On September 19, a strike of 35 spoolers of the Dominion Textile Company took place at Montmorency Falls, Que., on account of dissatisfaction with the conditions of work. It was settled by negotiations between officers of the Textile Workers' Union, and the manager of the mill and work was resumed on September 23. The duty of the spoolers is to fill up spools with yarn from the bobbins, which they receive in boxes. The spoolers wanted 150 bobbins to the box. As it often happens that the bobbins are not full of yarn, it was agreed that the boxes should be measured by weight, instead of by the number of bobbins they contained and that a box of bobbins of one quality of yarn should weigh 26 pounds, and that boxes of other qualities should weigh 25½ pounds. The company at the same time conceded a demand for an increase in the wages of women workers in two other departments of the mill.

**Strike of Tailors at Kingston, Ont.**

On September 23, about 25 men and 50 women workers employed in 7 tailoring establishments declared a strike at Kingston, Ont., and continued out until the end of the month. On September 16, a committee representing the local union of Journeymen Tailors, to which the strikers belonged, had presented to their employers a new bill of prices, involving an increase in wages averaging about 15 per cent. An arrangement was then made for a joint meeting of committees representing both parties, but before taking up the new bill of prices at this meeting the employers produced a signed document that hereafter their work-rooms would be open shops, and that they would reserve the right to employ whom they pleased. The employees' committee then reported this document to their Union, and a strike was declared against the 'open shop'.

**Strike of Tunnel Men at Windsor, Ont.**

On September 5, about 50 tunnel men employed in digging a tunnel under the Detroit River at Windsor, Ont., in connection the Michigan Central Railway went on strike. It was reported that the men had been getting \$3.37 for an eight-hour day, but their wages were

reduced to \$3. The men then asked for \$3.50 for an eight-hour day, and on being refused, they stopped work. No settlement of the dispute was reported during the month.

**Strike of Tinsmiths at Calgary, Alta.**

On September 2, about 40 tinsmiths employed on municipal work, declared a strike pending the adjustment of their wages scale. On September 10 work was resumed, an increase of 2½ cents an hour being conceded to them.

**Strike of Carpenters at Regina, Sask.**

On September 23, about 40 carpenters employed by 5 firms declared a strike at Regina, Sask., on account of the refusal of the employers to grant a demand for recognition of their union, and the employment of none but union foremen. No settlement of this dispute was reported during the month. The other building firms of Regina. to the number of 13, conceded the demand of their men without a strike.

The table published herewith is a compilation of the trade disputes of the Dominion of Canada, which began or were in continuance during the month of September and which have been reported to the Department:

### FAIR WAGES SCHEDULES IN GOVERNMENT CONTRACTS AWARDED DURING SEPTEMBER, 1907.

The following is a list of contracts awarded by the Department of Railways and Canals and the Department of Public Works, Canada, which have received the signatures of both parties, together with the fair wages schedule inserted in each contract, setting forth the minimum rate of wages to be paid to the labourers engaged upon the work. A statement of orders for supplies given by the Post Office Department is added.

**Department of Public Works.**

**E**XTENSION to the shore from breakwater at Petit Rocher, N.B., name of contractor, S. McGregor, Dalhousie, N.B.; date of contract, September 4, 1907; amount of contract, \$23,150.

**FAIR WAGES SCHEDULE.**

Trade or Class of Labour.	Rate of Wages, Per Day of 10 Hours, Not less than:
Contractor's foreman carpenter.....	\$2.00

Making and repairing rubber dating stamps and type; also other stamps.....	40.31
Supplying stamping material and repairing stamping pads.....	737.10
Making and repairing post office scales.....	435.50
Supplying Mail Bags.....	99.35
Repairing Mail Bags.....	1,087.60
Making and repairing mail locks and supplying mail bag fittings.....	11.05
Supplying street letter boxes and repairing portable letter boxes, railway mail clerks' tin travelling boxes and parcel receptacles	315.21
Making and repairing miscellaneous articles of Postal Stores.....	9.70
Making up and supplying articles of official uniform.....	1,426.20

## REPORTS OF DEPARTMENTS AND BUREAUS.

The following reports of departments and bureaus were received at the Department of Labour during September, 1907.

## DOMINION REPORTS.

## Old Age Annuities.

Speeches delivered in the Senate of Canada, during the Third Session of the Tenth Parliament, 6-7 Edward VII, 1906-7. Ottawa King's Printer, 1907. Pages 86.

A parliamentary paper has been issued containing speeches on the subject of old age annuities delivered in the Dominion Senate during the last session of parliament, on the occasion of motions for documents relating to old age pensions and of the presentation of a draft bill on this subject by the Right Hon. Sir Richard Cartwright, Minister of Trade and Commerce. The paper contains a copy of this bill and speeches by the Right Hon. Sir Richard Cartwright, the Hon. James McMullen, the Hon. Geo. W. Ross, the Hon. D. Ferguson and the Hon. Michael Sullivan. In the course of the discussion, much information was brought to light with regard to old age pensions and annuities in Canada, Great

Britain, Germany and other countries, and with regard to conditions prevailing among the poorer classes, who are the intended beneficiaries of such schemes.\*

## Inland Revenues of Canada.

Report returns and statistics of the Inland Revenues of Dominion of Canada for the nine months ended March, 31, 1907. Part 1, Excise etc. Ottawa: King's Printer, 1907. Pages, 209. Price 15 cents.

The report of the Deputy Minister of Inland Revenue states that the total inland revenue collected during the 9 months ended March 31, 1907, amounted to \$12,096,930. The excise duties came to \$11,930,153, the principal items being \$5,807,742 for spirits, \$4,065,129 for tobacco, \$1,042,881 for malt, and \$912,758 for cigars. The revenue derived from weights and measures, gas and law stamps, amounted to \$94,123 and from methylated spirits, \$42,665. In comparison with previous fiscal years, a marked increase in inland revenue is shown, the amount collected for the twelve months ended June 30, 1906, being \$14,435,642.

\* A statement concerning this discussion was published in the April number of the *Labour Gazette* on page 1061

## Canal Statistics.

Department of Railways and canals. Canal Statistics for the Season of Navigation, 1906. Ottawa: King's Printer, 1907. Pages 196. Price 10 cents.

The report on canal statistics of Canada for 1906 contains comparative figures since 1887. In this period, the total freight passing through the canals has increased from 2,720,516 to 10,523,185 tons. The number of Canadian vessels using the canals increased from 18,991 in 1887 to 25,498, and the number of United States vessels from 3,883 to 7,319. The Canadian vessels represented a tonnage of 5,526,321, and the United States vessels a tonnage of 5,683,315. With regard to the kinds of commodities taken through the canals in 1906, there were carried 2,970,637 tons of iron ore, 1,804,974 tons of coal, and 1,406,741 tons of wheat, the wheat tonnage representing about 46,891,367 bushels.

## ONTARIO REPORTS.

## The Dairying Industry.

Annual Reports of the Dairymen's Association of the Province of Ontario, 1906. Toronto: King's Printer, 1907. Pages 176.

The reports of the Dairymen's Associations of Ontario for 1906 contain the speeches and discussions at the annual meetings of the Eastern and Western Associations, and reports of the three dairy schools of the province at Guelph, Kingston and Strathroy. In the address of Mr. D. Derbyshire, M. P., President of the Dairymen's Association for Eastern Ontario, at the annual meeting held in Ottawa on January 9, 10 and 11, 1907, a number of statistics were given relating to the dairying industry in Ontario during 1906. It was stated that not quite so much milk was produced as in 1905, on account of shortage of pastures, but about 100,000 more cheese was made. About 180,000 fewer packages of butter were exported, but with the high prices obtained, the value of cheese, butter and bacon exported in 1906 was estimated at about \$46,500,000, which, added to the value of dairy produce consumed at home, amounting to \$54,500,000, made a total of \$101,000,000, which is \$6,000,000 more than for the year 1905.

## Vital Statistics of Ontario.

The Sanitary Journal of the Provincial Board of Health of Ontario. Parts III and IV of the 25th Annual Report, 1906. Toronto King's Printer, 1907. Pages, 84.

The sanitary Journal comprising Parts III and IV of the 25th annual report of the Provincial Board of Health of Ontario, contains reports on the water supply and sewerage system of many towns and villages of the province, including Peterborough, Cobalt, Bracebridge, Haileybury, New Lisgad, Port Elgin, and Gravenhurst. There are also given the new regulations for the sanitary control of lumber, mining and other camps, sawmills and other industries in the unorganized districts, which were approved of by the Lieutenant-Governor-in-Council on September 7, 1906. A review of the vital statistics for 1904 shows that the death rate for the province in that year was 14.1 per thousand of the population, as compared with 13.40 in 1903 and 12.60 in 1902. Out of a total of 30,920 deaths in 1904, there were 2,877 caused by tuberculosis, 608 by diphtheria and croup, 482 by typhoid fever, and 331 by influenza. Compared with 1903 there was a reduction in the number of deaths from scarlet fever from 580 to 163, accounted for by the better enforcement of the regulations of the Board of Health. Only 3 persons died from smallpox during the year. There was an increase of 97 in the number of deaths from cancer the mortality having been 1,253.

## BRITISH REPORT.

## Railway Accidents.

General Report to the Board of Trade upon the Accidents that have occurred on the Railways of the United Kingdom during the year 1906. London: Wyman & Sons, 1907. Pages, 69. Price, 7d.

The report on railway accidents in Great Britain and Ireland during 1906 shows a large increase in the number of persons killed and injured compared with previous years. Within the year 1,169 persons were killed and 7,212 were injured by accidents due to the running of trains or the movement of railway vehicles, while the average figures for the previous ten years were 1,144 and 6,631 respectively. More

passengers were killed in this way than in any year since 1889, but 56 out of a total of 58 deaths were attributable to three accidents. There were 13 railway servants killed and 140 injured by train accidents, the corresponding averages for the previous 30 years having been 12 and 127 respectively. The proportion of casualties to railway men in 1906, to the total number exposed to danger was 1 in 71, compared with the proportion of 1 in 81 for 1905. Only 5 out of every hundred of these casualties in 1906 were due to preventable causes, 57 having been due to misadventure, 32 to want of caution or misconduct on the part of the injured persons and 6 to want of caution or breach of rules on the part of other servants. The increase in the number of accidents reported is attributed to the exceptional activity in traffic, and to the increased vigilance on the part of railway companies in reporting accidents in response to a circular letter addressed to them by the Board of Trade with reference to this matter.

### AUSTRALIAN REPORT.

#### Industrial Conditions in New South Wales

New South Wales Department of Labour and Industry. Report on the Working of the Factories and Shops Act: Early Closing Acts: Shearers' Accommodation Act etc. during the year 1906. Sydney, N.S.W. Government Printer, 1907. Pages 50.

The Report on Factories and Shops of New South Wales for 1906, indicates a condition of great industrial prosperity throughout that State. The total number of factory hands increased from 55,705 in 1905, to 61,321 in 1906, the number of factories from 1,555 to 1,692 and the horse-power of machinery used from 33,415½ to 40,150¼. The prosperous condition of the country was attributed to a large increase in the wool-clip an enormous wheat yield, and an increase in the output of minerals, combined with the high prices prevailing for these products.

### NEW ZEALAND REPORT.

#### Workers' Dwellings.

Report on Worker's Dwellings by the Hon. the Minister of Labour, Wellington, New Zealand: Government Printer: 1907. Pages, 6.

A Report of the Advisory Board acting under the Workers' Dwellings Act of

New Zealand for the financial year ending March 31, 1907, states that £31,286 were expended in acquiring land and erecting dwellings upon it for workpeople during the year. There were built 71 dwellings, of which 52 were leased to March 31. The monthly rent of the leased dwellings reached a total of £112, 1s. 8d., and there were no arrears of rent. Photographs of several of these homes are given, the rent for which ranges from £2, to £2, 5s. 5d per month.

### UNITED STATES REPORT.

#### Employment of Women.

Department of Commerce and Labour. Bureau of the Census. Statistics of Women at Work, Washington: Government Printing Office, 1907. Pages, 399.

A Report on women workers in the United States, based on unpublished information derived from the schedules of the census of 1900, has been issued by the United States Bureau of the Census. In that year there were 4,833,630 women 16 years of age and over engaged in gainful occupations in continental United States, out of a total number of 23,485,559 women, the proportion of breadwinners among women being 20.6 per cent, or about 1 in 5. With regard to their occupations servants and waitresses comprised 1,165,561 of the total number, 456,405 were agricultural labourers, 338,144 were dressmakers, 328,935 were laundersses, and 327,206 were teachers and professors in colleges, etc. There were 307,306 classed as farmers, planters and overseers, making with the agricultural labourers a total of 763,711 women engaged in work on farms and ranches. Nearly four-fifths of the agricultural labourers are negro, Indian and Mongolian women.

#### Industrial Conditions in Massachusetts.

Thirty-seventh Annual Report of the Bureau of Statistics of Labour of Massachusetts, for the Year 1906. Boston State Printers, 1907. Pages 664.

In addition to the subjects annually dealt with in the Reports of the Massachusetts Bureau of Statistics of Labour, relating to Statistics of Manufactures, Labour Laws, and Labour and Industrial Chronology, the Report for 1906 contains also chapters on the Apprenticeship System, trained and sup-

plemental Employees for Domestic Service, and the Incorporation of Trade Unions. With regard to the apprenticeship system, replies were received from 58 employers and 104 trade union officials. The chapter dealing with trained and supplemental employees for domestic service, embodies the results of an investigation conducted by the Domestic Reform League of Massachusetts, which distributed 5,000 question blanks relating to this subject, and received 260 replies. In investigation the question of the incorporation of trade unions, opinions were sought from employers of labour, officials of trade unions, members of the legal profession and public individuals.

#### Co-operation in Iowa.

A widespread and successful movement in the direction of co-operation among farmers in the marketing of produce and the purchasing of supplies was begun about five years ago in the State of Iowa and has since made rapid progress, especially during the past two years. About two and a half years ago there was in existence some 15 co-operative associations in the state. About that time the Farmers' Grain Dealers' Association was formed. At the present time there are 175 associations in the state with a total membership of 25,000, each association averaging \$1,000,000 of capital. It is estimated that the grain grower has been benefitted to the extent of from three to five cents per bushel in localities where the experiment has been tried. An association, for example, organized at Gowrie, Iowa, five years ago with 87 members, capitalized at \$25,000 of which \$4,500 was paid up, has since paid one dividend of 100 per cent and has now a surplus of \$8,000. During the four years business amounting to \$325,000 was done at a total expenditure of \$3,160 or less than one per cent. The organization has undertaken to correct some pieces of legislation, but its main work has been in the application of practical business methods on a co-operative basis.

#### OTHER REPORTS RECEIVED.

*Canada.*—Report of the Surveyor General of Dominion Lands for the year ending June 30, 1906.

Report of the Royal Commission on dispute respecting hours of employment between the Bell Telephone Company of Canada, Ltd. and operators at Toronto, Ont.

## RECENT LEGAL DECISIONS AFFECTING LABOUR.

The following synopsis of recent cases affecting labour are based upon the latest reports of legal proceedings and other legal records of the different Provinces of Canada.

### ONTARIO CASES.

#### Workmen's Compensation.

The plaintiff's husband was killed while performing his duties as night watchman in defendant's factory at Yarker, Ont. His duties were to clean up the factory and keep up steam in the boiler to supply a dry kiln, and have the required pressure to operate the factory at 7 o'clock in the morning. The pump for supplying the boiler was usually operated by electric power, but this became inoperative, hence the necessity to put the engine in operation in order to supply water for the boiler. By starting the engine the whole shafting and machinery directly connected was put in motion. Among the different machines directly connected with the shafting was an auger, projecting about eight inches from frame of machine, operating in a horizontal position, and used for boring out hubs. It was at this place that plaintiff's husband met his death. When found, the evidence indicated that he had stooped to pick up a bar which he had used for the purpose of throwing off the belts which were directly connected. The auger caught in the back of his smock or overshirt, and wound him up, either causing strangulation or breaking his neck, the latter not being fully proven.

The case was taken under the Workman's Compensation Act, which provides for an allowance of \$1,500. After hearing the addresses of counsel, the judge explained to the jury the meaning of the law as to what might be considered the duty of employers in guarding

dangerous parts, also the duty of employees in taking proper precautions to protect themselves, and clearly explained what might be termed ordinary care and extraordinary care, and how it applied. The jury returned a verdict holding that the machine was not sufficiently protected. The judge awarded plaintiff \$1,200 and costs.

Carl v.s. Benjamine Manufacturing Co., of Yarker, Ont., High Court of Justice, Napanee, Ont.; April 3, 1907; Clute, J.

#### Violation of Bake Shops' Act.

On February 25th, 1907, a complaint was laid by a Provincial Factories' Inspector against six Jewish bakers in the city of Toronto for employing and suffering their employees to work more than twelve hours out of twenty-four hours or more than sixty hours per week, contrary to the provisions of section 39 of the Bake Shops' Act. The case came before Magistrate Kingsford, at Toronto, on February 28th and was remanded to March 6th, again to 11th, and again to 18th, when one offender was fined \$50.00 and costs, and a fine of \$20.00, and costs were ordered in each of the other cases.

#### Sunday Labour.

At Niagara Falls, Ont., a number of proprietors of souvenir stores were convicted of employing labour, and their clerks of selling goods, on Sunday contrary to the provisions of the Lord's Day Act, and all were fined by the police magistrate.

#### Sanitary Condition of Shops.

At Port Perry, June 14th, before Magistrate Ingram, a Provincial Factory Inspector laid a complaint against the owner and the tenant of premises occupied as a store and tailor shop, the former for not providing separate lava-

ories as provided by section 13, of the Shops' Act and section 15 of the Factories' Act, and the latter for not keeping the same in sanitary condition as provided by section 13 of the Shops' Act and section 16 of the Factories' Act. The magistrate gave the defendants 10 days in which to comply with the law and ordered them to pay the costs incurred.

#### Action Settled Out of Court

An action of Arthur Bates, fifteen years of age, by Effie Bates, his next friend, against The Jas. Smart Mfg. Co., Ltd., for damages sustained while in the employ of the defendant company, owing to the fall of an elevator, was settled by the company paying the plaintiff \$750.00 in full of his claim.

#### Action for Damages Dismissed.

Action was brought to recover damages for shock and severe burns occasioned to plaintiff by accidentally touching an iron spike driven into an electric light pole belonging to defendants about six feet from the ground, which spike was used to attach a chain for lowering and raising the lamp. Held, upon the evidence, that defendants were not guilty of any negligence. The defendants constructed and are operating the municipal lighting system under the authority of legislative enactment, and in the absence of negligence are not insurers against accidents. Not only did plaintiff fail to prove default, but the evidence offered by defendants shows that they complied with the law. Action dismissed with costs, if costs are insisted upon by defendants.

(Prue v.s. Town of Brockville, Ont.; Trial Court, Toronto, Ont.; Teetzel J.)

# THE LABOUR GAZETTE

NOVEMBER, 1907.

## INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF OCTOBER, 1907.

### I.—GENERAL SUMMARY.

THE market for labour was less active in October than in September. Compared with the corresponding period of 1906, also, the amount of general employment was less, though no surplus of labour was reported. Favourable weather conditions prevailed for threshing and marketing in Western Canada, and work in this connection was unusually prolonged; in Quebec and the Eastern Provinces some damage was caused to the late grain and root crops through the excessive rainfall. The agricultural yield will be less than that of 1906, but the exceptionally high prices are expected to equalize the monetary returns for the two seasons. There was a falling off in the activity of building, owing largely to continued stringency in the money market. The cessation of civic improvement work and other outside employment also placed a number of men upon the market. For all of these, however, ready employment was available in the railway construction camps, which were short of men, and which promised active operations throughout the winter. There was also a marked scarcity of men for work in the winter lumber camps of Ontario and Quebec. The mining industry continued very active throughout Canada, the labour shortage which prevailed during September in the coal mines having been relieved in Nova Scotia by the return of harvesters from Western Canada, and in British

Columbia by the lessening of activity in the lumber mills and camps. In manufacturing, conditions were somewhat less active. The volume of general freight in transit was unprecedentedly heavy.

#### Changes in Wages and Hours of Labour.

The following is a statement by industries and groups of trades of the more important changes in wages and hours of labour, information concerning which was received at the Department of Labour during October.

*Lumbering.*—In connection with the engaging of men for the winter camps in Ontario and Quebec, wages were about \$5.00 per month higher than in October, 1906. In New Brunswick the rate offered was somewhat lower than that of last year.

*Clothing.*—At Windsor, 60 journeymen tailors had their wages increased 5%.

*Printing.* — About 30 bookbinders and paper cutters at Winnipeg, Man., were granted a reduction in hours from 53 to 48 per week.

*Railway Service.*—An increase of 14½% all round was granted to the C. P. R. Company's Telegraphers as the result of the arbitration of a dispute between the employees and the Company, referred under the Industrial Disputes Investigation Act. About 2,500 men were affected, and the aggregate increase is estimated to amount to \$189,000

annually. An annual holiday was granted, and double time allowed for Sunday labour\*.

The following schedule was obtained by blacksmiths in the employ of the C. P. R. Company.

In Winnipeg and the Eastern district . . . . .	42c. per hour.
Central district . . . . .	46c. "
Western district . . . . .	43½c. "

Helpers will receive 25c in Winnipeg and in the Eastern district, 27c in the middle district, and 26c in the Western. Previously the rates were 35c for blacksmiths at Winnipeg, 35c in the middle district, 38c at Vancouver and 38½c in the mountain section. The increase granted to the helpers amounts to 3½c all round. The increase was dated from September 1st.

*General transport.*—Locks tenders on the Welland Canal received an increase.

### Cost of Living

A number of important commodities were exceptionally high in price throughout October. The wheat market was uncertain, several advances and declines being reported; on the whole the level was considerably higher than last month, the price passing \$1.00 per bushel. Oats and other grains were also very high, and hay reached the highest price in several years past. Farm produce of all kinds, including butter, milk and eggs, were on an unusually high level for the time of year. Following the advance in wheat, flour increased considerably in price; a grade which sold at \$4.30 in May last has been increased to \$5.75. Bread advanced in a large number of localities. Oatmeal and other cereal foods also showed an advance. The advance in raw materials used by confectioners, including sugar, chocolate, glucose, nuts, and vanilla beans had a disturbing effect on the manufacture of confectionery. Canned goods advanced as follows to the retailers: Tomatoes 7½c per dozen; corn, 2½c per dozen; fruits, from 2c to 45c per dozen. A scarcity of coal was reported in several

points in the Maritime Provinces, with prices advancing. Fuel prices were upward in Ontario. Copper has declined considerably during the past few weeks, and zinc, tin and spelter have followed. Iron and lead have been firm. The scarcity of feed in the farmers' hands induced heavy marketing of live stock, with the result that meats at some points were lower in price. Canadian distillers have advanced the price of product, owing to the increased cost of grain, labour, building material and other elements in manufacture.

### Interruptions to Industry.

The number of trade disputes in existence during October was 4 less than in the previous month, but there was an increase of approximately 1,450 in the number of working days lost. Compared with October, 1906, there was an increase of 10 in the number of trade disputes, but a decrease of about 24,570 in the number of working days lost.

Among industrial establishments, etc., destroyed by fire or through other causes during October, the following as reported in the press of the Dominion, may be mentioned:—

*Nova Scotia.*—Business block at Amherst, loss, \$25,000.

During October heavy gales occurred on the Atlantic coast and in the interior of Nova Scotia doing much damage to orchards and shipping.

*New Brunswick.*—Intercolonial Railway freight shed at Campbellton, loss, \$8,000; lumber mill at Deer Lake, loss, \$15,000; business block at Edmundston, loss, \$35,000; large boarding house at Moncton; saw and grist mill at St. Martin's, loss, \$10,000; factory at Sackville, loss, \$3,000; storehouse at Sussex, loss, \$3,000.

Barns at Sackville.

*Quebec.*—Stables and outbuildings at Chelsea, loss, \$15,000; grocery store at Montreal; hotel at Montreal, loss, \$2,000; lumber mill at Courcelle, loss, \$10,000; store at Delorimier, loss, \$1,000; theatre at Montreal, loss, \$2,000; large store of soft coal at Montreal; customs' warehouse at Montreal, loss, \$50,000; crockery warehouse at Quebec, loss, \$25,000; blacksmiths' shop at Ste. Agathe de Lotbinière; lumber mill at St. Tite; school house at South Montreal; hotel at Three Rivers, loss, \$1,200; church at Ville St. Paul, loss, \$90,000. Axe handle factory at Hull, loss, \$7,000.

Barns at St. Chrysostôme, Granby and Beauport.

*Ontario.*—Bakery at Athens; business block at Belleville, loss, \$40,000; car barns and 2 cars at Berlin, loss, \$8,000; theatre at Chatham, loss, \$1,800; planing mill, lumber yard and tenements at Dovercourt, loss, \$57,000; store at Flesherton, loss, \$2,000; evaporator at Foxboro, loss, \$2,500; co-operative store at Hamilton, loss, \$15,000; facing mill at Hamilton, loss, \$3,000; warehouse at Kincardine; lumber mill at Lindsay, loss, \$5,000; town hall at Meaford, loss, \$1,500; woollen mill at Orangeville, loss, \$3,000; torpedo factory at Petrolia; store at Peterborough, loss, \$2,000; carriage works at

\* A special article dealing with the award of the Board of Conciliation and Investigation is published elsewhere in the present issue.

Ridgetown, loss, \$1,000; clothing store and stock at Sault Ste. Marie, loss, \$6,000; hotel, blacksmith's shop and implement store at South Woodslee, loss, \$10,000; feather and down warehouse at Toronto, loss, \$1,200; tailor shop at Toronto, loss, \$1,200; blowing down of portion of exhibition buildings at Toronto, loss, \$40,000; freight sheds at Toronto, loss, \$6,000; brass works at Toronto, loss, \$2,300; 11 tenement houses at Toronto; theatre at Toronto, loss, \$2,000; ice house at Toronto, loss, \$4,000; hotel at Toronto, loss, \$6,000; planing mill at Waterloo; lumber mill at West Lorne.

Barns at Brantford, Ellice, Ingersoll, Patterson and West Zorra, Ancaster, Bayswater.

*Manitoba.*—Elevator and three car-loads of wheat at Arrow River; sewing machine warehouse at Brandon, loss, \$10,000; elevator at Carberry, loss, \$10,000; elevator at LaSalle; elevator and 23,000 bushels of wheat at Lytleton; paint and glass warehouse at Winnipeg, loss, \$170,000; storehouse at Winnipeg, loss, \$4,000.

*Saskatchewan.*—Prairie fires near Halerite caused considerable damage to farmers in that vicinity.

*Alberta.*—Post-office, stores and theatre at Edmonton; implement warehouse at Sedgewick, loss, \$6,000.

*British Columbia.*—Ranch buildings, equipment and farm implements at Phoenix, loss, \$20,000.

### Conditions in the Industries and Trades.

Conditions of employment during October in the several industries and trades throughout Canada, as indicated by the reports of correspondents to the Labour Gazette, and by information received at the Department from other sources, may be briefly summarized as follows:—

#### Agriculture.

Weather conditions during October were unfavourable in Quebec and the Maritime Provinces, with the result that considerable damage to the root and other late crops, especially potatoes, was reported, and poor progress made with fall ploughing. In Ontario, also, the rainfall was heavy, and some damage was done by early frosts. In western Canada, however, excellent weather prevailed for threshing and ploughing, the former being completed in many sections by the third week of the month. Returns show a considerable amount of damaged wheat. The marketing of produce was very active throughout Canada owing to the exceptionally high prices for grain, fodder, vegetables, dairy produce, etc., It is expected that the monetary return from this year's western crop, notwithstanding the diminished yield, will be little behind that of 1906. Final statistics with regard to the crop were impossible to obtain until the completion of threshing

and marketing, but it was estimated that the wheat yield would be between 50,000,000 and 60,000,000 bushels, with a considerable quantity available in addition for fodder.

In Ontario a diminution in feed stuffs was reported, especially in the eastern portion of the province. The corn crop was estimated at about 70 per cent., with roots up to the average. Surplus stock was being unloaded. In Quebec there has been a falling off in the grain yield and in cattle shipments. Country merchants as a result reported decreased sales. In Prince Edward Island the crop returns have been very favourable, and prices were firm.

The recent rains have improved the outlook for fruit, especially for winter apples. In Nova Scotia a windstorm on October 10 caused some damage, but shipments up to the middle of the month were exceptionally heavy. (\*) Frost caused damage to grapes in the Niagara peninsula; but on the occasion of the half yearly settlement day in that district, which occurred on October 1, payments were exceptionally satisfactory. The month was favourable for vegetables in Ontario.

It is expected that the exports of Canadian cheese during 1907, as compared with 1906, will show a falling off of about \$2,500,000. In British Columbia the creameries and cheese factories have had a successful year. There are at present 19 co-operative and other establishments of this nature in this province.

#### Fishing.

Good catches of cod were reported by the Nova Scotia fishing fleets, though rough weather and dog-fish interfered with the coastwise fisheries. The reduction works at Canso were in active operation. The bankers continued to report good fares. The catch of oysters was unfavourably affected by weather conditions, but the price was about two dollars per barrel more than last year. About 200 boats are employed in this fishery in Prince Edward Island. Good

\* See report of Halifax correspondent.

TABLE SHOWING STATE OF EMPLOYMENT IN 1

This table is based largely on the reports of the correspondents of the *Gazette* as published in the present issue several trades and industries throughout the Dominion. This table has reference only to the amount of employment headings in the *Gazette*. In tabulating the information in question the terms employed are divided into two groups, the busy, very busy, (2) quiet, dull, very dull.

catches of sardines and gaspereaux were made by New Brunswick fishermen. It is estimated that the fisheries of New Brunswick give employment at present to upwards of 20,000 persons; representing an invested capital of \$2,250,000 and earning between \$4,000,000 and \$5,000,000 annually, chiefly from the Gulf of St. Lawrence fisheries, which include 94 lobster canneries and 250 fishing vessels. Excellent results were reported from Caraquet, N. B., where demonstrations under the auspices of the Department of Marine and Fisheries, Canada, in the Scotch method of curing herring, have been in progress. Landings of fresh fish at Halifax were somewhat light owing to unsettled weather conditions.

On the Fraser river a few cohoes were taken, for which 20 cents per fish was paid. The herring season had not begun up to the closing week of the month. It was reported from Victoria, B. C., that the sealing catch of the present season will be only one-third that of last year, 15 schooners taking about 3,500 skins, in addition to 38 sea otter skins(\*)

The Commissioners appointed by the Dominion Government to investigate the fisheries of Western Ontario have completed their inquiries in Georgian Bay waters, and held sittings during September and October at various points along the north shore of Lake Erie. Information with regard to the past and present supply of fish in Lake Erie, the extent and effects of United States poaching, the relative effects of pound nets and gill nets, closed seasons, fish hacheries, etc., was obtained from fishermen at Windsor, Chatham, Port Stanley and other points. It was stated that whereas twenty years ago sturgeon were very abundant, and could be bought for 50 cents per cart load, the fish at present brings 25 cents per lb. White fish and lake herring have seriously declined, blue pike or pickerel being now the principal fish taken.

#### Lumbering.

Saw-mills continued very busy throughout Ontario, Quebec and the

Maritime Provinces. In the Ottawa Valley, the improvement in the water supply assisted manufacturing. Shipments were active with stocks light, though the market was somewhat easier. Owing to the successful nature of the drives the supply of logs is sufficient to ensure activity until the close of the season. There was a scarcity of men for employment in the lumber camps during the coming winter. A pronounced advance in the cost of logging in the Ottawa Valley was reported, lumbermen estimating that it will cost more to operate the shanties during the coming winter than in any previous year, labour being 20 per cent. higher, hay 40 per cent. higher, oats 30 per cent. higher and flour and meat 20 per cent. higher than last year, while extra cost in hauling is yearly entailed from the fact that lumbermen have to go further each year for their logs. On the whole it is estimated that the coming winter's cut will cost 25 per cent. more than last year. Jobbers operating with small gangs have advanced rates 20%.

In British Columbia logging operations decreased in activity, and the mills also lessened their output. A number of men previously employed in the camps found work at railway construction and about the mines and smelters. The reason advanced for the decline was the decreased demand from the prairie provinces, the stringency of the money market having curtailed building operations. A revival was expected with the completion of harvesting and threshing. There was a surplus of logs in the British Columbia market, though a demand continued for first-class timber. At a meeting of the British Columbia Lumber and Shingle Manufacturers' Association it was decided to close down all shingle mills on November 1, for an indefinite period. The reason assigned was the falling off in orders from the northwest provinces and the high price of raw material, the latter ranging from \$5.50 to \$6.00 per cord. The revenue derived from timber in British Columbia during the fiscal year ended June 30, 1907, amounted to \$1,261,220, the highest on record.

\*See report of Victoria correspondent.

**Mining.**

The Nova Scotia collieries were working to full capacity and large outputs were reported from every district, with the exception of Springhill, where labour disturbances continued. There was a demand for loaders and other unskilled help at some of the collieries, though the supply was more abundant than in the preceding month. It is not expected that total shipments will equal those of 1906 owing to the late opening of the season of navigation. In Quebec the asbestos mines were operated to their fullest capacity and men were in demand; but in the mica mining districts employment was less active than in the preceding month owing to unsettled market conditions. Operations in eastern Ontario and at Cobalt, Ont., were about the same as in September.

A proposal was made looking to the establishment of a 1,400-ton smelter by Moose Mountain, Limited, at Toronto, Ont., in return for a site of 350 acres, to

utilize the ore bodies in Moose Mountain, Ont., to be tapped by the Canadian Northern Railway. The establishment as proposed would involve the ultimate employment of 15,000 men.

The first shipment of pig iron from the Atikokan Iron Company's works at Port Arthur, Ont., was made on October 9.

The month was very active in the coal mines of British Columbia, the supply of labour having been more abundant and market conditions continuing very favourable.

At the annual meeting of the Granby Consolidated Mining, Smelting and Power Company, Limited, it was reported that the production of bullion during the year ended June 30th, 1907, was smaller than that of the preceding year, owing largely to the fuel shortage, but that the profits of the Company were somewhat larger. The following table shows the output of the Company during the past three years:—

Commodity.	1907.	1906.	1905.
Copper (lbs.).....	16,410,576	19,939,004	14,237,622
Silver (ozs.).....	257,278	316,947	212,180
Gold.....	35,083	50,020	42,884
Total amount realized.....	\$4,521,549	\$4,751,059	\$2,740,145
Charges of all kinds.....	\$2,673,529	\$2,927,422	\$2,036,496
Net profits.....	\$1,924,937	\$1,823,617	712,640
Granby ore smelted (tons).....	649,022	796,188	550,738
Foreign ore smelted (tons).....	16,393	36,158	30,382
Mine development (Lineal feet).....	9,701	8,698	5,200
Diamond drilling (Lineal feet).....	9,279	11,505	3,148
New construction.....	\$317,677	\$105,975	\$343,974
New mining properties.....	\$68,164	\$350,485	\$142,603
Cash and copper on hand.....	\$853,280	\$1,023,833	\$584,113

Under Chapter 73 of the Statutes of British Columbia for 1901, an agreement exists between the Crows Nest Pass Coal Company and His Majesty the King represented by the Chief Commissioner of Mines and Works for the Province, for the purpose of securing for the smelters and refiners in the counties of Yale and Kootenay, B. C., an adequate and sufficient supply of coal and coke. Representations having been recently made to the Government regarding a shortage of coke at the smelters in question, an investigation was con-

ducted by the Deputy Minister of Mines in order to ascertain whether or not the shortage existed. A confidential report was later submitted to the Government by the Deputy Minister of Mines. It was decided by the government to submit the question of the coke shortage to arbitration. The supply of coke, however, having been much better maintained in October than previously, further action in the matter was delayed.

**Manufacturing.**

Manufacturing establishments were less active than in the earlier part of the

season, though several branches continued very busy and a large number of additions to plants were under way. Rubber factories, in particular, continued busy, and as a rule heavy lines of manufactured goods were moving freely.

A deputation representing the pulp and paper section of the Canadian Manufacturers' Association had an interview with the Right Honourable the Prime Minister during October.

At the annual general meeting of the Ogilvy Flour Mills Company, net profits amounting to \$630,685.57 were declared, from which \$239,000 were transferred to rest account. The results for the year were stated to have been very gratifying, the milling business having had the benefit of favourable world's market conditions. The estimate made of the present year's wheat crop was from 60,000,000 to 65,000,000 bushels of all grades. The total daily capacity of the several mills is 16,300 barrels, with a terminal elevator capacity of 2,300,000 bushels. The total wheat storage capacity of the company's elevators in Manitoba and the North West is 3,005,000 bushels. The total flour storage capacity of the Company is 302,000 barrels.

The Lake of the Woods Milling Co., also reported the most successful year in its history, net profits amounting to \$618,473 compared with \$375,152 of the previous year.

At the annual meeting of the shareholders of the Dominion Iron and Steel Company, total earnings for the year of \$2,247,536 were reported, the net earnings being \$1,563,151. It was stated that from November, 1906, to February, 1907, aggregate earnings fell off about \$250,000 per month, as compared with the average of the preceding months of 1906, as a result of the disturbance and partial stoppage of operations by interruption in the coal supply. During the year, \$306,355 were spent on capital account, the chief items being a bessemer plant, the extension of coke ovens, new rolling stock, etc. The opinion was expressed that the Company must ultimately own or control its own coal mines. The total claim for damages

against the Dominion Coal Company was stated to be \$1,796,640.

A new edition of the Canadian Textile Directory was recently issued. Comparing it with the Textile Directory of 1899 the following development in the Canadian Textile trades is indicated:—

	1899.	1907.
Felt hat factories.....	13	21
Cloth cap factories.....	22	21
Straw hat factories.....	10	9

#### Railway Construction.

The railway construction camps reported a very busy month, with men in active demand throughout Canada. With the completion of harvesting and other out-door work, the supply was increased, though there was still a scarcity at many points in the closing week of the month. Lack of ties was also causing some delay in western Canada.

It was stated that work on the various sections of the National Transcontinental Railway would be pushed vigorously during the coming winter, and that staffs would be continuously employed. It was estimated that about 18,000 men were at work on this line between Winnipeg and Moncton at wages of from \$2.00 to \$2.25 per day for unskilled labour, and from \$2.75 to \$3.00 per day for experienced men. The monthly pay roll on these sections alone, is at present about \$1,000,000. On the sections of the Grand Trunk Pacific west of Winnipeg about 20,000 men were employed. About 123 miles of the road, from Portage la Prairie to Miniota, Man., has been completed for traffic, and an additional 100 miles will soon be ready. The cost of the prairie sections, owing to the increase in wages and the enhanced price of supplies is estimated at between \$23,000 and \$24,000 per mile, though originally estimated to cost about \$13,000 per mile. On the line between Saskatoon and Edmonton, Alta., the grading was being pushed and the greater part of the distance was ready for the ties.

Construction operations on the In-

ternational Railway in New Brunswick were somewhat delayed by the heavy rainfall, and by a scarcity of labour. About 900 men have been employed at this work at wages ranging from \$1.75 to \$2.00 per day, construction being carried on at both ends from Campbellton to St. Leonards. It was stated that work on the construction of the section of the National Transcontinental line out of Moncton would be begun at once, the equipment and material having been assembled during October.

A portion of the eastern division of the transcontinental Railway, covering a distance of 150 miles, from a point near Abitibi River, was sublet recently to the J. H. Reynolds Construction Company with head-quarters at McDougall's Chutes, Ont.

The Governor-General in Council approved, during October, the recommendation of the Commissioners of the Transcontinental Railway awarding a contract to the Dominion Iron and Steel Company for 44,000.2 gross tons of steel rails, and to the Algoma Steel Company for 21,371 gross tons of steel rails for delivery as follows:—

DOMINION IRON & STEEL COMPANY, Limited,

CONTRACT FOR

44,000.2 Gross Tons:				
3,771.4 tons	f. o. b. cars	Moncton, N. B.	\$35.85	November 1, 1907.
3,771.4 "	"	Edmundston, N. B.	37.60	" "
1,885.7 "	"	Quebec & Lake St. John Railway dock, Quebec.	35.00	" "
10,685.7 "	"	I. C. R. dock, Levis.	35.00	" "
4,023 "	"	f. o. b. cars Moncton, N. B.	35.85	July 1, 1908.
4,777 "	"	" Edmundston, N. B.	37.60	" "
8,800 "	"	I. C. R. dock, Levis.	35.00	" "
6,286 "	"	Quebec & Lake St. John Railway dock, Quebec.	35.00	September 1, 1908.

ALGOMA STEEL COMPANY, Limited.

21,371 Gross Tons @ \$40.00 per Gross Ton:			
10,686 tons	f. o. b. cars	Junction of T. & N. O. R'y & Transcontinental R'y in vicinity of Lake Abitibi.	November 1, 1908.
10,685 tons	f. o. b. cars	Junction of T. & N. O. R'y & Transcontinental R'y in vicinity of Lake Abitibi.	July 1, 1908.

The C. P. R. Company has had 747 miles of railway under construction west of Lake Superior, two thirds of the grading of which has been completed and 270 miles of track laying done. About 200 miles of the double track between Winnipeg and Fort William is now available for use.

The bridge erected by the Provincial Government at Saskatoon, Saskatchewan, was formally opened by His Honour the Lieutenant Governor of Saskatchewan on October 10. The bridge is the longest at present in the Province of Saskatchewan, being 800 feet in length. It was erected at a cost of \$110,000.

Railway construction operations will be extensive in British Columbia during 1903. In addition to the projected line of the Transcontinental Railway, extensions by the Canadian Pacific Railway Company are proposed on Vancouver Island, while the British Columbia Electric Railway Company will expend \$1,250,000 on improvements.

### General Transport.

Transportation employees of all classes had a busy month, and the earnings of railway companies were exceptionally high. There was a demand for railway employees of different classes. The amount of general freight moving was very heavy, though grain shipments were of considerably less volume than at the corresponding period of 1906. According to returns received by the Department of Trade and Commerce grain shipments by vessels from Fort William and Port Arthur during the present season of navigation show a considerable decrease as compared with the past year. From April 29 to August 31, 1907, a total of 26,599,686 bushels of wheat were forwarded. The total number of cars of grain inspected at Winnipeg was 6,356 less during the past six months than last year.

As a result of the late harvest and consequent delay in the movement of grain only 1,381 carloads were carried to Lake Superior by the C. P. R. during September, as compared with 4,898 carloads in September 1906.

Some shortage of cars was reported at points in the province of Ontario. It was stated, however, that railway conditions in the North West Provinces had greatly improved as compared with the corresponding period of 1906, and that no difficulty in handling the grain traffic was expected during the balance of the year. (\*)

Under date of October 8th a circular communication was addressed by the Board of Railway Commissioners for Canada to the various Railway Companies, calling the attention of the com-

panies to the fact that numerous defects in the equipment of safety appliances used on trains had been reported by the Board's Inspector, over 30% of the cars and engines recently inspected, numbering well into the thousands, having been found with defective safety appliances. Defective air brakes were found to be especially common. The attention of the companies was directed to this condition of affairs, with the request that the necessary improvements be made within a reasonable time.

Superintendents, trainmasters, chief dispatchers and yardmasters of the Grand Trunk Railway System have been instructed as to the necessity for giving and insisting upon proper rest for train and enginemen; when these employees have been on duty upward of sixteen hours they must be required on arrival at terminal to take eight hours rest before being again called for duty.

Port returns at Montreal and other Canadian ports showed a heavy volume of business. Returns of traffic through the Lachine Canal during September, showed a heavy increase in all departments over the returns for September 1906, especially in the amount of grain handled. Returns from the Sault Ste. Marie Canal for September were as follows:—

	U. S. Canal.	Canadian Canal.	Total.
<i>Freight:</i>			
East bound, net tons	4,950,629	2,002,380	6,953,009
West bound, net tons.	1,127,432	452,265	1,579,697
Total, net tons. . . . .	6,078,061	2,454,645	8,532,706
Vessel passages, No. . . . .	2,029	893	2,922
Registered tonnage net	4,691,504	1,794,629	6,486,133

Street Railway earnings continued to show heavy increases compared with the corresponding months of 1906. For example, the British Columbia Electric Railway reported gross earnings of \$151,340 for July, 1907, compared with \$103,013 for July, 1906. The Montreal Street Railway Company reported total earnings of \$329,755 in August, 1907, compared with \$300,278 in August 1906. The Toronto Railway Company's earn-

\* For statement with reference to the investigation of Board of Railway Commissioners in this connection see under heading "Notes" below.

ings were \$319,797 in August, 1907, against \$275,836 in August, 1906, while for the eight months ended August 31 the total increase amounted to \$233,720 over the corresponding period of 1906.

The report of the Grand Trunk Railway for the half year ending June 30, 1907, showed gross receipts of £3,381,259, an increase of £359,578. Working expenses were £2,436,544, an increase of £301,723, leaving net traffic receipts of £894,716, an increase of £59,855. Including interest on bonds the total net receipts were £1,025,793, an increase of £80,925. Passengers carried numbered 4,936,000, an increase of 319,000. The total freight hauled amounted to 8,510,000 tons, an increase of 912,000 tons. The increase in expenditure was attributed to the rise in wages and the difficulty of keeping men in the Company's employ. It was decided to inaugurate a pension fund for the benefit of employees.

In the address of the President of the C. P. R. Company on the occasion of the presentation of the twenty-sixth annual report, it was stated that by the end of the present season 361 miles of canals and ditches will have been completed in Western Canada, sufficient to give water to approximately 210,000 acres out of a total of 350,000 acres to be served in that section, and that the ultimate cost of the work, will be in the neighborhood of \$6.50 per acre. There are now in the service of the Company 74,000 officers and employees, with a monthly pay roll of \$3,700,000, which on an ordinary basis of five persons to a family would represent a population of 350,000 souls. The total assets of the Company were estimated at \$200,000,000.

The use of lignite on locomotives in Western Canada was forbidden by order of the Railway Commission on October 1st.

The Arbitration Board appointed to settle differences between the Grand Trunk Railway Company and the Intercolonial Railway with regard to certain traffic agreements rendered its award during October in favour of the Intercolonial Railway. The effect of the

award is that traffic for Intercolonial points originating on the Grand Trunk system west of Montreal must be forwarded via Montreal and the Intercolonial Railway, thus causing an increase of business on the latter system.

### The Trades.

*Building.*—There was a decrease in the amount of employment, both as compared with September, 1907, and the corresponding period of 1906. Good progress was made with the several contracts under way, but the amount of new business in sight was considerably less than October, 1906. The classes chiefly affected were bricklayers, masons, stonecutters and other outside workmen; carpenters, plumbers, etc., being for the most part very busy on inside work. The prevailing stringency in the money market was regarded as the chief cause of the decline in activity. There was a large movement in structural steel, brick, stone, cement, lumber and other building material, as is usual at this time of the year, though the movement was not as heavy as at the corresponding period of 1906.

*Metal, engineering and shipbuilding.*—The several branches had a busy month, iron and steel workers, electrical workers and linemen, and employees in shipyards being particularly active.

*Woodworking and furnishing.*—Active employment continued among woodworkers, carriage and waggon makers, coopers, etc. Sash and door factories were less active than in the earlier months of the season.

*Printing.*—The month was less active in a few localities, but in the larger centres employment continued exceptionally busy, with men in many cases in demand.

*Clothing.*—Journeymen tailors were busy on fall orders, and garment workers were well employed. Boot and shoe workers continued somewhat quiet.

*Leather.*—Owing to the continued weakness in the market for hides, tanners and carriers were meeting only the requirements of the trade. Trunk, bag and harness makers, and novelty workers were busy.

*Food and tobacco preparation.*—With the advent of cool weather, trade among bakers showed an improvement. Confectioners were well employed, many factories working overtime in preparation for the fall and holiday trade. Cigarmakers and tobacco workers had a good month.

*Miscellaneous.*—A fair month was reported among barbers, hotel and restaurant employees, clerks, stenographers, etc. In Western Canada there was the usual autumn surplus of workmen seeking light employment.

*Unskilled labour.*—The month was less active than September and in some of the cities there was a surplus of labour, owing to the cessation of civic improvements, building and other outside employment. This however, was largely absorbed by the demand for additional men to work on railway construction, in the lumber camps and in coal mining throughout Canada.

#### Canadian Trade and Revenue.

*Foreign trade.*—During September, 1907, the total value of imports entered for consumption was \$28,747,392, compared with \$28,296,614 in September, 1906. Total domestic exports during September, 1907, amounted to \$25,703,586, compared with \$21,337,915 in September, 1906. Increases in exports during the month took place under the heading of The Mine, The Fisheries, The Forest, Agriculture and Manufactures, while under the heading of Animals and Their Produce a decrease occurred.

*Imperial trade.*—According to reports received from commercial agents at the Department of Trade and Commerce, Canada, there is a good outlook at Leeds and Hull, Eng., for Canadian turkeys and chickens for the holiday trade, and for Canadian tool handles and apples. Canadian pears, properly packed, are in demand at Bristol, Eng. A good opening for Canadian clothing and textiles was reported in Australasia.

*Domestic trade.*—There was a good tone in general trade, though wholesale trade was characterized by caution, especially in connection with orders from western Canada. The movement of winter dry-

goods was heavy. Hardware merchants also had an active month's business. Groceries were active. The money stringency, however, tended to curtail trade in several lines. Canadian securities were on a lower level than for some months past.

The annual report of the Molson's Bank showed net profits for the year ending September 30, 1907, of \$571,026, an increase of \$136,358 compared with the preceding year.

*Canadian revenue.*—Total revenue on Consolidated Fund during October was \$8,223,071.80 and \$58,257,779.88 during the seven months ended October 31, 1907. Expenditures on capital account totalled \$3,092,931.93 for the month and \$13,107,834.38 for the seven months period.

#### Notes.

The ninth annual convention of the *Canadian Wholesale Hardware Association* was held at Montreal, Que.

The annual meeting of the Province of *Quebec Postmasters' Association* was held in Sherbrooke on the 18th October. About 25 members were present.

The fifth annual meeting of the *Maritime Funeral Directors' Association* was held at Charlottetown.

A commission appointed by the Government of Saskatchewan to report concerning the *organization of municipalities*, issued its report on October 1st.

The annual *assessment returns* of several of the cities for 1908 show a substantial growth in population and valuations during the past year.\*

Schools of *domestic economy* under the auspices of the *Fédération Nationale St. Jean Baptiste* were opened at Montreal, Que., during October.

A deputation from the city of Toronto waited on the Right Honourable the Prime Minister during October and requested the appointment of a commission to assist in promoting *technical education* in Canada.

The commission appointed by the Government of Nova Scotia to inquire into the question of *old age pensions* for

\* See reports of Montreal, Brantford, Woodstock and Hamilton and other correspondents.

workmen employed in the mines of that province held sessions for the taking of evidence during October at Sydney Mines, Glace Bay, Springhill and other points.

During October, a circular was sent out by the executive of the Trades and Labour Congress of Canada to the various unions affiliated with the Congress, requesting an assessment of ten cents on each member for the purpose of raising a fund to enable the Congress to send a representative to Great Britain for the purpose of disseminating information with regard to *conditions in the labour market in Canada*.

A true bill was returned by the grand jury at the Hamilton assizes on October 11th in the matter of the indictment of the *Wholesale Grocers' Guild* of Canada, for combination in restraint of trade. An extended review of the case and of the nature of the charge was given in the address of Chief Justice Falconbridge to the grand jury on this occasion\*\*. The trial will be proceeded with in January, 1908.

The first annual meeting of the *Rational Sunday League* was held at Toronto. Resolutions were passed favouring the repeal of the clauses of the Lord's Day Act passed in 1906 forbidding the opening of public galleries, museums, art galleries and other institutions on Sunday; obstructing transportation, mercantile and manufacturing interests; restricting the running of street cars; and forbidding the charging of a fee for admission to entertainments on Sundays.

During the past year the following clause has been inserted in all contracts awarded by the Government of the Province of Alberta:—

"It is distinctly understood that the contractors have accepted this contract upon the understanding that they will pay the labourers, workmen and mechanics employed by them the current wages of such labourers, workmen and mechanics in the locality where they are employed."

Previous to the adoption of this clause, little work was carried on by contract by the Government of Alberta.

A report was received on October 14 from an officer of the Board of Railway Commissioners dealing with the question

of the *coal supply* in Western Canada. It was stated that a shortage of cars for the moving of coal prevailed during April, May, June and July of the present year, as a result of the severe winter, the strike in the coal mines, and the work of moving the grain crops. By the middle of August, however, the shortage was overcome, and more cars were on hand than were needed. On August 2, there was in store at prairie towns west of Winnipeg over 25,000 tons of coal for domestic use, exclusive of that delivered to consumers, and more was coming in. The railway companies had large quantities of steam coal in stock at different points. The mines were reported to have been hampered by a scarcity of labour. No shortage of cars for hauling coal was expected during the balance of the season.

The 11th annual report of the *Free Municipal Labour Bureau* of the city of Montreal, was submitted to the members of the financial committee under date of November 2. The report showed that during the year ended October 31, 1907, a total of 2,032 situations were obtained as follows:—

Labourers, 633; male cooks, 68; masons, 2; carpenters and joiners, 64; stable and yard men, 47; bottle washers, 8; carters and coachmen, 55; kitchen helpers, 129; firemen, 14; clerks, 13; servant girls, 29; riveters, 30; scrubwomen, 69; waiters, 54; rock drillers, 27; chambermaids, 2; printers, 61; nurses, 3; farm labourers, 355; tinsmiths and roofers, 4; factory employees, 22; door keepers, 2; housekeepers, 3; office clerks, 3; apprentices, 5; female cooks, 15; blacksmiths, 6; railway labourers, 105; agent, 1; upholsterers, 5; dining room girls, 11; sewing girls, 3; painters, 19; electricians, 7; pressmen, 4; bakers, 4; laundry employee, 1; barbers, 2; gardener, 9; storekeepers, 2; elevator conductor, 1; polisher, 1; plumbers, 3; office boy, 1; butcher, 1; machinist, 1; pastry cook, 1; piano player, 1; harness maker, 1; sick nurse, 1; bushmen, 118; steam fitter, 1.

The above situations were obtained gratuitously, no fees, either directly or indirectly, being charged to employers or employees.

At the semi-annual meeting of the *Workmen's Store Company, Limited*, (co-operative) of Dominion, C. B., held on September 30, total receipts for the half year, amounting to \$29,400.67, were reported, with a total expenditure of \$28,833.96. The expense account amounted to \$2,676.25. The assets of the company were estimated at \$17,239.96, and the liabilities at \$14,837.17. The business of the company for the past 4½ years was set forth as follows:—

\*\* For a reference to previous proceedings against the guild, see the *Labour Gazette*, Volume VI, pages 785, 910, 1023, 1149, 1190.

Sales by Years.	Division of Profits.				Rate of dividend on members' payments.	
	Profits.	Reserve.	Interest.	Dividend.

Total.....	\$177,439.81	\$18,441.27	\$1,844.40	\$1,623.92	\$14,623.30	

Under date of October 21, an application was received from the Grand Trunk Railway Company of Canada for an order under the Railway Act permitting that company, its servants, workmen and agents, in order to prevent undue delay to traffic, to do, on any Sunday, work incidental to the continuance to its destination of freight in transit at the beginning of such Sunday, notwithstanding that the cars containing such freight, and forming part of any train so in transit, may not have a common destination, but may require to be switched, shunted, or otherwise dealt with at railway yards, divisional or other points, for the purpose of being sent on to their several destinations. Also for an order permitting the said company to do such work upon any Sunday as may be necessary for the purpose of furnishing to persons engaged in any manufacturing or other industry, or to shippers of live stock, a continuous railway service, without which such persons would be unduly hampered and delayed in their business. And for such further order as to the Board may seem

meet upon the evidence to be adduced before them as hereinafter stated. This is the first application of the kind that the Board has received, and the matter has not yet received its consideration.\*

At the annual convention of the Fishermen's Union of Nova Scotia, held at Halifax, N. S., Sept. 27 and 28, the following resolution was passed:—

"Whereas the conference of the Maritime Board of Trade held at St. John adopted a resolution favouring the appointment of a Fishery Board on the same lines at that of Scotland, for the purpose of directing and controlling the fishing industry of the Maritime Provinces;

"And whereas a pamphlet has been issued setting forth the object of said Board and outlining some of the methods contemplated with express intention of obtaining the concurrence of the Dominion and Local Governments;

And whereas, after carefully considering the proposition in all its aspects, we are convinced that a Board so constituted and so conducted would not prove beneficial to the fishermen or the fisheries at large;

"Therefore resolved, that this station recommend that the Fishermen's Union of Nova Scotia ask the Dominion and Local Governments to proceed with due caution in dealing with this question and to secure by all practical means full information upon the question before any decision is reached."

\* See statement under heading of "Recent Legal Decisions affecting Labour" in the present issue.

## II. REPORTS OF LOCAL CORRESPONDENTS.

**D**URING the month of October, Mr. R. F. Gofton was appointed correspondent to the *Labour Gazette* for Berlin, Ont., and district, in the place of Mr. H. Peters, resigned.

### SYDNEY, N. S., AND DISTRICT.

*Mr. John Moffatt, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions during October were active. All the larger industries con-

tinued busy, including the railways, foundries, factories and other works of the district.

Both the Sydney and Sydney Mines steel works had a brisk month. Steel products were in great demand.

The coal companies whose markets lie along the St. Lawrence are doing their utmost to fill their contracts before the shipping season closes. Some of the companies are behind in deliveries and only under the most favourable conditions will the Montreal district receive its full quota. Every mine on

the Island of Cape Breton was working steadily to supply the demands of the trade. The outlook is that the output of the year will fall below that of 1906. The short shipping season, with the Springhill strike, have operated against the expected gains.

Shipping was brisk, and rail transportation heavy. The building trades were active. The wholesale and retail trades did a good business.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The grain and root crops were a good average, but the weather was very unfavourable. Much of the hay on the marshes throughout the Province could not be cut owing to wet weather, water covering nearly all the low lying parts. The quality of the potato crop on low ground has been much reduced by the same conditions.

*Lumbering.*—Provided weather conditions are favourable, the lumber trade of the coming winter will equal last winter's, spruce deals excepted. The price of the latter has fallen within the past month, and lumbermen have decided to refrain from putting more of them on the market until prices improve.

*Fishing.*—Fishermen reported good catches throughout the fall, many of them carrying the largest loads in years.

*Railway construction.*—A contract for building seven miles of railway connecting the new Dominion collieries at Lingan with the Sydney and Louisburg Railway at the head of Grand Lake has been let. Men are busily employed on the railway, as well as developing the new colliery. A second colliery will be opened in the Lingan or Victoria district early in the spring.

*Mining.*—The North Atlantic Coal Company is rapidly developing its areas at Port Morien.

The output of the Dominion collieries for September was 323,733 tons against 333,779 tons in September, 1906. The Hub mine, which was in operation last year, is not producing coal at present, owing, it is said, to labour conditions at Dominion No. 6; the company will erect a number of houses and put in a double track around the collieries. The output

of the collieries of the Nova Scotia Steel Company for September was 49,000 tons, a slight decrease on the output of the previous month. Sydney No. 4 is the new colliery, from which, as yet, no coal has been shipped. Work on the short railway spur connecting the colliery with the main line is well ahead, and the line will be ready as soon as there is any material output from the colliery. Mabon mine will be developed during the winter with the view of a good output next summer. A new slope is being driven at the Joggins. When completed, all the output will be drawn from this source.

#### CONDITION OF PARTICULAR TRADES.

The several skilled trades were active, with unskilled labour in keen demand.

#### WESTVILLE, N. S., AND DISTRICT.

*Mr. Tom Hale, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

All classes were fully employed, with a demand at many places, especially at the collieries, for more men. The collieries in this district, while maintaining their average output, find it difficult to keep up with the demand. The strike at Springhill, has caused the loss of a large output of coal to the province and country, which is by no means well stocked with fuel for the coming winter.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers reported good grain and root crops, with good prices prevailing. On Oct. 21st, however, the district was visited with one of the worst snowstorms that ever occurred in October. Some farmers were caught with part of their late grain out, and many with their potatoes and fruit ungarnered. Milk vendors have advanced the price of milk one cent per quart.

*Lumbering.*—Quietness prevailed.

*Manufacturing.*—Business was good.

*Mining.*—The output at the Drummond colliery for the month of September was: Coal, 23,064 tons; coke, 622 tons; fireclay, 634 tons; fire brick, 115,000. The pay sheet for the month was a little over \$38,000. At the Acadia collieries the output was well up to the usual. The trouble caused by the boys at the Acadia collieries, Westville, refusing to go to work because the company would not agree stop work at 2 p. m. on Saturdays, terminated, after a strike of three days, by the boys going back to work without gaining their point. The Allen shafts are making headway in development work under and above ground. Leading places in the mine are going on double shifts, the coal proving of excellent quality. Overground, the large steel bankhead is nearing completion.

*Other industries.*—The town water extension is now completed. The men are at present employed putting in connections for house services and extending the water limits.

#### HALIFAX, N. S., AND DISTRICT.

*Mr. A. J. Smith, correspondent,* reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

There has been marked activity in the labour market during the past month. Work on the arena, the Silliker car works, and the new round house was being pushed. Business was good for the season. There are over 1,000,000 feet of lumber in the new arena, the largest amount of lumber ever put into one building in Nova Scotia. The large hard pine sticks, 50 feet long, have arrived and are placed in position.

The announcement that local technical schools will open in November has caused much satisfaction.

The condition of the wholesale and retail trades has been up to the standard. The only unrest in the labour field was a strike of boilermakers.

##### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The crops will be good. Of the apple crop, the president of the

Nova Scotia Fruit Growers' Association made the following statement:—

Nova Scotia will export from 400,000 to 500,000 barrels of apples of good quality, varieties about as follows:—

85,000	Gravensteins.
90,000	Ribston Pippin.
70,000	King.
70,000	Baldwin.
50,000	Gold Russet.
60,000	Nonpareil.
50,000	other varieties.

Owing to a heavy gale on October 10th, which shook about 50,000 bbls. off the trees, the quality, quantity and price will be reduced.

*Fishing.*—This industry was fairly active.

*Lumbering, manufacturing and mining.*—Conditions were normal.

##### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons had a good month. Carpenters and joiners were well employed. Lathers and plasterers were busy, but painters, except those employed on inside work, were not active. Plumbers, gas and steamfitters were normally employed, with stonecutters and builders' labourers fairly active.

*Metal.*—There was not much change in conditions.

*Woodworking and furnishing.*—Conditions were normal.

*Printing and allied.*—Printers and bookbinders were busy.

*Clothing.*—Journeymen tailors and garment makers had a fair month.

*Leather.*—These trades were fairly active.

*Miscellaneous.*—Barbers, clerks, delivery employees, hotel and laundry workers were very busy.

*Transport.*—All branches were busy.

*Unskilled labour* maintained its activity when weather conditions permitted.

#### AMHERST, N. S., AND DISTRICT.

*Mr. A. D. Ross, correspondent,* reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

During October there was abundant employment for all classes of labour in

Amherst and vicinity. Building operations were very brisk, and the season will be satisfactory. The Amherst Boot and Shoe Company is erecting a large three story brick structure as an addition to its present large quarters. It will give room for about 200 additional hands. In the various large industries of the town the outlook for the coming winter is entirely satisfactory. The collieries throughout the province have absorbed a large number of the men on strike at Springhill. With the approach of cold weather, the scarcity of coal is being felt severely. Building operations in Amherst this season did not equal those of last year, largely owing to the fact that money could not be secured on mortgage, notwithstanding this fact, however, the amount spent will probably total over \$300,000. The new buildings include two banks, rolling mills, two large brick blocks, a brick extension to the Amherst Boot and Shoe Company's premises, an enamelling plant, an extension to the Malleable Iron Company's works and about forty dwellings. Men were scarce during the summer months, but the supply and demand are now about balanced.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—October witnessed the close of one of the most unfavourable seasons to agriculture in the history of this province. In the first place the hay crop was light, being probably only about 85 per cent. of the average crop. Heavy rains set in during the haying season, and have continued with brief intervals ever since, resulting in the loss of thousands of tons of hay and grain. The potato crop suffered also from the continued wet weather, and in this immediate vicinity the chances are that the crop will only average about 50 per cent. Considering the high prices that already prevail the outlook from a consumer's standpoint is unsatisfactory.

*Lumbering.*—The shipping season has practically closed. The shipments were well up to the average, large quantities being shipped to the European market. The cut for this coming winter promises to be light, as the small operators consider it unprofitable to go into camp.

*Manufacturing.*—All industries, including woollen mills, rolling mills, car shops, foundries and machine shops, boot and shoe factory, etc., were busily employed.

*Mining.*—The Springhill strike is still unsettled, but the smaller collieries were actively engaged with a growing output. The supply of coal is decidedly short; prices have advanced and a further increase is anticipated before the winter is over. The price of coal in a district adjoining half a dozen collieries, is regarded as too high, considering the cost of production.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—All lines were actively employed. Masons and bricklayers especially were in demand.

*Metal.*—Metal workers reported an active and prosperous month.

*Woodworking.*—Business was brisk.

*Clothing.*—Tailors were fairly busy. Boot and shoe makers were in demand.

*Printing.*—Printers were very busy.

*Unskilled labour*—There has been a great demand for unskilled labour until the present time. From now until spring, however, the present supply will suffice.

#### DISTRICT NOTES.

The power (electric) being furnished by the Maritime Railway Power Company to the Amherst industries is giving great satisfaction. The power is generated by waste coal from the mouth of the mine, and transmitted to Amherst, a distance of 8 miles. This is the first plant of its kind to be established in North America.

#### CHARLOTTETOWN, P. E. I., AND DISTRICT.

*Mr. F. J. Nash, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during October differed very

little from September, supply and demand being well balanced. Wet weather during part of the month interfered somewhat with outside operations, but at the close finer weather prevailed and outside work was progressing well. The building of the new works for the Prince Edward Island Railway, and the new railway wharf, furnished employment for a large number of men. At Souris and Summerside, there is a considerable amount of work for the Dominion Government going on. Owing to the late harvest, potato shipping had hardly started at the beginning of the last week of the month. Wholesale and retail dealers reported a good trade, comparing favourably with conditions last year.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—At the close of the month a considerable quantity of potatoes had yet to be dug throughout the province, and a number of fields of grain were still in stook in certain sections where the land is low, as the unusually heavy rainfall during October had made the harvest very backward. The season opens with high prices for all kinds of produce. Oats, of which there was an abundant crop on this Island, are quoted at 50 cents, a remarkably high price for the opening of the season. Farmers were somewhat handicapped by the scarcity of labour, but the return from the West of a large number who went on the harvest excursions, will relieve the situation in a measure.

*Fishing.*—The stormy weather of the first part of the month interfered considerably with the catch of oysters, but the price this year is about \$2.00 per barrel more than last season, being the highest in the history of the Island. Over two hundred boats are employed in this industry, and some men make as high as \$50.00 per week. With the exception of a little cod, oysters were the only fish taken during the month.

*Manufacturing.*—The few factories were conducted under normal conditions, supply and demand being about equal.

*Railroad construction and employment.*—The new car works and shops of the Prince Edward Island Railway, are now

in course of erection, and several other minor works have been begun on different parts of the line. The supply of labour in this department is scarcely equal to the demand, and advertisements for men are still in the papers.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons were active. Carpenters and joiners were busy. Lathers and plasterers, painters, plumbers, gas and steamfitters, stonecutters and builders' labourers, were active.

*Metal, engineering and shipbuilding.*—Iron moulders, iron workers and helpers, machinists and engineers were busy. Steam engineers, electrical workers, linemen, blacksmiths and sheet metal workers were active.

*Woodworking.*—Woodworkers, upholsterers, carriage and wagon makers, car makers and coopers were active.

*Printing.*—Printers and bookbinders were busy.

*Clothing.*—Journeymen tailors, garment workers, boot and shoe workers were active.

*Food and tobacco preparations.*—Bakers and confectioners, butchers and tobacco workers were active.

*Leather.*—Tanners, curriers and saddlers were active.

*Miscellaneous.*—Barbers, clerks, hotel employees and laundry workers were active.

*Transport.*—Railroad conductors, locomotive engineers, firemen, railroad telegraphers, train men, switch men, freight handlers, steamboat men, longshoremen, teamsters and expressmen were active.

*Unskilled labour.*—There was a good demand for men.

#### DISTRICT NOTES.

The following is a conservative estimate of the value of farm crops in Prince Edward Island for the present year:—

Wheat.....	\$ 650,000
Barley.....	125,000
Oats.....	4,000,000
Mixed grain.....	250,000
Buckwheat.....	25,000
Potatoes.....	600,000
Root crops.....	600,000
Hay.....	2,000,000

Total..... \$8,250,000

If to this be added the value of the dairy products and of the 20,000 lambs that will be exported this year, the total value of the farm crops for this year at the prices farmers are receiving at the present time for these crops is fully eight and three-quarter millions of dollars; or if the present population of the Island be 100,000, \$87.50 for every man, woman, and child, or \$437.50 for every family of five in this province.

### MONCTON, N. B., AND DISTRICT.

*Mr. J. C. Graves, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

October produced no changes in the condition of the labour market from the preceding month. Artizans and labourers of all kinds were in good demand and found ready and steady employment. Farmers, painters and the employees on the sewers, water-mains and foundations of the I. C. R. shops were seriously handicapped by the continuous wet weather. Building operations were rapidly forwarded in view of the near approach of cold weather and the demand for carpenters, masons and builders' labourers was much greater than the supply. The number of buildings erected in the city and suburbs is much in excess of previous years. The Massey-Harris Block and the fire station are nearing completion, and though much retarded by the wet weather good progress has been made in the construction of the I. C. R. shops. Reductions will be made in the staff, but it is intended to keep a considerable number of men at inside work during the winter. In the foundry, machine shops, and in fact all other local industries active conditions prevailed. The cotton factory operated by the Dominion Textile Co. reported a good season's work and with sufficient orders ahead to assure plenty of work throughout the winter. The payroll with 237 operatives amounts to about \$2,800.00 fortnightly. Sixty hours con-

stitutes a week, eleven for the first five days and five hours on Saturday. An increase of 10 per cent. in wages affecting the whole staff came into effect early in the season. Relations between operatives and management appear satisfactory and about fifteen additional weavers could be placed.

Merchants reported wholesale trade good, and retail trade active. Houses are scarce, and rents high. Real estate is active and firm. There were no change in wages or hours of labour, and no labour disputes.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers have been very busy under exceedingly trying conditions harvesting their marsh hay, grain and potatoes. Never in the history of this section has the harvesting season been so prolonged. Considerable hay will not be cut, grain was harvested in poor condition, and the potato crop which, particularly upon low grounds, was much affected by rot, suffered further loss by the exceptionally heavy frost of the 20th inst. Produce commanded a high figure. Hay was quoted at \$16 to \$18 per ton, oats 60 cents per bushel, pork 9 cents per carcass; butter is exceedingly scarce, also eggs. The former retails at from 27 cents to 30 cents per pound, and the latter at 28 cents per dozen.

*Railway construction.*—The contractors plant for the construction of the 50 mile Section of the G. T. P. west from Moncton has arrived. It consists of 7 locomotives, 164 dump cars, a steam shovel and other material. Ground will be broken at once. The company brought its own drivers and shovel hands, but requires about 150 workmen for whom \$1.75 per day is offered. Work will be continued throughout the winter. The contractor for the double tracking of the I. C. R. from Moncton to Pajasec, owing to difficulty in securing labour and the excessive amount of rain this fall, have temporarily suspended work.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers were busy, and carpenters and joiners very active.

Plasterers, painters, stone cutters and builders' labourers were very busy.

*Metal, engineering and shipbuilding.*—Iron moulders, iron workers and helpers were busy. Machinists, engineers and linemen were active. Stove mounters, boilermakers and blacksmiths were very busy.

*Woodworking and furnishing.*—All classes of woodworkers were very busy.

*Printing and allied.*—Printers, pressmen and book binders were all very busy.

*Clothing.*—Journeymen tailors were active and garment workers very busy.

*Food and tobacco preparation.*—Bakers and butchers were very active.

*Leather.*—Tanners and curriers were busy, with leather workers and harness makers active.

*Transport.*—Railway crews were active, and freight handlers very busy. Carters, teamsters, and express men were well employed.

*Unskilled labour.*—For this class the demand was greater than the supply. Wages were \$1.50 to \$1.75 per day.

## ST. JOHN, N. B., AND DISTRICT.

*Mr. W. H. Coates, correspondent,* reported as follows:—

### GENERAL CONDITION OF THE LABOUR MARKET.

The labour market continued active during October, all trades being well employed. Unskilled labour was in great demand, the St. John Street Railway Company offering \$2 per night for men to work at double tracking. The St. John iron works received an order for machinery from Sweden during the month. A new pulp digester of the latest pattern was added to the Partington plant.

The St. John County Teachers' Institute held a two days' session, October 10-11, when the following resolution was unanimously adopted:—

RESOLVED: It is desirable in the interests of the public schools of this province that a system of pensions for aged or disabled teachers be established and maintained by the provincial government at the earliest possible date, and it is the opinion of this Institute that such a system can be more economically and efficiently administered by the government through the Board of Education than by any other agency.

Bank clearings for the four weeks ending October 24 were \$5,077,685, and for the corresponding period last year \$5,037,992, being \$39,693 greater in 1907 than in 1906, and \$1,486,956 less than for the five weeks ending Sept. 26 of the current year.

The prices of various staples continue to increase, flour being nearly \$2 per barrel higher than last year. Creamery butter is selling for 37 cents per lb., while market and tub butter fetches from 30 to 33 cents. Fresh eggs are selling at 35 to 40 cents per dozen. During the past year, Manitoba flour has advanced \$1.60 per barrel, being now quoted at \$6.95 and Ontario patents have shown an advance of \$1.65, with a present quotation of \$6.10 per barrel. Oatmeal has advanced from \$4.90 to \$6.90. Condensed milk has increased 5 per cent. Cornmeal has increased from \$2.60 to \$3.60 per barrel. Barley is quoted at \$5.25 per barrel, an increase of 75 cents over last year, while beans have advanced 70 cents on the bushel, and split peas 50 cents. The price of Canadian starches has become 10 per cent. greater during the year, and the lower grades of tea are now from 70 per cent. to 80 per cent. higher than they were a year ago. Beginning with November 1st, 8 cents per quart will be charged for milk.

The I. C. R. freight handlers held a meeting October 13, and decided to send a petition to the railway department in the matter of wages. The directors of the St. John Street Railway Company have decided to give an increase to their employees, as follows: 16½ cents per hour for the first year's service; 17½ cents for the second year, and 19 cents for the third year and afterward. The men had petitioned for an increase.

According to the present schedule, there are twenty sailings of the mail steamers to St. John. The "Victorian" will make her first trip to St. John from Liverpool on November 22, and will leave St. John, December 6. The remainder of the service will be made up of the "Virginian," "Ionian," "Gram-pian," "Corsican" and "Tunisian."

### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Reports from Carleton

county state that the hay and oat crop is abundant, but owing to the lack of dry weather, wheat is not up to the average. Beans will yield fairly well, and buckwheat will be a good crop. Dealers predict high prices, \$8 being paid for loose hay and 40 cents a bushel for oats. The heavy frost of October 25 put an end to potato digging, and nearly 200,000 barrels are still in the ground. There will be a loss of \$200,000 to Carleton County farmers, as the price has advanced from 80 cents per barrel to \$1. At Florenceville, pressed hay sold at \$10.50 a ton, oats at 45 cents a bushel, and potatoes at \$1 per barrel. Ten years ago, hay sold at \$4 per ton, and oats at 18 cents per bushel.

*Fishing.*—Sardine herring fishing has been very good, and those already taken have been sold at \$3 per hogshead for lobster and haddock bait. About 3,500 barrels have already been caught. Large schools of gaspereaux have been netted on the Kennebecasis River.

*Mining.*—The directors of the Lepreau iron mines received and accepted the offer of the Dominion Iron and Steel Company to rent areas at Point Lepreau. The lease will be made for eighty years, and it is the intention of the new owners to begin prospecting at once. The Steel Company will pay 25 cents royalty on all iron taken out, and must work the mine continuously.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—The several branches were active.

*Metal.*—Iron moulders, iron workers and helpers were busy. Machinists and steam engineers were active. Electrical workers and linemen were busy, and blacksmiths active, boilermakers busy and sheet metal workers very busy.

*Woodworking.* — Woodworkers and shingle weavers were active.

*Printing and allied.*—Printers, pressmen and bookbinders were active.

*Clothing.* — Journeymen tailors were busy.

*Food and tobacco preparations.*—Bakers and confectioners were busy, with cigarmakers active.

*Miscellaneous.*—Broom and brush-makers were active.

*Transport.*—Railroad conductors, locomotive engineers and firemen, railroad telegraphers, trainmen, switchmen, trackmen and freight handlers, street railway employees, teamsters and expressmen were busy.

*Unskilled labour* was very busy.

#### DISTRICT NOTES.

*Arbuckle.*—D. Fraser & Sons have made arrangements with the C. P. R. to take over the plaster works.

*Aroostook Falls.*—The formal opening of the Maine and New Brunswick Light and Power Company took place October 17. The company has a plant of about 5,000 horse power, and intends supplying electric power to several towns in Maine, and to Perth and Andover in New Brunswick.

*Fredericton.*—The bakers of this city have increased the price of bread from 8 cents to 9 cents per 2 lb. loaf. The price of flour has gone up \$1.80 per barrel since last May, and lard has increased 4 cents per pound in the same period. Sugar, butter, eggs and fuel have also increased in price, and the bakers say they were compelled to raise the price.

*Sackville.*—The Electric Light Company is projecting a reconstruction of its plant, and will put in two new and powerful dynamos, which will raise the voltage from 220 to 2,200. The Sackville freestone quarry has enjoyed a season of exceptional prosperity.

#### QUEBEC, QUE., AND DISTRICT.

*Messrs. E. Little and P. J. Jobin, correspondents,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Wet weather in the early part of the month delayed outside operations, about six days being lost. Otherwise the month compared very favourably with September for all classes. The demand for labour continued active, especially for men to work in the lumber camps during the

coming winter. The wages offered ranged from \$30 to \$40 per month, or about \$5.00 higher than last year. This caused a scarcity of employees in the sawmills, which were still working to full capacity.

The price of bread was increased from 18 to 20 cents per six-pound loaf, on October 21. At a meeting of milkmen

held in the City Hall on October 28 it was decided that owing to the large increase in the price of fodder, the price of milk from November 1 would be 10 cents per quart. The following tables show the prices of hard and soft wood and breadstuffs in Quebec on October 12 and 26, 1907, respectively:—

## PRICES OF HARD AND SOFT WOODS.

Nature of—	Length	October 12	October 26
Maple.....	3 feet	\$7.50 per cord	\$7.50 per cord
".....	2½ "	5.50 "	6.50 "
Wild cherry.....	3 "	\$6.00 to 6.50 "	\$6.00 to 7.00 "
".....	2½ "	5.00 to 5.20 "	6.00 "
".....	2 "	4.50 "	5.00 "
Cypress.....	3 "	4.50 to 5.00 "	4.50 to 5.00 "
Birch.....	3 "	5.00 "	5.00 "
".....	2½ "	4.20 "	4.60 "
Tamarac.....	2½ "	4.50 "	4.50 "
".....	2 "	3.50 "	3.50 "
" red.....	3 "	5.50 "	5.50 "
" ".....	2½ "	4.50 "	4.50 "
Beech.....	3 "	5.00 "	5.00 "
".....	2½ "	4.50 "	4.80 "
Wild cherry slabs.....	3 "	5.50 "	6.00 "
Soft wood slabs.....	per load	1.50 to 1.75	1.50 to 1.75
" blocks.....	"	2.00 to 2.30	2.00 to 2.30

## PRICES OF BREADSTUFFS.

Nature of—	Quantity.	October 12.	October 26.
Flour, winter patent.....	per barrel	\$4.75-\$5.00	\$5.30-\$5.75
" Manitoba patent.....	"	6.00- 6.25	6.50- 6.75
" straight roller.....	"	4.50	4.75
" extra.....	"	4.25	4.50
" superfine.....	"	4.00	4.25
" baker's special.....	"	5.50- 5.80	5.90-6.00
" strong bakers'.....	per 98 lbs.	2.75- 2.80	2.80-2.90
" Ontario patent.....	"	2.40- 2.45	2.65-2.70
" straight roller.....	"	2.35	2.60
" extra.....	"	2.00	2.50
" superfine.....	"	1.90	2.25
" fine.....	"	1.75	2.00
" patent Hung.....	"	3.00	3.20

The *Keewatin* and *Assiniboia*, the two Canadian Pacific railway vessels intended for the traffic of the upper lakes, were successfully cut in two during the month and forwarded through the canals.

It is expected that the Canadian Northern Railway trains will enter Quebec before the end of the year.

The opening of the free night schools provided by the provincial government took place on October 7.

The Chateau Frontenac extension is under way, and considerable progress has been made in the work of laying the concrete foundation. The Dominion government is erecting a steel lighthouse on the breakwater, to replace the wooden structure at present in use there.

## CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers had an unfavourable month owing to wet weather and

early frosts. Great difficulty was experienced in saving the crop, and in some sections the loss has been considerable. Plowing is very backward.

*Railway construction.* — The Quebec Railway, Light and Power Company has finished building a new siding at Limoilou Junction, a short distance below the station on the river side of the track.

#### CONDITION OF PARTICULAR TRADES.

The *building* and *metal* trades were active, with some branches of the latter busy. The *printing* trades were busy, and *tailors* were very busy. *Boot* and *shoe workers* were dull. *Bakers*, *butchers* and *ice cutters* were quiet, as were also *hotel* and *restaurant employees*, *ship labourers* and *longshoremen*. *Railway employees* were active and *unskilled labour* was busy.

#### DISTRICT NOTES.

The contract for the construction of the new waterworks system which it is proposed to install in the parish of Notre Dame has been awarded by the council of that municipality. The contract calls for the completion of the work by the first of July, 1908.

#### SHERBROOKE, QUE., AND DISTRICT.

*Mr. H. Logie, correspondent*, reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

Labour generally was in good demand throughout October, and compares favourably with the previous month. There are several large business buildings yet in course of erection which will keep the building and allied trades employed well into the season. The machine shops and factories were running full time, especially the former, where night shifts were running. There was a good demand for skilled machinists, and also for help in the woollen and carpet

factories. The Mathieu Medicine Company of Sherbrooke has placed the contract for a large four storey building; work has been commenced on the E. & I. Fairbank's Shops; the Genest Block is about finished as is also the new four-storey cigar factory erected by W. R. Webster & Co. Work on the new hospital is still proceeding, and it will be some time yet before the carpenter work will commence. There are also several dwelling houses in course of erection. The City Council will proceed with the extension of the water works system as soon as certain expropriation proceedings for a piece of land held by the British American Land Company have been completed.

The City Council has made another offer to the Sherbrooke Power, Light and Heat Co. for its plant. The new offer is in effect \$85 in cash for each one hundred dollars (\$100) share, or \$95 in four per cent. city bonds for each \$100 share. This would mean \$185,000 cash or \$195,000 in bonds, besides assuming some \$80,000 in liabilities and bonds. This new offer was brought about by the stringency of the money market. It was thought better to raise the offer for a going concern to the figures mentioned, so that during the first year the profits from the plant would more than offset the increase in the amount offered to the Company. The Company will call a special meeting of the shareholders in January to decide the matter.

Wholesale and retail trades have been very active, and the labour market free from unrest.

##### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were busy with their fall work. The crops did not turn out as well as was anticipated in the earlier part of the season. The potato crop has been much affected by the wet weather, and as a result potatoes were selling in the local market at from 65 cents to 70 cents per bushel, and indications point to a still higher figure. The Sherbrooke Milkmen's Association, composed of farmers from the surrounding district, decided to raise the price of milk on the 1st of November to 7 cents

per quart. Formerly the winter price was 6c., and the summer price 5c. The Association claims that even at this price there is but a small margin of profit left. It is claimed that the feed bill has more than doubled during the past 9 years. The labour problem has been a serious one with the farmer, and especially with those who keep a dairy herd, as skilled men have to be employed at a high wage. Bran, which could be bought at \$9 a ton, now sells at \$28; middlings now sell at \$28, whereas 9 years ago, they could be bought at \$12. Oats have also doubled in price.

The immigration work in connection with the Eastern Townships closed at the end of the month of October. Up to the middle of the month the Township's representative at Quebec sent forward 528 immigrants from Quebec. He also engaged 224 men in England in the winter, so that he has sent a total of 753 to date for the year. Last year he directed 624 to the Townships, so that a total of 1376 Old Country immigrants have been placed here in the past two years. He has still on hand a number of applications which he could not fill, as he worked somewhat under a handicap, in that at Quebec, he cannot change the destination of those booked to Western points. In addition to this work, the St. Andrew's Society of Richmond County has placed 40 Scotch settlers in Richmond County.

*Lumbering.*—Men are now in demand to go to the lumber camps. There is a scarcity of such workers.

*Manufacturing.*—All the manufacturing industries were running full time, and reported plenty of work ahead.

The Peerless Jewellery Company, of Sherbrooke, which is a branch of a concern in Attleboro, Mass., is now running to full capacity; it has been decided to put on a night shift to keep up with the orders from the Canadian market.

The Modern Bedstead Co., which recently secured a bonus from the town of Cornwall, Ont., will shortly move to that town. The staff here has been reduced to about 20, the others having gone on to Cornwall.

*Mining.*—The mining industry throughout Central Quebec was very busy. At Thetford Mines some of the companies are running night and day. There is a scarcity of help at these points to work in the pits. A syndicate of business men in Compton County and Sherbrooke has been formed under the name of the "Marsboro Gold Mining Syndicate." They have secured the mining rights on a tract of land about six miles from Lake Megantic, and will proceed at once to develop it. They now have a vein in sight which assays \$30 to the ton.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—All branches were busy, with plenty of work ahead.

*Metal and engineering.*—All engaged in the machine shops, including moulders, have been very busy.

*Woodworking and furnishing.*—Woodworkers, carriage makers, and pattern makers have been busy.

*Printing.*—Printers, pressmen and bookbinders have been busy.

*Clothing.*—Journey men tailors have been very busy, and the supply has not been equal to the demand. Garment workers and glove makers have been busy.

*Food and tobacco.*—Bakers and confectioners have been busy, with cigar makers very busy.

*Leather.*—Saddlers have been very busy.

*Miscellaneous.*—Bakers, clerks, stenographers, delivery employees, hotel and laundry employees were in good demand.

*Transport.*—All branches were busy.

*Unskilled labour* has been in demand; no one need be out of work.

#### DISTRICT NOTES.

*Thetford Mines.*—The village is growing fast and becoming very prosperous. There is work for everybody, and for more, if they would come. Thousands of dollars are every week paid in salaries.

## THREE RIVERS, QUE., AND DISTRICT.

*Mr. Joseph J. Ryan, correspondent,* reported as follows:

## GENERAL CONDITION OF THE LABOUR MARKET.

Labour as was fully employed as in September. Lumber mills, sash and door factories and other factories were running full speed and could employ more hands if they could get them. There seems to be as great a scarcity of men as during the summer. The new cotton factory is still in course of construction; also several stone and brick residences besides a large number of wooden cottages. The sash and door factory previously owned by the United Lumber Co., was reopened for the manufacture of material for the new cotton factory. Wholesale and retail trade was steady and the financial situation very satisfactory, though the bad weather and the bad roads of the neighbourhood always affect retail trade unfavourably. No changes in wages or hours were reported.

## CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were very busy, and farm labourers were in demand. Threshing was in progress on rainy days and farmers were hurrying ploughing during the fine weather.

*Fishing.*—Very little fishing was done on the St. Lawrence river this month.

*Lumbering.*—Lumber mills were still sawing and prospects are for a big season.

*Manufacturing.*—The C. P. R. is supplying shippers better than during the previous month but the service is still far from satisfactory. Glove factories, the coffin trimmings factory, the chair and shovel factory, the boot and shoe factory, and also the candy and biscuit factory were running full time.

## CONDITION OF PARTICULAR TRADES.

The building trades continued very busy. The metal and woodworking

branches had all the work they could handle. The printing, clothing, food and tobacco preparation trades were all busy. Transportation companies were in need of additional men. Unskilled labour was in great demand in almost every branch of industry.

## ST. HYACINTHE, QUE., AND DISTRICT.

*Mr. V. Phaneuf, correspondent,* reported as follows:—

## GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions were very active during October though the building trades were quiet. The month was very active among boot and shoe factories, the comparative inactivity which prevailed in the previous month having disappeared. The Ames Holden Company has made several changes in its factory in order to install additional machinery. The organ factory had a busy month. The iron industry was very active, and the orders on hand give promise of a very busy season. The corset factory, sash and door factory, tanneries, the Penman factory and other establishments were very active, more hands being taken on in many. The work of double tracking the Grand Trunk Pacific line between Ste. Rosalie and St. Lambert was going ahead rapidly, from 200 to 300 men being employed. Soundings were made during the month for a new bridge with double tracks; the construction of this will give employment to a number of additional hands. The organ pipe factory, established about a year ago, was very active with plenty of orders ahead. The free school for drawing was opened during October. A large number of male and female pupils gave in their names. Classes in painting and crayon drawing are held every Monday and Thursday at 2.30 p. m., and 7 p. m. The courses in architectural drawing take place every Tuesday evening. A large lumber exporting firm intends making St. Hyacinthe the centre of its operations. Trains

were running regularly on the new Grand Trunk branch line as far as St. Hilaire. The collection of taxes and assessments proceeded satisfactorily. In the municipal department the receipts were \$4,791.71 and the expenses \$2,770.65, leaving a surplus of \$1,921.65. In the water works department the receipts were \$1,816.93 and expenses \$770.62, leaving a surplus of \$1,046.41. Wholesale and retail trade was fairly active. The month's business was satisfactory considering the scarcity of money. Business is expected this year to be fully as good as last. There were no changes in wages or hours and employers and employees were in harmony.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Conditions were active, although the crops were poor in some localities, especially potatoes, which, owing to the heavy rains have rotted in some places. They were sold at from 50 to 60 cents per bushel. The price of butter continued to rise; it is now worth 32 cents per pound. Eggs were 30 cents per dozen.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Carpenters, joiners, painters, plumbers and steam and gasfitters had a fair month. The other branches were dull.

*Metal and engineering.*—These trades were all very active.

*Woodworking and furnishing.*—Woodworkers, upholsterers, polishers, carvers, carriage and wagon makers, etc., had a busy month.

*Printing.*—Active conditions prevailed. Bookbinders in particular had an abundance of work and overtime had to be made.

*Clothing.*—Tailors, garment workers and boot and shoe workers were busy.

*Food and tobacco preparation.*—Busy conditions were reported.

*Leather.*—This branch was very active.

*Miscellaneous.*—Barbers, clerks, delivery employees, hotel, restaurant and laundry workers were fully employed.

*Transport.*—Railway employees, cab

drivers, teamsters and expressmen were very active.

*Unskilled labour.*—There were few idle men.

#### DISTRICT NOTES.

*Sorel.*—The new dredge No. 8 *Beaujeu*, will leave Sorel in the first week of November for the lower St. Lawrence, where it will be used in conjunction with the dredge *Galveston* in widening the channel near Crane Island. This new dredge was on trial in the river here for some days and was found satisfactory. This vessel has the proportions of an ocean liner and was built entirely in the Sorel dockyard. The Federal Government took charge of this dock yard in 1888. Since that time the following dredges have been built there; The *Laurier*, 188 feet in length, a wooden vessel, built in 1896-97; the *Lady Aberdeen*, a steel vessel, built in 1898-1900; the *Lady Minto*, a steel vessel, built in 1898-1900; the *Lafontaine* in 1900-01, and the *Baldwin* in 1906-07. Powerful dredges have also been built in this yard for other provinces, among them the *Fielding*, 250 feet long, built in 1904-05, working in the ports of the Maritime Provinces; the *Progress*, steel, built in 1903-04, for the Department of Public Works. The following steam tugs have also been built since 1896. The *Cartier*, the *St. Jean d'Iberville*, the *Portneuf*, the *Emilia*, the *Lake St. Peter*, the *Montcalm*, the *Rouville*, the *Vercheres*, the *Hosanna*, the *James Howden*, the *Frontenac*, the *de Levis*, the *Champlain*, and several others for the Public Works Department such as the *Trudeau*, the *Sir John*, the *Marie Louise* and the *Lord Stanley*. A large number of coal barges, dredge scows, stone extractors and other vessels of less importance have also been built since 1896: Apart from these new constructions, repairs and improvements of dredging vessels have been made to the *Canadian*, the *Laval*, *Eureka*, *Arctic*, *Montcalm*. *Tarte*, *Lady Grey* and *Galveston*. The dockyard is becoming too small and extensions are made on all sides. A new wharf, 200 feet in length is being built, also a sawmill

60 x 70 feet, fitted up with the most improved machinery. Electric power is largely used to run these machines, and 600 men are employed. In order to hasten operations the Marine Department has made arrangements with the Quebec, Montreal and Southern Railway whereby freight is delivered directly at the yards, a branch line two miles long having been built for this purpose, to be in operation in a few days. A new steel dredging machine, to be used at Cap à la Roche, is under construction. A new steel steamer will also be begun at once. A boot and shoe company has applied to the city council for an exemption of taxation on a factory which it proposes to build.

*St. Johns.*—About \$175,000 worth of new buildings are being erected. With the exception of a hotel, a new post office, and a chapel and school of Our Lady of Secour, the sum will be spent on dwellings. Comfortable lodgings are very scarce in St. Johns and the labouring class feel the need very much. The Richelieu Cordage Company which abandoned the manufacturing of cordage many years ago will reopen its factory in a few weeks.

MAISONNEUVE, QUE., AND DISTRICT.

*Mr. E. Pelletier, correspondent,* reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The progress of the city of Maison-neuve is evidenced by a recent report of the assessors to the city council.

The figures are as follows:—

Year.	Popula-tion.	Value of Real Estate.	Increases.
1897.....	2,816	\$2,404,000.00	
1906.....	13,394	7,528,374.84	\$5,066,988.80
1907.....	16,197	9,528,974.84	2,057,985.96

The value of rentals in 1906 amounted to \$224,126, and in 1907 to..... 303,700,

An increase during 1907 of..... \$79,574

CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Grain prices advanced during the month. They were as follows:—

- Wheat, \$1.05 per bushel.
- Oats, 61 cents per bushel.
- Barley, 75 cents per bushel.
- Peas, 75 to 85 cents per bushel.
- Hay, \$18 to \$19 per ton.

Through the lateness of the season the hay crop was small. Fodder of all kinds was very high and advancing in value, making the feeding of cattle very expensive. In consequence a number of farmers marketed their stock with the effect of causing a reduction in the price of cattle on the hoof as compared with the corresponding period of last year.

CONDITION OF PARTICULAR TRADES.

*Building.*—Activity prevailed in all branches. Painters and decorators began working eight hours per day, the rate per hour being the same as in summer. These are the only workers in the building trades whose hours are reduced to eight in winter.

*Metal, engineering and shipbuilding.*—Iron moulders, iron workers, coremakers, machinists, etc., were better employed than in the corresponding month of last year.

*Woodworking and furnishing.*—Activity was reported in all branches.

*Printing.*—These trades were well employed.

In the *clothing, food and tobacco preparations and leather trades* active conditions existed.

*Miscellaneous.*—Barbers have secured an agreement for the closing of shops at eleven o'clock on Saturday nights.

*Transport.*—Ship labourers and longshoremen were very busy; the other branches were active.

MONTREAL, QUE., AND DISTRICT.

*Mr. G. Audet, correspondent,* reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Work in the building trades was more active than in September, owing to

improved weather conditions. Bricklayers, masons, stonecutters, structural iron workers, carpenters and builders' labourers reported that since the middle of the month they were much busier than in the first two weeks, which were rainy.

The city of Montreal has received from the street railway company the sum of \$213,682.35, being the percentage on receipts payable to the city for the year's operations. The amount of the percentage for the preceding year was \$177,586.52, thus showing an increase for 1906-7 of \$36,095.83.

The report of the fire department of the city showed a diminution of 17 in the number of fires during October, 1907, as compared with October, 1906.

During the month of September there were received at the Montreal post-office 536 sacks of European mails via the Canadian steamship lines and 1,061 sacks via New York, or a total of 1,597 sacks of mail matter, as compared with 823 for the corresponding month of last year, an increase of 669 sacks for September, 1907.

It was stated that an English company proposes to build a new locomotive factory at Lachine, Que., to cost \$3,000,000 and to employ about 1,500 men. The company has purchased a farm of 120 acres opposite Lachine station at a cost of \$35,000 and is seeking a bonus and exemption from taxation from the town of Lachine.

The increase in the value of real estate in Montreal this year will amount to \$17,000,000.

Business in general was very active, especially with dry goods merchants, grocers and boot and shoe merchants.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The vegetable market was active during the month, the prices asked being from 25 to 30 per cent. higher than last year.

*Manufacturing.*—All classes were working to full capacity. It was stated that the rubber factories will soon commence to work overtime.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Activity prevailed in all branches.

*Metal, engineering and shipbuilding.*—Blacksmiths were busy; shipwrights, caulkers, sheet metal workers and bicycle workers were fairly well employed; horseshoers were active; the other branches were very active.

*Woodworking and furnishing.*—Woodworkers, upholsterers, varnishers, carvers, etc., were active.

*Printing.*—Very busy conditions were reported.

*Clothing.*—Tailors, garment workers and boot and shoe workers were well employed.

*Food and tobacco preparations.*—Bakers confectioners, butchers and meat cutters were busy. Cigar makers and tobacco workers were fairly well employed.

*Miscellaneous.*—These trades had an active month.

*Transport.*—Street railway employees were active, as were steamboat men, ship labourers, longshoremen, cab drivers and hackmen. Teamsters were very busy.

*Unskilled labour.*—Owing to the large number of Italians in the city there were many men idle. There was a large amount, however, of employment.

### HULL, QUE., AND DISTRICT.

*Mr. Rod. Laferriere, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The labour market continued very busy, and there is no likelihood of a change in present conditions before winter sets in. Overtime was being worked in almost every factory, and there was a demand for additional labour. Large industries find it hard to get and keep their full complement of hands, while a number of new smaller industries have helped to drain the supply of labour. The large firm of Gilmour and Hughson, lumber manufacturers, has been obliged to look outside in order to secure enough men. The E. B. Eddy Company has barely enough workmen; while shantying opera-

tions are handicapped by the extreme scarcity of men.

It was stated that the Laurentide Mica Company, which is a branch of the Westinghouse Electric Company of Pittsburg, would be affected by the closing down of the latter firm's four largest branch houses in the United States, but it appears that those fears were unfounded. The Laurentide Co'y employs about 500 Hull girls, and buys almost all the mica mined in this district, thereby providing a means of livelihood for thousands of people all over the county of Ottawa, besides employing a couple thousand girls in its 14 culling establishments situated in every town or village between Buckingham and Aylmer.

Large stocks of mica are being held in Hull by mine operators, who do not care to sell under the uncertain conditions of the market. Certain mines have also been closed down. Fortin and Gravele's extensive mines in the township of Templeton closed down sometime since, and will not start again unless assured of better conditions. A valuable market in France for this product is expected to open, and negotiations are already far advanced towards establishing the same. This would ensure stability in mining operations. In the meanwhile, about a score of men usually employed in the mines are temporarily idle. The cause of this uneasiness in the mica market seems to be that the usual purchasers refuse to buy the smaller sizes of mica.

The E. B. Eddy, Company, has again increased its capacity for producing pulp and paper. A new machine necessitating the employment of five or six men was started during October, and will increase the daily production by about twelve tons per 24 hours.

The C. P. R. is employing about fifty men filling in the trestle through Hull. The work is nearing completion and will cost upwards of \$60,000. The southern extremity of the trestle, near Royal Alexandra bridge will be made of structural iron instead of ordinary ballast. The work is already completed. These works necessitated the operation of new

quarries and stone crushers and the use of large quantities of Portland cement.

There are about twenty concrete abutments to build at the intersection of every street along the trestle. About 95 men were employed at this work, \$2 being the average wages paid.

The Industrial Development Company, a new industrial venture, is preparing to build a \$60,000 factory for the distilling of commercial spirits, such as turpentine, methylated spirits, tar, etc. The new company intends using mill refuse, including sawdust, in the manufacture of turpentine. The company is capitalized at \$600,000 and has a federal charter. It has secured an exemption of taxes in Hull for ten years. Extensive purchases of machinery are alleged to have been made in France, to the amount of \$120,000, and operations are intended to commence next summer.

The saw mills will be running to full capacity for the balance of the season, that is, for another full month. The cut is above the average, no time having been lost from low water. The closing down of the mills will likely put an end to the scarcity of labour. Yet all spare men will readily find employment in the bush. Large numbers of men are brought occasionally from the Saguenay district to hire in the shanties. The Eddy firm alone employs 500 men in the bush on the River Du Moine. Supplies have been bought this month and prices were very high. Hay delivered at the shanty costs \$35 per ton. Chicago pork to the amount of \$16,000 was contracted for, to be delivered on the spot at \$25 per bbl. Oats delivered there will cost 54c.

#### OTTAWA, ONT., AND DISTRICT.

*Mr. W. Gilchrist, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The active demand for men in the lumbering industry, in building operations, in civic employment, and in railway

construction was as marked during October as at any time during the past summer. For unskilled labour the demand has been much increased by the starting of operations on the new Grand Trunk station, which promises to employ about 200 men the whole winter. The corporation work requires 150 men, who are paid from \$1.75 to \$2.25 per day. There are not enough men available to supply the demand. The hiring for the shanties has been briskly in progress, most of the companies paying \$35 per month. The W. C. Edwards Company commenced the re-building of its lumber factory, which was destroyed by fire on July 25, on the site of the old structure. The cost of the factory will be \$20,000, and a new office will be built at the cost of \$12,000. The water power is being further developed. Instead of being operated by water power direct and by steam, the factory will be run by electricity. Mr. J. R. Booth expects to have his new sulphite mill completed in the spring. It will have a capacity of 50 or 60 tons a day. The assessment returns for Ottawa published in October shows the present population to be 69,756, an increase of 2,184 over last year. The assessment for 1908 is \$43,354,450, or an increase of two millions. The city has granted a fixed assessment of \$150,000 for 20 years on a station to cost a million dollars, and a fixed assessment of \$500,000 for 15 years on a hotel to cost a million and a half, both to be erected by the Grand Trunk Railway Company.

A new electric light plant has been installed by the Wilbur Mining Company so that the taking out of iron ore can be carried on day and night. The Kingston and Pembroke Railway is taking 150 tons a day from this mine to Renfrew, where it is shipped to Sault Ste. Marie. The company contemplates employing 100 men.

Mortimer & Co., commencing on November 1, will give its 250 employees, made up of bookbinders, lithographers, pressmen, etc., an eight hour day instead of nine hours. The company reports that the change will cost them \$6,600 a year.

The dairymen supplying Ottawa ad-

vanced the retail price of milk from seven to eight cents, commencing on October 15.

A strike of two weeks' duration, and affecting 12 coat makers of the Universal Manufacturing Company, began on October 7. The cause was personal objection to the foreman. The men returned to work, signing an agreement not to strike again without submitting their grievance to arbitration.

Two members of the Local Plasterers' Union refused to work with a local contractor because he employed five non-union men.

A National Trades and Labour Council was organized during October.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were busy marketing their produce and received very high prices, as, for instance: Hay, \$25 per ton; oats, 50 cents per bushel; butter 32 cents per pound; eggs, 30 cents per dozen. Most of the vegetable growers reported a better yield than last year.

*Lumbering.*—The lumber manufacturers are obliged to pay jobbers considerably more than last year for taking out logs. In parts of the forest where operations are conducted on a small scale, large quantities of logs are taken out by jobbers, who can handle small gangs more economically.

*Railroad construction.*—The Canadian Northern Railway line is fast approaching the city.

#### CONDITION OF PARTICULAR TRADES.

The several skilled trades were actively employed. The printing trades were very busy. Unskilled labourers were busy, and wages were firm on a high level.

#### KINGSTON, ONT., AND DISTRICT.

*Mr. Wm. Kelly, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

There was no perceptible change in the condition of the labour market during

October, as compared with the previous month. Weather conditions were exceptionally favourable, and outside work was carried on to a larger extent than at the corresponding period last year. The merchants report business active. The local banks also reported a good business.

In another week the city's walk construction gangs will cease work for the season. There will probably be four scheduled walks unfinished. The Board of Works is taking steps to secure some good quarry lots, so that next year the city may furnish its own supply of stone. The property committee has decided to ask the present Council for an additional appropriation of \$500.00 for further improvements to the city buildings.

Up to a recent date there had been received at the M. T. Company's elevator eleven million bushels of grain since navigation opened last April. This is the largest quantity of grain the elevator ever received in a season. Fully two million bushels more are expected before the closing of navigation.

During the month, local bakers reduced the weight of bread from 3 lbs. for ten cents to 2½ lbs. for ten cents, or 1½ lbs. for five cents.

In view of the small fire losses in Kingston for years past, the Underwriters' Association has decided to decrease the insurance rates by fifteen per cent. This city has a very efficient fire brigade, and adequate protection otherwise. The reduction is the result of frequent appeals to the association.

The tailors' strike remains unchanged, except that two of the seven shops involved have conceded the demands made. There were no other strikes or lockouts, and no changes in wages or hours during the month.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were busy fall ploughing, and making preparations for winter.

*Fishing and lumbering* continued dull.

*Manufacturing* remained active.

*Mining* was very active. During the month, the K. & P. railway moved the first shipment of iron ore from the Wilbur

mines near Renfrew. This train load was the first shipment on a 100,000 ton contract to Sault Ste. Marie. A new electric light plant is being installed, so that the men can work day and night. A complete telephone service has been installed, and a large store opened at Wilbur. Twenty-five men are now employed, and four times that many will be employed shortly. At present 250 tons of ore are being moved daily, and before long the company expects to load a train in one hour.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—All branches continued to be actively employed.

*Metal, engineering and shipbuilding.*—These trades were active.

*Woodworking and furnishing.*—Woodworkers and furnishers were active.

*Printing and allied.*—Printers were busy.

*Clothing.*—The clothing trades were active.

*Food and tobacco preparation.*—Butchers, bakers, etc., were busy.

*Leather.*—Tanners and curriers were active.

*Miscellaneous.*—Barbers, broom-makers, furriers, laundry workers, etc., were active.

*Transport.*—All branches continued active.

*Unskilled labour.*—Labour is still in active demand.

#### BELLEVILLE, ONT., AND DISTRICT.

*Mr. H. C. MacDiarmid, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

That the city of Belleville is fast becoming an important industrial centre has been fully demonstrated this summer. The month of October was equal to the preceding months in industrial activity. Labour generally was in great demand. Every branch of manufacturing was fully employed, and in many cases the supply did not equal the demand. Good wages

prevailed. There was a scarcity during October, of unskilled labour, but towards the end of the month the market was steady. The Belleville Portland Cement Company has standing offers to labourers at \$1.75 a day. The Lehigh Portland Cement Company has nearly 500 men, skilled and unskilled, employed in the erection of its plant. A small village has sprung up in the vicinity, the company having erected over forty comfortable houses for their workmen, besides several larger boarding houses. Over 200 men from this city are employed there and live in Belleville. The Toronto and Belleville rolling mills ran continuously night and day, and were turning out immense quantities of finished iron and over 40 varieties of horseshoes. The Belleville Hardware Company was very busy during October and took on a number of skilled employees. The new brass foundry is nearing completion, and will be ready in November. The Tubular Axle Works moved into its new premises. This was found necessary owing to its increased business. There was no unrest in the labour market.

The total assessment for 1908 is \$4,189,998, an increase over 1907 of \$196,068. The increase is due to the large number of new buildings erected and in course of erection. The business assessment shows an increase of \$30,500, made up almost entirely of taxation on new business concerns. The increase in the population for the present year is 543. This does not include the students or floating population. The above are the largest increases in any one year of the city's history.

The corner stone of the new drill hall was laid on October 21st by the Honourable the Minister of Militia. Good progress has been made on the work. The new Hotel Quinte is nearing completion. The new House of Refuge was completed.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Ploughing and seeding were active, the weather being excellent. Corn and tomatoes were good crops.

*Fishing.*—Both herring and white fish were plentiful, and large catches were made.

*Manufacturing*—All branches were active.

*Mining.*—Activity prevailed.

*Railroad construction and employment.*—Conditions were active.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Every branch was active during October, there being no necessarily idle men.

*Metal, engineering and shipbuilding.*—Iron moulders and helpers were very busy. Machinists were being advertised for by the Lehigh Portland Cement Company. Electrical workers were busy. Blacksmiths, horseshoers and boiler-makers had an active month.

*Woodworking and furnishing.*—This branch had an active month, coopers being especially active turning out cheese boxes and apple barrels.

*Printing and allied*—Printers, pressmen and bookbinders had an active month.

*Clothing.*—Journeymen tailors reported a very busy month.

*Food and tobacco preparation.*—All branches were busy.

*Leather.*—Harness makers had an active month.

*Miscellaneous.*—Barbers, clerks, stenographers, delivery employees, furriers, hotel, restaurant and theatre employees, and laundry workers were all busy.

*Transport.*—Railway and steamboat men of all branches had an active month. Sailors also had a busy month, as did cab drivers, expressmen and teamsters.

#### PETERBOROUGH, ONT., AND DISTRICT.

*Mr. W. J. Johnston, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

All branches of labour, both inside and outside, were well employed. Sewer work and the laying of pipes were still under way, and will be until the frost sets in. Granolithic sidewalks are also still being laid; about six miles of these

walks have been laid this season, leaving three miles to be completed next year. The dredging of the river bed has been in full progress during the month, giving employment to large numbers of workmen. Considerable improvement work has been done in different places on the Trent Canal, and is still being carried on.

The contract for the erection of a new Roman Catholic church has been awarded; the church will cost about \$44,000. Work on the erection of Mann's new bakery building has been commenced. The firm of J. J. Turner and Sons has been awarded the contract for supplying flags for all the rural schools in the Province of Ontario. The Quaker Oats Company has advanced the price of cereal packages from 25 cents to 30 cents; the reason assigned for the increase is the present high price of oats and other grain.

Houses in Peterborough were more plentiful, but there are not enough houses at about \$10 per month to meet the demand. The city assessment now totals \$10,000,000, being an increase over that of last year of \$2,602,030. The population is 16,000, an increase of 1,038 over that of last year. There are 932 telephones in use in Peterborough. The Bell Telephone Company has completed its conduits for underground wires. Exports and imports have been very heavy during the month. Banks reported business steady. Wholesale and retail trade has been excellent. All industries were running full time with full forces of employees. Flour has advanced in price from \$2.70 to \$2.80, and bread from 10 to 11 cents for a 3 lb. loaf, also milk from 6 to 7 cents a quart. The labour market was well supplied, and harmony prevailed between employers and employees.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Fall ploughing, the sowing of fall wheat, threshing, hauling of grain to market, etc., have been the principal employment of agriculturists.

*Fishing.*—This industry was active.

*Lumbering.*—Conditions were very active. The Cavendish Lumber Company has 300 men employed in its camps, and expects to cut about 12,000,000 feet of lumber this season.

*Manufacturing.*—All industrial establishments were active.

*Mining.*—The surveying and testing of mineral lands throughout the district were being carried on, and it is reported that active operations will shortly begin in several places.

*Railroad construction and employment.* The filling in of the viaducts at Port Hope gave employment to large numbers of workmen.

The Street Railway Company has been busily engaged getting its line in good shape for the winter.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Busy conditions prevailed.

*Metal, engineering and shipbuilding.*—Iron moulders, steam engineers, blacksmiths, tool sharpeners and jewellers were active. Iron workers and helpers, machinists and engineers, and sheet metal workers were busy, and electrical workers, linemen and brass workers were very busy; but bicycle workers and horseshoers found employment somewhat dull.

*Woodworking and furnishing.*—Up-holsterers, varnishers, polishers, carriage workers and coopers were busy, with pattern-makers active, and car builders dull.

*Printing.*—The allied trades were active.

*Clothing.*—Journeymen tailors had active employment; garment workers, hat makers, boot and shoe workers were busy.

*Food and tobacco preparation.*—Bakers, confectioners, butchers, etc., were busy; cigar makers and tobacco workers active, and ice-handlers were dull.

*Leather.*—Harness makers and those employed making collars were busy.

*Miscellaneous.*—All were busy, with barbers active.

*Transport.*—Steam railroad employees, street railway employees and steamboat men were active. Cabmen, hackmen, carters and draymen teamsters and expressmen were busy.

*Unskilled.*—Busy conditions prevailed.

#### DISTRICT NOTES.

The fairs in nearly all the rural districts have been a success. The apple crop was a good one, and buyers were

busy picking and shipping. The threshing machines were busy throughout the district, grains yielding fairly well, though not so well as last season. The root crop was a good one. Cheese reached 12 9-16 cents per lb. Rural saw and grist mills were busy, and country general stores reported business good. Market quotations were as follows; Wheat, \$1.05; oats, 55 cents per bushel; butter, 30 to 35 cents per pound; eggs, 30 cents per dozen; potatoes, \$1 per bag, and hay \$20 to \$22 per ton.

*Port Perry.*—A new industry for the manufacture of all kinds of clothing, to employ about 50 workpeople, has commenced operations. Children over 14 years of age can earn \$3 per week, and more experienced help \$10 per week. The hours are from 8 a. m. to 6 p. m.

*Kendry Station.*—The new freight sheds are about completed.

*Campbellford.*—A by-law to raise \$80,000 for the erection of an electrical power pumping plant, to be controlled by the municipality, was carried by a vote of 296 for and 11 against.

## TORONTO, ONT., AND DISTRICT.

*Mr. Phillips Thompson, correspondent,* reported as follows:—

### GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during October has been more unsettled than for some time, owing to the scarcity of money and the tendency on the part of some leading employers to reduce staffs and curtail operations. While skilled mechanics in most lines have generally been well employed, a number have been thrown out of work. Unskilled labour was greatly in excess of the demand, and the numbers of the unemployed were increased by the usual influx from the rural districts at the close of the season and the return of many from the west. In fact, the situation is less favourable than has been the case for some time. A register of unemployed men was opened by the Building Trades Council on the 22nd, and 560 men had enrolled themselves as out of

work. The list included skilled mechanics. The great majority were recent immigrants. On the other hand, it is stated that many unemployed men are unwilling to accept less than current wages or to leave the city to work elsewhere.

The total assessment of Toronto for 1908 is \$207,317,767, an increase of \$22,054,507 over that of 1907. The population is 272,600, an increase of 18,880.

The city treasurer's annual report for 1906 shows total receipts from all sources amounting to \$11,940,018, with \$1,363 cash on hand at the end of the year. The waterworks receipts amounted to \$488,309, and the expenditures to \$447,404.

William Chessar, a foreman employed by Samuel Alexander, contractor for the building on which James Rigby, a carpenter, was working when killed by the fall of a scaffold last month, was committed for trial on the 24th Oct. for having caused the accident by lack of proper precautions in erecting the scaffold.

The Dominion Government has approved of the plans for the construction of a new western entrance to Toronto harbour, which will be dredged through the sand strip south of the present channel. The new channel will be 400 feet wide, having a depth of 18 feet, with long piers. The work, which it is expected will be commenced in the early spring, will involve an expenditure of between \$300,000 and \$400,000.

The building permits issued during September represent an approximate value of \$763,440, as compared with \$902,803 for September, 1906. The total value for the nine months ending September 30th is \$12,204,080, as compared with \$9,566,328 for the corresponding period of last year.

The gross receipts of the Toronto Railway Co. for the financial year ending August 31st were \$3,349,819, as compared with \$2,977,539 for the previous twelve months, being a gain of \$372,280. The percentage paid to the city was \$409,964, as against \$336,630.

The milk producers and retailers came to an arrangement as to prices on the 7th of October, fixing the rate to retailers

at \$1.55 per 8-gallon can for the seven months following November 1st, and \$1.35 for the four following months. The producers increased the price to consumers from 8 to 9 cents per quart for bottled milk and from 7 to 8 cents for loose milk, to take effect November 1st.

Owing to the continued advance in the price of hard coal, which has for some time been selling at \$7.25 per ton, the City Council, on October 28th adopted a resolution to the effect that the Government, whether Dominion or Provincial having jurisdiction, appoint a commission to enquire into the allegation that an unlawful combine to keep up the price exists among local dealers.

D. D. Mann, acting on behalf of Moose Mountain, Ltd., the company engaged in developing the iron deposits of Moose Mountain in Northern Ontario, has made a proposition to the city that in consideration of a grant of 350 acres of Ashbridges' Marsh as a site, the company will erect an iron-smelting plant with a capacity of 1,400 tons of ore daily, and ultimately establish other industries for the manufacture of iron and steel products, which it is expected will employ about 15,000 men. The matter is under consideration by the Board of Control.

A deputation representing the Canadian Manufacturers' Association waited on Hon. Nelson Monteith, Provincial Minister of Agriculture, on the 17th of October, protesting against the appointment of Trade Unionists as factory inspectors. On the 22nd, a committee of the District Labour Council saw Mr. Monteith and presented arguments in opposition to the view taken by the Manufacturers' Association, and urging that the inspectors should be taken from the ranks of labour, as being most vitally interested in the observance of the Factory Act.

On the 24th October, representatives of the Canadian Manufacturers' Association waited on the Civic Board of Control with reference to a clause in city contracts calling for a nine-hour day, to which they objected. The Board promised to consider the matter, and asked the deputation to present a written statement of its case.

The Canadian Birkbeck Investment and Savings Co. will erect an office building of 4 storeys at Nos. 6 and 8 Adelaide St. east, to cost \$120,000.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were busy with fall plowing, for which the fine weather which prevailed during the latter part of the month was very favourable. There is likely to be a considerable scarcity of feed for stock during the winter, owing to the shortage of the hay and root crops.

*Manufacturing.*—There was a decided slackening in manufacturing activity towards the end of the month, especially in connection with the iron and shipbuilding trades. The Canada Shipbuilding Co. discharged a number of men, having declined several contracts, and will largely curtail operations during the winter. The Canada Foundry Co. laid off 50 blacksmiths. Other factories have either reduced their staffs or are working part of the time only.

The Brunswick-Balke-Collender Co., manufacturers of billiard tables, will erect a 4-storey addition to the factory, to cost \$30,000. The E. B. Shuttleworth Chemical Co., Ltd., will put up a 3-storey brick factory, to cost \$25,000. The Aluminum Crown Stopper Co. will erect a \$50,000 factory on Parliament St. W. & D. Dineen & Co., furriers, will build a large new factory at the rear of their present building.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—The building trades were quieter than usual at this season, with a considerable percentage of the men out of work, more especially carpenters and builders' labourers. The greater proportion of the plumbers have gone back to work, having come to terms with the employers, but some of the larger firms are still affected.

*Metal, engineering and shipbuilding.*—Boilermakers, iron moulders, electrical workers, structural steel workers and sheet metal workers were generally at work, with a noticeable slackening towards the end of the month. Blacksmiths reported a number out of work.

Shipbuilders were inactive. Machinists were still on strike to the number of about 200. Brass workers were well employed. Jewellers and silversmiths were active.

*Woodworking.* — The woodworking trades generally had a good month. Piano workers report trade slack.

*Printing.*—Printers and allied tradesmen had steady work.

*Clothing.*—Journeymen tailors were fairly active. Garment workers were well employed. Furriers were busy. Hat, cap and neckwear workers had steady work. Boot and shoe workers had a fair month. Eighty shoe workers in the employ of the Victoria Shoe Co. went on strike on the 23rd, claiming that the employers were about to reduce wages 15 per cent., which was denied by the firm.

*Food and tobacco preparation.*—Conditions generally remained satisfactory.

*Leather.*—Harness and saddlery workers were steadily employed.

*Miscellaneous.*—Hotel and restaurant employees, laundry workers, barbers, clerks and salesmen were fairly well employed, but many in the lighter and less skilled lines were looking for work.

*Transport.*—Railway and street railway employees, expressmen and teamsters had plenty of work. Sailors and longshoremen were less active.

*Unskilled labour.*—A large number of unskilled labourers were out of work.

#### DISTRICT NOTES.

*Markham.*—On the 22nd, the property owners passed by-laws to raise \$9,000 for general improvements, including an extension of the electric light plant, approaches to the new bridge and permanent sidewalks.

#### NIAGARA FALLS, ONT., AND DISTRICT.

*Mr. Ernest Green, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

October was a very satisfactory month for labour. There was work for every-

body, and a sufficient supply of labour to keep all industries running satisfactorily.

The new factories of the Niagara Falls Canning Company and the Sanitary Can Company were being erected. That of C. S. Peaslee & Son, shoe manufacturers, was started. Plans were being prepared for the building of a brass manufacturing establishment, which will locate here. Machinery was being installed and a new boiler house erected at the carpet sweeper factory. The steel reduction plant will soon be ready. The new carriage mountings factory was in operation. The busiest lines of industry were agriculture and the building trades. Commercial and financial interests were satisfactory, though the effects of financial stringency in the United States were slightly felt.

The only interruption to industry occurred at the ship yards at Bridgeburg. Permanent walk construction was stopped for the season, but some sewer work was still going on.

The busy season in the fruit district was over. Canneries were finishing the season's pack, and many employees were being laid off. In fruit picking and handling and in factory work, growers and packers have to depend very largely on imported foreign labour. Hundreds of Italians, Hungarians, and people of other European countries, both men and women, find employment in the fruit industry from June till October. A few English immigrants have settled in the district and sought this employment, but employers say the continental people furnish the most reliable workers for both field and factory. Some of the newcomers from Great Britain settle down and make good farm labourers, but many dislike that life and drift into the cities.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.* — Farmers and fruit-growers were busy with their apple, grape, corn and late vegetable crops. While some crops were very light, others were good and prices were high, so that the average returns were very good.

*Fishing.*—Fishing in the lakes was good at times.

*Manufacturing.*—Factories were all running full time, with full staffs, except the bearings works, which reduced the number of its employees. The neckwear and suspender factories were very busy.

*Railroad construction.*—There was little work in progress, but general railway employment was good. Seventy-five trackmen were employed in raising and shifting track on the International railway.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons were steadily employed and had several busy weeks in sight. Carpenters were well employed, but work will be less plentiful in another month. Plasterers were active; painters, plumbers and gas fitters busy, and stonecutters quiet.

*Meal.*—Foundries and machine shops employed full staffs. Linemen were active, and many labourers were working with them. Many iron shipbuilders in this part of the country were out of work.

*Printing.*—Printers were active.

*Clothing.*—Tailors were busy.

*Food and tobacco preparation.*—Bakers were active, and butchers and ice men quiet.

*Miscellaneous.*—Office employees were in demand, and extra retail clerks will be employed in many stores in November and December. Hotels and restaurants have reduced the number of their employees to their regular winter forces.

*Transport.*—Railway passenger services have been reduced to winter schedules, but freight traffic, which was quiet early in October, improved towards the end of the month, and all classes of train, engine and yard-men were kept busy. Freight brakemen were in demand. Some more electric railway trainmen were laid off. Teamsters were busy, cabmen quiet.

*Unskilled labour.*—Labour was very well employed.

#### DISTRICT NOTES.

*Welland.*—Work was commenced on the erection of an iron pipe foundry, the buildings of which will contain sixty thousand square feet of floor space. The

Plymouth Cordage Company was erecting a large dining hall for its employees. The first forgings were turned out at the Billings & Spencer plant. Furnaces of the electro-metals plant were tested and found satisfactory.

*Port Colborne.*—Work was being rushed on the new government grain elevator.

*Bridgeburg.*—The Michigan Central railway was building a new twelve-stall roundhouse.

*Humberstone.*—The shoe factory was busy. Another machine was installed.

#### ST. CATHARINES, ONT., AND DISTRICT.

*Mr. Jas. A. Wiley, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

There was a perceptible lessening of activity in the labour market during October, as compared with the preceding month, and conditions were quiet in several branches of industry. To some extent the stringency of the money market was responsible, and caution is being used by manufacturers. Wholesale and retail trade was good. The assessment returns showed the largest increase in several years, the total assessable value being \$6,342,819, an increase over last year of \$257,834. Returns showed the population to be 12,293, an increase over last year of 547. There were no labour disturbances during October.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—While some of the fruits late in ripening were damaged by frosts, the most of the fruit crops were gathered without loss. Owing to the good prices secured, the fruit growers feel little of the stringency of the money market.

*Manufacturing.*—With few exceptions, factories and mills were running full time. The canneries were still very busy with a full staff of employees.

*Other industries.*—St. Catharines for some time past has been short of a natural gas supply. The St. Catharines and

Niagara Power and Fuel Company has amalgamated with the Wainflet Natural Gas Co., and acquired the latter's wells, and the city is now assured of a full supply. The company will be known in the future as the United Gas Co., Ltd.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—All branches were active. The demand and supply were about equal.

*Metal and engineering.*—With few exceptions, all branches were well employed for the month

*Woodworking and furnishing.*—Woodworkers, upholsterers, varnishers and polishers, wood carvers, carriage and wagon makers were active.

*Printing.*—The allied trades were active.

*Clothing.*—Journeymen tailors were in their busy season. Boot and shoe workers were busy.

*Food and tobacco preparation.*—Bakers, confectioners, butchers and meat cutters, cigar makers and tobacco workers were active.

*Leather.*—Tanners and curriers and leather workers had a good month's employment.

*Miscellaneous.*—Barbers, clerks, stenographers, delivery employees, furriers, hotel and restaurant employees and laundry workers were steadily employed.

*Transport.*—All branches were busy.

*Unskilled labour.*—Unskilled labour was well employed.

#### DISTRICT NOTES.

*Thorold, Merriton and Port Dalhousie.*—Labour was well employed and business good.

*Grantham Township.*—Good headway is being made on permanent roadway work by the Council.

*Dunnville.*—After November 1, the Bell Telephone Company will cease to do local business in the territory covered by the system of the Dunnville Consolidated Telephone Company. This territory includes the entire county of Haldimand, the township of Tuscarora in Brant county, the townships of Castor and Gainsboro in Lincoln, and that portion of Wainflet in the vicinity of Winger.

The Consolidated Company has purchased the poles, wires and all other outside plant of the Bell Company in this territory, except what is reserved for long distance service. The Bell Company agrees to maintain no local exchange and do no local business in this territory during the term of the agreement, which is for ten years, and as much longer as the two companies desire, it being terminable after ten years on sixty days' notice prior to the expiration of any yearly period. The Bell Company will handle all the long distance business, and for this purpose will have an exchange at Cayuga, but nowhere else in the district, and the Consolidated Company will give all the long distance business to the Bell Company.

#### HAMILTON ONT., AND DISTRICT.

*Mr. S. Landers, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Financial stringency and a slight slackening in building operations lessened trade and labour opportunities during the latter part of the month. Some of the large manufacturing establishments laid off a number of workmen. The shoe and clothing trades were exceptionally quiet, and wholesale and retail trade somewhat declined. The Eagle Knitting Works Company is adding a new section to its factory, to cost about \$50,000; when it is completed, the capacity of the factory will be about doubled. The London Tool and Machine Company will shortly build an addition to its present premises at a cost of \$25,000. The Berlin Tool and Machine Company expects to commence operations next month; it now has five acres under cover. This plant will give employment to about 500 hands.

At the beginning of the month, the price of wheat advanced to \$1 per bushel. The price of canned goods was also advanced. Tomatoes have gone up to 7½ cents to the retailer, and are now selling at \$1.25 a dozen cans; corn has been ad-

vanced 2½ cents, and is now selling at 95 cents per dozen cans. Other fruits have been advanced from two to fifteen cents per dozen cans. The canners say that the increases are not large, in view of the fact that they have been forced to pay almost double the price this year compared with last.

The price of coal has been advanced from \$7 to \$7.25 per ton.

The Dominion National Smoke Consumers' Company, Limited, capitalized at \$50,000, with head office at Hamilton, Ont., also the Royal Shirt Manufacturing Company, capitalized at \$200,000, headquarters at Hamilton, Ont., were incorporated.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers and fruit growers were busy.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Employment was not as active as in the previous month, especially towards the end of the month. With the exception of workmen employed on inside work, the trades were somewhat slack.

*Metal, engineering and shipbuilding.*—Iron moulders, coremakers, machinists, electrical workers, sheet metal workers and jewellery workers found employment active; linemen, blacksmiths and boiler-makers were fairly active, but horseshoers were somewhat quiet.

*Woodworking and furnishing.*—Employment with woodworkers, upholsterers and millmen was active. Pattern-makers were fairly active.

*Printing.*—The various branches were fairly active.

*Clothing.*—Journeymen tailors and garment workers were somewhat slack, but boot and shoe workers had fair employment.

*Food and tobacco preparation.*—Bakers and butchers were active, and cigar makers and tobacco workers had fair employment.

*Leather.*—Active conditions prevailed with leather workers.

*Miscellaneous.*—Broom makers were busy, and barbers and delivery employees

active. Hotel employees and laundry workers were fairly well employed.

*Transport.*—Railway train crews found employment only fair; steamboatmen and longshoremen were somewhat slack. Street railway employees were active, with cabmen and teamsters fairly active.

*Unskilled.*—Employment was somewhat slack.

#### BRANTFORD, ONT., AND DISTRICT.

*Mr. J. C. Watt, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market was not so favourable as during the preceding month. The building trades were very busy, but in some of the factories towards the close of the month a number of men were laid off. One factory started to work five days a week and another eight hours per day. These conditions are not expected to last long. The Penman Manufacturing Co., Ltd., is advertising for a number of girls to work in the mills. Merchants had a satisfactory month. The price of bread has been slightly advanced by many of the local dealers. Twenty-two tickets were formerly given for \$1.00; now only twenty are given. A public meeting was held by the workmen of the city to consider the advisability of forming a co-operative association. Another meeting will be held in the near future.

Brantford's assessment returns give the city an assessment of \$11,076,800, an increase of \$611,839 over last year. The population is 19,896, an increase of 804 over last year.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Agriculturists were very busy ploughing, harvesting the root crop, and hauling grain to market. Wheat, oats and barley reached the remarkably high prices of \$1.07, 56c., 83c. respectively per bushel.

*Railroad construction.*—Work has been active on the Brantford and Hamilton

Electric Railway, and on the Grand Valley extension to St. George. The new management of the Grand Valley Radial Railway announces that it will reconstruct the entire road, rebuild and extend the city portion of it, and build lines to Port Dover, Woodstock and London, with 80 pound rails and grades suitable for fast traffic. About 94 miles of new road will be built, work to commence at once.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers, masons, carpenters, joiners, lathers, plasterers, painters, plumbers, gas and steamfitters were very busy.

*Metal.*—Iron moulders and coremakers in several shops were not very busy. Machinists, engineers, electrical workers, linemen, metal polishers, buffers, platers and stove mounters were busy, but blacksmiths were not so busy as during the preceding month. Boilermakers and horseshoers were busy, and sheet metal workers were very busy.

*Woodworking.*—Carriage and wagon-makers were not very busy. Pattern makers and coopers were busy.

*Printing and allied.*—Printers and pressmen, etc., had a busy month.

*Clothing.*—Journeymen tailors and tailresses were very busy.

*Food and tobacco preparation.*—Bakers, confectioners and butchers were busy. Cigar makers and tobacco workers found trade a little dull.

*Leather.*—Leather workers and saddlers were busy.

*Miscellaneous.*—Barbers, clerks, delivery employees, hotel and restaurant employees and laundry workers were busy.

*Transport.*—Railroad trackmen were busy, as were freight handlers. Street railway employees were steadily employed, as usual. Teamsters were busy. Cab drivers and hackmen had an average month.

*Unskilled labour.*—There were a few labourers in the market, particularly after the middle of the month.

#### DISTRICT NOTES.

*Paris.*—The building trades were busy during the month. The fabric workers

employed by the Penman Manufacturing Co., Ltd., went on strike on October 12th, demanding that the Saturday half-holiday, which they had been having during the summer months be continued during the entire year. The employees went to work on the 22nd, a compromise having been effected. For thirteen weeks, the old schedule of hours will be worked, viz., until 4:30 p. m. on Saturday afternoons, after which work will start at 6:50 or 7 a. m., stopping at 6:00 or 6:10 p. m., and on Saturdays at 12:10, thus working the same number of hours per week, and having Saturday afternoon off during the entire year. About 1,000 employees were affected. The Plough Co. is erecting a new pattern storage vault, 50 x 80 feet.

#### GUELPH, ONT., AND DISTRICT.

*Mr. O. R. Wallace, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

October on the whole was a quiet month. A good deal of apprehension was caused by the state of the money market. While there was no slackening of employment, and in only one case a laying off of men, notices of lay-offs have been given that will cover part of November. The Raymond Co. will take stock for two weeks. The Bell Co. will make repairs for a week, and the Canada Furniture Co. will commence an eight-hour day temporarily on November 1st. In one carriage shop a reduction of the staff took place, affecting eighteen men. Owing to the starting of a number of new industries, there is no noticeable number of workpeople seeking employment.

The building trades are finishing up the season's work, without many new contracts coming in. A by-law is before the City Council requiring a permit to be taken out before erecting a new building in future. Sixteen miles of permanent sidewalks have been laid this year. A proposal for an abattoir is before the city; all animals slaughtered for meat will be killed and inspected before being dis-

posed of. An option has been obtained on the Springbank brewery plant. Retail trade was active. There were no strikes or changes in wages.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers have finished taking in their roots. Crops in this locality were about an average, and the high prices will make the season a favourable one.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—The building trades had an active month, but not many new jobs were started. Bricklayers and masons had a quiet month.

*Metal.*—The iron trades had an active month, but a scarcity of new orders was reported in some lines. Iron moulders, coremakers, tube mill workers and machinists were active.

*Woodworking.*—The woodworking trades showed a slight falling off compared with September. Woodworkers had a quiet month, and November promises some short time. Organ-workers had a busy month and piano workers an active month. Carriage workers were quiet.

*Printing and allied.*—Printers were active.

*Clothing.*—Journeymen tailors had a busy month, as did ladies' garment workers.

*Food and tobacco preparation.*—Bakers and confectioners and cigarmakers were active.

*Unskilled labour* was in fair demand, but the supply was equal.

#### BERLIN, ONT., AND DISTRICT.

Mr. R. F. Gofton, correspondent, reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

All classes of labour were busy during October, and conditions compared favourably with those of the previous month. Building operations were still underway,

and will continue for some time to come. A large number of houses under construction were completed during the month, and a number have yet to be completed. The house famine is being overcome. The new Zuelsdorf furniture factory is rapidly nearing completion. The addition to the factory of the Merchants' Rubber Company is now completed. The Municipal Light and Power Plant had a most successful month in September, the profit from the operation of the gas plant amounted to \$1,031.31, and from the electric plant to \$1,407.02, the net profit being \$969.81. The Light and Power Commission has decided to purchase mechanism costing about \$1,200, to equalize the board in the electrical department. The erection of a new opera house in Berlin has been proposed. Three new industries are about to locate at Berlin. A firm of South Bend, Indiana, manufacturers of collapsible go-carts and other wheel specialties, will erect a factory to cost about \$80,000, with modern equipment. A factory for the manufacture of concrete mixers and block and brick machines, will be 60 x 250 feet, and cost about \$30,000. Another factory for the making and supplying of water motors and washing machines will be 40 x 100 and cost \$15,000. These factories are to be in operation by the 1st of July next. The ground has already been broken for the first mentioned.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The farmers were busy harvesting sugar-beets and hauling them to the factory. Owing to the dryness of the weather, the crop will be considerably less than that of last year.

*Manufacturing.*—All industrial establishments had a good month, but slackness was noticeable in some lines, such as leather tanning. The Geo. Rumble shoe factory was rushed with orders and worked overtime.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons, carpenters and joiners were very active; stonecutters and builders' labourers

active. Painters, decorators and paper-hangers reported a busy month.

*Metal, engineering and shipbuilding.*—Iron moulders, iron workers and helpers, machinists and engineers were all busy, with electrical workers active.

*Woodworking and furnishing.*—Woodworkers, upholsterers, polishers and carvers had a very busy month.

*Printing.*—Printers, pressmen and bookbinders reported a busy month.

*Clothing.*—Journeymen tailors were busy, with garment workers, glove makers, boot and shoe workers active.

*Food and tobacco preparation.*—Bakers, confectioners, meat cutters and butchers were active. Cigar makers reported a busy month.

*Leather.*—Trunk and bag makers were active.

*Miscellaneous.*—Barbers, broom-makers, clerks and delivery employees were busy, and laundry workers very busy.

*Transport.*—Railway sectionmen and street railway employees were busy. Cabmen were also busy.

*Unskilled.*—This class was well employed.

## WOODSTOCK, ONT., AND DISTRICT.

*Mr. W. N. McEltheran, correspondent,* reported as follows:—

### GENERAL CONDITION OF THE LABOUR MARKET.

October was not characterized by greater activity than the preceding month. Workmen in some of the factories were on short time. In only one trade, that of stove moulders, was additional labour in demand. With continued fine weather, the farmers were occupied in harvesting their root crops and preparing for winter. The root crop was generally good, and the market for potatoes and vegetables active. Butter was very scarce throughout the month the price on the local market being 35 cents a lb. Eggs sold for 30 cents a dozen. Turkeys were plentiful at 15 cents a lb., but the demand was not very keen. Cheese sold on the Woodstock cheeseboard at 13 cents a lb. Hay

brought \$16 per ton. The coal dealers advanced the price of coal to \$7.25 per ton on the first of the month. The reason given for the advance was the difficulty experienced in getting coal through from the mines, it being claimed that the railway companies were either short of cars or had more freight than they could handle.

### CONDITION OF LOCAL INDUSTRIES.

*Manufacturing.*—Factories in Woodstock and Ingersoll were somewhat quiet. In several cases Northwest orders were being held, and as these orders made operations brisk last year, October was a dull month this year without them. The home market also was in many cases not as active as last year. Storerooms were generally well stocked, and some factories may find it expedient to take stock during the quiet season.

*Railroad construction and employment.*—The Canadian Pacific Railway Company pushed construction work on the Embro-Ingersoll extension, about 100 men with teams being kept busy. The good roads work being done by the county council was also employing men and teams, though the work progressed rather slowly.

### CONDITION OF PARTICULAR TRADES.

*Building.*—All available carpenters had a busy month. The brick work on the new Woodstock hotel was completed, and roofing on it was commenced. Work on the Carnegie library building went briskly on, and special efforts were put forth to rush forward the Young Men's Christian Association hall. Good progress was made with the construction of the Manual Training school at the Collegiate Institute. The addition to the local factory of the Canada Furniture Manufacturing Company was completed, and machinery, etc., installed. Lathers and plasterers were still quiet, but painters had a busy month, the weather being very favourable for outside work. Plumbers, gas and steamfitters were rushed with orders, the different firms being unable to secure sufficient men to get

through with the work. Stonecutters were steadily employed.

*Metal, engineering and shipbuilding.*—Machinists had an extra busy month, and electricians a very busy one. Good lathe hands were in demand. Iron-moulders had a busy month. Blacksmiths and horseshoers throughout the district were fairly busy. Wire fence workers were busy. A new storehouse for the Standard Wire Fence Company was completed.

*Woodworking and furnishing.*—Wagon-makers were not very busy, the store-rooms being pretty well filled up with unshipped stocks. Cabinet makers, while not rushed, were fairly well employed. Considerable work was being done on manufacturers' orders. Reed organ makers were not as steadily employed as in the corresponding month last year, but church organ makers were slacker than the month previous. Coopers were still busy.

*Printing.*—Printers had a busy month.

*Unskilled.*—The market was somewhat overstocked.

#### DISTRICT NOTES.

*Ingersoll.*—The Ingersoll Board of Education decided to take a plebiscite at the next civic elections, to ascertain the will of the people as to whether or not manual training and domestic science should be continued in the school curriculum.

#### STRATFORD, ONT., AND DISTRICT.

##### GENERAL CONDITION OF THE LABOUR MARKET.

*Mr. Jos. T. Carlin, correspondent,* reported as follows:—

The general condition of the labour market during October has been fairly active. The building trades were busy, the permits issued amounting to the sum of \$556,865. Of this amount, \$360,000 is credited to the Grand Trunk shops addition, work on the erection of which is progressing steadily. Huge electric cranes will be a part of the machinery

installed, which will be capable of lifting the largest engines. A large gang of men was employed on John street sewer and sidewalk construction. Wholesale and retail merchants reported business very good. The retail milk dealers have advanced the price of cream from 24 cents to 30 cents a quart to the householder, and from 18 cents to 24 cents a quart to milk dealers. Milk remained the same price, 6 cents a quart. The high price of butter is given as the cause or the advance in cream. No change has been made in rates of wages or hours of labour and there was no trouble in the labour market.

It is understood that a new factory will be erected for the manufacture of hay forks, step ladders, etc. The building will cost about \$15,000; the firm will employ a large number of hands.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture* — Farmers were busy threshing and ploughing. Market prices were as follows:—

Wheat, \$1.02 per bushel.  
Barley (new) 65 to 75 cents per bushel.  
Oats, 52 cents per bushel.  
Peas, 80 cents per bushel.  
Flour, \$2.90 per 100lbs.  
Manitoba flour, \$3.00 per 100 lbs.  
Bran, \$24 per ton.  
Shorts, \$26 per ton.  
Eggs, 27 to 28 cents a dozen.  
Butter, 27 to 28 cents per pound.  
Hay, \$16 per ton.  
Chickens, 25 to 50 cents each.  
Ducks, 45 cents each.  
Geese, 90 cents to \$1.10 each.  
Potatoes, \$1.00 per bag.  
Apples, 50 to 90 cents per bag.

*Manufacturing.*—The factories report business brisk with the exception of clothing establishments.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—All were busy, owing to the favourable weather.

*Metal.*—Iron moulders and iron workers, machinists and boilermakers were active. Blacksmiths and repair shops did a good business.

*Woodworking.*—Woodworkers, upholsterers, carriage and wagon makers were steadily employed. Coopers were active.

*Printing.*—Printers reported trade good with no idle men.

*Clothing.*—Journeymen tailors and garment workers were active.

*Food and tobacco preparation.*—Bakers and confectioners reported the month an active one. Cigar makers have been well employed.

*Leather.*—Harness makers did a good business.

*Miscellaneous.*—Barbers reported activity. Clerks, delivery employees and hotel and laundry workers had an active month. Hotel men will advance stable prices on November 1st. The high price of hay and oats being given as the cause.

*Transport.*—Railway employees have had an active month. Cab drivers, teamsters and draymen were busy.

*Unskilled.*—This class was fairly well employed, the supply being equal to the demand.

#### DISTRICT NOTES.

*Goderich.*—The business of the Jackson Manufacturing Company has so increased that it is necessary to obtain enlarged premises. A new factory is being built, 25 x 125 feet, one storey high, steam fitted and installed with the latest machinery. This means an increase in staff.

*Mitchell.*—A by-law was carried to grant Dufton & Waterhouse a loan of \$10,000 to enable them to increase their plant to manufacture men's underwear in connection with their woollen mills. They purpose to employ 40 hands. Work has commenced on the enlargement of the woollen mill.

#### LONDON, ONT., AND DISTRICT.

*Mr. A. Woonton, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during October was active in factories and foundries, but in the building trades there was a considerable falling off from the same month in 1906. The only works of importance in course of construction are Reid's new building, several

stores, and an addition to the G. T. R. car shops. The McClary Mfg. Co. has started using its producer gas engine, which produces 250 horse power at the rate of \$9 per horse power, per annum. A firm of sewer contractors has installed a digging machine, which will dig a trench twenty-three feet deep, doing the work of 50 men. The motormen and conductors of the London Street Railway Company have asked for an increase of wages to 20 cents per hour all round. At present they get 16 cents per hour for first year; 17 cents for second, and 18 cents afterwards. The local fire department has presented a petition to the city council asking for an increase in wages.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The price of farm produce has been strongly upward in this district, being higher than for the past forty years. The following prices were quoted:

Hay, \$18.50 per ton.  
Oats, \$1.80 per 100.  
Wheat, \$1.00 per 100.  
Butter, 30 cents per lb.  
Eggs, 28 cents per dozen.  
Potatoes, 90 cents 1½ bushel bag.  
Northern Spy Apples, \$3.00 per barrel.  
Baldwin Apples, \$2.50 per barrel.

Breakfast foods have also risen in price, former 10 cent goods selling for 13 cents or 2 for 25 cents, and 15c. goods for 20 cents.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers reported a number of men having left the city, owing to shortage of work; prospects are not very bright for this winter. Carpenters were all working, and lathers and plasterers were busy. Painters reported trade fair. Plumbers had plenty of work. Stonecutters were busy, but builders' labourers were not all working.

*Metal, engineering and shipbuilding.*—Iron moulders were active, but iron workers have slackened off somewhat, and the night shift at the rolling mills has been taken off for a time. Machinists were busy, and stove mounters and metal polishers reported trade good.

*Woodworking and furnishing.*—Carriage and wagon makers were active. Car-

builders at the G. T. R. shops reported an increase in the number of hands employed.

*Printing and allied.*—Printers and press men report trade as fair. A new large optimus press has been installed at Somerville's.

*Clothing.*—Journeymen tailors reported trade good, winter orders for overcoats and suits coming in. Garment workers were active, and boot and shoe workers reported increasing trade.

*Food and tobacco preparation.*—Cigar-makers were active.

*Leather.*—Tanners and curriers reported heavy receipts of hides.

*Transport.*—Freight traffic on the C. P. R. has fallen off during the month, but on the G. T. R. business was good.

*Unskilled labour.*—There were a number of idle men, the completion of a number of civic contracts and the let-up in the building trades being the cause.

#### DISTRICT NOTES.

*Clinton.*—The Clinton Knitting Co. is about to commence the building of a 30 x 60 two storey addition to its factory.

*Petrolea.*—On October 17th, the plant and nitro-glycerine magazine of Petrolea Torpedoes, Limited, were completely destroyed by an explosion. Several buildings in the vicinity were destroyed, and a large amount of glass was broken in the town.

#### ST. THOMAS, ONT., AND DISTRICT

*Mr. J. A. Killingsworth, correspondent,* reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during October was not so favorable as during the past few months. There was a demand for skilled and unskilled labour, but the supply exceeded the demand in almost every branch. Industries that have found it difficult during the summer to procure labour, report no scarcity at the present time. The weather has been most favorable

for out door work and as a result there has been little cessation in building activity. On the railroads there has been a slight falling off in traffic and spare men have not been well employed during the past month. On Oct. 25th. an order was posted in the M. C. R. Shops reducing the working hours therein. The employees will now work nine hours a day or fifty-four hours per week. While the reduction has been made in the working hours, there is an abundance of work to be done in the different railroad shops.

Wheat reached the dollar mark in this city in October, the John Campbell Milling Co., advertising for wheat at that price per bushel. St. Thomas millers do not anticipate a scarcity of wheat owing to the fact that farmers may hold back for a higher rate.

A number of new labour unions have been formed during October. The St. Thomas Street Railway Employees became associated with the "Amalgamated Association of Street and Electric Railway Employees of America." An International Brotherhood of Maintenance of Way Employees was also organized, and an effort was made to have the Carpenters and Joiners organized.

There is still a scarcity of houses for rental in this city. Peaceful conditions prevailed between capital and labour throughout October.

##### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Fall plowing was actively under way. The harvesting of the root crops has given employment to unskilled labourers. Farm produce has been selling at good prices. Butter has brought 30 cents per lb., and eggs 26 cents per dozen.

*Manufacturing.*—Local industries reported the month an active one. All hands were well employed and a good supply of fall orders are on hand. No scarcity of help was reported in any instance.

##### CONDITION OF PARTICULAR TRADES.

*Building.*—These trades were fairly well employed. Painters were not busy.

*Metal.*—Machinists, iron moulders, boilermakers and horseshoers had an active month.

*Woodworking and furnishing.*—Wood workers, and carriage and wagon makers had a normal month.

*Printers and Allied.*—Printers were busy.

*Clothing.*—Journeymen tailors have been busy, with plenty of fall orders ahead.

*Food and tobacco preparation.*—The different branches were busy.

*Transport.*—Railway employees, freight handlers, teamsters, cab drivers, street railway employees and others in the transport service have been well employed.

*Unskilled labour.*—There has been no scarcity of in this class.

#### DISTRICT NOTES.

*Aylmer.*—Industrial conditions give general satisfaction. The factories have been running steadily with all hands well employed. The Aylmer Cigar Co. was obliged to close on account of a falling off in business. The Canadian Condensed Milk Co. is erecting a building which it expects to open by Jan. 1st. It is estimated that one hundred hands will be employed at the start. The Aylmer Packing Company's plant which was destroyed by fire is being rebuilt on a larger scale. The Laidlaw-Watson Shoe Co., has removed to Toronto, but a new company is now under formation. The Aylmer Iron Works, the Canning Co., the cheese factory and the Draper Co., were active.

#### CHATHAM, ONT., AND DISTRICT.

*Mr. Alex. Gregory, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Labour has been fully as well employed during October as in the previous month, although being somewhat handicapped on a number of contracts for the want of building material. Factories

of all kinds were still on full time. Planing mills were working on interior work, as no large building permits have been issued during the month. The Chatham Carriage Company, an organization formed during the month, has occupied its new factory and is busy placing machinery. No change in hours or rates of wages occurred.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Agriculturists had unfavorable weather during the first part of the month, and many who had late beans were unable to harvest them to advantage. As a result, the crop will be considerably damaged. Prices are far above what they have been for a number of years.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons were slack, owing to all large buildings being completed. Carpenters and plasterers were busy. Painters were busy on interior work. Builders' labourers were steadily employed.

*Metal.*—Prospects are poor for the coming winter. Electrical workers were busy. Horse-shoers reported trade dull.

*Woodworking and furnishing.*—Woodworkers in all branches reported trade brisk. Coopers were dull, owing to the scarcity of apples in the section.

*Printing.*—Printers were very busy and good men were scarce. Bookbinders were all busy.

*Clothing.*—Tailors reported prospects fair, with the present month below the corresponding month in 1906.

*Food and tobacco preparation.*—Bakers were busy.

*Unskilled labour.*—All so far have been well employed.

#### WINDSOR, ONT., AND DISTRICT.

*Mr. D. Mitchell, correspondent,* reported as follows:

#### GENERAL CONDITION OF THE LABOUR MARKET.

The city has had a very active month in all branches of trade, and there was

plenty of work for skilled and unskilled labour. The building trade has shown a marked improvement over last month, and good carpenters were in demand. Work was commenced on Fox Bros., mantle factory, which is to be 40ft. x 140 ft., four stories high, and which will give employment to a large number of hands, when completed. There are several other buildings under way.

The assessment commissioner's returns for the year 1907 are as follows: Population 15,427; increase 625 over 1906. Total assessment \$8,509,075; increase \$471,075 over 1906.

The commissioner reported a general advance in rents, the increase being 25 per cent. on the average, in many cases 75 and 100 per cent. The largest increase in rents was made on small cottages where the people are least able to pay.

The customs receipts for September amounted to \$93,875.66, an increase of \$32,468.89 over the same month last year.

The tailors got a slight increase in wages on the first of the month.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were very busy gathering roots and doing their fall ploughing. The crops on the whole were behind those of last year, but the prices received now as compared with last year puts the farmers in as good a position. Hay sold this year for \$15.00 per ton, against \$10.00 last year; oats 55c per bushel this year, against 30 last year and potatoes 85c per bushel this year, against 60c last year.

*Manufacturing.*—This industry was very active.

*Railroad construction.*—All the railroads were very busy, with extra men employed on the tracks. The Windsor, Essex and Lake Erie Electric Railway opened its line from Kingsville to Windsor on October 3rd.

#### CONDITION OF PARTICULAR TRADES.

*Printing.*—The allied trades were busy with extra help wanted.

*Clothing.*—This trade was active, and nearly all journeymen tailors were working overtime.

*Food and tobacco preparation.*—Bakers, butchers, cigarmakers and tobacco workers reported plenty of work.

*Miscellaneous.*—Barbers had an active month. Clerks, delivery employees, hotel and laundry workers found plenty of work.

*Transport.*—Employees of the different branches were busy.

*Unskilled labour.*—This class was well employed.

### SAULT STE. MARIE, ONT., AND DISTRICT.

*Mr. F. A. Denman, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Labour was fully employed in all lines during October. There was a good demand for men for the lumber camps. The Canadian Logging Tool Company were about ready to commence operations, this being a new industry. Boat freights were heavy, merchants rushing in goods before the close of navigation. The steel plant and blast furnaces were working steadily, with orders ahead, and with only an occasional stoppage for repairs. The pulp mill, veneer mill, and sawmill were also working full time with orders ahead.

#### CONDITION OF PARTICULAR TRADES.

The various skilled trades reported normal conditions.

### WINNIPEG, MAN., AND DISTRICT.

*Mr. John Appleton, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

During October there have been complaints of lack of employment, but they have arisen largely from a class of la-

borers who have in the last two or three years found steady work in the city of Winnipeg itself. This year however the amount of city work has been less. Not only has the number of public undertakings been fewer than in previous years, but the amount of building has been less. Unskilled labourers have become accustomed to stay in the city and they do not take kindly to any proposal to work on railroad construction outside of the city. For the latter class of work there is abundant demand.

Many of the wholesale houses in Winnipeg are reducing their staffs. They are able to do this as the volume of trade is not increasing at the same ratio as it was a few months ago. Moreover the monetary stringency is causing business men to adopt methods of economizing.

During the month active operations were commenced upon the construction of a union depot for the joint use of the Canadian Northern Railway and the Grand Trunk Pacific Railway in Winnipeg. Large excavations have been made and the work is giving employment to a large number of men. Rapid progress is being made with the building of the Provincial Government's telephone system. Conduits are being placed under the principle streets in the city and this work is giving employment to several large gangs of workpeople. Bank clearings are about the same as recorded for corresponding periods of last year. For one or two weeks, towards the latter end of September and beginning of October, they were actually less, but at the present time they are maintaining a parity in volume with the figures of last year. In Winnipeg there have been no complaints from the retail traders as to the extent of business. Payments are being well met and the volume of cash trade is increasing.

About the middle of the month some rumors were circulated to the effect that a drop in wholesale lumber prices had taken place. As far as can be gathered from prominent men engaged in the trade there was no foundation for the rumor in question.

The city of Winnipeg has already spent approximately \$100,000 in the work of

developing power on the Winnipeg river. A locomotive has been purchased and this has already been put into commission to haul material for the plant from the Canadian Pacific Railway at Lac du Bonnet to the site of the development. A temporary line has already been graded. According to the Mayor, this work will have to stop. After a visit to London during October with a view to finding a market for an issue of Winnipeg debentures amounting to \$4,500,000, the market for this class of security was reported in a very demoralized condition and the present therefore is a bad time to dispose of municipal securities. In view of this circumstance, the Mayor has recommended to the City Council that the work in connection with the development of the Lac du Bonnet power be delayed for some time. This will throw out of employment a considerable force of men.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The farmers have had excellent weather both for completing harvesting operations and also for fall plowing. The crop is turning out better and prices remaining at higher point than was anticipated. Up to the present time the amount of wheat marketed is much below that of last year at the end of October. The whole movement is fully four weeks late. The crop however is expected to have a cash value almost equal to that of last year.

*Railroad construction.*—It is the intention of the Grand Trunk Pacific Railroad Company to prosecute the building of its lines in the West all winter wherever it is possible to do so. At the present time the various contractors are unable to get enough men for all of the gangs that are at work. As the weather becomes colder it is expected that enough men will be available.

#### CONDITION OF PARTICULAR TRADES.

*Building*—These trades have been very dull, as compared with last year. The building permits issued during September numbered 136, value \$385,850. Last

year during September the number was 319, value, \$1,226,900. The cause of the sudden decrease in the volume of building is due to the difficulty of getting the necessary money. Many of the larger firms of architects say that they have many plans ready to be proceeded with as soon as the financial situation becomes normal. The number of mechanics seeking work in the building trades this year is very much smaller than last year, and in consequence there is not very much complaint as to unemployment. Carpenters at the close of October were all fully employed, but it is anticipated that within a few weeks there will be many out of work. The buildings they are at present engaged upon are approaching completion and there are not many new structures being started; work upon the superstructure for the new Union depot will not be started, it is expected, for some months.

*Metal.*—The foundries are also feeling the effects of the money stringency. Orders are not coming in as fast as usual and in consequence there has been a thinning out of staffs. This applies to all branches of the engineering trades.

*Woodworking.*—Woodworking establishments are not running to full capacity and it is expected that their turnover this year will be much below that of 1907.

*Printing.*—The allied trades generally have been slack. Demands for work have fallen off considerably during the past few weeks and the prospects are not bright for an immediate improvement.

*Clothing.*—There has been activity in all branches and there is no indication of any slackening of trade.

*Food and tobacco preparation.*—The food trades were not as busy as during the early part of the year. The floating population of the city does not appear to be as large as usual. Perhaps the fine weather accounts for this in that it keeps so many employed outside the city.

*Miscellaneous.*—There is an unusually large number seeking light employment for the winter. Clerks, warehousemen, porters, waiters and other classes are finding employment difficult to obtain.

BRANDON, MAN., AND DISTRICT.

*Mr. S. P. Stringer, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions during October were very active. Fine weather has enabled building operations to be continued. A contract has been let for the erection of a new pop factory and warehouse for the Brandon Brewing Company to cost \$8,000. The C. P. R. has carried out considerable work in Brandon this year, and a large amount is still to be finished before the season closes. Advertisements appeared in the local paper for slaters and painters, plasterers, lathers and carpenters, for the Souris Construction Co. There was no special activity evidenced in shipments or transportation. Wholesale and retail trade was brisk. An increase in the rate of wages and a decrease in the hours of labour were granted to C. P. R. machinists, boilermakers, and boilermakers' helpers, also blacksmiths, and blacksmiths' helpers.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Most of the threshing was finished before the end of the month. Several of the largest threshing machines were through with the season's work by October 18th, and hundreds of farmers have turned their attention to ploughing and other preparations. The wheat deliveries at the elevators were not so large as was expected, but this may be accounted for by the general belief that there will be no decline in prices. According to information received from grain inspectors the yield throughout the west was estimated at 82,000,000 bushels. This is 12 million bushels less than last year. Eighty per cent. of the new wheat sampled at Winnipeg graded high.

On the Alberta ranges the cattle are of a superior class. There will be between 35,000 and 40,000 head exported this year. Shipping has already commenced, but the large shipments will not be put through for a month or two yet.

*Manufacturing.*—Flour mills were doing an active business, but sash and door factories were quiet, as is usual at the end of the building season.

*Railroad construction.*—Grand Trunk Pacific officials state that a first-class passenger service will be inaugurated on the Portage la Prairie division as soon as the track has been properly ballasted. It is intended that the distance of 55 miles between Portage la Prairie and Winnipeg is to be covered in an hour.

The C. N. R. route via Rapid City has been chosen and survey orders have been issued. Grading operations have commenced and a considerable amount will be finished this fall.

The McDonald-McMillan Company expects to finish its contract of grading 275 miles of the G. T. P. from Portage la Prairie to the Touchwood Hills this month. About 125 miles of steel has been laid west of Portage.

The C. P. R. has done a large amount of construction work this season and great improvements to their various lines have been made.

*Other industries.*—The new fire alarm system has been completed and twenty five fire alarm boxes have been fully installed.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Employees were active finishing the season's work.

*Metal.*—Machinists and engineers, blacksmiths, boilermakers, iron workers and jewellers were active.

*Woodworking and furnishing.*—Woodworkers, upholsterers and pattern makers' trade were brisk.

*Printing and allied.*—Printers and pressmen were active.

*Clothing.*—Journeymen tailors, garment workers, boot and shoe workers were active.

*Food and tobacco.*—Trade with bakers, confectioners, butchers, meat cutters was active. Ice cutters and drivers were quiet.

*Miscellaneous.*—Barbers, clerks, stenographers, delivery employees, and laundry workers and furriers were active.

*Transport.*—Employees were somewhat quiet. Cabmen, teamsters and expressmen were active.

*Unskilled labour.*—Unskilled labor was scarce during October. Many men were employed on civic improvements and others were engaged harvesting. No doubt there will be plenty of this class when the harvesting operations are finished.

#### DISTRICT NOTES.

*Carberry.*—More threshing outfits were sold this season in the Carberry district than in any past year. The Saskatchewan bridge, 800 feet in length, and costing \$110,000, was formally opened. Saskatoon is to have a new church, to be built on the west of the C. N. R. track.

*Lenigan.*—Plans are being prepared for a large business block.

*Kamsack.*—The new Bank of Commerce building has been erected at a cost of \$10,000. Homesteaders continue to arrive and are pleased with their claims.

*Grenfell.*—Natural gas has been discovered near the town and already plans have been made for thorough investigation and eventual utilization of the gas.

It is stated that ninety-five per cent. of the grain marketed on the G. N. R. Brandon-Churches Ferry line is grading No. 1 Northern and \$1.00 per bushel is being paid all along the line.

#### MOOSEJAW, SASK., AND DISTRICT.

*Mr. J. R. D. Bastien, correspondent,* reported as follows:—

#### DISTRICT NOTES.

*Swift Current.*—This is a station on the main line of the Canadian Pacific Railway and one of its terminal divisions being the dividing point of the Western and Central divisions, one hundred and twelve miles west of Moosejaw. In Swift Current the railway company is spending about \$800,000 in improvements to the main line. There are four work trains at present employed making permanent yards and track improvements. The

building of roundhouses, at a cost of \$100,000; a new station, a dining hall, a telegraph relief station, a bunk room for engineers, a freight shed and new coaling pockets, has provided employment for hundreds of workmen. Wages have been exceptionally high. Until recently, this district was not noted as an agricultural one, but this year agriculturists have reaped a splendid crop, in many instances averaging 40 bushels to the acre where the ground was well worked. The country tributary to Swift Current having become a successful agricultural district, has given the town considerable importance and materially benefitted the working classes, especially those employed in the building trades. This summer there were built two grain elevators of 85,000 bushels capacity and a new school costing \$45,000. The requirements of the railway company for labour have so increased that the staff, which a few years ago, consisted of 40 employees, now numbers 175.

#### REGINA, SASK., AND DISTRICT.

*Mr. Hugh Peat, correspondent,* reports as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during October was fairly active, although not so active as the preceding month, and a long way behind the corresponding month of last year. Towards the close of the month there was only about a dozen bricklayers employed out of some 75 who were all busy in the spring. Very few stonecutters were at work in the city, many having left town owing to the completion of the large buildings.

Invitations have been issued for designs for the Provincial parliament building to be commenced next year. The competition is restricted to seven firms, amongst which are Messrs. Storey and VanEgmond, of Regina. The designs are for a building to cost about \$1,250,000.

The new city fire hall has just been completed. There will be a permanent

paid staff of from five to seven men. The total cost of the building was \$21,000.

##### CONDITION OF LOCAL INDUSTRIES.

*Agriculture*—The cool dull weather of the latter part of September was unfavourable for the drying of grain in the stook. Heavy frosts also caused considerable damage. During October weather conditions have been more favourable, and threshing operations have made good progress.

The average yield will be 15 to 19 bushels to the acre, and about 33 per cent. of it will grade No. 3 Northern, or better. Oats are a fair crop, and will yield in the neighbourhood of 45 bushels to the acre. Barley will be 25 bushels to the acre. Flax, on account of its lateness in maturing, was caught by the frost, and the crop will be more or less of a failure.

##### CONDITION OF PARTICULAR TRADES.

*Building*.—Bricklayers were dull, very few men being actively employed. Masons were quiet; the majority have left the city. Lathers were active, and plasterers were very busy. Painters were all fully employed. Plumbers were very busy. Builders' labourers were active.

*Metal*.—Electrical workers had a very busy month. Sheet metal workers were very busy.

*Printing*.—The general condition of the trade was good, though job compositors were not so busy as in the previous month. Linotype operators were in demand. Bookbinders were busy.

*Food and tobacco preparation*.—Cigar-makers have had a dull month. One manufacturer has closed down and sold the business to a firm in Saskatoon.

*Miscellaneous*.—Barbers were quiet.

#### CALGARY, ALTA., AND DISTRICT.

*Mr. R. A. Brocklebank, correspondent,* reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

During October, labour was better employed than in the previous month,

but there were a number of men unemployed. The building trade improved somewhat, and a number of unskilled labourers found employment with threshing gangs. At present the supply of labour exceeds the demand. Work was commenced on the erection of a large brewery. The railroads were not so busy as last month, but bank clearings were better than those of September. Wholesalers reported trade somewhat better than for the previous month.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The farmers have been busy stacking and threshing. Reports from the surrounding territory are to the effect that the grain crop is an average yield. There has been considerable fall ploughing.

#### *Railroad construction and employment.*

—The Canadian Pacific, the Canadian Northern, and the Grand Trunk Pacific Railway Companies, also the Great Northern Railway Company, were all busy constructing their various lines through the province.

*Other industries.*—Early in the month natural gas made its appearance in the gas well at Calgary, and has been increasing in volume since. The constant supply and pressure demonstrate permanency of supply. Drilling has been suspended awaiting the arrival of a cable by express.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers, stonemasons, carpenters and joiners, lathers and plasterers, painters, decorators and paperhangers, plumbers, gas and steamfitters, stonecutters and builders' labourers were actively employed.

*Metal, engineering and shipbuilding.*—Machinists, engineers, steam engineers and electrical workers, blacksmiths, boiler-makers, sheet metal workers and horse-shoers and jewellers were active.

*Woodworking and furnishing.*—Active conditions prevailed with carriage and wagon makers and car builders.

*Printing.*—Printers, pressmen, bookbinders, steel and copperplate printers, and photo engravers were active.

*Clothing.*—Journeymen tailors and garment workers, boot and shoe workers were also actively employed.

*Leather.*—Active conditions of employment prevailed with leather workers.

*Miscellaneous.*—Conditions of employment were fairly active.

*Transport.*—Railway train crews, trackmen, freight-handlers and section-men were active. The same applied to cabmen, carters, draymen, teamsters and expressmen.

*Unskilled.*—Busy conditions prevailed.

#### EDMONTON, ALTA., AND DISTRICT.

*Mr. J. A. Kinney, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Labour was employed to about the same extent as last month. Compared with October, 1906, about the same number of men were employed, but at present the supply of mechanics more than equals the demand, while a year ago the reverse was the case.

The stringency in the money market is responsible for the limited number to buildings in course of erection. Work on the J. Y. Griffin (Swift & Co.) packing plant is proceeding, a large force of bricklayers being employed. The excavation for the Parliament buildings is also under way. Wholesale trade was fair, and retail trade good.

Bank clearings for September show an increase over September, 1906, of seven hundred thousand dollars. Customs receipts also show a marked increase.

Gas mains are being laid in Strathcona by the International Heating and Lighting Co., which has a franchise for supplying gas to Edmonton and Strathcona.

The corner stone of the Provincial Collegiate Institute was laid on the 18th inst. The automatic telephone system is at present being installed in the new telephone building. The government has completed the telephone line between Edmonton and Viguville, and four gangs of men are at present installing the sys-

tem between here and Lloydminster. There were no changes in rates of wages or hours per day.

The cities of Edmonton and Strathcona are at present considering ways and means whereby a street railway may be owned and operated by the municipalities jointly. Edmonton has at present nine blocks of street railway completed, with bithulithic paying for the same distance.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were busy threshing. A considerable proportion of the wheat was damaged by frost. Oats and barley in most localities are a good crop. On the whole, the farmers of North Alberta have had a fairly good year, as the present increased price of produce makes up for damage sustained by frost.

*Mining.*—Coal mining is being carried on more extensively than ever.

*Railroad construction.*—Work on the G. T. P. is proceeding rapidly, and it is expected that the road will reach Edmonton during the fall of 1908. The C. N. R. Co. has large gangs of men at work putting their track in better shape before winter sets in.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers were fully employed. Carpenters, lathers, plasterers, painters, plumbers, steamfitters were employed to about same extent as a year ago, but the supply at present is more than equal to the demand. Building labourers were busy.

*Metal.*—Of electrical workers and linemen, the supply equalled the demand. This would apply to blacksmiths, horse-shoers and sheet metal workers.

*Printing.*—Printers and pressmen reported trade quiet, with supply more than equal to demand.

*Other trades.*—Journeymen tailors, bakers and confectioners were quiet. Cigar makers and barbers reported trade fair. Retail clerks and stenographers also reported trade fair, the supply being equal to the demand. Unskilled labour was fairly active.

#### NELSON, B. C., AND DISTRICT.

*Mr. A. B. Dockstader, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during October was quiet throughout the Kootenay district, there being a surplus of labour of approximately 1,000 men. About one half of that number were miners and the remainder lumbermen and unskilled labourers. The depreciation in the value of copper threw the miners out of employment, and the decreased demand for lumber and the shutting down of the Hall mines smelter at Nelson were contributing factors.

#### CONDITION OF LOCAL INDUSTRIES.

*Lumbering.*—The decreased demand for lumber has unfavourably affected the lumbering industry, about 60 per cent. of the mills having shut down, and others being expected to close later. The Elk River Lumber Company's mill at Fernie, B. C., was the only mill in the Kootenay district running on double shifts, and it was stated that this mill would close down in November for the winter season.

*Mining.*—The coke shortage reported in previous months appears to have been alleviated, the smelters now receiving full requirements of that article. The mines throughout the district were producing profitably and are on a sound working basis.

#### DISTRICT NOTES.

*Fernie.*—This town was enjoying prosperity, the coal mines producing heavily with about 2,000 men on the pay-roll of the Crow's Nest Pass Coal Company. The construction of the extension of the Great Northern Railway from Fernie, to Michel, B. C., is now under way, with a pay-roll of about 1,000 men. The clearing and grading on this line made favourable progress, and it is expected that the steel will be laid by

midwinter. The new provincial court house will probably be ready for occupancy by January 1, 1908. The new post office building will be completed during the spring months of 1908. The skating rink has been demolished and replaced by one costing \$10,000. A long distance telephone service has been inaugurated between Fernie and Cranbrook, B. C. The installation of a sewerage system was in progress, there being plenty of labour available and weather conditions being favourable. The pipe is all laid and the septic tank is under construction. An effort will be made to complete the work before winter sets in.

#### NEW WESTMINSTER, B. C., AND DISTRICT.

*Mr. D. J. Stewart correspondent*, reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The labour market has been active, but indications point to an over-supply of labour in this district this winter. One of the local saw mills has notified its Japanese, Chinese and Hindu employees that on and after the 1st of November next their wages will be reduced from \$1.75 per day to \$1.40 per day. This has been caused to some extent by a falling off in the lumber trade, and also by the fact that numbers of these people have been coming into this province and the mill companies can get all they want at the reduced rate. It is expected that other mills will also reduce the wages paid to this class of labour. Plans are out for the construction of another cold storage plant in this city, to be erected on the waterfront, and to have a capacity of eight tons of fish; special attention will be paid to the packing of fish for the German market.

The B. C. Distillery, which has been closed during the warm weather, has again commenced operations and a large staff of men is being employed. The company has added a pig pen to their many buildings and three thousand pigs

will be fed on the refuse of the plant. The local fruit cannery has ceased operations for the season; the manager reports that the season has not been so successful as that of 1906, owing to the impossibility of securing a sufficient amount of suitable labour. Another bank has opened for business in this city; this makes four banks doing business here. The Provincial Exhibition which closed on the 6th inst., was the most successful of any yet held with the exception of the Dominion Exhibition. One of the district exhibits will be shown at the following points: Calgary, Moose Jaw, Medicine Hat, Regina, Broadview, and Portage La Prairie.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Conditions are more favourable in this province than at any time in its history. As all kinds of farm produce are in demand at good prices. The following are local market quotations

Beef (hind) 8 and 9 cents per lb.  
 Beef (fore) 5½ to 6 cents per lb.  
 Mutton (dressed) 13 cents per lb.  
 Veal, 7 to 8 cents per lb.  
 Pork, 9 to 9½ cents per lb.  
 Eggs, 50 cents per dozen.  
 Butter, 35 to 40 cents per lb.  
 Fowl, \$6.50 to \$7.50 per dozen.  
 Ducks, \$6.50 to \$7.50 per dozen.  
 Apples per box, 75c. to \$1.00 per box.  
 Potatoes, \$17.00 to \$18.00 per ton.  
 Onions, \$3.00 per 100lbs.

*Fishing.*—Some cohoes are still being caught, but not many fishermen were on the river. Twenty cents per fish was paid for cohoes by the canning and cold storage plants. The Dominion Government hatcheries have been very successful this season in securing salmon.

*Lumbering.*—Operations have fallen off considerably, but none of the mills in this district have closed down. The mills in most cases are replenishing their stocks, which had become very low.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—The building, metal, wood-working and printing trades were active, with blacksmiths and car builders active, and shingle weavers dull. Clothing, food and tobacco and miscellaneous trades were likewise active. The leather and transport branches were busy. Unskilled labour was fairly active.

## VANCOUVER, B. C., AND DISTRICT.

*Mr. Geo. Bartley, correspondent,* reported as follows:—

## GENERAL CONDITION OF THE LABOUR MARKET.

Work in the building trades was slack during the month, fully one-third of the men following these lines being unemployed. A number of men arrived here from the Northwest provinces; some went across the border into the Northwestern states. Out of 225 painters in the city 75, were reported out of employment. The metal trades on the other hand reported all hands fairly well employed, but the outlook is uncertain. The concensus of opinion among local bankers was, that while there is no cause to fear a prolonged stringency, the banks are not looking for new business. The real estate market was somewhat quiet, and not many sales were recorded, though there has been a fair turnover in residential properties. A feature of the market was the scarcity of houses. Rents continued high. The Canadian Pacific Railway Company's wharves were very busy, being packed with thousands of cases of salmon destined for Australia and other parts of the world. It is reported that the directors of the British Columbia Electric Railway Company will shortly spend over \$1,250,000 in improvements and extensions.

At a meeting of the shingle section of the British Columbia Lumber and Shingle Manufacturers' Association, Limited, it was unanimously decided that all coast mills should shut down on November 1, and remain closed till January 1. For some time past orders have been falling off owing to the fact that there is no demand in the Northwest. Shingle stocks on the coast are now large. There is sufficient stock on hand at present to permit the Canadian and Eastern United States trade to be cared for till the first of the new year. Several hundred men, shingle weavers, packers, etc., will be thrown out of employment by the closing of the mills. A consignment of 9,000 cases of apples for shipment to

Australian ports was discharged at the Canadian Pacific Railway Company's wharf from the steamer "City of Puebla" from San Francisco. On the 17th inst., Mr. Wm. White, second Vice-President of the Canadian Pacific Railway, who was in this city made the following statement:

It is the intention of the company to reserve sites for grain elevators on the Vancouver waterfront. This idea is being kept in view in the yard improvements now being carried out, as it is impossible to tell what effect the building of the Panama Canal may have on the export movement of wheat from the prairie provinces. One result may be that the very large percentage of the grain may seek an outlet via Vancouver instead of reaching the Liverpool market via the St. Lawrence river route. Under these circumstances we have felt justified in making provisions for future contingencies. If the grain from a big area of the Canadian west can be hauled here and loaded on steamers, making the passage of the Panama canal and landing it in Liverpool, only one transhipment being involved, as compared with elevator charges for transhipment at Fort William and Montreal—I say if this can be done more cheaply via Vancouver, then the business is bound to come this way.

The Trades and Labour Council has decided to try and secure a supply of cheap fuel along the lines followed in Seattle, and has appointed a committee to inquire into the question. In Seattle the unions have bought a coal mine, and hope to build a railway line to it. The saving already amounts to \$3 a ton.

The British Columbia Printing and Engraving Company will shortly erect a \$16,000 structure.

## CONDITION OF LOCAL INDUSTRIES.

*Mining.*—It was stated that a rich placer ground has been found on an unnamed branch of the Findlay river, in the interior of Northern British Columbia. The find consists of free coarse nugget gold.

## CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers, masons, carpenters and lathers reported a large number out of employment. Painters and decorators reported trade very dull. Plumbers, gas and steamfitters reported trade only fair. A few stonecutters were idle. Builders' labourers reported fully 50 per cent. of their number idle.

*Metal, engineering and shipbuilding.*—The different sections reported trade as fair and in some instances, shipbuilding good.

*Woodworking and furnishing.*—Woodworkers, upholsterers, varnishers and polishers reported trade fair. Woodcarvers were dull. Carriage and wagon makers, and car builders were fairly well employed, with conditions uncertain. Trade with gilders and shingle weavers was very quiet and the outlook not very promising.

*Printing.*—While work on the newspapers is increasing there were a number of men out of employment. In the job offices trade was quiet and several men idle.

*Clothing.*—Conditions with the clothing trade were unchanged from last month.

*Miscellaneous.*—Barbers reported several men idle. Hotel, restaurant and theatre employees were fairly well employed.

*Transport.*—Transportation employees were busy. Hackmen and cabmen reported employment fair. Teamsters and expressmen complained of dullness.

*Unskilled.*—Many were out of employment.

## VICTORIA, B. C., AND DISTRICT.

*Mr. W. E. Ditchburn, correspondent,* reported as follows:—

### GENERAL CONDITION OF THE LABOUR MARKET.

Labour generally was well employed during October, though a few cases were noted of unskilled labourers looking for work. This is owing to the large number of newcomers arriving in the city lately. In the skilled trades the market was well filled, no complaint being made on account of scarcity of men, though first-class workmen in any particular line can always find steady employment.

The Salvation Army has undertaken the experiment of bringing 250 girls to British Columbia for domestic service.

A branch of the Asiatic Exclusion League was formed here on the 10th inst. It has a membership roll of about 150.

Business, both wholesale and retail, has been in good condition during the month. Wages have not been changed

in any of the trades, and no strikes or lockouts have occurred.

### CONDITION OF LOCAL INDUSTRIES.

*Sealing.*—The full returns of the catch of seals for the season are not yet complete. It is quite evident though the reports of the schooners that have returned to date, that the catches this year will be small. The drain on the Behring Sea, which has been going on for so many years, and illegal methods of fishing, has caused an increasing difficulty in the securing of good catches. Up to the present, the average catch on the vessels returned is about 300 skins.

*Lumbering.*—The lumbering industry in this part of Vancouver Island was still very active, and the mills of the Shownigan Lumber Co., the Graham Lumber Co., Taylor Mill Co., Lemon and Gonnason, Muirhead and Mann, and the Sayward Milling Co. were working to their fullest capacity.

*Mining.*—The discovery of free gold at Klaskin Bay on the west coast of Vancouver Island seems to be attracting a large number of mining men to that district. One of the claims, the Golden West, has produced a considerable quantity of ore already. Good reports still come from the Queen Charlotte Islands, where first-class coal deposits have been located.

*Manufacturing.*—The Victoria Machinery Depot has been kept busy during the month, manufacturing winches and pumps to be used on the whaling stations. Their marine works have been kept fully employed on repair work to different craft. The Marine Iron Works reported business good on general work. Both of these establishments found the supply of labour up to the demand, though first-class mechanics can always be placed. The firm of Hutcheson Bros., Ltd., which manufactures all kinds of launches, reported business first-class. They are now working on two 25 ft. cabin cruisers, keeping about 20 journeymen steadily employed. The B. C. Marine Railway Co. is now very busy on repair work on the C. P. R. boats, which were in collision last week near Vancouver. This work, with the construction of the hydrogra-

phic steamer for the Dominion Government, keep a large force of men employed. The B. C. Paint Works are running at full capacity.

*Railroad construction.*—Various works of improvement on the island lines of the Canadian Pacific Railway are to be rushed to completion this winter. The Company proposes to put a regular work train in service to assist in the filling in of Waugh Creek. The employment of this train will add a considerable number of men to the wage earning list. Operations will soon commence at the terminals on the property recently purchased in this city.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Work was as active as in the past, principally in the house-building line. Bricklayers and masons, carpenters, joiners, painters, lathers, plasterers, plumbers and gas-fitters, and building labourers were constantly employed.

*Metal.*—Iron moulders, iron workers and helpers were well employed. Machinists, engineers, electrical workers and linemen were active. Stove mounters and moulders at the Albion Stove Works were all working full time. Boiler-makers, iron ship builders in all the yards found plenty of work to do. Sheet metal workers reported business good. The horseshoeing and blacksmithing trade was steady.

*Woodworking and furnishing.*—Woodworkers, upholsterers, varnishers and polishers were kept steadily employed at the furniture factories. Carriage and wagon makers reported business brisk, with good prospects for the future. Pattern makers were steadily employed. Coopering is only done on a small scale here, the barrels used at whaling stations being procured in London, Ontario.

*Printing and allied.*—The trade still keeps up in both the newspaper and job offices. The Times is installing a new double-deck linotype. The Government printing office still keeps its large force employed, the B. C. Gazette having assumed the size of about 230 pages weekly. Pressmen, electrotypers and bookbinders all had plenty of work.

*Clothing.*—The tailoring trade was brisk, and all journeymen tailors in the city found constant employment. Garment workers at the factories of J. Piercy & Co. and Turner, Beeton & Co. all reported work active.

*Food and tobacco preparation.*—Bakers and confectioners were steadily employed, as were butchers and meat cutters. Cigar-makers were kept busy.

*Leather.*—Harness making was reported brisk.

*Miscellaneous.*—Active trade was reported from all classes.

*Transport.*—Business has been excellent, owing to the unprecedented fine weather.

*Unskilled labour.*—Labour has been well employed, but the supply was fully up to the demand.

#### NANAIMO, B. C., AND DISTRICT.

*Mr. A. E. H. Spencer, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

There has been a slight falling off in the demand for men during the month, and while employment has been active in some industries, there has been a slowing down, throwing some out of work. There was still exceptional activity in the coal trade, with a steady increase in commercial shipments and passenger traffic. Business men report a very good month in nearly all branches. There have been no changes in rates of wages or hours of labour. There was a slight strike among the mine drivers and pushers, which only lasted a few days.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—There has been very little employment among the farmers.

*Fishing.*—The fishing season will soon commence. One company has started on salmon until the herring come in.

*Lumbering.*—There has been a falling off in activity in the woods and in some of the sawmills, owing to the lessened demand for lumber in the northwest

provinces, and a surplus of logs and lumber in the markets of the coast.

*Mining.*—There has been a falling off in quartz mining, one large mine being closed down for an indefinite period, although some properties are pushing development work. The coal mines were still working to their full capacity and increasing their output steadily to meet current demands. They were not hampered so much as last month by the shortage of men, especially of unskilled labour. The smelter at Ladysmith has been running to full capacity during the month.

*Railroad construction.*—The E. & N. R. Co. is busy clearing the right of way of the

extension to Alberni (about 60 miles), so that grading can be started as soon as possible. The C. P. R. Co. is making preparations to start clearing land on a large scale.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons reported work fair. Carpenters have been kept busy. Plumbers, builders' labourers and blacksmiths were active. Painters were active, and teamsters and expressmen very active. Unskilled labour has been well employed, but there was not as pronounced a scarcity as during the last few months.

#### THE INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907.—PROCEEDINGS UNDER THE ACT DURING OCTOBER, 1907.

NO application for the establishment of a Board of Conciliation and Investigation was received at the Department during the month of October. Of applications received prior to the beginning of October, proceedings in connection with which remained unfinished at the close of the month, there were the following, namely:—

I.—The application on behalf of the railroad telegraphers in the employ of the Canadian Pacific Railway Company;

II.—The application on behalf of the employees of the Canadian Mining and Smelting Company of Moyie, B. C.;

III.—The application on behalf of the Hillcrest Coal and Coke Company, Limited, at Hillcrest, Alta.;

IV.—The application on behalf of the Hosmer Mines, of Hosmer, B. C.;

V.—The application on behalf of the employees of the Rosamond Woollen Company, of Almonte, Ont.

With regard to the first named of these, the application on behalf of the railroad telegraphers of the Canadian Pacific Railway Company, a report was received from the Board during the month showing

that an agreement had been effected on all points at issue, and a serious strike thus averted. A report was also received from the Board established to deal with the dispute at the Hosmer Mines at Hosmer, B. C.; the report was unanimous in character, and the chairman stated that he expected shortly to receive the formal consent of the parties concerned to be bound by the agreement under section 62 of the Act. In the case of the applications on behalf of the employees of the Hillcrest Coal & Coke Company, Limited, of Hillcrest, Alta., and of the Canadian Mining and Smelting Company of Moyie, B. C., boards were duly established, but the report from the same had not reached the Department at the end of October. In the case of the application on behalf of the Rosamond Woollen Company of Almonte, Ont., the dispute not relating to a mine or public utility, the Act applied only by consent of both parties, and this not having been received by the department no proceedings were taken. Details of proceedings in connection with the various applications are contained in the present article.

## I.—AGREEMENT EFFECTED BETWEEN THE CANADIAN PACIFIC COMPANY AND THE RAILROAD TELEGRAPHERS IN ITS EMPLOY.

**T**HE Minister of Labour received on October 12 the report of the Board of Conciliation and Investigation established for the adjustment of differences between the Canadian Pacific Railway Company and the Railroad Telegraphers in its employment. The Board reported complete success in its efforts to secure a settlement, and set forth the terms of an agreement effected between the Company and its employees. The matters in dispute were numerous and important, including not only the question of rates of pay over the whole system, but such points as the classes of employees to be included in the schedule of rules and rates of pay applying to telegraphers, the character of services to be performed, the hours of work, the commission to be allowed on commercial messages, and the question of payment while on leave of absence.

The application for the establishment of a Board was received by the Minister of Labour on September 5, being submitted on behalf of the Telegraphers by D. Campbell, Toronto, 3rd vice-president of the Order of Railroad Telegraphers, and Ed. Goulet, Montreal, general chairman, System Division No. 7, Order of Railroad Telegraphers. The number of employees estimated to be affected, or likely to be affected, was placed at 1,656, including six females. The differences, declared the applicants, concerned train despatchers, agents, telegraph operators, linemen and levermen, members of the Order of Railroad Telegraphers, over all lines of the Canadian Pacific Railway.

The Board was duly established by the Minister of Labour, as follows: Mr. J. G. O'Donoghue, Toronto, recommended by the employees; Mr. Wallace Nesbitt, K.C., Toronto, recommended by the employing Company, and Professor Adam Shortt, Kingston, recommended by the foregoing members of the Board. The sittings of the Board began on Friday, September 27, and continued until October 10, being held partly in Montreal and partly in Toronto.

The Canadian Pacific Railway Company was represented before the Board by Mr. D. McNicholl, First Vice-President of the Railway; Mr. J. W. Leonard, Assistant General Manager of the Eastern lines, and Mr. A. Price, General Superintendent of the Central Division of Western lines. The Telegraphers were represented by Messrs D. Campbell, Third Vice-President of the Order of Railroad Telegraphers and E. Goulet, General Chairman, System Division No. 7, assisted by G. D. Robertson, Chairman Eastern lines; G. S. Morris, Chairman Western lines; J. E. Trottier, J. C. Rooney, A. Houston, J. A. Hawkins, J. Austin and P. W. Mooney, members of Committee.

The most vital point in the differences submitted to the Board was that relating to wages. The men had presented with the application for a Board a schedule setting forth the rules and wages demanded from the Company and the rates of wages indicated therein represented an average increase of twenty per cent. on those previously obtaining.

The employing Company, in its reply to the statement accompanying the application from the employees, said, with reference to the question of wages:—

“As to the rates of wages demanded by the applicants, the Company submits that it should not be called upon to grant any increase, for the reason that in view of the Rules and Regulations governing the services now being performed, the rates now being paid to telegraphers in the employ of the Railway Company are, in any case, fully as high, and in the majority of cases very much higher than on railways in corresponding territory and operating under similar conditions.”

The question of wages was finally settled by an agreement that a general increase of fourteen per cent. on the basis of the minimum wage, as in the 1905 schedule, should be granted to telegraphers. The new schedule of rules and rates of pay becomes effective from October 1st, 1907.

### A Serious Strike Averted.

The adjustment by conciliation and investigation of differences of so vital and far-reaching a character as those referred to the Board in question, and the

prevention in this way of a strike that would have caused the most serious injury to the commercial interests of the country, may, it is felt, be justly regarded as an eminent example of the great advantage to be derived, not only by the parties to a dispute, but by the country at large, from the application of the procedure of the Industrial Disputes Investigation Act in a broad and tolerant and conciliatory spirit to the settlement of industrial disputes. It is perhaps worthy of remark also, that the membership of the Board of Conciliation and Investigation in the present case is identical with that of the Board before which were adjusted the differences between the Grand Trunk Railway Company and the machinists in its employ, while Prof. Shortt, Chairman of the present Board, was chairman also of the Board before which were adjusted the differences between the G. T. R. Co. and the locomotive engineers in its employ.

The covering letter of the chairman of the Board, addressed to the Minister of Labour and printed below, shows the process of adjustment to have involved unusual and peculiar difficulties, and to have been finally completed only by the most earnest perseverance and zealous work on the part of the several members of the Board.

The agreement effected is signed by the three members of the Board also, and by D. Campbell and Ed. Goulet for the Telegraphers, and D. McNicholl for the Canadian Pacific Railway Company.

The report of the Board of Conciliation and Investigation, and the covering letter addressed by the Chairman, Professor Shortt, to the Minister of Labour, are as follows:—

#### The Chairman's Letter to the Minister.

TORONTO, October 11th, 1907.

The Honourable Rodolphe Lemieux,  
Minister of Labour,  
Ottawa, Ont.

Dear Sir:—

Enclosed I send the terms of the agreement between the Canadian Pacific Railway Company and the Telegraphers in their employment, as secured by the Board of Conciliation appointed to deal with the dispute between these parties. The points in dispute were quite numerous, and the differences between the claims were very considerable on several vital matters, such as the

classes of employees to be included in the schedule of rules and rates of pay applying to Telegraphers; the character of the services to be performed; the hours of work; the conditions for overtime and Sunday work; the commission to be allowed on commercial messages; the question of payment while on leave of absence, and the general question as to rates of pay. As the result of so many and such wide differences, not only had the parties themselves found it quite impossible to reach a mutual agreement, but it was very difficult for the Board to induce them to sufficiently modify their demands as to bring them within the range of each other's terms. Thus, even after the whole ground in dispute had been carefully covered by the Board, and the first proposal for a general agreement submitted to the respective parties, it was found that their best terms, though approximately considerable, were still wide apart. Hence many subsequent proposals and negotiations had to be undertaken before any hope of a settlement was reached. It was difficult, even for the members of the Board to reach a quite unanimous conclusion on several points.

At several stages in the proceedings it appeared very doubtful as to whether a strike throughout the whole of the Canadian Pacific Railway System could be averted. However, the disastrous consequences of such an outcome were so apparent that renewed efforts were always made and various modifications of the terms suggested, until in the end the parties were brought sufficiently near together to justify the Board in submitting to them a final proposal, upon which the members of the Board had been able to agree.

This proposal was ultimately accepted by both parties, and, on being signed by the Board and representatives of the Company and of the Telegraphers, became the enclosed agreement.

The whole course of the negotiations in this difficult case clearly demonstrated the importance of having men like Mr. Nesbitt and Mr. O'Donoghue as representatives of the respective parties on the Board of Conciliation. While they possessed the entire confidence of those who had nominated them, they acted, not as advocates of the respective interests, but as independent arbitrators regarding the matters in dispute upon their merits, while at the same time recognizing that the spirit of compromise was essential to an actual settlement.

The case for the Telegraphers was handled with exceptional ability by Mr. D. Campbell; and it goes without saying that the interests of the Canadian Pacific Railway were ably advocated by men of such eminence and experience in railroad matters as Messrs. McNicholl and Leonard. Notwithstanding the difficulty and trying nature of many points in dispute, harmony and good feeling prevailed throughout the negotiations.

Yours very sincerely,

(Sgd.) ADAM SHORTT,  
Chairman Board of Conciliation.

#### Report of Board of Conciliation and Investigation.

As members of the Board of Conciliation and Investigation appointed to deal with the dispute between "The Canadian Pacific Railway Company and the Telegraphers, Train Despatchers, Agents, Telegraph Operators, Linemen and Levermen in their employment," we beg to report as follows.

The Canadian Pacific Railway Company was represented by Mr. D. McNicholl, Vice-President; Mr. J. W. Leon-

ard, Assistant General Manager of the Eastern Lines, and Mr. A. Price, General Superintendent of the Central Division of Western Lines.

The Telegraphers were represented by Mr. D. Campbell, Third Vice-President of the Order of Railroad Telegraphers, and E. Goulet, General Chairman System Division No. 7, assisted by G. D. Robertson, Chairman Eastern Lines; G. S. Morris, Chairman Western Lines; J. E. Trottier, member of Committee; J. C. Rooney, member of Committee; A. Houston, member of Committee; J. A. Hawkins, member of Committee; J. Austin, member of Committee, and P. W. Mooney member of Committee.

The sittings of the Board began on Friday, September 27th, and continued until October 10th, 1907.

The first sittings were occupied in discussing details of the various articles of the schedules proposed by the Telegraphers and the Railway Company respectively.

A copy of the schedule of the existing rules and wages applying to the Telegraphers, etc., of the C. P. R. is enclosed. A copy of the proposed amended schedule as presented by the Telegraphers is enclosed, marked Schedule "A," and a copy of the counter-proposals in the amended schedule of the Railway Company is enclosed, marked Exhibit "A." Both these proposed amended schedules, except as to the details of salaries, are, for convenient reference, presented in parallel columns in the enclosed Exhibit "B." The portions in which they differ from each other are printed in red ink.

As regards wages, the Company proposed that no change should be made in the existing rates. The Telegraphers proposed the various increased rates as shown in their schedule.

The difference between the proposals of the Telegraphers and of the Company were fully debated without restriction as to the evidence or exhibits which either party deemed pertinent to the matters under discussion. Liberty was given to each party to alter or amend their proposals as they saw fit. Mutual concessions were made, and provisional agreements reached upon several matters in

dispute. The points upon which a mutual agreement could not be reached during the first hearings before the Board were reserved for the consideration of the Board after all the matters in dispute had been canvassed.

The matters reserved for the determination of the Board having been carefully considered, they presented to both parties certain proposed articles of agreement as to rules and minimum rates of pay. As these, however, were not acceptable to either party, various modifications of them were discussed. It being found impossible to bring the parties to a mutual agreement, the Board ultimately decided upon the following schedule of rules and rates of remuneration as in their opinion a basis for a reasonable and equitable settlement of the points in dispute between the Railway Company and their Telegraphers:

#### CANADIAN PACIFIC RAILWAY.

##### RULES AND WAGES FOR TELEGRAPHERS, TAKING EFFECT OCTOBER 1ST, 1907.

The following rules and wages will govern the Telegraphers on the Canadian Pacific Railway:

When additional Telegraphers' positions are created, compensation will be fixed in conformity with that for positions of the same class as shown by this schedule.

ARTICLE 1. All employees assigned by proper authority to railway telegraph service of any character or duration, and also the station agents incorporated in the accompanying schedule of wages, will be considered Telegraphers within the meaning of this schedule, and are so called herein.

ART. 2. (a) The right of promotion of Telegraphers (except Train Dispatchers and Linemen) will extend over each Superintendent's District, and will be governed by merit, fitness and ability; where these are sufficient, the senior Telegrapher (except Train Dispatchers and Linemen) of not less than two years' service, will, on application, be transferred from one Superintendent's District to another on the same General Division, within thirty days from date of such application, and when so transferred, will be allowed seniority on the new District to the extent of three-fourths their length of service on the said General Division. In such case, the Telegrapher making the transfer will take his place on the extra list, and will have the right to file into bulletined positions as per Clause (c) hereof.

A Telegrapher applying for a transfer will be given a Transfer Certificate showing his length of service and the capacities in which he has been employed in the General Division, which will be his authority for claiming his seniority on the District to which he is transferring.

This provision will also apply to a Telegrapher of not less than two years' service, desiring to transfer from one General Division to another, except that in such cases the Transfer Certificate will not carry with it any seniority rights, but will entitle the holder to the position of Junior Extra Telegrapher on the Superintendent's District to which he is transferring.

Transfer Certificates will not be valid unless filed with the Superintendent of the District to which transfer is being made within thirty days from date of issue.

(b) A Telegrapher's seniority will date from the time he last entered the service as a Telegrapher. The seniority of Telegraphers employed on lines under construction or absorbed by the Company will date from their last appointment as a Telegrapher on such lines. When newly constructed lines are taken over by the Operating Department, all Telegraphers' positions will be considered vacant, and any Telegrapher in line of promotion to them will have fifteen days within which to make application for same.

(c) All vacancies and permanent appointments will be immediately bulletined by a "23" message over the Superintendent's District. When vacancies in positions are bulletined, the bulletin will state rate of compensation. Application for vacancies must be made within ten days from date of bulletin.

A Telegrapher declining to accept promotion in any instance does not forfeit his rights to the same or any other position he may be entitled to under seniority when a vacancy occurs. A Telegrapher on leave of absence when a vacancy occurs will not be debarred from claiming position and receiving the appointment on resuming duty, if entitled to it. A vacancy will be filled within thirty days after it occurs by the appointment of the men entitled to it.

When a vacancy occurs, the Superintendent will fill the same by appointing the senior man, who is, in his opinion, entitled to the position, but this will not prevent any Telegrapher senior to the man so appointed claiming his right, under Clause (a) hereof, to the position, provided he files his protest within ten days after the appointment has been bulletined as above.

(d) Telegraphers in the employ will be given preference in filling vacancies or openings on extension or new lines of the General Division, their application to be endorsed by the Superintendent of the District on which applicant is employed.

(e) In case of reduction in the number of Telegraphers employed, the Junior Telegraphers on the respective Superintendents' Districts will first be dispensed with. If their services were satisfactory, they will, on application, be given a Transfer Certificate, which will entitle them to preference in filling new positions or vacancies on other divisions of the system, provided they are available when required.

(f) If a position included in the attached schedule is abolished, the Telegrapher will be entitled to the position held by the Junior permanently located Telegrapher on the Superintendent's District.

(g) A complete list of all Telegraphers on each Superintendent's District, showing their seniority standing, will be kept on file in the respective Train Despatching offices open to the inspection of all Telegraphers concerned. This list will be subject to correction on proper representation from any Telegrapher, and a copy of it, corrected to date, will be furnished the General Chairman at the beginning of each year.

(h) Telegraphers will have the exclusive right to any position incorporated in the 1905 wage schedule, and any Telegraphers' positions subsequently added in accordance with preamble; also to any new Telegraphers' positions created by the absorption of other lines or the construction of new lines, when vacancies in such positions occur.

(i) Telegraphers will also be eligible and considered in line of promotion to the position of Agent at any of the stations not incorporated in the attached wage schedule, which have been omitted in view of conditions which may make it impracticable or unfair to fill these positions exclusively from one branch of the service.

(j) The right of promotion of Train Despatchers will extend over the General Superintendent's Division, and will be governed by merit and ability; these being sufficient, the senior Train Despatcher to have the preference. The order of promotion of Train Despatchers will be from Senior Relieving Despatcher to Trick Despatcher.

The seniority of a Train Despatcher will date from the time he was first appointed a Trick Despatcher, unless

by his own request he takes another position in the service, under which circumstances his seniority as a Train Despatcher will date from the time he was last appointed a Trick Despatcher. A Train Despatcher will retain his position and seniority standing in the ranks of the Agents and Operators.

Relieving Train Despatchers will be appointed from their respective Superintendent's Districts, if available, in accordance with clause (c) of this Article, and will be allowed sufficient time without pay to learn the work of train despatching under a regular Trick Despatcher, such time not to exceed two weeks, and they will remain on such District until they receive promotion to a Steady Trick, which may be claimed at any office on the General Division at which a vacancy occurs.

In the event of a vacancy occurring in a Train Despatcher's position, or new Train Despatcher's position created, the senior Train Despatcher in order of seniority will have the refusal of same.

(k) The right of promotion of Linemen will extend over each General Superintendent's Division (Railway), and will be governed by merit and ability; where these are sufficient, the senior Linemen will receive the preference.

Linemen will be specially considered in the line of promotion to the position of Foreman on the General Superintendent's Division (Railway) on which they are located.

ART. 3. No Telegrapher shall be suspended (except for investigation) or discharged until his case has first been investigated, and he has been proven guilty of the offence charged against him, the decision in such case to be arrived at within ten days from date of such suspension. If a Telegrapher is found blameless in the matter under investigation, he will be paid at schedule rates for time lost and extra expenses while attending such investigation, if away from home, and be reinstated. If detained more than ten days awaiting investigation at the Company's instance, he will be paid schedule wages for the time in excess of ten days, whatever the decision may be. Telegraphers may have the assistance of a co-Telegrapher if they so desire.

A written statement setting forth the result of an investigation and the reasons therefor will be furnished by the Company to the Local Board of Adjustment, if requested by it.

ART. 4. Lack of conveniences, such as school facilities, etc., will be taken into consideration in locating Telegraphers, but only when this can be done without infringing on the rights of their seniors in the service.

ART. 5. Telegraphers serving on Boards of Adjustment representing Telegraphers will be relieved without unnecessary delay (not to exceed ten days) and will be furnished free transportation for such purpose.

ART. 6. Telegraphers will be granted free transportation and leave of absence to attend their meetings. Such free transportation will not extend beyond the next section adjoining their Superintendent's District, and the leave of absence will not exceed two days, and will only be granted when it will not interfere with the requirements of the traffic and the service, and provided the Company is not thereby put to additional expense.

ART. 7. When a Telegrapher is transferred by order of the proper official, he will suffer no loss of schedule wages in consequence thereof, and will be allowed reasonable time (not to exceed four days without pay) and to arrange for the shipment of his household effects.

ART. 8. Telegraphers attending court or investigation at the request of the proper official of the Company will have their extra expenses paid by the Company in addition to their schedule wages.

ART. 9. Telegraphers will not be required to teach telegraphy, nor admit students, nor members of station staff, to their office.

ART. 10. Telegraphers required to work at wrecks, washouts and slides will, in inclement weather, be provided with shelter and be paid the necessary expenses for the time away from home.

ART. 11. A Telegrapher securing employment with the Company will, within thirty days from date of employment, have returned to him all service cards and letters of recommendation which have been taken up by the Company, except any previously issued by the Company.

ART. 12. A Telegrapher leaving the service of the Company will, on request, within five days, be furnished with a certificate by the proper official stating term or terms of service, capacities in which employed, and whether discharged or leaving the service of his own accord. If discharged, cause of dismissal will be stated.

If detained more than five days awaiting such certificate, he will be paid schedule wages for all time in excess of five days.

Unless otherwise requested, this certificate will be mailed to the Telegrapher at the place of last employment.

ART. 13. Telegraphers will be exempt from shovelling snow, stencilling cars, sifting coal ashes, attending to flower gardens, scrubbing stations, and cutting or piling wood. The unloading of way-freight from cars and putting away into shed shall be done jointly with Trainmen.

ART. 14. At stations where dwelling, fuel and light are provided, the dwelling will, as far as practicable, be reserved exclusively for the use of the Agent and his family, unless he elect to reside elsewhere.

A deduction of five dollars per month will be made from the schedule rating of all Telegraphers occupying Company's dwellings, unless in the opinion of the Superintendent, such amount should be reduced.

When wood is supplied for fuel, it will be cut in lengths not exceeding sixteen inches.

A telegrapher occupying a Company's dwelling, who is dismissed from the service, will be allowed to retain possession of the dwelling until he has been paid all monies due him by the Company.

The Company will keep its dwellings in good repair. Occupants must keep such dwellings and their surroundings clean, and must pay for repairs other than those due to ordinary wear and tear.

ART. 15. Telegraphers required to work on Sunday will be paid extra pro rata on schedule salary for such service based on thirty days per month (any portion of an hour less than thirty minutes not to count; any portion of an hour, thirty minutes or over to count as one hour) with a minimum compensation of twenty-five cents for each call for which one hour's service shall, if required be rendered.

Telegraphers will be required to handle commercial messages on Sunday only during hours required for railway service, except on agreement.

Telegraphers required for Sunday duty other than attendance on regular passenger trains, will be so advised on the previous day.

ART. 16. If Telegraphers are required to attend to switch or semaphore lamps, they will receive \$4.00 per month for six or less such lamps and 50 cents per month for each additional switch or semaphore lamp at such station. Nothing in this Article will relieve Telegraphers from their responsibilities under the rules. Telegraphers will keep train order signal lamps clean and in good condition, and lighted when required, without extra compensation.

ART. 17. Telegraphers who attend pumping engines or windmills, which work will be optional with them, will be paid ten dollars per month for attending to steam pumping engines and windmills, and five dollars per month for attending to windmills only.

Telegraphers shall, within office hours, attend to fires under water tanks within a quarter of a mile of their station, and must see that fire is in good condition immediately before going off duty, without extra compensation.

ART. 18. A Telegrapher required to leave his permanent location to do relief work temporarily will, without

change in salary, be allowed all necessary expenses on production of voucher.

Other Telegraphers doing relief work, except regular relieving Telegraphers, will be paid the same wages without expenses as the Telegraphers they relieve, provided wages are not less than his own.

ART. 19. Railway Telegraphers handling Canadian Pacific Railway commercial business will be allowed ten per cent. commission on all business between points reached by Canadian Pacific telegraph lines and connecting telegraph lines with which business is checked direct, and on Canadian Pacific Railway's proportion of cable-grams.

The income accruing to a station on account of telegraph commissions will be equitably divided between the Telegraphers performing the service, the Agent to be entitled to not less than one-third of the total amount.

ART. 20. (a) At offices where two or less Telegraphers are employed, twelve consecutive hours, including meal hour, shall constitute a day's work. At offices where more than two Telegraphers are employed, not more than ten consecutive hours' service, including meal hours, or at the Company's option, eight consecutive hours without meal hour, shall constitute a day's work. Except in cases of emergency, operators will have eight consecutive hours' rest per day.

The hours of duty of all Main Line Agents will commence between the hours of 7 and 9 o'clock a. m.

(b) Telegraphers working ten hours or more will be allowed sixty consecutive minutes for a meal between either 7 a. m. and 9 a. m. or 12 noon and 2:30 p. m., or 5 p. m. and 7 p. m., or between midnight and 2:30 a. m., or receive in lieu thereof one hour overtime, provided that a day Telegrapher working twelve hours will be allowed his meal hour between twelve noon and 2:30 p. m. This will not apply to service rendered the Express or Commercial Telegraph business.

Nothing herein will prohibit a Despatcher from granting two meal hours to Telegraphers working twelve hours. The intention being to grant regular meal hours so far as the business of the Company permits.

(c) Overtime shall be computed pro rata on schedule wages, based on thirty days per month, but in no case at less than twenty-five cents per hour, less than thirty minutes not to count, thirty minutes or over to count an hour, except that Telegraphers required to remain on duty after regular hours, if detained fifteen minutes, will be allowed one hour overtime for the first hour, or any portion thereof.

(d) If a Telegrapher is called before or after office hours, he will be allowed fifty cents, which shall cover one hour's service. If kept on duty more than one hour, overtime will be allowed thereafter as per Clause (c), except when a Telegrapher residing in a Company's dwelling is required to attend a schedule train due at his station within three hours after his regular twelve hours' duty, when he will receive twenty-five cents for the first hour of duty or any portion thereof, if kept on duty more than sixty minutes, overtime will be allowed as per Clause (c).

(e) The regular hours of duty will be specified by the Superintendent to all Telegraphers. If required for service outside these hours, Telegraphers will be given an official order as authority, and excused in the same manner.

(f) Overtime will not be allowed unless overtime tickets are mailed to the proper official within forty-eight hours from the time the service is performed. If overtime as claimed is not allowed, Telegraphers will be notified in writing within ten days from the time such service is performed, setting forth the reason for disallowance. Telegraphers will number overtime tickets consecutively for each month.

ART. 21. Eight consecutive hours' train despatching and time required to make transfer will constitute a day's work for a Trick Despatcher. Train Despatchers will not be required to do clerical work that will interfere with the proper handling of their trains.

ART. 22. If a Telegrapher considers himself over-taxed, his statement to that effect to the proper official will be carefully considered, and, if well founded, relief will be granted.

ART. 23. When the handling of Express and Telegraph business for which a commission payment is allowed, is withdrawn from any Telegrapher, the wages will be adjusted to conform with that of similar stations in the same locality where such work is not performed by them.

ART. 24. When a Telegrapher is assigned to a position and after a fair trial is found incompetent, he will take his place on the extra list, retaining his seniority rights.

ART. 25. Train Despatchers will be allowed three weeks' leave of absence each year, with full pay.

Other Telegraphers who have been in the employ of the Company four or more consecutive years, will be allowed two weeks' leave of absence each year with full pay. If the Company find it inconvenient to grant leave of absence during any year to a Telegrapher entitled to it under this rule, the Telegrapher shall, at his option, receive either compensation at his regular salary for the period, or in the next year additional leave of absence for a like period.

Application for leave of absence filed in January of each year will be given preference in order of seniority of applicant, and applicants will be advised in February of dates allotted them. January applicants will have preference over later applicants, and applicants after 30th September will not be entitled to salary compensation if Company is unable to relieve them in that year. The Company will, as far as practicable, relieve all applicants during the summer season, when so desired.

In the event of a Telegrapher being discharged or leaving the service on proper notice before obtaining the deferred leave of absence, he will be paid his salary for same.

ART. 26. Telegraphers will be granted transportation of their household goods and passes or reduced rates and

leave of absence in accordance with the general regulations of the Company as established from time to time.

ART. 27. A Lineman required to leave his own District will be allowed actual expenses, not to exceed one dollar per day and extra compensation commensurate with responsibility if called upon to take charge of any number of men.

District Linemen will be allowed actual expenses, not to exceed one dollar per day, while performing duties on their own district away from headquarters.

ART. 28. Application may be made to General Superintendent direct for general revision of schedule.

ART. 29. The preamble, and Clauses *b, c, d, e, f* and *g*, of Article 2; Articles 3, 4, 5, 6 and 7; Article 8 and Articles 11, 12, 22, 24 and 26 in the schedule of Rules and Wages for Telegraphers will apply also to Linemen

Linemen come under general rules as do other employees of Company as to holidays.

On the subject of remuneration, the Board agrees that a general increase of fourteen per cent. on the basis of the present minimum wage, as in the 1905 schedule, should be granted to Telegraphers.

Any position added or omitted from 1905 scale to date shall remain unless Local Committee and Superintendent otherwise agree.

This Schedule is to be become effective from the First of October, 1907.

## II. AWARD OF BOARD IN DISPUTE AT HOSMER MINES, B. C.

THE Department received, on October 21, the findings of the Board of Conciliation and Investigation established for the adjustment of the differences between the Hosmer Mines, B. C., and the coal miners in the employ of the controlling company. The application was received on September 16, and the Board was finally constituted on September 30, as follows: Frank H. Sherman, Taber, Alta., recommended by the employees; Frank B. Smith, recommended by the employing company, and His Honour Judge Wilson, chairman, recommended by the foregoing members of the Board.

The number of men concerned was estimated at one hundred, and the questions at issue related to wages and condition of labour generally, including the check-off system in the mines named.

The Board presented a unanimous report. The principal point in dispute

was alleged to be in regard to the rates paid for rock work, the men asking the same rate as that paid in metalliferous mines in British Columbia, and the Board agreed that the same rates should be paid, making due allowance for the difference in the cost of living in the respective localities. A modified schedule based on these conditions was appended to the report, as indicating the judgment of the Board on this point. The Board also recommended that the Company concede the check-off system.

The findings of the Board were not formally accepted before the Board by the representatives of the parties to the differences, but the chairman of the Board in a letter to the Honourable the Minister, accompanying the report, stated his expectation that he would shortly be able to forward to the Department the formal consent of the parties concerned to be bound by the report as provided by sec-

tion 62 of the Act. At the end of the month of October, no further word had been received, but the Department has no reason to believe that the findings of the Board are unacceptable to either party. The report of the Board is as follows:

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between

HOSMER MINES, HOSMER, B. C.,  
Employer,  
and

THE EMPLOYEES OF SAID HOSMER MINES,  
Employees.

To the Honourable the Minister of Labour:

Your Board of Conciliation and Investigation appointed herein beg to report as follows:

The Board met at Fernie, B. C., on the 14th day of October, 1907, and investigated the cause of dispute herein, and after attempts at adjusting the differences between the parties hereto, and failing, we proceeded on the 15th, 16th and 17th days of October to take evidence tendered by the parties touching the matters in question. The sittings were held at Hosmer, and witnesses were called and examined on behalf of both parties. The principal question in dispute was in regard to the rates paid for rock work, which rates do not seem to be covered by the rates agreed on between the Western operators and their employees. The men wished the same rate as is paid in metalliferous mines. The rates for that class of work suggested by the Board are those set out in the schedule annexed, and your Board would suggest that such rates be fixed and allowed. The Board think that the same rates should be paid for rock work in a coal district as are paid in the metalliferous district for the same class of work. The rates for rock work paid in the metalliferous district of Southern British Columbia are those asked for by the men, and the Board think that rate should be allowed, but the cost of living is less in this coal mining district than in the metalliferous district, according to the evidence adduced before us. We think, for that reason, a reduction in the wages

paid in quartz mines of 25 cts. per day for machine men, helpers and muckers, would be a reasonable one, and for that reason we have fixed the wages in these occupations at the rate set out in the schedule.

The rate asked for rock miners should, we think, be allowed at the rate asked for by the men and as set out in the schedule.

In regard to dumpers, we think the rate should be 25 cts. per hour for dumpers under cover and 27½ cts. per hour for those not under cover, and therefore exposed to the weather.

As to the other classes of labour, we think that the rates should remain as they now are, and recommend the same accordingly.

The question has been raised by the Company that the rates should be reduced to the scale paid by the Western operators, but that, we think, is not a question properly before us, as no formal request for the same has been filed with the department.

Dealing with the question, however, as if it had been properly before us, we find the present rates as paid should stand, and recommend the same accordingly.

We also recommend that the check-off system be conceded by the company.

In witness whereof we have set our hands this 17th day of October, 1907, at Hosmer, B. C.

(Sgd.) P. E. WILSON,  
F. H. SHERMAN,  
FRANK B. SMITH.

Machine men.....	\$3.75 per day,	8 hours.
Machine helpers.....	3.25 " "	8 "
Muckers.....	2.75 " "	8 "
Drivers.....	2.75 " "	8 "
Miners (rock).....	3.50 " "	8 "
Dumpers (under cover)...	.25 per hour.	
Dumpers (without cover)...	.27½ per hour.	
Outside labour.....	2.50 per day,	10 hours.
Blacksmiths.....	\$3.50-\$4.00	10 "
" helpers.....	2.75 per day,	10 "
Timber framers.....	3.50 " "	10 "
Tracklayers.....	3.25 " "	8 "
Bratticemen.....	3.25 " "	8 "
Hoistmen.....	2.89 " "	8 "
Firemen.....	2.75 " "	8 "

These rates to govern until the completion of the rock tunnels on the property.

This is the schedule referred to in the annexed report.

P. E. WILSON,  
Chairman

### III.—TERMINATION OF THE DISPUTE AT SPRINGHILL MINES, N. S.

THE strike of coal miners in the employment of the Cumberland Railway and Coal Company of Springhill, N. S., which commenced on August 1, was ended on October 31, when the men returned to work.

The strike, it will be remembered, was the result of a dispute between the Company and its employees, with regard to the question of payment for local stone in pillars. The points involved had been, with other matters, the subject of a reference to a Board of Conciliation and Investigation, presided over by the Honourable Mr. Justice Graham, of the Supreme Court, of Nova Scotia. The members of the Board failed to agree in their findings. Two reports were presented, a majority report signed by the chairman and the member of the Board appointed on the recommendation of the employer, and a minority report signed by the member appointed on the recommendation of the employees concerned. Neither of these reports being acceptable to both parties, the dispute remained unsettled, and a strike resulted on the date named.\* During the

month of October, as a result of efforts on the part of many public men of Nova Scotia, a conference took place between certain representatives of the employees and the Honourable Mr. Justice Graham, at which conference Judge Graham made certain verbal statements with a view to assisting the men to an interpretation of the report and recommendations signed by the majority of the Board. Subsequently a written memorandum to the same intent dated October 15 was addressed to the men by Judge Graham, a copy of which was received in the Department on October 21. On October 24, a further memorandum from Judge Graham on the subject was received in the Department, copies of which were forwarded from the Department to the respective parties to the dispute. After various enquiries of the Department with regard to the possible reference to a Board of Conciliation and Investigation of matters remaining in dispute between the Company and its employees and receiving information on the points raised, the men resumed work on October 31.

\* The two reports were published in full in the *Labour Gazette* for August 1907.

### AN OPINION OF THE ACT FROM A MEMBER OF A FORMER BOARD.

THE Honourable the Minister of Labour received, on October 17, the following letter from Mr. Duncan McCormick, K. C., relating to the Industrial Disputes Investigation Act, 1907, Mr. McCormick having been a member of the Board established for the adjustment of the differences between the Montreal Cotton Company and its employees at Valleyfield:—

Alliance Building, 107 St. James St.  
Montreal, Oct. 17th, 1907.

Dear Sir:—

The dispute between the Montreal Cotton Company and their employees having been successfully terminated by

means of the legislative medium placed at public disposal by the parliamentary act, with which your name is now so intimately associated, it may possibly interest you to know to what extent I was personally impressed, in a general way, as a member of the Board of Conciliation and Investigation with the working and practicability of the said instrument.

Speaking briefly, and without entering into any technicality or detail, the most valuable feature of the scheme, to my mind, is the spirit of fairness and of reasonableness to both parties in which it has been conceived.

“Freedom with order, and unalterable respect for law along with indelible res-

pect for individual right," is, as Mr. John Morley writes in his essay "On Compromise," of the very essence of ideal justice in a state where the controlling power is democratic. And as he further remarks in the same connection, "the right of thinking freely and acting independently, of using our minds without excessive awe of authority, is now a finally accepted principle, in some sense or other, with every school of thought that has the smallest chance of commanding the future".

Some such train of thought must seemingly have inspired the conception of "The Industrial Disputes Investigation Act," and the striking success of the principle, so far, in the realm of utility, is a significant tribute to the wisdom and insight of this distinguished thinker and statesman.

Without any hard and fast code of judicial procedure, the act provides a platform for broad and unfettered discussion, where each party feels a freedom of individuality that, in itself, tends to conciliation, and to the creation of a mental atmosphere that inevitably ma-

kes for good will and mutual understanding. Strange as at first sight it may appear, the very elasticity of the arrangement, is, in my opinion, the secret and warranty of its success.

In the hands of men temperamentally fitted to adjust disputes, the absence of any arbitrary element in the process of settlement without doubt works out successfully in the direction of amicable agreement.

In conclusion, I have no hesitation in stating my belief that whatever slight modification in detail may become necessary, the measure as a whole, is one that will prove effective and well adapted to the elimination of friction between capital and labour in the future industrial development of the country.

Complimenting you on the authorship of such a beneficent piece of legislation.

I am, Yours sincerely,

(Sgd.) DUNCAN McCORMICK.

HON. RUDOLPH LEMIEUX,  
Minister of Labour  
Ottawa.

#### ALBERTA LEGISLATION AFFECTING LABOUR, 1907.

THE second session of the first Legislative Assembly of Alberta opened on January 24, 1907 and prorogued on March 16, 1907. Some forty-nine acts were assented to at prorogation, including a number which are of special interest from the standpoint of industry and labour. A review of these is presented in the following article: (\*).

##### The Railway Act.

An act "respecting railways" (1) was among the most important and comprehensive measures of the session. The act sets forth at length the procedure to be observed in the organization of railway companies, with special reference to capitalization, meetings of share-

holders, duties of railway presidents and directors, dividends, shares, borrowing and other powers of companies, the location of lines, the taking over of lands, the construction of branch lines and of railway and highway crossings, the protection of farm crossings, the erection of telegraph and telephone lines and of bridges, tunnels and other structures. It is provided that railways 30 miles or less in length must be constructed and put in operation within two years from the incorporation of the company (2). The wages of the labourers employed on the construction of railway lines subsidized by the province of Alberta are protected by a clause guaranteeing the payment of the current or fair rate of wages in the district in which the work is being performed (3). No agreement is permitted between

(\*). A copy of the Acts of the Session, in the form in which they received the Royal Assent, was received at the Department of Labour, Canada, during October, by courtesy of the King's Printer, Edmonton, Alta.

( ) Chap. 8.

(2) Sec. 68.

(3) Sec. 153.

a railway company and its employees relieving the former from liability for personal injury to any workman; similarly, contributions by the company to the funds of any insurance or provident society, whereby compensation is made to an employee sustaining injury, do not in any way release the company from liability for damages for personal injury (<sup>4</sup>). Provision is made for the inspection of railways before opening, the proper equipment of trains, the qualification of engine drivers (these being required to have had at least three years experience as locomotive firemen); the packing of frogs, wing-rails, etc.; the reporting of accidents; the prevention of fires; and the passing of by-laws and regulations. Passenger conductors are given the power and authority of constables (<sup>5</sup>). An annual statistical return must be made by every company with regard to such matters as capital, traffic, working expenses, etc., and a semi-annual return of the accidents which have occurred during the half year immediately preceding (<sup>6</sup>). An important section is that which provides machinery for the acquisition of railways by the government of the province, in case such acquisition is deemed in the public interest, including the fixing by arbitration of the amount of compensation to be paid (<sup>7</sup>). Other sections of the act have reference to tolls, express companies, interchange of traffic, and offences and penalties. The operation of street cars on Sunday is forbidden in the closing section of the act under a penalty of \$400.

#### The Steam Boilers Act.

The steam Boilers Act, passed in 1906, was amended in several important particulars. The section defining the duties of inspectors in inspecting boilers was amended by the addition of seven clauses requiring, respectively, that boilers be stamped so as to show the tensile strength of the material; that hydro-

static tests be not less than fifty per cent. above the working steam pressure; that openings in the boiler shell over one and one quarter inch in diameter be reinforced by a suitable plate; that boilers requiring a safety valve to be over three inches in diameter be equipped with twin valves; that man holes in boilers to permit of inspection and cleaning be at least 10 inches by 15 inches in size and be strengthened with a reinforcing ring, the doors to be provided with two bolts rivetted to the inside; that the stress on stays does not exceed 8,000 pounds per square inch of net section, if tensile strength lies between 54,000 and 64,000 pounds, or not over one-eighth of the breaking strain, and having reference to the strengthening of steam domes. It is also provided that in the operation of large plants having a battery of boilers and where the horse power exceeds 500, the plant must be in charge of a holder of a first-class certificate, with the holder of at least a second-class certificate under him in charge of the boilers on both day and night shifts. A candidate for a final certificate, unable, through lack of education, to write, may secure the services of a person to write his answers to questions, provided the person so engaged be not an engineer and that the answers to the questions are written in the presence of an inspector. On the recommendation of an inspector and the payment of a fee of \$3.00, a second provisional certificate, valid for one year, may be granted to any person who has submitted to an examination in accordance with the provisions of the act, but has failed to receive a recommendation for a final certificate. No further or other provisional certificate than these may be granted. (<sup>8</sup>).

#### The Taxation of Corporations.

An act was passed providing for the taxation of banks, joint-stock companies and other corporations. Among the rates fixed by this measure were the following:

(<sup>4</sup>) Sec. 154.

(<sup>5</sup>) Secs. 194 and 195.

(<sup>6</sup>) Secs. 224 and 225.

(<sup>7</sup>) Secs. 233 to 238.

(<sup>8</sup>) Chap. 5, sec. 18.

*Banks.*—Head offices are required to pay \$400 annually and \$200 additional for each branch up to four, all branches in excess of four and up to ten to pay \$100 each.

*Private banks.*—A tax of \$200 annually is levied, except in villages, in which case the tax is \$100, with \$25 added for each branch.

*Insurance companies* will pay a tax of one per cent on gross premiums with certain exceptions.

*Loan companies* will pay \$100 on capital up to \$100,000, and \$75 on each additional \$100,000 or fraction thereof of paid-up capital.

*Trust companies* will pay a tax of \$100 per annum where the paid-up capital is \$100,000 or less, and a sum of \$50 on every additional \$100,000 or fraction thereof of paid-up capital. Where the gross earnings of a trust company are \$25,000 or over, the company must pay a further sum of \$500 per annum.

*Street railway companies* will pay a tax of \$200 per annum, and \$10 for each mile of track in excess of 20 miles.

*Telegraph companies* are required to pay a tax of \$1.00 per mile for every mile of line.

*Telephone companies* are taxed 50 cents per instrument, in cities of 10,000 inhabitants or over, and 25 cents on each instrument in localities having a population of less than 10,000.

*Gas companies* will pay \$500 annually.

*Electric light companies* are taxed \$500 in cities of 10,000, \$100 in cities of less than 10,000, and \$25 in towns and villages. Municipally operated plants are exempted from this tax.

*Express companies* having over 100 branch offices will pay \$1,000 per annum, and those having over 50 but not more than 100 offices, \$500 per annum (°).

#### The Noxious Weeds Act.

An act was passed to assist in securing the destruction of noxious weeds, under conditions which are of considerable importance to the agricultural interests

of the province. The appointment of inspectors for the enforcement of the act is provided for, and their duties defined. The sale or disposal of grain intended for seed purposes, in which there are more than five seeds of any noxious weed per 1,000 seeds of such grain is forbidden. Similarly, bran-shorts, crushed grain or screenings containing the seeds of noxious weeds must not be disposed of except in closely woven and securely tied sacks, to be burnt or fed to sheep within enclosures which are the property of the feeders. A farmer, however, may remove to his own farm from an elevator or mill screenings of his own grain in closely woven sacks. Threshing machines must be cleaned before removal from one setting to another, and the grain as delivered by a thresher to the owner must not contain more than 100 seeds of noxious weeds, other than wild oats, in every 1,000 seeds of grain. All screenings containing the seeds of noxious weeds must be destroyed within five days after the grain is threshed or removed in closely woven sacks (1°).

#### The Dairymen's Act.

An act was passed providing machinery for the incorporation of associations for the manufacture of butter and cheese. Such associations must consist of five members, and stock to the value of at least \$1,500, of which \$1,000 is paid up, must be subscribed. The site, plans and specifications of buildings for the manufacture of cheese and butter must be approved by the Minister of Agriculture. The act also provides for the appointment of a dairy commissioner, and for the making of loans to associations up to the amount of \$1,500 (1°).

#### Miscellaneous.

In an *Assignment Act* passed during the session, the usual clause is inserted giving to workmen's wages, not exceeding three months wages, a privileged

(1°) Chap. 15.

(11) Chap. 16.

claim in assignments for the benefit of creditors (<sup>12</sup>).

In an act passed for the protection of *game*, provisions are inserted regulating the sale of game heads and forbidding the exportation of low grade furs, except by permission of the Minister of Agriculture (<sup>13</sup>).

A by-law providing for the granting of a bonus of \$100,000 to the *Grand Trunk Pacific Railway Company*, with exemption of taxation, by the city of Edmonton was authorized by special act (<sup>14</sup>).

It is provided by an addition to the *Interpretation Act* that legislation enacted previous to September, 1905, and having reference to the North-West Territories, shall apply to the province of Alberta (<sup>15</sup>).

(<sup>12</sup>) Chap. 6, sec. 28. For a reference to the provisions of the law on this point in other provinces of the Dominion, see special article dealing with legislation for the protection of wages in Canada, published in the *Labour Gazette* for October, 1906, at page 377.

(<sup>13</sup>) Chap. 14, secs. 11, 12 and 22.

(<sup>14</sup>) Chap. 36.

(<sup>15</sup>) Chap. 5, sec. 20.

An act passed in 1906 for the encouragement of the *sugar beet* industry was amended verbally in the section defining the amount to be paid to persons establishing plants. The alterations have the effect of dating all such payments from the passage of the act (<sup>16</sup>).

The following railway companies were incorporated:—

- The Diamond Railway Company, Limited.
- The Calgary and Knee Hill Railway Company.
- The Knee Hill Railway Company.
- The Crow's Nest and Prairie Electric Railway Company.
- The Red Deer Railway and Power Company.
- The Lethbridge Radial Tramway Company.

Among other important legislation of the session were a *Village Act* (Chapter 10); a *Local Improvements Act* (Chapter 11); a *Public Health Act* (Chapter 12) and a *Vital Statistics act* (Chapter 13). Clauses are inserted in the *Public Health Act* providing for the proper inspection of foods which are offered for sale (<sup>17</sup>).

(<sup>16</sup>) Chap. 5, sec. 21.

(<sup>17</sup>) Chap. 12, secs. 50 to 52.

## SASKATCHEWAN LEGISLATION AFFECTING LABOUR, 1907.

THE second session of the first legislature of the Province of Saskatchewan, which began on the 21st day of February, 1907, was closed by prorogation on the 3rd day of April, 1907 (<sup>1</sup>). The number of acts passed during the session was 49. A review is given in the following article of the several measures included in this number, having reference to industrial and labour conditions.

### The Mechanics' Lien Act.

A *Mechanics' Lien Act* was passed, similar in general outline to existing legislation in the other provinces (<sup>2</sup>). Under its provisions, any person perform-

ing service upon or furnishing materials for use in the construction of a building, wharf, trestle, mine, etc., is entitled to a lien for the price of his work or material attaching directly upon the estate or interest of the owner. Agreements waiving the rights of workmen under the act are null and void. The amount of the lien, however, must not be greater than the sum payable by the owner to the contractor, though where the lien is claimed by any other person than the contractor, the amount claimed is limited to the amount owing the contractor or subcontractor, or other person for whom the work has been done or the materials furnished. The owner is permitted to deduct a percentage of the contract price for 30 days in order to meet such liens, and payment may be made direct by an owner to the persons entitled to a lien. A mechanics' lien is given priority over all judgments, executions, attachments, etc., and over all conveyances and mort-

(<sup>1</sup>) A copy of the acts of the session, in the form in which they received the Royal Assent was received at the Department of Labour during October, by courtesy of the Government printer, Regina, Sask.

(<sup>2</sup>) For a review of this legislation throughout Canada see the *Labour Gazette* for September and October 1907, at pages 307 and 414 respectively. See also article elsewhere in present issue. The provisions of the Saskatchewan act are not included in the first two installments of this article.

gages, after registration of the lien. Liens for 30 days' wages have priority over all other liens, and any device to defeat this priority is null and void. The act also defines the procedure to be followed in registering, transmitting and discharging liens. With regard to the duration of a mechanics' lien, it is provided that a lien ceases if not registered within 30 days. A lien-holder is at any time entitled to information concerning, and inspection of the contract <sup>(3)</sup>

### The Taxation of Corporations

A special act was passed respecting the taxation of corporations. The more important rates were fixed as follows:—

*Banks.*—Head offices are required to pay a tax of \$400, with an additional sum of \$100 for each branch office or agency up to four in number, and an additional tax of \$50 for each branch office or agency over four and up to eight in number. For each branch office or agency over eight in number the tax is \$25.

*Private banks.*—Head offices are taxed \$200 when situated in a city or town and \$100 when in a village with an additional tax of \$25 for each branch or agency.

*Insurance companies.*—The tax is one per cent. on gross premiums of life insurance companies, and two thirds of one per cent. on premiums of other insurance companies.

*Loan and trust companies.*—The tax is fixed at forty cents for each \$1,000 employed.

*Telegraph.*—The rate is one per cent. on gross receipts.

*Express companies.*—A tax of \$100 is imposed, with an additional tax of \$3.00 for each branch office over 25 in number.

*Land companies.*—Companies having among their assets money unpaid on sales of lands are to be taxed \$20, unless the amount of unpaid purchase money exceeds \$50,000, in which case

the rate is forty cents for every \$1,000 remaining unpaid at the end of the year. <sup>(4)</sup>

### Miscellaneous.

The sections of the Ordinance of 1904, *respecting Masters and Servants*, having reference to counter claims by employers, procedure on trial, and judgments in connection with proceedings for non-payment of wages were, repealed. <sup>(5)</sup>

In a *Jury Act* passed during the session, the following were declared to be exempt from serving as jurors:—Governments officials and employees licensed; ferrymen and mail carriers; members of the N. W. Mounted Police force; salaried firemen in the employ of any municipality; railway employees; telegraph operators; clerks of chartered banks; and millers in actual employment. <sup>(6)</sup>

The Ordinance of 1903 *respecting hail insurance*, was amended, permitting the Minister to enter into contracts to indemnify against loss to growing crops by hail, to the amount of \$5.00, instead of \$4.00 as previously, for every acre insured. A re-arrangement of the fees to be paid was also made, the present rates being eleven cents for each acre to be insured at the rate of \$3.00; fifteen cents for an insurance of \$4.00 per acre; and nineteen cents where the rate is \$5.00 per acre. <sup>(7)</sup>

By an act *respecting open wells and others things dangerous to stock*, it is forbidden to have any open excavation of a sufficient area and depth to be dangerous to stock which may come or stray upon the premises. The storing of unprotected grain is also prohibited. No proceedings to recover a penalty under this act may be taken except by a person whose stock has been killed or injured, or is liable to be killed or injured by reason of the non-observance of the act. The maximum penalty is fixed at \$25. <sup>(8)</sup>

<sup>(4)</sup> Chap. 22.

<sup>(5)</sup> Chap. 32, sec. 4. For reference to these provisions see *Labour Gazette* for August, 1906, p. 158.

<sup>(6)</sup> Chap. 11, sec. 4.

<sup>(7)</sup> Chap. 29.

<sup>(8)</sup> Chap. 30.

<sup>(3)</sup> Chap. 21. The provisions of this act, in so far as they relate to procedure for the enforcement of liens, are set forth in a special article published elsewhere in the present issue, dealing with legislation throughout Canada with regard to the enforcement of mechanics' liens.

LEGISLATION IN CANADA WITH REGARD TO MECHANICS' AND WAGE-EARNERS'  
LIENS—*Continued.*

THE procedure by which mechanics' liens for wages may be realized in Canada differs considerably in detail in the several provinces. In the following statement the general nature of the proceedings for enforcement in each province is set forth, with particular reference to the more important legal steps to be taken in bringing suits for recovery of wages under the several acts.

Enforcement of Mechanics' Liens in  
Nova Scotia.

In Nova Scotia mechanics' liens may be enforced by actions brought in the County Court of the district in which the lands charged are situated, according to the ordinary procedure of the court (<sup>1</sup>). The action must be commenced by filing in the office of the clerk a statement of the claim verified by affidavit (<sup>2</sup>). Any number of lien-holders claiming liens on the same property may join in an action, and any action brought by a lien-holder shall be regarded as having been brought by all the other lien-holders on the property, all lien-holders served with a notice of the trial to be treated as if they were parties to the action (<sup>3</sup>). Every lien-holder who is not a party to the action must file his claim verified by affidavit (<sup>4</sup>). A statement of claim must be served within a month after it is filed, though the court

may extend the time for service (<sup>5</sup>). The statement of the defence must be in a prescribed form with an affidavit of verification, and must be delivered within the same time as for entering an appearance in an action in the Supreme Court (<sup>6</sup>).

The form of the trial and the powers of the court are set forth in full detail. After the delivery of the statement of defence, where the plaintiff's claim is disputed, or after the time for the delivery of statement of defence in all other cases, if it is desired to try the action otherwise than at the ordinary sittings of the court, either party may apply to the judge to fix a date for the trial. On the day appointed, the case must be fully heard, and every effort made to dispose finally of the action and adjust the rights and liabilities of the parties involved (<sup>7</sup>). The judge, if he sees fit, may order the estate or interest charged with the lien to be sold after a reasonable time for advertising and the sale or removal of any materials may also be ordered (<sup>8</sup>). Lien-holders, who have not proved their claims at the trial, are permitted to prove them subsequently at any time before the amount realized for the satisfaction of liens has been distributed, and if their claims are proved, they may share in the distribution upon such terms as to costs, etc., as may be considered just (<sup>9</sup>). Lien-holders for an amount not exceeding \$100, or lien-holders not parties to the action, may attend in person at the trial, or may be represented by a solicitor (<sup>10</sup>). All moneys realized from a sale are to be paid into the court to the credit of the action, and the judge who ordered the sale of the lands must direct the distribution thereof, adding to the claim of the person conducting the sale, his actual disbursements incurred in con-

(\* In previous articles dealing with legislation in Canada with regard to mechanic's and wage earners' liens, published in the *Labour Gazette* for September and October, 1907, at pages 307 and 414, respectively, the origin and nature of mechanics' liens were described in detail, with special reference to the manner in which such liens attached to property, the amount to which liens are limited, the protection of the interests of owners, the manner in which liens may be registered, consolidated and transmitted, the rights of lien holders as to priority of claim, security of lien holders, mechanics' lien on chattels, etc. See also article dealing with Saskatchewan legislation affecting labour, 1907, published elsewhere in present issue, for statement with reference to mechanics' lien legislation enacted in that province during the present year.

(<sup>1</sup>) N. S., stat. 1904, chap. 25, sec. 2.

(<sup>2</sup>) R. S. N. S., 1900, chap. 171, sec. 28, sub-sec. 2.

(<sup>3</sup>) R. S. N. S., 1900, chap. 171, sec. 28, sub-secs 3 and 4.

(<sup>4</sup>) R. S. N. S., 1900, chap. 171, sec. 28, sub-sec. 5.

(<sup>5</sup>) R. S. N. S., 1900, chap. 171, sec. 28, sub-sec. 6.

(<sup>6</sup>) R. S. N. S., 1900, chap. 171, sec. 29.

(<sup>7</sup>) R. S. N. S., 1900, chap. 171, sec. 30, sub-sec. 1.

(<sup>8</sup>) R. S. N. S., 1900, chap. 171, sec. 30, sub-sec. 2 and 3.

(<sup>9</sup>) R. S. N. S., 1900, chap. 171, sec. 30, sub-sec. 4.

(<sup>10</sup>) R. S. N. S., 1900, chap. 171, sec. 30, sub-sec. 5.

nection therewith. Where sufficient to satisfy the judgment and costs is not realized, the judge must certify the deficiency and the names of the persons who are entitled to recover, as well as the persons adjudged to pay the same, it being permitted to enforce the law by execution or otherwise as a judgment of the court <sup>(11)</sup>.

Eight clear days' notice must be served by a person obtaining an appointment, fixing the date and place of trial upon the solicitors for the defence and upon all lien-holders known to him, who have registered their liens, and upon all other persons having any registered charge against the lands in question. This notice must be served personally, unless otherwise directed by the court <sup>(12)</sup>.

Any lien-holder may apply for the carriage of the proceedings and may be granted the same by the judge, being constituted thereupon the plaintiff in the action for all purposes in connection with the proceedings <sup>(13)</sup>.

The judgment of the court in all cases where the total amount of the claims is \$100 or less, is binding and without appeal, though another trial may be granted if application is made within 14 days after judgment is rendered <sup>(14)</sup>. In actions where the total amount of the liens exceeds \$100, an appeal to the Supreme Court is allowed, whose judgment shall be final <sup>(15)</sup>. though a judge of the Supreme Court may, upon the application of any party to an action to enforce a lien, transfer the action to the County Court of the district in which the lands are situated, in which case the latter shall have full power and authority to determine the action <sup>(16)</sup>.

All costs under the act are at the discretion of the court, or judge <sup>(17)</sup>. In the case of claims filed in the city of Halifax, in an action to enforce a mechanics' lien, a fee of fifty cents is payable <sup>(18)</sup>.

Where a deficiency remains after the sale of a property to meet the claims of lien-holders, the owner thereof is still liable to the lien-holders for the amount, as well as for any costs of the court for which he may be liable, and the amount may be recovered by the usual process of the court <sup>(19)</sup>.

A schedule is appended to the act giving the form in which certificates vacating liens must be made.

It is expressly provided in Nova Scotia that when a claimant for a mechanics' lien fails in court to establish a valid lien, he may nevertheless recover a *personal judgment* against the parties to the action for any sum that is due to him and which he might recover in an action on the contract <sup>(20)</sup>.

#### Enforcement of Mechanics' Liens in Prince Edward Island.

Under the Prince Edward Island Act of 1879, proceedings to recover mechanics' liens may be taken, when the amount of the claim is within its jurisdiction, in the County Court of the county in which the land charged is situated, or in the Supreme Court. The judge may proceed in a summary manner, and in default of payment, may direct the sale of the estate charged, and take such other proceedings in settlement of the action as he may think proper <sup>(21)</sup>. Any conveyance under the seal of the Supreme Court is to be effectual in passing the interest or estate sold. Fees and costs are to be, as in similar matters, according to the ordinary procedure of the courts <sup>(22)</sup>. In other cases the lien may be realized in the Court of Chancery <sup>(23)</sup>. The sale and removal of machinery may also be authorized by a judge in settlement of a claim of this nature <sup>(24)</sup>.

The act of amendment passed in 1882 contained a number of provisions defining in further detail the procedure to be taken in realizing a mechanics' lien. After proper registration, it is provided

<sup>(11)</sup> R. S. N. S., 1900, chap. 171, sec. 30, sub-sec. 6.

<sup>(12)</sup> R. S. N. S., 1900, chap. 171, sec. 31.

<sup>(13)</sup> R. S. N. S., 1900, chap. 171, sec. 33.

<sup>(14)</sup> R. S. N. S., 1900, chap. 171, sec. 34.

<sup>(15)</sup> R. S. N. S., 1900, chap. 171, sec. 35.

<sup>(16)</sup> N. S., stat. 1904, chap. 25, sec. 4.

<sup>(17)</sup> R. S. N. S., 1900, chap. 171, sec. 36.

<sup>(18)</sup> R. S. N. S., 1900, chap. 171, sec. 37.

<sup>(19)</sup> R. S. N. S., 1900, chap. 171, sec. 38.

<sup>(20)</sup> R. S. N. S., 1900, chap. 171, sec. 42.

<sup>(21)</sup> P. E. I., stat. 1879, chap. 8, sec. 13.

<sup>(22)</sup> P. E. I., stat. 1879, chap. 8, sec. 13, sub-sec 2 and 3.

<sup>(23)</sup> P. E. I., stat. 1879, chap. 8, sec. 14.

<sup>(24)</sup> P. E. I., stat. 1879, chap. 8, sec. 15.

that the debtor may be summoned for examination under oath, with regard to the claim, providing the period of credit which may have been given by the lien-holder had expired<sup>(25)</sup>. The form of the summons is duly defined, one of its provisions being that the debtor must appear for examination within 10 days<sup>(26)</sup> the service of the summons and the proof of the service to conform to the ordinary custom of the court<sup>(27)</sup>. If the debtor does not deny the debt, or refuses to appear, the judge may order the land or material charged by the lien to be sold by public auction after due advertisement, and in other respects as the judges may consider most expedient to satisfy the lien<sup>(28)</sup>. After the sale, a deed or bill of sale, according as the property is real or personal, operates as an absolute conveyance of the property<sup>(29)</sup>. A party interested in the premises charged by the lien may apply to have the proceedings stayed on the ground of fraud or collusion between the persons registering the lien, and the judge, in that case, may make such orders as may seem proper or the justice of the case requires<sup>(30)</sup>. In case a partial payment of the claim is made, the judge may order a partial sale to satisfy the claim, but the lien-holders may proceed nevertheless to enforce the balance of the claim<sup>(31)</sup>. If any surplus arises from the sale or partial sale of the property, it must be paid out by order of the judge to such persons as he may consider legally entitled thereto, but no such payment may be made until the persons claiming the lien have abandoned or substantiated their rights to a lien for the balance<sup>(32)</sup>. Sales made under the act must be made by the sheriff of the county in which the land or property to be sold is situated, though a judge may order otherwise if he deems it advantageous<sup>(33)</sup>.

In case a lien-holder is shown to have wrongfully refused to grant a discharge of a lien, or to have claimed a larger sum than was justly owing to him, the judge may order him to pay such costs as may, in the opinion of the court, be fitting<sup>(34)</sup>.

Nothing in the Prince Edward Island Act is to be construed as debarring any one from pursuing a common law remedy to recover any claim for wages<sup>(35)</sup>.

#### Enforcement of Mechanics' Liens in New Brunswick.

In *New Brunswick*, no writ of summons is required in enforcing a mechanics' lien, but the claimant may file a statement of his claim, verified by affidavit, with a judge of the County Court of the county in which the lands are situated<sup>(36)</sup>. The judge thereupon must issue a certificate in duplicate, and upon registration of this certificate, the action is deemed to have been commenced against the owner and all other parties against whom the lien is claimed<sup>(37)</sup>. The judge, at the same time, must appoint a time and place for the hearing of the case, due notice being served on the owner and other proper parties at least 15 days prior to the first proceedings of the action<sup>(38)</sup>. Within 10 days after the fixing of the time and place in this manner, the defendants in the action may file a notice with the judge disputing the plaintiff's right to a lien<sup>(39)</sup>. The judge thereupon, before taking further proceedings, must determine the question raised by the notice, and if so required by any of the parties, may issue a certificate of his finding in the matter, entering the same in his book if no request is received<sup>(40)</sup>. Where the plaintiff's lien, however, is not disputed in this manner, and the proceedings are instituted by a sub-contractor, the owner must file with the judge a verified statement at least eight days before the hearing of the case,

<sup>(25)</sup> P. E. I., stat. 1882, chap. 11, sec. 1.

<sup>(26)</sup> P. E. I., stat. 1882, chap. 11, sec. 2.

<sup>(37)</sup> C. S. N. B., 1903, chap. 147, secs. 40 and 41.

<sup>(38)</sup> C. S. N. B., 1903, chap. 174, secs. 42 and 43.

<sup>(39)</sup> C. S. N. B., 1903, chap. 147, secs. 44.

<sup>(40)</sup> C. S. N. B., 1903, chap. 147, secs. 45 and 46.

showing to what extent he admits his indebtedness in the matter of the plaintiff's lien and other liens of the same class. In case the owner omits to file this statement, or files an untrue statement, the judge may order him to pay all costs incurred in establishing the true amount owing by him <sup>(41)</sup>. The lien-holders must also submit a verified statement of the amounts due to them within six days of the hearing of the action, in which credit must be given for all sums in cash, merchandise or otherwise, received from the debtor <sup>(42)</sup>. As in Nova Scotia, a lien-holder, who has registered his lien, but has not filed his claim within the time limit set forth, may be allowed by the judge to share in the distribution of any sum collected for the satisfaction of a lien, upon such terms as to costs as appear just. <sup>(43)</sup> Having received the above statements, the judge must proceed to take an account of what is due from the owners, and what is due to the respective lien-holders, and also to make an apportionment of the costs, settle priorities, and otherwise conduct inquiries with a view to the adjustment of the several claims. On the completion of this duty, he is required to make a report as to the result of his inquiry, and direct that any money found due by the owner shall be paid into a bank to the credit of the action at the expiration of one month from the date of the report <sup>(44)</sup>. If any dispute arises as to the amount due by the owner for the satisfaction of mechanics' liens, or as to the amount claimed to be due to any of the lien holders, the costs occasioned by the dispute must be borne as the judge directs <sup>(45)</sup>. In case it is found by the judge that nothing is owing by the owner, all further proceedings must be stayed, with costs at the discretion of the judge, and at the expiration of 14 days thereafter, a certificate may be granted vacating the lien of the plaintiff and all other liens of the same class <sup>(46)</sup>. Where it is found

that something is owing by the owner, he may pay the amount into a bank named by the judge, to the credit of the action on or before a day appointed for payment. The judge may thereupon vacate the lien of the plaintiff and all other liens of the same class <sup>(47)</sup>, and may pay out the money to the parties entitled thereto <sup>(48)</sup>. The owner's costs in obtaining and registering a certificate vacating the lien are at the discretion of the judge <sup>(49)</sup>. Upon the registration of a certificate of vacation, liens are declared vacated and discharged <sup>(50)</sup>. In default of payment by the owner within the time directed by the judge's report, the judge, on application from the plaintiff, may order a sale of the land for the satisfaction of the lien <sup>(51)</sup>, the judgment for a sale to be entered in the office of the Clerk of the County Court <sup>(52)</sup>. The sale must be conducted by the sheriff <sup>(53)</sup>, who must pay the proceeds into a bank to the credit of the action, and make a report upon the sale to the judge, the latter taxing the costs of the sale and apportioning the money realized among the parties <sup>(54)</sup>. In the carrying out of a sale and apportioning the moneys realized thereby, the plaintiff is regarded as representing all the other lien-holders unless the judge otherwise directs, and the lien-holders of each class rank *pari passu* for the several amounts, the proceeds of the sale being distributed among them pro rata according to their several claims and rights <sup>(55)</sup>. The judge may add parties as he may deem necessary from time to time, and the death of an owner or another defendant shall not cause the proceedings to abate, but they may be continued against the personal representatives of the owner or other defendants <sup>(56)</sup>. A similar provision to that in Nova Scotia with regard to the

<sup>(42)</sup> C. S. N. B., 1903, chap. 147, sec. 48.

<sup>(43)</sup> C. S. N. B., 1903, chap. 147, sec. 49.

<sup>(44)</sup> C. S. N. B., 1903, chap. 147, sec. 50.

<sup>(45)</sup> C. S. N. B., 1903, chap. 147, sec. 51.

<sup>(46)</sup> C. S. N. B., 1903, chap. 147, sec. 52.

carriage of proceedings is in force in New Brunswick (<sup>67</sup>). Proceedings may be dismissed for want of prosecution, in which case the judge may apply the costs as he finds just (<sup>68</sup>).

The New Brunswick Act also provides for cases in which *infants* may be defendants in an action for the recovery of mechanics' liens, the law stating that all notices, etc., may be served upon their guardians, or in case they have no official guardian, a guardian *ad litem* appointed by the judge (<sup>69</sup>).

*Fees and costs* under the Mechanics' Lien Act of New Brunswick are the same as are payable in respect of similar matters according to the ordinary procedure of the County Court. Where the costs for the enforcement of a lien, however, are payable out of the amount realized by the proceedings, and exceed 10 per cent. of that amount, they must be reduced proportionately by the judge, so as not to exceed the amount, and no further costs than the reduced amount may be recovered between party and party or solicitor and client (<sup>69</sup>). It is further provided that in no case must costs taxed against any of the parties exceed 10 per cent. of the amount in dispute between the party and the person to whom the costs are awarded (<sup>61</sup>). In cases where the lien has not been paid in full, a certificate for the balance of the claim may be issued by the judge, which, after having been filed in the office of the clerk of the court, may be enforced as a judgment of the County Court (<sup>62</sup>).

An appeal to the Supreme Court from orders or certificates made by a judge of a County Court under the act is allowable in the same manner as from any other order or decision of a County Court Judge (<sup>63</sup>). The proceedings upon such order and certificate may be stayed as in ordinary cases where an appeal is made (<sup>64</sup>). Judges are given the general

power of enlarging for good cause the time in which new proceedings are to be taken upon application made either before or after the time for taking such proceedings has expired (<sup>65</sup>).

Any moneys paid into a bank under the act must be paid out by order of the judge as he may direct (<sup>66</sup>). A provision is inserted in the act whereby in case a judge of a County Court in which an action is brought, is interested in any proceedings under the act, or related to any of the parties, the case may be taken for trial before another judge of a County Court (<sup>67</sup>).

Affidavits required under the act may be sworn before a justice of the peace or a commissioner for taking affidavits (<sup>68</sup>).

#### Enforcement of Privileged Claims in Quebec.

In order to preserve the special privilege for wages accorded by the Quebec law, workmen or labourers must give notice in writing, or verbally before a witness, to the proprietor of the immoveable, that they have not been paid for their work at and for each term of payment due to them. This notice may be given by one employee in the name of all other workmen who have not been paid, but in such cases the notice must be in writing. The architect and builder are likewise required to inform the proprietor of the immoveable, or his agent, in writing of the contracts which they have made with the chief contractor, within eight days from the signing of the same. A supplier of materials must, before delivering any material, give notice in writing to the proprietor, of the contracts which have been made by him for the delivery of materials, making mention of the cost, and of the immoveable for which they are intended. These notices on the part of suppliers of materials have the effect of an attachment by garnishment on the contract price. Within three months following such a notice, the interested parties must take legal proceedings to

(<sup>67</sup>) C. S. N. B., 1903, chap. 147, sec. 63.

(<sup>64</sup>) C. S. N. B., 1913, chap. 147, sec. 69, sub-sec. 2.

(<sup>65</sup>) C. S. N. B., 1903, chap. 147, sec. 72.

(<sup>66</sup>) C. S. N. B., 1903, chap. 147, sec. 73.

(<sup>67</sup>) C. S. N. B., 1903, chap. 147, sec. 74.

(<sup>68</sup>) C. S. N. B., 1903, chap. 147, sec. 75.

have the debtor condemned and the seizure declared valid under penalty of the lapse of the claim. The proprietor of the immoveable must be made a party to this suit. In case the proceeds realized in an action to recover a privilege are insufficient to pay the labourer, workman, architect and supplier, or in cases of contestation, the additional value given to the work is to be established by a relative valuation effected in the manner prescribed by the Code of Civil Procedure<sup>(69)</sup>.

#### Enforcement of Mechanics' Liens in Ontario.

A mechanic's lien in Ontario may be realized by bringing action in the High Court of Justice, in accordance, for the most part, with the ordinary proceedings of that court<sup>(70)</sup>. The action may be commenced by filing a statement of claims, verified by affidavits, without issuing a writ of summons<sup>(71)</sup>. This statement must be served within a month after it has been filed, unless the judge extends the time for service, the time for entering a statement of defence being the same as for entering an appearance in other actions in the High Court<sup>(72)</sup>. All lien-holders, who have been served with a notice of the trial, are to be treated for all purposes as if they were parties to the action<sup>(73)</sup>.

An action to enforce a mechanics' lien may be tried by the master in ordinary, a local master of the High Court, an official referee, or a judge of the County Court in the judicial district in which the lands affected by the action are situated, as well as by a Judge of the High Court of Justice<sup>(74)</sup>. These officers are expressly endowed, for the purposes of the case, with all the jurisdiction and authority of the High Court in addition to their ordinary powers.<sup>(75)</sup>

After the delivery of the statement of defence above mentioned, where the

plaintiff's claim is disputed, or after the time for the delivery of defence in all other cases, where it is desired to try the action other than at the ordinary sitting of the High Court, either party may request a day to be fixed for the trial. The judge thereupon, after fixing a date, is required to try the action and to decide all questions arising in connection therewith<sup>(76)</sup>. He may, if he thinks necessary, order the estate charged with the lien to be sold, allowing, however, a reasonable time for the purpose of advertising the sale<sup>(77)</sup>. He may likewise order the sale of any material<sup>(78)</sup>. Lien-holders, who have not proved their claims at the trial, may be let in to prove them subsequently, on such terms as to costs as may be just, at any time before the amount realized by the action has been distributed<sup>(79)</sup>. Lien-holders for an amount not exceeding \$100 are also given the right to attend in person at the trial or to be represented by a solicitor or other agent as they may choose<sup>(80)</sup>. On the sale of a property to satisfy a lien, the Judge must make a report on the matter, directing to whom the moneys must be paid, and adding to the amount of the person who conducted the sale his actual disbursements in connection therewith. Where sufficient to satisfy the judgment and costs is not realized from the sale, the judge must certify the amount of the deficiency and the names both of the persons who are entitled thereto and of the persons adjudged to pay the same, and the enforcement of this certificate may be by execution or otherwise as a judgment of the court.<sup>(81)</sup>

The party on whose application the day and place of the trial has been fixed as above, must serve a notice in specified form at least eight days before the date of the trial, upon the solicitor of the defendant, upon all lien-holders who have registered their liens or who are known to him, and also upon all other persons having any charge or encumbrance upon

<sup>(69)</sup> Que. stat. 1895, chap. 42, sec. 2.

<sup>(76)</sup> R. S. O., chap. 153, sec. 35, sub-sec. 1.

<sup>(77)</sup> R. S. O., chap. 153, sec. 35, sub-sec. 2.

<sup>(78)</sup> R. S. O., chap. 153, sec. 35, sub-sec. 3.

<sup>(79)</sup> R. S. O., chap. 153, sec. 35, sub-sec. 4.

<sup>(80)</sup> R. S. O., chap. 153, sec. 35, sub-sec. 5.

<sup>(81)</sup> R. S. O., chap. 153, sec. 35, sub-sec. 6.

the land affected. This service must be personal, unless otherwise directed by the judge who is to try the case <sup>(82)</sup>.

A transferring of the carriage of the proceedings is allowed as in Nova Scotia and New Brunswick <sup>(83)</sup>.

In the matter of *appeal*, the judgment of the court of first instance is to be final in all actions where the total amount of the claim for liens aggregates \$100 or less, except that the judge may, upon application within fourteen days of the delivery of the judgment, grant a new trial <sup>(84)</sup>. Where the total amount of the claim is over \$100 and not more than \$200, an appeal to a divisional court is allowed, the judgment of the latter to be final upon the appellant, though the respondent may appeal therefrom to the Court of Appeal, whose judgment shall be binding <sup>(85)</sup>. In all other cases, an appeal is allowed in like manner and to the same extent as from the decision of a judge trying an action in the High Court without a jury <sup>(86)</sup>.

With regard to *costs*, it is provided in the Ontario law that no fees are payable to a judge in an action brought to realize a mechanics' lien or on any proceedings in the action, except that every person, other than a wage earner, must, on filing his claim or statement of claim, pay a fee of \$1 on every \$100 or fraction thereof of the amount of his claim up to \$1,000 <sup>(87)</sup>. Plaintiffs and successful lien-holders costs must not exceed in the aggregate 25 per cent. of the amount of the judgment and actual disbursements; they must be in addition to the judgment and must be borne in such proportion as the trial judge may direct <sup>(88)</sup>. Where the costs are awarded against plaintiff or lien-holder, they must not exceed 25 per cent. of the claim and actual disbursements <sup>(89)</sup>. In case the least expensive course under the act has not been taken by the plaintiff, the costs allowed to his solicitor must

in no case exceed what would have been incurred had the least expensive course been taken <sup>(90)</sup>. A reasonable amount of costs for drawing and registering a lien or for vacating the registry of a lien, may be allowed by the judge <sup>(91)</sup>. Incidental costs not otherwise provided for, are to be at the discretion of the judge or official to whom the application or order in connection with which the costs were incurred, was made. <sup>(92)</sup>.

The procedure in making *payments out of court* is carefully defined in the Ontario Act. Except in actions tried by judges of the High Court, the judge, when the time for paying out arrives, must forward to the accountant of the Supreme Court of Judicature a requisition for all cheques, accompanied by a certified copy of his judgment and of his report of any sale made thereunder. The latter is thereupon required to return to the judge cheques for the amount payable to the persons specified in the requisition, for distribution by the judge among the persons entitled thereto <sup>(93)</sup>. No fees are payable on payments out of court in respect to a claim of liens, though sufficient postage stamps to prepay a return registered letter must be enclosed with every requisition for cheques <sup>(94)</sup>.

The person liable for the amount of a judgment in favour of a lien-holder is required under the Ontario law to pay any deficiency which may remain after a sale of property, and if sufficient to satisfy the judgment costs is not realized from the sale, the deficiency may be recovered by execution against the property of the defendant <sup>(95)</sup>. In case also a claimant fails to establish a valid lien, he is not debarred thereby from recovering a personal judgment against any party to the action, for the sum that is owing to him and which he may recover by execution against the property of the debtor <sup>(96)</sup>.

### Enforcement of Mechanics' Liens in Manitoba.

In Manitoba, mechanics' liens may be realized by actions brought in the Court of King's Bench according to the ordinary procedure of the court, except as varied by the act. All lien-holders served with a notice of trial are to be treated, for all purposes, as if they were parties to the action<sup>(97)</sup>. The action may be tried by a judge at any regular sitting of the court, or when the aggregate amount of the liens involved does not exceed \$1,000, by a local judge of the Court of King's Bench within whose judicial district the cause of action has arisen<sup>(98)</sup>. The local judge in these cases has the same powers as a local Master under the King's Bench Act, and all powers and authority otherwise conferred upon a judge of the Court of King's Bench. If, during the progress of an action before a local judge, it appears that the aggregate amount involved exceeds \$1,000, he may, with the consent of the parties, continue to try the case, or he may refer the action, in his discretion, to a judge of the King's Bench at Winnipeg, and order all papers and documents to be transferred to the proper officers in that city<sup>(99)</sup>. The procedure for appointing a day and place for the trial, the general powers of the judge in directing a sale of lands or materials, and in making a report thereon, the letting in of lien-holders who have not proved their claims at the trial, the attendance of lien-holders in person at the trial and the transferring of the carriage of proceedings are provided for in substantially the same manner as in Ontario<sup>(100)</sup>. In the matter of *appeals*, the judgment of the court of first instance is final, as in Ontario, in all actions where the total amounts of the claims is less than \$100, or less, except that a new trial may be granted on application within 14 days after the judgment has been pronounced<sup>(101)</sup>. When the total amount exceeds \$100, an appeal to the Court of

King's Bench, *in banc*, is allowed, whose judgment is final<sup>(102)</sup>. The same limits with regard to costs to plaintiffs and successful lien-holders, and in cases where costs are awarded against the plaintiff, are fixed as in Ontario<sup>(103)</sup>, and in cases where the least expensive course has not been taken, and where a lien is discharged or vacated, the acts of the two provinces are identical<sup>(104)</sup>. Similarly, in the matter of procedure in making payments out of court, and in holding persons against whom a judgment in favour of lien-holders has been made personally liable for any deficiency which may remain after the sale of the property, the legislation of the two provinces is in substantial agreement<sup>(105)</sup>.

### Enforcement of Mechanics' Liens in Saskatchewan.

In Saskatchewan where a Mechanics' Lien Act was passed during the present year superseding the North West Territories Ordinance previously in force, actions to realize under a Mechanics' Lien must be brought and tried in the district court in the same manner, and subject to the same right of appeal as ordinary actions<sup>(106)</sup>. The Judge is given power to decide all questions necessary to dispose of the action. He may direct that the interest charged with the lien may be sold after a reasonable time for advertising the sale, and when the sale has been held he must say to whom the monies in court shall be paid, adding to the claim of the person conducting the sale his actual disbursements. Where sufficient to justify the judgment and costs is not realized from the sale the deficiency may be covered by execution or otherwise as a judgment of the Court<sup>(107)</sup>. With regard to costs, a reasonable amount may be allowed by the judge for drawing and filing the lien, or for vacating the registration of the lien; other incidental costs in connection with applications and orders are in the

(97) R. S. Man., 1902, chap. 110, sec. 27.

(106) S.S. 1907, Chap. 21, Sec. 30.

(107) S. S. 1907, Chap. 21, Sec. 33.

discretion of the judge<sup>(108)</sup>. All judgments in favour of lien holders must provide that the person or persons liable for the amount of the judgment must pay any deficiency remaining after the sale of the property, the said deficiency in cases where sufficient to satisfy the judgment and costs is not realized to be recovered by execution<sup>(109)</sup>. Where actions brought under the Act fail to establish a valid lien, a personal judgment may nevertheless be recovered for such sums as are due, and which might be recovered in an action on contract<sup>110</sup>.

All liens filed prior to the coming into force of the Act must be enforced under the legislation previously provided, viz., the Mechanics' Lien Ordinance of the North West Territory, passed in 1898. The date on which the Act comes into force will be proclaimed in the Saskatchewan Gazette<sup>(111)</sup>.

#### Enforcement of Mechanics' Liens in Alberta.

Liens under the Alberta Act, not exceeding \$200 in amount, may be tried summarily by originating summons as provided for by the Judicature Ordinance of the North West Territory as quickly as possible, according to the ordinary practice and procedure of the Court<sup>(112)</sup>. No appeal is allowed where the claim does not exceed \$200<sup>(113)</sup>. Where the claims are in excess of \$200 the lien may be realized in the Supreme Court of the West Territories in the Judicial District in which the land charged is situated, the ordinary procedure of the Court to be followed<sup>(114)</sup>. Judgment for the amount of the claim may be given as if the liability in question had been sued for in the ordinary way, and without reference to the Mechanics' Lien Act<sup>(115)</sup>. The judges of the Supreme Court are given power to

make general rules and regulations not inconsistent with the Act, for expediting business and for the advancement of the interests of suitors<sup>(116)</sup>. As in the case of Saskatchewan the Act of 1907 is not retroactive<sup>(117)</sup>.

#### Enforcement of Mechanics' Liens in British Columbia.

Proceedings for the recovery of a mechanics lien may be taken in British Columbia before a judge of the County Court of the county in which the land charged is situated, no matter what the amount of the claim may be. The judge is thereupon authorized to proceed in a summary manner by summons and order, to carry out the necessary inquiry. In default of payment he may direct the sale of the estate charged, and may otherwise act in his discretion. With regard to procedure, the ordinary practice of the court is to be followed when not otherwise provided; when there is no guide, the practice and procedure of the Supreme Court is to be adopted.

Fees and costs in all proceedings are to be the same as in ordinary proceedings of the court.

An appeal is allowed from any judgment or order of the court as in ordinary cases<sup>(118)</sup>, but where the lien is for less than \$250 the judgment of the first court is final and binding<sup>(119)</sup>.

The person against whose property a mechanics' lien has been registered may apply to a judge of the County Court, in case hardship or inconvenience has been caused by the action of the lien holder, for a summons calling upon the opposite party to show cause why the lien should not be cancelled on sufficient security being given. This summons must be served on the opposite party and returned in three days thereafter, or as the judge may direct<sup>(120)</sup>. On the return of this summons the judge may order the cancellation of the lien, either

(108) S. S. 1907, Chap. 21, Sec. 35 and 36.

(120) R. S. B. C., 1897, Chap. 132, Sec. 17.

in whole or in part upon the giving of satisfactory security by the party against whose property the lien is registered<sup>(121)</sup>. The County Court Registrar must thereupon cancel the lien<sup>(122)</sup>.

Where it is apparent that the action has resulted from the failure of an owner or contractor to fulfill the terms of his contract, or to comply with the provisions of the act, the judge may order him to pay all the costs of the proceedings, in addition to the amount of the contract, sub-contract, or wages due. In default for such costs a final judgment may be ordered against the contractor or owner with execution<sup>(123)</sup>.

If the property sold in proceedings under the act is leasehold the purchaser is to be deemed the assignee of the lease<sup>(124)</sup>.

The British Columbia statute provides in a special manner for the distribution of moneys realized under the act<sup>(125)</sup>.

In further reference to procedure, the judges of a County Court are permitted to make general rules and regulations, not inconsistent with the act, for expediting and facilitating the business of the court and for the advancement of the interests of the suitors<sup>(126)</sup>. By the act passed in 1882 it was further enacted, with regard to procedure, that upon the hearing of any claim or a lien the court might give judgment against the debtor in favour of the creditor for any indebtedness arising out of the claim in the same manner and to the same extent as if the indebtedness had been sued upon in the County Court in the ordinary way<sup>(127)</sup>.

By an act passed in 1903-04 the limit of fees payable to a judge and of costs to plaintiff and against plaintiff, where the least expensive course had not been taken, and for vacating liens, etc., were

<sup>(127)</sup> B. C. Stat., 1900, Chap. 20, Sec. 23.

made similar to the provisions of the Ontario act<sup>(128)</sup>.

#### Arbitration of Disputes.

In *Prince Edward Island, Saskatchewan, and Alberta*, provision is made for the settlement by *arbitration* of disputes that may arise in respect to the claims of sub-contractors in respect of liens. In all three provinces it is expressly provided that recourse must be had to arbitration in all such cases, one arbitrator to be appointed by the person making the claim, one by the person against whom the claim is made, and the third by the two thus chosen, the decision of the arbitrators or a majority of them to be final and conclusive. In case either of the parties interested in the dispute refuses or neglects within three days, after receiving notice in writing, to appoint his arbitrator, or if the two arbitrators appointed fail to agree upon a third, the appointment may be made in the case of Prince Edward Island by the county judge of the county, or by a judge of the Supreme Court. In Saskatchewan and Alberta the appointment is to be made by a judge of the Supreme Court only. It is also provided that disputes arising as to the validity or amount of an unpaid account owing to a lienholder may be settled by arbitration<sup>(129)</sup>.

#### Forms.

Forms to be adopted in proceedings under the Mechanic's Lien acts of the several provinces are prescribed as follows:—

*Nova Scotia*.—Claim of lien for registration; claim of lien for wages for registration; affidavit verifying claim; claim of lien for wages by several claimants; certificate of *lis pendens*; affidavit verifying claim on commencement of action; affidavit of lien holder verifying claim; defence where there are no matters disputed or where matters in dispute are matters of account; affidavit of owner verifying account; judg-

<sup>(128)</sup> B. C. Statute, 1903-04, Chap. 35.

<sup>(129)</sup> P. E. I., Statute, 1879, Chap. 8, Secs. 9, 19 and 20; C. O. N. W. T., 1898, Chap. 59, Secs. 12 and 14.

ment; notice of trial; certificates vacating lien.

*Prince Edward Island.*—Statement of claim.

*New Brunswick.*—Claim of lien; claim of lien for wages by several claimants; affidavits verifying claim; contractor's affidavit; affidavit of agent; affidavit of mortgagor; certificate and appointment by judge; notice disputing plaintiffs' right of lien; statement of account to be filed by owner; affidavit of owner verifying account; statement of account by lienholder; affidavit of lienholder verifying claim; order for sale of lands; certificates vacating lien; certificate for judgment for balance after realizing of lien.

*Quebec.*—Form of notice or memorial.

*Ontario.*—Claim of lien for registration; claim of lien for wages for registration; claim of lien for wages by several claimants; affidavit verifying claim for registration; affidavit verifying claim on commencement of action; certificate for registration; defence where there are no matters disputed or where matters in dispute are matters of account; affidavit

of owner verifying account; notice of trial; statement of claim by lienholder not parties to the action; affidavit of lienholder verifying claim; judgment; certificates vacating lien.

*Manitoba.*—Claim of lien; claim of lien for wages by several claimants; affidavit verifying claim; affidavit verifying claim in commencing action; certificate of *lis pendens*; statement of defence; statement of defence where there are no matters in dispute or where matters in dispute are matters of account; affidavit of owner verifying account; notice of trial; statement of lienholders not parties to the action; affidavit of lienholders verifying claim; judgment; certificates vacating liens.

*Saskatchewan.*—Claim of lien for registration; claim of lien for wages for registration; claim for lien for wages by several claimants; affidavit verifying claim for registration; certificate for registration to be signed by the clerk of the Court.

*Alberta.*—Claim for mechanic's lien.

*British Columbia.*—Statement of claim; statement descriptive of work to be done; pay-roll.

#### ORIENTAL IMMIGRATION—MINISTER OF LABOUR LEAVES ON A SPECIAL MISSION TO JAPAN—INQUIRY INTO LOSSES OF JAPANESE RESIDENTS OF VANCOUVER DURING THE RECENT DISTURBANCE.

ON October 13, the following order-in-council was approved by His Excellency the Governor-general appointing the Honourable the Minister of Labour a special envoy to His Majesty the Emperor of Japan, with reference to the question of immigration from Japan to Canada:—

The Right Honourable Sir Wilfrid Laurier recommends that, in view of the recent unfortunate occurrences, which have taken place in British Columbia, as a result of the largely increased influx of Oriental labourers into that Province, and in view of the fact that there has been a Treaty of Peace and Commerce between His Majesty the King and the Emperor of Japan since the year 1894, and that Canada became a party to that Treaty less than two years ago, the Honourable Rodolphe Lemieux, Postmaster General and Minister of Labour, do proceed immediately to Japan to discuss the situation with His Majesty's Ambassador at Tokio and the Japanese authorities, with the object, by friendly means, of preventing the recurrence of such causes as might disturb the happy relations which have, under the said Treaty, existed between the subjects of His Majesty the King, in Canada and elsewhere, and the subjects of His Majesty the Emperor of Japan.

The Minister of Labour, who was accompanied by Mr. Joseph Pope, C. M. G., Under-Secretary of State, left Montreal for Vancouver on the evening of October 23, and sailed for Japan on the steamer *Empress of China*, on October 30. \*

#### Enquiry into Losses Sustained by Vancouver Japanese Disturbance.

On October 12, by an Order-in-Council, Mr. W. L. Mackenzie King, C. M. G., Deputy Minister of Labour, was appointed a Commissioner to conduct an enquiry into the losses and damages sustained by the Japanese population in Vancouver on the occasion of the recent riots in that city, the said Order-in-Council being as follows:—

(\* ) A cable dispatch reports the arrival of the Minister of Labour and Mr. Pope at Tokio on Nov. 13.

On a Memorandum dated 27th September, 1907, from the Secretary of State, representing that he has received a communication from Mr. T. Nosse, Consul-General for Japan, in Canada, stating that he was in receipt of a cable message from the Foreign Minister in Japan calling attention to the damages and losses sustained by the Japanese residents in Vancouver during the riots in the early part of the month of September, 1907, and expressing the hope that in view of the cordial and friendly relations existing between Japan and Canada, the case may be settled at Ottawa independent of the British Government and without going through the usual diplomatic channels.

The Minister, therefore, recommends that the losses sustained during the recent riots by the Japanese population residing in Vancouver be ascertained with a view to their payment, and that Mr. W. L. Mackenzie King, C. M. G., Deputy Minister of Labour, be appointed a Commissioner under the Enquiries Act, chap. 104, of the Revised Statutes, to conduct an enquiry into the losses and damages sustained by the Japanese population in Vancouver on the occasion of the recent riots in that City. The Committee submit the same for approval.

The claims made on behalf of the Japanese residents of Vancouver were submitted to the Government by Consul-General Nosse; they amounted to nearly \$14,000, of which about \$2,500 was for broken windows, etc., and the balance chiefly for loss occasioned by the closing of Japanese shops during several business days.

Mr. Mackenzie King left Ottawa for Vancouver on Monday, October 14, arrived at Vancouver on Sunday, October 20th, and commenced an enquiry under his commission on Monday, October 21st, in Pender Hall, which had been hired for the purpose. Mr. F. W. Giddens was appointed Secretary and Stenographer to the Commission, and Mr. Howard G. Duncan, Vancouver, acted as counsel on behalf of the Japanese Government. Fifty-seven claims were presented.

A ruling of some importance made by the Commissioner during the progress of the enquiry related to the question of payment for damages to property occupied by Japanese as tenants and not as proprietors. Mr. King held that in such cases the landlords were responsible for the damages sustained. The Commissioner subsequently stated that his ruling on this point had been upheld by the Department of Justice to which he had referred the question.

Mr. King made a special enquiry into the facts with regard to an alleged attempt to burn down a Japanese school-house, pointing out that this was a

matter which, in the interest of justice, should be carefully investigated.

In the course of the investigation, information was elicited by the Commissioner tending to show elaborately planned methods on the part of employment agencies in Vancouver and in Japan respectively, to secure the immigration to Canada of Japanese labourers. Mr. Duncan, counsel for the Japanese Government, objected to Mr. King proceeding with an enquiry along this line, the points involved, he contended, being outside Mr. King's Commission. Mr. King stated that the questions involved were of the greatest importance and that it might become necessary to recommend the appointment of a special Commission to enquire into them.\* The investigation was still in progress at the close of the month.

#### The Prime Minister's Expression of Regret.

The following cables with regard to the subject of the disturbance have been exchanged between Sir Wilfrid Laurier, Prime Minister of Canada and Sir Claude Macdonald, British Ambassador at Tokio:

OTTAWA, 12th October, 1907.

Sir Claude Macdonald,  
Tokio, Japan.

The press has already acquainted you with the deplorable disturbances which have taken place recently in British Columbia, directed against Asiatic labourers residing in the city of Vancouver. I am happy to say that the local authorities have taken prompt measures to restore order. At the same time, it must not be forgotten that amongst the people on the Pacific coast there are strong racial prejudices which, though greatly to be regretted, have still to be taken into account by all who desire to cultivate the best relations between Canada and the Orient.

His Excellency the Governor-General and the Canadian Government will be pleased if you will convey to His Imperial Majesty the Emperor of Japan their deep regret for the unfortunate occurrences at Vancouver, in which the persons and property of certain of his Imperial Majesty's subjects were treated in a manner which receives only the strongest condemnation from the Canadian authorities, and if you will also convey to his Imperial Majesty the assurance that the Canadian authorities will use their utmost efforts to prevent any recurrence of such regrettable events.

(Signed) LAURIER.

(\* ) On November 4, an Order-in-Council was passed appointing Mr. W. L. Mackenzie King a commissioner to enquire into the methods by which Oriental labourers have been induced to emigrate to Canada during the present year.

TOKIO, 19th October, 1907.

Sir Wilfrid Laurier,  
Ottawa, Ont.

I duly conveyed your message of 12th October, same day to Secretary of State for transmission to His Majesty, the Emperor of Japan. Just received following answer: His Majesty received message from Governor-General of Canada and government of Canada with greatest gratification and notes with much satisfaction the earnest intention of Governor-General and Government of Canada to promote cordial and friendly relations

which exist between British Empire and Japan. Count Hayashi adds that Japanese government deeply regret unfortunate occurrence at Vancouver, but they have full confidence in the sincere action which Canadian authorities are taking in devising measures for future, and they have much satisfaction in hearing expression of regret conveyed by Premier of Canada in name of Governor-General of Canada and Canadian government and assurances given that Canadian authorities will use all efforts to prevent recurrence of such regrettable events.

(Signed) MACDONALD.

### TECHNICAL EDUCATION IN NOVA SCOTIA.

At the session of the Legislature of Nova Scotia which prorogued in April, 1907, an act was passed providing means for the establishment of a technical education system for the province. (\*). Since that date various steps have been taken to give effect to the legislation in question. The following statement with regard to the progress that has been made in this connection and the manner in which the technical education system will be conducted, has been furnished by courtesy of Professor Frederic H. Sextor, S. B., Director of Technical Education and Principal of the Nova Scotia Technical College.

**M**OSTLY of the efforts of the Department of Technical Education have been occupied, since the passage of the legislation regarding technical education, in organizing the local technical schools as provided in the act. For the present year, there is to be one of these schools in each of the following industrial centres: Sydney, Amherst, Halifax, New Glasgow.

The classes for the ensuing year are to be held entirely in the evening, beginning November 3rd and closing April 30th, with two weeks' intermission covering the Christmas-New Year's holidays. Each class is to be held twice a week for two hours each session.

The teachers are for the most part men engaged in practical work, who hold positions of responsibility in various industries. A number of the instructors have had previous practical teaching experience, besides being eminently fitted from long experience in having acquired just such knowledge as the workmen need.

Classes are to be held in the following subjects: English language, Practical Arithmetic, Practical Geometry, Mechanical Drawing, Architectural Drawing, Mechanism, Electricity and Chemistry.

(\*). A synopsis of the provisions of the act was published in the *Labour Gazette* for July, 1907, at page 72.

It is intended to carry out all these classes in a practical rather than in an academic manner, so that they will engage and benefit the craftsman, who will attend only so long as he is learning something which is helping him in his every day work.

The expenses of the schools are to be borne by the locality in which they are situated and the Provincial Government, the former supplying proper rooms, heat, light, and one-half the cost of instructors, while the latter pays the other half for the teachers, and furnishes the equipment for conducting the classes.

The fees for each class are from three to five dollars, varying with the nature of the course. Two-thirds of the fee will be refunded to each student at the completion of the course who has attended 90% or more of the sessions of his class; three-fifths refunded for a percentage of 80 to 90%, one-half for 70 to 80%, and two-fifths for 60 to 70% attendance. Thus the classes will be practically free, the fee serving mostly as an incentive to attend well.

A diploma signed by the teacher and countersigned by the Director of Technical Education, will be granted to all students who have satisfactorily attained the required standard in any class, attesting to proficiency in that class.

The schools for the instruction of coal miners have been transferred from the Department of Mines to the Department of Technical Education. These schools are conducted for the benefit of those miners who wish to educate themselves in the evenings, so that they may obtain Government certificates of competency. Under the new arrangement, in each of

five coal mining districts, one teacher will be appointed, who will devote his whole time and effort to this work alone. This teacher must possess a manager's certificate or the proper practical and theoretical knowledge requisite to teach all the branches of the science and art of coal mining called for by the Board of Examiners who grant the certificates of competency. In each district there will be held two to four classes in different places, each class meeting two nights a week. If the teacher cannot overtake all the work in the district, he will have local assistants. Any intending students must possess a working knowledge of simple English composition and of arithmetic up through decimals and fractions. For such applicants as are deficient in these two branches, preparatory classes under a supplementary teacher will be held wherever there is a coal mining class if the number of deficient applicants warrants it. These schools will begin November 1st and continue to within a week of the examinations, which are usually held about the first of July, with the exception of two weeks at Xmas.

The schools for stationary engineers, which were conducted by the Mines Department heretofore for such persons as

desired to obtain Government certificates of competency, were also transferred to the Department of Technical Education. For this year, they are to be held in any coal mining centre where there are ten or more applicants. The same educational requirements apply to these classes as to the coal mining classes, and deficient applicants are to attend the same preparatory classes in English and arithmetic as the coal miners.

The Nova Scotia Technical College is to be built this coming autumn and next spring. It is to be articulated closely to the existing colleges in Nova Scotia, and such others as the Council of Public Instruction shall recognize, by giving the last two years' professional courses in Civil Mining, Mechanical and Electrical Engineering, while the other colleges give the preliminary two years' course for these engineering branches. The first two years' training consists mostly of pure science, and general training can be well taught by a little change in the existing colleges, and thus avoid duplication. A provisional course for this first two years' course is under consideration at present and will be adopted in the near future.

#### DEPARTMENT OF INDUSTRIES AND IMMIGRATION ESTABLISHED IN NOVA SCOTIA.

THE Government of Nova Scotia, under the authority given at the last session of the Legislature, \*has taken the necessary steps to organize a Provincial Department of Industries and Immigration. This is in accord with the policy outlined by the Premier on several occasions, and a reference to which has already appeared in the *Gazette*. The Secretary, or official head, of this new branch of the service is attached to the Provincial Secretary's Department, and the Government has selected Arthur S. Barnstead, of Halifax, for this office. Mr. Barnstead is a graduate in Arts, 1893, and Law, 1895, of Dalhousie University, has been engaged in journalistic work for the past eight years on the editorial staff of the *Acadian Recorder*, and has for two years been clerk of the Legislative Council.

There are two divisions of work to be under his jurisdiction, namely, Industries and Immigration. On the industrial side it will be the duty of the Secretary to collect and arrange facts and statistics relating to the agricultural, industrial and other interests and resources of the province. The possibilities of Nova Scotia as an industrial centre have not heretofore been as much advertised as the opportunities for development in these lines would warrant. There are many of these not yet utilized, not only in the towns, but throughout the country generally. The facts as they may appear will be placed before the public in such a form as may best promote the progress of the province. Literature specially prepared for the purpose will be circulated wherever it will conduce to the

desired results. Active steps will be taken to attract to the province such new industrial and manufacturing concerns as may be expected to grow there.

Under the Act, the Secretary is also required to encourage immigration to the province. Thousands of settlers are yearly coming to Canada and Nova Scotia, at the very gateway of the Dominion, will make a strong effort to retain many of them in that province. There are unoccupied Crown lands available, and there are, in the eastern sections of Nova Scotia particularly and in Cape Breton, many vacant farms suitable for settlement. When full information is obtained regarding them, it will be utilized for the encouragement of settlement. It is not the purpose of the Government to bring in labourers to compete with those engaged in industrial occupations. Rather is it the aim to increase the numbers of the farming and agricultural population. The Town and Municipal Councils and Boards of Trade are to be asked to give whatever aid they can in locating these settlers.

The act (chapter 9, Acts N. S., 1907)

(\* ) For a review of this legislation see the *Labour Gazette* for July 1907, p- 73.

## IMMIGRATION AND COLONIZATION.

The official statements given below with regard to recent immigrant arrivals in Canada, number of homestead entries made, land patents issued, etc., are published, except where otherwise stated, by courtesy of the Department of the Interior, Canada.

**T**HE most recent official returns continue to show a heavy increase in the number of immigrants arriving in Canada compared with any previous year. Up to the close of the summer season, the increase amounted to 31%. During the autumn also, the movement was on a larger scale than ever before reported. Arrivals from the United States were less than in 1906, and there has been a falling off in the number of Homestead entries made and in the acreage of Dominion lands patented.

also provides for co-operation with the immigration service of the Government of Canada, or any other agency or institution, for the purpose of encouraging immigration from other countries to Nova Scotia. The agents of the Dominion Government will be asked to present the attractions of the Eastern provinces to intending emigrants, as they now do the fertility of the western lands. The Department will seek to work in with and through the thoroughly organized Dominion immigration service both in the preparation and the circulation of information regarding the province.

It will be the aim of this, the newest of provincial departments, to gradually develop an immigration propaganda and such plans for settlement as are adapted to the conditions of the province. With this in view, caution and discrimination in the selection of immigrants will be exercised, rather than the use of hasty efforts to induce the immigration of a haphazard class. The Secretary took up his duties on the 14th of October.

### Recent Immigration Returns.

Immigration through ocean ports during August, declared for Canada, was as follows:—

#### IMMIGRATION THROUGH OCEAN PORTS DURING AUGUST, 1907.

	Male	Female	Children under 12	Total.
Immigrants . . .	8,584	4,431	3,921	16,936
Returned Canadians . . . . .	1,657	809	262	2,728
Tourists . . . . .	436	205	36	677
<b>Totals . . . . .</b>	<b>10,677</b>	<b>5,445</b>	<b>4,219</b>	<b>20,341</b>

A summary of immigration proper, during April-August, 1906-07, declared for Canada, is as follows:—

IMMIGRATION BY OCEAN PORTS APRIL-AUGUST, 1906-07.

	Male	Female	Children under 12	Total
April.....	24,972	5,052	4,414	34,438
May.....	24,744	7,153	6,858	38,755
June.....	18,107	7,171	7,041	32,319
July.....	11,841	4,695	4,410	20,946
August.....	8,584	4,431	3,921	16,936
Totals .....	88,248	28,502	26,644	143,394
Corresponding mos. of 1906				99,494
Increase, 1907				43,900
Percentage of increase.....				44%

The following is a statement of immigration from the United States from April to August, 1907, both months inclusive, compared with the corresponding period of 1906.

IMMIGRATION FROM THE UNITED STATES APRIL-AUGUST, 1906-1907.

Through Montreal.....	April	140	
	May	70	
	June	77	
	July	93	
	August	76	456
Through Winnipeg and out-ports.....	April	8,966

British Emigration Returns.

During the month ended September, 30, 1907, the number of passengers leaving the United Kingdom for British North America, according to official returns of the Board of Trade, was as follows:—

EMIGRATION FROM GREAT BRITAIN DURING SEPTEMBER, 1907-06.

Nationalities.	1907.	1906.
English.....	9,083	7,179
Scotch.....	2,708	2,147
Irish.....	845	410
Total of British origin .....	12,636	9,736
Foreign.....	2,971	2,820
Total.....	15,607	12,556

During the nine months ended September 30, 1907, the total number of passengers leaving the United Kingdom for British North America, according to official returns of the Board of Trade, was as follows:—

EMIGRATION FROM GREAT BRITAIN DURING NINE MONTHS ENDED SEPTEMBER 30.

Nationalities.	1907.	1906.
English.....	97,579	78,943
Scotch.....	30,771	19,548
Irish.....	6,726	3,781
Total of British origin .....	135,076	102,272
Foreign.....	25,670	20,757
Nationality not distinguished.....		21
Total.....	160,746	123,050

Homestead Entries During September, 1907

The following statement shows the number of homestead entries made in September, 1907, compared with September, 1906:—

STATEMENT SHOWING THE NUMBER OF HOMESTEAD ENTRIES MADE DURING THE MONTH OF SEPTEMBER, 1907, AS COMPARED WITH SEPTEMBER, 1906.

Agency.	1907	1906	Increase	Decrease
Battleford.....	460	464	.....	4
Brandon.....	2	7	.....	5
Calgary.....	105	123	.....	18
Dauphin.....	52	24	28	.....
Edmonton.....	285	342	.....	57
Estevan.....	50	96	.....	46
Humboldt.....	294	.....	294	.....
Kamloops.....	6	1	5	.....
Lethbridge.....	149	177	.....	28
Minnedosa.....	.....	12	.....	12
Moose Jaw.....	375	.....	375	.....
New Westminster.....	4	1	3	.....
Prince Albert.....	101	121	.....	20
Regina.....	212	726	.....	514
Red Deer.....	169	207	.....	38
Winnipeg.....	40	64	.....	24
Yorkton.....	91	230	.....	139
Total.....	2,395	2,595	705	905

It will be seen that there has been a net decrease in the number of homestead entries made in September, 1907, compared with September, 1906, of 200.

A statement of the homestead entries made during the first nine months of the present year compared with the corresponding period of the last calendar year, is as follows:—

STATEMENT OF HOMESTEAD ENTRIES  
JANUARY-SEPTEMBER, 1907-1906.

Month.	1907	1906	Increase	Decrease
January.....	1,111	1,903	.....	792

Doukhobors.....	.....
Chinese.....	1
Japanese.....	1
Persians.....	.....
Australians.....	2
New Zealanders.....	.....
Portuguese.....	1
Total.....	2,395

Representing 5,664 souls.

Of a total of 611 made in September, 1907, by persons coming from the United States, there were 174 from North Dakota, 116 from Minnesota, 36 from Kansas, 33 from South Dakota, 30 each from Washington and Wyoming, 29 from Michigan, and 25 from Illinois.

#### Lands Patented During September, 1907.

An abstract of letters patent covering Dominion lands situated in Manitoba, Saskatchewan, Alberta, British Columbia and the Yukon Territories, issued from the Department of the Interior dur-

ing the month of September, 1907, is as follows:—

LANDS PATENTED DURING SEPTEMBER, 1907.

Nature of Grant.	September, 1907.	
	No. of Patents	No. of Acres.
Alberta Ry. and Irrigation Co. . . . .	1	640.00
British Columbia Homesteads. . . . .	7	905.00
British Columbia Sales. . . . .	6	107.10
Commutation Grants. . . . .	2	146.92
Homesteads. . . . .	1,204	190,948.83
Hudson's Bay Co. . . . .	1	160.00
Military Bounty grants. . . . .		
Military Homesteads. . . . .		
Mineral rights (1,470.39 acres). . . . .	11	
North-west half-breed grants . . . . .	32	5,500.84
Parish sales. . . . .	2	358.35
Quit Claim special grants (160 ac.) . . . . .	1	
<i>Railways:</i>		
Alberta Railway and Coal Co. . . . .		
Canadian Northern Ry. Co. . . . .	9	2,866.77
Can. Pac. Ry. grants. . . . .	1	140.10
Can. Pac. Ry. grants, Souris Branch. . . . .		
Can. Pac. Ry. roadbed and station grounds. . . . .		
Man. South-western Col. Ry. Co Qu'Appelle Long Lake and Sask. Rd. and Steamboat Co . . . . .	6	1,040.00
Sales. . . . .	40	3,800.78
School Lands sales. . . . .	21	1,259.47
Special grants. . . . .	12	422.18
Yukon Territory sales. . . . .	12	432.46
Totals. . . . .	1,368	208,728.80

In September, 1906, the number of patents issued was 608, covering an area of 241,374.56 acres, showing an increase for the month of September, 1907, of 760 in the number of patents issued, but a decrease of 32,645.76 acres in the area patented.

RECENT INDUSTRIAL AGREEMENTS.

AGREEMENT IN THE PRINTING TRADES, MONTREAL.

Memorandum of understanding arrived at this 30th day of May, 1907, between a Committee representative of the International Typographical Union, Montreal Typographical Union, No. 176, and Jacques Cartier Typographical Union, No. 145, and a Committee

Land Sales.

The following is a statement of the farm land sales made by the Canada North West Land Company, Limited, during the month of September, 1907, compared with the sales in the corresponding month of 1906, and also of the sales from the beginning of the calendar year to September 30, 1907, compared with the corresponding period of 1906:—

LAND SALES OF THE CANADA NORTH-WEST LAND COMPANY.

	Acres.	Price obtained.
September, 1907. . . . .	490.41	\$6,857.25

Notes.

It was stated that about 1000 English farmers and labourers would be distributed by the *Salvation Army* in Nova Scotia during the immigration season of 1908.

Up to the middle of October, some 752 immigrants were distributed in the *Eastern Townships* in Quebec through the government immigration agent for that district, 224 of this number having been secured by the agent in Great Britain. A total of 624 persons were distributed through the same agency in 1906.

representative of the Employing Printers of Montreal, whose names are hereto annexed.

The Committee representing the Unions being duly authorized by a joint meeting of the two Unions, held on May 29th 1907, hereby undertakes that the scale of wages, hours and conditions affecting compositors and operators belonging to said Unions employed in the job offices of the

said Employing Printers shall be as follows, which shall be the minimum accepted by any member of these Unions during the term of this understanding.:

WAGES—HAND COMPOSITORS.

\$14.00 per week of 48 hours from June 1st, 1907, to December 31st, 1908.

\$15.00 per week of 48 hours from January 1st, 1909, to June 30th, 1911.

\$16.00 per week of 48 hours from July 1st, 1911, to June 30th, 1912.

MACHINE OPERATORS.

\$1.00 per week more than the above scale.

OVERTIME.

For the first three hours, daily, 1½ time, until December 31st, 1908, over three hours, double time. After December 31st, 1908, 1 1-3 time for first three hours and double time thereafter.

NIGHT SHIFTS, 15% IN ADVANCE.

In consideration of the said Employing Printers agreeing only to employ members of these Unions when engaging new men hereafter—excepting when no Union men are available—there is to be no disturbance of the conditions prevailing in said offices. That is, present employees, whether Union or non-Union, and their wages, are not to be interfered with, nor are the said employers to be asked to enforce any regulations of the Unions in regard to their men. Employers are to have the privilege of employing non-Union men at higher than Union scale where Union men of equal ability are not available.

This understanding is to extend over a term of five years and one month from June 1, 1907, and the said Unions, as represented by their Committee hereto signing, agree to faithfully observe the spirit as well as the letter of this understanding, the purport of which is to secure industrial peace between the parties hereto for the said period.

To this end, it is further understood that in case of any disagreement arising as to the interpretation of this understand-

ing, the said Unions will abide by the results of arbitration, and will thus ensure the said Employing Printers against strikes during said term of years.

Signed on behalf of the INTERNATIONAL  
TYPOGRAPHICAL UNION,

CHAS. S. BROWN.

Signed on behalf of JACQUES CARTIER  
TYPOGRAPHICAL UNION, No. 145,

GUS. FRANCO, *President*.

VICTOR TARDIFF.

The Committee representing the Employing Printers hereby certify that they were authorized by certain Employing Printers, at a meeting held on May 29th, 1907, to accept an arrangement with a Committee representing their employees on the basis, as to terms and conditions above mentioned. The Committee, individually for themselves, hereby undertake to faithfully observe the spirit and the letter of said arrangement, and to abide by the results of any arbitration that may be found necessary in order to prevent any disturbances of business relations between the parties hereto during the said five years. The Committee also pledges itself to exercise its best endeavour to secure the signatures of as many of the Employing Printers of Montreal as possible to this memorandum.

It is further understood that in News Rooms controlled by signers hereof the same scale and conditions shall prevail, providing that the signers reserve the right to vary the details thereof in accordance with any variations therefrom accepted by members of the Unions in any other News Room in the city.

Signed as members of the Committee,

W. A. DESBARATS, *Chairman*.

Making and repairing miscellaneous articles of Postal Stores.....	22.55
Making up and supplying articles of Official Uniform.....	4,675.80

## INDUSTRIAL ACCIDENTS DURING THE MONTH OF OCTOBER, 1907.

Under this heading account is taken of such accidents only that were sustained by workmen in the course of their employment and resulted in loss of life or limb or other serious impairment to industrial efficiency. The accidents reported are such as have come to the notice of the Department through the press of the country or correspondents of the *Labour Gazette*. The department is also indebted to the Bureau of Mines of Ontario and British Columbia, to the office of the factories' inspectors of the province of Ontario, the Ontario Railway and Municipal Board, and to the Department of Railways and Canals, Ottawa, for their kind assistance in furnishing the Department with the statement of returns of accidents reported to them.

industrial accidents, 34 referred to persons under twenty-one years of age, 50 to persons between twenty-one and forty-five and seventeen to persons over 45; 158 persons were over twenty-one years of age but their exact ages were not specified.

The following is a record of the accidents of the month by industries and trades:—

## STATEMENT OF ACCIDENTS DURING OCTOBER, 1907, BY INDUSTRIES AND TRADES.

Civic employees.....		2	2
Miscellaneous.....	5	23	28
Unskilled labour.....	5	24	29
Total.....	140	306	446

INDUSTRIAL accidents occurring to 446 individual workpeople in Canada during the month of October, 1907, were reported to the Department of Labour. Of these 140 were fatal, and 306 resulted in serious injuries. In addition, four fatal accidents were reported as having taken place prior to the beginning of the month, information not having been received by the Department before October, 1907. The number of fatal accidents reported in October, 1907, was 106 more than in the previous month and 151 more than in October, 1906.

Of 259 returns received during the month giving the ages of the victims of

**Nature of Fatalities and Accidents.**

The chief disasters of the month were the drowning of three members of a Grand Trunk Pacific survey party in the Fraser River, B. C., the killing of two railway employees by the explosion of a boiler near Newbury, Ont., the death of two train hands in a wreck on the Canadian Pacific Railway near Regina, Sask., and the death of two workmen by the explosion of a retort at the Trenton, Ont., canning factory.

**Triple Drowning at Fraser River, B. C.**

On October 4, six members of a Grand Trunk Pacific Railway survey party attempted to shoot the Giscombe Rapids in the Fraser River about 35 miles above Fort George, B. C. Their canoe struck a rock and upset, and three of the party were drowned.

**Explosion of Boiler near Newbury, Ont.**

The boiler of engine No. 446, on a Grand Trunk accommodation train conveying the Dominion railway commissioners from Chatham to Hamilton, Ont., exploded near Newbury, Ont., on the night of October 29, instantly killing the engineer and fatally injuring the fireman, who died on October 31.

**Railway Wreck near Regina, Sask.**

On October 30, eastbound passenger engine No. 470 with train received orders to wait at Fushimi siding, four miles east of Regina, until westbound extra freight engine No. 1413, should pass that siding at 8 a. m. The extra freight cleared at Balgonie at 7.22 a. m., and following instructions attempted to make Fushimi siding by 8 a. m. The passenger engine however failed to wait at the siding the time allotted, and as a consequence a head on collision occurred in which the fireman and an express messenger on the passenger train were killed, and a mail clerk and the engineer of the same train seriously injured.

**Explosion of a Retort at Trenton, Ont.**

By an explosion on October 22, of a large steel retort at the Trenton, Ont., factory of the Cannery Corporation, the man in charge of the retort was instantly killed and his helper died half an hour afterwards.

**Record by Trades and Industries,**

*Agriculture.*—There were 24 fatal and 31 non-fatal accidents reported in this industry in October, 1907, compared with 22 killed and 36 injured in September last, and 23 killed and 15 injured in October, 1906. Five farmers met accidental death by runaways, 4 by being run over by vehicles, 3 by being struck by trains, 3 by falling, 2 by live stock, and 1 each by blood poisoning, drowning, machinery, by an explosion and by being burnt to death in a prairie fire. Of the serious accidents, 14 were caused by machinery, 10 by falls, 3 by runaways, 2 by live stock, 1 by being run over and 1 by falling material.

*Lumbering.*—In this group, 8 workmen were accidentally killed and 14 injured during October. In the previous month there were 7 killed and 10 injured, and in October, 1906, 4 killed and 5 injured. Five of the fatalities were due to falling material, 1 to a fall, 1 to being run over by a dump cart, and 1 to a fall in a mill. Of the injuries 6 were due to falling material, 5 to machinery, 2 to falls, and 1 to the glancing of an axe.

*Mining.*—During October, 1907, there were 13 deaths by accident and 23 injured, compared with 16 killed and 27 injured in September, 1907, and 8 killed and 13 injured in October of last year. Of the deaths, 6 were caused by falling material, 3 by explosions, 2 by being struck by cars, 1 by being caught in a "bump" and 1 by being struck by a falling derrick. Nine were injured by falling material, 5 by explosions, 2 by upsetting of a derrick, 2 by machinery, 2 by being caught between trips, 1 by live stock, 1 by being struck by cars and 1 being run over.

*Building trades.*—Six were killed and 30 injured in October, compared with 2 killed and 18 injured in the previous month, and 7 killed and 27 injured in October, 1906. Of the deaths 3 were due to falls, 2 to being run over by cars, and 1 to being struck by a derrick boom. Of the accidents, 10 were due to falls from scaffolds, 9 to falls, 6 to falls from buildings, 2 to machinery, 1 to falling material, 1 to an elevator and 1 to an explosion.

DEPARTMENT OF LABOUR, CANADA,  
STATISTICAL TABLE SERIES F., No. 48.

TABLE OF FATAL ACCIDENTS DURING THE MONTH OF OCTOBER, 1907.

Trade or Industry.	Locality.	Date.	No. Killed.	Cause of Fatality.
<b>Agriculture—</b>				
Farmer	Near Newboro, Ont.	Oct.	8	1 Hooked in leg by heifer, died of pyemia.
"	Gloucester, Ont.	"	5	1 Struck by train.
"	Nanoose Bay, B. C.	"	1	1 Tree fell on him.
"	Goderich, Ont.	"	4	1 Run over by load of wood.
"	Near Edmonton, Alta.	"	14	1 Trampled to death by horse.

"	Port Arthur, Ont.	" 29	1	In collapse of flour warehouse.

FATAL ACCIDENTS HAPPENING IN PREVIOUS MONTH BUT ONLY REPORTED TO THE DEPARTMENT IN OCTOBER.

Miner	Slough Creek, B. C.	Sept. 12	1	Fell down shaft.
"	Fernie, B. C.	" 20	2	Premature explosion of blast.
Carpenter	Toronto, Ont.	" 30	1	Scaffold collapsed.

*Metal trades.*—The record for October among these workers was 14 killed and 58 injured, compared with 5 killed and 46 injured in September last, and 6 killed and 37 injured in October, 1906. Five of the fatalities were caused by falling material, 3 by being run over, 2 by machinery, 2 by elevators, 1 by the collapse of a factory and 1 by molten metal. Falling material was responsible for 22 non-fatal accidents, machinery for 15, falls for 10, molten metal for 3, tools for

2, elevators for 2, the boom of a derrick for 1, an explosion for 2.

*Woodworking trades.*—A woodworker at Waterville, Que., died from lockjaw, from the effects of the falling of a piece of iron on his foot. Contact with machinery caused all the 13 minor accidents.

*Printing.*—Among these crafts there were only 4 non-fatal accidents in October, compared with 1 non-fatal accident in September, 1907, and 1 in October, 1906. Three of the accidents

were due to machinery and the other to the victim having his leg badly crushed in an elevator.

*Clothing.*—During October, 1907, a boot and shoe worker at St. Hyacinthe, Que., had his arm badly cut in a machine. There were no accidents in the previous month and there was 1 fatality in October, 1906.

*Textile.*—Five workmen were injured in these trades during October, compared with 3 in the previous month and 3 also in October of last year. Machinery was responsible for the five injuries.

*Food and tobacco preparation.*—Four killed and 8 injured was the record for October as against 6 injured in September last, and 1 killed and 6 injured in October, 1906. Two of the deaths were caused by the explosion of a retort in a canning factory, 1 by electric shock and 1 by being run over by an engine. Four of the accidents were caused by machinery and 1 each by an elevator, tools, live-stock and by a fall.

*Railway service.*—There were 39 fatal and 35 non-fatal accidents in October. In September the record was 20 killed and 31 injured, and in October, 1906, 19 killed and 27 injured. Of the fatalities, 15 were due to the victims being run over by trains or portions thereof, 6 to being struck by engines, 4 to derailments, 3 to being caught between cars, 2 to explosion of a locomotive, 2 to collisions, 2 to explosions of dynamite, 3 to drowning and 1 each to a fall and to being burnt to death in a car. Fourteen of the other accidents were due to the victims being caught between cars, 5 to falling material, 4 to being run over, 4 to falls, 3 to explosions, 2 to collisions, and 1 each to a derailment, to molten metal, to machinery and to being burnt in a construction car.

*Navigation.*—Twelve of these workers were killed and 6 injured in October, 1907, compared with 11 killed and 10 injured in the previous month and 9 killed and 5 injured in October, 1906. Nine of the fatalities were caused by drowning, 2 by falls and 1 by machinery. Of the other accidents, 5 were caused by falls and 1 by falling material.

*General transport.*—There were 9 killed and 29 injured as against 4 killed and 16 injured in the previous month, and 7 killed and 20 injured in October, 1906. Falls caused 3 deaths, being run over 2, falling material 1, live stock 1 and derailment of train 1. Falls caused 11 serious injuries, runaways 4, collisions 4, being run over 3, being crushed between vehicles 3, being burnt by sulphuric acid 1, falling material 1, live stock 1, and being struck by an engine 1.

*Civic employees.*—Two firemen were injured by falling from a ladder during October. In the preceding month the record was 2 killed and 1 injured, and in October, 1906, 3 injured.

*Miscellaneous.*—There were 5 killed and 23 injured as against 1 killed and 10 injured in September last and 3 killed and 13 injured in October of last year. One of the deaths was caused by electric shock, 1 by machinery, 1 by an explosion, 1 by a runaway, and 1 by being run over by a runaway team.

*Unskilled labour.*—Among these workers 5 met death by accident and 24 were injured during October, 1907, compared with 2 killed and 17 injured in the previous month, and 4 killed and 14 injured in October, 1906. Two of the fatalities were due to the victims being run over by vehicles, 2 to falling material and 1 to being smothered by slack coal in a chute. Of the other accidents 14 were due to falling material, 3 to falls, 2 to machinery, 2 to being run over, 1 to a derrick, 1 to a cave-in and 1 to being struck by a train.

## TRADE DISPUTES DURING THE MONTH OF OCTOBER, 1907.

THERE was a slight improvement in industrial conditions in Canada, during October, compared with the previous month with regard to trade disputes, and at the close of the month, very few localities continued to be affected to any serious extent by strikes or lockouts. The chief point of disturbance was at Springhill, Nova Scotia, where the strike of coal miners, which began on August 1, existed until October 28, causing a continued shortage of coal to be felt throughout the province.

## Analysis of Trade Disputes During the Month.

*Number and magnitude.*—The total number of trade disputes reported to have been in existence in Canada during October was 22, a decrease of 4, compared with the previous month, but an increase of 10 compared with October, 1906. About 67 establishments and 5,168 employees were affected by these disputes, 19 firms and about 2,598 employees being involved in the disputes which began in October.

*Loss of time in working days.*—The loss of time to employees through trade disputes during October amounted approximately to 63,350 working days, compared with 61,900 in September, and 87,920 in October, 1906.

*Trades affected by new disputes.*—The following table shows the trades affected by the new disputes of the month, and the number of workpeople affected in each group of trades.

Trades.	No. of Disputes.	No. of Workers.
Lumbering.....	1	85
Mining.....	1	1,342
Clothing trades.....	3	1,101
Printing and book-binding.....	1	30
Miscellaneous trades..	1	40
Total.....	7	2,598

*Localities affected by new disputes.*—The new disputes of the month occurred in the following provinces of Canada:—

Province.	No. of Disputes.
Quebec.....	1
Ontario.....	3
Manitoba.....	1
British Columbia.....	2
Total.....	7

*Causes of disputes.*—The following were the causes of the new disputes of the month:—

Cause.	No. of Disputes.
For higher wages.....	1
For shorter hours.....	2
Against reduction in wages.....	1
Against increase in hours.....	1
For recognition of union.....	1
Friction with a foreman.....	1
Total.....	7

*Methods of settlement.*—Of the 22 disputes that were in existence during October, 15 were terminated in the course of the month, leaving 7, still in existence. In 1 case dispute was settled through the Industrial Disputes Investigation Act, in 5 by negotiations between the parties concerned, in 4 work was resumed without negotiations, and in the remaining 5 industrial conditions ceased to be affected.

*Results of disputes.*—Of the disputes that were terminated, 10 resulted in favour of the employers, and 3 in favour of the employees, in 1 a compromise was reached, and in 1 the strikers were partially successful, their demands being conceded by some firms involved. In two cases in which the employers were successful, only a small portion of the workpeople were directly involved, the majority of them not desiring any change in the prevailing conditions.

## Disputes which Commenced Prior to the Beginning of the Month.

The trade disputes in existence during October, which began in previous

months, comprised strikes of coal miners at Springhill, N. S., plumbers, machinists, electrical workers and granite cutters at Toronto Ont., carpenters at Regina, Sask., boilermakers and helpers at Halifax, N. S., woollen mill hands at Almonte, Ont., tailors at Kingston, Ont., carpenters, stonemasons, bricklayers and masons at Galt, Ont., and pulp and paper makers at Sturgeon Falls, Ont. A brief account of these disputes is given below.

#### **Strike of Coal Miners at Springhill, N. S.**

A strike of coal miners of the Cumberland Railway and Coal Company, which began at Springhill, N. S., on August 1, was terminated on October 31. The subject of the dispute and settlement are set forth in a special article on the operations of the Industrial Disputes Investigation Act, 1907. The company concerned being one of the largest mining companies in Nova Scotia, employing about 1,250 men, the strike caused a great shortage of coal throughout the province, affecting indirectly many industries dependent upon these mines. In the course of the dispute many of the employees had left Springhill and obtained work in other districts.

#### **Strike of Boilermakers and Helpers at Halifax, N. S.**

No settlement was reported with regard to a strike of boilermakers and helpers at Halifax, N. S., which took place on September 25, owing to the refusal of the Halifax Graving Dock Company to grant a demand for an increase in wages from \$2.50 to \$3.50 per day for mechanics' and from \$1.80 to \$2.50 per day for helpers. When the strike was declared two vessels were undergoing repairs at the dock. During October the Company succeeded in temporarily repairing them, and took them to New York, where the work required was completed. About 89 men were directly affected by this dispute, and 100 indirectly.

#### **Strike of Carpenters at Regina, Sask.**

A strike of carpenters which was declared at Regina, Saskatchewan, on

September 23, affecting 5 firms and about 40 men, was terminated on October 3. The cause of the dispute was the refusal of the employers to grant a demand for recognition of the carpenters' Union, and for the employment of none but union foremen. Work was resumed under the conditions prevailing before the strike, the contractors agreeing to meet their men some time in January or February of next year, in order to consider their grievances and to come to some arrangement with them, if possible. One of the firms affected stated that the 12 men in their employ, who were called out were replaced by non-unionists, and no serious loss was suffered by them.

#### **Strike of Woollen Mill Workers at Almonte, Ont.**

A strike of 5 warpers at Almonte, Ont., which began on September 13, and caused the closing of a large part of the mill of the Rosamond Woollen Company, throwing out of employment about 200 workpeople, was terminated on October 2, and a few days later normal conditions were restored. After a meeting between the warpers and a representative of the company, held on October 1, 3 of the strikers agreed to withdraw their demand for an increase in wages and to return to work under the conditions prevailing before the strike. The other 2 warpers refused to go back.

#### **Strike of Tailors at Kingston, Ont.**

A strike of tailors which took place at Kingston, Ont., on September 23, continued throughout October; no general settlement being reached, but in the course of the month the demands of the strikers were conceded by 2 out of the 7 firms affected. The dispute, which concerned 25 men and 50 women workers, arose through a declaration by the employers for "open shops", prior to the consideration of a new bill of prices, involving an increase of 15 per cent, in wages, which had been presented by the Journeymen Tailors' Union.

TABLE OF TRADE DISPUTES DURING THE MONTH OF OCTOBER.

Occupation.	Locality.	Alleged Cause or Object.	No. of Firms or Establishments affected.	Approximate No. of Employees affected.				Date of commencement.	Result.	
				Directly.		Indirectly.				
				Males	Fe-males	Males	Fe-males			
<i>Mining</i> — Coal miners.....	Springhill, N. S.....	Demand for payment of 4 cents per inch, per lineal yard, for stone in pillar work.....	1	500	.....	750	.....	Aug. 1	Oct. 31	Strike declared off; work resumed without change in conditions as to pillar work.
<i>Building Trades</i> — Plumbers .....	Toronto, Ont.....	Against employment of non-unionists.....	1	50	.....	.....	.....	Apr. 13	.....	No settlement reported at end of month.
Plumbers .....	Toronto, Ont.....	Demand for increase in wages from 37½ to 45 cents per hour, apprentices from \$6.50 to \$8.50 per week, and closed shops.	6	250	.....	.....	.....	" 13	.....	No settlement reported, but most of the strikers obtained work on terms demanded. The larger firms continued to oppose the principle of "closed shops."
Carpenters, plumbers and labourers	Galt, Ont.....	Against employment of non-unionists.....	1	7	.....	.....	.....	July 29	.....	Conditions ceased to be affected.
Stone masons.....	Galt, Ont.....	Against employment of non-union labourers.....	1	12	.....	.....	.....	Aug. 23	.....	Conditions ceased to be affected.
Bricklayers and labourers.....	Galt, Ont.....	Against employment of non-union carpenters.....	1	12	.....	.....	.....	" 26	.....	Conditions ceased to be affected.
Granite cutters .....	Toronto, Ont.....	Men alleged they had been brought in to work under misrepresentations.....	1	14	.....	.....	.....	" 22	.....	No settlement reported at end of month.

DISPUTES WHICH COMMENCED PRIOR TO THE BEGINNING OF THE MONTH.

Carpenters.....	Regina, Sask.....	Demand for recognition of Union and employment of none but union foremen.....	5	40	Sept. 23 Oct.	3	Work resumed under old conditions on employers promising to consider demands of their men in January or February of next year.
<i>Metal Trades—</i>							
Machinists.....	Toronto, Ont.....	Demand for reduction in working hours from 10 to 9, with no change in wages.....	16	400	June	8	No settlement reported but employers claimed to be no longer affected, demand of strikers conceded by some jobbing and repair shops.
Iron moulders.....	Vancouver, B. C.....	Demand for increase in wages from \$3.75 to \$4 per day, and reduction in working hours from 9 to 8.....		75	"	24	No settlement reported at end of month.
Electrical workers	Toronto, Ont.....	In sympathy with striking plumbers.....	5	25	July 20		No settlement reported at end of month.
Boilermakers and helpers.....	Halifax, N. S.....	For an increase in wages; mechanics from \$2.50 to \$3.50; helpers from \$1.80 to \$2.50 per day.....	1	89	Sept. 25		No settlement reported at end of month.

Miscellaneous Trades—Plate glass workers	Montreal, Que.....	5	.....	40	.....	"	7	"	21	Work resumed, no change, Union not recognized.

\* Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where after the declaration of a strike, some of the original strikers have returned to work or had their places filled with new hands, or where establishments affected have found that for either of these reasons, or both, or for other causes their business is no longer seriously affected. In such cases while, in one sense, it may be true that a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon the business interests of the community is concerned a record of the continuance of such a dispute might be misleading. The list of trade disputes published in the present table, therefore, includes mention only of such disputes as during the month or at its termination, affected, to an appreciable degree, the carrying on of the industrial or business operations of the firm or establishments concerned; mention, moreover, is not made of disputes involving less than six employees, or less duration than 24 hours.

### Strike of Boilermakers at Ottawa, Ont.

During the month, a small strike of boilermakers was reported to the Department which took place at Ottawa on September 5, affecting 11 men. The dispute arose through the discharge of an employee, who alleged that he was dismissed because he was a member of the Boilermakers Union. The employer stated that he was discharged because he demanded an increase in wages and was continually finding fault. On September 24, the strikers returned to work, the discharged man not being reinstated.

No settlement was reached with regard to a strike of *plumbers* which was declared at Toronto on May 17, but by the end of the month it was reported that the greater proportion of the strikers had gone back to work, having come to terms with their employers. Some of the larger firms still continued to be affected.

No change was reported with regard to a strike of 25 *electrical workers* at Toronto, who stopped work on July 20, in sympathy with the striking plumbers.

### Other Disputes.

Industrial conditions ceased to be affected by a strike of 216 *pulp and paper makers* at Sturgeon Falls, Ont., which began on June 10, owing to the refusal of their employers to grant a demand for the discontinuance of Sunday labour, and for recognition of the Union. Most of the places of the strikers were filled.

Conditions also ceased to be affected in the case of three small strikes affecting the *building trades*, which began in July and August at Galt, Ont. These disputes all arose from the employment of non-unionists.

It was reported that a strike of 50 *tunnel labourers* at Windsor, Ont., which took place on September 5, was terminated on the following day, the places of the strikers being filled.

Fourteen *granite cutters* at Toronto, Ont., who stopped work on August 22, alleging that they had been engaged under mis-representations, and 75 iron moulders at Vancouver, B. C.,

who went out on June 8, having been refused a demand for an increase in wages and a reduction in working hours.

### New Disputes.

The new disputes of the month involved coal miners at Nanaimo, B. C., lumber handlers at Vancouver, B. C., garment workers at Paris, Ont., and Ottawa, Ont.; boot and shoe workers at Toronto, Ont.; bookbinders at Winnipeg, Man., and plate glass workers at Montreal Que..

### Strike of Coal Drivers and Pushers at Nanaimo, B. C.

On October 1, the coal drivers and pushers employed by the Western Fuel Company at Nanaimo, B. C., stopped work on account of their dissatisfaction with the terms of a two years agreement which had been arranged by the Company and a committee of employees, and ratified by a majority of the employees by secret ballot. It was stated by the company that the strikers demanded \$3.15 instead of \$2.86 for an 8 hour shift, although it was claimed that the latter rate was 11 cents per shift higher than the rate for similar work elsewhere in British Columbia and Alberta. On October 4, the strikers accepted the agreement, and work was resumed. The drivers gradually returned until October 7, when normal conditions were restored, all except a few being taken back. According to a report received from the company, 181 men were directly affected by the dispute, and 1161 indirectly. Another report stated that about 200 men were directly and 500 indirectly affected by the dispute.

### Closing of Mines at Hillcrest, Alberta.

On October 11, the mines of the Hillcrest Coal and Coke Company, at Hillcrest, Alberta, were closed for two days, throwing about 70 men out of employment. The miners, claiming that the closing of the mines constituted a lockout, prosecuted the company for violation of the Industrial Disputes Investigation Act, on the ground that such action was illegal

during the session of a conciliation board, which had been established under the Act for the purpose of dealing with the differences between the company and its employees.\* A conviction was recorded and a fine of \$200.00 imposed, from which the company appealed. The company claimed that the closing down of the mills had not been in the nature of a lockout.

#### **Lockout of Lumber Handlers at Vancouver and New Westminster, B. C.**

On October 1, it was reported that a lockout was inaugurated by stevedores and millmen against the lumber handlers at Vancouver and New Westminster, B. C., involving 2 mills, and about 85 men. The dispute arose from a desire of the employers to increase the working hours of the lumber handlers from 9 to 10 per day, with the object of making them the same as the hours of the men employed inside the mills. The latter were anxious to have their working day reduced from 10 to 9 hours. On October 23, work was resumed under the conditions prevailing before the dispute.

#### **Strike of Garment Workers at Paris, Ont**

On October 12, about 1,000 employees of the Penman Manufacturing Company, of whom 150 were men and 850 women workers, declared strike. The cause of the dispute was the refusal of the Company to grant a demand for the continuance of the Saturday half holiday which had prevailed during the summer months. On October 21 work was resumed, a compromise having been effected. It was agreed that for the next 13 weeks the hours of labour would be the same as formerly, namely until 4.30 on Saturdays. After that work would commence a 6.50 or 7 a. m. and continue until 6 or 6.10 p. m., except on Saturdays, when work would cease at 12.10 p. m., during the entire year.

#### **Strike of Garment Workers at Ottawa, Ont.**

On October 7, a strike of 11 garment workers employed by the Universal Manufacturing Company took place at

\* For further reference to this dispute see the October number of the *Labour Gazette*, page 412.

Ottawa, Ont., on account of friction between the designer and the employees. The strike was confined to the male workers, all the female employees continuing at work. On October 21, the strikers returned to work and signed an agreement not to go out again without submitting their differences to arbitration. It was reported that the employers agreed, on their part, to discharge 3 of the 6 girls, who had been engaged to replace the strikers at the end of three months, if the men gave evidence of good faith at that time.

#### **Strike of Boot and Shoe Workers at Toronto, Ont.**

On October 23, a strike of 92 boot and shoe workers, of whom 30 were female employees, took place at Toronto, Ont. The dispute arose from a readjustment of piece work prices by the Victoria Shoe Company, incident to the installing of some new machinery. The strikers alleged that the readjustment involved a reduction in wages in violation of an agreement between the Company and their employees, which provided that any proposed changes in wages on the part of either the firm or its employees if no mutual agreement is reached, should be submitted to an arbitration board, whose decision would be binding on both parties. It was reported by the Shoe Workers' Union, that work was resumed on October 28, the company having restored the wages to their former basis. It was stated by the Company that the object of the dispute was partly to obtain a new contract between the Shoe Workers' Union and the employing Company, and to force an adjustment of prices with the manager, instead of the superintendent; to change slightly the rate of wages and the system of paying the men. As a result of the dispute the men lost \$900 in wages, and received back pay to the amount of \$1.08.

#### **Strike of Bookbinders at Winnipeg, Man.**

On October 1, a strike of bookbinders was declared at Winnipeg, Man. in which 8 establishments and 30 employees were involved. The dispute arose from a demand for a reduction in working

hours from 53 to 48 per week. Work was resumed on October 4, by all but 6 of the strikers, four of the firms affected having signed an agreement granting a working day of 8 hours.

#### Strike of Plate Glass Workers at Montreal, Que.

On October 7, a strike of plate glass bevellers took place at Montreal, Que. A report received from one of the companies affected, stated that 5 firms and 40 employees were involved. The cause

of the dispute was the refusal of the employers to recognize the glass bevellers' Union. On October 21, work was resumed under the old conditions, recognition of the Union not having been conceded.

The table published herewith is a compilation of the trade disputes of the Dominion of Canada, which began, or were in continuance during the month of October, and which have been reported to the Department.

### CHANGES IN RATES OF WAGES AND HOURS OF LABOUR, CANADA—THIRD QUARTER OF 1907.

IN the accompanying statistical table detailed information is presented relating to changes in rates of wages and hours of labour reported to the Department of Labour as having gone into effect during the third quarter of the present calendar year, including the months of July, August and September, 1907.

The changes reported during the quarter, affecting in each case a number of workpeople, were 53 in number. Of these, 39 were of the nature of increases on wages and 8 of the nature of decreases in hours. In 2 cases the changes involved a decrease in wages, and in 4 an increase in wages combined with a decrease in hours.

#### The General Result.

The general tendency of wages was strongly upward during the quarter, though to a much less pronounced degree than during the quarter immediately preceding. Compared with the corresponding period of 1906, however, the number of changes occurring and the number of employees affected were considerably larger. This was particularly the case among railway employees, street railway employees, in the printing trades and in the mining industry.

Among the first mentioned, the following received advances: conductors and trainmen on the Quebec Central Railway system; locomotive engineers on the G. T. R. and M. C. R. systems; locomotive firemen on the M. C. R. system and the C. P. R. western lines; machinists, boilermakers and other shop employees of the I. C. R., C. P. R. (Western) and Pere Marquette systems; and freight handlers of the I. C. R. Among street railway employees, new agreements involving an increase to large numbers of men went into effect from July 1 at Toronto, and on the lines of the British Columbia Electric Railway Company. In the printing trades, some 2,200 employees at Montreal and Toronto obtained the 8 hour day. In the mining industry, the scarcity of men prevailing in the metalliferous camps and smelters of British Columbia led to some important advances in the wages scale. In the building trades, the number of men obtaining increases was less than in the third quarter of 1906.

In the following small table an analysis is presented showing the approximate aggregate results according to industries and groups of trades of the several changes of the quarter in so far as detailed information was obtained by the Department.

TABLE SHOWING, BY INDUSTRIES AND GROUPS OF TRADES, THE RESULTS OF CHANGES IN WAGES AND HOURS OF LABOUR, CANADA, DURING THE THIRD QUARTER OF 1907.\*

Industry or Group of Trade..	Approximate Number of Workpeople Affected.	Total increase in Weekly Earnings.	Total decrease in Weekly Earnings.	Total increase in Hours of Employment Per Week.	Total decrease in Weekly Employment Per Week.
Mining.....	2,500	\$7,000	.....	.....	.....
Building.....	850	1,460	.....	.....	2,000
Metal.....	270	194	.....	.....	1,850
Woodworking.....	281	.....	.....	.....	1,405
Printing.....	2,388	170	.....	.....	13,575
Textile.....	863	725	.....	.....	.....
Food and tobacco.....	100	100	.....	.....	.....
Leather.....	15	45	.....	.....	90
The Railway Service.....	3,400	.....	.....	.....	.....
Street Railway Employees.....	1,796	2,600	.....	.....	.....
General Transport.....	210	350	.....	.....	.....
Civic employees.....	45	63	.....	.....	.....
Miscellaneous.....	38	19	.....	.....	.....
Unskilled labour.....	353	219	.....	.....	.....

\*Account is taken in this table only of changes concerning which detailed information was obtained by the Department. The returns are to be regarded as approximate only.

**Changes by Industries and Trades.**

The following is a statement of the changes in wages and hours of labour reported to the Department as having gone into effect during the third quarter of 1907, according to the several industries and groups of trades affected:—

*Fishing.*—The rates paid to salmon fishermen on the Fraser River, B. C., during the present year have been as follows:—

<i>From March 1st to April 20th:</i>	
Red salmon.....	\$.08 per lb.
White salmon.....	.05 "
Steelheads.....	.06 "
<i>From April 20th to June 1st:</i>	
Red salmon.....	.06 "
White salmon.....	.05 "
Steelheads.....	market prices
Sockeyes.....	.25 per fish.

The prices paid during the season of 1906 were as follows:—

<i>Up to April 15th:</i>	
Red spring salmon.....	\$.08 per lb.
<i>After April 15th:</i>	
Red spring salmon.....	.05 "
White spring salmon.....	.04 "
Steelheads.....	.05 "
Sockeye salmon from July 10 to Aug. 18.	.25 per fish.
Sockeye salmon from Aug. 1 to Aug. 25.	.20 "

The number of men engaged in 1907 was approximately 3,000, compared with 5,500 last year. Average individual earn-

ings were \$50 in 1907, compared with \$100 in 1906. (1)

*Lumbering.*—In connection with the hiring of men to work in the winter lumbering camps of Ontario and Quebec, the wages offered were about \$5.00 per month in advance of last year. In New Brunswick, the rates were the same as last year, or slightly lower. (2)

*Mining.*—A pronounced advance in wages went into effect during the summer months in the metalliferous mining camps and smelters of British Columbia. The advances followed in some cases on increases granted during the spring months and were generally due to the prevailing scarcity of workmen. In the Rossland mining camp, where about 750 men were affected, the increases ranged from 25 to 50 cents per day, dating from July 1, notwithstanding that a similar increase affecting a large proportion of these employees went into effect on May 1, preceding. By courtesy of the Granby Consolidated Mining and Smelting Company, Limited, the British Columbia

(1) For a statement with reference to the extent of the catch see *Labour Gazette* for September and October, 1907, at pages 285 and 391 respectively.

(2) For a statement with regard to the wages paid to lumbermen in 1906, see the *Labour Gazette* for November 1907, page 571.

Copper Company, Limited, and the Dominion Copper Company, Limited, a detailed statement is presented in the accompanying table showing the exact effect of the change among the various classes in their employ. The return may be regarded as representative of conditions prevailing in the industry as a whole, about 2,500 men being affected (\*).

During September, the wages scale at Rossland, B. C., for men employed about mines was as follows:—

Trade or Class of Labour	Rate of Wages, Per Day of 8 Hours, Not less than:
Machinists and timbermen	\$4.00
Shovellers.....	3.25
Blacksmiths.....	4.25
"    helpers.....	3.50
Skip tenders.....	3.75
"    helpers.....	3.25
Engineers.....	4.25

The minimum wage on the surface was \$3.25 per day of 9 hours.

*Building trades.*—Bricklayers (600) at Winnipeg, Man., had their hours reduced from 55 to 51 per week during July and August, as the result of a strike. Carpenters (300) at Regina, Sask., received an increase in wages from 27½ to 35 cents per hour. Plumbers' and steamfitters' helpers at Calgary, Alta., had their wages increased, the former from 45 cents to 51½ cents per hour, and the latter from 25 cents to 30 cents per hour.

*Metal, engineering and shipbuilding trades.*—During the month of June, between 800 and 900 machinists at Toronto, Ont., went on strike for a reduction in hours from 10 to 9 per day, without reduction in pay. The strike is still unsettled in the larger shops, but in about 34 of the smaller shops, employing about 250 men, the reduction in question has been granted. Electrical workers at Halifax, N. S., received an increase in wages from \$12 to \$13.50 per week. Apprentices, whose wages varied from \$3 to \$6 per week, received a scale of 14 cents per hour. Employees of the Bell Telephone Company, consisting of fore-

men, linemen and cable splicers, to the number of 120, received a Saturday half-holiday without loss of pay. Iron moulders at New Westminster, B. C., and Victoria, B. C., had their wages increased by 50 cents per day in the first locality, and by 25 cents per day in the second. Tinsmiths at Calgary, Alta., were increased from 40 to 42½ cents per hour.

*Woodworking and furnishing trades.*—Employees of the Office Specialty Manufacturing Company, Limited, of Newmarket, Ont., numbering 281 in all, had their hours reduced one per day on the first five days of the week, dating from July 1, by voluntary concession.

*Printing and allied trades.*—During the month of June, the allied printing trades of Montreal, Que., and Toronto, Ont., obtained five years' agreements involving an increasing scale of wages and a reduction in hours, to take effect immediately, from 9 to 8 per day. Upwards of 2,000 employees were affected by these agreements (\*).

At Brantford and Stratford, Ont., printers, pressmen, etc., had their hours reduced from 8½ to 8 per day, in fulfillment of agreements entered into in 1906; about 85 employees in all were affected.

At London, Ont., job and newspaper compositors received an increase in wages of \$2.00 per week in the case of the former and of \$1.00 per week in the case of the latter. The former class also received a reduction of three hours per week.

*Textile trades.*—A number of the lower paid workmen employed in the Montmorency mills of the Dominion Textile Company, Que., had their wages advanced during the quarter, in addition to the advance which was granted to the entire staff in May last. The increase had the effect of equalizing the amount of the increases received by individual employees. Employees of the Penman Manufacturing Company, woollen manufacturers, of St. Hyacinthe, Que., obtained increases ranging from \$1.00 to

(\* For statement re increases which went into effect at Moyie, B. C., in June see *Labour Gazette* for August, 1907, pages 192 and 204.

(\* For full details with respect to the nature of the changes involved in these agreements see text of agreement concluded at Toronto published in the *Labour Gazette* for August, 1907, at page 213, and of the Montreal agreement published under the heading of "Recent Industrial Agreements" in the present issue.

\$2.00 per week. Dye-house labourers at Sherbrooke, Que., obtained a slight advance.

*Food and tobacco preparation.*—Moulders at Toronto, Ont., had their wages increased from \$11.50 to \$12.50 per week, after negotiations between employers and employees.

*Leather trades.*—Harness makers at

Victoria, B. C., received an increase in wages from \$2.50 to \$3.00 per day, and a decrease in hours from 10 to 9 per day.

*The Railway service.*—By an agreement which went into effect on July 1, the following increases in wages were granted to conductors, brakemen and baggage-men in the employ of the Quebec Central Railway Company:—

PASSENGER TRAINS.

Train number.	Class of Employees.	Old scale.	New scale.	Hours of employment per day.
15	Conductors.....	\$ 3.25	\$ 3.40	11
8	Brakemen.....	2.00	2.15	11
16	Baggagemen.....	1.65	1.80	11
1	Conductors.....	3.00	3.25	11
8	Brakemen.....	1.90	2.05	11
2	Baggagemen.....	1.80	1.75	11
17	Conductors.....	2.75	3.00	11
8	Brakemen.....	1.80	1.90	11
18	Baggagemen.....	1.80	1.90	11

WAY FREIGHTS.

Conductors.....	2.60	2.80	11
Brakemen.....	1.85	2.00	11

EXTRA FREIGHTS.

Conductors.....	2.50	2.70	11
Brakemen.....	1.70	1.85	11

TRAINS ON MEGANTIC BRANCH.

Conductors.....	2.60	2.80	11
Brakemen.....	1.75	1.90	11

CONSTRUCTION TRAINS.

Conductors.....	.22½ per hour	.25 per hour	11
Brakemen.....	.15 per hour	16½ per hour	11

SHUNTERS.

Conductors.....	2.00	2.20	
Brakemen.....	1.50	1.70	

All Trains going to load wood on the Main Line to be paid mileage from the starting point to place where they load and by the hour while loading.

One hundred miles or 11 hours to constitute one day on all freight trains.

One hundred and fifty miles or 11 hours to constitute one day on all passenger trains.

Passenger specials consisting of 5 cars or more to be paid highest passenger train rates; of less than 5 cars, to be paid next highest.

Trainmen deadheading on Company's orders to receive half rate of train on which they travel.

OF LABOUR DURING THE THIRD QUARTER OF 1907.

Estimated Rate of Wages per Week		Estimated Hours of Labour per Week.		Change in Wages per Head per Week.		Change in Working Hours per Head per Week.		Manner in which Change was brought about.
Before Change.	After Change.	Before Change.	After Change.	Increase.	Decrease	Increase	Decrease	
\$9.00	\$10.50	54	54	\$1.50				
\$10.00*	\$11.00‡			\$1.00				By mediation after a strike.
\$9.60	\$10.20	60	60	.60				After a strike.
9.00	9.60	60	60	.60				Owing to scarcity of men.
12.00	13.50			1.50				On demand of workmen.

\* With 50% of all earnings over \$16 per week.

‡ With 50% of all earnings over \$17 per week.

Locomotive engineers (200) in the employ of the Michigan Central Railway Company received an increase in wages as follows:—

Passenger engineers, for 100 miles—Large engines, \$3.30 to \$3.40; medium sized engines, \$3.30 to \$3.35; small engines, \$3.20 to \$3.25.

Freight engineers, for 90 miles—Large engines, \$3.40 to \$3.65; medium sized engines, \$3.40 to \$3.55; small engines, \$3.12 to \$3.25.

For all grades of engines in all yards, an advance of 48 cents a day, or from \$3.12 to \$3.60 for a twelve-hour day.

Transfer engineers at the terminals, \$3.50 to \$3.75 per day of 12 hours.

On the Michigan, Midland and Petrolia division, an advance of 25 cents a day, or from \$3.25 to \$3.50.

Passenger service on the St. Clair division, from \$3.25 to \$3.40.

On work trains—For large engines, from \$3.70 to \$4; medium sized engines, \$3.70 to \$3.85; for small engines, \$3.50 to \$3.65.

Other minor matters were satisfactorily adjusted.

The new schedule is considered satisfactory by the men. [ ] [ ] [ ]

Locomotive firemen (220) in the employ of the same company had their wages advanced as follows, the first figures in each instance being those of the old schedule, the second those of the new one, just granted: [ ] [ ] [ ]

Passenger—Large class, from \$2 to \$2.05; small, from \$1.82 to \$1.85.

Freight—Large class, from \$2.12 to \$2.30; medium, \$2.01 to \$2.10; small, \$1.86 to \$1.95.

Three-crew Locals—From \$60 to \$63 per month.

Work trains—Large, from \$2.25 to \$2.45; medium, \$2.15 to \$2.25; small, \$2 to \$2.10.

Switch engines, per day of twelve hours—From \$1.92 to \$2.16.

Montrose and Victoria Transfers—From \$2 to \$2.15 per day.

Michigan, Midland and Petrolia—From \$1.85 to \$2.

St. Clair Branch, passenger—From \$1.85 to \$1.95.

Firemen will also get New York Central rates via Suspension Bridge.

Locomotive engineers employed by the Grand Trunk Railway Company, as the result of an investigation conducted by a Board under the Industrial Disputes Act, 1907, received an increase in wages under the terms of a new three years' agreement (6). The agreement involved an increase of about ten per cent., 1,300 men being affected.

Locomotive firemen on the central and western divisions of the Canadian Pacific Railway were granted a new schedule dating from July 1, involving an increase of from 15 to 20 per cent. in wages (6).

(6) The report of the Board of Investigation, together with a copy of the agreement was published in the September, 1907, issue of the *Labour Gazette*, at page 292. See also the *Labour Gazette* for August, 1907, page 179.

(6) For the full text of this agreement see the *Labour Gazette* for October, 1907, page 451.

Machinists and boilermakers in the employ of the C. P. R. Co., west of Fort William, had their hours reduced from 10 to 9 per day, with a substantial increase in rates of wages, dating from September 1.

At St. Thomas, Ont., 72 employees in the Pere Marquette railway shops had their wages increased 1 to 2 cents per hour according to class.

Freight handlers in the employ of the I. C. R. were granted an increase in wages during August by a Board appointed under the Act respecting Conciliation and Labour, (chap. 96, R. S. C., 1906.) (7) The increase was in addition to an advance which took effect on April 1, by which 47 men were affected.

Machinists employed on the I. C. R. system had their wages advanced.

*Street railway employees.*—Two very important new agreements, each to last for three years, went into effect on July 1. By one of these, the 1,400 employees of the Toronto Railway Company received an increase of 2 cents an hour (7). By the second agreement, which was not written, but based on a pay roll schedule only, the various employees of the British Columbia Electric Railway Company, Limited, operating in New Westminster, Vancouver and Victoria, B. C., had their wages increased by from 3 to 5 per cent. The change in scale for motormen and conductors was as follows:— (8)

	Old scale per hour.	New scale per hour.
First three months.....	\$ .20	\$ .20
Second six months.....	21	
Second three months.....		23
Third three months.....		25½
Second year.....	22	26½
Third year.....	23	27½
Fourth and fifth years.....	24	28½
Sixth and seventh years.....	25	29½
Eighth, ninth and tenth years.....	26	30½
After 10 years.....	27	31½

At Peterborough, Ont., the employees of over three years continuous service

(7) See *Labour Gazette* for August 1907 and September, 1907, at pp. 180 add 289.

(8) For statement re wages of the several classes see accompanying table.

were granted an increase of 10 cents per day.

Six motormen and conductors employed by the Niagara, St. Catharines and Toronto Railway Company for five years or upwards, obtained an increase in wages from 20 to 22½ cents per hour. Four others, of three years or upwards, service, had their wages increased from 18 to 20 cents per hour.

*General transport.*—Coal carters at Quebec, Que., were granted an increase in wages of \$3.00 per week. Workmen engaged in discharging coal from steamers at Montreal had their wages increased 2½ cents per hour.

*Civic employees.*—Increases were granted during the quarter to civic firemen at Brantford, Ont., and to various officials at London and Windsor, Ont. (°). La-

(°) For a statement of these increases in detail, see accompanying table.

bourers in the employment of the municipality at the latter point had their wages increased from \$1.50 to \$1.75 per day.

*Miscellaneous.*—Barbers at London, Ont., received an increase in their scale of from \$10 to \$11 per week; at the same time, an allowance of 50 per cent. on all earnings over \$16 per week was reduced to a similar allowance on earnings over \$17 per week.

*Unskilled labour.*—Unskilled labourers at Halifax, N. S., Moncton, N. B., and Regina, Sask., had their wages increased. In the first named city, the scale was advanced from 16 to 17 cents per hour; in the second, from \$1.50 to \$1.60 per day, and in the third, from \$2.00 to \$2.25 per day. Forty-five employees were affected in the first instance, 300 in the second and 8 in the third.

## REPORT OF DEPARTMENTS AND BUREAUS.

The following reports of departments and bureaus were received at the Department of Labour during October, 1907.

### DOMINION REPORTS.

#### Trade and Navigation Returns.

Tables of the Trade and Navigation of the Dominion of Canada for nine months of the fiscal year ended March 31, 1907. Ottawa, King's Printer, 1907. Pages 579. Price, 50 cents.

**T**HIS report on the trade of Canada during the last fiscal year indicates a continuance of the great prosperity which has prevailed in recent years. During the nine months ending March 31, 1907, the total exports amounted to a value of \$205,277,197 being nearly \$2,000,000 greater than during the whole year which ended on June 30, 1905, when the exports amounted to \$203,316,872. The total imports for the nine months were to the value of \$259,786,007 being over \$500,000 greater than for the whole of the fiscal year 1903-1904. The total duty collected in the nine months was \$40,290,171.70, compared with \$46,671,101.18 in 1905-1906, and \$42,024,339.92 in 1904-1905.

#### Post Office Department.

Report of the Postmaster General for the nine months ended March 31, 1907. Ottawa, King's Printer, 1907. Pages, 579. Price, 30 cents.

During the nine months ended March 31, 1907, the Report of the Postmaster-General shows that there was an increase of 236 in the number of post offices in Canada. The gross revenue for this period amounted to \$6,535,093.18, and the expenditure was \$5,452,791.59, leaving a surplus of \$1,082,301.59. The increase in the number of letters carried, estimated for a year on the basis of the nine fiscal months was 40,451,000, as compared with 38,103,000 in the previous fiscal year. The returns of the post office savings banks indicate an increase in the number and amount of deposits compared with the corresponding nine months of the previous fiscal year, and an increase in the balance due depositors on March 31, 1907 compared with March 31, 1906. The number of deposits during these periods increased from 178,767 to 186,916, and the amount of deposits from \$8,206,918, to \$8,803,233. On March 31, 1906 the balance due depositors was \$45,099,134.34, and on March

31, 1907, the balance amounted to \$47,452,957.75.

### Statistics of Insurance.

Report of the Superintendent of Insurance of the Dominion of Canada for the year ended December 31, 1906. Ottawa, King's Printer, 1907. Pages, 156.

The following statistics are given in the Report of the Superintendent of Insurance of Canada for 1906. The total amount paid for losses by fire insurance companies during the year was \$6,584,291, and the total premiums amounted to \$14,687,693, the ratio of losses to premiums being 44.83 per cent. compared with 42 per cent. in 1905, and 66.32 per cent. during the past thirty-eight years. British companies received from premiums \$3,601,374, Canadian companies \$3,179,319, and American companies \$2,907,270. There are at present 133 companies under the supervision of the office of the Superintendent of Insurance. Of these 54 carry on life insurance, as well as 4 doing life insurance on the assessment plan, 47 conduct fire insurance, 20 sickness insurance, 18 accident insurance, 10 guarantee insurance, and the remaining 27 carry on insurance, of various kinds. The total amount of premiums received in Canada for all forms of insurance was \$41,769,055, of which \$20,611,764 was received by Canadian companies, \$11,112,715 by British companies, and \$10,044,576 by American companies.

## BRITISH REPORTS.

### Conciliation in Trade Disputes.

Sixth Report of the Board of Trade of Proceedings under the Conciliation (Trade Disputes) Act, 1896. 1905-1907. London, Eyre and Spottiswoode, 1907. Pages, 110. Price, 5½d.

The Sixth Report of the British Board of Trade on the proceedings taken under the Conciliation Act of 1896, states that there were 51 cases dealt with from July 1, 1905, to June 30, 1907. Of these, 45 were settled under the Act. Since August, 1896 to June, 1907, there were 232 cases dealt with, of which 168 were settled under the Act. Joint applications for

the mediation of the Board of Trade were made in 140 cases, applications from workpeople only in 60 cases, and from employers only in 22 cases. In the last two years joint applications were received in 90 per cent. of the cases. Of the 51 disputes which came under the Act, 14 were in the building trades, 13 in the boot and shoe trade, 7 in metal engineering and shipbuilding, 4 in mining and quarrying and 6 in other trades. Attention is drawn to the fact that clauses exist in 60 trade agreements between employers and employees, providing that application shall be made to the Board of Trade for the appointment of an arbitrator, umpire or conciliator, in the event of the Conciliation Board or other conciliatory agency failing to effect a settlement.

### Strikes and Lockouts in Great Britain.

Report on strikes and Lock-outs and on Conciliation and Arbitration Boards in the United Kingdom, in 1906. London: Wyman and Sons, 1907. Pages, 152. Price, 8d.

The report on strikes and lockouts in the United Kingdom for 1906 states that the number of workpeople affected during that year was 217,773. This is considerably higher than the average of the previous ten years which was 178,494. The loss of time in working days amounted to 3,028,816 in 1906, compared with 2,470,189 in 1905. The average for the quinquennial period 1901 to 1905 was 2,783,000 working days, but for the preceding quinquennial period, 1896 to 1900 the average yearly loss of time was 7,010,000 days. In each of the past five years the industry principally involved in trade disputes was that of coal mining. In this branch of industry there were 81,550 employees affected in 1906, and in the previous year, 40,448 out of 93,503 persons were employed in coal mines. Excluding agricultural labourers and seamen, only 2.2 per cent. of all the workpeople employed in industries and trades were affected by disputes during the year. The amount of working time lost was only equivalent to about one third of a day per head of the working population.

### Friendly Societies.

Reports of the Chief Registrar of Friendly Societies for the year ending 31st December, 1906. Part A. London, Eyre and Spottiswoode, Pages, 197. Price 1s., 7d.

The growth of Friendly Societies in Great Britain and Ireland is shown in the Report of the Chief Registrar for 1906. Returns were received during the year from 45 societies, having a total membership of 7,884,307, an increase of 435,000 members compared with the previous year. The income of these societies exceeds £3,397,000 sterling a year, and their accumulated funds amount to £8,469,000. In 1906, 249 new branches of friendly orders were registered, as against 348 in 1905. Of the new branches 119, or 48 per cent. were registered by two temperance orders.

### Building Societies.

Twelfth Annual Report by the Chief Registrar of Friendly Societies of the Proceedings of the Registrars under the Building Societies Acts; with an Abstract of the Annual Accounts and Statements of Societies for the year, 1906. Part 1. Report, London; Wyman and Sons, 1907. Pages, 21. Price, 2½d.

The twelfth Annual Report on Building Societies in Great Britain and Ireland, states that during 1906, 31 new societies were formed, an increase of 6 over the previous year. There were received 1,999 returns for the year 1905, showing a total membership of 612,424 as compared with 609,785 members in 2,075 societies in 1904. The total receipts increased from £38,729,009 to £43,219,548. The number of societies making advances to borrowers on mortgage security diminished from 1,632 in 1904 to 1,558 in 1905. It is pointed out that the larger Friendly Societies, especially co-operative societies, and life assurance companies are entering into competition with the building societies, in offering facilities to their members for becoming owners of their own houses.

### Industrial Conditions in Mines and Quarries.

Mines and Quarries: General Report and Statistics for 1906. Part II.—Labour, London; Wyman and Sons, 1907. Pages, 115. Price, 8d.

In the report on labour in mines and quarries in Great Britain and Ireland during 1906, it is stated that in this

industry there were employed 1,004,092 persons, of whom 912,576 were employed in or about mines, and 91,516 in or about quarries. In the mines there was an increase of 18,965 males working underground compared with the preceding year, and an increase of 6,554 males and a decrease of 467 females working above ground. There were altogether 5,687 females working at the mines, 94.7 per cent. of the increase of employees occurred at coal mines. With regard to the fatal accidents in mines, the statistics covering the last 35 years show a steady diminishment of the dangers attending the work of mining, the rate of fatalities per 1,000 employees having been over 2 in 1873, and 1.291 in 1906. This decrease was largely among those working underground.

### NEW ZEALAND REPORT.

#### Industrial Conditions in New Zealand

Sixteenth Annual Report of the Department of Labour, New Zealand, 1907. Wellington; Government Printer, 1907. Pages, 141. Price, 2s., 6d.

The Sixteenth Annual Report of the Department of Labour of New Zealand, covering the year from April 1, 1906 to March 31, 1907, states that this period was one of exceptional prosperity in New Zealand. The number of factories increased from 9,881 in 1906, to 10,788 in 1907, and the factory workers from 70,403 to 75,310. There was activity in all the trades except in the making of saddlery and harness, dullness in this industry being attributed to the extension of the street railway systems, and the introduction of motor cars and cycles. In the course of the year 7,393 persons were assisted by the Department in procuring employment, and 146 wives with their families were forwarded to their husbands. There were 679 accidents in factories, of which 16 were fatal, being an average of one fatal accident to 5,000 employees. During the year ending December 31, 1906, there were 406 cases presented for settlement under the Industrial Conciliation and Arbitration Act. Two strikes occurred in New Zealand in violation of this act. One concerned the employees of the Auckland

Electric Tramway Company, who stopped work on the dismissal of two conductors. This dispute lasted less than half a day. The company was subsequently fined for dismissing men without notice, and the men were fined for taking part in a strike. The other dispute began with a strike of slaughtermen near Wellington who went on strike for an increased rate of pay, after the expiry of an industrial agreement under which they had been working. When application was made for the enforcement of the Act against the men, the application was dismissed on account of a flaw in the original agreement. The strike then spread to other places, where work was carried on under other agreements, and in these districts the men were fined £5 each for having aided and abetted a strike. This dispute brought up the question whether the Arbitration Court could punish men by imprisonment if the fines inflicted on them by the Court were left unpaid.

#### UNITED STATES REPORTS.

##### Wages and Hours of Labour and Prices of Food.

Bulletin of the Bureau of Labour, No. 71, July, 1907. Washington, D. C. Government Printing Office, 1907 Page, 408.

A report of the United States Bureau of Labour recently issued, contains the results of an investigation as to ways and hours of labour in 4,034 establishments in the principal manufacturing and mechanical industries of the United States during the years 1905 and 1906. Combined with statistics in previous reports, comparative tables are given for the years from 1890 to 1906, inclusive. It is stated that in 1906, the average wages per hour in these industries were 4.5 per cent. higher than in 1905, and the regular hour of labour per week were 0.5 per cent. lower, while the number of employees was 7 per cent. greater. In order to estimate the purchasing power of wages, an inquiry was made with regard to the retail prices of food, towards which go nearly half of the expenditures for all purposes in a workman's family, and it was found that compared with 1905, these prices were 2.9 per cent. higher, when estimated

according to consumption in representative workingmen's families. As the rise in wages was proportionately greater, it was estimated that a full week's wages in 1906 would purchase 1 per cent. more food than a full week's wages in 1905.

##### The Coal Industry in Illinois.

Twenty-fifth Annual Coal Report of the Illinois Bureau of Labour Statistics, 1906. Also, the Eighth Annual Report of the Illinois Free Employment Offices for the year ended September 30, 1906. Springfield, Ill., State Printers, 1907. Pages, 527.

The Report on the coal industry of Illinois for 1906 contains some interesting facts with reference to its development in the last twenty-five years. In that period the production of coal in Illinois has increased from 11,017,069 to 38,317,581 tons, and the number of employees from 20,290 to 62,283. Concurrently with this development, the conditions of the miners have greatly improved. The greatest advance has been in the last ten years, during which period a uniform working day of eight hours has been generally established, and wages have increased in many places over 100 per cent. Much of the friction in the relations between employers and employees in mines has been removed by the abolition of the 'truck' system, the adoption of the gross weight plan in paying for coal mined and the introduction of the system of paying wages semi-monthly.

#### OTHER REPORTS RECEIVED.

*Canada.*—Geological Survey of Canada. Report on the Cascade Coal Basin, Alberta, by D. B. Dowling, B. A., Sc.

Report, returns and statistics of the Inland Revenues of the Dominion of Canada, for the nine months ended March 31, 1907. Part II. Inspection of Weights and Measures, Gas and Electric Light.

### RECENT LEGAL DECISIONS AFFECTING LABOUR.

The following synopsis of recent cases affecting labour are based upon the latest reports of legal proceedings and other legal records of the different Provinces of Canada.

#### SUPREME COURT CASES.

##### Judgment for Damages Confirmed.

The Supreme Court of Canada recently disposed of an appeal in an action brought to recover damages for personal injuries sustained by plaintiff while in the employ of a sub-contractor under defendant.

Defendant, appellant, a contractor for the construction of a portion of the Lake St. John Railway, let a section of his work near La Tuque to a sub-contractor for earth and rock excavation. Plaintiff, respondent, an experienced miner, was employed by the sub-contractor to do the blasting of a thin layer of rock, and in setting off a series of blasts lighted the fuses with torches made of bark, instead of making use of a heated bar of iron provided for that purpose. Seven mines were thus successfully exploded. In lighting the eighth fuse, plaintiff threw away the torch in close proximity to the ninth fuse, which thereby became ignited without being observed by him. On returning to the mine after the eighth blast had been exploded, the ninth blast exploded and plaintiff received injuries which deprived him of his eyesight. In an action for \$10,000 damages brought by him against the contractor, both courts below found the contractor at fault in failing to supply electrical

apparatus for setting off the mines, and also that plaintiff was guilty of contributory negligence, and, according to the rule as to common fault prevailing in the Province of Quebec, divided the damages assessed and awarded \$2,000 to the plaintiff, respondent. Appellant claimed that the plaintiff's negligence was the sole cause of the disaster, and, in any event, that the plaintiff was not employed by him, and that he could not be held responsible.

The Court dismissed the appeal with costs.)

(Paquet v. Dufour; 17th October, 1907; Supreme Court.)

##### Quebec Law to Govern.

In the case noted at page 1,057 of the March, 1906, and at page 1,453 of the June, 1907, numbers of the *Labour Gazette*, the Supreme Court of Canada has affirmed the judgments holding that the case must be ruled by the law of the Province of Quebec, where the contract of hiring was made, and not by that of the Province of New Brunswick, where the accident happened.

(Logan v. Lee, 17th October, 1907; Supreme Court.)

#### QUEBEC CASES.

##### Restraint of Trade.

A very important judgment affecting the relations between employer and employee was recently rendered in the Superior Court at Montreal, in an action resulting from the journeymen plaster-

ers' strike of 1905. At the beginning of June, in that year the Journeymen Plasterers' Union notified the Master Plasterers' Association of Montreal, that on and from July 3rd, its members would no longer consent to work for the then accepted price of thirty-three and one-third cents per hour, but that they would insist upon their wages being advanced to forty cents per hour for a nine hour day's work. As a result, the master plasterers signed an agreement for their mutual protection, one of the clauses of which was as follows:—

"The subscribers and each of them severally, bind themselves to pay into a fund, as liquidated damages, for the violation of any clause in the present agreement the sum of \$500. As an admission of said liability and to secure the prompt payment of said damages, each of the said subscribers shall give a note bearing date not later than July 10, 1905."

Among the members of the Master Plasterers' Association who signed this agreement were Knott & Gardner, the defendants, and they duly gave their note as above mentioned. The journeymen plasterers went on strike in the middle of September. Defendants thereupon broke their engagement, and yielded to the strikers' demands by paying their men forty cents an hour. On being informed of the action taken by defendants, the Association decided that these members should be made to pay the penalty of \$500 agreed upon, and on September 28th, 1905, the present action based upon the promissory note signed by them was instituted by the three trustees for the Association. Defendants resisted the action, one of their principal pleas being that by their present action the plaintiffs seek to have the Court enforce and sanction an agreement which is, in effect, an illegal conspiracy to repress and restrain the free exercise of contract and the right to procure such services and pay such wages as a legal freedom of contract would allow, and that the said agreement, and particularly the specific clauses referred to are unjust and oppressive and constitute an attempt to create a trust or combine prohibited by law.

Before dealing with the main question as to whether the coalition or combination of the master plasterers is an un-

lawful one under the circumstances of the case, the trial judge took up this other question: Was the action of the strikers a lawful one? He remarked: "It is as clear as the sun's light at noonday, that if the journeymen plasterers were not violating any law in forming a coalition or combine in order to secure advanced wages, their employers could not possibly be guilty of any wrong, either private or public in clubbing together for the purpose of resisting their demand, and by the same means of protecting themselves against loss." On the question of strikes the Court pointed out that formerly the fact of forming a combination for the purpose of raising the price of labour was held to be a conspiracy, punishable by law; but times have changed, notions more humane and more in accord with real justice have prevailed, and now in all civilized countries workingmen are permitted to unite together for their mutual protection, and legislation has intervened to sanction such rights. His Lordship then added: "It being shown that the journeymen were doing nothing but that which they had a right to do in joining together for the purpose of obtaining an increase of wages, the most rigid logic ought, in my opinion, to bring us to the conclusion that if the action of the employees was lawful in making such a demand, that of the employers was equally lawful, when it is shown that all they did was simply to club together in order more effectually to oppose it." After quoting authorities in support of his opinion, the learned Judge examined the question of the validity of the penal clause included in the master plasterers' agreement, and came to the conclusion that it must stand good. He pointed out that defendants never withdrew from the coalition, never notified their co-subscribers that they had changed their minds, and never demanded back their promissory note. Without giving notice to any one, without a word of warning, they simply yielded to the demands of the strikers. Under these circumstances the Court held it to be clear that defendants thereby rendered themselves liable, and that they sub-

mitted to the obligation of paying the penalty which was to be the price of their defection. The note was given to represent liquidated damages; the evidence showed that the damages suffered by the members of the Association by reason of defendants' defection were far in excess of the amount of the penalty, and the action was maintained for the full amount of \$500 with interest and costs.

(Lefebvre v. Knott *et al.*; 11th October, 1907; St. Pierre, J.)

#### Damages Due to a Defective Scaffold.

In the Superior Court at Montreal, judgment was rendered recently in an action for damages for personal injuries sustained by plaintiff in the course of his employment by defendant, owing to the collapse of a defective scaffold. Plaintiff's duties consisted in carrying bricks to bricklayers employed by defendant in the erection of a house, and he was so engaged when the accident happened. The evidence went to show that the defendant had been warned to make the scaffold stronger, but the Court based its judgment on the now generally accepted principle, that employers must be held responsible for accidents resulting from failure on their part to have their advice or orders for the safety of their men duly carried out. In the present case defendant did not see that his recommendation was obeyed, and he was held responsible. There was, however, contributory negligence on the part of plaintiff, and for that reason judgment in his favour for \$65 only.

(Lamarche v. Tremblay; 22nd October, 1907; Martineau, J.)

#### Drunkenness while in Charge of Train.

Adelard Maheux, a conductor, formerly in the employ of the Canadian Northern Quebec Railway, was found guilty at the Court of Sessions at Montreal of having been drunk while on duty in charge of a freight train. He was sentenced to one month's imprisonment.

(Rex v. Maheux; 22nd October, 1907; Choquet, J.)

#### Decision under the Alien Labour Act.

Judgment was recently rendered in the Court of Special Sessions at Montreal in two important cases arising under the

Alien Labour Act. By that Act any person or corporation who brings into Canada any alien to perform labour or service of any kind in Canada, or who knowingly assists or encourages or solicits the importation of any alien for such purpose, is liable to pay a fine not exceeding one thousand dollars, and not less than fifty dollars. Two prosecutions for infraction of this law were instituted before the Court of Special Sessions by Gustave Francq, President of the Trades and Labour Council, and seven actions for penalties of one thousand dollars each were instituted by the same complainant in the Superior Court against the Dominion Car & Foundry Company, Limited, and its officers.

The Company pleaded that the establishment of a plant for building steel cars was a new industry not hitherto established in Canada, and that skilled labour for such industry could not be obtained in Canada and that therefore, under the provisions of clause (b) of Section 9 of the Act, they were exempted from the provisions of the Act and obliged for the prosecution of such industry to bring skilled steel car builders from the United States.

After reserving his decision for some time Judge Choquet maintained the position of the defence, and held that the manufacture of steel cars was a new industry in Canada and that the defendants had advertised in the Montreal newspapers for, and had made enquiries through their officers, to obtain skilled labour for this purpose, without avail. The learned judge held that while the importation and employment of aliens was prohibited for the protection of the Canadian workingman, the application of the Act could not be pressed so far as to cripple any new industry established in Canada requiring the employment of skilled labour, and that it was not shown that any Canadian workingman skilled in this work had been prevented or deprived from obtaining employment.

(Francq v. Dominion Car & Foundry Co.; 25th September, 1907; Choquet, J.)

#### Actor Loses Suit for Wrongful Dismissal.

Plaintiff sued for \$420 for balance of salary and cost of transportation on his

return trip to France. He is an actor and brought suit under a deed of agreement, made in Paris on the 14th August, 1906, whereby he contracted with defendant for an engagement of three months at the Theatre des Nouveautes, in the City of Montreal, at a salary of 1,800 francs per month. This contract was extended later on until the 2nd May, 1907. Plaintiff alleged that on the 6th April, 1907, defendants dismissed him without just cause, and that until the expiration of his agreement, he was always at the defendants' disposal, ready to fulfil his engagement. Defendants pleaded, invoking the terms of the contract, which they said plaintiff violated in two respects: 1st. He refused to perform in the leading part of a play called "La Tosca", which was in his repertoire, and 2nd, he violated the rules of the management, which he was bound to adhere to, by smoking in the theatre against the distinct prohibition of the regulations. As to the second ground the Court disposed of it at once. Plaintiff did smoke against the rules, but everyone smoked. Defendants tolerated this abuse until the institution of this action, and in the opinion of the Court only pleaded plaintiff's disobedience as an after-thought. Dealing with the first ground of defence, the Court found that plaintiff signed an agreement in which he gave defendants to understand that the play of "La Tosca" was one in which he was proficient. He was getting a very high salary, and this justified defendants in the belief that he was competent and ready to take the leading role in the play. The Court held that the evidence on this point was conclusive; indeed the proof went to establish that in the early part of his engagement plaintiff spoke of the leading role as belonging to him. In March the management decided to put "La Tosca" on the boards for the 8th of April last. Plaintiff, on the 21st March, when made aware of this, wrote a letter to defendants stating that he had not played the leading role in the play, which had been assigned to him that of "Baron Scarpia"; that he had taken the character of "Marquis Attavante" par complaisance; that he did

not know the Baron's part but would learn it for the 15th April, instead of the 8th, as announced. To this letter defendants made no reply. Again, on the 29th March, he wrote confirming the letter of the 21st, offering to play the part of the "Marquis" on the 8th, or to take the "Baron's" part, if sufficient time were given him, according to the terms of his agreement. Defendants did not answer this letter, and taking advantage of the writing between the parties dismissed the plaintiff. The Court proceeded to say that the contract between the plaintiff and defendants could not well be more one-sided than it was in many of its provisions, but plaintiff agreed to it, and is bound by it. Defendants adhere to the terms agreed upon. There was no obligation on the part of defendants to take any notice of the letters of plaintiff, although it seemed harsh that the dismissal should have taken place as it did. Plaintiff had placed "La Tosca" in his repertoire as one of the plays in which he was ready. By article of his engagement it was stipulated that an artist taking employment with a repertoire of roles, he was not ready to play, incurred immediate dismissal, and article 26 reiterated this stipulation. Plaintiff's offer to play a secondary role in the piece cannot avail him. He was the leading artist and when, amongst other plays, he gave "La Tosca" as being in his repertoire, he led defendants to believe that he could fill the leading part. The letter of the contract, and the weight of evidence being against the plaintiff, his action was dismissed with costs.

(Lasalle v. La Compagnie des Théâtres de Montréal; 25th October, 1907; Curran, J.)

#### Verdict in a Damage Suit.

In the Superior Court at Montreal an action was brought by one Pierre Francoeur against the defendants to recover \$1,000 damages for a fractured leg. Plaintiff had been moving car wheels in the Angus Shops, and in a fall there a wheel dropped on and broke his leg. He claimed that the accident was due to improper flooring, and entered suit, the case occupying several days before a judge and a special jury, con-

sisting of a number of the leading French and English contractors and business men of the city.

The jury brought in a verdict in the form of answers to a series of questions submitted. These were as follows:

1. Was the accident to the plaintiff entirely, or in part due to the negligence of the defendant, and if so, in what does the negligence consist? To this the answer was in the negative.

2. Was the accident entirely or in part due to the plaintiff's own fault or negligence, and if so, in what did his negligence consist? To this the jury unanimously replied that the accident was not due to the plaintiff's fault but was entirely due to *force majeure*.

In consequence of this finding no answer was made to the question as to whether the plaintiff had suffered any damage in consequence of the accident. The result as it stands is in favour of defendants. It is understood that the case will be taken further by plaintiff.

(*Francoeur v. C. P. R.*; *St. Pierre, J.*; 14th September 1907.)

#### Plaintiff Sécures Verdict after Third Trial of Action.

Upon the third trial of her action, Dame Valerie Pelletier, recently succeeded in obtaining an indemnity of \$1,200, for the loss of her husband, Theophile Emond, labourer, who met his death on March 25th, 1905, from injuries sustained on February 10th, previous, while working for defendant on the construction of a building in the City of Montreal. At two previous trials of the action there were disagreements of the jury on various points. It appeared from the proof made that plaintiff's husband was fatally injured while in the act of hoisting mouldings from the ground floor to the second storey. In this he was assisted by another labourer, both men standing on a platform about six feet from the floor. This platform was constructed in the way of the open shaft destined to receive the staircase, and beneath was an opening which led to the basement. The hoisting was done by means of a rope and pulley, the wood being placed in a sling and then sent up.

As the two men were proceeding with their work, the bundle struck a plank, placed across the opening at the second storey, with the result that some of the mouldings slipped out of the sling and one struck Emond on the head, knocking him off the platform into the basement, sixteen feet below. The result was that Emond had his skull crushed and died in the hospital about six weeks afterwards from the result of his injuries.

Plaintiff claimed that the accident was due to the negligence of the defendant or his employees, particularly in placing the men in a dangerous position to do the hoisting. She contended that the platform on which they stood was too narrow, and that it should not have been constructed over the opening leading to the basement.

Defendant pleaded that the platform was of sufficient area for the men to safely work upon, and that the accident was not due to any neglect or carelessness on his part or on that of his employees, but to the recklessness of Emond himself in continuing to hoist when he saw the mouldings were slipping out of the sling.

The jury, however, held that Emond's death was caused by the sole fault and negligence of defendant and his employees and that Emond was not to blame, and assessed the damages at \$1,000. for Mrs. Emond, and at \$200 for her minor daughter, in all \$1,200.

(*Pelletier v. Forde*; 27th September, 1907; *Guerin, J.*)

#### Action for Damages for Loss of Thumb.

Plaintiff brought his action to recover \$500 damages from defendants, alleged to have been sustained by the loss of the thumb of his right hand while operating a buzz planer in the factory of defendants. Plaintiff alleged that he was not accustomed to working this class of machine, and had not been given any instructions regarding its working by the foreman or warned of the danger. Defendants pleaded that plaintiff had never been ordered to work the planer, and that he did so without having received orders from the foreman. If he had suffered damages they were due to his own negligence and fault. A special jury, before which the case was tried, found in

favour of the defence and the action was dismissed.

(Rosen v. William Rutherford & Sons, Ltd.; 19th September, 1907; Archibald, J.)

#### Judgment Confirmed in Review.

In the case noted at page 926, of the February, 1907, number of the *Labour Gazette*, the verdict and judgment at the trial in plaintiff's favour were confirmed by the Court of Review, to which Court the case had been taken by way of appeal by defendants.

(Wilson v. G. T. R., 30th September 1907. Court of Review.)

#### Appeal in Damage Action Dismissed.

Plaintiff brought suit against defendant to recover damages for personal injuries sustained by him while in the employment of defendants, claiming \$1,999 as indemnity.

Plaintiff was first employed in the manufactory of defendant on the 21st of March, 1905, and was taken as an apprentice, and was immediately put to learn how to run an embossing machine, and on the 28th day of March following, in the morning shortly after he had commenced work, his right hand was caught in the machine between the plates, and several fingers were crushed, necessitating amputation.

At the trial plaintiff was awarded the sum of \$500 damages, the trial Judge (Mathieu, J.) finding defendants at fault in the following particulars:

1st. That the plaintiff, being without experience in the operation of the press, and having followed instructions received from defendant's employees, was exposed to having his fingers caught between the two plates, as actually happened.

2nd. That these plates, when open, only have a distance of about three inches one from the other; the press was a dangerous press.

3rd. That the press ought to have been equipped with some mechanism or apparatus so that a card might be put in on the lower plate, without the workman being obliged to push it in with his fingers, as was customary, or it ought to have been arranged in a manner so that it might be operated more slowly.

4th. That defendant's employees do not appear to have sufficiently superintended the first work of plaintiff, and did not protect him as they should have against his own inexperience.

Defendant appealed to the Court of Appeals, which has confirmed the trial judgment.

(Hickman v. Union Card & Paper Co., Ltd. 30th October, 1907.)

#### Damages for Death of a Street Car Conductor.

Plaintiff sued to recover \$10,000 damages for the death of her husband, who, while in the employ of the company as a conductor, and in the performance of his duty, was killed. He was in charge of an open car, with footboards on the sides. At a certain part of its tracks on Notre Dame Street, the company was re-laying the road bed and a temporary track was laid immediately beside the curb-stone. Plaintiff's husband, about the middle of the afternoon, went out upon the foot-board to collect some fares, when his head came into collision with a post on the side-walk, and he was instantly killed. Defendant pleaded that deceased was familiar with the route; that he knew the exact location of the posts near the temporary track; that he had been specially warned about the locality, particularly by the watchman a moment or two before the accident. The evidence showed that deceased was on his third trip only over the track when killed. The trial Court found the defendant at fault, and that the car was travelling too rapidly, and that there was no fault on the part of deceased. Judgment went in favour of plaintiff for \$6,000 damages for herself and child.

Defendant appealed to the Court of Appeals, which confirmed the trial judgment.

(Pelodeau v. Montreal Street R'y Co.; 30th October, 1907.)

#### Obligation to the Public.

In the case noted at page 1,454 of the June number of the *Labour Gazette*, on an appeal taken by the Eastern Townships Bank, the Court of Appeals recently confirmed the judgment at the trial.

(Collet v. E. T. Bank, et al, 30th October, 1907.)

### Trainmen Committed for Trial on Manslaughter Charge.

On a charge of manslaughter, brakeman Clarence Howell, Operator Loyal Sheets and Operator Laris Stata, all of the G. T. R., will come up for trial during the next term of the Court of King's Bench. A charge of manslaughter was laid against the three accused as a result of evidence produced at the Coroner's inquest into the case of brakeman Robinson, whose death resulted from injuries received in a rear-end collision between two freight trains near Vaudreuil on 18th September last. Evidence given before the Coroner went to show that Operator Sheets, of St. Dominique, should have detained at his station the freight train which caused the collision, instead of allowing it to proceed to Vaudreuil, where it caught up with and ran into the train in front. It also appeared that Operator Stata, at Vaudreuil, had opened the semaphore and given passage to the second train sooner than the regulations allowed, and that brakeman Howell, of the front train, had not protected its rear by placing torpedoes on the track.

The accused were committed for trial by the Police Magistrate.

(Rex v. Howell *et al.*, 25th October, 1907, Lafontaine, J.)

### ONTARIO CASES. \*

#### Railway Switchman Acquitted of Criminal Negligence.

George Smuck, a switchman on the Grand Trunk Railway, who was committed for trial by the Police Magistrate at Brantford on the charge that he unlawfully neglected his duty on the 22nd of December, 1906, thereby causing the death of J. N. Dymont, a trainman, has been honorably acquitted by the County Judge at Brantford.

On the date in question engine 359

\* In the first seven cases dealt with under this heading, a review is given in the more important prosecutions that have recently been instituted against railway employees in connection with railway disasters in Canada. See also the final case dealt with under the heading "Quebec Cases" above. For representations made in this connection by railway labour organizations to the Attorney General of Ontario, see the *Labour Gazette* for October, 1907, p. 356.

and an attached caboose were standing in a light cut, when a freight train, which had been stalled, came crashing into the caboose. In the engine were the engineer and Dymont, his fireman. The latter was killed by being crushed between the boiler of the engine and the tender.

At the Coroner's inquest the following verdict was brought in:—"We find that James Dymont came to his death in a collision in the Grand Trunk yards on Saturday morning, December 22, and that same was caused by partial negligence of Switchman Smuck in failing to put up semaphore, but we are of the opinion, in view of divisional orders issued, that no train had right to enter the yards without lantern signals from Smuck, which were not given by him; and we are also of opinion that Engineer Yapp mistook the 'come-ahead' signal of Conductor Tree, further west in the yards, for that of Smuck."

In the course of operations Conductor Tree gave two signals, one was a back-up for Dyer on train 422 to reverse his engine out of Ryerson's siding, the other was a go-ahead for him to proceed up the yard. The latter signal was the one, which was said to have been misinterpreted as one from Smuck.

Before the County Judge it was shown that the wreck was due to misinterpretation of this signal and the accused was acquitted.

(Rex v. Smuck; 24th September, 1907; Hardy, Co. J.)

#### Railway Engine Driver Found Guilty of Violating Rules.

M. B. Reid, the engineer on the fruit special which collided with the regular from Guelph to Hamilton in September, 1906, causing the death of three persons, was tried at the last Assizes at Guelph.

The case arose out of the same collision for which conductor Thompson was tried, convicted and afterwards pardoned, See p. 1451 of the June number and p. 242 of the August number of the *Labour Gazette*.

The defendant gave evidence in his own behalf. He described his engine as a dilapidated one, and it was the trouble he experienced with it which

caused him to overrun Hespeler which he confessed he passed without seeing, as also Preston. He would have stopped at Hespeler, but at the time was putting oil in the lubricator, the pipe being broken.

In the result the defendant was convicted upon the second count of the indictment, which charged him with breaking the rules of the road, by which it was defendant's duty to keep his train clear of a passenger train, keep out of its way and be clear by five minutes.

The defendant was sentenced to nine months imprisonment. In sentencing the defendant the Judge remarked that he had carefully considered the case, and as a breach of the law had been committed there was only one thing to be done and that was to punish the accused. It had been his first intention to give the accused one year but on consideration of his having lost considerable time from his injuries, suffered both mentally and physically and lost his position, he thought that nine months would be a sufficient term of imprisonment.

(Rex v. Reid; 19th September, 1907; Anglin, J.)

#### **Railway Telegraph Operator Sent to Jail for Being Drunk While on Duty.**

A. J. Ryan, night operator on the C. P. R. at Vankleek Hill, on the night of September 18th held the midnight train for half an hour over its time. He was badly the worse for liquor and refused the crew of the midnight train orders to leave. He persisted in this attitude, and for half an hour the train was stalled. Before it could leave the day agent at the station had to be hunted up at his home a mile and a half away in the village. He hurried down to the station and straightened matters out, but not before serious trouble had arisen.

Ryan was at once arrested, and on being brought before the Magistrate on the charge of being drunk while on duty in contravention of the rules of the Railway, admitted the charge and was sentenced to jail for six months.

The proceedings were taken under Section 296 of the Railway Act.

(Rex v. Ryan; 19th September, 1907; Thistlethwaite, County Magistrate.)

#### **Railway Conductor Found not Guilty on Charge of Manslaughter.**

Conductor J. F. Cook, who was tried at the last Whitby Assizes on a charge of manslaughter in connection with the death of Charles Jones and Harry Howe in the wreck on the C. P. R. at Myrtle on March 25th last, was acquitted by the jury after three hours, deliberation.

The wreck was caused by Cook's train not waiting to cross the train he had received orders to cross at Myrtle, owing, it was alleged, to his negligence in not observing the rules of the Railway laid down for the guidance of its employees.

The presiding judge expressed himself as very much dissatisfied with the verdict.

(Rex v. Cook; 25th September, 1907; MacMahon, J.)

#### **Railway Engineer Found Guilty of Wilful Neglect of Duty.**

Murray Stephens, formerly engine driver on the Wabash Railway, was tried at the recent Assizes at St. Thomas on two counts of wilful neglect of duty in failing to stop his train on approaching the diamond crossing east of St. Thomas, where the C. P. R. and Wabash trains collided on August 24th, 1906, killing two people and injuring several others, and was found guilty. It appeared that the semaphores were set against Stephens' train and that he ran past them without paying attention to them, as he was bound to do. In sentencing Stephens to six months in jail the presiding judge stated that he firmly believed that if the Crown had decided to put him on trial on the charge of manslaughter, as was first intended, he would have been convicted on the evidence adduced, if the jury had done its duty. It would therefore have fallen to his lot to impose a much heavier sentence than the present charge called for. While giving the prisoner the full benefit of the plea that he was not alone to blame, he did not think that the full credit for the accident should be placed on the employers of the accused. It should be observed that the railroad officials had asked that the law as to stopping at crossings be lived up to,

and had threatened that failure to obey this law would result in dismissal. Making all allowances for this, the fact could not be overlooked that the law was the put on the statute book to protect people placed in the care of the engineer, and signals had been put up to guard against accidents, but the prisoner had neglected to look at the semaphore and had taken his train, loaded with human lives placed in his care, on to danger at the rate of twenty-five miles an hour. Nothing could justify him in showing such recklessness and lack of responsibility, and he could not be let go with a merely nominal punishment.

(Rex v. Stephens; 9th October, 1907; Meredith C. J.)

#### Engineer Found Guilty of Failure to Obey Order.

At the recent sittings of the District Court for the District of Rainy River at Kenora, Engineer George Wrighton, was found guilty of neglect of duty with a recommendation to mercy.

The case arose out of the collision at Butler, on the line of the C. P. R., on the 28th of June last, in which thirteen people were killed, consisting of eleven Chinamen and their guard, O'Connor, and one Japanese. Wrighton was in charge of the engine hauling the second section of eastbound express No. 96, when it collided head on with westbound No. 97 with the result indicated.

The evidence showed that two orders had been given to Engineer Wrighton at Raleigh, the first station west of Butler the one annulling the other, and he failed to act on the second, thus causing the accident. The presiding Judge sentenced the prisoner to three month's imprisonment.

(Rex v. Wrighton; 10th October, 1907; Chapple, District Judge.)

#### Train Crew acquitted on Charge of Manslaughter.

At the Fall Assizes at Parry Sound recently, the charge of manslaughter against Conductor Frederick Graham and Brakeman Archibald Looker and Joseph Albert Lighthall, in causing the death of Fireman Alexander Rochon on the 31st May last was tried, resulting in the acquittal of all the prisoners.

The evidence showed that the accident occurred about a mile and a half west of Beatty's siding on the Canada Atlantic division of the Grand Trunk Railway, and that the westbound train in charge of the prisoners had over-run its orders. At this point there was difficulty in proving the orders by direct evidence, owing to the absence of the night operator at Sprucedale, who received and delivered the orders to Conductor Graham.

Counsel for the prisoners Looker and Lighthall, contended that the production of the stop order to the Coroner by Conductor Graham was not evidence against the brakemen, and that there was no evidence whatever to show they had ever seen or known of the order. The Court sustained this contention, and instructed the jury to find a verdict of acquittal as against Looker and Lighthall, which they did without leaving the box.

The trial of Graham proceeded, but no evidence in defence was offered nor did the prisoner go into the box on his own behalf. The charge of the Judge to the jury was strongly against the accused. After an absence of nearly two hours the jury returned a verdict of "not guilty". In discharging Graham from custody, his Lordship said the jury had taken a very merciful view of the case, and that the prisoner had a very narrow escape from conviction.

(Rex v. Graham *et al.*; 15th October, 1907; Clute, J.)

#### Sunday Work on Railways.

With the first prosecution of a railway under the new Lord's Day Act, the presiding magistrate has left it to the Dominion Railway Commission to decide what is necessary Sunday work.

The case arose out of the prosecution by the Attorney-General of Ontario, of the Grand Trunk Railway Company, for alleged breach of the Act in moving trains at its York yards on Sunday, April 21st. The railway company broke up some through trains there and sent out some cars of cinders for road repair purposes, and also some empty cattle cars to Stratford.

Evidence was taken before the Ma-

gistrate at East Toronto, and argument was heard upon it.

On behalf of the defence it was contended that the work done was necessary work under the provisions of section 12 of the Act and that under clause (x) of that section the province of determining what was necessary Sunday work lay, not with the Magistrate, but with the Board of Railway Commissioners of Canada.

The Crown Attorney for the prosecution, while not agreeing that the interpretation of the defence as to necessary work was correct, agreed that it might be advisable to refer the matter to the Railway Commission.

The Magistrate said that in his opinion the defendants had committed a breach of the Act, but he considered the Act too stringent. He agreed to reserve his decision until the matter had been brought before the Railway Board.\*

(Rex v. G. T. R. Co.; 19th September, 1907; Ellis, P.M)

#### Picket Found Guilty of Intimidation.

Edward Medcalf was convicted by a jury at the General Sessions for the County of York last month of having intimidated Eugene Guthrie, a non-union machinist employed by the Fairbanks-Morse Company.

Guthrie's evidence was as follows:—"He (defendant) followed me from the works, up and down and along several streets to my home. He called me a scab and a rat, and said if it was after dark he would kill me." Medcalf admitted he was a picket that day under the direction of his Union, and that he followed Guthrie but argued that as a picket he had that right.

In charging the jury, Judge Winchester said:—"Unions are good things in themselves, and are very necessary in this age. Strikes are useful or not. Sometimes they do good and other times they don't, but we have not that to consider in this case. The question is whether Medcalf did persistently follow Guthrie. If he did so, he did wrong. No man has the right to follow another from place to place for the purpose of

getting that man to abstain from work. If this thing were allowed, you can understand how seriously it would result. The opprobrious name of scab is something disgraceful to apply to any honest workman. These things, if you believe they were done show a motive. One of the jurors very properly asked if the picket had a right to watch the Fairbanks-Morse factory. They have no right to beset or watch any place, but they have the right to ask information of people going in and coming out and to attempt to persuade them to help in the strike."

(Rex v. Medcalf; 28th September, 1907.)

#### Case Under Alien Labour Act Dismissed.

In an Alien Labour Law case which came up in the Toronto Police Court recently, Mr. Fred Armstrong was charged with a breach of the law, in that he brought B. M. Johnson, of Philadelphia, to Toronto, to work for W. J. McGuire, Limited, who required men on account of the plumbers' strike. The young man was secured by an agent in the United States, and had his fare paid to Canada.

At the trial counsel for the defence pointed out that the Act made it illegal to make a contract bringing men to Canada but produced a document signed by Johnson, who agreed to come to Toronto without having any employment guaranteed. The document read as follows:—"In reply to an advertisement, I have been informed that there was a strike among the plumbers and steamfitters at the City of Toronto, Canada, and that I could secure employment by applying to the Employers' Association at that point, but that no contract would be made with me by which I would be guaranteed employment. As I am without means, I have been assisted to the extent of having my fare advanced; otherwise I am leaving this city on my own initiative, for the purpose of seeking employment at my trade."

Upon the production of this document, and it appearing that no contract for employment had been made prior to the alien leaving the United States, the

\* See reference in opening article of present issue.

Police Magistrate dismissed the case, holding that there was neither an express or implied contract for employment to bring the case within the Act.

(Rex v. Armstrong; 27th September, 1907; Denison, P.M.)

#### Damages for Injuries in Paper Mill.

At the recent Assizes at Cornwall, Edward Garlough was awarded \$900 damages for injuries sustained by his 18 year old son, William, while at work in the defendants' mill at Cornwall. The young man was sent to turn on water, and the alleged premature shooting of a digester caused him to be scalded by the pulps and acids. His arm was injured and it was claimed that his speech was affected.

(Garlough v. Toronto Paper Mfg. Co.; 10th October, 1907; Britton, J.)

#### Machinist Awarded Damages.

George Capelle, a young machinist, was awarded \$500 damages by a jury at the Toronto Assizes recently for the loss of an eye while working for the defendants in their factory at Toronto Junction.

Plaintiff was hammering a steel die into a metal box with a steel hammer when a piece of steel flew up the hammer and hit him in the eye. He claimed that had defendants provided him with a proper hammer the accident would not have occurred.

(Capelle v. Canada Cycle & Motor Co.; 11th October, 1907.)

#### Charge of Intimidation Against Striker Dismissed.

At the recent Sessions for the County of York held at Toronto, Frederick Dickson, a Union plumber, was put upon his trial on a charge of having attempted to intimidate James Jones, who was employed by one Patterson. Jones said he did not hear the threats which Patterson swore had been made to him. The presiding Judge directed the Jury to return a verdict of not guilty, as the offence upon which the prisoner was charged was not indictable under the Criminal Code.

(Rex v. Dickson; 11th October, 1907; Winchester, Co. J.)

#### Motorman's Action for Damages Dismissed.

At the recent Hamilton Assizes plaintiff, formerly a motorman in the employ of defendants, brought suit to recover damages for injuries received by him in the course of his employment owing to the alleged negligence of the defendants.

Plaintiff was motorman on a car which collided with the regular car at the gravel pit near Bartonville on November 20, 1906. He claimed that the brakes were defective, and that he was not able to stop the car going down the grade. He also contended that the defendants' officials were negligent in allowing the car to pass near where the accident occurred, because it was dangerous. The defence was that plaintiff was to blame for the accident and for his injuries, because he did not carry out his orders. It was stated that plaintiff went into a hotel at Stony Creek and lost time there, which he was trying to make up when the collision occurred. He was suspended by the company and has never been reinstated. The jury brought in a verdict for defendants.

(Cole v. Hamilton, Grimsby & Beamsville R'way; 14th October, 1907.)

#### Damages for Loss of an Eye.

At the Hamilton Fall Assizes Joseph McLaughlin was awarded \$500 damages for the loss of an eye while at work in the employ of defendants, owing to the alleged negligence of the latter.

(McLaughlin v. Double Use Mitten Co.; 15th October 1907.)

#### Damages for Maiming of Hand.

Andrew H. Green was awarded \$2,000 damages by a jury at the Toronto Assizes against defendants, paper box manufacturers, for the maiming of his right hand. Plaintiff was operating a paper cutting machine when the knife fell and severed two of his fingers. The defence claimed that the plaintiff had been negligent and failed to oil the machine.

(Green v. Kilgour Bros.; 17th October, 1907.)

#### Striker Fined on a Charge of Trespass.

Edward Buckley, a striking plumber, was fined \$10 and costs, or 30 days in

the Police Court at Toronto recently for trespass.

Defendant went to a house where a number of plumbers employed by Fiddes & Hogarth were working. The firm had been warned that the striking plumbers intended to send representatives to get their men to go out. The foreman of the employers went up and found defendant interviewing the plumbers and endeavouring to get them to go out on strike. The warning to trespassers had been torn down.

In sentencing the defendant the Magistrate said: "I am going to stop this sort of thing."

#### Fruit Grower Fined for "Facing" Baskets of Fruit.

Richard Secord, a Stony Creek fruit grower, was recently fined at Hamilton \$5 for offering for sale on the market five baskets of peaches that had been "faced". The fruit was confiscated. The Police Magistrate, in imposing the fine, said he regretted that the law did not empower him to make it more than \$1 per basket. It was shown that the large peaches had all been placed on the top of the basket, while the bottom was full of small ones of much poorer quality.

(Rex v. Secord; 30th August, 1907; Jelfs, P. M.)

#### Adulterating Milk.

On charges laid by the Government Inspector, George Duval, of Talbotville, was fined \$30, and costs by the Police Magistrate at St. Thomas for selling watered milk to the Payne's Mill cheese factory, and W. L. Walker, of Lawrence Station, was fined \$100 and costs for supplying the West Magdala factory with the watered article.

(Rex v. Duval and Walker; 4th September, 1907; Hunt, P. M.)

Four Binbrook farmers, John E. Laidman, Edward Ramsbury, Edward Laidman and John McEvoy, were recently charged by the Government Inspector with delivering adulterated milk to the Woodburn cheese factory, and their cases were disposed of at Hamilton by the Police Magistrate. Ramsbury and Edward Laidman were each fined \$30.

and McEvoy and John E. Laidman were each fined \$20.

(Rex v. Laidman *et al*; 24th September, 1907; Jelfs, P. M.)

William Kelly and William Bogue of Ancaster recently appeared before the Police Magistrate at Hamilton on a charge preferred by the Government Inspector of selling adulterated milk to the Alberton cheese factory; they pleaded guilty and were each fined \$25.

(10th October, 1907.)

#### Union Label.

David Pearlstein, a Hamilton tobacconist, was recently ordered to spend 24 hours in jail and to pay the costs of the motion to commit him for contempt of Court, in disobeying an injunction.

On July 11th last Pearlstein called upon Thomas Murphy, tobacconist, and endeavoured to sell him certain boxes of cigars, but Murphy declined to purchase because they did not bear the Union label. Subsequently Pearlstein returned with the Union label stamp affixed to the cigars and sold them. This was in violation of an injunction of May 15th restraining Pearlstein from using these labels.

(Todd v. Pearlstein; 13th September, 1907; Mulock C. J.)

#### Fraudulent Labour Agent Convicted of False Pretences and Forgery.

One William Blood was recently charged at Hamilton with obtaining money under false pretences from Thomas Beecroft. Blood represented himself as the agent of the Nipissing Lumber Company, and on the strength of this secured 50 cents from Beecroft and thirteen others as a fee for securing them positions with this company.

It was learned later than no person had authority to engage them and a complaint was lodged with the police.

During the hearing of this charge it transpired that Blood had signed the name of T. F. Best, secretary of the local Y. M. C. A. to a certificate of character, which he showed to applicants for jobs as evidence that he was all right. This developed a further charge of forgery, upon which Blood was sub-

sequently tried and convicted. The result was that Blood was sentenced to 18 months in the Central Prison for his misdeeds.

(*Rex v. Blood*; 10th September, 1907; Jelfs, P. M.)

#### Damages for Loss of Fingers.

At the last Berlin Assizes, William Spahr was awarded \$250 as damages against the New Hamburg Metal & Stamping Co., for the loss of some of his fingers while working at a press in the defendants' factory.

The jury based their verdict upon the ground that plaintiff, an inexperienced man, was set to work at the press without having been given sufficient instruction.

(*Spahr v. New Hamburg M. & S. Co.*; 26th September, 1907; Anglin, J.)

#### Duty to Warn Employee of Dangerous Nature of Machine.

Action for damages for injuries sustained by plaintiff while in the employment of defendants, by reason of the negligence of defendants, as alleged. Plaintiff, a lad between 14 and 15 years of age, entered the employment of defendants in May last and on the 19th of June met with an accident while attempting to take a tin plate out of a stamping machine. He lost the ends off three fingers. Plaintiff had no knowledge of machinery of any kind, and was engaged as a helper to any of the other workmen needing help. He was given no instructions how to operate any of the machines, nor was he given any warning as to any of them being dangerous. On the occasion of the accident he was helping one George Hill to put the plates through the stamping machine in question; they were carried to the machine by plaintiff and Hill; the latter was to operate the press; after they were stamped the plaintiff was to carry them away. Hill had left the machine for a few minutes, and the foreman called out and asked in effect if the two were going to be all day in getting the plates through, whereupon the plaintiff, in the absence of Hill, took hold of the press and endeavoured to get a plate out, when the die came down upon his hand. The press is

tripped by a foot press, and this the plaintiff must have inadvertently touched, as it appears it had never been known to fall without pressure upon that part. Hill had been accustomed to use a stick to take the plates out, but this had been misplaced.

It was held by the Trial Judge that the accident plainly occurred by reason of the plaintiff's endeavour to get the plates put through without delay, and his attempting to remove one from a machine about which he had never been instructed or warned as to its dangerous nature. It was further held that there was negligence on the part of defendants' foreman in directing plaintiff to assist at the working of a dangerous machine without himself giving some instruction or seeing that the operator of the machine did so. Damages were assessed at the sum of \$600, for which amount and costs judgment was entered in plaintiff's favour.

(*Lawson v. Packard Electric Co.*; 1st October, 1907; Mabee, J.)

#### Appeal in Damage Action Allowed.

Action brought by Robert Findlay to recover damages for the death of his son, Beverley, employed as a brakeman on defendants' railway, running west from Port Arthur. On 10th September, 1906, deceased was on an empty flat car in front of a train proceeding from Windigo Station, when, owing to the alleged negligence of defendants, the train ran into a hand-car, was derailed, and Findlay was killed. At the trial on motion for a non-suit, judgment was given dismissing the action with costs. On an appeal to the Divisional Court, the trial judgment was set aside and judgment ordered to be entered in favour of plaintiff for amount of damages assessed at trial, \$300, with costs to trial. No costs of appeal.

(*Findlay v. Canadian Northern Railway Co.*; 10th October, 1907; Divisional Court.)

#### Damages for Death.

At the recent Assizes held at North Bay, plaintiff brought suit to recover damages for the death of an employee of defendant, a railway contractor, engaged in the construction of part of the Temis-

kaming & Northern Ontario Railway. The work of deceased was that of repairing cars placed upon a switch. An engine accidentally turned into the switch and jarred the car under which the deceased was working, and he sustained injuries resulting in his death. The jury found negligence against defendant, and the Court held that there was evidence to support the findings. Judgment was ordered to be entered in favour of plaintiff for \$1,400 and costs.

(Warren v. Macdonnell; 19th October, 1907; Riddell J.)

#### Doctor Awarded Damages for Wrongful Dismissal.

An interesting case arising out of a claim for \$2,000 damages by plaintiff against defendants for wrongful dismissal, plaintiff having acted in the service of defendants as medical attendant to a large lumber mill on the French River, was heard before a judge and jury at the Toronto Assizes recently. Plaintiff alleged that he contracted with the defendants through one McWilliams, their late manager, to act as medical attendant to the camp at a rate of 50 cents per man for single men; \$1.00 for married men, and \$1.50 for married men with families, and the contract was to cover the last six months of the year 1906, and the whole of the year 1907. After working four months he was discharged without notice by a new manager, and accordingly brought the action. As evidence of the nature of his labours, plaintiff said he prepared 158 surgical dressings in July, 162 in August, and 300 in September, and his contract and private practice there brought him in an average of about \$150, a month, while in winter he estimated it would have been worth \$250 a month.

The company denied that they had entered into such an agreement with plaintiff, Mr. McWilliams, the defendants' late manager, gave evidence for plaintiff, and produced a letter from the President of the company showing that he was empowered to make such contracts on behalf of the company.

The jury found for the plaintiff, giving him \$700 damages.

(Davis v. Ontario Lumber Co.; 21st October, 1907; Boyd; C.)

#### Action Dismissed as Jury could Not Specify Negligence.

At the recent Assizes at Goderich two suits for damages arising out of the accident of a year ago in the erection of the C. P. R. bridge across the Maitland River, when Emmanuel Maddeford was killed and others injured, were tried before a jury. A derrick, car and men fell sixty-five feet from the bridge into the river. The jury's finding was: "We believe there was some neglect of someone in connection with the work, or the car could not have fallen off, and we would award to plaintiff Ede \$2,700, and to plaintiff Lynn \$5,000."

After reserving judgment the Court dismissed the actions without costs, the finding of the jury failing to specify what, or whose neglect was responsible for the accident.

(Ede v. Canada Foundry Co.; Lynn v. The same; 22nd October, 1907; Boyd, C.)

#### Failure to Give Notice of Leaving Service Entails Loss of Wages.

During the month of August, William Cook, superintendent of the Dominion Textile Company, appeared in the Police Court at Kingston to answer a charge of non-payment of wages, amounting to \$3.25, to Stuart Farrell, a fourteen year old lad.

Mr. Cook told the court that the boy had only worked a few days and then left without giving any notice whatever, although he had signed an agreement to give two week's notice in case he desired to leave. He produced the agreement, which, plaintiff in the witness box admitted signing although he said, he did not read it. This latter statement was denied by Mr. Cook, who swore the agreement had been read over to the boy. Plaintiff, after staying away for several days came back and demanded his money, which was refused him.

To the court the lad said, he had worked at the cotton mill for eight days and left because he did not like the work. The Court told the lad that he would be given a chance to return and work out the balance of his two weeks, so that he could receive the money. To this the plaintiff replied that he did not want to go back,

and in consequence the court had no alternative but to dismiss the case.

(8th August, 1907; Toye, J. P.)

**Damages for Loss of Eye.**

At the London Assizes recently, plaintiff, a workman in the employment of defendants, sued the latter for damages for personal injuries received in the course of his employment. While he was working at a machine a splinter flew up and put out one of his eyes. He was awarded \$1,350 damages.

(Osborne v. Rolling Mills; 11th October, 1907; Teetzel, J.)

**Injunction Against Interference with Workmen.**

The injunction granted by Chief Justice Falconbridge on the 16th August last, whereby Robert Roadhouse and six others, members of the Cobalt Miners' Union, Western Federation of Miners, Branch 146, were restrained from interfering with the working of the Buffalo Mines, has been continued to the trial, restraining defendants from doing any act which would be in contravention of Section 501 of the Criminal Code, and from in any way interfering with, or endeavouring to persuade men to break their contracts, but modified so as not to prevent defendants peaceably persuading men not under contract not to engage while strike was on. A motion to commit three of the defendants for contempt of Court in disregarding the interim injunction was ordered to stand over till the trial.

Section 501 of the Criminal Code above referred to as is follows:

"Every one is guilty of an offence punishable, at the option of the accused, on indictment or on summary conviction before two justices and liable on conviction to a fine not exceeding one hundred dollars, or to three months' imprisonment with or without hard labour, who, wrongfully and without lawful authority, with a view to compel any other person to abstain from doing anything which he has a lawful right to do, or to do anything from which he has a lawful right to abstain:

- (a) Uses violence to such other person, or his wife, or children, or injures his property; or,
- (b) Intimidates such other person, or his wife or children, by threats of using violence to him, her or any of them, or of injuring his property; or,
- (c) Persistently follow such other person about from place to place, or,
- (d) Hides any tools, clothes or other property owned or used by such other person, or deprives him of, or hinders him in, the use thereof; or,

(e) With one or more other persons, follows such other person, in a disorderly manner, in or through any street or road; or,

(f) Besets or watches the house or other place where such other person resides or works, or carries on business or happens to be.

(Buffalo Mines v. Cobalt Miners' Union; 28th October, 1907; Meredith, C. J.)

**Settlement of Damage Suit.**

A suit brought by plaintiff on behalf of herself and two children for damages for the death of her husband, who was killed in the defendants' yards last February, owing to the fall of a ledge of frozen sand was settled before the opening of Court, plaintiff accepting \$500 and costs from defendant in settlement.

(Keough v. Indestructible Brick Co.; 28th October, 1907.)

**MANITOBA CASES.**

**Acceptance of Cheque for Wages Marked "in Full."**

Eva Heoman sued the defendants in the Police Court at Winnipeg to recover a week's wages in lieu of notice of dismissal. Plaintiff, with 39 others, was dismissed by defendants on August 17th last without notice, and claimed that she was entitled to a week's notice of dismissal or in lieu thereof to a week's wages.

It appeared that defendants made an arrangement whereby each employee forfeited the first half week's wages, which were kept in case the employee should leave at any time without giving notice. This was regarded by the employees as an undertaking that defendants would also give a week's notice when he dismissed any of them. When plaintiff and the other 39 were discharged, they were each given a cheque for the amount of wages due, upon the face of which the words "in full" were written. Plaintiff accepted the cheque and signed for it.

In dismissing the case the Police Magistrate said it was not a matter of right and wrong, but one of contract, a distinction with a difference. The plaintiff had taken her money and signed for it, which she should not have done if she intended to claim another week's wages for lack of a week's notice of dismissal.

(Heoman v. Scotland Woollen Milling Co.; 25th September, 1907; Daly, P. M.)

## ALBERTA CASE

Injury to Public Interests by Misrepresentations re American Immigration.

On the 18th of March 1907, an information and complaint was laid by Percival Wiseman of Taber, Constable in the Royal North West Mounted Police, against Anna B. Hoaglin, of Taber, charging her that she did on the 7th of March 1907, unlawfully purchase and receive for sale manufactured tobacco, which had not been stamped according to law. The accused was supposed to be the chief partner in the "Cash Buyers' Union" the name by which George S. Hoaglin and his wife carry on business at Taber. The accused was convicted after a hearing before S. J. Layton, J.P., Taber, and Inspector Belcher, of Lethbridge and sentenced to pay the sum of \$100.00 and \$3.00 costs. The trial for this offense took place at Taber, on the 18th of March 1907.

On the 6th of April 1907, an information and complaint was laid against George S. Hoaglin, charging him that he did on or about 19th day of March, 1907, at Taber, in the Province of Alberta, wilfully and knowingly publish a false tale, to wit:—"Americans not wanted in Canada, investigate before buying land or taking homesteads in this country" by means whereof, injury was likely to be occasioned to a public interest, namely, the immigration of Americans into Canada, contrary to Section 126 of the Criminal Code of Canada.

The preliminary hearing took place on the 10th day of April 1907, before W. A. Aubin, J.P., of Taber, and the accused was sent up for trial at the Sittings of the Supreme Court at Lethbridge.

The trial came on for hearing on the 5th July, 1907, at Lethbridge, before Mr. Justice Harvey. The accused elected to be tried summarily. It was objected that the charge was not borne out by the words with which the accused was charged with having published, that is, that the words did not disclose a crime, but His Lordship over-ruled the objection. From the evidence it was shown that the accused brought to the editor of the Taber Free Press a notice, from which posters were to be printed, but which the editor refused to print. The Notice was on a piece of paper about

8 inches by 10 inches, and read as follows:—

## CLOSING OUT SALE:

We have decided to leave Canada. We will now offer our entire stock for sale at the actual wholesale cost. Americans not wanted in Canada. Investigate before buying land or taking homesteads in this country. Ten thousand dollars worth of new goods arriving.

Men's Clothing  
• Women's skirts  
• Millinery  
Shoes of all kinds.

All kinds of dry goods, everything will be sold at actual cost.

## CASH BUYERS' UNION.

Taber, Alta.

It was also brought out that two notices had been displayed in the windows of the Cash Buyers' Union of Taber, one about 2 feet by 5 feet in size, and bearing the following in large letters:—

"Closing out Sale.—Our entire stock at cost. Americans not wanted. Investigate before buying property or taking homesteads."

The second notice was about 2 feet by 5 feet, and read as follows:—

"Closing Out Sale.—Our entire stock at cost. Americans not wanted. Think well before buying property or taking a homestead."

Part of this was also underlined.

Several witnesses deposed as to seeing the notices in the windows of the Cash Buyers' Union at Taber, and stated that in their opinion, they considered the statement that Americans were not wanted in Canada to be detrimental to the interests of the country.

Chas. Mair, Dominion Immigration Travelling Agent, at Lethbridge, swore that the statement that Americans were not wanted in Canada, was not correct, as the Dominion Government were using efforts to induce them to come to Canada.

The defence submitted no evidence, and His Lordship sentenced the prisoner to pay a fine of \$200.00, or in default to three months imprisonment in the Guard Room at Lethbridge.

Rex. vs. Hoagland; Lethbridge, Alta; Harvey, J.

## BRITISH COLUMBIA CASE.

## Damages for Loss of an Eye

A jury at Vancouver recently awarded plaintiff, a workman in the employ of defendants, \$1,650 damages for injuries sustained by him in the course of his employment. Plaintiff lost an eye through a piece of granite flying from a block.

(Pascoe v. Kelly Bros. & Mitchell; 29th October, 1907.)

THE

# LABOUR GAZETTE

DECEMBER, 1907.

---

---

INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF  
NOVEMBER, 1907.

I.—GENERAL SUMMARY.

A decline in the amount of general employment took effect during the opening weeks of November, and the month was considerably less active than October. This was due largely to the cessation of outdoor operations, usual at this season, and chiefly affecting employees in the agricultural industry, and in the building and civic improvement branches. The closing down of the saw-mills for the year, in Ontario and Quebec, similarly affected a large number of workmen. Compared with the corresponding period of 1906, a season of unprecedented prosperity throughout Canada, industrial and labour conditions were reported less active, and the outlook for the winter less favourable. The lumbering camps have absorbed fewer men than usual, owing to the fact that the cut in Ontario and the eastern provinces will be smaller during the coming winter than that of 1906-07 while a marked decline in both camps and mills has taken place in British Columbia. In the mining industry, also, some heavy reductions in working forces went into effect in the metalliferous mines of British Columbia, and in the mica mines of Quebec, though coal and asbestos mines were producing to their full capacity. Manufacturing in Ontario, though there has been no marked falling off in orders, was less active than for some time past, staffs having been reduced and shorter time being worked in a number of important establishments. Apart from local or

particular causes, the prevailing stringency in the money market of the world has naturally influenced adversely the commercial situation in Canada, resulting in a general shortening of credits, while capital for several projected enterprises, as well as for current industrial and commercial purposes, has been difficult to obtain. On the other hand, railway construction operations, especially in connection with the building of the National Transcontinental line, which have been hampered for some time past by a shortage of labour, have been very busy during the past month, and promise to continue so throughout the winter season. Many of the labourers thrown out of employment owing to the conditions above referred to, found work at good wages in the railway camps. The fact that the agricultural yield, though considerably less than that of 1906, will realize, owing to the prevailing high prices, a return only slightly if at all below that of last year, is also a favourable feature of the general situation. Trade has continued fair, though there was a tendency on the part of both wholesalers and retailers towards a reduction of stocks. In the closing week of the month, some improvement in the general tone of industry was noted, employees who were released during the opening weeks having in several instances been re-engaged though a considerable number of unemployed were still reported at certain points.

*The LABOUR GAZETTE, in its accounts of proceedings, abstracts of reports, legal decisions, quotations or other records of matters of concern to labour, is not to be regarded as necessarily endorsing any of the views or opinions which may be expressed therein. —Ed.*

### Changes in Wages and Hours of Labour.

As is usual at this season, wages were downward in tendency among unskilled labourers and the classes affected by the cessation of outside operations. A few reductions also were made in particular industries and localities, in which a curtailment of operations went into effect. The following is a statement by industries and groups of trades of the more important changes in wages and hours of labour, information concerning which was received at the Department of Labour during November.

*Lumbering.*—The wages of employees in the lumber camps in the Ottawa valley were reduced by from \$5.00 to \$10.00 per month during November. Wages remained firm in British Columbia, notwithstanding the recent cessation in activity, except in a few localities where Chinese labourers had their wages reduced.

*Manufacturing.*—The wages of the less skilled classes employed in manufacturing establishments in a few localities were reduced. At Brantford, Ont., for example, several employees who were receiving \$1.50 per day were reduced to a rate of \$1.35 per day.\*

*Mining.*—Mica pickers and trimmers in the Ottawa district had their wages reduced in certain localities from 16 to 12 cents per pound. Miners employed at Rossland, B. C., at a special meeting, decided to accept a reduction in wages to the scale in force prior to July 1, 1907, namely, \$3.50 per day for machine men and \$2.75 for shovellers.

*Metal, engineering and shipbuilding.*—The scale of employees in shipyards at Victoria, B. C., was reduced \$1.50 per week in the case of new employees. Gas fitters in the employ of the Quebec Gas Company, numbering 35, had their wages reduced from \$3.25 to \$2.50 per day of ten hours, the company notifying a number that their services will not be required after January 1st.

*Printing.*—A new scale of wages went into effect in the job printing offices of Vancouver, B. C., on November 1st. Twenty-five pressmen, press feeders and

bindery workers in the employ of the Ottawa Free Press Company, Limited, had their hours reduced from nine to eight per day by voluntary concession, dating from November 11th.

*Railway employees.*—Yardmen in the employ of the Grand Trunk Railway Company, east of the St. Clair and Detroit rivers, to the number of 500, had their wages increased 12 per cent., taking effect from November 1.

*Transport.*—Lock tenders, carpenters and bridge tenders employed on the Welland canal were granted an increase in wages.

*Civic employees.*—Scavengers to the number of 100 in the employ of the city of Toronto, Ont., received an increase from \$2.00 to \$2.25 per day of nine hours, to date from December 15.

### Cost of Living

Farm and dairy produce continued exceptionally high in price. Eggs were dearer in many localities than in several years past, reaching 50 cents per dozen at Toronto, Ont., and elsewhere. Further advances in the price of milk were reported. Butter was still upward, the high price having suggested the importing of Danish and Irish product. Hogs and hog products were lower than in October. Poultry also was lower on several markets than for some time past, and meats generally were affected by the heavy marketing of animals. Wheat varied considerably, but was on a lower level than in October, with flour firm. Bread advanced in a number of localities, and fancy biscuits, soda biscuits, confectionery, etc., were held at higher rates by manufacturers. Hay and feed of all kinds were higher than in many years past.† Following a decline in the price of barley, Ontario brewers announced a reduction in wholesale prices. Wool prices have been unchanged for some time past, the prevailing quotations being 22 to 23 cents per pound for washed wool, 12 to 13 cents for unwashed and 16 to 17 cents for rejects, the demand from the mills being slow. The hide market con-

(†) For a comparative statement of prices of farm produce in November, 1906 and 1907, see report of London, Ont., correspondent.

(\*) See also report of Chatham, Ont. correspondent.

tinued dull, and few changes in prices were recorded. The Canadian metal market was somewhat quiet, with prices showing a tendency to decline, interest being largely confined to the delivery of metals purchased during the past two months for winter requirements. The pig iron market was unsettled. Bar iron, antimony, copper and lead were firmer than in the preceding month. Building material was easier. Cordwood and coal were firm to upward. As significant of general tendencies in cost of living, it may be stated that the rates for hotel accommodation were raised at several points in Ontario, and that doctors' fees at Toronto, Hamilton, Ottawa and other points were substantially increased. Blacksmiths and wagon-makers of the county of Waterloo, Ont., met in convention on November 1, and adopted a new price list, involving several increases, based on recent advances in general living expenses, the high prices ruling for all kinds of material, particularly woodwork, the high wages of skilled labour and the shortening of the terms of credit by wholesale houses. Certain newspapers have advanced their subscription price, owing to the increased cost of white paper.

### Interruptions to Industry.

The number of trade disputes in existence during November was 14 less than in the previous month, and there was a decrease of approximately 44,075 in the number of working days lost. Compared with November, 1906, there was a decrease of 11 in the number of trade disputes, and a decrease of about 59,370 in the number of working days lost.

Among industrial establishments, etc., destroyed by fire or through other causes during November, the following, as reported in the press of the Dominion, may be mentioned:—

*Prince Edward Island.*—Two stores with stock at Summerside, loss \$10,000.

*New Brunswick.*—Intercolonial freight shed and contents at Campbellton, loss, \$30,000; the steamer "Springfield" at St. John, loss, \$4,000; butter factory at Salisbury, loss \$2,500.

Heavy storms occurred on the Atlantic coast and in Quebec in the first week of the month causing heavy damage to shipping and other property.

*Quebec.*—Store at Bury; hay sheds and contents at Lake Megantic; jewellery store at Levis, loss, \$5,000;

tannery at Limoilou, loss, \$15,000; church at Longue Pointe, loss, \$75,000; Dominion park buildings, at Montreal, loss, \$100,000; glass factory at Montreal; tent and awning factory and drug store at Montreal, loss, \$30,000; pickle factory at Montreal, loss, \$2,000; grand stand at baseball grounds, loss, \$8,000; storehouse at Montreal, loss, \$4,000; wadding factory at Montreal, loss, \$2,000; type-writing establishment at Montreal, loss, \$2,000; furniture factory at Montreal, loss, \$60,000; hotel at Montmorency Falls, loss, \$15,000, wholesale hardware store at Montreal, loss, \$50,000, granary and contents at Pierreville, loss, \$3,000; stable and contents at Pierreville, loss, \$6,000; printing office at Quebec, loss, \$40,000; dry-house at Sayabac; college at St. Lin, loss, \$6,000; business block at St. Chrystôme, loss, \$15,000; stores at St. Johns, loss, \$40,000.

The steamer "Neepawa" collided with one of the locks of the Lachine canal causing damage of \$50,000.

*Ontario.*—Conservatories at Berlin, loss, \$4,000; convent at Belleville, loss, \$25,000; elevator at Brockville, loss, \$2,000; railway station and elevator at Caledonia, loss, \$15,000; stores at Casselman, loss, \$16,000; cheese and butter factory at Cayuga, loss, \$1,500; Cataract Power sub-station at Dundas; hardware store at Fort William, loss, \$5,000; church at Fort William, loss, \$10,000; livery stable at Hamilton, loss, \$1,500; foundry at Hamilton, loss, \$15,000; coal shed and contents at Kingston; furniture store at Hastings; business block at Leamington, loss, \$18,000; large boarding house at Little Current; railway station and sheds at Londesboro; flour mill at Magnatewan, loss, \$7,000; planing mill at Meaford; canning factory at Kingston, loss, \$12,000; furniture store at Norwood, loss, \$20,000; hotel at Ottawa, loss, \$3,000; asphalt plant at Ottawa, loss, \$1,000; store at Ottawa, loss, \$5,000; business block at Ottawa, loss, \$9,000; foundry at Petrolea; collegiate institute at Picton, loss, \$2,000; town hall at Port Arthur; fruit factory at Ridgetown, loss, \$8,000; three boat houses and boats at St. Catharines, loss, \$2,000; cold storage plant at St. Thomas, loss, \$3,000; business block at Smith's Falls; planing mill and lumber at Sudbury, loss, \$50,000; evaporator and contents at Trenton, loss, \$8,000; electric light sub-station at Toronto, loss, \$5,000; business block at Toronto, loss, \$100,000; cap factory at Toronto, loss, \$5,000; drug warehouse at Toronto, loss, \$6,000; collapse of a water tank at Toronto, loss, \$25,000; two tenements at Toronto, loss, \$4,000; box factory at Toronto, loss, \$5,000; neckwear factory at Toronto, loss, \$15,000; pottery factory at Toronto Junction, loss, \$5,000; flour mill at Uxbridge.

Barns at Port Stanley and West Lorne.

*Manitoba.*—Livery stable at Brandon; business block at Brandon, loss, \$20,000; planing mill at Carberry, loss, \$5,000; granary and contents at Pilot Mound, loss, \$2,000; convent at Winnipeg; lumber factory and business block at Winnipeg, loss, \$150,000.

*Saskatchewan.*—Threshing outfit at Carlyle.

*Alberta.*—Business block at Calgary, loss, \$1,500.

*British Columbia.*—School house at Fernie; hotel at Moyie; hotel at Nicola.

### Conditions in the Industries and Trades.

Conditions of employment during November in the several industries and trades throughout Canada, as indicated by the reports of correspondents to the *Labour Gazette*, and by information received at the Department from other sources, may be briefly summarized as follows:—

#### Agriculture.

The completion of threshing, the marketing of grain, fruit, live stock and pro-

TABLE SHOWING STATE OF EMPLOYMENT IN

This table is based largely on the reports of the correspondents of the *Gazette* as published in the present issue several trades and industries throughout the Dominion. This table has reference only to the amount of employment headings in the *Gazette*. In tabulating the information in question the terms employed are divided into two groups, the busy, very busy, (2) quiet, dull, very dull.

duce, fall ploughing, and the making of preparations for the winter season, constituted the chief employment of agriculturists during November.

An important announcement of the month affecting the interests of agriculturists was that the government of Canada would assist in financing the movement of the western crops, upon the prompt marketing of which the general prosperity of the country to a considerable degree depends. The action of the government was taken in view of the prevailing monetary stringency which has greatly hampered the forwarding of the crops this year, it having been found very difficult to borrow money from the banks for the conveyance of grain across the lakes from Fort William. It was stated that a number of vessels left the port light of cargo, as the banks would not release the wheat until paid for, while the total amount marketed is about 60% of that forwarded during the same period of 1906. The lateness of the season and the short interval remaining before the close of navigation further embarrassed the situation. It was stated by the Honourable the Minister of Finance that details of the government's action in the matter, and of the arrangements made between the government and the banks would be given in due course.

In the Maritime Provinces, the heavy rainfall has caused a considerable falling off in the yield of hay and oats, and fall ploughing has been delayed. The latest official returns, however, are of a favourable nature. The annual government crop report for Nova Scotia shows that in spite of the late spring and wet autumn, a large harvest has been housed in a fairly satisfactory condition. The following is the estimated acreage and yield of the principal crops:—

	Acres.	Tons.
Hay.....	556,000	700,000
Forage crops for summer feed.....	2,000	7,000
		Bushels.
Oats.....	100,000	3,500,000
Wheat.....	16,000	320,000
Barley.....	7,000	175,000
Buckwheat.....	9,500	280,000
Potatoes.....	30,000	6,000,000
Other field roots.....	2,500	1,250,000

The value, to the farmer, approximately, of seven of the products above mentioned, is \$16,857,000, as follows:

Hay.....	\$11,900,000
Oats.....	1,750,000
Potatoes.....	2,400,000
Other field roots.....	212,500
Wheat.....	288,000
Barley.....	122,500
Buckwheat.....	84,000
	<b>\$16,857,000</b>

Taking an average crop as 100, the various crops are estimated as follows:

	Per cent.
Hay.....	90
Oats.....	100
Wheat.....	95
Barley.....	95
Potatoes.....	110
Corn for Ensilage.....	90
Mangles.....	95
Buckwheat.....	99

In Prince Edward Island the grain crop will be heavy, wheat being an average yield and the oats yield being almost double that of last year, amounting to about 5,000,000 bushels of good quality. The potato crop, though suffering from rot, will be considerably heavier than last year.

The prolongation of mild weather materially assisted farmers throughout Quebec, Ontario and the Northwestern Provinces, and good progress was made with fall ploughing and marketing, the high prices having considerably stimulated the latter.

A grain blockade was complained of in central Saskatchewan, though it was stated there was 50 per cent. more cars available during the present season than in the same periods of 1905 and 1906. Although the grain started to move much later this year than last, the date being about three weeks later in Saskatchewan, the amount of grain in store in country elevators was much less than in 1905 and 1906.

Owing to the scarcity of feed in Ontario, an unusually large number of cattle and hogs were marketed during November. In connection with this feed shortage, press notices were sent out by the Department of Agriculture, Ontario, urging farmers and dealers to investigate the possibility of securing inferior wheat from the northwestern provinces for feed purposes, farmers in sections where the supplies are short being advised to secure

quantities of the wheat from the growers, by placing themselves in communication with the Manitoba Grain Growers' Association. The chief obstacle in the way has been the difficulty of securing cars for transportation and the risk involved in sending frozen wheat long distances and holding it before using.

An official estimate published during November of the grain crop of 1907, in the Province of Saskatchewan, was of a very favourable character. Owing to the increase in agricultural population, the acreage sown was much larger than in any previous year, notwithstanding that the unfavourable spring weather interfered with sowing. Compared with 1906, however, an increase of 6.76% was sown to wheat; in the case of oats, the increase was 20%. Although the growing season was not propitious, the increasing area over which agriculture is now carried on rendered local weather conditions of less importance, the area of the districts now partly under cultivation being estimated at 73,171,780 acres. The varied character of the soil included in this area, the improved methods of cultivation, the scattered nature of the tilled land, and the complexity of the weather conditions peculiar to so large a territory, all tend to reduce to a minimum the probability of anything like a general crop failure. The following is an estimate of the season's crop, compiled from the reports of a large staff of correspondents, based in many cases upon actual results of threshing:—

Grain.	Crop area acres.	Total yield bushels.
Wheat.....	1,847,708	28,042,108
Oats.....	772,770	29,167,964
Barley.....	60,261	1,903,072
Flax.....	85,209	921,043

With regard to the quality of the wheat crop, the following estimate was made of the probable grading:

—Nos. 1, 2, and 3 Northern.....	10,392,657
Nos. 4 and 5.....	7,941,594
No. 6 and feed.....	9,707,855
	28,042,106

The aggregate value of the season's crop at present prices is expected to come well up to that of last season, though the

output is somewhat unevenly distributed. On the whole, the aggregate results are regarded as very favourable, the oats crop being the largest in the history of the Province, with an average yield exceeded in only two years since 1898, while the yield per acre of barley has only once been greater since 1898.

According to a circular issued by the secretary of the Northwest Grain Dealers' Association, showing the position of the crop up to November 15, the total yield of grain in the northwest provinces was estimated at 163,936,500 bushels. The wheat yield was estimated at 64,675,000, and the oat yield at 81,395,000 bushels. It has been estimated that over 70,000 head of cattle have been shipped this year from the Canadian northwest, this being the largest number ever forwarded. The hay crop in British Columbia was about the same as in 1906, but the severe winter lead to the exhaustion of reserve supplies, and there will be no more than what is required for the coming winter season. The price, while ranging from \$22 to \$23 in Ontario, reached \$28 per ton in British Columbia.

The season's shipments of cheese from Montreal were 1,973,162 boxes, compared with 2,227,838 boxes last year. From Quebec there were shipped 55,792 boxes, compared with 28,507 boxes last year. The present season's shipments were 227,291 boxes less than last year, and 92,047 less than the season of 1905. Exports of butter for the season amounted to only 66,773 packages, compared with 361,400 packages last year and 573,449 packages in 1905. High prices prevailed for both cheese and butter throughout the season, and although exports were smaller, the dairy farmers are estimated to have received about \$21,000,000, compared with \$25,712,157 last year. Dairy farmers in British Columbia have had an exceptionally successful year, and the creameries in several districts reported the largest output on record.

An official return relating to hail insurance in Alberta shows that contracts to the number of 2,932 were given, insuring 137,997 acres wholly and 19,059 acres partially. The number of claims

filed was 292, on 18,019 acres of damaged crop. The money paid out was \$29,419. The insurance cost \$22,241.

Among meetings of interest to agriculturists held during the month were: the annual convention of the Ontario Beekeepers' Association, held at Toronto, Ont.; the annual meeting of the Farmers' Association of Ontario, held at Toronto, Ont.; the annual meeting of the Ontario Fruit Growers' Association, held at Toronto, Ont., a scarcity of cars being complained of by several of the delegates, and the movement of apples during November being reported as exceptionally heavy; and the third annual convention of the Ontario Vegetable Growers' Association, also held at Toronto, Ont.

#### Fishing.

Uncertain weather conditions affected markets in the Maritime Provinces. Arrivals, however, were fair, and with improved weather in the second half of the month, receipts of fish at Halifax, N. S., showed an increase. Cod fishermen had finished their season on the banks; returns were satisfactory and prices high. The mackerel catch thus far has been uncertain. The supply of oysters also was limited, though the demand in the markets of Ontario and Quebec has been active, from \$10 to \$12 per barrel being paid in Montreal. Large quantities of dog fish were taken, and the reduction works at Canso, N. S., were running to full capacity, though low prices were offered. The decline in lumbering in New Brunswick caused a lessening in the demand for fish at St. John.

In British Columbia, interest centered in herring fishing at Nanaimo and whale fishing off Vancouver Island. A catch of approximately 10,000 tons of the former is expected, a considerable portion of which will be put up in the Scotch method. The whaling fleet has had the most successful season ever reported, extensive developments in the industry being in progress.\*

#### Lumbering.

There has been a general falling off in the lumber industry throughout Can-

ada, compared with the corresponding season of 1906. In the Maritime Provinces, the recent decline of prices in the British and American markets has caused a general curtailment of operations, both in the mills and in the camps. With regard to the former, it was stated that only a few would be in operation in New Brunswick and Nova Scotia during the present winter season. The outlook is that the cut will be considerably smaller than last year, that of the St. John river being estimated at 70,000,000 feet, that of the Tobique river at 15,000,000 feet, and that of the Restigouche river at about 35,000,000 feet. This would indicate a reduction of about 40 per cent. compared with 1906.† The high price of feed and provisions, and the prevailing stringency in the money market were also cited as causes for the lessening of operations. Conditions in the woods have also been thus far unfavourable, the wet weather having prevented lumbermen from beginning operations, and the high water in the streams having made it difficult to forward supplies. In Ontario and Quebec, the saw-mills have closed down after, on the whole, a very favourable year, the delay in the opening of the season having been made up at the close. A considerable number of men were rendered available thereby for other employment, the camps having absorbed a considerably smaller number than last year, and having further reduced staffs during November, the latter action being accompanied by a reduction in wages ranging from \$5 to \$10 per month. The accumulation of stocks, due to the easing of prices and the falling off in building operations, together with the high cost of production, to which the scarcity of and high price of fodder and other supplies contributed, were held responsible for the curtailment of operations. It is expected that a considerable number of the men thrown out of employment will find work in the railway construction camps during the winter, though the lessening of the quantity of feed and provisions consumed will be felt over a considerable area.

(\*) See reports of Victoria and Nanaimo correspondents.

(†) See report of St. John, N. B. correspondent.

Throughout Western Canada, conditions in the lumbering industry were very quiet, except in the getting out of railway ties. In the Kootenay district of British Columbia, it was stated that eighty per cent. of the mills had closed down owing to the falling off in orders, and elsewhere in British Columbia similar conditions prevailed. A number of large logging camps also closed down, and in others the crews were reduced. Reports of fire wardens showed that the forests of British Columbia have suffered less by fire during the present season than in many previous years. Timber licenses to the number of 1,071 were issued in September, the fees amounting to \$143,102. This constitutes the highest record for any one month.

The British Columbia Lumbermen's and Forestry Association was re-organized at Vancouver during November, with the object of protecting the interests of timber merchants. It is proposed to organize branches in different parts of the province.

The taking of evidence was resumed at Edmonton, Alta., in the matter of the alleged combine of lumber manufacturers and dealers operating in Alberta. Officers of the Alberta Retail Lumber Dealers' Association, the Western Retail Dealers' Association and others were examined as witnesses. A fine of \$5,000 was imposed on November 28\*.

#### Mining.

In Nova Scotia, the collieries had a busy month, labour being more plentiful than in the early part of the season. The output of the Dominion Coal Company during October was 342,453 tons (being the largest total for any one month this year), compared with 296,889 tons in September and 350,009 tons in October, 1906. It was stated, however, that the output of this company for the season will be 100,000 tons less than last year, the late opening of navigation and the scarcity of labour being held responsible for the falling off. Notwithstanding the heavy output, there was a shortage of coal at several points in the Maritime

Provinces, and some embarrassment to industry was occasioned thereby.

The Dominion Coal Company recently awarded contracts for the construction of 100 miners' houses in No. 2 district, the same to be completed in time for occupation in the spring of 1908. It was stated that the number of persons at present living in houses belonging to this company was 10,584, of whom 5,438 were women and children. Tenants numbered 1,791 and boarders 1,326.

At Bathurst and Lepreaux, N. B., the development of some important deposits of magnetite was in progress.

In Quebec, the asbestos mines were being worked to full capacity, but there has been a marked falling off in the production of mica, and a number of miners and female mica pickers and sorters in the Ottawa district were thrown out of employment.

Activity continued in the eastern sections of Ontario. Shipments from Cobalt camp, Ont., during the month of October, were 1,174 tons, compared with 760 tons in September. The total output from the camp during the first ten months of the year was 10,924 tons. The value of the output for the year is expected to exceed \$7,000,000. Some staffs were reduced during November.

The collieries of Alberta and British Columbia were very busy, shipments being only limited by the supply of cars available. On Vancouver Island, the labour shortage had been overcome, and production continued on a heavier scale than in any previous year, it being estimated that the output of the Nanaimo coal fields would amount to 600,000 tons.

It was stated that the Government of Saskatchewan would operate a coal mine in the Eagle Lake district for the benefit of settlers.

In the Kootenay district, B. C., recent fluctuations in the prices of copper and silver have materially affected employment. A number of mines and smelters have closed down, and the staffs of others have been reduced. At Rossland, B. C. a material reduction in wages went into effect. In the Boundary district, over 1,000 men were thrown out of employment.

\*See statement published under the heading "Recent Legal decisions affecting labour" elsewhere in the present issue.

Recent reports from the hydraulic and placer mines of the Atlin district, B. C., have been of a favourable nature, it being expected that the gold output will equal, if not exceed, that of former years, a number of large operators having worked continuously throughout the season.

Operations in the Yukon closed during the third week of October.

### Manufacturing.

A general tendency to lessen production was noted on the part of manufacturing concerns. In several of the more important centres, a shortening of the hours of employment and reductions in the working force went into effect in a number of establishments. The cause alleged was the contraction in the business outlook, due largely to shortage of money. The iron and steel branches continued very busy, the Dominion Iron and Steel Company having exceeded during November the highest previous record for one day in the production of steel rails in Canada. At Sault Ste. Marie, Ont., conditions were very active. A new furnace, costing about \$500,000, was blown in by the Hamilton Iron and Steel Company on November 8; the furnace has a capacity of 300 tons of foundry iron, or 400 tons of basic iron, per day, and a considerable additional staff will be required to operate it.

### Railway Construction.

Up to the end of the month, large numbers of workmen, thrown out of employment by the completion of threshing, building, civic improvement work, etc., and by the falling off in the lumbering and other industries, were given employment in the railway construction camps, especially those of the National Transcontinental line, which has been hampered for some time past by lack of men, and which promises to be very active throughout the winter.

With reference to the progress of construction on the National Transcontinental Railway line, it is estimated that of the 800 miles between Winnipeg and

Edmonton, about 500 miles will be completed by the end of the year, and the grading finished besides on 200 miles, about \$13,000,000 having been expended thus far on the work. On the eastern division, about 850 miles are under contract, while contracts for about 950 miles are still to be let. About \$13,000,000 has also been expended on this portion of the work. In all, it is estimated that about \$125,000,000 remain to be expended on the completion of the line by the end of 1911. Labour, though not plentiful, especially in the eastern section, was more abundant during November. Wages continued high. It was stated that conditions were such that work could be pushed very rapidly on both divisions of the line if the necessary labour were obtainable. It was announced that the route of the railway had been located through the Yellow Head Pass of the Rocky Mountains, and that 150 men would be employed throughout the winter on the various engineering parties engaged in locating the route through British Columbia. Steel laying on the Grand Trunk Pacific made rapid progress, the work being continued as long as weather permitted. It is expected that the Company will start its regular service, both passenger and freight, on the completed sections of the line in Western Canada early in the season of 1908, the road being for the present occupied chiefly by construction trains.

The Canadian Pacific Railway Company was preparing for the close of the most active construction season in the west since the completion of its transcontinental line. Work was being rushed on several lines by the Company and by the Canadian Northern. A number of additional branch lines will be constructed by both companies in Western Ontario during the season of 1908. Construction work on the Great Northern in the vicinity of Fernie, B. C., has been actively under way.

It was stated that up to October 15, the following locomotives and equipment had been delivered to the Canadian Northern Railway Company since January 1, 1907:—

JANUARY 1ST, 1907

H

KIND.	Delivered to Canadian Northern.	Delivered to Eastern Lines.	Total Delivered.
Locomotives.....	78	24	102
<i>Passenger Equipment:</i>			
Day Coaches.....	12	24	36
Sleeping & Dining & Parlor Cars.....	6	6	12
Baggage, Mail & Express Cars.....	16	9	25
Baggage, Mail & Express Cars.....	16	9	25
<i>Freight Equipment:</i>			
Box Cars.....	1,350	400	1,750
Flat Cars.....	185	165	350
Refrigerator Cars.....	18	2	20
Stock Cars.....	175	25	200
Hart Convertible Cars.....	140	80	200
Steel Ore Cars.....	40	10	50
Cabooses.....	18	13	31
Totals.....	2,038	738	2,776

It was stated that orders for 100 locomotives, to cost approximately \$1,500,000, were placed by the Grand Trunk Railway Company during November.

#### General Transport.

Railway employees of all classes had an active month, the gross earnings of companies showing a heavy increase, though the increase in operating expenses has caused, in the case of the Canadian Pacific Railway, a decline in net profits for the past four months. Steamboat men, longshoremens, ship labourers, etc., were quieter than in October, though those engaged in the forwarding of grain, and at winter ports were busy, the amount of grain in lake elevators being very large. Freight traffic was very heavy throughout the month; as a result, a car shortage was reported at several points. The Montreal Wholesale Grocers' Guild, the Dominion Millers' Association and fruit growers in Ontario preferred complaints in this connection. Delays in the handling of grain at Owen Sound, Ont., were also complained of. At Moosejaw, and other points in Saskatchewan, a scarcity of cars for grain shipments was reported, and the coal companies of Alberta and British Columbia were hampered for lack of cars. The whole question of railway equipment and the adequacy of trans-

portation facilities have been under investigation by the Board of Railway Commissioners for some months past. A special report, prepared by the operating expert of the Board, was published during November, with reference to the equipment of the Canadian Pacific Railway Company. The report set forth a number of specific instances of failure on the part of the company to supply the necessary cars and other accommodation. It was stated that the company had in use on its system on April 15th, 1907, the following equipment: 40,336 cars for handling freight traffic, including box, stock, flat and coal cars; 1,763 passenger cars, of all kinds; and 1,363 locomotive engines. Contracts have been entered into for delivery to the Company this year of the following: 5,090 freight cars; 156 passenger cars; and 39 locomotive engines. The company has provided for an expenditure of rolling stock and equipment during the year 1907 amounting to upwards of \$12,000,000. The company is also making provision at its principal terminals, for instance, at Montreal, Toronto and Fort William, for additional yard room in which to unload traffic; and generally throughout its system for additional roundhouses and repair or machine shops, storage and sorting yards, sidings and warehouse accommodation. On the whole, the situation

with regard to car shortages compare very favourably with the previous year, and a still further improvement is anticipated.

In the opening week of the month, a number of men were laid off in various car shops of the Canadian Pacific Railway, the Grand Trunk Railway, the Michigan Central Railway, and other companies. The number originally laid off was somewhat larger than last year, though several were re-engaged in the closing week of the month.

Traffic through the canals has been very heavy. The following is a summary of traffic through the Sault Ste. Marie canals during October:—

TRAFFIC THROUGH SAULT STE. MARIE CANALS DURING OCTOBER, 1907.

	U. S. Canal.	Canadian Canal.	Total.
<i>Freight:</i>			
East bound, net tons	4,929,110	2,066,338	6,995,448
West bound, net tons	1,089,946	331,203	1,421,149
Vessel passages, no. . . .	1,960	923	2,883
Registered tonnage . . .	4,886,201	1,903,904	6,790,105

In order to assist in the moving of the western crops, navigation on Lake Superior will be kept open to as late a date as possible, arrangements having been made to maintain lighthouses, etc., in operation until December 10th.

The harbour revenue of Montreal for the month of October increased \$2,731 as compared with October, 1906; while the total increase for the year has been \$6,648, the total receipts to the end of October, 1907, being \$283,291.

The winter shipping season opened at St. John, N. B.; a busy season is anticipated.

According to the fifth annual report of the Canadian Northern Railway Company, the results of operations for the year ended June 30, 1907, compared with the preceding year, were as follows:—

	1906	1907
<i>Gross earning:</i>		
Passenger traffic . . . . .	\$1,062,639	\$1,464,256
Freight . . . . .	4,335,933	5,741,729
Express, mail, etc. . . . .	505,183	1,144,213
	\$5,903,755	\$8,350,198
Working expenses . . . . .	3,674,733	5,424,164
	\$2,229,022	\$2,926,034
Fixed charges . . . . .	1,509,448	1,882,489
Surplus . . . . .	\$ 719,574	\$1,043,545

At the tenth annual meeting of the White Pass and Yukon Railway Company, the most prosperous year in the history of the company, since the early years, was reported. There was a falling off in the amount of freight carried, but the operating expenses were very considerably reduced. Reference was made to the change in the character of the work now being done in the Klondike district, a change from placer mining, involving the employment of a large number of men to mining by means of hydraulic dredgers involving the employment of a large amount of capital. Satisfactory progress in the installation of dredges and large machine plants in the Klondike was reported.

The gross earnings of the Montreal Street Railway Company during 1907 increased by \$403,156, or 13 per cent.; operating expenses increased by \$253,933, or 13.72 per cent., and net earnings by \$149,223, or 11.94 per cent. A total of 115,416,468 passengers was carried, an increase of about 15,000,000 over the year previous.

It was stated that the Canadian Pacific Railway Company will issue additional stock amounting to \$28,320,000.

### The Trades.

*Building.*—A further decline occurred during November in the amount of employment, work being almost wholly confined to the finishing of contracts. The out-door branches were dull in most of the cities, though indoor workers had a fair month. Compared with the corresponding period of 1906, the outlook for the winter is less promising.

*Metal and woodworking.*—These trades had a fair month, though the decline in manufacturing affected certain classes.

*Printing.*—The month was a fair one, though less active than October.

*Clothing.*—Journeymen tailors were active, but garment workers were somewhat quiet. Glove and mitt factories were busy on sorting orders, and boot and shoe factories were fairly active, though sorting orders were on a smaller scale than had been expected. Spring orders were favourable. Manufacturers of rubbers were busy, with orders ahead,

the raw rubber market has recently shown a decline. Furriers were in their busiest season.

*Leather.*—The jobbing trade in leather has been active, but not busy, though stocks were low.

*Food and tobacco preparation.*—Bakers reported an increase in trade, with prices upward. Confectioners were busy, though the existing financial condition affected production, and a number of establishments completed their season at an earlier date than last year. Cigar-makers were quiet.

*Miscellaneous.*—Miscellaneous trades were fairly well employed. In Western Canada there was a surplus of labour seeking light indoor employment for the winter, usual at this season of the year.

*Unskilled labour.*—With the advent of cold weather and the cessation of building, civic improvement works, etc., a number of men were thrown out of employment, and in most of the cities, the supply of general labour was greater than the demand. The decline in lumbering, which usually furnishes employment to large numbers during the winter season, has been an unfavourable feature, though the railway construction camps are expected to be very busy throughout the winter.

### Canadian Trade and Revenue.

*Foreign trade.*—During October, 1907, the total value of imports entered for consumption was \$31,484,400, compared with \$31,729,831 in October, 1906. The total value of imports for these seven months ending October 31, 1907, was \$226,395,735, compared with \$195,011,682 for the corresponding period of 1906. Total domestic exports during October, 1907, amounted to \$23,697,148, compared with \$26,880,090 in October, 1906. The total domestic exports for the seven months ending October 31, 1907, amounted to \$149,270,783, compared with \$147,907,575 in the corresponding period of 1906. Increases in exports during October, 1907, took place under the headings of The Fisheries and Manufactures, and decreases under the headings of The Mine, The Forest, Animals and Their Produce and Agriculture.

*Imperial trade.*—According to a statement of the British Board of Trade, imports from Canada into Great Britain during October were as follows:

12,704 cattle, value £208,668; 13 horses, £660; 898 sheep and lambs, £1,700; 1,585,400 cwt. of wheat, £692,079; 165,700 cwt. of meal and flour, £91,018; 9,850 cwt. of peas, £4,416; 95,765 cwt. of bacon, £257,072; 26,537 cwt. jams, £75,830; 2,702 cwt. butter, £13,821; 272,002 cwt. cheese, £784,102 and 26,146 great hundreds of eggs, £11,451.

According to reports received from commercial agents at the Department of Trade and Commerce, Canada, openings were good for Canadian apples, smoked salmon, cheese, bacon and eggs in Great Britain. The demand for Canadian apples, bacon and ham in South Africa was also reported good. In the West Indies, general trade conditions are improving. The Australian importing trade was depressed.

*Domestic trade.*—Trade advices were generally favourable, the good weather having stimulated the movement of winter goods. Sorting orders for the Christmas trade were fair, and spring orders active. Remittances were slow. The prevailing money stringency had the effect of reducing stocks. Though the holiday turn-over is not expected to be as heavy as last year, the outlook for the winter is regarded as favourable. Canadian securities continue on low levels.

A statement issued by the Imperial Bank of Canada showed profits of \$389,027 for the half year ending October 31. Premium on new stock amounting to \$86,358 was added to rest account. The annual report of the Bank of Nova Scotia showed an addition to rest account and a considerable sum carried forward. The annual statement of the Bank of Montreal showed net earnings of \$1,980,138, compared with \$1,797,976 in the previous year. The sum of \$699,969 was carried forward.

According to the October bank statement all loans in Canada showed a decrease of \$355,206 and call loans elsewhere a decrease of \$15,211,864, compared with September. The decrease represents in large part the money withdrawn to assist in the financing of the crop movement.

*Canadian revenue.*—Total revenue on Consolidated Fund during November

amounted to \$8,404,647.83, compared with \$7,639,655.94 in November 1906. The total revenue for the eight months ended November, 30th, 1907, was \$66,-662,427.71, compared with \$57,513,552.90 in the corresponding period of last year. Expenditures on capital account totalled \$3,546,652.83 for the month and \$16,654,487.21 for the eight months period.

#### Notes.

The annual meeting of the *Lord's Day Alliance* was held in Montreal.

The sixth annual convention of the *Canadian Clay Products Manufacturers' Association* was held at Ottawa, November 19-21.

The establishment of a *Royal Mint* at Ottawa, Ont., to operate from the 9th of November, was authorized by the Imperial government.

The royal commission appointed by the government of Canada to investigate into the causes of the collapse of the *Quebec bridge* held a number of sessions for the taking of evidence in the United States during November.

The annual report of the commissioners of the *Light and Power Department of the town of Brockville, Ont.*, shows a total revenue for 1906-07 of \$46,311.10. Working expenses were \$28,644.50 and profits \$8,088.91.

Sessions were held at Quebec, Que., and other points, by the commission appointed by the government of Quebec to inquire into the causes, and the best measures to be taken for the prevention, of *industrial accidents*.

The first annual convention of the *Federation of Textile Workers of Canada* was held at Montreal, Que. It was stated that there are now about 25,000 textile workers in Canada operating machines in the different provinces, as follows:

Provinces.	Looms	Spindles.
New Brunswick.....	2,694	107,984
Nova Scotia.....	694	48,000
Ontario.....	8,717	145,953
Quebec.....	12,275	545,700

Mining Company, Limited, for the year ended December 31, 1906, showed the most prosperous year in the history of the association, over \$1,200 having been added to its funds. The large number of men employed, the heavy coal output, and the general good health of the members, were cited as having chiefly contributed to this result.

Following a custom which has been in force for the past five years, the British Columbia Electric Railway Company will distribute among its employees at Victoria, Vancouver and New Westminster, a portion of the *profits* of the Company for the past year. The sum of \$30,000 will be distributed, each employee getting \$63.00. This amount is the largest paid out in this way by the Company in any one year since the adoption of the plan, the share per employee in the first year being \$25.00 in the second year \$35.00, in the third year \$40.00, and last year \$45.00. Some 478 employees will profit by the arrangement, compared with 439 last year.

The following were appointed as factory inspectors for the Province of Ontario during November: Robert Hungerford, Toronto; Henry Clark, London; Frederick Kellond, Hamilton; Stephen J. Mallion, Stratford. They will each receive a salary of \$1,100 per annum. There are now ten factory inspectors in the province. A deputation representing the Employers' Association of Toronto, Ont., waited upon the Honourable the Minister of Agriculture for Ontario with reference to the appointments, declaring itself opposed to the appointment of members of trade unions, though not opposed to non-union workmen.

The Trades and Labour Council of Vancouver, B. C., passed the following resolution during November, having reference to *immigration and conditions of employment* in British Columbia:

"Resolved that whereas this council has twice placed itself on record as being in favor of white immigration that comes unassisted and under fair conditions;

"And whereas such immigration is at present coming by hundreds from the Northwest as well as from eastern Canada, and unable to find enough employment at present, and unless these men can be placed, will be a charge on the city;

"And whereas they will be needed in the spring;  
"Be it resolved; that this Council request through the press that large employers of labor such as the mills, Can-

The fifteenth annual report of the trustees of the *Relief Fund Association* of the employees of the Intercolonial Coal

adian Pacific Railway, British Columbia Electric Railway Company and others be requested to give them employment instead of the many Orientals now employed, thus showing the people of this province that they are true to the sentiments they express as being in favor of white labor provided the same can be secured; "And be it further reserved that this council open a register for all unemployed white citizens where employers can secure any number."

The *Western Ontario Municipalities Niagara Power Union* held a conference with the Hydro-Electric Power Commission during November. It was decided that by-laws to provide for the erection of distributing plants in the various places to which the commission will deliver electric energy, will be submitted to the people in these cities and towns in January next, a model by-law being in course of preparation for distribution to the municipalities. It was stated that Toronto, Hamilton, London, Stratford, Guelph, Hespeler, St. Thomas, Woodstock, and several other cities and towns, would submit the question of securing cheap power through the commission in this manner. It is understood that if a number of cities and towns vote in favour of the power, they will receive it, the commission having arranged a contract with the Ontario Power Company at Niagara Falls. The transmission lines will be built by the government and the distributing plant by the municipalities, the latter in some cases involving the purchase of light plants belonging to private companies.

The fourth session of the tenth *Parliament of Canada* was opened on November 28. In the speech from the throne, reference was made to the remarkable expansion in the trade and revenue of the Dominion during the past year, the latter leaving a surplus of over \$3,000,000 to be applied to the public debt. The increase in the volume of immigration was also referred to. It was stated that the existing financial stringency was felt to be temporary, and that the illimitable resources of Canada gave ample guarantee of continued material progress. With reference to the National Transcontinental Railway, progress was stated to have been retarded by the difficulty of obtaining labour and materials at a time of great business activity; a section of the western division, about 250 miles long, however, has been completed, and

in a short time the whole work will be under vigorous construction. Other questions referred to were the conclusion of a trade convention with the government of the French Republic, the recent influx of immigrants from Oriental countries into British Columbia, the collapse of the Quebec bridge necessitating a devising of means for the completion of the bridge within a reasonable time, and the placing of telegraph and telephone companies holding charters from the Dominion under government control.

The annual meeting of the *Canadian Society of Equity* was held at Calgary, Alta., November 13-16. Delegates representing between two and three thousand farmers from the Province of Alberta being present for the purpose of considering plans for the advancement of the farmers' interests, to receive the report from the fraternal delegate who attended the Trades Congress at Winnipeg, and to adopt some measure whereby closer relations might be established between farmers and working classes. Mr. R. P. Pettipiece attended the convention as fraternal delegate from the Trades Congress. The following resolution was passed:

"Whereas for the first time in the history of the Labour movement farmers represented by the Canadian Society of Equity and the Trades and Labor Congress of Canada representing over 50,000 organized workers have seen fit to exchange fraternal delegates for the purpose of unifying their interests;

Therefore be it resolved that we reaffirm the position and attitude of the Trades Congress and pledge our selves to affiliate if possible and do everything in our power to promote unity of purpose between the farmers and industrials of Canada;

And be it further resolved that we the delegates of the Canadian Society of Equity here assembled, report back to our Locals, urging a demand for the Union Label upon Manufactured goods, including printing of all kinds purchased by members of this Society.

The next convention of the society will be held the third week of July next in Calgary. The officers elected are as follows:

*President*—R. C. OWENS, Edmonton.  
*Vice-Pres.*—A. VON. MEILECKI, Calgary.  
*Secretary*—W. J. KEEN, Edmonton.  
*Directors*—NESTOR NOEL, River QuiBarre.  
 C. PEGLER, Nanton.  
 A. DUFFIELD, Westaskinwin.  
 J. STEMACKER, Edmonton.  
*Organizer*—R. C. OWENS.

In the report of the fifth annual convention of the National Trades and Labour Congress of Canada, published in the *Labour Gazette* for October, 1907, *delete* the first paragraph under the heading "Education", on page 435, the resolution in question having been laid on the table of the Congress but not passed.

## II. REPORTS OF LOCAL CORRESPONDENTS.

### SYDNEY, N. S., AND DISTRICT.

*Mr. John Moffatt, correspondent, reported as follows:—*

#### GENERAL CONDITION OF THE LABOUR MARKET.

THE general condition of the labour market differed little from that of the preceding month, all the large industries continuing active, while the railways, workshops and factories were enjoying the same prosperous conditions. Business was not as brisk as in November, 1906.

Activity prevailed in the coal industries; the output for November was larger than in 1906, but the total output will not exceed that of last year. Owing to the lateness of the opening of navigation and other adverse conditions, coal shipments to the Montreal territory were 150,000 tons behind at the beginning of the month, but favourable weather enabled the companies to catch up, and the shortage was much reduced. The October output of the Dominion collieries was 342,453 tons; one colliery alone producing 100,912 tons. The Hub colliery resumed operations on the 14th of the month, after being idle for one year. Operations at the Lingar collieries were active. The proprietors of these collieries will endeavour to make the output 1,500 daily. December will not be so busy a month at the collieries; the Caledonia and part of the Reserve colliery will be placed on single shifts. The Sydney mines collieries were active, and will continue so; the output for October was 57,071 tons, being an increase over that of September of 8,415 tons. One of the collieries, closed down some years ago, will shortly be re-opened; the pumps are at work, and when the mine is dry, repairs will be made, and another colliery added to the number of operated industries. The Inverness collieries were busy.

The output of the Port Hood collieries averaged over 450 tons per day for the month of October. With the opening up of new districts, this colliery is expected

to produce 800 tons per day, next summer. Pictou and Cumberland collieries were very busy. Springhill was almost up to its normal output.

The iron and steel industries were active. All departments of the Sydney Steel Works, with the exception of the rod mill, which was closed down for a few days for repairs, were continually running. Orders for steel products were still plentiful. The yards were well stocked with iron ore and material for fluxing. During October, the output of the Sydney Steel Works Company amounted to 6,986 tons of steel, being 1,497 tons more than in September. Activity was continuous around these works. The Londonderry Iron Works Company obtained a fair output of iron.

The building trade continued brisk in some districts, but on the whole was quiet. The Dominion Coal Company is building 100 houses at the Hub colliery.

Transportation was rather light during the last part of October, but greatly increased since, and will continue so until after the Christmas holidays.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture and fishing.*—Conditions were more or less dull.

*Lumbering.*—Trade was not as active as last year, owing to the drop in prices in the foreign markets.

Active conditions prevailed in the *metal and engineering* trades. The same applied to the *woodworking and furnishing, printing, clothing, food and tobacco preparation, and leather trades.*

*Miscellaneous.*—Barbers, broom-makers, clerks, stenographers, delivery employees and furriers had active employment, but conditions of employment with hotel and restaurant employees etc., were more or less dull.

*Transport.*—Railway employees, steamboatmen, steamboat firemen, ship labourers, longshoremen and street railway employees were active. Quietness prevailed with other classes.

*Unskilled.*—Work was fairly plentiful.

## WESTVILLE, N. S., AND DISTRICT.

*Mr. Thomas Hale, correspondent,* reported as follows:—

## GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions were very active, and are likely to continue so, except in trades influenced by climatic conditions, such as bricklaying and other outdoor occupations. The mines were very busy, though local consumers complained of a shortage of coal. The various collieries were in need of additional men; according to report, the Allan shafts were much handicapped for the want of men. The output of coal at the Drummond colliery for October was 24,292 tons; coke, 711 tons; fire clay, 351 tons; fire brick, 88,000, and the pay-roll amounted to \$39,000. There were five days' time lost at this colliery during October, owing to two fatal accidents. The coal shipments of the Acadia Coal Company for the month of October, as reported in the "Mining Record," were 31,987 tons, being an increase over the corresponding month of last year of 4,765 tons, and making a total increase for the ten months ending October, 1907, of 42,840 tons. The Intercolonial Coal Company reported a decrease in the amount of coal mined at the end of the ten months ending October, 1907, of 13,917 tons, compared with 1906.

## CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farm produce of all kinds met with ready sale at good prices. Owing to bad weather, some root crops are still to be harvested.

*Lumbering.*—There was a steady demand for pit timber. The price of deals declined.

*Manufacturing.*—Steel and other industries were very brisk.

## DISTRICT NOTES.

*Antigonish County.*—The prospects that this county will enjoy a period of great industrial activity never appeared brighter. A second seam of coal was located

some days ago at Big Marsh, near the seam located a few weeks ago. There are now two seams of six and eight feet respectively, and experts say that the quality is excellent. It is believed that the formation is similar to that of Port Hood. A company has been formed, and it is announced that operations will begin immediately. The iron ore deposits at Arisaig, within a few miles of the coal areas, are also being developed.

## HALIFAX, N. S., AND DISTRICT.

*Mr. A. J. Smith, correspondent,* reported as follows:—

## GENERAL CONDITION OF THE LABOUR MARKET.

Labour during November was fairly active, and while not as fully employed as during October, owing principally to the cooler weather, and the completion of some building contracts, was more active than in the corresponding month of 1906. New buildings were advanced several stages, while the factories showed the activity usual at this season of the year. Among the new buildings nearing completion are the Silliker Car Works, consisting of six buildings, the erecting, moulding, machine and smit shops, planing mill and dry kiln, which are practically ready for the reception of the new plant, etc.; the Athletic Arena, as well as several smaller buildings. Among the new structures begun is the cathedral, to replace the building burned two years ago, and to cost about \$200,000. Extensive repairs are to be made to the post office. Another altering contract is the building of a new wing to the court house to cost \$25,000, which is not to be completed until July, 1908. The Halifax branch of the Nova Scotia Technical School, established by the Provincial Government, opened on November 11th. The number present on the opening night was 182, enrolled as follows: English, 51; arithmetic, 48; practical mathematics, 16; mechanical drawing, 23; architectural drawing, 17; electricity, 27. Since the opening night, the attendance has materially increased.

The crop report for 1907 which has been issued by the Secretary for Agriculture for the Province, says: "While weather conditions have been far from ideal, yet so far as produce is concerned, the season has been the most satisfactory we have had in some years, and farmers generally have every reason to congratulate themselves on a season which will bring more money into agricultural Nova Scotia than has been received for a number of years." Pastures were backward until June 15th, when they became good, and continued so. Cheese was 5% to 20% below the average output, but the quality was much superior to that of former years. For fruits the season has been the most satisfactory for years. The crop returns for 1906 gave an average of 75 per cent.; the returns this year will average 100 per cent. In September and October, 1906, 58,988 barrels were shipped; in 1907, during the same month, the shipments numbered 100,386 barrels, notwithstanding that the October gales blew some 40,000 barrels of apples off the trees, and that the crop would have been increased had more help been obtainable.

The Atlantic winter mail service has opened, and work along the waterfront, which has only been fair during the past month, is expected to show a big improvement. Much produce, fish, etc., has arrived at the port during the month, two steamers and twenty-nine schooners arriving on one day, November 14th. Among the cargoes arriving were 7,000 quintals of dry fish, 26 casks of cod oil and 772 barrels of herring from Newfoundland, besides other cargoes of much value.

A new union was formed on the 12th of November, being a branch of the Station Freight Clerks' Union. The members are employees of the I. C. R. deep water station, and number about thirty.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—This industry has had a successful season.

*Fishing and lumbering.*—These industries have been dull, particularly the latter.

*Manufacturing.*—The fancy baking and confectionery line has been brisk.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons were not nearly so well employed as during last month. Carpenters and joiners were fairly well employed. Painters and decorators showed a falling off from October. Lathers were dull. Plumbers and gasfitters had a fair month, as did steamfitters. Stonecutters were busy. Freestone cutters were dull, with future prospects fair. Builders' labourers had a fairly busy month.

*Metal.*—The strike between the local union of boilermakers and the Dry Dock Co. is still on. Some of the local men went to Pictou to finish a contract, but have returned. The month has been the dullest for some time.

*Printing.*—Printers and pressmen, while not as busy as usual early in the month, are now active, and bookbinders show improved business.

*Clothing.*—Journeyman tailors and garment workers were rather dull, but with the advent of the cold weather, an improvement is looked for.

*Unskilled labour.*—This class showed much activity.

#### AMHERST, N. S., AND DISTRICT.

*Mr. A. D. Ross, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

November was a busy month for labour. Building operations were exceedingly brisk during the summer, and November opened with a large number of buildings in an unfinished state. Contractors increased their forces to close the work before the frost set in. A close estimate of the cost of building in this town during the past season places the amount in the vicinity of \$500,000. The census, which is taken annually, shows that the growth of population during the past year was over 1,000, Amherst having now a population of over 9,000. Rapid as has been the growth of the town, it is safe to say that the population would have been five hundred more if houses

could have been obtained. Building has not been able to keep up with the demand. Only seventy-nine new houses were built for the accommodation of the 1,000 increase in population.

The Victor Woodworking Company, which went into liquidation in September, has been purchased by a strong company, and will recommence operations shortly. The Amherst Malleable Iron Company has added a large extension, doubling its capacity. The Amherst Boot and Shoe Company has made an addition to its factory, providing double the original floor space. Two large wharves have been built at a point two miles from Amherst, and a branch spur line connects the wharves with the Intercolonial railway. Over thirty vessels have unloaded at these wharves during the summer. This is practically the first season that freight has come to Amherst by water. Wages generally have had a steady upward tendency.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—In the immediate section, the farming classes have had a discouraging season. Thousands of acres were left uncut owing to the wet weather. The potato crop was seriously affected by dry rot, and other crops were below the average. Prices, however, for all kinds of produce were exceedingly high, and no serious consequence will follow from the partial failure of crops, excepting to the consumer. Farmers complained of a shortage of farm help, although better wages were being paid than ever before.

*Lumbering.*—The shipping of lumber was brisk this summer to both American and English ports. Prices, however, have fallen during the past month, and the outlook for the winter is unfavourable. The cut will probably be the smallest in several years. The larger operators are reducing the number of employees, and many of the smaller operators intimate that they will not put out any lumber the coming season. Farmers generally do some lumbering during the winter months to furnish them

with ready money, but dealers are not sub-letting any contracts as yet this season. On the whole, the outlook for the trade is depressing, and will lead to a further scarcity of money.

*Manufacturing.*—All factories reported orders very numerous; many of them are working nightwork.

*Mining.*—Mining operations were exceedingly brisk. Miners were receiving good wages, but there was a marked scarcity of coal cutters. All the mines are steadily increasing their outputs, with more orders in sight than they can fill. New slopes were being opened. Bank-head buildings were being improved, and the whole industry put on a better basis than ever before.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Employment was very active in all branches, and will continue so as long as weather permits. There was abundance of employment for bricklayers, masons, carpenters, joiners and lathers.

*Metal, engineering and shipbuilding.*—Metal workers had steady employment, and the prospects at present indicate that the various factories employing moulders, coremakers, machinists, etc., will have a busy winter.

*Woodworking and furnishing.*—An exceedingly active month prevailed, with the demand greater than the supply. Car builders will have a busy winter.

*Printing.*—Busy conditions prevailed in these trades, but there is no extra demand for additional labour.

*Clothing.*—Tailors reported an active month, and a few good workmen could find employment.

*Leather.*—Trunk and bag makers had an active month, and will be steadily employed during the coming winter.

*Unskilled.*—The season just closed furnished abundant employment for unskilled labourers. Wages ranged from \$1.35 to \$1.75 per day. Men were scarce, and work was retarded owing to this fact. The local supply will be sufficient to meet the demand during the winter months.

## CHARLOTTETOWN, P. E. I., AND DISTRICT.

*Mr. F. J. Nash, correspondent,* reported as follows:

### GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during November was more active than the same month last year, as the stormy weather which prevailed in 1906 interfered considerably with outdoor work. This month the weather has been remarkably fine, allowing outdoor work to go on uninterruptedly. Supply and demand were well balanced. Merchants and bankers reported a good month for trade with money fairly plentiful and collections easy. The unusually heavy crops taxed transportation facilities to their full capacity.

### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The fine weather enabled farmers to get through with a considerable proportion of their shipping.

*Fishing.*—Operations in this line were quiet.

*Lumbering.*—Very little lumbering was carried on.

*Manufacturing.*—Conditions were normal.

*Railroad construction and employment.*—Work on the railway wharf in Charlottetown was closed down for the season about the middle of the month, but work at the new car shops was continued till the end of the month.

### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons, carpenters and joiners were busy. Lathers and plasterers, painters and paperhangers, plumbers, gas and steamfitters, stone cutters and builders' labourers were active.

*Metal.*—Iron moulders', iron workers and helpers, machinists and engineers, steam engineers, linemen, and blacksmiths were active.

*Woodworking.*—Woodworkers, uphol-

sterers, carriage and wagon makers, and car builders were active.

*Printing.*—Printers, pressmen, and bookbinders were busy.

*Clothing.*—Journeymen tailors, garment workers, boot and shoe workers were active.

*Food and tobacco preparation.*—Bakers and confectioners, butchers and meat cutters, and tobacco workers were active.

*Leather.*—Tanners and curriers, leather workers and saddlers were active.

*Miscellaneous.*—Activity prevailed.

*Transport.*—Railroad employees, steamboat men, and longshoremen, were active.

*Unskilled labour.*—There was a fair demand.

## MONCTON, N. B., AND DISTRICT.

*J. C. Graves correspondent,* reported as follows:—

### GENERAL CONDITION OF THE LABOUR MARKET.

November has witnessed no diminution of the active conditions which characterized the labour market in this locality during the past season. One contributory cause has been the favourable weather which permitted outdoor work to be carried on with but slight interruption. Labourers, skilled and unskilled, were in good demand. Building operations have gone on briskly, and contractors have been enabled to close out their contracts, though much inside work remains to be done. Corporation work on the streets, water-mains and sewers is about finished, and a considerable number of men will soon be free for other work. In the foundry, machine shops and other local manufacturing concerns very active conditions prevailed, and the forecasts for the winter's work are excellent, and with no reductions of operating staffs expected. In the I. C. R. machine shop 4 new ten-wheeled passenger engines with all modern equipments are nearly completed, and will be ready for the road in a few days. The two woodworking factories both report a good season, with orders

enough ahead to ensure steady work during the winter. The Builders' Woodworking Co. has about 90 names on the payroll, which amounts to nearly \$4,000 per month. Some construction hands will be laid off. The Paul Lea Co., Ltd., payroll amounts to about \$1,800 per month; the firm employs about 50 men. The Moncton stave and head factory has a payroll with 43 names of \$1,500 monthly. This factory has much increased its output during the past year. Over 4,000 cords of wood were manufactured. The P. N. Hamm Bisquit Company reported an expansion of business; it has about 25 names on a pay roll of \$130 weekly. About one-half the employees are females.

The City Council and the Board of Trade are both moving to encourage new industries to locate here. A joint deputation of the City Council and the Board of Trade waited upon the Minister of Railways and asked that the old I. C. R. shops when vacated be leased by tender, with the proviso that they be used for car construction shops. The Minister promised consideration. They also recommended the bonusing and granting of concessions to the L. Higgins Co. on condition of starting a shoe factory to employ at least 100 hands. Wholesalers reported trade above the average, but in view of the uncertainty of the money market expect to curtail during the winter season. Retail trade has been active. Owing to the cost of flour, one baker has advanced the wholesale price of bread from 5 to 6 cts. per loaf. The other bakers declined to do so. A third bakery closed a short time ago, being unable to effect an agreement to advance the price with the others. Houses are scarce and rents high. No material changes in wages or hours of labour, and no strikes or lockouts have occurred.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were busy marketing and preparing for winter. Very little fall ploughing has been done, owing to the land being too wet. Feed of all kinds is very high, and dairy produce exceptionally so. Milk remains at

7 cents per quart; butter, 27 cents to 32 cents per pound.; beef, 5 cents to 6 cents per pound, per quarter; pork, 9 cents per pound, per carcass; oats, 60 cents and potatoes 50 cents per bushel.

*Lumbering.*—Indications point to a smaller cut of lumber than usual.

*Mining.*—The Drummond Mining Co. of Montreal has purchased the lease of the iron mining areas along the Nepisiguit River, 25 miles from Bathurst, Gloucester Co. The Provincial Government diamond drill has been at work there testing the deposits. Analysis of samples from one drill hole, taking a sample every ten feet for 300 feet, showed an average of 51.38 per cent. and ran as high as 63.83 per cent. The Company will at once develop the property, and will ask the I. C. R. for a branch line to the mine.

*Railroad construction and employment.*—Active construction of the Moncton-Chipman section of the G. T. P. has commenced. The right of way is being cleared, two large depot camps constructed, branches from I. C. R. laid, and steam shovels put into operation. About 125 men are employed and 100 more are wanted.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers were quiet, with carpenters and joiners active, painters and plumbers busy, and builders' labourers were in good demand the first of the month, but quieter towards the close.

*Metal, engineering and shipbuilding.*—Iron, moulders, iron workers and helpers, machinists, linemen, blacksmiths, boiler-makers and horse shoers were all very busy.

*Woodworking and furnishing.*—Wood workers, upholsterers and car builders were active.

*Printing and allied.*—Printers, pressmen and bookbinders were busy.

*Clothing.*—Journeymen tailors and garment workers were active, with boot and shoe workers busy.

*Food and tobacco preparation.*—Bakers and butchers were fairly well employed.

*Leather.*—These trades were quiet.

*Miscellaneous.*—Barbers were active. Clerks, delivery employees, hotel and theatre employees were busy. Laundry workers were active.

*Transport.*—Traffic both in passenger and freight lines continued heavy and trainmen reported an average month. Carters, teamsters and express men were very busy.

*Unskilled labour.*—The demand for this class has been exceptionally active throughout the month, but with cold weather will become somewhat quieter.

#### DISTRICT NOTES.

*Campbellton.*—Shives' mill, employing 260 hands, shut down for the season on the 8th inst. All other mills have also closed down. The Restigouche Boom Company which has rafted about 80 million feet, has completed its season's work.

#### ST. JOHN, N. B., AND DISTRICT.

*Mr. W. H. Coates*, correspondent, reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

The labour market continued active during November, and all branches of industry were well employed, excepting the ship labourers. A new manufacturing plant has been erected at Mount Courtney, Crouchville, St. John County, for the manufacture of axes. Eight hands are employed, and additional men will be put to work as the business increases. The cooking capacity of the Partington Pulp and Paper Company's works at Union Point has been increased 45½ per cent. by the installing of a new digester 50 feet in height. The digester is built of cast iron, and is the fourth to be installed in the pulp mill. The James Pender Company is contemplating reducing the working time from ten to eight hours per day, and the Maritime Nail Works will cut off night work; fear of over production being the reason assigned. Bank clearings for the five weeks ending November 28th were \$6,549,077, and for the

corresponding period last year \$6,154,104, being \$394,973 greater in 1907 than in 1906, and \$1,471,392 in excess of the four weeks ending October 24th of the current year. The winter port trade opened on November 22nd. Members of the Ship Labourers' Association have been receiving 40 cents an hour during the past summer, and refused to work for less during the winter. The C. P. R. Company declined to pay more than 30 cents per hour, the rate paid last winter. The crew of the steamer was put to work discharging and taking in cargo. There are now in port two C. P. R. liners, two Donaldson liners, one Allan liner, one Furness liner, and the steamer Amanda from Montego Bay, Jamaica. A number of outsiders went to work on the Donaldson boats, and the Allan boat is being handled. The Furness boat is being discharged by her own crew. Pressmen and assistants inaugurated the 8-hour day on November 18th by mutual consent. At Fitzgerald Lake a new industry is being worked. This is the refining of tripoli. The plant erected consists of a dry house, 300 feet long, 14 feet high, and 14 feet broad, with shelves on either side; a boiler and engine house, kiln and mill. At present the tripoli is handled as follows: It is taken out by spades and placed in the dry house, and carried in buckets by an endless chain to the moulding shed, where it is formed into bricks in 4x8½-inch moulds. From there it is conveyed to the kiln, where it is burned or calcined and from the kiln it goes to the mill, where it is ground in a 16x4½ foot cylinder, in which there are four tons of round flint stones. After the material is reduced to a fine powder it is blown by a fanner through a pipe into a large galvanized iron separator. The separator is cone-shaped with a screw built on the turbine principle. The separator deposits the different grades of the finished article into bins, and from the bins the tripoli is placed in bags, each bag weighing 100 pounds ready for shipment.

##### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The farmers along the Portage, anagance and Hayward's report several hundred acres of hay that could

not be made. Owing to the heavy freshets, mowing machines, horse rakes, etc., were submerged in five feet of water on the marshes. Practically the whole of the potato crop in the St. John Valley has been gathered. Large quantities of dressed pork have been shipped from Hartland, but owing to a recent enactment, the price has declined about \$35 per ton; though still above the average. In all other lines of produce the farmers are realizing returns beyond any in former years.

*Lumbering.*—A liberal statement of the lumber cut on the Tobique last year would place it at 25,000,000, while this year's total will be less than 15,000,000. Operators state that wages are as high as ever and that provisions for men and feed for horses are higher than ever before, with conditions in the woods very unfavourable owing to the heavy rains, thus necessitating a curtailment. Reports from Lepreau state that the cut last year was about 8,000,000 feet, and between 400 and 500 men were employed, while this season the cut will only be between 3,000,000 and 4,000,000 feet, and only about 150 to 180 men will be employed. The lumber cut this year on the Restigouche will be 35,000,000 superficial feet. The cut last year was 52,000,000 feet, while 75,000,000 feet, both old and new came down the river last spring.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—The various branches were active.

*Metal, engineering and shipbuilding.*—Machinists, engineers, and horseshoers were active. Electrical workers, linemen, boilermakers and sheet metal workers were very busy. Iron moulders, iron workers, helpers and blacksmiths were busy.

*Woodworking and furnishing.*—Woodworkers were active. Several shingle mills have closed down.

*Printing.*—Bookbinders were active. Printers were very busy, overtime being worked in some shops. Pressmen were busy.

*Clothing.*—Journeymen tailors were busy.

*Food and tobacco preparation.*—Bakers and confectioners were very busy. Cigarmakers were active.

*Leather.*—Tanners and curriers were active.

*Miscellaneous.*—Brush and broom makers were busy.

*Transport.*—Railway employees were very busy. Steamboatmen had a fair month. Ship labourers were dull. Street railway employees, teamsters and expressmen were busy.

*Unskilled labour* was busy.

#### DISTRICT NOTES.

*Fredericton.*—Miss Mabel French, of St. John, was sworn in a barrister on November 21, at the Supreme Court, being the first woman in the province to be admitted to the bar. The Chestnut Canoe Company, Limited, is now having erected near the C. P. R. station and freight sheds a large factory for the manufacture of canvas canoes.

#### QUEBEC, QUE., AND DISTRICT.

*Messrs. P. J. Jobin and Edward Little, correspondents,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Labour was well employed during November, weather conditions being more favourable for outside work than in October.

The Quebec Gas Company has reduced the pay of gasfitters in its employ from \$3.25 to \$2.50 per day of ten hours and has notified a number that their services will not be required after January 1st.

Bread remained at 20 cents per six pound loaf, though a few master bakers were still selling at 18 cents.

For the Provincial Council of Conciliation and Arbitration Mr. J. H. Lauer has been appointed to represent the employers and Mr. O. Brunet to represent the employees.

There have been no strikes or lock-outs during the month.

The steamer *Victorian* which sailed from this port on the 8th instant had 158

Italian navvies as passengers for Italy. These men had all been at work during the summer on railway construction work in the west. The steamer Bavarian, which ran ashore on Wye Rock two years ago, and was subsequently floated off and brought up to this port, was successfully blasted in two and beached on the 13th instant.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Fall ploughing was interfered with by wet weather and heavy frosts.

*Lumbering.*—The large mills in the district have shut down; a few were unable to complete the cut. The demand for men for the camps continued active; a gang of 18 left in the early part of the month at \$35 per month.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers, masons, carpenters, joiners, plumbers and builders' labourers were busy. Lathers and plasterers were quiet.

*Metal, engineering and shipbuilding.*—Activity prevailed among iron moulders, iron workers, engineers, etc. Electrical workers were busy and linemen especially busy on repairs. Shipbuilders had a good month.

*Printing.*—Printers, pressmen and bookbinders were busy.

*Clothing.*—Tailors and garment workers were active. Boot and shoe workers were quiet.

*Food and tobacco preparation.*—Cigar makers were active.

*Leather.*—Quietness prevailed.

*Transport.*—Shiplabourers and long-shoremen were dull. Steamboat employees were being laid off for the winter. Other branches were quiet.

*Unskilled labour.*—The month was active.

### SHERBROOKE, QUE., AND DISTRICT.

*Mr. H. Logie, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Labour, especially in the machine shops, was not so well employed during

November as in October. This has been brought about to a large extent, by financial conditions. The iron industries of the city have found it necessary to lay off a number of hands, after reducing the hours of labour. The Rand Drill Company is now working 56 instead of 59, and the Jencks Machine Shop 55 instead of 56. This went into effect about the middle of the month. In one establishment alone about 35 hands have been dismissed with, while a smaller number has been dismissed in another large concern. This action has been brought about not by any lack of work but simply by the condition of the money market. All other industries were running full time, including the worsted, woollen and carpet factories. The open weather has enabled the building trades to be carried on with but slight interruption. The contract for the new drill shed, has been signed, and work will be begun shortly. The contract price is \$82,500. The custom duty collected at this port during October amounted to \$245,021.96, being an increase over the corresponding month of the previous year of \$6,756.17. Wholesale and retail trades have been well up to the average.

During the month a co-operative society was formed, composed chiefly of working men. A committee has been appointed to carry out the necessary arrangements for the opening of a co-operative store here.

The city council has withdrawn its offer to the Sherbrooke Power Light and Heat Company, and orders were given the special light committee to enter into negotiations with Messrs Ross and Holgate to prepare plans for the development of the power owned by the city at Westbury. The reason for the breaking up of the negotiations between the city and the company was that the directors of the latter would not call a special meeting until January to discuss the offer, and the city council held that they had waited long enough upon the company and if they delayed longer valuable time would be lost.

During the month the employees of the Paton Mill had their hours of labour reduced by three hours a week without

any change in wages. This factory now opens at seven o'clock in the morning instead of half past six. The Jencks Machine Co. and the Rand Drill Company now work 55 and 56 hours respectively as above stated, but as the employees are paid by the hour the reductions involve a decrease in wages. There has been no unrest among the working class.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The open weather has enabled farmers to complete their fall work without much interruption. Hay is very scarce, and is selling as high as \$16.00 and \$17.00 per ton. Good prices are also being secured for farm produce. Dairy butter is selling as high as 30c. and 32c. per pound, while creamery is a few cents higher. Eggs can only be secured at 35c. A movement is on foot to amalgamate about fifteen creameries in Stanstead and Sherbrooke counties. Application has been made for incorporation as a joint stock company to be known as the Eastern Township Dairy Produce Co. The three main points which the company aims at are: (1) Economy in production; (2) uniformity in quality; (3) improvement in quality, where such is possible. The company will be capitalized at \$90,000. Mr. E. W. Brewster, E. T. Immigration Agent, has left for Great Britain to secure help for the Eastern Township farmers. During the season at Quebec, Mr. Brewster placed 588 immigrants, as follows: 348 single men, 36 married men, 36 married women, 51 children and 17 single women, with 100 men for railway construction. In addition to the above, Mr. Brewster booked 224 in England last year.

*Lumbering.*—There has been a fairly good demand for men for the woods; wages rule about the same as last year.

*Manufacturing.*—Factories were running, with orders ahead.

*Mining.*—The local mines, i. e., small copper properties, are closing down for the winter, but the large mines at Capleton and Eustis, and the asbestos properties are running full time.

*Railroad construction and employment.*—It is understood that the G. T. R. will lay

double tracks between Sherbrooke and Lennoxville in the spring. This is a congested piece of track, as the B. and M. have running power over the G. T. R. between these points.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—All branches were fairly active. The large contracts started in the summer are now nearing completion, and not much new work will be started before spring.

*Metal.*—These trades were quiet, as firms were reducing expenses owing to the condition of the money market. There were orders ahead in all the shops, and when the stringency is passed, full time will be resumed.

*Woodworking.*—These trades were active. Carriage and wagon workers were busy.

*Printing and allied.*—Printers, pressmen and bookbinders were quiet.

*Clothing.*—Journeymen tailors and garment workers were active.

*Food and tobacco preparation.*—Bakers and confectioners were quiet. Butchers and cigarmakers were active.

*Miscellaneous.*—Barbers, clerks, delivery employees, hotel and laundry employees were active.

*Transport.*—All branches were active.

*Unskilled labour.*—This class was in good demand for the season.

#### DISTRICT NOTES.

*Brompton Falls.*—Work in the O. M. R. will be commenced this fall.

*Eastman.*—The C. P. R. still has a large gang of men repairing the track between the village and Eastman Junction, and intend taking up the old rails and putting down heavier steel.

*La Patrie.*—Preparations for the lumber season were under way in this section. The scarcity of hay is perhaps the most serious problem which faces farmers and lumbermen. The ruling price now is about \$17 per ton, with very little available. Some farmers are selling off their stock rather than buy hay at the present advanced price.

### THREE RIVERS, QUE., AND DISTRICT.

*Mr. Jos. J. Ryan, correspondent* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market has been very active, finer weather than in October prevailing. Lumber mill owners have succeeded in sawing most of their logs, and there are only about 125,000 left in the Government booms. All mills are now closed for the winter. Unskilled labourers were in great demand till the last week of the month, and were scarce until the lumber mills closed down. All factories have been working full time except the boot and shoe factory, which was not as active as in previous months. There has been over 100,000 tons of coal unloaded here during the navigation season, which is now closed. Wholesale and retail trade had a fair month. There have been no changes in rates of wages, and the best of feeling has prevailed between employers and employees.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—There was not much employment among the farmers.

*Fishing.*—Hardly any fishing was done.

*Lumbering.*—Shipping for local, and neighbouring districts was active, but there was very little export trade.

*Mining.*—The Northern Aluminum Co. of Shawinigan Falls ceased operations. About six hundred hands were employed.

*Manufacturing.*—There are still over two hundred and fifty men employed on the construction of the new cotton factory.

*Railway construction.*—The C. P. R. is still unable to supply the necessary empty cars to the shippers of this district. The Great Northern and the Transcontinental have kept large numbers of men working on their new road in the county of Portneuf, in the parish of Deschambault.

### CONDITION OF PARTICULAR TRADES.

The building trades had a busy month, but metal workers were quiet, though electrical workers, linemen and blacksmiths were active. Woodworkers had plenty of work, and carriage and wagon-makers were busy. The printing and clothing trades had a fair month, and miscellaneous employees were all working. Transportation employees were very busy. Unskilled labour became dull in the closing week of the month.

### ST. HYACINTHE, QUE., AND DISTRICT.

*Mr. V. Phaneuf, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

There was not much change in the condition of the labour market in November as compared with the preceding month and the month of November, 1906. The building trades were very quiet. Several residences have been completed, and others repaired or improved. The city council has begun negotiations with an American company which desires to start a factory for the manufacture of asbestos. Sash and door factories, boot and shoe factories, the woollen factory, tanneries, and the organ factory were very active. The iron industry was very busy, with a demand for skilled hands. Unskilled labour was well employed owing to the fine weather. The work of widening the Grand Trunk Railway bridge for a double track was commenced. It was rumoured that several new factories would be established shortly. Rents and provisions were very high. Bakers, during the month, increased the price of the six-pound loaf from 16 to 18 cents. Milk was increased from 5 to 7 cents a quart. Wholesale and retail trade was good. The trade in furs was very active. The Eastern Clothing Company was very busy, with many orders on hand. This company employs regularly 120 workpeople in its factory and a large number of others at home. A

ladies' garment factory was also in active operation. Bookbinding establishments were very busy, night work being necessary. Banks reported easy collections and a good volume of business. There were no changes in wages and no strikes or lockouts during the month.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture*.—Conditions were very good. Farm produce sold readily, and at good prices compared with those of last year. There was, however, no demand for farm hands. Dairy products were very high in price, as was poultry of all kinds. The re-opening of the classes at the St. Hyacinthe Dairy School will take place on December 2nd.

*Manufacturing*.—All industrial establishments were in full operation, with full staffs and plenty of orders ahead.

#### CONDITION OF PARTICULAR TRADES.

*Building*.—With the exception of painters, plumbers and gas and steamfitters, who were fairly active, these trades were dull.

*Metal, engineering and shipbuilding*.—Iron moulders, iron workers and helpers, machinists and engineers worked full time. Blacksmiths, horseshoers and boilermakers had an active month. Electrical workers were busy.

*Woodworking and furnishing*.—Activity prevailed.

*Printing*.—Conditions were favourable, there being an abundance of work.

*Clothing*.—Garment workers reported the usual fall activity. Boot and shoe workers were very active.

*Food and tobacco preparation*.—Bakers, confectioners and tobacco workers were fully employed.

*Leather*.—Exceptional activity was reported.

*Miscellaneous*.—Barbers, clerks, delivery employees, hotel, restaurant and laundry workers were very busy.

*Transport*.—Freight and passenger traffic was very heavy.

*Unskilled labour*.—Active conditions prevailed, and the quiet season for these workers will commence later than in past years.

#### DISTRICT NOTES.

*Sorel*.—The by-law granting certain privileges to Messrs. Duhamel and Bros. for the erection of a boot and shoe factory was passed. The building of the new factory was commenced. It will be of solid brick, 60 x 35 feet, with basement and foundations for heavy machinery. In return for a 20 years' exemption from taxation, the company guarantees to keep the factory running continuously and to pay at least \$8,000 in salaries yearly. The Sorel Novelties Company, recently established, was in full operation. The tug "Corinne," which sank in Lake St. Peter after collision with the "Jessie Hume" has been floated and brought to Sorel for repairs.

*St. Johns*.—The progress of this city may be judged by the fact that there still remains \$170,300 worth of new buildings to be completed, notwithstanding the fact that 29 constructions costing \$44,600 were completed in 1907. The most important of the buildings yet to be finished are a military school, a post office, a chapel and school, a large hotel, and new electric power stations. The total population is at present 6,410 souls, of which 5,409 are French-Canadians. The total monthly salary of residents of St. John is \$67,819.57, but this total will show an increase if the wages paid those belonging to Iberville, who work in St. Johns, are taken into consideration. There are 565 houses in the city. Since three years, there has been expended in new buildings and in repairs the sum of \$454,533. This amount does not include the Singer Company's workshops, which alone cost over \$1,000,000. St. Johns has several other large manufacturing establishments, and five banks have branches there. Five railways run through the city, and it has 13 hotels for the accommodation of the travelling public. Business in the port has doubled within the past three or four years, and trade with the United States is rapidly increasing. The manager of the Bell Asbestos Company of Ambler, Pennsylvania, has informed the city council that his company will establish at St. John a large factory for the manufacture of asbestos, and has asked for certain privileges.

### MAISONNEUVE, QUE., AND DISTRICT.

*Mr. E. Pelletier, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Activity in the labour market decreased during November, some large establishments having reduced their staffs.

The Bradham White Lead Company, of London, Eng., is building a large factory in the town of St. Louis du Mile End. This factory when completed will give employment to over 600 men.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—The trades were not so well employed as in the corresponding month of last year.

*Metal, engineering and shipbuilding.*—These trades were well employed, with structural iron workers very active.

*Woodworking and furnishing.*—Upholsterers and wood carvers were very busy, the other branches being well employed.

*Printing.*—Activity prevailed.

*Clothing.*—Owing to autumn trade opening earlier, the clothing trades have been busy, with boot and shoe workers active.

*Leather.*—Active conditions were reported.

*Miscellaneous.*—Delivery employees, hotel, restaurant and theatre employees were busy.

*Transport.*—The close of navigation has slackened employment in the transportation trades, but cab drivers, hackmen, carters, street railway employees, teamsters and expressmen were active.

*Unskilled labour.*—The market was overcrowded, no demand for this class existing.

### MONTREAL, QUE., AND DISTRICT.

*Mr. G. Audet, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Building operations during October were very active. The value of new

buildings for which permits were granted was \$998,159, whereas in October, 1906, it was \$560,925. The permits for repairs amounted in October to \$93,165; in October, 1906, they amounted to \$32,820. The most important permit of the month was that granted for the erection of the new post office, valued at \$487,537. The permits for the month were divided as follows: 118 residences, 1 warehouse, 2 factories, 1 stable, 19 sheds and 1 public edifice. The water works department purchased three new boilers for the lower pumping station at a cost of \$13,939. According to the report of the superintendent of the fire alarm system, there was an increase in the number of fires and in the number of alarms as compared with October of last year. The total customs receipts on imports in the port of Montreal during October, 1907, was \$1,458,420.46, compared with \$1,326,522.72 in the corresponding month of 1906, or an increase of \$131,897.74. From May 1, 1908, the water rate which was 7½ per cent. of the rental value, will be reduced to 5 per cent. The city will lose by this change \$174,000 a year, but will remain with a balance on hand of \$230,000. When administrative expenditure is subtracted there will remain a surplus of \$58,000. The public hospitals will each pay a uniform tax of twenty-five dollars for their water. Tax exemptions in 1903 were \$40,000,000; to-day they are \$54,438,670, or an increase of over \$14,000,000. The confectioners of Montreal have decided to increase the cost of product 10 per cent. from December 9th. The cause is the fact that flour has increased by \$1.50 per barrel, butter by 10 cents per pound, lard by 3 cents per pound, eggs by 5 cents per dozen and wages by 33 per cent.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Activity was reported in all branches.

*Metal, engineering and shipbuilding.*—Steam engineers, stove mounters, horse-shoers and jewelers were active. Iron moulders, iron workers, machinists, electrical workers, linemen, blacksmiths, boilermakers sheet metal workers and tool sharpeners were busy. Shipwrights and caulkers were dull.

*Woodworking and furnishing.*—Hands were well employed.

*Printing.*—Printers, pressmen, book-binders, etc., were very busy.

*Clothing.*—Glove makers were very active. Boot and shoe workers had fair employment.

*Leather.*—Activity prevailed.

*Miscellaneous.*—Furriers were very active and in great demand. Clerks delivery employees, hotel, restaurant, theatre and laundry workers were active.

*Transport.*—Street railway employees were active. Cab drivers, teamsters and expressmen were busy. Steamboat men and longshoremen were dull.

#### DISTRICT NOTES.

*Ville St. Louis.*—The monthly report of the building inspector shows the following new buildings for the month of October, 1907:—2 shops and 100 new residences. The total value of permits granted was \$166,909.

*Lachine.*—The English company which purchased the Johnston farm will not commence building until next spring, when a large steel plant will be constructed. The town of Lachine voted \$50,000 and a 20 year tax exemption in return for the works, the company guaranteeing to build a steel plant worth \$250,000 and to employ 500 hands at the end of the first year, 1,000 at the end of the second and 1,500 at the end of the third year.

#### HULL, QUE., AND DISTRICT.

*Mr. Rodolphe Laferrière, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Notwithstanding the closing down of some sawmills during November the market for labour was busy at the end of the month. Saw-mills at Hull, Des-Chênes, Aylmer, Buckingham, and Templeton closed down on the 29th and 30th of the month, about a week later than last year. Contrary to press reports, the cut of the season was above the average

and shipping more active than last year. There was no apparent falling off in the production of factories, employers now being able to obtain an abundance of hands, owing to the closing of the saw-mills. Some new factories started operations and others are proceeding towards completion. There was, however, a marked tendency to lower the wages of common labourers, mica girls and shantymen. The reduction of the wages of labourers was the usual one in winter, and represented about ten per cent.; that is, men receiving \$1.50 per day formerly are now paid \$1.35 per day. The decrease in wages among mica girls was due to the stringency in the American market, local firms either reducing their staffs or the wages of their employees. The decrease among shantymen was due to the fear of unfavourable conditions in the English market next year. Wages in this industry were exceptionally high in August and September last, but they dropped in November. Labourers for outside work at Eddy's were satisfied to accept \$1.35 per day and there were plenty of hands available. The Laurentides Mica Company laid off about two thirds of its staff, or about 200 girls. The General Electric Company, rather than dismiss its staff, imposed a reduction of four cents per pound on mica, that is, the girls will cut and trim the mineral for 12 cents instead of 16 cents per pound. Shantymen who commanded from \$30 to \$35 per month and board in the early fall were only offered in November \$1.00 per day, or \$26 per month, and labour was abundant. Cooks who were paid \$50, now obtain \$30. J. R. Booth, who did not hire in the early fall, owing to the high wages, closed down his large saw-mills, both day and night shifts, on November 28th and the following day sent 700 men to his shanties. There were no prospects of reduced activity in the Eddy or Booth industries, the two main sources of employment in Hull. J. W. Woods' new factory started operations in the closing days of the month, with a moderate staff, which will be increased as the moving of the plant from Ottawa progresses. Shantymen's supplies are being manufactured there and about

50 girls are already at work; these will be increased to 200 in December. The new factory is of solid brick, five stories high, 180 x 90 feet in size. Exemption of taxation for ten years has been granted. Several private cottages will be built for the use of employees in the vicinity. It was stated that the company would utilize the balance of the ten acres of land owned by it for mills for the refining of precious metals for the Canadian mint.

### OTTAWA, ONT., AND DISTRICT.

*Mr. W. Gilchrist, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Towards the end of November, a marked falling off occurred in the demand for men in the woods. Lumber manufacturers decided to curtail logging operations by about 25 per cent. owing to the high wages and excessive price of supplies. Wages for head log-makers have dropped from \$35 per month to \$30-\$32. There has been a corresponding decrease in the wages of other classes, and ordinary hands are not offered more than \$24 per month. Men are plentiful but there is no evidence that there will be much unemployed labor during the winter.

The building trades have continued more active than usual this autumn. Many carpenters were employed on inside work, and plumbers, painters and plasterers were fairly busy. The W. C. Edwards Company has a large staff employed on its new sash and door factory, which it hopes to have in operation in another month. Construction is going ahead actively on J. R. Booth's new sulphite mill in order to have it finished by spring. The Grand Trunk Railway Company has 50 men employed on preparatory work for the new central station. Altogether it is estimated that building operations for the season will surpass two million dollars, or an increase of over 10 per cent. compared with last year. The sum includes many fine dwellings;

there would have been more of these, had it not been for labour troubles during the early part of the summer and tight money at the close.

The village of Ottawa East voted in favor of annexation to the city on terms of a fixed assessment for eight years. Arrangements are being made to have the village annexed on December 16.

Negotiations are nearing completion for an equal division of the Chaudiere water power between the holders on either side of the Ottawa river. The contract will necessitate the building of a new dam across the Chaudiere.

The James W. Woods, Limited, clothing and tent manufacturers of Ottawa, will remove its industry from Ottawa to Hull early in December. Nearly 200 hands are employed in the factory.

Twenty-four sheet metal workers of Ottawa have decided to form an international union and have made application for a charter.

Dating from November 1st, twenty-five pressmen, press feeders and bindery workers employed by the Ottawa Free Press had their hours reduced from 54 to 48 per week by voluntary concession.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Owing to a scarcity of fodder many farmers sold stock rather than incur the expense of feeding them through the winter. As a result beef and pork on the local market declined slightly in price during the latter part of November. Remarkably high prices prevailed for dairy produce, hay and grain.

*Lumbering.*—The demand for lumber was quieter, but the outlook is that stocks will be well broken up by the end of the season. Shipments by water from Ottawa were a little less than last year, owing chiefly to the late start of the mills. The best grade of shingles and medium grades of pine and spruce are nearly sold out.

*Manufacturing.*—Manufacturers of leather goods reported less activity than usual owing to a decline in orders from the North-west.

## CONDITION OF PARTICULAR TRADES.

*Printing.*—These trades were busy.

*Clothing.*—Business was quiet.

*Leather.*—Some hands have been laid off owing to decline in trade.

*Miscellaneous.*—Business is active with hotels and restaurants and extra help has been engaged.

*Transport.*—Telegraphers are plentiful. Workers on the Rideau Canal finished for the season on November 28, about the same date as last year. Some spare men on the electric railway have been laid off till spring, but the regular staff was busy as usual.

## KINGSTON, ONT., AND DISTRICT.

*Mr. Wm. Kelly, correspondent,* reported as follows:—

## GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market was fair during November. As compared with last month and the corresponding period of last year there was a slight falling off in some lines, notably the building trades and corporation labour. Merchants, bankers, etc., reported a slight diminution in the amount of business from various causes, but it is expected that the Christmas trade will make up the difference, owing to the return of a large number of mechanics, marines, etc. There were no new strikes, lockouts or changes in wages or hours during the month. There were no new developments in connection with the tailors' strike. During the month a proposition was placed before the employees by the employers, but this was not satisfactory. The strike pay is coming regularly, and the tailors continue to meet twice daily. The employers claim that their work is going on satisfactorily.

On the 27th of the month two of the striking tailors were charged with having intimidated three tailors who had taken their places, by using threatening language toward them; on the 28th they had a hearing before the police magistrate, who, after hearing the evidence, imposed

the maximum penalty of \$100 fine or one month in jail. The city is negotiating for the purchase of quarry lots so as to have its own stone supply for the building and repairing of the streets next year. The quarries, if purchased, will give employment to a number of men this winter. The purchasing of these lots depends upon the passing of a \$12,000 by-law to be submitted to the electors in January next. Only about \$5,000 of the city's taxes remain uncollected. It is expected that next year the taxes will amount to about \$6,000 more than those of the present year.

Under civic management a 10% reduction in general household water rates will be made, and the rates for baths and closets will be considerably lowered. The minimum household rate hereafter will be \$3 per year. This is the fifth reduction made since the city took over the plant. The city council is petitioning the legislature for the repeal of section 25 of 1 Edward VII, as it is of the opinion that the size of a loaf of bread should be entirely within the control of the municipalities, as it was prior to the passage of the section noted. The bakers, of course, will fix the price according to the cost of production from time to time.

## CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Conditions were quiet.

*Fishing.*—Somewhat active conditions prevailed.

*Lumbering.*—This industry was somewhat dull.

*Manufacturing.*—Active conditions prevailed. The locomotive works were very busy. An order was recently received for the supplying of four engines for the Prince Edward Island narrow gauge railway. These and other orders are being rapidly filled. Other industrial establishments continued active.

*Mining.*—Very active conditions prevailed.

## CONDITION OF PARTICULAR TRADES.

*Printing.*—Active conditions prevailed.

*Food and tobacco preparation.*—Bakers, butchers, and cigar makers were active.

*Leather.*—Tanners and curriers continued busy.

*Miscellaneous.* — Furriers, broom-makers, laundry workers, etc., were active.

*Transport.*—All branches continued active. The marine season, now drawing to a close, has been a most successful one. There has been plenty of work and very few mishaps have occurred. Many sailors have arrived home, and the work of laying up the various crafts has already commenced.

*Unskilled.*—This class is not in great demand at present. The large influx of emigrants has caused a depression, but some are leaving for other parts.

#### BELLEVILLE, ONT., AND DISTRICT.

*Mr. H. C. MacDiarmid, correspondent,* reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

The month of November was an exceptionally favourable one for almost every branch of labour, and as a result there were few out of employment, despite the fact that within the past year the population has increased over 500. Unskilled labour was in brisk demand and the wages offered were high. The demand came principally from the two big cement plants, a few miles east of the city, which found it difficult to secure sufficient help. Nearly 1,000 men are employed at these places. The Belleville rolling mills ran continuously day and night with a full force of both skilled and unskilled men; the fortnightly payroll of this industry is very large and its effect on business is appreciated by the merchants. Work on the premises of the new Brass and Steel Company is about completed; it gave employment to a large number of stone masons, bricklayers and carpenters. A large number of mechanics were employed in the construction of the new hotel St. Roman, which is expected to be completed about the first of the coming year. The iron

industry had an active month, all workshops, foundries and machine shops working full time. A large number of men were engaged rebuilding the city gas plant, which was recently destroyed by fire. Building operations on the Government drill hall closed down for the season; this put a number of workmen out of employment for a short time, but many of the bricklayers went out to Corbyville, where a large distillery is being built. The Cheese Board closed down this month. This season's cheese prices were the highest in years. Banks reported money coming in freely, and no stringency has been felt in this section. The apple crop was large and brought in a lot of money. Retail and wholesale merchants reported an active month's business. There were no strikes or lockouts during November.

##### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—All cheese factories were running during the month. Cheese Board prices averaged over 12 cents per lb; butter remained at 27 to 30 cents a lb; and eggs the same per dozen.

*Fishing.*—Active conditions prevailed. Herring were very plentiful, selling wholesale at \$1.50 per hundred. A large number of men were engaged. Several million whitefish were secured for the Dominion Government hatchery at Sandwich.

*Lumbering.*—This industry is becoming less active.

*Manufacturing.* — Activity prevailed in nearly all branches.

*Mining.*—Conditions were very active in North Hastings, where a couple of new mines were opened up. A large quantity of talc was shipped from the mine near Madoc to the United States.

*Railroad construction and employment.* The Central Ontario Railway Company has completed its line as far as Maynooth, a distance of sixteen miles from Bancroft, the former terminus. The extension of this line will be continued in the spring.

##### CONDITION OF PARTICULAR TRADES.

*Building.*—All branches had an excellent month. Weather conditions

could not have been better for outside employment.

*Metal, engineering and shipbuilding.*—Iron moulders, helpers, brass moulders, machinists, foundry blacksmiths and boilermakers were active. Electrical workers and engineers were well employed. Hoseshoers had an active month.

*Woodworking and furnishing.*—Woodworking and furnishing establishments were very active during November, many orders being filled for outside points. The big increase to the population is creating a large demand for furniture of all kinds. Coopers were busy making cheese boxes and apple barrels.

*Printing.*—Printers, pressmen and bookbinders had an active month.

*Clothing.*—Journeymen tailors and boot and shoe workers were active.

*Food and tobacco preparation.*—The price of bread was advanced to 12 cents for a three pound loaf on the first of November. So many patrons started to bake their own bread that the price was reduced to 10 cents. Butchers had an active month, also cigar makers.

*Miscellaneous.*—Barbers, clerks, delivery employees, furriers, hotel and theatre employees, and laundry workers had an active month.

*Transport.*—Steamboatmen of all classes were actively employed. A large amount of freight was handled. Railway men were generally well employed. Cabmen, carters and draymen reported a busy month.

*Unskilled.*—This class was in demand at good wages.

#### PETERBOROUGH, ONT., AND DISTRICT.

*Mr. W. J. Johnston, correspondent,* reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

Labour during November was fairly active, though a number of workmen were out of employment. Most mechanics were fairly well employed. The

general outlook for the winter, so far as outdoor work is concerned, is not encouraging. A number of men will be employed completing the interior work of unfinished buildings. Sewer work is still under way. Dredging, also, is giving employment to a number of men. The Water Commissioners are laying water mains on some of the city streets. The Bell Telephone Company is putting its wires underground. A few permits were issued for the erection of dwellings, and a number of buildings are under construction to be completed by the end of the year. Railway transportation was very active. Banks reported steady business, and wholesale and retail trade was active. Wages remain unchanged, and the labour market was free from unrest.

##### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Threshing, hauling grain to market and fall ploughing furnished the chief occupation.

*Lumbering.*—Busy conditions prevailed.

*Manufacturing.*—This industry experienced a busy month.

*Mining* was dull.

##### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers, masons, carpenters, joiners, lathers and plasterers, painters, decorators and paperhangers, and plumbers were busy, with gas and steamfitters, stonecutters and builders' labourers active.

*Metal, engineering and shipbuilding.*—Iron moulders and helpers, machinists and engineers, steam engineers, electrical workers and linemen, brassworkers and shipworkers were busy, also sheet metal workers. Blacksmiths, tool sharpeners, horseshoers and jewellers were active, but boilermakers and bicycle workers were somewhat dull.

*Woodworking and furnishing.*—Woodworkers, upholsterers, varnishers and polishers, and carriage workers were active, car builders experienced dullness of employment, while pattern makers were active and coopers busy.

*Printing.*—The allied trades were active, but not so active as last year at this season.

*Clothing.*—Journeymen tailors and garment workers were active. Hat makers were dull and boot and shoe workers busy.

*Food and tobacco preparation.*—Bakers, confectioners, butchers and meat cutters were busy, cigar makers, etc., active. Ice-handlers had a poor month.

*Leather.*—Busy conditions prevailed.

*Miscellaneous.*—Active conditions prevailed with barbers and broom makers. Other trades under this heading were busy.

*Transport.*—Busy conditions prevailed in all railway branches. With steam-boat employees dull conditions prevailed towards the latter part of the month. Street railway employees, cabmen, hackmen, carters and draymen were active.

*Unskilled.*—This class was well employed.

DISTRICT NOTES.

The Cheese Board at its last meeting sold 2,840 boxes at 12-13-16 cents per lb. The total number of boxes sold during the past year was 41,118, netting \$400,000. The average price per lb. was 12 cents. Market prices of various kind of produce were as follows:—

Hogs, live.....	\$ 5.25 cwt.	
“ dressed.....	7.50 cwt.	
Hay.....	18.00	\$20.00.
Hay baled.....	20.00	\$22.00
Straw.....	6.00	\$ 7.00 a load.
Potatoes.....	.80	per bag.
Apples.....	.50 to 1.00	per bag
Chickens.....	.70 to .75	pair
Geese.....	.90 to 1.00	each
Ducks.....	.80 to 1.00	pair
Turkeys.....	1.00 to 1.50	each.

General stores in the district reported a steady trade. Grist and sawmills were becoming slack.

*Campbellford.*—Good headway is being made with improvement work on the canal.

*Lindsay.*—The Machine Telephone Company is busy installing underground work.

*Cobourg and Charlotte.*—The large car-ferry has been placed in commission. The boat is 317 feet long, 56 feet beam and 37 feet from top deck to keel, fitted

with twin screw expansion engine, developing 3,000 indicated horse-power, averaging 15 miles per hour. It will carry 25 loaded cars and 250 passengers, with a loaded draught of 15 feet. It is intended to carry coal north and lumber south. It cost \$375,000.

*Cavan Swamp.*—Work on the drain has been suspended, about one half being done.

TORONTO, ONT., AND DISTRICT.

*Mr. Phillips Thompson, correspondent,* reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The prevailing financial stringency has unfavorably affected industry, and a large number of skilled mechanics in various lines were laid off. Conditions were less favourable than during October. While with one or two exceptions no large establishment has entirely closed down, the tendency towards retrenchment and reduction in working forces has been very general. This fact coupled with the influx of surplus farm labourers and men employed during the summer on other outside work indicates that there is likely to be much lack of employment during the coming winter. At the annual meeting of the Associated Charities on Nov. 18th, the Secretary stated that extensive demands upon the funds would be made. It was asserted that all the charitable institutions were full, while there were many additional applications for assistance. Prof. Goldwin Smith forwarded a check for \$1,000. A large number of recent immigrants are returning to their former homes.

The number of building permits issued in October was 334, representing an approximate value of \$776,555, as compared with 570 permits, representing \$1,536,595, in October, 1906.

The receipts of the Toronto Railway for October were \$294,394, as compared with \$271,104 for October, 1906.

A by-law to provide for the raising of \$2,500,000 for the establishment of a

civic electric power and light distribution plant will be submitted to the vote of the ratepayers on January 1st. The estimate of the amount required is based on the receipt of about 12,000 h. p. with a possible increase to 20,000 h. p.

The T. Eaton Co., will enlarge its department store by erecting two additional storeys on the new portion of it, making it eight storeys high, at a cost of \$55,000.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The farmers were mainly occupied with fall plowing and the marketing of produce, the fine weather during the greater part of the month being favorable for outdoor work. The root crops are all stored and it is anticipated that there will be plenty of coarse feed for stock.

*Manufacturing.*—The manufacturers as a rule are simply filling orders and not making goods for prospective trade owing to the tightness of money and the uncertainty of the situation.

Though the present difficulty is regarded as only temporary, the conservative policy of the banks in restricting accommodation has enforced retrenchment in all lines of production and throws many men out of work. The shipyard of the Canadian Shipbuilding Co., which had been gradually decreasing its force for some time, was closed down for the winter early in the month. The American Abell Engine & Thresher Co., employing 500 men, closed down in October, as is customary, for stock taking and repairs, and will not be reopened until the New Year, when a smaller force will be employed. The E. N. Dart Manufacturing Co., of Providence, R. I., manufacturers of gas fixtures, etc., will establish a branch factory. Lever Bros., soap manufacturers, will erect a large addition to their present buildings to cost \$45,000. Frank H. Fleer & Co. will erect a chewing-gum factory on Sterling Road at a cost of \$65,000. Work has been begun on the new factory of the James Morrison Brass Manufacturing Co.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—The building trades have been slack with a large proportion of men out of work. Weather conditions were for the most part favorable and work more continuous than usual at this season for those having employment.

*Metal, engineering and shipbuilding.*—These trades were generally quiet with many out of work. Brass workers were better employed than other lines. A number of jewellers and silversmiths have been laid off.

*Woodworking.*—Furniture workers, cabinet makers and upholsterers found trade quiet. Carriage makers were slack. Coopers fairly well employed. Piano-workers reported a number out of work.

*Printing.*—Printers and bookbinders found trade dull with a number unemployed.

*Clothing.*—Journeymen tailors and garment workers were not so active as in October. Furriers had a good month. Hat and cap workers and boot and shoe workers were fairly well employed.

*Food and tobacco preparation.*—These trades had for the most part steady work.

*Leather.*—Saddlers and harness makers had a quiet month with many men laid off.

*Miscellaneous.*—Hotel and restaurant employees, laundry workers and barbers were fairly well employed. Clerks, salesmen, stenographers and those engaged in light occupations were much in excess of the demand.

*Transport.*—Railway and street railway employees, expressmen and teamsters were generally well employed. Men engaged in connection with navigation have mostly been laid off.

*Unskilled labor.*—A large number were out of employment.

#### NIAGARA FALLS, ONT., AND DISTRICT.

*Mr. Ernest Green, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The financial and industrial depression was plainly felt in this district in No-

vember. There were many more unemployed than in October, and more than at this season in any of the previous four years. There was little demand for labor and no indications that there will be any greater demand during the coming winter. Several new factories now being erected will not be in operation before spring. Factories in operation had all the employees at present required. Sewer building will be concluded in December. Large numbers of unemployed from the United States enter Canada here and the labor market was consequently glutted with men of every trade. Business was light on all lines of railways, but at the close of the season lake navigation was busy. Money was scarce and rates high, but local financial and commercial houses appeared to be holding their own. Another branch bank was opened in the city.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Fall plowing and apple shipping ended agricultural operations for the year.

*Fishing.*—Fishing in the lakes was very good.

*Manufacturing.*—Local factories were all running with full staffs, but some were busy on holiday orders and may reduce their output in December. Others report fewer orders than at this time last year, but some expect to run to full capacity all winter. The Ontario Power Company began to operate the fifth unit of its plant and will have the sixth running early in 1908. This will complete the equipment of the present power house. Each unit has a capacity of thirteen thousand horsepower.

*Railroad construction.*—The Buffalo, Niagara & Toronto railway closed purchases of lands for a right of way from Falls View to Stanford, but no announcement of railway construction was made.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons were busy on new factories, but work will close in December. There were a number of idle carpenters. Lathers, plasterers, painters and stonecutters

were quiet and builders laborers very quiet. Plumbers and gasfitters were active. The opening months of 1908 will probably be dull in the building trades here.

*Metal.*—Foundry men were active, but machinists, engineers and electrical workers were quiet.

*Woodworking.*—Coopers were busy for a short time, but were quiet at the end of the month.

*Printing.*—Business was steady but not particularly active.

*Food and tobacco preparation.*—Fruit and vegetable canneries completed the season's work and discharged many employees. Evaporators were busy.

*Miscellaneous.*—Retail clerks and stenographers were active, with hotel and restaurant business very quiet.

*Transport.*—Freight traffic on railways was light and showed little improvement as lake traffic decreased. Regular employees were all working, but no extra men were engaged, though many sought railway employment. Steamboat men were being laid off for the winter. Electric railways reduced the number of employees to suit winter schedules. Hackmen were quiet, but draymen and teamsters were active.

*Unskilled labour.*—There was little employment.

#### DISTRICT NOTES.

*Fenwick.*—Sixty hands were employed at the evaporator.

*Bridgeburg.*—Only fifteen men were working at the shipyards. A new "pure food" factory is to be built.

*Niagara-on-the-Lake.*—The cannery was busy. Outlook for the winter is dull.

*Ridgeville.*—A site was purchased for a fruit cannery to be erected next year. It will employ 100 hands.

*Port Colborne.*—The traffic on the Welland canal during the closing weeks of the season of navigation was very heavy. Good progress was made on the new grain elevator now being completed.

*Welland.*—Local industries were all prosperous. M. Beatty & Sons, engine and machinery builders, will increase their capital stock.

## ST. CATHARINES, ONT., AND DISTRICT.

*Mr. James A. Wiley, correspondent,* reported as follows:—

## GENERAL CONDITION OF THE LABOUR MARKET.

November was not characterized by the busy conditions that have prevailed in previous months of the year, and one or two industries have laid off hands owing to shortage of orders due to the stringency of the money market. With these exceptions, labour was well employed, and confidence is felt for a speedy return of activity. Municipal improvement work, railway construction, etc., were completed for the year. Business was reported good.

## CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The fruit growing industry has increased from year to year until it is estimated that there are 10,000 acres in the Niagara Peninsula devoted to the growing of fruits. The prices prevailing this year for choice Canadian fruits and the supply shows the possibilities for this industry. The Niagara district growers have increased the yield by better tillage and the introduction of better varieties. That good returns for their labour is received may be gathered from the fact that whereas the average wheat crop produces \$30.00 to the acre, tomatoes yield all the way to \$100.00 per acre. This year there were canning and preserving companies that hardly got the amount of fruit that could have been used, and several additional concerns are projected. Quality is the great consideration, and with strict attention to prompt marketing, high prices and ready sales, the farmer and fruit grower has much to encourage him.

## CONDITION OF PARTICULAR TRADES.

*Building.*—These trades though not so busy as in former months were active.

*Metal.*—All branches were with few exceptions well employed.

*Woodworking and furnishing.*—Woodworkers, upholsterers, varnishers, polishers and carriage and wagon makers were active.

*Printing and Allied.*—Printers, pressmen, machine hands and bookbinders were active.

*Clothing.*—Journeymen tailors and boot and shoe workers were busy.

*Food and tobacco preparation.*—Bakers and confectioners, butchers and meat cutters, cigar makers and tobacco workers were active.

*Leather.*—Tanners, curriers and leather workers were active.

*Miscellaneous.*—Barbers, clerks, stenographers, delivery employees, furriers, hotel and restaurant employees and laundry workers were active.

*Transport.*—All branches were busy with a good volume of trade.

*Unskilled labour.*—This class was quiet, with the supply more than equal to the demand.

## DISTRICT NOTES.

*Thorold.*—The labour market was satisfactory. Good headway was made on waterworks construction, and work was begun on the new electric light water works power station.

*Port Dalhousie.*—The labour market was active. The Maple Leaf Rubber Works were advertising for help.

*Merritton.*—All the mills and factories were running full time, with labour well employed.

*Ridgeville.*—The Canadian Cannery, Limited, has purchased six acres of land and will build a \$10,000 factory, and cottages for the employees. The works will employ seventy-five women and twenty-five men and the plant is to be ready for operation by next summer.

## HAMILTON, ONT., AND DISTRICT.

*Mr. S. Landers, correspondent,* reported as follows:—

## GENERAL CONDITION OF THE LABOUR MARKET.

Towards the end of the month labour was not very well employed, many

workmen in the large industries being laid off, while there was a slackness in most of the trades. Wholesale and retail trade so far has not been materially affected. Bank clearings and transportation were but slightly below the average. There was but one dispute, that among the barbers, who desired to shorten the Saturday workday. The effort met with opposition and a number of men were called out in certain of the shops.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The fruit crops for the season just closed were plentiful and brought fair prices.

*Manufacturing.*—This industry has been fairly active, notwithstanding the number of men laid off, especially in the iron branches.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Building operations have fallen off in comparison with previous months. Many men were out of employment. Bricklayers and carpenters were less actively employed than formerly, but plumbers, painters, lathers and plasterers had fair employment.

*Metal.*—Employment with stove and machine moulders, stove mounters, machinists, etc., was fair; with metal polishers and jewellers active, and with horseshoers somewhat slack. Blacksmiths had only fair employment.

*Woodworking and furnishing.*—Woodworkers, pattern makers, and coopers had active employment.

*Printing.*—Employment was active.

*Clothing.*—Journeyman tailors and garment workers found work somewhat slack, and boot and shoe workers were only fairly active.

*Food and tobacco preparation.*—Employment was active with bakers and butchers, but only fair with cigarmakers and tobacco workers.

*Leather.*—Workers on leather goods and harness workers were fairly well employed.

*Miscellaneous.*—Employment with bakers was only fair, owing to the difficulty concerning the shorter hour day on Saturday. Broommakers were actively employed and laundry workers fairly so.

*Transport.*—Electrical and steam railway employees had fair employment. Steamboatmen, longshoremen, etc., were somewhat slack.

*Unskilled.*—Slackness prevailed.

#### DISTRICT NOTES.

*Dundas.*—Labour and business conditions slackened somewhat in the various industries towards the latter part of the month. Wholesale and retail trade, bank clearings, etc., were fairly satisfactory. Construction work on the Hamilton and Brantford Electrical Railway is progressing, a number of unskilled men being employed.

#### BRANTFORD, ONT., AND DISTRICT.

*Mr. J. C. Watt, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Labour was not so well employed in November as in the preceding month, nor did the month compare favourably with the corresponding month of last year. The building trade was exceptionally busy for the season. Some of the factories were busy, but others were somewhat slack, and a number of men were laid off for an indefinite period. A number of workmen have left the city. In two of the factories the wages of unskilled labourers were reduced from \$1.50 to \$1.35 per day; about 58 men were affected. The reason given for the reduction was that the supply exceeded the demand. A number of labourers are still receiving \$1.50 per day, those affected by the reduction being of the lower grades. Merchants had a satisfactory month.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were busy, the month being exceptionally favourable for outside work.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers, masons, carpenters, lathers plasterers etc., were very busy; painters and decorators were busy.

**Metal, engineering and shipbuilding.**—Iron moulders, coremakers, etc., found trade conditions somewhat slack, though in several shops brisk conditions prevailed. Machinists, engineers, electrical workers and linemen were busy. Metal polishers in several shops were busy. Similar conditions prevailed with stove-mounters, but blacksmiths were not very busy, while boilermakers and sheet metal workers, particularly the latter, were very busy.

**Woodworking and furnishing.**—Carriage and wagon makers found trade dull, while pattern makers and coopers were busy.

**Printing.**—The allied trades were busy.

**Clothing.**—Tailors were very busy.

**Food and tobacco preparation.**—Bakers, confectioners, and butchers were busy, and cigarmakers, etc., active.

**Leather.**—Saddlers and leather workers were active.

**Miscellaneous.**—Barbers, clerks, delivery employees, hotel and restaurant employees were steadily employed, and laundry workers were active.

**Transport.**—Railway trackmen and freight handlers were busy; street railway employees were regularly employed; teamsters and carters were busy, and expressmen had active employment.

**Unskilled.**—There was some unskilled labour unemployed at the close of the month.

#### DISTRICT NOTES.

**Paris.**—Practically all wanting work were employed during the month. The fabric mills were busy.

**St. George.**—A number of men and teams were employed completing the construction of the electric road between here and Blue Lake.

#### GUELPH, ONT., AND DISTRICT.

*Mr. O. R. Wallace, correspondent,* reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

The labour market was in an unsettled state as compared with the conditions

that have existed for some time. There has been a number of workpeople out of employment. The building trades have nearly completed their season's work. Many men in these trades seek indoor work for the cold months. This year, owing to the slackness in some shops and the feeling of uncertainty, few new men are being put to work. Two factories that were closed in the early part of the month resumed work on an eight-hour day basis. Another large factory also went on an eight-hour day temporarily. Notices have been posted in the shops of the Bell Co. that a reduction of 5% in wages will come into effect in December. This is the first general reduction of wages affecting any number of employees reported in some years. Towards the latter part of the month an improvement in general conditions was noted.

##### CONDITION OF PARTICULAR TRADES.

**Building.**—Bricklayers, masons and builders' labourers had a dull month. Carpenters, painters and plumbers had a quiet month.

**Metal.**—Some lines were very dull, others active, the stove trades being busy in some shops, with short time and reduced staffs in other lines. Moulders, machinists and coremakers had a quiet month. Tube mill workers were active.

**Woodworking.**—The woodworking trades generally had a dull month, short time being the rule in some shops. Woodworkers, piano and organ workers and carriage workers had a very dull month. Upholsterers had a quiet month.

**Printing.**—Printers had a quiet month.

**Clothing.**—Journeymen tailors and ladies' garment workers had an active month.

**Food and tobacco preparation.**—Bakers and cigarmakers were active.

**Unskilled labour** was very dull.

#### BERLIN, ONT., AND DISTRICT.

*Mr. R. F. Gofton, correspondent,* reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market was satisfactory up to the middle

of the month, when civic improvement work ceased for the season. Had it not been for the Ontario Sugar Company factory starting up at this time there would have been about three hundred labourers out of employment. The factory referred to gave employment to about half the above number of workmen. The town has many men seeking employment.

A new rubber company has been formed, with Mr. Jacob Kaufmann president, and capitalized at \$500,000. Actual operations are not to be commenced until next spring.

The population of Berlin is now 13,088, being an increase of 932 during the year. The total assessment amounts to \$5,898,093, an increase over that of 1906 of \$471,721. New cars for the city's street railway have arrived.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were busy delivering sugar beets at the factories.

*Manufacturing.*—Planing mills were active, but the furniture trade has not been so quiet in November for many years. The Canada Furniture Company's factory, and the Penman Company's factory are only working five days a week. The tanners also are working five days a week, the leather trade being very quiet. The Berlin Interior Hardwood Company was very busy, owing to the great demand for its product. The company found it necessary to run its establishment three nights a week to enable it to keep up with its increasing orders.

*Railroad construction and employment.*—The switch construction gang has been laid off, also about 25 sectionmen.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons were busy until about the last week of the month, when about twenty-five were laid off. A few carpenters and joiners were out of employment. Lathers and plasterers, painters and paperhangers were busy; plumbers, gas and steam-fitters active, and builders' labourers well

employed. Stonecutters found employment somewhat quiet.

*Metal, engineering and shipbuilding.*—All branches were actively employed, excepting machinists, engineers and boilermakers, who were somewhat quiet.

*Woodworking and furnishing.*—These trades were very quiet. Upholsterers, varnishers and polishers and wood-carvers were quiet, also carriage and wagon makers.

*Printing.*—Quiet conditions prevailed.

*Clothing.*—Journeymen tailors and glove makers were active; garment workers, boot and shoe workers quiet.

*Food and tobacco preparation.*—Active employment prevailed.

*Leather.*—Quiet conditions prevailed with tanners and curriers. Trunk and bag makers were active.

*Miscellaneous.*—Active conditions prevailed.

*Transport.*—With the exception of expressmen, all engaged in transportation found business somewhat quiet.

*Unskilled.*—This class was very quiet.

#### WOODSTOCK, ONT., AND DISTRICT.

*Mr. M. W. McEltheran, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during November was dull, the factories generally running shorter hours, and in some cases shutting down altogether. A feature of the situation was that orders were plentiful, but that large concerns found it difficult to get cash to meet payrolls. This was the reason given for the laying off temporarily of about sixty men at the local furniture factory, and the shortening of the day to eight hours. The Bain wagon factory closed down for two weeks for stock-taking, and when work resumed, it was only on an eight-hour schedule, and with but little over half the staff. The month was very good for iron-moulders, being better than last year. Employment has been very active in the district for some years past, so that the slight shortening will not be so keenly felt. The unpaid

taxes this year amounted to \$6,998.54, while last year they amounted to \$7,513,-46. Retail trade was quiet. There were no changes in the rates of wages and no labour troubles of any kind reported.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were busy preparing for winter, shipping apples, etc.; during the fine weather which continued up to the 26th, fall ploughing was in progress. Products from the farm still commanded highest prices. Butter sold as high as 37c. per pound, and eggs 30c., though towards the end of the month, these prices dropped a few cents. Cheese still sold at 12 and 12½c. on the Woodstock cheese board, though few sales were reported. An ordinance was passed by the City Council, requiring that all poultry (except wild fowl and live poultry) exposed or offered for sale on the public market, shall be properly dressed or cleaned, shall not be blown, and shall have the crops empty and heads removed. Work was still carried on on the county road, and good progress was made. The cost of road construction was reduced about \$25.00 per day by the purchasing of a new road engine capable of drawing five cars. The engine keeps three crushers busy to provide the necessary loads. The outfit necessarily decreased the number of men employed.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons were not very busy, the season's work being nearly finished. Carpenters were busy, judging from the small number of men asking for employment towards the end of the month. Lathers and plasterers were not rushed. Painters were all busy, though decorators and paper-hangers had a quiet month. Plumbers, gas and steamfitters were busy, with wages good. Stonecutters, though few in number, were all steadily employed.

*Metal.*—Stove moulders had a good month, work being brisk and wages good. Machinists were steadily employed. Electricians had all the work they could handle. Stove mounters were busy. Blacksmiths and horseshoers throughout the district had a very good month.

Jewellers, though quiet in the early part of the month, grew busier towards the close. Makers of farm tools and accessories were very busy, the Eureka Planter Co. reporting orders largely increased over last year. Wire fence manufacturers were quiet.

*Woodworking.* — Woodworkers of all trades had a quiet month, the lay-off at the furniture and wagon factories, and the shortening of the hours at the other factories affecting the upholsterers, varnishers and polishers, wood carvers and carriage and wagon workers. Organ and piano makers were also affected by the stringency of the money market, though in one factory there was no lay-off or short hours. Church organ manufacturers were very busy, there being several good orders on hand. Planing mills were busy.

#### STRATFORD, ONT., AND DISTRICT.

*Mr. Joseph T. Carling, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during November was active, although there were a number of unemployed in the city. Upwards of 200 were laid off at the Grand Trunk Railway shops; some of them have found work in other shops, and others have left the city.

Activity continued in the building trades, permits to the amount of \$10,784 having been issued the first two weeks of the month. Wholesale and retail merchants reported business fairly good. No changes in wages or hours of labour, and no trouble in the labour market was reported.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farm produce has advanced in price, the following being current quotations:—

- Butter, 28 to 30 cts. lb.
- Eggs, 27 to 29 cts. doz.
- Potatoes, 90 cts. to \$1.00 bag.
- Apples, 50cts. to \$1.00 bag.
- Chickens, 25cts. to 40cts. each.
- Turkeys, 15 cts. lb.

*Manufacturing.*—All industrial establishments were busy.

CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons were fairly well employed owing to the favourable weather. Carpenters, lathers and plasterers were busy. Painters and plumbers had a good month. Builders' labourers were more than equal to the demand.

*Metal.*—Iron moulders, iron workers and helpers found employment rather dull. Machinists, blacksmiths and boiler-makers were active. Horseshoers reported a busy month.

*Woodworking.*—Woodworkers and carriage and wagon makers had an active month. Coopers were busy.

*Printing.*—Printers had an active month.

*Clothing.*—Journeymen tailors were busy. One clothing factory has not been running full time.

*Food and tobacco.*—Bakers and confectioners had a busy month; bread continued at the old price, 1½ pound loaf for 5 cents. Cigar-makers reported trade good.

*Miscellaneous.*—Barbers, clerks and delivery employees were active. Hotel and laundry workers had a busy month.

*Transport.*—Railway crews were active and freight handlers very busy. Cab drivers, draymen, teamsters and expressmen were active.

*Unskilled labour.*—A number were idle.

DISTRICT NOTES.

*St. Mary's.*—A by-law is to be voted on on December 9th for the loan of \$6,000 to establish a wood-working factory, to employ from 15 to 30 hands.

*Mitchell.*—Fifty carloads of apples have been shipped from here, the bulk going to England and Scotland. Messrs. H. Hill & Co., bridge builders, have been awarded a \$10,000 contract for a large bridge over the Maitland river.

LONDON, ONT., AND DISTRICT.

*Mr. Alex. Woonton, correspondent,* reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

A general decline in the activity of labour took place during November, and

there was less employment in every line than at this time in any previous year for the past five years. In a number of factories, hands were being laid off, and in a few cases, business was suspended entirely. The stringency of the money market is blamed for the laying off of hands. One hardware company has commenced building an addition to its factory, 110x125 feet, composed of cement. Retail traders reported trade good, and wholesalers were shipping as much as usual at this time of the year. The Grand Trunk Railway Company's yardmen received an increase in wages of 12 per cent., dating from first of November.

CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—A comparison of prices of farm produce is appended, showing the difference in prices compared with last year:

WEEK OF NOVEMBER 12.	
1906.	1907.
Hay, \$11.50 to \$12.00 a ton	Hay, \$17.00 to \$18.00 a ton.
Straw, \$4.00 a ton.	Straw, \$8.00 to \$8.50 a ton.
Oats, \$1.10 cwt.	Oats, \$1.50 cwt.
Turkeys, \$.14 to \$.15 lb.	Turkeys, \$.11 to \$.12 lb.
Ducks, \$1.00 to \$1.25 pair	Ducks, \$.08 to \$.10 lb.
Butter, \$.22 to \$.24 lb.	Butter, \$.29 to \$.31 lb.
Potatoes, \$.80 to \$.90 bag	Potatoes, \$.80 to \$.85 bag.
Apples, \$.40 to \$.50 bush.	Apples, \$2.25 to \$2.50 bbl.
Pears, \$.90 to \$1.00 bush.	Pears, \$1.00 to \$1.25 bush.
Dressed hogs, \$8.75 to \$9.	Dressed hogs, \$7.00 to \$7.50.
Milk, \$.05 qt.	Milk, \$.07 qt.
Bran, \$.95 cwt.	Bran, \$1.20 cwt.
Shorts, \$1.00 cwt.	Shorts, \$1.30 cwt.
Corn, \$.95 cwt.	Corn, \$1.20 cwt.

CONDITION OF PARTICULAR TRADES.

*Building.*—There was a sudden decline in activity in these trades, and very little building was going on. A number of bricklayers were out of work, but the carpenters were mostly all employed. Lathers and plasterers were busy, painters somewhat slack, with a number out of employment. Plumbers reported trade good. Stonecutters had very little to do. Builders' labourers found employment slack, and a number were out of work.

*Metal, engineering and shipbuilding.*—Iron moulders in some foundries were only working nine hours where they usually work ten. Iron workers reported trade fair. Machinists at several foundries

were working eight hours instead of ten, and with the force greatly reduced, notably at Leonard's. Electrical workers and linemen reported employment plentiful. Stove-mounters were working short time. Boilermakers were only working nine, instead of ten hours.

*Woodworking and furnishing.*—Carriage and wagon workers reported business quieter than in years. Car-builders were fairly well employed. A large addition is being made to the Grand Trunk Railway shops. Coopers reported trade dull.

*Printing.*—Printers and pressmen were all working. Lithographers were busy, also cardboard box makers.

*Clothing.*—Tailors reported trade very good, but conditions were somewhat dull with garment workers, two firms having closed down and others running with reduced forces. Boot and shoe workers had fair employment.

*Food and tobacco preparation.*—The local candy and biscuit factories slackened off earlier than usual, one of them having laid off over 50 hands. Cigar-makers were slacker than for years, there being over 50 idle.

*Leather.*—Tanners reported trade good, and saddlers were busy.

*Transport.*—Railway train crews reported a good month, with no curtailment.

*Unskilled.*—A large number were out of employment. Although the weather has been fine, business generally has declined. One firm advertised for two men, and received over one hundred applications.

#### ST. THOMAS, ONT., AND DISTRICT.

*Mr. J. A. Killingsworth, correspondent,* reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

Conditions during November were generally satisfactory, with labour in most lines fairly well employed. The weather was unusually fine and mild, making work in out-door trades possible, and enabling incompleting building contracts to be proceeded with. While the labour market

has not been as brisk as during the corresponding month, of 1906, there have not been many idle men in the city. As is usual at this time of year, there are certain classes not well employed, but on the whole, the month has been a very good one.

The dwelling house problem remains unsettled. There is still a scarcity of houses, and as a result many are compelled to go to lodging-houses.

It was said that the Pere Marquette Railway Co. would carry out the repair work necessary on Wabash rolling stock in their shops in this city. Should this arrangement be completed, it will necessitate an increase in the force of skilled and unskilled mechanics employed in the Pere Marquette shops. Heretofore, the Wabash railway has had all heavy work done in the shops on the American side. At the present time, Pere Marquette shop employees, with the exception of roundhouse workmen, and men employed upon the repair tracks, are working only five hours per day. It is expected, however, that it is only a matter of a few days until the eight-hour schedule will be resumed, and it is possible that a ten-hour schedule may be put into effect. On November 26th, an order was posted in the Michigan Central Railway shops reducing the working hours from 50 hours a week to 45 hours a week, which means that instead of working 9 hours for the first 5 days of the week, and 5 hours on Saturday, the men will, until further notice, put in 8 hours a day for the first five days of the week and 5 hours on Saturday. These reductions in the hours of labour in the two railway shops are not the result of scarcity of work, but are due to retrenchments usually made at this time of the year. There is plenty of work, and it is only a matter of a short time until railway shop employees will resume the 8 or 10 hour workday.

Representatives of the St. Thomas Street Railway employees met the commissioners at a recent meeting, and made a demand for an increase in wages. They requested that wages be 15 cents per hour for the first month, 18 cents per hour for ensuing six months, and 20 cents

per hour thereafter. In addition to the above increase, pay is asked for occasions when men are called out to work and are not employed. The Secretary of the Board will communicate with electric railway companies in other cities of equal population to St. Thomas, to ascertain the wage rate for employees on electric roads in other places. The October statement of the Street Railway showed that while the number of passengers carried decreased, the receipts increased as compared with the same month last year.

Representatives of the Heinz American Pickle Company visited the city for the purpose of selecting a suitable location for the establishment of a large pickle plant. Fitness of soil for raising of products required in the manufacture of pickles, together with railway facilities, are important considerations.

At the commencement of the month, about 400 labourers were laid off along the lines of the Michigan Central Railway. As these men were employed on construction work during the summer, the laying off is not unusual, and does not affect this city to any extent.

The power question is at present being earnestly considered by the citizens. It is felt that St. Thomas manufacturers and municipal institutions have been at a greater expense in purchasing power than is necessary. A representative of the Hydro-Electric Power Commission was in the city November 26th, and furnished estimates as to cost of Niagara power. According to his figures, an outlay on the part of the city of \$42,493.00 will be necessary before power can be delivered to the consumer. This means an estimated annual outlay of \$8,146.00, and as the figures are based on 1,825 horsepower being used, the cost to the consumer, in addition to the figures quoted by the Commission for delivery at the city limits, will be \$4.46 per horse power per year. The figures quoted by the Commission and submitted to the people, at the time the by-law was voted on last year, are \$21.50 the minimum, or \$26.50 the maximum.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The farmers were well advanced with fall ploughing, the weather

being very favourable. Farm produce continued to bring high prices.

*Manufacturing.*—All branches had a busy month, with plenty of orders on hand.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—All branches were fairly well employed. There was little cessation in the work indoors, and considerable work was done outdoors. Bricklayers and masons have been working all month, and contractors report the season as being especially good. There has been a steady demand for bricklayers and masons, and in some cases, men have had to be brought in. There has been no scarcity of brick or building material.

*Metal.*—Moulders, machinists, blacksmiths and boilermakers reported plenty of work ahead, although many of them employed in railway shops, have had their hours of labour reduced.

*Woodworking.*—All were well employed.

*Printing and allied.*—Printers had an average month.

*Clothing.*—Tailors were busy.

*Transport.*—Railway employees reported the month a brisk one.

*Unskilled labour.*—As is usual at this time of the year, the supply was in excess of the demand.

#### DISTRICT NOTES.

*Pt. Stanley.*—The month has been active at this shipping port. Wheat, apples, hogs, beans, hay and potatoes constituted the bulk of shipments. The Traction Company entered Pt. Stanley during the month, and is now running cars to the terminal, handling some large fish shipments. A construction gang has been at work unloading stone for the protection and security of the west pier from heavy seas from the southwest.

#### CHATHAM, ONT., AND DISTRICT.

*Mr. Alex. Gregory, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Labour was fairly well employed during November, but owing to the strin-

gency in the money market, a large number of the manufacturing firms are shortening the hours of labour, instead of reducing the staff, in order to keep all hands employed. On the 11th of November, the Chatham Auto Company made a cut of 25 per cent. in the wages of a number of its best hands; as a result, a number left for Detroit. Merchants reported trade fair, although in many lines, owing to the continued mild weather, there is no demand. The Chatham, Windsor, and Lake Erie Electric Railway Company is still unable to proceed with the construction of the roadbed south of the Grand Trunk Railway.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers generally are through with their fall work, and although in some instances their crops have not been up to former years, the prices obtained have evened things up. Prices for produce during the past month were as follows:—

Wheat, \$.95 per bushel.  
Beans, \$1.50 per bushel.  
Oats, \$ .45 per bushel.  
Corn, \$.60 per bushel.  
Barley, \$1.35, cwt.  
Hay, \$15.00 ton.  
Butter, \$.28 to \$.35 lb.  
Eggs, \$.30 doz.  
Live hogs, \$.50 cwt.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons reported trade slackening, owing to most of the larger buildings being completed, but carpenters, plasterers and plumbers were busy. Gas and steamfitters reported the month ahead of the corresponding month of 1906. There was a demand for additional stonecutters. Builders' labourers were fairly well employed.

*Metal, engineering and shipbuilding.*—Machinists reported trade slack, and a number laid off for a time. Electrical workers and linemen, blacksmiths and boiler-makers were busy.

*Woodworking and furnishing.*—Slack conditions prevailed with carriage and wagon makers; some were working only eight hours per day.

*Printing.*—Printers, pressmen and book binders were busy.

*Clothing.*—Journeymen tailors and garment workers found employment somewhat slack, but expect an improvement next month.

*Food and tobacco preparation.*—Bakers and confectioners reported business fair.

*Unskilled.*—The supply exceeded the demand.

#### WINDSOR, ONT., AND DISTRICT.

*Mr. D. Mitchell, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The labour market was quiet compared with last month, and a number of men were out of employment, owing to the stringency in the money market and the postponement of contemplated operations and undertakings. Building operations have shown a marked falling off; with the exception of a few dwellings to be finished, there is no work in sight at present. The manufacturers, with a few exceptions, have had a quiet month, and several have closed down for a short time. The wholesale and retail merchants reported trade fairly good, but money scarce. The milk dealers have raised the price of milk to eight cents a quart. The movement of the large Canadian stock breeders to make Windsor the principal sale centre for buyers from the United States was inaugurated on November 28, when the first sale took place.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers have completed their fall ploughing, and are now attending to work incidental to the season of the year. Hay and all coarse seeds were high in price and very scarce.

*Manufacturing.*—All industrial establishments experienced an unusually quiet month.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Many bricklayers, carpenters and builders' labourers were out of work. Plumbers were fairly busy.

*Metal, engineering and shipbuilding.*—There was a lull in the activity of the iron trades towards the latter part of the month. Most of the iron and brass manufacturers have had to lay off some of their hands, and are running their establishments with as few as possible. Ten have closed down until the commencement of the new year.

*Woodworking.*—Fairly active conditions prevailed.

*Printing.*—The allied trades were well employed.

*Clothing.*—Tailors and garment workers were active.

*Food and tobacco preparation.*—Bakers, butchers, cigar and tobacco workers were fully employed.

*Leather.*—Leather workers reported trade quiet on new work, but had plenty to do on repair work.

*Miscellaneous.*—Barbers were all working, and hotel and restaurant employees were fairly active.

*Transport.*—Railway and steamboat employment in all lines was steady. Teamsters and expressmen were not very busy.

*Unskilled.*—The supply was equal to the demand.

#### DISTRICT NOTES.

*Sandwich.*—The cost of new buildings erected and improvements made in Sandwich during the past twelve months amounted to over \$100,000.

#### SAULT STE. MARIE, ONT., AND DISTRICT.

*Mr. F. A. Denman, correspondent,* reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

Labour was fully employed during the month, supply and demand being well balanced. Merchants were having their goods for the holiday trade rushed in by boat. Money was tight. Wholesale and retail trade was fair.

##### CONDITION OF LOCAL INDUSTRIES.

*Lumbering.*—The sawmill was still running, the cut being all sold. The veneer

and pulp mills were working full time. The wages of men for the lumber camps have dropped about \$5.00 per month, \$20 to \$28 per month being now paid.

*Manufacturing.*—The Canadian Tool Company a new industry, has been operating about a month. There are 12 men employed, and the company is looking forward to increasing the staff shortly. The steel plant and blast furnaces were busy. The reported shortage of pig iron here was incorrect. There are plenty of orders ahead. The charcoal plant, machine shop, etc., were all working full time.

#### CONDITION OF PARTICULAR TRADES.

The *printing and clothing trades* were busy. In the *woodworking, food and tobacco preparation, and miscellaneous trades* conditions were reported as normal. In the *building trades, plumbers, gas and steamfitters* were busy, the other branches normal. Horseshoers and jewellers were busy. Normal conditions were reported in the other *metal trades*. In the *transport trades, freight-handlers, steamboat men and longshoremen* were busy, and the others active.

#### WINNIPEG, MAN., AND DISTRICT.

*Mr. John Appleton, correspondent,* reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

During November, employment has not been as plentiful as in the previous month, nor has it been as plentiful as in the same month of last year. Work outside of the city on railroad construction has been plentiful, and for the winter there will be employment for a large number on rock work. Ordinary earth grading has already ceased, and the men employed in this way will be able to find work in the woods for the winter months. The teams employed on the railroad grades will also be utilized for hauling firewood to the sidings, and to keep them employed will require a very large number of men. Attention has been directed

to this class of enterprise by the present high price of firewood and the low stocks on hand. Dealers have had great difficulty in getting supplies commensurate with a reasonable estimate of the probable consumption. Well seasoned wood is scarce, the supply being practically exhausted by the unusual length and severity of last winter.

Work on laying conduits for the system of government telephones in Winnipeg has practically ceased, but the new exchange building will be completed without any cessation of activity.

The Provincial Government announce that early in the year 1908 operations will be commenced upon the erection of a new provincial gaol. Plans have already been prepared and approved by the government.

Building permits issued during the first ten months of the year were as follows:—

1907.	Permits	B'ldgs	Cost.
January.....	48	54	\$ 62,000
February.....	82	92	189,150
March.....	225	264	687,700
April.....	464	537	1,170,600
May.....	450	543	1,155,000
June.....	337	412	1,090,750
July.....	273	325	896,350
August.....	164	181	388,550
September.....	139	150	382,950
October.....	95	96	132,650
Total.....	2,277	2,654	\$6,155,700

On public works, activity for the year has ceased. It has been intimated by the mayor of the city that sewer construction will continue during the winter months. Work actually accomplished is shown in the following table:—

Kind of Work.	Constructed 1907. Miles.	Previously Constructed. Miles.
Pipe sewers.....	10.552	
Concrete sewers.....	4.898	
	15.450	141.558
Domestic water mains.....	20.008	147.305
High pressure water mains ...	1.924	3.0
Domestic Hydrants.....	170	868
High pressure hydrants.....	39	8
Asphalt pavements.....	7.876	33.463
Block pavements.....	.617	22.43
Macadam pavements.....	.516	37.537
Granolithic walks.....	7.944	57.871
Plank walks, new.....	16.805	279.056
Plank walks, renewal.....	.705	3.018
New grading.....	11 5	165.9
Sewer connections.....	2,231	10,362
Water connections.....	2,370	14,964

A new high pressure water service, covering the centre of the city, to be used only for fire protection purposes, is partially completed. Two units are already in operation.

The amount expended during the year in general municipal improvements exceeded \$1,500,000.

Trade, wholesale and retail, has not exceeded that of last year. No complaints are being made from retailers in the city of Winnipeg, but wholesalers complain of the difficulty in making collections at some points in the west. The banks have in many cases curtailed credits, and this has had a tendency to contract the volume of business.

A prospectus has been issued announcing the proposed establishment of a new bank to be called the Bank of Winnipeg. It will have a capital of \$2,000,000. A meeting of the shareholders of the proposed Bank of Canada was held recently, but no definite announcement as to what the provisional directors propose to do has been made.

The first galvanized ironware factory commenced operations in Winnipeg during the month, and promises in a short time to give employment to many work-people.

CONDITION OF LOCAL INDUSTRIES.

*Agriculture.* — The secretary of the Northwest Grain Dealers' Association, reports wheat marketed up to November 15th as follows:—

	Bushels.
Inspected, 18,417 cars.....	19,700,000
In transit.....	1,600,000
In store at country points.....	8,540,000
Total.....	29,840,000

Oats marketed up to the same period were as follows:—

	Bushels.
Inspected, 1,800 cars.....	3,240,000
In transit (not inspected).....	325,000
In store at country points.....	450,000
Total.....	4,015,000

Mr. Fowler's opinion is that 52 per cent. will be of contract grade, and 48 per cent. No. 4 and inferior. The total yield of all grain is estimated to be 163,936,500 bushels. Wheat is estimated to yield 12.9 bushels per acre; oats, 34.3, and barley 25.3. Flax, the total crop

of which is 1,071,500 bushels, yielded 10.2 bushels per acre. Of 146,070,000 bushels of oats and wheat, only 33,855,000 have been marketed.

*Lumbering.*—Work in the woods cutting firewood will be plentiful, as many contractors are preparing to employ all their forces in this enterprise. As to lumbering proper, there is not likely to be so marked an activity as last year.

*Railroad construction.*—Operations during the winter will be normally active.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—In the building trades there was a cessation of activity. The volume of trade has not been nearly so large as in the previous year. Many new buildings are approaching completion.

*Metal.*—The engineering trades are feeling the effect of the monetary stringency, and staffs are being gradually reduced. There is not likely to be any marked activity until next summer.

*Woodworking.*—Woodworkers were not busy. Only a fair amount of work is being asked for, and plants were not working to full capacity.

*Printing.*—The allied trades were moderately active. Most of the skilled workers were kept fully employed.

*Clothing.*—Conditions were a little dull. Although there were no complaints as to lack of employment, the employers anticipate that they will have to dispense with some hands before the winter is over.

*Leather.*—The leather trade was normally active. There does not appear to be much change in the demand for new goods.

*Miscellaneous.*—In the customary migration to the city in the months preceding winter, there are large numbers of workpeople endeavouring to get light work indoors. Many at the present time are out of work.

### BRANDON, MAN., AND DISTRICT.

*Mr. S. P. Stringer, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Business conditions during November were active, despite unfavourable crop

reports and the tightness of the money market. The fine weather enabled building operations to continue on many buildings. The stone work on the new Salvation Army citadel was completed; the bricklayers have finished laying the brick on the new addition to the asylum; the brick work on the new roundhouse of the Canadian Northern Railway Company was completed. Work was commenced on the erection of the new pop factory for the Brandon Brewery Company, and the Symington Company has made considerable additions to its store.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The open fall has enabled farmers throughout the province to get considerable fall ploughing done. It is estimated that fully twenty-five per cent. more ploughing has been done this fall than ever before. The stringency of the money market is not so noticeable in Manitoba as might be expected. It is said that fully seventy-five per cent. of the wheat raised in Manitoba during the past season has been marketed, the farmers taking advantage of the high prices which prevailed earlier in the season.

*Lumbering.*—The Hanbury Lumbering Company will not send any men to its lumbering camps this winter, as it has sufficient lumber now on hand for next season. This company during the past season has shipped a large quantity of fixtures to points on the Canadian Pacific Railway. It has also secured the contract for supplying and adjusting the fixtures for the Great Northern Railway depot.

*Manufacturing.*—The daily output from the Wheat City Flour mills was over 630 barrels.

*Railroad construction and employment.*—Seventeen working trains have been taken off by the Canadian Pacific Railway Company and started hauling grain. The new Canadian Northern Railway from Brandon to Regina is nearing completion. Farmers are already shipping grain on this line; freight has been shipped for some months past. The Grand Trunk Pacific contractor stated that sixty miles of grading east of Saskatoon will be ready

for the rails shortly, and that the prospects of the line reaching Portage this year were excellent.

*Other industries.*—The Bell Telephone Company has made a considerable number of extensions and improvements to its system throughout the district.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—The trades were active finishing the season's work, weather conditions permitting outside work. Plumbers were busy, and steamfitters found employment brisk.

*Metal, engineering and shipbuilding.*—Iron moulders, machinists, steam engineers, sheet metal workers and boiler-makers were active.

*Woodworking and furnishing.*—Woodworkers, upholsterers and pattern makers were active, but with no openings.

*Printing.*—Printers and pressmen were active.

*Clothing.*—Journeymen tailors and garment workers, boot and shoe workers were active.

*Food and tobacco preparation.*—Bakers, confectioners, butchers and meatcutters cigarmakers and tobacco workers were actively employed, with an opening for a butcher with capital.

*Miscellaneous.*—Trade with barbers, clerks, stenographers, delivery and laundry employees was active.

*Transport.*—Traffic on the railway was not as heavy as during the corresponding period of last year. Cabmen, teamsters and expressmen were active.

*Unskilled.*—The supply was equal to all demands.

#### DISTRICT NOTES.

*Yellow Grass, Sask.*—The Western Fire Clay Products Company, Limited, of Winnipeg, is about to build a large brick and sewer pipe works close to this town. The company proposes to employ from 60 to 100 men.

*Vonda, Sask.*—A by-law to raise \$15,000 for a waterworks system was carried by a large majority.

MOOSEJAW, SASK., AND DISTRICT.

*Mr. J. R. D. Bastien, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The condition of labour during November was seriously affected by the money stringency and the shortage of cars, which prevented producers from receiving the highest prices. Although there is still a number of houses being erected, the principal employment was with the railway and the municipal corporation. The city has opened the new gravity water supply system. Transportation business, while not as active as in October, was still heavy, and the men employed in the service were accorded good mileage. Railway employment was fair, train crews making good mileages.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The agriculturist was handicapped by inefficient transportation facilities and the scarcity of money.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Inactivity was the rule in the various branches.

*Metal and engineering.*—Conditions were fair in the different branches. Electrical workers were busy.

*Woodworking and furnishing.*—Conditions were dull.

*Printing.*—The printing trade was not up to the standard of October, but was regarded as fair.

*Clothing.*—Trade was fair.

*Food and tobacco preparation.*—Conditions of employment were fair.

*Leather.*—Conditions were dull.

*Miscellaneous.*—Barbers reported business good; clerks and stenographers fair, and hotels and restaurants, etc., very good.

*Transport.*—Transportation employees, compared with the corresponding period of last year, were exceptionally active, the weather being more favourable.

*Unskilled.*—In spite of prevailing conditions, unskilled labour found fair employment.

## REGINA, SASK., AND DISTRICT.

*Mr. Hugh Peat, correspondent,* reported as follows:—

## GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market has been somewhat quiet; so far as the building trades are concerned, work is practically suspended till the beginning of next season. The Stonecutters' Union has disbanded till next spring, the majority of its members having left the city. Several bricklayers and masons are still employed, but the work is not likely to last long, as almost all the buildings that have afforded employment during the season are completed, or nearly so. Last year, building operations were in progress throughout the winter, but with the exception of carpenters and plasterers who will be employed on interior work, the building trades will be closed down entirely this year. The last stone on the new city hall was laid on November 19. The cost of the building was \$140,000. The new Darke block was completed during the month, at a cost of \$125,000.

## CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Threshing has been general throughout the month, and operations are now almost completed. Exceptionally favourable weather conditions have prevailed. The season's output is very unevenly distributed amongst the farmers, many of whom have had the best results in many years' experience, while others have had the worst. It is worthy of note that not only is the oats crop the largest in the records of the province, but the average yield per acre has been exceeded in only two years since crop figures were first compiled in 1898.

## CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers, stonecutters and masons were very quiet, and so far as these branches of the building trade are concerned, business for the present season is at an end. Carpenters and

joiners were fairly busy. Lathers and plasterers were active. Painters were all fully employed. Plumbers, gas and steamfitters were actively employed. Builders' labourers were very quiet. A few labourers were actively engaged in street and park improvements for the city.

*Metal.*—Electrical workers were active.

*Printing.*—Printers were active in all branches. Bookbinders were also active.

*Food and tobacco preparation.*—Cigar makers were fairly active, though business has fallen off somewhat during the last two months.

*Miscellaneous.*—Barbers were fairly active.

## CALGARY, ALTA., AND DISTRICT.

*Mr. R. A. Brocklebank, correspondent,* reported as follows:—

## GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during November was practically in the same condition as last month. A number of contractors were rushing work in order to finish by the setting in of winter. The city was also pushing its improvements as far as possible before the ground became frozen. The supply of labour generally exceeded the demand, and it is expected that during the month of December there will be idle men in the different trades; but unskilled labour was well employed for the time of year. The transportation companies were kept busy. The moving of grain is steadily increasing year by year. Bank clearings for the weeks ending November 7th and 14th reached the highest amounts in the history of the clearing house, amounting to \$1,820,000 and \$1,814,000 respectively. For the week ending November 21st, the clearings amounted to \$1,570,000, an increase of 7 per cent. over the corresponding week of last year. Wholesalers reported an increase in trade over the previous month, with collections fair. Retail trade has been fair.

## CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers have been busily engaged teaming grain to market, thresh-

ing, and saving the root and vegetable crops.

*Mining.*—The coal mines were being operated on as large a scale as the furnishing of cars by the railroads would permit, and it is generally believed by the coal dealers that there will not be a shortage of coal this winter, the consumers having laid in a part of their winter's supply, and the dealers having more coal on hand than they had last year.

Other industries throughout the locality were well employed considering the tightness of the money market.

#### EDMONTON, ALTA., AND DISTRICT.

*Mr. J. A. Kinney, correspondent,* reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

Labour generally was not employed to as great an extent as last month, or a year ago. Fewer men were engaged, and the number would have been further reduced but for the continued fine weather. In nearly all branches the supply more than equalled the demand. The usual exodus of mechanics to the coast at this season of the year has been more marked than usual.

The City Council again put in force an agreement entered into with the Trades and Labour Council last spring, whereby labourers employed by the city should receive a minimum wage of \$2.25 for an eight-hour day. A number of men have been laid off by the city, and also by the company putting in the sewer. Some of these men are finding employment in the different lumber camps now beginning operations for the winter; others will perform homestead duties for the next few months.

Wholesale and retail trade was fairly active.

Coal mining will be carried on this winter more extensively than ever before. Some new mines have been opened up.

Telephone communication has been established between Edmonton and

Beaver Hill's P. O., Bruderheim, Lamont, Chipman, Mundare, and Veguville, there being an exchange of 65 phones at Veguville. All of these may be reached by a subscriber in Edmonton, Strathcona or Fort Saskatchewan. The lines between Wetaskiwin and Daysland have been opened for business with offices at Wetaskiwin, Gwynne, Rosenroll, Camrose, Bawlf, Ohaton and Daysland; likewise the line between Lacombe and Stettler, with toll offices at Lacombe, Chigwell, Valley City, Lees, Alix, Content, Erskine and Stettler. Within the next two or three weeks, the line east of Veguville will also be opened.\*

Express parcels received in October numbered 240, and in October, 1906, 106.

##### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Homestead entries for the month of October were 327, and for October, 1906, 387.

##### CONDITION OF PARTICULAR TRADES.

Bricklayers, carpenters, lathers, plasterers, painters, plumbers, all reported trade as dull, with a number of each craft idle. This also applies to electrical workers, linemen and sheet metal workers. Printers and pressmen were dull, but barbers and cigar-makers reported trade fair. The supply of unskilled labour was more than equal to the demand.

#### NELSON, B. C., AND DISTRICT.

*Mr. A. B. Dockstader, correspondent,* reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market throughout the Kootenay districts during November was quiet, owing to the falling off in the lumber trade and the depressed state of the metal market, the latter particularly affecting the mines that produce a considerable proportion

(\* ) For a reference to the convention of the society of Equity at Edmonton during November, see opening article of present issue.

of copper values, and throwing over a thousand workmen out of employment in this district. The tendency of wages was downward. The miners at Rossland held a referendum vote as to whether they should voluntarily reduce their wages to the scale in force prior to June 1, 1907. It was resolved to make the reduction, such action ensuring the continuous working of the Rossland mines.

The erection of the Court House at Nelson is making satisfactory progress. The Canadian Bank of Commerce is expected to occupy its new building about December 1.

#### CONDITION OF LOCAL INDUSTRIES.

*Mining.*—The Consolidated Mining and Smelting Company of Canada, Limited, recently paid its November dividend at the rate of 10% per annum on its issued capital stock, making \$848,825.00 paid in dividends to date. This is one of the largest companies in the Kootenay district; it operates the War Eagle and Centre Star groups of mines at Rossland, the Eureka group near Sandon, the extensive Trail smelting and refining works, the Snowshoe and War Eagle group of mines at Pheonix, and the St. Eugene mine at Moyie, at which the company has on its payroll slightly over four hundred workmen. At Moyie also, the Cambic Mining Company, which owns the mining claims underlying Moyie Lake, is now engaged in sinking a double compartment shaft two hundred feet out in the lake, with a depth of sixty feet of water, and with a depth of thirty-five feet of clay and gravel before solid rock is reached. Fair progress is being made, and the shaft is now down about twenty feet in the clay and gravel. This is said to be the first effort in Canada to mine under the waters of the lakes for precious metals.

The Crow's Nest Pass Coal Company is now producing more coke than is required by the smelters, the shutting down of the several smelters in the Boundary district recently bringing about this result. The coal company, however, reported that it could find sale for more coal than they can produce with its present force, and that it is in a most

prosperous condition, as evidenced by this month's payroll for the company's three collieries and coke ovens, which amounted to \$205,416.00, being the largest payroll to date.

The town of Hosmer, situated eight miles east of Fernie on the Canadian Pacific Railway Company's Crow's Nest branch, has advanced rapidly during the past year, growing to be a town of nearly one hundred houses, with many buildings planned for next year. The C. P. R. Company is now engaged in opening up and developing a new and valuable coal mine at this point, there being now over three hundred men employed in this connection, the company having a sawmill of its own on the spot for the cutting of mine timber. It is reported that the mine will be ready in one year's time to produce coal and coke on a large scale, thus ensuring a plentiful supply of coke for the Kootenay and Boundary smelters. Hosmer has four hotels, three stores, two meat markets, a public school, a post office and a railway station.

#### NEW WESTMINSTER, B. C., AND DISTRICT.

*Mr. D. J. Stewart, correspondent, reported as follows:—*

#### GENERAL CONDITION OF THE LABOUR MARKET.

The labour market in this district has been quiet throughout the month, and there is a large number of idle men, with slight prospects of steady employment during the winter months. A new fish company has been organized, and has secured some water front lots, on which a cold storage plant, with the necessary wharves, will be erected; another company is contemplating the erection of a factory for the purpose of making concrete blocks. A contract has been let for the construction of a roller skating rink, to cost about \$8,000.00. Beginning on the first of the year, the school teachers of this city will receive a substantial increase in their salaries. Though there is a number of idle men in the city, and the staff in many of the local indus-

tries have been reduced, there has been no reduction made in the wages of those who have been kept on, with the exception of the Chinese and Japanese employed in the sawmills. The land registry receipts for the month of October were \$1,916.97, and for the corresponding month of last year, \$1,880.00.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The farmers have finished their season's operations. Good prices prevailed for all commodities. There were nineteen creameries established in the province, all doing well and earning satisfactory dividends for the shareholders. The total quantity of butter produced by the creameries during the year 1905 was 1,456,343 pounds, and the average price was 26.6 per pound; the output in 1906 was 1,636,877 pounds, and the average price 27 cents per pound; the figures for 1907 are not yet available, but there are indications that the demand for first-class butter is far ahead of the supply. The prevailing retail price ranges from 35 to 40 cents a pound.

*Fishing.*—This industry is quiet at present, the coho packing season having closed. The canners reported that the season has been the past in years. About twenty carloads have been disposed of in the eastern markets.

*Lumbering.*—A number of the sawmills have reduced the number of their employees by about half, and some of the mills have ceased operations for an indefinite period. This has affected the logging camps, and a number of them have closed down, the net result being that a number of men have been thrown out of employment.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Conditions were somewhat dull.

*Metal and engineering.*—Conditions were dull, except among steam engineers, who were active.

*Woodworking and furnishing.*—Car-builders were busy, but shingle weavers found employment dull.

*Printing.*—Printers and pressmen were busy.

*Clothing.*—Journeyman tailors, boot and shoe workers were active.

*Food and tobacco preparation.*—Bakers, confectioners, butchers and cigar makers were active.

*Leather.*—Tanners and curriers were active.

*Miscellaneous.*—Barbers, hotel and restaurant employees and laundry workers were active, but clerks and stenographers found employment dull.

*Transport.*—Steamboatmen, street-railway employees, teamsters and expressmen had active employment.

*Unskilled.*—Dull conditions prevailed.

#### VANCOUVER, B. C., AND DISTRICT.

*Mr. Geo. Bartley, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market during November was dull, some fifteen hundred men being reported out of employment. The weather, up to the 20th, was all that could have been desired, but there was a heavy falling off in building. The prospects are that the ranks of the unemployed will be considerably augmented during the coming winter.

The North Coast Lumber Company, with a capital of \$1,000,000, to acquire, own, buy and sell realty, was organized.

Prices declined 1 cent in butter and eggs, while hams and bacon were lowered  $\frac{1}{2}$  to 1 cent. Dressed chickens were quoted at 22 and 23 cents a pound wholesale. California navel oranges made their appearance for the first time this season. The market was well supplied with potatoes. Flour was quoted at \$7.25 a barrel. Cut nails were advanced 25 cents a keg. Other lines of hardware were steady and trade was brisk.

The delayed fall business is coming in by degrees, and it is expected that the half year from October to March will be active. There has been no falling off from the high rents that have prevailed, owing to the increase in population during the past year. Collections were light and money scarce.

The new steamship, Celtic, built at the Wallace shipyards, for the Coast Steamship Co., at a cost of \$40,000, made her first trip from Vancouver to Steveston.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—The various branches were inactive, a large number of labourers being out of work.

*Metal, engineering and shipbuilding.*—Sheet metal workers reported trade good, but that there was no demand for additional men. There are about 70 men, of whom about one quarter were idle. Moulders reported trade fair, with no demand for additional men.

*Woodworking and furnishing.*—Factory men reported a great falling off in trade, and a large number of men out of employment.

*Printing.*—Printers on the newspapers have asked for an increase in wages of 50 cents a day all round. The present rate is: Day work, \$4.00 for 7½ hours; night work, \$4.50 for 7½ hours. The job printers' new scale, which went into force on November 1, is \$24.00 for 48 hours; for 5 days, 8 3-4 hours, quitting at 12 o'clock on Saturday. Printers reported a surplus of hands. Bookbinders reported trade good.

*Clothing.*—Journeymen tailors reported trade only fair for this time of the year, but boot and shoe workers were active.

*Food and tobacco preparation.*—Cigar-makers reported trade fair. Bakers, confectioners, butchers and meat cutters were well employed, with a demand for extra men.

*Leather.*—Workers on horse goods reported trade active. Tanners and curriers were well employed.

*Miscellaneous.*—Barbers, clerks, stenographers, etc., reported trade dull. Waiters reported active employment for the month. A large number of white cooks arrived during the month, displacing Chinese. Laundry workers were very active, all being well employed, women receiving \$1.10 to \$1.75 for nine hours.

*Transport.*—All transportation lines were very active. In some instances, train crews worked overtime. Street railway employees were well employed,

with no demand for additional men, though a large number apply daily to get work on the road. Freight-handlers reported trade fair, and teamsters and expressmen were well employed.

#### VICTORIA, B. C., AND DISTRICT.

*Mr. W. E. Ditchburn, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

A number of men were looking for employment in several branches of work. These, in nearly all instances, are newcomers, attracted to this part of the country by the recent reports of scarcity of labour here. It has been ascertained that, with one exception, the industries have all the labour they require, and are receiving numerous applications for employment from new arrivals in the city. The one exception was the Albion stove works, where it is stated that a few stove mounters, moulders and sheet iron workers are required. This firm claims it has failed to secure the services of sufficient mechanics to enable it to satisfactorily fill orders, although paying union wages, \$3.50 per day, to the stove mounters and sheet iron workers, and good wages to the stove-plate moulders, who usually earn from \$3.75 to \$5.50 per day. The firm employs about 45 journeymen regularly. In the building trades, there was a large number of men out of employment, not because building had fallen off, but because the contractors have all the men that they require. All local men are working, thanks to the continued fine weather, which has allowed outdoor work to be carried on this year longer than usual. This has particularly favoured the painting trade. The employing painters say that this has been the best season for years. At the lumber mills, there is no scarcity of white lumber. The British Columbia Marine Railway Company has announced a reduction in the wages of some of its labourers from 25 cents per hour for nine hours to \$2.00 per day of the same number of hours, making a total reduction in wages of \$1.50 per week. The prevailing opinion among the busi-

ness men is that the stringency in the money market all over the continent will not seriously affect this city to any great extent, owing to the developments on a large scale which will take place on Vancouver Island.

#### CONDITION OF LOCAL INDUSTRIES.

*Fishing.*—The fishing and canning season is closed. The whaling station at Kynquot has closed down for the winter, and the whalers have established a station at Nanaimo, the reason being that weather conditions will not permit of successful whaling in the outside waters. This has not been a successful season for the sealers, a little more than half the usual catch being the total for the year. Last year the total catch was 9,900 seals, while this year it was only 5,235, with 38 sea otter skins. The reason given for the poor catch is that the white hunters have to remain outside the 60 mile limit, while the Japanese sealers, who are not bound by the same regulations, hunt inside a three mile limit; consequently, very few seals get outside the limit, and those that do are so wild that it is hard to kill them.

*Lumbering.*—Although numerous logging camps on the mainland have recently closed down, it is not known that any on the lower part of Vancouver Island have done so, except the camp of the Taylor Mill Company at Union Bay, which closed, as is customary, for the winter, and will re-open in the spring. The mills here have plenty of logs for the winter, and all were running full time. No changes in wages have taken place. There is no scarcity of white labour in this industry, but on the contrary, a number of applications for work have been received. It is stated that the Red Cliff Lumber Company, of Duluth, with large holdings on the coast, will soon commence the development of its interests at Alberni; the mill it expects to erect will have a capacity of 250,000 feet per day, and when started, will give employment to a large number of workmen.

*Mining.*—While the smelters located in the Kootenay district have closed down recently, owing to the decline in the price of copper, the smelter at Ladysmith, 40

miles from Victoria, is still running. On Prince of Wales Island, one mine operated by the Alaska Industrial Company continues to ship regularly, and with supplies from the Tye, and other mines, the smelter is kept running. News of another strike of copper at Jedway, on the Queen Charlotte Islands, was brought to the city recently. The seam discovered is stated to be over twelve feet wide in places, and to extend for over a thousand feet; it is expected that it will prove one of the most profitable on the Islands, as the ore is of good grade.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—While fine weather lasts, the building trade will be busy, as there is no abatement in the number of new residences being erected. There were plenty of men to do all the work offering.

*Metal, engineering and shipbuilding.* Iron moulders and iron workers have been kept busy, also machinists, electrical workers and linemen. Stove moulders, stove mounters and sheet metal workers employed at the Albion stove works have all the work they can do. Blacksmiths were busy, with plenty of men to do the work. Boilermakers and shipbuilders were busy at the yards of the British Columbia Marine Railway Company and the Victoria Machine depot, on repair work on the vessels "Charmer" and "Tartar," which were in collision recently, and on the "Indravilli," which recently ran on the rocks when passing Kellett's Bluff. The shipwrights at Turpel's yard will be kept busy for some time. Horseshoers were busy.

*Woodworking and furnishing.*—Woodworkers, upholsterers and polishers had satisfactory employment. Coopers were busy, while pattern-makers were steadily employed.

*Printing.*—Active conditions prevailed. The shortage of linotype operators has been fully supplied. Work at the Government printing office has increased to such an extent that it has been found necessary to install two linotypes. The "Times" is also putting in a new linotype.

*Clothing.*—Journeymen tailors and garment workers had satisfactory employment.

*Food and tobacco preparation.*—The baking and confectionery trade is regular, and does not fluctuate to any extent. This is also the case in the cigar-making industry.

*Miscellaneous.*—Barbers were fully employed. Clerks were steadily employed. Hotel and restaurant employees found business good.

*Transport.*—Normal conditions prevailed with ship labourers, longshoremen and street railway employees. Teamsters and expressmen were busy.

*Unskilled.*—The supply of unskilled labour seems to exceed the demand. The city keeps a force of about 280 men of this class more or less employed, and there is enough new work for a large number of men for some time. It is not thought wise, however, to start much new work at this time of the year, especially cement sidewalks.

#### DISTRICT NOTES.

The price of butter and eggs has increased, the former selling at 50 cents a lb. and the latter at 70 cents a dozen.

#### NANAIMO, B. C., AND DISTRICT.

*Mr. A. E. H. Spencer, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

There has been a marked change in the labour market since last month, there being at present a large number of men out of work in the district. The principal industry affected is lumbering, the shutting down of the logging camps and sawmills having thrown a large number of men out of employment. Activity continues in the coal trade, which is the principal industry in this district. Thus far, wholesale and retail dealers have not felt any depression. Travel both by rail and boat has been heavy. There have been no changes in rates of wages or hours of labour.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—There has been little activity among farmers.

*Fishing.*—Fishermen have not had much employment, but the run of herring is expected to commence at any time. The whaling station has commenced operations, having already taken several whales; it employs about 100 men, and there is every indication that the business will be a success, as on the west coast of the Island.

*Mining.*—Conditions at the quartz mines were quiet, but coal mines were still working to full capacity, and not experiencing the shortage of men as during the summer. Unskilled labourers are now in excess of the demand. The new coal mines being opened up in this district are pushing development work, and some of them expect to be shipping soon. Work has been steady at the quarries and at the smelter at Lady-smith.

*Railroad construction and employment.*—Work at clearing the right-of-way for the extension of the railway was progressing. The masonry work on the filling of this city is about finished, and the steam shovel is expected soon. The work is estimated to cost about \$60,000.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons reported employment somewhat quiet, but carpenters and joiners were active for the time of the year. Plumbers were also actively employed, and painters fairly so, but quietness prevailed with builders' labourers.

*Metal, engineering and shipbuilding.*—Machinists and engineers had active employment, but carriage and wagon makers reported conditions somewhat quiet.

*Printing.*—Printers were fully employed.

*Miscellaneous.*—Teamsters and express men reported work active.

*Unskilled.*—While some unskilled labour was employed steadily, there was a large number of men out of employment in the district.

**INDUSTRIAL DISPUTES INVESTIGATION ACT 1907—PROCEEDINGS UNDER THE ACT  
DURING THE MONTH OF NOVEMBER.**

**D**URING the month of November, seven applications for the establishment of Boards of Conciliation and Investigation were received at the Department, being respectively as follows:—

I.—On behalf of the employees of the Duggan and Huntrods Company of Taber. The number of employees affected is estimated at 40.

II.—On behalf of the employees of the Canada West Coal and Coke Company of Taber, Alberta. The number of employees affected is estimated at 150.

III.—On behalf of the employees of the Domestic Coal Company of Taber, Alberta. The number of employees affected is estimated at 50.

IV.—On behalf of the employees of the Strathcona Coal Company, Limited, of Edmonton, Alberta. The number of employees affected is estimated at 40.

V.—On behalf of the Grand Trunk Railway Company of Canada, for the adjustment of differences with the telegraphers employed on its railway. The number of employees affected is estimated at 500.

VI.—On behalf of Pioneer Lodge, No. 1, P. W. A., of Springhill, N. S., relating to various differences between the members of the Lodge and the Cumberland Rail-

way Co. The number of employees affected is estimated at 900.

VII.—On behalf of the Canadian Pacific Railway Company, for the adjustment of differences with the carmen employed on its western lines. The number of employees affected is estimated at 1,215.

Of applications received prior to the beginning of November, proceedings in connection with which remained unfinished at the close of the preceding month, there were the following, viz.: The application on behalf of the employees of the Hillcrest Coal and Coke Company at Hillcrest, Alberta, and the application on behalf of the employees of the Canadian Consolidated Mining and Smelting Company, working in and around the St. Eugene mine at Moyie, B. C.

With regard to the first named of these, the report of the Board established was received during the month, and is printed below.

In the case of the Canadian Consolidated Mining and Smelting Company of Moyie, B. C., the Board proceeded during the month with an investigation of the differences referred to it, but had not reported to the Department at the end of the month. A statement of the proceedings during the month of November, in connection with the various applications, is printed herewith.

**I—SETTLEMENT OF THE DISPUTE AT HILLCREST, ALBERTA.**

**T**HE findings of the Board of Conciliation and Investigation established for the adjustment of differences between the Hillcrest Coal and Coke Company, Limited, at Hillcrest, Alberta, and certain employees of that Company were received in the Department during the month of November. The Board had been established by the Honourable the Minister of Labour on September 24th, on an application made on behalf of the employees, and consisted of Mr. Frank H. Sherman, Taber, Alberta, recommend-

ed by the employees; Mr. J. R. McDonald, Hillcrest, Alberta, recommended by the the employing Company, and the Honourable C. W. Fisher, Speaker of the Legislative Assembly of Alberta, Chairman, appointed by the Minister, the members of the Board appointed on the recommendation of the parties to the dispute having failed to agree on the recommendation of a third member. The Board met on Monday, October 7th, at Frank, Alberta, and endeavoured to arrive at an agreement

without the aid of witnesses. Failing in this, an adjournment was made to Hillcrest, Alberta, where witnesses were examined under oath, and an investigation of the differences before the Board was made, lasting several days. Two reports were presented to the Minister, one signed by the Chairman and Mr. John R. McDonald, the member of the Board appointed on the recommendation of the Company, concerned in the dispute, received in the Department on November 4, and a minority report signed by Mr. Frank H. Sherman, the member of the Board appointed on the recommendation of the employees concerned in the dispute, received in the Department on November 8. Each report made recommendations for the settlement of the differences that had been the subject of investigation.

Subsequently to receiving the findings of the Board, the Department received information respectively from Mr. Frank H. Sherman on behalf of the employees, and from Mr. C. P. Hill, managing director of the employing company concerned in the dispute, to the effect that an agreement had been reached between the Company and its employees on the points at issue. The reports of the Board are printed below.

#### The Majority Report.

To the Honourable,  
The Minister of Labour,  
Ottawa, Ont.

Sir:—

On the twenty-fourth day of September 1907, we, Charles Wellington Fisher, Frank Henry Sherman and John Robert McDonald, were, in pursuance of the provisions of Section 6 of the Industrial Disputes Investigation Act, 1907, constituted a Board of Conciliation and Investigation to endeavour to bring about the settlement of a dispute then existing between the Hillcrest Coal and Coke Company, Limited, of Hillcrest, in the Province of Alberta, hereinafter called "The Company," and certain employees of the Hillcrest Coal and Coke Company, Limited, and to this end expeditiously and carefully to enquire into the dispute and all matters affecting the

merits and the right of settlement thereof.

The said Frank Henry Sherman is the appointee on the recommendation of the employees, John Robert McDonald is the appointee on the recommendation of the company, and Charles Wellington Fisher is the appointee of the Honourable the Minister of Labour.

The undersigned members of your said Board of Conciliation and Investigation hereby beg to submit the following report:

Pursuant to agreement, we, the said Board, met at Frank, in the Province of Alberta, on Monday, the seventh day of October, 1907. We spent the whole day in endeavouring to arrive at an agreement and adjustment of the dispute without the aid of witnesses. Failing to agree, we adjourned to Hillcrest, where we summoned a number of witnesses before us, requiring them to produce the books, papers and other documents necessary to make a thorough investigation, and we spent the rest of the week in taking evidence from witnesses under oath.

John R. Calvin, Peter Patterson and John A. McDonald all appeared on behalf of the employees, and Charles P. Hill appeared on behalf of the Company. Each side was given every opportunity to present its case.

Your Board has carefully weighed the matters affecting the merits of the dispute, and we find that the Company was handicapped to a considerable extent in getting railway cars for shipping coal and extra cost of placing coal on cars.

We, the undersigned members of the Board, make the following recommendations for the settlement of the dispute:—

The following should be the minimum rates paid for the following services, but nothing in this recommendation shall be construed to prevent the employer from paying higher wages or rates to any workman if they so desire.

*Mining.*—Rate to be 50c. per gross ton.

*Yardage.*—Levels to be 10 ft. wide, 7 ft. high on low side, and thickness of coal on upper side, \$1.75 per lineal yard.

*Parallel airway.*—To be 6 ft. x 10 ft., \$1.75 per lineal yard.

*Crosscuts between levels.*—To be 6 ft. x 8 ft., \$1.50 per lineal yard.

*Room crosscuts.*—To be not less than 8 ft. x 8 ft., not to be driven more than 25 ft. from one side, no tracks; \$1.00 per lineal yard.

*Timbering.*—Room timber, maximum to be 10 in. in diameter at butt, and 16 ft. in length, \$1.00 per set; if required to set timber of larger dimensions to be paid for in proportion or set by the Company. Entry timber, maximum to be 12 in. in diameter at butt, 14 ft. in length, \$2.00 per set with lagging; if required to set timber of larger dimensions, to be paid for in proportion or set by the Company.

*Props.*—All props exclusive of those used to set brattice or chutes. Chutes, 5 c. per lineal foot.

*Track laying.*—All tracks to be laid by the Company, except the pair of temporary rails to the face, which should be laid by the miner without charge.

*Chutes.*—Thirty cents per lineal yard, 5 planks 2 x 12, 2 posts every 8 ft., with cross pieces. This includes sheet iron.

*Brattice.*—Five cents per lineal yard for each foot in height.

*Brushing.*—Six ft. wide, 5c. per inch per lineal yard; 12 ft. wide, 10c. per inch per lineal yard. All materials to be delivered at nearest cross-cut to face in rooms; in entries as near the face as possible. Company to take all coal in chutes from nearest cross-cut to face in rooms.

Wages for Company men under ground, 8 hour shifts:

Fire bosses.....	\$3.50
Brattice men.....	3.00
Brattice men's helpers.....	2.50
Timbermen.....	3.00
Drivers.....	2.75
Timber men's helpers.....	2.50
Drivers, wet places.....	3.00
Track layer's.....	3.00
Track layers' helpers.....	2.50
Miners.....	3.00
Miners, wet places.....	3.50
Chutes loaders.....	2.62½
Labourers.....	2.50
Timber handlers.....	2.75
Rock miners.....	3.50
Tower-foot men.....	2.62½ for ten hours
Tower-head men.....	2.62½ "
Slate pickers (boys, \$1.25).....	2.25 "
Car oiler (boys, \$1.50).....	2.25 "
Tally boy.....	1.25 "
Teamsters.....	2.62½ "
Blacksmiths.....	3.67½ "
Blacksmiths' helpers.....	2.62½ "
Carpenter.....	3.67½ "
Carpenters' helpers.....	2.62½ "
Power house engineers.....	3.67½ for twelve hours.
Power house engineers.....	3.15 for eight hours.
Fan man.....	2.62½ for twelve hours
Hoist man.....	2.89 for eight hours.
Box car loader engineer.....	3.15 for ten hours
Tipple engineer.....	3.15 "
Locomotive engineer.....	3.15 "
Locomotive engineer's helper.....	2.75 "
Car repairers.....	3.15 "
Lampmen.....\$2.25 to	3.15 for twelve hours.
Lampmen.....\$2.25 to	2.62½ for eight hours
Fireman.....	2.62½ for eight hours
Box car shovellers.....	2.62½ for ten hours
I. R. R. car handler.....	2.36 "
All other outside labour.....	2.25 "

We further recommend as follows:—

Any miner failing to earn the minimum rate of wages, \$3.00 per day, on account of abnormal conditions of his working place, the Company should pay him a

sufficient amount to secure him the same minimum.

In any case where it may appear that a member of the United Mine Workers of America has not been fairly treated, the Company should, through its officials, meet a pit committee appointed by the United Mine Workers of America.

This committee should first meet the pit boss or mine manager, and endeavour to settle the trouble, but in case of their disagreement, it should be referred to the superintendent of the Company and president of the Local Union; should they fail to agree, it should be referred to the general manager and district president of the United Mine Workers of America for adjustment.

The pit committee above referred to should have access to the mine from time to time to make examinations as allowed by the Coal Mines Regulations Ordinance, and for the purpose of investigating any disputes that may occur between the officials of the Company and the men employed in the mine.

The Company should deliver workmen house coal at \$2.50 per ton.

The Company should allow the miners to employ check-weighers, and should grant the said check-weighers every facility to enable them to render a correct account of all coal weighed; and should allow the cars to be tarred from time to time, and the machine to be properly tested from time to time; and should deduce from the wages of all contract miners such amounts as will be designated from time to time, and should pay over the same to the Secretary of the Local Union, for wages of check-weighers.

Men should be allowed to work as partners, but in the event of it being necessary for the foremen calling upon any two who may be working as partners, to do any class of work, other than their regular work at the working face, paid by day wage, that the minimum miner's wage, viz., \$3.00 per day, should be paid to but one of the said partners, the other receiving what is designated as helper's wage, viz., \$2.50 per day.

When a place is abnormal, preventing said partners from earning the minimum

miner's wage as designated in this contract, viz., \$3.00 per day, but one of the said partners should be made up to the said minimum, the other receiving a minimum day wage, viz., \$2.50. per day.

The Company should give to the United Mine Workers of America full recognition and concede the "check off system," i. e., upon individual request in writing by any of the Company's employees, should deduct such amounts from their wages each month as may be designated for dues, assessments and initiation fees. In other words, the Company should retain from the wages due employees any sum they may have given orders upon the Company for, in writing, payable to the persons or associations designated in such orders.

We enclose the depositions of the witnesses which were taken before us.

All of which we most respectfully submit.

(Sgd.) C. W. FISHER,  
*Chairman of the Board.*

(Sgd.) JOHN R. McDONALD,  
*Appointee of the Company.*

Cochrane, Alberta, October 24th, 1907.

#### The minority report.

To the Honourable  
The Minister of Labour,  
Ottawa, Ont.

Re the dispute at the coal mines of the Hillcrest Coal and Coke Company between the Company and its employees:

The undersigned, acting as representative of the employees upon the Board of Investigation and Conciliation appointed by you, begs to report as follows:

Your Board spent considerable time at Frank, Hillcrest and Cochrane, taking evidence and deliberating upon the evidence before it. Several attempts were made during the course of the investigation to settle the dispute, but of no avail.

I failed to agree with my colleagues upon their recommendations to you, and respectfully submit my findings and recommendations for the settlement of the dispute.

#### COST OF PRODUCING COAL.

The main argument of the employers for their not conceding to the demands of the employees was on the excessive cost of producing coal as compared with other mines in the same coal field. A number of documents were submitted and statistics were quoted by the Company to prove this. I believe them to be incorrect, and in all cases where these arguments are used by employers a competent expert should be employed to examine all books and accounts in order to find the actual facts. The Company were frequently asked by me to produce their costs sheets, but always said that they had none. The cost of producing coal is generally stated at least once a month on a cost sheet by the mine managers, and submitted to the directors. That this was done was shown by the daily cost sheet sent to Chairman Fisher at Cochrane, and bears the date of, Sept. 10th. Hillcrest mine output, 424 tons; shipped 323 tons. Total cost of labour and materials, \$394.65; 424 tons costing \$394.85, or 93.1 per ton. Number of men employed, 121. On further examining the documents, you may find further details. It would not be fair to take the above and say that this is the cost of producing coal, inasmuch as this is only one day's report. To my mind this gives a fair inkling of what the proper examination of the books would have revealed.

By a reference to the certified statement put in as evidence by General Manager C. P. Hill, you will find a sum of \$701,000 is stated to have been invested in the Company. To anyone acquainted with the property of the Company, this is ridiculous, and suggests "watered stock." This company, as with as others, can pay a good return upon actual cash invested, but not upon "watered stock."

#### DISCRIMINATION BY C. P. R.

The price paid to the Company for coal by the C. P. R. was said to be \$2.00 per ton, run of mine. To the commercial trade, \$2.40 per ton was said to be the price charged. This gives the C. P. R. an advantage over other people of 40

cents per ton. It was also shown that all the coal could be sold to the commercial trade for \$2.40 per ton, but that the C. P. R. would not provide transportation facilities to enable the Company to market its product properly. It would appear that there is a concerted effort on the part of the C. P. R. officials to cripple the commercial trade of small mines in order to obtain coal cheap. Shortage of cars at Hillcrest mines is also responsible for some discontent among the workmen, owing to their losing time. I would beg to recommend that the government take some measures to protect the small companies in the Crows' Nest Pass from the rapacity of the C. P. R.

#### RECOMMENDATION FOR SETTLEMENT.

In order that the miners of Hillcrest may be placed upon a level with the other miners in the Frank coal field, I recommend that they receive the following contract rates, viz., 55c per ton of 2,240 lbs., together with the rates for dead work that prevail in Coleman No. 2 seams.

#### DAY WORK RATES.

Underground and outside labour, the same as prevails in the surrounding collieries belonging to the Western Coal Operators Association. The conditions and hours of labour should be in accordance with the general agreements at

present in force at the mines of the above association.

It being admitted by the Company that they were already paying more than district rates to many of their employees whom they considered exceptionally good men, a clause should be inserted protecting these men against any reduction under a new agreement.

The new agreement should date from the 1st day of September, 1907, until March 31st, 1909.

If the Company will agree with its employees along these lines, I see no reason why industrial peace should not prevail and a prosperous time for the Company ensue.

All of which is respectfully submitted by

(Sgd.) F. H. SHERMAN,  
*Member of Board.*

#### A Note from the Employing Company.

Mr. C. P. Hill, Managing Director and Treasurer of the Hillcrest Coal and Coke Company, Ltd., writing under date of Nov. 18, in acknowledgement of the receipt of copies of the above reports from the Department, stated:

"I am now pleased to report that a settlement has been arrived at between the Company and its men closely along the lines of the recommendation of the said Board of Conciliation, and wish to extend to your good offices my most sincere thanks for your assistance in the matter."

## II—THREE APPLICATIONS FROM COAL MINERS AT TABER, ALTA.

THREE several applications for the establishment of Boards of Conciliation and Investigation were received on November 5 from coal miners at Taber, Alta. being on behalf of the employees respectively of the Canada West Coal and Coke Company, the Duggan-Huntrods Company and the Domestic Coal Company, the differences indicated in the three cases being practically the same. In the course of the establishment of the different Boards, the Minister was informed by the members appointed on the recommendation of the respective parties to the

several disputes that they had failed in each case to agree on a recommendation with regard to a third member, and was requested therefore to appoint a third member and chairman; the members in question also suggesting to the Minister the desirability of appointing the same chairman in each case. The Minister thereupon on November 20 appointed the Honourable Mr. Justice Stuart of Calgary, Alta., to be third member and chairman in the case of each of the three Boards.

The differences referred for adjust-

ment in the case of each application related to wages, hours and conditions of labour, a schedule setting forth the men's demands being submitted in each case. The demands included full recognition of the union, the check-off system, eight hours from bank to bank, a minimum daily wage of \$3 to miners, weekly payment of wages, etc. In addition to the number of employees affected in each case, the applications respectively set forth that the disputes concerned a number of persons using domestic coal on the prairies. The Department had not, at the end of the month, received information concerning the proceedings of the several Boards.

The application on behalf of the employees of the Canada West Coal and Coke Company was signed by Hopkin Evans and Robert Doodson, president and secretary respectively of Local Union No. 1,959 of the United Mine Workers of America. The number of employees concerned in the dispute was estimated at 150. The Board was duly established by the Honourable the Acting Minister, being constituted as follows: Frank H. Sherman, Taber, recommended by the employees; S. A. Jones, Taber, Alta., recommended by the employers, and the

Honourable Mr. Justice Stuart, Calgary chairman.

The application on behalf of the employees of the Duggan-Huntrods Company was signed by James Boyle and William Murdock, president and secretary respectively of Local Union No. 102 of the United Mine Workers of America. The number of employees concerned was estimated at 40. The Board was duly established as follows: Frank H. Sherman, Taber, recommended by the employees; Joseph Shorthouse, Taber, recommended by the employer; the Honourable Mr. Justice Stuart, Calgary, chairman.

The application on behalf of the employees of the Domestic Coal Company was signed by James Boyle and William Murdock, president and secretary respectively of Local Union No. 102 of the United Mine Workers of America. The number of employees concerned in the dispute was estimated at 50. The Board was duly constituted as follows: Frank H. Sherman, Taber, recommended by the employees; Robert Duggan, Taber, recommended by the employer; the Honourable Mr. Justice Stuart, Calgary, chairman.

### III.—DIFFERENCES BETWEEN THE CANADIAN PACIFIC RAILWAY AND ITS WESTERN CARMEN.

ON November 22, the Department received an application on behalf of the Canadian Pacific Railway and signed by Mr. Wm. Cross, of Winnipeg, assistant to the 2nd Vice-President, for the establishment of a Board of Conciliation and Investigation to which might be referred for adjustment certain differences between the Company and the carmen employed on its western lines, and being members of the Brotherhood of Railway Carmen of America. The number of employees affected by the dispute was estimated at 1,215, of whom 15 were stated to be under the age of 21 years. The dispute was said to relate to certain demands made by the employees, namely: (i) for a reduction in the number of working hours from ten to nine hours;

(ii) for an advance of pay to compensate for such reduction in the working hours, which represented, according to the application, advances of wages varying from eleven to twenty per cent. The Railway Company took exception to both these demands. A further subject of difference was indicated as follows: viz., "The Company and the carmen desire the Board to inquire into and make recommendations concerning the pipe-fitters in connection with the carmen."

The Department also received a communication from the employees concerned enclosing a copy of the rates of pay and change of hours which had been presented by the employees through a committee to Mr. G. H. Eaton, assistant master carbuilder, and head of the car

department, western lines, Canadian Pacific Railway.

The Board was duly established by the Honourable, the Acting Minister of Labour, being constituted as follows:—Mr. A. M. Nanton, Winnipeg; recommended by the employing company; Mr. J. H. McVetty, Vancouver, recommended

by the employees; and Professor Odlum, Vancouver, B. C., chairman, recommended by the foregoing members. The Board was fully constituted on Nov. 26.

No proceedings were taken by the Board prior to the close of the month, but arrangements were made for its meeting at Winnipeg on December 3.

#### IV.—MINING DISPUTES AT STRATHCONA, ALTA., REFERRED FOR ADJUSTMENT.

ON November 12 the Department received a communication signed by John W. Saint and John R. Galvin on behalf of the employees of the Strathcona Coal Company Limited, being members of the United Mine Workers, America, making application for the establishment of a Board of Conciliation and Investigation to which might be referred for adjustment certain differences between the employees and employing company above indicated. The number of persons concerned in the dispute was estimated at 40. The demands on the part of the employees were stated to be as follows, viz:—A change in the hours of labour requiring an 8 hour day from bank to bank, a change in wages re-

quiring weekly pay of legal tender, a change generally of the conditions surrounding the working in and about the mine, and recognition of the United Mine Workers of America.

The Board demanded was duly established by the Honourable the Acting Minister of Labour, being constituted as follows:—Frank H. Sherman, Taber, Alta., recommended by the employees; F. L. Otter, Edmonton, Alta. recommended by the employing company; and George Montgomery, Edmonton, chairman, appointed by the Minister on the recommendation of the foregoing members. Mr. Montgomery was appointed under date of December 2.

#### V—A NEW BOARD REQUESTED TO DEAL WITH DIFFERENCES AT SPRINGHILL, N. S.

THE Department received, on November 21, an application signed by James Cawfield and William Watkins, master workman and secretary respectively, of Pioneer Lodge, No. 1, Provincial Workmen's Association, for the establishment of a Board of Conciliation and Investigation to which might be referred for adjustment certain differences between the Cumberland Railway and Coal Company of Springhill, N. S., and certain of its employees. The number of persons likely to be affected by the dispute was estimated at 1,600, this being the total number of employees, men and boys, of the Company; of the number, 900, it was stated, belong to the Union making the application. The causes of differences were set forth as follows:—

“First case is in respect to the fulfilment of an agreement between the parties

for payment for stone in pillar work where it exists, on the basis of 4c. per inch per lineal yard for 4 in. and upwards.

“Second case is in respect to the adoption of a general wage schedule for coal cutters and their loaders.

“Third case is in respect to the matter of the change in the mode of payment of the mineral gotten from box to tonnage price.

“Pioneer Lodge, No. 1, Provincial Workmen's Association, further respectfully makes application for a reference to the Board of Conciliation now being applied for, of any cases in dispute which may arise between the contending parties, from the date of this application up to, and including the date of the sittings of the said Board. The object of the Lodge in this respect being to have a final and satisfactory adjustment of all matters in

dispute between it and the said Company, which may be pending up to the date of the sittings of proposed Board."

Mr. R. B. Murray, of Springhill, was appointed a member of the Board on the

recommendation of the employees concerned in the dispute. The constitution of the Board had not been completed at the close of the month of November.

#### VI.—DISPUTE BETWEEN GRAND TRUNK RAILWAY AND ITS TELEGRAPHERS REFERRED TO A BOARD.

ON Nov. 19 the Department received a communication from Mr. W. G. Brownlee, General Transportation Manager of the Grand Trunk Railway Company, making application on behalf of the railway named for the establishment of a Board of Conciliation and Investigation to which might be referred for adjustment certain differences between the employing company named and the railway telegraphers in its employment. The number of persons affected by the dispute was placed approximately at five hundred and the differences were said to have been the subject of repeated conferences between Mr. Brownlee, on behalf of the Company, and a committee appointed by the telegraphers, since the 25th of September last, as well as of conferences between Messrs. C. M. Hays, second vice-president and general manager on the one hand

and the committee of telegraphers on the other, at which the questions still open were discussed, but it had not been possible to reach an agreement. The differences were set forth in the form of schedules presenting the claims of the Company and the men respectively, and included question relating to general conditions of labour, hours, and wages of telegraphers.

The Board was duly established, being constituted as follows, namely, Mr. J. G. O'Donoghue, Toronto, recommended by the employees; Mr. Wallace Nesbitt, K. C., Toronto, nominated by the employing company; and Professor Adam Shortt, Kingston, Chairman, appointed on the recommendation of the foregoing members. The Board met at Montreal on December 3, to proceed with the investigation of the differences referred under the Act.

#### VII.—REPORT OF THE SECOND BOARD APPOINTED TO ENQUIRE INTO THE DIFFERENCES AT SPRINGHILL. N. S.

THE members of Pioneer Lodge, No. 1 P. W. A., being the employees of the Cumberland Railway and Coal Company of Springhill, N. S., who had been on strike from August 1, having resumed work on October 31, the report received by the Minister of Labour in September from the Board of Conciliation and Investigation established to enquire into certain differences, and consisting of His Honour Judge Patterson, Mr. R. B. Murray and Mr. P. S. Archibald, was sent to each of the parties to the dispute. The receipt of the report was acknowledged on behalf of the employees in a communication received in the Department on November 25, in which it was stated that the members of Pioneer Lodge decided to accept the findings on their

part. The Department had not received word on this point from the Company at the end of the month.

The report of the Board in question, which is signed by the Chairman of the Board and Mr. R. B. Murray, is as follows:—

The Honourable Rodolphe Lemieux,  
Minister of Labour,  
Ottawa.

Sir:

The undersigned members of the Board of Conciliation and Investigation of a dispute between the Cumberland Railway and Coal Company, and certain employees of said Company beg leave to report as follows:—

The Board composed of R. B. Murray

and P. S. Archibald, Esquires, and Judge Patterson, Chairman, pursuant to notice given by the Chairman to the parties interested, met on the 31st of July, 1907, at 10 o'clock a. m., in a public hall in Springhill, the locality of the said dispute, and having taken the proper oath of office, proceeded with the reference.

The employees were represented by three of their number designated by Pioneer Lodge, P. W. A., to which all the employees interested, belong.

We desire to compliment them on the fair and honourable way in which they conducted their case.

The Company was represented by three members of its staff, with whose efforts to substantiate the Company's contention no fault could be found. Unfortunately, the representatives of the Company later on withdrew from attendance at the Board meetings.

After formal opening, the taking of evidence was begun and continued until about noon, when an adjournment of two hours was taken. This adjournment the Chairman spent in endeavouring to effect a settlement, not only of the matters specifically before the Board, but of matters that had been dealt with by a previous Board, and upon which a strike was threatened. The taking of evidence was resumed at half-past two, and continued until four o'clock, when another adjournment was taken, and negotiations for settlement were again entered into by the Chairman. He had repeated conferences with the employees and with the solicitor of the Company, and on behalf of the employees made a number of proposals to the Company through their solicitor, but the Company could not see its way clear to accept any of the offers so made. No settlement having been reached, the threatened strike went on. After consultation with both employees and the Company, when the Board met on the morning of August first, it was decided that in view of the fact that the strike was on, it would be wise for the Board to adjourn the present reference, to reconvene at the call of the Chairman.

On receipt of your telegram of the 6th instant, the Chairman called the Board together to meet at Springhill at three

p. m. on Monday, September 9th. Immediately upon the meeting of the Board, the solicitor of the Company objected to the Board going on, his objection shortly being that the employees having ceased work in accordance with a notice they had given the Company, were no longer employees of the Company, and the Industrial Disputes Investigation Act only covered cases of disputes between employers and employees actually at work. In view of this objection, the Board adjourned until the next morning, in order that the Chairman might consult you. The Chairman accordingly wired you, asking for instructions. Next morning, no reply having been received, another adjournment was taken until four o'clock in the afternoon. At this last named hour there was still no reply from you, and a further adjournment was taken until Wednesday, September 11th, at four p.m. Meantime, a telegram was received from your Deputy advising the Board, under the circumstances, to do what it deemed most expedient. In order that no injustice might be done the Company, who at this meeting were not represented, an adjournment was had until the next morning, and a written notice given to the Company of the Board's intention to proceed with the hearing.

When the Board met again, pursuant to adjournment, Mr. Archibald, the Company's nominee on the Board, was not present, though he was fully aware of the time and place to which the Board had adjourned, and had consented to the adjournment as made. No representatives were present on behalf of the Company at this meeting, or any meeting subsequent to that on the 9th instant. The undersigned went on with the taking of the evidence, and when it was about completed, the Chairman received the following communication from Mr. Archibald:

SPRINGHILL, Nova Scotia,  
12th September.

"Mr. Justice Patterson,  
Chairman,  
Board of Conciliation, etc.

Dear Sir:

In my opinion, as I explained to you personally, the Board has no jurisdiction

to proceed with the Arbitration. I must therefore, with regret, refuse to act any longer as a member (Section 48 (2) of the Act).

"The Department evidently recognize this as a correct position, or we should have received instructions to the contrary.

Yours truly,

(Sgd.) P. S. ARCHIBALD."

We completed the taking of the evidence, all of which, with the various exhibits, is annexed hereto.

During the periods of adjournment, the Chairman was actively engaged in carrying on negotiations between the parties, but utterly without success.

When the Company withdrew from further participation in the proceedings, the men's case was not finished. We have therefore had no evidence on behalf of the Company, and were without the assistance of their nominee in preparing this report. We recognize that the value of any report or finding made under such circumstances must be of necessity greatly decreased. Nevertheless, we deem it our duty to give you the result of our consideration of the evidence presented to us. We will deal with the cases in the order set out in the application for appointment of Board.

Case (a) This case is stated in the application thus:

"There has been an arrangement in operation for some years whereby close work and ribbing in bords is paid so much per box for coal and so much per lineal yard for wall, and when the bords are driven to the limit and the work of extracting the pillars commences, the equivalent of the yardage should be added to the price per box in pillars, less 4c. per box differential in the price of bord and pillar work."

The Company's reply to this was as follows:

"There has never been an agreement in operation, nor is there one at the present time, in respect to the price per box for drawing pillars in the entire east side of No. 3 mine, as set out in the complaint. At no time in this section of the mine has the equivalent of the yardage been

added to the price per box in pillars less 4c. differential. On the contrary, in each successive lift, special rates for pillar work have been from time to time made to suit the varying local conditions."

We have no hesitation in finding that such an arrangement as claimed by the employees has been in force since 1894, and is still in force. A written agreement between the Company and the employees dated May 18th, 1894, was put in evidence. This agreement contains this clause, the only reference in it to this matter:

"It is mutually agreed and understood between the parties that the arrangement previously entered into by the said Christopher Hargreaves and a Committee of said Lodge in reference to the difference in price between close and pillar work, viz., four cents, is not affected by anything in this agreement."

The "arrangement previously entered into" referred to, and in a measure ratified by this agreement, was apparently a verbal one, but its existence is sufficiently established apart altogether from the agreement, by the production of the original minute book of Pioneer Lodge, P. W. A., where, under date of April 26th, 1894, there is a report received from a committee appointed to confer with the management on this and other disputed points, setting out that this differential price had been agreed on—a report which the Lodge adopted. The cross-examination, to which the Company's representatives subjected the witnesses on behalf of the employees, as well as their reply, shows that the Company do not actually deny that such an agreement was made. What they do say is that it does not apply "in the entire east side of No. 3 mine"—in other words, that it was of local application. One will search in vain the clause we have quoted from the agreement for any hint that it was of merely local application, or not to apply to the whole colliery. We can hardly believe the Company serious in suggesting that we should read the Agreement as not applying to the entire east side of No. 3 mine. If they were, it is easy to see that they would similarly suggest it did not apply to any other section where a dispute might happen to arise. It was never suggested by cross-examination, nor is it suggested in the reply, that the agree-

ment was changed by any subsequent agreement. What the Company did endeavour to show was that men had been paid and had accepted less than, under the agreement, these men were entitled to, but we do not think we should be asked, or expected to hold, that even a long-established and universally recognized custom on the part of the men to take less than they were entitled to would warrant the Company in saying that the agreement was abrogated. But far from a long established or universally recognized custom being proved, all that was shown to us was that an occasional man, sometimes a newcomer, who did not know of the agreement, had been content to take less than he might have had.

In conclusion as to Case (a) we find that the Agreement of May 18th, 1894, as to the difference in price between bord and pillar work has never been changed, and is still in force over the whole colliery.

With respect to the second case (b) referred to in the application for this reference, the section where the claim is made for more price is known as the 21 incline, east side, top seam, No. 3 mine.

It appears from the evidence that ribbing in a pillar consists practically of driving a new bord, the work in connection with one being almost identical with the other, save that in some cases with ribbing in, the coal sets or hardens, making the work more difficult than when driving an ordinary close place.

It further appears from the evidence of the witnesses examined in this connection that it has always been the practice in

this colliery to pay the same price per box for coal and the same amount for yardage in ribbing in, as in bords or other close work.

All the evidence in this case was taken in the absence of the Company's representatives, and except from their reply, no idea can be formed of what their answer would have been. The employees produced a mass of evidence in support of their contention, and there being no contradiction of it, the undersigned are bound to hold the case made out, that is to say, that in the section in dispute, the yardage for ribbing in should be the same as yardage for tight bords, and the price that should be paid for ribbing in in such section is 43c. per box and \$1.25 per yard.

The extraordinary course pursued by one of the parties to the investigation has left us in some doubt as to whether we should at this time make the full report required by Section 25 of the Act. Possibly only an interim report should for the present be sent. After carefully considering the matter, we have decided that the other party having done everything in its power to aid the Board should not be denied whatever benefit there may be from our conclusions upon the evidence submitted.

All of which is respectfully submitted.

(Sgd.) GEO. PATTERSON,  
*Chairman.*

(Sgd.) R. B. MURRAY.

Springhill, N. S., Sept. 18th, 1907.

#### VIII.—AN INFRINGEMENT OF THE ACT IN ALBERTA.

A prosecution under the provisions of the Industrial Disputes Investigation Act, 1907, was brought against the Hillcrest Coal and Coke Company of Hillcrest, Alta., during the month of October, as was briefly mentioned in the issue of the *Labour Gazette* for November. The case was heard before Inspector P. Belcher, R. N. W. M. P., police magistrate at Pincher Creek, Alta., who, under section 67 of the Act, furnished the Department with the following official report of the proceedings:

"I have the honour to state that on the 10th day of October, 1907, while the Board of Conciliation was sitting at Hillcrest, and before it had finished its work, the Hillcrest Coal and Coke Company posted up notices which caused the miners to stop work; also on the night of the 10th the whistle was blown by the orders of the Company, signalling that there would be no work on the next day. Owing to these causes, the mine was closed for two days. The Miners' Union laid an information against the Company for causing

a lockout, and the case was heard by me. On the evidence produced I convicted the Company and fined them \$100 for each day and costs \$6.25, or altogether \$206.25. The Company have appealed the case to the next sitting of the Su-

preme Court of Macleod district. The notices posted up have been forwarded to the Clerk of the Court, Macleod, as exhibits, also all the papers in connection with the case."

#### ONTARIO LEGISLATION AFFECTING LABOUR, 1907.

AT the third session of the eleventh legislature of Ontario, which met on January 24th, 1907, and prorogued in April, 1907, a number of acts were passed of interest from the standpoint of industry and labour.\* A review of the more important of these is given in the following article:—

##### Stationary Engineers.

An act was passed providing for the appointment of a Board of Examiners, to consist of three competent and independent engineers, whose duties are to prescribe subjects in which candidates for certificates of qualification as stationary engineers may be examined, and to conduct the examinations in question. The Act provides for the issuing of Government regulations as to the examination of candidates, the granting of certificates, the fixing of fees for examination, the cancellation of certificates, and the remuneration of the Board. No person who is not a holder of a certificate under this Act will be permitted to operate or have charge of a steam plant in Ontario after July 1st, 1908, except in a case of emergency, and then only for a period not exceeding thirty days. Certificates of qualification may, upon evidence of good character and sobriety, and upon payment of the prescribed fee, be obtained by any engineer now holding a certificate from an association of stationary engineers in the Province, by any one who is the holder of a marine or locomotive engineer's certificate, by any one who is in charge of a steam plant of twenty-five horse power or over in the Province, or by any one who has had at

least two years' experience in the operation of a steam plant of twenty-five horse power or over in the Province. The Act requires that certificates be exposed in the engine-room, as *prima facie* evidence of qualification. Provision is made for appeals from the Board of Examiners to the Minister of Agriculture, for an annual report of the Board to the Minister, and for the imposition of a penalty of not less than ten or more than twenty-five dollars, with costs, for operating an engine without a license.

An important section of the Act is one which provides that factory inspectors may be appointed to the Board and called upon to assist in the enforcement of the Act. In order that this additional work might be adequately performed, and to assist generally in the carrying out of the Factories Act, the supplementary estimates contained an appropriation for the appointment of additional inspectors.\*\*

The legislation amending the Stationary Engineer's Act passed in 1906, was repealed. (1)

##### The Hydro-Electric Power Commission.

An Act was passed constituting the Hydro-Electric Power Commission of Ontario as a body corporate, to consist of three persons, two of whom may be, and one of whom must be, a member of the executive council. The Commission is empowered to appoint a chief engineer, an accountant, a secretary, and such other officers and workmen as may be necessary, the salary of such to be fixed by the Commission, subject to the rati-

\* The volume containing the statutes passed at the session was recently issued and a copy received during November at the Department of Labour through the courtesy of the King's Printer of Ontario. For the sake of accuracy a review of this legislation was delayed until such time as the statutes were available, as finally printed.

\*\* For reference to the appointment of these officers see under heading of "Notes" in opening article of present issue.

(1). Chapter 32, 1907. For a review of the legislation passed in 1906 in this connection see the *Labour Gazette* for September, 1906, page 281.

fication of the Lieutenant-Governor-in-Council. The Commission may, from time to time, report to the Lieutenant-Governor-in-Council with regard to lands, machinery, etc., to be acquired for the purposes of the Act, or with regard to the quantity of the product of any corporation or person generating electric power or energy in Ontario, or bringing such power into the province for use or transmission there. The Commission may be authorized, upon its own report, to secure lands, works, water privileges, etc.; to construct or expropriate and operate the plants and property of transmission companies, or to contract for the supply of power. The powers of the Commission in the matter of expropriation are defined at some length. The Commission is required to report upon water powers or privileges when required by the Lieutenant-Governor-in-Council. Municipal corporations may apply to the Commission for a supply of power, and the commission is thereupon required to furnish the corporation with a statement of prices, cost, plant, etc. A provisional contract may thereupon be entered into between the Commission and the Municipal Council, the same to be submitted for approval to the rate-payers. Railways and other corporations may be supplied with power by the Commission. All costs of works, together with other specified annual charges, must be borne by the municipality which has entered into a contract with the Commission. Complaints as to excessive rates charged by a municipal corporation, or that the corporation is using the power conferred upon it by the Act for the purpose of granting a bonus by supplying power below cost to manufacturers, may be heard by the Commission and a penalty imposed. The fine for disobedience of an order of the Commission is placed at \$100 per day during which the neglect of any order of the Commission continues (<sup>2</sup>).

#### Public Utilities.

In an act "Respecting Certain Railways and Other Corporations," the "term public utility" is defined as meaning and includ-

ing "any water works, gas works, electric heat, light and power works, telegraph and telephone lines, railways however operated, street railways, and works for the transmission of gas, oil, water or electrical power or energy, or any similar works supplying the general public with necessities or conveniences."

The same Act provides for the forfeiture of rights by a company or corporation operating a public utility under a general or a special act of Ontario in case the company subsequently passes out of the jurisdiction of the province. Municipal corporations are forbidden to contract with companies not in the jurisdiction of the province. (<sup>3</sup>).

In the consolidation of the Ontario Companies Act, a special part is devoted to the regulation of companies operating municipal franchises and public utilities. (<sup>4</sup>)

The Ontario Railway and Municipal Board is given power to enquire into the rates charged for public utilities operated by municipalities. (<sup>5</sup>)

#### Encouragement of Metal Refining and Smelting.

A metal refining bounty act was passed authorizing the payment of certain specified bounties on metals or ores refined in the province from ores raised and mined in the province. The metals specified and the maximum amount to be allowed as bounty in any one year are: nickel, \$60,000; cobalt, \$30,000; copper, \$60,000, and arsenic, \$15,000. The bounty is to lapse at the end of five years (<sup>6</sup>).

A bonus to encourage the smelting in Canada of iron ores mined in the Province of Ontario, and to encourage the use in Canada of natural gas produced in the Province of Ontario, was also authorized. (<sup>7</sup>)

#### Legislation Affecting Mines.

The mines act passed in 1906 was extensively amended. The supplementary

(<sup>2</sup>) Chapter 37.

(<sup>3</sup>) Chapter 34, Sections 154-168.

(<sup>4</sup>) Chapter 38.

(<sup>5</sup>) Chapter 14.

(<sup>7</sup>) Chapter 9, Section 46.

(<sup>2</sup>) Chapter 19.

revenue act, 1907, also contained extended provisions with reference to the assessment and taxation of mines, oil lands, gas wells, etc. <sup>(8)</sup>

#### Miscellaneous.

An act was passed for the improvement of *public highways*, for which an appropriation of \$1,000,000 was set aside, to be administered under a plan involving the co-operation of counties and the assumption of highways by the latter. <sup>(9)</sup> An act for the granting of aid to *colonization roads* was also passed <sup>(10)</sup>. The act provides that statute labour shall be estimated at two dollars per day of ten hours for each labourer and four dollars per day of ten hours for each man and team.

In an act amending and consolidating the Ontario Companies' Act, special sections defining the liability of directors of companies for *wages*, and establishing a special privilege for wages in the winding up of corporations were re-enacted. <sup>(11)</sup>

An addition was made to the *San José Scale Act* of a section permitting an inspector to give notice to an owner of the presence of scale, and to have the trees or shrubs sprayed forthwith at the expense of the owner. <sup>(12)</sup>

The subsection of the consolidated municipal act, 1903, having reference to *smoke prevention* was repealed, and a more stringent clause enacted in its place <sup>(13)</sup>. The same act was amended by the addition of a clause permitting municipal councils to make contracts with street railway companies for *watering the streets* for any number of years not exceeding five <sup>(14)</sup>.

With reference to the *taxation of street railways*, it was provided that in computing mileage, each mile of double track may be counted as two miles of single track, though switches, sidings, tracks into car stables, curves at street corners,

or portions of track not in general use for passenger traffic are not to be counted. <sup>(15)</sup>

An act was passed amending and consolidating the law respecting the *Temiscaming and Northern Ontario Railway*, in which provision is made for the management of the road by a board of commissioners whose powers are defined at length. <sup>(16)</sup>

The act providing for the incorporation of *co-operative cold storage associations* was amended verbally <sup>(17)</sup>. In the Consolidated Companies' Act, it is provided that no shareholder of a co-operative company or of a cheese and butter manufacturing company carried on for co-operative purposes may hold shares exceeding \$1,000 <sup>(18)</sup>.

A special act was passed to prevent the wasting of *natural gas*, and to provide for the plugging of abandoned wells. The act provided for the appointment of inspectors to secure its enforcement <sup>(19)</sup>.

An addition was made to the Public Schools Act, giving to corporations, societies, agents or persons having the custody of an *immigrant child*, the power to send the same to the public or separate school of the municipality or school section in which the child resides <sup>(20)</sup>.

An amendment and consolidation of the Ontario Game and Fisheries Act was enacted. Thirteen sections of the act deals with the protection of the *fisheries* of the province. It is forbidden to "hunt, take, kill or destroy any game, or use any gun or engine for that purpose" on the Lord's Day <sup>(21)</sup>.

The Consolidated Municipal Act was amended by an addition permitting the council of a municipality to subscribe for and accept membership in any *union of Ontario municipalities* designed for the purpose of furthering the interests of municipalities <sup>(22)</sup>. The same act was amended so as to permit the passing of

<sup>(8)</sup> Chapters 13 and 9. See also Chap. 23, Sec. 314.

<sup>(9)</sup> Chapter 16.

<sup>(10)</sup> Chapter 17.

<sup>(11)</sup> Chapter 34, sec. 94, 156 and 174. See also *Labour Gazette* for October, 1906, page 377-78 for a review of this provision.

by-laws for laying pipes or *conduits* for *electric wires* <sup>(23)</sup>.

The town of Berlin was authorized to take over the property of the *street railway* company on complying with certain conditions <sup>(24)</sup>.

<sup>(23)</sup>. Chapter 40, sec. 13.

<sup>(24)</sup>. Chapter 58, sec. 1.

The Ontario Railway and Municipal Board Act of 1906 was amended by additions extending the powers of the Board and permitting of the *appointment of counsel* upon the request of the board <sup>(25)</sup>.

<sup>(25)</sup>. Chapter 38.

**PUBLIC OWNERSHIP AND OPERATION OF TELEPHONE SYSTEM IN WESTERN CANADA.**

**D**URING the past two years, a movement looking to the establishment and operation of telephones under government or municipal control has made rapid progress in the North-west provinces of Canada, including Manitoba, Alberta and Saskatchewan.

In two of the provinces in question, Manitoba and Alberta, legislation authorizing the construction of such systems was passed during 1906, the general principle being that the local services should be controlled by the municipalities, while the provincial governments should direct the operation of the long distance lines. In Manitoba, the enactment of this legislation was preceded by an investigation carried out by a select committee of the provincial legislature.\* In both of these provinces, steps were immediately taken to carry the legislation in question into effect, a statement, supplied by courtesy of the officials concerned, being given below of the work of construction and installation completed during the present calendar year.

**Government Telephones in Alberta.**

The most substantial progress made has been in the Province of Alberta, where the following number of miles of long distance trunk telephone lines were completed by the Department of Public Works of Alberta during 1907:—

Line.	Miles.
Edmonton-Lloydminster line.....	208
MacLeod-Blairmore line.....	60
Calgary-Banff line.....	93
Lacombe-Stettler line.....	55
Wetaskwin-Daysland line.....	60
Total.....	476

Local exchanges have been installed at Fort Saskatchewan, Lamont, Innisfail, Vegreville, Vermillion, Lloydminster, Daysland, Camrose, Rosenroll, Stettler, Pincher Creek, Blairmore, Frank, Coleman, Canmore and Cochrane; also about twenty toll stations at smaller country points.

\*All of these lines are of the most modern type, the construction being first class in every respect. The long distance lines carry two No. 10 hard drawn copper wires, which are used as metallic circuits.

The type of instruments used in connection with this system are graded among the most efficient instruments in use anywhere and have an admirable speaking quality.

**Government Telephones in Manitoba.**

In Manitoba, the following work has been carried out on the construction of government telephone systems during 1907. In Winnipeg, 10 miles of subway have been built, and 30 miles of pole lines erected. An exchange building is in course of construction, to be completed by July 1st, 1908. In Brandon, a site has been purchased and plans prepared for a subway, the contracts for the latter

\* A review of the findings of this Committee and of the legislation passed by the Manitoba Legislature was published in the *Labour Gazette* for May, 1906, page 1,235. See also the *Labour Gazette* for January, 1907, page 708 and the *Labour Gazette* for March, 1907, page 941. A review of the Alberta Act was published in the *Labour Gazette* for December, 1906, page 640.

being under consideration. In addition, 11 municipalities have been surveyed and routes selected for pole lines. A canvas has been made and over 2,000 subscribers secured.

### Government Investigation in Saskatchewan.

No legislation bearing on the subject has been enacted in Saskatchewan, but the following resolution was passed during the 1907 session of the Legislature:—

"That, while this house favours the principle of Government ownership and control of a telephone system for the province, it is of the opinion that before any active measures towards the inauguration of such a system are undertaken the Government should make a thorough inquiry into the working out of similar systems in Canada and elsewhere, and that the steps already undertaken by the government with that object in view should be continued in order that the legislature at its next session may be in a position to deal with this important question."

In accordance with this resolution, Mr. Francis Dagger was engaged as telephone expert by the Government during the past summer for the term of three months, and instructed to prepare a report and recommendations on the subject of the extension and development of the telephone services in the Province, with special reference to the establishment of this utility in the rural

districts, the Government declaring itself to have an open mind on the whole question of ways and means to that end. In conducting his enquiry, which was begun on August 1, the following communication was addressed by Mr. Dagger to the various city, town and village municipalities of the Province:—

Dear Sir:—

This government is making an investigation with a view of ascertaining the most satisfactory method of improving, cheapening and developing the telephone service in this province, and with a view of assisting me in this matter I shall be glad if you will kindly favour me with the following information:—

1. Name of the company or companies furnishing telephone service in your municipality.
2. Number of telephones at present in service.
3. Rates charged. (a) Business; (b) Residence.
4. Have you long distance service? If so, state distance and charges to a few points.
5. Have the farmers in your neighbourhood any telephone service. If so, state rates charged for same.
6. To the best of your knowledge what is the feeling among your community regarding the efficiency of the present telephone service and the rates charged? Are they satisfied or otherwise?

Yours truly,

FRANCIS DAGGER,  
*Provincial Telephone Expert.*

The report of Mr. Dagger, based on the information obtained in reply to this communication, is at present under the consideration of the Provincial Government.

### CONCLUSION OF ENQUIRY INTO LOSSES OF JAPANESE RESIDENTS OF VANCOUVER.\*

THE taking of evidence with regard to the losses sustained by Japanese residents of Vancouver during the recent riot there, which was commenced on October 21, by Mr. W. L. Mackenzie King, C.M.G., Deputy Minister of Labour, and the Commissioner appointed for the purpose by the Dominion Government, was concluded on November 6, and a week later payments were made to cover the claims of the Japanese, as assessed by the Commission.

#### Report of the Commissioner.

On November 8, the following report upon the result of the enquiry, was telegraphed by the Commissioner to the Honourable the Secretary of State for Canada:—

Honourable R. W. Scott,  
Secretary of State,  
Ottawa, Ont.

Claims and estimates presented for losses and damages sustained by Japanese population amounted to \$13,576.25. As result of investigation believe \$9,036 fair assessment of actual losses. Japanese Consulate has not presented any account for expenses incurred in preparation estimates and claims, or for professional services of of counsel who appeared before the Commission on behalf of Japanese Government. As careful preparation of estimates and claims, and presence of counsel have greatly facilitated the examination, in my opinion Japanese Consulate should be reimbursed amount expended in this connection, and I would, therefore, respectfully recommend that in addition to payment of actual losses and damages sustained by Japanese population at Vancouver, Japanese Consulate be reimbursed the sum of \$1,600 expended in preparation of estimates and claims, and be allowed on account of legal expenses the sum of one thousand dollars. I would further recommend that claimants be reimbursed the sum of \$139 expended by them in declaring their claims.

(Signed.) W. L. MACKENZIE KING,  
*Commissioner.*

\* See the special article in the November number of the *Labour Gazette*, page 560

### Correspondence with the Japanese Consul at Vancouver.

An Order-in-Council was passed authorizing the payment of the sums recommended in this report, and on November 15, Mr. King transmitted \$1,600 to the Japanese Consul, with the following letter:—

Dear Sir:—

On behalf of the Government of Canada, I beg to enclose a cheque for the sum of \$1,600, authorized by Order-in-Council and payable to the order of His Imperial Majesty's Consulate at Vancouver, being an allowance of \$1,000 on account of legal expenses, and re-imbusement to the amount of \$600 for amounts expended by the Japanese Consulate in the preparation of estimates and claims of losses and damages sustained by the Japanese population in the recent riots in the City of Vancouver, and the presentation of these claims before the Royal Commission appointed to inquire into the said losses and damages.

The Japanese Consulate at Vancouver has not presented any account for expenses incurred in the preparation of estimates and claims, or for professional services of counsel who appeared before the Commission on behalf of the Japanese Government. When, as Commissioner appointed to inquire into the losses and damages sustained by the Japanese population in Vancouver, I requested you to kindly let me have a statement of the amounts expended by the Japanese Consulate, you intimated in reply that it was not your intention, or the desire of the Japanese Consulate to allow a consideration by the Government of Canada of any expenses which the Consulate may have incurred in the preparation and presentation of claims made on behalf of the Japanese population in Vancouver.

As you are aware, the careful preparation of estimates and claims and the presence of counsel, greatly facilitated the enquiry. This of itself, in the opinion of the Dominion Government, is a sufficient reason why all such outlays should be fully met. I have, therefore, to express the hope that on further consideration, you will find it possible to accept the enclosed cheque on account of expenses incurred by the Japanese Consulate in this connection.

The Government has, by Order-in-Council, also authorized payment of the sum of \$9,036, on account of losses and damages sustained by the Japanese population in the recent riots, and the reimbursement to claimants of the sum of \$139, expended by them in declaring their claims. Cheques in payment of the amounts due the several claimants are at present being made out in accordance with the amount assessed as a result of the enquiry under Royal Commission just concluded.

These cheques I hope to be in a position to hand to the several claimants to-morrow.

I am, dear sir,

Very respectfully yours,

(Signed) W. L. MACKENZIE KING  
*Commissioner.*

M. Kishiro Morikawa,  
His Imperial Japanese Majesty's Consul,  
Vancouver, B. C.

On November 19, the cheque was returned by the Japanese Consul, with the following letter:—

Sir:—

Permit me on behalf of my Government to thank you for your letter of the 15th instant, enclosing a cheque of \$1,600.00 as an allowance for expenses, legal and incidental, to my Government in connection with the preparation and investigation of claims by Japanese residents for damages to their property in the unfortunate riot of the 7th September. I also thank you for the notification of the allowance of \$9,036.00 and costs of declaring claims by the Canadian Government for the payment of losses and damages sustained by the Japanese residents in the riot.

I cannot too strongly express the satisfaction and approval of my Government in your award and adjustment of the losses and damages sustained by the Japanese residents here, a feeling I am sure, shared by every claimant. If I may be permitted to say anything further of a personal character I would assure you that the great skill, unvarying patience and urbanity which marked your conduct of the Commission, has done much to restore the feeling of my countrymen here that the Canadian Government and the people of Canada are opposed to every element whose purpose is to defy the ordinary rules of decency in life, and the wider laws which bind nations in friendly accord.

While appreciating the high and honourable motives which have prompted you and your Government to send me the cheque for \$1,600.00, I regret that it is impossible for my Government to accept a reward for protecting the interests and property of the subjects of Japan. This and this only is my reason for returning to you the cheque for \$1,600.00.

You may assure your Government of my grateful acknowledgement of their generous course, a policy which I am sure will make for an increase of good feeling between our peoples.

I have the honour to be, Sir,

Your obedient servant,

(Signed) K. MORIKAWA,  
*H. I. Japanese Majesty's Consul.*

W. L. Mackenzie King, Esq., C. M. G.,  
Canadian Commissioner,  
Vancouver, B. C.

### PROCEEDINGS OF COMMISSION TO ENQUIRE INTO METHODS TO INDUCE ORIENTAL LABOURERS TO EMIGRATE TO CANADA.

AS already mentioned in the *Labour Gazette*,\* Mr. W. L. Mackenzie King, C. M. G., Deputy Minister of Labour, was appointed, on November 5, a commissioner to conduct an inquiry into the

methods by which Oriental labourers have been induced to emigrate to Canada. The Order-in-Council, by which the Commission was constituted, was as follows:—

\* See the November Number of the *Labour Gazette*, page 561.

On a Memorandum dated 4th November, 1907, from the Secretary of State, recommending—in view of the

recent unfortunate occurrences which have taken place in British Columbia, as a result of the largely increased influx of Oriental labourers into that Province—that Mr. W. L. Mackenzie King, C. M. G., Deputy Minister of Labour, be appointed a Commissioner under the Inquiries Act, Chapter 104, of the Revised Statutes of Canada, to conduct an inquiry into the methods by which the said Oriental labourers have been induced to emigrate to Canada during the present year.

The committee submit the same for approval.

On November 11, the first session of the Commission was held in the City Hall, Vancouver, Mr. F. W. Giddens, of the Department of Labour, acting as Secretary to the Commission, and Mr. F. Evans, of Vancouver, as stenographer. Mr. Charles Wilson, K. C., was appointed by the Provincial Government of British Columbia to act as counsel for the Province before the Commission.

#### Testimony of Chinese Immigrants.

The first two days of the inquiry were spent in examining Chinese immigrants who had just arrived at Vancouver on the Empress of India. In nearly all cases, it was ascertained the passage money and head tax had been advanced by relatives and friends in Canada, with whom the immigrants intended to work. The immigrants were induced to come by reports of the high wages to be obtained in this country, and many of them stated that they intended to return to China when they had made enough money. No evidence was disclosed pointing to the importation of Chinese by employment agencies. A witness representing a firm of Chinese merchants stated that he had a contract with a canning company, by which he was paid a certain sum for packing each case, in return for which he furnished from 80 to 100 men every year to do the work, paying them not less than \$65 per month.

#### Evidence of Japanese Employment Agencies.

An officer of the Canadian Nippon Supply Company said that his firm had supplied Japanese labourers to the Canadian Pacific Railway Company and the British Columbia General Contract Company. On November 30, at the closing session of the Commission, there were produced copies of contracts between the Nippon

Supply Company and six corporations, by which the former agreed to furnish a certain number of labourers, receiving in return a specified sum per man, out of which their wages would be paid. The parties to these contracts were the Canadian Pacific Railway Company, the Wellington Colliery Company, the British Columbia General Contract Company, Macdonald, Gzowski & Company, and two sawmill owners. All these contracts contained a clause to the effect that the labourers must have been procured legally, and not in violation of the Immigration Act or the Alien Labour Act.

#### Evidence of Hindu Labourers.

A few Hindus who were being deported gave evidence at Victoria, before the Commissioner, on November 23. It was alleged that one of their countrymen had collected sums of money from them, saying it was for the purpose of making presents to the customs and immigration officers, who would then let them go. He then instituted habeas corpus proceedings and secured his own release. Under instructions from the commissioner, he was subsequently arrested by the police and arraigned on the charge of obtaining money under false pretences. Many of the Hindus testified that they had been induced to come to Canada through newspaper reports of the country. From other witnesses who appeared later before the Commission, it was shown that Dr. Davichand, a native of India, had brought a number of Hindu labourers to Canada, and obtained employment for them, charging them \$1 a month for his services.

#### Arrival of the Special Envoy at Japan.

On November 13, the Honourable Rodolphe Lemieux, Minister of Labour, who had been appointed special envoy to Japan to discuss the immigration question with the Japanese government, arrived at Tokio. In the course of the month, conferences were held with officials of the foreign office of Japan, but negotiations were delayed through the

illness of Baron Hayashi, Minister of Foreign Affairs, and through the absence of the Chief of the Bureau of Commerce of Japan, who was returning from

the United States, where he had been investigating the Japanese trouble. The matter was still pending at the close of the month.

**IMMIGRATION AND COLONIZATION.**

**Recent Immigration Returns.**

IMMIGRATION through ocean ports during September 1907, declared for Canada, was as follows:—

**IMMIGRATION THROUGH OCEAN PORTS DURING SEPTEMBER, 1907.**

	Male	Female	Children under 12	Total

Winnipeg.....	76	103		27
Yorkton.....	124	235		111
Total.....	2,252	3,389	589	1,726

It will be seen that there has been a net decrease in the number of homestead entries made in October, 1907, compared with October, 1906, of 1,137.

A statement of the homestead entries made during the first ten months of the present year, compared with the corresponding period of the last calendar year, is as follows:

STATEMENT OF HOMESTEAD ENTRIES,  
JANUARY-OCTOBER, 1907-06.

Month.	1907	19 6	In-crease	De-crease
January.....	1,111	1,903		792
February.....	1,033	2,036		1,003
March.....	1,589	4,018		2,429
April.....	2,594	6,189		3,595
May.....	3,253	4,583		1,330
June.....	4,574	5,369		795
July.....	3,690	4,174		484
August.....	2,814	3,388		574
September.....	2,395	2,595		200
October.....	2,252	3,389		1,137
Total.....	25,305	37,644		12,339

The decrease in the number of homestead entries shown this year has been explained as owing in part to the fact that incomers were buying land outright instead of homesteading. Real estate values in Western Canada have continued firm during the past month.

Nationalities of Homesteaders.

The nationalities of homesteaders, as reported by the several agencies of the Department of the Interior in Manitoba, Saskatchewan, Alberta and British Columbia, during the month of October, 1907, were as follows:—

STATEMENT OF HOMESTEAD ENTRIES,  
JANUARY-OCTOBER, 1907-1906.

Nationalities.	No. of Entries
Canadians from Ontario.....	328
“ Quebec.....	45
“ Nova Scotia.....	20
“ New Brunswick.....	5
“ Prince Edward Island.....	11
“ Manitoba.....	67
“ Saskatchewan.....	92
“ Alberta.....	45
“ British Columbia.....	11
Persons who had previous entry.....	260
Canadians returned from the United States...	32
Americans.....	548
English.....	331
Scotch.....	86
Irish.....	36
French.....	18
Belgians.....	6
Swiss.....	4

<b>Totals . . . . .</b>	<b>1,306</b>	<b>205,706.86</b>

In October, 1906, the number of patents issued was 970, covering an area of 151,574.28 acres, showing an increase for the month of October, 1907, of 336 in the number of patents issued and of 54,132.58 acres in the area patented.

**THE BRITISH WELCOME LEAGUE, TORONTO.**

THE Department received, during November, by courtesy of the president of the British Welcome League of Toronto, the following statement with reference to the work carried out by the League since its inception on March 27th, 1907:—

The total number of persons registering at the head office of the league has been 5,393. Employment has been found for 3,000 of these. The following numbers have been taken care of at the League hotel:—Men, 1,248; married couples, 832; children, 781. Several thousands have been fed with one meal free of charge, while free beds have been given to about 10,000. It was found that 308 men arrived with less than \$5.00, 337 with less than \$2.00; and 606 men, 185 married couples with 353 children, without money. Gospel temperance and good citizen's meetings are held by the League every Sunday night, at which 1,000 persons have signed the temperance pledge. A bible class is held on Sunday afternoons and a concert on Wednesday nights. Immigrants wishing to write home are given writing paper and stamps. The expenses of the League include, \$15 per week for a secretary, \$10 per week for a night watchman, \$10 per week for a trained nurse, and \$100 per month for rent of buildings. Nearly \$1,000 has been paid out for beds, bedding and office furniture. With regard to revenue, the Ontario government granted \$1,000 to the League. Between \$2,000 and \$3,000 in addition have been raised, for the most part by the people of Toronto. The League has now a balance on hand of over \$400. The executive consists of business men having an interest in the work. Branch offices have been opened in Paris, Brantford and Berlin, Ont.

### PRICES OF FOOD IN GERMANY.

**T**WO important Consular reports, relating to conditions in Germany, have lately been issued, one upon the trade and agriculture of Bavaria, and the other upon the Consular district of Frankfort. The most interesting information in these reports relates to the enormous increase in the cost of living, and the significant diminution in the consumption of meat by the working classes, resulting from the new German tariff. Mr. Consul Buchmann (who in his previous report stated that the keep of a German workman had increased in cost by 25 per cent. since 1904, meat alone having risen 38 per cent., whilst wages had only risen 10 per cent., and also that £4 per annum more than formerly was then required by the military administration for the maintenance of a soldier) now writes that in Munich the price of beef per pound has risen from 7½d in 1874 and 8½d in 1884 to 11½d last year. A similar increase is shown to have taken place in the price of veal, which in 1874 cost 7d per pound; in 1884 and 1894 cost 8d; in 1904 only 8½d; whereas by last year the price had risen to 11d. Pork in 1874 cost 8d per pound; in 1904, 9d, and last year, 11½d. Mutton in 1874 was sold at 5½d, in 1904 and 1906 the price stood at 8½d. It is stated that the consumption of butchers' meat per head of population diminished in Germany by 9 lbs. in 1904-5, and by over 5 lbs. in 1905-6. The scarcity of meat in Bavaria is indirectly shown by the declension of railway revenues derived from the transport of cattle, for in August and September, 1906, £2,670 less were taken for such transport than during the same period in 1905. The Consul also writes: "In consequence of protective tariffs, the export of certain Bavarian goods to Austria-Hungary, Russia, the Balken States and Switzerland, has decreased or stopped entirely, but to the United Kingdom and the United States it has

increased." Mr. Consul-General Oppenheimer, in his report on Frankfort, writes to the same effect: "The rise in the price of meat has become notorious;" and, "to-day there is consensus of opinion that the price of meat is not likely to again drop anywhere near its former level." The import of foreign cattle into Germany has practically ceased. Imported fresh meat was formerly subject to a duty of from 15 to 17 marks per metric centner, which, since March, 1906, has been raised to 27 marks. The Consul also points out as a very serious matter, that there has been a considerable reduction in meat consumption. This reduction, he adds, applies more to the working classes, and is even greater than the official figures seem to admit, for "a part of the population does not participate in the consumption of meat (e.g., children and invalids), and again, a not inconsiderable part of the well-to-do classes, does not to any extent alter its consumption of meat in consequence of the price." Comparing the positions of British and German workmen, he writes: "In the future, there can be no question as to who is the better off, unless an unexpected change takes place, because the comparison will be between meat and no meat." And not only in the case of meat can the effects of the tariff be seen so clearly, but, to quote Mr. Oppenheimer again, the trade in corn during 1906 was influenced by the increased customs duties, which were raised on wheat from 35 to 55 marks; on rye, 35 to 50 marks; on oats, from 28 to 50 marks; and on malting barley, from 20 to 40 marks. "The average price, July to September, for wheat, was 6 marks higher than in 1905, and the price of rye exceeded the price for 1905 by 4 marks; but admittedly agriculture did not to any great extent benefit from these prices, as the difference was swallowed up by the increased cost of agricultural labour."

**FAIR WAGES SCHEDULE IN GOVERNMENT CONTRACTS AWARDED DURING NOVEMBER, 1907.**

The following is a list of contracts awarded by the Department of Railways and Canals, the Department of Public Works and the Department of Marine and Fisheries, Canada, which have received the signatures of both parties, together with the fair wages schedule inserted in each contract, setting forth the minimum rate of wages to be paid to the labourers engaged upon the work. A statement of orders for supplies given by the Post Office Department is added.

**Department of Public Works.**

**E**XTENSION to landing pier, Breton Cove, N. S.; name of contractor, Wm. J. Landry, Antigonish, N. S.; date of contract, October 28, 1907; amount of contract, \$5,788.00.

Post Office Department.

The following orders for supplies were given subject to the regulations for the suppression of the sweating system, the securing payment of fair wages, and the performance of the work under proper sanitary conditions:—

Nature of Order.	Amount of Order.
Making metal dating stamps and type, and making other hand stamps and brass crown seals.....	\$ 901.82
Making and repairing rubber dating stamps and type, also other stamps.....	93.00
Supplying stamping material and wooden boxes, and repairing stamping pads.....	3,155.71
Making and repairing post office scales.....	28.50
Supplying mail bags.....	15,308.90
Repairing mail bags.....	1,696.50
Making and repairing mail locks and supplying mail bag fittings.....	4,958.00
Supplying Railway Mail Clerks' tin Travelling boxes and repairing portable letter-boxes, Railway Mail Clerks' tin travelling boxes and parcel receptacles.....	129.75
Making and repairing miscellaneous articles of Postal Stores.....	22.35
Making up and supplying articles of Official Uniform.....	1,200.60

## INDUSTRIAL ACCIDENTS DURING THE MONTH OF NOVEMBER, 1907.

Under this heading account is taken of such accidents only, as were sustained by workmen in the course of their employment and resulted in loss of life or limb, or other serious impairment to industrial efficiency. The accidents reported are such as have come to the notice of the Department through the press of the country or correspondents of the *Labour Gazette*. The department is also indebted to the Bureau of Mines of Ontario and British Columbia, to the office of the factories' inspectors of the province of Ontario, the Ontario Railway and Municipal Board, and to the Department of Railways and Canals, Ottawa, for their kind assistance in furnishing the Department with the statement of returns of accidents reported to them.

**I**NDUSTRIAL accidents occurring to 372 individual workpeople in Canada during the month of November, 1907, were reported to the Department of Labour. Of these 142 were fatal and 230 resulted in serious injuries. In addition 3 fatal accidents were reported as having taken place prior to the beginning of the month, information not having been received by the Department before November, 1907. The number of fatal accidents reported in November, 1907, was 2 more than the previous month and 25 more than in November, 1906.

Of 195 returns received during the month giving the age of the victims of industrials accidents, 23 referred to persons under twenty-one years of age, 44 to persons between twenty-one and forty-five, 12 to persons over 45, 116 persons were over twenty-one years of age but their exact ages were not specified.

The following is a record of the accidents of the month by industries and trades:—

STATEMENT OF ACCIDENTS DURING NOVEMBER, 1907, BY INDUSTRIES AND TRADES.

Total.....	142	230	372

**Nature of Fatalities and Accidents.**

The chief disasters of the month were the killing of five train hands and two passengers in a railway wreck at Moore Lake, Ont.; the killing of seven members of a construction gang; the wounding of others by an explosion of dynamite near Dryden, Ont., the death of four workmen and the serious injuring of three others by the dropping of a wooden bucket in a shaft at Toronto, Ont.; the killing of three miners by an explosion at Hosmer, B. C.; the asphyxiation of three farmers while repairing a well near Aylesbury, Sask.; the drowning of three tug hands in a collision on Lake Ontario, near Port Dalhousie, Ont.; the killing of two hands by the collapse of a railway trestle near Eastman station, Que., and the killing of two miners through an explosion at Cobalt, Ont.

**Railway Wreck near Moore Lake, Ont.**

On the night of November 14, as the C. P. R., passenger train, No. 8, was approaching Moore Lake station, about thirty-five miles west of Pembroke, Ont., from the east, an east bound light engine collided with it, head on, through a disobedience or misinterpretation of orders on the part of its engineer, he having been instructed to take the siding at Bass Lake west of Moore Lake. In the wreck which ensued five train hands and two passengers were killed and several others were injured. The finding of the coroner's jury was in accordance with the above.

**Fatal Explosion near Dryden, Ont.**

On November 20, a construction gang was at work in a rock cutting on the line of the Grand Trunk Pacific Railway 26 miles north-east of Dryden, Ont. The foreman and powderman had been pressing dynamite into a hole and the foreman left to secure a further supply of the explosive. Almost immediately after, an explosion took place killing the powderman. Six other workmen in the cut below were killed by falling rock.

**Disaster at Toronto, Ont.**

On the evening of November 19, by the parting of a 5-8 inch steel wire cable,

seven men who were ascending in a bucket were dropped 90 feet down the shaft of the waterworks tunnel off Hanlan's Point, Toronto, Ont.; two were instantly killed and two survived only for a short time. The other three were badly injured.

#### **Explosion at Hosmer, B. C.**

November 11, while a number of men were employed in an open cut at the head of the incline of the Pacific Coal Company's mines at Hosmer, B. C., the unexpected explosion of a charge in a missed hole killed the foreman of the gang and two employees.

#### **Asphyxiation of Three Farmers near Aylesbury, Sask.**

On November 22nd, a farmer near Aylesbury, Sask., who had descended into a well for the purpose of repairing it was asphyxiated by gas. Two of his companions went down in turn to attempt a rescue, but died from suffocation.

#### **Drowning of Three Members of the Crew of the Tug "Escort" in Lake Ontario.**

On the evening of November 23rd the tugs *Escort* and *Golden City* raced from Port Dalhousie towards Niagara, Ont., for the privilege of towing the barge *Harrison*. While attempting to cross the bow of the barge the *Escort* was struck and foundered, taking down her captain and two of her crew.

#### **Collapse of Trestle on Canadian Pacific Railway at Eastman, Que.**

On November 1 an extra freight train on the Canadian Pacific Railway line, drawn by engine No. 784, a large ten-wheeler, had left Eastman Station and was making its way out on a long trestle near the village, when the trestle collapsed. From rail to water the distance is sixty feet. The engineer and the fireman of the engine were killed, and the brakeman on the train was dangerously injured.

#### **Fatal Explosion at Cobalt, Ont.**

On November 21, two miners while engaged in mucking in the north shaft

of the Cobalt Lake mine at Cobalt, Ont., struck a shot that had missed fire, causing an explosion which killed both.

#### **Record by Trades and Industries.**

*Agriculture.*—During November 1907, there were 23 fatal and 25 non fatal accidents in this industry, compared with 24 killed and 31 injured in the preceding month and 16 killed and 15 injured in November, 1906. Four of the deaths were due to runaways, 3 to falls, 3 to being struck by trains, 2 each to falling material and machinery, 3 to being asphyxiated by gas in a well, and 1 each to drowning, to an explosion, to being accidentally shot, to a collision and to live stock. Of the serious accidents 5 each were due to falls and to live stock, 4 each to machinery and to runaways, 2 each to falling material, to being struck by trains and to tools, and 1 to an explosion.

*Fishing and hunting.*—Two fishermen were drowned during November, 1907. There were no casualties during October, 1907, nor in November, 1906.

*Lumbering.*—Death by accident befell 10 workers in this group during November, 1907, while 10 others were injured. In the previous month there were 8 killed and 14 injured and in November of last year 14 killed and 7 injured. Three of the fatalities were caused by falling trees, 2 each by falling material and by being run over by logging train and 1 each to being accidentally shot by a hunter, by being crushed between logs and by drowning. Of the other injuries 7 were caused by machinery and 3 by falling material.

*Mining.*—Thirteen mine workers were killed and 20 injured in November, 1907, compared with 13 killed and 23 injured in the previous month and 3 killed and 4 injured in November, 1906. Six of the deaths were due to explosions, 3 to falling material and 1 each to being run over, to electric shock, to a fall and to being struck by a train. Of the minor accidents 8 each were due to falling material and to explosions and 1 each to a fall, to being run over, to being crushed by cars and to machinery.

DEPARTMENT OF LABOUR, CANADA,  
STATISTICAL TABLE SERIES F., No. 49.

TABLE OF FATAL ACCIDENTS DURING THE MONTH OF NOVEMBER, 1907.

Trade or Industry.	Locality.	Date.	No. killed.	Cause of Fatality.
<i>Agriculture—</i>				
Farmer	Napinka, Man.	Nov. 1	1	Fell from vehicle.
"	Lumsden, Man.	" 2	1	Explosion of threshing engine.
"	Lakefield, Que.	" 9	1	Tree fell on him.
"	Norton, N. B.	" 9	1	Struck by train.
"	Lethbridge, Alta.	" 12	1	Run over by threshing machine.
"	Stanbridge, Que.	" 15	1	Tree fell on him.
"	St. Odilou, Que.	" 11	1	In a runaway.
"	Lobo, Ont.	" 16	1	Found drowned in creek.
"	Britannia, Ont.	" 19	1	Struck by train.
"	Grandview, Man.	" 19	1	Caught in thresher.
"	Saskatoon, Sask.	" 15	1	In a runaway.
"	Hawtrey, Ont.	" 20	1	Accidentally shot while hunting a weasel.
"	Aylesbury, Sask.	" 22	3	Overcome by gas in a well.
"	Plympton Tp., Ont.	" 22	1	Fell from top of windmill.
"	Pierreville, Que.	" 20	1	Struck by train.
"	St. Joseph de la Beauce, Que.	" 9	1	In a runaway.
"	Maidstone, Sask.	" 25	1	In a runaway.
"	Thessalon, Ont.	" 28	1	Drowned—broke through ice
"	Edmunston, N. B.	" 1	1	Kicked by a stallion.
"	St. John, N. B.	" 15	1	Thrown from load of hay.
Drover	Alma, Ont.	" 26	1	In a collision of wagons
<i>Fishing and Hunting—</i>				
Fisherman	Bowen Island, B. C.	" 16	1	Drowned.
"	Near New Westminster, B. C.	" 13	1	Drowned, fell out of boat.
<i>Lumbering—</i>				
Logger	Eagle Lake, N. B.	" 14	1	Tree fell on him.
"	Campbellton, N. B.	" 14	1	Accidentally shot by a hunter.
"	Huntsville, Ont.	" 22	1	Tree fell on him.
"	Chatham Channel, B. C.	" 26	1	Crushed between 2 logs.
"	Chemainus, B. C.	" 5	2	Logging train ran away.
"	Slocan, B. C.	" 26	1	Tree fell on him.
"	Cortez Island, B. C.	" 23	1	Drowned.
Saw mill hand	Newville, N. S.	" 1	1	Smokestack fell on him.
"	Chaudière Curve, Que.	" 23	1	Pile of logs fell on him.
<i>Mining—</i>				
Mine superintendent	Eustis Mine, Que.	" 2	1	Run over by water car.
"	Thetford Mines, Que.	" 15	1	Electrocuted.
Miner	Dominion No. 7, N. S.	" 8	1	By fall of stone.
"	Hosmer, B. C.	" 11	3	By explosion of dynamite.
"	Reserve, N. S.	" 13	1	Fell down shaft, 200 ft.
"	Michel, B. C.	" 20	1	Struck by runaway car.
"	Sydney, N. S.	" 25	1	Explosion of boiler.
"	Nanaimo, B. C.	" 18	1	By fall of rock.
"	Cobalt, Ont.	" 29	2	Explosion of dynamite.
Quarryman	Glen Williams, Ont.	" 28	1	Rock fell on head.
<i>Building Trades—</i>				
Carpenter	Ottawa, Ont.	" 1	1	Scaffold broke, fell 30 ft.
"	Moose Jaw, Sask.	" 23	1	Building collapsed.
Painter	Montreal, Que.	" 4	1	Fell 50 ft.
Bricklayer	Toronto, Ont.	" 15	1	Fell 60 ft.
Decorator	Guelph, Ont.	" 21	1	Fell 12 ft. from scaffold.
Plasterer	Toronto, Ont.	" 25	1	Nail ran into foot, died of lockjaw.
<i>Metal, Engineering and Shipbuilding Trades—</i>				
Iron worker	St. Catharines, Ont.	" 5	1	Caught in belting.
"	Montreal, Que.	" 7	1	Fell in a fly wheel.
"	Sydney, N. S.	" 13	1	Struck by moving car.

TABLE OF FATAL ACCIDENTS DURING THE MONTH OF NOVEMBER, 1907.

Trade or Industry.	Locality.	Date.	No. Killed	Cause of Fatality.
<i>General Transport—</i>				
Hostler.....	Penetanguishene, Ont.....	" 6	1	By electric shock.
Teamster.....	Joliette, Que.....	" 11	1	Run over by loaded vehicle.
".....	Musquash, N. B.....	" 14	1	By falling tree.
Street railway employee	Winnipeg, Man.....	" 9	1	Caught between cars.
<i>Miscellaneous—</i>				
Clerk.....	Montreal, Que.....	" 3	1	Head crushed off in elevator.
Domestic.....	Vancouver, B. C.....	" 4	1	Lighted fire with coal oil.
Window cleaner.....	Toronto, Ont.....	" 14	1	Fell 50 ft. to pavement.
".....	Toronto, Ont.....	" 14	1	Fell from fifth floor.
Gas Co.'s employee.....	Ottawa, Ont.....	" 15	1	Explosion of dynamite.
".....	Montreal, Que.....	" 18	1	Asphyxiated by gas.
Drug clerk.....	Cobalt, Ont.....	" 16	1	Inhalation of fumes of nitric acid.
<i>Unskilled Labour—</i>				
Labourers.....	Toronto, Ont.....	" 19	4	Cage dropped 100 feet in caisson.

FATAL ACCIDENTS HAPPENING IN PREVIOUS MONTH BUT ONLY REPORTED TO THE DEPARTMENT IN NOVEMBER.

Roofers.....	Bridgeburg, Ont.....	Oct. 27	1	Fell from scaffold.
Brakeman.....	Lethbridge, Alta.....	" 30	1	Run over by train.
Labourer.....	Edmonton, Alta.....	" 29	1	Cave in of earth.

*Building*—Six deaths by accident occurred in these trades, and 23 workers were seriously injured during November 1907, compared 6 killed and 30 injured in October and 1 killed and 6 injured during November 1906. Four workmen were killed by falls, 1 by the collapse of a building and 1 died from lockjaw, his foot having been pierced by a rusty nail. Twelve workers were injured by fall, 6 by falling material, 2 by falls from buildings, 1 by machinery and 1 by an explosion.

*Metal*.—Among these workers death by accident occurred to 8 while 37 others were injured. In October 14 were killed and 58 injured and in November of last year 4 were killed and 32 injured. Three of the deaths were due to falling material, 2 each to machinery and electric shock and 1 to being struck by a train. Of the injuries 12 were due to machinery, 9 each to falls and falling material, 3 to molten metal, 2 to elevators

and 1 each to electricity and to an explosion.

*Woodworking*—There were 14 workers in this group injured in November, compared with 1 killed and 13 injured in the previous month and 1 killed and 6 injured in November 1906. All of the 14 accidents were caused by machinery.

*Printing*.—There were 3 minor accidents due to machinery in these trades, compared with 4 in October and 1 in November, 1906.

*Clothing*.—Two workmen were injured by machinery in this group during November. In October last 1 worker was injured and in November of last year 2.

*Textile*.—Seven workers were injured in November, compared with 5 in the previous month and 3 in November, 1906. Three of the accidents were due to machinery, 2 to falling material and 1 each to a fall and to an explosion.

*Food and tobacco preparation*.—There

were 1 killed and 13 injured in November. In October last the record was 4 killed and 8 injured and in November of last year 5 killed and 14 injured. A sugar refiner in Montreal, Que., was caught in belting and killed. Six of the injuries were caused by falls, 4 by machinery and 3 by explosions.

*Railway service.*—Among railway employees there were 51 killed and 26 injured during November, compared with 39 killed and 35 injured in the preceding month and 27 killed and 40 injured in November, 1906. Twelve of the deaths were due to the victims being run over, 11 to explosions, 11 to collisions, 5 each to derailments and being struck by trains, 3 to being caught between cars, and 2 each to falls and falling material. Of the accidents 6 each were due to the victims being caught between cars and to collisions, 5 to explosions, 4 to falls, 3 to being run over and 1 each to a derailment and to machinery.

*Navigation.*—Fatal accidents occurred to 13 workers in this class and serious injuries to 7. In October there were 12 killed and 6 injured and in November of last year 30 killed and 5 injured. Of the deaths 6 were caused by drowning, 4 by falls and 1 each by being caught between cars, by being struck by a capstan bar and by falling material. Four of the injuries were caused by falls and 1 each by exposure, by falling material and by being caught between two loaded vehicles.

*General transport.*—There were 4 killed and 12 injured in November, 1907, com-

pared with 9 killed and 29 injured in the preceding month and 3 killed and 10 injured in November a year ago. Of the deaths 1 each was due to electric shock, to the victim being run over, to a runaway and to being caught between cars. Six of the injuries were due to collisions, 4 to falls, 1 to a runaway and 1 to being run over.

*Civic employees.*—Two civic firemen were injured by falling material and 1 by a fall during November. In the previous month there were 2 injured and in November, 1906, 1 killed and 11 injured.

*Miscellaneous.*—Seven were killed and 12 injured in this group. Three of the deaths were due to explosions, 2 to falls, 1 to an elevator and 1 to inhaling the fumes of nitric acid. Four of the accidents were due to collisions, 3 to machinery, 2 to falls and 1 each to falling material, a runaway and an explosion. In October, 1907, the record was 5 killed and 23 injured and in November, 1906, 8 killed and 11 injured.

*Unskilled labour.*—Four labourers were killed and 3 seriously injured by the fall of the bucket down the shaft of the new waterworks improvement in Toronto, Ont. Thirteen other labourers were seriously injured during November. Eight of these last injuries were caused by falling material, 2 by falls and 1 each by being run over, by an explosion and by an elevator. In the previous month 5 workers were killed and 24 injured and in November of last year 1 was killed and 8 injured.

#### TRADE DISPUTES DURING THE MONTH OF NOVEMBER, 1907.

**T**HERE were very few trade disputes in Canada during November, and the losses through this cause were comparatively slight. The only locality where a large body of employees was affected was at St. John, N. B., where transportation was hampered through a strike of longshoremens, during the latter part of the month.

##### Analysis of Trade Disputes During the Month.

*Number and magnitude.*—The total number of trade disputes reported to

have been in existence in Canada during November was 8, a decrease of 14 compared with the previous month, and a decrease of 11, compared with November 1906. About 34 firms and 1,686 employees were affected by these disputes, 15 firms and about 1,107 employees being involved in the disputes which began in November.

*Loss of time in working days.*—The loss of time to employees through trade disputes during November amounted approximately to 19,275 working days,

compared with 63,350 in October, and 78,655 in November, 1906.

*Trades affected by new disputes.*—The following table shows the trades affected by the new disputes of the month, and the number of workpeople affected in each group of trades:

Trades.	No. of Disputes.	No. of Workers.
Building.....	1	50
Transport.....	1	1,049
Miscellaneous trades..	1	8
Total.....	3	1,107

*Localities affected by new disputes.*—The new disputes of the month occurred in the following provinces of Canada:—

Province.	No. of Disputes.
New Brunswick.....	1
Ontario.....	1
British Columbia.....	1
Total.....	3

*Causes of disputes.*—The following were the causes of the new disputes of the month:—

Cause.	No. of Disputes.
For higher wages.....	1
For shorter hours.....	1
Dispute between trade unions over right to do certain work.....	1
Total.....	3

*Methods of settlement.*—Of the 8 disputes that were in existence during November, 5 were terminated either definitely, or by industrial conditions ceasing to be affected by them, leaving 3 still in existence at the end of the month. In 1 dispute a settlement was reached through negotiations between the parties concerned, in 2 others settlements were reached with some employers through

negotiations, and in 2 the strikers secured work elsewhere.

*Results of disputes.*—Of the disputes that were terminated, 2 resulted in favour of the employers, and in 2 the employees were partially successful, some employers conceding their demands. The result of one dispute, which concerned certain conditions of employment, was uncertain, both sides claiming a victory.

#### Disputes which Commenced Prior to the Beginning of the Month.

The trade disputes in existence during November, which began in previous months comprised strikes of plumbers and electrical workers at Toronto, Ont., tailors at Kingston, Ont., and cigar-makers at Montreal, Que. A brief account of these disputes is given below.

#### Dispute of Cigar Makers at Montreal, Que.

On October 10, a dispute of cigar-makers employed by the firm of Granda Hermanos y Ca., took place at Montreal, Que. According to the employers the dispute arose because the cigarmakers insisted on receiving good wrappers for broken ones, without giving an account of what was done with the latter, and it was decided that additional wrappers would not be given if the broken ones were not returned. The firm reported that work was resumed on November 7, the cigar-makers having agreed to return the broken wrappers. According to the cigar-makers' union, the dispute was of the nature of a lockout, caused by the refusal of the employees to perform certain work not included in the agreement existing between them and this firm, and their refusal to comply with certain other requirements. It was claimed that the dispute was settled on November 6, when the employers withdrew their demands, and agreed to confine themselves in the future to the terms of the agreement which had been formerly concluded with their employees. According to the firm, 65 employees were directly affected by this dispute, but according to the cigar-makers' union, 47 men

were directly affected and 12 women workers were indirectly affected by it.

#### Strike of Machinists at Toronto, Ont.

In a report received from the Machinists' Union with reference to a strike of machinists at Toronto, which began on June 8, information was given supplementing the account of this dispute which appeared in the October number of the *Labour Gazette*. It was claimed that a large number of firms conceded their demand for a nine-hour day without a strike, and that in November there were at least 38 shops which recognized the nine hour day for machinists. In three or four of these, the machinists worked 10 hours, but received pay at the rate of time and one half for the extra hour. It was claimed that the strike was still in existence with regard to some shops, but that there were 525 union machinists at work, the majority of whom had a working day of nine hours or less. While the shops which conceded the demands of the union were mostly small ones, it was stated that nearly two-thirds of the machinists of Toronto were employed in shops. The Secretary of the Employers' Association reported early in November that the strike was over, so far as the employers were concerned, all the shops being run with full staffs of men.

#### Strike of Tailors at Kingston, Ont.

A strike of tailors at Kingston, Ont., which began on September 23, continued throughout November. One attempt at a settlement was made during the month, when the employers presented an offer to their striking employees, agreeing to pay the wages demanded, but one of the firms affected reported that the strikers refused to return to work unless they had union shops, to which the employers would not consent. On November 27, two of the strikers were prosecuted on the charge of using threatening language to three tailors who had taken their places, and were sentenced by the magistrate to a fine of \$100. or one

month in jail. It was reported that 7 firms and about 75 employees were originally affected by this dispute, but 2 of the firms conceded the demands of the strikers in October, and the other employers claimed in November that work was going on satisfactorily in their shops. The matters in dispute were a decision of the employers to conduct "open shops", and a demand of the employees for an increase of 15 per cent. in their wages.

#### Strike of Plumbers at Toronto, Ont.

No settlement was reported with regard to a strike of plumbers which began at Toronto, Ont., on May 15, on account of the refusal of the employers to grant a demand for an increase in wages and "closed shops". It was stated that about 250 men out of 500 who went out had returned to work on the terms demanded. Places of other strikers had been filled and conditions ceased to be greatly affected by the dispute.

#### Strike of Electrical Workers at Toronto.

It was reported that the 25 electrical workers who went on strike at Toronto on July 20, in sympathy with the striking plumbers, obtained employment elsewhere, and conditions ceased to be affected.

#### Strike of Boilermakers at Halifax, N. S.

The strike of boilermakers at the dry dock of the Halifax Graving Dock Company, which took place on September, 25, continued throughout the month. The cause of the dispute was the refusal of the company to grant a demand for an increase in wages. About 89 employees were affected directly by this dispute, and 100 indirectly.

#### New Disputes.

The new disputes of the month affected longshoremen at St. John, N. B., bricklayers at Victoria, B. C., and barbers at London, Ont.

DEPARTMENT OF LABOUR, CANADA,  
STATISTICAL TABLE, SERIES C., No. 83.

TABLE OF TRADE DISPUTES DURING THE MONTH OF NOVEMBER.

Occupation.	Locality.	Alleged Cause or Object.	No. of Firms or Establishments affected.		Approximate No. of Employees affected.				Date of commencement.	Date of termination.	Result.
			Directly.	Indirectly.	Directly.	Indirectly.	Females	Males			
<i>Building Trades</i> — Plumbers .....	Toronto, Ont.....	Against employment of non-unionists.....	1		50				Apr. 13		No settlement reported, but conditions ceased to be affected.
	Toronto, Ont.....	Demand for increase in wages from 37½ to 45 cents per hour, apprentices from \$6.50 to \$8.50 per week and closed shops.....	6		270				May 15		No settlement reported, but many strikers secured work on terms demanded and places of others were filled. Conditions ceased to be affected.
<i>Metal Trades</i> — Electrical workers, Boilermakers and helpers.....	Toronto, Ont.....	In sympathy with striking plumbers.....	5		25				July 20		Strikers secured work elsewhere.
	Halifax, N. S.....	For increase in wages, mechanics from \$2.50 to \$3.50, helpers from \$1.80 to \$2.50 per day, and recognition of union....	1		89		100		Sept. 25		No settlement reported at end of month.
<i>Clothing Trades</i> — Tailors.....	Kingston.....	Against declaration of employers for open shops and demand for higher wages and shorter hours.....	5		18	36			Sept. 23		No settlement reported at end of month, but employers claimed to be no longer affected.

Demand granted by employers, all  
strikers except 2 secured work on  
terms demanded during month.

\* Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where after the declaration of a strike, some of the original strikers have returned to work or had their places filled with new hands, or where establishments affected have found that for either of these reasons, or both, or for other causes, their business is no longer seriously affected. In such cases while, in one sense, it may be true that a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon the business interests of the community is concerned a record of the continuance of such a dispute might be misleading. The list of trade disputes published in the present table, therefore, includes mention only of such disputes as during the month or at its termination affected, to an appreciable degree, the carrying on of the industrial or business operations of the firm or establishments concerned; mention moreover, is not made of disputes involving less than six employees, or less duration than 24 hours.

**Dispute of Longshoremen at St. John, N. B.**

On November 22, the longshoremen of St. John, N. B., declined to remove the cargo of the Canadian Pacific Railway steamship "Empress of Ireland," which arrived in port on that day, on account of the refusal of the Company to grant a demand for wages of 40 cents per hour, instead of 30 cents, which was the rate prevailing last winter. The other shipping companies of that port were involved in this dispute including the Battle Line, the Furness Line, the Manchester Line, the Head Line, the Donaldson Steamship Company, the Elder Dempster Line and the Allan Line. The number of men interested in the dispute was 1,049. No settlement took place during the month, and the work of loading and unloading the vessels that entered the port was performed by the crews, assisted by a number of men brought from Montreal and other places for this purpose. It was stated by representatives of the men that more than 100 labourers were brought to St. John by the Canadian Pacific Railway and the Donaldson Line.

**Strike of Bricklayers at Victoria, B. C.**

On November 15, the bricklayers, to the number of 50, employed on the building of an addition to St. Joseph's Hospital at Victoria, B. C., stopped work on account of a disagreement with the stonecutters, over the right to lay cut stone, which was claimed by both the bricklayers' and stonecutters' unions. No settlement of the dispute was reported at the close of the month.

**Strike of Barbers at Hamilton, Ont.**

On November 2, a strike of 8 barbers employed in 6 shops took place at Hamilton, Ont. The cause of the dispute was a demand for earlier closing on Saturdays so that all work would be over by midnight. In the course of the month 2 employers granted the demand of the barbers' union, and all the strikers except two secured work in these shops and elsewhere.

The table published herewith is a compilation of the trade disputes of the Dominion of Canada, which began or were in continuance during the month of November, and which have been reported to the Department.

**REPORTS OF DEPARTMENTS AND BUREAUS.**

The following reports of departments and bureaus were received at the Department of Labour during November, 1907.

**DOMINION REPORTS.****Government Railways and Canals.**

Annual Report of the Department of Railways and Canals for the fiscal period from July 1, 1906, to March 31, 1907.

**T**HE Report of the Department of Railways and Canals for the nine months ended March 31, 1907, states that the total railway expenditure for this period amounted to \$14,918,598.92, which included \$5,537,867.50 for the National Transcontinental Railway, \$1,323,367.48 for subsidies to railways other than government roads, and \$68,664.29 for the Board of Railway Commissioners for Canada. The earnings of the Intercolonial Railway amounted to \$6,248,311, producing a profit of \$218,139.17 over the

expenditure. The Windsor branch of the Intercolonial Railway, which is leased by the Government to the Dominion Atlantic Railway Company, showed a profit of \$30,015.20, and the Prince Edward Island Railway with earnings of \$215,434.97, showed a loss of \$67,713.53.

**Department of Agriculture.**

Report of the Minister of Agriculture for the Dominion of Canada for the fiscal year ended March 31, 1907. Ottawa; King's Printer, 1907. Pages, 125. Price, 10 cents.

The Report of the Minister of Agriculture for the fiscal year ended March 31, 1907, contains a summary of the work of the various branches of the Department of Agriculture during this period. The dairying industry is reported to have been in a very satisfactory condition, the yield of milk having been quite up to the average, while the price of cheese was the highest ever received. Encouraging reports with regard to the

apple trade were received from Great Britain, prices for Canadian apples ruling from two to five shillings per barrel higher than for the same varieties from other countries. Many improvements were made in facilities for cold storage, subsidies being granted by the government for cold storage warehouses and iced cars for cheese and fruit. Two new experimental farms were established during the year, one at Lethbridge in Southern Alberta, and the other at Lacombe in Northern Alberta, and it is the intention of the Department to establish several additional stations in other parts of Canada.

#### Dominion Lands and\*Immigration.

Annual Report of the Department of the Interior for the fiscal period from July 1, 1906, to March 31, 1907. Ottawa; King's Printer, 1907. Pages, 472. Price, 30 cents.

The Report of the Department of the Interior for the nine months ended March 31, 1907, shows continued progress of the country in the amount of land taken up and in the number of immigrants who arrived during this period. The total revenue of the Department amounted to \$2,278,548.21, a net increase of \$753,333.28 compared with the corresponding previous nine months. There were 124,667 immigrant arrivals and 21,647 free homestead entries. The total British immigrants numbered 55,791, an increase of 17,170 over the corresponding period of the previous year. From the United States there were 34,748 immigrants. The next highest number of immigrants came from Russia, of whom there were 5,802 Hebrews and 1,927 others.

#### BRITISH REPORTS.

##### Conciliation and Arbitration Boards.

Report on Rules of Voluntary Conciliation and Arbitration Boards and Joint Committees. London: Wyman and Sons, Ltd., 1907. Pages, 298. Price, 1s. 4d.

A report on the rules of conciliation and arbitration boards and joint committees in Great Britain and Ireland, has been issued by the Labour Department of the British Board of Trade. The practice of dealing with matters affecting the relations between employers and

their employees by these boards and committees has become very widespread in the United Kingdom, 194 being known to be in existence in the various trades at the present time, as well as two others restricted to co-operative societies, and 15 district boards not confined to any particular trade. Most of the principal trades have their boards or committees, including the coal mining, iron and steel industries, the cotton trade, engineering, shipbuilding and building trades.

Some of the more important boards limit their work to fixing the general level of wages; others inquire only into disputes at individual works; others deal with the demarcation of work between different trades, but the most numerous class consider all questions. The rules of 36 trade boards provide for reference to the Board of Trade for the appointment of a final authority to settle disputes; 26 other boards have final recourse to a permanent neutral chairman, arbitrator, or referee, and 11 have reference to an arbitrator, umpire or referee appointed in each case. There are 15 boards with power to refer disputes to two arbitrators and an umpire, the umpire having the final decision, and 7 boards with power to refer disputes to three arbitrators or referees, who decide by a majority vote.

### RECENT LEGAL DECISIONS AFFECTING LABOUR.

The following synopsis of recent cases affecting labour are based upon the latest reports of legal proceedings and other legal records of the different Provinces of Canada.

#### SUPREME COURT CASES.

**T**HE Supreme Court of Canada recently disposed of an appeal taken by plaintiff, a motorman in the employ of defendants, from a judgment of the Court of Appeal of Ontario reversing the verdict and judgment at the trial in plaintiff's favour and dismissing the action. Plaintiff was taking his car to a place called Springbank, outside the city of London, when it ran into a car stranded on the track, and plaintiff was injured. On the trial of his action for damages, it was shown that the power was very poor on the car on this trip, the lights going out frequently. The car crossed the circuit breaker, and plaintiff threw off the controller and started to put down the brakes when the collision occurred. The jury found that no negligence or breach of duty on plaintiff's part contributed to the accident, and gave him a verdict of \$1,500. The Court of Appeal set aside the verdict and dismissed the action on the ground that according to the evidence the accident was caused by plaintiff's violation of a rule of the Company requiring him, when the power left the line, to shut off the controller, throw the overhead switch and bring the car to a stop. The Supreme Court dismissed the appeal instanter.

(Harris v. London Street Railway Co.; 12th November, 1907.)

#### Appeals in Damage Suits Dismissed.

An appeal by defendants from a judgment of the Court of Review at Montreal, affirming the judgment at the trial in favour of plaintiff, has been dismissed by the Supreme Court of Canada. The action was brought by the widow and children of the late John E. Cameron to recover damages on account of his death, caused, as alleged, by the negligence of the defendants in leaving certain dangerous machinery unprotected. The defence was that the deceased was master mechanic, in full charge of the defendants' paper mills at East Angus, that he had been instructed to have all machinery properly protected at the defendants' expense, and that the accident from which his death resulted was caused solely through the neglect and imprudence of the deceased.\*

(Royal Paper Mills Co. v. Cameron; 5th November 1907; Supreme Court.)

An appeal by defendants from a judgment of the Court of Review, sitting at Quebec, affirming the judgment at the trial in favour of plaintiff, has been dismissed by the Supreme Court of Canada, without costs on an equal division of opinion among the judges. Plaintiff sued defendants for \$5,000 damages for injuries suffered in an accident at their foundry at Three Rivers. At the trial the presiding judge found defendants negligent in failing to supervise the manner in which employees did their

\* For reports of the former proceedings in the case, see the August, 1906, and April, 1907, numbers of the *Labour Gazette*, at pages 213 and 1145 respectively.

work, but also found contributory negligence on the part of plaintiff in disobeying orders and failing to make use of proper appliances furnished for the purposes of his employment. Judgment went in favour of plaintiff for \$1,200 damages under the rule as to common fault in the Province of Quebec.

(Jean v. Montreal Pipe Foundry Co.; 5th November 1907; Supreme Court.)

## QUEBEC CASES.

### Claim for Damages Dismissed.

Plaintiff, a pressman in the employ of defendants, brought suit to recover an indemnity of \$1,985 for injuries sustained by him in the course of his employment. Plaintiff claimed that as he was in the act of feeding one of the presses, another employee of the Company started the machinery without giving due warning, with the result that the thumb of his right hand and two fingers were crushed and cut off, and two other fingers were so badly maimed as to prevent him from using his right hand for life. He further set that the accident was due to the fault and negligence of the defendants in not properly supervising the work, by not placing a competent man to run the press, and in the machinery being set in motion while he was placing paper in the press. Defendants pleaded that plaintiff was thoroughly accustomed to the work, having been properly instructed when he entered their employ; that the work was not dangerous if instructions were carried out; that the press was in good working order, and the operator competent, and that plaintiff had been injured because he had not followed instructions in regard to his work. The evidence showed that at the time of the accident, plaintiff was working on a four-deck Goss Straightline press. As often happens, the feed broke, and together with another employee named Corrigan, plaintiff was ordered to run the feed through the cylinders again. They accordingly put the paper through the first set of cylinders, while the machinery was at a standstill, after which the operator turned on the power, but not to its full extent, so that the paper might slowly reach the second set of cylinders.

When it reached there, instead of taking the direction wanted, the paper curled up around one of the cylinders, and while plaintiff attempted to disentangle it, his hand was caught in the machinery. The evidence satisfied the Court that the accident was entirely due to plaintiff's own fault and negligence, and the action was dismissed.

(Cudner v. Montreal Star Publishing Co.; 12th November, 1907; Pagnuelo, J.)

### Damage Action Settled out of Court.

An action for damages brought by plaintiff for injuries sustained by him in the course of his employment by defendants was recently settled out of Court on the eve of trial by a jury.

Plaintiff, a young man, was employed in the Angus shops of the defendants at Montreal, and while he was carrying a pail of molten lead, some of it flew up and struck him in the right eye, destroying the sight. He sued for \$5,000, but a settlement was effected whereby defendants pay \$1,200 and costs.

(Vinet v. C. P. R. Co.; 23th November, 1907; Superior Court, Montreal.)

### Wrongful Dismissal.

Plaintiff brought action in the Superior Court at Montreal to recover \$655 damages for unjustified dismissal from employment as a clerk. The trial judgment dismissed plaintiff's action with costs, but on an appeal to the Court of Review, this judgment was reversed, and plaintiff's action maintained to the extent of \$159 and costs.

(Jacob v. Nolan; 4th November, 1907; Court of Review.)

### Breach of Contract of Hiring.

Plaintiff sued to recover \$500 for damages he claimed to have suffered by reason of the refusal of the defendant to confirm a contract which he claimed gave him the agency of the Company in the District of Quebec. The defence was that there was never any contract between the parties; that there were only attempts made to form a contract, and that, in any event, even if plaintiff considered there really was a contract, it was an-

nulled by plaintiff's own letter. The trial judgment awarded plaintiff \$147, but on an appeal by defendant, the Court of Review at Montreal reversed the judgment at the trial and dismissed the action, holding that no contract had been made out.

(Vaillancourt v. La Sauvegarde Assurance Co.; 4th November, 1907.)

#### Seamen Punished for Breaches of Discipline.

Andrew Brown, a fireman on the Allan liner "Victorian," was brought before the Judge of Sessions at Montreal recently, charged with refusal to work, although ordered to do so by his superior officer. The accused declared that he was sick, and that it was impossible for him to work on the day in question. The chief engineer gave accused the order several times, but he refused to move coal. The accused was sentenced to five weeks in jail.

(Rex v. Brown; 6th November, 1907; Choquet, J.)

John Lewis, a sailor on the steamship "Parkwood," was before the said Court on two charges, one of assault on the first mate of the ship, and the other of refusing to obey orders. The accused pleaded that he was under the influence of liquor at the time of the commission of the offences. He was sentenced on the first charge to six weeks in jail, and on the second charge to four weeks in jail.

(Rex v. Lewis; 6th November, 1907; Choquet, J.)

Louis Christopherson, a Norwegian, and Grance Blanco, a Spaniard, both sailors on the Donaldson line s.s. "Escalona," deserted their ship. Two days later they were found on the wharf under the influence of liquor, and were brought before the Magistrate. Christopherson expressed his willingness to return to his ship and was discharged, but as Blanco was obdurate, he was sent to jail for four weeks with hard labour.

(Rex v. Christopherson and Blanco; 8th November, 1907; Lafontaine, P. M.)

#### Fraudulent Use of Trade Mark.

A judgment of interest to milkmen and others was recently rendered in a case wherein F. A. Stephen, a milkman, was accused of delivering his milk in bottles

bearing the registered trademark of the Guaranteed Pure Milk Company, blown in the glass. The prosecution was instituted under the article of the Criminal Code dealing with the fraudulent use of trade marks, etc. The accused was found guilty and fined \$5 and costs.

(Rex v. Stephen; Choquet, J.)

#### Damages for Death of Husband.

Plaintiff brought action in the Superior Court of Montreal to recover \$12,000 damages for herself and two minor children, on account of the death of her husband, who was accidentally killed while employed as brakeman in the service of defendants on April 16 last.

Deceased was on the last car of a freight train, which, when nearing the Victoria Bridge, was backed on a side track. The car ran off the track, and deceased fell to the ground, was run over and killed. The jury found that there was no fault or negligence on the part of deceased, and holding the defendants responsible, rendered a verdict for \$3,000 damages in favour of the widow, and \$1,000 for each of the children.

(Robson v. G. T. R. Co.; 2nd November, 1907.)

#### Buckingham Strikers Found not Guilty of Manslaughter but Convicted of Rioting.

At Hull, during the month of November, six strikers, Adelard Hamelin, Hilaire Charette, Louis Landry, Jean Bte. Clement, Colbert Bastien and George Robinson Croteau, came up for trial on a charge of manslaughter for the killing of certain detectives who were employed by the Maclaren Company to protect their workmen who were engaged in removing logs of the Company on October, 8, 1906.

After a lengthy hearing, the accused were acquitted of the more serious charge, but were found guilty by the Magistrate of rioting, and sentenced to two months' imprisonment each.

In rendering his decision, the Magistrate said that the evidence was not strong enough to warrant him in finding the accused guilty of manslaughter, but it was quite clear that they were rioters.

(Rex v. Hamelin et al.; 19th November, 1907; Talbot, District Magistrate.)

### Barbers' Annual Dues to Association.

In the Circuit Court at Sherbrooke, recently, the Quebec Barbers' Association sued four barbers, Messrs. Blais, Morin, Rouillard and Roberge, to recover from each the sum of \$2, the amount of their dues to the Association. Defendants pleaded that they did belong to the Association, but as they had not paid dues, they had become lapsed members, and if there was an action against them, it was not an action to recover the annual dues, but it was an action for a penalty of \$10, which is by law imposed on any barber practicing in a city of over 5,000 population who is not a member of the Association. The Court held that the Association had the option to take action for the penalty of \$10, or for the annual dues, and maintained the action.\*

(Quebec Barber's Association v. Blais et al; 30th October, 1907; Hutchinson, J.)

### Trainmen Acquitted on Charge of Manslaughter.

Operators Stata and Sheets and Brakeman Howells, three Grand Trunk Railway employees, who were committed for trial on a charge of manslaughter, as noted at page 613 of the November number of the *Labour Gazette*, for causing the death of a fellow employee by failing to observe the rules of the Company, have been acquitted in the Court of Sessions at Montreal. The presiding judge found that it had not been proved that the operators in question or the brakeman had received orders that there was a second train coming down the track, with orders to proceed ahead to Montreal.

(Rex v. Howell et al; 12th November, 1907; Choquet, J.)

### Responsibility of Locomotive Engineer.

A coroner's jury decided to acquit Engineer Rudolphe Vallee of criminal responsibility in connection with the ballast train collision at St. Polycarpe, on the line of the G. T. R., in which Fireman Hope of Montreal was killed on 12th November.

Vallee was in charge of the engine attached to the moving train which crashed

into the stationary one. He explained to the Coroner that his engine was going tender first. His lamps had been giving him trouble, having gone out several times between Coteau and St. Polycarpe. This caused him to lose his bearings, and he did not think he was so near St. Polycarpe. This, along with the anxiety because his gauge indicated low water, caused him to miss the switch, and a collision was inevitable before he realized that this had occurred. This frank statement was largely responsible for the way the jury decided to excuse the engineer.

(Inquest re Hope; 15th November; 1907.)

### Engineer Held Responsible.

Engineer Rennick, at a coroner's inquest held at St. Clet, was held responsible for the fatal accident which occurred at that station on the C. P. R. early on the morning of the 12th November, when a stationary freight train, opposite a water tank, was struck in the rear by another freight train following down the track, resulting in the death of Fireman Daniel Mooney of Smith's Falls.

Engineer Rennick, in the cab of the engine which collided with the train in front, saved his life by jumping through the window when he realized that the collision was inevitable. Fireman Mooney did not have time to follow his example, but was pinned to death under the debris of the overturned locomotive, being crushed almost beyond recognition, when the body was recovered by the wrecking crew. The upsetting of the engine also caused two of the trainmen to sustain serious scalds, but they were not of a fatal nature.

The accident occurred at 1 a.m., and the circumstances brought out at the inquest showed that signals must have been disregarded to permit of the second train coming up.

(Inquest re Daniel Mooney; 12th November, 1907.)

## ONTARIO CASES.

### Trainmen Held Responsible by Coroner's Jury.

A coroner's jury at Barrie, which enquired into the circumstances surrounding the death of Robert Blackburn, the

\* See case noted at page 1286 of *Labour Gazette* for May, 1906, in the same sense.

G. T. R. fireman who was killed on the night of September 30th, in the Allandale yards, returned a verdict that "the rear-end collision was due to violation of the rules of the Grand Trunk by Engineer Henry J. Morris, of the second train, starting before the expiration of the ten minutes prescribed by the rules, and not having the train under full control, and also due to John Ferrill, conductor on the first train, not protecting his rear by flag or fusee." The verdict expressed disapproval of the transportation of non-perishable freight on Sunday, and recommended that the Grand Trunk Railway Co. make, by semaphore or otherwise, better protection for trains at the place where the accident occurred.

(Inquest re Blackburn; 10th October, 1907.)

#### Engineer and Conductor Acquitted of Criminal Negligence.

In connection with what is known as the Caledon wreck, which occurred on the 3rd September last, on the line of the C. P. R. at what is known as the Horse Shoe curve, George Hodge, the engineer, and Matthew Grimes, the conductor of the ill-fated train, were put upon their trial at the last assizes at Brampton on a charge of criminal negligence in failing to observe the rules laid down for their guidance by the officials of the Railway. It will be remembered that the train which was wrecked was a special passenger train carrying a large number of persons to visit the Toronto Exhibition. Of the number on board, seven were killed and close on to two hundred injured, more or less severely. The particular charge made against the accused was that of maintaining too high a rate of speed while taking the curve, which is a very sharp one, contrary to the specific rule of the Company upon the point. After a trial of some days, the jury brought in a verdict of acquittal. In discharging the accused, the presiding judge said: "I am glad for your sake that the jury have been able to reach a definite conclusion. I hope it will be a lesson to you both in after life to exercise all possible carefulness in the discharge of your duties."

A further charge of manslaughter

against Hodge was traversed to the next Assizes, the accused being released on bail.

(Rex v. Hodge and Grimes; 16th November, 1907; Magee, J.)

#### Trainmen Acquitted of Neglect of Duty.

At the last sittings of the District Court at Port Arthur, Conductor F. McCarthy and Brakeman Anderson were acquitted by a jury of criminal negligence in causing the death of Engineer Edward O'Donnell at Kama on the line of the C. P. R., on the north shore of Lake Superior, on the 13th August last. The accused were charged with unlawfully omitting to do an act which was their duty, viz., to see that the switch on the main line was closed, neglect which resulted in the collision of a passenger train, and a work train in charge of accused, which caused the death of O'Donnell, the engineer of the passenger train.

(Rex v. McCarthy and Anderson; 13th November, 1907; O'Leary, J.)

#### Fined Imposed on Railway Company for Careless Handling of Explosives.

At the recent Assizes at Sandwich the Michigan Central Railway Company pleaded guilty to an indictment presented against them in connection with loss of life and property occasioned by the explosion of a car of dynamite at Essex station, on the 10th of August last, and were fined \$25,000. The following are extracts from the remarks of the presiding judge when pronouncing judgment:—

"This fearfully dangerous substance was shipped with no more care or precaution than a carload of potatoes. \* \* \* It makes one's blood run cold to consider the history of this car—an ordinary car loaded partly with dynamite and partly with other freight shunted backwards and forwards with detonations like pistol shots—and no one taking the slightest care. \* \* \* I have always thought (and the more I think of it, the more I am sure I am right), that if it were made more costly to railway companies and others to disobey than to obey the law, offences against the law would be much diminished. \* \* \* The Company, so far as appears, took no care whatever to have

the employees instructed in the handling of such materials, and knowledge of that character does not come by instinct \* We continue to call such occurrences "accidents," "crimes" were the better word. \* \* \* \* If it were the fact that the Board of Directors or the General Manager of the defendant company, or any one responsible directly or indirectly \* \* \* \* resided within the jurisdiction of this Court, I should have recommended their being indicted as well as the company. \* \* \* \* But I have not been able to find any person, high or low, in the service or management of the company within the territorial jurisdiction of the Court who can be said to be in any way the guilty authors of the shocking casualty. \* \* \* \* So far as our law is concerned, those who are really responsible for the bloodshed at Essex must be left to their own conscience and the court of public opinion."

(Rex v. Michigan Central Railway Co.; 25th October, 1907; Riddell, J.)

#### **Widow's Action for Damages Dismissed.**

At the recent Assizes at Perth, an action by Annie Fanning, the widow of James Fanning, against the C. P. R. Company for damages for the killing of her husband, her only means of support, was tried. Deceased was an engineer, employed by the company, and was killed on the 14th of June last by his engine turning over near Sand Point at a place where a rail had been removed by the repair gang. The jury found that the proper signals had not been set out to warn of danger, and that death was due to no negligence of the deceased. On motion by defendants for a non-suit, the Judge held that the answers of the jury were not in accord with the undisputed testimony, and dismissed the action. The jury had awarded \$2,000 damages.

(Fanning v. C. P. R. Co.; 15th November, 1907; Falconbridge, C. J.)

#### **Judgment in Damage Action.**

Action was brought by Stephen Burley, administrator of the estate of Alonzo Burley, deceased, for damages for the death of deceased, owing, as alleged, to defendants' negligence. Deceased was

a conductor on defendants' railway, and left Sarnia on April 24th, 1907, in charge of a train for Mimico by way of London. The train reached London East about 11 o'clock at night, and it was then found that the engine must be run into the repair shop for repairs. The order for this purpose was given by the conductor to the engine driver while standing on the station platform, London East. The driver went off to obey the order, leaving the conductor on the platform, and that was the last time he was seen alive. Immediately after a car from another train was run by a flying shunt into the repair shop yard, the body of the conductor was found by the night watchman at Rectory Street, between the rails of the first track south of the station. No one saw the accident. Plaintiff's theory was that the deceased had entered upon the track in crossing to his train after the engine had passed, and was run over by the shunting car. The jury found that the defendants were guilty of negligence in not having the car protected, by a light, according to the rules, and made other findings, and assessed the damages at \$1,080, for which amount judgment was ordered to be entered.

(Burley v. G. T. R. Co.; 18th November, 1907; Clute, J.)

#### **Consent Judgment in Damage Suit.**

In an action brought to recover damages for the killing of the plaintiff's husband, who fell from a scaffold while in the employ of defendants, a consent judgment was entered with the approval of the Court on behalf of the infants interested for \$1,000 and costs., the amount to be apportioned among the plaintiff and her children.

(Jackson v. Dominion Bridge Co.; 6th November, 1907; Mulock, C. J.)

#### **Damage Caused by Defective Floor.**

Plaintiff was a gardener and choreman in the employment of defendant, a married woman, at Belleville. Part of his duty was to feed a calf and a colt, and to do so he had to go up into a loft or hay mow and pitch hay down. There was a hole in the floor of the loft six or eight inches wide and six feet long, which was at first covered with hay, but as the hay

decreased, became exposed. Plaintiff, in the course of his employment, put his leg through the hole and was injured. On conflicting evidence as to plaintiff's knowledge of the existence of the hole, a jury in an action for damages against defendant for negligence awarded plaintiff \$800 damages, and this verdict was upheld on appeal.

(Cobb v. Lingham; 13th November, 1907; Divisional Court.)

#### Strikers Fined for Intimidation.

George Leader and W. J. Robinson, of Kingston, two striking tailors, have been fined \$100 each or one month in jail for intimidating John Martin, a non-Union strike-breaker. The accused called Martin a "scab" and threatened to kill him if he did not get out of town.

(Rex v. Leader and Robinson; 23th November, 1907; Farrell, P. M.)

#### Obtaining Money by False Pretences.

A case of considerable interest to employers of labour, as well as to employees, was dealt with in the Police Court at Toronto lately. The Universal Knitting Company some time ago brought over two girls, Sarah Waldron and Nellie Alexander, from England, to work for them, the Company advancing their fares and making other advances. The girls signed a contract under which they were to work for the Company at wages not to be less than \$6 per week until they had paid back their passage money and certain other advances. They worked for the Company for a time, but soon left for better positions, still owing the Company about \$50 each. The Company had them arrested on the charge of obtaining money under false pretences. The defence was that no proceeding could be taken under the Criminal Code, the remedy, if any, being by proceeding in a civil court as for breach of contract. The Magistrate took this view, and dismissed the case, while remarking on the dishonesty of such action on the part of the accused.

(Rex v. Waldron and Alexander; 20th November, 1907; Denison, P. M.)

#### Enticing Away of Employees.

An action was recently brought in the High Court at Toronto by the Gale Manu-

facturing Company against the Colonial Manufacturing Company of Guelph, and Maggie Blair, Cassie McCormack and Fannie Gorman, recently of Belfast, Ireland. The Gale Company brought the girls out, paying their passage, and they afterwards left the employment of plaintiffs and entered the employ of the Colonial Company. An injunction was applied for to prevent the Colonial Company from enticing away and harbouring the girls from the employment of plaintiffs, and against the girls restraining them from being enticed. Plaintiffs sought also to recover \$151.20, advanced to the girls to bring them out. The injunction against the girls was refused, and the motion against the Colonial Company enlarged. Subsequently, the plaintiffs decided to go no further with their action, and it was dismissed.

#### Forfeiture of Wages.

A case of some importance as affecting the relations of master and servant was disposed of in the Police Court of St. Thomas recently. Complainant commenced work for defendant on the 8th day of July, 1907, and continued in his employment until Saturday night, the 19th day of October, 1907, under a contract for a weekly hiring at \$10 a week wages, payable at the end of each week. Defendant paid complainant all the wages due to him except the last week's, wages which he refused to pay upon the ground that the complainant had not given him a week's previous notice of leaving his employment. The magistrate held it was not necessary to decide the point whether the defendant was entitled to a week's notice, or a reasonable notice, for the purpose of terminating the contract, because the last week's wages were due and payable, and the want of notice did not operate a forfeiture of the wages, for which proposition there was abundance of authority. In consequence, defendant was ordered to pay complainant the sum of \$10, being the wages due him for the week ending the 19th October, and the costs of the proceedings.

(Stewart v. Hutcheson; 14th November, 1907; Glenn, P. M.)

### Verdict in Damage Suit.

At the recent jury sittings of the High Court at Hamilton, plaintiff, as mother and administratrix of the estate of Charles W. Allan, deceased, brought suit to recover damages for the death of her son, caused, as alleged, by the defective machinery of defendants. Deceased was killed at the blastfurnace of defendants, on February 3rd, by falling from an ore buggy that, toppled over, and being run over by the wheels. Plaintiff was a widow, and her son was her only support. He was earning \$3.50 a day at the time of his death. His duty was to accompany the ore train as it ran back and forth from the wharf to the furnace, taking slag away. The box on one of the cars, called the buggy, was overloaded and warped, the plaintiff claimed, and negligence was urged because there was no safe place provided for deceased to ride on. The jury found in favour of plaintiff, with \$1,500 damages, for which sum and costs judgment was given in her favour.

(Allan v. Hamilton Steel & Iron Co.; 2nd November, 1907; Falconbridge, C. J.)

### Damage Suit Dismissed.

At the same court was heard an action by plaintiff to recover \$5,000 damages for injuries sustained on defendants' railway. Plaintiff was employed as a brakeman, and on 29th January last, while passing from the tender of a moving train to the car immediately following, was thrown down between the two, and sustained such injuries as necessitated the amputation of his right leg. Plaintiff alleged negligence of the defendants, in the engine-driver applying the emergency brake without warning, which was the cause of the accident. The jury assessed the damages at \$1,200, but on motion for non-suit, the action was dismissed with costs.

(Curtis v. Michigan Central R. R. Co.; 24th October, 1907; Falconbridge, C. J.)

## MANITOBA CASE.

### Case Involving Plumbers.

In an action brought at Winnipeg by Cotter Bros., master plumbers, against the Journeymen Plumbers' Local Union, No. 62, George Litster, the secretary of

the Union, was ordered to produce the minute book of the organization, which he had previously sworn was in his possession. He refused to do so, alleging as an excuse that the executive of the Union would not allow him to do so. Upon this refusal, proceedings were taken against him by way of attachment for contempt of court, and Litster was again ordered to produce the book, being informed that the Court was superior to the officers of the Union. Upon his continued failure to produce the book, he was, in July last, committed to jail until he should have purged his contempt. Lately, an application was made for his discharge from custody, and in support of the application, an affidavit was made by his mother stating that she had come across some books at her house, and looking over them, found the minute book in question. Thinking it would save a lot of trouble, she burnt it without a word to her son. She had no idea that the non-production of the minute book would be treated as a contempt of court, or that there was anything wrong in her disposal of the book. Her only object was to save her son getting into trouble, and at the time of making the affidavit, she stated that she had she had never told him yet that she had destroyed it; that she had acted on her own initiative entirely, her son never having made any suggestion of any kind to her in regard to the book, and she had no desire or intention of interfering with the course of justice. Litster himself made an affidavit in which he stated that his mother never said anything to him about having destroyed the book. When he first refused to produce the book, the reason which impelled him to so refuse was the reluctance of the executive of the Union to have same produced, and afterwards, when he desired to comply with the order of the Court, he was unable to do so owing to the disappearance of the book. Ultimately, an order was made for Litster's discharge upon payment of the costs, which will be \$400. During the hearing of the motion, an interested Union man in court stuck out his tongue at plaintiff's counsel, and was fined \$10.

(Cotter v. Union No. 62 et al.; 19th November, 1907; Macdonald, J.)

## ALBERTA CASE.

**Conviction in Lumber Combine Case.**

The lumber combine case, involving all the lumber dealers of the Province, which has been in progress for some weeks, has resulted in the Alberta Retail Lumber Dealers' Association being convicted and fined \$5,000. This is one of twelve indictments against each of fourteen defendants, who are charged with infractions of the sections of the Criminal Code regarding conspiracies in restraint of trade.

The punishment provided by the Code in the case of individuals is a fine of not more than \$4,000 and not less than \$200, or two years' imprisonment, and in the case of a corporation, a fine of not more than \$10,000 and not less than \$1,000.

(*Rex v. Clark et al*; 29th November, 1907; Sifton, C. J.)

## BRITISH COLUMBIA CASES.

**Musicians' Union Must not Interfere With Regimental Bands.**

Alfred Greenwood, secretary of the Musicians' Protective Union at Victoria, was recently fined \$25 on a charge preferred under section 126 of the Militia Act, for having written a letter detri-

mental to Albert Ban Rumsby, bandmaster of the Fifth Regiment, on account of acts performed by him while in the performance of his duty as a militiaman. The trouble which gave rise to the prosecution, which was instituted by the Colonel of the Regiment, was between Rumsby and his Union. Rumsby, when not in uniform, is a professional musician and is a member of the Union. Several of the other members of the Regimental band are also Union men, and it is alleged that two of these had been suspended by the Union for non-payment of fines. There is a regulation among the Union rules which provides that any conductor or leader employing a suspended man on a paid job is liable to a fine of \$10. Rumsby is said to have permitted two of these suspended men, who were also members of the regimental band, to play in the last band concert of the year at Beacon Hill Park. Rumsby was accordingly fined \$10 by his Union, and subsequently suspended himself for non-payment of the fine. Greenwood, secretary of the Union, wrote him a letter announcing the imposition of the fine, whereupon an information was laid against him for a breach of the Militia Act.

(*Rex v. Greenwood*; 7th November, 1907; Jay, P. M.)

# LABOUR GAZETTE

JANUARY, 1908.

## INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF DECEMBER, 1907.

### I.—GENERAL SUMMARY.

THE exceptionally mild weather which continued up to the middle of December throughout the North-west provinces and British Columbia had a favourable effect upon the market for labour. The activity incident to the holiday season was a further favourable feature of the month, the volume of Christmas trade having been satisfactory. There was, however, an increase in the supply of labour available for general employment as compared with November, though the amount of work in hand in several localities showed no diminution. The decline in activity was chiefly noted in the manufacturing and railway construction departments; in other branches the month showed little change from November. The surplus of labour was most apparent in the cities of Toronto, London, Winnipeg, Edmonton and Vancouver, though at several other points the supply, as is usual during the winter season, was in excess of the demand. The money stringency was somewhat less, though still acute. The outlook for the spring season was regarded as favourable at the close of the year.

#### Regulation of Immigration.

The Immigration Branch of the Department of the Interior, Canada, issued instructions during December to its agents in Great Britain to insert advertisements in the British newspapers informing intending emigrants that the winter

months are inopportune for emigration to Canada, and advising those who contemplated coming to this country to wait until spring. Instructions were also, cabled to the office of the assistant superintendent of emigration, London, Eng., to advise steamship booking agents that immigrants arriving in Canada until February 15th, should have \$50 and that those arriving after that date and until April 1, should have \$25.00, in addition to inland transportation, unless they show to the satisfaction of the immigration officers at Canadian ports that they have employment to go to, or friends who will care for them. The regulations will apply to Pacific as well as Atlantic ports. The action was considered necessary by reason of the fact that whereas in previous years immigration has greatly declined during the late autumn months the number of arrivals during October and November, 1907, were unusually heavy and showed no signs of abating. It was stated, also, that the section of the Immigration Act requiring persons who become a charge on the public within two years of arrival to be deported, will be applied by the government.

#### Changes in Wages and Hours of Labour.

The downward tendency in wages, among labourers affected by the cessation of activity noted in November was continued during December. The

changes have been most pronounced among lumbermen, railway construction employees and unskilled labourers. In western Canada it was estimated that 10,000 workmen of these classes, boarded by the employers, have had their wages reduced \$10.00 per month, as compared with the corresponding period of 1906<sup>(1)</sup>. The same tendency was observed in other parts of Canada, especially in British Columbia and in the larger industrial centres.

The following is a statement by industries and groups of trades of the more important changes in wages and hours of labour, concerning which information was received at the Department of Labour during December.

*Agriculture.*—Farm labourers' wages were lower during the closing months of the year in western Canada than in 1906, the prevailing rate during the closing weeks of the season of activity having been \$2.00 per day, as compared with \$2.25 in 1906. A bulletin issued by the Ontario Department of Agriculture with reference to wages of labour on farms stated that it was unlikely that wages would go higher, as farmers cannot afford to pay more. Improved farm implements and the co-operation of neighbours were cited as helping to relieve the strain caused by the scarcity of labour.

*Mining.*—Under the terms of an award by a board appointed under the Industrial Disputes Investigation Act, 1907, to settle a dispute between the Strathcona Coal Company, Alta., and its employees, the latter were granted an increase in wages and an eight-hour day. Employees of the Consolidated Mining and Smelting Company of Canada at the St. Eugène Mine, Moyie, B. C., also received an advance in scale, as the result of an investigation by a board appointed under the Act<sup>(2)</sup>.

*Building.*—Carpenters (200) at Ottawa, Ont., had their wages reduced from 30 to 25 cents per hour.

*Metal, engineering and shipbuilding.*—Machinery blacksmiths (15), machinists

(17) and drill and shaper hands (15) at Brantford, Ont., had their wages reduced 10 per cent.

*Woodworking.*—Piano and organ workers (300) at Guelph, Ont., were reduced 5 per cent in wages. At Fredericton, N. B., canoe makers had their wages reduced \$1.00 per week. Furniture workers (320) at Berlin, Ont., were reduced 10 per cent.

*Clothing.*—Some 16 tailors at Kingston, Ont., received an increase of 15 per cent in wages.

*Leather.*—Larrigan makers (70) at Fredericton, N. B., had their wages increased 10 per cent.

*General transport.*—About 1,000 longshoremen at St. John, N. B., received an increase in wages from 30 to 32½ cents per hour on December 4th.

*Railway employees.*—Engineers and firemen (35) and telegraphers (33) employed on the Temiscaming and Northern Ontario Railway had their wages increased dating from November 1st. Section men, snow shovellers, etc., (15) at Hull, Que., received an increase from \$1.35 to \$1.50 per day.

*Civic employees.*—Dating from January 1st, the employees of the London, Ont., fire department to the number of 30 will receive an increase in wages<sup>(3)</sup>.

*Railway Construction Employees.*—Labourers (200) employed on the construction of a bridge for the Grand Trunk Pacific Railway Company at Clover Bar, Alta., had their wages reduced from 25 to 20 cents per hour.

*Unskilled labour.*—The wages of unskilled labour were generally lower in December than during the summer and autumn seasons. At Ottawa, Ont., for example, the average rate was reduced from \$1.66 to \$1.33 per day and at Hull, Que., from \$1.35–\$1.50 to \$1.10 per day. At Brantford, Ont., labourers employed in manufacturing establishments were reduced 10 cents per day.

### Cost of Living.

The price of wheat and other grains was somewhat lower than in November, though upwards towards the close of the

(1) See report of Winnipeg correspondent.

(2) An article dealing with the appointment, proceedings and findings of these boards is published in the present issue.

(3) See report of London correspondent.

month. Other farm produce remained steady on high levels, butter and eggs being higher than in many years past. Poultry during the holiday season was lower than last year. Since the early summer the price of hogs has declined, and in December was lower than in some time past. The cause alleged was the stringency in the money market, inducing a reduction of prices in the British market. Large quantities were marketed by farmers within the past few weeks owing to the high price of feed. There was a slight decline in the cost of building materials in western Canada from the high prices which ruled during the active season. The change was most marked in the case of plumbers' supplies. Wood fuel in western Canada was lower than last year (4). Notwithstanding the efforts of the provincial government, a shortage of coal was reported at several of the small towns in Saskatchewan, especially those on branch lines in newly settled sections in the centre of the province. The metal market has been steady.

### Interruptions to Industry.

The number of trade disputes in existence during December was 2 less than in the previous month, and there was a decrease of approximately 8,500 in the number of working days lost. Compared with December, 1906, there was a decrease of 7 in the number of trade disputes, and a decrease of about 5,795 in the number of working days lost.

Among industrial establishments, etc., destroyed by fire or through other causes during December, the following, as reported in the press of the Dominion, may be mentioned:

*Nova Scotia.*—Steamer "Hamblin" at Canso; store at Sydney, loss, \$1,500.

Steamship "Kildona" wrecked on Cape Sable, total loss.

*New Brunswick.*—Shingle mill at Charlo, loss, \$30,000. Barns at Tracadie.

*Quebec.*—Millinery store at Farnham; general store at Hull, loss, \$6,000; market house at Longueuil, loss \$15,000; hotel at Montmorency Falls, loss, \$15,000; hardware stores at Montreal, loss, \$7,200; box factory at Montreal, loss, \$3,000; jewellery store at Montreal, loss, \$11,000; radiator building at Montreal, loss, \$15,000; stable and three horses at Montreal; factory and tailor shop at

Montreal, loss, \$10,000; tannery at Quebec business block at St. Flavien de Lotbinière, loss, \$4,000; drain pipe factory at St. Johns, loss \$125,000, 150 workmen out of employment; blanket factory at St. Paul; barns at Smith's Mills.

*Ontario.*—Suspender factory at Arnprior, loss, \$50,000; business block at Chatham, loss, \$7,000; flax mill at Forest, loss, \$4,000, 20 hands out of employment; factory at Guelph, loss, \$2,200; hotel at Guelph, loss \$2,000; power sub-station at Hamilton, loss, \$1,500; machine shop at Hamilton, loss, \$3,000; south pier and light-house at Hamilton; railway station at Harrisburg; coal shed at Kingston, loss, \$2,500; tailor shop at Lancaster, loss, \$1,000; business block at Little Current, loss, \$70,000; stores and stock at Omemeé, loss, \$10,000; workshop at New Liskeard, loss, \$6,000; barn and sheds at Simcoe, loss, \$2,000; stave mills at Springfield, loss, \$3,000; paper box factory and planing mill at Toronto, loss, \$170,000; business block at Toronto, loss, \$76,100; three Grand Trunk Railway freight cars and contents at Toronto, loss, \$6,000; furrier store at Toronto, loss, \$50,000; restaurant at Toronto, loss, \$1,000; store at Wheatley.

*Manitoba.*—Hotel, warehouse and stores at Beauséjour, loss, \$26,000; power storehouse at Northfield; store at Selkirk, loss, \$2,000; engraving and printing establishment at Winnipeg, loss, \$3,000; warehouse at Winnipeg, loss, \$12,000; elevator at Wood Bay, loss \$6,000.

*Alberta.*—Store and laundry at Macleod; business block at Red Deer; hotel and store at Vegreville, loss, \$50,000.

*Saskatchewan.*—Greater portion of town of Alameda, loss, \$200,000; restaurant at Indian Head; tailor shop at Swift Current; elevator and 8,000 bushels of wheat at Vonda.

*British Columbia.*—General store at Bulkeley, loss \$10,000.

### Conditions in the Industries and Trades.

Conditions of employment during December in the several industries and trades throughout Canada, as indicated by the reports of correspondents to the *Labour Gazette* and by information received at the Department from other sources, may be briefly summarized as follows:

#### Agriculture.

Unsettled weather in Ontario and the eastern provinces interfered with the marketing of produce, though the Christmas markets were well supplied. In western Canada, a slight decline in the price of grain caused a tendency among farmers to withhold stocks. The weather throughout the northwest provinces has been exceptionally favourable for outdoor employment. In some sections of southern Alberta ploughing was continued up to the middle of December. It is estimated that there will be a considerable increase in the area put to seed in these provinces.

(4) See report of Winnipeg correspondent.

TABLE SHOWING STATE OF EMPLOYMENT IN

This table is based largely on the reports of the correspondents of the *Gazette* as published in the present issue several trades and industries throughout the Dominion. This table has reference only to the amount of employment headings in the *Gazette*. In tabulating the information in question the terms employed are divided into two groups, the busy, very busy, (2) quiet, dull, very dull.

According to an official estimate issued by the Department of Agriculture of Quebec the crop yield of 1907 compared favourably with that of 1906, the return amounting to 71 per cent as compared with 65 per cent for the preceding year. The following is a comparative statement in percentages of the crop yield during the past two years:

	1906.	1907.
Wheat.....	72	64
Barley.....	70	72
Oats.....	70	68
Rye.....	66	65
Buckwheat.....	64	70
Flax.....	70	67
Peas.....	64	63
Beans.....	73	69
Indian corn.....	75	67
Beets, fodder.....	70	69
Turnips.....	72	80
Potatoes.....	63	67
Clover.....	49	79
Timothy.....	53	76
Apples.....	57	66

Two important official returns with reference to the crop season of 1907 in Ontario were issued during December. A bulletin of the Census and Statistics Branch of the Department of Agriculture, Canada, setting forth the result of a census of live-stock and grain crops during 1907, showed that the area of improved land was 14,123,742, an increase of 900,429 acres compared with 1901, the year of the previous census. The area of land under crop was 7,769,724 an increase of 567,008 acres. The area under orchard and vineyard was shown as 326,290, an increase of 64,360 in the six years. The production of fall and spring wheat showed a considerable falling off. Oats, barley, mixed grain, roots, clover, etc., showed an increase in areas but a shortage in the yield during 1907. A crop bulletin issued by the Department of Agriculture of Ontario gave the following comparative returns for 1906 and 1907:

	1907	1906
Fall wheat, bush.....	15,545,491	18,841,774
Spring wheat, bush.....	2,473,651	3,267,000
Oats, bush.....	83,524,301	108,341,455
Barley, bush.....	21,718,332	25,253,011
Rye, bush.....	1,081,706	1,327,582
Buckwheat, bush.....	2,546,468	1,792,903
Beans, bush.....	790,269	950,312
Peas, bush.....	7,365,036	7,388,987
Potatoes, bush.....	20,907,893	15,020,299
Turnips, bush.....	48,205,605	57,060,151
Corn, for husking.....	22,247,931	23,988,682
Hay, tons.....	3,891,863	4,684,625
Corn, for forage, tons.....	2,029,547	2,149,413

According to an estimate made by the Canadian Pacific Railway Company, the total value of the western crop for 1907 will considerably exceed that of the crop of 1906. In southern Alberta the yield was heavy and the acreage larger than in the preceding year. A large portion of the wheat grown in this section will be ground by British Columbia mills.

Final returns with reference to the dairying season of 1907 show a considerable falling off as compared with 1906. The make of cheese was about 10 per cent short, while butter exports declined \$3,882,400 in value. The aggregate value of Canadian cheese and butter exports for the season was about \$20,186,398, compared with \$25,999,304 in 1906. The late spring and the poor pasturage were the chief causes alleged for the decline. Labour troubles at Montreal, at the opening of navigation, also delayed the export movement. Stocks in Canada at the close of the season were considerably lighter than last year.

There has been a marked decline in the hog raising industry in Ontario during the past autumn due to scarcity of feed and prevailing market conditions.

It is estimated that from 400,000 to 500,000 barrels of apples valued at \$1,000,000 were in cold storage in Ontario at the close of the year.

The Maritime Winter Fair was held at Amherst, N. S., December 2 and 3. The Guelph Winter Fair was held on December 9-10. Both were well attended.

At a meeting of the United Farmers' Association and the Dominion Grange held at Toronto, Ont., a resolution was passed advocating the reduction of the tariff to a revenue basis. The Pomological and Fruit Growing Society of the province of Quebec and the Northwest Fruit Growers' Association held meetings at Ste. Anne de Bellevue, Que., and Vancouver, B. C., respectively. At Regina, Sask., a conference of delegates from Saskatchewan agricultural societies was held. The Butter and Cheese Manufacturers' Association of the province of Quebec was formed at Farnham, Que., with the object of improving conditions among dairy farmers in Quebec.

In connection with the *supply of labour*

on farms and orchards in British Columbia, the following circular communication was recently sent out by the Honourable the Minister of Finance and Agriculture for the Province:—

VICTORIA, October, 1907

Dear Sir:

Letters are being constantly received by the Bureau of Provincial Information from persons desiring work on farms and orchards. These applications are from the Middle and Eastern Provinces of Canada, the British Isles and Northern Europe, and may be divided into four classes, namely:

- (1) Young men inexperienced in farm work, wishing to learn practical farm work and horticulture
- (2) Experienced farm hands, unmarried.
- (3.) Experienced farm hands, married (with families or otherwise) whose wives are willing to take service with their husbands.
- (4.) Women domestics.

A majority of the applicants is of Class 1, but there is a considerable number of Class 2. Class 3 is much less numerous, and there are very few applicants in Class 4. Most of the married men are desirous of having a dwelling separate from that of the employer, an arrangement which should commend itself to those who look to securing permanent help.

Under an agreement existing between the Government and the Emigration Branch of the Salvation Army, a considerable immigration of farm hands and domestic help is expected from Great Britain during the spring and early summer of 1908.

The Government is very desirous of securing the immigration to British Columbia of a reliable class of white labour, and invites the earnest co-operation of the farmers, fruit-growers and dairymen of the Province to that end.

You are therefore requested, if you are in need of help, to fill in, as comprehensively as possible, the form enclosed. If you do not require help, please hand this letter and form enclosed to some neighbour who does.

Yours truly

R G TATLOW,  
Minister of Finance and Agriculture

The above circular, with the accompanying form, was sent out to over 3,000 farmers, from all of whom returns have not been received up to the end of the year. It was stated by the Bureau of Provincial Information for British Columbia, however, that sufficient answers have been received up to December 6th to warrant the belief that there is a demand in British Columbia for from 1,500 to 2,000 farm labourers and domestic servants.

### Fishing.

Smelts were taken in considerable quantities in the Maritime provinces. In other branches conditions were quiet. Markets were unchanged. An unusually large amount of partially cured

stock was reported in the hands of fishermen; this with the prevailing financial stringency caused a downward tendency in prices. In British Columbia the chief activity of the month was in connection with the herring fisheries at Nanaimo, B. C., where the number of men employed was larger than last year. The final return of the salmon pack of 1907 was issued during December; a decrease of 175,946 cases in the pack of sock-eyes was shown (<sup>6</sup>). The year's sealing operations also compared unfavourably with those of 1906 (<sup>6</sup>). The outlook for whaling during the present winter was regarded as very favourable.

The sessions of the British Columbia Fishery Commission were closed at Victoria, B. C., on November 29th. The report and recommendations of the Commission were later forwarded to Ottawa. The Commission, which was appointed in July, 1905, has previously submitted two interim reports in December, 1905, and October, 1906, and a special report on sanitary conditions in the salmon canning industry in July, 1906. The following resolution was passed at the closing session of the Commission:

"The British Columbia fishery commissioners desire to express to the honorable the Minister of Marine and Fisheries their hearty appreciation of his action in authorizing the establishment of a biological station at Nanaimo. They feel that in British Columbia there is an unequalled field for investigation and they believe that the station will prove of the greatest value to the fishing industries, and they would urge the necessity of affording to this institution liberal financial support."

Regulations governing the smelt fisheries of the Maritime provinces and the fisheries of the North-west provinces and territories were issued by the Government of Canada during December.

### Lumbering.

Conditions throughout Canada were about the same during December as in the preceding month. Sawing operations in the Ottawa and St. John Valleys came to an end for the year with the closing down of the larger mills in the opening week of the month. Between 2,000 and

(<sup>6</sup>) For detailed statement see report of New Westminster, B. C., correspondent.

(<sup>6</sup>) See report of Victoria, B. C. correspondent.

3,000 men were thereby released, and as the gangs taken to the camps were about 20 per cent smaller than in the preceding year, many of these found it necessary to look for work elsewhere. On the whole, the sawing season was very favourable, the time lost at the beginning of the season having been made up at the close. The output was estimated as slightly in excess of 1906. In Quebec and the Maritime provinces unsettled weather conditions caused some embarrassment in the camps; the curtailment of operations among farmers and jobbers will be pronounced in these provinces. Trade was somewhat quiet, but prices were firm with stocks low. In the North-west provinces the output of logs will be curtailed; labour was plentiful, though experienced help was scarce, at wages \$10 a month less than last year (?). In British Columbia the camps and mills continued very dull. Considerable additions to plant and machinery were being made. The British Columbia Timber and Forestry Chamber of Commerce, recently incorporated, held a meeting at Vancouver during December. The objects of the Chamber were defined as follows:

1. The securing of something like stability of title in special license lands.
2. The definite fixing of licence fees and royalties for some years to come.
3. The survey of timber lands under conditions which more nearly meet the approval of timber owners and the Government than the present usages permit.
4. Prevention of forest fires.

A circular communication was recently sent out by the commissioner of Lands and Works of British Columbia to steamboat owners throughout the province with reference to the enforcement of the law prohibiting the exportation of timber. The circular pointed out the provisions and penalties of the law, and stated that the sections dealing with the legal exportation of timber will be strictly enforced.

### Mining.

The Nova Scotia collieries had a very busy month the output being heavier than in December, 1906. In Quebec, the mica mining industry remained quiet, and there was some curtailment of opera-

tions in other branches as a result of seasonal causes. In eastern Ontario, also, there was a further decline in activity. Shipments from the Cobalt camp during November were exceptionally heavy. The coal mines at Edmonton and in the Crow's Nest Pass had a very busy month. On Vancouver Island, however, some falling-off in the output took place. Metalliferous mining in British Columbia continued with little change from November.

A coal mine is being opened up by the Department of Public Works of the Province of Saskatchewan for the benefit of settlers in the Eagle Lake district. The mine is being operated under the supervision of skilled miners, it being the intention of the Department to sink a shaft and to run drifts, at the same time excavating a small supply of coal for the immediate needs of the farmers.

The following statement was received from the President of the Galbraith Coal Company, Limited, of Lundbreck, Alta., which hoisted coal over its new plant for the first time in December:—

The Galbraith Coal Company is giving employment to a force varying from 40 to 50 men according to the tonnage to be produced. When an ample car supply is available the maximum number is engaged. Miners and others receive the scale of wages established by the agreement between the mine operators of the Crows' Nest Alberta coal fields and the United Mine Workers, and the relations between employers and men have always been of a cordial nature. The Galbraith mine is worked from tunnel levels, and up to the present time no gas has developed in the workings, the men working with naked lights, using seal oil. Black powder is employed in breaking coal. An interruption to the activity of the property occurred on December 21st, when a section of the tramway connecting the tunnel portals with the tippel and bunkers at the railway level were damaged by a gale. A strong crew of carpenters was immediately assembled, and it was estimated that ten days would be ample to complete the repairs. When the maximum daily tonnage of 400 to 450 tons is reached the crew of miners will probably

(?) See Report of Winnipeg correspondent.

total about 75. The seams stand at an angle of about 70 degrees, and the "long wall" method of mining is practiced. This obviates the use of coal pillars and permits the extraction of all coal encountered in the workings. Owing to the absence of gas in the mine, its proximity to the town of Lundbreck and other favourable conditions the company has had no trouble in securing an adequate crew, but its experience is that hoistmen and blacksmiths of ripe experience for mine work are not as plentiful as could be desired. At the Breckenridge & Lund mine, adjoining the Galbraith to the south, the extraction of coal has been resumed under a lease from the company to the Alberta Fuel Company, whose Canadian head offices are located at Calgary, Alta. Fifteen miners have been employed on the start, and this number is likely to be materially increased as the output is enlarged. The Alberta Coal & Coke Company's collieries in the Lundbreck coal fields are also employing a small force which is likely to be increased at an early date.

It was officially reported that for the nine months ending March, 1907, the Yukon territory produces gold to the value of \$3,304,791.05. It is expected that the new Placer Act would afford opportunities for increasing the output.

### Manufacturing.

There was a further recession in activity during December at several important points, including Montreal, Que., Toronto, London, and Brantford, Ont. A number of establishments in these cities, after closing down for stock taking purposes and repairs usual at this season, resumed with reduced staffs. No change is expected while the present stringency in the money market continues until orders for the spring trade are received. Iron and steel branches were very busy. It was stated that the quantity of steel rails required in Canada during 1908 would be upward of 380,000 tons.

### Railway Construction.

As a result of the mild weather, railway construction operations were con-

tinued well into December in western Canada but here, was a decline in activity during the closing weeks of the month.

Invitations were issued by the Grand Trunk Pacific Railway Company during December for tenders for the construction of approximately 120 miles of line west from Edmonton. The tenders were required to be in by December 23rd. The question as to what further sections will be let by contract was under consideration.

Some heavy purchases of railway ties were made by the Grand Trunk Pacific Company in Western Canada during December. The ties will be delivered during the winter at different points in Alberta.

Construction was actively continued along the line of the National Transcontinental Railway in New Brunswick; the work of rock and other cuttings will be continued throughout the winter. Men were in some demand.

It was stated that work for 1,000 additional men on grading on the extension of the Temiskaming and Northern Ontario Railway was available at wages of \$1.50 per day. About 900 men were employed on this work during December.

A number of labourers were engaged at Vancouver, B. C., for work on the Kitamaat branch of the Grand Trunk Pacific Railway.

Contracts for 100 locomotives of various sizes, to cost approximately \$1,500,000, and to be delivered about September 1st, 1908, were recently awarded by the Grand Trunk Railway Company. Twenty new passenger coaches have recently been added to the system.

The Canadian Northern Railway Company has made application for authority to construct some 15 additional branch lines in Western Canada. The Company is also desirous of increasing its capital by \$19,250,000.

The adjourned annual meeting of the Grand Trunk Pacific Railway was held at Montreal on December 5th. The report of the president showed that the authorized mileage of the company for the main line and branches consists of 7,500, no new mileage having been authorized since the last annual meeting.

The mileage under contract, the construction of which is in charge of the Grand Trunk Pacific Railway Company, consists of 988 miles from Winnipeg to Edmonton, including the Lake Superior branch. The mileage under contract, the construction of which is in charge of the Commissioners of the Transcontinental Railway, consists of 852 miles on the main line in the eastern division, or a total mileage on the entire railway, the construction of which is now in progress, amounting to 1,840 miles. It was stated that owing to the severe winter and late spring, the contractors were much delayed in getting on the work, but that increased forces had been employed during the season, with the result that only a small portion of the grading was unfinished on the prairie section, while track laying was rapidly proceeding.

### General Transport.

Though the holiday traffic was heavy and the forwarding of grain active, railway companies reduced their working staffs somewhat during December. Gross earnings, however, of the Canadian Northern Railway, Grand Trunk Railway and the Canadian Pacific Railway Company, have recently showed heavy increases compared with the corresponding period of 1906. Earnings of street railway companies also continued to show increases at Montreal, Toronto and other points. The supply of cars was more abundant than in November, though the heavy diversion of cars for the handling of the wheat crop in the days immediately preceding the close of navigation caused a shortage in the supply available for the movement of merchandise. The shortage was particularly felt in the coal mining districts of Alberta and eastern British Columbia.

The third annual report of the Alberta Railway and Irrigation Company showed a total revenue of \$284,930, leaving a surplus of \$60,901 for payment of expenses and dividend. Coal sales were 122,947 tons, compared with 192,824 tons for the previous year, the decrease being due to the strike which ended in December, 1906. Gross railway earn-

ings were \$197,608, while land sales aggregated \$213,845 at about \$5.21 per acre.

At a joint meeting of the Order of Railroad Conductors, Brotherhood of Railroad Trainmen, Brotherhood of Locomotive Engineers, Brotherhood of Locomotive Firemen and Enginemen and Order of Railroad Telegraphers, held in Medicine Hat, December 9th, the provisions of the Railway Act, R. S., 1906, were duly considered, and the following resolution unanimously adopted:—

“Whereas, by the provisions of the aforesaid act power is given the judiciary of Canada under the act to sentence men in the operation of trains for offences to fine or imprisonment, or both, when such offence may simply be a lapse of memory or an error of judgment, made honestly, and

“Whereas, the carrying out of such a law is degrading to members of our occupation, lowering the intelligence and respectability of the position of men engaged in such service, bringing humiliation and disgrace unjustly on them, their homes, and the members of their families by knowledge of the fact that he who is looked up to for example has been placed behind prison bars and classed with degraded criminals, when they are not criminals, and should not be so classed, and

“Whereas, we as practical railroad men know from experience that in order to be able to be at our best at all times to meet the constantly recurring emergencies in railroad service, so as to give the best security to the lives and property entrusted to our care, submit that we should not be placed in constant fear of criminal prosecution for errors humanely impossible to avoid. Therefore, be it resolved that we protest against the said law as being unwarranted and unnecessary

“Resolved, further, that a copy of this resolution be forwarded to the Right Hon. Sir Wilfrid Laurier, Premier of Canada; the Hon. Geo. P. Graham, Minister of Railways and Canals; and the Hon. R. L. Borden, Leader of the Opposition

“We, therefore, earnestly and respectfully request the assistance of yourself and colleagues to have this, to us, most objectionable law, amended or repealed during the present session of parliament.”

### The Trades.

*Building.*—Outside workers were idle in most localities, and the season for inside employment was less active than that of 1906. A considerable number of building contracts were being held over, owing to the money shortage. A scarcity in medium priced houses was general, and constitutes a favourable feature in the outlook for 1908.

*Metal and woodworking.*—Employees in manufacturing establishments were on the whole quiet, though conditions varied considerably according to locality.

*Printing.*—The allied trades were well employed on holiday printing.

*Clothing.*—A fair month was reported

by journeymen tailors. Garment workers, hat and cap makers, etc., were, on the whole, well employed. Furriers were very busy.

*Leather.*—Tanners and curriers were somewhat quiet owing to the downward tendency of leather prices following the decline in the price of hides. The price of raw rubber has also been downward, but rubber manufacturers were busy. Boot and shoe manufacturers were becoming busy on spring orders, and the leather, glove and mitt trade was active.

*Food and tobacco preparation.*—Bakers, butchers, confectioners, etc., were very busy throughout the holiday season. Prices were firm owing to the high level of flour and other raw material.

*Miscellaneous.*—Retail clerks, delivery employees, hotel and restaurant employees, barbers, etc., were busy throughout the holiday season, a number of extra hands being employed.

*Unskilled labour.*—The supply of general labour was considerably in excess of the demand at several points, largely as a result of seasonal conditions and the decline in activity resulting from the money stringency. The prolongation of fine weather enabled outside work to be prosecuted to an unusually late date in western Canada; on the other hand, the delay in the opening of the ice harvesting season caused some loss of employment. The work of snow removal afforded employment in many centres. Civic improvement work was begun in certain localities where the lack of employment was chiefly felt.

### Canadian Trade and Revenue.

*Foreign trade.*—During November, 1907, the total value of imports entered for consumption was \$33,099,349, compared with \$36,720,818 in November, 1906. The total value of imports for the eight months ending November 30, 1907, was \$259,495,184, compared with \$231,732,500 for the corresponding period of 1906. Total domestic exports during November, 1907, amounted to \$23,162,891, compared with \$26,393,965 in November, 1906. The total domestic exports for the eight months ending November 30, 1907, amounted to \$172,433,-

679, compared with \$174,301,540 in the corresponding period of 1906. Increases in exports during November, 1907, took place under the headings of the Fisheries, the Forest and Manufactures, and decreases under the headings of the Mine, Animals and Their Produce and Agriculture.

*Imperial trade.*—According to reports received from commercial agents at the Department of Trade and Commerce, Canada, good openings were reported in Great Britain for maple flooring and turned wood suitable for building, cabinet making and other trades, Canadian wood-working machinery and pitwood. Canadian apples were in demand. Good markets were reported for Canadian oak staves; there was also openings for potash and pearl ash, oats and barley.

*Domestic trade.*—From nearly all sections the retail holiday trade was reported satisfactory. At many points, the turnover was equal to or larger than that of 1906, notwithstanding that the latter was the most active year recorded. Collections, however, were much slower than in 1906. Following the close of navigation and preceding the holiday trade, business was inactive. Stock-taking was in progress at many points. Though the money stringency was still severely felt, conditions in this respect showed some improvement as compared with November.

The profits of Canadian chartered banks, as indicated by the annual reports of several presented during the past few weeks, show a large increase in many cases compared with the preceding year. The Bank of Commerce's profits for the year were \$1,752,349, compared with \$1,741,000 in 1906 and \$1,376,000 in 1905. The assets of the bank have risen in two years from \$98,000,000 to \$113,000,000. At the 49th annual meeting of the Eastern Townships Bank, net earnings were reported as \$372,669 for the year ending November 15, 1907. Of this, \$140,000 were added to the reserve fund and \$100,677 carried forward. The Merchants' Bank paid dividends amounting to \$240,000 and carried forward \$267,400. The Hochelaga Bank reported net profits of over 20%, both capital and reserve

fund, having been increased. The Bank of Ottawa had a very profitable year; the capital of the bank will be raised from \$3,000,000 to \$5,000,000. The annual statement of the Bank of Toronto shows net profits for the year ending November 30th of \$586,635, unpaid up capital of \$4,000,000. The sum of \$56,470 was transferred to rest account, and the balance of \$150,708 carried forward. The total assets of the bank have increased \$800,000 during the year. The Union Bank, at its 43rd annual meeting, added \$100,000 to rest account and carried forward \$62,212.

*Canadian revenue.*—Total revenue on Consolidated Fund during December, 1907, amounted to \$7,093,530.87, compared with \$7,172,200.58 in December, 1906. The total revenue for the nine months ended December 31st, 1907, was \$73,755,958.58, compared with \$64,685,753.48, in the corresponding period of last year. Expenditures on capital account totalled \$2,617,479.44 for the month and \$19,271,966.65 for the nine months period.

### Notes.

The *Ontario Bandmasters' Association* held its annual meeting at Hamilton, Ont.

The annual meeting of the Ontario branch of the *Lord's Day Alliance* was held at Toronto. It was stated that 75,000 persons had been freed from Sunday labour, and the circulation of Sunday papers reduced by 75%, under the operations of the Lord's Day Act, 1906.

The third annual convention of the *Retail Merchants' Association of Canada* was held in Montreal and was attended by representatives from all parts of the Dominion. The following resolution was passed with reference to co-operation:

"That we again place ourselves on record as being opposed to the introduction of a measure to give co-operative societies special privileges, and that we use every effort to defeat any such legislation from being placed on the statute books of the Dominion.

A Bill to authorize the issue and sale of *old age annuities* by the Government of Canada for the purpose of encourag-

ing thrift and saving among the working classes of the country was introduced into the House of Commons during December. At the annual meeting of the *St. John City Teachers' Association*, a draft pension scheme was submitted, to be laid before the Board of Education. The amount of yearly pension recommended was \$400 for males and \$250 for females. A proposition for the adoption of an *old age pension* scheme was recently submitted to a referendum vote by the *International Typographical Union* and was adopted by a majority of 7,983. The pension law will not become effective until six months after the discontinuance of the eight hour assessment. The latter assessment has been made for the past two years, and was originally 10 per cent., but that has been reduced from time to time until it is now 1 per cent.

During the last session of the legislature of the Province of Quebec, an Act was passed incorporating the *Montreal Technical School* for the purpose of educating manufacturers and workmen in theoretical knowledge and in practical shopwork. The school was allowed an annual grant of \$10,000 by the Province. The Act provided that the corporation should consist of delegates appointed by the Montreal Board of Trade and the *Chambre de Commerce* of Montreal respectively, two delegates appointed by the city council of Montreal and four delegates appointed by the Lieutenant-Governor-in-Council. These delegates were recently appointed as follows: Mr. Peter Lyall, contractor, of the city of Montreal, by the Montreal Board of Trade; Mr. A. V. Roy, civil engineer, of the city of Montreal, by the Chamber of Commerce; Mr. W. J. White, K. C., and Dr. E. G. Dagenais, both aldermen of the city of Montreal, by the City Council, and Messrs. Gaspard Deserres, alderman; J. T. Marchand, merchant; M. Quirk, civil engineer, and J. M. Fortier, manufacturer, of the city of Montreal, by the Lieutenant-Governor-in-Council. It was stated that the directors had not yet appointed the staff of the new school, but that they were at work upon the problem of organization.

The Byron Co-operative Telephone Exchange, operating in the County of Middlesex, Ont., has in good working order about 20 miles of line, radiating from Byron, where the head office is situated. There are about 70 offices in working order, for which subscribers pay \$6.00 a year if stockholders and \$10.00 per year if not stockholders. The system is connected with the Bell Telephone system, and has calling arrangements with London, Ont., for five cents over the Bell Telephone line. The subscription as above mentioned has enabled the association to meet all expenses and retain a small balance in the treasury. It has been found that the cost of constructing a line with a single wire and

return is about \$81 per mile, with about \$13 per mile additional where there is more than one wire on the same set of poles. Each subscriber supplies his own instrument, which the company inspects semi-annually, repairs being at the expense of the subscribers. A few miles of new wire were erected in 1907 and some additional wires strung. Some fourteen or fifteen farmers in Nepean township near Ottawa, have established a co-operative telephone system and are having a service installed at a cost of \$20 per year. The farmers invested about \$500 and have connection with the Bell Telephone system of Ottawa by paying long distance rates.

## II. REPORTS OF LOCAL CORRESPONDENTS.

### SYDNEY, N. S., AND DISTRICT.

*Mr. John Moffatt, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions during December were active, mild weather with a steady demand for industrial products contributing to the uninterrupted activity. Railway transportation was heavy, but transportation by water decreased. Some of the larger vessels were taken off the coal trade, although December shipments were equal to those of the same month of 1906. An unusually large number of coasting vessels carrying produce from Prince Edward Island and other places entered the port of Glace Bay. The repairing of the piers and the loading of small vessels with coal has given an impetus to the trade done by the small sailing craft. Retail trade was active, while the wholesale trade was favourably affected by the holiday season. The outdoor trades experienced quiet conditions.

The coal trade was active, and but for an accident to a boiler, which put one of the large collieries out of work for four days, the output of coal would have

exceeded that of November. Every colliery on the Island was busy. One colliery, Dominion No. 3 and a part of Dominion No. 5 will remain on the double shift all winter. The larger collieries are expected to produce the same tonnage as last winter, while development work will be rapidly pushed. The smaller collieries will probably be more active than in the early months of 1907.

The iron and steel works of Sydney and Sydney Mines continued active, the output being equal to that of November. As these works are well supplied with orders and have a winter's supply of material, output should be maintained in volume during the winter months.

The cement works had a good year, also the Chemical Tar Company of Sydney.

Labour was abundant with an absence of strikes or lockouts. The Dominion Coal Company early in November entered in to negotiations with the Provincial Workmen's Association with the view of renewing the "three year contract" as it stood. The association refused to re-sign the contract, claiming that some classes of employees were entitled to an increase in wages. The company then proposed a readjustment, to go into force on the 4th of May, which was refused by the association. The

Grand Council of the Provincial Workmen's Association entered a protest against this action.

#### CONDITION OF LOCAL INDUSTRIES.

*Lumbering.*—Weather conditions were not favourable to operations in the woods.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Quiet conditions prevailed in these trades.

*Metal, engineering, etc.*—Active conditions prevailed in all trades. Unskilled labour had plenty of employment.

#### DISTRICT NOTES.

*Lingan.*—The work of opening up the new colliery and the constructing of the railway spur connecting it with the other collieries, shortly to be opened, is being rapidly finished. From this part of the Dominion coal field much of the future output will be mined.

*Port Morien.*—The Dominion Iron and Steel Company has purchased the coal areas owned by the Cumberland Railway and Coal Company, situated near Port Morien. There is said to be several seams of coal of good quality in this district.

#### WESTVILLE, N. S., AND DISTRICT.

*Mr. T. Hale, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The collieries in this district have been very busy, with a demand for more men at some of the mines. The output at several collieries showed a good increase over the corresponding month of 1906. At the Drummond colliery, Westville, the output was the largest in the history of the colliery.

The Trenton Steel Works has, after several months of marked activity, become quiet. This is one of the chief industries in this district.

There was no unrest in the labour mar-

ket in this district, and no changes in wages or hours of labour.

Outside employment was quiet from seasonal causes.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers are marketing their crops. Hay is in good demand. The retail price for pressed hay is about \$21.00 per ton; potatoes, about 50 cents per bushel; turnips, 30 cents; butter, about 30 cents per pound; eggs, about 30 cents per dozen; beef in steak or roasts, 12 to 15 cents per pound; by the quarter, about 8 cents; mutton, about 15 cents per pound; pork, by the side or carcass, about 10 cents per pound; turkey and geese, about 18 cents per pound.

*Lumbering.*—Quietness prevailed.

*Manufacturing.*—Conditions were active.

*Mining.*—Conditions were very busy. The Acadia Coal Company's shipments from their several collieries, namely, the Allen shafts, Albion mines, Acadia and Vale collieries, were 32,327 tons, an increase over the corresponding month of 1906 of 3,351 tons, making a total increase for 11 months of 46,191 tons. The output of the Drummond colliery Westville, for November, 1907, was: Coal, 30,598 tons; coke, 808 tons; fire clay, 432 tons; fire brick, 50,000. The pay roll was about \$45,000. The coal increase over the corresponding month of 1906 was 8,550 tons.

#### HALIFAX, N. S., AND DISTRICT.

*Mr. A. J. Smith, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The past month has been one of normal activity, the weather conditions being such as to enable some outside operations which are usually closed down at this season of the year. There has, however, been the usual cessation of active outside building operations, although some work of this character is being carried on. Commercial activity

was a marked feature of the month, while wholesale and retail trade was remarkably good.

The Boilermakers' Union declared off the strike which has existed for three months.

The year that is just closing has been a very busy one with respect to building operations. Permits were issued up to November 30 by the City Engineer's staff for new structures and for repairs, alterations, etc., which it is now estimated cost \$632,086, of which amount \$577,210 were for structures that cost over \$1,000 each, the remaining \$54,876 being for smaller repairs which cost less than \$1,000 each.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—This industry during the past year has been very successful, with good prices in every department.

*Fishing.*—During the past twelve months, this industry has been up to the standard; during the past month, conditions have been normal.

*Lumbering.*—Conditions were rather quiet in the lumber trade compared with previous years, but it is yet too early to make a proper estimate of the result.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Building operations have been largely closed down, and men engaged therein were for the most part idle. There were some, however, engaged on small jobs.

*Clothing.*—Tailors and garment makers reported conditions about the same as last month.

*Printing.*—Conditions were active.

*Miscellaneous.*—Barbers, clerks, delivery employees, hotel and laundry workers were busy.

*Transport.*—All branches of railroad employees were busy. Longshoremen were fairly active.

*Unskilled labour.*—Dullness prevailed.

#### AMHERST, N. S., AND DISTRICT.

Mr. A. D. Ross, *correspondant*, reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

December was rather a dull month in industrial circles, but the open weather

was favourable for outdoor labour, hence there was but little idleness. The market is supplied with all the labour required until early spring, though farm labourers are in demand. No new industries were started during the past month, but work was steady, many working night-work to overtake orders. The Amherst Boot and Shoe Company has completed the erection of a large four storey brick structure, which will give the firm an opportunity of employing more workmen. Wholesale and retail merchants reported the Christmas trade better than that of any previous year, although collections were more difficult than in former years.

It is difficult to give definite information with regard to wages. There is hardly an industry in Amherst that is run on a definite wage schedule. Wages are graded chiefly according to the merits of the individual. Strikes are unknown, although about 3,000 work-people are employed. The same wages on the whole prevail as last year. In hundreds of individual cases wages have been advanced from 15 to 25%.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—This industry, at this season of the year is at a stand still. The prices of farm produce remained high, but there was a slight drop in the price of poultry. Hay is reported scarce in some parts of the county but the straw crop was good and no suffering is expected.

*Lumbering.*—The lumbering industry was not up to the usual, the falling market causing many of the smaller firms to limit their operations this season. A majority of the farmers in this section cut more or less lumber during the winter months and the depressed market will have the effect of curtailing their work this winter.

*Manufacturing.*—Activity prevailed and the prospects for a good winter's work were exceedingly bright.

*Mining.*—All the coal mines were working full time coal being much in demand. More miners could find employment in the Cumberland mines. The Maritime Railway Coal and Power

Company is making extensive improvements at the Joggins mines, a new slope is being sunk, the railway line repaired, and the whole property improved in many ways.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Open weather during December was favourable to building operations, but work from now until spring will be exceedingly slack. Carpenters and joiners will have plenty of work during the winter but the local supply will be sufficient.

*Metal, engineering and shipbuilding.*—Brisk conditions prevailed in all lines, although at this time of the year all local industries usually close down for a few days for repairs. Moulders, coremakers and machinists were active.

*Woodworking and furnishing.*—Car builders were actively employed, especially in the building of freight cars. Woodworkers in general were well employed.

*Printing.*—Printers were busy but there were openings for the employment of a few competent men and girls.

*Clothing.* Fairly busy conditions prevailed.

*Leather.*—Bag and trunk makers were active.

*Unskilled.*—This class was well employed, but the local market will be capable of meeting the demand during the winter.

#### CHARLOTTETOWN, P. E. I., AND DISTRICT.

*Mr. F. J. Nash, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during December differed very little from that in November, supply and demand being well balanced. The exceptionally mild weather permitted more outdoor work to be done than during December 1906. Owing to the good roads, the Christmas trade was unusually brisk, and sales were greater

than last year. Earlier in the season it was feared that there would be a surplus of produce but at the end of the month, navigation remained open, and large quantities of produce were being handled. There has been no change in the rates of wages or hours of labour, and harmonious relations prevailed between employer and employee.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Operations were mainly confined to the shipping of produce. Oats dropped 10c per bushel from the previous month.

*Fishing.*—A considerable quantity of smelts were handled during the month, but other branches of the industry were at a standstill.

*Manufacturing.*—The few factories in this province (in which agriculture is the principal industry) were carried on under normal conditions, supply and demand being well balanced.

*Railroad construction and employment.* Outdoor work was concluded by the end of the month. The change of timetable which came into force on the 30th. reduced the number of trains and lessened the number of hours of work for a number of employees.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons, carpenters and joiners were active. Lathers and plasterers were fairly active. Painters and paper-hangers had a quiet month. Plumbers, gas and steam-fitters, stone cutters and builders laborers, were active.

*Metal, engineering and shipbuilding.*—Iron moulders, iron workers and helpers, machinists, engineers and sheet metal workers were active. Bicycle workers had a dull month.

*Woodworking and furnishing.*—Woodworkers, upholsterers, Carriage and wagon makers, and car builders were active.

*Printing and Allied.*—Printers and bookbinders were active.

*Clothing.*—Journeymen tailors, garment workers, boot and shoe workers, were active.

*Food and tobacco preparations.*—Bakers, butchers and confectioners were busy. Tobacco workers were active.

*Leather trades.*—Leather workers, tanners and curriers were active.

*Miscellaneous.*—Barbers, clerks, stenographers and delivery employees were busy.

*Transport.*—Railroad conductors, locomotive engineers, locomotive firemen, railroad telegraphers, railroad trainmen and switchmen, ship labourers, longshoremen and street car employees were busy.

*Unskilled labour.*—There was a fair demand.

## MONCTON, N. B., AND DISTRICT.

Mr. J. C. Graves, correspondent, reported as follows:

### GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions during December were more active than last year, and compared favourably with those of November. The mildness of the weather throughout the month was especially favourable for outdoor work.

The volume of Christmas trade in nearly all lines exceeded that of last season. Retail trade was exceptionally good; wholesale trade was satisfactory. While the outlook for the coming season's business is fair, there seems to be a disposition among wholesale men towards curtailment and retrenchment. Manufacturers also reported a good month and in nearly every case a satisfactory closing of the year's business. The Record Foundry and Machine Co., reported a large increase of sales for the year. It has at present about 225 names on a pay roll amounting to \$1900, weekly. The N. B. Wire Fence Co., reported an increase of sales, though their output was hindered by the setting up of new machinery. The sales to farmers show an increase of 30%. Another wire weaving machine will be added to the plant. The Campbell Clad Co., is making arrangements for a more extensive business next season. A recent

meeting of the Board of Trade pronounced in favour of Compulsory Education. The City Council voted to bonus the Higgins Shoe Factory. The customs returns for this port of entry for November amounted to \$16,085 as compared with \$6,303 for November 1906, being an increase of \$9,782. About 300 men are at present employed on the construction of the I. C. R. Shops and it is not expected that any reduction will be made, and no unrest among employed was noticed. Hours and wages remained the same.

### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were active looking after stock, getting wood and attending to winter work. The markets were active and nearly all kinds of farm produce commanded good prices.

*Fishing.*—Large catches of smelt have been made at Chatham, but along the Kent shore the fishing has been poor.

*Lumbering.*—Conditions were fairly active in some sections, but were generally quieter than last year.

*Mining.*—The Drummond Mines Co., is seeking legislation to empower it to utilize the Grand Falls of the Nepisiguit River in developing power for its mining operations in the iron areas recently acquired.

*Railroad construction and employment.* Construction work upon the I. N. R., has ceased for the winter. About 40 miles of track has been laid and 10 miles more ready for the rails. The work of clearing the right of way on the Moncton-Chipman section of the G. T. P., is rapidly progressing. The contractors have also two steam shovels at work and over 100 men on their pay roll, and expect to keep on grading all winter.

### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers were quiet, but masons, carpenters and joiners were fairly well employed. Painters and decorators were busy. About 100 building permits have been issued as compared with 60 last year.

*Metal, engineering and shipbuilding.*—Mechanics all report an active month.

*Woodworking and furnishing.*—These trades reported work up to the average.

*Printing.*—Printers, pressman and bookbinders were active.

*Clothing.*—Journeyman tailors were in demand. Garment workers of all kinds were very busy.

*Food and tobacco preparation.*—Bakers and butchers were busy.

*Leather.*—Quietness prevailed.

*Miscellaneous.*—Barbers clerks stenographers, delivery-employees, hotel, restaurant and theatre hands were active with laundry workers busy.

*Transport.*—Traffic in both freight and passengers was above the average and railroad crews were actively employed. Hackmen, carters and teamsters were well employed.

*Unskilled labour.*—There was a falling off in the demand for this class but few men were out of work.

#### DISTRICT NOTES.

*Dorchester.*—A large electric power station has been built and an incandescent lighting system installed. The Crown Woodworking Co., has enlarged its plant and the sash and door factory commenced operations. A new department store has opened for business.

*Hopewell.*—An attempt to re-open the Dickson plaster quarry is being made and a considerable crew of men are engaged.

#### ST. JOHN, N.B., AND DISTRICT.

*Mr. W. H. Coates, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Business during December continued active. The building trades were well employed considering the season of the year. Ship-labourers were kept busy, although the season has not been as good as that of last year.

On December 8th, two breaks occurred in the water mains leading to the city.

All the mills, factories and street railway had to close down.

Up to December 21st, fourteen steamers sailed from St. John. These carried away Canadian goods valued at \$2,082,388 and foreign goods valued at \$645,207, making a total valuation of \$2,727,595.

Bank clearings for the three weeks ending December 19th were \$3,861,147, and for the corresponding period last year, \$3,904,115, being \$42,968 less in 1907 than in 1906, and \$2,687,930 less than for the five weeks ending November 28th of the current year.

Wholesale and retail dealers reported business brisk. During Christmas week, a large amount of money was put in circulation.

The trouble between the steamship companies and the Longshoremen's Association was settled December 4th, on a basis of 32½ cents per hour. The agreement entered into holds good until May, when the summer rates come into force.

Freight handlers who have been in the employ of the I. C. R., for the past five years and over, received an increase in their pay checks for the last month, their daily wages having been increased from \$1.60 to \$1.65.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—From returns sent in to the Department of Agriculture, the potato crop in New Brunswick during the past year has been the worst in many years. The only section of the province where the crop was at all good was in the east. The oat and turnip crops were good, and the buckwheat crop was the best in years. Much of the hay on the low lands was spoiled by the high water, and there was very little wild hay cut at all.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers, masons and building labourers were dull. Carpenters and joiners, painters and decorators and plumbers and gas-fitters were active.

*Metal, engineering and shipbuilding.*—All branches were busy, with the excep-

tion of sheet metal workers, who were reported dull.

*Woodworking and furnishing.*—Woodworkers were active, but shingle weavers were dull.

*Printing and allied.*—Printers and pressmen were very busy, and bookbinders were active.

*Clothing.*—Journeymen tailors were busy.

*Food and tobacco preparation.*—Bakers and confectioners were busy, and cigar makers active.

*Miscellaneous.*—Brush and broom makers were active.

*Transport.*—Steam and electric employees were busy, with teamsters and expressmen active.

*Unskilled labour* was active.

#### DISTRICT NOTES.

*Sackville.*—A paper box company has been formed here, and has purchased a building to be used as a factory. The work of installing the machinery will be begun soon after the new year. Work has been suspended at the factory of the new woodworking company, and will not be resumed until March.

*Sussex.*—The new factory of the H. H. Dryden Company, Limited, is almost ready for occupancy. A large lot of machinery has been installed, and it is anticipated that steam will be in the boilers soon.

#### QUEBEC, QUE., AND DISTRICT.

*Messrs. Edward Little and P. J. Jobin, correspondents,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Although building was fairly active, outside labour had less employment during December than in the preceding month, unfavourable weather having hampered operations. The work of demolishing old buildings and excavating for the new wing of the Hotel Frontenac was suspended. The last ocean steamer of the season left Quebec on December 5.

The S.S. "Dunelm" arrived in port on December 10, and proceeded to Montreal. Retail trade was active during the Christmas season. A strike of boot and shoe factory employees (17) took place at Levis on December 6; a sympathetic strike of 40 other employees occurred in the same factory on December 13\*. A number of men were employed making repairs to the Dufferin Terrace. The ice harvesting season will be about three weeks later in opening than in 1906.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Country roads were in a bad condition during the first half of the month and marketing was rendered difficult. Meat prices were higher than last year, but poultry was lower. Beef sold at 6 cents per pound for hind quarters and 5 cents for fore-quarters. Mutton sold at 8 to 9 cents per pound by the carcass, pork from 8½ to 9 cents, turkeys at from 15 to 18 cents per pound, chickens from 10 to 12 cents, and geese from 11 to 14 cents per pound.

*Lumbering.*—The bad weather and lack of snow interfered with operations.

*Railway construction.*—The Quebec Railway, Light and Power Company was carrying out improvements to road-bed at Limoilou junction.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—A fair month was reported, though bricklayers, masons and stonecutters were dull.

*Metal, engineering and shipbuilding.*—Conditions were fair.

*Printing.*—The allied trades were busy.

*Clothing.*—Activity prevailed.

*Food and tobacco preparation.*—Conditions were busy.

*Leather.*—The various branches were active.

*Miscellaneous.* The month was active.

*Transport.*—Railway employees were active but cab drivers, teamsters, carterers, etc., were quiet.

*Unskilled labour.*—This class was quiet.

\*See article dealing with Trade Disputes in present issue.

## SHERBROOKE, QUE., AND DISTRICT.

Mr. H. Logie, correspondent, reported as follows:—

### GENERAL CONDITION OF THE LABOUR MARKET.

Labour generally has been somewhat quiet during the month of December, although the mild weather has permitted outside work to be carried on to a much later period than last year. The same conditions exist at the machine shops as last month. The wholesale clothing establishment here is running on short hours. During the latter days of the month, a petition to wind up the Moore Carpet Company was presented; until a decision has been given, the works are practically closed down, some 40 hands being effected.

The Christmas trade was fully up to that of former years.

There has been no unrest in the labour market.

### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—There is practically no agricultural work being carried on, although the open season gave farmers a splendid chance to get ahead with outside work.

*Lumbering.*—The open winter is retarding the hauling of pulpwood, and unless snow comes soon, many will be unable to fill their contracts.

*Manufacturing.*—The Paton Woollen factory was running full time, with orders ahead. Good weavers are in demand at this concern. The Boblin Manufacturing Company are running full time, with orders ahead for some months.

### CONDITION OF PARTICULAR TRADES.

*Building.*—The various trades were quiet, as is usual at this time of the year. Plumbers were active.

*Metal and engineering.*—All branches were quiet.

*Woodworking.*—Woodworkers were quiet. Carriage and wagon makers were active.

*Printing and allied.*—Printers and press men, and bookbinders were active.

*Clothing.*—Journeymen tailors were active. Garment workers were quiet.

*Food and tobacco preparation.*—Bakers and confectioners, butchers and meat-cutters were active. Ice cutters were dull, with cigar makers active.

*Miscellaneous.*—Clerks, delivery employees, hotel and restaurant employees were active.

*Transport.*—Railroad employees were active, as also were cab drivers and expressmen.

*Unskilled labour* was somewhat quiet.

### DISTRICT NOTES.

*Magog.*—Owing to the high price of feed, farmers are selling off their surplus stock, and the price of meat has fallen in consequence. Prime beef sells at 4c. for forequarters and 5c. for hind-quarters.

*Waterloo.*—The Roxton Mill and Novelty Manufacturing Co. has commenced operations in its new factory, which was purchased lately from the Waterloo Wood Mfg. Co., and expect to be running to full capacity in a few days. They intend to employ not less than 50 men.

## ST. HYACINTHE, QUE., AND DISTRICT.

Mr. V. Phaneuf, correspondent, reported as follows:—

### GENERAL CONDITION OF THE LABOUR MARKET.

Activity was fairly well maintained during December. The building trades, however, were quiet. The metal trades also slackened owing to scarcity of money, though orders were numerous. In one important manufacture, working hours were shortened. The boot and shoe factories were fairly well employed. Sash and door factories were active. In the Penman woollen factory new machinery was installed for night work. The organ factory and the tanneries were active. A new company was incorporated under the title of the Heat Light

and Power Company of St. Hyacinthe, with a total capital of \$20,000. Wholesale and retail trade was active, the fine winter roads having stimulated business. The banks reported a good month with easy collections. An industrial dispute arose during the month between the Eastern Townships Manufacturing Company and its employees. On December 12th the directors gave out a document to be signed by the employees to the effect that the latter bound themselves to leave in the hands of the company ten per cent of their weekly earnings up to a sum of \$100, which sum was to be invested by the company for the employees in a share in its capital stock. The individual workmen would thus become shareholders in the company's stock. The men signed the document, but on December 13th signed another document withdrawing their signatures from the previous one and stating that they could not accept the company's offer. The men were then discharged by the directors of the company. Later the company prepared another statement which was published in the newspaper press. No understanding has as yet been reached between parties. There were no changes in rates of wages or hours of labour.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The month was a favourable one, produce selling well at good prices. There was very little demand for farm hands.

*Manufacturing.*—With the exception of the iron industry, which was dull, manufacturing was very active.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—The month was a dull one for bricklayers, masons and carpenters. In the other branches work was satisfactory.

*Metal, engineering and shipbuilding.*—Iron moulders, iron workers, engineers and machinists were busy but not so busy as in the preceding month. Electricians were very busy.

*Woodworking and furnishing.*—Active conditions prevailed.

*Printing.*—These trades reported a satisfactory month.

*Clothing.*—Tailors had a very active month. Boot and shoe workers were very busy.

*Food and tobacco preparation.*—Bakers, confectioners and butchers were active, as were also tobacco workers.

*Leather.*—Activity continued.

*Miscellaneous.*—A very active month was reported.

*Transport.*—Railway workers were very active, a number of additional hands being taken on owing to abundance of work. Carters, hackmen and delivery employees were very busy.

*Unskilled labour.*—This class was in fair demand.

#### DISTRICT NOTES.

*Sorel.*—The dredge No. 5. *Lafontaine* which was damaged opposite Varennes was brought to Sorel to be repaired. The whole of the dredging fleet and the boats of the Richelieu Navigation Company are in winter quarters. The dredge No. 1, *Laval*, was placed in dry-dock for repairs. A special bed has been constructed on which a powerful electric motor assisted by a large block and tackle hauls these vessels of large tonnage. The dipper dredge at present under construction in the government's shipyard will be launched in the spring.

*Drummondville.*—The Campbell-MacLaren Lumber Company will establish a branch here to employ over 30 hands. Over 600 workmen find employment in the various industries of the town. Building operations were active during the past summer and the prospects are that they will be even more active next year.

#### MAISONNEUVE, QUE., AND DISTRICT.

*Mr. E. Pelletier, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

December has been less active than the corresponding month of last year.

The supply of labour exceeded the demand, especially in the building trades. Activity prevailed in commercial circles. The demand for clerks has been very active. Some large establishments doubled their staffs for the Christmas and New Year holidays. There have been no changes in rates of wages or hours of labour.

The C. P. R., shops were working to their full capacity, large numbers of cars being in course of construction. The C. P. R., contemplates building additional shops for the requirements of their trade.

The Mount Royal Spinning Co., has just completed an extensive cotton factory in the town of Cote St. Paul. The factory will be in full operation in the early part of spring and will employ over 1000 hands.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—The demand for labour in the different branches was very dull.

The prospect for January seems to be brighter, their being some large constructions which will be resumed in the early part of the month.

The *metal and woodworking trades* were active.

*Printing.*—Activity prevailed in the Allied Trades.

*Clothing.*—The clothing trades were active.

*Food and tobacco preparation.*—These different branches have been very active during this month.

*Leather.*—Trade was quiet.

*Miscellaneous.*—Activity prevailed.

*Unskilled labour.*—There was no demand for unskilled labour owing to the lack of snow.

#### MONTREAL, QUE., AND DISTRICT.

*Mr. G. Audet, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The city has received the sum of \$71,243.85 in accordance with a clause in the contract with the gas company, obliging the latter to pay three per cent on its gross receipts during the five last years of its contract.

The season of navigation for 1907 in the port of Montreal was particularly satisfactory, especially as concerned the number of passengers and the amount of customs revenues. As regards the number of passengers carried, the year was the best in the history of the St. Lawrence. The revenues of the harbour commissioners show an increase of \$8,500 over 1906. One of the principal incidents of the season was the arrival of two new steamers for the Allan line, the "Corsican" and the "Grampian." The following are further statistics of the shipping of the port: Coalers from Sydney, 231 vessels, 1,075,000 tons; inland navigation, arrivals, 2,299; vessels of 1,372,266 tons, and crews numbering 49,003 men; sailings, 2,226 vessels; 1,326,636 tons, and crews of 508 men. Arrivals of sea-going vessels, 707, divided as follows: Norwegian, 181; Swedish, 7; Danish, 10; German and American, 2 each; English, 512, which gives a floating population in the port of about 50,000 persons during the seven months' navigation.

During the month of November, 1907, the amount of customs duties collected on importations amounted to \$1,448,154.33, or a decrease of \$39,912.67 as compared with November, 1906.

The report of operations on the Lachine Canal for 1907 shows the number of entry permits to the canal to be 6,239, or an increase of 867 over 1906. If the canal tolls had not been abolished, the statistical bureau in Montreal would have collected \$72,166.84, or \$4,411 more than last year. The collection of wharfage dues realised \$10,106.57. In 1907, there passed through the canal 16,444,938 bushels of wheat, an increase of 8,000,000 bushels over 1906. The report also contains a comparative statement showing the number of vessels which passed through the canal in 1906 and 1907, as follows:—

	1906.	1907.
Canadian vessels.....	1,239	1,345
Barges.....	1,589	2,011
American steamers.....	151	176
Tonnage.....	522,210	733,000
Passengers.....	37,606	52,753
Sundry merchandize..... tons	128,479	150,713
Wood..... feet	122,720,000	124,505,000
Soft coal..... tons	94,296	137,540
Hard coal..... tons	222,414	271,126

CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Conditions were satisfactory.

*Lumbering.*—The lumber market was active, notwithstanding the fact that the majority of the large buildings were constructed largely of structural iron.

*Manufacturing.*—There was a marked decline in manufacturing in December as compared with November.

CONDITION OF PARTICULAR TRADES.

*Building.*—All branches were fairly active, but less so than in the preceding month, especially amongst carpenters.

*Metal, engineering and shipbuilding.*—Iron moulders, iron workers, coremakers and machinists were busy. Electrical workers were fairly well employed, as well as blacksmiths. Shipbuilders and caulkers were dull. Tool sharpeners were busy, with horseshoers and jewellers active.

*Woodworking and furnishing.*—Woodworkers, upholsterers, etc., were active in the first half of the month, and were busy during the balance. Gilders were busy, but shingle weavers were dull.

*Printing.*—Activity prevailed.

*Clothing.*—Tailors were very active on custom work at the beginning of the month, but were quiet at the end. Garment workers were generally busy for the first fortnight, but dull afterwards. Boot and shoe workers were fairly busy.

*Food and tobacco preparation.*—Butchers, bakers and confectioners were very active. Ice workers were dull. Cigarmakers and tobacco workers were fairly busy.

*Leather.*—Leather workers and trunk and bag makers were active in the first half and busy during the balance of the month. Tanners and curriers were busy.

*Miscellaneous.*—All branches were active.

*Transport.*—Street railway employees, cab drivers, hackmen, etc., were active. Teamsters and expressmen were busy. Steamboat men, ship labourers and long-shoremen were dull.

*Unskilled labour.*—This class was dull.

DISTRICT NOTES.

In 1905 and 1906 the following surrounding municipalities were annexed to the City of Montreal. Their population, superficies and assessment value are given below:—

Municipality.	Population.	Superficies Area.	Assessment Value.
Villeray.....	800	72 acres	\$160,000
St. Henri.....	24,165	424 "	8,658,845
Ste. Cunégonde.....	11,225	125 "	4,118,018
Rosemount.....	300	204 "	175,000
Sault au Récollets.....	2,700	1,220 "	190,000
St. Laurent.....	2,300	860 "	300,00
Totals.....	41,490	2,950	\$13,601,863

HULL, QUE., AND DISTRICT.

*Mr. Rodolphe Laferrrière, correspondent,* reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Conditions were somewhat less favourable for labour during December. This was not unexpected, as the month

usually witnesses the closing down of the largest sawmills, whereby hundreds of men are thrown out of employment. The scarcity of hands which prevailed through out the year has ceased, and there are a number of unemployed. This had a tendency to reduce wages, though not among the permanent staffs of the factories. The exceptionally mild character of the winter so far has deprived hundreds of men of their usual source of labour. There

has been no ice cutting nor carting, and until towards the end of the month, very little snow to shovel or cart away. Owing to lack of ice, there was no work in the shipyards. The day labourer was receiving \$1.10 per day instead of \$1.35 and \$1.50 in the fall. Merchants in almost every line were unanimous in asserting that their holiday trade was ahead of last year. The banks were all satisfied with prevailing conditions. The refusal, however, of several large Montreal wholesale firms to renew notes at their next quarterly maturity in February 1908, has caused some embarrassment. Lumbering operations, which affect about 1,000 men in this district, have been greatly curtailed by the present stringency in the money market. All along the railway lines, from here to Sault Ste. Marie, are to be found saw-mills and camps. Two firms, at Webbwood and Whitefish, Ont., closed down; others reduced their staffs by from 40 to 50 per cent., and others closed down in order to re-engage their men at reduced wages. The decrease in the rates reaches as much as 25 per cent. from last fall's rates. Of late, engagements have been made below Quebec, and men brought up for the Eddy shanties on the Rouge river at \$20 and \$26 per month, a decrease of \$9 and \$10 respectively compared with the fall prices. In this case, the company paid the men's transportation. On the other hand, firms which do not pay transportation charges, hired their men at from \$26 to \$30 per month. The latter may be regarded as the prevailing market prices, being \$4 to \$5 respectively lower than last fall's wages. Of the former class, road cutters and handy men obtain \$26, while choppers, log-rollers and general labourers receive \$30.

An increase in wages was granted by the Canadian Pacific Railway Company to its snow shovellers along the Hull Electric Railway line. They are getting \$1.50 instead of \$1.35 per day. Linemen or sectionmen who are without work in winter are preferred by the company. They are not very numerous, however.

Large numbers of teams were idle, and their owners in many instances have sold at a loss, rather than pay excessive

prices for feeding idle horses. The cost of living, except in the case of fuel and milk, has not increased very materially. The societies for the relief of the poor have not yet started their usual work, there being little poverty needing relief.

The building trades were still busy, and no changes in wages or hours were reported during December.

The Woods factory was running full time. About 240 hands, mostly girls were employed, about 100 of whom were from Hull and the others from Ottawa.

The International Portland Cement Company has awarded to the Phoenix Bridge Company the contract for the steel work of its 1908 additions to its plant. Ten steel workers will arrive in Hull this week to commence the work. It is stated that the improvements of 1908 will cost in the neighbourhood of one quarter of a million.

#### OTTAWA, ONT., AND DISTRICT.

*Mr. W. Gilchrist, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

A surplus of unskilled labour was noted in the Ottawa district during the whole of December. This was due to an influx of labourers, and not to any scarcity of employment. The civic corporation and local contractors had as many men engaged as during the corresponding period in other years; in fact, more were given work by the municipality, which took advantage of the opportunity to prosecute necessary improvements. Sewers were started, giving work to 70 men at a minimum rate of \$1.75 per day. This wage is 10 cents per day more than last winter, and is the same as the summer rate. An average of 25 men a day were given work breaking stone for the city at 30 cents per ton; this enables them to earn from 40 cents to \$1.50 per day, according to their efficiency. The work was started by the Mayor so that all the unemployed would have a chance to earn a livelihood. Snow storms gave work to 200 men temporarily, the wages being

\$1.75 per day or 10 cents more than last year. The staff of scavengers is maintained at 40, wages being \$2.25 per day for man and horse, the same as during the summer. It became necessary, near the end of the year, owing to lack of funds, to suspend waterworks extensions, but with the new year at least 100 men will be engaged in this branch of the civic service at the usual wages of \$1.75 per day.

The Ottawa Electric Railway Company is paying 14 cents per hour to snow shovellers, being the same rate as last year.

Inquiry among the building trades showed that there was little foundation for reports of slackness in this branch of employment. One of the largest employers of painters and paper hangers has more work in progress than a year ago, and stated that wages have not dropped from the summer scale. Nearly all this work is on repairs. The plumbing contractors report work very light on new installations, but not many hands have been laid off. The wages have been slightly affected, as most of the masters are now paying the minimum rate of 35 cents per hour.

Employers of unskilled labour, not already mentioned, are paying new hands from 20 to 30 per cent. less than was offered in October and November. In like manner, carpenters' wages dropped from 30 to 25 cents per hour where hiring has been done within the last month.

The number of girls employed in Ottawa mica factories has dwindled from about 1,400 to 150. All the small factories of the city, numbering about a dozen, have closed, and only a few large ones are operating. The wages of these hands have been reduced from 15 to 20 per cent, and altogether about \$5,000 a week is lost in earnings. The factory managers are of the opinion that the industry may be revived quickly, and look forward to re-engaging their hands before the spring. The depression is due entirely to a falling off in the demand for mica in the United States, where the output of the local factories is sent. The large number of girls thrown idle in this way has not affected wages of sewing machine

hands, waiters or domestic help, except in rare cases, where new employees were taken on recently.

The cost of living was affected by a slight drop in the price of meat sold by farmers in the local market. There was an increase in the price of milk per pint from four to five cents.

The volume of Christmas business surpassed that of last year with most of the local merchants, showing no scarcity of money in the city. Another evidence of the supply of money was that the average collection on the 1907 tax rolls was 90 per cent. paid up, as compared with 48 per cent. six years ago.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—During December, the farmers reduced their herds of cattle by an extent unequalled in years before in order to avoid buying fodder at the current high rates. Dairy cattle have been sold at from 20 to 40 per cent. less than the animals could be bought for a year ago.

*Lumbering.*—The lumbermen are devoting all their attention to shanty operations. Wages, though they fell off at the beginning of the month, remained firm on the lower level. Although many strangers in the city were seeking work, they refused such offers as \$22 or \$24 per month to go to the shanties. Mr. J. R. Booth has begun to haul sawlogs by train to the city, and will reserve them for sawing in the spring. His output of sawn lumber for the season is estimated at 90,000,000 feet, a little more than last year.

#### CONDITION OF PARTICULAR TRADES.

*Printing.*—The allied trades were busy.

*Clothing.*—The demand for the more expensive kinds of clothing showed a falling off. Orders were so slack in some factories that the staff of employees was reduced.

*Miscellaneous.*—Delivery employees were in active demand during the month owing to the Christmas season.

*Unskilled labour* was plentiful.

## KINGSTON, ONT., AND DISTRICT.

*Mr. Wm. Kelly, correspondent,* reported as follows:—

## GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market was satisfactory during the closing month of the year 1907. During November, the sum of \$28,898.36 was collected in import duties at the local customs house; this was \$7,582.47 more than in the corresponding month last year, and nearly \$15,000 more than in November, 1905. Every month this year showed an increase in the amount of import duties. The collections at the close of the fiscal year will be fully \$30,000 ahead of those of 1906.

The year 1907 was one of marked progress. The extensions to the light and power plant have been completed, and the cost of electricity and gas materially reduced. The committee managing the waterworks also made large reductions in the rates. The chief improvements on the public streets were the construction of five and a half miles of electric lighting. The King street breakwater, destroyed last spring, has been restored. The chief work for the council of 1908 is the general improvement of the city's streets. To this end, a by-law is to be submitted to the ratepayers for the raising of a loan of \$12,000. The City Council, Board of Trade and the Trade and Labour Council are uniting in an effort to have this by-law carried.

Merchants generally reported a very satisfactory Christmas trade; with most of them, it was better than that of last year. The post office and express offices were rushed, and compelled to employ extra help.

An expert from St. Louis, Mo., will take charge of the erection and operation of the lead smelter to be erected here. The company has opened an office on the site of the smelter, and active operations will begin about January 18, 1908. It is expected that this plant will be completed and in operation by June 18, 1908.

Under the direction of the Rev. Canon Star, a stone quarry was opened adjacent

to the city for the benefit of the unemployed, most of whom are recent arrivals; so far, twenty-nine men are at work breaking stone, making about \$1 per day.

The amount voted for the construction of an additional military building totals \$57,000, exclusive of the Tete de Pont barracks, and for the city post office, \$27,342, an increase of \$1,121. The amount voted the post office inspectors staff at Kingston, for salaries, is \$8,550, an increase of \$850. There was an increase also in salaries of the penitentiary staff. About the middle of the month, most of the milk dealers decided not to deliver any milk on the Sabbath until the warm weather returns; customers are served with extra quantities on Saturdays.

There were no changes in the rates of wages or hours of labour, except that ten tailoresses and six tailors received an increase of 15%. Two firms granted the demand; otherwise, the strike is still on.

## CONDITION OF LOCAL INDUSTRIES.

*Fishing.*—Dull conditions prevailed.

*Lumbering.*—This industry was active. It is stated that owing to the increased cost of hay, oats, provisions, etc., as well as the high rates of wages, that there will be a considerable increase in the cost of medium grade lumber in this district in the spring.

*Manufacturing.*—Active conditions prevailed.

*Mining.*—This industry was fairly active, the open weather conducing to this condition.

*Railroad construction.*— Conditions were dull.

## CONDITION OF PARTICULAR TRADES.

*Building.*—The building trades were quiet.

*Metal engineering and shipbuilding.*—These trades were active.

*Woodworking and furnishing.*—Quiet conditions prevailed.

*Printing.*—Employment in these trades was somewhat quiet.

*Clothing.*—The clothing trades were active.

*Food and tobacco preparation.*—Bakers, butchers, ice cutters, etc., were active.

*Leather.*—Tanners had active employment.

*Miscellaneous.*—Barbers, broom makers, furriers and laundry workers were actively employed.

*Transport.*—All branches of transportation were active. Steamboatmen, long-shoremen, sailors, etc., found employment quiet. Teamsters and expressmen were active.

*Unskilled.*—This class was inactive, the market being over-supplied.

## BELLEVILLE, ONT., AND DISTRICT.

*Mr. H. C. MacDiarmid, correspondent,* reported as follows:—

### GENERAL CONDITION OF THE LABOUR MARKET.

The month of December was fairly active, being more favourable for general labour than the same month last year. An optimistic feeling existed as to the future. The Lehigh Cement Company has laid off about 350 unskilled labourers, who were employed on construction work, they were mostly foreigners, and have nearly all left the district. The company has about 150 workmen permanently employed. As usual, the Belleville Rolling Mills Company closed down its plant on the first of the month for about six weeks; about 250 men were affected. Little hardship will be felt, as the workmen receive good wages and were prepared for the close down. The horseshoe branch of the rolling mills was running full time, employing a full staff. Many skilled and unskilled workmen were still employed in the rebuilding of the hotel "Quinte", which is expected to be completed next month. Work on the public library has also given employment to many, and it is expected that it will be opened to the public in a few weeks. A heavy snow storm put a stop to all outdoor employment, throwing a number of men out of work temporarily. Every other industry was running as usual. A large number of civic employees were engaged in snow shovelling, and as yet

no one has applied to the civic authorities for aid. Wholesale and retail merchants reported business active; the banks also had an active month, owing to the distribution of dividends in connection with the cheese factories. The price of all kinds of produce remained high. Hay was very scarce, and sold readily at \$24 to \$25 a ton. Straw that last year sold at \$3 and \$4 a load now sells at \$9 and \$10 a load. Butter was 30c. a lb.; fresh eggs, 30 to 35c. a dozen; beef, hind quarters, 4½ to 5c. a lb.; fore quarters, 3 to 3½c. a lb., and dressed pork, \$7.50 cwt. There was no unrest in the labour market.

### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Owing to poor crops, feed was very scarce and high in price. Many citizens were using dry leaves and sawdust for bedding animals.

*Lumbering.*—This industry was inactive, although many lumbermen secured employment elsewhere.

*Manufacturing.*—Activity prevailed in all branches.

*Mining.*—Conditions were fairly active. Craigmont mine closed down for the winter, throwing about 200 workmen out of employment.

*Railroad construction and employment.*—Inactivity prevailed.

### CONDITION OF PARTICULAR TRADES.

*Building.*—Plasterers were active, many being employed at the hotel "Quinte", painters were also employed there. Plumbers, gas and steamfitters had active employment, but builders' labourers were inactive.

*Metal, engineering.*—All branches, with the exception of shipbuilding, had a fairly active month, the only drawback being the temporary closing of the rolling mills. Horseshoers reported a very busy month.

*Woodworking and furnishing.*—Woodworkers, upholsterers, varnishers and polishers had a very active month, one furniture factory having an order for 900 chairs for one institution, besides a large amount of other furniture. Not a man has been laid off in these industries, but an hour less is being worked per day. Carriage workers were fairly active.

*Printing.*—The printing trade is always active here in December, and this year was no exception to the rule, every man and woman in the trade being employed.

*Clothing.*—Journeymen tailors reported having a very active month, with all hands working full time.

*Food and tobacco preparation.*—Bakers and confectioners, as usual, were very active getting ready for the holiday season. Butchers and meat cutters had an active month, and cigar makers were very active.

*Miscellaneous.* — Barbers reported a busy month, while clerks and delivery employees worked overtime. Many persons were employed as extra clerks during the holiday rush. Furriers had an active month. Hotel, restaurant and theatre employees had a very active month.

*Transport.* — Railway transportation was exceedingly active. Apart from a few heavy falls of snow, little inconvenience was experienced. Cabmen, carters, teamsters and expressmen were actively employed.

## PETERBOROUGH, ONT., AND DISTRICT.

*Mr. W. J. Johnston, correspondent,* reported as follows:—

### GENERAL CONDITION OF THE LABOUR MARKET.

Work in general for the past month has been fairly active, considering the season of the year and the large number of workpeople that have come to reside in the city during the past summer. A large number of families from Great Britain have recently taken up their residence here; they are principally labourers. Work for that class has been somewhat dull, and many of them are in reduced circumstances. The cordage works, after being shut down for general repairs, has started again with one hundred hands; this number, in a few weeks' time, will be increased to about 200. The total value of the building permits issued during the year amounted to \$767,546.00, divided

as follows: In April, \$2,425; 132 in May, \$538,635; 42 in June, \$55,678; 21 in July, \$26,790; 26 in August, \$18,690; 33 in September, \$42,370; 28 in October, \$78,643; 8 in November, \$8,325, and 4 in December, \$1,990. Some of these structures will not be completed until next year. The Peterborough Canoe Company is making 100 toboggans, and is also very busy on canoe work. Curtis Bros., closed the season after an output of 4,200,000 bricks, their largest output for anyone season. Heavy shipments of live stock took place during the month, and local dealers were very busy. Work on the Collegiate Institute is being hurried, but work on the construction of the armouries, Normal school and the Roman Catholic church is stopped until spring. The Christmas trade was exceptionally good, and business of all kinds exceeded that of any former year. Activity prevailed in commercial circles, and wholesale and retail trade was never better. Wages remain unchanged.

### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Agricultural work was somewhat quiet, as is usual at this time of the year, farmers being employed in hauling produce to the market.

*Fishing.*—Dullness prevailed.

*Lumbering.*—Activity was the rule. Lumber dealers have reduced wages from \$35 to \$26 per month. A large number of men have left the camps, and will not work at the reduced rate. It is not anticipated that there will be any difficulty in replacing the men that left, as a great number are out of employment. All the men that remained in the camps will be paid at the rate of \$20 to \$28 per month and any new men going in at the rate of \$18 to \$26 per month.

The Peterborough Lumber Company output for the season amounted to 7,000,000.

*Manufacturing.*—Industrial establishments were active.

*Mining.*—Dull conditions prevailed.

*Railroad construction and employment.*—Work was confined to general repairing and keeping the track and equipment in good order.

## CONDITION OF PARTICULAR TRADES.

*Building.* Carpenters and joiners, plasterers, painters and plumbers were active, but dullness prevailed with bricklayers, masons, lathers, gas and steam fitters, stonecutters and builders' labourers.

*Metal, engineering and shipbuilding.*—Activity prevailed with iron moulders, iron workers and helpers, machinists and engineers, brassworkers, blacksmiths, shipworkers, sheet metal workers and horseshoers, while electrical workers and jewellers were busy, and boilermakers found employment dull.

*Woodworking and furnishing.*—Active conditions prevailed, except with car builders, who were somewhat dull.

*Printing.*—December has been a good month; work during Christmas week was never better.

*Clothing.*—Journeymen tailors were active; garment and boot and shoe workers busy, and hat makers dull.

*Food and tobacco preparation.*—Bakers and confectioners, butchers and meatcutters were busy, cigarmakers and tobacco workers active, and ice-handlers dull.

*Leather.*—Harness and collar makers were active.

*Miscellaneous.*—These trades were busy.

*Transport.*—All branches of railway employment were exceedingly busy. Steamboatmen, carters, draymen and teamsters found employment dull, but active conditions prevailed with draymen and street railway employees.

*Unskilled.*—Employment for this class was scarce.

## DISTRICT NOTES.

Work throughout the district consisted of chopping cordwood, threshing and hauling to market different kinds of produce, the price of which remains much the same, as stated in former report, with a slight reduction in the price of wheat, oats and barley. Cheese factory operations are suspended for the winter months. A profitable season was reported.

*Nogey's Creek.*—A new dam, eight feet high and 54 feet long, has been completed. It has a slide constructed specially for running logs.

*Lindsay.*—A new wheel factory has begun work, employing 17 hands and turning out twenty set of wheels per day.

*Lakefield.*—The Cavendish Lumber Company reported an output of 17,000,000 feet.

## TORONTO, ONT., AND DISTRICT.

*Mr. Phillips Thompson, correspondent,* reported as follows:—

## GENERAL CONDITION OF THE LABOUR MARKET.

With the setting in of the winter season and the general cessation of most outdoor occupations, conditions are duller than those of last month, with large numbers of both skilled and unskilled workers out of employment. The continuance of the financial stringency has induced a slackening of activity in nearly all lines, and the problem of providing for the unemployed has become serious. During the holiday season, the situation was somewhat relieved by the demand for extra help, which enabled a number to secure temporary employment. The congestion was increased by an influx from other parts of the country. Charitable institutions report an unusually large number of applications for assistance.

At a meeting of the Associated Charities held December 6th, resolutions were adopted urging the city authorities to distribute work among as many people as possible; to carry on public works for which contracts have not already been let by day labour, and to begin work on contracts let without delay; and requesting the Dominion government to procure speedy employment for as many as possible on the Grand Trunk Pacific and other public works, and to begin work on the western gap without delay. The Ontario Government was asked to establish a free labour bureau for artisans. On the 10th inst., 100 men were engaged for construction work on the Temiskaming and Northern Ontario Railway at \$1.50 per day.

The approximate value of building permits issued during November was \$638,150 for 201 buildings, as compared with \$1,087,692 for 402 buildings in November, 1906.

At a meeting of the directors of the Canadian National Exhibition, a financial statement was presented showing receipts of \$202,422; expenditure, \$161,796; leaving a surplus of \$40,626.

The receipts of the Toronto Railway Company during November were \$281,982 as against \$251,130 for November, 1906. The Company has made an extensive purchase of land on Roncesvalles Ave., and Queen st. west, for the extension and improvement of the car barns.

The Canadian Birkbeck Investment and Savings Co., has taken out a building permit for the erection of a new office building to cost \$120,000.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were engaged in caring for stock and marketing produce, prices being well maintained. The wet and unsettled weather towards the close of the month was unfavourable for out-door operations.

*Manufacturing.*—The industry has been quiet in nearly all lines. The monetary stringency curtailed operations. Many establishments which usually close down about this season for stock-taking and repairs will protract the period of suspension and reduce their staffs on re-opening. No immediate change is likely to occur until orders for the spring trade indicate the prospects for the season.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—These trades found less employment than usual at this season. Owing to the falling off in building during the last few months, there will be considerably less indoor work during the winter than last year.

*Metal, engineering and shipbuilding.*—Iron moulders, machinists, blacksmiths, boilermakers, electrical workers, sheet metal workers and structural steel workers had a quiet month, with a good many out of work. Brass workers had steady

work. Jewellers and silversmiths were fairly well employed, but some were laid off.

*Woodworking.*—These trades were generally well employed. Carriage makers were busy. Piano workers found trade dull.

*Printing.*—The printing trade was quiet at first, but improved towards the close of the month. A number were reported out of work.

*Clothing.*—Tailors and garment workers were fairly well employed. Hat and cap makers were dull. Boot and shoe workers had a fair month.

*Food and tobacco preparation.*—Bakers and confectioners, butchers and brewery workers were steadily employed. Cigar-makers found trade slack.

*Leather.*—Many were out of work.

*Miscellaneous.*—Hotel and restaurant employees, barbers and theatre employees were active, especially during the holidays. Clerks, salesmen and delivery men were busy, but many were looking for work.

*Transport.*—Transportation workers had an active month, but some reductions in railway staffs have taken place.

*Unskilled labour.*—A large number were out of work.

#### NIAGARA FALLS, ONT., AND DISTRICT.

*Mr. Ernest Green, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The closing month of 1907 witnessed a further decrease of activity in industrial circles and the outlook is that the opening months of 1908 will be still quieter. The number of men employed in the city was less than in any December in several years, and an addition was made to the ranks of the unemployed by the influx of men from other cities seeking work. With the exception of some small sewer contracts, no public works were going on. No trade could be said to be busy. Holiday trade was not up to the standard of other years, owing

largely to industrial conditions, and in part to unfavourable weather before Christmas. The stringency in financial circles continued, yet business generally appeared to be on a firm footing, and no alarm was felt.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Employment was very dull.

*Fishing.*—Fishermen were idle.

*Lumbering.*—No lumbering is done in this district, except a very little in mid-winter.

*Manufacturing.*—Nearly all factories ran with full staffs up to the end of the year, but it was expected that the suspender, neckwear and muffler factories would reduce staffs in January, their busy season being over. A wire screen manufacturing concern, and a paper box factory will locate here in the spring, or sooner.

*Railroad construction and employment.*

—Railroad employment was dull for a large part of the month, and the Grand Trunk car department laid off a few men and reduced the working hours of others. However, a heavy snowfall gave employment to many men in shovelling snow for some time, and towards the end of the month, a rush of freight and passenger traffic kept all departments very busy. Railways reported having more applicants for employment than they have had in five years past. The International Railway (electric) reduced its staff of trainmen to a minimum, but another system slightly increased the number of its employees.

*Other industries.*—The electric power developing companies disbanded their outside construction forces for the winter; operating staffs were also reduced.

Large appropriations included in the Dominion estimates for Welland canal improvements promise employment during the coming summer in the part of this district traversed by the canal.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—These trades were having a rather better season than was expected, but most of them were quiet. Car-

penters, bricklayers and plumbers were most active. There were few, if any, opportunities for employment. Twenty-five men, who had been employed for four months in painting the Cantilever bridge, finished their work and were discharged.

*Metal.*—The outlook for continued steady employment of full forces of employees in local foundries and machine shops was good. The re-opening of the shipbuilding plant at Bridgeburg gave employment to many idle men of these classes. The Niagara Falls Machine & Foundry Company secured a large contract for waterworks supplies for the city of Toronto.

*Printing.*—The allied trades were active.

*Miscellaneous.*—Retail clerks had a busy holiday season. Many office employees were idle. Hotels and restaurants were having a quiet time.

*Transport.*—On electric lines, employment was dull, and is likely to remain so for four or five months.

*Unskilled labour.*—There was little employment.

#### DISTRICT NOTES.

*Niagara-on-the-Lake.* — Lake fishermen completed their season, and there will be no further activity till spring.

*Port Colborne.*—Public works contractors laid up their plants till spring. A number of vessels will winter and re-fit here.

*Welland.* — The Page-Hershey Company laid foundations for a \$150,000 pipe foundry, part of which will be running in March. Beatty's engine and machine works had \$200,000 worth of orders on hand on December 1st. The Ontario Iron and Steel Company's plant will be running in March.

*Shisler's Point.*—Very little work will be done in the quarries during the winter. Many of the foreign labourers have gone away.

*Bridgeburg.*—The plant of the Canadian Shipbuilding Company, which has been closed for some time, re-opened on the 9th and gave employment to over two hundred men.

## ST. CATHARINES, ONT., AND DISTRICT.

*Mr. Jas. A. Wiley, correspondent*, reported as follows:—

### GENERAL CONDITION OF THE LABOUR MARKET.

During December, the labour market was less active than in the early autumn, though there was a slight improvement over November. Taking the year as a whole, labour was well employed. Though the stringency of the money market was felt to a slight extent during the fall months, there was a general opinion that the New Year would find conditions improved, and that activity would be restored to most branches of industry. Christmas trade, though not so large in volume as last year, was good.

The season just closed has been a very active one on the Welland Canal. Had it not been for the financial slump in November, the increase over former years would have been greater. December showed considerable improvement and was about equal to December, 1906. The canal closed on December 17th last year, a day later than the season just closed. The canal has been singularly free from accidents, navigation having practically no interruptions. The canal was open on Sundays during September, October, November and December, one month longer than in former years.

### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Work was confined to tending stock, etc.

*Manufacturing.*—Meat factories and mills were running full time; a few were running on short time or were shut down taking stock between seasons. The canneries closed a most successful season, during the greater part of which they were working to their full capacity and overtime, to fill orders received.

### CONDITION OF PARTICULAR TRADES.

*Building.*—The allied trades were quiet.  
*Metal and engineering.*—All branches were active.

*Woodworking and furnishing.*—All branches were active.

*Printing.*—All branches of the allied trades were active.

*Clothing.*—Journeymen tailors, boot and shoe workers were busy.

*Food and tobacco preparation.*—Bakers and confectioners, butchers and meat-cutters, cigar makers and tobacco workers were active.

*Leather.*—Tanners, curriers, and leather workers were active.

*Miscellaneous.*—Barbers, clerks, stenographers, delivery employees, hotel and restaurant employees, and laundry workers were well employed.

*Transport.*—All branches were busy.

*Unskilled.*—Unskilled labour was quiet there being little demand.

### DISTRICT NOTES.

*Thorold, Merriton and Port Dalhousie.*—The condition of the labour market was satisfactory. Labour was well employed, and business good for the season of the year.

## HAMILTON, ONT., AND DISTRICT.

*Mr. S. Landers, correspondent*, reported as follows:—

### GENERAL CONDITION OF THE LABOUR MARKET.

General labour was dull during December, many skilled and unskilled workers being out of employment.

A new screw factory, incorporated with a capital of \$250,000, will locate in Hamilton.

The Tuckett Tobacco Company has been re-organized with a capital of \$200,000.

The Hamilton Iron and Steel Company will build a \$5,000 brick addition. Bricks are now selling as low as \$7 a thousand.

The Bank of Hamilton will make application to the Dominion parliament for the incorporation of a company to be known as the Bank of Hamilton pension fund. The pension fund will be used for the benefit of employees who have been

in the bank's service over a certain period of years, and retire. The fund will make provision for widows and children.

The value of buildings for which permits were taken out up to the end of November last year amounted to \$1,957,840, as compared with \$2,729,640 up till the end of November this year, an increase of \$771,800. There were about 800 new houses erected this year. Retail merchants did an excellent business.

#### CONDITION OF LOCAL INDUSTRIES.

*Manufacturing.*—Manufacturing has not been as active as in previous months. The latter part of the month especially was slack. The iron industry has been quiet, while food and clothing establishments have been fairly active.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—The building trades were only fair in the early part of the month and were slack towards the new year. Machinists, molders, stovemounters, blacksmiths, etc., were very slack, with some factories closed for a few weeks. The woodworking trades were fair, but pattern makers and coopers were slack. Printers were busy during the latter part of the month on the Christmas issues of newspapers and the heavy advertising. Tailors were slack, but garment workers and boot and shoe workers were fairly active, as were bakers, butchers, cigar and tobacco workers. Leather workers barbers, broom makers, furriers, hotel, and restaurant employees, laundry workers, railway employees (steam) and street railway employees. Longshoremen and ship labourers were slack, but teamsters, cabmen, expressmen and etc. were active. Unskilled labour was very dull.

#### DISTRICT NOTES.

*Dundas.*—Several trades were slack. The council granted \$1,000 to the Jones Bros. company for the construction of a bridge and switch into its factory premises.

The Imperial Globe Company, Limited, of Dundas, has been incorporated with a capital of \$40,000.

BRANTFORD, ONT., AND DISTRICT.

Mr. J. C. Watt, correspondent, reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

There was considerable skilled and unskilled labour unemployed. December did not compare favourably with the preceding month, or the corresponding month of last year. Considering the season, the building trades were active, but many of the factories were running below their capacity, and several have practically shut down. It is alleged that much of this is due not to any lack of work, but to the "money stringency."

About 17 machinists had their wages reduced 10%; 15 drill and shaper hands and 15 blacksmiths were also reduced 10%, and a number of labourers were reduced 10c. per day.

A number of moulders and labourers have been laid off work at one of the factories, and the City Engineer has laid off 25 men on the sewer construction works. The Board of Water Commissioners is arranging to have some construction work done in the near future, to engage the unemployed. A number of families were reported in straightened circumstances. Christmas trade was brisk, being up to the average of other years, starting earlier than usual. Market prices were in many respects high; turkeys were 16c. to 20c. per lb.; eggs 40c. per dozen; butter, 28c.-30c. per lb., and potatoes 60c. per bushel.

#### CONDITION OF LOCAL INDUSTRIES.

*Manufacturing.*—None of the factories were busy, and several were slack with working forces reduced.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons found work dull, though during the first part of the month there was considerable work. Carpenters, joiners, lathers and plasterers were busy. Painters were quiet. Gas and steam fitters and plumbers were busy.

*Metal, engineering and shipbuilding.*—There were a number of moulders and coremakers unemployed. Machinists, electrical workers, linemen, metal polishers and stove mounters were active. Blacksmiths in some shops were active; in others trade was dull. Boiler-makers and sheet metal workers were very busy. Horseshoers were busy.

*Woodworking and furnishing.*—The carriage and wagon making trades were quiet. Pattern makers and coopers were fairly busy.

*Printing.*—The allied trades were busy. Jobbing work was especially brisk.

*Clothing.*—Journeymen tailors were very busy, some working extra time.

*Food and tobacco preparation.*—Bakers, confectioners and butchers were very busy. Cigar makers and tobacco workers were active.

*Leather.*—Leather workers and saddlers were fairly busy.

*Miscellaneous.*—Barbers had an average month. Clerks and delivery employees were very busy. Hotel and restaurant employees and laundry workers were busy.

*Transport.*—Railroad trackmen and freight handlers, street railway employees, and all engaged in transportation had a steady month; none being very busy.

*Unskilled labour.*—There was a number unemployed, more than during the same period last year.

#### DISTRICT NOTES.

*Paris.*—The fabric mills are very busy, and there is a demand for capable operatives. There are not many unemployed in town.

#### GUELPH, ONT., AND DISTRICT.

*Mr. O. R. Wallace, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market in December was unsettled. Compared

with a year ago, there was a considerable amount of lost time and a feeling of uncertainty regarding wages and the steadiness of employment. Compared with November, conditions were about the same. Outdoor work was practically at a standstill. Factories in lines in which goods were sold on liens or long time payments were working short time and with reduced staffs. Other factories were in about the usual condition at this season of the year. A number closed down over Christmas until the first Monday in the new year. Retail trade, during the Winter Fair and Christmas season, was generally reported as good, the only noticeable exception being in sales of fur garments. There has been a tendency on the part of some firms to reduce wages, but the only general decrease was one of 5% to piano and organ workers.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—The trades were very dull in December, the only work done being a small amount of interior work.

*Metal.*—Iron moulders and machinists had a quiet month. Some shops were working full time, or nearly so, but trade generally was contracted.

*Woodworking.*—Woodworkers had a dull month, as did piano and organ workers, upholsterers and carriage workers.

*Printing.*—Printers were busy at the first of the month and quiet over the holidays.

*Clothing.*—Journeymen tailors and ladies' garment workers had an active month.

*Food and tobacco preparation.*—Bakers and confectioners and cigarmakers were active.

*Miscellaneous.*—Barbers, clerks and delivery employees had a busy month, owing to the Winter Fair and holiday season.

*Unskilled labour.*—Unskilled labour was not in demand, and the considerable number of men working short time and out of work were more than sufficient for the extra odd jobs usual in December.

## BERLIN, ONT., AND DISTRICT.

*Mr. R. F. Gofton, correspondent,* reported as follows:—

## GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during December was on the whole quiet compared with the previous month and the corresponding month of 1906. The building season closed, and many of the industries were not working full time, some closing on the 18th and 20th and not having started again, though some are expected to commence operations on the 8th of January. In previous years, this was a busy month for the furniture trade. The walls of the new go-cart factory are completed. Outside work on the St. Jerome College is completed. The building will cost about \$65,000. The Berlin Rubber Company is remodeling its factory with a view to manufacturing felt, and intends commencing operations in January. The Berlin Interior Hardwood Company was very busy. Some of the industries are working eight hours a day, though ten hours constitute a day's work. The employees of the H. Krug Furniture Company, the Berlin Furniture Company and the Anthaes Furniture Company have had their wages cut 10 per cent, and some of the latter firm's employees 15 per cent.

## CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were busy hauling hay and wood.

*Lumbering.*—This industry was very quiet.

*Manufacturing.*—With a few exceptions, all industries have had a somewhat quiet month.

## CONDITION OF PARTICULAR TRADES.

*Building.* — Quiet conditions prevailed.

*Metal, engineering and shipbuilding.*—All were well employed.

*Woodworking and furniture trade.*—Seventy per cent of the woodworkers,

upholsterers, varnishers and polishers are out of employment. Carriage and wagon makers were well employed.

*Printing.*—Printers, pressmen and bookbinders reported a busy month.

*Clothing.* — Journeymen tailors were busy, and garment workers, glove makers, boot and shoe workers active.

*Food and tobacco preparations.*—Cigar makers reported a busy month.

*Leather.*—Trunk and bag makers, tanners and curriers were quiet.

*Miscellaneous.*—Barbers, broom-makers, clerks, delivery employees and laundry workers were busy.

*Transport.*—Street railway employees and cabmen were busy.

*Unskilled.*—There was a large number out of employment.

## DISTRICT NOTES.

*Elmira.*—All classes of labour were well employed. The Elmira Furniture Company, the Operative Furniture Company and the Elmira Felt Works Company have been working overtime, and reported that they were very busy.

## WOODSTOCK, ONT., AND DISTRICT.

*Mr. W. N. McEltheran, correspondent,* reported as follows:—

## GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during December was very quiet compared with conditions a year ago. While it is a usual thing at this time of the year for factories to close down for stock-taking or to overhaul plants, the lay offs this season are for indefinite periods in many instances. Reed organ makers and those employed in the manufacture of church organs were the most steadily employed. Holiday traffic in the railways seemed to show no falling off, and the transportation companies were busy. Special interest has been taken by the citizens of Woodstock and Ingersoll in the Niagara power question. By-laws will be submitted in each place at the time of the civic elections for 1908. Woodstock will

elect its first Board of Education at the same time, while Ingersoll will take a plebescite of the ratepayers to ascertain the will of the people regarding the discontinuance or not of manual training and domestic science departments in the educational curriculum.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—These trades were generally quiet. Bricklayers and masons were unable to do anything on account of the cold weather. Work on the new Y. M. C. A., building was totally suspended for about three weeks, but was resumed again towards the end of the month. Heating and plumbing systems were installed in the new Woodstock hotel.

*Metal.*—Stove moulders had about half a month, while machinists, though few in numbers, were steadily employed. Stove mounters were laid off most of the month.

*Woodworking and furnishing.*—Varnishers, upholsterers, carvers, carriage and wagon makers, piano makers and like trades were quiet.

*Printing.*—Printers and pressmen had a quieter month than a year ago.

*Food and tobacco.*—Bakers and confectioners were extremely busy, overtime being required in the biscuit and chocolate departments. Butchers and meatcutters were fairly busy. Cigar makers were steadily employed. The new Jones Bros., cigar factory was completed and occupied during the early part of the month.

*Leather.*—Tanners and curriers were steadily employed.

*Miscellaneous.*—Delivery employees had their busy season during the Christmas week. Laundry workers were about as usual.

*Unskilled labour.*—was plentiful.

#### STRATFORD, ONT., AND DISTRICT.

*Mr. Joseph T. Carlin, correspondent* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market was quiet compared with last

month, and a number of men were out of employment. One hundred and fifty employees of the Grand Trunk shops were laid off the first of the month, the reduction, as in the previous month, involving every department of the works. The staff in the summer was between 1,000 and 1,100 strong. The reductions have brought it down to between 700 and 800, this being the same as in average years at this time. Fifty hours a week are worked. The building trades were quiet owing to the weather. Contracts were let for a few buildings, one to cost \$15,000. Wholesale and retail merchants reported trade good. The customs receipts for month ending November 30, 1907, were \$48,611.18 as compared with \$9,864.52 for the corresponding month last year. No change in wages and no trouble in the labour market were reported.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Prices for produce during the month were as follows:—

Butter	28 to 30 cts. a lb.
Eggs	28 to 30 cts. a doz.
Geese	from 80 cts. to \$1.00, each.
Ducks	from 40 to 50 cts. each.
Turkey	13 to 15 cts. per lb.
Potatoes	\$1.00 a bag.
Apples	80 cts. to \$1.00 a bag.
Live hogs	\$5.35 per cwt.
Hay	\$14 to \$15 per ton.
Barley	from 50 to 60 cts. per bushel.
Oats	44 cts. per bushel.

*Manufacturing.*—Nearly all industrial establishments had a quiet month.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons, carpenters and builders' labourers were out of work. Plumbers were fairly busy.

*Metal.*—Conditions were quiet in the different branches, though blacksmiths and horseshoers were busy.

*Woodworking.*—Woodworkers were very dull. Coopers reported trade active.

*Printing.*—Printers were well employed.

*Clothing.*—Journeymen tailors reported trade fairly good. Garment workers were dull.

*Food and tobacco.*—Bakers and con-

fectioners, butchers and meat cutters were active. Cigar makers had a good month.

*Leather.*—Harness makers and leather workers were busy.

*Miscellaneous.*—Barbers, clerks, stenographers, delivery employees, furriers, hotel and laundry workers were active.

*Transport.*—Railway trackmen and freight handlers were busy. Teamsters cab drivers and expressmen were active.

*Unskilled labour.*—This class was very dull a number being idle.

move some of the hands here. The Helena Costume Co., which employs girls at sewing and sewing machine work, claim difficulty in getting hands of this kind, but the factories not employing skilled girls can get more than they want, a large number being laid off in some instances. The sum of \$94,925 was spent this year by the city for local improvements.

The city fire brigade was granted increases to take effect January 1st, as follows:—

DISTRICT NOTES.

*St. Marys.*—A by-law was carried authorizing a loan of \$6,000 to Mr. S. J. Doolittle of Preston, to start a wood-working factory.

LONDON, ONT., AND DISTRICT.

*Mr. A. Woonton, correspondent,* reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

A marked depression in the labour market occurred this month, especially in the building trades, which were almost at a standstill. A large number of foremen have left for their homes. As an indication of the number of unemployed, the military school here, which for the past five years has only had about 75 men, has now recruited up to 288, and more were coming in every day. On December 2nd, the London Bolt and Hinge Works reduced the piece hands 15% and the day hands 10%; on December 19th, they closed down until the new year. The Toasted Corn Food factory closed the last week in November, and has not yet opened again. On December 2nd, the G. T. R., reduced the hours in its car shops from 55 to 49½ per week. The Wilcox Manufacturing Company, manufacturers of hardware, went into liquidation early in the month, and the courts have ordered the company wound up, throwing about 40 hands out of work. The Green-Swift Wholesale Clothing Company of this city has closed its St. Thomas branch, and will

	Old Scale Per Year.	New Scale Per Year.
Chief.....	\$1,400.00	\$1,500.00
Asst. Chief.....	950.00	1,000.00
Foremen & Truck Foreman (4).....	750.00	866.00
Asst. Foremen (5).....	675.00	791.00
1st Engineer.....	745.00	795.00
2nd Engineer.....	675.00	791.00
Firemen (17).....	650.00	766.00

Forty per cent more local freight was handled by the railroads than last year. The G. T. R. Co., has completed the addition to the car shops and is placing the machinery in position; it has also completed its new coal chutes, 550 feet long, and with a capacity of 300 tons.

CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers, carpenters, lathers, plasterers, painters, stone cutters and builders' labourers, with a very few exceptions, were idle somewhat earlier this year than usual. Plasterers were fairly well employed.

*Metal.*—Moulders were slack. Iron workers had three weeks' holidays. Metal polishers and stove mounters reported trade fair. Blacksmiths were slack.

*Woodworking and furnishing.*—Carriage and wagon workers were slacker than for a number of years. Car-builders reported considerable repair work. Coopers had some work ahead.

*Printing.*—Printers and pressmen have not suffered the depression of the other trades, and business was good. In the job branch, a lot of overtime was put in. Lithographers reported trade good.

*Clothing.*—Garment workers were

fairly well employed. Boot and shoe workers were busy.

*Food and tobacco preparation.*—The biscuit factories have been busy, but are laying off hands now. Cigarmakers were fairly busy, but shut down in most instances for two weeks, for stock-taking.

*Transport.*—Railroad train crews reported business good, owing to the Christmas trade. Teamsters were slack, some getting the first lay-off in five years.

*Unskilled labour.*—There were hundreds in the city out of employment.

## ST. THOMAS, ONT., AND DISTRICT.

*Mr. J. A. Killingsworth, correspondent,* reported as follows:—

### GENERAL CONDITION OF THE LABOUR MARKET.

There has been less activity in the building trades during December than in the preceding month, due to weather conditions. Mechanics were employed on inside work. The amount of work done was satisfactory.

A considerable reduction was made in the Michigan Central and Pere Marquette locomotive shops. This lay-off was not attributable to lack of work, but was the result of an order received from headquarters to have retrenchments made in the working forces. It is altogether likely that the forces will soon be brought up to the standard, and mechanics who are now out of work on that account will be given employment. In making the reduction, married men were given a preference over single men.

Notwithstanding the general surplus of labour throughout Ontario, St. Thomas has not felt the effect of an over-stocked labour market. Mechanics and labourers in this city have been very well employed considering the season of the year. There are always more or less reductions made during December, and those made in this city were not unusual. While the number of idle men is considerable, it cannot be said that we are experiencing hard times.

In the traffic department on the railroads, business has been good. Freight

traffic on the various railroads entering this city has been heavy, and trainmen are in many instances three and four days ahead of the month.

The Christmas trade was reported as active as in the past two or three years. There was plenty of money in circulation and no indication of a stringency. Produce was sold at a reasonable price, turkeys being quoted from ten to twelve cents per lb.

The local factories handling logs are being fairly well stocked, the good sleighing facilitating the same.

The newly constructed South Western Traction line from London to Pt. Stanley has been doing a good business since the line was opened up.

There has not been sufficient cold weather to enable ice-men to harvest their supply.

Relations between employers and employees have continued very cordial. There were no changes reported in rates of wages or hours of labour.

Living expenses are exceptionally high in this city. However, mechanics and railway employees are well paid, and this fact minimizes to a certain extent the high rate charged for staple articles and similar commodities.

The following prices are now in effect in this city: House rent, \$8 to \$15 per month; board, from \$3.50 to \$5.00 per week; coal, per ton \$7.50; wood, \$3 to \$6 per cord; butter, dairy, 30 cents; creamery, 34 cents; eggs, 30 cents per dozen; potatoes, \$1 per bag; meat, 12½ to 18 cents per pound; bread, 5 cents per 1¼ lb. loaf; apples, 90 cents per bag; flour, \$3 per hundred; lard, \$2.90 per 20 lb. pail; tea, 25 cents to 60 cents; beans, 5 cents per lb.; turnips, 12 cents per peck and milk, 6 cents per quart.

### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—There was considerable activity among farmers, the markets being well attended.

*Manufacturing.*—Manufacturing, on the whole, was satisfactory. The Thomas Bros., Still's, Heard's and other factories, also the Canadian car wheel foundry, reported the month a favourable one.

CONDITION OF PARTICULAR TRADES.

*Building.*—The allied trades were quiet.  
*Metal.*—The metal and engineering trades had fair employment.

*Woodworking and furnishing.*—Woodworkers, upholsterers and wagon-makers reported a quiet month.

*Printing and allied.*—Printers and pressmen had satisfactory employment.

*Clothing.*—Journeyman tailors were very busy.

*Transport.*—Traffic was heavy on the railroads.

*Unskilled labour.*—The supply was not equal to the demand.

CHATHAM, ONT., AND DISTRICT.

*Mr. Alex. Gregory, correspondent,* reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general decline in all branches of the building trades during the first part of the month has resulted in a large number of labourers and mechanics being thrown out of employment. Labourers who have been in the country during the harvesting of the sugar beets are returning, and are swelling the ranks of the unemployed. The City Council is endeavouring to relieve the stress by constructing a number of sewers, which would otherwise not have been done until spring. Manufacturing is still slack. With one or two exceptions, the factories are running on short time. In one instance only has a cut in wages been recorded. Merchants reported trade generally not up to 1906, although Christmas week was brisk, and the month passed with only one assignment.

CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers have enjoyed the finest of weather, and have been able to complete their fall work. Sugar beets have been harvested in good condition, and the crop has been very good.

*Railroad construction.*—The Chatham, Wallaceburg & Lake Erie Electric Rail-

way Company has discontinued track laying for the winter, and has laid off a number of hands.

CONDITION OF PARTICULAR TRADES.

*Building.*—All contracts have been completed. Plasterers have a few contracts still unfinished; otherwise, there is nothing new in sight. Plumbers and gasfitters were busy, but builders' labourers were idle.

*Metal.*—Machinists in most cases were on short time. Electrical workers had steady work.

*Woodworking.*—Carriage and wagon-makers were slack.

*Printing and allied.*—Printers and pressmen have been fairly busy up to the 25th. Bookbinders reported work a little slack.

*Clothing.*—Journeyman tailors were somewhat quiet.

*Food and tobacco preparation.*—Bakers and confectioners reported trade very good during the month, especially the latter part.

*Unskilled labour.*—The supply far exceeded the demand.

DISTRICT NOTES.

The Wallaceburg Sugar Beet Co., has had a very successful year. The total amount put through the transforming process was 42,000 tons.

WINDSOR, ONT., AND DISTRICT.

*Mr. D. Mitchell correspondent,* reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of trade and labour has been unsettled during the past month. Local trade has been very good, but business depending on outside markets has been quiet. The Penberthy Injector Co., has closed down for six weeks throwing 45 hands out of employment. The Tinned Goods Co., has laid off 20 hands, and has reduced the rest to 8 hours a day for two months. There are

a number of idle men in the city at present owing to the fact that there are so many out of work in Detroit, where some large manufacturers have closed down. Apart from that, there are few idle men in the city. The wholesale and retail merchants reported a better Christmas trade than a year ago, but collections are not so good.

#### CONDITION OF LOCAL INDUSTRIES.

*Fishing.*—For the first time in some years, the Sandwich fish hatchery is stocked to its capacity. The jars contain 110,000,000 fry of whitefish; in addition, between 30,000,000 and 40,000,000 were shipped to the hatchery at Selkirk, Man. With the exception of about 12,000,000 fry secured in Lake Ontario, the hatchery was stocked from the Detroit river.

*Manufacturing.*—Nearly all branches were quiet.

*Railroad construction.*—The Michigan Central Railroad Co., is building a new yard at the tunnel approach, and giving employment to about 200 men.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—There was little activity as most of the jobs are completed, and there are no new ones starting.

*Metal.*—Iron moulders, iron workers and helpers, machinists and engineers were not very busy. Brass workers and stove mounters were quiet. Blacksmiths and horseshoers were very busy.

*Woodworking.*—Quietness prevailed.

*Printing.*—Printers reported all men working.

*Clothing.*—Journeymen tailors and garment workers were busy.

*Food and tobacco preparation.*—Bakers, butchers and tobacco workers were all working.

*Leather.*—Leather workers were busy on repair work.

*Miscellaneous.*—Barbers reported trade fair. Clerks, delivery employees, hotel and laundry workers were all fully employed.

*Transport.*—Owing to the closing of navigation, freight handlers had very

little to do. Teamsters and expressmen were not very busy.

*Unskilled labour.*—There was no demand.

#### SAULT STE. MARIE, ONT., AND DISTRICT.

*Mr. F. A. Denman, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The supply of labour during December was greater than the demand in most lines, though the Christmas trade caused temporary activity. Merchants reported a fair month. Buying was rather slow, an unusual circumstance this season. Very little snow fell during the month, and the continued mild weather prevented sleighing. This had a tendency to make trade quiet. Normal conditions prevailed in all local industries and trades.

#### WINNIPEG, MAN., AND DISTRICT.

*Mr. John Appleton, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

December has been a critical month in so far as unskilled labour is concerned. The unusually fine weather which lasted well on to the middle of December had the effect of keeping men employed outdoors much longer than is customary. This had the result of delaying the general change from summer to winter employment some weeks. Usually in October there is a large migration of labour into the city of Winnipeg. The men come in from the railroad construction camps and the farms. This movement did not set in this year until the latter part of November, and reached its most active period during the first days of December. Usually, the men have no trouble in re-engaging themselves at occupations that can be carried on in winter, but this year there was very little demand for men.

Contractors usually make up large gangs for logging, tie-cutting and wood-cutting, out of those who come in from the farms and the railroad grades at the close of the fall weather. This year they did not appear to be in evidence to the same extent as usual. The consequence is that in the early weeks of December there were many men out of work and reduced to want. This condition had a depressing effect upon rates of wages. In camps where most of the men are employed during the winter months wages are ten dollars per month lower than at the corresponding period of last year. Then, \$2.25 per day, equivalent to \$40.00 per month and board, the standard price of the latter being \$4.50 per week, was common rate. At the present time, the highest wages being paid to men in the woods is \$30 per month. Only experienced men are able to get this, and inexperienced men are offered \$20. Expert men are in a few cases obtaining \$35.00 per month.

Railroad building upon so large a scale as has taken place during the past year has created a great demand for ties. For this particular class of work, the demand for experienced men is good. But men with experience are hard to get. There are as many good men as formerly, but more ties are now being taken out than ever before, and in consequence the number of men required for the work is much larger. New men have to be trained to the work, and these are being employed. The imperative need of ties has made it essential for the railroad companies to provide the money necessary to start contractors to work. This is a fortunate circumstance at this particular juncture inasmuch as many of the contractors usually employing large numbers of men cutting firewood have not been able to start operations this year on account of the money stringency. There was some improvement towards the end of December. The same cause has had something to do with the scarcity of employment in the regular lumber camps.

It is extremely difficult to arrive at any satisfactory estimate as to the numbers of men that will be affected by the reduction in the rates of wages that has

taken place. Some of the employment agents set the figure at 10,000. This is perhaps as near the mark as possible, and the estimate is based upon a general knowledge of the various camps and the usual number of men employed in them.

In almost every line of business there has been a steady reduction of staffs during December, and for the Christmas holidays, and the men in several of the large foundries have been laid off for about two weeks.

Retail trade was active before Christmas, but did not exceed in volume that of the previous year. Jobbers all say that trade was quiet.

In the early part of December, it was feared that measures would have to be taken to relieve distress. A meeting of representatives of the various existing charitable organizations took place, and it was decided that an organization be formed to assist existing organizations in preventing over-lapping, and in arresting professional mendicants. For this purpose, an officer will be appointed, to whom all suppliants for charity will be referred. This officer will have power to investigate and ascertain full particulars concerning those in receipt of aid. When he finds that genuine distress exists, he will call a meeting of the executive body of the Charity Organization Society (the name proposed for the new body), and they will act either in conjunction with existing societies or the public authorities.

#### CONDITION OF LOCAL INDUSTRIES.

*Lumbering.*—Lumbering has been interfered with by monetary conditions, and stocks are large. During the year 1907, the amount of building, both in towns and in rural districts, did not reach the volume anticipated. The action of the banks in not extending and increasing lines of credit also made collections bad. This condition has very naturally resulted in the limitation of lumbering operations throughout the Provinces of Alberta, Saskatchewan and Manitoba.

Immediately around Winnipeg there has been a steady demand for firewood. Last winter stocks were pretty well ex-

hausted and prices went up. The piece prices paid for cutting wood went up also. About two years ago, and previous to that time, the average price paid to wood-cutters was from 75 to 90 cents per cord. As the demand for wood became acute, and labour was not equal to the supply, the price went up to \$1.25 per cord. Beginning with December, the price being paid is in no case higher than \$1.00. At the same time, the price for wood has materially dropped. Tamarac, which last January sold as high as \$10 per cord, delivered in Winnipeg at the consumer's door, is now being laid down for \$7.50. Poplar has come down likewise from \$6.50 to \$5.50. These changes are of very material importance to Winnipeg, inasmuch as most of the working people use wood for fuel. Milder weather has had the effect of decreasing the demand, and a better supply has been forthcoming as a result of improved transportation facilities.

*Railroad construction.*—In railroad construction work, more men are employed than in any previous year at this season, but the supply of men is larger. When asked as to whether all the men at present seeking employment would be able to procure it, one well-informed and reliable employment agent said that he did not think so. The contractors wanted good men, and they were discriminating in favour of those that showed aptitude for the work. They have issued instructions to their agents, now that the supply of men is equal to the demand, to select only men that are likely to adapt themselves willingly to camp life and the work incident thereto. Many of the immigrant class cannot do this, and keenly dislike the rough life of the camp, whether in the woods or on the railroads.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—The amount of building for the year has been very much below that anticipated, and except the interior finishing of a few large buildings, nothing is being done. It is not anticipated that the volume of building will be any larger during the coming year than it was in 1907.

*Metal, engineering and shipbuilding.*—All the foundries are reducing their

staffs, and the prospects of an early revival of business are not very bright. Those shops doing railroad work are keeping most of their men at work, but the orders ahead are not large, and it is probable that more reductions in staffs will be made early in the spring. The Canadian Pacific Railway shops are working shorter hours; this affects nearly 2,000 men.

*Woodworking and furnishing.*—In these trades there has been little activity. Business has been seriously affected by the decline in the volume of building.

*Printing.*—The allied trades were quiet, some of the large printing establishments working on short time. The only demand for labour is in the case of good operators of linotype machines. Several of these are wanted at the various printing offices in Winnipeg.

*Clothing.*—There has been a decline in the volume of business. There is no demand for workpeople, and many are seeking work.

*Food and tobacco preparation.*—Food and tobacco preparation industries are in a normal condition. There is seldom any marked variation in these trades in Winnipeg.

*Leather.*—Leather workers were kept at work steadily, with trade good.

*Unskilled labour.*—The surplus of labour seeking any kind of employment indoors and in the city has been aggravated during the last few weeks by the large influx from the country. Amongst this class there is some distress, which is being taken care of. A wood yard was opened by the city, and those in need were given employment at cutting wood sufficient to provide for them. This test has had the effect of getting rid of a large percentage of the so-called unemployed.

#### BRANDON, MAN., AND DISTRICT.

*Mr. S. P. Stringer, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Business conditions during December were somewhat quiet, and a number of

workmen were out of employment. The building trade was inactive, excepting for a few men employed on inside work. Railway companies were sufficiently active to give employment to permanent staffs, but there was no demand for extra help. Work on the inside fitting of the Canadian Pacific Railway Company's new machine shops was progressing slowly. The erection of the Brandon Winter Fair buildings was nearing completion. Wholesale and retail trade was brisk. Postal delivery has been instituted in Brandon. The carmen's demand for an increase of wages, etc., has been submitted to a board of arbitration.

CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—According to an official statement, the crop shipments of 1907, as compared with those of 1906, are as follows:—

	1907.	1906.
Wheat.....bushels	20,193,000	25,193,000
Oats....."	2,040,000	2,240,000
Barley....."	578,000	378,000
Flax....."	317,000	217,000

*Manufacturing.* — The Wheat City Flour Mills Company shipped a carload of flour to Bergen, Norway, during December.

*Railroad construction and employment.*—The Canadian Northern Railway Company's branch line from Brandon to Regina has been finished, but the official opening will not take place until spring. The Canadian Pacific Railway Company has completed the Brandon and Saskatchewan branch line. The opening of this line will be the means of starting a large amount of wheat to move.

CONDITION OF PARTICULAR TRADES.

*Building.*—The building trade was inactive, only a few workmen being employed on inside work. Plumbers and steamfitters were active.

*Metal, engineering and shipbuilding.*—Machinists, horseshoers, steam engineers, electrical workers, blacksmiths and jewelers were actively employed, also linemen.

*Woodworking and furnishing.*—Woodworkers, upholsterers and varnishers were somewhat slack.

*Printing.*—The allied trades were fairly well employed.

*Clothing.*—Tailors and garment workers were actively employed. Boot and shoe workers found employment active.

*Food and tobacco preparation.*—Butchers, bakers and meat-cutters, etc., were well employed.

*Miscellaneous.*—Barbers, hotel and restaurant employees, and laundry workers found employment active, and clerks, delivery employees, etc., were busy.

*Transport.*—Traffic, as usual, at this time of the year, was heavy.

*Unskilled.*—The market was well supplied, although considerable work was done on water pipes for the Canadian Pacific Railway Company at its round house, and on new mains on the streets.

DISTRICT NOTES.

*Prince Albert.*—The new water and sewer system has been placed in operation. It includes a high pressure service, which is being extended, and cost about \$275,000. A company has been formed to establish a daily newspaper; it is capitalized at fifty thousand dollars.

REGINA, SASK., AND DISTRICT.

*Mr. Hugh Peat, correspondent,* reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during December was very quiet. Building operations were practically at a standstill. The stonecutters' union has disbanded till next spring, as there are not enough stonecutters left in the city to carry on the work of the union. The laying of steel on the new line of the Canadian Northern Railway from Brandon to Regina was completed on December 12th. Last spring, Mr. D. D. Mann, Vice-President of the Canadian Northern Railway, stated that wheat would be hauled over the new line this fall; this prediction has already been fulfilled, many farmers having shipped wheat over it during the past month. The

completion of the line will mean much to Regina and to the province as a whole. It will bring effective competition with the Canadian Pacific Railway. When the new line to the east is in operation, the people of the province will have an opportunity of judging definitely what railway competition means. It will give, at least, an alternative route to Brandon, Winnipeg and Port Arthur. It will also join the Regina-Prince Albert branch at this point, completing the circle of railway which the C. N. R. Co., has been building around the Province of Saskatchewan. It is not likely that the new line will be in shape for passenger traffic until next spring, but a through passenger service from Port Arthur and Winnipeg to Edmonton, via Regina, will probably be installed some time next summer, as well as a similar service to Prince Albert. It is not expected that the Canadian Northern line from Winnipeg will make much difference in freight rates, as the distance is practically the same as that over the main line of the Canadian Pacific, but two roads will probably give a better service than one.

The local unions are drawing up new schedules for wages and hours, which are to be submitted to the Builders' Exchange early next year. This is the result of a conference between the Trades Council and the Builders' Exchange which was held a few months ago, at which it was suggested that the whole of the trades unions in the city should prepare schedules, which, if accepted, would go into operation early in the year and stand good for twelve months.

The Electrical Workers' and the Painters' Unions have already handed in their schedules to the Trades Council for endorsement, and those from the other Unions are expected to be in the hands of the Secretary of the Trades Council before the end of the month.

There has been no change in rates of wages or hours of employment during the last three months, with the exception of the building trades, where the hours of employment have been shortened owing to lack of daylight.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers were dull, very few men being employed. Masons, lathers and plasterers were very quiet. Painters, plumbers and builders' labourers were very quiet.

*Metal.*—Electrical workers were quiet. Sheet metal workers were dull.

*Printing.*—The general condition of the trade was quiet in comparison with last year; in spite of Christmas activity, several men have been laid off.

*Food and tobacco preparation.*—Cigar makers were dull.

*Miscellaneous.*—Barbers were only fairly active.

#### MOOSE JAW, SASK., AND DISTRICT.

*Mr. J. R. D. Bastien, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of labour during December was exceptionally quiet in comparison with conditions at any time during the past two years. During the latter part of the month, the Canadian Pacific Railway closed its erecting and building shops; this threw a number of men out of employment for a period of ten days. Traffic on the railway decreased during the latter part of the month, and engine and trainmen earned considerably less. The decrease in railway employment is principally owing to the fact that as a result of the exceptionally fine weather, locomotives were handling full tonnage trains, whereas last winter traffic was hindered by storms. In all other local industries, employers laid off a considerable number of employees. There was little or no demand for employees in the building trades, this class being the most seriously affected. With agriculturists also, there was very little employment. The money situation is being seriously felt in the community, especially by merchantile firms. There has been no lockouts or trade disputes in any of the trades or

occupations during the month. The railways have all their spare tracks filled with empty cars.

CALGARY, ALTA., AND DISTRICT.

*Mr. R. A. Brocklebank, correspondent,*  
reported as follows:—

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Conditions were dull, as farmers could not dispose of their produce to advantage.

*Lumbering.*—Dullness prevailed.

*Manufacturing.*—This industry was very dull.

*Mining and railroad construction.*—The mining industry was busy, but railroad construction and employment was dull.

#### CONDITION OF PARTICULAR TRADES.

*Building.* — Employment was very slack.

*Metal.*—Machinists and engineers were fairly busy until the end of the month. Electrical workers reported work fair, but linemen were dull. Blacksmiths and jewellery workers were dull, but boilermakers and horseshoers were fairly busy.

*Woodworking.*—Car builders were dull.

*Printing and allied.* — Printers and pressmen and photo engravers were fairly busy.

*Clothing.*—Journeymen tailors, garment workers and boot and shoe workers were dull.

*Food and tobacco preparation.*—Bakers and confectioners, and butchers and meat-cutters were fairly busy, but cigar makers and tobacco workers were dull.

*Miscellaneous.*—Barbers were busy, and delivery employees active, but clerks and stenographers, hotel, restaurant and theatre employees were dull.

*Transport.*—Business was very good until the 20th of December, but since then it has completely fallen off, the men making considerably less mileage and freight handlers not being afforded much work.

For *unskilled labour* there has been little demand.

#### GENERAL CONDITION OF THE LABOUR MARKET.

During the month of December, a large number of men have been out of employment. Especially was this the case with men engaged in the building trades and with unskilled labour. The scarcity of money is regarded as the cause. The lumbering business is not employing as many men as in former years, as there has been a great falling off in the demand for lumber during the latter half of the year. The number of unemployed is in excess of any previous year, and double the number of unemployed in November. Bank clearings for the month show a slight falling off over the corresponding month of last year. There has been a heavy falling off reported by the transportation companies. Wholesalers have had a very favourable month, and retailers report a greater amount of business than during the corresponding month last year.

The report of the Light Committee for 1907 shows a profit of \$20,000 for the year. The city, after installing the plant two years ago, made a reduction of 20% on the cost of lighting at that time; it is expected that a further reduction will be made in the near future.

#### CONDITION OF LOCAL INDUSTRIES.

*Lumbering.*—The lumbering industry was lighter than for a number of years.

*Manufacturing.*—During the money stringency, manufacturing has kept up remarkably well. It is estimated that the products of the Raymond sugar factory for the year will be five million pounds.

*Mining.*—The coal mines throughout the province were working full time and keeping a stock of coal on hand, and it is expected that there will be plenty of coal during the winter.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Quiet conditions prevailed with bricklayers, stonemasons, carpen-

ters and joiners, lathers and plasterers painters, decorators and paperhangers. Plumbers, gas and steamfitters had active employment. Conditions were dull with builders' labourers.

*Metal, engineering and shipbuilding.*—Conditions were quiet except with jewellers, who were more or less actively employed.

*Woodworking and furnishing.*—Woodworkers, carriage and wagon makers, and car builders were quiet.

*Printing.*—Printers, pressmen, electrotypers, bookbinders, steel and copperplate engravers, and photo-engravers were quiet.

*Clothing.*—Journeymen tailors, garment workers, boot and shoe workers were active.

*Food and tobacco preparation.*—Confectioners, butchers and meat-cutters were busy, and cigar makers active.

*Leather.*—Workers in the leather trades were somewhat quiet.

*Miscellaneous.*—Barbers were active, and clerks, stenographers and delivery employees busy. Hotel, restaurant and theatre employees were also active, and so were laundry workers.

*Transport.*—Railway train crews were somewhat dull, trackmen and freight-handlers quiet. Cabmen, hackmen and carters, draymen, teamsters and expressmen were active.

*Unskilled.*—Conditions of employment were very dull.

## EDMONTON, ALTA., AND DISTRICT.

*Mr. J. A. Kinney, correspondent,* reported as follows:—

### GENERAL CONDITION OF THE LABOUR MARKET.

Labour was not employed to as great an extent this month as last. Compared with December a year ago, fewer men found employment, and there are at present more idle men in the city than at any time before. This is due to the usual cessation of work at this season of the year, and also to an influx of men from the railway camps near Saskatoon. The industries employing the largest number

of men in the district during the winter months are the coal mines and the lumbering companies. Twenty-six coal mines are now in operation in the Edmonton district, giving employment to five hundred men. About twenty-seven hundred tons per day are turned out; this amount could be doubled on thirty days' notice. The present retail price is \$3.50 per ton delivered. A number of men have gone into the woods for the different lumber companies operating in the north and west timber limits. In addition to lumber, a large number of ties will be taken out this winter, contracts having been let by the Grand Trunk Pacific for a large number to be delivered at this point for the railway construction between here and Saskatoon. Some 600,000 will be purchased in Alberta if possible. The officials of the G. T. P., here have been notified to prepare for the receiving of 100,000 from British Columbia. The John Walters Lumber Co., intends to bring down sleepers for three miles of the Strathcona Radial Tramway, so that construction work may start in the spring. Wholesale trade was fairly active. A number of large retail merchants of the city stated that the trade showed a marked increase over the closing months of 1906.

Building permits issued for November totalled \$84,935, compared with \$75,415 for November, 1906. The total permits issued for the year 1907, up to November 30th, was \$2,239,755, as compared with \$1,868,069 for 1906. Owing to the lack of available capital, a considerable portion of building for which permits were issued has been postponed.

### CONDITION OF PARTICULAR TRADES.

A considerable falling off has taken place in the number of mechanics employed, compared with last month. Compared also with December a year ago, fewer men were employed. This will hold good for mechanics in all the trades, as there are at present more idle mechanics here than in December of any other year in our history. Owing to all trades working under agreements, wages remained about the same.

NELSON, B. C., AND DISTRICT.

NEW WESTMINSTER, B. C., AND DISTRICT.

*Mr. A. B. Dockstader, correspondent,* reported as follows:—

*Mr. D. J. Stewart, correspondent,* reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market throughout the Kootenay district during December was very dull, the supply of both skilled and unskilled labour exceeding the demand by about 1,200 men, owing to the depreciation in copper values and the decreased demand for lumber. On December 1, a reduced wage scale went into effect at the mines in the Rossland camp, and also at the Trail smelter, the employees accepting the reduction owing to decreased values in the metal market. The reduction amounts to about 50 cents per day for each man. It is estimated that about 1,300 men are affected by the reduction. The arbitration board, in the case of the employees of the St. Eugene mines at Moyie, and the Canadian Mining and Smelting Company, Limited, under the *Industrial Disputes Investigation Act, 1907*, has made its award, granting a sliding scale increasing or decreasing automatically according to the varying values of metal. The Canadian Bank of Commerce has moved into its new brick building.

There have been many idle men in the city. This was caused by a couple of the sawmills ceasing operations, and others reducing the number of employees. Other industries also reduced the number of their staffs. This coming at a time when the weather is not suitable for outdoor work caused an over-supply of labour, which it is hoped will be absorbed in a couple of months, when the spring work opens up. There are a number of important works to be started early in the year. Chief among these is a new steel bridge to be built across the north arm of the Fraser river, connecting the city with Lulu Island, and replacing the present wooden structure. A new reservoir, to cost \$25,000, will also be built. Many other new buildings are contemplated, so that there is likely to be a good deal of employment, although no shortage of labour is expected in the coming year.

The Customs returns for the month of November show an increase over the corresponding month of last year of about 70 per cent.

CONDITION OF LOCAL INDUSTRIES.

CONDITION OF LOCAL INDUSTRIES.

*Lumbering.*—The lumbering industry was much depressed, not over one quarter the number of men being employed in the woods as at this time last year. The larger part of those so employed are working on tie making for the Grand Trunk Pacific Railway.

*Agriculture.*—Good prices prevailed for all kinds of farm produce. Many of the farmers are taking advantage of the number of unemployed men and are having more of their land cleared up.

*Mining.*—The different Crows' Nest Pass Coal Companies' collieries are enjoying prosperity. The Companies' payroll for the month of December amounted to \$205,000.

*Fishing.*—Operations on the Fraser river are practically at a standstill. Some few fish are being taken, for which good prices are obtained.

DISTRICT NOTES.

*Fernie.*—A fourth bank has been established at Fernie, the Eastern Townships Bank having recently opened a branch there.

A statement of the extent of the salmon pack during the past season in this province has just been issued, which shows a large decrease from last year's figures. The decrease is 175,946 cases, or about 28%. The pack of white spring salmon and cohoes was slightly larger this year

than last, but in all other grades the decrease in 1907 was very large. This year's pack was about equal to that of the pack of 1905, when 473,674 cases were put up, against 453,511 this year. The following are the figures for the various districts: *Fraser River*, Sockeyes, 60,273; red springs, 2,479; white springs, 34; humpbacks, 24,561; cohoes, 38,879; total, 126,216. *Skeena River*: Sockeyes, 105,738; red springs, 7,509; white springs, 774; humpbacks, 18,324; cohoes, 14,001. total, 146,346. *Rivers Inlet*: Sockeyes, 87,305; red springs, 764; humpbacks, 700; cohoes, 3,626; total, 92,395. *Naas River*: Sockeyes, 17,437; red springs, 1,299; humpbacks, 5,882; chooes, 5,930; total, 30,548. *Outside*: Sockeyes, 40,342; red springs, 1,342; white springs, 2,200; humpbacks, 6,468; cohoes, 7,654; total, 58,006. By kinds, the returns is as follows:—

	1907.	1906.
Sockeyes.....	311,085	459,679
Red springs.....	13,393	31,621
White springs.....	3,008	1,083
Humpbacks.....	55,953	68,305
Cohoos.....	70,090	69,132
	453,511	629,460

*Lumbering*.—Indications point to a good spring and summer trade. One local mill company is spending about \$1,000,000 in improvements to plant. Logs have taken a decided drop, and timber that brought \$12.00 per thousand a couple of months ago can be purchased at the present time for \$8.00.

#### CONDITION OF PARTICULAR TRADES.

*Building and metal*.—The various branches were quiet.

*Woodworking*.—Shingle weavers, woodworkers and carriage and wagon makers were dull. Car builders (electric) were active.

*Printing and Clothing*.—These trades were quiet.

*Food and tobacco preparation*.—Bakers and confectioners, butchers and meat-cutters and cigar makers were active.

*Leather*.—Tanners and curriers were active.

*Miscellaneous*.—Barbers were active, but clerks and stenographers were dull, with laundry workers quiet.

*Transport*.—Steamboatmen and street railway employees were active.

*Unskilled labour* was dull.

#### VANCOUVER, B. C., AND DISTRICT

Mr. Geo. Bartley, correspondent, reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

There were more men out of work during the month than in the previous history of the city, there being fully 5,000 men idle. With the exception of a few employed on the construction of several large structures, such as the post office and court house, the building trade was practically at a standstill. The banks reported money very scarce. Steps have been taken to establish two new banks, viz., the Bank of Vancouver and the Bank of British Columbia. The City Council provided relief work and meal tickets to a large number of men. The volume of holiday trade did not come up to expectation, although it reached that of last year; but taking into consideration the great increases in population it may be stated that there was a falling off. The Assessment Commissioner estimates the population of the city at 70,000, as against 52,000 last year.

The price of flour held firm at \$7 a barrel, though wheat fell \$3 per ton. Bank clearings for the week ending December 26, 1907, amounted to \$3,292,891, for the same week, 1906, to \$3,358,020, and 1905, \$1,823,207.

It was estimated that there were about 500 men unemployed in the parade held on December 9, which marched to the city hall to meet the council, asking for employment. A deputation addressed the members of the council, which provided the needy with relief work.

#### CONDITION OF PARTICULAR TRADES.

*Building*.—All branches reported trade very dull.

*Metal, engineering and shipbuilding*.—The various branches reported trade fair,

with the exception of the machinists and moulders, who reported that there was a large number of members out of work, and that prospects were poor.

*Woodworking and furnishing.*—Woodworkers reported trade dull, upholsterers fair, varnishers and polishers, a number out of work. Carriage and wagon makers, and car builders were fairly well employed, with prospects uncertain, several having been notified of a temporary lay off next month.

*Printing.*—Towards the end of the month, newspaper workmen were busy but a slackening off is looked for next month. The job offices were very quiet.

*Clothing.*—Tailors reported trade fair.

*Miscellaneous.*—Barbers reported a large number of members out of employment. Bartenders stated that there were about 80 men out of work; there are about 60 hotels in the city. Restaurant waiters were well employed, though there were a number out of employment; theatre employees were also well employed.

*Transport.*—Transportation employees, with the exception of teamsters, and expressmen, were well employed.

*Unskilled.*—It is estimated that there were fully 2,500 unskilled labourers out of work.

## VICTORIA, B. C., AND DISTRICT.

*Mr. W. E. Ditchburn, correspondent,* reported as follows;—

### GENERAL CONDITION OF THE LABOUR MARKET.

Victoria, like all the other coast cities, is feeling the effect of the closing down of the logging camps and mines of the upper country and of the neighbouring states. It is estimated that there are at least three hundred unemployed men in the city, with little hope of finding work, as the industries have all the help they require. The effect, however, is not felt as severely as on the mainland. Business in general, both wholesale and retail, is first class, and will probably remain so until the end of the year, when it is expected there will be a slight de-

cline. At present, money collections are easy. The bank clearings for November showed a gratifying increase over those for the corresponding month of last year, totalling \$5,030,519, as compared with \$4,024,506 in November, 1906., an increase of 25 per cent. During November a year ago, there were some heavy transfers in real estate, and the clearings then reflected this activity. For the eleven months of this year, the total clearings aggregated \$50,969,346, compared with \$41,083,375 for the corresponding eleven months a year ago.

A conference was held on November 27 between representatives of the Salvation Army and members of the Provincial Government relative to immigration to British Columbia. The steamship "Kensington," which has been chartered for the purpose, will bring during February, fifty families, 250 domestics servants and 150 young men who will be employed as farm labourers. Satisfactory arrangements were made with the local government in the matter of financial aid.

### CONDITION OF LOCAL INDUSTRIES.

*Fishing.*—The prospectus of a company to be known as the Queen Charlotte Islands Fishing and Cold Storage Company was issued early in the month. The company is being organized with the intention of taking over the present station, oil and cannery plant, at Skidegate, enlarging this station and conducting a fishing and fertilizer business. Salmon, cod, halibut, herring, dogfish and clams will be fished for shipment, the offal being turned into fertilizer, and the oil obtained being treated and barrelled at the factory.

*Whaling.*—There is every reason to believe that the whaling operations in the inland waters of the Straits of Georgia will prove in every way as successful as those conducted at the stations of Sechart and Kyuoquot Sound. With regard to the new station at Page's Lagoon, it is expected that hunting will be possible all the winter, as the waters of the Straits of Georgia are seldom too rough for whaling.

*Sealing.*—The price of seal skins realized on the London market is reported

about the same as last year, viz., \$22. This year's catch was only a little more than half of that of last year, being the lowest since the earliest years of pelagic sealing. Last year the catch totalled 10,370 skins. The catch taken during the past year gave employment on the fifteen sealing schooners to 379 men, of whom 177 were whites and 220 were Indians. The fifteen vessels had 52 boats and 105 canoes. There were 50 less men employed this season than last year, when 477, of whom 204 were whites and 243 were Indians, were engaged in the work on seventeen schooners. The catch of the past season in detail was:

	Skins.
B. C. coast.....	1,934
Copper Islands.....	448
Behring Sea .....	2,858
Taken by Indians.....	157
	—
Total .....	5,397

*Mining.*—For the past five months, a Dominion Government expert has been investigating the iron deposits of Vancouver Island with a view to having it determined whether the ores are here in sufficient quantity to justify expectations of industrial development.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—The building trades are still brisk and the outlook is good for the coming new year. The erection of more buildings for next season, both business and residential, is promised than for any previous year. Some contractors say that much more building would be undertaken but for the excessively high price of lumber of all grades. Rough lumber costs \$17 per 1,000 feet, and dressed lumber costs from \$30 to \$40 per 1,000 feet. This is considered high when it is remembered that logs only cost from \$5 to \$7 per 1,000 feet. The outside work in the building line has been retarded somewhat lately on account of the wet weather. Lathers, plasterers and indoor painters were all kept going. Plumbers were rather dull.

*Metal, engineering and shipbuilding.*—Iron moulders, iron workers and helpers found work in a normal condition, though there are plenty of men. Elec-

trical workers find that the closing down of the mines and mills in the upper country has affected their business, and there has been a laying off of some of the men. Business locally is fair, but depends greatly on the amount of building. Linemen's work is normal, being principally on repairs. Stove mounters and stove moulders find that work still keeps brisk. Blacksmiths, boilermakers and iron shipbuilders have been kept well employed at the different works, but there are plenty of men on hand.

*Woodworking and furnishing.*—All the different branches of the woodworking trade were well employed. Some idle polishers were noted, but these were strangers who had come here in the hope of obtaining employment. Pattern-makers are generally kept working full time, but there are not many of this trade employed here.

*Printing and allied.*—Printers, both book and job, keep busy, and there are at present no idle printers in the city.

*Clothing.*—Journeymen tailors and garment workers find no scarcity of work, notwithstanding that there are a great many ready-made clothing houses all doing a good business.

*Food and tobacco preparation.*—Bakers and confectioners were in their busy season. Cigarmakers found trade in a healthy condition.

*Miscellaneous.*—Clerks and delivery employees find all the work they can do.

*Unskilled labour.*—Owing to the inclement weather, unskilled labourers have in some instances been idle.

N.B.—While trade is, in some branches above, reported in good condition, this does not mean that there is room for more workmen. The contrary is the case, as applications for employment have been numerous in all lines of business.

#### NANAIMO, B. C., AND DISTRICT.

*Mr. A. E. H. Spencer, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The labour market has been much depressed during December, there being a

large number of men out of work, especially in the lumber camps and sawmills, with poor prospects of an early improvement. Business men reported a fair month, but the outlook is not favourable. There have been no definite changes in wages, but there is a downward tendency in rates among unskilled labourers.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—There has been no activity among farmers, except for a little ploughing.

*Fishing.*—Herring fishing was fully under way on a more extensive scale than last year. The whaling station near here is very busy, catching plenty of whales.

*Lumbering.*—There is hardly any work

going on in the lumber camps. The local sawmill was idle the first part of the month, but has resumed work for a short time, but not to its full extent.

*Mining.*—The coal mining industry has shown a falling off, there having been some idle time during the month, with more men than are required waiting for work. There was very little activity in the quartz mines in this district.

#### CONDITION OF PARTICULAR TRADES.

Plumbers were active, but the other branches of the *building trades* were dull. The *metal and woodworking* trades were quiet, as were teamsters and expressmen. There was little employment for unskilled labour, and a number of men were in idleness.

### THE INDUSTRIAL INVESTIGATION ACT 1907—PROCEEDINGS UNDER THE ACT DURING THE MONTH OF DECEMBER.

**D**URING the month of December, five applications were received at the Department of Labour for the establishment of Boards of Conciliation and Investigation, being as follows, viz.:—

1. An application on behalf of the employees of the McKinley-Darragh Mining Company, of Cobalt, Ont.

2. An application on behalf of the workers in fur employed by various firms in Montreal.

3. An application on behalf of engine-men, firemen and hostlers in the employment of the Canadian Northern Railway.

4. An application on behalf of the employees of the Thomas Davidson Manufacturing Company of Montreal, Que.

5. An application on behalf of the employees of the Eastern Townships Manufacturing Company, St. Hyacinthe, Que.

Of applications received prior to the beginning of December, proceedings in connection with which remained unfinished at the close of November, there were the following, namely: (1) the application on behalf of the employees of the Canada Mining and Smelting Company, of Moyie, B. C.; (2) the applica-

tion on behalf of the employees of the Canada West Coal and Coke Company of Taber, Alta.; (3) the application on behalf of the employees of the Duggan-Huntrods Company of Taber, Alta.; (4) the application on behalf of the employees of the Domestic Coal Company of Taber, Alta.; (5) the application on behalf of the Stratheona Coal Company of Edmonton, Alta.; (6) the application on behalf of the Canadian Pacific Railway Company for the adjustment of differences with the carmen employed on its western lines; (7) the application on behalf of the employees of the Cumberland Railway and Coal Company, of Springhill, N. S.; (8) the application on behalf of the Grand Trunk Railway Company of Canada for the adjustment of differences with the railroad telegraphers employed on its lines.

#### Proceedings of Boards during December.

During the month of December, reports were received in the Department as follows, viz., with respect to three disputes at Taber, an agreement being signed in each case between the Company

and the employees concerned regarding all matters in dispute; with respect to the differences between the Canadian Pacific Railway Company and the carmen employed on its western lines, the report in this case also being unanimous; with respect to the differences between the Strathcona Coal Company of Edmonton, Alta., and its employees, an agreement on all points being effected until March 31, 1909; and with respect to the differences between the Canadian Consolidated Mining and Smelting Company of Moyie, B. C., and its employees at the St. Eugene mine, where also the report of the Board was unanimous.

The text of the various reports is printed below.

In the case of the Board established for the adjustment of the differences between the employees of the Cumberland

Railway and Coal Company of Springhill, N. S., and the employing company, the Board was fully constituted during the month, His Honour Judge Murray of New Glasgow being chairman, but no report as to its proceedings had been received at the end of December.

In the case of the Board established for the adjustment of differences between the Grand Trunk Railway Company and its railroad telegraphers, the Board met in Montreal and Toronto at various dates during the month, and is understood to have formulated the general principles of an agreement, and to have referred the working out of the details to committees representing the respective parties. A formal report of the proceedings, however, had not reached the Department at the close of the month.

#### I.—DIFFERENCES AT THE ST. EUGENE MINE, MOYIE, B.C.—UNANIMOUS REPORT OF BOARD.

THE Department received, on December 28th, the report of the Board of Conciliation and Investigation established for the adjustment of differences between the Canadian Consolidated Mining and Smelting Company of Moyie, B. C., and certain of its employees working in and around the St. Eugene mine, a silver-lead mine at Moyie. The application for the Board was received on September 11, the difference being stated as follows: "That the said Company and its employees are unable to arrive at an agreement regarding the wages to be paid for the different classes of labour in and around the above mentioned mine." The number of men concerned in the dispute was estimated at 350 to 400. The Board was established as follows, viz.: S. S. Taylor, K. C., Nelson, B. C., recommended by the employees; J. A. Harvey, Cranbrook, B. C., recommended by the employing company; and His Honour Judge Peter Wilson, Cranbrook, B. C., recommended by the foregoing members of the Board. Judge Wilson's appointment was dated September 23. The Board met first on October 7 at Moyie, B. C., remaining in ses-

sion until October 9, and thereafter at various dates in October, November and December, the later sessions being held at Nelson, B. C.

The investigations of the Board showed the contention of the employees to be a demand for the same wages as those paid in the boundary district of British Columbia, while the Company maintained that not only should such an increase as would bring the wages to this scale not be granted, but that the then existing scale of wages at the St. Eugene was excessive. A considerable amount of evidence was therefore taken, ranging over a wide field, and relating to the cost of living now as compared with the cost of living in prior years since 1900, to increases of wages since 1900 in other lines of industry, and to the scales of wages paid in other mining camps in North America. Evidence was adduced showing the cost of living also in a great number of other mining camps, working under the same conditions, and also as to the scale of wages paid in each mining camp in British Columbia, in the Yukon and Alaska, and in various important mining camps of the United States.

Eventually, the Board formulated what its members believed to be a fair wage scale applicable to a number of districts in British Columbia as well as to the St. Eugene mine. The Board, however, took into account the fact that operating conditions were variable, and devised, therefore, three recommended schedules to be applicable respectively during normally favourable conditions, abnormally unfavourable conditions, and abnormally favourable conditions, the market price of silver and lead and of copper, as the case may be, to determine, as provided, which scale shall be applicable; the "abnormally unfavourable" scale—an average reduction from the then existing rate of 50 cents per day was recommended for adoption at the present time.

The findings of the Board under such circumstances are believed to be of special value to all concerned in the mining industries of Western Canada.

The conclusions of the Board were not formally accepted by the parties to the difference, but in a letter to the Department from the chairman of the Board it is stated that the executive of the Miners' Union at Moyie is quite satisfied with the findings, and the chairman of the Board adds: "I believe that the feelings of the Company will be the same."

#### Text of Report.

The text of the findings of the Board is as follows:—

In the Matter of the Industrial Disputes Investigation Act, 1907, and of a Dispute between

The Consolidated Mining and Smelting Company of Canada, Limited, (Employer)

and

Certain Employees of the said Company in and around the St. Eugene Mine, Moyie, B. C. (Employees.)

The Board of Conciliation and Investigation herein appointed beg to report as follows:—

On our appointment, we proceeded to Moyie on the earliest possible day that could be arranged, and held our first meet-

ing on the 7th day of October. The sessions held on the 7th, 8th and 9th days of October were devoted to ascertaining the exact cause of dispute as between the parties, and our purpose then was to proceed as a Board of Conciliation in as far as we could to ascertain the real basis of the difficulties between the parties, and, if possible, to narrow down the issue for the purpose of any investigation that it might be necessary to hold. At the end of that period we had fully acquainted ourselves with all the facts in dispute, but at that time we found we could do no more as a Board of Conciliation, and were then ready to proceed with the investigation. The Company, however, had instructed counsel in the matter, who was fully prepared, and their officials were not in a position to proceed without his assistance unless they had an adjournment to more fully inform themselves as to the evidence to be adduced.

As the men objected to counsel appearing, we were compelled to grant that adjournment, and the matter then stood over until the 17th day of October, when we again met in Moyie, and attempted again as a Board of Conciliation to bring the parties together.

We sat for such purpose on the 17th and part of the 18th days of October, and on the afternoon of the 18th a proposition was prepared, and the men then agreed to hold a meeting that evening to discuss the proposition, and determine whether or not the proposition submitted by the Company should be accepted. On the following morning, the men reported that they could not consider any proposition for a reduction, and the Company refused to agree to the submission to the Board of the question as to three classes of labour in dispute, and we therefore had to proceed with the hearing as to the whole matter.

In our investigation as a Board of Conciliation, we found that the dispute arose from the desire by the men to have their wages increased to what is known as the Boundary scale. Prior to June 1st, the men had been working under what was known as the old Slocan scale fixed in 1900. On June 1st they had received a

very material increase, but did not receive the same rate of wages as was being then paid in the Boundary district. The men maintained that the rate of increase as given was not sufficient, that they should receive the same rate of wages as that paid in the Boundary district, and that the increase as given discriminated in regard to certain classes of labour. They based their demands for an increase on the fact that the cost of living had materially increased since the old scale was fixed, that the wages in other departments of industry had increased during the last ten years from 25 to 100 per cent.; that they were entitled to the same rate of wages as that paid in the Boundary country, where conditions are practically the same as at Moyie, and that more especially in the case of muckers in Rossland and the Boundary, the increase had been from 16 2-3 to 30 per cent., while in Moyie, the increase had only been 8 1-3 per cent. The Company met this issue, and maintained that not only should an increase not be granted, but that the present scale of wages was excessive under the conditions, and that the old Slocan scale, which prevailed prior to June 1st, should be restored.

On that dispute we then proceeded on the 19th and 20th days of October to take evidence at Moyie, and then dealt principally with the prices of commodities and the cost of living at the present time as compared with the period from 1900 to 1904. On the 20th, we adjourned until the 27th of October, when we again sat at Moyie and proceeded with taking further evidence on the cost of living, the wages paid other mining camps, and the conditions of labour at Moyie itself. That session lasted until the 30th day of October, and the evidence produced before us covered a very wide field on the cost of living now as compared with the cost of living in prior years since 1900, on the increase of wages since 1900 in other lines of industry, and on the scales of wages paid in other mining camps in North America. Evidence was adduced showing the cost of living in a great number of other mining camps working under the same conditions, and also as to the scale of wages paid in each

mining camp in British Columbia, in the Yukon and Alaska, and in all the various important mining camps of the United States, including Michigan, Utah, Montana, Idaho, Colorado and California.

On the 20th day of October, our sittings at Moyie were adjourned to Nelson, to take further evidence from the Slocan and Boundary countries. The Boundary scale being that demanded by the men, and the Slocan scale being the old rate paid, it was deemed necessary to inquire into the conditions on which those scales were based. Owing to certain business engagements of one of the members of the Board, and owing to an affliction in the family of another member, the sitting at Nelson was delayed until the 29th day of November. The men then requested a further adjournment, owing to the absence of Mr. Mills, who had been their leading representative in presenting their case to the Board. On the consent of all parties, that adjournment was granted, and while the Board desired to expedite matters, they did not feel that they could proceed in the face of the men's statement that to do so, in the absence of Mr. Mills, would prejudice their case. A further adjournment was then taken until the 19th day of December, when the Board again sat at Nelson and completed their work of taking evidence on the points which were referred to our session at Nelson.

Since we have undertaken the settlement of the particular dispute submitted to us, it has been made to appear by all parties to the dispute that we are expected to fix a scale of wages that would apply to practically all the mining districts of Kootenay and Yale, and to that end the miners adduced evidence from all parts of those districts; the Company followed the same course, and in addition, pressed upon us the fact that they were operating a large mine in the Boundary district, two large mines in Rossland, a smelter at Trail, in addition to the St. Eugene at Moyie, all of which would be affected by our findings. Recognizing this turn in the arbitration proceedings, and the evident benefit to all persons in such districts if some such broader disposition of the matter of wage scale was

included in our determinations, we have concluded that our first duty was to establish a fair wage scale, applicable to the districts named, including the particular mine interested, namely, the St. Eugene at Moyie. But we also deem it necessary, in view of existing abnormally unfavourable operating conditions, and the late abnormally favourable operating conditions that have prevailed, that we should provide a recommended scale to be acted upon under such normal conditions; hence we have determined that the scale named below as the "Recommended Fair Wage scale for normally favourable conditions" is the scale that all mines, including the one particularly affected by these proceedings, should pay under all normally favourable conditions. But as we find that present operating conditions are abnormally unfavourable, we recommend that the scale provided below and entitled "Recommended wage scale for abnormally unfavourable operating conditions" should be now adopted and continued whilst such conditions prevail, and should the industry, either as to lead, silver-lead, copper, copper-gold, and the like mines, again pass to abnormally favourable operating conditions, then any such class of the industry so abnormally favourably affected should at once adopt the scale provided below entitled "Recommended wage scale for abnormally favourable conditions."

We find that the present most pronounced conditions affecting the lead and silver-lead mines, entitling them to be considered as operating under abnormally unfavourable conditions, are:—

- (a) The panic conditions of the metal market.
- (b) The difficulties found in marketing the metal products.
- (c) The loss sustained continuously of late by lead declining after the ore is received by the smelters, in which case the bounty (payable only on the value of the lead contained in the ore at the time of receipt by the smelter) does not relieve against the loss thus sustained.
- (d) The abnormally low price of the silver contents of the ore.

We find also that the copper mines affected are operating at present under abnormally unfavourable conditions, for the following most pronounced reasons:—

- (a) Because of conditions similar to those given above in respect of the lead and silver-lead mines.
- (b) The present abnormally low price of copper.

We find also that abnormally favourable operating conditions in lead and silver-lead mines arise when silver is quoted for thirty days on the metal market at sixty-two cents and over, and lead is quoted for thirty days at nineteen pounds per long ton and over. And in copper or copper-gold mines and the like, as far as evidence has been adduced before us, we suggest that abnormally favourable conditions are experienced when copper is quoted on the metal market for thirty days at eighteen cents and over per pound.

We, therefore, while strongly recommending the adoption of the scale provided and entitled "Recommended wage scale for abnormally unfavourable conditions" until such conditions can be said to be normally favourable, have determined that the following scales are under the several conditions set out, right and proper, and should be followed as those conditions rise.

## WAGE SCHEDULE.

Employment.	Recommended Fair Wage Scale for Normally Favourable conditions.	Recommended Wage Scale for Abnormally Unfavourable Operating Conditions.	Recommended Wage Scale for Abnormally Favourable Operating Conditions.
Shaftmen.....	4.25	4.00	4.50
Machinemen including machine-men in raises above 40 ft.....	3.75	3.50	4.00
Hammersmen.....	3.65	3.40	3.90
Blasters.....	4.25	4.00	4.50
Powdermen.....	3.50	3.25	3.75
Timbermen.....	3.75	3.50	4.00
Timber Framers.....	3.75	3.50	4.00
Timbermen Helpers.....	3.25	3.00	3.50
Pumpmen.....	3.75	3.50	4.00
Pipemen, underground or on surface.....	3.50	3.25	3.75
Trackmen.....	3.75	3.50	4.00
Trackmen Helpers.....	3.50	3.25	3.75
Nippers.....	3.25	3.00	3.50
Muckers and Carmen.....	3.25	3.00	3.50

*Board of Conciliation and Investigation.*

## II.—AGREEMENT EFFECTED BETWEEN THE CANADA WEST COAL AND COKE COMPANY AND ITS EMPLOYEES:

ON Dec. 26 the Department received the findings of the Board of Conciliation and Investigation established for the adjustment of the differences between the Canada West Coal and Coke Company and its employees. The findings were signed by all the members of the Board and were accepted by the parties

to the dispute as a settlement of the differences referred for adjustment.

The Board consisted of the following gentlemen, viz: Mr. Frank H. Sherman, Taber, Alta., recommended by the employees; Mr. S. A. Jones, Taber, Alta., recommended by the employing company and the Honourable Mr. Justice Stuart,

named and appointed by the Minister, the foregoing members having been unable to agree on a general recommendation. The differences related to wages, hours and conditions of labour, a schedule setting forth the demands of the men being submitted. The demands included full recognition of the union, which was a local branch, No. 1,959 of the United Mine Workers of America, the check-off system, eight hours from bank to bank, a minimum daily wage of \$3 to miners, weekly payment of wages etc. The number of men affected was estimated at 150, besides a number of persons using domestic coal on the prairies. The meetings of the Board were held on Dec. 5 and 6, and an agreement was signed on the evening of the second day.

#### Report of Board.

The text of the report of the Board and of the agreement effected is as follows, viz:—

In the Matter of the Industrial Disputes Investigation Act, 1907.

Between the Canada West Coal & Coke Company employers and their employees members of Local Union No. 1,959 of the United Mine Workers of America, employees.

Thursday, Dec. 5th, 1907.

Meeting of Board of Conciliation and Investigation constituted by order of Nov. 20, 1907.

Present Chas. A. Stuart, Chairman; Frank H. Sherman, S. A. Jones.

The members of the Board took the oath of office as prescribed by section 13 of the Act before S. J. Layton, J. P.

Mr. J. H. Taylor and Mr. V. S. Kidd appeared representing the employers.

Messrs. Galvin, Donnell, and Doodson appeared representing the employees.

Before hearing evidence a conference was held informally in order to endeavor to arrive at a basis of settlement. The Board assisted at this conference which, continued all day and until 7.30 p. m., including a personal inspection of the mine lasting three hours in the afternoon.

Friday, Dec. 6th.

The conference continued at 9.30 a. m., the Board still assisting. At 11.30 an agreement was practically arrived at and dictated to a stenographer, and five copies struck off. During the afternoon this was submitted to a committee of the men. The conference resumed at 7.30 p. m. and after some further discussion of details the agreement, of which a copy is hereto annexed, was signed on behalf of the parties.

(Sgd.) CHAS. A. STUART.  
*Chairman.*  
F. H. SHERMAN.  
S. A. JONES.

#### Agreement.

It is hereby agreed between the Canada West Coal Company, Ltd., of the first part, and employees of the said Company, as represented by the United Mine Workers of America, District No. 18, of the second part:—

That the agreement existing prior to December 9th, 1907, respecting general provisions and scales of contract prices and wages, shall govern the parties hereto for the period commencing December 9th, 1907, and ending March 31st, 1909, in so far as the same may not be modified or affected by the provisions of this agreement; it being understood and agreed that the parties hereto will meet in conference sixty days prior to the expiration of this agreement to discuss a renewal thereof.

This agreement covers the mines and outside plant operated by the said Company, and all persons accepting employment at these mines agree to be governed by the following rules and regulations:

#### SETTLEMENT OF LOCAL AND GENERAL DISPUTES.

(a) In case any disputes or grievances arise under this agreement or any local agreement made in connection therewith, whether the dispute or grievance is claimed to have arisen by the Company or any person or persons employed, or by the men as a whole, then the parties

shall endeavour to settle the matter as hereinafter provided. But before any grievances shall be submitted to the Pit Committee, the person or persons affected shall endeavor, by personal application to the Pit Boss, to settle the matter, and in the event of them agreeing, their decision shall be final.

(b) In case of any local dispute arising in any mine, and failure to agree between the Pit Boss and any employee, the Pit Committee and Mine Superintendent shall endeavour to settle the matter, and if they agree, their decision shall be final.

(c) In the event of the failure of the Pit Committee and the Mine Superintendent to settle any dispute so referred to them, as well as in the event of any other dispute arising, the matter in dispute shall be referred to the General Superintendent or General Manager of the Company and the Officers of District No. 18, U. M. W. of A., for settlement, and if they agree their decision shall be final. Should they fail to agree, it shall be referred to a Joint Committee, said Committee to be made up of three operators appointed by the Canada West Coal Company, Ltd., and three miners appointed by District No. 18 of the U. M. W. of A., for settlement. If they agree their decision shall be binding upon both parties. A majority of the full Committee must vote in favor of any action before it can be declared carried. In the event of a failure to agree, the Committee shall endeavour to select an independent chairman, and failing to agree upon an independent chairman, the Minister of Labour shall be asked to appoint such chairman; the decision of the Committee thus constituted shall be binding upon both parties. The Joint Committee, when necessary shall meet on the second Monday of each month.

(d) In the meantime, and in all cases, while disputes are being investigated and settled, the miners, mine labourers and all other parties involved must continue to work pending investigation and until final decision has been reached, but where miner, miners, mine labourer or mine labourers has or have been discharged by the Company, he or they shall

not remain in the employ of the Company while his or their case is being investigated and settled. If a claim be made within five days where a man or men has or have been unjustly discharged, the case shall be dealt with according to this article, and if it is proven that he or they have been unjustly dealt with, he or they shall be reinstated. If claim is made for compensation for time lost, in cases where reinstatement has followed, it shall be left to the Joint Committee to decide what amount, if any, is to be paid.

(e) Any breach of this agreement by any of the parties hereto is not to void the said agreement, but same is to continue in full force and effect. It is not intended, however, by this subsection to abridge the right of the men to suspend work after final settlement as herein provided, if any operator or operators refuse to be bound by any decision given against them under this article.

ART. No. 2. No miner working at contract work on coal shall be allowed to hire labourers.

ART. No. 3. The Company gives the U.M.W. of A. a full recognition, and concedes to the check-off system; that is to say, upon the individual request in writing of any of the Company's employees, the Company shall deduct such monies from their wages as is designated for dues, assessments, fines and initiation fees; in other words, the Company will retain from wages due employees any sum they may have given upon the Company for, in writing, payable to such officers of the U. M. W. of A. as may be designated in such orders.

ART. No. 4. The Company will furnish screened coal to their workmen at \$2.50 per ton, within a radius of one mile from the mine. Beyond this radius haulage to be charged.

ART. No. 5. The Company will deliver all timbers as near the working face as possible.

ART. No. 6. The hours of labor are to remain as at present.

ART. No. 7. The Company will furnish duplicate statements to all workmen and will pay by cheque semi-monthly.

ART. No. 8. The Company will make deductions from all contract miners for wages of check-weighers.

ART. No. 9. The employees will have the right to make their own doctor and hospital arrangements, the Company agreeing to make the usual deductions for same, the majority rule to rule in all cases of selection of doctor.

SCHEDULE "A".

Commencing December 9th, 1907, the following schedule of wages will be paid at the Canada West Coal Company's Mines located at Taber, Alberta:—

Pillars in pick-driven rooms . . .	\$.90 per ton,	2,240 lbs.
Pick work in rooms . . . . .	.90 "	2,240 "
Pillars in machine rooms . . . . .	.80 "	2,240 "
Pillars of 12 ft. up to 20 ft. . . . .	.90 "	2,240 "
Machine cutting in rooms by Punching machines . . . . .	.30 "	2,240 "
Loading after machines in rooms . . . . .	.50 "	2,240 "

Entry work and narrow work between pillars of entries and necks of rooms to be paid at the rate of \$1.25 per ton of 2,240 pounds, to be divided as follows: For loaders 82½ cts., and 42½ cts. for machine men. It is fully understood that this price does not apply to cross-cuts in rooms and that the mining is to be done under the coal no less than 9 inches in thickness. This price applies to punching machines only.

Electric machine runners, \$3.50 per shift of 8 hours at the face.

Electric machine scrapers, \$3.00 per shift of 8 hours at the face.

The Company will pay the sum of \$3.00 per shift to all miners taken from contract to Company work.

All other wages to remain as in old contract.

All other day work not included in old contract to be district rates.

Signed, sealed and delivered in triplicate, this sixth day of December, 1907, on behalf of the Canada West Coal Company, Limited, and the United Mine Workers of America, District No. 18.

III.—AGREEMENTS EFFECTED IN TWO OTHER COAL MINING DISPUTES AT TABER, ALTA.

ON Dec 28, the Department received a joint report from the Boards of Conciliation and Investigation respectively established for the adjustment of differences between the Domestic Coal Co., Taber, Alta., and its employees, and between Duggan, Huntrods and Co., of Taber, Alta., and their employees, an agreement on all points of difference being reported in each case. The Board established in the case of the dispute between the Domestic Coal Co., and its employees was composed of F. H. Sherman, Taber, Alta., recommended by the employees; Robert G. Duggan, Taber, Alta., recommended by the employing com-

pany and the Honourable Mr. Justice Stuart, Calgary, Alta., appointed by the Minister, in the absence of a joint recommendation from the foregoing members of the Board. The Board established in the case of the disputes between Messrs Duggan Huntrods & Co., and their employees was identical with that established in the case of the Domestic Coal Company save that Mr. J. Short-house was appointed to the former Board on the recommendation of the employing Company. The chairman was appointed by the Minister in the absence of a joint recommendation from the other members of the Board. The differences in the case of the

two companies were practically identical being similar to those indicated in the report above printed relating to the Canada West Coal & Coke Co., and were considered together, the two Boards sitting jointly on Dec. 5, 6, and 7. The number of employees concerned in the case of the Domestic Coal Company was estimated at 50 and in the case of Messrs. Duggan Huntrods & Co., at 40. The text of the report and agreement with respect to the two disputes is as follows:

In the Matter of the Industrial Disputes Investigation Act

Between The Domestic Coal Co., employers and their employees, members of Local Union 102 of the United Mine Workers of America.

Thursday, Dec. 5, 1907.

Meeting of the Board of Conciliation and Investigation constituted by order of Nov. 20, 1907.

*Present*—Charles A. Stuart (Chairman), Frank H. Sherman and Robert G. Duggan.

The members of the Board took the oath of office as prescribed by Sec. 13 of the Act.

Mr. Bullock appeared on behalf of the employers. Messrs. Calvin, Donnell and Doodson appeared for the employees.

The meeting was adjourned until Friday, 6th inst., at 2 p.m. to enable the Board in the case of the Canada West Coal Co., Ltd., to meet.

Friday Dec. 6, 2 p.m.

The Board resumed and the questions involved in this case were considered concurrently with the questions involved in the case of The Duggan, Huntrods Co., the two Boards sitting jointly. The discussion continued and statements made by various witnesses were heard until 6 p.m. when the Board adjourned till 8.30 p.m.

3.30 p.m.

The sittings of the Board were delayed until 9.30, pending the final signing of the agreement in the case of The Canada West Coal and Coke Co., Ltd. At 9.30 the discussion of these cases was resumed and continued until 11 p.m., when the

sitting was adjourned until 9.30 next morning.

Saturday Dec. 7th, 9.30 a.m.

The sittings of the two Boards were resumed, and continued until 11.30, when the Boards adjourned till 1.30 p.m. At 1.30 the discussion continued until 7 o'clock p.m. when an agreement was practically arrived at. The agreement was then typewritten and executed on behalf of the parties. A copy is hereto annexed.

(Sgd.) CHAS. A. STUART,  
*Chairman.*

F. H. SHERMAN  
R. C. DUGGAN.

Taber, Alta., Dec. 7, 1907.

In the Matter of the Industrial Disputes Investigation Act, 1907, and of a dispute

Between Duggan-Huntrods Co., employers, and their employees, members of Local Union No. 102 of the United Mine Workers of America.

Thursday, Dec. 5, 1906.

Meeting of the Board of Conciliation and Investigation constituted by order of Nov. 20, 1907.

*Present*—Charles A. Stuart, (Chairman), Frank H. Sherman and J. Shorthouse.

The members of the Board took the oath of office as prescribed by Section 13 of the Act.

Mr. Duggan and Mr. Huntrods appeared on behalf of the employers and Messrs. Galvin, Doodson and Donnell appeared for their employees.

The same proceedings were taken in every respect as in the case of the Domestic Coal Co. and their employees, the two Boards sitting simultaneously and hearing discussion as in that case. The joint agreement was eventually arrived at, as will appear from the report in that case.

(Sgd.) CHAS. A. STUART,  
*Chairman.*

F. H. SHERMAN,  
JOS. SHORTHOUSE.

Taber, Alta., Dec. 7, 1907.

**Agreement.**

Agreement made this 7th day of December A.D. 1907, between the Domestic Coal Co., of Taber, Alta., of the first part, the Duggan Huntrods and Company of the second part and the employees of the said companies as represented by the U.M.W. of A., dist. No. 18 of the third part.

The agreement entered into on the 6th day of Dec. 1907. between the Canada West Coal Co., Limited and their employees as represented by the U.M.W. of A., Dist. No. 18 shall, *mutatis mutandis* except in so far as changed or modified by this agreement apply to and be binding upon the parties hereto respectively.

The Companies will furnish duplicate statements to all workmen and will pay semi-monthly in the same manner as at present.

Commencing Dec. the 9th, 1907, the following schedule of wages will be paid at the Duggan Huntrods & Co's and the Domestic Coal Company's mines located at Taber, Alta.

**CONTRACT RATES**

Pick mined coal 90 cts, per ton of 2240 lbs., run of mine.

Forked coal \$1.05 per ton of 2000 lbs.

Yardage Entries and Narrow work \$1.00 per lin. yd.

Room necks and widening out rooms 9 ft. \$4.00, and 12 ft. \$5.00.

Brushing 10 cts, per inc. per lin. yd. or on company's time at Dist. rates for Rock miners. Miners to do the stowing and furnish explosives. Stowing over 100 yards from working face to be paid extra.

**CLOD SCALE.**

The clod to be removed by the miners for nothing for the first four inches; for

5 inches 12½ cts. per lin. yd. and 5 cts. for each additional inch. Clod in entries and narrow work is to be paid for as brushing. In rooms the width of the rooms. It is understood that rooms are to be 16 feet wide. Rooms ordered to exceed 16 feet to be paid extra in proportion.

All other wages to remain as in old contract.

All other daywork not included in old contract to be paid dist. rates.

All water in the mines to be removed by the companies.

Signed, sealed and delivered in triplicate this 7th day of December 1907.

#### IV—AGREEMENTS EFFECTED IN COAL MINING DISPUTES AT STRATHCONA, ALTA.

ON December 28, the Department received the report of the Board of Conciliation and Investigation established for the adjustment of differences between the Strathcona Coal Co., Ltd., of Strathcona, Alta., and certain of its employees. This report was unanimous in character, and included the text of the agreement on all points of difference between the parties concerned. The differences referred for investigation were demands on the part of the employees as follows, viz.: A change in the hours of labour, requiring an eight-hour day from bank to bank; a change in wages requiring weekly pay by legal tender, and a change generally of the conditions surrounding the working in and about the mine, and recognition of the United Mine Workers of America. The number of employees concerned was estimated at forty. The Board, which was fully constituted on December 2, consisted of Frank H. Sherman, Taber, Alta., recommended by the employees; F. L. Otter, Edmonton, Alta., recommended by the employing company, and George Montgomery, Edmonton, Alta., appointed by the Minister on the recommendation of the foregoing members. The Board met at Edmonton on December 18, 19 and 20, and an agreement was arrived at on all points in dispute, effective from December 23, 1907, until March 31, 1909. The agreement involved "an 8-hour working day at face or place of working; semi-monthly payment of wages by cheque; supply of screened coal by the company to its workmen at \$3.25 per ton within Strathcona city limits, and full recognition of the United Mine Workers of America, with the adoption of the check-off system, and an arrangement for the settlement of local and general disputes."

In a covering letter to the Minister, accompanying the report of the Board, and dated Dec. 23, the chairman of the Board, Mr. Geo. S. Montgomery, states:—

"Whilst the Board was not called upon to investigate fully the matters between these parties, there is no question but that the mere fact of the Board having been

appointed by the Government, and being in session, had the effect of bringing about a reconciliation and a compromise between these parties. It is the unanimous opinion of the Board that the law is successful."

The text of the report of the Board and of the agreement effected is as follows:

#### Report.

The Board of Conciliation and Investigation of the Strathcona Coal Company, Limited, was duly organized on the 18th day of December, 1907, A. D., at the offices of the Universal Coal Company, 2nd Street, Edmonton, Alta., and the qualifications and oaths of office were duly taken by the following gentlemen, who comprised the Board, viz., Mr. G. S. Montgomery, chairman; Messrs. Francis L. Otter and F. H. Sherman, members.

The complaints of the employees of the Strathcona Coal Company, Limited, were received and were filed with the Board. The parties in dispute were notified that in accordance with the provision and requirements of the law, the Board was duly constituted and established with all necessary power to investigate their complaints, and for the settlement of their differences as far as practicable in an amicable and conciliatory manner.

The statement of the claims of the Strathcona Coal Company, Limited, were also received and were duly filed with the Board; the documents in question were left in the care of the Secretary of the Board. Mr. Frank Smith, the manager of the Strathcona Coal Company, Limited, and Mr. J. R. Galvin, vice-president District No. 18, U. M. W. of A., met the members of the Board at the above offices on the afternoon of the 18th inst., and requested an informal sitting of the Board as its third member, Mr. F. H. Sherman, was unavoidably absent. They then reported that they had been able to arrange their differences, and a copy of the contracts as drawn out between them was produced and was informally read through, and it was considered most

satisfactory to lay before the Board at its meeting on the ensuing day.

On the Board re-assembling on the 19th instant, Mr. J. R. Galvin, the Vice-President District No. 18, U. M. W. of A., gave a resume of the reasons why the Board had been organized, and was satisfied with the progress which had been made, while claiming he had not succeeded in getting all for the workers he could wish, yet matters had been arranged in such a way as would tend for the peace and harmony of all parties concerned. Mr. J. R. Galvin then made a request that the Managing Director of the Strathcona Coal Mine, Limited, (Mr. Ross) be asked to attend on the Board, that the contracts might be signed in their presence in an official manner. This request met with the approval of the Board, and the meeting stood adjourned till 4 p. m., when Mr. Ross attended the Board meeting, and after a short discussion between him and some members of the Board on the length the contracts should run, the contracts were duly signed in the presence of the Chairman of the Board by Mr. Ross, which was considered very satisfactory, and the contracts as signed by the parties are attached hereto.

(Sgd.) GEO. S. MONTGOMERY,  
*Chairman.*

(Sgd.) F. H. SHERMAN,

(Sgd.) FRANCIS L. OTTER.

#### Agreement.

It is hereby agreed between the Strathcona Coal Company, Ltd., of the first part, and the employees of the said Company, as represented by the United Mine Workers of America, District No. 18, of the second part:

That the agreement respecting general provisions and scales of contract prices and wages shall be governed by the Union scale now prevailing in sub-district No. 4 of District 18, insofar as the same may not be modified or affected by the provisions of this agreement; it being understood and agreed that the parties hereto will meet in conference sixty days prior to the expiration of this agreement to discuss a renewal thereof.

This agreement covers the mines and outside plant operated by the said Company, and all persons accepting employment at these mines agree to be governed by the following rules and regulations:—

#### Settlement of local and General Disputes.

(a) In case any disputes or grievances arise under this agreement, or any local agreement made in connection therewith, whether the dispute or grievance is claimed to have arisen by the Company or by person or persons employed, or by the men as a whole, then the parties shall endeavour to settle the matter as hereinafter provided. But before any grievances shall be submitted to the Pit Committee, the person or persons affected shall endeavour, by personal application to the Pit Boss, to settle the matter, and in the event of them agreeing, their decision shall be final.

(b) In case of any local dispute arising in any mine, and failure to agree between the Pit Boss and any employee, the Pit Committee and Mine Superintendent shall endeavour to settle the matter, and if they agree, their decision shall be final.

(c) In the event of the failure of the Pit Committee and the Mine Superintendent to settle the dispute referred to them, as well as in the event of any other dispute arising, the matter in dispute shall be referred to the General Superintendent or General Manager of the Company and the officers of District No. 18, U. M. W. of A., for settlement, and if they agree, their decision shall be final. Should they fail to agree, it shall be referred to the Joint Committee, said Committee to be made up of three operators appointed by the Strathcona Coal Company, Limited, and three miners appointed by District No. 18 of the U. M. W. of A., for settlement. If they agree, their decision shall be binding upon both parties. A majority of the full Committee must vote in favour of any action before it can be declared carried. In the event of a failure to agree, the Committee shall endeavour to select an independent chairman, and failing to agree upon an independent chairman, the Minister of Labour

shall be asked to appoint such chairman; the decision of the Committee thus constituted shall be binding upon both parties. The Joint Committee, when necessary, shall meet on the second Monday of each month.

(d) In the meantime, and in all cases, while disputes are being investigated and settled, the miners, mine labourers and all other parties involved must continue to work pending investigation, and until final decision has been reached; but where miner, miners, mine labourer or mine labourers has or have been discharged by the Company, he or they shall not remain in the employ of the Company while his or their case is being investigated or settled. If a claim be made within five days where a man or men has or have been unjustly discharged, the case shall be dealt with according to this article, and if it is proven that he or they have been unjustly dealt with, he or they shall be reinstated. If claim is made for compensation for time lost, in cases where reinstatement has followed, it shall be left to the Joint Committee to decide what amount, if any, is to be paid. Any costs, it was settled upon, should be decided by the Board.

(e) Any breach of this agreement, by any of the parties hereto, is not to void the said agreement, but same is to continue in full force and effect. It is not intended, however, by this subsection to abridge the right of the men to suspend work after final settlement as herein provided, if any operator or operators refuse to be bound by any decision given against them under this article.

ART. No. 2. No miner working at contract work on coal shall be allowed to hire labourers.

ART. No. 3. The Company gives the U. M. W. of A. a full recognition, and concedes to the check-off system; that is to say, upon the individual request in writing of any of the Company's employees, the Company shall deduct such monies from their wages as is designated for dues, assessments, fines and initiation fees; in other words, the Company will retain from wages due employees any sum they may have given orders upon the

Company for, in writing, payable to such officers of the U. M. W. of A. as may be designated in such orders.

ART. No. 4. The Company shall furnish screened coal to their workmen at \$3.25 per ton, in Strathcona city limits.

ART. No. 5.—The Company attends to timber, water and track.

ART. No. 6. The hours of labour are to be 8 hours working day at face or place of working. It is understood that nothing herein shall be held to afford any ground against the enactment of legislation respecting hours of labour in the Province of Alberta.

ART. No. 7. The Company shall pay semi-monthly by cheque.

ART. No. 8. The Company shall make deductions from all contract miners for wages of check weighers.

ART. No. 9. The employees will have the right to make their own doctor and hospital arrangements, the Company agreeing to make the usual deductions for same, the majority rule to rule in all cases of selection of doctors.

The coal mined and delivered at the cage to be 33 1-3 cents per car. This is at the rate of 30 cents per car and 3 1-3 cents per car for pushing.

For turning and opening out room from entries is \$3.00.

All narrow work 8 feet and under, 50 cents per lineal yard and coal.

This contract goes into effect on Monday, 23 December, A. D. 1907, and continues until March 31st, 1909, provided, if the Strathcona Coal Company, Limited, sell the mine, this contract will cease and terminate.

**V.—FINDINGS OF BOARD ESTABLISHED TO ADJUST DIFFERENCES  
BETWEEN CANADIAN PACIFIC RAILWAY COMPANY AND ITS  
WESTERN CARMEN.**

THE Department received on Dec. 23 the report of the Board established for the adjustment of differences between the Canadian Pacific Railway Co. and its western carmen. The report was unanimous so far as its recommendations were concerned, but set forth in addition the respective views of certain members of the Board. The Department had not at the close of the month been informed whether the recommendations are acceptable to the parties to the dispute.

The members of the Board in question were J. H. McVeity, Vancouver, B. C., recommended by the employees; A. M. Nanton, Winnipeg, Man., recommended by the company and Prof. E. Odlum, Vancouver, Chairman, appointed on the joint recommendation of the foregoing members. An application for a Board was received in the Department on Nov. 22, signed by Mr. Wm. Cross, assistant to the 2nd Vice-President, on behalf of the Canadian Pacific Railway Company, and the Board was fully constituted on Nov. 26. The number of men affected was estimated at 1,215, of whom 15 were stated to be under the age of 21 years. The differences related to certain demands made by the employees, viz., (1) for a reduction in the number of working hours from ten to nine hours; (2) for an advance of pay to compensate for such reduction in the working hours, which represented, according to the application, advances of wages varying from eleven to twenty per cent. The railway company took exception to both these demands. A further subject of difference was indicated as follows: The company and the carmen desire the Board to inquire into and make recommendations concerning the pipefitters in connection with the carmen. The Board met at Winnipeg on Dec. 2 and held its final session on Dec. 19, meeting daily on all week days in the interim. During the course of the pro-

ceedings several witnesses were heard, including Messrs J. Hillis, of Winnipeg; L. L. Hannah, of North Vancouver, B.C.; D. M. O'Dwyer, of Vancouver B. C., and Frank McKenna, of Cranbrook, B. C., who were called as experts

The Board in its findings recommended a 9 hour day for carmen excepting relay men and that the rate of wages per hour for all carmen shall remain as at present. No change was recommended in the relations of pipefitters to carmen. The change of hours to plumbers in force from January 1, 1908 to July 1, 1908.

**Text of Report of Board.**

The text of the report of the Board is as follows:—

To the Honourable  
The Minister of Labour,  
Ottawa, Ont.

Honourable Sir,

In the matter of dispute between the Canadian Pacific Railway Company and the Railway Carmen employed on its Western Lines, submitted on the 26th day of November, 1907, by the Department of Labour to the Board of Conciliation and Investigation, consisting of Mr. A. M. Nanton, of Winnipeg, Man., Mr. J. H. McVeity of Vancouver, B. C., and Professor E. Odlum, Chairman, of Vancouver, B. C., the said Board begs to report that the majority of the Board award as follows:—

RE HOURS.

(a) That all Carmen, excepting the relay men, as at present defined, shall work on the nine hour basis.

(b) The hours shall be from 7 o 17K, with one hour off for dinner, from 12 to 13K, excepting from April 1st to October 1st, when the hours will be from 7 to 17.30 K, the first five days of the week, with one hour off for dinner between 12 and 13K., and 7 to 12K, on Saturdays.

## RE WAGES.

(c) The rate of wages per hour shall remain as at present for all carmen.

## RE TIME

(d) This change shall take place on the first day of January, 1908, and shall remain in force at least until the 1st day of July, 1908.

(e) Concerning the relation of the pipe-fitters to the carmen, the Board has not heard sufficient reason for recommending a change.

## EXPLANATORY NOTE.

Notwithstanding the fact that Mr. Nanton and Mr. McVeity hold the following opposing views, they have agreed to the above report.

Mr. Nanton holds that the decision of the Board should be:

(1) That the hours of work for carmen working in all shops should be on the nine-hour basis, as set out in section "b" above mentioned.

(2) That carmen working as car inspectors, car repairers, car oilers, air-brake testers, car cleaners, icemen, car heatingmen, lampmen and others who work on running and repair tracks, the working hours should be from 7 to 18K, six days of the week, with one hour off for dinner from 12 to 13K.

(3) That carmen working as relay men, as at present defined, the hours should be from 7 to 19K for day work, daily, with one hour off for dinner between 12 and 13K, and from 19 to 7K

for night work, with one hour off for dinner between 24K and 1K.

(4) Overtime, after above hours, for all carmen should be paid on the basis provided in present schedule.

(5) The rate of wages per hour for all carmen should remain as at present.

(6) The changes above recommended should commence on the 1st of January, 1908, and remain in force at least until the 31st December, 1908.

On the other hand Mr. McVeity holds the following views:—

(1) That all carmen should have their hours shortened as set forth under "b" in the above report, excepting for the relay men, who should be worked on an eight hour shift.

(2) That the rate of wages per hour should be increased so that the men would earn as much in nine hours as they now do in ten hours.

(3) That the change should come into effect from November 1st, 1907, and continue until January 1st, 1908.

(4) That the pipe-fitters should be divided; the car pipe-fitters remaining on the carmen's schedule, and a new schedule issued covering the balance of the pipe-fitters.

Signed by all members of the Board in accordance with the above, at Winnipeg, this 19th day of December, 1907.

(Sgd.) A. M. NANTON.  
 JAS. H. McVEITY.  
 E. ODLUM.  
*Chairman.*

## VI.—BOARD ESTABLISHED TO DEAL WITH DISPUTE AT COBALT.

ON December 8, the Department received an application for the establishment of a Board of Conciliation and Investigation for the adjustment of differences between the McKinley-Darragh Mining Company, Ltd., of Cobalt, Ont., and certain of its employees, miners, engineers, surfacemen, etc., members of Cobalt Miners' Union No. 146, Western Federation of Miners, Mining Department of Industrial Workers of the World. The

differences to be referred for adjustment related to the wage question. The McKinley-Darragh Mining Company, Ltd., had, it was stated, posted a schedule on November 15, 1907, to take effect from December 15, 1907, which would mean a reduction on an average of 25 cents per day all round, and an increase of one hour in work all round. The members of the Union affected by the change demanded that the wage schedule in force

at the time the notices of change were posted, should be continued, and a copy of such wage schedule was submitted with the application. The application was signed on behalf of the employees concerned by James McGuire, president, and Arthur Lionel Botly, financial secretary of the Cobalt Miners' Union. The number of employees concerned in the dispute was estimated at 120.

The Board demanded was duly estab-

lished, being constituted as follows:—viz., John A. Welch, Cobalt, Ont., recommended by the employees; E. C. Kingswell, Haileybury, Ont., recommended by the employing Company; and Professor Adam Shortt, Kingston, chairman, recommended by the foregoing members. Prof. Shortt's appointment was dated December 21, and it was understood that the investigation before the Board would begin on January 1, 1908.

#### VII.—DIFFERENCES BETWEEN C. N. R. AND CERTAIN OF ITS EMPLOYEES REFERRED UNDER THE ACT.

ON December 19, the Department received an application for the establishment of a Board of Conciliation and Investigation for the adjustment of differences between the Canadian Northern Railway and certain of its employees, enginemen, firemen and hostlers, being members of the Brotherhood of Locomotive Firemen and Enginemen.

The differences to be referred were stated to be, first, the discrimination alleged to be employed in the engine services of the employing company; second, the alleged setting aside by the employing company against the wishes of the Brotherhood of Locomotive Firemen and Enginemen, of a general schedule said to have been made between the Brotherhood of Locomotive Engineers and the Brotherhood of Locomotive Firemen and

Enginemen on the one hand, and the officials of the Company on the other, and put into effect on June 1st, 1907. The number of employees concerned in the dispute was estimated at 359. The establishment of the Board was duly proceeded with, Mr. J. G. O'Donoghue, Toronto, being appointed on the recommendation of the employees, and Mr. Frederick Hunter Richardson, Toronto, on the recommendation of the employing company. The last of these appointments was dated December 27, and the Department had not, at the end of the month, received a recommendation with regard to a third member of the Board.\*

\*Early in January Prof. Adam Shortt was appointed chairman of the Board, Messrs. Richardson and O'Donoghue having been unable to make a joint recommendation.

#### VIII.—APPLICATIONS RELATING TO DISPUTES NOT EXPRESSLY INCLUDED UNDER THE ACT.

THE Department received three applications during the month relating to disputes of a nature not expressly included under the Industrial Disputes Investigation Act, 1907. These were on behalf respectively of the Association Internationale des Ouvriers en Fourrures, Montreal, Local No. 12; the employees of the Thomas Davidson Manufacturing Company of Montreal, and the employees of the Eastern Townships Manufacturing Company of St. Hyacinthe, Que. In each of these three cases, the Industrial Disputes Investigation

Act, 1907, was applicable only under section 63, and required the consent of the two parties concerned in the respective disputes.

In the case of the first named of these differences, sixteen several fur-working establishments of Montreal were indicated as being concerned, and the employees affected were estimated at from 1,000 to 1,200. The dispute was said to relate to efforts on the part of the Union to effect an agreement between the employing companies and their employees with respect to wages and general conditions

of labour. The Department corresponded with the various firms, and found none of the firms named desirous of having the differences in question referred under the Act.

In the case of the dispute between the Thomas Davidson Manufacturing Company and its employees, the latter were estimated at 300, and the differences concerned an alleged reduction of wages by ten per cent in force from the beginning of November, and various conditions of labour. The employing Company did not accept the proposition to refer the differences under the Act.

In the case of the Eastern Townships Manufacturing Company of St. Hyacinthe, Que., it was stated on behalf of the employees that a strike had been in existence since November 13; the nature of the difference was not indicated. About 100 hands were concerned. The Department communicated with the firm named, and was informed that it was not desirous of referring the differences with its employees to a Board established under the Act.

Under the circumstances, there were no further proceedings under the Act in any of the three cases indicated.

#### IX—QUESTION AS TO INTERPRETATION OF AGREEMENT AFFECTED BETWEEN THE C. P. R. CO. AND ITS RAILROAD TELEGRAPHERS.

IN the application of the agreement effected by a Board of Conciliation and Investigation on October 10, between the Canadian Pacific Railway Company and its railroad telegraphers, a difference of opinion arose between the representatives of the Company and those of the employees on various points, viz. (1) Whether in the case of increase granted by the Company in individual cases since the schedule of 1905 came into effect, such increases should be accepted by the employees as part of the 14 per cent increase agreed on as one of the terms of settlement; (2) whether in the case of article 15, referring to the conditions under which Sunday labour is to be performed by telegraphers; (3) what is the number of hours, having reference to article 20, to be worked per day by operators at stations where an agent and two operators are employed. The parties to the original agreement agreed together to place these issues before the members of the former Board of Conciliation and Investigation and to abide by the decision reached. Messrs. Adam Shortt, Wallace Nesbitt, K. C., and J. G. O'Donoghue, members of the Board before which the agreement had been

effected, accordingly met in Toronto on November 23, and in Montreal on December 6 to consider the same. Written statements were submitted embodying the views of the respective parties with respect to certain of the points raised. The members of the former Board duly considered the differences and rendered decisions which were accepted by the parties thereto. The text of the decision was as follows:

"The opinion of the majority of the Board, to whom were referred the points in dispute, as to the interpretation and application of the term "Telegrapher", in Articles 15 and 20 in the Agreement between the Canadian Pacific Railway Co. and the Telegraphers in its employment, is as follows:

(a) In Article 15 the term "Telegrapher" is not intended to include despatcher.

(b) In Article 20, stations at which a station agent, who has no telegraphic duties assigned to him to perform, and two telegraphers are employed, are to be regarded as twelve hour stations.

(Signed) ADAM SHORTT,  
Chairman.

**X.—MONTREAL LONGSHOREMEN'S SETTLEMENT—A DECISION IN THE  
RECORDER'S COURT AT MONTREAL RELATING TO PROCEEDINGS  
UNDER THE ACT.**

A case recalling the differences of last spring between the longshoremen of Montreal and the steamship companies of that port, was heard in the Recorder's court at Montreal during the month. It will be remembered that as a result of the reference of the differences to a Board established under the Act, the Board recommended that the shipping companies should pay  $27\frac{1}{2}$  cents per hour for day and  $32\frac{1}{2}$  cents per hour for night work, and to all the men who worked until the close of navigation, a bonus of  $2\frac{1}{2}$  cents an hour to be paid at the end of the season. The shipping companies prepared a form of agreement on the lines recommended by the Board, under which those of the men who so desired, agreed to remain at work until the close of navigation, and signed their names accordingly, the company on its part agreeing to pay at the end of the season to such men the bonus of  $2\frac{1}{2}$  cents per hour recommended by the company.

A number of men, estimated at about 200, who did not sign the agreement, claimed at the end of the season that they were entitled to the bonus, and a test case against one of the shipping companies involved, was brought before Recorder Weir on December 23.

In delivering judgment, the Recorder said: "The plaintiff, who is a longshoreman, brings suit for the recovery of five dollars from defendant, and declares the amount to be due as 'balance of wages for work done in Montreal during the season of 1907 at  $2\frac{1}{2}$  cents extra per hour, 200 hours, so arbitrated on June 14th, 1907, under the Industrial Disputes In-

vestigation Act, 1907, and promised by defendants and accepted by the plaintiff.' In other words, the action seeks to enforce an amicable agreement made in virtue of a special statute which has for its object the adjustment of industrial disputes. Turning, however, to the statute in question, I find the following important section (No. 64): 'No court of the Dominion of Canada, or of any province or territory thereof, shall have power or jurisdiction to recognize or enforce, or to receive in evidence any report of a Board, or any testimony or proceedings before a Board, as against any person or for any purpose, except in the case of the prosecution of such person for perjury.' It would appear from the plaintiff's pretensions that a basis of settlement had been arrived at, but not fully carried out, and this court is now invited to investigate and enforce, not the original contract between the parties, but the amicable agreement itself. The section I have cited expressly forbids this. The Act would appear to regard as incongruous, and certainly forbids, an adjustment of a dispute under its provisions becoming afterwards subject matter for contentious litigation. Possibly, the plaintiff has rights which he may still retain under his original contract, and which can be determined by competent courts of law. I am of opinion to dismiss plaintiff's action as on its face illegal, but reserve to him his recourse under the original contract between him and defendant, if any such exists."

(*Martin v Canadian Pacific Railway Co*; 23rd December, 1907; Weir, Recorder)

**INDUSTRIAL AND LABOUR CONDITIONS IN CANADA DURING 1907.**

DURING the first nine months of the year 1907, the general prosperity of trade and industry and the very active conditions of employment, which were more pronounced in 1906 than in any previous year in the

history of the Dominion, were continued without abatement. A somewhat late spring, following upon a severe winter in western Canada, delayed the opening of the season of activity; but the extensive railway construction

operations, projected and the rapid progress of settlement in the North-West provinces (immigration being heavier than in any previous year and reaching the approximate total of 300,000 arrivals,) created a demand for labour that was for some months considerably in excess of the supply. Accompanying these conditions there was a continued expansion in almost every branch of trade and industry, the effects of which were felt, directly or indirectly, in almost every section of Canada. Prices and wages, which were steadily upward in 1906, reached still higher levels in the spring and summer of 1907. With the close of the summer season, however, a growing stringency in the money markets of the world began to be felt in Canada, in the way of checking the rapid increase in production and equipment which had been uninterrupted for some time before. The yield of wheat and grains in the North-West provinces and in Ontario also showed a falling off as compared with 1906, and although the Atlantic fisheries and the coal mines had an exceptionally busy year, with labour in active demand, and though the volume of traffic and the earnings of railway companies were the largest ever recorded, the output of manufactured goods and of various metals was less in the closing months of the year than at the corresponding season of 1906. The lumbering industry, both in British Columbia and in Ontario and the Eastern Provinces, was also quiet throughout the autumn, with preparations under way for a smaller cut than last year. With the close of the season of out-door activity, more than the usual number of unemployed were reported in certain of the larger centres, including Toronto, Hamilton, London, Winnipeg and Vancouver, though the prolongation of mild weather in western Canada enabled an unusually large amount of work to be completed in preparation for the season of 1906. During the closing weeks of the year there was a noticeable improvement in the general tone of the labour market and in industrial and commercial circles following upon somewhat easier financial conditions. It

was remarked that although collections were somewhat slow in December, as compared with 1906, the turnover of holiday goods was as large in many sections as in the phenomenal season of the preceding year. The foreign and domestic trade of the country as a whole, the revenues of the Dominion and Provincial Governments and other public bodies, as well as the profits of banks, loan companies, etc., were heavier than in any previous year in Canada. The outlook for 1908 was regarded as very favourable in view of the large amount of railway construction and other work in progress, the vast extent of land still unoccupied in Western Canada and the prevailing opinion that the money shortage would be overcome.

#### Immigration and Colonization.

The number of immigrants arriving in Canada during 1907 exceeded that during 1906, which was the most active year in this respect that was previously recorded, reporting 71,912 in excess of 1905. Final returns were not obtainable at the close of the year, but it was estimated that the total number arriving would fall but little short of 300,000. There has been an increase of approximately 45% in the number of arrivals by ocean ports compared with 1906, but arrivals from the United States have declined about 8%. On the whole the increase compared with 1906 will be about 31%‡. A feature of the year was the pronounced activity of the movement during the autumn months. In view of the current decline in industrial activity, steps were taken by the Government to discourage arrivals until the opening of the spring of 1908.\* The majority of the immigrants were distributed in Western Canada, but special arrangements were made to facilitate the placing of immigrants on farms in Ontario by the appointment of employment agents in 198 towns and villages throughout the province.† In this way about 3,310 immigrants were distributed.

‡ For latest returns with reference to immigration see Immigration article elsewhere in present issue.

\* See statement on opening page of present issue.

† See the *Labour Gazette* for March, 1907, p. 1011

The immigration of farm labourers to the Eastern Townships, Quebec, was also encouraged, over 750 immigrants having been distributed by a special agent of the Government. Delegates from other localities were sent to Great Britain under a three month's engagement during the spring. The Salvation Army assisted largely in bringing immigrants to Canada and in distributing them on arrival, the operations of the organization in this connection exceeding those of 1906. It was estimated that over 13,000 were brought in by this agency under its immediate supervision, the government allowing a commission for those placed on farms. The health of immigrants was reported good, strict enforcement of the regulations having been made.

A considerable number of immigrants from Oriental Countries reached the Pacific ports of Canada during the second half of the year.\*\* During September, a serious disturbance occurred at Vancouver and some damage was done to Japanese property. The Deputy Minister of Labour was subsequently appointed a Commissioner to enquire into these losses. In the course of the investigation, information was elicited by the Commissioner tending to show elaborately planned methods on the part of employment agencies, in Vancouver and in Japan respectively, to secure the immigration to Canada of Japanese labourers. On November 4, therefore, a further commission was issued to the Deputy Minister of Labour to enquire into the methods by which Oriental labourers were induced to immigrate to Canada during 1907. On October 13, the Honourable the Minister of Labour was appointed as a special envoy to His Majesty the Emperor of Japan with reference to the question of Japanese Immigration to Canada. The Minister left for Japan during October, and had not returned at the close of the year. The final reports of the Deputy Minister of Labour as Commissioner had not been presented to Parliament up to December 31.\*

\* For statement re arrivals of Chinese since 1904, see immigration article in present issue.

\*\* For detailed statement re Oriental Immigration during 1907, see the *Labour Gazette* for October, November and December, pp. 449, 560 and 694, respectively.

There was a falling off in the number of homestead entries made in 1907, compared with 1906. The acreage of lands patented also showed a decline in the second half of the year. Land sales by private companies were less in some instances than in 1906.

A British Welcome League was formed at Toronto during March, 1907.†

A Department of Industries and Immigration was established in Nova Scotia. ††

### Wages and Hours of Labour.\*

The upward tendency of wages was more pronounced during the first nine months of 1907 than in any previous year of which a statistical record has been kept in Canada, with the single exception of 1903. The number of increases taking effect in 1903 was greater than in 1907, but the number of employees affected by several of the changes of 1907 was greater than those affected by any change in 1903. It was estimated, for example, that in the railway service alone, over 17,000 employees obtained increases as the result of four changes which went into effect in April and May 1907. The total number of railway employees receiving increases during the year was not less than 25,000. Other important increases were, to coal miners (5,000) on Vancouver Island, to the same class (4,000) in Alberta and the Crow's Nest Pass; to lumbermen, throughout British Columbia to the number of several thousands; to street railway employees (2,000) at Montreal; to the same class (1,400) at Toronto; to textile employees (10,000) in Ontario and Quebec; and to bakers (1,000) at Toronto; In the building trades over 8,000 obtained advances, and under the heading of General Transport over 2,000.

† See the *Labour Gazette* for December, p. 699, and for May, p. 1274.

†† See the *Labour Gazette* for November, p. 563.

\* Special articles and tables relating to changes in wages and hours of labour during the first, second and third quarters of 1907 appeared in the May, August and November issues of the *Labour Gazette* at pages 1277, 191, and 586, respectively. An article dealing with changes reported during the fourth quarter of the year will be published in the February, 1908, issue of the *Gazette*, together with a statistical review of the changes occurring throughout the year.

In the autumn months the upward tendency of the spring and summer went into effect. Thus in the lumbering industry in Ontario and Quebec wages in the camps were \$5—\$10 lower per month than in 1906, though fully 10,000 river drivers had obtained a substantial increase during the spring. Metal miners at Rossland, B. C., who received an advance in scale in July, accepted a reduction to the old rate in December. The wages of agricultural and unskilled labourers, railway construction employees, and workmen engaged on civic improvements were maintained for the most part on the high level established in 1906, though the rate for general labour declined in the last three months of the year, and the wages of the less skilled employees engaged in manufacturing establishments were reduced in a few instances. Reductions in the general scale, however, were nowhere reported.

#### Cost of Living.

The advance in retail prices which has been so pronounced during the past five years was continued during 1907. Milk, butter, eggs, potatoes, canned fish and vegetables, cereals and other staple articles of consumption were higher in price during the autumn months of 1905, than in the experience of present householders. Meats were somewhat lower than in 1906. Wheat and grains, hay, food and flour, wool, textiles, metals, brick, lumber and fuel, were on higher levels than in the preceding year, though a recession in the wholesale prices of metals took place during the autumn months. Hides and skins were lower. Rentals continued to advance in the larger centres. Small houses at moderate rentals were scarce, and though conditions in this respect were on the whole less severe than in 1905 and 1906, a civic committee was appointed at Toronto to deal with the question.

A special and detailed investigation conducted by the Civil Service Association at Ottawa, Ont., into local price tendencies during the past ten years showed that expenditures on necessities

by a family of five living on an income of \$750 per year had increased 34% during the decade. The investigation was conducted in June prior to a pronounced advance in fuel, bread-stuffs and dairy produce which was maintained up to the close of the year.

#### Interruptions to Industry.

There were 149 trade disputes reported to the Department of Labour as in existence during 1907,\* compared with 138 in 1906, 87 in 1905, 103 in 1904 and 160 in 1903. The number of workpeople involved was approximately 34,694 in 1907, compared with 26,014 in 1906. The number of working days lost through trade disputes was approximately 613,986 in 1907, compared with 490,400 in the previous year. Although the number of disputes and the number of workpeople involved were greater than in 1906, and there was also an increase in the amount of time lost, none of the disputes were so serious in their results as certain of those that occurred in the preceding year. A stoppage of work which occurred in the coal mines of Alberta and Eastern British Columbia involved 3,450 men and caused embarrassment to transportation and metalliferous mining interests through the scarcity of fuel which resulted. Apart from this, the localities which suffered most from trade disputes were Springhill, N. S., and Toronto, Ont. In the former place a strike of about 1,250 coal miners continued from August 1 to October 31, causing a shortage of coal throughout the Province. In Toronto, building operations were impeded for many months by a general strike of plumbers, which began on May 17, and which had not reached a definite settlement at the close of the year.

Cold weather and the unusually heavy snow fall caused some inconvenience and loss to industry in the North-west provinces and in British-Columbia during January and February. The most serious embarrassment ensued in connection with the supplying of fuel to towns in

\* A special article, with tables and diagrams, dealing in full detail with the trade disputes of the year, is published elsewhere in the present issue.

Southern Manitoba and Saskatchewan†. Range cattle also suffered, and railway and lumbering operations were hampered.

The collapse of the Quebec bridge on August, 29, causing the loss of over sixty lives, a heavy property loss, and a serious delay in the industrial development of the country, was the chief disaster of the year in Canada.\*\*

### Conditions in the Industries and Trades.

Conditions of employment during 1907 in the several industries and trades throughout Canada may be briefly summarized as follows:—

#### Agriculture.

In the agricultural industry, the total yield was less than in 1906. There was a falling off in the more important agricultural provinces, including Ontario, Manitoba, Saskatchewan and Alberta; in the Maritime provinces, Quebec and British Columbia, however, conditions on the whole were more favourable than in 1906. More detailed information with regard to conditions, crops, etc., during the year is as follows:—

The favourable weather which prevailed during the autumn of 1906 enabled a large area to be prepared for seeding. The winter which followed was also favourable, good snow roads permitting active progress with the marketing of grain and produce, and the cutting and hauling of cordwood. In portions of the Northwest Provinces, the snowfall was heavier than usual, causing some loss to cattlemen on the ranches of Alberta. The spring opened late, and seeding was delayed by from 12 to 15 days throughout Canada, as compared with 1906, (which in turn was somewhat later than the year 1905) not being completed in western Canada until the opening week of June. A succession of cold and mild intervals in the months of April and May caused damage to fall wheat, clover and pastures. The area seeded was less ex-

tensive than in 1906, though returns from the Province of Saskatchewan showed a considerable increase. The falling off was chiefly noted in the area devoted to wheat, the coarser grains showing an increased acreage compared with 1906. The seed bed, however, was in good condition, and a period of warmth and moisture in June and July promoted rapid growth. The month of August was less favourable, drouth occurring in southern Manitoba and over a considerable area in Ontario and Quebec, with resulting damage to the grain and fruit crops, and to the dairying industry. The harvest in western Canada was on the whole 20 days later than that of 1906, and as a result, an unusual amount of damage was caused by early frosts. During the early autumn months, the rainfall was heavier than usual in Quebec, and in the Maritime Provinces, and interfered seriously with the harvest. The damage done to hay and potatoes was considerable. In western Canada, however, and in Ontario, the weather continued mild until an unusually late period, and enabled good progress to be made with fall ploughing and marketing. In connection with the marketing of the western wheat crop, the supply of cars was more adequate than in 1906, the chief obstacle to the rapid forwarding of the crop being the stringency in the money market, which caused some embarrassment at points of transshipment on the great lakes.

With regard to the total grain yield of the Dominion, no final estimate of an official nature had been made up to the close of the year. The consensus of opinion was that there would be a considerable falling off in the wheat yield of western Canada, especially in the higher grades. On the other hand, the coarse grains will show a heavy increase compared with 1906. Wheat, clover and potatoes were very light in Ontario, and oats and barley were below the average. Nova Scotia, Prince Edward Island and Quebec reported a more favourable crop than in 1906,\* and in British Columbia, good progress was made in several bran-

† See special articles published in the *Labour Gazette* for August, p. 208; for September, p. 304; and for October, p. 442.

\*\* A special article dealing with the disaster was published in the September issue of the *Labour Gazette* at p. 317.

(\* See opening article in December, 1907, issue of the *Labour Gazette*.

ches of the industry. In Quebec, the crop on the whole showed an increase of five per cent, there being a decrease in the grain yield, but an increase in hay and fodder.

Prices for all classes of farm produce were on an exceptionally high level throughout the year. Wheat advanced to one dollar per bushel in several localities during June, and the advance was well maintained. Hay sold as high as \$22 to \$28 at many points, while butter and eggs were higher than in several years past throughout the autumn season. On the whole, it was estimated that the monetary return from the crops of 1907, notwithstanding the decline in the output, would equal that of 1906.

In the stock-raising branch, the long and severe winter, the high price of fodder of all kinds and the poor pasturage exercised an unfavourable influence. Marketing in Ontario was on an exceptionally heavy scale during the autumn months, with the result that prices declined. Hog-raising in Ontario received a check. An effort was being made in the closing months of the year to secure the damaged portion of the western wheat crop for feed purposes in Ontario.

Dairying in Ontario and Quebec had a less active year than in 1906, owing chiefly to the late opening of the spring, the bad condition of pastures and the high price of feed. The season's shipments of cheese and butter from Montreal, Que., showed a considerable falling off compared with 1906†. Additional cow-testing associations, under the auspices of the Department of Agriculture, Canada, were organized in several localities, with excellent results for the industry. In Quebec, further health regulations were enforced during the year, and in Ontario, means were taken to lessen the amount of Sunday work performed in cheese factories and creameries. The industry made rapid progress in British Columbia during the year, 19 co-operative dairying associations being reported in operation.

The fruit yield was only fair. Grapes

were a very heavy crop and apples were a good crop, though the drouth in August caused damage. Favourable reports were received from the co-operative apple-packing associations in operation in Ontario and British Columbia. Pears were a failure and peaches were a light crop. The crop of small fruits was also light. The season was exceptionally free from insect pests.

From the standpoint of the employment of labour, conditions varied considerably with the season. A marked scarcity of labour prevailed during the spring and early summer months, with wages higher than in the corresponding period of 1906. The number of immigrants distributed in Ontario and elsewhere by the Dominion and Provincial governments was larger than in any previous year. Later in the year, however, the demand was less active, except in portions of Quebec and the Maritime provinces. In connection with the harvesting of the western crops, some 21,000 harvesters from eastern Canada were employed, as compared with 24,000 in the preceding year. Wages were well maintained. In the autumn months, the supply of labour was more abundant than in the corresponding period of 1906, and wages were somewhat lower.

#### Fishing.

In the Maritime provinces, though the season was late in opening, catches were heavier and prices higher during 1907 than in several years past. The bank and deep sea fishing fleets had an exceptionally favourable year, and the quantity of cod, halibut and haddock taken was abundant. The inshore fisheries also made good catches, herring and mackerel being plentiful. Trade in fish from Cape Breton to the United States increased considerably during the year. The lobster fishermen sustained some damage to gear through drift ice during the spring, but later made some good catches, prices being very high. Good catches of sardines and gaspereaux were made by the New Brunswick fishermen. The catch of salmon was below that of the exceptionally heavy return of 1906. Dog fish caused damage during

(†) See opening article in December issue of *Labour Gazette*.

the autumn, though the reduction works at Canso and elsewhere were in active operation. The supply of oysters was limited, and prices were unusually high. The tom-cod season on the St. Lawrence was favourable. On the great lakes catches were light. Great activity prevailed during the winter in the northern lake fisheries of Saskatchewan and Alberta, hundreds of men and teams being employed in catching and forwarding the product. The restrictive regulations applying to lake fisheries in western Canada were amended, with a view to the conservation of the local fish supply.\* In British Columbia, the pack of sockeyes was very light, being considerably below that of last year, and less also than that of four years ago. About 3,000 fishermen were employed, as compared with 5,500 last year; the rate of wages was the same, but individual earnings were estimated at only \$50 per head, compared with \$100 last year.† Good catches of springs, cohoes, and humpback salmon were reported. Prices in the British market were upward. Fewer traps were operated off Vancouver Island than last year. The catch of herring at Nanaimo was much heavier than in 1906, and more men were employed in the industry than ever before. The sealing operations in Behrings Sea were less successful than in 1906, the total catch being 5,235 skins, compared with 9,900 last year. The whaling industry off Vancouver Island had an exceptionally prosperous year; catches were unprecedentedly large, and extensive additions were made to the number of vessels employed and to the size and number of the reduction establishments on Vancouver Island.

The demonstrations conducted under the auspices of the Department of Marine and Fisheries, Canada, in the Scottish method of curing herring, were repeated during 1907.\*

The British Columbia Fishery Commission held sessions during July, and completed the taking of evidence in December.

The commission appointed to investigate the fisheries of western Ontario completed its enquiry in Georgian Bay waters and held sittings during the autumn at points on the north shore of Lake Erie.

### Lumbering.

The winter season of 1906-07 in the woods was very active in Ontario and the Eastern Provinces. Weather conditions were favourable, and the cut showed an increase compared with the preceding year. The heavy snow-fall hampered operations in Northern Quebec and the North-West provinces, and the number of railway ties cut in the latter was less than the demand; but in Nova-Scotia the opposite conditions prevailed, with labour scarce. The spring was backward, as compared with 1906, but the high water in the streams enabled exceptionally rapid progress to be made with the drives. Men were scarce for this employment, and wages were advanced. The season in the mills was favourable, the time lost in May being made up at the close. The cut was somewhat larger than that of the previous year. The preparations made during the autumn months for the cut of the coming winter season were on a much less extensive scale than in 1906. The high price of supplies, the decline of prices in the British Market, and the falling off in the demand for lumber for home consumption were stated to be the leading causes. Wages of employees in the camps were from \$5 to \$10 less than in the previous year and the outlook is for a diminution in the cut.

The total exports of lumber from Montreal to Great Britain and the Continent during the past season amounted to 113,996,314 feet. For the season of 1906 shipments totaled 146,765,423 feet.

In British Columbia, the year was unprecedentedly active, both in the camps and mills, up to the month of September. The revenue derived from royalties, leases, licenses, etc., was the largest in the history of the province. Wages, also, were higher than ever previously recorded. With the falling off however, in the demand for lumber in the

(\*) See *Labour Gazette* for June, 1907, page 1328.

(†) See *Labour Gazette* for November, 1907, page 587.

(\*) See *Labour Gazette* for June, 1907, page 1328.

prairie provinces, caused by the cessation of building which followed the money stringency, conditions during the autumn became very inactive throughout the province, most of the mills closing down and the men returning from the camps.

Trade conditions were uniformly buoyant throughout the year until the closing months. Prices, which advanced in the winter, were maintained on a high level, and no general reductions were reported, notwithstanding the decline in the demand which occurred in November and December.

In connection with lumber prices in Western Canada, a select Committee of the House of Commons conducted an inquiry into the operations of an alleged illegal combine of manufacturers and dealers. A report was presented to the effect that the prices charged were excessive, and that a combination in restraint of trade existed. Proceedings were taken later by the Government of Alberta under the Criminal Code at Edmonton, Alta., and a fine of \$5,000 imposed\*.

Action was taken by the Provincial Board of Health of Ontario, looking to the improvement of sanitary conditions in lumber camps in the remote districts of the province†.

Annual conventions of various lumbermen's Associations were held and reported favourable conditions. A provincial forestry convention was held at Fredericton, N. B., during February, and the annual meeting of the Canadian Forestry Association at Ottawa, Ont., during March. The British Columbia Lumbermen's and Forestry Association was reorganized at Vancouver.

### Mining.

Employment was less continuous in certain branches of the mining industry than in 1906, though the output was in several important districts and departments heavier than in any previous year. The Nova-Scotia collieries were hamp-

ered by the late opening of navigation and by drift ice during the month of May, and shipments to the St. Lawrence markets accordingly showed a falling off, notwithstanding that the fleet employed was the largest and most efficient in the history of the industry and that the mines were worked to the utmost capacity possible during the remainder of the year. Some scarcity of labour of the less skilled grades was experienced during the late summer and early autumn. A labour disturbance at Springhill, N. S., still further reduced the output. Metal mining in Nova Scotia was quiet. In New Brunswick the development of certain iron areas was in progress during the autumn. The asbestos mines of Quebec, had the busiest year ever recorded, operations being carried on during the winter months to an extent never before attempted, with labour in active demand throughout most of the year. Mica mining was also very active up to October, when unfavourable conditions in the foreign market caused the closing of a number of mines and factories. At Cobalt, Ont., the spring months were very active, but a strike which occurred during July affected the output for several weeks; later in the year shipments showed an increase. Extensive development work and installation of machinery were effected. The Larder Lake district was actively prospected. In the Eastern counties of Ontario, and in the oil producing sections of the south west, the year was favourable, several additional strikes being reported. North of Lake Superior, the Atikokan iron mines shipped their first product to the company's furnaces at Port Arthur. In Alberta and British Columbia, conditions varied considerably at different periods of the year. After an exceptionally busy winter season in the collieries, a stoppage of work which occurred during April, as a result of the failure of negotiations between the operators and workmen employed in the coal mines of Alberta and Eastern British Columbia, was the cause of widespread embarrassment. The domestic fuel supply was low in the districts de-

\* For detailed statements re proceedings in this case, see the *Labour Gazette* for March, April, May, September, December at pp. 935, 1051, 1178, 250, 631, and 740, respectively.

† See the *Labour Gazette* for May, 1907 p. 1178.

pendant on these mines; the railway lines were in a congested condition from a prevailing shortage of cars and the heavy immigration and freight movement and were urgently in need of steam-coal; and the smelters which treat the ores of the metalliferous mines of British Columbia were short of coke. The dispute was settled under the Industrial Disputes Investigation Act, 1907, which had gone into effect during March. Immediately thereafter, production in the collieries became very heavy, being limited only by the supply of labour and cars obtainable, the former, in particular, being exceedingly limited. The smelters and metal miners were also enabled to resume activity. Wages in these branches in view of the prevailing scarcity of men, were materially advanced on July 1. On Vancouver Island the collieries were worked to full capacity throughout the summer and autumn seasons, with labour in demand. The pay roll in all of these was heavier during this period than in any previous year, notwithstanding that a shortage of coke caused considerable embarrassment at the smelters during September and October. This was later made the subject of an investigation by the provincial Department of Mines, but as the supply was by that time adequate no further action was taken. In the closing months of the year, fluctuations in the prices of copper and silver caused a marked falling off in activity in the Kootenay districts. A number of mines and smelters closed down, and the staffs of others were reduced. Wages also, at Rossland and elsewhere were reduced to the rates in force prior to July 1. With the increase in the supply of labour thus obtainable the shortage at the Crow's Pass and Vancouver Island collieries was relieved. Reports with regard to the gold output of the Atlin Lake mines were favourable, but returns from the Yukon were smaller than in 1906.

A Royal Commission was appointed by the Government of Alberta to investigate and report on all matters concerning the relations of employers and employees

in the coal mining industry of the province\*.

A Department of mines was created by the Dominion Government during 1907†.

### Manufacturing.

The pronounced activity and expansion of manufacturing, which was so marked a feature of the year 1906, was continued during the first half of 1907. Establishments in nearly every branch and locality were running to full capacity, with orders well ahead. Overtime was worked to an unprecedented extent, and staffs were largely augmented. Heavy additions to factory room and equipment were made. While these conditions may be said to have been general, they were especially noticeable in plants engaged in the production of heavy goods. The output of iron and steel, portland cement, etc., was larger than in any previous year. The expansion of textile establishments was very marked. The large flour milling companies also had the most active year in their history. The shipbuilding industry of Canada had a very favourable year. The largest boat ever built in Canada was launched at the yards of the Collingwood Ship Building Company. After the month of July, however the stringency in the money market began to be felt over a considerable area, in the way of checking the expansion in equipment and output previously in progress. Later the shortage in the western crop affected payments, though orders continued heavy for some time. A general tendency to lessen production was noted in the closing months of the year, factories in several important centres having reduced their staffs or having adopted shorter hours. Wages which were upward during the first nine months of the year were downward at the close.

In connection with power development, arrangements were further advanced for the distribution of Niagara

\* A copy of the report of the Commission was published in the *Labour Gazette* for September, 1907, at p. 304.

† See the *Labour Gazette* for May, p. 1252.

Power throughout western Ontario. Power from this source was delivered for the first time in Toronto, early in 1907. By-laws to enable municipalities to participate in the project of the Hydro-Electric Commission were submitted at various points. At Chignecto Mines, N. S., a power plant for the distribution of electrical energy to Amherst, N. S., was inaugurated on August 1. This was the first plant of the kind in America to be located at the mouth of a coal mine. At several points in Western Canada electrical power has been developed.

### Railway Construction.

Notwithstanding the late opening of the season of activity and a scarcity of certain necessary material, principally railway ties, the extent of railway construction operations in progress was greater than in any previous year. During the opening months of the year, operations were for the most part suspended, though extensive rock-cutting was completed on the La Tuque branch of the National Transcontinental Line. Large quantities of material were assembled and arrangements made for the supply of labour.

Additional contracts for the construction of 457 miles of road were awarded by the Commissioners of the National Transcontinental Railway during March, 1907. In February some important contracts for bridges were let, and in November, two large contracts for steel rails. According to the report of the commissioners the total expenditure during the nine months ended March 31st amounted to \$5,537,867, of which \$224,880 was spent for supplies.

With regard to the extent of operations in progress in connexion with the National Transcontinental line during 1907 the following statements were furnished to the Department in the closing week of December, by courtesy of the secretary of the commissioners of the Transcontinental Railway and the general manager of the Grand Trunk Pacific Railway Company respectively:

### I.—On Eastern Divisions.

(1) The total number of miles on the Eastern Division under construction is 860.

(2) Number of miles finally completed nil.

(3) Number of men employed by contractors about 12,000.

(4) Number of horses employed by contractors about 2,000.

(5) Paid to contractors to Dec. 24th 1907 about \$11,000,000.

(6) Paid for rails and fastenings to Dec. 24th 1907, about \$1,500,000.

(7) Paid for railway ties to Dec. 24th, 1907, about \$260,000.

(8) Paid for supplies to Dec. 24th 1907 about \$140,000.

### II.—On Western Divisions.

1. The Grand Trunk Pacific, Railway, Winnipeg to Prince Rupert, will be approximately 1740 miles in length. The Lake Superior Branch, extending from Fort William to Lake Superior Junction, on the Main Line of the Eastern Section (or the Transcontinental Railway) will be 200 miles long. Of this total mileage of 1940 miles, there is at present 1000 miles under actual construction, including the entire Lake Superior Branch, and the Main Line between Winnipeg and Edmonton.

2. About 880 miles of grading has been completed, and 470 miles of rail laid of which 200 miles is ballasted.

3. During last year there were employed in connection with the construction work over 22,000 men and about 6,000 animals; the expenditure in labor and material being in the neighborhood of \$12,000,000.00.

Labour in connection with the above was scarce during the summer months but was more abundant after the conclusion of harvesting.

It was stated that the C. P. R. Co., had 747 miles under construction, west of Lake Superior. The C. N. R. Co., had extensive branch lines under construction in Ontario, Quebec and New-

Brunswick, as well as in the North-West provinces throughout the season of activity, the total mileage exceeding 800 miles. The Temiscaming and Northern Railway was extended to within 52 miles of its junction with the National Transcontinental. The Grand Trunk Railway Company carried out some important double tracking and other improvements in Ontario.

Heavy additions were made to rolling stock during the year by the I. C. R., C. P. R., G. T. R., C. N. R., and other Companies.

The outlook at the close of the year was that operations during 1908 in the way of increasing the mileage and equipment of Canadian railways would equal or exceed those of the past year.

**General Transport.**

Railway employees of all classes had a very busy year. The heavy snow-fall in western Canada hampered operations during the winter and spring months. Later, however, the movement of western grain became very heavy. The amount of general merchandise in transit was greater than ever before recorded. The tourist trade was larger than in 1906, and the unprecedented volume of immigration, above referred to, correspondingly increased the business of the railways. The earnings of railway companies, as a result, reached a higher point than ever before recorded, while the annual reports of all showed the largest amount of business in the history of Canada. The number of employees engaged was larger than in any previous year, and men of several classes were in demand over a large portion of the year. Wages were strongly upward, no less than 25,000 railway employees having received substantial increases in Canada in the second quarter of the year alone.

The supply of cars was better maintained by the railways than in 1906, though a shortage prevailed in Western Canada at certain periods of the year. Investigations were conducted by the Railway Commission into the state of the equipment of the Canadian Pacific and Canadian Northern Railway Companies, and orders given to remedy certain de-

ficiencies that were found to exist. The Commission also issued an important order with reference to the use of safety appliances, besides directing the attention of the Attorney-Generals of certain of the provinces to cases in which the negligence of railway employees had led to fatal accidents. A number of prosecutions of employees were made in this connection.\*

The adoption of a new code of railway rules was discussed by the Board with representatives of the different companies and classes of employers at different times, a special meeting for the purpose having been held in February.

Street Railway Companies reported at Montreal, Ottawa, Toronto, Winnipeg, Vancouver, Victoria, and other points the largest earnings in their history.

Navigation was late in opening†, and the presence of drift ice for some time after in the St. Lawrence River and elsewhere curtailed shipments in the opening weeks of the season. Traffic on the great Lakes and through the Canadian Canals, was very heavy, the fleets engaged having largely increased their numbers and tonnage. The following is a comparative statement of traffic through the Sault Ste. Marie Canals during 1906 and 1907:—

Items.	Season 1906.	Season 1907
Vessels, total number . . . . .	22,155	20,437
Lockages, number . . . . .	14,523	14,020
<i>Tonnage—</i>		
Registered, net . . . . .	41,098,324	44,087,974
Freight, net . . . . .	51,751,080	58,217,214
Passenger number . . . . .	63,033	62,758
<i>Coal:</i>		
Hard, net tons . . . . .	1,011,375	1,506,668
Soft, net tons . . . . .	7,728,255	9,893,427
Flour, barrels . . . . .	6,495,350	6,524,770
Wheat, bushels . . . . .	84,271,358	98,135,775
Grain, bushels . . . . .	54,343,155	43,463,338
Manf. & pig iron, net tons . .	391,105	307,941
Salt, barrels . . . . .	468,162	460,802
Copper, net tons . . . . .	107,633	89,959

General Mdse. net tons . . . .	1,134,851	1,022,654

The decrease in lockages and number of vessels, together with the increase in

\* See the Labour Gazette for May p. 1181, and November, p. 615.

† See Labour Gazette for May, p. 1181, for dates at which navigation opened at the leading Canadian ports.

tonnage, reflects the tendency to increase the size of the vessels engaged in the lake traffic.

Navigation closed at Fort William, Ont., on December 10th. Vessel arrivals for the year were 921 and departures 968, compared with 858 arrivals and 854 departures last year.

Ocean navigation closed at Montreal on November 29th. The aggregate of grain exported showed a large gain compared with 1906, the total being 32,021,016 bushels in 1907 compared with 25,953,876 in 1906. There was a falling off in cattle and dairy produce, but gains in flour and apples. Passenger traffic and customs revenue for the year showed a large increase compared with 1906. The volume of freight traffic was also larger, and the harbour revenue showed an increase of \$8,500 on imports, though dues on exports showed a falling off. There was a decrease of 80 in the number of ocean-going vessels entering the port, and a decrease in tonnage of 48,748. The total number of vessels which entered the port was 740, representing a tonnage of 1,924,475. The average number of men employed daily on the wharves was 786, compared with 742 in 1906. The season extended from May 2nd to November 29th; last year it extended from April 29th to December 2nd.

The winter shipping season at St. John, N. B., showed a falling off in exports owing to the severe weather and car shortage in western Canada. The number of passengers and the volume of imports increased.

### The Trades.

*Building.*—During the first half of the year, building operations were fully as extensive as in the corresponding period of 1906, which was the largest building year in the history of Canada. The money stringency and high price of materials, however, caused a falling off in activity, especially in western Canada, during the autumn months. At Toronto and Winnipeg, in particular, the number and value of buildings under construction were less than in 1906. In December, work was generally confined to the finishing of contracts. The winter

season of 1908 promised to be less active for inside workers than that of 1907.\*

*Metal and woodworking.*—The several branches employed in manufacturing establishments had a very busy year, up to the month of October. In November and December, employment was less active, and some operatives were out of work. Coopers had a good year. Electrical workers and linemen were busy owing to extensions in the telephone system that were carried out in the North-west Provinces.

*Printing.*—The allied trades had a busy year, with men in demand in several of the cities, conditions being fully as active as in 1906, except in the closing months. Bookbinders were very busy. Important trade agreements involving increases in scale went into effect at Montreal and Toronto.

*Clothing.*—Tailors and garment workers were well employed. Glove-makers reported a larger output than ever before recorded. Boot and shoe workers were less active than in 1906, though the year was a busy one at many points.

*Textile.*—The year was very active for employees in textile establishments, staffs being augmented and the wages of over 10,000 workpeople in cotton mills being advanced.

*Leather.*—Tanners were affected by the fluctuations in the price of hides, and production was adjusted to the immediate needs of the market. Other leather workers had an active year.

*Food and tobacco preparation.*—Butchers, bakers, etc., were well employed. Confectioners reported a somewhat smaller volume of business than in 1906. Cigar makers and tobacco workers had a good year. Ice handlers had a very favourable year.

*Miscellaneous.*—Miscellaneous employees, including barbers, hotel and restaurant employees, laundry workers, theatre employees, etc., had a good year, the heavy tourist traffic having improved employment during the summer months. Domestic servants were very scarce, though the supply was increased during

\* A statistical review of building operations in the several cities will be published in the April, 1908, issue of the *Labour Gazette*.

November and December by the decline in factory employment.

*Unskilled labour.*—General labour was in very active demand throughout Canada during the spring and summer seasons. The extensive railway construction operations and civic improvement works in progress, together with the pronounced activity of the mining and other industries, absorbed all of the available supply, and additional men could have found employment. The scarcity was especially felt in the metal and coal mines of British Columbia during the early summer, and in the collieries of Nova Scotia during the early autumn. Wages were on the high level established in 1906. With the completion of harvesting, however, labour became more abundant, and in the closing months of the year was in excess of the demand, with wages downward. At Toronto, Winnipeg and Vancouver, there were a large number of unemployed during December.

**Canadian Trade and Revenue.**

Canadian foreign trade showed a gain of approximately \$25,000,000 during 1907, compared with 1906. The gain was wholly in imports, exports having shown a slight falling off. Canadian products found favourable markets in Great Britain and throughout the Empire.

Domestic trade, notwithstanding the stringency in the money market, was on the whole as active as in 1906, the volume of general merchandise in transit on the railways having been greater than in any previous year. There was a decline in activity during the autumn months, but the Christmas trade was very heavy, equaling that of 1906, at many points. Collections were slow, especially in the second half of the year.

Canadian securities were on a lower level than in 1906, though banking profits and industrial earnings were the largest on record. The year was one of anxiety throughout the financial world, and of acute panic in the United States. The Canadian banks, however, withstood the pressure of the external situation exceedingly well. Mining and land speculation

were reduced in volume, and the general financial situation was regarded with confidence at the close of the year. Bank clearings showed a gain in every Canadian city, compared with 1906, the total increase being \$256,410,687.

The revenue of the Dominion was approximately \$10,000,000 larger in 1907, than in 1906, which in turn was larger than that of any year. Provincial, municipal, and other public revenues were also large.

**Proceedings of Labour Organizations, Employers' Associations, etc.**

From returns received at the Department of Labour to December 31, it would appear that 218 labour organizations were formed during 1906, and 59 dissolved(\*). By provinces the record was as follows:

Provinces.	Unions Formed.	Unions Dissolved.
Nova Scotia.....	12	1
New Brunswick.....	7	1
Quebec.....	45	11
Ontario.....	91	33
Manitoba.....	5	4
Saskatchewan.....	11	1
Alberta.....	25	2
British Columbia.....	22	6
Total.....	218	59

In a directory of Canadian Labour organizations published in the *Labour Gazette* during 1907, some 1,681 organizations of all kinds were included, of which 8 are congresses and national associations issuing charters, 49 are trades and labour councils, 31 are federations of trade unions and 1,593 are trades unions or other local associations of employees. (1)

Conventions of the Trades and Labour Congress of Canada, and of the National Trades and Labour Congress of Canada

(\* ) A special article with statistical tables giving revised and detailed returns relating to the formation and dissolution of labour organizations in Canada during 1907, will be published in the February, 1908, issue of the *Labour Gazette*.

(1) Full reports of the proceedings of these conventions, including copies of the more important resolutions passed, were published in the *Labour Gazette* for October, 1907, at pages 421 and 432 respectively.

were held during September at Winnipeg, Man., and Glace Bay, N.S., respectively. The membership of the former was reported to be 32,997 compared with 27,767 in the previous year, while the number of unions affiliated with the congress increased from 448 to 515. A number of important resolutions relating to the condition of labour were passed at these meetings<sup>(2)</sup>. The Fishermen's Union of Nova Scotia and the Canadian Society of Equity held important conventions at Halifax, N.S., and Edmonton, Alta., respectively. The first annual convention of the *Federation of Textile Workers of Canada* was held at Montreal, Que.

The Canadian Manufacturers' Association held its thirty-sixth annual meeting. The total membership on July 31, 1907, was reported to be 2,189 an increase of 85 compared with 1906.<sup>(3)</sup> Important meetings were held by the Montreal and Toronto branches.

#### Labour Legislation—The Industrial Disputes Investigation Act, 1907.

The most important legislation enacted during the year affecting industrial and labour conditions was the Industrial Disputes Investigation Act, 1907, which became law on March 22. A brief review of the operations of the Act to the close of the year will be of interest. The object of the Act, it will be remembered, as set forth in the complete title is, "to aid in the prevention and settlement of strikes and lockouts in mines and industries connected with Public Utilities," and provide that in the event of differences between employer and employees in any of the industries indicated, before it becomes legal to declare a strike or lockout, an investigation into the differences shall take place before a Board of Conciliation and Investigation established according to the provisions of the law. Pending the proceedings before the Board there can be no change affecting the conditions of work or wages. Penalties are

provided under the Act for those who bring about or aid in bringing about a strike or lockout contrary to the provisions of the Act. It is not intended that the findings of the Board of Conciliation and Investigation to which the differences are referred shall be compulsory, but it was believed that the more serious aspects of an industrial struggle might in many cases be averted if the participants were given an opportunity of adjusting their differences before a tribunal of the character instituted under the Act, and with the aid of the members of such tribunal. The Board is required to effect by conciliation an agreement between the disputants if possible, and if an agreement is impossible, then to investigate the matters of difference and report thereon to the Minister with recommendations for settlement, securing such witnesses, documents, etc., as may be necessary for the purposes of the enquiry. The Board is constituted of three members, two appointed on the recommendation of the respective parties to a dispute and the third on the joint recommendation of these members, or in the absence of such joint recommendation, by the Minister of Labour.

From the enactment of the measure until the end of the year there had been thirty-one applications for Boards of Conciliation and Investigation. A number of these related to disputes in industries other than coal mines and public utilities and not therefore expressly included within the provisions of the Act, though by a special clause the machinery of the Act may be invoked in such cases should both parties concerned be agreeable to such a course. In the case of several applications of this nature the consent of both parties not having been obtained no Board was established. In the case of a number of further applications the existence of the Act exerted a conciliatory influence on negotiations between the disputants and settlements were reported before the establishment of the Board had been effected. In twenty-two cases boards have been established. With regard to four of these the proceedings of the Boards were unfinished at the end of December.

<sup>(2)</sup> See *Labour Gazette* for November, 1907, p. 492 and December, 1907, p. 637-

<sup>(3)</sup> A report of the proceedings of this convention was published in the October, 1907, issue of the *Labour Gazette*, p. 437.

Formal agreements were effected in eleven cases and informal settlements in five other cases. In the case of the two remaining Boards, both of which related to differences between the same disputants, the differences remained unsettled by the investigation before the Board, and a strike occurred which continued for three months and ended in a resumption of work on lines recommended by the Board. In three cases also in which no Board was established, settlements were reported which were directly attributable to the influence of the Act, making in all 19 disputes adjusted by virtue of the Act.

The disputes referred under the Act during these first nine months of its operation, during the earlier portion of which period its provisions were but imperfectly known, have directly affected considerably over twenty thousand men and many millions of dollars of capital apart from the vast interests indirectly affected, and the great public interests at stake in several instances. Of the disputes referred under the Act, fifteen related to the coal mining industry in the provinces of Nova Scotia, Alberta and British Columbia, and seven to differences between railway companies and various classes of their employees. The remaining disputes affected longshoremen in Nova Scotia and Quebec, metal miners in British Columbia and Ontario, and cotton operatives in Quebec. Proceedings in connection with the various Boards, and the text of the various reports to the Minister of Labour have appeared from month to month in the *Labour Gazette*.†

### Other Legislation.

In addition to the above, several other important enactments affecting labour were passed by the Dominion Parliament and the different provincial Legislatures. Among measures enacted by the former were, an act establishing a provident fund for the benefit of the employees of the Intercolonial and Prince Edward

Island Railways; an act for the protection of the wages of labourers engaged in the construction of the National Transcontinental Railway; an act providing for the inspection of meats and canned foods; an act providing for the revision of the Customs tariff including a revision of the clauses having reference to conspiracies and combines; providing for the payment of bounties on the manufacture of steel and iron; to encourage the establishment of public cold storage warehouses; creating a Department of Mines; providing for the preservation of the peace in the vicinity of public works; and providing for the deportation of prohibited immigrants; together with a large number of Acts relating to railway companies and transportation. Among bills which were introduced during the session, but which were not finally passed, were a bill respecting the establishment of industrial and co-operative societies, a bill to limit the hours of labour in connection with contracts for public works; a Bill in the form of an Amendment to the Conciliation Act, 1900, providing for the imposition of a fine of \$100 in the case of an alien intervening in a strike or lockout, existing or apprehended, between employers and employees, or between different classes of employees in Canada; a bill providing that masters and mates on Canadian vessels shall be British subjects; that workmen be allowed time to vote at elections; that barges be subject to inspection; and that additional restrictions be inserted in the Steamboat Inspection Act. The subject of the establishment by the Dominion of a system of old age annuities was discussed in the Senate on the basis of an arrangement outlined by the Hon. the Minister of Trade and Commerce. (1)

In the Province of Ontario, Acts were passed by the Legislature relating to the licensing of stationary Engineers, the status of the Hydro-Electric Power Commission, the encouragement of metal refining and smelting, and affecting mines, public utilities, fisheries, etc. (2). A special com-

(1) A review in detail of the Legislation of the Dominion Parliament during 1907, was published in the *Labour Gazette* for April, p. 1118 and for May, p. 1248.

(2) See the *Labour Gazette* for December, 1907, p. 690.

† The text of the act and a special article dealing with the scope and machinery of the act were printed in the issue of the *Labour Gazette* for April, 1907.

mittee of the Legislature conducted an investigation into the administration of the law with regard to the employment of child labour (3).

In Quebec legislation was passed further regulating the employment of women and children in industrial establishments and the inspection of steam boilers, and amending the acts with reference to the formation of co-operative associations, the Montreal Firemen's Benefit Association, the issuing of timber licenses and the taxation of companies, partnerships, etc. An act was passed authorizing the appointment of a special commission to report with respect to the prevention of industrial accidents and the legal remedies therefor. (4).

The Nova Scotia Legislature passed important acts for the protection of coal miners, regulating the employment of stationary engineers, establishing a system of technical education for the province and providing for the appointment of a "Secretary of Industries and Immigration." The appointment was authorized of a commission of three members to examine into and report upon the feasibility of adopting some scheme providing old age pensions for workmen, and report on the organization and administration of existing miners' relief societies (5).

In New Brunswick, the legislation of the year included acts providing for the organization and incorporation of fishermen's unions, the housing of miners, the encouragement of agriculture, the amendment of the Workmen's Compensation Act, and Government ownership and regulation of the telephone systems (6).

The Legislature of Manitoba passed Acts for the protection of children, the establishment of Municipal telephone systems and of government telephone and telegraph systems, the operation of Municipal coal and wood sheds, the early closing of drug stores, and the amendment of the Manitoba Railway Act (7). By resolution of the Legislature during February, 1905, government contracts

will in future, contain clauses securing the payment of fair wages to workmen, and for the prevention of abuses arising from the sub-letting of contracts (8).

A Mechanics' Lien Act, together with some important legislation with reference to the taxation of corporations, were passed in Saskatchewan (9).

The Alberta Legislature passed amendments to the Railway and Steam Boilers Acts. Acts for the taxation of corporations, the destruction of noxious weeds, and the incorporation of Dairymen's Associations were also assented to (10).

In British Columbia, the most important act affecting labour passed in 1907, was one providing for the adoption of the eight-hour day in smelters. Other acts of the year had reference to Mechanics' Liens, the protection of children, the protection of timber, trade licences, and the taxation of industrial and other undertakings (11).

#### Royal Commissions.

On February 2nd, a Royal Commission was issued to Mr. W. L. Mackenzie King, Deputy Minister of Labour, and Judge Winchester for the purpose of enquiring fully into a strike of telephone operators in the employ of the Bell Telephone Co., at Toronto, Ont. The enquiry was begun on February 4th, and was continued until February 18, some 71 witnesses being examined. The Company on the latter date agreed to a working period of seven hours per day, arranged so as not to continue at any time for a longer period than two hours at a stretch. The report of the Commission was later presented to Parliament †.

A Royal Commission was appointed by the Dominion government to enquire into the causes of the collapse of the Quebec bridge, and held a number of sessions for the taking of evidence. No report had been made up to the end of the year.

(3) See the *Labour Gazette* for April, 1907, p. 1122.

(4) See the *Labour Gazette* for June 1907, p. 1384.

(11) See the *Labour Gazette* for August, 1907, p. 184.

† See the *Labour Gazette* for March, 1907, page 984 for statement of origin and settlement of strike.

A Royal Commission was appointed by the Dominion Government to enquire into and report on conditions in the Civil Service of Canada. Sessions were held for the taking of evidence at Toronto, Ottawa and Montreal.

A Commission appointed by the Government of the Province of Quebec conducted an enquiry into the question of industrial accidents, and the means best adapted to afford protection to the victims of such accidents and to the public in general. Representations to the commission were made by the Chambre de Commerce, of Montreal, and other bodies.

Sessions were held by a commission appointed by the government of the Province of Nova Scotia to enquire into the subject of *old age pensions*.

In Alberta and Manitoba a Commission to investigate conditions in the Beef Industry held sessions during 1907.

#### Notes.

The number of *factory inspectors* in Ontario was increased to ten.

The first convention on *Irrigation* in Western Canada was held at Calgary, July, 17.

A special committee was appointed by the Ontario Legislature to investigate the subject of *Prison Labour*.

Active steps were taken in Nova Scotia towards establishing a *technical education* system under legislation passed in 1907.

An investigation was conducted by the Board of Railway Commissioners, Canada, into the rates charged by *telephone and express companies*.

The supply of furs in Northern Canada showed a falling off as a result of the severe winter and the unusual depth of snow.

The investigation of the business of the Bell Telephone Company of Canada was conducted by the Board of Railway Commissioners.

*Free employment bureaus* were opened under the auspices of the Ontario Bureau

of Labour, at Ottawa, Hamilton, and London (2).

Steps were taken during 1907 towards the public ownership and operation of telephone systems in Manitoba, Saskatchewan and Alberta (3).

Arrangements for the organization of the Intercolonial and Prince Edward Island Railway Employees' Provident Fund were completed by the Government†.

A special committee of the House of Commons took evidence with reference to *co-operation* during February and March, the Honourable the Minister of Labour being chairman (4).

Regulations were issued by the Dominion Government during August, 1907, for the purpose of enforcing the Act respecting the inspection of meats and Canned Foods. (5)

A provision was enacted during August, 1907, by order-in-council of the Dominion Government with the object of furthering more effectively the purpose of the *Fair Wages* Resolution adopted in 1900.\*\*.

The *Lord's Day Act*, 1906, came into force on March 1, 1907. Action of a special nature was taken by the Attorneys-General of certain of the provinces, by way of pointing out to those charged with the administration of the criminal law the provisions of the new statute, and of defining what the attitude of the Provincial Department would be in the event of prosecutions being undertaken.\* The Canadian National Sunday League was organized at Toronto.

## REVIEW OF TRADE DISPUTES IN CANADA DURING 1907.\*

THERE was a slight increase in the number of trade disputes in Canada during the year 1907, compared with the previous year. There were in all 149 disputes in 1907, 138 in 1906, 87 in 1905, 103 in 1904, 160 in 1903, 123 in 1902, and 104 in 1901. There was a corresponding increase in the number of employees affected, which amounted approximately to 34,694 in 1907, and 26,014 in 1906. Although in these respects the past year appears to have been more unfavourable than the previous year, in other ways the loss and suffering from trade disputes were not nearly so great. No rioting or loss of life was reported through trade disputes, and no privations were felt by the general public in any way comparable to those undergone in the Provinces of Alberta and Saskatchewan owing to the coal shortage in 1906. A number of strikes were terminated, and many more were averted, in the course of the year, through the operation of the Industrial Disputes Investigation Act, 1907, which became law on March 22.†

The principal disputes of the year were a strike of coal miners in Alberta and Eastern British Columbia, a strike of coal miners at Springhill, N. S., strikes of plumbers and machinists at Toronto, Ont.

#### Strike of Coal Miners in Alberta and Eastern British Columbia.

During the month of March, a conference was held at Calgary, Alta., between the Western Coal Operators' Association and their employees, for the purpose of drawing up a new agreement to come into force on April 1, when the existing

\* The information contained in the present article is based on reports received from official correspondents of the *Gazette* and interested parties, relative to trade disputes which occurred during 1907. A comparison is also made with returns obtained in the five preceding years, analysis of which appears in the issues of the *Gazette* for January, 1903, January, 1904, and January, 1905, January, 1906 and January, 1907.

† A statement with reference to the enforcement of the act during 1907 is included in the annual review of Industrial and Labour Conditions in Canada during 1907, published in the present issue.

one was to expire. No settlement being reached at this conference, the employees forwarded to the Department early in April an application for the appointment of a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act, 1907. A few days later, applications were sent also by the seven companies who were members of the Western Coal Operators' Association. The Boards were accordingly appointed, and with the consent of the parties interested, were consolidated.

On April 15, some employees of the Crow's Nest Pass Coal Company quit work, and in the course of the week they were joined by the miners of the other companies involved, until there were about 3,450 men idle. On April 19, Mr. W. L. Mackenzie King, Deputy Minister of Labour, under instructions from the Minister of Labour, proceeded to Fernie, B. C., for the purpose of lending his good offices toward securing a resumption of work pending the enquiry by the Boards of Conciliation and Investigation. On May 6, the miners returned to work, an agreement having been signed to be in force for two years.

The Conciliation Boards met on April 30, but as negotiations for a settlement were then in progress, they adjourned from day to day without taking action, and on May 6 they adjourned *sine die*, on receiving information that the agreement had been signed.

#### Strike of Coal Miners at Springhill, N. S.

On May 8, an application was received at the Department of Labour for the appointment of a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act, 1907, to deal with certain matters in dispute between the Cumberland Railway and Coal Company of Springhill, N. S., and their employees. The application was sent by the men, who made a claim for higher wages for "dead work," and for an allowance for "local stone" occurring in pillar work. The report of the Board,

which was made on July 5, supported the contentions of the miners with regard to the first claim, but opposed them in the case of local stone in pillar work; the member of the Board appointed on the recommendation of the men, however, presented a minority report supporting both claims. On July 18, the miners notified the Department that they declined to accept the finding of the Board in the case of stone in pillars, and on August 1, they went on strike to the number of about 1,250 men, demanding payment of 4 cents per yard per lineal inch for this work. On October 31, the strikers returned to work on the terms recommended in the report of the Board.

**Strike of Plumbers at Toronto, Ont.**

On May 15, a general strike of plumbers took place at Toronto, Ont., in which there were involved about 104 firms and 500 employees. The cause of the dispute was the refusal of the employers to grant a demand for an increase in wages from 37½ to 45 cents per hour for journeymen, and from \$6.50 to \$8.50 per week for apprentices, and for the employment of union labour only. No definite settlement of this dispute took place, but by the end of September, it was reported that all but 6 important shops had come to terms with the Union. These firms continued to oppose the principle of "closed shops," and gradually filled the places of the strikers, conditions ceasing to be affected about the month of November.

**Strike of Machinists at Toronto, Ont.**

On June 8, a strike of machinists took place at Toronto, Ont., in which about 50 firms and 750 men were concerned. The dispute arose from a demand of the men for a reduction in working hours

from 10 to 9 per day. Many employers granted this demand before the strike was declared, and in the course of the first three weeks of the strike, a number of other firms also conceded the shorter working day, leaving about 400 men still out at the end of June. By the end of August, all but 16 firms had come to terms with the Machinists' Union, and in September, industrial conditions ceased to be affected by this dispute, the places of the strikers having been filled by the firms which had not conceded their demand.

**Magnitude of Trade Disputes.**

There were approximately 34,972 employees involved directly and indirectly in trade disputes which began during the year 1906. The following table shows the number affected according to the months in which the disputes commenced.

TOTAL NUMBER OF EMPLOYEES INVOLVED IN TRADE DISPUTES WHICH BEGAN DURING 1907.

**Disputes by Localities Affected.**

Of the 144 trade disputes which began during the year, 70 took place in the Province of Ontario, 28 in Quebec, 12 in Nova Scotia, and 11 in British Columbia. There were 8 in New Brunswick, 6 each in Manitoba and Alberta, and 1 in Sask-

atchewan. One dispute occurred in both Alberta and British Columbia, and another in Quebec, Ontario and Manitoba. There were no disputes reported in the Province of Prince Edward Island. The following table shows the number of disputes by provinces, according to the months in which they began:—

TABLE SHOWING TRADE DISPUTES IN CANADA BY PROVINCES DURING 1907.

Provinces.	Number of Disputes.												
	Jan.	Feb.	Mar.	April	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Total

Total.....	8	3	8	28	30	20	13	12	9	7	3	3	144

\* This dispute took place in Alberta and British Columbia.

† This dispute took place in Quebec, Ontario and Manitoba.

The following table shows the number of trade disputes in Canada during the

past seven years, according, to the provinces in which they began:—

TABLE SHOWING TRADE DISPUTES IN CANADA ACCORDING TO PROVINCES FOR THE YEARS 1901 1902, 1903, 1904, 1905, 1906 and 1907.

Locality.	Number of Disputes.							Total	
	1901	1902	1903	1904	1905	1906	1907		
Nova Scotia.....		5	12	7	7	7	11	12	61

Total.....		104	123	160	103	87	138	144	859

\* Dispute affected all provinces in Dominion with exception of Prince Edward Island.

† First dispute affected Ontario, Manitoba, Saskatchewan and Alberta; second, affected same provinces with the addition of British Columbia.

‡ Dispute took place in Quebec and Ontario.

\* The dispute took place in Quebec, Ontario and Manitoba, and the other in Alberta and British Columbia.

**Disputes by Months.**

From the preceding tables it may be seen that in 1907, the greater number of disputes began in the months of April

May and June. The following table, covering the past seven years, shows that these were the months of the greatest industrial disturbances during that period

TABLE SHOWING TRADE DISPUTES IN CANADA BY MONTHS DURING 1901, 1902, 1903, 1904, 1905, 1906 and 1907.

Months.	Number of Disputes.							Total

Total.....	104	123	160	163	87	138	143	859

**Causes of Disputes.**

Of the 144 disputes which took place in 1907, 65 were occasioned solely by demands for higher wages, while the question of wages entered into 88 disputes, either as a sole or as a contributory cause. In 11 disputes, the only cause

was a demand for shorter hours. There were 18 disputes caused by the employment of non-Unionists, and 7 by the discharge of employees.

The following table shows the causes of trade disputes of 1907, according to months:—

TABLE SHOWING CAUSES OF TRADE DISPUTES IN CANADA DURING 1907.

### Methods of Settlement.

Of the 149 disputes which were in existence during 1907, comprising 5 that began in 1906, and 144 that began in 1907, 146 were terminated in the course of the year, leaving three still unsettled. In three cases, settlements were affected by means of arbitration, and in 7 by means of conciliation. Of the latter,

four settlements were due, directly or indirectly, to the Industrial Disputes Investigation Act, 1907; two were settled under the Conciliation and Labour Act, and one was settled through the friendly intervention of the Quebec Bureau of Labour.

The following table shows the methods of settlement of trade disputes during 1907:—

TABLE SHOWING METHODS OF SETTLEMENT OF TRADE DISPUTES IN CANADA DURING 1907.

Methods.	Number of Disputes.												
	Jan.	Feb.	Mar.	April	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Total

**Results of Disputes.**

Of the 149 disputes which were in existence during 1907, 54 ended in favour of the employees, and in 34 cases compromises were reached. The employees were partially successful in 5 disputes, some firms conceding their demands, and in 3 cases the employers were not

immediately concerned. In 16 cases the results were indefinite, or not fully reported to the Department, and three disputes were still in existence at the close of the year.

The following table shows the results of trade disputes by months during the year:—

TABLE SHOWING RESULTS OF TRADE DISPUTES IN CANADA DURING 1907.

### ARBITRATION OF DISPUTE BETWEEN TORONTO RAILWAY COMPANY AND EMPLOYEES.

ON November 18th, 1907, four motor-men in the employ of the Toronto Railway Company as extra men, on reporting for duty, were instructed to take out open cars, and refused to do so. One of the number excused himself on the ground of not feeling well. All were thereupon dismissed from the service of the company. On appealing to the manager of the company, he confirmed the action of the subordinate officials in discharging them. The matter was then laid before the Conciliation Committee provided for the settlement of disputes in the agreement existing between the company and its employees, (\*) consisting of J. Gibbons, W. D. Robbins, Thomas Dulan and W. Murray, representing the men, and Manager R. J. Fleming and Superintendent James Gunn, representing the company. The Conciliation Committee failing to come to any agreement, resort was had to arbitration in accordance with the terms of the agreement. A Board of Arbitration was then constituted as follows: Kenneth J. Dunstan, representing the Toronto Railway Co.; J. G. O'Donoghue, representing the employees,

and Hon. W. R. Riddell, Judge of the High Court, as third arbitrator.

The arbitrators met on December 21st, and on the 23rd rendered their decision as follows:—

#### TO ALL TO WHOM THESE PRESENTS SHALL COME:

"WHEREAS, certain differences have arisen between the Toronto Railway Company and certain of the employees of the said Company, which differences the parties agree are within the provisions of Section 15 of a certain Agreement made the 13th Day of July, A. D., 1907, between the said Company and a Committee of its employees:

AND WHEREAS under the provisions of the said Section 15, the matters have been investigated and considered by the Conciliation Committee in the said Section 15 provided for:

AND WHEREAS the said Conciliation Committee have been unable to agree, and therefore the said differences are, under the provisions of the said Section, to be submitted to a Board of Arbitration:

AND WHEREAS the said Railway Company have appointed Kenneth J. Dunstan, Esq., their Arbitrator and the said employees have appointed John G. O'Donoghue, Esq., their Arbitrator; and the said Messrs. Dunstan and O'Donoghue have appointed the Hon. William Renwick Riddell, Judge of The High Court, the third Arbitrator;

AND WHEREAS, the said Board of Arbitrators, hereinbefore, mentioned have investigated and determined all the said difficulties and differences, and have decided upon their award:

NOW, the said Board of Arbitrators do hereby decide, determine and award as follows: that is to say:

1. THE said Company have no right to disobey any law or valid regulation laid down for their guidance or governance.

\* For a copy of this agreement, see the *Labour Gazette* for August, page 211.

2. The Employees of the said Company have a right to all the protection given them by any law or valid regulation.

3. This Board does not see fit to decide as to the validity of the Order of the Ontario Railway Commission in respect of the closing of the vestibules on the cars of the Railway Company.

4. The employees of the Railway Company, if considering that they did not receive the full benefit of the said Order or of any other regulations, have not taken the proper course to have such Order or regulation enforced.

5. No employee can be compelled under any penalty, except loss of wages for the time, to take out a car if by so doing he is thereby endangering either his own health or the safety of the public; but reporting for duty must as against any employee be considered *prima facie* as denoting his capacity to do any work to which he might, in the usual course of business be called.

6. The employees here concerned have no right to be paid for any time since they declined on any ground to take out the car offered to them.

7. If the real reason for so declining was danger to their own health or to the safety of the public, this reason should have been given and no other.

8. Hereafter, any employee declining to take out a car which is offered to him must, at the time, give his reason or excuse for so declining in writing, and he will for all purposes be held to the reason or excuse which he has so given, and he will in no case be allowed to add any further or other reason.

9. Hereafter any employee who desires to report simply for the purpose of reporting his inability, must make such report in writing at or before the time at which he is under the regulations of the Company from time to time required to report; and in such report he shall state his reasons for such inability; and he will for all purposes be held to such reasons.

10. If the real reason for declining to take out the car was the danger to the health of the employee or to the safety of the public even if the further ostensible reason was given them or at any other time that the right existed to have closed vestibules, the employees should not now be further punished than by loss of pay during the interval, upon their expressing regret (as they now do) that their position was not made clear from the beginning.

11. The Company must be the sole judge as to the policy and method of administering the affairs of the road in all matters, subject to the control of the ordinary tribunals of the land.

12. The action of the Company in this case has been fully justified.

IN WITNESS WHEREOF we have hereunto set our hands and seals this the Twenty-third Day of December, A.D., 1907."

The men were at once re-instated by the company.

## INSURANCE AND BENEVOLENT FEATURES OF SOME ONTARIO LABOUR ORGANIZATIONS.

THE present article contains statistics of insurance of a number of labour organizations of Ontario derived from the detailed report of the Inspector of Insurance and Registrar of Friendly Societies of Ontario; giving the transactions of these societies during the year 1906.

Two tables are given below, the first of which deals with life insurance, and the

second with sick and funeral benefits paid by these organizations. In previous volumes of the *Labour Gazette*, similar tables have been published, relating to the years 1899, 1900, 1903 and 1904, to which reference may be made for purposes of comparison.\*

## THE WORK OF THE DEPARTMENT OF LABOUR.

THE seventh annual report of the Department of Labour, describing the work of the Department during the fiscal year which ended on March 31, 1907, was published in December, and is now available for distribution.

The work of the Department is classified in the report under the following headings: (1) The *Labour Gazette*, (2) Conciliation and Arbitration, (3) Inquiry by Royal Commission into Dispute between Bell Telephone Company and Operators at Toronto, (4) The Railway Labour Disputes Act, (5) The Industrial Disputes Investigation Act, (6) Fair Wages on Public Contract Work, (7) False Representations to Induce Emigration—Mission of Deputy Minister of Labour to England—Imperial Legislation, (8) The Alien Labour Law, (9) Strikes and Lockouts in Canada during 1906, with comparative statistics for the years 1901 to 1905, inclusive, (10) Industrial Accidents in Canada during 1906, with comparative statistics for the years 1904 and 1905, (11) The Library of the Department, (12) The circulation of the *Labour Gazette*, (13) The distribution of the *Labour Gazette* and other publications, (14) Inquiries, correspondence and other departmental work.

### The Labour Gazette.

Attention is called in the report to two new articles added as regular features of the *Labour Gazette*, one a statement from month to month of industrial agreements between employers and employees throughout Canada, and the other, an abstract of information received at the department with reference to opportunities for the employment of labour. The quarterly articles on changes in wages and hours of labour showed that the upward tendency of wages was very marked, being more pronounced than in any previous year since 1903. Mention is made of special articles published in the *Labour Gazette* relating to rates of wages of farm hands, railway construction employees and unskilled labourers, building

operations in Canada during 1906, early closing arrangements, legislation of the Dominion and the various provinces affecting industrial and labour conditions, meetings of trades and labour congresses, manufacturers' associations and other bodies.

### Conciliation and Arbitration.

On two occasions the intervention of the Department took place under the Conciliation Act, in each case with satisfactory results, a strike of coal miners at Lethbridge, Alberta, and a strike of telephone operators at Toronto, being settled through the mediation of the Department. From the time of the passing of the Act, in 1900, to the close of the fiscal year, 1906-07, the friendly intervention of the Department had been requested on 41 occasions.

Inquiry by Royal Commission into a dispute between the Bell Telephone Company and operators at Toronto.

An account is given of the work of the Royal Commission appointed February 4 to inquire into the causes of the dispute of the telephone operators at Toronto. On the appointment of the Commission the strikers immediately reported for work, and in the course of the inquiry, a satisfactory arrangement was made by the company with its operatives, and all the former employees were taken back.

### The Railway Labour Dispute act.

There was no occasion for the application of the provisions of the Railway Labour Disputes Act, 1903, during the last fiscal period, there having been no strike or threatened strike, liable seriously to affect transportation during that period. This Act was consolidated with the Conciliation Act, 1900, during the year, in an Act Respecting Conciliation and Labour. In railway disputes, the companies and their employees may choose between the machinery provided by this Act, and that provided by the Industrial Disputes Investigation Act

of 1907, for the investigation of their grievances. The Report contains copies of the forms adopted by the Department to be used in the establishment of Conciliation and Investigation Committees and Arbitration Boards in railway disputes under the Conciliation and Labour Act.

#### **The Industrial Disputes Investigation Act.**

A review of the Industrial Disputes' Investigation Act, which became law on March 22, 1907, is given in the report, its principal features being set forth under separate headings. While no requests for the application of this Act were received at the Department during the remaining nine days of the fiscal year, many requests for copies of the Act, and inquiries concerning it were received. Copies of the various forms used in the administration of the Act are given in the report.

#### **Fair Wages on Public Contract Work.**

During the fiscal period of nine months 150 Fair Wages Schedules were prepared by the Fair Wages Officers of the Department, compared with 147 during the previous twelve months. There were 53 schedules prepared for the Department of Public Works, 84 for the Department of Railways and Canals, 10 for the Department of Marine and Fisheries, and 3 for the Commissioners of the Transcontinental Railway. In addition to these, supplies were furnished to the Post Office Department to the value of over \$860,000, contracts for which were not awarded until the rates of wages to be paid were approved by the Department of Labour. Attention is called to the adoption of a similar fair wages policy by the government of Manitoba, and to the introduction of a fair wages resolution in the Assembly of Natal, the mover of which stated that the proposed legislation was based on the practice of the Dominion of Canada.

#### **False Representation to Induce Immigration.**

The Report contains an account of the mission to England of Mr. W. L. Mac-

kenzie King, C. M. G., Deputy Minister of Labour, to endeavour to secure legislation by the British Parliament for the prevention of fraudulent representations in Great Britain to induce emigration to Canada. As a result of this mission a section was introduced into the Merchant Shipping Act, 1906, which was then before parliament, embodying the desired legislation.

#### **The Alien Labour Law.**

A summary is given of the legislation to restrict the importation and employment of aliens, since the passage of the first Act in 1897, and of the work of the Royal Commissions to enquire into the employment of aliens by the Grand Trunk Pacific Railway and the Pere Marquette Railway Company. This is followed by a brief synopsis of some of the more notable prosecutions under the Alien Labour Act, reported from time to time in the *Labour Gazette*.

#### **Strikes and Lockouts.**

In the portion of the Report dealing with trade disputes it is stated that 139 were reported to be in existence in Canada during the calendar year 1906, the number which began in that year being 5 more than in 1905, and 35 more than in 1904. The loss of time through trade disputes amounted approximately to 490,400 working days, compared with 284,140 in 1905, and 278,956 in 1904. A classified table is given of all the trade disputes in existence in Canada during 1906, showing in each case the occupation of the employees, the locality affected, the cause of the dispute, the method of settlement, the result, the dates of commencement and termination, and the number of establishments and employees affected. The returns of the disputes are further analyzed by months, according to their number and magnitude, and according to the class of industry concerned. By means of coloured charts an idea is afforded of the monthly fluctuations in the number and magnitude of the trade disputes in Canada since 1901.

### Industrial Accidents.

The number of fatal accidents to employees during 1906 reported to the Department was 1,107, an increase of nearly 20 per cent. over the preceding year. There were 252 deaths among persons engaged in the railway service. These occurred on a railway system of 20,000 miles, whereas it is shown that in Great Britain, in 1904, a railway system of 23,300 miles represented 399 deaths to employees, and in the United States a railway system of 212,349 miles represented 3,361 deaths to employees during the year ended June 30, 1905. The monthly variations in the number of fatal accidents occurring in the principal industries in Canada during 1904, 1905 and 1906, are exhibited on coloured charts, and tables are given showing the number of persons killed and injured during these years in the different trades and industries, classified according to the causes of the accidents.

### The Library of the Department.

As in previous years, the report contains a catalogue of reports and other documents that were added to the Department during the fiscal year.

### The Circular and Distribution of the "Labour Gazette."

The total circulation of the *Labour Gazette* on March 31, 1907, amounted to 12,138 copies, compared with 11,534 on June 30, 1906, and 10,362 on June 30, 1905. The average monthly circulation during the past fiscal year was 11,820 copies. There were distributed by the Department 133,236 separate publications in the nine months ended March 31, 1907, including 113,404 individual copies of the *Labour Gazette*, 9,691 indices, and 2,082 copies of annual reports.

### Other Departmental Work.

Mention is made of the large amount of correspondence conducted by the Department in connection with requests for information, which constitutes an increasingly important part of the Department's work. The classification of Dominion and Provincial legislation on a card catalogue was continued, also a card catalogue of wages and prices. Card indexes of labour organizations and manufacturers' associations of Canada were revised and kept up to date, and references to industrial matters in reports and other publications were entered on a card catalogue.

## IMMIGRATION AND COLONIZATION.

### Recent Immigration Returns.

IMMIGRATION through ocean ports during November, declared for Canada, was as follows:—

#### IMMIGRATION RETURNS DURING NOVEMBER 1907.

	Male	Female	Children under 12	Total
Immigrants . . .	4,963	2,552	2,074	9,589
Returned Canadians . . . . .	587	254	97	938
Tourists . . . . .	277	78	35	390
Totals . . . . .	5,827	2,884	2,206	10,917

A summary of immigration proper through ocean ports, declared for Canada,

from April to November, 1907, is as follows:—

#### IMMIGRATION BY OCEAN PORTS APRIL-NOVEMBER, 1906-07.

	Male	Female	Children under 12	Total
April . . . . .	24,972	5,052	4,414	34,438
May . . . . .	24,744	7,153	6,858	38,755
June . . . . .	18,107	7,171	7,041	32,319
July . . . . .	11,841	4,695	4,410	20,946
August . . . . .	8,584	4,431	3,921	16,936
September . . . . .	8,085	4,055	3,064	15,204
October . . . . .	6,939	3,640	3,018	13,597
November . . . . .	4,963	2,552	2,074	9,589
Total . . . . .	108,235	38,749	34,800	181,784
Corresponding mos. of 1906 . . . . .				125,709
Increase, 1907 . . . . .				56,075
Percentage of increase . . . . .				45%

The following is a statement of immigration from the United States, April to November (eight months), 1907, compared with the corresponding period of 1906:—

IMMIGRATION FROM THE UNITED STATES,  
APRIL-NOVEMBER, 1906-07.

By rail.....	April	9,106	
	May	6,324	
	June	4,702	
	July	4,796	
	August	3,683	
	Sept.	3,412	
	Oct.	4,171	
	Nov.	3,656	39,850
By highway, April to Nov...			3,967
Total.....			43,817
Corresponding mos. of 1906..			47,307
Decrease, 1907.....			3,490
Percentage of decrease....			7%

The total immigration to Canada from April to November, 1907, inclusive, compared with the corresponding months of 1906, was as follows:—

TOTAL IMMIGRATION TO CANADA, APRIL-NOVEMBER, 1906-07.

1907.			
Via ocean ports.....	181,784		
From the United States.....	43,817	225,601	
1906.			
Via ocean ports.....	125,709		
From the United States.....	47,307	173,016	
Increase, 1907.....		52,585	
Percentage of increase.....		30%	
Percentage of increase via ocean ports		45%	
Percentage of decrease from the U. S.		7%	

**British Emigration Returns.**

During the month ended November 30th, the number of passengers leaving the United Kingdom for British North America, according to official returns of the Board of Trade, was as follows:—

EMIGRATION FROM GREAT BRITAIN DURING NOVEMBER, 1907-06

Nationality	1907	1906
English.....	3,289	2,843
Scotch.....	635	824
Irish.....	253	257
Total of British origin.....	4,177	3,924
Foreign.....	3,023	2,153
Total.....	7,200	6,077

During the eleven months ended November 30, 1907, the total number of passengers leaving the United Kingdom for British North America, according to official returns of the Board of Trade, was as follows:

EMIGRATION FROM GREAT BRITAIN DURING ELEVEN MONTHS ENDED NOVEMBER 30, 1907-06

English.....	109,077	86,872
Scotch.....	33,164	21,867
Irish.....	7,445	4,388
Total of British origin.....	149,686	113,127
Foreign.....	33,348	25,686
Nationality not distinguished.....		21
Total.....	183,034	138,834

**Homestead Entries during November 1907.**

The following statement shows the number of homestead entries made in November, 1907, compared with November, 1906:—

STATEMENT SHOWING THE NUMBER OF HOMESTEAD ENTRIES MADE DURING THE MONTH OF NOVEMBER, 1907, AS COMPARED WITH NOVEMBER, 1906.

Agency.	1907	1906	Increase	Decrease
Battleford.....	343	388	.....	45
Brandon.....	9	10	.....	1
Calgary.....	171	109	62	.....
Dauphin.....	72	59	13	.....
Edmonton.....	265	329	.....	64
Estevan.....	49	160	.....	111
Humboldt.....	154	327	.....	173
Kamloops.....	22	10	12	.....
Lethbridge.....	170	245	.....	75
Moose Jaw.....	447	.....	447	.....
New Westminster....	1	6	.....	5
Prince Albert.....	92	123	.....	31
Regina.....	112	715	.....	603
Red Deer.....	129	220	.....	91
Winnipeg.....	80	117	.....	37
Yorkton.....	145	148	.....	3
Total.....	2,261	2,966	534	1,239

It will be seen that there has been a net decrease in the number of homestead entries made in November, 1907, compared with November, 1906, of 705.

A statement of the homestead entries made during the first eleven months of the present year, compared with the corresponding period of the last calendar year, is as follows:—

STATEMENT OF HOMESTEAD ENTRIES  
JANUARY-NOVEMBER, 1907-06.

Month.	1907	1906	In-crease	De-crease
January.....	1,111	1,903	.....	792
February.....	1,033	2,036	.....	1,003
March.....	1,589	4,018	.....	2,429
April.....	2,594	6,189	.....	3,595
May.....	3,253	4,583	.....	1,330
June.....	4,574	5,369	.....	795
July.....	3,690	4,174	.....	484
August.....	2,814	3,388	.....	574
September.....	2,395	2,595	.....	200
October.....	2,252	3,389	.....	1,137
November.....	2,261	2,966	.....	705
Total.....	27,566	40,610	.....	13,044

Nationalities of Homesteaders.

The nationalities of homesteaders, as reported by the several agencies of the Department of the Interior in Manitoba, Saskatchewan, Alberta and British Columbia, during the month of November, 1907, were as follows:—

NATIONALITIES OF HOMESTEADERS  
JANUARY-NOVEMBER, 1907-1906.

Nationalities.	No. of Entries.
Canadians from Ontario.....	299
“ Quebec.....	36
“ Nova Scotia.....	11
“ New Brunswick.....	11
“ Prince Edward Island.....	8
“ Manitoba.....	80
“ Saskatchewan.....	111
“ Alberta.....	48
“ British Columbia & Yukon 1.....	9
Persons who had previous entry.....	216
Newfoundlanders.....	25
Canadians returned from the United States.....	25
Americans.....	557
English.....	344
Scotch.....	81
Irish.....	19
French.....	27
Belgians.....	8
Swiss.....	3
Italians.....	2
Roumanians.....	1
Syrians.....	53
Germans.....	183
Austro-Hungarians.....	8
Hollanders.....	8
Danes (other than Icelanders).....	8

.....	1	.....
Totals.....	1,691	403,036.06

In November, 1906, the number of patents issued was 1,209, covering an area of 198,996,86, showing an increase for the month of November, 1907, of 482 in the number of patents issued, and of 204,039,20 acres in the area patented.

Notes.\*

The Bureau maintained at Toronto for some time past by the Government of the Province of Ontario for the distribution of immigrants, was closed on December 31, 1907.

During the fiscal year ended June 30, 1907, the *Canadian Pacific Railway Company* sold lands to the value of \$994,840 at an average of \$5.92 per acre. A portion of these sales were made at low rates, on contracts made previous to the beginning of the year. The price on lands actually sold during the year was \$8.09 per acre. The Company still holds about \$14,825,496 acres of land.

It was officially stated that the *Salvation Army* had chartered ten steamships for the immigration business of 1908. Eight of these steamships will sail out of Liverpool and two out of Glasgow. The first vessel of the season to sail will be the *S.S. Kensington* out of Liverpool on February 20th, with passengers booked to points in British Columbia. The following steamships will arrive in April and throughout the season, the immigrants to be distributed throughout Canada. Agricultural labourers, as well as domestic servants, will be encouraged to emigrate.

In the annual statement of the chief medical officer of the Immigration Branch Canada, the following review of the results of the system of *inspecting immigrants*, inaugurated in 1903, was made:—

"There seems to be but one conclusion to be arrived at, which is to the effect that, whether compared with those entering from the United States or those crossing from Britain, Canada to-day is absolved, not only from accusation that she is the recipient of undesirables, not admissible elsewhere, but further, that she is receiving and welcoming more largely than ever, a population, whether from Britain or the States, which will mingle at once with our own people, and adapt themselves to our customs, employment and laws. During the five years' medical inspection enforced, 11,807 immigrants have been detained, and 2,222 deported. As to Oriental immigration inspection, there were 88 new arrivals of Chinese at Victoria and Vancouver. Of these, with returned Chinese formerly in Canada, 185 were detained, but only one deported. Of Japanese, one in every two was detained, and one in 54 deported at Victoria, while at Vancouver one in three was detained and one in ten deport-

\*For statement re the action of the Immigration Branch of the Department of the Interior, Canada, with reference to immigration during the present winter season, see opening page of the present issue of the *Labour Gazette*.

ed. Of Hindus, totalling 2,117. Some 508, or one in four, were detained, and 112, or one in eighteen, were deported.

The following return re *arrivals of Chinese* in Canada since Jan. 1, 1904, the date on which the head-tax on Chinese was raised from \$100 to \$500, is published by courtesy of the Deputy Minister of Trade and Commerce:—

	Exempt.	Paying \$500 Tax.
Jan. 1, 1904, to June 30, 1904...	24	1
Year ended June 30, 1905.....	69	8
Year ended June 30, 1906.....	146	22
Year ended March 31, 1907 (9 months).....	200	91
March 31, 1907, to Nov. 30, 1907	471	1,112

With reference to certain features of the *Chinese Immigration Act* of the Dominion, and to the alleged evasion of certain sections of the Act by Chinese, the following order-in-Council was passed by the Government of British Columbia during December:—

It is provided by sub-section 3 of section 7 of the "Chinese Immigration Act," being Chapter 95 of the Revised Statutes of Canada, 1906, that persons of Chinese origin claiming, on their arrival in Canada, to be students, but who are unable to produce the certificate establishing that fact, as required by a former branch of the section, shall be entitled to a refund of the tax of five hundred dollars exacted from them under the authority of said Act, on the production, within eighteen months from the date of their arrival, of certificates from teachers in any school or college in Canada showing that they are and have been, for at least one year, bona fide students in attendance at such school or college.

It has been drawn to my attention by the Board of School Trustees for the City of Victoria that the above enactment enables large numbers of Chinese to avoid paying the Chinese Capitation tax, and, at the same time, cast upon said Board, and other school authorities in this Province, the burden of teaching Chinese children the English language for one year merely to equip them to compete in this Province with white labourers. At the present time, some fifteen or twenty Chinese children, whose ages range from nine to fourteen years, are seeking admission to the Public Schools of Victoria. These children, who have recently arrived from China, are unable to speak English. How many more will follow it is impossible to say. Judging from the experience of similar cases in the past, these children, if admitted, will attend school long enough to obtain the above-mentioned certificate, and by that time they will have obtained a sufficient knowledge of English to enable them to obtain employment as domestic servants. The School Boards of Victoria and Vancouver, which are the ones principally affected by this new Mongolian invasion, strongly object to devote their revenues to the education of Chinese Coolie children to furnish them forth as competitors with white labourers. It is the experience of educational authorities that bona fide Chinese students do not come to Canada. Higher education can now be obtained in some parts of China and in many places in Japan. The colleges and universities

of Europe are open to Chinese wishing to prosecute advanced studies. There is, therefore, no reason why the Chinese Immigration Act should exempt Chinese students from its provisions, as any such provision is sure to be made a cloak for the introduction of Chinese into Canada, and especially into British Columbia; to compete in various callings with our own citizens.

The undersigned would, therefore, recommend that the Dominion Government be requested to promote legislation at the earliest possible time during the approaching session of Parliament by which the said subsection 3 of section 7, and all other provisions in the Chinese Immigration Act exempting students from the payment of the capitation tax, shall be repealed.

And that a copy of this report, if approved, be forwarded to the Secretary of State of Canada.

Dated this 14th day of November, A. D. 1907.

(Sgd.) H. E. YOUNG,  
*Minister of Education.*

Approved this 14th day of November, A. D. 1907.

(Sgd.) R. McBRIDE,  
*Presiding Member of the Executive Council.*

Approved by His Honour the Lieutenant-Governor the 16th day of December 1907

### JAPANESE IMMIGRATION TO CANADA—THE MINISTER OF LABOUR CONCLUDES HIS MISSION—THE DEPUTY MINISTER'S ENQUIRY CONCLUDED.

THE Honourable Rodolphe Lemieux, Minister of Labour, who had been appointed envoy to Japan to discuss with the Japanese government the question of Japanese immigration to Canada, having concluded his negotiations with the Japanese Government, sailed from Tokio on December 26, 1907, on the Steamship "Empress of China," reached Vancouver, B. C., on January 6, 1908, and arrived at Ottawa on January 10.

The enquiry by Mr. W. L. Mackenzie King, C. M. G., Deputy Minister of Labour, the special commissioner appointed

by the Dominion Government, to inquire into the methods by which Oriental labourers have been induced to emigrate to Canada was concluded Nov. 30, the proceedings under the Commission being outlined in the Labour Gazette for December. Mr. Mackenzie King left Vancouver on December 5, and after paying a brief visit to San Francisco where he made a brief investigation into the conditions at that port respecting Oriental immigration, reached Ottawa on December 17.

### FAIR WAGE SCHEDULE IN GOVERNMENT CONTRACTS AWARDED DURING DECEMBER, 1907.

The following is a list of contracts awarded by the Department of Railways and Canals, the Department of Public Works and the Department of Marine and Fisheries, Canada, which have received the signatures of both parties, together with the fair wages schedule inserted in each contract, setting forth the minimum rate of wages to be paid to the labourers engaged upon the work. A statement of orders for supplies given by the Post Office Department is added.

#### Department of Public Works.

Painting on Districts 1, 2 and 3, I. C. Ry.; date of contract, December 23, 1907; amount of contract, schedule rates; contractor, Luc Vaillancourt, of L'Islet, Que.

FAIR WAGES SCHEDULE.

All mechanics, labourers or other persons who perform labour in the construction of the work hereby contracted for, shall be paid such wages as are generally accepted as current for competent workmen in the district in which the work is being performed, and if there is no current rate in such district, then a fair and reasonable rate, and shall not be required to work for longer hours than those fixed by the custom of the trade in the district where the work is carried on, except for the protection of life or property, or in the case of other emergencies. In the event of a dispute arising as to what is the current or a fair and reasonable rate of wages, or what are the current hours fixed by the custom of the trade, it shall be determined by the Minister of Labour whose decision shall be final.

These conditions shall extend and apply to moneys payable for the use or hire of horses or teams, and the persons entitled to payment for the use or hire of horses or teams shall have the like right in respect of moneys so owing to them as if such moneys were payable to them in respect of wages.

In the event of default being made in payment of any money owing in respect of wages of any mechanic, labourer or other person employed on the said work, and if a claim therefor is filed in the office of the Minister of Railways and Canals and proof thereof satisfactory to the Minister is furnished, the Minister may pay such claim out of any moneys at any time payable by His Majesty under such contract, and the amounts so paid shall be deemed payments to the contractor.

Painting on District No. 4, I. C. Ry.; date of contract, December 23, 1907; amount of contract, schedule rates; contractors, Cloutier & Gaudreau, of L'Islet, Que.

Shoe workers.....	Levis, Que.....	Demand of an employes for an increase in wages, others stopped work in sympathy.....	1	57	.....	40	"	3	No settlement reported at end of month.

\* Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where after the declaration of a strike, some of the original strikers have returned to work or had their places filled with new hands, or where establishments affected have found that for either of these reasons, or both, or for other causes, their business is no longer seriously affected. In such cases while, in one sense, it may be true that a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon the business interests of the community is concerned a record of the continuance of such a dispute might be misleading. The list of trade disputes published in the present table, therefore, includes mention only of such disputes as during the month or at its termination affected, to an appreciable degree, the carrying on of the industrial or business operations of the firm or establishments concerned. mention moreover, is not made of disputes involving less than six employees, or less duration than 24 hours.

*Trades affected by new disputes.*—The following table shows the trades affected by the new disputes of the month, and the number of working people affected in each group of trades:—

Trades.	No. of Disputes	No. of Workers.
Building.....	1	42
Clothing.....	2	235
Total.....	3	277

*Localities affected by new disputes.*—The new disputes of the month occurred in the following provinces of Canada:—

Province.	No. of Disputes.
Quebec.....	2
Ontario.....	1
Total.....	3

*Causes of disputes.*—The following were the causes of the new disputes of the month:—

Cause.	No. of Disputes.
For higher wages.....	1
Non-payment of wages.....	1
Against conditions of employment ..	1
Total.....	3

*Methods of settlement.*—Of the 6 disputes in existence during December, 3 were terminated in the course of the month, leaving 3 still in existence at the close. One dispute was settled through negotiations between the parties concerned, one by the resumption of work after the removal of the cause, and one by the owners taking the job away from the contractors and paying the wages due.

*Results of disputes.*—Of the 3 disputes that were terminated, one resulted in favour of the employers, in one a compromise was reached, and in the third,

which arose from a conflict between two unions, the result was indefinite, the cause of the trouble being removed.

### Disputes which Commenced Prior to the Beginning of the Month.

The trade disputes in existence during November, which began in previous months, comprised strikes of bricklayers at Victoria, B. C., longshoremen at St. John, N. B., and boilermakers and helpers at Halifax, N. S. A brief account of these disputes is given below:

#### Strike of Bricklayers at Victoria, B. C.

A strike of bricklayers employed upon St. Joseph's hospital at Victoria, B. C., took place on November 15. The cause of the strike was a dispute between the bricklayers' and stonecutters' Unions over the right to lay cut stone. The stone was laid by a man who was a member of both the unions, and on the completion of this work, the bricklayers returned, having been out for three weeks. About 50 men were involved in this dispute.

#### Dispute of Longshoremen at St. John, N.B.

A dispute of longshoremen at St. John, N. B., which began on November 22, on account of the refusal of the shipping companies to pay wages at the rate of 40 cents per hour, was terminated on December 4, when work was resumed at the rate of 32½ cents per hour, an increase of 2½ cents per hour above last winter's rate. It was reported that 7 firms were interested in the settlement of the dispute. According to the Longshoremen's Union, 1,000 men were thrown out of work by the dispute.

#### Strike of Boilermakers and Helpers at Halifax, N. S.

No change was reported in the situation of the strike of boilermakers and helpers of the Halifax Graving Dock Company, which began on September 25, on account of the refusal of the employers to grant a demand for an increase

in wages. About 89 employees were involved directly and 100 indirectly in this dispute.

### **New Disputes.**

The new disputes of the month affected corset workers at St. Hyacinthe, Que., boot and shoe workers at Levis, Que., and carpenters and builders' labourers at Toronto, Ont.

#### **Dispute of Corset Workers at St. Hyacinthe, Que.**

On December 12, the Eastern Townships Manufacturing Company presented a document to their employees for their signatures, by which each employee would bind himself to leave in the hands of the Company 10 per cent. of his weekly earnings, until the sum so left amounted to \$100, which would be invested in a share of the capital stock of the company. Any employee who was unwilling to agree to these terms could be discharged by the company without any other cause. The employees signed this document when it was first presented, but on December 13, they all signed another paper withdrawing their signatures to the company's document, and stating that no understanding had yet been reached between the parties. Operations in the factory ceased from that date, the employees claiming that they were locked out, and no settlement of the dispute was reached during the month.\*

#### **Strike of Boot and Shoe Workers at Levis, Que.**

On December 3, the shoe machine workers employed by the firm of J. B. Blouin & Son, at Levis, Que., declared a strike on account of the refusal of the employers to grant a request of the man in charge of the sole finishing department for an increase of 20 per cent. in his wages. On December 6, according to a report received from the employers, the leather cutters went out, having been

refused a demand for payment of wages by the piece instead of by the week. On December 13, about 40 other employees, members of the lasters' union, joined the strikers in sympathy, and they all remained out during the rest of the month. About 38 male and 40 female employees were indirectly affected by the dispute. The firm stated that there were 114 men and 31 women workers effected by the dispute. It was claimed by the employers that the man who asked for an increase in wages did not do his work properly, and did not care whether he remained there or not. They also claimed that there would be no difficulty in filling his place, and that the question of wages only affected this one man. On the other hand, the strikers claimed that the employee who demanded the increase in wages was a first-class hand, who was paid by the piece at a price far inferior to that paid in Quebec factories, and that he had asked for an increase with the object of paying more to the 6 men or boys working for him, who could only earn between \$3 and \$4 per week at the prices paid. During the progress of the dispute, the strikers sought work in other factories.

#### **Strike of Carpenters and Labourers at Toronto, Ont.**

On December 9, about 16 carpenters and 26 labourers employed on the construction of a gum factory at Toronto, Ont., stopped work on account of the failure of the contractors to pay them their wages, the arrears amounting to the aggregate sum of \$850. The men entered a mechanics' lien against the building for the recovery of their wages. The owners of the property then took the job out of the hands of the contractors and paid all the overdue wages. Work was resumed on December 14 under the supervision of the owners.

The table published herewith is a compilation of the trade disputes of the Dominion of Canada, which began or were in continuance during the month of December, and which have been reported to the department.

\* On another page of the present number of the *Labour Gazette*, an account is given of the action of the Department with reference to this dispute, under the Industrial Disputes Investigation Act, 1907.

## INDUSTRIAL ACCIDENTS DURING THE MONTH OF DECEMBER, 1907.

Under this heading account is taken of such accidents only as were sustained by workmen in the course of their employment and resulted in loss of life or limb or other serious impairment to industrial efficiency. The accidents reported are such as have come to the notice of the Department through the press of the country or correspondents of the *Labour Gazette*. The department is also indebted to the Bureau of Mines of Ontario and British Columbia, to the office of the factories' inspectors of the province of Ontario, the Ontario Railway and Municipal Board, and to the Department of Railways and Canals, Ottawa, for their kind assistance in furnishing the Department with the statement of returns of accidents reported to them.

**I**NDUSTRIAL accidents occurring to 283 individual workpeople in Canada during the month of December, 1907, were reported to the Department of Labour. Of these, 88 were fatal and 195 resulted in serious injuries.

The number of fatal accidents reported in December, 1907, was 81 less than the previous month and 87 more than in December, 1906.

Of 188 returns received during the month giving the ages of the victims of industrial accidents, 16 referred to persons under twenty-one years of age, 33 to persons between twenty-one and forty-five, 16 to persons over 45; 93 persons were over twenty-one years of age, but their exact ages were not specified.

The following is a record of the accidents of the month by industries and groups of trades:—

STATEMENT OF ACCIDENTS DURING DECEMBER 1907, BY INDUSTRIES AND TRADES.

### Nature of Fatalities and Accidents.

The chief disasters of the month were, the killing of four railway construction hands by the fall of a boulder at Key Harbour, Ont.; the death of three workmen by the explosion of a boiler at Glace Bay, N. S., and the death of an engine crew at Angler, Ont.

### Disaster to Members of Construction Gang at Key Harbour, Ont.

On December 5th, some eighteen men were working in a rock cut on the Canadian Northern Railway near Key Harbour, Ont., when a piece of rock rolled down from the face of the cut, exploding a charge of dynamite, which killed four workmen, three instantly, and injured several others. The cause of the accident could not be ascertained, as no dynamite had been used in the cut for several days previous.

### Boiler Explosion at Glace Bay, N. S.

On the morning of December 21st, a boiler explosion occurred at the engine house of No. 2 colliery of the Dominion Coal Company, at Glace Bay, N. S., by which three workmen lost their lives and three others were severely burned and cut.

### Railway Wreck Near Angler, Ont.

On December 16, owing to the removal of a rail by a section gang, proper precautions not having been taken to flag the incoming train, engine No. 96, Canadian Pacific express eastbound, was ditched near Angler, Ont., and the fireman and engineer killed.

### Record by Trades and Industries.

*Agriculture.*—There were 20 fatal and 21 non-fatal accidents happening to persons engaged in agriculture during December, 1907, compared with 23 killed and 25 injured in November, and 11

killed and 21 injured in December, 1906. Five of the deaths were due to runaways, 4 to falling material, 3 to falls, 3 to live stock, 2 to machinery, 2 to being struck by trains, and 1 to drowning. Of the serious accidents, 6 were due to explosions, 5 to falls, 4 to machinery, 3 to falling material, and 1 each to live stock, to being run over, and to a runaway.

*Fishing and hunting.*—During December, a fisherman at New Westminster, B. C., fell out of his boat and was drowned. In the preceding month, the record was 2 deaths, and in December, 1906, 3 deaths.

*Lumbering.*—In the month of December, 1907, death through accident occurred to 9 workers in this group, and 7 others were injured. In November, 10 were killed and 10 injured, and in December, of last year, the record was 14 killed and 21 injured. Trees fell on and killed 6; a log rolled on a workman and killed him; 1 was drowned, and 1 had his head caught in an elevator. Three of the accidents were caused by falling material and 1 each by a fall, by exposure by tools and by machinery.

*Mining.*—Fifteen mine-workers were killed and 17 injured during December, 1907, compared with 13 killed and 20 injured in the previous month, and 9 killed and 16 injured in December, 1906. Eight of the deaths were due to explosions, 3 to falling material, 2 to being struck by cars or boxes, 2 to being crushed between cars, and 1 each to a fall and to being struck by a runaway car. Of the serious injuries, 8 were due to falling material, 5 to explosions, 3 to being struck by cars, and 1 to a fall.

*Building trades.*—There were 2 deaths due to accident in this group during December, 1907, and 8 accidents, compared with 6 killed and 23 injured in November, and 3 killed and 21 injured in December of last year. A painter at Niagara Falls, Ont., was killed by falling from a ladder and a builders' labourer at Port Colborne was killed by falling 176 feet from the roof of a house. Five of the other accidents were caused by falls, 2 by machinery and 1 by falling material.

*Metal trades.*—During December, there were 6 fatal and 50 non-fatal accidents in this group, compared with 8 killed and 37 injured in the preceding month, and 11 killed and 30 injured in December, 1906. Two of the fatalities were due to electric shock, and one each to machinery, to being run over by a train, to being struck by the cable of a derrick, and to drowning. Of the injuries, 13 were due to machinery, 12 to explosions, 8 to falling material, 7 to falls, 5 to flying splinters, etc., 2 to being run over by trains, and 1 each to molten metal, to an elevator and to electric shock.

*Woodworking trades.*—Three workers were killed and 15 injured during December, 1907. In the preceding month, there were 14 injured, and in December of last year, 7 injured. A woodworker at Deseronto, Ont., fell against a circular saw and was killed, a furniture worker at Winchester, Ont., was also killed by coming in contact with a saw, and an engineer in a casket factory at Mount Forest, Ont., was killed by being caught in shafting. Thirteen of the minor accidents were caused by machinery and 2 by falling material.

*Printing trades.*—Two minor accidents, due to machinery, were recorded in December. The month before there were three accidents and in December, 1906, 2.

*Clothing trades.*—Two accidents caused by machinery occurred in December; in November there were 2 accidents, and in December, 1906, 2.

*Textile trades.*—In these trades there were 5 non-fatal accidents in December, 1907, 4 of which were due to machinery and 1 to falling material.

*Food and tobacco preparation.*—There was 1 minor accident in this group, caused by machinery. In the preceding month, the record was 1 killed and 13 injured, and in December of last year, 2 killed and 7 injured.

*Leather trades.*—A harness maker during December fell down an elevator shaft at St. Catharines and was injured internally. There were no accidents in the previous month, nor in December, 1906.

DEPARTMENT OF LABOUR, CANADA,  
STATISTICAL TABLE SERIES F., No. 50.

TABLE OF FATAL ACCIDENTS DURING THE MONTH OF DECEMBER, 1907.

Trade or Industry.	Locality.	Date.	No. Killed-	Cause of Fatality.	
<i>Agriculture—</i>					
Farmer.....	Village des Aulnaies, Que. ....	Dec.	2	1	Load of wood fell on him.
"	South Battleford, Sask. ....	"	2	1	Fell 60ft. into well.
"	Sowerby, Ont. ....	"	4	1	Drowned, ice gave way.
"	Garden Hill, Ont. ....	"	7	1	In a runaway.
"	Saskatoon, Sask. ....	"	7	1	Caught in threshing machine.
"	St. Lambert, Que. ....	"	7	1	In a runaway.
"	Putnam, Ont. ....	"	4	1	Trampled to death by team.
"	Hartney, Man. ....	"	4	1	In a runaway.
"	Moorefield, Ont. ....	"	12	1	Struck by train at crossing.
"	Hamilton, Ont. ....	"	13	1	In a runaway.
"	Glenbow, Alta. ....	"	10	1	Fell from bay loft.
"	Asbestos, Que. ....	"	17	1	Kicked by a horse.
"	Kingston, Ont. ....	"	27	1	Blow of hammer caused septicemia.
"	Osage, Sask. ....	"	21	1	In a runaway.
"	Sussex, N.B. ....	"	7	1	Struck by train.
"	Wellandport, Ont. ....	"	24	1	Fell from building.
Farmer's son.....	Raymond, Alta. ....	"	22	1	Horse fell on him.
"	Cap Rouge, Que. ....	"	14	1	Load of wood fell on him.
"	Mildmay, Ont. ....	"	14	1	Tree fell on him.
Farm hand.....	London, Ont. ....	"	21	1	Vat of syrup rolled on him.
<i>Fishing and Hunting—</i>					
Fisherman.....	New Westminster, B.C. ....	Dec.	6	1	Drowned, fell out of boat.
<i>Lumbering—</i>					
Logger.....	Long Lake, Ont. ....	"	2	1	Drowned, ice gave way.
"	Lakehurst, Ont. ....	"	12	1	Tree fell on him.
"	Buctouche, N.B. ....	"	13	1	Tree fell on him.
"	Kenora, Ont. ....	"	10	1	Log fell on him.
"	Mildmay, Ont. ....	"	14	1	Tree fell on him.
"	Jacques Cartier River, Que. ....	"	25	1	Tree fell on him.
"	Tabusmtac, N.B. ....	"	16	1	Tree fell on him.
"	Richmond, Que. ....	"	21	1	Tree fell on him.
Saw mill hand.....	Hull, Que. ....	"	16	1	Head caught in elevator.
<i>Mining—</i>					
Miner.....	Cobalt, Ont. ....	"	9	1	Explosion of dynamite.
"	Cobalt, Ont. ....	"	8	1	Fell 66ft. in shaft.
"	Eustis, Que. ....	"	16	1	Struck by underground car.
" (fireman).....	Thetford Mines, Que. ....	"	9	1	Crushed between cars in mine.
" (fireman).....	Glace Bay, N.S. ....	"	22	2	By boiler explosion.
"	Cobalt, Ont. ....	"	19	1	Explosion of dynamite.
"	Sydney, N.S. ....	"	27	1	Caught between coal cars.
"	Cobalt, Ont. ....	"	23	1	Explosion of dynamite.
"	Extension, B.C. ....	"	7	2	Gas ignited.
"	Westville, N.S. ....	"	6	1	Box fell on him.
Quarryman.....	Hull, Que. ....	"	16	1	Explosion of dynamite.
"	New Rockland, Que. ....	"	21	1	By falling rock.
"	Ottawa, Ont. ....	"	14	1	Arm of derrick broke.
<i>Building—</i>					
Painter.....	Niagara Falls, Ont. ....	"	20	1	Fell from ladder.
Builder's labourer.....	Port Colborne, Ont. ....	"	7	1	Fell from roof 176 ft.
<i>Metal Trades—</i>					
Machinist.....	Fort William, Ont. ....	"	1	1	Caught in belting.
Electrical lineman.....	Maisonneuve, Que. ....	"	16	1	Electrocuted.
" worker.....	Shawingan, Que. ....	"	17	1	Electrocuted.
"	St. Helene, Que. ....	"	9	1	Run over by train.
Structural iron worker.....	Hartwell's Locks, Ont. ....	"	13	1	Struck by cable of derrick.
"	Vancouver, B.C. ....	"	24	1	Drowned, fell from bridge.
<i>Woodworking and Furnishing Trades—</i>					
Woodworker.....	Deseronto, Ont. ....	"	4	1	Fell against circular saw.

STATISTICAL TABLE SERIES F., No. 50.

TABLE OF FATAL ACCIDENTS DURING THE MONTH OF DECEMBER, 1907.

Trade of Industry.	Locality.	Date.	No. Killed	Cause of Fatality.	
Furniture worker.....	Winchester, Ont. ....	"	28	1	Contact with saw.
Engineer casket factory	Mount Forest, Ont.....	"	2	1	Caught in shafting.
<i>Railway Employees—</i>					
Engineer.....	Angler, Ont.....	"	17	1	Derailment of engine.
Fireman.....	Regina, Sask.....	"	13	1	Runover by train.
".....	Angler, Ont.....	"	17	1	Derailment of engine.
Brakeman.....	Ericau, Ont.....	"	3	1	Caught between cars.
".....	Brocket, Alta.....	"	22	1	In head on collision.
Car repairer.....	Barrie, Ont.....	"	19	1	Struck by engine.
".....	Toronto Junction, Ont.....	"	11	1	Crushed under car, trestle gave way.
Switchman.....	Fernie, B.C.....	"	6	1	Run over by train.
Construction hand.....	Merrickville, Ont.....	"	11	1	Run over by hand car.
".....	Key Harbour, Ont.....	"	5	4	Explosion of dynamite.
".....	Fernie, B.C.....	"	3	1	In a rockslide.
".....	Hartwell's Locks, Ont.....	"	13	1	Derrick boom fell on him.
".....	Near Vermillion, Ont.....	"	22	1	Explosion of dynamite.
".....	Near Vermillion, Ont.....	"	19	1	Explosion of dynamite.
".....	Ste. Euphémie, Que.....	"	24	1	In a rockslide.
Sectionman.....	Peterborough, Ont.....	"	11	1	Drowned, fell off bridge.
Freight handler.....	Montreal, Que.....	"	23	1	Run over by locomotive.
<i>Navigation—</i>					
Sailor.....	Deadman's Cave, N.S.....	"	6	1	Drowned, vessel wrecked.
".....	Near New Westminster, B.C.....	"	10	1	Drowned, fell overboard.
Mate.....	Bridgewater, N.S.....	"	8	1	Drowned, fell overboard.
Longshoreman.....	New Westminster, B.C.....	"	7	1	Run over by street car.
Diver.....	Fort William, Ont.....	"	24	1	Drowned, dress burst.
Sailor.....	Grand Manan, N.B.....	"	24	1	Drowned.
Fireman.....	Lunenburg, N.S.....	"	24	1	Drowned, fell off wharf.
<i>General Transport—</i>					
Delivery employee.....	Montreal, Que.....	"	13	1	In collision with street car.
Teamster.....	Port Rouge, Que.....	"	16	1	Run over by load of wood.
<i>Miscellaneous—</i>					
Cement mill worker.....	Shallow Lake, Ont.....	"	1	1	Caught in machinery.
Commercial traveller.....	Davelryville, Que.....	"	3	1	Struck by train at crossing.
Civil engineer.....	Cedars, Que.....	"	16	1	Burned to death in house on works.

*Railway service.*—In this category the record for December was 20 killed and 27 injured. In November, there were 51 killed and 26 injured, and in December, 1906, 18 killed and 27 injured. Of the fatalities, 6 were caused by explosions, 4 by being run over, 2 each by derailments, by being caught between cars, and by rock slides, and 1 each by a collision, by being struck by an engine, by falling material and by being drowned. Five each of the other accidents were caused by collisions, by falls and by falling material, 4 by being run over, and 2 each by being

caught between cars, by derailments, by flying material and by being struck by engines.

*Navigation.*—During December, there were 7 workmen killed; in the preceding month, 13 killed and 7 injured, and in December, 1906, 7 killed and 12 injured. Six of the deaths were due to drowning and 1 to being run over by a street car.

*General transport.*—A delivery employee in Montreal, Que., was killed by his vehicle coming in collision with a street car, and a teamster at Port Rouge, Que. fell in front of his load of wood and was

killed by being run over. Five workmen were injured by falls, 2 by falling material, and 1 each by being run over, by a collision, by being caught between cars, and by being struck by an engine.

*Civic employees.*—In this group 11 workmen were more or less injured during December; in November, 3 were injured, and in December of last year, 2 were killed and 4 injured. Five firemen were badly burned at fires; 2 of the injuries were due to falls; the Chief of Police at Napanee, Ont., had an eye injured by a prisoner, and a civic employee a St. Thomas, Ont., broke his neck by falling into a sewer.

*Miscellaneous.*—Among these workmen there were 3 killed and 10 injured. In November, there were 7 killed and 12 injured, and in December, 1906, 3 killed

and 15 injured. A cement mill employee at Shallow Lake, Ont., was caught in machinery and killed; a commercial traveller was killed by being struck by a train at a crossing, and a civil engineer at Cedars, Que., was burned to death in his working shack. Machinery caused 3 other injuries, falling material 2, and an explosion, an elevator, clothing catching fire, flying material and a fall, 1 each.

*Unskilled labour.*—Seven labourers were injured during December. In the month before, 4 were killed and 16 injured, and in December, 1906, 2 were killed and 1 injured. Two of the injuries were caused by falling material, 2 by being caught between cars, and 1 each by an elevator, by a cave-in, and by flying material.

## REPORTS OF DEPARTMENTS AND BUREAUS.

The following reports of departments and bureaus were received at the Department of Labour during December, 1907.

### Merchant Shipping Statistics.

Reports of the Harbour Commissioners for Toronto; Quebec, Three Rivers, Belleville, North Sydney, Pictou and Montreal, and Pilotage Authorities, certificates to Masters and Mates, the Harbour and Shipping Masters, certain port Wardens and Statement of Wrecks and Casualties, chiefly up to the 31st day of December, 1906. Ottawa: King's Printer, 1907. Pages, 164. Price, 20 cents.

In the volume containing the reports of the harbour commissioners of Canada, issued as a supplement to the Thirty-ninth Annual Report of the Department of Marine and Fisheries, it is stated that the total number of vessels on the register books of the Dominion on December 31, 1906, was 7,512, with a total of 654,179 tons register, an increase of 187 vessels and a decrease of 15,646 tons compared with the previous year. There were 397 new vessels built and registered in Canada during 1906, measuring 21,741 tons, and with an estimated value of \$978,345. In a table showing the tonnage of each of the maritime states of the world, it is stated that the net tonnage of British vessels amounted to 11,742,672 tons, total of 26,776,607 tons for the whole world.

### Criminal Statistics.

Report of the Minister of Justice as to Penitentiaries of Canada for the nine months ended March 31, 1907. Ottawa, King's Printer, 1907. Pages, 200. Price, 15 cents.

The average daily population of the penitentiaries of Canada during the fiscal year 1906-7 was 1,433, compared with 1,407 in the previous year. The slight increase is attributed by the Inspector of Penitentiaries to the growing population of the country. There were 157 paroles and 29 pardons during the last fiscal year. About 17 per cent of the prisoners were absolutely illiterate, and not more than 10 per cent had the advantage of a good common school education. It is stated that youths under 20 years of age constitute 11 per cent of the prisoners.

### Canadian Fisheries.

Fortieth annual report of the Minister of Marine and Fisheries, Canada, Ottawa, King's Printer, 1907.

The annual report of the Fisheries Branch of the Department of Marine and Fisheries has been made public. It shows the total value of the fisheries of Canada during the last fiscal year to have been \$26,279,485, a net decrease of \$3,200,077. The bulk of the decrease was

in British Columbia, representing \$2,846,-869, and due entirely to the shortage in the salmon catch. Quebec showed an increase of \$171,319, and Ontario one of \$25,893.

The quantity of fish used as bait in the season of 1906 is valued at \$544,453, and that of fish oil at \$253,520.

The fur seal skins secured by the British Columbia hunters during the same period realized \$316,224.

The most important fluctuation is noticed in the salmon industry, which notwithstanding a diminution of over three million dollars, still heads the list with a surplus of over two millions above any other species.

While the lobster industry is half a million less than last year, that of herring and mackerel each show an increase of over \$400,000.

The large falling off noticed in the sardine industry is ascribed to the reduction of 50 cents per barrel as received fresh from the weir fishermen.

From the year 1869 to 1906 inclusive, the five principal commercial sea fishes have yielded the following values to the industry.

Cod.....	\$139,514,753
Salmon.....	96,790,220
Lobsters.....	83,291,553
Herring.....	75,270,165
Mackerel.....	47,416,972

**Indian Affairs.**

Annual Report of the Department of Indian Affairs for the year ended March 31, 1907. Ottawa, King's Printer, 1907. Pages, 660. Price, 25 cents.

The report of the Department of Indian Affairs for the last fiscal year shows that the Indian population of Canada is slowly increasing in numbers, so far as can be ascertained by careful estimates. It is calculated that March 31, 1907, there were approximately 110,345 Indians in Canada, including 20,485 supposed to outside treaty limits. The amount of land under cultivation by Indians was 52,256 acres in 1907, an increase of 4,301 compared with the previous year, and the value of farm products showed an increase of 195,601. The earnings of the Indians amounted to \$1,659,398 in wages and \$714,125 in various industries, showing an aggregate decrease of

\$1,239, for the nine months ending March 31, compared with the previous twelve months. This would indicate an actual increase in earnings if comparisons were made for similar periods of time.

**Public Works.**

Report of the Minister of Public Works on the Works under his control for the Fiscal Period ended March 31, 1907. Ottawa: King's Printer, 1907. Pages, 532. Price, 25 cents.

During the fiscal year 1906-7, the total expenditure incurred by the Department of Public Works amounted to \$7,156,396.06. Of this amount the sum of \$2,784-713.69 was spent on public buildings, \$1,964,529.28 on dredging, and \$1,532,255.77 on harbours and rivers. The revenue for the period of nine months amounted to \$279,484.15, compared with a revenue of \$261,314.67 for the twelve months of the previous fiscal year. The principal sources of revenue are from slides and booms, graving docks, rents and telegraph lines. The receipts from all these sources, except from graving docks, were proportionately greater than in the previous year.

**BRITISH REPORT.**

**Changes in Wages and Hours of Labour.**

Report on Changes in Rates of Wages and Hours of Labour in the United Kingdom in 1906, with comparative statistics for 1897-1905. London: Wyman and Sons, 1907. Pages, 181. Price, 9d.

The report on changes in wages and hours of labour in Great Britain during 1906 shows that compared with 1905 there were net advances in all the principal groups of trades, with the exception of building and quarrying. Nearly 1,098,000 workpeople received advances, amounting in all to £58,400 per week, while only about 5,000 sustained decreases, amounting to rather more than £500. The aggregate increase in wages calculated from the date of each change to the end of the year is computed at £1,419,000. During 1906, the wages of 1,060,172 workpeople were changed without any stoppage of work, a cessation of work occurring in the case of only 54,988, whose wages were changed. The regular working hours of 54,954

workpeople were changed during the year, a reduction of hours being made in the case of 52,969 people. The net effect of the changes was a reduction of 98,892 hours in the weekly working time of the employees affected.

Preliminary figures are given for the first half of 1907, showing a continuance of the upward tendency of wages in all groups of trades, the most important changes being in the coal mining and textile industries.

## NEW ZEALAND REPORT.

### Work of the Department of Labour.

New Zealand Department of Labour: its Organization and Work. Issued under the Direction of the Hon. J. A. Millar, Minister of Labour. Wellington, New Zealand: King's Printer, 1907. Pages, 32.

In an illustrated pamphlet issued under the direction of the Minister of Labour of New Zealand, an account is given of the work of the Department of Labour of New Zealand, since its inception in 1891 as "The Bureau of Industries." The Department was instituted primarily to help the unemployed to obtain work, and up to March 31, 1907, employment was procured for 52,477 men with 88,818 dependants by various acts, the duties of the Department were extended to the inspection of factories, shops, servants' registry offices, shearing sheds, and scaffolding. In 1893 the publication of a monthly journal was commenced, which contains report of the state of trade and labour in all parts of New Zealand, legal decisions, awards of the arbitration court and recommendations of conciliation boards, as well as special articles on industrial questions. The administration of the Industrial Conciliation and Arbitration Act was entrusted entirely to this Department in 1900. In 1905, the Minister of Labour was empowered to acquire land and build dwellings to be leased at low rental or sold to workpeople on easy terms of payment. Houses have been built under the "Workers' Dwellings Act," in several localities, the rent of which ranges from 9s. 3d. to 11s. per week, and

it is proposed to erect smaller ones, which will be rented at 8s. or less per week.

## UNITED STATES REPORT.

### Industrial Statistics of Virginia.

Tenth Annual Report of the Bureau of Labour and Industrial Statistics for the State of Virginia, 1907. Richmond, Va. Superintendent of Public Printing. Pages, 332.

The Report of the Bureau of Labour Statistics of Virginia for 1907 contains 47 statistical tables giving returns of the number of employees, wages, and hours of labour in the principal industries of the State, railway accidents, and coal production in Virginia. The volume also contains a report of the special agent of the Bureau on inspection of factories and investigations touching child labour, with copies of laws relating to the employment of children which are in force in the United States.

## OTHER REPORTS RECEIVED

*Canada.*—Report, returns and statistics of the Inland Revenue of the Dominion of Canada for the fiscal year ended June 30, 1907. Part III. Adulteration of Food.

Reports of the Public Accounts Committee, Session 1907.

Convention respecting the Commercial Relations between Canada and France.

Canada Public Accounts for the fiscal period of Nine months ended March 31, 1907.

Report of the Auditor General for the nine months ended March 31, 1907. Volumes I and II.

*Ontario.*—Annual Reports of the Live Stock Associations of the Province of Ontario, 1906 and 1907.

Report of the Farmers' Institutes of the Province of Ontario, 1906. Part I Farmers' Institutes. Part II—Meetings and Statistics. Appendix to the Nineteenth Annual Report of the Inspectors of Factories for the Province of Ontario, 1906. Devices for Guarding Machinery, etc.

*Saskatchewan.*—Public Accounts of the Province of Saskatchewan for the Financial Years 1905, 1906-7.

*British Columbia.*—Estimates of the Revenue and Expenditure of British Columbia for the fiscal year ending 30th June, 1908.

*Great Britain.*—Statistical Abstract for the Principal and other Foreign Countries in each year from 1895 to 1904-5.

Reports of the Chief Registrar of Friendly Societies for the Year ending 31st December, 1906, Part A—Appendix (0). Particulars of valuation returns.

Return of Railway Servants of certain classes who were on one or more occasions during the Month of July, 1907, on duty on the Railways of the United King-

dom for more than twelve hours at a time.

Annual Statement of the Trades of the United Kingdom with Foreign Countries and British Possessions, 1906. Supplement to volumes I and II. Abstract and detailed tables showing countries of Consignment of Imports and Countries of ultimate destination of Exports.

*United States.*—Twenty-first Annual Convention of the International Association of Factory Inspectors held at Hartford, Connecticut, June 4th, 5th, and 6th, 1907.

*Italy.*—Relazione Preliminare sul Programma dei Lavori della Commissione.

*The Netherlands.*—Grèves et lock-outs dans les pays bas pendant 1906.

**RECENT LEGAL DECISIONS AFFECTING LABOUR.**

The following synopsis of recent cases affecting labour are based upon the latest reports of legal proceedings and other legal records of the different Provinces of Canada.

**SUPREME COURT CASES.**

**Appeal in Damage Suit Allowed.**

Appellant was the widow of a man who was killed by a train of cars run by the respondents, while engaged in keeping the track clear of snow. The respondents had not complied with the provisions of the Nova Scotia statute requiring a man to be stationed on the car at the rear of the train which was moving reversely, and the judgment appealed from, setting aside a verdict for the appellant, held that the death of deceased was caused by the negligence of a fellow-servant, and plaintiff could not recover when it was shown that the trains were habitually run in violation of statutory rules. Appellant argued that the doctrine of common employment could not be invoked where there was a breach of a statutory duty, and, moreover, that it could not be raised in this case, as "The Employers' Liability Act" took away the right to do so. The Court allowed the appeal, and restored the verdict of the trial in plaintiff's favour.

(McMullin v. Nova Scotia Steel & Coal Co.; 13th December, 1907; Supreme Court.)

**Two Cents a Mile Between Toronto and Montreal.**

The appeal taken by the Grand Trunk Railway from the decision of the Railway Commission, declaring that the railway company is bound by the terms of its charter to run at least one passenger train per day each way, between Montreal and Toronto, charging a third-class fare at one penny per mile, has been dismissed.

The Railway Company contended that the provision in question had been abrogated by the course of subsequent legislation relating to the road, but the Court held, affirming the judgment of the Board that the statutory provision was still in full force and effect.

(Grand Trunk Railway Co. v. Robertson; 13th December, 1907; Supreme Court.)

**NOVA SCOTIA CASE.**

**Important Decision on Chinese Head Tax.**

The Nova Scotia Supreme Court has decided that it is not an indictable crime for a Chinaman to come into Canada by evasion of the payment of the \$500 head tax provided for by the Chinese Immigration Act, R. S. C., chapter 95.

The case arose out of the arrest of seventeen Chinamen in Cape Breton, who were charged with having been smuggled

into Canada from Newfoundland. Judge MacKenzie, of the County Court, had held that the Chinamen, in entering Canada without paying the tax imposed by the Act, had committed an offence for which they might be indicted under the Act. The Supreme Court held that the tax was only a debt, which could be sued for in a civil action, the entry of a Chinaman into the country without payment of the tax being analogous to the case of a commercial traveller entering a municipality where a special tax was imposed, without paying such tax.

The case turns entirely on the construction to be put upon the statute. The argument in support of the conviction was that every violation of the Act was an indictable offence, but the majority of the Court held that this could not refer to mere failure to pay the tax imposed. Moreover, there were express provisions in the Statute with reference to the mode of collecting the tax which tended to exclude the idea that non-payment was intended to be made a criminal offence.

The result of the decision is that the convictions of the prisoners who had been fined \$100 each, are quashed.

(Nova Scotia Supreme Court; 30th November, 1907.)

## QUEBEC CASES.

### Validity of Agreement.

Plaintiff brought suit in the Superior Court at Montreal to recover \$1,327.30, damages, on the ground that he was verbally offered by the defendant and five of the directors of the Accident and Guarantee Company of Canada, of which Company defendant was the president, the position of manager of the company; that he accepted the offer on the strength of a letter signed by Nelson, as president, and resigned the position which he held with the Canada Life Assurance Company, but that subsequently, Nelson wrote to the plaintiff that he had not been authorized by the board of directors to make the offer, and that the board declined to confirm it. Plaintiff then accepted the position of inspector of agencies for the same company, under reserve of

his rights, and after his services as inspector had been dispensed with, he again tendered his services as manager, under the original agreement, but those services were again refused. Plaintiff then sued the company, but his action was dismissed, on the ground that his appointment as manager had never been authorized by the board. He then sued defendant personally for damages. In the court of first instance, plaintiff's action was dismissed, and he carried the case to review, when the judgment at the trial was reversed and judgment rendered in plaintiff's favour for \$827, damages and costs.

In rendering the judgment of the Court of Review, Mr. Justice Mathieu held that the directors who made the offer to plaintiff were in the majority, and, necessarily, their authorization was the authorization of the board. How, then, could the first court hold that these directors, who made an offer which they could carry out if they chose, could, after their offer had been accepted, refuse to have it carried out, and not make themselves responsible to plaintiff. The plaintiff did not waive his rights against defendant by accepting the new position offered him. There was no proof that he waived his claim against defendant, and he could not be presumed to have done so. Plaintiff accepted his new position from the company, and not from the person who was responsible to him for damages he had suffered by reason of not having been made manager of the company, viz., the defendant.

(Stewart v. Nelson; November, 1907; Court of Review.)

### Damages Awarded Widow and Children.

Plaintiff, the widow of a workman named Perrault, who was killed while at work in the employment of defendant, sued to recover \$15,000 damages for herself and six minor children. Defendant was the contractor for the demolition of the Temple Building at Montreal, and deceased was employed by him on the work. The accident which caused the death was a peculiar one. Both elevators in the building had been run down to the basement preparatory to their

removal, while two of deceased's fellow-workmen climbed on top of one to unfasten the cables. These men imprudently cut the cables, which released a heavy counter-poise, weighing over fourteen hundred pounds. The counter-poise dropped down from the top flat along the guides running alongside the other elevator. At this moment, deceased, for some inexplicable reason, thrust his head between the guides, with the result that he was decapitated by the falling iron weight. The jury found that the accident was due to the negligence of defendant or his employees, and assessed the damages at \$3,000, of which \$2,000 was given to the widow and \$1,000 to the children.

(*De. Perrault v. Major*; 11th December, 1907; Charbonneau, J.)

#### Action for Damages.

Plaintiff, a workman in the employ of defendants, brought suit in the Superior Court at Montreal to recover an indemnity of \$4,000 for injuries sustained in the course of his employment. The accident giving rise to the action occurred on the 19th December, 1906. Plaintiff, who is a young man aged 22, was engaged in baling shavings by means of a horizontal press. While in the act of handling one of the panels which separated the bales, his left arm was caught by the machinery, which is continually in motion while the pressing goes on, and was so badly crushed that it had to be amputated below the elbow.

The jury, after deliberation, arrived at the conclusion that the accident was occasioned by the victim's own carelessness, and that he was not entitled to any indemnity. The action was accordingly dismissed.

A pleasing feature in connection with the case was that after the jury's verdict had been rendered, defendants offered to take plaintiff back into their employ at the same wages he obtained before the accident, provided his conduct was good.

(*Borduas v. Wm. Rutherford & Sons, Ltd.*; 6th December, 1907; St. Pierre, J.)

#### Forfeiture of Wages by Leaving without Notice.

Plaintiff entered the service of defendants as a clerk at the salary of \$40 a month, but after working eleven days, left his employment without giving any notice to his employers. He then claimed payment of salary for the time he had worked, which being refused him, he brought suit to recover the amount. The court held that plaintiff had forfeited his right to demand such payment by leaving without due notice, and dismissed his action.

(*Simmons v. C. P. R. Co.*; 12th December, 1907; Circuit Court, Dorion, J.)

#### Railway Crossing Gateman Drunk while on Duty.

Michael Colfer, a watchman in charge of the gates at the Charlevoix Street crossing of the G. T. R., in Montreal, was recently charged with being drunk in his cabin and neglecting his duties. It was alleged that between 10 and 11 o'clock one night, the crossing gates at Charlevoix street had been left open while trains were passing. This endangered the lives of persons who had ventured on the track, and led to an investigation as to the cause of the negligence, when it was discovered that the gateman was lying drunk in his cabin along with a companion, who was also under the influence of liquor. The evidence showed that at the time of his arrest, Colfer had had no sleep for nearly forty-eight hours, but it was his own fault. However, it was proved that his regular hours on duty were fourteen hours a day, which fact prompted the Recorder to say that he would send for the Railway's yardmaster and advise him that that length of time was too long. He also said that he had no time to make an enquete on the general administration of railroads, but that after what had been stated before him, it was no wonder that there are so many accidents at railway crossings. As to Colfer, the Recorder said that he was under the impression that he was not sober when arrested, and that at

any rate he was not attending to his duty. He could fine the prisoner \$400, or send him to jail for one year, but he would be lenient, and impose a sentence of two months in jail and \$50 fine. In default of the fine being paid, the prisoner will spend three additional months in prison.

(Rex v. Colfer; 13th December, 1907; Weir, Recorder)

Stanley Gillespie, G. T. R. gateman at the Charlevoix street crossing in Montreal, who was appointed to succeed Michael Colfer, convicted of a like offence, as noted above, was charged with being intoxicated while on duty. The facts as disclosed by the evidence were that on Friday night, the 13th December, near midnight, two pedestrians, who had found the crossing gates open, barely escaped being run over by a passing train when they ventured out on the tracks. To find out the reason for the negligence, the gateman's shanty was entered, the stove found to be red hot, the gateman lying helpless on the floor, and a strong odor of liquor permeating the atmosphere. The police having been summoned, Gillespie was put under arrest and brought before the Court. He was found guilty and sentenced to one month's imprisonment, together with a fine of \$25, or two other months in jail.

The Recorder in addressing the prisoner said:—

"You occupied a position full of responsibility, on the discharge of the duties of which depended the safety of the public, and you were found in a state of intoxication when on duty. This offence is punishable by a fine of \$400 and four years in the penitentiary. The conviction of your predecessor does not appear to have been a lesson to you. The citizens have the right to be protected, and it is the duty of the Courts to punish offences of this nature in a severe fashion."

(Rex v. Gillespie, 18th December, 1907; Weir, Recorder.)

#### **Injuries Due to Defective Scaffold.**

Plaintiff, a bricklayer and plasterer, brought suit in the Superior Court at Montreal against the defendants to recover damages for injuries sustained while working for defendants at Shaw-

inigan Falls. Plaintiff was engaged by the defendants, Bishop & Co., to work on a building that was being erected for their co-defendants, the Northern Aluminium Co., which guaranteed the contractors against accidents. In the afternoon of November 14th, 1906, plaintiff, with five other bricklayers and a helper, was working on a scaffold about 20 feet high, when it gave way, precipitating the men to the ground, with the result that three of them were injured. Plaintiff was taken to the local physician's house, but the doctor failed to notice any serious injury, and sent the patient back, after replacing a rib that had been displaced, and sewing up a cut on his upper lip. Plaintiff resumed work after the accident, but upon experiencing some difficulty in moving his arm, he subsequently obtained employment as a foreman. On the 6th March following, he complained of the pain in his arm at the office of Bishop & Co., whereupon they sent him to a hospital, where it was found that the upper part of the upper bone of his arm near the shoulder was slightly fractured, and that a small portion had been torn out and displaced, and had become attached in an abnormal position near the socket, thereby impeding the working of the shoulder. Plaintiff alleged that the accident was due to the negligence of defendants in not having the scaffold properly constructed, and also alleged that owing to this injury, he would no longer be able to use his arm with the same facility as before, and that it would be impossible to exercise his trade. After a trial of some days, when the evidence given by the medical experts differed greatly, the jury found negligence on the part of defendants in erecting the scaffold, and that there was contributory negligence on the part of plaintiff, and assessed the damages at \$2,234. After argument on the legal points, judgment was ordered to be entered against both defendants jointly and severally for that sum.

(Gagnon v. Bishop & Northern Aluminium Co.; 23rd November, 1907; Saint Pierre, J.)

#### **Wrongful Dismissal, Libel and Slander.**

Plaintiff was a hydrant inspector in the employ of the City of Montreal in Feb-

ruary, 1906, and claimed that on the 15th of the same month, at the time of the municipal elections, defendant wrote a letter to the Superintendent of the Water Department stating that plaintiff was absent from his post on polling day; that he had taken part in the campaign, and that he had spoken against him, as well as against other candidates for municipal honours. Plaintiff averred that such statements were false and made with malicious intent, and he further alleged that defendant told several persons that plaintiff was robbing the corporation by not doing his work; that he had obtained money under false pretences; that he had made false reports, and that defendant had said that he was going to have plaintiff arrested for theft and forgery, and had repeated this threat before the Water Commission. As a result of defendant's actions, plaintiff alleged that he had been dismissed, and brought suit to obtain an indemnity for injury to his reputation, as well as real damages which he claimed to have suffered by reason of his dismissal.

Defendant admitted writing the letter in question, but said that he did it in his quality as alderman in the interests of the public, and that the letter was privileged. He also set up that whatever he said respecting plaintiff at the meeting of the Water Committee was said while he was acting in his capacity of alderman, was in the public interest and was privileged; that the letter in question was addressed to plaintiff's superior officer and was privileged, and that whatever he did say or write about plaintiff was true.

The Trial Judge held that the letter was not written in the public interest, but simply to gratify defendant's feelings of revenge and enmity towards plaintiff, was not a privileged communication, and that its contents were false and entirely without justification. The evidence, the Court said, establishes that the plaintiff was not absent from duty on polling day as alleged. Defendant had abused his position as alderman and the influence he had as such, to have plaintiff dismissed from his situation in the employ of the City of Montreal. The other allegations of plaintiff's declaration are also proved. Defendant falsely and maliciously ac-

cused him of dishonesty and not doing his duty. However, plaintiff did take part in the civic election, and worked and spoke against defendant, and he permitted himself the use of strong and violent language towards defendant, especially in a speech he had made the day previous to that on which polling took place, and defendant was evidently still smarting under plaintiff's words, and his anger was provoked. The letter in question, the dismissal of the plaintiff as a consequence, thereof, and the slanderous statements made by defendant were of a nature to considerably injure plaintiff's reputation and cause him damage. Considering the circumstances as established by the evidence, the Court awarded plaintiff the sum of \$120, as real and exemplary damages.

(Barthe v. Lapointe; 11th December, 1907; St. Pierre, J.)

#### Manufacturing Substitute for Butter.

For manufacturing a material that looked like butter, Jean Keiskider has been fined \$200 in the Police Court at Montreal. The prosecution was instituted by Government Inspector McPherson, under the provisions of section 298 of the Dominion Inspection and Sale Act, which reads as follows:—

"No person shall manufacture, import into Canada or offer, sell or have in his possession for sale, any oleomargarine, butterine, or other substitute for butter manufactured wholly or in part from any fat, other than that of milk or cream."

Section 309 provides a penalty for infraction of section 298, not exceeding \$400 and not less than \$200 and costs, and in default of payment, imprisonment for a term not exceeding three months.

The article manufactured by the accused was called "Borine," and by analysis was proved to consist of cotton-seed oil, beef fat, milk and colouring matter.

The accused claimed that he never sold the article as butter, but that the intention was to have it used in pastry kitchens instead of lard.

(Rex v. Keiskider; 12th December, 1907; Piche, J.)

#### Appeal in Damage Suit Dismissed.

In the case noted at page 114 of the July number of the *Labour Gazette*, an

appeal by defendants from the judgment at the trial has been dismissed with costs.

(Delorme v. Locomotive & Machine Co.; 23rd December, 1907; Court of Appeal.)

### Judgment in Damage Suit Confirmed.

Plaintiff sued defendant for \$5,000, for damages for injuries (the loss of an eye) caused to him when engaged in the service of defendants in putting a new brass above the journal of a passenger coach. To do the work plaintiff was given a tool which he claimed was dangerous, of bad quality and not intended for such use. While striking the brass to force it into position, a chip flew off the tool and put out his eye. He claimed the bar he was working with was defective, in as much as it was tempered too hard and was accordingly brittle. The plea was that plaintiff, even supposing it to be brittle and defective, should not have used the crow-bar for the work in question; that plaintiff was an experienced workman and knew how to do the work he was engaged in, and that he did the work in the way in which he chose himself to do it safely; that the accident was due to his misuse of the tool; that no one told him how to do the work on the occasions in question, since he knew how to do it, and that the work was not dangerous. The Court of first instance, by judgment delivered on the 23rd February, 1907, found that the tool was defective, being improperly tempered; that while not the proper tool for the work in hand, it was the only kind of tool supplied for the purpose, and that the defendants never inspected the tools supplied to their workman. Judgment went in favour of plaintiff for \$1,999 damages. Defendants appealed to the Court of Appeal, which has dismissed it, and confirmed the judgment of the trial Judge.

(Turcot v. Great Northern Railway Co. of Canada; 24th December, 1907.)

### Judgment in Damage Suit Reversed as to One Defendant.

Owing to a confusion of names it was stated by error at page 612 of the No-

vember number of the *Labour Gazette* that the judgment at the trial had been confirmed in the case mentioned there.

Judgment on the appeal of the Bank has only recently been rendered, and has resulted in the appeal being allowed, and the action dismissed as far as the Bank is concerned. The Judgment against the contractor for the demolition of the building in question however stands intact.

(Collet v. Eastern Townships Bank; 23rd December, 1907; Court of Appeal.)

## ONTARIO CASES.

### Action for Wrongful Dismissal.

Plaintiff sued defendants for damages for wrongful dismissal, he having been hired as an agent for one year at \$75 per month and expenses. At the end of seven months, defendants discharged him, the contract of hiring providing that plaintiff could be discharged for sufficient cause. Judgment went in plaintiff's favour for \$116.30 and costs.

(Hall v. American Abell Manufacturing Co.; 25th November, 1907; Barron, Co., J.)

### Damages for Death by Electric Shock.

Action was brought at the last Hamilton Jury Sittings by plaintiff, as administrator of the estate of John Goddard, deceased, to recover \$5,000 damages for Goddard's death, caused, as alleged, by the negligence of defendants. Deceased, on November 6th, 1906, was attending to electric lights in defendants' yard, replacing burnt-out carbons. In the round-house, he took hold of a cable to lower a light, and got a shock that killed him. The rope was wet and the current ran down the cable. The negligence alleged was that deceased was not provided with a glass-bottomed stool, rubber gloves, or any insulating material wherewith to avoid such an accident. Defendants denied any negligence, and pleaded that deceased was a member of the Grand Trunk Railway Insurance and Provident Society, and that there was an agreement with the insurance society that the Railway was relieved of all liability when an employee was insured in the

society and received insurance. The sum of \$500 had been paid to Goddard's widow. It was held that defendants could not rely on this as against plaintiff, and the jury brought in a verdict in plaintiff's favour for \$500.

(Enright v. G. T. R. Co.; 17th October, 1907; Falconbridge, C. J.)

### Wrongful Dismissal.

Plaintiff, a machinist, sued defendants for damages for wrongful dismissal, inasmuch as he was discharged without notice, which he claimed to be entitled to. Plaintiff claimed that he was hired by the Master Mechanic of defendants, and that he was asked to take out an insurance policy in the G. T. R., Provident Association, and refusing to do so, was discharged. Defendants claimed that plaintiff signed a book agreeing to abide by the rules of the shop, and that at first he was temporarily employed. Then, it being decided to engage him permanently, he was asked, as required from all employees under 40 years of age, to take out a policy which runs from \$250 to \$2,000, the amount of premium being deducted from their wages. The plaintiff having declined to do so, was dismissed. The Court held with defendants, and dismissed the action with costs.

(Gould v. G. T. R. Co.; 21st November, 1907; Ermtinger, Co. J.)

### Wages Case.

In the Police Court, at Hamilton, recently, Fred A. Lewis sued Joseph Carson for \$63 wages due. Complainant said he was engaged by defendant to go to Sarnia and work as an engineer on a private boat called the *Tempest*, which was brought down to Hamilton. He worked for five weeks in fitting up the boat, and on the trip, but after defendant paid him the first instalment of his wages, he refused to give him any more, alleging that complainant would have to look to William Moore, a part owner in the boat, for the amount. Carson said he had sold Moore a half interest in the boat on the understanding that he was to pay all the expenses of the trip. As it was evident that he had engaged Lewis, and as the

boat is still in his name, the magistrate gave judgment against Carson for the amount claimed.

(Police Court, Hamilton; Lewis vs. Carson.)

### Damages for Injuries.

At the recent sittings of the Court at Parry Sound, an action was brought by plaintiff under the Workmen's Compensation Act to recover damages for injuries sustained by him in the course of his employment. Plaintiff was engaged in drilling rock in the construction of a branch of the C. P. R., near Parry Sound, and while so engaged at the bottom of a deep cut, a large rock, which was on the side of the cut, and above where plaintiff was working, became loosened and rolled down the bank and upon plaintiff, causing him serious injury, for which he sued Phillips & Co., the contractors, and his employer, Montgomery, and also one Maybee, who was Montgomery's foreman. The Court held that Montgomery was an independent contractor under Phillips & Co., and the latter were not liable; that it was the duty of Maybee, as Montgomery's foreman, to see to the removal of all loose or overhanging rocks from the sides of the cuts, so that workmen below might not be injured by their fall. By his negligence, the rock, which injured plaintiff was not removed, and both he and his employer, Montgomery, were liable in damages to plaintiff. Action dismissed as against Phillips & Co., with costs. Judgment for plaintiff for \$1,200 against defendants, Montgomery and Maybee, with costs.

(Kitts v. Phillips & Co. et al.; 5th December, 1907; Teetzel, J.)

### Damages Due to Plaintiff's Negligence.

At the Fall Assizes at Hamilton, an action brought to recover \$5,000 damages for personal injuries sustained by plaintiff in the course of her employment with defendants, owing to the alleged negligence of the latter, was tried. On January 8th of this year, plaintiff, a girl, was working at defendants' factory, sharpening tools at a grindstone. Her hand was caught in the revolving grindstone, and the little finger was so crushed

that it had to be amputated at the knuckle, and the cords of two other fingers had to be removed. Negligence was alleged on the ground that the grindstone should have been properly guarded, and that the flooring underneath was uneven, causing the plaintiff to slip at the wrong moment. The jury found that defendants were not to blame for the accident, and that it was due to the plaintiff's own negligence; consequently, the action was dismissed.

(Murphy v. Canada Screw Co.; October, 1907; Falconbridge, C. J.)

### Damage Suit Dismissed.

At the same Assizes, another action was brought to recover \$2,000 damages for personal injuries. Plaintiff was a foreman in the employ of defendants, who were doing construction work on the Brantford and Hamilton line. He was injured owing to the explosion of some dynamite. Plaintiff alleged negligence on the part of the defendants, while they charged that it was he who was negligent, as he was the foreman in charge of the work and should have taken greater care. The jury answered the questions submitted to them against the plaintiff, and the action was dismissed.

(Taylor v. Nicholson et al; October, 1907; Falconbridge, C. J.)

### Plaintiff Non-Suited in Damage Action.

At the same Assizes an action was tried which was brought by the widow and children of an employee of defendants, who was killed while in their employ. Deceased went in between two cars in the company's yard to couple, when he was crushed between the buffer beams, so that he died. It was claimed by plaintiffs that the beams were not necessary on the cars, and that if they had not been there, the deceased would not have been injured. The case was submitted to the jury to assess the amount of damages, which they returned at \$3,700. On motion for non-suit, however, the presiding judge dismissed the action. It is said an appeal will be taken.

(Whiteman v. Hamilton Steel & Iron Co.; October, 1907; Falconbridge, C. J.)

### Verdict for Damages Sustained.

Two actions were brought recently at Hamilton for damages arising out of an explosion of natural gas in the round-house of the defendants, a railway company. One action was brought by one of the men injured, and the other by the widow and children of the other man, who was killed by the explosion. The two men were in the employment of the railway company, and on the 1st of November, 1906, in the course of their duties, entered a part of the round-house carrying torches, and on entering the repair-shop they heard a noise as of something escaping, and on going to investigate, were met by a great sheet of flame, the result of the natural gas, supplied to the railway by their co-defendants, the Natural Gas Co., being ignited by the torches they carried. One of the men, Perkins, was so badly burned that he died the following morning, while the other, Collins, was laid up in the hospital for 14 weeks as the result of his injuries. The case developed into a contest between the defendants as to who was responsible for the accident. The jury found a verdict in favour of plaintiff, Collins, with \$7,000 damages, and in favour of the widow and children of Perkins with \$4,000 damages. Motions for non-suit were made by both defendants, but were overruled, and judgment ordered to be entered against both defendants for the amount found by the jury.

(Perkins & Collins v. T. H. & B. R'y Co. & Dominion Natural Gas Co.; October, 1907; Falconbridge, C. J.)

### Appeal in Damage Action Dismissed.

In the case noted at page 617 of the November number of the *Labour Gazette*, an appeal by defendants from the judgment at the trial in plaintiff's favour was dismissed.

(Garlough v. Toronto Paper Co.; 6th December, 1907; Divisional Court.)

### Wrongful Dismissal.

In the case noted at page 620 of the November number of the *Labour Gazette*, an appeal by defendants from the verdict and judgment at the trial was dismissed.

(Davis v. Ontario Lumber Co.; 10th December, 1907; Divisional Court.)

**Engineer Acquitted.**

Henry Morris was put upon his trial at the General Sessions at Barrie on a charge of manslaughter, arising out of a rear-end collision in the railway yards at Allandale, on the line of the Grand Trunk Railway Co., on September, 29th last, in which a fireman named Blackburn was killed. Morris was the engineer of the train which ran into the rear end of a train standing ahead of his train, and was held responsible for the accident by the Coroner's jury. At the Sessions, Morris was acquitted by the jury. A note of the finding of the coroners' jury will be found at page 735 of the December number of the *Labour Gazette*.

(Rex vs. Morris, 12 December, 1907; General Sessions, Barrie.)

It should be noted that the coroner's jury also held Conductor Farrell liable for the accident, but at the preliminary hearing before the magistrate, he was discharged.

**Leniency Recommended for Engineer.**

At the December Sessions for the County of Elgin, held at the City of St. Thomas, the Grand Jury recommended in the case of Murray Stephens, former engineer on the Wabash railway, who was sentenced in October to six months in jail for disregarding signals, as detailed in the note of the case at page 614 of the November number of the *Labour Gazette*. The jury thought that the ends of justice would be sufficiently met if Stephens were soon released, and now that the attention of the railway authorities and employees has been drawn to the subject by the punishment of this man, fewer accidents may be anticipated from the carelessness of railway employees.

(12th December, 1907.)

In this connection it may be noted that an agitation is on foot among the railway employees organizations to obtain a repeal of the law under which men operating trains are liable to fine and imprisonment for offences which they claim may simply be due to a lapse of memory or an error of judgment honestly made.

**Master Liable for Servants' Negligence.**

An appeal from the verdict and judgment at the trial in an action for damages for personal injuries has been dismissed. Plaintiff, who was a passenger on a street railway car, while standing on the step, was jolted off by a collision with a waggon driven by a servant of defendants, or by the car suddenly stopping to avoid a collision, and was injured. The negligence alleged was the want of care of the driver in turning into the highway out of a lane with a heavily laden wagon. At the trial, plaintiff recovered a verdict of \$700 damages. Defendants' appealed from this, but the Court held that there was evidence upon which the jury could properly find as they did, and that the verdict could not be interfered with, and dismissed the appeal.

(McIlvoy v. Miles; 12th December, 1907; Divisional Court.)

**Motorman Acquitted of Criminal Negligence.**

James McIlwraith, a motorman, formerly in the employ of the Hamilton Street Railway Company, was put upon his trial at the General Sessions at Hamilton recently upon a charge of criminal negligence.

The charge arose out of an accident, the accused being in charge of a car which ran into a freight train at the corner of King street and Ferguson avenue, on the 12th November. No person was killed, but several of the passengers were injured. The defence was that the brakes were in such bad working order that he could not stop the car in time to avoid the accident, and that he jumped just in time to save his own life. The jury brought in a verdict of not guilty.

(Rex v. McIlwraith; 16th December, 1907; Monck, Co. J.)

**Discharged Brakeman Acquitted.**

William Powles, of Deseronto, a brakeman, formerly in the employ of the Bay of Quinte Railway, was tried at the General Sessions at Belleville recently on a charge of intentionally turning a switch the wrong way, thus causing considerable damage to rolling stock, as well as en-

dangering the lives of several passengers, after being discharged by the company for being intoxicated. The jury brought in a verdict of not guilty.

(Rex v. Powles; 14th December, 1907; Deroche, Co., J.)

### Union Tailors Want Magistrate Removed.

In connection with the case noted at page 738 of the December number of the *Labour Gazette*, at a mass meeting of local tailors, held at Kingston recently, the following resolution was adopted:—

“Resolved, that we hereby protest against the maximum fines imposed by Police Magistrate Farrell on the two persons before him on the charge of intimidation, and consider it an outrageous insult to organized labour; and be it further resolved that this meeting petition the Trades and Labour Council to take the matter up, by petitioning the Attorney-General’s Department for the removal of the said magistrate.”

(13th December, 1907.)

### Railway Engineer Released.

In the case noted at page 615 of the November number of the *Labour Gazette*, a press despatch from Kenora states, under date of 18th December, that word had been received by the Mayor of that town that an order had been issued by the Minister of Justice for the liberation of Engineer Wrighton, who was sentenced to three month’s imprisonment for neglect of duty.

(Toronto Globe; 19th December, 1907.)

### City Council Recommended Leniency.

Referring to the case noted at page 615 of the November number of the *Labour Gazette*, the City Council of the City of St. Thomas has passed a resolution recommending the Department of Justice to release Murray Stephens, sentenced on 9th October to six months imprisonment for criminal negligence.

(Rex v. Stephens; 19th December, 1907.)

### Railway Engineer Released.

Murray Stephens, who was on October 4th, sentenced to six months in jail for

causing the fatal wreck at the diamond crossing east of St. Thomas, by disregarding signals set against him, has been released by order from the Department of Justice at Ottawa.

(Rex v. Stephens; 24th December, 1907.)

### Appeal in Damage Suit Dismissed.

In the case noted at page 343 of the September, 1907, number of the *Labour Gazette*, an appeal taken by the defendants to the Court of Appeal from the verdict and judgment at the trial has been dismissed.

(Fulton v. Michigan Central Railway; 24th December, 1907; Court of Appeal.)

### Judgment Confirmed on Appeal.

In the case noted at page 629 of the February number of the *Labour Gazette*, an appeal by defendants from the verdict and judgment at the trial has been dismissed.

(Condon v. Hamilton Steel & Iron Co.; 24th December, 1907; Court of Appeal.)

### Railway Engineer Released.

Mark B. Reid, the Grand Trunk engineer, a report of whose conviction and sentence for a breach of the rules of the railway is to be found at page 613 of the November number of the *Labour Gazette*, has been released from prison, by order of the Department of Justice, after serving some three months of his sentence of nine months.

(Rex v. Reid; 24th December, 1907.)

## ENGLISH CASES.

### Instructing Workman as to Dangerous Machine.

Plaintiff, who was of the age of 20, and was in the employment of defendant, a farmer, was engaged in working a straw-pressing machine when he received an injury. In an action to recover damages under the Employers’ Liability Act, 1880, upon the ground that there was a defect in the condition of the machine, in that it was not properly fenced, the County Court Judge found that there was a defect

in the machine, in that, although perfectly made and not requiring a guard, it was a dangerous machine, and that being so, it was the duty of the defendant to instruct those who used it as to its dangers, there being no foreman to do so, and that he had failed in that duty. He accordingly gave judgment for the plaintiff.

On an appeal by defendant, the Court held that what was disclosed did not constitute a defect in the condition of the machine under the Act, and judgment was entered for him.

(Greenwood v. Greenwood; 25th October, 1907; Divisional Court.)

### Right of Theatrical "Understudy."

By a written contract, the defendants, who were managers of a theatre, engaged the plaintiff, who was an actress, for the run of a certain play at the theatre, to understudy the principal actress at a certain salary, and the plaintiff agreed not to appear at any place of public entertainment elsewhere during her engagement without the defendants' consent. During the run of the piece, the principal actress left the theatre, and the plaintiff claimed the right to play the part, which the defendants refused. In an action to recover damages for breach of the contract, evidence was given on behalf of the defendants that an understudy was not entitled as of right to play the principal's part if the latter was absent.

The Court held, upon this evidence and upon the true construction of the contract, that no right was conferred on the plaintiff to play the part, the contract merely imposing on the plaintiff the obligation of playing the part if called upon by the managers to do so.

(Newman v. A. & S. Gatti; 22nd October, 1907; Court of Appeal.)

### Restraint of Trade.

A clerk to a firm of solicitors covenanted that, if his engagement should be terminated, he would not "act for any person who is or has within previous five years been a client of the firm." The Court held that the covenant referred to persons who should be clients

of the firm at the time when the clerk's engagement terminated, or within five years before that time, and was not wider than was reasonably necessary for the protection of the firm's practice.

(Lewis v. Durnford; 8th November, 1907; Swinfen Eady, J.)

### Engagement of Theatrical Artist.

The defendants agreed to engage the plaintiff, who was an actor, for the principal part in pantomime at a salary of £130 per week for the first year, £140 a week for the second year, and £150 a week for the third year, with the option, in consideration of the engagement, of retaining the plaintiff's services on the same terms and conditions as set forth in the agreement for the forthcoming pantomime season. The Court held that the contract meant that if the option were exercised, the weekly salary payable would be that which was payable for the third year, and that the contract was not void for uncertainty.

(Wade v. Robert Arthur Theatre Co.; 14th November, 1907; Parker, J.)

### Death Not Due to Accident.

A workman met with an accident in the course of his employment, and tumors on the neck ensued. He was incapacitated for work, and his employers paid him half his weekly wages under an agreement to that effect, a memorandum of which was registered under the Workmen's Compensation Act, 1897. The workman continued incapable of working, and died in a year. His widow claimed compensation under the Act, and the County Court Judge found that the workman's death was not caused or accelerated by the accident, the sole cause of his incapacity for work being the disease from which he was suffering, and of which disease alone he died; but he held that the employers were estopped from denying that the disease which caused his death was the result of the accident by reason of the agreement and the payments made by them. The Court of Appeal reversed this judgment, holding that there was no estoppel, and on a further appeal by plaintiffs' to the House

of Lords the decision of the Court of Appeal was confirmed.

(Cleverley et al v. Gas Light & Coke Co.; 18th November, 1907.)

### Right to Terminate Engagement.

In the case noted at page 1312 of the May, 1907, number of the *Labour Gazette*, the Court of Appeal has affirmed the judgment at the trial.

(Storey v. Fulham Steel Works Co.; 14th November, 1907.)

### Defrauded Emigrants.

At the Liverpool Assizes recently, Max Block and Marcus Helfman were found guilty of the charge of defrauding emigrants, and were sentenced to six months' imprisonment with hard labour.

They were charged with having "unlawfully obtained by false pretences and conspiracy the passages of certain emigrants from Liverpool to Canada, by means of ships belonging to the Canadian Pacific Railway, with intent to defraud at Liverpool, on or about the 15th July, 1907, and other days."

Mr. Justice Bray, in summing up, said the evidence showed that Block had sent six persons, and Helfman had sent three persons to Liverpool, where they were taken on board the steamer without tickets, and concealed on board until they reached Quebec. At that port three of the immigrants were found to be disqualified physically for admission to Canada, and they were sent back to Liverpool and imprisoned for stowing away. It was not for that court to enquire how that miscarriage of justice came about. It was quite clear now that those emigrants were not fraudulent, as they had paid money for their passages to somebody or other.

The jury returned a verdict of "guilty" against both prisoners of conspiracy to

defraud emigrants but they found them "not guilty" of defrauding the steamship company. On account of their previous good character, they recommended the prisoners to the clemency of the court.

His Lordship, addressing the prisoners, said that emigrants were a class of people who required the utmost protection of the law. The offence had been a serious one. At the same time he would take into consideration the jury's recommendation to mercy, and the fact that the prisoners had already been in jail for two months. Under these circumstances he would impose a sentence on each prisoner of six months imprisonment with hard labour, and he would also recommend that sentence should be followed by their expulsion from the country.

(Rex v. Block & Helfman; Liverpool Assizes; Bray, J.)

### Blacklisting.

Plaintiff brought an action for damages for conspiracy to hinder from obtaining employment against his late employers and the masters' association to which they belonged in the High Court at London recently.

In consequence of a dispute between the Ironmoulders' Union and his employers the plaintiff gave the latter notice. His employers brought his case before the Leicester District Engineering Trades Employers' Association, with the result, as plaintiff contended, that he had been unable to obtain employment elsewhere.

The presiding Judge at the trial said it was quite true that a man had a perfect right to try to get his living. On the other hand, there was no law to compel a master to employ a particular man.

The jury found that there had been no conspiracy on the part of the defendants, and judgment was entered for the defendants accordingly.

(Bond v. Ashwell & Nesbitt, Ltd., et al.; Lawrence, J.)

# THE LABOUR GAZETTE

FEBRUARY, 1908.

## INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF JANUARY, 1908.

### I.—GENERAL SUMMARY.

THE most important developments affecting industrial and labour conditions throughout Canada during January were, the gradual, though still only partial, alleviation of the financial stringency, and the continuance of exceptionally mild weather in the North-west provinces. The effect of the former was at once shown in the improved tone of general trade and manufacturing industry, and the general outlook for the coming season of activity. The latter considerably facilitated the moving of the western grain crop and greatly reduced the consumption of fuel in the area affected. In Ontario and Quebec, some heavy snow storms and a period of cold weather which occurred in the closing week of the month gave employment to large numbers of men at snow removal and the storing of ice, the latter being of excellent quality though about three weeks later in forming than last year. From these circumstances, though there were a large number of unemployed at Toronto, Ont., Vancouver, B. C., and other centres, the month did not compare unfavourably with December, notwithstanding the advance of the season.\* The agricultural and fishing industries

were dull from seasonal causes, and the cut of timber was smaller than in the corresponding period of 1907. Railway traffic was also somewhat lighter. In mining, however, the outlook was for a favourable winter season, metal mining having shown an improvement compared with December, and the collieries being busy though the falling off in the demand for coal caused a diminution in activity on Vancouver Island.

### Changes of Wages and Hours of Labour.

The following is a statement by industries and groups of trades of the more important changes in wages and hours of labour, information concerning which was received at the Department of Labour during January:—

*Fishing.*—An adjustment of the wages of halibut fishermen in British Columbia went into effect on January 1st.

*Manufacturing.*—A carriage factory employing 200 hands, and a fanning mill company employing 100 hands, at Chatham, Ont., reduced wages 10 per cent owing to the stringency in the money market. Moulders at Victoria B. C., had their wages reduced.

*Mining.*—A new schedule of rates for miners and mine employees was put into effect by the Dominion Coal Company on January 6th. Employees of the Granby Mining and Smelting Company at Phoenix, and Grand Forks, B. C., accepted a reduction in wages.

(\* ) A special article setting forth the demand for labour and the number, if any, of unemployed in the several cities of Canada is published elsewhere in the present issue. As conditions in this respect varied widely according to locality, the reader is referred to this article for detailed information, in addition to that contained in the reports of local correspondents.

*Printing and allied trades.*—Machine and hand compositors at Quebec, Que., had their wages increased 15 per cent under a two years, agreement, dating from January 20th (\*).

*Civic employees.*—Policemen at Chatham, N. B., had their salaries increased. At Niagara Falls, Ont., certain municipal employees had their wages advanced. Fourteen employees of the water and sewerage department at St. John, N. B., received an increase in wages (†).

*Railway construction.*—Employees in certain camps east of Winnipeg, Man., had their wages reduced from January 1st. Drillers, muckers and labourers are now paid from 15 to 17½ cents per hour, or from \$1.50 to \$1.75 per day. The rate was previously from 17½ to 20 cents per hour. Under the new schedule only very inferior workmen will be paid less than \$1.75 per day.

*Railway employees.*—Telegraphers in the employ of the Grand Trunk Railway Company were granted an increase of 10 a per cent under the terms of an award by board appointed under the Industrial Disputes Investigation Act. The advance was to date from January 1st, 1908, and was stated to amount in the aggregate to \$27,000 annually. Payment for Sunday labour will also be made to the men in future. The award took into consideration the hours of labour and various other points. (‡)

### Cost of Living.

A reduction in the price of mill feed, owing to the falling off in the demand following the marketing of live-stock, went into effect in January. Hay and oats were also lower in price. Weather conditions tended to check further marketing of live-stock with the result that meat prices became firmer. Dairy produce remained exceptionally high. Wood fuel in western Canada was considerably lower than last year; coal also, owing to the decreased demand

following the mild winter was easier in price. The price of flour, however, was further advanced in the opening week of the month. Cocoa beans, chocolate, etc., declined in price. The copper and tin market showed strength during January. Heavy rubber lines were in demand, retail prices remaining unchanged, though the raw rubber market has declined. Lumber was easier in price in the western provinces.

### Interruptions to Industry.

The number of trade disputes in existence during January was 3 more than in the previous month, and there was an increase of approximately 10,265 in the number of working days lost. Compared with January 1907, there was a decrease of 4 in the number of trade disputes, and an increase of about 8,896 in the number of working days lost.

Among industrial establishments, etc., destroyed by fire or through other causes during January, as reported in the press of the Dominion, the following may be mentioned:—

*Nova Scotia.*—Store of Dominion Coal Company at Glace Bay, loss \$20,000; business block at Halifax, loss, \$10,000; residence of blast company's employee at Sydney, loss, \$2,000.

Heavy gales in the first and last weeks of the month did much damage to fishing gear along the Nova Scotia coast.

*New Brunswick.*—Hotel at Florenceville; carriage works and departmental store at St. John, loss, \$2,500.

In the gales at the beginning of the month two vessels, the "Whisper" and the "Baden Powell" were wrecked off the New Brunswick coast, the former near St. John and the latter off Falkland Island; the crews in both cases were saved.

*Quebec, Que.*—Aerated water factory at Hull, loss, \$1,000; stores at Buckingham, loss, \$5,000; wholesale furrier establishment at Montreal, loss, \$20,000; Pintsch gas works, and tarred felt factory at Montreal, loss, \$50,000; fancy goods store and laundry at Montreal, loss, \$3,000; departmental store at Montreal, loss, \$100,000; gas reservoir

(\* The full text of this agreement is published under the heading of "Recent Industrial Agreements," elsewhere in the present issue of the *Labour Gazette*.

(†) See report of St. John, N. B., correspondent.

(‡) The text of the award is published elsewhere in the present issue.

at Montreal, loss, \$30,000; silk waist factory, planing mill and store at Montreal, loss \$31,000; five stores at Montreal, loss, \$125,000; stores on citadel at Quebec; store at Quebec, loss, \$1,000; convent at Rimouski, loss, \$100,000; saw mill at St. Jean Deschaillons, loss, \$8,000; blacksmith shop at St. Phillippe d'Argenteuil; convent at St. Remi, loss, \$30,000; hotel at Sawyerville, loss, \$6,500.

Owing to the comparatively mild weather the River St. Lawrence was clear of ice below Montreal up to the middle of the month. This is very unusual.

**Ontario.**—General store at Alvinston, loss, \$18,000; cold storage at Aylmer, loss, \$10,000; furniture store at Barrie, loss, \$3,000; opera house at Brantford, loss, \$40,000; general store at Cayuga; general store at DeCewsville; skating and curling rink at Elora; street railway power-house at Hamilton; coffee and spice factory, at Hamilton, loss, \$100,000; glass works at Hamilton; grocery store at Ingersoll; grist and flour mills at Lakefield, loss, \$28,000; tin plate factory at Morrisburg; stores and warehouses at New Liskeard, loss, \$4,000; hotel at Ottawa, (partial) loss, \$1,000; livery stable and curling rink at Peterborough, loss, \$11,000; planing mill at Port Credit, loss, \$2,500; flour mill and grain at Kenora, loss, \$1,000,000; clothing store at Stratford; storage warehouse at Toronto, loss, \$500,000; church and stores at Toronto, loss, \$28,000; school supply factory at Toronto, loss, \$19,000, 30 men out of employment. Barn at Petrolea.

**Manitoba.**—General store at Arden, loss, \$10,000; elevator and grain at Souris, loss, \$11,000; stores at Winnipeg, loss, \$35,000.

**Saskatchewan.**—Storehouse at Humboldt, loss, \$5,000; elevator and 18,000 bushels of grain at Milestone; railway station at North Battleford, loss, \$5,000; furniture warehouse at Saskatoon.

**Alberta.**—Store at Vermillion, loss, \$1 000.

### Conditions in the Industries and Trades.

Conditions of employment during January in the several industries and trades throughout Canada, as indicated

by the reports of correspondents to the *Labour Gazette* and by information received at the Department from other sources, may be briefly summarized as follows:—

### Agriculture.

Conditions were quiet among agriculturists during January from seasonal causes. Good snow roads assisted in the hauling of fire wood and the marketing of produce, prices for which remained high. A decline in the price of feed was a favourable feature in the livestock branch; in western Canada the prevailing mildness of the weather enabled cattle to find plenty of fodder on the ranches. The movement of western grain was also materially assisted by the open weather.

A large number of agricultural and dairying associations held their annual conventions during January. Among these the more important were the following: The Western Ontario Dairymen's Association at Woodstock, Ont., January 15-17; the Eastern Ontario Dairymen's Association at Picton, Ont., January, 8-10; the Eastern Ontario Winter Fair and Poultry Show at Ottawa January, 20-24; the New Brunswick Farmer's and Dairymen's Association at Fredericton, January 22-24; the Huntingdon Dairymen's Association at Orms-town, Que., January 31; the Nova Scotia Farmers' Association at Antigonish, N. S., January 28-30. The Prince Edward Island Fruit Growers' Association Charlottetown; the Pomological and Fruit Growing Society of Quebec, at Ste. Anne de Bellevue, Que., and the New Brunswick Fruit Growers' Association at Fredericton, Jan. 25. The Alberta Farmers' Association held a convention during January.

The Manitoba Grain Growers' Association held a three days convention at Brandon, Man.\*

The English market for apples was unsettled, prices having shown a considerable decline with resulting losses to Canadian apple buyers. The decline in prices was attributed to heavy shipments from the United States following upon the scarcity of money.

(\* See report of Brandon correspondent.

TABLE SHOWING STATE OF EMPLOYMENT IN

This table is based largely on the reports of the correspondents of the *Gazette* as published in the present issue several trades and industries throughout the Dominion. This table has reference only to the amount of employment headings in the *Gazette*. In tabulating the information in question the terms employed are divided into two groups, the busy, very busy, (2) quiet, dull, very dull.

There was a marked increase in cow-testing work in Canada during 1907, there being 52 associations in operation instead of 16 in 1906, and 876 members in place of 297, while the number of cows increased from 3,750 to 9,160.

#### Fishing.

Smelts and eels in fair quantities were taken off the New Brunswick and Prince Edward Island coasts. Some catches of lobsters were also made. The other branches in the Maritime provinces were quiet from seasonal causes. Gales and shifting ice caused damage to gear. The tom-cod fishing was fair in the St. Lawrence river. The month was very quiet on the great lakes. In British Columbia some heavy catches of herring were made at Nanaimo. The whaling station established on the east coast of Vancouver Island was also busy. The final return of the sealing catch during the past season was 5,397 skins, being the smallest in many years. Thirty-eight sea otter skins were also taken. (†)

#### Lumbering.

Compared with a year ago the lumbering industry was less active in Ontario and in the eastern provinces. In Nova Scotia the cut will be smaller than in many years past. In New Brunswick the absence of snow in the woods hampered operations, and a number of camps were broken up. Conditions in this respect, however, were favourable in Quebec and eastern Ontario, though lack of snow was complained of in the western portion of the latter province.

The latest official estimate of the Ontario pine cut for 1907-08 is 675,000,000 feet, a shrinkage of 35,000,000 feet from the estimate earlier in the season. The estimates of railway ties have been doubled owing to the active demand of the Canadian Northern Railway, the National Transcontinental Railway and the Canadian Pacific Railway.

In the Northwest provinces large numbers of men were employed taking out fire wood, the supply of which was more plentiful than in 1907.

The lumber camps and mills of British Columbia continued very quiet. Nearly all of the mills suspended operations in December for annual overhauling of plants and have not since re-opened. It was estimated that 317,000,000 feet of lumber were sold last year by the coast mills of British Columbia and 178,000,000 feet by the mountain mills. This is a considerable falling off compared with 1906. Stocks on hand at present are very heavy, especially in the mountain mills. At a meeting of manufacturers, representing both the mountain and coast mills, held at Vancouver, a reduction in the price of lumber was discussed. It was decided by the provincial government to discontinue the issuing of licences to hand loggers.

#### Mining.

Conditions were active for the season in the Nova-Scotia collieries (‡) and in the asbestos mines of Quebec. There are at present 13 companies engaged in asbestos mining in Quebec, employing about 2,500 men; the output in 1907 was estimated at 25 per cent more than that of 1906. The selling price has considerably increased, being about \$300 per ton for first-class crude asbestos. In New Brunswick the Minto coal mines reported a good year; extensive developments in iron mining in the vicinity of Bathurst are expected in 1908. The mica mines of Quebec continued very dull. Total shipments of ore from Cobalt, Ont., during 1907, were 14,040 tons, compared with 5,129 tons in 1906, 2,144 tons in 1905 and 158 tons in 1904. The estimated value of shipments during 1907 was between \$10,000,000 and \$12,000,000. In other sections of Ontario conditions during January were normal. The Canada Corundum Company closed down its works at Craigmont on account of business depression in the United States. The estimated output of Ontario mines during 1907 included 9,000,000 ounces of silver, 10,776 tons of nickel and 5,260 tons of copper. The production of iron ore during the first nine months of 1907 was 141,719 tons.

(†) For a return with regard to the salmon pack of 1907, see report of Vancouver, B. C., correspondent.

(‡) For statement re output during 1907, see report of Sydney, N. S., correspondent.

There are now 7 blast furnaces in the province, 2 having been added during the past year, one at Hamilton and one at Port Arthur. The coal mines of Alberta were fairly active, notwithstanding the falling off in consumption due to the mild winter. In British Columbia also, the Crows Nest Pass Coal mines were very busy, the output showing an increase of over 30 per cent, compared with that of January, 1907; a reduction in staff and output went into effect in the mines of Vancouver Island, as a result of a falling off in the industrial demand. In the metalliferous mines in the Boundary district the employees of the Granby Company returned to work at a reduced scale. It is stated that the gold yield of Cariboo for 1907 would show an increase of approximately one third over the yield of 1906, the season having been very favourable on account of the very heavy rainfall. Preliminary estimates of the mineral production of British Columbia during 1907, place the total at \$25,738,983, an increase of approximately \$750,000 over the yield of 1906.

#### Manufacturing.

Conditions were much the same as in December, though an improvement in outlook, resulting from easier financial conditions, was reported in several branches and localities. Cotton mills and rubber factories continued busy. Boot and shoe factories also were busier than in the autumn months. The iron and steel output was less than in December owing to the closing down of the Sault Ste. Marie, Ont., plant through a shortage of pig iron and for repairs. At Sydney, N. S., however, the largest production of pig iron reported at these works in one day, was made early in January, the furnaces turning out 1,135 tons of pig iron within 24 hours. The year's output of the company was as follows:—

Iron ore mined.....	593,000 tons.
Limestone quarried.....	352,600 tons.
Coke produced.....	409,000 tons.
Pig iron produced.....	256,500 tons.
Steel ingots produced.....	270,600 tons.
Steel blooms produced.....	237,500 tons.
Steel billets produced.....	71,000 tons.
Steel rails produced.....	129,000 tons.
Steel rods produced.....	64,500 tons.
Sulphate Ammonia.....	1,550 tons.
Tar.....	4,378,000 gallons.
Granulated slag.....	17,000 tons.

The most important additions to the company's plant were two Bessemer converters with their accessory appliances. These are not used for the making of steel but for the preliminary treatment of the molten pig iron on its way to the open hearth furnaces.

It was stated that the capacity of flour mills in western Canada was increased by 13,600 barrels per day, or 40 per cent during 1907 as a result of the erection of 17 new mills and the enlargement of 3 other mills.

#### Railway Construction.

Railway construction operations were carried on as actively as the season would permit during January, in view of the large contracts which will be undertaken with the opening of the spring. The general market for labour was considerably affected in certain localities by these operations. As the work in this connection was of special importance in view of the lack of employment prevailing at certain points, a special statement was prepared by the several correspondents to the *Labour Gazette*, and information was obtained by the Department from leading contractors with reference to the extent of employment, wages, prices paid for board, etc., in railway construction camps during January. A summary of these statements according to provinces is as follows:—

*Nova Scotia.*—Men were cutting down the timber on the right of way for the Sydney and Louisbourg line, at a rate of \$1.50 per day, Board for labourers in Nova Scotia is about \$15 per month.

*Prince Edward Island.*—There were no railway construction operations in progress. Board generally ranges from \$3 to \$5 per week.

*New Brunswick.*—Work on the International Railway (Campbellton to Edmunston), and the doubletracking of the Intercolonial Railway from Moncton to Painsec was suspended. On the Moncton and Chipman section of the National Transcontinental Railway, 140 labourers, with steam shovel and gravel train crews were employed; labourers received \$1.75 per day, and board was charged at the rate of \$3 to \$3.50 per week. Two hundred choppers on the right of way and

several portage crews were employed at a rate of \$1.25 to \$1.50 per day, with board. The work of clearing the right of way will be continued throughout the winter, and a number of steam shovels operated.

*Quebec.*—Operations were in progress at La Tuque. Messrs. M. P. and J. T. Davis, contractors, have 200 miles of railway under contract, of which 130 miles were under way during January, about 2,000 men being employed at rates of from \$1.50 to \$1.75 per day; \$3.50 per week is charged for board, and a deduction of 50 cents per month is made for medical attendance.

*Ontario, East.*—Some 40 men were hired at Ottawa at wages of \$1.50 per day during the winter and \$1.75 for the summer. A charge of \$3.50 per week is made for board, with a further deduction of 50 cents a month for medical attendance. About 120 men at Toronto were given work on the Temiscaming and Northern Ontario Railway at wages of \$1.50 per day, with a deduction of 60 cents a day for board, \$1.00 per month for medical attendance, and 20 cents per month for mail service; they were also charged \$7.50 for transportation. The Brantford and Hamilton Electric Railway had about 80 men employed on construction work. The grading was completed on the St. Mary's and Western Ontario Railway from St. Mary's to Embro; 200 men were employed at 17½ cents per hour, and obtained board for \$3.50 per week. The Michigan Central Railway Company is building a new yard at Windsor, employing 250 men at \$1.60 per day of 10 hours, the men paying \$4.00 per week for board.

*Western Ontario and the Northwest Provinces.*—About 300 miles of railway east of Winnipeg is under construction, and the rock work in connection therewith was being done during January. About 150 additional labourers and rockmen were in demand at 17½ cents per hour, employees being charged \$4.50 per week for board, and a medical fee of 50 cents per month. About 400 men were employed on the construction of steel bridges at Battle River and Clover Bar. Labourers were receiving 2 cents per hour, and carpenters 35 cents per

hour. Board at the camps was \$4.50 per week, and 75 cents per month was being deducted from wages for medical attendance. (\*) Lumber contractors were getting out a large number of ties for the railways in northern Alberta. The Canadian Pacific and Canadian Northern Railways had suspended operations.

*British Columbia.*—About 1,400 men were employed on the Great Northern Branch from Fernie to Michel, and on the Canadian Pacific Railway branch at Hosmer. The rates of wages were \$2.00–\$2.25 per day; board was \$5.25 per week, with a deduction also of \$1.00 per month for medical attendance. Men were being engaged for the building of a road between Kitamaat and Kitsalas Canyon. It was stated that tenders for the construction of 100 miles of railway in British Columbia from Prince Rupert eastward would be invited shortly. On Vancouver Island, a contract for an extension of 12 miles by the Canadian Pacific Railway has been awarded, but work has not yet been begun beyond the clearing of the right of way by Japanese labour.

### General Transport.

The movement of western grain was very heavy, having been facilitated by the mild weather. The fact had a pronounced effect on money conditions throughout the west. Large quantities of low grade grain were forwarded to the European market, and it was expected that all the elevators would be cleared of this product before the arrival of warm weather.

The following table shows shipments of grain during the seasons of navigation of 1906 and 1907 from Fort William and Port Arthur, Ont.:—

COMPARATIVE STATEMENT SHOWING SHIPMENTS OF GRAIN FROM FORT WILLIAM AND PORT ARTHUR, CANADA, DURING THE SEASONS OF NAVIGATION, 1906 AND 1907.

	Season of navigation, 1907.	Season of navigation, 1906.	Increase, 1907.
	Bush.	Bush.	Bush.
Wheat...	46,985,546	44,376,338	2,609,208
Oats....	10,706,268	5,741,564	4,964,704
Barley...	1,353,630	683,759	669,871
Flax....	852,605	382,054	470,551

\* See also report of Edmonton, Alta correspondent..

During the season of 1907, upwards of 25,640,000 bushels of grain were shipped to Montreal by way of the St. Lawrence Canal system.

Shipments of general merchandise were light during January, compared with the previous month, and some train crews were laid off in Ontario and the North-west Provinces. There was a surplus of freight cars in the latter provinces, owing largely to the decline in the coal traffic resulting from the mild weather. Car shop employees were quieter than in December. Traffic on the Inter-colonial Railway, however, was exceptionally active.

The Canadian Pacific Railway Company's earnings during 1907 exceeded those of 1906 by about \$8,000,000, amounting to upwards of \$75,000,000, compared with \$67,000,000 in 1906, which, in turn, were \$13,000,000 in excess of any previous record. Since 1900, the earnings of the company have considerably more than doubled. The Temiscaming and Northern Ontario Railway also reported a considerable increase in profits.

By an order-in-council, the right to carry passengers from one Canadian port to another will be granted solely to British vessels after January 1st, 1909.

### The Trades.

*Building.*—Conditions were unchanged from December, the inside branches being only partially employed.

*Metal and woodworking.*—There was, on the whole, an increase in activity among the employees of the metal, engineering, woodworking and furnishing trades, as compared with December, but the month was less active than January, 1907.

*Printing.*—The allied trades were somewhat quiet, though bookbinders had a fair month.

*Clothing.*—Journeymen tailors were quiet, as is usual at this season. Garment workers had a fair month. Boot and shoe workers were busy. Furriers were quieter than in the winter of 1907.

*Leather.*—The production of leather was still limited to the quantities re-

quired for immediate use; the price of hides showed some decline.

*Textile.*—Employees in textile establishments, including cotton mills, carpet factories, etc., had a good month.

*Food and tobacco preparation.*—Bakers had a fair month. In connection with legal proceedings at Toronto, Ont., it was stated that the cost of flour was nearly double that of ten years ago, soft flour costing \$4.90 per barrel, as compared with \$2.45, and hard flour \$5.50, as compared with \$3.22 ten years ago. Labour, malt extract, shortening, sugar, etc., have also advanced. Confectioners were somewhat quiet. Flour mills continued busy, with prices firm. The ice harvest was about three weeks later in opening than in the preceding year, but the cold weather of the closing days of January in Ontario and Quebec assured an abundant supply, and employment became very busy.

*Miscellaneous.*—Barbers, hotel and restaurant employees, retail clerks and delivery employees were somewhat quiet. The supply of domestic servants was greater than for some time past.

*Unskilled labour.*—There were a number of unemployed at various points, but conditions, notwithstanding the advance of the winter season, compared favourably with those prevailing in December. The heavy snowfall of the second half of January gave employment to large numbers of men in several of the cities of Ontario and Quebec. The harvesting of the ice crop also employed a number.

### Canadian Trade and Revenue.

*Foreign trade.*—During December, 1907, the total value of imports entered for consumption was \$24,548,061, compared with \$19,860,125 in December, 1906. The total value of imports for the nine months ending December 31, 1907, amounted to \$284,043,245, compared with \$251,592,625 for the corresponding period of 1906. Total domestic exports for the nine months ending December, 1907, amounted to \$193,913,346, compared with \$195,532,556 in the corresponding period of 1906. Increases in

exports during December, 1907, took place under the headings of the Mines, Agriculture and Manufactures, and decreases under the headings of the Fisheries, the Forest and Animals and their Produce.

*Imperial trade.*—The following table shows the total numbers and values of Canadian produce received in Great Britain during 1907:—

	Amount.	Values.
Cattle.....	125,753	£2,150,469
Sheep.....	14,485	26,216
Wheat, cwt.....	13,469,700	4,963,048
Wheat, flour.....	1,837,920	921,890
Peas, cwt.....	170,090	68,348
Bacon, cwt.....	1,192,401	3,171,562
Hams, cwt.....	296,949	845,021
Butter, cwt.....	34,753	175,537
Cheese.....	1,698,847	4,989,399
Eggs, grt. hundreds.....	115,872	53,084
Horses.....	166	7,090

According to reports received from commercial agents at the Department of Trade and Commerce, good openings were reported in Great Britain for basswood and poplar broom handles, maple skewers for butchers' use, maple last blocks, woollen rags for manufacturing shoddy cloth, frozen or fresh salmon, ropes and twine.

An increased demand was reported at St. Kitts, Nevis and Virgin Island, West Indies, for Canadian goods generally. In Australasia, a satisfactory trade was reported in Canadian agricultural implements, and a good demand for news and wall papers and glazed kid.

*Domestic Trade.*—Trade, wholesale and retail, was quiet throughout January. The good snow roads and the high prices offered for produce brought large numbers to market. Mild weather caused slowness of movement in heavy dry-goods lines during the first half of the month; conditions in this respect improved later. The situation as a whole was regarded as healthy, collections being fair and spring orders average.

Since the opening of the year there has been a gradual but steady improvement in the financial position. The rate for call money declined, and time money became more plentiful, securities advancing in price. In the December bank statement decreases were shown in deposits, current loans and call loans in Canada. Current loans in Canada

have decreased \$24,500,000 in the past five months, though the December totals were nearly \$8,000,000 higher than in December, 1906. Bank clearings were less than in January 1907.

The annual statements of several of the Canadian chartered banks were published during January, and in every instance show a prosperous year with an increase in profits in most cases compared with the preceding year. \* The Bank of New Brunswick, out of profits of \$133,291, paid \$30,000 into rest account. The Bank of Hamilton reported net profits of \$384,708. The United Empire Bank's deposits increased 40% during the year. The number of branches of the Bank of Nova Scotia has increased from 65 to 72, and deposits by 2,000,000; reserve is now 180% of capital. The Royal Bank declared profits of 19% out of which a bonus of 10% was paid to employees. The Bank of Commerce, the Eastern Townships Bank, and the Bank of Toronto also paid bonus to staff. The Provincial Bank and the Farmer's Bank reported favourably for the year. The Metropolitan Bank will carry forward \$241,532, which is \$57,000 more than the similar balance of the preceding year. Total profits of the Dominion Bank were about \$100,000 more than in the previous twelve months. The Traders' Bank of Canada has added \$100,000 to rest and has carried \$25,000 forward, assets, circulation and discounts having shown substantial increases.

The assets and business of the Crown Bank of Canada were purchased by the Northern Bank; the amalgamated business will be conducted in the name of the Northern Crown Bank with head offices in Winnipeg. The Northern Bank previously had 47 branches in western Canada and the Crown Bank 24 branches in Ontario.

The Sovereign Bank of Canada suspended payment during January. The various branches were taken over by 13 other banks. Some 391 employees were affected.

(\* See also the *Labour Gazette* for January, 1908, p. 751.

*Canadian Revenue.*—Canadian revenue during January, 1908, amounted to \$7,268,313.72, compared with \$6,963,976.84 in January, 1907. For the ten months ending January 31, 1908, the total revenue was \$81,024,272.30, compared with \$71,649,730.32 during the corresponding period of 1906-7.

The total expenditure on capital account during January, 1908, was \$2,973,533.05, of which the leading items were Public Works, Railways and Canals, \$2,412,106.17; Militia (capital) \$173,288.97; and Bounties, \$216,455.56.

#### Notes.

The *assessment values* in several Canadian cities showed heavy increases during the past year. The total assessment of Victoria, B. C., for example is at present \$21,945,080, an increase of \$3,808,926 over the preceding year.

New stations of the *Fishermen's Union of Nova Scotia* have recently been incorporated as follows: Station No. 18, situated at Framboise, Richmond Co., Station No. 19, situated at Digby, Digby Co; and Station No. 20, situated at Ingomar, Shelburne Co. This makes a total of twenty stations.

An appeal taken from the judgment of Judge Longley in favour of the contention of the *Dominion Iron and Steel Company* that it had suffered damage through breach of contract on the part of the Dominion Coal Company, was dismissed in January by the full bench of the Supreme Court of Nova Scotia.

In the Speech from the Throne at the opening of the eleventh legislative assembly of the province of *British Columbia* January 19th, 1908, reference was made to the prosperity of the past year, the appointment of a commission on irrigation, the encouragement of immigration, the progress of railway construction and the regulation of the civil service, the last to involve the creation of a superannuation fund. A large reduction in the public debt was made during the past year.

The third session of the first legislature of *Alberta* was opened on January 15th. Reference was made in the Speech from the Throne to the prevailing prosperity

and the favourable weather conditions of the past autumn. The reports of the Beef and Coal Mining Commissions, it was stated, were ready and would be laid on the table of the house. A workmen's compensation act, a mines' regulation act, an act for the establishment of an industrial school and an act for the establishment of a government drainage system will be introduced.

At the opening of the first session of the twelfth legislature of *Manitoba* January 2nd, it was stated in the Speech from the Throne that general prosperity had prevailed throughout the province during the past year. Reference was made to the purchase of the business and interests of the Bell Telephone Company of Manitoba, the proposed establishment of a Department of Telephones and Telegraphs and the safeguarding of the interests of agriculturists by facilitating the sale of grain.

By-laws submitted to enable various municipalities throughout western Ontario to participate in the project of the Hydro-electric Commission for the distribution of *Niagara power*, were carried by large majorities. The municipalities affected were, Toronto, Hamilton, London, St. Thomas, Brantford, Stratford, Guelph, Galt, Woodstock, Waterloo, St. Mary's, Hespeler and New Hamburg. At Ingersoll the proposal was rejected.

The fifth annual meeting of the employees, management, travellers and officers of the *Williams, Green and Rome Company, Limited*, of Berlin, Ont., was held in the assembly room of the company's factory on January 9th. An address was delivered by the president of the company, who reviewed the business conditions of the past year with special reference to the financial stringency of the closing months; The progress of the "Welfare work" system was also reviewed (\*). The effort made by the company a year ago to encourage saving among the employees by presenting a savings bank book with an account opened and one dollar deposited

(\*) A special article describing the system in operation among the employees of the Company was published in the February, 1907, issue of the *Labour Gazette*, at page 819.

in the employees' name for every year of his service with the firm, was reported to have proved a success, the employees having to their credit at the end of the year the sum of \$12,223.35. In addition, \$5,369.90 had been paid out of earnings on real estate, mortgages and improvements. Altogether the employees had saved \$17,603.25 in the year. Out of 460 employees, 370 have an account. Withdrawals have been somewhat heavy during the past six months. It was stated that nearly 4,000 visitors had inspected the establishment during 1907. The various branches of the system were reported to have had an active and successful year. A social evening was held by the employees at the factory on January 10th.

The *Cottage Home Builders' Association*, organized in June last under the auspices of the Toronto Branch of the Canadian Manufacturers Association, to build one thousand moderate priced homes for working men in Toronto, has had to postpone the carrying out of its project indefinitely owing to the financial stringency. About one-fifth the required amount of stock was subscribed, but as the manufacturers were the first to feel the effect of the restrictive policy put in force by the banks, many who had promised their support were forced to withdraw, since all their surplus capital was required for their own businesses. It was thought, however, that the agitation for cheap houses which preceded the organization of the company did good in showing how inadequate was the housing accommodation in Toronto for the requirements of its industrial population, and the attention directed to this subject resulted in the erection of many hundred cheap houses by speculative builders during the summer months. The situation is therefore at the present time not nearly so aggravated as it was a year ago, but there still said to be considerable field left for the operations of such a company as the manufacturers proposed to form.

(†) See the *Labour Gazette* for March and June, 1907, pp. 965 and 1334 respectively.

It was settled as probable that the proposal will be revived when the money market adjusts itself, and a large number of houses to sell for \$1,200 each will be erected. An English financial agent has recently made inquiries regarding this project with a view to embarking English capital in an enterprise to be organized for the same purpose in Toronto.

The *Dominion Legislative Board* of the International Brotherhood of Locomotive Engineers, composed of representatives from the several divisions in Canada, was in session at Ottawa from the 22nd to the 30th of January. It was convened for the purpose of considering legislation affecting employees of the operating branches of the railway service. On the 27th of the month the members of the Board, together with representatives of other railway labour organizations, met the Rt. Hon. the Prime Minister and the Hon. the Minister of Labour, and asked, among other requests, for an amendment to the section of the Railway Act (Sec. 415) under which prosecutions at present are frequently made on the ground that the section is causing railway men to be unjustly dealt with in many cases. They asked that the words "or negligently" be eliminated from the Act, and that offenders be left liable to be punished only for wilfully disobeying orders. The Prime Minister replying, stated that the safety of the travelling public and of the trainmen themselves required careful protection under the law, but that he would consult with the Minister of Railways and the Minister of Justice, and ascertain if the grievance of the railway employees could be remedied without removing the element of protection which the law provides. The Board had many other matters of a legislative nature under consideration and the executive committee was instructed to remain at Ottawa, to meet the Minister of Railways in regard to the amendment of the Railway Act, and the Board of Railway Commissioners as to changes in the rules governing the movement of trains.

## II. REPORTS OF LOCAL CORRESPONDENTS.\*

### SYDNEY, N.S., AND DISTRICT.

*M. John Moffatt, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Labor conditions were active throughout January. Open weather and the absence of heavy storms, facilitated transportation on the Railways, and the easy movement of cars on the sidings of the larger works.

The Coal industry was active, and while all departments of the Sydney Steel Works were not as busy as usual, yet the output from the blast furnaces formed a record. The N. S. Steel & Coal Co., had a fair month in both the steel and coal departments.

The Coal output of Nova Scotia, during the year, was greater than in 1906, and when returns are complete, may show an increase of thirty or forty thousand tons, the total output being 5,900,000 tons. Of this amount Cape Breton Island produced 4,550,000 tons. The Dominion Coal Co., alone produced 3,541,000 tons, the N. S. Steel & Coal Co. 664,000 tons, Inverness, 270,000 tons. One of the Dominion Collieries, No. 2, produced 1,100,000 tons during the year; this is probably the largest output on record in Nova Scotia for one mine. If weather conditions continue favorable, and no industrial disturbances interfere, the year 1908 will place the Coal output of Nova Scotia, well above six million tons. The Nova Scotia Steel Co., had an active month, with normal outputs of Coal and Steel. No's 2 and 4 Collieries, are being rapidly developed with a view

to additional outputs. Inverness had an active month and is being placed in position to maintain and if possible add to the past year's record which exceeded that of 1906 by 10,000 tons without sinking further to the dip. Port Hood was also active and has good prospects for a busy year. Coal heaps are appearing at some of the larger Collieries and a normal if not a larger amount of coal will be banked.

The Sydney Steel Works continued busy. Four blast furnaces were in operation, while the rail mill was kept constantly running. The rod mill was shut down for three weeks, as orders for steel rods, were ordered held back. The operating of the four blast furnaces together, created an over supply of pig iron, which will be kept for use later on.

No construction work was done during January. About 150 men from the piers, transportation and other departments were laid off. Outside trades were quiet. Foundry's and other works were active. Woodworkers were on short time, working eight hours per day instead of ten. The building trades were quiet and prospects are not favorable. Transportation by Railway was heavy. Wholesale and retail trades were quiet.

About two miles of the Railway spur line connecting Number 12 Colliery with the Sydney and Louisburg main line has been built and graded.

### WESTVILLE, N. S., AND DISTRICT.

*Mr. T. Hale, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions compared favourably with those of the corresponding month of last year. While the Drummond colliery output showed a decrease of a few hundred tons, all the other collieries in the district reported increases, so that the year closed favourably for Pictou county. The total amount

(\* In addition to the following reports of local correspondents to the *Labour Gazette* with regard to industrial and labour conditions during January in the several cities of Canada, special statements were prepared by the correspondents with reference to the number of unemployed, if any, in their respective districts during the present winter season, as compared with previous years. These are published elsewhere in the present issue under the heading "Unemployment during the winter season, 1907-08."

of coal shipped in the district was about 40,000 tons in excess of 1906. The outlook for the year 1908 is favourable for a continuance of these prosperous conditions. The weather has been very mild, and very little difficulty has been experienced in the handling of traffic. The supply of cars, so far, has been sufficient to meet all requirements. There is little demand for loaders or unskilled labourers at the different collieries, but all appear to be fairly well employed. There were a number of surface men put off at the Allan shafts, but many of them obtained employment under ground.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were employed on work of the season.

*Fishing.*—Inactivity was the rule.

*Lumbering.*—Active conditions prevailed in supplying pit timber to the various collieries.

*Manufacturing.*—The Steel Company's plant, at Trenton, worked more steadily than in December, and it is expected that all hands will find employment by Feb. 1.

*Mining.*—This industry was generally active, the men being fully employed, with excellent prospects for a continuance of these conditions. The output at the Drummond colliery in December, 1907, was as follows:—Coal, 25,850 tons; coke, 437 tons; fire clay, 272 tons and fire brick, 65,000. The pay-roll amounted to \$41,000. The Acadia collieries shipped 27,355 tons.

*Railroad construction and employment.*—Work on the railway was very brisk. In one week the net tonnage amounted to 38,000 tons, mainly representing shipments of steel rails from Sydney, to Edmonton, Alberta, for the Grand Trunk Pacific Railway Company.

*Other industries.*—Outside construction work was more or less inactive.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Quiet conditions prevailed except in the plumbing and gas-fitting branches and among unskilled labourers employed at the collieries.

*Metal, engineering and shipbuilding.*—Machinists, steam engineers, electrical workers and linemen found employment active,

*Printing.*—Printers had active employment.

*Food and tobacco preparation.*—Bakers and confectioners were busy.

*Miscellaneous.*—Barbers were actively employed, and clerks and stenographers were very active.

*Transport.*—All branches of transportation, including street railway employees, switchmen, trackmen, freight handlers, etc., were busy.

*Unskilled.*—Quiet conditions prevailed.

#### HALIFAX, N.S., AND DISTRICT.

Mr. A. J. Smith, correspondent, reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions during the past month, were in many respects all that could be expected considering climatic conditions. Very unseasonable weather prevailed and the lack of snow, was responsible for much dullness in many lines which would not otherwise have prevailed. Work on the waterfront was slack during the early part of the month, but as the month advanced increased in activity with prospects brighter for February. The various building and repairing contracts made fair progress.

The Canadian Bank of Commerce is nearing completion. Work on the additions to the Union Bank and Court House also made good progress. The new telephone building is in the hands of the plasterers who will soon give way to the carpenters, of whom a number will be employed. The local market can easily supply this demand. At a special meeting of the Trades and Labour Council, held on the 22nd of January, it was reported that "with the exception of a few trades that are always dull at this season, the unions reported employment very good."

## CONDITION OF LOCAL INDUSTRIES.

*Fishing.*—Local fishing has only been fair, considerable damage was done to lobster traps by gales; otherwise this branch would have been favourable. There was an active demand for fresh fish; local dealers reported the market brisk, and stated they could not secure sufficient to satisfy the demand. The prevailing rate paid was 2½c. per pound by the ton.

*Lumbering.*—Trade has been dull.

*Manufacturing and Mining* have been normal.

*Railroad construction.*—Conditions were very dull.

## CONDITION OF PARTICULAR TRADES.

*Building.*—Masons experienced a dull month. Bricklayers were better employed than in December. Plasterers were fairly well employed. Carpenters had a fair month with prospects better for February. Painters had a quiet month, but there was an improvement over December. Stone cutters had a busy month. Builders' labourers had a fairly good month.

*Metal.*—Boilermakers had a fair month, a marked improvement over December. Horseshoers also experienced a fair month.

*Printing.*—Printers and Pressmen had a busy month, there being but few idle hands. Bookbinders were active.

*Clothing.*—Tailors and garment makers were rather dull, owing to weather conditions.

*Unskilled labour.*—Was duller than for some months.

Other lines were about up to the average.

## AMHERST, N. S., AND DISTRICT.

Mr. A. D. Ross, correspondent, reported as follows:—

## GENERAL CONDITION OF THE LABOUR MARKET.

The past month has been exceptionally dull. A number of factories closed

down temporarily for stock-taking, for repairing machinery and other purposes. The local supply of labour was more than sufficient to meet the demand.

The Amherst Boot & Shoe Co., has added a large ell. This will about double its capacity. The installation of new machinery necessitated a cessation of manufacturing for about two weeks. The enlarged factory will give employment to a number of extra men. There has been no line of trade particularly active. All the industries have re-opened within the past few days, and report prospects for the coming season exceptionally good.

## CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Prices for farm produce continued high. Hay was scarce in some quarters.

*Lumbering.*—Small dealers are practically out of business.

*Manufacturing.*—This industry was quiet during the early part of the month, but all the factories are now re-opened.

*Mining.*—Coal mining was very brisk, all the mines working full time. More miners could find employment in the Cumberland mines.

## CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons were not employed owing to the season. Local carpenters and joiners as a rule were working steadily, but there was no demand for more hands.

*Metal.*—Business in these trades was fairly active. No demand for extra labour exists at present, but the outlook for next month is good.

*Woodworking.*—Trade was dull but expectations are that spring work will be active.

*Printing.*—Printers were fairly active. A few good printers could find employment.

*Clothing.*—Trade was dull between seasons. Boot and Shoe workers have had steady employment.

*Leather.*—Trunk and bag makers have had steady work.

*Unskilled Labour.*—The dullness in the lumber trade has seriously effected the market for unskilled labour.

## CHARLOTTETOWN, P. E. I., AND DISTRICT.

*Mr. F. J. Nash, correspondent,* reported as follows:—

### GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market in January differed little from that of December, supply and demand being well balanced. Sales which started early in the month kept the clerks in dry goods stores busy. In other departments conditions were normal.

The mild weather enabled the winter steamers to run regularly giving steady employment to teamsters, freight handlers, etc.

### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Operations were quiet being mainly confined to getting out fence rails, hauling mud, etc.

*Fishing.*—Large quantities of smelts and eels were shipped to the American markets. No other fish were caught.

*Manufacturing.*—The few factories were carried on under normal conditions.

*Railroad construction and employment.*—Construction was practically at a stand-still. Change of timetable on the P. E. I. R., gave less time to a number of employees.

### CONDITION OF PARTICULAR TRADES.

*Building Trades.*—Bricklayers and masons had a dull month. Carpenters and joiners were active. Lathers and plasterers were dull. Plumbers, stone-cutters, gas and steam-fitters were active.

*Metal, Engineering and Shipbuilding.*—Iron workers, moulders and helpers, machinists, steam engineers, electrical workers and line-men were active.

*Woodworking and furnishing.*—Woodworkers, car builders and upholsterers were active.

*Printing.*—Printers, pressmen and bookbinders were active.

*Clothing.*—Journeyman tailors, garment workers, boot and shoe workers were active.

*Food and tobacco preparation.*—Bakers and confectioners, butchers and meat cutters, and tobacco workers were active.

*Leather.*—Tanners and curriers, and saddlers were active.

*Miscellaneous.*—Barbers, clerks and stenographers were active.

*Transport.*—Railroad conductors, locomotive engineers and firemen, trainmen, switchmen, telegraphers, trackmen and freight-handlers were active.

Longshoremen were active at Georgetown, but had a dull month in other parts of the province.

*Unskilled Labour.*—There was a fair demand.

## MONCTON, N. B., AND DISTRICT.

*Mr. J. C. Graves, correspondent,* reported as follows:—

### GENERAL CONDITION OF THE LABOUR MARKET.

For the season of the year labour has been fairly well employed and but few were unsuccessful in finding work. The entire month has been very mild so that a large amount of out-door work was possible. Merchants reported that their Christmas sales were much in excess of previous years. January has brought the usual quietness in trade, and stock-taking and preparing for the coming spring were in progress. All manufacturing establishments were in operation and some were especially active. The outlook for the year is exceptionally good, and business men are sanguine that the activity which characterized all branches of business in this section last year will be greatly surpassed in 1908.

Tenders will be received by the Department of Railways and Canals up to Feb. 15th for the lease of the old I. C. R., car and work shops at Moncton for the purpose of establishing an industry which will be productive of increased business for the I. C. R.

The notice specifies a 21 years lease and a guarantee that the industry will be commenced within one year from the acquiring of the property, that it

will give a reasonably steady traffic to the I. C. R., and that it will employ continuously not less than 300 operatives. Considerable work upon the new I. C. R., shops is being done, some 250 men being employed.

The Board of School Trustees for the city have decided to increase the salaries of the lady teachers of the staff commencing with next term as follows:—All Grade VII Teachers to receive an increase of \$50.00 per year, making the salary for this grade \$375.00. The teachers of the other grades upon new contracts are to receive \$25.00 of an increase for the first year making the salary \$325.00, and after two years service an additional \$25.00 will be given. About 29 teachers are effected by this change. No other change in wages or hours of labour have been noted and no unrest on the part of employees.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were occupied in caring for stock, getting out wood and marketing produce.

*Fishing.*—Smelt fishing has been in progress along the shore, but catches have not been large. At Miramichi many nets and shanties were swept away by drifting ice, entailing considerable loss.

*Lumbering.*—A small cut is being made in this immediate locality. Upon the Miramichi waters and North Shore the cut will be about 20% less than that of last winter. Lack of snow has interfered with hauling operations. Wages range from \$24.00 to \$28.00 per month.

*Mining.*—The Bathurst Town Council have granted a twenty year's exemption from taxation upon the proposed smelting works to be erected there by the Drummond Mines Co.

*Railroad construction and employment.*—About 225 men are now employed upon this end of the Moncton-Chipman section of the Transcontinental Railway. Three steam shovels are now in operation and much work done cleaning the right of way. The light snow fall and the mild weather so far

have been very favourable for the prosecution of this work.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers, masons and allied trades were quiet owing to the season. Carpenters found employment active and plumbers had an average month.

*Metal Engineering and shipbuilding.*—The various branches of these trades reported an average month.

*Woodworking and furnishing trades.*—Employees in these trades reported a fair month. The woodworking factories were busy and the employees of the Barrel Factory active.

*Printing and Allied.*—Active conditions in the various branches prevailed, employment being steady and wages satisfactory.

*Clothing.*—These trades reported quietness, that being the normal condition at this season of the year.

*Food and tobacco preparation.*—Bakers were brisk and butchers fairly active.

*Leather.*—Quietness prevailed.

*Miscellaneous.*—The various operators under this heading reported a fair month.

*Transport.*—The movement of heavy freight of all kinds still continued and the passenger traffic for the month has been good. Consequently train crews have had a good month, many making extra money.

*Unskilled labour.*—This class of labour has been quiet during the month, yet the unemployed in this locality seem to be few and the movement of men seeking work small.

#### DISTRICT NOTES.

*Sackville.*—The Enterprise Foundry was closed a fortnight during Christmas season. The moulders in the Fawcett Foundry were idle for some time owing to the power-house being out of order. The Sackville Board of Trade, with a membership of 67, held its Annual Meeting on the 14 inst., at which many important matters were discussed.

Additional wharf accommodation is urgently asked. Ten thousand tons of freight were landed at the wharves during the past year. The volume of business done in Sackville during 1907 is estimated as follows:—Value of manufactured goods sent out \$500,000; business done by Merchants bank \$1,000,000; business at the two banks \$1,700,000, and farming output \$6,000,000. A factory for manufacturing paper boxes is nearly ready to begin operation.

### ST. JOHN, N. B., AND DISTRICT.

*Mr. W. H. Coates, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during January was inactive especially among the building trades. The St. John Street Railway Company has commenced boring for water. The Fair property at Fairville is to be converted into a coal warehouse. The 87th annual meeting of the shareholders of the Bank of New Brunswick was held January 20. The statement for the year showed that the net profits were \$133,291.38. The usual dividends at the rate of 12 per cent per annum were paid, \$30,000 had been placed in rest account, \$5,000 had been contributed to the pension fund, \$10,000 had been written off bank premises, and a balance of \$15,494.88 carried forward. The rest account now is \$1,225,428. Cargoes have been filed at the Customs House for 36 steamships up to and including January 25. These steamers took away Canadian goods valued at \$5,356,520, and foreign goods valued at 2,118,412, making a total of \$7,474,932. The wheat shipment by the above steamers consisted of 2,100,579 bushels, valued at \$2,336,758. A statement recently published shows that the freight and passengers traffic earnings of the I. C. R., at St. John station is rapidly increasing. The total freight earnings were \$1,080,793.19 an increase of \$305,937.74 over 1906; in freight poundage there was an increase of 206,010,227

lbs., over 1906; the ticket earnings for 1907 amounted to \$147,980.82 an increase of \$12,463.79 over 1906; and the amount of grain passed through the elevator was 610,000 bushels, an increase of 262,774 bushels. The value of exports through St. John to the United States for the quarter ending December 30, 1907 was \$733,861.65. Shipments of goods during the four quarters of 1907 were:

	Canadian goods.	American lumber.
March.....	\$ 55,270.08	\$102,630.37
June.....	559,632.52	206,591.72
Sept.....	609,030.90	240,907.46
Dec.....	517,495.95	216,365.70
Totals.....	\$2,201,429.45.	\$766,495.25.

The grand total for the year was \$2,967,924.70, which was an increase of \$440,459.29 over 1906, when the grand total of the trade was \$2,527,465.41.

Bank clearings for the four weeks ending January 23 were \$4,945,240, and for the corresponding period last year \$5,319,700, being \$374,460 less in 1908 than in 1907, and \$1,084,093 greater than for the three weeks ending December 19, 1907. Fourteen employees of the Water and Sewerage Department have had their wages increased, taking effect January 1, of the present year, as follows:—Two from \$13.20 to \$15.00 per week; two from \$10.50 to \$12.00; five from \$10.00 to \$12.00; two from \$11.00 to \$12.00; one from \$10.00 to \$11.00; and two from \$9.00 to \$10.00. The caulkers have given notice that after March 1, they will demand \$3.00 per day. The present rate is \$2.50.

The provincial government will introduce a bill to provide a pension system as asked by the Provincial Teacher's Association. The plan as submitted to the government is that male teachers 60 years of age, and female teachers 55 years of age, shall be eligible if they have taught for thirty years or more. Teachers who have taught twenty years and who from any cause may be incapacitated, will be entitled to a pension of as many thirtieths of the full pension as years of service, up to thirty years. The full pension is \$400 for males and \$250 for females.

## CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Reports from Hartland Carleton County, are that prices for hay remain firm, and farmers are being paid \$9 to \$10 per ton. Oats are selling at 36 cents per bushel, and potatoes at \$1.00 per barrel. Dressed winter beef is selling at 4 and 5 cents, and dressed winter pork at 7 cents.

*Lumbering.*—The cut of the International Paper Company on the Richards and Hutchinson properties on the Miramichi will probably amount to 40,000,000 feet. It had been the intention of the company to cut only 30,000,000 feet, but conditions for yarding were so excellent and men available that it is likely there will be a larger quantity cut. There is much need of snow in the woods, and if more snow does not come within a few days a large number of the 1,200 men employed by this company will have to be discharged. The Miramichi Lumber Company was not long ago given permission to increase capitalization from \$400,000 to \$800,000, and the capital has already been increased to \$600,000. The men coming out from the lumber camps say, that the operators are laying off large numbers of men in every direction owing to the lack of snow. There has been nothing done for weeks, and the outfits, horses and men are being kept up at great expense. Gilman Bros. & Burden are taking out about 3,000,000 feet of lumber this season for manufacture at their mill at Pokiok.

## DISTRICT NOTES.

*Fredericton.*—The 32nd annual meeting of the Farmers and Dairymen's Association was held here on January 22-24, and the New Brunswick Fruit Growers' Association held its annual meeting January 25.

*Sackville.*—The Enterprise Foundry started up January 2, after being shut down for a fortnight. The Charles Fawcett Company has installed a boiler and a new 175 horse-power engine in the brick power house erected last autumn.

## QUEBEC, QUE., AND DISTRICT.

*Messrs. P. J. Jobin and Edward Little, correspondents, reported as follows:—*

## GENERAL CONDITION OF THE LABOUR MARKET.

The month was a quiet one for labour the supply exceeding the demand, though no reduction in wages went into effect. On the request of the Quebec Typographical Union No. 302, an increase in wages was granted (\*). A strike took place among the planing mill employees of the Gravel Lumbering Company of St. Romuald, on January 17. It was settled on the 22nd through the intervention of the secretary of the provincial board of conciliation and arbitration. A heavy snowfall gave considerable employment during January. Ice harvesting was begun about the middle of the month, the ice being between 10 to 12 inches thick, and increasing to 15 inches at the close of the month. The harvest was three weeks later in beginning than last year; the cost, in consequence, will be greater. A gang of thirty men started to work on the 9th instant to complete the strengthening of the cross-wall between the Louise Basin and Dock. The gas company had a number of men employed introducing gas in different wards of the city.

## CONDITION OF LOCAL INDUSTRIES.

*Lumbering.*—Conditions were very favourable, the snowfall being sufficient to facilitate operations. The cut this year, it is estimated, will be about the same as last year. The mills, accordingly will have fewer logs than in 1907 as the supply of 1907 was augmented by the logs hung up in 1906. The Iberville Lumber Company is making an extensive cut this winter. It has 12 camps on the riviere Castor and 14 camps on the riviere Sault au Mouton, Que. It was stated that it has already

(\* ) A copy of the new schedule is published under the heading "Recent Industrial Agreements," elsewhere in the present issue. See also opening article in present issue

60,000 logs laid on the banks of these rivers.

*Railway construction.*—The LaTuque branch of the Lake St. John Railway has been opened to traffic. The rock cutting gangs on the Transcontinental line were active.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Carpenters and joiners were active, other branches were quiet.

*Metal, engineering and shipbuilding.*—Employment was favourable.

*Printing and Allied.*—Conditions were busy.

*Clothing.*—Boot and shoe workers were active.

*Food and tobacco preparation.*—Bakers and butchers were quiet. Ice cutters were busy. Cigar makers were active.

*Leather.*—Activity prevailed.

*Miscellaneous.*—Hotel and restaurant employees, laundry workers, etc., were quiet.

*Transport.*—Railway employees were active, but steamboatmen, ship labourers, etc., were quiet.

*Unskilled labour.*—Considerable work was afforded by the snow falls but the month on the whole was quiet.

#### SHERBROOKE, QUE., AND DISTRICT.

*Mr. H. Logie, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions were about the same in January as during the month of December. The machine shops were running with about the same number of hands as last month, and there has been no further cut so far in hours of labour than that already reported. A number of men were engaged for the woods during the month, and other experienced hands were in demand. The Modern Bedstead Factory has now moved to Cornwall, and the works here have been closed down with the excep-

tion of the warehouse containing some surplus stock. The Bankers reported that paper is being met satisfactorily. There has been but one failure in the city during the month.

The cigar makers in the Queen Cigar Factory, who were engaged in making a certain brand of cigars, quit work because their earnings had been cut down \$1.00 per 1,000. The firm state that last June the men were given a raise of a dollar for 1,000 on these cigars. The firm had stopped making these cigars owing to a large stock being in hand, and at the same time preparations were being made to move into a new building. When the price of making was increased they were informed that if times became dull the old scale would be put in force. When the men enquired how soon they could start work, they were informed that they could go back at the old scale or if they preferred they could wait until the stock was reduced, when the advanced price would be given. This the men refused to accept, and a number of the other workers did not report for some days although there was no question of price with them.

At a meeting of the Sherbrooke Power Light and Heat Company, it was decided to sell the plant to the city of Sherbrooke, at the rate of \$85 for every \$100 share, the city to assume the bond of the company to the amount of \$80,000, making a total price of \$250,000. The City Council has accepted the offer, and the matter will be submitted to the ratepayers at an early date for ratification. If approved of, the work on the development of the Westbury Basin Power will be discontinued by the city.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Work was at a standstill. Many farmers were engaged hauling pulp wood and lumber to the city and various sidings. The Sherbrooke Dairy-men's Exchange boarded butter to the value of \$137,652 and cheese to the amount of, \$31,623.

*Lumbering.*—There has not been the same activity in lumbering this year as last, and wages are not quite so high.

*Mining.*—Operations in the asbestos district of Central Quebec are being carried on so far as the weather permits.

*Manufacturing.*—This industry was fairly busy, the woollen mills and worsted mills running full time.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers, masons and stonecutters were dull, work being at a standstill on account of the weather. Carpenters, lathers and painters were quiet. Plumbers were active.

*Metal.*—Machinists, moulders and iron workers were quiet.

*Woodworking.*—These trades were active.

*Printing.*—Printers, pressmen and bookbinders were busy.

*Clothing.*—All branches were quiet.

*Food and tobacco preparation.*—Bakers, butchers and meat cutters were active. Ice-cutters were busy. Cigar-makers were quiet.

*Miscellaneous.*—Barbers, clerks, delivery employees, hotel and laundry employees were active.

*Transport.*—Railroad men have been busy. Cab drivers, teamsters, &c., have been quiet.

*Unskilled labour.*—Has been quiet.

### THREE RIVERS, QUE., AND DISTRICT.

Mr. Joseph J. Ryan, correspondent, reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market was fair compared with the same month last year although not as active as in December. There was no exceptional activity in any particular trade. The new Cotton Factory is still in course of construction; there is now about \$250,000 worth of work completed; the plant is valued at 1,000,000 when completed. A new building for the Ursu-

line's Convent and a large addition to the Christian Brother's School are nearing completion. Trade was rather quiet as it always is in January, but it was better than last year.

Rates of wages are always lower in winter, but are not noticeably so this year. There have been no strikes or lock-outs of any kind. The heavy snow fall during the last part of the month has been of benefit to the few unemployed of the city.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The marketing of produce was the chief activity amongst farmers. Prices were very favourable.

*Fishing.*—The Tommy-cod Season has been about the same as last year.

*Lumbering.*—Operations were fairly successful owing to fine weather in the first part of the month.

*Railroad construction.*—The C. P. R. Co., is getting ready to reinforce and enlarge its bridge on the St. Maurice River near this city.

*Manufacturing.*—The local factories were fairly busy.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Carpenters, lathers and painters were active. Other branches were quiet.

*Metal.*—Horseshoers were busy, blacksmiths and stove mounters active. The iron branches were somewhat quiet.

*Woodworking.*—Carriage and wagon makers, were rather quiet.

*Printing.*—Printers and pressmen, were fairly employed.

*Clothing.*—Fairly busy conditions prevailed.

*Food and tobacco preparation.*—Quietness prevailed.

*Leather.*—These trades were rather quiet.

*Miscellaneous.*—Conditions were rather quiet in the first part of this month, but were better at the close.

*Unskilled labour.*—There was work for those wanting it.

## ST. HYACINTHE, QUE., AND DISTRICT.

Mr. V. Phaneuf, correspondent, reported as follows:—

## GENERAL CONDITION OF THE LABOUR MARKET.

Conditions in January among certain industries and trades were dull. The stringency of the money market had the effect of diminishing production in several factories. The building trades were completing some work under way, but no new work was in sight. Sash and door factories were active. Iron working establishments were busy. One iron company was obliged to reduce the number of its employees and its hours of work; Orders are numerous in this industry and conditions are expected to become again normal in February. Boot and shoe factories were dull. The leather trade was fairly busy, some lines having increased in activity. The organ factory had a good month with full staff working. The woollen mills were very busy, new hands being taken on. It was stated that the Emporium Cigar Company had closed its doors for an indefinite period. The lock out, commenced on December 13 by the Eastern Township Manufacturing Company, was terminated on January 24, the employees accepting the company's terms. Workers, male and female, allow ten per cent of their wages, up to the sum of \$80, to remain with the company when the latter will give them a share worth \$100. On the amounts paid in weekly the company agrees to pay five per cent per annum interest, such interest to be paid semi-annually. The workpeople had refused these conditions being unwilling to leave any portion of their wages, on the ground that their wages being very low they could not afford any deduction. Work was at once resumed with a full staff; about 100 employees were affected.

## CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Very satisfactory conditions existed during January. The market was active. Hay and grain

sold at good prices, and wood fuel was very high. The vegetable market was active, prices being from 25 to 30 per cent higher than last year. The supply farm labourers fully equalized the demand.

## CONDITION OF PARTICULAR TRADES.

*Building.*—Plumbers, and gas and steamfitters were fairly busy; the other branches were dull.

*Metal, engineering and shipbuilding.*—Moulders, iron workers and helpers, machinists and engineers had a more satisfactory month than in December. Blacksmiths and horseshoers were busy; the other branches were quiet.

*Woodworking and furnishing.*—Active conditions were reported.

*Printing.*—A good month was reported.

*Clothing.*—Boot and shoe workers were dull; other branches were active.

*Food and tobacco preparation.*—Bakers, confectioners, butchers and meat cutters were active. Cigar makers were idle.

*Leather.*—Active conditions prevailed.

*Miscellaneous.*—Barbers, clerks, delivery employees, restaurant and hotel employees, and laundry workers were very busy.

*Transport.*—Great activity was reported in all branches.

*Unskilled labour.*—This class was in fair demand considering the season.

## DISTRICT NOTES.

*Sorel.*—Apart from repairs to the fleet of the Department of Marine, the shipyards will build a steel vessel 235 feet in length for lighthouse service in the lower St. Lawrence. More than 600 men work in these yards. The shipyards of the Sincennes McNaughton Company are filled with vessels, including tugs, barges, dredges etc., to be repaired before the opening of navigation. At the Manceaux shipyards four dredges, three tugs, two steamers, and several barges and scows have been placed in winter quarters and will be repaired. More than 20 vessels were quartered in the yards of Messrs. Dulac

and Beaulieu, employing a large number of men. At the Richelieu Company's yards extensive repairs are being done to the Steamers "Beaupré" and "Chicoutimi," as well as minor repairs to other vessels of their fleet.

*St. Johns.*—The financial depression existing in the United States is felt in St. Johns. At the beginning of the month the Singer Company, employing nearly 1,000 hands closed the doors of its factory for three weeks. The potteries dismissed their employees a month ago. About 100 heads of families have become idle in consequence of the fire at the Standard Drain Pipe Company's works. There are at St. John's over 1,200 men out of employment. On January 20 the Singer Company recommenced work, but the hours of labour will be reduced to eight per day causing a diminution of 20 per cent in the salaries of the wage earners. About one hundred employees refused this reduction and would not resume work. It was stated that the Standard Drain Pipe Company will at once rebuild its works.

#### MAISONNEUVE, QUE., AND DISTRICT.

*Mr. E. Pelletier, correspondent,* reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions were fairly active during January, the mild weather and a few snow storms having improved conditions, especially among unskilled labourers. Building operations have been continued actively. Some anxiety was felt in connection with the ice supply, no ice having been cut up to January 10th. Fifteen companies are engaged in this business in Montreal and surrounding municipalities and the requirements amount to over 200,000 tons. The later severe cold promises a good harvest of ice, and many workmen are at work at the present time.

##### CONDITION OF PARTICULAR TRADES.

*Building.*—Conditions have somewhat improved. Work has been re-

newed on many buildings. Carpenters and joiners were very quiet, but painters and decorators, plumbers, gas and steam-fitters were active. Builder's labourers were quiet.

*Metal.*—Iron moulders, iron workers and helpers, machinists, engineers and electrical workers were active.

*Woodworking.*—Woodworkers, upholsterers, carriage and wagon makers were very quiet. Car builders were busy.

*Printing.*—Printers, pressmen, lithographers and bookbinders were active.

*Clothing.*—Journeymen tailors and garment workers were quiet. Boot and shoe workers were active.

*Food and tobacco preparation.*—Bakers and butchers had a good month and cigar makers and tobacco workers a fair month. Ice cutters were becoming active in the closing week of the month.

*Leather.*—Active conditions prevailed.

*Miscellaneous.*—Furriers were active. Hotel and restaurant, and theatre employees were busy.

*Transport.*—Street railways employees were active; cab drivers etc., were busy. Ship labourers and longshoremen were dull.

*Unskilled labour.*—Quietness prevailed.

#### HULL, QUE., AND DISTRICT.

*Mr. Rodolphe Laferrrière, correspondent,* reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

There was a marked improvement in the condition of the labour market during January. The market has again reached its normal state after a couple of months of unrest, and may now be said to be active, with supply and demand fairly well balanced. There were very few unemployed labourers. The advent of cold weather and snow had a noticeable effect on general labour in the city. In the rural districts, employment has been very dull, owing to lack of ice. Very little mining and lumbering were done. Owing to the scarcity of feed, farmers brought their horses to local firms and hired them for work

around the mills for the price of their board alone. There is now plenty of work for teams and men, hundreds of both being employed by the Ottawa Electric Company, the Hull Electric Company and the municipal corporation in hauling snow. Teamsters were paid 20 cents per load, or an average of \$3.00 per day for both man and horses; shovelers earned \$1.26 per day. Ice cutting, hauling and packing was employing hundreds of men and horses; cutters were paid one cent per block, or about \$1.50 per day; carters received from one to four cents per block, according to the length of the haul, averaging \$3.00 a day for a team; packers received \$1.20 per day. The solid ice on the Ottawa permitted of the usual winter work being performed in the Hull shipyards. This gives employment to about 60 workers who receive wages ranging from \$1.75 to \$3.00 per day.

The cement company has paid a dividend of 10 per cent to its shareholders on last year's business, and has retained 10 per cent of earnings as a reserve fund. The mills have not been able this far to close down for necessary repairs, owing to pressure of business, although it is customary to do so during January. After twelve months' uninterrupted grinding, extensive and expensive repairs are needed, the shafting and other machinery being worn away. This year, the company determined to keep running in order to lay up a stock of some 100,000 barrels of cement, to tide it over the forced lull required for repairs and the construction of the \$250,000 enlargement now going on. The mills will be stopped shortly, but the whole staff, about 400 hands, will be kept at work at regular pay on repairs and construction work. The mills when enlarged will have a capacity of 3,000 barrels per 24 hours, and will be in full operation by next April, employing about 50 additional men.

In other lines of trade and industry, the usual conditions prevailed. The 2,000 employees of the E. B. Eddy Company were all working at usual rates of wages, and orders were plentiful and prospects bright for the coming season.

The Hull Electric Company is erecting a very substantial steel and brick structure on Main street for its head offices. The building will cost about \$10,000. Shipments of all kinds of merchandise were very active.

#### OTTAWA, ONT., AND DISTRICT.

*Mr. W. Gilchrist, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The demand for labour, skilled and otherwise, during January, was not equal to the supply, but the situation was much better than was anticipated at the close of the year. The number of men seeking work at the city hall decreased gradually toward the end of the month. The municipal stone yard, which was established to give employment to the needy, was discontinued, as it seemed no longer necessary. The large snow storms each gave temporary work to about 700 men, nearly everybody looking for work being accommodated. Between \$15,000 and \$20,000 was expended by the city corporation and the Ottawa Electric Railway Company on snow cleaning, the latter being obliged to haul away the snow off the streets where tracks are laid. Ice-packing was delayed about a month owing to the mild weather of the early winter. Mica factories were still idle waiting for a revival of trade in the United States. The foundries and machine shops were operating with fewer hands, but only in rare cases have there been a reduction of wages. The business of the Ottawa division of the Grand Trunk Railway Company has fallen off, owing to lack of forest production; the company had a few hundred cars idle. The local office of the Canadian Pacific Railway Company reported a corresponding quietness due to the falling off in manufacturing. The Ottawa and New York Railway Company found transportation 50 per cent lower than in the summer. The local manufacturers of clothing complained of dullness until about the end of the month, when the

number of orders indicated an improved condition. A lockout of two days' duration occurred in the Chaudiere machine and foundry shops, when the men refused to work after a 20 per cent reduction in wages. The men afterwards came back and resumed work on concessions being made by both sides. The proprietor stated that the reduced rate was compulsory owing to the advance in wages during the last ten years without a corresponding rise in the price of manufactured articles.

The total revenue of Ottawa last year was \$683,537, and expenditure \$704,421. There was \$39,649 less local improvements carried out last year by the city than in the previous year. There was \$27,260.10 worth of concrete sidewalks constructed, \$1,528.75 worth of plank sidewalks, \$89,998.75 worth of tar macadam pavements, \$138,983.28 worth of asphalt pavements, \$11,682.86 worth of street openings, and \$26,572.98 worth of sewers.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The farmers of the Ottawa district marketed large quantities of pork and beef, which remained at steady prices all winter. The price of hay has declined slightly and fodder is more plentiful than earlier in the season.

*Lumbering.*—The smaller lumber manufacturers of the Ottawa district will be affected by the curtailment of logging operations, as they will scarcely have enough material to keep the mills running during the summer. The larger manufacturers who have a couple of seasons' cut of logs ahead will produce the usual amount. Scarcely any buying or selling has been done during the past month, though prices were firm.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—The building trades were all quiet. The usual quantity of indoor work was in progress.

*Metal.*—Some shops have laid off hands, but expect to be running at full capacity early in the spring.

#### KINGSTON, ONT., AND DISTRICT.

*Mr. Wm. Kelly, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during January was rather quiet, especially among unskilled labourers and those trades affected by bad weather. As a winter month January was fairly satisfactory, but operations in the building and other out-door trades were quiet. There has been a large influx of immigrants, many of whose families suffered privations, and every effort was directed by charitable societies and individuals towards their relief. On the 27th of the month the city threw its recently acquired stone quarry open to all comers, so that they might be employed getting out stone for the roads; under this arrangement 20 to 30 men, mostly all new arrivals, are able to earn about \$1.00 per day. Civic officials are very busy at the present time. The collector reported less than \$500 of 1907 taxes outstanding. The light and water collectors are finishing up their January quarter collections, and preparing statement covering last year's business. In the city engineer's office plans for the street work for the year are being prepared. The walks to be built will soon be advertised. Notices are being issued for Court of Revision sittings to fix the cost of last year's walks. The assessment rolls have been turned over to the city clerk by the assessor. In another month, 14 additional letter boxes will be placed throughout the city, making fifty-five in all, exclusive of a dozen paper and parcel boxes. Most of the new boxes are for the outlying portions of the city. An improved collection service is also being inaugurated, and two collectors instead of one employed. Some \$90,000 worth of debentures have just been sold at par; this amount includes the light plant extension debentures. The Board of Trade resumed its meetings during the month; its committee of industries is in communication with

four or five concerns, with a view to having them located here.

In the report of the United States Consul at Kingston appears the following:—

“Not only in the Kingston district of Canada, but in all the territory along the St. Lawrence river and great lakes there is still room for expansion in the trade in cotton goods, boots and shoes, marine and mining machinery, typewriters, jewellery, plated ware, glassware, staple groceries hardware, woven wire fencing, automobiles, motor boats and machinery, rubber goods, and drugs. It must be understood, however, that the Canadians are becoming our chief rivals in their home market for certain lines in this trade, and in rough cotton goods, rugs, blankets, knittings, farming implements, boots and shoes, confectionery, piano machinery, and in all the manufacturing of stoves, heaters, and other branches. The proposed improvements to Kingston's streets will create a market for automobiles, but few are in use here, though the demand is increasing”.

About the middle of the month the chief of the fire department sent his annual report to the city council, for the year 1907. The property endangered was value at \$350,000, and the loss was only \$15,500. The department has nine horses, and sixteen firemen, of which number thirteen are permanent and three callmen. The chief made application on behalf of himself and the men for an increase in wages, on account of the increased cost of living. The chief is also asking that the city furnish the men with winter clothing or give a grant in lieu thereof. The police are provided with winter clothing.

Various horticultural, and charitable societies held their annual meetings and reported a year of material progress. On the 14th of the month the new medical buildings were opened at Queen's University.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were attending to work incidental to the season.

*Fishing*—This industry was active.

*Lumbering.*—There was considerable activity.

*Manufacturing.*—Active conditions prevailed in all branches.

*Railroad construction and employment.*—Dullness prevailed.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Inactivity was the rule.

*Metal, engineering and shipbuilding.*—These trades generally were active. The mild weather during the month has given marine men the opportunity of making necessary alterations on their vessels. With the formation of ice this industry will become more active still. On Friday, January 24, 1908, the steamer “Saginaw” left at 9 a. m. for Cobourg, and reached there about 9 p. m. Navigation was continued to a later date than usual.

*Woodworking and furnishing.*—Continued activity was the rule.

*Printing.*—Printers and allied craftsmen were busy.

*Clothing.*—The clothing trades were busy.

*Food and tobacco preparation.*—Bakers, butchers, ice-handlers, cigar and broom makers were busy.

*Leather.*—Tanners were busy.

*Miscellaneous.*—Barbers, delivery employees, etc., were rather quiet, but laundry workers were busy.

*Transport.*—Quiet conditions prevailed.

*Unskilled.*—Comparative inactivity prevailed.

#### BELLEVILLE, ONT., AND DISTRICT.

*Mr. H. C. MacDiarmid, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The month of January was not favourable for labour owing to the closing down of the rolling mills, which necessitated the laying off of about 300 men, skilled and unskilled. It is expected that work will be resumed again about the middle of February. The horseshoe branch of the mills, which was also closed

down, will start operations about the middle of the present month, when about 100 hands will be taken on. About 300 men were laid off at the Leigh Cement Company's plant, but they will all be taken on again in February. With the exception of the usual corporation work, there was very little outside employment. The Brass and Steel Goods Company put on a number of skilled mechanics, and are adding others. A number of skilled workmen were employed putting the finishing touches to the hotel "Quinte" it will be opened next month. A large number of men were engaged harvesting the ice crop, which is of excellent quality; many teams were also employed. The new public library was completed and taken over by the city council. Business generally was above the average for January. A number of factories, in order to keep their staffs employed, reduced the hours from 10 to 8 per day. From appearances, there will be but very little distress from inactivity of labour.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were busy marketing wood, hay and straw, for which excellent prices were obtained. Hay has not sold below \$18.00 and has sold as high as \$23.

*Fishing.*—This industry was fairly active with regard to the coarser grades of fish.

*Lumbering.*—Inactivity was the rule.

*Manufacturing.*—Activity prevailed in nearly all branches.

*Mining.*—In the northern parts of the county mining was brisk, and many men were employed.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—The building trade was comparatively inactive, with the exception of painters, plumbers, gas and steamfitters, who reported a fairly active month.

*Metal, engineering and shipbuilding.*—Iron moulders, iron workers and helpers, blacksmiths, boilermakers and horse-shoers reported a very active month, es-

pecially boilermakers, who are engaged in building a new gasholder for the City Gas Department.

*Woodworking and furnishing.*—Woodworkers, upholsterers, polishers, furniture and cabinet makers had a very active month, with all hands working. The furniture needed for the hotel "Quinte" kept one factory busy. Carriage makers were active, with coopers fairly so. The Deseronto Car Company also had a busy month.

*Printing.*—Printers, both in newspaper and job offices, were well employed, including machine operators and pressmen. None were out of employment.

*Clothing.*—Journeymen tailors reported a fairly active month.

*Food and tobacco preparation.*—Every branch had an active month, with all employees working full time.

*Leather.*—Harness makers reported a more active month than the corresponding month last year.

*Miscellaneous.*—Barbers, clerks and delivery employees were active. Furriers reported a very busy month. Hotel, restaurant and laundry employees were busy, but theatrical employees reported a dull month.

*Transport.*—All branches of railway transport were busy, much more so than in the same month last year. Cabmen, teamsters, hackmen and expressmen were well employed.

*Unskilled.*—This class found employment somewhat scarce.

#### PETERBOROUGH, ONT., AND DISTRICT.

Mr. W. J. Johnston, correspondent, reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions during January, especially among outside workers, were very dull, only a few being employed on buildings under construction. Employment in the several factories and shops was fairly active, except during stock-taking. There were more men out of

work in Peterborough this winter than for many years past, owing to a large extent to the influx of immigrants. The closing down of the Wm. Hamilton shops has been a serious matter for about 200 workmen, the majority of whom are still out of work, some having left the city. A few men and teams were employed removing the snow from the main streets. The harvesting of the ice crop gave employment to a number of men. Carpenters, lathers and plasterers are still employed on the Collegiate Institute, Normal School and some residences, and workmen are engaged on the Bell Telephone Company's new building. The Northern Electric Company, of Montreal, is installing a telephone plant in its building, which will be ready for occupation about April 1. Stone-cutters are actively employed at the new armouries when weather conditions permit. A number of men were busily engaged in the quarry at Clear Lake getting out stone to be used in the construction of the Roman Catholic church. The civic authorities provided work at stone-breaking for the unemployed. In the painting trade, a number of workmen were busy, but a large number were out of employment. Linemen looking after wires and lights were active. Florists were active preparing for spring. Commercial activity was not up to the standard, but wholesale and retail trade was fair, considering the condition of the weather. Banks were feeling the money stringency and doing a cautious business. Wages rates remained practically the same, excepting in cases where shorter hours have been adopted. The large curling rink was recently destroyed by fire, at a loss of about \$10,000.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were mainly engaged in hauling produce to market, which sold at good prices. Hay was sold at from \$17 to \$18 per ton; wood, \$4 to \$6.50 per cord; beef, \$5 to \$6 per cwt.; pork, \$9 to \$10 per cwt. Potatoes, butter, eggs and fowl of all kinds were selling at high prices.

*Fishing.*—Dull conditions prevailed.

*Lumbering.*—The lumbering industry on the whole was somewhat inactive, but the Mann Lumber Company was very busy sawing lumber and shingles for custom and local trade. The planing mill department was busy on stock and orders. This company employ about 25 men, and declared a dividend of 6% for the past year.

*Manufacturing.*—On the whole, active conditions prevailed in all branches. Curtis Bros. were busy during the past year, making over 4,000,000 bricks, and having yet to supply the new armouries with 700,000 bricks. This firm employs about 30 workmen, and has in operation a portable sawmill cutting custom logs; it is also cutting 3,000 cords of wood for burning in brick kilns. The Sand and Lime Brick Company manufactured a large output and is busy shipping to outside points. The Taylor and Hall Cement Company sold last year 400,000 cement bricks, together with all the cement pipes of all sizes it could make, and is now busy making pipes of all kinds for the spring trade, also a new style of cement blocks for solid and veneered walls. The firm employs about 6 men in summer and 3 in the winter. The Canada General Electric Company was fairly active in all branches, and employing over 1,000 hands. The Quaker Oats Company was also busy in all departments, the oatmeal mill running 24 hours per day. This company employs about 400 hands and could give employment to 50 more girls if it could get them. The Peterborough Cereal Company's mill was busy in parts; it is not usually so active at this time of the year as in the summer, when it generally finds employment for 30 hands. The Central Milling Company's plant was running 24 hours per day, with 12 hands employed. The Matthews Packing Company was active, employing about 100 hands. The B. F. Ackerman and Company's harness factory was active, employing 50 hands. On account of crop failures in the west, some of this firm's orders had to be cancelled, and consequently its business was not so large as in previous years, but the firms Ontario trade was very promising.

All branches of the Peter Hamilton Company were active, but will not have to make up so large a stock this season on account of the recent fire, which impeded last year's sales and caused it to have some of last year's machines on hand. This firm employs about 110 workmen. The G. N. Green shops were active, excepting the moulding shop, which is slack just now; the firm employs 40 hands. The Shovel works were fairly active, employing 45 hands. The G. Fitzgerald carriage shops were active in all branches. The several blacksmith shops were not active in the horse-shoeing line; owing to the fall of snow, little shoeing was needed. Some blacksmiths were active on other work and on spring trade. The Wilson machine shop, employing 8 workmen, was very busy; and the firm is adding to its plant. The Peterborough Canoe Company, employing 55 hands, find business somewhat quiet. The Canadian Canoe Company, employing 30 hands, was active, while the cordage works, employing 180 workpeople, were very active. The lock works were active for a while; they are now taking stock, but will shortly be in full running order, with orders ahead. The 170 employees of the Auburn Textile works were actively employed, the firm having orders ahead. The Colonial Weaving Company's plant was busy, employing 45 hands, and did 23 per cent more business this year than last; having put in \$1,200 worth of new machinery, it is enabled to manufacture material here that it previously had to import. The Oke Furniture Company had a good year's business, disposing of all its stock; its prospects for the coming season are excellent. J. J. Turner & Sons had a splendid year, keeping a full staff of 65 workmen employed steadily, and paying over \$20,000 in wages. This firm has orders ahead for months, and is making for the Provincial Government of Ontario 6,000 flags for the public schools of the Province. The Rapid Tool Company, employing 25 hands, found business active, and shortly expects to give employment to at least 40 workpeople. The McDonald planing mill and Ward's planing mill were both active on orders and stock for the coming season.

*Lumbering.*—Operations in the camps were busy.

*Mining.*—Dull conditions prevailed.

*Railroad construction and employment.*  
—General dullness prevailed.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Conditions were more or less dull, except in the case of painters and gas and steam-fitters.

*Metal, engineering and shipbuilding.*—Inactivity was the rule in these trades; this condition did not apply to iron workers and helpers, electrical workers and linemen, brass workers, ship carpenters and caulkers, and jewellers, who were more or less actively employed.

*Woodworking and furnishing.*—Woodworkers were active in some shops. Upholsterers, varnishers and carriage makers were active, but car workers found employment dull. Pattern makers employed in the Canada General Electric Company's works were active, but dullness prevailed in other shops. Coopers were inactive.

*Printing.*—Printers, pressmen and bookbinders were active.

*Clothing.*—Dullness was the rule in these trades, excepting with the boot and shoe workers, who found employment active.

*Food and tobacco preparation.*—Activity prevailed in all branches.

*Leather.*—Activity was the rule.

*Miscellaneous.*—Barbers, clerks, stenographers and delivery employees were active, and furriers, hotel and restaurant, theatre and laundry employees busy, while broom makers were very busy.

*Transport.*—With the exception of street railway employees, who found employment active, dullness generally prevailed in branches of transportation.

*Unskilled labour.*—Dullness prevailed.

#### DISTRICT NOTES.

*Buckham.*—Considerable work and repairs were underway on the Trent waterways, 20 men being employed.

*Gamebridge.*—Twenty teams and 30 men are employed on the waterways. Twelve other men are at work at other points.

*Cobourg.*—A number of men were engaged here and at other points replacing wires broken down by recent storms.

*Lakefield.*—The grist mill and planing factory were recently destroyed by fire, the loss being about \$28,000, and 30 workpeople being out of work.

*Lindsay.*—Construction of the Machine Phone works is being carried on as rapidly as weather will permit.

*General.*—A large number of men are busy in different parts of the district chopping cordwood. Trade throughout the district is not so brisk as in previous years, owing mainly to stormy weather and the bad condition of the roads. Since the closing down of the cheese factories, more farmers' butter is being brought to market. A great many farmers give close attention to the raising of hogs for the market; they also fatten beef and market it themselves, rather than sell it live weight. Times in general are good, as farmers had good crops.

*Trent Waterway Improvements.*—A dam at Norland was rebuilt during 1907 at a cost of \$650. At Gooderham, a concrete dam was replaced at a cost of \$1,770; at Hawk Lake a new dam has been built, raising the water level 3 feet, costing \$4,100; new dams were also built at Eagle Lake, costing \$922, Bottle Creek, costing \$810, and Noggins Creek, costing \$890. There was also spent \$2,360 at other places. These works have been all completed during the past season. Some 18 lumber firms bring their logs through these waters.

## TORONTO, ONT., AND DISTRICT.

*Mr. Phillips Thompson, correspondent,* reported as follows:—

### GENERAL CONDITION OF THE LABOUR MARKET.

Conditions in January were similar to those reported in December, with a great many skilled and unskilled labourers out of work and a good deal of destitution among the unemployed. Nearly all lines of business and of the manufacturing industry were quiet, with but few indications of any resumption

of activity for some time. The building trade was duller for the season than has been the case for some years past.

Building permits issued for December represented a value of \$507,015, as against \$969,783 in December, 1906. The record for the year 1907 shows a total of 3,572 permits issued for 5,051 buildings, representing a total approximate value of \$14,225,800, as compared with 3,439 permits for 4,710 buildings, valued at \$13,160,396, in 1906.

The fifty-seventh annual report of the Harbour Master shows 3,661 arrivals of vessels during the season, an increase of 255. The coal receipts were 155,915 tons, a decrease of 6,587 tons.

The receipts of the Toronto Railway for December, 1907, were \$292,338, as compared with \$275,185 for December, 1906.

Two Jewish co-operative butcher shops have been opened on Centre and Elizabeth streets, at which meat is sold at 10c. per pound.

### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—There was little work on the farms except in connection with the care of stock and the marketing of produce. Numerous meetings of Farmers' Institutes and Agricultural Associations were held. Many farmers have been looking for help, offering long engagements.

*Manufacturing.*—Quietness prevailed in most lines of productive industry. Orders are coming in slowly, and manufacturers are not as a rule turning out goods in anticipation of the market, so that many establishments are running with reduced staffs. The open winter has had a depressing effect upon the clothing and fur manufacturing lines. The prospect of a fair amount of activity in the building trade in the spring has given a slight stimulus to manufacturers of builders' supplies.

The Canadian Shipbuilding Co. has disposed of its entire plant in Toronto, formerly the property of the Bertram Engine Works, to A. Berg & Sons, manufacturers of brick machinery. The reason assigned is the inadequacy of the

machinery for the construction of the large engines now required by modern vessels. A. Berg & Sons will remodel the establishment and devote it to the manufacture of brick-making machinery, employing between 200 and 300 men. The Canadian Shipbuilding Co., will concentrate their operations at its yard at Bridgeburg, Ont.

#### CONDITIONS OF PARTICULAR TRADES.

*Building.*—There was very little work for carpenters, bricklayers, stonemasons, builders' labourers, or others employed in out door work, and less than usual at this season for inside workers.

*Metal, engineering and shipbuilding.*—These trades had generally a quiet month, with many out of work and others laid off temporarily by the closing down of plants for repairs and stock-taking. Brass workers and electrical workers were fairly well employed. Jewellers and silversmiths were slack. The strike pay of the machinists out on strike has been increased to \$8 per week for married and \$6 for single men.

*Woodworking.*—Furniture makers, cabinet makers, carriage makers, upholsterers and coopers were generally well employed.

*Clothing.*—Custom tailors found trade slack. Garment workers had a fair month. Boot and shoe workers, and hat and cap workers generally had steady work. Furriers were quiet.

*Printing.*—Printers and bookbinders reported trade quiet, with a number out of work.

*Food and tobacco preparation.*—Bakers and confectioners, butchers and brewery workers had continuous work. Cigar-makers had a quiet month. Ice cutters were busy.

*Leather.*—Harness and saddlery workers were slack.

*Miscellaneous.*—Hotel and restaurant employees, barbers and laundry workers were fairly well employed. Clerks, salesmen and stenographers were slack. Domestic servants are now plentiful owing to lack of employment for women in factories and in other lines.

*Transport.*—Railway employees had a quiet month. Street railway men were well employed.

*Unskilled labour.*—A large number of unskilled labourers were out of work.

#### NIAGARA FALLS, ONT., AND DISTRICT.

*Mr. Ernest Green, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

January was the quietest month in industrial and commercial circles that this city and district have had in many years. All trades were quiet, and there was no demand for labour of any kind. However, it is felt in all circles that spring will bring a revival, and that the depression is merely temporary. There was no distress among the poor, and municipal relief was not more called upon than is usual at this season. Transportation by rail was at times dull and again very active. Retail trade was light, with corresponding effects on wholesale and financial branches. Increases in salaries were granted to a number of school teachers and to officials of the municipal waterworks department. Carpenters decided to adopt the same scale of wages for 1908 that they had in 1907..

By-laws to provide \$23,000 for additional public schools, \$15,800 for improvements to the waterworks system, and \$5,600 for garbage disposal works were carried at the elections on January 6th.

The new carpet sweeper factory was running, with twenty employees. Machinery for the paper box factory was arriving.

Building expenditure for 1907 was estimated at \$460,000. This is \$85,000 more than in 1906.

#### CONDITION OF LOCAL INDUSTRIES.

In the *agricultural, fishing and lumbering industries* there was no employment. Most factories were as busy as they

usually are at this time of the year. Railway employment was steady, but car and motive power departments were running with minimum staffs. There was no extra employment caused by snow storms as there often is in this month.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—The building trades were generally quiet, though some bricklayers and carpenters were working. Work for the former was about ended until spring. Carpenters had a small amount of work ahead. There were idle men in all branches. Many carpenters and bricklayers went to other places to seek employment.

*Metal.*—Work in foundries and machine shops was steady. The re-opening of the shipbuilding plant at Bridgeburg gave employment to many iron shipbuilders and men of kindred trades. Engine fitters were in demand.

*Woodworking.*—Car builders and repairers were quiet as a result of the retrenchment policy of the railway companies.

*Printing.*—Printers were quiet.

*Food and tobacco preparation.*—Ice-cutters and packers were active when there was ice to cut, but irregular weather interrupted employment.

*Miscellaneous.*—Stenographers and office employees were generally active. Hotel, restaurant and laundry workers were quiet.

*Transport.*—Engineers and train men, telegraphers, yard and trackmen were steadily at work. Electric railway employment was dull. Carters and teamsters were doing very little.

*Unskilled labour.*—There was no work for unskilled labourers.

#### DISTRICT NOTES.

*Welland.*—A small sawmill is to be erected. Building expenditure for 1907 is estimated at \$402,000.

*Bridgeburg.*—The consolidation of the Canadian Shipbuilding Company's plants here promises additional employment in the future.

#### ST. CATHARINES, ONT., AND DISTRICT.

*Mr. Jas. A. Wiley, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Labour was not so well employed during January as in the preceding month. It was in the building trade that the quiet conditions were the most noticeable, sixty per cent of the men being out of employment. A few factories have reduced their staffs, numbering about 140 men, owing to a shortage of orders, especially for export trade, but most of the factories and mills were running full time. The present quiet conditions are likely to prevail until the approach of spring, when it is anticipated that activity will be resumed in the branches of industry now experiencing a slack season, which this year is more marked owing to the stringency in the money market. Business both wholesale and retail was reported fair for the season of the year. The Bank of Nova Scotia has taken over the business of the local branch of the Sovereign Bank, and will shortly occupy the new premises intended for the latter bank, costing \$75,000. The Bank of Toronto is open for business in its new building erected at a cost of \$35,000. The value of the building permits for the past year amounted to \$200,000, largely residences of the better class.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Work, was mainly confined to care of live stock and other work incidental to the winter season. The Fruit Growers' Association was convened in this city on the 20th of January, 1907, and discussed the question of the amalgamation of all the fruit growing associations in the Niagara peninsula, the association endorsed the proposition, and a meeting was arranged with the different associations to formulate plans of amalgamation. Such

amalgamation it was claimed would be a material advantage to the fruit growing industry by securing better shipping facilities, etc. The proposed new association will be known as "The Niagara Peninsula Fruit Growers Association."

#### CONDITION OF PARTICULAR TRADES.

*Building.*—The allied trades were quiet, as is usual at this season of the year.

*Metal, engineering and shipbuilding.*—Employees were in the main inactive.

*Woodworking and furnishing.*—Woodworkers, upholsterers, varnishers and polishers, wood carvers, carriage and wagon makers were active.

*Printing.*—Printers, pressmen, machine hands and bookbinders had active employment.

*Clothing.*—Quiet conditions prevailed.

*Food and tobacco preparation.*—Bakers, confectioners, butchers and meat cutters, cigar makers and tobacco workers were active.

*Leather.*—Saddlers and leather workers found work quiet.

*Miscellaneous.*—Barbers, clerks, stenographers, delivery employees, hotel and restaurant employees were active. Laundry workers found business quiet.

*Transport.*—Railway train crews, railway telegraphers, switchmen, trackmen, freight-handlers, street railway employees, hackmen, carters, draymen, teamsters and expressmen were active.

*Unskilled.*—Quiet conditions prevailed.

#### DISTRICT NOTES.

*Port Dalhousie.*—After two weeks of repairs and stock-taking, the Maple Leaf Rubber Company's works resumed operations on the 15th of January 1908.

*Thorold and Merritton.*—Labour was well employed considering the season. The building trades were quiet, but mills and factories were active, and business good.

#### HAMILTON, ONT., AND DISTRICT.

*Mr. Samuel Landers, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Labour, skilled and unskilled, was poorly employed during January. There were hundreds of labourers out of work and according to reports many in want, or being relieved by civic charity. At the beginning of the month the Westinghouse Manufacturing Company operated its factories only from 7 a. m. till 4 p. m. Commercial activity, shipments, etc., have fallen off considerably. Wholesale and retail trade was only fair. The barber's difficulty remained unchanged from that reported last month.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—There was a meeting of the fruit and vegetable growers of Wentworth county, and it was decided that as there was no money in growing tomatoes for the canners at 25 cents a bushel, and the price next year will be 30 cents a bushel. A resolution was passed agreeing that no tomatoes should be grown under contract.

*Manufacturing.*—Generally speaking, manufacturing has not been as active as in previous months, although few establishments have closed down entirely. During the month an announcement was made to the effect that the Hamilton Iron and Steel Company has had a most successful year and that a bonus would be given to the shareholders. The company is securing a new charter, and will increase its capital to \$5,000,000.

*Railroad construction and employment.*—The Hamilton and Brantford Electric is the only road doing any construction work in the vicinity of Hamilton.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Work in the various branches of the building trade, with the exception of interior work, was very slack,

the weather and money stringency being mainly responsible. Fairly active conditions prevailed with painters, plumbers and steam-fitters.

*Metal, engineering and shipbuilding.*—Iron moulders, (stove), were slack, but machinery moulders had fair employment. Electricians and horse-shoers were active, but other branches found employment only fair. Linemen and stove mounters were slack.

*Woodworking and furnishing.*—Woodworkers, carriage and wagon makers, and pattern makers had fair employment, but there was a slackness among upholsterers and coopers.

*Printing.*—Printers and pressmen were active, and bookbinders had fair employment.

*Clothing.*—Journeymen tailors and garment workers found employment somewhat slack, and boot and shoe workers had fair employment.

*Food and tobacco preparation.*—Bakers and confectioners were active, and butchers, cigar and tobacco workers were fairly well employed.

*Leather.*—Active conditions prevailed.

*Miscellaneous.*—Barbers and delivery employees found employment only fair, but active conditions of employment prevailed with broom makers, hotel and restaurant employees.

*Transport.*—Railway trains crews, including street railway employees, had fair employment, but employment with steamboatmen and ship labourers was more or less slack. Cabmen and teamsters were active.

*Unskilled.*—Employment was slack.

#### BRANTFORD, ONT., AND DISTRICT.

Mr. J. C. Watt, correspondent, reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

There was little change in the condition of the labour market during January. The month did not compare favorably with the corresponding month of last year. There are about 500 unemployed in the city at present princi-

pally labourers. The opportunities for employment in the factories seems to be increasing, and with the opening of suitable weather for outside work it is expected there will be work for all desiring it, on railway, sidewalk and sewer construction and in the building trades.

The building operations of last year exceeded that of 1906 to the extent of \$101,320. There were seven factory extensions amounting to \$135,040.

Merchants had a fair month. The co-operative society formed by the working men of the city, expects to open a retail grocery store in a short time.

##### CONDITION OF LOCAL INDUSTRIES.

*Manufacturing.*—Manufacturing was not very brisk during the month. The stove works were busy, but the agricultural shops were not so busy as during the same period last year. Some of the factories took on a few more men.

##### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons found trade very dull. Carpenters and joiners were active. Lathers, plasterers and painters were quiet. Plumbers were active.

*Metals.*—Iron moulders and core makers were better employed than during December. Machinists and engineers and electrical workers were active. Line men were quiet. Metal polishers, buffers and platers were active. Stove mounters were busy. Blacksmiths in some shops were busy; in others they were not so brisk. Boiler-makers were busy. Sheet iron workers were active. Horse shoers were busy.

*Woodworking.*—Carriage and wagon makers were a little quiet. Coopers and pattern makers were active.

*Printing.*—The allied trades were very busy.

*Clothing.*—Tailors and tailoresses were active.

*Food and tobacco preparation.*—Bakers and butchers, particularly the former, were busy. Cigar and tobacco workers were active.

*Leather.*—Leather workers and saddlers were active.

*Miscellaneous.*—Barbers found trade as usual, clerks and delivery employees were active. Hotel and restaurant employees and laundry workers were busy.

*Transport.*—Railroad trackmen found work quiet, freight handlers were active. Street railway employees were busy. Carters, teamsters and cab men particularly the former found trade dull. Draymen were busy.

*Unskilled.*—There were a number of unemployed.

#### DISTRICT NOTES.

*Paris.*—There were not many unemployed in the town. The fabric mills were busy, and at the plough factory there was more activity than during the previous month.

#### GUELPH, ONT., AND DISTRICT.

*Mr. O. R. Wallace, correspondent,* reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market during January was unsettled, many men being out of work and a larger number working short time. Towards the close of the month factories were more active, but there still was a considerable amount of short time being worked. In the building trades very little work was done. There have not been many cases of acute distress, the bulk of the working people here being able to tide themselves over the depression. Upholsterers have been on strike, owing to a cut of 10% in wages. Industrial conditions improved towards the close of January, and while new men find it hard to obtain work, it is generally expected that in a short time employment will be plentiful.

##### CONDITION OF PARTICULAR TRADES.

*Building.*—The building trades were practically at a standstill. Few contracts

are as yet reported and a falling off is looked for.

*Metal.*—Iron moulders, machinists, and helpers had a dull month some shops having reduced staffs and some working short hours.

*Woodworking.*—Woodworkers, piano and organ workers, and carriage workers had a very dull month. Only a small amount of time was worked.

*Printing etc.*—Printers, tailors, bakers, confectioners and cigarmakers had a quiet month.

*Textile.*—Brussels weavers, ingrain weavers and tapestry weavers had an active month.

*Unskilled labour* was in no demand owing to the unsettled conditions. The ice harvest and malting season gave employment to a few men.

#### BERLIN, ONT., AND DISTRICT.

*Mr. R. F. Gofton, correspondent,* reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during January was not so favourable as in the corresponding month of last year. The building trades were very quiet, buildings under construction being nearly completed. About one third of the factory employees were laid off. The various industrial establishments were running short time, with a few exceptions, such as the boot and shoe factories. The Interior Hardwood Company and the brewery were running full time. The Western Shoe Company purpose taking a few more hands on in the near future. The new branch of the Felt Boot and Shoe Company is expected to be ready for operation by the first of March. The Zuelsdoy furniture factory is completed and in operation, with a small staff of employees. The Berlin Steel Go-cart Company's factory is nearing completion; the boiler and engine are installed, the shafting is being lined up, and a number of machines have arrived. The report of the Berlin light commissioners shows a successful month's

business. The total revenue for gas and electricity amounting to \$3,159.54; payment for principal and interest, \$1,483.02; leaving a net profit over all expenses of \$1,676.52. About 400 yards of gravel have been delivered to the new Kaufman Rubber factory, which will be built of concrete.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were inactive. Market prices were as follows:—

Butter, 25 to 28c per lb; eggs, 30 to 35c per doz; potatoes, \$1.00 per bag; beef, 5½ to 6½ by the quarter; oats, 60c per bushel; hay, \$16.00 to \$18.00 per ton, and other produce about the same as last month.

*Manufacturing.*—Industrial establishments were not as active as in January 1907. Many were running short time, but the boot and shoe establishments were running as usual.

*Transport.*—Conditions not so active as in the preceding month.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Employment was quiet.

*Metal, engineering and shipbuilding.*—All were active.

*Woodworking and furnishing.*—Carriage and wagon makers were active and pattern makers well employed, but the other trades were more or less inactive.

*Printing.*—Printers and pressmen were active.

*Clothing.*—Journeymen tailors were all employed, but on short time. Garment workers were quiet, and glove makers very quiet, with boot and shoe workers active.

*Food and tobacco preparation.*—Activity prevailed.

*Leather.*—Tanners and curriers, trunk and bag makers, and saddlers found employment very quiet.

*Miscellaneous.*—Barbers were active, and broom makers quiet.

*Unskilled.*—Inactivity was the rule.

#### STRATFORD, ONT., AND DISTRICT.

*Mr. Jos. T. Carlin, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market during January was dull. Upwards of seven hundred men being reported out of employment. Manufacturers with a few exceptions had a quiet month. Some of the factories were closed for a short time and others laid off hands owing to the scarcity of orders and the shortage of money. There was little demand for labour and no indications that there will be any greater demand during the winter months. The Queen Tailoring Co., whose factory has been closed for two weeks resumed work with a full staff of hands and the Stratford Clothing Co., has re-opened its factory. Some thirty-five men were employed digging sewers. The Niagara power by-law was carried by a majority of 696 votes. Wholesale and retail merchants reported business good but money scarce. No changes in rates of wages and no trouble in the labour market were reported.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were dull. Market prices were as follows:—

Wheat, 95c. per bushel.  
Barley, 55 to 70c. per bushel.  
Oats, 45c. per bushel.  
Peas, 70 to 75c. per bushel.  
Bran, \$22 a ton.  
Shorts, \$24 a ton.  
Eggs, 28 to 30c. a dozen.  
Butter, 26 to 28c. a lb.  
Live hogs, \$5.10 a cwt.  
Hay, \$11.50 to \$13 a ton.  
Chickens, 35 to 60c. each.  
Ducks, 40 to 50c. each.  
Geese, 90c. to \$1 each.  
Turkeys, 13 to 14c. a lb.  
Potatoes, 90c. to \$1 a bag.  
Apples, 60 to 90c. a bag.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers, carpenters, plasterers, painters and builders labourers were out of work. Plumbers were fairly busy.

*Metal.*—Most of the foundries had to lay off some of their hands and were running their establishments with as few as possible. Horseshoers were active.

*Woodworking.*—These trades were quiet with the exception of coopers.

*Printing.*—Printers were active but, not so active as last year at this season.

*Clothing.*—Journeyman tailors and garment workers found employment scarce.

*Food and tobacco.*—Bakers, butchers and cigar-makers reported business active.

*Miscellaneous.*—Barbers, clerks and delivery employees had a busy month. Hotel and laundry workers were active.

*Transport.*—Railway men were well employed; cabmen, carters and draymen reported a busy month.

*Unskilled.*—A large number were out of employment.

DISTRICT NOTES.

*Goderich.*—By-laws were carried to guarantee \$150,000 of the bonds of the Ontario and West Shore Electric Railway, and in favour of loaning to the Doty Engine Works the sum of \$35,000.

*Mitchell.*—Hill & Co., are busy getting material ready for a 290 foot steel bridge at Bayfield. The firm is working full time, and has increased the number of its hands.

*Kincardine.*—A by-law was carried on January 6, to grant \$8,500 for improvements to the central school.

LONDON, ONT., AND DISTRICT.

*Mr. Alex. Woonton, correspondent,* reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Not in some years past has the general condition of labour been so inactive as at present. The number of unemployed is about 750 men and 400 girls, at least three times as many as is usual at this time of the year. Employers state that they have plenty of orders on hand, but cannot collect their outstanding accounts; the banks will not carry them,

making it impossible for them to pay the hands. The city authorities have contracted with the owners of a couple of gravel pits for the supplying of stone for street purposes, and a number of men are given work breaking the stone. The Charities Aid Society has made arrangements with a number of wood yards, and are placing men at work sawing wood. The outlook in the building trades is not very bright for the coming summer, but with the advent of spring, it is expected that the foundries and factories will resume their normal condition. At Wolsley barracks, nearly 300 men are now quartered, the largest number in the history of the barracks; this has helped to absorb some of the unemployed.

There are no construction gangs working on any of the railroads, where during the past three years about 100 men were usually employed. At the Canadian Pacific Railway Company's freight sheds, seven men were laid off, and at the Grand Trunk about 12. The Canadian Chemical Company will no longer manufacture here, and about 35 men will be laid off or have to move to the company's new works at Hastings. About 15 hands employed at construction on the Canadian Pacific Railway were laid off. On the Grand Trunk Railway, the car inspectors and cleaners had their hours reduced from 10 to 8 per day.

Thirteen telegraphers in this city have received a 10% increase granted by the Canadian Pacific Railway Company. About 130 female teachers in the city schools have received increases as follows:—

Those receiving.....	\$400 to \$449	to get \$500
" "	\$450 to \$499	to get \$550
" "	\$500 to \$549	to get \$600
" "	\$550 to \$599	to get \$650
" "	\$600.....	to get \$700

A by-law to raise a sum of money to bring Niagara power to London was carried by a vote of three to one.

CONDITION OF LOCAL INDUSTRIES.

*Railroad construction and employment.*—The Grand Trunk Railway Company has brought eight new mogul locomotive engines here, of the cross-compound

consolidated type, and twelve engines that had been in use before, to handle the fast freight between London and Sarnia and London and Niagara Falls. Eight train crews, composing 30 men and their families, are being moved from Sarnia to this city to work on these trains, the idea being to change the crews here so as to make faster time. First-class freight rates have been reduced between London and Toronto from 36 to 32 cents per hundred.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—There was little work in the building trade, though plumbers were fairly busy.

*Metal, engineering and shipbuilding.*—Iron and brass moulders were slack, and many iron workers were out of employment. Machinists reported trade fair, but metal polishers had little to do. Stonecutters reported trade good.

*Woodworking and furnishing.*—Carriage and wagon makers, and car builders reported trade slack, but coopers were fairly well employed.

*Printing.*—Printers and pressmen were all working.

*Clothing.*—Tailors were fairly well employed, garment workers being slack, and boot and shoe workers reported trade good.

*Food and tobacco preparation.*—The two local biscuit and candy factories were only working three-quarter time, and have laid off a large number of girls. Ice-handlers were busy, and have quite a number of teams and men employed. Cigarmakers were not busy, and a number were out of work.

*Leather.*—The local tannery was rushed with work and employed all the hands it had room for.

*Miscellaneous.*—Stage employees were busy.

*Transport.*—January was a quiet month for train crews, and a number of freight-handlers were laid off for a short time. Teamsters were not active, but a number secured work hauling ice and logs.

*Unskilled.*—There was very little work to do, but the work of sawing wood and breaking stone for the city helped somewhat.

#### ST. THOMAS, ONT., AND DISTRICT.

*Mr. J. A. Killingsworth, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during the month of January did not compare favorably with the preceding months. This was due in part to the advent of cold weather which had its effect upon building. The reductions which were made in the different railway shops also resulted in throwing many men out of employment or reducing their hours of labour to such extent that it is a hard matter for them to meet the present high rate of living. In addition, there have been a number of small reductions in the working forces of various local industries, but so far these reductions have not been extensive. The amount of traffic on the railways has been exceptionally heavy and trainmen have been well employed during January.

The by-laws submitted to the rate payers on January 6th re the introduction of Niagara Falls power and the construction of the Ross Street subway, were both carried.

The annual report of the Water Works Commissioners is a very favourable one. The report shows a surplus of revenue over expenditures amounting to \$17,726.63. Deducting \$10,021.55, the amount of debenture payment and interest, for which the Department is liable to the City, this leaves a balance of \$7,705.08 to be handed to the City.

There are a number of idle men in the City but so far very little distress has been reported.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farm work has been somewhat at a stand still. The City markets have been well attended, owing in part to the splendid condition of the roads. The prices of farm produce remained firm.

*Manufacturing.*—In the smaller local industries business has not been as brisk

as during the preceeding months. It was stated that the Heard & Company's factory will close down about the first of February on account of having orders filled. A number of men were laid off by the Red Foundry. The Canadian Iron Foundry reported business as fairly good to date, but that orders are now being turned out faster than the demand. This may result in a slight reduction being made in the working staff at a later date. However, it is not anticipated that there will be any extensive reduction.

*Railway construction and employment.*

—In the traffic departments, the men have been exceptionally well employed during January, and have had to work overtime to meet the demands made upon them.

CONDITION OF PARTICULAR TRADES.

*Building.*—On account of the cold weather, there has been very little work done.

*Metal, engineering and shipbuilding.*—Iron moulders, machinists and metal workers, employed in the railway shops have had their hours reduced, but it is expected that they will be put on full time in the near future.

*Woodworking and furnishing.*—A reduction was made in the number of car builders, employed by the Michigan Central Railway Co. Other woodworkers reported a quiet month.

*Printing and Allied.*—Printers were well employed, there being decided activity in the job departments.

*Clothing.*—Journeymen tailors reported the month an average one.

*Unskilled labour.*—There were a number of idle men in St. Thomas, but so far no distress has been reported.

CHATHAM, ONT., AND DISTRICT.

Mr. Alex Gregory, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during January has been extremely quiet. The city

council has been doing all in its power to relieve the burden of the needy by providing work on sewers, which has lasted up till the end of the month. Factories have been running steadily and the skilled mechanic fared much better than the unskilled. The building prospects are not of the brightest for the coming season, a number of the largest manufacturing firms owing to the closeness of the money market have made a cut of from 10% to 30% in the wages of their men. The cost of living remains the same if not higher.

The Wolverine Brass Co., is busy installing machinery and will in a short time be ready for orders. The assignment of the Chatham Motor Car Co., will be a decided loss to that city, but hopes are entertained that the company will be able to again commence operation.

CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers had very little to do. A few were taking advantages of the good roads to market hay during the latter part of the month, the price having fallen to \$12.00 and \$14.00. Many of the farms are selling their pork live weight.

CONDITION OF PARTICULAR TRADES.

*Building.*—Many members of the several trades were out of employment, especially bricklayers, plasterers. Carpenters as a rule were better able to secure work. The severe cold spell towards the latter part of the month was of help to the plumbers who had not been very busy.

*Metal.*—Machinists were, on eight hour shifts. Horseshoers had a fair month.

*Woodworking.*—All carriage and wagon factories were running full time with a full complement of men. In one instance a cut of from 10 to 30% was made in piece work prices.

*Printing.*—Printers reported an average amount of work. Bookbinders were not so busy as in the preceding month.

*Clothing.*—Journeymen tailors reported trade very dull.

*Food and tobacco preparation.*—Bakers had only a fair month. Ice cutters so far have had nothing to do owing to the mild weather.

*Miscellaneous.*—Barbers complained of dull times and reported that the falling off was noticeable.

*Unskilled labour.*—There was no demand.

#### SAULT STE. MARIE, ONT., AND DISTRICT.

*Mr. F. A. Denman, correspondent,* reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

During January the supply of labour was in excess of the demand. This was especially so after the closing down of the steel plant, 500 or 600 men being temporarily thrown out of employment, though a large proportion of the workmen were kept employed on repairs. Banks reported a continued stringency of money. Merchants reported business dull in all lines. Mild weather and scarcity of snow, up to the last week of the month, had a tendency to make business quiet, as a good deal depends here on the extent of lumbering operations. During the last week of the month, however, cold weather prevailed; this will probably improve conditions.

##### CONDITION OF LOCAL INDUSTRIES.

*Lumbering.*—Operations were active, though retarded by mild weather and lack of snow during the greater part of the month.

*Manufacturing.*—The steel plant closed down about the middle of the month owing to a shortage of pig iron and for necessary repairs, but at the end of the month a notice was posted to the effect that the bessemer-bloom-open hearth and rail mills will resume operations in all departments on Friday morning January 31st. The veneer mill closed down on account of lack of logs. The weather was responsible for this as logs cannot be hauled from the bush through

want of snow. Other industries were running full time with many orders ahead.

##### CONDITION OF PARTICULAR TRADES.

*Building.*—With plumbers, gas and steam fitters conditions were busy; other branches were dull.

*Metal, engineering and shipbuilding.*—Machinists and engineers were busy; conditions in the other branches were normal.

Normal conditions also prevailed in the *Woodworking, Printing, Clothing, Food and Tobacco Preparation, Leather, Miscellaneous and Transport trades.*

#### WINNIPEG, MAN., AND DISTRICT.

*Mr. John Appleton, correspondent,* reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

For the season of the year conditions were normal. More than usual are being sent out of the city to work on the double tracking of the Canadian Pacific Railroad between Winnipeg and Port Arthur. In the same section large numbers of men are being sent out to work on Grand Trunk construction work. Factories generally speaking were not very busy. A factory for making artificial stone will commence operations in the spring. A new engraving and copper-plate printing establishment proposes starting in Winnipeg at an early date.

The Grand Trunk Pacific Railway Company has already laid about ten miles of track in the new yards just east of the City of Winnipeg. The new shops are to be placed upon the same location. The line east from St. Boniface has been completed to a point five miles east of the last branch of the Brokenhead river, making forty miles of track. By the 1st week of February it is expected that the track will have reached Whitemouth.

The Grand Trunk Pacific Telegraph line into Winnipeg from Western points has been completed. The line has been in operation for railway purposes from

Portage la Prairie westwards for some time, and is now connected with Winnipeg. The track of the Grand Trunk Pacific is laid some 65 miles beyond Melville to the west, and construction trains are running. Beginning at Saskatoon the track is constructed 60 or 70 miles eastward but there remains a gap of about 60 miles to complete the line to Saskatoon.

On this portion the work is proceeding at the rate of about two miles a day.

The total earning of the Winnipeg Electric Street Railway for 1907 were \$861,857.42.

A central charities organization has been formed for the City of Winnipeg. It is composed of representatives from existing organizations and will not dispense charity but collect information as to those in receipt of charity with a view to the prevention of overlapping in charitable work and the elimination of imposters and habitual beggars. It is proposed to ask the City Council to appoint an officer to act under the direction of a central charities board. This officer will ask every charitable institution to report to him the names of every recipient in aid. Charitable organizations will be requested not to give aid until after first having received a report from the secretary of the central association, certifying to the fact that the applicant for relief has not been receiving aid from other sources.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Loan companies in Winnipeg are taking action so as to be in a position to loan money to farmers in Alberta and Saskatchewan, who on account of the adverse weather conditions of last year, are not in a position this year to purchase for themselves necessary seed grain. It is proposed to ask the governments of the two provinces named to authorize a simple lien to be given against farm land for the purpose of securing seed grain loans, this lien to take precedence over existing encumbrances. If this is done the loan companies and the insurance companies with representatives in Winnipeg will be

able to meet all the demands for money for seed grain purposes. They will not be in a position to extend any such accommodation to those settlers who have not as yet secured patents for their homesteads. The interests of these are, it is understood, in so far as seed grain is concerned to be looked after by the provincial governments to whom money will be advanced by the Dominion government for this particular purpose.

*Lumbering.*—Large numbers of men are being employed in the woods east of Winnipeg taking out firewood. Supplies are now more plentiful than they have been for some time and wood prices in consequence have gone down.

*Railroad construction and employment.*—Railroad construction to a greater extent than usual is being carried on this winter. Most of the work being done is in the rock sections of the Grand Trunk Pacific between Winnipeg and Port Arthur, and the double tracking of the Canadian Pacific Railway.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Practically nothing is being done in the building trade, and uncertainty exists as to what the volume of trade will be next year.

*Metal, engineering and shipbuilding.*—Dullness prevailed. All the foundries are running with small staffs and there does not appear to be any signs of an early revival of activity.

*Woodworking.*—In common with other manufacturing industries carriage building was dull. A considerable amount of repair work is being attended to but there is no work being done on stock.

*Printing.*—Printers are experiencing a very dull season. The session of the local legislature is being held at present. This caused one or two of the printing offices to engage extra help.

*Clothing.*—The Clothing trades are experiencing very little demand for new work. The fur trade has been exceptionally dull, a condition that is attributed to the open weather up to the end of January.

*Food and tobacco preparation.*—Conditions have been normal.

*Leather.*—The leather factories maintain steady activity. The demand for goods is not heavy but in a few months it is expected that accumulated stocks will soon be shipped out.

*Miscellaneous.*—A large number of men and women are seeking employment indoors. Amongst this class there is a certain amount of want. At present there is no demand for stenographers or for help for indoor work. Domestic servants are always in demand.

BRANDON, MAN., AND DISTRICT.

Mr. S. P. Stringer, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Considering the season through which Brandon has just passed, the building record for 1907 speaks well for the progressiveness of the city. The total expenditure on building has been only slightly under that of 1906, notwithstanding the lateness of the season's opening and the financial difficulty experienced here, as elsewhere. The following is a comparative statement showing the nature and cost of buildings erected in Brandon during 1907 and 1906:—

	1907	1906
Residences (new).....	\$278,920	\$293,050
Additions.....	17,170	17,985
Rifle range.....	10,000	44,500
Armoury.....	65,000	30,000
Salvation Army.....	12,000	6,800
Collegiate.....	65,000	22,500
Asylum (addition).....	12,000	90,000
Churches.....	5,000	26,950
Railway buildings.....	96,910	6,350
Lighting plant (adds).....	35,000	\$132,777
Warehouses.....	21,870	
Stables, etc.....	5,285	
Winter Fair buildings.....	45,000	
Other buildings.....	45,135	
<b>Total.....</b>	<b>\$715,290</b>	<b>\$724,905</b>

The building trades were quiet, with the exception of a few men employed on inside work on the Winter Fair building. The Canadian Pacific Railway Company was also giving employment to a few men, steam fitters and tinsmiths, in fitting up the interior of additions to its shops. A number of train crews were laid off owing to the falling off of traffic. Wholesale and retail trade was quiet. The Canadian Pacific Railway Company has granted a nine hour schedule to its car repairers, but in consequence of slackness they are at present working only eight hours per day. The mechanics employed in the company's workshops are also on short time, having the option of either losing two and one half days per week, or working eight hours per day.

CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Three important resolutions were passed at a recent meeting of the Manitoba Grain Growers Association. A discussion took place regarding Government ownership of elevators, and resulted in the passing of the following resolutions:—

(1) "That this branch urge the Dominion Government not to interfere with the present system of distributing cars to shippers of grain, as provided for by the *Manitoba Grain Act*, as that is the only safeguard the farmers have from unfair treatment by buyers at country points".

(2) "That this branch approves of the principle that the local government provide a system of storage facilities for receiving, storing, cleaning and shipping the grain products of Manitoba".

(3) "That this branch declares its firm conviction that the Dominion Government should own and operate the terminal elevators".

Other resolutions passed were as follows:—

"That this Association recommends to all farmers, and elevator companies to do business, as far as possible, through the Grain Growers' Grain Company, and that each elevator company use its influence with its patrons, who ship their own grain, to do the same".

“That where any elevator company is found to be discriminating in the matter of storage charges, the minimum charge they make at any point shall become the maximum charge, they shall be allowed to make at all points”.

The following statistical statement was also submitted.

Number of elevators in Manitoba.....	686
Capacity, bushels .....	20,000,000
Estimated value of elevators.....	\$ 2,000,000
Estimated amount required to buy elevators and to build new ones.....	\$ 5,000,000
Salaries and running expenses.....	\$ 300,000
Total yearly expenses.....	\$ 500,000

*Manufacturing.*—Quiet conditions prevailed.

*Railroad construction and employment.*—The Canadian Pacific Railway Company has changed its plans owing to the fine open winter, and work trains are arriving with workmen, steel and ties, at Shebo, Sask., and have commenced the laying of steel westward from that point. The extension is part of the trunk line from Winnipeg to Edmonton, and the company proposes to reach Lanigan as soon as possible, thereby completing its line to Saskatoon, and opening up a fine country to the west of Shebo. The numerous side tracks being laid at Shebo point to the possibility of its being made a junction.

CONDITION OF PARTICULAR TRADES.

*Metal.*—Machinists, engineers, blacksmiths, boilermakers, jewellers and sheet-metal workers were quiet.

*Woodworking and furnishing.*—Woodworkers, upholsterers and pattern makers found employment somewhat quiet.

*Printing.*—Active conditions prevailed.

*Clothing.*—Journeymen tailors, garment workers, boot and shoe workers were actively employed.

*Food and tobacco preparation.*—Bakers, confectioners, butchers, meat cutters, ice-handlers, cigar makers and tobacco workers were active.

*Leather.*—Quiet conditions were the rule.

*Miscellaneous.*—Barbers, clerks, stenographers delivery employees, laun-

dry workers and furriers were active. Advertisements appeared for experienced stenographers.

*Transport.*—Several train crews were laid off on account of diminution of trade, Cabmen, draymen, teamsters and expressmen found employment somewhat quiet.

*Unskilled.*—The demand for unskilled labour was fully supplied, and a number of this class were unemployed. The Canadian Pacific Railway Company has reduced the wages of its labourers from \$2.00 to \$1.50 per day; these men are scattered over the division.

DISTRICT NOTES.

*Beckenham, Sask.*—Between 200 and 300 men are busy on the Grand Trunk Pacific Railway laying steel; it has been laid as far as Jesmond. This will enable the various parties that have located here to get in lumber for the erection of their buildings and the signs point to great activity in the spring.

*Saskatoon, Sask.*—A new company has been formed known as the Saskatoon Iron Works Company, it will be capitalized at about \$50,000.

REGINA, SASK., AND DISTRICT.

*Mr. Hugh Peat, correspondent,* reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during January was practically the same as in the preceding month. A few carpenters found employment on interior work, but all other branches of the building trade were inactive. The Painters' union reported 35 unemployed out of a membership of 41, but stated that the prospect of an early opening up of business in the spring was very good. There were a number of other unemployed in the city, mostly labourers, but with the exception of a few families who arrived in the country late in the season, and who had no op-

portunity of preparing for the winter, there are no cases of absolute destitution. Those referred to are being taken care of by the Relief Society.

The City Council made an appropriation of \$2,500 for excavating and cartage in order to provide work for the unemployed; the Provincial Government has provided similar work. These measures, coupled with an exceedingly mild winter will insure immunity from real hardship to the unemployed till the general opening up of work in spring, when plenty of work is expected on the Provincial Parliament buildings and other works.

The new parliament buildings, which are to be fire-proof throughout, will require an enormous quantity of concrete in their construction, and the Government has decided to provide work for a considerable number of men during the winter months by having the gravel necessary for building operations hauled at once to the site. It is understood that there will be in the neighbourhood of 20,000 square yards hauled. The decision of the Government to proceed with the work during the winter will provide work for those out of employment, and should provide a safeguard against idle men in Regina during the rest of the winter.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers, stonecutters and masons were very quiet. Carpenters and joiners. Lathers and plasterers, and painters were very dull. Plumbers, gas and steam-fitters were fairly active. Builders' laborers were active on city work.

*Metal.*—Electrical workers were fairly active.

*Printing.*—Printers were fairly active; there was a slight improvement in trade as compared with last month.

*Food and tobacco preparation.*—Cigar-makers were fairly active.

*Miscellaneous.*—Barbers were fairly active. Laundry workers had a busy month.

#### CALGARY, ALTA., AND DISTRICT.

*Mr. R. A. Brocklebank, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during January, 1908 was much the same as in December 1907. There were a few more idle men in the building trades than in December, but there were not so many unskilled labourers idle, as the ice merchants have commenced their seasons operations. The supply of labour however exceeded the demand both for mechanics, office help, railroad employees and unskilled labour. The only unsatisfied demand was for domestic help. Work was commenced during the month on the new plant of the Independent Meat Co., which intends carrying on business as butchers and meat packers. There has been a heavy falling off in passenger traffic and freight shipments.

Bank clearings show a small falling off over the corresponding month of 1907. Wholesalers and retailers reported business quieter than during the previous month, but on a par with the corresponding month of 1907. Wages remained about the same as in 1907, though in some cases it is reported there will be a reduction in the near future. There were no strikes or lockouts.

#### CONDITION OF LOCAL INDUSTRIES.

*Lumbering.*—Owing to the falling off in the erection of buildings during the latter part of last year, lumbering is not being carried on to the same extent as last winter.

*Manufacturing.*—This industry was kept up remarkably well during the present winter considering the money stringency. None of the factories in the city have closed down, though most of them are working shorter hours.

*Mining.*—A number of coal miners have been laid off on account of the reduced demand for coal partly on account of the railroads not requiring as much coal as

last year and also on account of the very mild winter prevailing throughout the province, it being estimated that fully one third less coal is being used for domestic purposes than was used a year ago.

EDMONTON, ALTA., AND DISTRICT.

Mr. J. A. Kinney, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour was employed to about the same extent as last month. Compared with a year ago, fewer men were employed. The number of unemployed remained about the same as a month ago. The number would be increased only for the continuous fine weather, which permits of considerable outdoor work being done. No new industries or public works are being started, though it is expected that a number of men will be required shortly to clear the right-of-way for the first 60 miles, west from the city, of the Grand Trunk Pacific Railway. The contract for this section has been let to an Edmonton firm. The contract for the construction of 126 miles of the same railway, from a point six miles east of the city to a point 120 miles west, has been let to Messrs. Foley, Stewart, Welsh and Larsen, of Winnipeg, and it is expected that work will be started in the spring. Work on the construction of the piers of the Grand Trunk Pacific Railway Company's bridge at Clover Bar, six miles east of here, is still under way, with about 300 workmen employed. These are the largest concrete piers in the world. The second one was finished early in the month. It contains about 4,000 cubic yards of concrete, costing approximately \$52,000. It is estimated that the sub-structure for the bridge will be completed about April first. The steel for the bridge will probably be brought to Edmonton on some other line, and taken out to Clover Bar on the Grand Trunk Pacific Railway.

The fur catch, which is a considerable source of revenue to the city, is reported small and prices low.

The value of the building permits issued during 1906 amounted to \$1,868,069, compared with \$2,268,210 in 1907.

The Customs returns for 1906 were \$155,073.56, and for 1907 \$265,149.31. Post office returns 1905-6 amounted to \$25,494.03, and for 1906-07 to \$48,155.14. Money orders paid in 1905-06 amounted to \$96,461.66, and in 1906-07 to \$166,430.84.

The clearing house returns were as follows:—

Six months ending.....	31 of Dec. 1906,—	\$3,936,721.60
12     "     "	31 of Dec. 1907,—	22,960,307.67
12     "     "	31 of Dec. 1907,—	45,716,792.62

The Alberta Executive of the Dominion Trades and Labour Congress waited upon the Provincial Government and discussed a number of resolutions which had been adopted by the Provincial Labour Party at the convention recently held in Calgary, re legislation for the betterment of the condition of the working classes. Among the resolutions was one referring to a "Workman's Compensation Act" along the lines adopted by the Imperial Parliament, for an eight hour bank to bank day for coal miners, the total abolition of the contract system in all public works, and an eight-hour workday, the examination and registration of steamfitters and plumbers, an extension of time on election day to permit workmen voting after work hours, to prevent the employment of children under sixteen years of age in factories, for the abolition of the present law compelling candidates for the Provincial Assembly to put up a deposit, and several resolutions regarding amendments to the "Mines Regulation Act."

The city assessment for 1906 amounted to \$17,046,728 and the tax rate to 10½ mills; in 1907 it amounted to \$21,958,700, and the tax rate to 13 1-8 mills. There was 1,661 applications for patents during 1906 and 1,764 in 1907.

Edmonton purposes to extend its city limits by taking in an area of about 5,000 acres; this would give the city a total area of fifteen square miles.

CONDITION OF LOCAL INDUSTRIES.

Lumbering.—A number of men were in the woods getting out logs for the saw-

mills; a number are also employed cutting railway ties.

*Mining.*—The coal miners in and around the city were busy, a number being employed as a result of a conference between the representatives of the miners and the mine owners, held recently, when a new wage scale was arranged which will give the miners about a dollar a ton at the face of the mine.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—A limited number of bricklayers and masons were employed, mostly on the construction of the new post office building. Only a small number of carpenters found employment; this condition would also apply to lathers, plasterers and painters. Plumbers and steam fitters were more or less employed, and builders' labourers were rather inactive.

*Metal, engineering, etc.*—Electrical workers, linemen and sheet metal workers had very little to do.

*Printing.*—Printers and pressmen were fairly well employed, but some were out of employment.

*Clothing.*—Journeymen tailors found employment only fair.

*Food and tobacco preparation.*—Bakers, confectioners, etc., had fair employment.

*Miscellaneous.*—Barbers, clerks and restaurant employees found employment only fair.

*Transport.*—Railway employees were fairly busy.

#### NELSON, B. C., AND DISTRICT.

*Mr. A. B. Dockstader, correspondent,* reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during January was quiet throughout the Kootenay district, there being a surplus of labour approximating 1,200 men, about 300 of these being miners, 200 skilled labourers, and 700

lumbermen and unskilled labourers. The depreciation in the market values of the silver-lead and copper produced at the mines, together with the winter season when out-door or above ground operations partially cease, accounts for the unemployed miners. The slackness in building operations together with a temporary lay off by the Canadian Pacific Railway Company of several train crews and part of its shop employees accounts for the unemployed skilled labourers, while the decreased demand for lumber from the prairie provinces accounts for the unemployed lumbermen and unskilled labourers. No case of real want has yet been reported because of the unemployed and no special effort is being made to furnish work for the unemployed by either corporations or municipalities, and the concensus of opinion seems to be that with the opening of spring sufficient work will be afforded for the majority of the unemployed here, but that further immigration of labour to this district at present, under existing conditions, would be injurious to both the community and the new arrivals, for sometime to come at least.

A company has been formed at Creston, B. C., for the construction and installation of a system of electric lighting and telephones for the town and fruit farms adjacent. Twenty miles of phone line and about 100 phones are reported as installed.

At a largely attended meeting of lumbermen held at Vancouver, B. C., recently, at which the lumber industry of the interior of British Columbia, as of the coast, was represented, it was reported that a substantial reduction in prices of lumber and shingles was decided upon.

The published report of the Nelson city engineer for 1907 as to the building permits reads as follows:—There have been issued throughout the year, within the fire limits, one permit for brick building, costing \$1,800 and eighteen permits for alterations, costing \$3,250. Outside the fire limits, 11 permits have been issued comprising new buildings and repairs, costing \$91,129, and making a total value of \$95,179.

NEW WESTMINSTER, B. C., AND DISTRICT.

Mr. D. J. Stewart, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market was about in the same condition as last month. There were a large number of idlemen in this city and district, with no prospect of employment for some time to come, although the general opinion is that when the spring opens, all surplus labour will be absorbed.

The year 1907 was an exceptionally busy one, it being estimated that 300 new houses were erected in this city during the year, while the increase in population is placed at 1,500, making the population of the city at the present time 11,000. In spite of the large number of new buildings erected there is at the present time a scarcity of houses to rent, and as much building as possible is being carried on at the present time, the outlook for 1908 being even brighter than for the past year. Many new streets have been opened up and new sidewalks added; extensions have also been made in the sewer service over a large area of the city. A large addition has been made to the central school, and an up to date heating plant added. Among the more important industries added during the year were the wooden pipe works, and the glass factory; some large business blocks and an up-to-date hotel have been erected, large additions have been made to many of the wharves along the water front, the various districts adjoining this city, viz., Burnaby, Coquitlam, Delta, Langley, Maple Ridge Dewdney, Matsqui and Sumas, have all shared in the general prosperity of the past year, many new settlers having made their homes in these districts. The outlook for the present year is very favourable.

CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Agriculture is rather quiet at present although considerable

improvements are being made by many of the farmers in the way of clearing more land, it being possible to get labour at a low rate owing to the crowded condition of the labour market.

The following are current market quotations.

Beef hind	qrs	7½ to 8½	cts per lb.
Beef Fore		5½ to 6½	cts per lb.
Lamb	"	13	cts per lb.
Veal	"	10½ to 11½	cts per lb.
Pork	"	8 to 9	cts per lb.
Fowl	"	\$9 to \$10.00	per dozen.
Ducks	"	\$9 to \$10.00	per dozen.
Geese	"	\$1 to \$1.25	each.
Eggs	"	40 cent	per dozen.
Butter	"	35 to 40 cents	per lb.
Potatoes	"	\$18 to \$20.00	per ton.
Apples	"	\$1.00 to \$1.75	per box.

*Lumbering.*—The lumbering industry is quiet at present, and the fact is being taken advantage of by the different companies in having considerable improvements and additions made to plants, in anticipation of the spring and summer trade. It is estimated that 317,000,000 feet of lumber were sold by the coast mills last year, and on the coast it is estimated that 50,000,000 was taken from Dominion lands. The stock on hand at the beginning of the year was 100,000,000, ft., and the actual scale of logs was 407,065,223 or a total of 507,065,223 feet. There is about 160,000,000, feet of logs scattered in the various rivers and 80,000,000, feet of lumber in the yards. The total unsold is 240,000,000, feet. This subtracted from 507,065,223 feet cut and on hand, leaves a balance of sold lumber on the coast of 267,065,223 feet. The managers of the different mills are confident that the present year will prove to be equally as good as the year 1907.

CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons, carpenters and joiners, lathers and plasterers, painters and decorators and builder's labourers were dull. Plumbers were quiet.

*Metal and engineering.*—Iron moulders, iron workers, machinists, engineers, electrical workers, blacksmiths and boiler-makers were dull,

*Woodworking.*—Woodworkers, carriage and wagon workers were quiet. Car

builders (electric) were active, but shingle weavers were dull.

*Printing.*—Printers, pressmen and bookbinders were active.

*Clothing.*—Journeymen tailors, boot and shoe workers were active.

*Food and tobacco preparation.*—Butchers and meat cutters, bakers and confectioners were active and cigar and tobacco workers dull.

*Leather.*—Tanners and curriers were active.

*Miscellaneous.*—Clerks and stenographers, and laundry workers were dull.

*Transport.*—Steamboatmen, street railway employees, teamsters and expressmen were active.

*Unskilled labour.*—Very dull conditions prevailed.

#### VANCOUVER, B. C., AND DISTRICT.

*Mr. G. Bartley, correspondent,* reported as follows;—

##### GENERAL CONDITION OF THE LABOUR MARKET.

Bank clearings for the week ending January 23rd amounted to \$3,303,346. In 1907, for the corresponding week, the figures were \$2,771,444, while for 1906 the total was \$1,759,323.

Business in all lines remained stationary during the month, very few changes in the markets being reported. Lemons and Japanese oranges dropped in price, but onions and turpentine rose.

The percentage of earnings paid by the B. C. Electric Railway Company to the city for last year amounted to \$16,300. The net earnings for the year were \$500,000.

The sixty-day test of the city incinerator proved that 50 tons of garbage could be consumed at a cost of 45 cents a ton. As high as 60 tons were disposed of in one day.

##### CONDITION OF LOCAL INDUSTRIES.

*Fishing.*—The figures for the pack of salmon for 1907 have just been given out by the Fraser River Packers' Association for the whole of the provincial

coast, as follows: Sockeyes, 314,074 cases; red springs, 23,159; white springs, 2,959; pinks and chums, 113,704; cohoes, 87,900; steelheads, 683; making a grand total of 547,459 cases. Of this total, the Fraser River pack was made up as follows: Sockeyes, 59,815 cases; red springs, 3,448; white springs, 557; pinks and chums, 68,530; cohoes, 3,576; total, 163,116 cases. In 1886, the lowest previously recorded year on the Fraser, the sockeye pack was 183,007 cases. Preparations on a small scale for the Fraser river during the coming season are being made.

*Lumbering.*—A petition to the Legislature was circulated amongst hand-loggers praying for a reconsideration of the recent decision not to issue any more hand-loggers' licenses. The B. C. Lumbermen's Association held a conference on the 23rd and 24th.

##### CONDITION OF PARTICULAR TRADES.

*Building.*—Conditions were very dull. Of 2,000 carpenters resident in the city, about 1,500 were reported to be idle. The lathers number about 55, half of whom were out of work. The plumbers reported 50 with 15 seeking employment. Seventy-five out of 100 electricians were unemployed. The bricklayers state that 98 per cent of their number, which is 150, were not working, and that several arrived from the Prairies and the States. The regular scale of wages is \$5.00 for eight hours, yet it was further stated, cases were reported where strangers worked for \$2.00. The iron structural workers, which were chiefly employed on the post office and Bank of Commerce buildings, now in course of erection, stated that 75 per cent of their number were idle. Stonecutters and granite men, (75) and soft stone men, (40) reported that two-thirds of the men were out of work.

*Metal, engineering and shipbuilding.*—About one-third of the 100 moulders were idle. Sheet metal workers, 80 all told, were fairly employed, but idle men were reported. Inactivity was the rule in the other branches.

*Woodworking and furnishing.*—Conditions were very inactive, and prospects uncertain.

*Printing.*—The condition of the printing trade was not up to the standard of December, and was considered as the duller in ten years. Every job office in the city reduced its staffs.

*Clothing.*—Journeymen tailors worked short time. The clothing trades are always in keen competition with the Chinese and Japanese concerns.

*Food and tobacco preparation.*—The bakers, 60 in number, reported trade very dull, there being no demand for cakes, and the working people in general baking their own bread. Butchers were well employed. The P. Burns Co., and the B. C. Meat Market Co., control the meat business, and the prices remained unchanged. Australian is about the only mutton brought to the city; 157,000 carcasses were received by P. Burns & Co. Cigar-makers report 60 out of the 75 men as idle. Kurtz's cigar factory, the largest concern here, laid off all its men on the 24th inst., the cause being over-production. The outlook is gloomy.

*Leather.*—Saddlers and harness-makers had a fair month, 20 men out of the 25 being at work. The prospects are that in the near future the majority of the men will be laid off.

*Miscellaneous.*—Hotel and restaurant employees, laundry workers and barbers were fairly well employed, but the latter reported a number out of work. Clerks, salesmen, stenographers, and those following light occupations were much in excess of the demand,

*Transport.*—At the offices of the street railway company signs were posted that no men were wanted. Large numbers of men daily apply for work. Railway employees worked short time. There was no demand for construction employees. Expressmen and teamsters were inactive. Men engaged in navigation were fairly well employed, but stevedores largely exceeded the demand.

*Unskilled.*—An exceedingly large number were out of employment.

VICTORIA, B. C., AND DISTRICT.

*Mr. W. E. Ditchburn, correspondent,* reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market in Victoria during January was less active than last month, and it is estimated that there are at least 500 unemployed people in the city, owing to work in the building trades having fallen off in the winter months. Members of the Carpenters Union state that there at least 150 of their men out of work, about one-third are new arrivals. Some of the hands employed in the mills have been laid off, and while none of the industries have shut down, they are running with reduced forces. It is expected that this condition will improve in the spring. All the iron-working establishments are working an eight-hour day instead of nine, this is the usual practice during the winter months. In the molding shops wages have been cut 25 cents per man. The cut will affect about 25 moulders and helpers. The wholesale and retail trade is in fair condition through not so brisk as before Christmas.

The Inland Revenue returns, which reflects the general increase of trade, were \$222,350.58, compared with \$187,451.86, in 1906, an increase of \$34,898.72, or 20%.

The year just closed was one of the most prosperous for many years so far as building operations were concerned. The aggregate value of all buildings erected during the past twelve months, together with the amount spent in alterations and improvements was approximately \$1,552,945, being \$273,325.00 in excess of the heaviest previous year 1891, when the aggregate totalled \$1,279,620.

The Customs receipts for 1907 were greatly in excess of those of the past few years, being nearly 100% greater than in 1905 and over 60% greater than in 1906. During the year just closed the total collections amounted to \$1,384,009.30, as compared with \$873,226.41

in 1906, and \$728,535.36 in 1905, an advance of \$655,473.94, over the latter year, and \$500,772.39 over the former. The largest month's collection was made in October, when the total receipts amounted to \$158,185.88 and the smallest collection was made in February, when the total amounted to \$62,203.52.

During the year just closed 450 Chin-

ese, who paid the head-tax of \$500, entered at this port as compared with less than 30 that entered in previous year, the high wages paid for labourers being the attraction. The following table shows for each month the number who had paid the head-tax and the number of returns, outward passages and lapses.

Year.	Head tax.	Returns.	Outward	Lapses.
January, 1907.....		34	37	8
February.....	3	30	10	8
March.....		5	23	9
April.....	26	56	16	14
May.....		1	32	14
June.....	66	241	29	7
July.....	36	104	27	13
August.....	61	162	46	5
September.....	54	122	140	11
October.....	96	57	694	45
November.....	67	41	315	15
December.....	41	27	129	13
Totals.....	450	870	1,498	159

CONDITION OF LOCAL INDUSTRIES.

**Lumbering.**—The Shawnigan Lake Lumber Company's mill at Shawnigan Lake, situated near Victoria, which was closed down for six weeks for repairs has has started up again. The lumber industry on Vancouver Island seems to be thriving, and a new mill is to be erected at Kennedy Lake, on the west coast. Another new mill will be erected on Salt Spring Island in the spring. This plant will have a capacity of about 25,000 feet per day, and give employment to about 30 or 40 workpeople.

**Mining.**—A large coal deposit has been

discovered at North Saanich, 20 miles from Victoria. It is reported that a seam 3 feet in thickness has been found. The overhauling of the Tye smelter at Ladysmith is now underway, and within a short time work will be blown in again and commenced. Ore is being steadily received at the works, so that when the company starts its smelter again it will have a good supply of ore on hand to begin with.

The following tabular statement prepared by provincial mineralogist, shows the approximate total mineral production of British Columbia for 1907.

TROY, OZS.

	Quantity	Value.	
Placer Gold.....		\$ 700,000	
Lode gold.....	199,770	4,129,246	
Silver.....	2,940,190	1,862,320	
	<b>Lbs Avoir.</b>		
Copper.....	38,392,264	\$ 7,678,453	
Lead.....	48,309,660	2,318,864	
Bldgmst, etc.....		1,200,000	\$ 17,878,883
	<b>Tons 2240 lbs</b>		
Coal.....	1,856,600	\$ 6,498,100	
Coke.....	227,000	1,362,000	\$ 7,860,100
Grand total.....			\$25,738,583

## CONDITION OF PARTICULAR TRADES.

*Building.*—While dullness is the rule in the building trades and many men are out of employment, it is expected that when spring opens up much of the surplus labour will find steady employment, as it is reported that next season will see a large number of new buildings erected.

*Metal, engineering and shipbuilding.*—All moulders, excepting stove moulders, were working on a reduced wage of \$3.75 per day, and a number of moulders were out of employment. Machinists were fairly busy, but were working only eight hours per day during the winter months. Stove moulders and mounters were kept busy. Boilermakers and iron shipbuilders had steady work at the different yards, mostly on repair work on vessels. Wooden shipbuilders employed at Messrs. Turpels' and Watsons' yards were busy. The latter firm is the only one paying the union wage of \$4.00 for eight hours. At one of the yards, some scows are being built for the Government dredge, and a new freighter.

*Woodworking and furnishing.*—Woodworkers, upholsterers, and polishers were busy, but a number of men were out of employment. Pattern makers were steadily employed, and carriage and wagon makers had fairly regular employment.

*Printing.*—The printing and book-binding trades found work plentiful, and it is expected to continue so until the close of the local legislature.

*Clothing.*—The tailoring business was not quite so brisk as it was a month ago, though not much complaint was heard. The garment workers employed at the two factories here were kept fairly well employed.

*Food and tobacco preparation.*—Bakers and butchers found very little falling off in the volume of trade, but cigar-makers feel that trade has lessened somewhat since the commencement of the new year.

*Unskilled.*—There were many unskilled labourers out of work, but it is expected that the city council will be able to give employment to a number very shortly on the laying down of the new block pavement and other municipal improvement work about to be taken up.

## NANAIMO, B. C., AND DISTRICT.

*Mr. A. E. H. Spencer, correspondent,* reported as follows;—

## GENERAL CONDITION OF THE LABOUR MARKET.

The tendency of the labour market in this district during January has been downward, the number of unemployed increasing daily, with few signs of improvement for some time to come. Business men reported that they were feeling the general stagnation. There have been no changes in hours of labour or rates of wages.

## CONDITION OF LOCAL INDUSTRIES.

*Fishing.*—Herring fishing was in full progress, the companies engaged in it making good catches. It is expected that more fish than ever before will be handled. The whaling station on the inside waters near this city is meeting with success. It is expected that the station on the west coast will soon resume operations.

*Lumbering.*—Trade was very quiet, there being very little employment in the woods and among the sawmills. The local sawmill is working, but is employing very few white men.

*Mining.*—The coal mining industry is feeling the depression. About 300 men have been laid off at Nanaimo, and the rest are not getting full time. At the other mines in the district work is slack, and there are a large number of men looking for employment.

*Railway construction.*—There is not much work on the railroad as yet. The contract for the first 12 miles has just been let, and it is expected that work will be commenced about the beginning of next month.

## CONDITION OF PARTICULAR TRADES.

*Building.*—Work was dull.

*Metal.*—Machinists and engineers, blacksmiths and carriage makers were quiet.

*Printing.*—Printers were quiet.

*Transport.*—Teamsters and expressmen were active.

*Unskilled labour* was very dull, there being a large and increasing number of idle men in the district.

**ORIENTAL IMMIGRATION—STATEMENT TO PARLIAMENT BY MINISTER OF  
LABOUR—EFFECTIVE RESTRICTION MEASURES PROMISED BY JAPAN.**

**T**HE Honourable Rodolphe Lemieux, Minister of Labour, who had been, as stated in previous issues of the *Labour Gazette*, appointed envoy to Japan to discuss with the Japanese Government the question of Japanese immigration to Canada, arrived back at Ottawa on January 10. The arrangement made with Japan for the restriction of Japanese immigration to Canada was accepted by the Dominion Government, and the Minister made a statement before the House of Commons on Monday, January 21, with regard to the negotiations and their outcome.

The Minister first read the Order-in-Council of October 12, relating to his appointment, as follows:—

“The Rt. Hon. Sir Wilfrid Laurier recommends that in view of the recent unfortunate occurrences which have taken place in British Columbia, as a result of the largely increased influx of oriental labourers into that province, and in view of the fact that there has been a treaty of Peace and Commerce between His Majesty the King and the Emperor of Japan since the year 1894, and that Canada became a party to that treaty less than two years ago, the Hon. Rodolphe Lemieux, Postmaster-General and Minister of Labour, do proceed immediately to Japan to discuss the situation with His Majesty’s ambassador at Tokio and the Japanese authorities, with the object by friendly means of preventing the recurrence of such causes as might disturb the happy relations which have under the said treaty, existed between the subjects of His Majesty the King in Canada and elsewhere and the subjects of His Majesty the Emperor of Japan.”

The Minister referred to the Commission of 1884 appointed to inquire into the question of Oriental immigration, and to the head tax of \$50 imposed in 1885 by the Government of the day, as a result of the recommendations of that Commission, on the Chinese entering Canada. This tax was doubled in 1900, and in the same year, since the agitation

against Asiatic labour continued, a second Commission was appointed, which recommended as follows:—

“Your commissioners are of opinion that the further immigration of Chinese labourers into Canada ought to be prohibited;

“That the most desirable and effective means of attaining this end is by treaty supported by suitable legislation;

“That in the meantime, and until this can be obtained, the capitation tax should be raised to \$500.”

As a result of these recommendations, the capitation tax was increased to \$500.

With regard to Japanese immigration to Canada, the Minister stated that there was no doubt there existed, at the time the enquiry under the second Commission was in progress (1900), a tacit understanding between the Japanese authorities and the Dominion Government that the flow of immigration from Japan would be regulated by the Governor of the several prefectures as not to exceed a reasonable figure. The Minister touched briefly on the political and social revolutions which had marked the progress of Japan in recent years, and then considered the relations of Canada to the treaty of 1894 between Great Britain and Japan. The correspondence relating to the tacit understanding said by the Minister to exist with Japan concerning the regulation of Japanese immigration to Canada was then dealt with at considerable length. Coming to the negotiations on the present occasion, the Minister stated that he reached Tokio on November 14, and immediately called at the British Embassy. The British Ambassador, Sir Claude Macdonald, had been directed by the Foreign Office in London to present the credentials of the Minister of Labour to His Excellency Count Hayashi, Minister of Foreign Affairs for Japan, which had been done. It was agreed that for negotiations, the two countries should be represented as follows: Japan, by His Excellency Count Hayashi, Minister of Foreign Affairs;

Baron Chinda, Vice-Minister of Foreign Affairs, and Mr. Ishii, Director of the Bureau of Commerce; Canada, by His Excellency Sir Claude Macdonald, British Ambassador; the Hon. F. O. Lindley, Secretary of the British Embassy; the Minister of Labour, and Mr. Joseph Pope, Under Secretary of State for Canada. The Minister took occasion here to express the obligations of Canada to the British Ambassador at Tokio in connection with these negotiations. The Ambassador had been present at every conference, and had spared no effort to bring the negotiations to a speedy and successful issue. From Mr. Lindley and Mr. Pope, the Minister had, he said, all the assistance which a long experience and thorough knowledge of the various points at issue could give. From the Japanese authorities, and more especially from the Minister of Foreign Affairs, the Minister had received the most courteous hearing, and had found in Count Hayashi a true friend of Canada and of Great Britain, animated with a sincere desire to reach such an arrangement as would be mutually beneficial and equally honourable to both countries.

#### Official Assurance of Japan.

The Minister was not, he said, at liberty to divulge the proceedings at conferences or the contents of documents of a confidential nature, but the written assurances he had received from the Minister of Foreign Affairs for Japan, that Japan would in the future restrict her emigration to Canada, was, he said, the best evidence that the new arrangement is now on a satisfactory and permanent basis. The written assurance in question read as follows:—

Tokio, December 23, 1907.

Monsieur le Ministre,—

In reply to your note of even date, I have the honour to state that although the existing treaty between Japan and Canada absolutely guarantees to Japanese subjects full liberty to enter, travel and reside in any part of the Dominion of Canada, yet it is not the intention of the Imperial government to insist upon

the complete enjoyment of the rights and privileges guaranteed by those stipulations when that would involve disregard of special conditions which may prevail in Canada from time to time.

Acting in this spirit and having particular regard to circumstances of recent occurrence in British Columbia, the Imperial government have decided to take efficient means to restrict emigration to Canada. In carrying out this purpose, the Imperial government, in pursuance of the policy above stated, will give careful consideration to local conditions prevailing in Canada, with a view to meeting the desires of the government of the Dominion as far as is compatible with the spirit of the treaty and the dignity of the state.

Although, as stated in the note under reply, it was not possible for me to acquiesce in all of the proposals made by you on behalf of the Canadian government, I trust that you will find in the statement herein made, proof of the earnest desire of the Imperial government to promote by every means within their power, the growth and stability of the cordial and mutually beneficial relations which exist between our countries. I venture to believe, also, that this desirable result will be found to have been materially advanced by the full exchange of views which has taken place between us, and it gives me special pleasure to acknowledge the obligation under which I have been placed by your frank and considerate explanations regarding the attitude and wishes of your government.

I avail myself, &c., &c.,

(Sgd.) TADASU HAYASHI.

The Honourable Rodolphe Lemieux,  
Postmaster-General and Minister of  
Labour for Canada, Tokio.

The Minister stated his view that in this letter the Minister of Foreign Affairs for Japan gave Canada the official assurance that the Imperial government had decided to take efficient means to restrict emigration from Japan. During the conferences on the subject, a series of most stringent regulations, accompanied by instructions addressed to the

local governors and to the consuls of Canada, had been adopted. The Minister assured the House that the British Ambassador and himself were satisfied that these regulations were sufficient for the purpose, and that they would be honestly enforced by the Foreign Office at Tokio. As a result of the negotiations, the Minister stated, all emigration of contract labourers, artisans included, is now prohibited—unless they come at the request of the Canadian Government. This meant, the Minister explained, that hereafter such companies as the Canadian Nippon Supply Company would be unable to co-operate with the emigration companies of Japan in sending labour under contract to this country. *Bona fide* students, merchants and tourists from Japan would, as before, continue to enjoy freedom of entrance into the Dominion.

#### Emigration from Hawaii.

As regards immigration from Hawaii, the Minister stated, the question was settled. The Japanese Government admitted they had no jurisdiction and no control over emigrants from Honolulu to Canada, but the Alien Labour Act of Canada provided against the importation of contract labour from the United States. Hawaii was an American possession, and therefore the Act applied. If its provisions were not found sufficient to meet all requirements, they could be amended accordingly. It ought not to be necessary, the Minister explained, to amend the Alien Labour Act in view of a recent Order-in-Council prohibiting immigrants from landing or coming into Canada unless they come from the country of their birth or citizenship by a continuous journey and on through tickets purchased before leaving the country of their birth or citizenship. (\*). This regulation applies to Atlantic and Pacific ports, and indiscriminately to all countries. The Order-in-Council would prevent Hindus coming from Hong-Kong and Shanghai to Canada, or Japanese coming from the Hawaiian Islands to Canada. With the avenue from Japan carefully regulated and the avenue from Hawaii completely

closed, the Minister could, he said, announce that all features of the question of Oriental immigration that could give rise to future trouble had been eliminated. Concerning the propaganda of certain immigration companies operating in Japan, the Minister of Foreign Affairs for Japan had informed him officially at his last interview, and had authorized him to state before the Canadian Parliament, that he (Count Hayashi) had practically suppressed emigration companies in Japan. There were seventeen of these companies. The deposit required by the Government had been increased so much that three only of them had been able to continue. Count Hayashi had stated to a deputation of shareholders of those companies that in future as between high diplomatic interests and those of emigrants, the latter would yield. The Count had further stated to the Minister that the three emigration companies remaining in Japan were especially subsidized to invite emigrants not to the United States and Canada, but to Manchuria and Korea, and in future they would be prevented by special regulations from carrying on any work of emigration to Canada and the United States.

The dignified assurance given by Count Hayashi on behalf of his government, was, said the Minister, a solemn engagement which Canada is bound to accept in good faith. The fact that it was given of her own free will made it the more binding to Japan.

The question of Oriental immigration to Canada was further debated on Monday, January 28, on an amendment to a motion to go into supply.

#### Official Statement by Count Hayashi to the Japanese Diet.

Cable despatches to the press from Tokio, under date of January 28, state that Count Hayashi, on the preceding evening, replying to interpellations in the Lower House of the Diet, spoke at length on the foreign policy of the government, including negotiations with Canada. He announced that the Canadian question had been definitely settled

and read the correspondence with Rt. Hon. Rodolphe Lemieux, the Canadian Minister of Labour, wherein Japan had agreed to restrict emigration to Canada within reasonable limits. He said that a memorandum attached thereto defined what is considered reasonable limit, but insisted that Japan had not conceded any of her treaty rights, nor had her

prestige suffered. Viscount Hayashi, continuing, said it was the duty of the Central Government to conserve the interests of Japanese subjects resident in other countries by preventing a further exodus of their countrymen, which might be prejudicial to those already residing abroad, and the restrictions therefore would be extremely rigid.

#### ORIENTAL IMMIGRATION—REPORT OF ENQUIRY UNDER COMMISSION BY THE DEPUTY MINISTER OF LABOUR.

THE first portion of the report of Mr. W. L. Mackenzie King, C.M.G., Deputy Minister of Labour, of his enquiry under a Royal Commission, dated November 5, 1907, into the methods by which Oriental labourers have been induced to come to Canada within the past year, was laid on the table of the House of Commons on January 20. The report, which consists of 55 printed pages, relates exclusively to immigration from Japan, the Commissioner intimating in the introduction his intention, for the purpose of furthering an undertaking of the problem involved, to divide the report into three parts, dealing respectively with the immigration from Japan, India and China.

Sittings of the Commission were held continuously from November 11 until November 30, during which time there were examined 101 witnesses, including 27 Japanese, 15 Hindus, 35 Chinese and 24 other persons.

The direct examination of the witnesses was conducted by the Commissioner, the witnesses being also examined by counsel for the government of British Columbia and counsel for the City of Vancouver, who were accorded the right of questioning all witnesses and of having any persons called whom they desired to have appear before the Commission.

The Commissioner shows in the first place the extent of the immigration from the beginning of the past year to the end of the month of October. This is set forth effectively in a tabular statement, commenting on which the Commissioner remarks: "It will be seen that during the

ten months ending October, 1907, the steamships of the Pacific brought to our shores in all 11,440 Orientals, of whom 8,125 were Japanese, 2,047 Hindus and 1,266 Chinese. These are the totals. They embrace all who were brought, including such as were not allowed to land, some who were subsequently deported, some who were former residents, and those who came via Canada and gained admission later into the United States. These totals are, of course, greatly in excess of the number of actual immigrants and should not be confounded with them."

The first of the eight chapters of which the report, other than the introduction, consists, is devoted to an explanation of the regulation of emigration in Japan, showing the elaborate system of investigation pursued, whereby the Government of the country secures a record of every individual in the empire, and the control exercised over the citizens of Japan with respect to emigration, the effect of which is that without permission from the Foreign Office none can obtain a passport, and without a passport no one can emigrate.

In the second chapter, the Commissioner discusses the immigration during years prior to 1907. He shows that the total immigrant Japanese population at the taking of the Dominion census in 1901 was 4,674, of which number 4,515 were in British Columbia. The branches of the Dominion Immigration Department at Vancouver and Victoria were not opened until July, 1904, and there are no statistical records from January, 1901, to July, 1904; there was, however, suffi-

cient ground for believing the number of Japanese immigrants during that period to have been small.

During the fiscal year 1905-6, there were, including new arrivals and returning immigrants, 1,922 immigrants in all, and during the nine months (July to March) of the fiscal year 1906-7, 2,042, of this latter number, 607 came during the months of January to March inclusive, which would leave 1,435 for the last six months of 1906. On this basis, the Commissioner expresses his conviction that the total number of Japanese in

British Columbia at the beginning of 1907 would have been about 7,500.

**Analysis of Japanese Immigration in 1907.**

In Chapter III, the Commissioner discusses the Japanese immigration of 1907, and sets forth the results of his analysis of the arrivals of Japanese at Canadian ports during the ten months ending October, 1907, in a table, showing the sources from whence the immigrants have come and the classes to which they respectively belong, as follows:—

CLASSIFICATION OF JAPANESE ARRIVALS AT CANADIAN PORTS DURING THE TEN MONTHS ENDING OCTOBER, 1907.

Total arrivals, 8,125.	
{ (i) rejected.....	77
{ (ii) admitted to United States.....	3,619
{ (iii) remaining in Canada.....	4,429
{ (i) from Hawaiian Islands..	2,779
{ (ii) from Mexico.....	9
{ (iii) from Japan direct.....	1,641
{ (i) under agreements with Tokio Emigration Company.....	900
{ (ii) immigrants to United States rejected by United States officers and allowed to remain in Canada.....	151
{ (iii) persons formerly resident in Canada (approx).....	300
{ (iv) other classes.....	290
{ (i) merchants, officers, students and travellers (approx).....	100
{ (ii) relatives or friends of Japanese in Canada, admitted on certificates of Japanese Consul (approx).....	190

The Commissioner refers in Chapter IV to the manner in which the Japanese settled in British Columbia are usually occupied, quoting on this point the report of the Royal Commission of 1902 on Oriental Immigration, the point of the quotation being to show that but a very small proportion of the number of men employed on the C. P. R. in British Columbia at that time consisted of Japanese, not more, in fact, than about 300 out of 5,000 on the whole division. During 1907, the Commissioner states, the number of Japanese employed under contract for the C. P. R. was 1,130. "It is in the employment of Japanese labourers on railway work," says the Commissioner, "that we find the beginning of what has led to the importation of most of the labourers who have been brought to Canada by the Canadian Nippon Supply Company." The Commissioner ex-

plains the methods formerly used by American railways to secure Japanese labour, and refers to Mr. S. Gotoh, the Japanese contractor for labour, who had made agreements to supply labour to various American railways, and had in 1901 secured a connection with the C.P.R., along the same lines, on account of which he opened an office in Vancouver.

**Organization of the Canadian Nippon Supply Company.**

Mr. Gotoh found it more difficult to procure Japanese labour in Canada than in the United States. His difficulty in filling the contract with the C. P. R., led to the organization, in December, 1906, of a corporation known as the Canadian Nippon Supply Company. In the testimony given before the Commission, by members of the corporation, there

was, says the Commissioner, "a curious indifference and lack of knowledge in regard to the nature and extent of its company's transactions on the part of its principal officers, even to their own connection with its affairs. At the same time, it was clear that the purposes of the Company were twofold—to furnish labour to companies and contractors on the one hand, which part of the work was to be under the direction of Mr. Gotoh, and to furnish supplies to the labour, which point was to be under Mr. Yoshi's direction."

Other evidence showed the connection existing between Japanese emigration companies and the Canadian Nippon Supply Company. The Commissioner, finding it necessary to examine personally the books and records of the Company, in question, was given every assistance by Messrs. Yoshi and Gotoh. Mr. Yoshi, before becoming connected with the Company, had been Japanese Consul at Vancouver, and the Commissioner remarks:

"Both Mr. Yoshi and Mr. Gotoh appear to have carefully considered the probable future of the new venture before Mr. Yoshi's connection with the Japanese Consulate at Vancouver was severed. In particular, they negotiated with different parties as to their willingness to employ Japanese labour, and to make them sole contractors in the event of their finding it possible to furnish this labour under contract in the quantities desired. Through Mr. Gotoh's connection with the Canadian Pacific Railway, the new company once started, had a contract sufficiently large to ensure its continued existence. Negotiations had also been commenced with Mr. James Duns-muir, the president of the Wellington Colliery Company, for the supply of miners from Japan, and had been so successfully conducted that before its incorporation, the new concern had also the assurance of a contract with that company. There seemed, to, bright prospects of a contract at some future day with the Grand Trunk Pacific Railway Company."

In connection with the last named railway, the following letter was received by Mr. Gotoh from the late E. G. Rus-

sell, the then agent of the G. T. P., in the west:—

GRAND TRUNK PACIFIC RAILWAY,  
Vancouver, B. C., December 10, 1906.

Mr. S. Gotoh,  
Japanese,  
Vancouver, B. C.

Dear Sir,—Making reply to your verbal inquiry of recent date upon the subject of Japanese labour for general and railway work in Northern British Columbia, I would say 5,000 men will undoubtedly be required, should they apply in reasonable numbers, and there is no doubt that all such men can secure a remuneration of \$1.50 per day.

There would not be any difficulty in securing 5,000 acres of land in British Columbia for cultivation at not to exceed \$12 per acre and upon reasonable terms, but not for speculation.

There could not be any objection to giving an exclusive right to supply Japanese labour required, so far as was legal, so soon as a company demonstrated its ability to perform such an undertaking, and so long as good labour and acceptable citizens in numbers required were furnished, and that you could control their actions as law-abiding people or remove them, and everything was done as required.

Yours truly,

(Signed) E. G. RUSSELL.

#### Company's Negotiations in Japan.

The Commissioner continues:—Mr. Gotoh's experience in connection with the supplying of Japanese labour has taught him that labour of this class could not be obtained in sufficient quantities in Canada; that if the contracts for which the new company had assurances, as well as those of which it had hopes, were to be carried out, labour would have to be brought to Canada from Japan. What grounds Mr. Yoshi and Mr. Gotoh had for believing that they would be able to secure this labour from Japan in view of the known policy of the Japanese government to restrict the number of emigrants to Canada, is

something on which the evidence taken before the commission throws but little light. The facts are that when the Canadian Nippon Supply Company was formed a policy of restriction was in existence. It was the first obstacle the company encountered when it commenced negotiations in Japan for the sending out of labourers to this country. Both Mr. Gotoh and Mr. Yoshi visited Japan after the company was formed, and it was while they were there that a new exception was added to the all but general prohibition which had hitherto prevailed. This exception was that thereafter emigration companies were to be allowed to send labourers under contract to Canada; to appearances, the change was effected at the instance of the emigration companies in Japan.

Whether this change was the result of such representations as were made to the Japanese government through the emigration companies, assisted, in so far as they might be of service in that connection, by Mr. Yoshi and Mr. Gotoh; or whether it was the carrying out of a new policy on the part of the Foreign Office in Japan, of which Mr. Yoshi and Mr. Gotoh, or either of them, may have had some knowledge at the time they were negotiating for the supply of Japanese labour in large quantities for with companies in this country, it is impossible to say. There appear to be grounds for either belief. It is scarcely to be credited that two such experienced persons would have embarked upon an enterprise, the success of which depended upon their being able to secure Japanese labour from Japan, without a very substantial belief in their ability to secure this labour. On the other hand, it is to be remembered that they were not without powerful Canadian interests behind them when they went to Japan, that they had in their possession documents which indicated the need and the desire for Japanese labour in this country, that they were able to afford assurances that for this labour employment would be immediately forthcoming, and that they were in a position to conjure with names which, to the statesmen of Japan, would not be with-

out significance or weight. In justice to Japan and to the prejudice which has been aroused against her people in some quarters, in consequence of the sudden influx of her countrymen in large numbers to Canada, it is not to be forgotten that in the regulations, which were issued about April of the present year, the exception permitting emigration companies to send labourers to Canada was made conditional upon the agreements with responsible employers of labour in this country; the *bona fides* of which agreements the Japanese Government required should be certified to by the Consul resident in Canada". The Commissioner narrates at some length, giving numerous extracts from pertinent evidence, the negotiations conducted in Japan by the directors of the Canadian Nippon Supply Company.

An arrangement was concluded with the Tokio Emigration Company whereby the latter company should send out labour into Canada. A branch of the Canadian Nippon Supply Company was opened at Yokohama to facilitate dealings with merchants and others in Japan. All difficulties were finally overcome, and on May 15th. 1907 the first shipment of Japanese sent out by the Tokio Emigration Company to the Canadian Nippon Supply Company, left Yokohama by the Kagi Maru. The dates of the various consignments, and the number of emigrants in each case is set forth in the report, together with the dates of their arrivals in Canada, and the proportion of labour described as "common" and that denoted as "miners". The number of consignments was 15, and the total number of immigrants comprised in these was 856 of which 135 were classed as miners.

The report contains a carefully classified statement, prepared by the Commissioner from documents in the possession of the Canadian Nippon Supply Company, showing the number of labourers in the employ of the Company during October 1907, also the place of residence of these employees immediately prior to their engagement with the Company. "Now from the above classification it will be seen", says the Com-

missioner, "that the Canadian Nippon Supply Company was supplying under contract, at the end of the month of October, 1,468 labourers, most of whom were employed on the Canadian Pacific Railway, 871 of these labourers had come out direct from Japan, being the number of those sent out by the Tokio Emigration Company to whom employment had been given up to the 23rd of the month; 139 were from the number of those Japanese who came to Canada from Hawaii, 6 were from the United States, 156 had been residents of Canada. Of 296 the former place of residence was unknown.

#### Nippon Supply Company's Contracts.

The contract which Mr. Gotoh had made to supply labour to the Canadian Pacific Railway Company was transferred to the Canadian Nippon Supply Company on the formation of that corporation. On June 1907 a new agreement was executed between the Canadian Pacific Railway Company and the Nippon Supply Company which was for five years, to June 1, 1912. "The methods of the Canadian Nippon Supply Company in handling labourers are described at considerable length in the report, the Commissioner declaring that with the labourers in its employ the Company appears to have been fair and just, and the charges made for its services, all things considered, appear to have been entirely reasonable." With the exception of the rates of wages specified it was, so Mr. Gotoh explained, the same to all intents and purposes as previous contracts. The wages to be paid under the new agreement were \$1.35 to \$1.50 per day to men working on section gangs and \$1.65 per day of 10 hours to men working on extra gangs.

On April 15, 1907, Mr. F. F. Busteed, General Superintendent of the C. P. R. Pacific Division, wrote Mr. Gotoh that he would say the number required per annum would be between 500 and 2,000.

"The agreement with the Wellington Colliery Company", says the Commissioner, "is dated the 31st January and is for 5 years. It calls for the

supplying of 500 Japanese coal miners within 6 months after the date of execution, and in addition to this number 25 common labourers, 6 moulders, 6 machinists and 2 carpenters. The scale of wages for common labourers is fixed at from \$1.35 to \$1.55 per day, and for miners as well as the other classes of skilled labour at from \$1.50 to \$1.90 per day, the hours to be 8 underground and 10 when working above ground. After each miner has worked in the mine one month the Supply Company is to receive in full for its services the sum of \$5 for every miner supplied. It is provided that in the event of a strike taking place the Supply Company shall use its best endeavours to prevent its miners from joining the same, and if any of such miners shall strike the Colliery Company shall be at liberty to wholly determine this contract forthwith or to cease from further employing any such strikers or at any time.

"Mr. Gotoh stated that though 135 miners had come out to work under this agreement he had been unable to supply more than 40, as the men when they landed on this side of the Pacific declared that they preferred to work on the railways and he had no way of compelling them to go into the mines. Not having been able to fulfil the conditions of the contract he had cancelled it. He was no longer supplying miners at the time his testimony was given.

"These are the only contracts, the duplicates of which appear to have been sent to Japan."

#### The Grand Trunk Pacific and the Influx.

In Chapter V the Commissioner deals with the alleged connection of the Grand Trunk Pacific Railway Company with the influx of immigrants from Japan. The commissioner had been given to understand at the commencement of the enquiry that an investigation would show this Company to be largely responsible for the influx. With the exception, however, of the letter from the late Mr. Russell, quoted above, the Commissioner had not found after a careful enquiry anything indi-

cating any intention on the part of the Company named to enter into an agreement for the importance of Japanese labourers.

"It was shown", says the Commissioner, "that several attempts had been made both by the Nippon Supply Company and other persons to secure contracts from the Grand Trunk Pacific Company for the supply of labour on its work of construction, but that all had failed as already mentioned. Mr. Gotoh admitted quite frankly that he had understood Mr. Russell's letter was not an agreement or an undertaking, but that he had tried to make use of it in Japan to convey the impression that it was a genuine agreement, in order that he might be the better able to secure the labour which he desired from that country. The Japanese Government, however, had made independent inquiries through its consul, Mr. Morikawa, at Vancouver, and had found out that no such contract was in existence. As late as July of the present year, the Foreign Office appears to have given public notice to the effect that no contract of the kind existed."

"The evidence appears conclusive", says the Commissioner, finally, on this point, "that in no way was the Grand Trunk Pacific Company responsible for any Oriental immigration which has taken place".

#### **Japanese Immigration from Hawaii.**

In the sixth chapter the Commissioner deals with Japanese immigration from Hawaii. After describing the nature of the organization known as the Planters' Association of Hawaii and indicating the part ascribed to it in influencing legislation in the United States on the subject, and in connection with the Asiatic Exclusion League in San Francisco, remarks, "It was suggested by one of the Japanese witnesses who gave testimony before the Commission, that the influence of the Planters' Association was not altogether inoperative in British Columbia today. Inoperative it certainly has not been, if we recognize the fact that it was in the

efforts of the Planters' Association to lower the wages of the Japanese residents in Hawaii, that we find the beginning of the unrest which has led to Japanese coming in such large numbers from the Hawaiian Islands to British Columbia during the past year."

The Commissioner shows the volume of emigration from Hawaii to Canada the first ten months of 1907, the figures of which were 2,779, of which number 1,444 reached Canada during July. "It was in the summer months", says the Commissioner, "with the arrival at the port of Vancouver of the "Admiral Jaurequiberry", and especially the arrival subsequently of the "Kumeric" and "Indiana" that the citizens of Vancouver saw landing at their wharves a foreign multitude for which accommodation within its city's precincts could not be found. It was then that many of the indifferent were alarmed, and the people at large became aroused to what the possibilities of an unlimited immigration of persons from the Orient might mean. Discussing emigration from Japan to Hawaii the Commissioner says some 50,000 or 60,000 had arrived at the islands, chiefly replacing native labour on the plantations, but lately, and particularly since the war, this immigration had been restricted, and the resident Japanese had sought increased wages. This difficulty the planters sought to effect by importing Portuguese labourers. Here arose the unrest that induced the emigration of Japanese from Hawaii to Canada. The "Admiral Jaurequiberry" which brought Portuguese labourers from the Canary Islands to Hawaii was chartered by the Japanese Boarding House Keepers of Honolulu to carry Japanese from Hawaii to Vancouver, and brought to that port 241 Japanese immigrants. Dr. Munro, the medical inspector of the port, demanded under the immigration regulations, the production of \$25 on the part of each immigrant, and 150 of the number, not being able to produce this sum, he was about to refuse their admission, when the Japanese Boarding House Keepers' Union of Vancouver advanced over \$3,000 as a guarantee bond that the Japanese would

not become a public charge. "This was accepted by Dr. Munro." says the Commissioner, on the condition that he should be given later a statement showing that employment had been secured by these men and where they were at work". The S. S. "Kumeric" reached Vancouver shortly after with 1,189 Japanese passengers from Hawaii. In this case the Theodore Davis Company of Honolulu, which had chartered the steamer, deposited a sum sufficient to meet the requirements of the case, exacting \$25 in the case of each immigrant, and this sum was sent by draft to the Vancouver agent of the charterers, who cashed it and distributed the money to the passenger. Theodore Davis wrote a letter to the Captain of the Steamer, stating that the money had been forwarded in this way so that the passengers might not gamble it away during the voyage. This letter was shown to Dr. Munro, who at the time considered the transaction genuine. "It appeared subsequently", says the Commissioner, "that the money belonged in reality to the charterers, had been put up in this way as 'show' money pure and simple, and that Mr. Maruyama, who accompanied the party, had come along to see to the getting of it back after all had been landed." As various expenses had to be met in connection with the provision of accommodation for so large a number of newcomers, Mr. Morikawa, Japanese Consul in Vancouver, secured the consent of the immigrants to his holding the money in trust till all were properly provided for, and sent an officer of the Consulate to collect the money. This procedure was however stopped by Dr. Munro, and most of the immigrants landed with the \$25.00 in their pockets. The Honolulu Company which chartered this steamer, and advanced the 'show' money lost heavily on the outcome of the whole proceedings.

The Commissioners state that Canadian Nippon Supply Company did its utmost to prevent the immigration from Hawaii, realizing that a sudden influx of Japanese in large numbers would work injury to their enterprise. Mr. Morikawa, the Japanese Consul at Vancouver, also did his best

by cables to the Japanese Consul at Honolulu to stem the tide of immigration, but was unable to achieve his purpose.

"It is true", says the Commissioner, closing this chapter, "that of the immigrants from Hawaii all were provided with passports, many of them passports issued by the Foreign Office of Japan during the present year, but they were passports marked for *Hawaii* or *Hawaii only*. In going to Hawaii their holders were voluntarily allowed to pass beyond the jurisdiction of Japan; in coming to Canada it seems reasonable to assume they went beyond the wishes of the authorities by whose permission they had been allowed to emigrate at all. This seems the proper view to take, but it makes plain this fact, which is of the utmost significance so far as Japanese immigration to Canada is concerned, that whatever may be the power of Japan to control the emigration from her own shores, that power may end when the territorial limit is crossed".

#### Other Sources of Japanese Immigration.

In Chapter VIII the Commissioner discusses briefly the immigration of Japanese from other sources than Hawaii and Japan. "In accounting," the Commissioner says, "for the 2,779 immigrants from Hawaii, the 900 sent over by the Tokio Emigration Company, the 3,619 who were destined for and admitted to the United States, and the 77 who were rejected, most of the story of the causes of Japanese immigration into British Columbia during the first ten months of 1907 is told. The numbers remaining constitute only 750, of whom it seems reasonable to allow that 300, at least, were persons formerly resident in Canada, and 100 Japanese merchants officers, students and travellers, who came in the ordinary way. Of the 9 from Mexico all that can be said is that there were that number who came from that country. There remain then to consider the 190 Japanese who obtained passports from their government on the production of certificates from the Consul in Canada, that they were relatives or friends of Japanese resident here, and

the 151 who came originally with the intention of going to the United States, were rejected by the United States officers, and allowed to remain in this country. The 190 require little in the way of explanation; the numbers are themselves the best answer that can be given to the degree of caution with which the Consuls in Canada and the Foreign Office in Japan have exercised their powers in this connection. In regard to the 151 a word or two may be necessary".

The Commissioner points out that among the Japanese immigrants to Canada are a number who have been rejected as unfit by the United States officers stationed at the ports of departure in Japan, and who have taken passage to Canada with a view to going ultimately to the United States. If rejected by the United States officers stationed at Canadian ports they have been turned over to the Canadian officers, "who if the disease has been slight have allowed them to go to the detention hospital, where they have been treated, and if the treatment has proven successful, they have been allowed to remain". The treatment in such cases has been given at the expense of the companies who have brought the labourers to this country.

#### The Commissioner's Conclusions.

In the final chapter the Commissioner gives the conclusions reached as the result of the investigations. He dwells on the scarcity of statistical information concerning the immigration of Japanese into British Columbia in the past, so that it is impossible to say definitely how many who have come to Canada within the past year were former residents of the country, and, without such an enquiry as the present, it is impossible to say how many have held passports for Canada, how many for the United States, and how many for Hawaii. Within the last few months a record of this kind has been kept at one of these ports but not at the others. The Commissioner does not desire to reflect in any way upon the immigration

officers at these ports, "who appear," he says, "to have performed their duties faithfully and well," but he adds, "I would respectfully submit for consideration the advisability of giving to the work of the immigration officers on the Pacific a wider significance than has hitherto been accorded, or possibly been necessary, and would suggest that a staff adequate to all the duties should be maintained".

"The practice of treating diseased immigrants" says the Commissioner "might, it would seem, be discontinued on the Pacific coast without working any hardship save in exceptional cases; it would ensure greater precautions on the part of companies carrying immigrants, and at the same time would lessen a little the duties of our own officers." It would seem reasonable, too, that Japanese holding passports for the United States should be required to present themselves for examination by the American officers before examination by our own; if rejected by the United States officers they should be declared *ipso facto* undesirable, so far as Canada is concerned, and not allowed to land.

Regarding the general subject of Japanese immigration the Commissioner states:—

If the present inquiry has revealed anything, it is that the Japanese Government has permitted to come to Canada during the past year, only the following classes:—

(1) Merchants, officers, students and travellers to the number of about 100 as described.

(2). Japanese formerly resident in Canada.

(3). Such persons as may be designated 'relatives' or 'friends' of Japanese resident in Canada, and this only where the consul resident in Canada has certified that they were wanted, and that upon their arrival they would be sure of immediate employment 'or a home. This number has been approximately 190.

(4). Contract labourers for work under a *bona fide* contract with a Canadian company or corporation, the *bona fide* of which contract has been certified to by the resident consul, and a duplicate

of which has been produced at and approved of by the Foreign Office in Japan,—a class of immigration which has been allowed only since April of the present year.

With the immigration from Hawaii the Japanese Government has had nothing to do.

Were the immigration of Japanese from Hawaii and all other points beyond the jurisdiction of Japan absolutely prohibited, and a stop put to the immigration of contract labour, at the instance of individuals and companies in this country and immigration companies in Japan, and a like reserve shown in the future in the granting of passports to all other classes of persons as appears to have been practised in respect to these classes during the past year, the Japanese immigration to this country would not be such as, having regard for numbers, would be likely to cause any serious embarrassment to this country, or as to which exception could reasonably be taken. On the other hand, unless methods sufficiently effective to prohibit absolutely all immigration from Hawaii

and the importation of contract labour from Japan, there are strong grounds for believing that the numbers of Japanese likely to enter Canada from the former islands will greatly exceed, within a few months, the numbers of the past year, and that the Canadian Nippon Supply Company and other like concerns will carry on a traffic in Japanese labour the like of which has not been equalled in the importation of any class of coolie labour that has ever been brought to our shores. I would most respectfully submit that an immediate consideration of this subject is desirable, not only in the interest of the people of the province of British Columbia, but of the whole Dominion, and that any effective solution demands prohibition of such Japanese immigration as may come from countries beyond the jurisdiction of Japan, and an absolute restriction in the numbers that may come from Japan direct.

The report concludes with an acknowledgement of the Commissioner's obligations to counsel and to officials who had in any way assisted in the enquiry.

#### INDUSTRIAL DISPUTES INVESTIGATION ACT 1907—PROCEEDINGS UNDER THE ACT DURING THE MONTH OF JANUARY.

**D**URING the month of January, four applications for the establishment of Boards of Conciliation and Investigation were received at the Department, being respectively as follows:—

I. On behalf of the employees, being carmen, of the Grand Trunk Railway Company of Canada; the number of employees affected is estimated at 800.

II. On behalf of the employees of the Temiscaming and Hudson Bay Mining Company of Cobalt, Ont., the number of men affected is estimated at 50.

III. On behalf of the employees of the Dominion Coal Company, Limited, of Dominion, B. C.; the number of employees affected is estimated at 7,000.

IV. On behalf of the employees of the Hamilton Street Railway Company, the Hamilton and Dundas Railway Company, and the Hamilton and Burlington Radial Railway Company; the number

of employees affected directly is estimated at 120, and indirectly affected at 25.

Of applications received prior to the beginning of January, proceedings in connection with which remained unfinished at the close of the preceding month, there were the following, namely: (1) The application on behalf of the employees of the McKinley-Darragh-Savage Mines, Limited, of Cobalt, Ont. (2) The application from Pioneer Lodge, No. 1, P. W. A., on behalf of the employees of the Cumberland Railway and Coal Company of Springhill, N. S. (3) The application on behalf of the Grand Trunk Railway Company of Canada for the adjustment of differences with the telegraphers in its employ. (4) The application on behalf of certain employees, being enginemen, firemen and hostlers, of the Canadian Northern Railway.

With regard to each of these last named applications, the reports from the Boards established to deal with them respectively were received during the month and are printed below. A state-

ment of the proceedings during the month in connection with all other applications not disposed of is contained in the present article.

#### DISPUTES AT MCKINLEY-DARRAGH MINES, COBALT, ONT.—UNANIMOUS REPORT OF BOARD.

ON January 22nd, the Department received the report of the Board established to investigate the differences between the McKinley-Darragh-Savage Mines of Cobalt, Ont., and its employees. The application was received in the Department on December 8, signed by James McGuire and Arthur L. Botly, president and secretary respectively of Cobalt Miners' Union, Local No. 146 of the Western Federation of Miners, Mining Department of the Industrial Workers of the World. The number of employees concerned was estimated at 120. The cause of dispute related to wages and hours, the employing company having, it was alleged in the application, posted up a schedule on the 15th November, 1907, to take effect from December 15, 1907, which would mean a reduction on an average of 25 cents a day, and an increase of one hour in work all round. The members of the Union employed required that the schedule in force before the proposed change should be continued. A Board of Conciliation and Investigation was established by the Minister, being constituted as follows: Mr. J. A. Welsh, Cobalt, Ont., appointed on the recommendation of the employees concerned; Mr. E. C. Kingswell, Haileybury, Ont., appointed on the recommendation of the employing company concerned, and Professor Adam Shortt, appointed on the joint recommendation of the foregoing members. The Board met at Cobalt on January 1 and 2, and on the evening of January 2 reached a unanimous agreement as to the terms of the award, though a formal agreement was not effected between the parties concerned. The chairman of the Board, with a view to securing that any settlement reached should not be out of touch with the general conditions of

the Cobalt district, took occasion to visit a number of the leading mines, and to interview the managers with reference to labour conditions. The schedule of wages contained in the agreement recommended, showed an average reduction of 25 cents a day on the figures of the schedule prevailing before and during the investigation, but the Board recommended that nine hours continue to constitute a day's work, as in the case of such latter schedule.

Copies of the report were transmitted to the parties concerned in the dispute immediately on its receipt in the Department, with the request that they would respectively state whether or not they would agree to abide by the same. The Department had not at the end of the month received word on this point, but an informal working agreement is believed to have been received averting the strike which was declared to be impending at the time the application was addressed to the Department.

#### Report of the Board.

The report of the Board is as follows:—

COBALT, Ont., January 2nd, 1908.

In the matter of a dispute between the McKinley-Darragh-Savage Mines of Cobalt, Limited, and various employees in their service, which was referred, under the Industrial Disputes Investigation Act, to a Board of Conciliation and Investigation, established and appointed by the Minister on December 21, 1907, and composed of the following members: E. C. Kingswell, of Haileybury; J. A. Welsh, of Cobalt, and Adam Shortt, of Kingston, chairman.

We, the members of the said Board of Conciliation, having held various

sessions in the town of Cobalt, and having carefully considered the evidence and arguments of both parties to the dispute, and having given due consideration to the various conditions of time and place, have unanimously agreed upon the following schedule of wages and hours as a reasonable basis for the settlement of the dispute in question, and earnestly recommend to both parties the acceptance of the award as a settlement of their differences.

SCHEDULE OF WAGES.

Carpenters.....	\$3.25
Mechanics.....	3.25
Pipe Fitters.....	2.75
Blacksmiths.....	3.25
Helpers.....	2.50
Engineers, nine hours.....	3.00
Over nine hours, 32½ cents per hour.	
Firemen, nine hours.....	2.50
Over nine hours, 27½ cents per hour.	
Ore Sorters.....	2.50
Hammermen.....	2.75
Teamsters.....	2.50

Hoistmen, nine hours.....	2.50
Over nine hours, 27½ cents per hour.	
Cage or Bucketers.....	2.50
Other labour on surface.....	2.25
<i>Underground—</i>	
Timbermen.....	\$3.25
Machine Men.....	3.25
Helpers.....	2.75
Cage or Bucketers.....	2.50
Other underground labour.....	2.50

Hours:—

Nine hours to constitute a regular day's work.

Miners in wet shafts to be paid 25 cents extra per day, and to be furnished with oil clothes.

Minimum wages for cooks, \$75 per month.

(Sgd.) ADAM SHORTT,  
*Chairman;*  
 J. A. WELSH,  
 E. C. KINGSWELL.

1.—DISPUTE AT SPRINGHILL, N.S., BETWEEN COAL MINERS AND OPERATORS.—UNANIMOUS REPORT OF BOARD.

THE Department received on January 22, the report of the Board of Conciliation and Investigation, established for the adjustment of certain differences between Pioneer Lodge No. 1, Provincial Workmen's Association, of Nova Scotia, and the Cumberland Railway and Coal Company, of Springhill, N.S. The report was signed by all the members of the Board, and dealt exhaustively with the subjects of difference.

The application in connection with which the Board was established, was received in the Department on November 21. The number of persons effected by the dispute was estimated at 1,600, this being the total number of employees, men and boys, of the Company; of the number, 900, it was stated, belong to the union making the application. The causes of difference were set forth as follows:—

“First case in respect so the fulfilment of an agreement between the parties for payment for stone in pillar work where it exists, on the basis of 4c. per inch per lineal yard for 4 in. and upwards.

“Second case is in respect to the adoption of a general wage schedule for coal cutters and their loaders.

“Third case is in respect to the matter of the change in the mode of payment of the mineral gotten from box to tonnage price.

“Pioneer Lodge No. 1, Provincial Workmen's Association, further respectfully makes application for a reference to the Board of Conciliation now being applied for, of any cases in dispute which may arise between the contending parties, from the date of this application up to and including the date of the sittings of the said Board. The object of the Lodge in this respect being to have a final and satisfactory adjustment of all matters in dispute between it and the said Company which may be pending up to the date of the sittings of the proposed Board.”

The Board was duly established by the Minister, being constituted as follows: His Honour Judge Patterson, New Glasgow, N. S., chairman; R. B. Murray, Springhill; and Hiram Donkin, Halifax.

Mr. Murray was appointed on the recommendation of the employees. Mr. Donkin was appointed by the Minister on behalf of the company in the absence of a recommendation from the employing company concerned, and in compliance with section 8, clause 2, of the Industrial Disputes Investigation Act, 1907. The chairman was appointed in the absence of a joint recommendation from the two members of the Board first appointed. The report was, as stated above, unanimous in character, and an agreement between the parties to the dispute not having been reached during the proceedings before the Board, certain recommendations were made for a settlement of the differences. The Board considered first the third case as stated above, relating to "the mode of payment of the mineral gotten from box to tonnage price," and decided that the fair way to arrive at the weight of coal would be on a basis of specific gravity indicated, and indicated what it regarded as a reasonable determination of weights.

#### Question of General Schedule.

With respect to the second case, that relating to "the adoption of a general wage schedule for coal cutters and their loaders," a little difficulty was experienced, the report states, save with regard to a very few details. A schedule of rates was discussed by men and management last May, at which not only was the principle of a schedule assented to by both parties, but as a result of repeated conferences, almost every detail of the schedule was accepted. The Board considered the various sections concerning which agreement had not been reached, and made a recommendation in each case copies of the original draft schedule and the schedule as amended being submitted with the report. Certain sections of the schedule referred to the question of payment for stone in pillar cuts, and the Board, in discussing these points, made some reference to the general question of stone in pillar, and to the previous Board which had dealt under the Act with this question to some extent. The report pointed out that the

Company had furnished no statement in reply to the application, and the Board had therefore to rely wholly upon the evidence furnished by the Lodge, but that so far as the schedule is concerned, it was impossible to conceive that any evidence would have been adduced by the Company to deny that the principles of a schedule had been concurred in between the parties, and that a very large proportion of the section and items therein had been adopted. The report states on this point: "It seems clear to the Board that if in the past a schedule of wages had been in operation in the Springhill collieries, very much of the friction and unpleasantness which has so frequently occurred there between the Company and its employees would have had no existence." The Board recommended that the schedule as amended be adopted for a period of three years. Filed as part of the report is a letter addressed by Mr. Donkin, a member of the Board, to Mr. H. McInnes, counsel for the Company, urging, on behalf of the Board, that the Company should meet the men with a view to framing a schedule, and dwelling on the fact that although nearly all the items in the proposed schedule had been already agreed upon, the men were prepared to make modifications, if by so doing they could meet the views of the Company. The reply of the Company is also included in the report. In this communication, sent by wire, Mr. McInnes stated he had discussed the question of a schedule with the general manager, who had stated that a hard and fast schedule in a place like Springhill is unworkable. Mr. McInnes elaborated this point at some length, and stated in conclusion that "a schedule properly and honestly prepared would leave open so many rates to be governed by local conditions that it would be practically worthless."

Immediately on receipt of the report in the Department, copies were prepared and transmitted to the parties concerned, with the request that they would state respectively whether or not they would abide by the recommendations of the same. The Department had not, at the end of the month, received a reply to

these communications. In the meantime no cessation of work has occurred at the mines at Springhill.

### Report of Board.

The report of the Board is as follows:—

In the matter of the Industrial Disputes Investigation Act, 1907, and of the Cumberland Railway and Coal Company, Limited.

Employer,

and

Pioneer Lodge No. 1, Provincial Workmen's Association,

Employees

Report of Board of Conciliation and Investigation in the above matter:

The Board, composed of R. B. Murray, recommended by the Lodge to represent the employees, and Hiram Donkin, appointed by the Minister of Labour, to represent the employer, and Judge Patterson, Chairman, pursuant to notice given by the Chairman to the parties interested, met on the 8th day of January, 1908, at three o'clock p. m., in a public hall in Springhill, the locality of the dispute between the above parties, and having taken the proper oath of office, proceeded with the reference.

Mr. William Watkins, Secretary of Pioneer Lodge No. 1, filed with the Board a certificate from the Lodge appointing Mr. Alexander E. McPherson, Mr. E. B. Paul and Mr. J. B. Moss, to present the case of the Lodge before the Board. No person was present on behalf of the Company.

The Chairman spent the balance of the afternoon endeavouring to ascertain if the matters in dispute could not be arranged between the parties themselves. The representatives of the Lodge assured him that they had, without success, exhausted every possible means of securing a settlement with the Company without the intervention of the Board. The failure of the subsequent efforts made by the Board itself to induce the Company to meet the Lodge and endeavour by friendly conference to settle

the dispute, leaves the Board in no doubt as to the truth of their statements.

The taking of evidence was commenced at ten o'clock on the morning of January 9th, and continued, with an intermission at noon, all day. Adjournment was had until ten o'clock next morning, when the hearing was resumed and continued with the usual intermission all of that day. Adjournment was further had until ten o'clock to the next morning, when the hearing was again resumed and completed at about two o'clock p. m. The stenographer being unable at once to furnish the Board with complete copies of evidence, the Board adjourned, to meet at Truro on the 16th inst., to draw up its report. In consequence of the indisposition of Mr. Donkin, it was subsequently arranged that this meeting should be held at Halifax.

On the morning of the 9th inst., Mr. Donkin, with the approval of the Lodge, went to the office of the Company to open up negotiations with them towards a settlement of the matters in dispute, and was referred by the Assistant General Manager to the Company's solicitor, Mr. H. McInnes, K. C. Mr. Donkin got into communication by telephone with Mr. McInnes, and told him that so far as he could see, there was very little difference between the men and the Company; that there was a pronounced disposition on the part of the men to meet with representatives of the Company and arrange the schedule which would eliminate all other matters in dispute. He pointed out that this should be more satisfactory to all concerned than to have these matters referred to outside parties. At Mr. McInnes' request, Mr. Donkin addressed a letter to him putting in formal shape what had been said over the telephone. A copy of that letter is annexed to this report. To that letter he received a reply by wire arguing the impossibility of fixing a schedule for the Springhill mines. A copy of that reply is also hereto annexed. It will appear more fully hereafter, but may properly be mentioned here, that last May, the principle of a schedule had been adopted and the schedule itself was drawn up, and with the exception of a very few

and most of them matters of trifling importance, agreed upon by both management and men.

Three cases in dispute were stated in the application, but a reference to the last page of the minutes will show that the Lodge did not offer any evidence upon the first case set out in the application.

The third case, that is "in respect to the change in the mode of payment of the mineral gotten from box to tonnage price," was first dealt with.

The evidence seems conclusive that for at least a period of 25 years, 22 cubic feet of solid coal has been accepted as the basis of measurement; this was taken to be the equivalent of a box of mined coal, and its weight was assumed to be 1,650 lbs. The weight of the box of coal was arbitrary, and only of secondary importance; the basis of measurement was the 22 cubic feet of solid coal.

In the course of events, there arose a question between the men and the management as to what was a box of coal. A box filled level full of mined coal at the face of the workings would not be level full on arriving at the bank head. It was agreed between men and management that if the shrinkage did not amount to more than six inches in the height of the coal in the box at the bankhead, it was to be considered a full box. If the shrinkage were greater than six inches on any one box, the box was forfeited; and while this was the agreement, it was disclosed that for a period of at least six years there were no forfeitures in this respect. In 1906, the men made application to the Commissioner of Mines of the Province of Nova Scotia, praying him to order the installation of scales at the bankhead, so that payment might be made by the ton (of 2,240 lbs.) instead of by the box. These scales were installed during the strike of last year.

In 1907, by methods which by reason of the Company's attitude in not appearing at the investigation are unknown to the Board, the Company made a test of the weight of the boxes in order to arrive at a standard weight. The standard arrived at, was for Number 2 Mine, 1,843 lbs.; and for Number 3 Mine, 2,009

lbs. Boxes now weighing less than the figures given are docked; but in cases of overweight, the excess is allowed the men. It has already been pointed out that for a period of at least 25 years, and as a result of an agreement with the Company (a copy of which agreement is annexed to this report) the standard weight of a box of coal had been fixed at 1,650 lbs. It will be thus seen that the standard weight of a box has been raised by the Company for Number 3 Mine by 359 lbs., and for Number 2 Mine by 193 lbs. It is well known that the coal produced in Number 3 Mine is smaller than the coal produced in Number 2 mine. It would therefore weigh more per box of the same capacity than the larger coal produced from Number 2 Mine—hence the greater part of the difference in weight of the coal produced from these mines is accounted for. This difference may be further in part accounted for by the fact that the number of boxes of wet coal from Number 3 Mine during the test was greater than the number of boxes of wet coal from Number 2 Mine. This large difference, however, is not borne out by scientific calculations based on the specific gravity of the coal, as will hereafter more fully appear. The evidence is complete that boxes loaded level full of dry coal at the face, in accordance with the old agreement (this agreement is also annexed to this report) could not contain 2,000 lbs. and 1,843 lbs. respectively. That in order to obtain such weights, boxes must have been loaded in a different way; and it appears that during the period the test was being made, boxes were loaded differently. In some cases, boxes, after having travelled from the face, a considerable distance and necessarily shrinking, were returned under the Company's instructions to one of the Company's chutes, and more coal put on them. The details of the docks and fines also show clearly that some different system of docks and fines must have been employed during this time.

Witness after witness swears that during the period in December since the Company adopted its standard, boxes that were loaded so as to faithfully fulfil

the requirements of the last mentioned agreement were docked. The inference, too, is irresistible that during the time the test was being made, a large quantity of stone was in the boxes. During that time there were only 137 docks and 15 fines for stone in the whole of Number 3 Mine. For a similar period in December, when not so much coal was mined, and not so many men were at work, there were 430 docks and 129 fines in the same mine. In Number 2 Mine, the figures are equally striking; while the Company were trying to fix the standard weight, there were only 44 docks and 24 fines; but in the corresponding period in the next month, there were 111 docks and 126 fines.

In the opinion of the Board, the fair way to arrive at the weight of the coal would be on a basis of specific gravity. The specific gravity of the coal from Numbers 2 and 3 mines has been determined and put in evidence. (Exhibits H4 to the minutes of evidence). Referring to the exhibit, it will be found that the specific gravity of coal from Number 3 mine is 1.29, and from Number 2 Mine, is 1.282. In both of these determinations the cubic foot of water was taken as 62.335; therefore, the weight of a cubic foot of solid coal would be 62.335 multiplied by 1.29 for Number 3 mine, and by 1.282 for Number 2 mine, or in other words, 80.41 lbs. for Number 3 mine and 70.91 lbs. for Number 2 mine.

Bearing in mind that 22 cubic feet has been the basis of measurement for at least 25 years at these collieries, the result of the above figures multiplied by 22 should give 1,769 lbs. per box for Number 3 mine and 1,758 lbs. for Number 2 mine.

The Board ordered measurement to be made to determine the cubic capacity of the box used. From those measurements, it was found the box had a cubic capacity of 35.2 cubic feet. On reference to text-books, it is shown that loose bituminous coal weighs 50 lbs. per cubic foot. On this basis a box of coal would weigh 1,760 lbs.—a remarkable confirmation of the accuracy of the former calculation.

A calculation was also made of a box of coal on arrival at the bankhead with the shrinkage amounting to four inches. This was treated as coal moderately shaken—and the text books to which reference has been made give the weight of such coal as 54 lbs. per cubic foot. The box, under these conditions, would weigh 1,650 lbs.; going to show pretty clearly that the old standard was practically correct. Applying this calculation to a level full box arriving at the bankhead, it would give a weight of 1,900 lbs., but the evidence establishes beyond a doubt, that a box level full at the face, as required by the agreement formerly referred to, does not arrive at the bankhead level full.

While there is no doubt that the specific gravity of the coal from Number 3 and Number 2 mines is substantially 1.29 and 1.282 respectively, and the calculation herein based thereon is substantially correct, the Board does not wish to say that the specific gravity has been finally determined by one test. It does, however, wish to say in the most emphatic manner that the accurate specific gravity is the only proper basis for the conversion of box price to tonnage price; and if the price per box has been based on 22 cubic feet of coal in the solid, as it undoubtedly has, its conversion into an equivalent price per ton (of 2,240 lbs.), as shown on the scales, can be arrived at with absolute accuracy.

The Lodge repeatedly during the course of the investigation expressed its willingness to accept the weight as it will be scientifically determined, though indisputably, that weight will be greater per box than has for more than 25 years been the accepted standard. The Board feels that so nearly correct is the determination of weights, namely, 1,769 lbs., for Number 3 mine and 1,758 lbs. for No 2 mine, that it recommends that 1,770 lbs. be taken as standard weight of 22 cubic feet of coal in the solid for both mines. The employees are willing to accept this standard. In making this recommendation, the Board must not be understood as recommending against the continued measuring of

coal won. Measurement should still be made in order to arrive at a fair distribution of earnings among the men.

THE SECOND CASE is in respect to the adoption of a general wage schedule for coal cutters and their loaders. Little difficulty, except in regard to a very few details, was experienced here. The evidence showed conclusively that in May last the matter of a schedule of rates was taken up by the men and management; not only was the principle of a schedule assented to by both interests, but as a result of repeated conferences between the management and a committee of the Lodge, almost every detail of the schedule was agreed to. Speaking more particularly, the schedule was divided into two parts; part one referring to Number 2 Mine and part two to Number 3 Mine. In both parts there were 63 sections. (In the minutes of evidence these sections are referred to as "items," but "section" is the more correct term, and will be followed in this report; "item" being used for a part of a section when necessary). Of these 63 sections, 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 14, 16, 17, 18, 19, 20, 21, 22, 23, 24, with two items excepted, which will be dealt with 25 and 27, with one item excepted also to be dealt with later, 28, 29, 33, 34, 35, 36—the second item of this section 36 "ribbing in" was not agreed to, the management claiming to the committee there would be none of that class of work to do in that lift. The prices asked are the prices for that kind of work in the mine, and should such work be done, it must be paid for at the rate specified). 37, 38, 39. (The same remark as made under 36 applies to the second item of section 39). 40. (Item 3 in this section was objected to by the management. It was not made clear to the Board that timber in this lift was being paid for, and the objection of the management is sustained). 41, 42, 44, 45, 46, 47, 48, 49, 51. (The items "fan holes," "setting up fans," "moving ginny," "stone in pillar cuts for thickness amounting to four inches or over," and "cope ups," were not agreed to, and all of these will be discussed later). 52, 53, 54, 55, 56, 57, 58, 59 and 60 were, ac-

ording to the evidence furnished by the Board, fully agreed upon as the result of the conferences between the committee and the management. The Board would not presume to interfere in matters agreed upon by the parties interested, and desires without further discussion to confirm these sections, subject to the exceptions before referred to and hereinafter to be dealt with, and recommends their adoption.

As to the sections remaining, 31, 32, 62 and 63 should have no place in a wage schedule, and are beyond the scope of this inquiry.

Sections 30 and 61 appear to be entirely superfluous.

Sections 13 and 43, in the judgment of the Board, were inserted to meet possible future conditions. The basis idea in drawing up the schedule is to provide for present day conditions, and such as in the natural course of events will arise within a reasonable time. Taking this view, the Board has not inserted these sections in the schedule it recommends.

Sections 15 and 20. The evidence upon these shows that where old timber was taken out and disposed of by the men and new timber set, they were paid double. As these sections appear in the draft schedule, no reference is made to the disposing by the men of the old timber. The Board has made an amendment which correctly covers prevailing conditions, and with that amendment has inserted the sections in the schedule.

In section 24 there were two items not agreed upon, viz., "ginny and landing" and "moving ginny." Without going fully into the evidence, the Board recommends that "ginny and landing" be struck out, and "moving ginny" be divided into three items, as follows:—

Moving ginny across chute.....	50c.
"    "    down    "    .....	1.00
"    "    up    "    .....	1.50

The item "moving ginny" in Section 51 is to be amended in same way.

The item "cope up" in Sections 27 and 51 will remain as proposed in draft schedule.

To the item "fan holes" and "setting up fan" in this last named section, the

only objection of the management was that in Number 3 Mine there would be no such work. It appears that since the time of the negotiations such work has been done, and that the prices asked are the prices at present prevailing. We have therefore left items as proposed.

There remains now to be dealt with only Section 26 and an item in Section 51. The section is actually the same as the item, the one referring to Number 2 Mine and the other to Number 3. Both deal with the "stone in pillar" question, the proper decision of which has been the only real difficulty in the way of the Board. According to the evidence before us, stone in pillar cuts should be paid for in both mines at the rate asked in draft schedule. But the Board cannot ignore the fact, which is of general notoriety, that a former Board sitting under this Act dealt in a partial form with this question, and made a finding upon it—a finding which has evoked much discussion and some criticism. If this finding had been thoroughly studied and understood, much of this discussion and criticism, in the judgment of the majority of the present Board, would have been spared. The application for the granting of the Board referred to asks for that Board to consider two matters in dispute, with the first of which this Board has no concern. The second matter is set out as follows:

"The nature and cause of the second dispute pending between the said parties is the matter of the question of "local stone." In former years, it has been the custom in this colliery to pay the workmen for all stone occurring in coal in pillar work in thicknesses of four inches and upwards. This "local stone" is now appearing in pillars on the 2,600 level of No. 3 mine, and where the same is of a thickness of four inches and over, the claim is made, and has been made on behalf of the workmen, for payment or allowance for such stone where it exists in pillar work in thicknesses of four inches and over."

It will thus be seen that the general question of stone in pillar cuts was not before the Board appointed in response to that application—*merely the question*

*of stone in pillars on the 2,600 ft. level of No. 3 mine.* The Board that met to hear that matter was presided over by Mr. Justice Graham. Anyone who knows that most capable and careful Judge will know that he would be the last man to go outside the scope of his commission and attempt to deal with subject matters over which he had no jurisdiction.

This Board would not willingly trench upon any ground that had been covered by another Board, but to it nothing can be clearer than that the finding of that Board, of which Mr. Justice Graham was chairman, only applied to No. 2,600 level, No. 3 mine. Indeed, it seems to this Board that such misunderstanding of that finding as had arisen has sprung from the fact that Judge Graham, with his usual care and thoroughness, was not content to make a flat finding that no stone in pillars in No. 2,600 level, No. 3 Mine, was to be paid for, but sought to distinguish the chutes in that level where stone was not to be paid for, from those in the same level where it was. If the Board may without presumption say it, the report of the former Board by itself does not make this distinction quite clear, but reading the report in the light of a subsequent memorandum filed by the Chairman, it is now reasonably certain that that Board decided that stone in pillars off chutes on the 2,600 level, No. 3 mine, west side, being worked at date of former reference, was not to be paid for—the matter of stone anywhere else being left undecided. As we have stated, the evidence before this Board justifies us in holding that stone in pillars, other than in those pillars in regard to which the former Board has decided, should be paid for. In the schedule therefore we recommend for adoption we have left section 26 of draft schedule unchanged. To the item in section 51 of that draft schedule, referring to stone in pillars, we have added the words "saving and excepting stone in pillars off chutes on No. 2,600 level, No. 3 mine, west side, being worked in May, 1907"—the time of the reference to former Board.

Mr. Murray argues strongly that the Company having furnished no statement

in reply to the application, nor called the attention of this Board to the fact that this question of stone in pillars had been in part dealt with by a former Board, it was open to this Board to decide upon that whole question. He would greatly prefer that the exception just above set out should not be inserted, but in the interest of peace and harmony, and recognizing how much more weight will be attached to a unanimous decision, he concurs with the majority in making such exception.

The Board has annexed to this report and marked as "A" the schedule as discussed and largely adopted by the parties. Exhibit "B" is the schedule the Board recommends for adoption.

The Board has not fixed the tonnage prices in the schedule, but has allowed the box prices to remain as they were when the matter was under discussion between the parties. It is a simple matter, when once the standard weight of a box has been established, to make the conversion from box to tonnage price.

It was proved to the Board that in June last, and when the schedule was under discussion between the Committee of the Lodge and the management, Mr. Cowans, General Manager of the Company, desired the following clause to be inserted in the schedule:—

"Nothing herein contained is to be construed to prevent either party hereto from making any application under the Industrial Disputes Investigation Act, 1907."

The Board does not feel that such a clause is essential, but sees no objection to having it inserted in the agreement, prefixed to the schedule, if the Company still desires it.

The Company having furnished no statement in reply to the application, the Board in making this report has therefore to rely wholly upon the evidence furnished by the Lodge. In so far as the schedule is concerned, from the evidence and documents before the Board, it is impossible to conceive that any evidence could have been adduced by the Company to deny that the principle

of a schedule had been concurred in between the parties, and that a very large proportion of the sections and items therein had been adopted.

The employees have for a long time been complaining that without a schedule no one could tell whether he was being paid according to the current rate of wages or not—that often in want of such schedule, work was done at lower rates than those established by agreement or otherwise, and then the Company sought to make these lower rates the standard. On the other hand, the Company (See the telegram of their solicitor to Mr. Donkin already referred to) complain that the men were constantly asking for increases and special allowances. Surely nothing more is needed than comparison of the respective attitudes of the parties to show clearly the absolute necessity for a schedule. It seems clear to the Board that if in the past a schedule of wages had been in operation in the Springhill collieries, very much of the friction and unpleasantness which has so frequently occurred there between the Company and its employees would have had no existence.

In the agreement prefixed to the schedule, it will be observed no time is mentioned. It is the desire of the men (See evidence of Seaman Terris, at page 64) that it should remain in force so long as the present working places continue, i.e., according to his estimate, five years. It seems to the Board that five years is rather too long a time for which to make a fixed schedule, but it would recommend that three years be the term adopted.

The minutes of evidence taken and the exhibits therein referred to accompany this report.

All of which is respectfully submitted.

(Sgd). GEORGE PATTERSON,  
*Chairman.*

R. B. MURRAY,  
HIRAM DONKIN.

Halifax, Jany. 18th., 1908.

**Documents Mentioned in Report.**

(The documents referred to in the report and attached thereto are printed below.)

**TELEGRAM.**

January 10th, 1908.

To Hiram Donkin,  
Springhill, N. S.:

Have fully discussed schedule with General Manager. He says hard and fast schedule in place like Springhill is unworkable. If seams were regular and of equal thickness all through, and no local disturbances or extra grade or pressure something like Cape Breton or the seams of the United States, it would not be as difficult to make a schedule, but the men are constantly asking for consideration for various causes, which the management always consider if anything like a case is made—Schedule would only bind the Company; there could be no adjustment if conditions improve, but only advances if the men considered that they have grounds for extra payment; every man's rate is scheduled in his monthly account. There is no dispute about rates between the Company and the men except when the men make demands for extra payment, and clearly are not supported by existing conditions. Schedule means maximum rates of to-day the minimum rates of the future. The schedule of rates in Springhill are those in existence on the 31st July last; they cannot be disturbed except by approval of the President and Directors of this Company. A schedule properly and honestly prepared would leave open so many rates to be governed by local conditions that it would be practically worthless.

HECTOR McINNES.

SPRINGHILL, N. S., Jan. 9th, 1908.

H. McInnes, Esq., K. C.,  
Solicitor, Cumberland Railway & Coal  
Company.

Dear Sir:—

Referring to my two telephone communications with you to-day, I beg to repeat what I then said, that I have

fully discussed, with a representative committee of the men the Schedule of wages they propose. They assure me positively that it is based upon the present prices prevailing in the colliery; that they would greatly prefer to have it fixed and agreed upon by both parties through conference with each other, than to have it settled by any Board of outsiders; that though they maintain nearly all the items have been already determined upon, they are prepared to make modifications on various lines if by so doing they can meet views of Company. The Board feels very strongly that if the matter could be so settled by men and management without its intervention, it would be a most decided step in the right direction. They would suggest that if the management will favorably consider the principle of a schedule and consent to meet with the men in an attempt to fix that schedule, they would adjourn only to reconvene if no agreement should be reached, and then only to consider such items as could not be agreed upon.

Please let me have your reply by wire at the earliest possible hour to-morrow morning, and greatly oblige,

Yours very truly,

(Sgd.) HIRAM DONKIN.

Memo. of Conference held at Springhill, August 19th, 1890, at the Royal Hotel, between the Committee of Pioneer Lodge and Mr. H. Swift, representing the Cumberland Railway & Coal Co.; present, Hon. W. S. Fielding and E. Gilpin, jr.

Respecting the agreement in the matter of stone dockage, it is agreed that the maximum of stone be 24 lbs. per box. If over 24 lbs., a fine of 20c. to be imposed; if over 45 lbs., the box to be forfeited.

Concerning short measure, it is agreed that doubtful boxes be weighed, and if under 1,650 lbs., the deficiency be deducted in proportion to the allowance for the whole box.

The memorandum of grievances submitted to Mr. Swift on Monday night is

accepted by him, and he agrees to remedy the complaints.

It is agreed in the matter of pillar stone, that when, and so long as the stone exceeds four inches in one, two and two, or three and one plies, it will be paid for at the rate of 4c. per inch. This to be put on the box price.

It is agreed that in closed places, the price for all stone will be at the rate of 5c. per inch.

The case of Taylor to be considered part of the grievances submitted last night.

The Committee guarantee that upon a settlement upon the foregoing basis, the strike will come to an end and all hands resume work, and the pumps commence working, provided that the Committee are to have liberty to go into the Lodge at once and to ascertain if there are any matters that they have omitted at present. If so, such matters are to be presented to Mr. Swift immediately, and if they are considered to be unreasonable, he is to be at liberty to withdraw his offer, and the whole matter to stand as before.

(Sgd.) H. SWIFT,  
Cumberland Ry. & Coal Co.  
A. D. FERGUSON,  
Pioneer Lodge.

(Sgd.) E. GILPIN, jr.,  
Inspector of Mines.

LIST REFERRED TO.

David Conn case, what he was discharged for, whether it is lawful to take him away from engine when men are in the mine.

John Larkins, discharged for refusing to work 10 days in the week; worked nine days.

No men to be discharged for going in jail one day.

All loaders to be paid \$1.25 per day, not to apply to loaders who bum.

Robert Fraser work James Burns.  
Crooked rails, sleepers and cap pieces.  
Uncivil replies from petty officials.

Pay scrips to be adjusted.  
All miners to put in their time.

Checkweighmans' pays to be stopped.

The body of workmen to defend Company in case of dispute.

Text of Suggested Agreement.

MEMORANDUM OF AGREEMENT

made this \_\_\_\_\_ day of January, 1893, between the management of the Cumberland Railway & Coal Company and the employed in the Springhill Collieries of said Company, in respect to filling of boxes.

- 1st. That all boxes be properly filled level full at the face.
- 2nd. That the management see that all boxes are properly filled level full at the face.
- 3rd. That the contents of all boxes reaching the bank, below six inches of level full, be docked for short measure.
- 4th. That the Bankhead Foreman, and Checkweighman, determine all deductions for short measure.
- 5th. That this agreement be registered in the Commissioner of Mines' Office, Halifax, N. S.

AGREEMENT, made and entered into, this \_\_\_\_\_ day of \_\_\_\_\_ in the year of Our Lord, one thousand nine hundred and eight:—

BETWEEN Pioneer Lodge No. 1, P. W. A., (represented by the Managing Committee of said Lodge) of the one part, and The Cumberland Railway & Coal Company, Limited, of the other part:—

The parties hereto, believing that a working basis should exist between them governing the different classes of work pertaining to the mining of coal in Springhill, and that such basis would tend to create peace in the industrial life of the town, the following schedule of rates has been drawn up, to which the said parties have assented.

IN WITNESS WHEREOF, the said parties have hereunto set and subscribed their hands and respective seals the day and year first above written.

CUMBERLAND RAILWAY AND COAL COMPANY, LTD.

COAL CUTTING PRICES AND OTHER RATES.

No. 2 Mine.

1. 2400 ft. level, East Aberdeen Tight work, 10 feet wide, 32c. per box per ton and \$1.00 per yard.  
Ribbing in bords, 35c. per box per ton and 75c. per yard.  
Drawing pillars, (including railroad pillar) 35c. per box per ton.
2. Halfway level, East Aberdeen Tight work, 10 feet wide in Main level, 32c. per box per ton and \$1.00 per yard. Above Main level, 32c. per box per ton and 75c. per yard.  
Drawing all pillars, 35c. per box per ton.
3. Halfway, straight in, seam east and west of tunnel, Main level, 10 feet wide, 35c. per box per ton and \$1.00 per yard.  
Above Main level, 32c. per box per ton and 75c. per yard.  
Drawing all pillars, 35c. per box per ton.
4. Halfway, Minto seam, east and west, Tight work, 10 feet wide above level, 35c. per box per ton and 75c. per yard.
5. Tight work in level, 32c. per box per ton and \$1.00 per yard.  
Drawing all pillars, 35c. per box per ton.
6. Aberdeen, lower level, East Tight work, 10 feet wide, 32c. per box per ton and 75c. per yard.  
Drawing all pillars, 35c. per box per ton.
7. Aberdeen, lower level, west to fault Tight work, 10 feet wide, 32c. per box per ton and 75c. per yard.  
Drawing all pillars, 35c. per box per ton.
8. Number 5 sinking, 34 chute to No. 2 slope, 32c. per box per ton and 75c. per yard.
9. Number 2 sinking, east and west to fault, Tight work 10 feet wide, 35c. per box per ton and \$1.00 per yard.
10. Number 2 sinking, from 34 chute to fault, 35c. per box per ton and \$1.00 per yard.
11. Halfway level, west Aberdeen, Tight work 10 feet wide, 32c. per box per ton and 75c. per yard.  
Drawing all pillars, 35c. per box per ton.
12. In all sections, when state of roof renders it necessary to boom pillar cuts, all booms with props paid for on authority of Examiner.
13. In all sections, timber set in pillar cuts, above 40 feet, paid for.
14. In all sections, tight work, 8 feet wide, 25 cents per yard over level rate, and tight work, 6 feet wide, 50 cents per yard over level rate.
15. In all cases where re-timbering has to be done, the extra timber to be paid for. Where old timber is taken out and new timber set, paid double.
16. For bord, heads and pillars, all timber to be placed on the nearest landing, by the Company.
17. All timber to be paid for in up-hill tight work, when carriage exceeds 40 feet.
18. First tight cut in pillars to be paid yardage.
19. All timber to be paid for in levels and heads off main levels.
20. When Company supplies the timber, two props and one sill to be paid for in each set; and if only two props are used, one prop only to be paid for. All timber to be paid for when cutters supply their own timber.
21. Ladders, not exceeding 10 ft. long, \$1.00 each.  
Props . . . . . .10 "  
Split Booms . . . . . .15 "  
Common booms . . . . . .25 "  
Slope booms . . . . . .50 "  
Iron booms . . . . . .50 "  
Long stays . . . . . .20 "  
Short stays . . . . . .10 "  
Long sills . . . . . .15 "  
Short sills . . . . . .15 per pr  
Running booms with props to be paid double.

22. High coal seam  
Board batteries . . . . . \$1.50  
Battery of split booms . . . . . 1.50  
Battery of split booms, with cleck . . . . . 2.  
Battery of common booms . . . . . 3.00  
Boarding chute to roof . . . . . .45 per yard  
Boarding, 3 or 4 feet high . . . . . .25
23. Low coal seam  
Battery . . . . . .50  
Boarding chute to roof . . . . . .25 per yard.  
Boarding chute, 1 foot high . . . . . .10 "  
Boarding chute, 2 feet high . . . . . .15 "
24. Steps . . . . . .05 each  
Laying sheets 6 ft. long in all places . . . . . .25 "  
Laying permanent roads in slants . . . . . .20 per yard,  
Laying roads in tight bords (when cutters carry the rails) . . . . . .10 "  
Laying roads when ribbing in (when cutters carry the rails) . . . . . .10 "  
Relaying road in old bord (when cutters carry the rails) . . . . . .20  
Building chute mouth . . . . . 2.00  
Landings . . . . . 1.45  
Ginny and landing . . . . . 3.00  
Moving ginny . . . . . 1.50  
Fan holes . . . . . .50 & \$1 each.  
Setting up fan . . . . . 1.00 each  
Boring holes for water or gas . . . . . .20 per foot.  
Rebuilding ginny when broken or worn out . . . . . .50
25. Stone in tight work and ribbing in, 4 inches in thickness and over, 5 cents per inch per lineal yard.
26. Stone in pillar cuts, 4 cents per inch per lineal yard, for thicknesses amounting to 4 inches or over
27. Cope ups, \$0.50, \$1.00 and \$1.50.  
Brushing roof or pavement with free dynamite 60c. per inch.  
Overpush, for every 100 feet or part thereof after the first 350 feet, 2c. per box.
27. Cutter's day's pay for Company work, when taken out of his place, \$2.00.  
Cutter's loaders' rate, per day, \$1.25.  
Falling stone:  
Payment according to conditions, by mutual agreement with Examiner.  
Pushing down coal:  
Cutters to put coal down the first 40 feet, in unusual places, or if the pusher down is absent, payment may be made by mutual agreement with the Examiner.  
Miscellaneous jobs:  
Such as crossing stone heads, repairing, cleaning up old bords, building platforms, boarding high side to hold the rib, etc., to be paid \$2.00 per day, or by mutual agreement, according to conditions.
28. An additional 22% is paid on all rates in this schedule.
29. Changes in the state of the coal, faults, and other unusual conditions to be dealt with as they arise.
30. All agreements now in force and understood to be continued and carried through as specified therein.
31. All persons who leave the mines and again return will be considered new hands unless they previously obtain leave of absence from the management, and notify the lodge.
32. Persons, who having entered the mine and are given no job, or if they cannot work, shall be allowed to return to bank, by way of entrance, between 7 and 10 a.m.

No. 3 Mine.

33. 2,600 Lift, west side  
Tight work 10 feet wide, 33c. per box per ton and \$1.00 per yard.  
Ribbing in, 38c. per box per ton and 50c. per yard  
Drawing pillars, 38c. per box per ton.  
Railroad pillar, 36c. per box per ton and allowance for starting cuts.  
The above prices to be subject to change as work progresses outwards to bottom.

34. 3,200 Lift, west side.  
Tight work, 10 feet wide, 36c. per box per ton and 50c per yard.  
Ribbing in, 36c. per box per ton and 50c. per yard.  
Drawing pillars, 36c. per box per ton.  
Railroad pillar, 36c. per box per ton.  
The above prices to be subject to change as work progresses outwards to bottom.
35. 3,800 Lift, West side.  
From Main slope to 200 ft. inside.  
No. 8 slant.  
Tight work 10 feet wide, 43c. per box per ton and \$1.00 per yard.  
200 ft. inside No. 8 slant, inward, 38c. per box per ton and 75c. per yard.
36. -3,800 Lift, east side, top seam.  
Top seam, 43c. per box per ton and \$1.25 per yard.  
Ribbing in, 43c. per box per ton and \$1.25 per yard.
37. 3,800 Lift, east side, under seam, uphill work, 40c. per box per ton and 50c. per yard.  
Bords and levels, 40c. per box per ton and 75c. per yard.
38. Number 3, sinking.  
Crossheads and uphill work to be paid \$2.00 per day.
39. 3,200 ft. Lift, East side, top seam.  
Tight work 10 ft. wide, 43c. per box per ton and \$1.25 per yard.  
Ribbing in, 43c. per box per ton and \$1.25 per yard.
40. 3,200 ft. Lift, East side, under seam.  
Tight work 10 ft. wide, 37c. per box per ton and no yardage.  
Ribbing in, 37c. per box per ton and no yardage.  
All timber to be paid for.
41. In all sections, tight work 8 feet wide, 25 cents per yard over level rate, and tight work 6 feet wide, 50 cents per yard over level rate.
42. In all sections, when state of roof renders it necessary to boom pillar cuts, all booms with props to be paid for on authority of Examiner.
43. In all sections, timber set in pillar cuts above forty (40) feet, to be paid for.
44. For bords, heads and pillars, all timber to be placed on the landing by the Company.
45. All timber to be paid for in uphill tight work in heads, when carriage exceeds forty feet.
46. All timber to be paid for in levels, heads, chutes and balances off main levels.
47. First tight cut in pillars to be paid yardage.
48. When Company supplies the timber, two props and sill in each set to be paid for; if only two props are used, one prop to be paid for. All timber to be paid for when cutters carry their own timber.
49. Running booms with props to be paid double.
50. In all cases where re-timbering has to be done, the extra timber to be paid for. Where old timber is taken out and new timber set, paid double.
51. Props, 10 cents each. Split booms, 15 cents each. Common booms, 25 cents each. Slope booms, 50 cents each. Iron booms, 50 cents each. Long stays, 20 cents each. Short stays, 10 cents each. Long sills, 15 cents each. Short sills, 15 cents per pair. Stringers for stepping, 10 feet long, 15 cents each. Stops, 5 cents each. Fan holes, 50 cents and \$1.00 each. Setting up fan, \$1.00. Building chute mouth, \$2.00. Landings, \$1.45. Moving ginny, 55 cents, \$1.00 and \$1.50. Rebuilding ginny when broken or wornout, 50 cents. Bore holes for water or gas, 20 cents per foot. Building ladders, not exceeding 10 feet long, \$1.00 each, or exceeding 10 feet, in proportion. Stone in tight work and ribbing in, 4 in. in thickness and over, 5 cents per inch per lineal yard. Stone in pillar cuts, for thicknesses amounting to 4 inches or over, 4 cents per inch per lineal yard. Laying permanent roads in slants, 20 cents per yard. Re-laying road in old bords, when cutters carry rails 20 cents per yard. Laying road in tight bords, when cutters carry rails, 10 cents per yard. Laying road when ribbing in, in each case when cutters carry rails, 10 cents per yard. Brushing roof or pavement with free dynamite, 7 cents per inch per lineal yard. Laying sheets 6 feet long, in all places 25 cents each. Overpush, for every 100 feet or part thereof, after the first 350 feet, 2 cents per box. Cope ups, 50 cents, \$1.00 and \$1.50. Cutters' rate for Company's work, when taken out of place, \$2.00 per day. Cutters' leaders' rate, \$1.25 per day.
52. Pushing down coal.  
Cutters to put coal down the first 40 feet.
53. In unusual places, or when the pusher down is absent, payment may be made by mutual agreement with the Examiner.
54. High Coal Seam.  
Boarding chute to the roof, 35c. per yard.  
Boarding 3 or 4 feet high, 25c. per yard.  
Strapping up with props, 10c. per yard.
55. Low Coal Seam.  
Boarding chute to roof, 25c. per yard.  
Boarding 1 foot high, 10c. per yard.  
Boarding 2 feet high, 15c. per yard.
56. Batteries, \$1.00 each.  
Batteries, (with checks) \$1.50 each.
57. Falling stone.  
Payment according to conditions by mutual agreement with the Examiner.
58. Miscellaneous Jobs.  
Such as crossing stone heads, repairing, cleaning up old bords, packs, building platforms, boarding high side to hold the rib, etc., \$2.00 per day (or by mutual agreement, according to conditions).
59. An additional 22% is paid on all rates in this schedule.
60. Changes in the state of the coal, faults, and other unusual conditions, to be dealt with as they arise.
61. All agreements now in force and understood, to be continued and carried through as specified therein.
62. All persons who leave the mines and again return will be considered new hands, unless they have previously obtained leave of absence from the management, and notified the lodge.
63. Persons, who having entered the mine and are given no job, or if they cannot work, shall be allowed to return to bank by way of entrance, without undue delay, and between 7 and 10 a.m.

AGREEMENT made and entered into this day of \_\_\_\_\_ in the year of Our Lord, one thousand nine hundred and eight:—

BETWEEN Pioneer Lodge No. 1, P, W. A. (represented by the Managing Committee of said Lodge) of the one part, and The Cumberland Railway & Coal Company, Limited, of the other part.

The parties hereto, believing that a working basis should exist between them, governing the different classes of work pertaining to the mining of coal in Springhill, and that such basis would tend to create peace in the industrial life of the town, the following schedule of rates has been drawn up, to which the said parties have assented.

IN WITNESS WHEREOF, the said parties have hereunto set and subscribed their hands and respective seals the day and year first above written.

### III.—DISPUTE BETWEEN GRAND TRUNK RAILWAY COMPANY AND ITS TELE- GRAPHERS—AGREEMENT ON ALL POINTS EFFECTED BEFORE BOARD.

THE Department received on January 23 the report of the Board established to deal with the differences between the Grand Trunk Railway Company and the telegraphers employed on its system. The report was in effect an agreement on all points of differences, signed by representatives of both parties.

The application in connection with this Board was received in the Department on November 19, from Mr. W. G. Brownlee, General Transportation Agent of the Grand Trunk Railway Company. The number of persons affected by the dispute was estimated at five hundred. The differences related to wages, hours and conditions of labour, and were set forth in the form of schedules presenting the claims of the Company and the men respectively. The Board was duly established, being constituted as follows: namely, Mr. J. G. O'Donoghue, Toronto, recommended by the employees; Mr. Wallace Nesbitt, K. C., Toronto, recommended by the employing company; and Professor Adam Shortt, Kingston, Chairman, appointed on the joint recommendation of the foregoing members. The Board began its sessions on December 4 at Toronto, and continued until the evening of December 7. Several matters remained still to be adjusted when the Board adjourned, these relating especially to increase of wages, allowance for overtime for Sunday work, posting of seniority list and the announcement of the vacancies on the district as they occur. The Board met again to consider these and other matters on December 11 and 12 at Montreal. At this meeting, the general principles of the agreement were agreed on, but certain details were left

for settlement between the officers of the railway and the committee of the telegraphers. These details proved more difficult of adjustment than had been expected, and further meetings of the Board took place on January 10 and 13 resulting in the signing of an agreement on the last named date. In the course of the discussions which took place before the Board, certain general considerations affecting the ability of the railways to pay increased wages were brought out which were deemed by the Board to be of sufficient interest to be placed on record in their report and included therein. These considerations, printed below, form a valuable contribution to the current discussion of industrial and social problems.

The agreement effected provides that the rules and rates of pay governing agents and telegraphers, effective June 1, 1905, shall remain in force subject to certain stated changes relating to rate of pay for work performed on holidays, and to the following conditions: "An increase of ten per cent, in minimum rates and fixed salaries of less than \$47.00 per month, where total salary from all sources does not exceed \$60 per month, and not included in the apportionment of \$10,000 per annum for specified offices in accordance with recommendations of superintendents. Salary of relieving agents to be \$75 per month, effective January 1, 1908, and thereafter subject to ninety days' notice of change."

#### Report of the Board.

The full report of the Board is as follows:—

Memorandum of agreement between the Grand Trunk Railway and a Committee representing the Telegraphers on lines east of the Detroit and St. Clair Rivers.

Rules and rates of pay governing Agents and Telegraphers, effective June 1st, 1905, to remain in force, with the following exceptions.

Article 13 to be changed to read as follows:—

"Telegraphers required to work on Sundays or the following legal holidays, viz., New Year's Day, Dominion Day, Labor Day, and Christmas Day, except to meet regular passenger trains, will be paid extra for such work pro rata on schedule salary based on a thirty day month (less than thirty minutes not to be counted over thirty minutes, and less than sixty minutes to be counted as one hour) with a minimum compensation of twenty-five cents for each call for which one hour service shall, if necessary, be rendered. This rule not to apply to Telegraphers receiving the main line minimum or in excess thereof and when the overtime allowed brings the monthly pay to the main line minimum rate that station shall be considered a regular Sunday office, and the Main Line minimum shall constitute the Telegrapher's pay for that station."

An increase of ten per cent in minimum rates and fixed salaries of less than \$47.00 per month, where total salary from all sources does not exceed \$60.00 per month, and not included in the apportionment of \$10,000.00 per annum for specified offices, in accordance with recommendations of superintendents.

Salary of relieving Agents to be \$75.00 per month.

Effective January 1st, 1908, and thereafter subject to ninety days' notice of change.

January 13, 1908.

The Board were much pressed by the suggestion that the same Board had recommended a higher rate of pay to the Telegraphers in the service of the Canadian Pacific than they were prepared to recommend in the present instance. We

are glad to be able to report that the parties appreciated the reasons why the members of the Board could not in this instance see their way to the recommendation of any higher rate than that finally agreed upon between the parties, and we desire to put upon record some of the reasons why we came to this conclusion.

We thought, under the present conditions, that the offer of the Company in the matter of increase of wages was all that could be justified. There are many considerations entering into the question. In our view, there is the right of the men to receive a living wage, and that right is paramount. The workmen is entitled to get a fair day's wage for a fair day's work. What, however, often seems to be ignored is that capital, and labour are both necessary in order to produce a profit, whether it is in the operation of railways, in manufacturing, or in any other branch of trade. The aim of the worker should be to secure a fair share of this profit. But there is also to be considered the position of the men who advance the money to enable the undertaking to be carried on, which gives employment; he, too, is entitled to receive a return for his money and his risk. A hundred millions of the capital stock of the Grand Trunk Railway receives no dividend whatever. If such dividends on the preferred stock as are now being paid are still further reduced by the wages bill being increased, what must necessarily follow? The Company cannot obtain further money for expansion, for it can be more remuneratively employed in other undertakings. This certainly would be a disadvantage to the vast numbers who find employment on railways. Then there is the constant demand of the public for the betterment of the service and equipment, for increase of facilities, the bettering of the roadbed, and general improvement in the accommodations. These can only be obtained where the parties asked to advance the money can see some possibility of return for the advance. Our experience on a number of these Boards has led us to the conclusion that there seems to be an oversight on the part of the public on two things; first, that there is a continual

demand for an increase of expenditure upon the part of the Company for facilities, and second, a continual demand for a reduction of the tariffs which furnish the monies necessary to provide these facilities and accommodations. The growth of earnings is not keeping pace proportionately with the growth of expenses. If the operating expenses and the wages to employees must be increased from time to time, and the public so demand, very serious considerations must be given to proposals for the reduction of freight and passenger rates, inasmuch as every reduction directly affects the ability of the railways to pay the wages asked by their employees. There is no doubt that the cost of living has greatly increased, and that the employees of a railway company are entitled to be better compensated to meet such increased cost, but surely they are not entitled to be compensated at the sole expense of people who have invested their money, and who would in turn be deprived of their means of livelihood. The public should bear their share. The railway employee spends his money for the benefit of every other member of the community, from farmer to manufacturer, and if the employee has to obtain more money to meet his increased cost of living, other classes of the community who receive the benefit of the money he spends should contribute their share towards enabling him to get the money he has to spend, and it is for the foregoing reasons that, under the present conditions, and having in view all the surrounding circumstances, we thought that the offer of increase made by the officials of the Grand Trunk Railway Company had gone as far as could be justified, though not necessarily to the limit which the Telegraphers ought to receive

under other circumstances. The deterring of the investment of capital in railway undertakings would certainly not be a benefit to the community at large, and if the property of lenders is to be practically confiscated between the demand of the public on the one side and the demand of the employees on the other, it must lead to a general reduction in wages or a shrinkage in the number of employees, with a much greater ultimate loss to labour. It has been suggested that this state of affairs be met by the state becoming sole owner of the railways. To accomplish this, the capital necessary to make railways and work them would still have to be found. The mere fact of state ownership does not bring capital down from the skies like the manna to the Israelites in the desert. If borrowed by the state, interest must be paid for it, and probably at a higher rate than the state now has to pay, for two reasons; first, because of being larger borrowers; second, because of the risk incident to industrial undertakings. If raised by taxation, this would be nothing more than getting it from the collective resources of the country. The wages, other than the living wage before referred to, which are paid by railway companies to their employees must, therefore, disguise it as we may, depend upon what a company earns after the interest on capital employed is paid. This may equally be said of all industrial and commercial undertakings, and no amount of vague, philanthropic talk can alter this fact any more than it can alter the act that two and two make four.

J. G. O'DONOGHUE.

**IV—CONFLICT BETWEEN TWO TRADE UNIONS COMES INDIRECTLY  
BEFORE A BOARD IN THE DISPUTE BETWEEN THE C.N.R. AND  
CERTAIN EMPLOYEES—AGREEMENT EFFECTED.**

THE Department received, on January 25, a report of the Board established to deal with the differences between the Canadian Northern Railway and certain of its employees, being engine-men, firemen and hostlers, members of the Brotherhood of Locomotive Firemen and Enginemen. The Board reported that an agreement had been effected under date of January 18. The application in connection with this dispute was received in the Department on December 19. The number of employees concerned was estimated at 359, and the Board, as established, was constituted as follows: Mr. J. G. O'Donoghue, Toronto, recommended by the employees; F. H. Richardson, recommended by the employing company, and Professor Shortt appointed in the absence of a joint recommendation from Messrs. O'Donoghue and Richardson. The differences were stated to be, first, the discrimination alleged to be employed in the engine services of the employing company; second, the alleged setting aside by the employing company against the wishes of the Brotherhood of Locomotive Firemen and Enginemen, of a general schedule said to have been made between the Brotherhood of Locomotive Engineers and the Brotherhood of Locomotive Firemen and Enginemen on the one hand, and the officials of the Company on the other, and put into effect on June 1st, 1907.

**Nature of the Dispute.**

The Chairman of the Board, in an interesting letter accompanying the document constituting the agreement, explained in some detail the nature of the differences to be adjusted. "This difficulty," writes Professor Shortt, to the Department, "was by no means of the usual type, since there was no question as to wages, overtime, hours and other characteristic features of railway labour disputes. Although technically this was a dispute between the Canadian Northern

Railway Company and the members of the Brotherhood of Locomotive Firemen and Enginemen, it was in reality a test case in a continental conflict between two trades unions—the Brotherhood of Locomotive Engineers, and the Locomotive Firemen and Enginemen, the former composed entirely of engineers and the latter of engineers and firemen. The difficulties between these unions are very complex and far-reaching, and cannot be detailed here. The immediate cause of the present dispute was the fact that the B. of L. E., had secured from the C. N. R. Co., an engineer's schedule, giving to the officials of that union certain exclusive privileges in connection with the presentation to the officers of the railway company of the grievances of engineers. The same privileges were demanded by the officials of the B. of L. F. & E., and because the company in view of its agreement with the B. of L. E., declined to grant these in the Firemen's schedule, there was threatened trouble, resulting in an application for a Board of Conciliation. Owing to the strong rivalry between the two unions if the dispute between the B. of L. F. & E., and the railway company were settled to the satisfaction of the former, without any reference to the B. of L. E., the latter would undoubtedly have made trouble with the company. In order to effect a satisfactory settlement, therefore, it was necessary that the representatives of the B. of L. E., should be admitted to the hearings before the Board, and allowed to present the claims of their order."

The Chairman's letter closes with the following tribute to the attitude to each other and to the Board respectively of the parties to the dispute: "I cannot close my summary of this case without expressing an appreciation of the tolerant and moderate spirit displayed, under trying circumstances, by the various parties to this difficult and far-reaching dispute, and the able manner in which the

officials, Canadian and international, of the two unions presented their respective cases. The fair and accommodating spirit shown by the representatives of the railway company also contributed very materially to the settlement arrived at."

The text of the letter referred to above, and constituting the basis of agreement, is as follows:

THE CANADIAN NORTHERN RAILWAY COMPANY.

TORONTO, 18th January, 1908.

C. A. Boyd, Esq.,  
Gen. Chairman, B. of L. F. & E.,  
Winnipeg, Man.

Dear Sir:—

There are two ways in which an engineer who considers that he has a personal grievance may bring his case before the proper officials.

He may either come with a committee that represents a majority of the engineers on the road, and this committee shall be entitled to present his case, and bring such witnesses as are necessary to throw light upon the matter in dispute; or

He may bring with him such engineers as he may select to present his case and such witnesses as may throw light upon the dispute, the engineers selected being considered by the Company as the personal representatives of the engineer having the grievance.

In both cases, the party having a grievance has the right of appeal to the higher officials of the Company.

Yours truly,

(Sgd.) W. H. MOORE,  
*Secretary.*

A. SHIELDS,  
*Master Mechanic.*

Accepted.

(Sgd.) C. A. BOYD,  
*Genl. Chairman.*

W. F. METCALF,  
*Secretary.*

J. C. O'DONOGHUE,  
F. H. RICHARDSON,  
*Members of Board of Conciliation.*

V.—DISPUTE BETWEEN GRAND TRUNK RAILWAY COMPANY AND ITS CARMEN REFERRED TO A BOARD.

THE Department received, on January 8, an application on behalf of the carmen in the employ of the Grand Trunk Railway Company of Canada, being members of the Brotherhood of Railway Carmen of the United States and Canada, for the establishment of a Board of Conciliation and Investigation for the adjustment of the differences between the parties named. The application was signed by S. M. Nichols, of Niagara Falls, Ont., chairman of the Joint Protective Board of the Brotherhood named, and by E. Rogers, Ottawa, chairman of the local board of the Brotherhood. The number of employees directly affected by the differences was estimated at 800. The differences relate to rules and regulation of hours and wages, the demands of the em-

ployees with respect to all of which were set forth in a schedule marked "Schedule A," attached to the application and representing, among other changes demanded, an increase in wages. The employing company, in reply to the application, stated that the Company did not see its way to agreeing to the demands of the employees as set forth in "Schedule A," and in lieu of the same, presented for the approval of any Board that might be established "the regulations and rules to be observed by all workmen in motive and car shops," as set out in a pamphlet attached to the statement in reply; and it was submitted these were reasonable and just, and should be adopted. Concerning the rates of pay, it was submitted by the Company that the Company was not in a position

to accede to the demands contained in the schedule, and that the rates of pay and wages now in force respecting the employees concerned in the application were proper and fair, and should not be increased or altered.

The Board demanded was duly established by the Minister, being constituted as follows: Mr. J. G. O'Donoghue, To-

ronto, recommended by the employees; Mr. Wallace Nesbitt, K. C., Toronto, recommended by the employing company, and Professor Adam Shortt, Kingston, Ont., recommended by the foregoing members of the Board. It was understood that the Board would begin its investigation on February 25.

#### VI.—A SECOND DISPUTE AT COBALT REFERRED UNDER THE ACT.

ON January 11, the Department received an application on behalf of the engineers, miners and labourers in the employ of the Temiscaming and Hudson Bay Mining Company of Cobalt, the same being members of No. 146, Western Federation of Miners, Mining Department of the Industrial Workers of the World, for the establishment of a Board of Conciliation and Investigation for the adjustment of differences between the parties named. The application was signed by Mr. James McGuire and Mr. A. L. Botly, President and Secretary respectively of Local 146 Western Federation of Miners. The number of employees affected by the differences was estimated at 50, and the causes of differences were said to relate to wages and hours. The employing company, it was stated in the application, had, on December 16, 1907,

notified the men that there would be a reduction of 25 cents per day on each man, from the schedule of wages paid up to that time. A copy of the schedule previously paid, being the wages schedule adopted by the Cobalt Miners' Union, No. 146, in July last, was attached to the application.

The Board was duly established by the Minister, being constituted as follows, namely: Mr. C. B. Duke, Cobalt, Ont., recommended by the employees; Mr. M. F. Pumaville, New Liskeard, Ont., recommended by the employing company, and Professor S. J. MacLean, Toronto, appointed by the Minister in the absence of a joint recommendation from the foregoing members. The Board was finally constituted on January 31, and it was expected that the enquiry into the dispute would take place during February.

#### VII.—DIFFERENCES BETWEEN HAMILTON STREET COMPANIES AND THEIR EMPLOYEES REFERRED TO A BOARD.

ON June 23, the Department received an application on behalf of the employees of the Hamilton Street Railway Company, Hamilton and Dundas Railway and Hamilton and Burlington Radial Railway Companies, the said employees being motormen, conductors, shopmen, linemen, machinists and blacksmiths, members of Division No. 107, Amalgamated Association of Street and Electric Railway Employees of America, of Hamilton, Ont. The application was signed by Messrs. George Armstrong, and John Theaker. The number of employees affected was estimated at 120

directly, and 25 indirectly. The differences referred under the Act arose out of agreements between the various employing companies named and the Union representing the employees, the said agreements being awards of the Ontario Railway and Municipal Board, which were the basis of settlement of a strike somewhat more than a year ago. "Ever since the agreements were made," recites the statement accompanying the application, "company officials have used much artifice and indulged in coercion, discrimination and favouritism to prevail upon employees to abandon the

Union, the agreements and conditions thereof. Numbers have been discharged from the service primarily because of their membership in the Union." The statement goes on to state that Conductor John Theaker, president of the Union, was discharged on January 7, 1908, and the applicants claim that in this discharge the management had violated the agreement. In various other ways it was alleged, the companies had shown "wanton discrimination and aggravating

partiality on the part of company officials against membership in the Union, and in utter disregard for the said working agreements and conditions thereof." Mr. J. G. O'Donoghue, Toronto, was recommended on behalf of the employees for appointment to the Board, and was accordingly appointed by the Minister on January 31. A recommendation on behalf of the employing companies had not been received at the close of the month.

#### VIII.—DIFFERENCES BETWEEN THE DOMINION COAL COMPANY AND ITS EMPLOYEES REFERRED TO A BOARD.

THE Department received, on January 29, an application signed by Stephen B. McNeil and Sylvanus K. Nicholson, Grand Master and Grand Outside Watch respectively of the Provincial Workmen's Association of Nova Scotia, on behalf of various lodges of the Association, for the establishment of a Board of Conciliation and Investigation to adjust differences between the said lodges and the Dominion Coal Company, Limited. The lodges named are as follows: Golden Rule, Kimberley, Unity, Steadfast, Olive, Equity, Bay View, Wilson, Independence, Queen, Aberdeen, Power, Keystone, Ironsides and Island. An approximate estimate of the number of employees involved places the figure at 7,000. The matters in dispute are set forth as follows:—

"The nature and cause of the dispute is: That the Dominion Coal Company asked the members of the aforesaid lodges to renew the 'Three Year Contract' as it stood, or enter into a new contract, which these lodges refused to do when they were notified: That the rate in all pillar work would be reduced from

46 to 41.5 cents per ton; restrictions would be placed on pillar cross-cut work, pillar coal would have to be wedged down where the presence of gas prohibited the use of powder for blasting purposes, without any remuneration for the extra work performed, the price of house fuel would be increased 60 per cent and explosives would be sold at cost price plus 10% for handling the same.

"The Association claims: That under the present high cost of living, and the favourable conditions of the coal trade, all the day labourers and mechanics in and around the Dominion collieries are entitled to an increase of 15%; that men out of places in the mine doing shift-work at the rate of \$1.65 per day, should receive a uniform rate of \$2.44 per day; that miners working in a double-shifted colliery should receive an increase of 4 cents per ton; that the pillar rates of No. 9 (Harbor) be increased from 45, 46 and 48 cents per ton to 47.3, 50.8 and 52.6 per ton."

Proceedings in connection with the establishment of the Board were in progress at the close of the month.

#### IX.—DEFINITE SETTLEMENT OF THE DISPUTE AT THE SILVER LEAD MINES AT MOYIE, B. C.

THE Department received word during the month that the dispute at the St. Eugene silver lead mine, at Moyie, B. C., between the Consolidated Mining and Smelting Company of Canada-

Limited, and its employees, had been definitely settled by the adoption of a wage scale based largely on the recommendations of the Board established for the adjustment of the dispute. It

will be remembered that the Board formulated in its report three separate wage schedules, for use in the metal mining camps of British Columbia, the first for normally favourable conditions, the second for abnormally unfavourable conditions, and the third for abnormally favourable conditions. The Board advised that the market prices of silver and lead and copper, according to figures named in the report, should determine the scale to be applied to the camp. The scale applicable to abnormally unfavourable conditions was recommended for present adoption. There was no formal agreement reached before the Board, nor were the findings of the Board formally accepted. Subsequently, when copies of the report were forwarded by the Department to the respective parties but after some negotiations between the Company and the Union officials respecting the employees, an agreement was reached on January 13, on the following wage scale, viz.:-

1—Shaftmen.....	\$4.00
2—Machinemen.....	3.50
3—Muckers.....	3.00
4—Nippers.....	3.25
5—Timbermen.....	3.50
6—Blasters.....	4.00
7—Blacksmiths.....	4.00
8—Blacksmiths' helpers.....	3.25
9—Skip Tenders.....	3.50
10—Pumpmen.....	3.50
11—Labourers.....	2.75
12—Carpenters, Bench.....	4.00
13—Carpenters, Rough.....	3.50
14—Carpenters' helpers, (on C'r Work).....	3.00
15—Machinists.....	4.00
16—Machinists' helpers.....	3.00
17—Compressor Engineers.....	4.00
18—Licensed Engineers.....	4.00
19—Hoist Engineers, Double drum.....	4.00
20—Hoist Engineers, Single drum.....	3.50
21—Motormen.....	3.25
22—Electrician Helpers.....	3.00
23—Firemen.....	3.25
24—Pipemen, Underground.....	3.50
25—Fitters on surface.....	3.50
26—Trackmen.....	3.50

27—Trackmen's Helpers.....	3.00
28—Hammermen.....	3.40
29—Topmen.....	3.00
30—Oilers.....	3.00
31—Teamsters.....	3.00
32—Teamsters, caring for stock.....	3.50
33—Powdermen.....	3.25
34—Timber Framers.....	3.50
35—Timber Framers' Helpers.....	3.00
36—Ore Sorters.....	3.00
37—Pipemen's Helpers.....	3.25
38—Crusher-men.....	3.25
39—Millmen.....	3.50
40—Car Loaders for Motors.....	3.25
41—Bulldozers.....	3.00
42—Watchmen.....	3.00
43—Electrician in charge of Generator.....	4.00
44—Electrician not in charge of Generator.....	3.50

A comparison of the scale adopted with the scale recommended by the Board shows few variations, and a further comparison with the demands of the Union shows that in various cases where the Union asked an increase, the Company offered the amount fixed by the Board. This applies to labourers, motormen, teamsters, powdermen, timber framers, timber framers' helpers, machinists' helpers, and watchmen. The Union asked 25 cents more on crushermen and electrician helpers. The Board did not fix rates for either of these occupations. The Company increased by 25 cents per day the rate recommended by the Board in the case of nippers, engineers on double drum hoist and pipemen, all of which were accepted by the Union. The Company lowered by 25 cents per day the rate recommended by the Board in the case of trackmen's helpers and engineers on single drum hoist, both of which were accepted by the Union.

It will be seen therefore that the investigations and report of the Board in this case, while not resulting in any formal agreement, may certainly be credited with being the basis of an informal settlement of the differences.

**UNEMPLOYMENT DURING WINTER SEASON, 1907-08.**

WITH the advent of cold weather in the closing weeks of November, a considerable decrease in the amount of general employment usually occurs throughout Canada. The outside trades are principally affected, operations among agriculturists, fishermen, build-

ers, certain classes of miners, workmen engaged on railroad construction and civic improvement works, etc., being largely curtailed. On the other hand, the lumber camps of Ontario and the Eastern provinces employ large numbers of men at this period, and

the work of snow removal and the gathering of the ice supply require the services of many. Manufacturing is affected only to a minor extent by seasonal influences. The net result is to leave each year a number of workmen, especially among the unskilled class, with only intermittent employment during the winter months.

During the present winter season, as a result largely of unfavourable financial conditions, the number of those temporarily out of work has been larger at certain points than in some years past. With a view of presenting an authentic statement on this subject, in connection with the distribution of the labour supply and for the information of intending immigrants, the correspondents of the Labour Gazette, residing in the several cities of the Dominion, were requested during the past month to forward, in addition to their usual report, a special statement showing the number of unemployed, if any, in their respective localities. The correspondents were also asked in this connection to specify the causes, other than seasonal, of any unemployment existing, and to mention any steps of a special nature being taken to provide employment. A reference to the outlook for the balance of the winter and for the resumption of activity on the opening of spring was also requested.

### The General Situation.

Replies were received from the various correspondents to the above communication, and while it was found that conditions varied widely according to locality, certain features of more or less general application were noted. In the Maritime Provinces, for example, employment is about as usual during the present winter, except in the lumbering industry; in portions of New Brunswick and in Prince Edward Island, conditions are more active than in past years. In Quebec and in Eastern Ontario, also, though the amount of general employment is less than last year, no widespread stagnation is apparent. The number of unemployed from other than seasonal causes is perhaps largest in the various cities of Ontario west of Peterborough and south of

the Georgian Bay, and in British Columbia. The North West Provinces, though with a larger supply of labour than in 1906-07, have experienced an exceptionally mild winter, which allowed outside operations to be continued to an unusually late date. The prevailing dullness is almost wholly attributed, as was said above, to the financial stringency which, by curtailing credits has caused a falling off in production since the month of November, especially in manufacturing and lumbering, the two industries in which conditions, under ordinary circumstances, are relatively the most active in winter. Coalmining on Vancouver Island has also fallen off recently from causes that are exceptional. On the other hand, the amount of railway construction in progress, in view of the large contracts in connection with the National Transcontinental line and the extension of existing systems remaining unfinished from 1907, has been unusually great for the season.\* In Eastern Ontario and Quebec, the work of snow-removal has been heavy. It should, moreover, be pointed out that the remarkable and continuous prosperity of industry, and especially of manufacturing, during the past few years in Canada has enabled employees to provide for a temporary falling off in activity to a degree otherwise impossible. A number of municipalities, owing to the prevailing quietness, have continued works which under normal conditions would have closed down during the winter. The outlook in almost every case is for an immediate improvement in conditions with the opening of spring.

### Conditions in the Several Cities.

The special reports received from the correspondents to the Labour Gazette with regard to unemployment in the several cities are printed below, the order followed being from east to west. In each case the reports are to be regarded as supplementary to the usual monthly report printed in part II of the opening article of the present issue.

\* A detailed statement according to provinces of the amount of railway construction at present in progress is contained in the opening article of the present issue under the heading "Railway Construction".

### The Maritime Provinces.

*Sydney, N.S.*—The closing of the navigation season, always throws a number of men out of employment for the winter months. At present, conditions are fairly well balanced, labour, apart from 150 men at the Steel Works, (Transportation Department) being well employed. The Mine operators state that they have abundance of labor. The factories are running with the same number of men, but on short time, eight hours being substituted for the nine and ten hour schedules of summer.

*Halifax, N.S.*—The number of unemployed is slightly in excess of the corresponding period of 1907. This may be accounted for to a considerable extent by the almost entire absence of snow, there having been but two or three storms which were followed soon after by mild weather. The demand on local charitable institutions is but slightly greater than in 1907 and conditions are not by any means alarming. The municipal authorities have not been asked, and are not making, any provision to afford employment to any greater extent than in preceding years. There is nothing to indicate that the coming month will develop less favourable conditions, but the probability is that as the season advances labour conditions will be fully as active as in the spring of 1907.

*Westville, N.S.*—Labour was fully as well employed as in the corresponding month of 1907.

*Amherst, N.S.*—There was a surplus of labour, due largely to the closing of manufacturing establishments for stock-taking.

*Charlottetown, P.E.I.*—Conditions were normal. The mild weather rendered transportation hands unusually active for the season.

*Moncton, N.B.*—Conditions were unusually active, the weather permitting outside work to continue and factories being active. There were few without work.

*St. John, N.B.*—There are no more out of work this winter than in previous years at this season. The scarcity of snow has been the means of keeping a number of men in idleness, but the heavy snowstorm of January 29 has been the means of fur-

nishing employment to a good number in cleaning the streets, as the city has a contract with the St. John Street Railway Company to clear the snow off streets traversed by the street cars. No special effort is being made by the municipality to furnish employment to those out of work. A number of undesirables have come out on the steamers from England and other European cities, but they are desirable only to reach Montreal, Boston, etc. The outlook for the balance of the winter is bright, as the steamers are expected to arrive more regularly, and to give employment to a larger number of men.

### Quebec.

*Quebec, Que.*—Labour conditions in Quebec City and District are quiet. The supply of labor being in excess of the demand. The falling of in the demand is due to close of navigation and laying up of steamboats and tugs, which temporarily throws a large number of men out of employment. These conditions are of yearly occurrence and have been counter-balanced by activity in other lines. In the iron ship repairing plant at St. Joseph Dock, Lévis, 200 men are employed at repairs; in the Davie ship-yard some 60 more; and in the new marine slip of F. H. Drolet, some 30 others. The new gas company has had a large number of labourers working in the streets intermittently, locating leaks and making services with its new Main. The Quebec Harbour Commission has also about 150 labourers at work on the Cross-wall. The excavation and levelling works for the new wing of the Chateau Frontenac have been stopped; some 60 men were employed here and this work will recommence as soon as the weather becomes fine. The Quebec Gas Works Company dismissed some 20 of its gas-fitters most of whom left Quebec. The shoe factories although not running to their fullest capacity, are nevertheless active. In the boiler shops, foundries and machine shops the conditions may be classed as busy, principally upon repair work. The stringency in the money market has not had much effect in Quebec. Local trade in all lines was better during the holiday season this year than last year. Some few English

and other emigrants returned to Quebec from the railway and lumber camps, and found employment. Some of these were equally as unfit for labour in town as they were in the railway and lumber camps. A number of Italians were also out of work. There has been no special effort made by the municipality to provide employment.

*Three Rivers, Que.*—The winter season does not affect labour as much as in some other places as all capable workmen get employment in the bush from the Lumber firms and the balance get employment shoveling snow for the Corporation of the city. So far there have been no reports of many unemployed.

*Sherbrooke.*—This city and district are not suffering to any considerable extent from scarcity of work. There may be a few more people out of work than was the case this time last year, but so far the condition of affairs has not caused particular attention. As is usual at this season of the year practically all building operations have ceased, owing to the severity of the weather, but there are no more idle than is usually the case. There is every prospect that the building trades will be as busy next season as in 1907. While the machine shops are running somewhat shorter hours, and gangs are laid off week about, it is anticipated that full time will be resumed shortly. In one of the larger shops, some of the draughtsmen who were laid off for some weeks have returned to work, which would show that matters are improving.

A number of the hands in the Moore Carpet Co., have been paid off owing to a demand being made to the Courts to have the concern wound-up. This order, granted by the Superior Court here, has been appealed, and will be heard in the Court of Appeals next month. In the meantime the Superior Court has granted a motion to allow the works to run until the orders are completed and the decision of the Court of Appeal given. The Walter Blue Co., makers of ready-made clothing, are running eight hours a day instead of ten, but the Company is sanguine that this will only be for a short time. The woollen and worsted factories are running full time, also the jewel-

lery and bobbin factories, with the same number of hands as during the summer. There has been a good demand for men to go to the woods, and many who work in the city during the summer and fall find ready work in the lumber camps. This has the effect of relieving congestion among unskilled labourers. There is a large quantity of pulpwood being got out, and this requires more men. The wages are only slightly less than last year. So far there has been no action taken by the Corporation to provide work, as the situation is not such as to call for any. The consensus of opinion among business men is that the present lull is only temporary, and that when spring opens conditions will again become normal.

At the city offices it is reported that payments are fully up to those of the same period last year, and the standing poor committee of the City Council has had no extraordinary claims upon it so far. In the Asbestos Mining Camps at Black Lake and Thetford, it is reported that men are not so hard to get as last summer, and that wages are slightly less, but that there were few idle men.

*St. Hyacinthe, Que.*—Labour was fairly well employed for the season.

*Montreal, Que.*—There has been a considerable falling off in activity in the manufacturing industry, and several establishments have reduced staffs or working hours. Snow removal in the latter half of January gave employment to large numbers of men. The number of unemployed was greater than last year, about 2,000 labourers being wholly dependant on snow removal for employment. The building trades are very dull. Cigar-makers and boot and shoe workers are also very dull.

*Hull, Que.*—There are no unemployed in Hull. There was a temporary lull in December, but this was owing to the mild weather, and the closing of the saw-mills. At present, men, boys and teams are all busy, and there is hardly any poverty in the city. Only about 35 families, out of more than 3,000, are being assisted by charity. This number is slightly in advance of last year, when the maximum number of poor families was

25. This increase over last year is due to the fact that newcomers unacquainted with the local conditions have not yet found permanent work. The opinion prevails that the spring will see great activity in the labour market. The enlarged cement factories will employ more hands; Woods Ltd., will increase its staff and building; the C.P.R., intends improving its electric line; the new French treaty will give a decided impetus to the mica market, which has been quiet for the last few months.

### Ontario.

*Ottawa, Ont.*—During the month of January the number of unemployed in Ottawa decreased. The previous oversupply was due principally to the arrival of many English immigrants from other cities.

The curtailment of operations in the lumber camps reduced the demand about 20 per cent for hands. At no time, however, would it have been impossible for a man to make a living if he accepted the wages offered by farmers.

The city of Ottawa established a municipal stone yard for men in search of work, where they could earn from 50 cents to \$1.50 per day. The usual number of nearly 100 men were engaged on municipal sewers, a work which is always reserved for the winter period. The men's rescue mission found work for a considerable number with railroad contractors and lumbermen. The consensus of opinion is that no hardship will be experienced by the working class this winter and the city charity department reports the condition of the poorer people much improved within the last few weeks. The factories and mills in districts outside of Ottawa are employing less labour than usual. Work is not plentiful but no want is experienced.

*Belleville, Ont.*—There are this winter about 300 men out of employment through the closing down of the rolling mills and partial cessation of work at the Lehigh Portland Cement Company's plant. There are the usual number of men idle at this time of year owing to there being no work in the building line. The municipality has not been asked, nor

is there any apparent reason why it should provide extra work as no exceptional hardship through lack of work has been reported to those in charge of charitable organizations out of the ordinary. The outlook is favourable, the coming spring being expected to be the busiest in several years.

*Peterborough, Ont.*—Since about the middle of December, outside work has been quiet, except in connection with snow removal which has been very heavy this winter, and, the cutting and storing of ice. Generally at this season of the year unskilled labour is very plentiful. It is more so this winter on account of the number of immigrants who are dependant on their daily earnings, and who came here without provision for winter. The City has procured a large quantity of stone and is giving employment to all who will work.

The board of relief and private citizens are subscribing to a fund to help the need are subscribing to a fund to help the needy. The relief officer each week buys a quantity of provisions and gives them to those who are deserving.

The outlook for the balance of the winter is not very bright, as the weather is getting cold. As many as 75 to 100 men some days ask for assistance or work. Some of these, breaking stone do very well, others are indifferent whether they make a living or not. The outlook for spring is more encouraging. A lot of building is being carried over.

*Toronto, Ont.*—There is an unusually large number of unemployed men in Toronto this season, including workers of every class, but more particularly unskilled laborers. This is largely due to seasonable causes, the effect of which is felt more severely than in previous years owing to the closing of the building season earlier than usual, leaving but few partially constructed buildings on which work can be continued throughout the winter. The principal causes, however, are the heavy immigration of last year, which resulted in many more mechanics and labourers coming to Toronto than could have been absorbed under normal conditions, and the monetary stringency resulting in the curtailment of manu-

facturing and business operations and the displacement of many workers. The situation was rendered more acute by the influx at the close of the open season, of large numbers of farm labourers, railway labourers and others engaged in outdoor occupations, who cannot readily find work in the country during the winter. A large proportion of these are recent immigrants, many of them entirely unsuited for farm work or kindred employments. Among those who may be classed as unemployed, are machinists, plumbers and others out on strike, including a number who came to fill strikers' places, but were induced to join the strikers. As the great majority of these are in receipt of strike pay this feature does not materially affect conditions.

As previously stated the need of providing for the unemployed is engaging the attention of the charitable associations, who have done much to alleviate distress. The city authorities have also taken active measures to provide those in need with temporary work on sewers under construction and in snow-cleaning and other work on the streets. A Civic Bureau was opened for the registration of the names of those desiring work. The number of names now on the list is upwards of 2,000, several hundred of those registering in the course of the month having been struck off, either because they had procured work elsewhere or for other causes. The applicants receive work in rotation, not more than 3 days work being given to each until the list is exhausted. They receive \$2 per day. The number employed varies from day to day, being increased after a heavy snow-fall. On the 21st, the Board of Control appropriated \$2,000, in the meantime for the payment of wages. On the 26th, representatives of the charitable organizations held a conference with the Mayor and Board of Control, and an agreement was reached whereby the House of Industry, Salvation Army, St. Vincent de Paul Society, and Associated Charities will arrange among themselves a more comprehensive scheme for the relief of the poor and report to the Board of Control when final arrangements will be made. The Mayor promised that the city

would contribute a reasonable amount. The combined charitable organizations will obtain statistics of the families in need of, and deserving assistance. The prospects are not for any substantial improvement in conditions during the remainder of the winter.

In several suburban localities, especially to the north west of the city, where large numbers of workingmen, mostly recent immigrants, have bought land and built small houses or shacks, outside of the city limits, destitution prevails, as many of the new comers had not obtained employment when winter set in. Not being residents of the city they cannot obtain temporary civic relief work. The Globe newspaper started a subscription for the relief of this class, and the citizens have responded liberally, the amount contributed to January 30, being \$2,901 in addition to donations of food and clothing. The money is being distributed by a local committee.

*Niagara Falls, Ont.*—There were many unemployed men at the end of January. They are of all trades, particularly the building trades and other out-of-door workers and unskilled laborers. Conditions on the frontier are largely affected by those in the United States. The re-opening of large steel plants and other concerns in Buffalo and neighboring cities, which had been shut down, gave work to thousands of men and improved conditions in a large district. The re-opening of the shipbuilding plant at Bridgeburg also had a good effect. On the whole, there are not as many idle men in the district as it was expected there would be. Idleness in the building trades is due chiefly to the weather. Great building activity during the summer drew large numbers of mechanics here, consequently there are more idle men of these crafts than in previous winters. The same applies to unskilled labour. Other causes of idleness are the reductions of shop staffs by railways and by manufacturing concerns. Many employees of factories in New York State live in Canada. Conditions have not been such as to require special efforts to provide employment. There will probably be as many idle men all winter

as at present, except as railways require snow-shovellers or ice-cutting and packing gives temporary occupation. The general expectation is that there will be a brisk revival in the spring and that there will be the usual plentiful employment of all classes of workers next summer.

*St. Catharines, Ont.*—While there are a few more unemployed than during the corresponding season of other years there does not seem to be much hardship complained of. Employment for some time past has been so active that many were able to lay aside savings. About 60% of the building trades are unemployed but nearly that number are usually idle at this season of the year. The Packard Auto Factory closed down and the hands have left the city owing to stringency of the money market.

The McKinnon Dash and Metal Work Company has but 40 per cent of its employees working owing to shortage of orders. No effort has been made by municipality to give employment to unemployed, and it is expected they will be able to tide over till the opening up of spring when it is anticipated activity will prevail again.

*Hamilton, Ont.*—It is difficult to estimate the exact number of unemployed, but it is safe to say there are several hundred. Times however are not duller than they were during the winter of 1906-07. Few if any factories are employing their normal number of hands and those closing for stock-taking closed for a longer period than usual.

The Ontario Rolling Mills was closed nearly all the month throwing 500 men out of employment, and on resumption considerably reduced the staff. The Deering Company is working with about 500 men less than in the busy season, other large factories are proportionately in the same position.

The building trades generally are very slack. The prevailing conditions have been caused partially by cessation of out-door work on account of weather and by the general financial depression. The only work the city is providing is quarry work and stone breaking, but not more than 150 men are employed.

The outlook for the balance of the winter is not very bright and all idle men can hardly be in employment until April.

It is expected that as soon as the weather permits if financial conditions are better things will again assume their normal state.

*Brantford, Ont.*—There are about 500 unemployed in the city at the present time, including many branches of labour, skilled and unskilled. About 300 have left the city. The greater number are day labourers. This is due in part to the cessation of out-door activity and in part to the money stringency, several factories having reduced their forces on that account, and a few having been affected by "overproduction" in certain lines. Many recent arrivals especially from England are out of work. Employers are expecting a satisfactory year and several factories have taken on a few more men since Jan. 1st. From present information there should be employment for all when outside work can be commenced. The city has offered work to some at breaking stone but few have availed themselves of the offer. It is not expected that there will be much actual suffering during the rest of the winter.

At a special meeting of the council held on Jan. 29th, the city engineer was instructed to expend about \$6,000 on sewerage construction work, mainly to relieve the unemployed, about 250 having applied for work. Work was started on the 30th, with 40 men. These will be laid off in a few days and another gang of 40 put on and so on until the work is completed.

*Guelph, Ont.*—Outdoor work closed down earlier than for some years and little work has been done since winter set in. Factories making goods that are sold on long time payments or on liens have found it harder to make sales and also to get banking accommodation. This has applied to makers of pianos, organs, sewing machines, cream separators, furniture, upholstered goods, piano, plates, stoves and carriages. In these lines owing to a falling off in sales there has been a considerable number of men laid off and short time worked. To-

wards the latter part of January an improvement was noticed. An estimate of the number of men out of employment has placed it at about 175.

The only extra civic work started to help those out of employment has been the putting of 15 men to work on the stone crusher preparing stone for road work next summer.

*Berlin, Ont.*—Out-door activity ceased about the middle of October, 1907, whereas it is usually prolonged until December. As a rule about 300 workmen are out of employment during the winter in Berlin. This year 130 masons,

150 carpenters, 50 builders' labourers and 414 factory employees are out of work. The money stringency is alleged as the chief cause. No effort has been made by the municipality to provide employment, the opinion being that conditions will become active with the advent of warm weather.

*London, Ont.*—There was a large number of unemployed. Only a few establishments were working with full forces and these were for the most part running shorter hours. The following table may be regarded as illustrating conditions in this respect:—

Names of firms.	Number usually employed	Number employed at present	Hours usually worked per week	Hours worked at present or 11 week
E. Leonard & Son.....	200	100	59½	44
London Foundry Co.....	120	120	59½	54
Wortman & Ward.....	100	50	59½	48
Empire Brass Works.....	60	15	59½	59½
Mann Brass Co.....	25	13	59½	42
London Bolt Works.....	90	Closed	59½	
White Engine Co.....	120	120	59½	59½
Mallocks' Machine Co.....	40	4	59½	59½
Wilcox Hardware Co.....	35	Closed	59½	
G. T. R. car shops.....	400	320	50	47
McClary Manufacturing Co.....	900	1,000	50	59
Rolling mills.....	60	Closed	59½	

*St. Thomas, Ont.*—Previous to the month of January, the money stringency throughout the country, was not felt to any extent in St. Thomas. About the first of January a reduction was made in the working staff employed in the Michigan Central Railway Shops. Again on Jan. 17th, a further reduction was made affecting all Departments, 35 men being laid off, and the working day reduced to 7 hours, with a complete shut down on Saturdays. Reduction was also made in the number of days worked by employees of the Pere Marquette Shops. Slight reductions have been made in the working staffs in a number of factories with a possibility of further reductions and a complete shut down in at least one of the handle factories. St. Thomas is largely dependent upon the activity of business on the railroads, as the number of industries is small and they do not employ a great many men.

At this time of year there is always a falling off in the Labour market, due to weather conditions which are responsible for a great many of our mechanics in the building trades being thrown out of employment. Aside from the reductions which have been made on the railroads, considering the influx of English labourers, the present winter cannot be said to have been exceptionally dull. On the railroads, in the traffic departments, the rush of traffic has been unusually heavy and as a result trainmen have been working overtime. The reductions which have been made in the railway shops, were not on account of insufficient work, but the result of orders which were forwarded from headquarters, requesting a reduction in expenses. Severe weather is bound to affect power to such an extent that it will be necessary to increase the forces in the shops before many weeks, and it is the general opinion that the pre-

vailing conditions will not be extended beyond the following month. Arrangements have been completed whereby repair work on locomotives, which was formerly done in Michigan for the Wabash Railway, will be done hereafter in the Père Marquette Shops in this city. As a result, the staff of the Père Marquette Shops will have to be increased considerably and will go on full time February 1st. A number of men are being given employment cutting ice for city firms and for the Michigan Central Railway. If there is any distress owing to depression in the labour market, it has not manifested itself to such an extent that appeals have been made to the municipality for assistance. It is true that there have been a few cases where assistance has had to be rendered, but this is true of every winter. As soon as the Michigan Central Railway shops find it necessary to increase their working staff, idle men in this city will find employment. The consensus of opinion is that the City of St. Thomas has so far been fortunate in the matter of having very little distress among the working classes, and it is hoped that the month of February will find the unemployed doing as well as can be expected at this time of year, though it would not be advisable for any person to come to St. Thomas with the expectation of finding ready employment.

*Chatham, Ont.*—The number of idle men in the city exceeds that of a number of years past, the greater number being immigrants. The cause can without doubt be traced to the Financial crisis. From December 24th to January 6th, nearly all the factories closed down. When they resumed the employees were met with a notice of a 10 to 30% cut in wages in a number of cases. The city formed an associated charities committee and money and provisions are distributed to the worthy and needy families, so far the city council has endeavoured to carry on public improvements by constructing sewers, but that is now at a standstill. The defect in the break water on the Government Park, which furnished work, has also been brought to a stop. Now that ice harvesting has commenced, work will

be provided for a large number. There has been no trouble with Canadians unemployed who look for work, but the foreigners expects help to be offered. The City Council gave instructions to the superintendent to take on a large number of the immigrants and give them work, the city to furnish them and their families with fuel and provisions, but a number refused to work on these terms. The ladies of the city have formed themselves into charity committees and the work of relieving the distress will now be very largely left to them.

*Sault Ste. Marie, Ont.*—The question of unemployment did not affect Sault Ste. Marie to any extent until the closing of the steel plant about the middle of January. This has thrown possibly 680 men out of employment temporarily. The cause given for the shut down was shortage of pig iron and the necessity for repairs. At the date of writing these repairs are nearly completed and orders to start are expected soon. Men engaged in the building trades are as a rule idle at this time. It has not been necessary for our Municipal or other organizations to take action. The outlook is for improved business and industrial conditions.

#### The North-West Provinces.

*Winnipeg, Man.*—See report of local correspondent on page .

*Brandon, Man.*—In the building trades there are 30 bricklayers and masons, 100 carpenters, and 50 builders' labourers idle. This is the result of the cessation of outdoor activity. Twenty-five carpenters are employed on the inside of the Winter Fair Building, but will be finished in the course of a week or two. There are also 30 to 35 men on the C. P. R., train service laid off, owing to the falling off of trade and the mild weather causing no inconvenience on the railroad. The same condition has caused a reduction of 25 men, who were engaged in yard improvements, the bridge and building department of the C. P. R., has laid off 25 men this, is usual at this time of the year. One shopman and one carman of the C. P. R. have been laid off, business not being

brisk. The Hanbury Lumber Co., did not send any men to its lumber camp this winter, having sufficient number of logs on hand for next season's work. The unskilled labour market as near as can be ascertained has 150 to 200 men idle. Other winters the heavy snow fall and the cold weather gave employment to a large number, the railway also employed extra labourers, keeping the track clear. The supply of nearly all classes of labour is greater than the demand. The city has appointed a relief officer to assist in all cases of distress, but there no municipal or other organization is making any effort to give employment to the unemployed. The outlook for the balance of the winter is not very promising. Few building are in the hands of the architects. There will no doubt be a great deal of work on railroad construction in the spring, as work in some sections has already commenced on account of the mild weather.

The City Council decided at a meeting held Jan. 20th, to go ahead at once with the erection of the large bridge at First St., over the Assiniboine river and the C. P. R., tracks. The bridge will be built of concrete, and will cost in the neighborhood of \$100,000, to be built jointly by the city and the C. P. R. The work of moving the old bridge will be started at once. This will give employment to a considerable number of idle men in this city.

*Regina, Sask.*—The number of unemployed has never assumed serious proportions at any time during the present winter. Last winter, in spite of the severity of the weather, building operations were carried on in the case of two large buildings in the city; this year building work closed down at the beginning of winter. The present condition of unemployed labour is attributable to the usual cessation of outdoor activity and not to any untoward cause.

The conditions in the various trades in Regina were as follows:—

Class.	Un-employed	Spring prospects
Plasterers.....	17	Fair
Bricklayers and masons.....	40	Poor
Amalgamated S. of Carpenters...	70	Fair
Painters.....	35	Good
Printers.....	3	Good
Brotherhood of Carpenters.....	65	Fair

Reports from the electrical workers, metal lathers, plumbers and stone-cutters were not received.

It is impossible to obtain an accurate estimate of the number of labourers who are unemployed as there is no Labour Bureau where registration takes place.

At the first meeting of the City Council in the New Year an appropriation of \$2,500 was made for excavating and carting purposes in order to provide work for the unemployed; 40 or 50 labourers are engaged on this work. The Provincial Government has also provided similar work, having gravel carted to the grounds where the new Parliament Buildings are to be erected in the spring. The Regina Relief Society is caring for any cases of extreme poverty or destitution brought to notice. The society has 28 cases under its care at present. All cases of poverty in the city are being well taken care of, the finances of the society being adequate for all needs. All known cases of poverty are the result of sickness or are due to the fact that the families are late arrivals in the country and have therefore not had sufficient time to prepare for the winter. The general opinion prevails that with a continuance of the exceptionally mild weather, and with the help afforded by the city and the Provincial Government, that the outlook for the balance of the winter is good, and that the prospects for an early commencement of operations in spring are very bright.

*Calgary, Alta.*—The number of unemployed in the city is about 940 made up as follows: Carpenters 150; stone-masons 15; bricklayers 25; stonecutters 20; painters 18; plumbers 10; electricians 6; lathers 8; plasterers 6; building labourers 108; unskilled labourers 300; R. R. employees 124; miscellaneous (tailors, barbers, printers, clerks, stenographers restaurant employees, etc.) 170. About 30% of these are laid off every winter when outside work shuts down such as sewer & water works. The direct cause of other unemployment is the stringency in the money market. People wishing loans on buildings which they wished to erect were unable to procure them throwing a number of mechanics out of

employment. The city has put some 40 men to work who were in want. The city is putting some 100 men to work on the Dominion Exhibition Buildings in a few days; this will relieve the situation somewhat. There will be a number of idle men during the balance of the winter. The general opinion is that with the opening of spring building activity will again revive and the labour market will greatly improve.

*Edmonton, Alta.*—The number of unemployed is as follows:—

Building Trades.....	400
Other Trades.....	100
Unskilled Labourers.....	150
<hr/>	
Total.....	650

The large number of people attracted to Edmonton by the general prosperity is the chief cause. So few having money to invest in building, and the lack of money by the city to go on with public improvements are other causes. As the weather has been exceptionally mild only about 1-3 of these are idle on account of the season.

The Provincial Government is proceeding with the erection of the Parliament building by day labor and is giving employment to a number. The city is opening up gravel pits and will put on more men and teams to haul gravel for street improvements and construction.

**British Columbia.**

*Nelson, B.C.* — See statement contained in monthly report.

*New Westminster, B.C.*—A conservative estimate of the number of unemployed of all classes in this city and district would be about 300, there cannot be said to be many destitute, as a number have been steadily employed during the greater part of last year and consequently are in a position to do without employment for a time at least. In this city and district there are a num-

ber of unemployed men for a short time every winter, as the weather conditions are not suitable for outdoor work, but the present winter is somewhat unusual owing to the arrival of a large number of men in the late fall months. No special effort is being made by the city or district officials to provide employment, and there is not much prospect of a change in conditions for the next two months at least. It is expected that with the opening of the spring work all surplus men will be employed.

*Vancouver and Victoria, B.C.*—See monthly reports of correspondent for detailed statements.

*Nanaimo, B.C.*—An unusual quietness in the lumber business is caused by the scarcity of money causing a cessation of orders. The supply of logs especially second and lower grades has been far in excess of the present demand. Last fall the Coal Co., contracted for a large supply of foreign coal so that they could be sure to fill their large contracts. The Pacific Coast Coal operators in view of the shortage last year also contracted for a large supply of coal to meet demands this winter. In addition the stringency of the money market which has been so great on the American side (the principal market) combined with an exceptionally mild winter has thrown a large amount of coal on the market causing a slackness of work in the mines. The coal trade, however, is expected to resume normal conditions about April. There are about 600 men in the coal mines idle. There is no evidence of any change for the better in the lumber business.

It is expected that grading will commence soon on the extension to the railroad which will give work to a good many men.

Altogether there are nearly 1,000 idle men in this district. There has been nothing done by the municipality or government as yet to relieve the situation.

## ANNUAL CONVENTION OF DISTRICT ASSOCIATION NO. 6, WESTERN FEDERATION OF MINERS.

**T**HE tenth annual convention of District Association No. 6 of the Western Federation of Miners was held at Greenwood, B. C., January 1-4, 1908.

The association comprises all of the local unions of the Western Federation of Miners in the Province of British Columbia, its authority being superior to that of the local union, but inferior to that of the international organization. The tax-paying membership of the district is about 4,000. Its finances are maintained by a levy of 40 cents per annum on each member in good standing of each local union, the tax being paid quarterly. By a member in good standing is meant one who is not over two months in arrears for dues, fines or assessments. Any important action taken by the executive is submitted for the approval of the membership through a referendum.

The convention held during January was larger than any previously held. Resolutions were passed as follows:—

1. Condemning the Industrial Disputes Investigation Act, 1907.
2. Protesting against the decision of the arbitration board under the Industrial Disputes Investigation Act in the

case of the Consolidated Mine and Smelter Company of Canada vs. the Moyie Miners' Union.

3. Protesting against the immigration policy of the Dominion and Provincial governments, and condemning the attitude of the lieutenant-governor of British Columbia towards organized labour and Oriental immigration.

4. Favouring the sanitary inspection of boarding houses in and around mines, mills and smelters in British Columbia.

5. Favouring the enactment of a universal eight-hour day.

6. Favouring the opening of co-operative stores on the Rochdale system, with a view of establishing wholesale distributing centres later in the Crow's Nest district, the Slocan district, the Nelson and Rossland districts and the Boundary district. Localities wishing to start a store of this kind were recommended to communicate with Grand Forks, where an enterprise of this description was stated to be in successful operation.

7. Recommending that a referendum vote be taken on the question of a home for the aged, sick and indigent members of the union.

### THE EDWARD MEDAL FOR COURAGE IN MINES OR QUARRIES.

**D**URING the month of January a circular communication was received by His Excellency the Governor-General of Canada, from the office of the Secretary of State for the Colonies, Great Britain, informing the Canadian Government that His Majesty the King has been pleased to institute a medal, to be called the Edward medal, for the purpose of distinguishing by some mark of the Royal favour the many heroic acts performed by miners, quarrymen and others, who endanger their own lives in saving or endeavouring to save the lives of others, from perils in mines or collieries within His Majesty's Dominions, Protectorates, etc.

The medal is to be of two classes; the Edward medal of the first-class to consist of a circular medal of silver with the effigy of His Majesty on the obverse, and on the reverse a design representing the rescue of a miner with inscription, "For courage"; the Edward medal of the second-class to consist of a circular medal of bronze of similar design.

#### Conditions of Award.

The medal may be bestowed on persons of either sex and of any nationality, who have endangered their lives in saving or attempting to save the lives of others in or about a mine or quarry,

either above or below ground. It is, however, His Majesty's desire that the medal should not be given for rash or injudicious attempts at saving life however gallant they may be; as for instance in cases where those who attempted to rescue others have themselves to be rescued and thus only aggravate the danger. No award is to be made except on the recommendation of the principal Secretary of State for the Home Department. Applications for the medal will be dealt with as they arise. In the case of Canadian applicants, the officer administering the government of Canada is requested to submit to the Secretary of State for the Colonies, for the consideration of the Secretary of State for the Home Department, any instances that may be brought to his attention of exceptional courage of the nature indicated, accompanied by such observations and documents as he may think proper. The names of those upon whom the decoration is conferred will be published in the *London Gazette*.

The awarding of this medal will not be in substitution for the Albert medal, but both medals will not be bestowed in respect of the same action. It is intended that the qualification for the Edward medal, although not so high as for the Albert medal shall be of a high and exceptional order and grants will be reserved for such cases.

The Edward medal is to be suspended from the left breast. The riband which is an inch and three-eighths in width, is dark blue with a narrow yellow stripe on either side. When the medal is awarded to a woman it is to be worn on the left shoulder, suspended from a riband of the same width and colour, fashioned in a bow.

#### Bars and Erasures.

Any act of gallantry which is considered worthy of recognition by the awarding of the Edward medal, but which is performed by one upon whom the decoration has already been conferred, may be recorded by a bar attached to the riband by which the medal is suspended. For each such additional act an additional bar may be added.

If any person on whom either of the decorations is conferred is subsequently guilty of any crime or disgraceful conduct his name is to be erased forthwith by special warrant from the registry of those upon whom the decoration has been conferred, the medal being forfeited. The person to whom a medal is given must, before receiving the same, enter into an agreement to return it if his name shall be so erased. The Sovereign is to be the sole judge of the circumstances demanding such forfeiture. A medal thus forfeited may be regranted.

#### THE FISHERMEN'S UNION OF NOVA SCOTIA—THIRD ANNUAL CONVENTION.

THE third annual convention of the Fishermen's Union of Nova Scotia was held at Halifax on September 26th, 1907\*. There was a fair attendance of delegates, representing stations in the counties of Shelburne, Queen's, Digby and Cape Breton, all of which were reported in a flourishing condition, with large accessions to membership, in most cases during the present year. It was stated that work of an important nature had been accomplished since the last general meeting, and the organization

was said to be growing in popular favour. This was manifested by requests from several quarters for information as to procedure in forming the stations.

Officers for the ensuing year were appointed as follows: D. Scott, Main à Dieu, C. B., president; G. A. Hemcon, Arnold, Shelburne County, vice-president; Bernard Cummings, Port-Joli, Queen's County, secretary-treasurer. The executive board was completed by the election of M. C. Swim, W. Edwards, John M. Ferguson and Augustus Harris.

The following is a synopsis of the resolutions adopted at the three sessions of the convention, forming the basis of

\*The Department has received the present report during January by courtesy of Mr. M. H. Nickerson of Clark's Harbour, N. S.

the petitions which have been addressed to the Dominion and Provincial governments:—

1. That the government be asked to revoke the order-in-council regarding the issuing of new licenses for the canning of lobsters.

2. That an appeal be made to the proper authorities with a view to securing better transportation facilities for the marketing of fish products along the seaboard of Nova Scotia and the Island of Cape Breton.

3. That the Federal government be requested to consider a scheme for the paying of a bounty for catching dog-fish as a means of mitigating the pest, and thus protecting the inshore and deep sea fishing grounds.

4. That the government be asked to re-arrange the fishing bounty schedule, so as to pay an equal sum to the men engaged in the deep sea fisheries, whether prosecuting the same in decked vessels or in open boats.

5. That the government be petitioned to amend the law relating to the size limit of lobsters, to suit circumstances and conditions of the various localities on the coast.

6 That the Federal government be asked to enact a law prohibiting the operations of beam-trawlers, steam-drifters, and all other destructive methods of taking fish within the territorial waters of eastern Canada.

7 That the government be memorialized to provide a pension for fishermen who by old age, or for other causes, are rendered incapable of earning a livelihood by their occupation.

8 That the government be asked to institute an inexpensive insurance system for fishermen as a protection to their families in case of death or accident, the benefits of which shall be available to such fishermen as voluntarily contribute to the maintenance of the fund created for the purpose specified.

9 That the government be asked to appoint an advisory board to confer

with and advise the Marine and Fisheries department on all questions affecting the fisheries, the members of said board to be selected from the Fishermen's Union, and composed of practical men free from political control.

10 That the Fisheries department be requested to enforce the law in regard to the catching and sale of lobsters under the legal size limit.

11 That the Provincial government be asked to give to the fishing industry the same encouragement as is given to the other industries and callings in the province, by the appointment of one or more instructors to visit the different localities, and by means of addresses, acquaint the fishermen with the latest and most effective methods and the best markets for their products.

12 That the Federal government be asked to take measures for establishing a salt water hatchery for the propagation of cod and other food fish in St. Mary's Bay, located in western Nova Scotia, in accordance with the recommendation of the fishery commission in 1904, endorsed by the Fishermen's Union at their annual convention in 1906.

13 That the government be urged to order the inspection of live lobsters (designed for export) at the various points of collection on the coast, instead of at the port of transshipment, as is the present custom, such a measure being necessary to prevent abuses of the law and damage to the lobsters by unpacking while in transit (\*).

A motion favouring the use of the purse-seine—now forbidden within the three-mile limit—insofar as it applies to the taking of pollock, was deferred till the next annual meeting; the various stations of the Union, in the meantime, will formulate an opinion on that subject on which action will be taken in full council.

The next annual convention will be held in Halifax on September 3, 1908.

(\*) This request has since been granted and arrangements were made at the opening of the present lobster season for carrying out the new regulation.

## GOVERNMENT OWNERSHIP OF TELEPHONES IN MANITOBA—PURCHASE OF BUSINESS OF BELL TELEPHONE COMPANY BY GOVERNMENT OF MANITOBA.

ON the fifteenth of January, the government of the Province of Manitoba took over the entire business of the Bell Telephone Company in the Province of Manitoba. The terms of the purchase were as follows: \$3,300,000 for the business and plant as a going concern, and \$100,000 for supplies and equipment, the payment to be made in bonds of the Province payable in forty years and bearing interest at the rate of four per cent.

On December 10, 1907, there were 14,195 telephones in the Province of Manitoba; 8,890 of this number were connected with the Winnipeg exchange, 780 with the Brandon exchange, and the balance distributed amongst 65 smaller points, practically covering the whole telephone area of the province.

An engineer appointed by the Government of Manitoba prepared the following estimate of the value of the plant in Manitoba:

Winnipeg plant, \$1,584,000.  
 All other exchanges and farm lines \$712,500.  
 1,192 miles long distance pole lines, \$333,780.  
 331 long distance circuit miles No. 10 (524 lbs.) copper at \$143, \$47,333.  
 2,044 long distance circuit miles No. 12 (346 lbs.) copper at \$100, \$204,400.  
 124 long distance circuit miles No. 9 iron at \$40, \$4,960  
 75 toll offices at \$175, \$13,125.  
 Total, \$2,900,098.  
 Engineering and real estate, \$310,000.  
 Total value exclusive of supplies, \$3,210,098.

A condition of the sale was that employees of the company would be retained for at least one year, subject to dismissal for incapacity or other cause. No changes of importance have taken place amongst the staff, except that some of the operators have been discharged because of the decrease in business incidental to this season of the year. The company reserved the right to operate through lines connecting the systems of Ontario and Saskatchewan.

The management of the telephone system has been placed in the hands of a commission composed of men previously in charge for the Bell Company..

## LABOUR ORGANIZATIONS IN CANADA DURING 1907.

**T**ABLES are published herewith containing a list, by industries and groups of trades, of the labour organizations formed and dissolved in Canada during the year 1907, with details relating to locality, date of organization and other particulars. \*

### The General Result.

According to the information received by the Department, the total number

\* The tables are based on information collected by the Department of Labour during the year from the daily press, the trade journals of the different central labour organizations, and other sources, details having been obtained or verified by correspondence with the secretaries of unions, the organizers of central bodies, the correspondents of the *Labour Gazette*, and other persons in a position to furnish accurate information. Instances may have occurred of labour organizations in particular localities having been formed or dissolved without the fact being reported to the Department, though the extent of organization and dissolution in the several trades or provinces is indicated with considerable accuracy in the table. It was found difficult, however, in some instances to obtain exact information with regard to the causes leading to the surrendering of charters.

of labour organizations formed in Canada during 1907 was 232, and of organizations dissolved, 58, being a net increase during the year of 174 in the number of organizations in existence. Compared with the three preceding years, the returns show a marked increase in the activity of organization. In 1906, the number of organizations formed was 154, and of organizations dissolved 85, a gain of only 69. In 1905, there was a net loss of 2, the unions formed numbering 103, and of unions dissolved, 105. There was an increase of 44 in the number of unions during 1904. The year 1903 alone, since the inauguration of the present record by the Department, was more active than the season just past in respect to the organization of workmen, the number of unions formed in that year being 275, and of unions dissolved 54, a net increase of 221.

### The Record by Industries and Trades.

The following is a statement, by industries and groups of trades, of the labour organizations formed and dissolved in Canada during 1907:—

*Trades and labour councils.*—Trades and labour councils were organized, at Ottawa, Ont., Fort William, Ont., and Cranbrook, B. C. The Ottawa council is in affiliation with the National Trades and Labour Council; it was originally organized in 1904, but remained inactive during 1905 and 1906. The Fort William and Cranbrook councils are chartered by the Trades and Labour Congress of Canada.

*Fishing.*—A Weir Owners' and Fishermen's Union was organized in Charlotte County, N. B., under the act passed by the New Brunswick Legislature in 1905. (\*).

*Mining.*—Eleven new branches of the United Mine Workers of America were organized in Western Canada. Of these, one went out of existence prior to the close of the year. Five branches of the Western Federation of Miners, all in British Columbia, were organized; and a branch of this organization at Nanaimo was dissolved. A Union of Quarrymen was formed at Terrebonne, Que., and a lodge of the Provincial Workmen's Association at No. 6 Colliery, Glace Bay, N. S.

*The building trades.*—As in 1906, the largest number of new unions formed in the building trades was among carpenters and joiners, 13 branches of the United Brotherhood of Carpenters and Joiners, and 3 branches of the Amalgamated Society of Carpenters and Joiners having been organized. In addition, a district council of the United Brotherhood of Carpenters and Joiners was formed at Toronto, Ont., and a Pile Drivers' and Bridge Carpenters' Union at Vancouver, B. C. The Bricklayers' and Masons' International Union and the Brotherhood of Painters, Decorators and Paper Hangers of America each organized 4 branches; 3 branches of the latter formed in 1902, 1904 and 1906 respectively, were dissolved. The Wood, Wire

and Metal Lathers' International Union, the Operative Plasterers' International Association, and the International Hod Carriers' and Building Labourers' Union each organized 3 branches. The United Association of Journeymen Plumbers, Steamfitters, Gas Fitters' and Steamfitters' Helpers organized 2 new Unions and the Journeymen Stonecutters' Union of North America and Granite Cutters' International Association of America, one each. A National Metal Lathers Union and a Granite Workers' Union were also formed. Branches of the United Association of Plumbers, Steamfitters, Gas Fitters and Steamfitters' Helpers and of the International Hod Carriers' and Building Labourers' Union were dissolved, together with a Rock Drillers' and Helpers' Union in affiliation with the American Federation of Labour. Altogether, there were 41 labour organizations formed and 6 dissolved in the building trades in Canada during 1907.

*The Metal, engineering and shipbuilding trades.*—The largest number of organizations formed was among blacksmiths and electrical workers, the International Brotherhood of Blacksmiths and the International Electrical Workers' Union each having organized 7 unions in 1907. Two branches of the latter association went out of existence during the year. The International Brotherhood of Boilermakers and Iron Shipbuilders organized 6 branches and withdrew the charters of 5, while the International Association of Machinists organized 4 branches and withdrew the charters of 2. The Amalgamated Sheet Metal Workers' International Alliance formed 4 branches, and dissolved 1. Two branches each of the Iron Moulders' Union of North America and of the Metal Polishers Buffers, Platers, Brass Moulders and Brass and Silver Workers' International Union were formed. Among stationary engineers, 3 branches of the Canadian Association of Stationary Engineers were organized, 2 of the International Union of Steam Engineers and a Union Canadienne des Ingénieurs Stationnaires, while a branch of the International Union of Steam Engineers and a Marine Firemen's Union went out of existence.

For statement re provisions of the act see the *Labour Gazette* for August, 1905, page 177.

A Master Horseshoers' Protective Association and a branch of the International Union of Journeymen Horseshoers were formed. Other new organizations were, a branch of the Stove Mounters' and Steel Range Workers' International Union of America, a Union of employees in a tinware manufacturing establishment in Montreal, and a Ship Carpenters' International Union in the same city. An International Jewellery Workers' Union at Toronto, Ont., was dissolved.

*The Woodworking and furnishing trades.*—A branch of the Pattern Makers' League of North America and a Carriage Workers' International Union were formed, and branches of the Amalgamated International Woodworkers' Union and of the International Wood Carvers' Association dissolved.

*The Printing and allied trades.*—Five branches of the International Typographical Union were organized and one dissolved in 1907. Other Unions formed were, 2 branches of the International Brotherhood of Paper Makers, and branches of the International Stereotypers and Electrotypers' Union and of the International Union of Bookbinders. A branch of the Lithographers' International Protective Association and a branch of the International Association of Pulp Paper Workers were dissolved.

*The clothing trades.*—Two branches of the Journeymen Tailors' Union of America were formed and two dissolved. The United Garment Workers of America organized 3 new branches and disbanded 1. Two branches of the International Boot and Shoe Workers' Union were formed, together with a Moccasin Union in affiliation with the American Federation of Labour. A fur workers' union was dissolved.

*The textile trades.*—Ten branches of the Federation of Textile Workers of Canada were organized in the Province of Quebec, one of which represented the absorption of a National Union of Textile Workers; 2 branches of the Federation were dissolved. A Tapestry Workers' Union was organized at Guelph, Ont.

*The leather trades.*—An International Saddlers' Union was dissolved at Montreal, Que., and a branch of the Inter-

national Brotherhood of Leather Workers on Horse Goods was formed at Ottawa, Ont.

*Food and tobacco preparation.*—Three branches of the United Brewery Workers of America, and 2 of the Journeymen Bakers and Confectioners' International Union, together with a Butcher Workmen's Union were organized.

*Hotel and restaurant employees.*—The Hotel and Restaurant International Alliance and Bartenders' International League of America organized 6 new branches in 1907. The National Association of Cooks and a branch of the Hotel and Restaurant Employees' National Association of Canada (Waitresses) were formed at Montreal, Que.

*The railway service.*—Among railway employees, the chief activity in the formation of organizations was shown by the International Brotherhood of Maintenance-of-Way Employees, which organized no less than 32 branches during the year. Some 19 branches of the same organization were consolidated or amalgamated with other lodges. The Brotherhood of Railway Carmen of America organized 9 branches, the Brotherhood of Locomotive Firemen and Enginemen, 5 branches, and the Brotherhood of Locomotive Engineers, 2 branches. The Brotherhood of Railway trainmen and the Order of Railroad Telegraphers each organized one branch, while a local Station Freight Clerks' Union was formed at Halifax, N. S. The only railway union reported as dissolved during 1907, apart from those that were absorbed, was a branch of the Brotherhood of Railway Carmen at Sydney, N. S. Altogether, there was a net increase of 32 in the number of railway unions in existence in Canada during 1907.

*Street railway employees.*—A national Union of Street Railway Employees was formed at Hamilton, Ont., and a branch of the Amalgamated Association of Street and Electric Railway Employees at St. Thomas, Ont. The Hamilton National Union subsequently became inactive.

*General transport.*—Two unions of longshoremen were formed, one being in affiliation with the International Longshoremen, Marine and Transport Workers'

Association. A branch of the International Brotherhood of Team Drivers, a Team Owners' and Coal Handlers' Association and a National Cab Drivers' Union were also organized.

*Miscellaneous.*—A Civil Service Association was formed at Ottawa, Ont., composed of employees of the Government of Canada, with the immediate object of making representations to a Royal Commission appointed by the government to enquire into and report upon conditions in the Civil Service. The association was subsequently organized on a permanent basis. The school teachers of the Province of Ontario also formed an organization during April. At Maisonneuve, Que., a Federation of Civic Employees was organized, while 3 National Unions of the same class were formed in Montreal. Clubs Independants des Ouvriers were organized at Hull, Que., and at Sherbrooke, Que., and an Association Nationale des Employés du Commerce et de l'Industrie at St. Hyacinthe, Que. Among retail clerks, an independent association was formed at Quebec, Que., and a similar association

dissolved at Berlin, Ont. A Union in affiliation with the Retail Clerks' International Protective Association was formed at Brantford, Ont., in March, 1907, and was disbanded in the following May. Another branch of the same organization was formed at Calgary, Alta., and a branch disbanded at Hamilton, Ont. The American Federation of Musicians organized 4 branches and the International Glass Workers' Union 1 branch.

*Unskilled labour.*—Four Federal Labour Unions and one Amalgamated Labour Union were formed, 3 of the former being chartered by the Trades and Labour Congress of Canada and 1 by the American Federation of Labour.

**Aggregate Results by Industries and Groups of Trades, 1903, 1904, 1905, 1906, and 1907.**

The accompanying table sets forth the aggregate number of labour organizations formed and dissolved in Canada during 1907, according to industries and groups of trades, compared with the years 1906, 1905, 1904 and 1903:—

TABLE SHOWING BY INDUSTRIES AND GROUPS OF TRADES THE NUMBER OF LABOUR ORGANIZATIONS FORMED AND DISSOLVED IN CANADA DURING 1903, 1904, 1905, 1906 and 1907.

\* Included under " Food and Tobacco Preparation " in 1903, 1904, 1905 and 1906.

† Included under " General Transport " in 1903, 1904, 1905 and 1906.

It will be seen from the table that the number of labour organizations has increased in all the industries and groups of trades with the exception of the wood-working and leather trades, in both of which the number remained unchanged. The largest net increase, namely, 35 organizations, took place, as in 1906, in the building trades, the railway service following with an increase of 31 and the metal trades with an increase of 29. There was an increase of 16 in the number of miners' unions, of 14 in the number of miscellaneous organizations, and of 8 in the number of textile unions. Com-

pared with previous years, the activity of organization was greater during 1907 in almost every branch than in any year since 1903. In the mining industry, the increase was the largest since the record of the Department was inaugurated. The largest gain reported in any industry or trade in 1906 was 26 organizations (\*).

**Record by Provinces, 1903, 1904, 1905, 1906 and 1907.**

In the accompanying table, the number of Unions formed and dissolved during the years 1903, 1904, 1905, 1906 and 1907 are set forth by provinces:—

TABLE SHOWING BY PROVINCES THE NUMBER OF LABOUR ORGANIZATIONS FORMED AND DISSOLVED IN CANADA DURING 1903, 1904, 1905, 1906 and 1907.

Province.	1903		1904		1905		1906		1907	
	Unions Formed	Unions Dissolved	Unions Formed	Unions Dissolved	Unions Formed	Unions Dissolved	Unions Formed	Unions Dissolved	Unions Formed	Unions Dissolved
Nova Scotia.....	26	2	10	5	13	5	14	8	11	1
Prince Edward Isle.....		2				1		3		
New Brunswick....	22	2	3	4	5	6	1	5	1	1
Quebec.....	62	11	38	15	18	18	37	19	51	11
Ontario.....	125	28	62	65	40	57	44	31	94	33
Manitoba.....	10		12	3	9	5	17	3	6	4
Saskatchewan ...	7		13	4	5		10	1	13	1
Alberta.....					9	1	18	5	28	1
British Columbia..	23	9	10	8	4	8	12	8	22	6
Yukon.....										
Total.....	275	54	148	104	103	101	153	85	232	58

The largest number of Unions formed and dissolved was, as in previous years, in Ontario and Quebec, the net increases being 61 and 40 respectively. The activity of organization in Western Canada, which was a feature of 1906, was continued during the past year, Manitoba alone of the Northwest Provinces showing a decrease in the number of Unions formed. In Saskatchewan, Alberta and British Columbia, the net gains were 12, 27 and 16 respectively, compared with gains of 9, 13 and 4 in 1906.

**Record by Months of Labour Organizations Formed, 1904, 1905, 1906 and 1907.**

The Department secured information with regard to the date of formation of 171 labour organizations formed during 1907, compared with 127 during 1906, 94

during 1905, 113 during 1904 and 243 during 1903. The record by months for each of these years is shown in the following table:—

TABLE SHOWING BY MONTHS, NUMBER OF LABOUR ORGANIZATIONS FORMED IN CANADA DURING 1903, 1904, 1905, 1906 and 1907.

Month.	Number of Organizations Formed.				
	1903	1904	1905	1906	1907
January.....	25	13	18	6	23
February.....	17	15	2	7	15

April.....	43	10	8	7	12
May.....	25	14	13	15	13
June.....	22	10	7	7	20
July.....	21	7	7	15	13
August.....	11	11	6	17	14
September.....	9	7	7	11	11
October.....	17	5	6	24	15
November.....	9	9	7	3	8
December.....	5	2	3	5	8

\* See *Labour Gazette* for February, 1907, page 880.

It will be seen that the month of January, with a record of 23 new organizations, June with 20, March with 19, February and October with 15 each, August with 14, and May and July with 13 each, were the most active months for labour organization during 1907. Compared with 1906, every month, with the exception of May, July, August and October, showed an increase.

#### **Operations of Central Organizations During 1906.**

The following table, based upon the detailed returns presented herewith of the labour organizations formed and dissolved during 1906, shows the num-

ber of charters issued in Canada by certain central international organizations during 1907. A record of the number of charters withdrawn by or returned to these organizations is also given, only such unions being included as the Department has secured full information concerning, and no record being made of affiliations with either of the trades and labour congresses of Canada. (\*).

The Provincial Workmen's Association organized one lodge during 1907.

The Federation of Textile Workers of Canada organized 10 branches and disbanded 2.

---

\*Statements relating to the membership of the Trades and Labour Congress of Canada and the National Trades and Labour Congress of Canada during 1906-1907, appeared in the October, 1907, issue of the Labour Gazette at pages 425-6 and 434 respectively.

Inter. Bro. of Boilermakers and Iron Shipbuilders, Helpers Div., No. 211.	Toronto, Ont.	Aug. 1906	Dissolved in January 1907, through non-attendance of members.
Inter. Bro. of Boilermakers and Iron Shipbuilders, Helpers Div.	Collingwood, Ont.	Mar. 1903	Omitted from official list in 1907.
Inter. Bro. of Boilermakers and Iron Shipbuilders, Helpers Div.	Collingwood, Ont.		Omitted from official list in 1907.
Inter. Bro. of Boilermakers and Iron Shipbuilders, Helpers Div.	Victoria, B.C.	Sept, 1902	Omitted from official list in 1907.
Inter. Bro. of Electrical Workers, No. 510.	Toronto, Ont.	Aug. 10, 1906	Dissolved May 9, 1907, owing to non-attendance of members.
Inter. Bro. of Electrical Workers, No. 529.	Niagara Falls, Ont.		Omitted from official list in 1907.
Inter. Union of Steam Engineers, No. 258.	Winnipeg, Man.	May, 1904	Union reported by secretary as suspended, August 31, 1907.
Marine Firemen, Oilers & Water Tenders, No. 575.	Midland, Ont.	Feb. 18, 1904	Union suspended for non-payment of capitation tax and lack of interest by members; charter still retained.
Inter. Jewellery Workers' Union, No. 7.	Toronto, Ont.		Dissolved through falling off in membership.
<i>The Woodworking and Furnishing Trades—</i>			
Amal. Inter. Woodworkers Union, No. 34, (Piano workers)	Toronto, Ont.	Sept, 1895	Omitted from official list in 1907.

Inter. Wood Carvers' Assoc.....	Berlin, Ont.....	Oct. 1899.....	Dissolved in June 1907, the introduction of wood-carving machines having reduced the membership
<i>The Printing and Allied Trades—</i> Inter. Typographical Union, No. 358.....	Greenwood, B.C.....	Dec. 1899.....	Dissolved in January 1907 owing to non-payment of dues and assessments. The union included printers in Grand Forks and Phoenix
Lithographers Inter, Protective Assoc., No. 27.....	Montreal, Que.....	May, 1903.....	Reported by Secretary as dissolved during 1907.
Inter. Bro. of Pulp and Paper Workers, No. 51.....	Grand Mere, Que.....	Nov. 9, 1903.....	Amalgamated with Paper Makers, Lodge No. 38, during 1907.
<i>The Clothing Trades—</i> Journeyman Tailors Union of America.....	Port Hope, Ont.....	Jan. 8, 1907.....	Affiliated with Peterborough Lodge.
Journeyman Tailors Union of America, No. 388.....	Sault Ste. Marie, Ont.....	Aug. 1, 1903.....	Reported dissolved in January, 1907.
United Garment Workers of America.....	Berlin, Ont.....	June 18, 1903.....	Union dissolved in April 1907, members leaving with the South Gate firm.
Fur Workers' Union, No. 11,640 (A. F. of L.).....	Sandwich, Ont.....	Apr. 25, 1904.....	Union has ceased to meet, though charter has not been handed in.
<i>The Textile Trades—</i> Federation of Textile Workers of Canada, No. 20.....	Coaticook, Que.....	.....	Dissolved in 1907.
Federation of Textile Workers of Canada, No. 15.....	Point St. Charles, Que.....	Mar. 23, 1907.....	Dissolved in 1907.
National Union of Textile Workers.....	St. Hyacinthe, Que.....	June, 1903.....	Amalgamated with branch of Canadian Textile Workers Association formed in May, 1907.
<i>The Leather Trades—</i> Bro. of Leather Workers, Saddlers' Union, No. 43.....	Montreal, Que.....	Dec. 1, 1899.....	Dissolved, Jan. 1, 1907, owing to discrimination of Employers.
<i>The Railway Service—</i> Bro. of Railway Carmen, No. 306.....	Sydney, N.S.....	Jan. 21, 1905.....	Charter lapsed, July, 1907, through non-payment of dues.
Inter. Bro. of Maintenance of Way Employees, No. 191.....	St. Leonard, N.B.....	Mar. 1901.....	Consolidated with other lodges.
Inter. Bro. of Maintenance of Way Employees, No. 187.....	Farnham, Que.....	1902.....	Amalgamated with lodge No. 187 at Farnham.
Inter. Bro. of Maintenance of Way Employees, No. 307.....	St. Hyacinthe, Que.....	.....	Consolidated with other lodges.
Inter. Bro. of Maintenance of Way Employees, No. 228.....	Lake Megantic, Que.....	.....	Consolidated with other lodges.

Inter. Bro. of Maintenance of Way Employees, No. 179.....	Yale, B.C.....	Feb. 1901.....	Amalgamated with lodge No. 168 at Mission City B.C.

TABLE OF LABOUR ORGANIZATIONS DISSOLVED IN CANADA DURING 1907.

Name and Class of Organization.	Locality.	Date of Organization.	Particulars relating to dissolution.
<i>Street Railway Employees</i> — National Union of Street Railway Employees.....	Hamilton, Ont.....	Feb. 16.....	Reported inactive at annual convention of National Trades & Labour Congress held in September, 1907.
<i>Miscellaneous</i> — Retail Clerks, Inter. Protective Association..... Retail Clerks' Inter. Protective Association..... Retail Clerks Association (Independent).....	Hamilton, Ont..... Brantford, Ont..... Berlin, Ont.....	Ju. 3, 1904..... Mar. 1907..... May, 1, 1906.....	Suspended May 1. Suspended May 1. The members lost interest in the union after an early closing arrangement had been granted. A branch of the Retail Clerks' Inter. Assoc., formed in 1901, dissolved in 1905 owing to non-payment of dues.

CHANGES IN RATES OF WAGES AND HOURS OF LABOUR, CANADA.—  
FOURTH QUARTER, 1907.

IN the accompanying statistical table detailed information is presented relating to changes in rates of wages and hours of labour reported to the Department of Labour as having gone into effect during the fourth quarter of the present calendar year, including the months of October, November and December, 1907.

The General Result.

Though a number of important increases in wages went into effect during the quarter, the general tendency of wages was in a downward direction, the cause being the general falling-off in activity resulting from the stringency in the money market. The wages of unskilled labour, the class chiefly affected by these conditions, were in many localities from 20 to 25 per cent lower than at the corresponding period of 1906. In the lumbering industry throughout Canada wages were downward, being from \$5 to \$10 per month lower in Ontario and Quebec than in the preceding year. The less skilled employees in the manufacturing industry

were similarly affected. In the metaliferous mines of British Columbia, wages were reduced; but as a substantial increase was granted to these classes during the month of July last, the rate in December remained the same as in the closing months of 1906. Mica pickers and sorters had their wages reduced, owing to the prevailing stagnation in the market for the product. On the other hand, the upward tendency of wages among railway employees, which was so marked during the third quarter of the year, was continued during the closing months, yardmen and switchmen throughout the Grand Trunk Railway system and carmen and telegraphers employed by the Canadian Pacific Railway Company being among those who received advances.

In the following tabular statement an analysis is presented showing the approximate aggregate results according to industries and groups of trades of the several changes of the quarter in so far as detailed information was obtained by the Department:—

TABLE SHOWING, BY INDUSTRIES AND GROUPS OF TRADES, THE RESULTS OF CHANGES IN WAGES AND HOURS OF LABOUR, CANADA, DURING THE FOURTH QUARTER OF 1907.\*

Industry or Group of Trades.	Approximate Number of Workpeople Affected	Total increase in Weekly Earnings.	Total decrease in Weekly Earnings.	Total increase in Hours of Employment. Per Week.	Total decrease in Hours of Employment. Per Week.
Lumbering.....	2,100	.....	\$4,200	.....	.....
Mining.....	3,080	.....	6,600	.....	.....
Building.....	585	\$167,50	.....	.....	.....

General transport.....	1,000	.....	.....	.....	.....
Civic employees.....	100	150	.....	.....	.....

\*Account is taken in this table only of changes concerning which detailed information was obtained by the Department. The returns are to be regarded as approximate only.

Changes by Industries and Trades.

The following is a statement of the changes in wages and hours of labour reported to the Department as having gone into effect during the fourth quarter

of 1907, according to the several industries and groups of trades affected:—

*Agriculture.*—The wages of farm labourers were somewhat lower during the autumn months than in 1906. Labour-

ers, during the threshing season in western Canada, were paid \$2.00 per day, whereas the average rate during the scarcity of labour which prevailed in the preceding year was \$2.25.

**Lumbering.**—Wages in the lumber camps of Ontario were from \$5 to \$10 per month lower than at the corresponding period of 1906. In Quebec and New Brunswick, also, wages were somewhat lower than last year. In British Columbia, there was a very marked falling-off in production, a large number of camps and mills having closed down. In a few of the mills which continued running, the wages of Chinese and Japanese employees were reduced from \$1.75 to \$1.40 per day.

**Mining.**—Female employees in mica trimming and picking factories at Ottawa, Ont., and vicinity, had their wages reduced 20–25 per cent. Block makers and trimmers had their wages reduced 4 cents per pound. The reduction was a result of unfavourable market conditions for mica in the United States.

In the coal mining industry of Alberta, some important agreements were signed during December, with the effect of increasing the living wage of employees. These agreements were granted after investigations by boards appointed under the Industrial Disputes Investigation Act, 1907. The companies affected were the Canada West Coal and Coke Company, employing 150 men; the Domestic Coal Company, Taber, Alta., employing 50 men; Duggan, Huntrod & Company, Taber, Alta., employing 40 men, and the Strathcona Coal Company, Limited, Strathcona, Alta., employing 40 men (1). A new agreement was similarly effected during November between the Hillcrest Coal and Coke Company, Limited, Hillcrest, B. C., and its employees (2). In October, 100 miners in the Hosmer mines B. C., obtained a new schedule after an investigation by a board appointed under

the Industrial Disputes Investigation Act (3).

In the metalliferous mines of British Columbia, the unfavourable conditions prevailing in the market for copper and other minerals had the effect of reducing the amount of employment, and in some cases the rates of wages paid to the miners. At Rossland, B. C., a reduced scale was accepted by the miners from December 1, the new rate being that which was in force prior to July 1, 1907. Timbermen and hoistmen were reduced from \$24 to \$21 per week, and common labourers from \$19.50 to \$18 per week. Blacksmiths were reduced from \$4.25 to \$4.00 per day, and their helpers from \$3.50 to \$3.25. Carpenters were reduced from \$4.00 to \$3.50. Smeltersmen employed at Trail, B. C., also agreed to a reduction. The nature of the latter change is shown in the following table:—

	New Rate	Old rate.
<b>Copper furnace employees:</b>		
Furnacemen.....	4.00	4.00
Matte pot-pullers.....	3.25	3.50
Slag spoutmen.....	2.75	3.00
Claymen.....	2.75	2.75
First feeders.....	4.00	4.00
Second feeders.....	3.25	3.50
Car fillers.....	3.25	3.50
Locomotive motormen.....	3.00	3.25
Charge wheelers.....	2.75	3.00
All other labour.....	2.50	2.75
<b>Lead furnace employees:</b>		
Furnacemen.....	4.00	4.00
Tappers (slag).....	3.50	3.50
Buillion handler.....	3.00	3.00
Head feeder.....	4.00	4.00

Sheet hangers.....	2.75	3.00
Sheet casters.....	2.75	3.00
Slime roaster men.....	2.75	3.00
Antimony tank men.....	2.75	3.00
Dore furnace helpers.....	2.75	3.00
Blue vitroil man.....	2.75	3.00

but operations were resumed under the new schedule on December 29, 1907. The scale is about the same as that which went into effect during November at the mines in Rossland, B. C., and at the smelter in Trail, B. C., and is the same as was in force in December, 1906, hours of labour being unchanged. In brief, the reduction was from \$4 to \$3.50 for ordinary machine men in the mine, from \$3.30 to \$3 for muckers, from \$4 to \$3.60 for smeltermen, and from \$3 to \$2.50 for common labourers. The present scale of wages in effect at the Company's mines at Phoenix, B. C., is as follows:—

Class of Labour.	Wages per day.
Miners sinking.....	\$4.00 8 hrs.
Machine men.....	3.50 "
Barmen.....	3.75 "
Muckers.....	3.00 "
Nippers.....	3.25 "
Chuteman.....	3.25 "
" helper.....	3.00 "
Timbermen.....	3.50 "
" helper.....	3.00 "
Drivers, underground.....	3.00 "
Blasters.....	4.00 "
" helpers.....	3.25 "
Skip tenders.....	3.50 "
Pumpmen.....	3.25 "
Compressor Engineers.....	4.00 "
Motormen.....	3.50 "
Head brakeman.....	3.25 "
Back brakeman.....	3.00 "
Firemen.....	3.25 "
Steam motormen.....	4.00 "
Hoisting double drum.....	4.00 "
Hoisting single drum.....	3.50 "
Pipemen underground.....	3.50 "
Trackmen.....	3.50 "
" helpers.....	3.00 "
Hammersmen.....	3.50 "
Topmen.....	3.00 "
Ditcher.....	3.50 "
Blacksmiths.....	4.00 9 hrs.
" helpers.....	3.25 "
Men on steel sharpener.....	3.75 "
Labourers.....	3.00 "
Carpenters' helpers.....	3.25 "
Carpenters.....	4.00 "
Machinists.....	4.00 "
Electricians' helpers.....	3.50 "
Crushermen's helpers.....	3.00 "
Crushermen.....	3.50 "
Teamsters.....	3.25 "
Teamsters' helpers.....	3.00 "
Fitters on surface.....	3.50 "
Railroad dump car loaders.....	3.00 "
Millmen.....	4.00 "
Millmen's helpers.....	3.50 "
Oiler.....	3.00 "
Watchmen.....	3.00 12 hrs.

A dispute with regard to wages, which had arisen between the Canadian Consolidated Mining and Smelting Company of Moyie, B. C., and some 350 to 400 of its employees working in and around the St. Eugene mine, was referred during the quarter for settlement under the Industrial Disputes Investigation Act, 1907, the result being that an agreement was signed during December providing for a sliding scale of wages in accordance with conditions in the metal market. Under current conditions, a reduction of 50 cents per day from the existing rate was recommended. The effect of the decision of the Board was felt in other mining districts of Kootenay and Yale, especially in the Boundary district (\*).

The Granby Consolidated Smelting, Mining and Power Company, Limited, operating a smelter at Grand Forks, B.C., and mines at Phoenix, B. C., notified its miners and smeltermen of a reduction in wages early in December. The men at first refused to accept the reduced scale,

The scale of wages in effect at the smelter at Grand Forks, B. C., is as follows:—

(\* A copy of the agreement and wages schedule was published in the January, 1908, *Labour Gazette*, page 792.

Hrs.	Class of Labour.	per day.

The miners of the Western Fuel Company signed a two years' agreement dating from October 1, 1907, under which the men will not be required to pay for transportation to work, for which \$1.00 per month was previously charged. The bonus of 10 per cent which was granted in the spring was conceded for the two years' period. (\*)

*The building trades.*—Carpenters at Ottawa, Ont., had their wages reduced from 30 to 25 cents per hour from December 1. At Toronto, Ont., some 250 plumbers who went on strike in May for an advance in scale from 32½c. to 45c. per hour, obtained the increase during the autumn months, about 500 others remaining on strike.

*The metal and woodworking trades.*—As a result of the falling off in activity in the manufacturing industry, owing to the money stringency, a number of employees in the metal and woodworking trades had their wages decreased, though the unskilled classes employed about manufacturing establishments were chiefly affected. Among instances of reductions in scale which went into effect in this connection during the quarter, the following may be cited:—

At Fredericton, N. B., the employees of R. Chesnut & Son had their wages reduced about one dollar per week. At St. Johns, Que., and Shawinigan Falls, Que., some reductions went into effect. At Brantford, Ont., employees of the Cockshutt plough factory and of the Brantford Screw Company were reduced 10 per cent, while employees of the Adams' Wagon Company were reduced 10 cents per day. At Guelph, Ont., 300 piano and organ makers, employed by the Bell Piano and Organ Company, were reduced 5 per cent in wages in December.

(\*) A copy of this agreement was published in the October, 1907, issue of the *Labour Gazet* at page 455.

At Berlin, Ont., employees of the H. Kruge Company, the Berlin Furniture Company, the Anthies Furniture Company, the Waterloo Furniture Company and the Berlin Button Company, aggregating 310 employees, had their wages reduced 10 per cent. At Chatham, Ont., the wagon company's employees were reduced in wages. Up to the end of the year, the decline in industrial activity was evidenced by reductions in the number of employees and in the number of working hours rather than in reductions in wages schedules.

*The clothing trades.*—Journeymen tailors at Kingston and Windsor, Ont., had their wages increased by 15 per cent in the former case and by 5 per cent in the latter. The increase at Kingston was granted to 16 employees, including 10 females, and the increase at Windsor to 60 employees, including 15 females. The change at Kingston was granted by two firms after a strike. In Windsor, the increase amounted to 50 cents in piece work prices on certain overcoats and coats, and 25 cents on certain other coats.

*The printing trades.*—At Guelph, Ont., a three years' agreement was signed by which printers, including ad., book, job and machine men, obtained an increase of 50 cents per week from October 1, 1907, with a further increase of 50 cents per week on October 1, 1908, and a further increase of \$1.00 per week on October 1, 1909 (6). At Ottawa, Ont., the Free Press Company, Limited, and the Mortimer Company, Limited, voluntarily granted an eight-hour day to pressmen, press feeders, bindery workers, etc. At Winnipeg, Man., bookbinders and cutters obtained a similar concession during October, after a strike.

*The leather trades.*—Larrigan makers (70) at Fredericton, N. B., received an increase of 10 per cent in wages.

*Railway service.*—Several important changes went into effect during the quarter, all of them being in the nature of increases.

Locomotive engineers and firemen (35) employed by the Temiscaming and Northern Ontario Railway received an increase in wages as follows:—

	Engineers		Firemen.	
	Old rate.	New rate.	Old rate.	New rate
Per 100 Miles				
Passenger train ..	\$3.40	\$3.40	\$2.10	\$2.20
Work train.....	3.55	3.65	2.20	2.30
Freight, mixed or snow plow	3.55	3.95	2.20	2.30
Way freight.....	3.55	.15	2.20	2.60
Switching ..	3.55	3.50	2.20	2.20

Telegraphers on the same railway had their minimum wages increased from \$45 to \$55 per month.

Yardmen in the employ of the Grand Trunk Railway Company, east of St. Clair and Detroit rivers, were increased 12 per cent from November 1; about 384 men were affected by the change.

A general increase of 14 per cent from October 1, 1907, was granted by the Canadian Pacific Railway Company to the telegraphers in its employ, as a result of a reference under the Industrial Disputes Investigation Act. Some 2,500 men were affected, and the approximate increase was estimated to amount to \$189,000 annually. The agreement made arrangements for an annual holiday and for the

allowance of double time for Sunday labour (6).

Under the terms of the findings of a Board established under the Industrial Disputes Investigation Act, 1907, to adjust certain differences between the Canadian Pacific Railway Company and its western carmen, a nine-hour day was granted to the employees in question, with the exception of relay men, dating from November 1, 1907, the rate of wages remaining unchanged (7).

(6) A copy of this agreement was published in the October, 1907, issue of the *Labour Gazette*, at page 455.

(7) A special article dealing with the award under which this change took effect was published in the November 1907, issue of the *Labour Gazette*, page 537

(7) For the full text of the agreement see *Labour Gazette* for January, 1908, page 805.

## CHANGES IN RATES OF WAGES AND HOURS OF

CLASS OF WORKPEOPLE AFFECTED	LOCALITY	Approximate Number of Work-people affected	Date from which change took effect	PARTICULARS OF CHANGE.

\*\*See detailed statement in accompanying article.

†See the *Labour Gazette* for January, 1908, p. 854.

Blacksmiths in the employ of the same company received a schedule of 42 cents per hour in Winnipeg and the eastern district, 46 cents per hour in the central district, and 43½ cents per hour in the western district. Helpers were granted a rate of 25 cents per hour in Winnipeg and the eastern district, 27 cents per hour in the central district and 26 cents per hour in the western district. The increase in the case of helpers amounted to 3½ cents per hour all round. In the case of blacksmiths, the increase amounted to 7 cents per hour at Winnipeg, 11 cents per hour in the central district, and from 5 to 5½ cents per hour in the western district.

Section men and snow shovellers (15) at Hull, Que., employed by the same company, were advanced from \$1.35 to \$1.50 per day.

*General transport.*—One thousand longshoremen at St. John, N. B., received an increase in wages from 32 to 32½ cents per hour dating from December 4.

*Street railway employees.*—Motormen and conductors in the employ of the St. John, N. B., Street Railway Company, to the number of 160, had their wages increased dating from October 15. Under the old agreement, first year men were paid 15½ cents per hour; after two years,

16½ cents per hour; after 3 years, 18 cents per hour, and after 5 years, 18½ cents per hour. Under the new schedule, first year men are paid 16½ cents per hour; after the first year the rate is 17½ cents, and after 2 years, 19 cents per hour.

*Civic employees.*—Scavengers to the number of 100 in the employ of the city of Toronto, Ont., had their wages increased from \$2.00 to \$2.25 per day of nine hours, dating from December 15.

*Unskilled labour.*—The wages of unskilled labour were on a lower level during the closing quarter of 1907 than in the corresponding period of 1906. Large numbers were affected by these conditions. In the city of Ottawa, Ont., for example, about 1,000 labourers were receiving 20 per cent less than in 1906, and in the Northwest Provinces, upwards of 10,000 men were employed in railway construction and in other outside work were earning about \$10 per month less than in 1906. These conditions were general in localities affected by the cessation of activity which usually takes place in the months of November and December. The numbers out of employment through this cause having been considerably increased during the closing months of 1907 by the falling off in activity in the manufacturing industry.

## INTERVIEW OF TRADES AND LABOUR CONGRESS OF CANADA WITH DOMINION GOVERNMENT

**R**EPRESENTATIVES of the Trades and Labour Congress of Canada were granted an interview on January 30th, by the Right Honourable Sir Wilfrid Laurier, Prime Minister, and the Honourable Rodolphe Lemieux, Minister of Labour, for the purpose of bringing to the attention of the Government of Canada certain resolutions passed at the annual convention of the congress held in September, 1907. The delegation included Mr. A. Verville, M.P., President of the Congress, Mr. P. M. Draper, Secretary, and J. G. O'Donoghue, the solicitor of the Congress.

Among the requests made by the delegates were the following:—

1. The appointment of a Minister of Labour, to give undivided attention to

the work of the Department of Labour. In reply to this request the Prime Minister stated that in the event of a rearrangement of the Departments a separate minister would be assigned to the Department of Labour.

2. That effect be given to the recommendations of the Telephone Commission appointed in 1907. The Minister of Labour pointed out, in reply, that while the matter was largely one for provincial legislation the Railway Commission had charge of rates and would further regulate employment.

3. That a Workmens' Compensation act be enacted by the Dominion parliament, with special reference to employment on railways under the jurisdiction

of the Dominion. Consideration of the request was promised.

4. That the wages of letter carriers be increased. In reply to this request, the Minister of Labour stated that the case of the letter carriers was under consideration by the Civil Service Commission and that he was desirous of dealing generously with them.

5. That the Federal Government appoint inspectors for the purpose of inspecting gear in the loading and unloading of ships and steamers, with a view to the protection of longshoremen. Favourable consideration was promised.

6. That the immigration of Hindus be prevented. In reply it was stated that the effect of a recent order in council would be to prohibit any further immigration of these people. The Japanese question it was further stated by the Minister of Labour, had been definitely settled.

7. That the bonusing of immigrants be abolished. Consideration was promised, it being pointed out by the Minister of Labour that the bonus was paid only to agricultural labourers and domestic servants.

8. That certain amendments to the

Industrial Disputes Investigation Act be carried out. In reply it was suggested that the amendment of this act be postponed until further experience in administering its provisions had been obtained.

9. That a commission on technical education be appointed. Consideration was promised.

10. That an eight hour day law, to apply to work carried on for the Government, be passed. Consideration was promised.

11. That Dominion lands be granted only to bona fide settlers. It was stated by the Minister of Labour that this was the present policy of the Government.

12. That the proposed act respecting industrial and co-operative societies be passed and enlarged so as to permit co-operative banking. Careful consideration of the suggestion with regard to banking was promised, a Government measure being in preparation on the subject of co-operation.

13. That a pension fund for aged persons be established. In reply to this request, the Ministers expressed the opinion that the Dominion was not as yet in need of a system of old age pensions.

#### PENSION DEPARTMENT OF THE GRAND TRUNK RAILWAY COMPANY OF CANADA.

BY legislation passed during 1907 by the Dominion Parliament, the Grand Trunk Railway Company of Canada was granted permission to establish a pension fund for the payment of allowances to employees after leaving the service. The fund, it was required, should be supported out of the gross earnings of the Company by such amounts as the Directors might determine, the sums in question to be regarded as a part of the working expenses of the Company. The Directors were at the same time given power to frame rules and regulations for the administration of the fund. (\*)

In pursuance of this legislation, the sum of £40,000 was set apart by the

Directors during the summer of 1907 as the initial capital required for putting a pension arrangement into operation. Later, a series of rules and regulations were drawn up and were approved by the Directors on December 13, 1907, becoming effective on January 1, 1908. A copy of these rules is as follows:—

1. The Grand Trunk Pension Fund shall subject as hereinafter mentioned be administered by a Pension Committee whose Members shall from time to time be nominated by and hold office during the pleasure of the Board.

2. The first Members of the Pension Committee shall be  
 CHARLES M. HAYS, 2nd Vice Pres. and General Man.  
 E. H. FITZHUGH, 3rd Vice President.  
 W. WAINWRIGHT, 4th Vice President.  
 W. H. BIGGAR, General Solicitor  
 W. G. BROWNLEE, General Transportation Manager.

3. The Office of the Pension Committee shall be at Montreal and the Pension Committee shall from time to time appoint a Secretary to whom at such Office all communications shall be addressed.

\* VI-VII Edward VII, Chap. 89, "An act respecting the Grand Trunk Railway Company of Canada".

4. All actions and decisions of the Pension Committee shall from time to time be reported to the Board for confirmation and when confirmed shall (subject to such modifications if any as may be made by the Board) take effect as from the date of the decision of the Pension Committee.

5. Subject as aforesaid and as hereinafter expressed the Pension Committee shall have power:

To make and enforce rules and regulations for the efficient operation of the Pension Department;

To determine the eligibility of Employees to receive Pension allowances;

To fix the amount of such allowances; and

To prescribe the conditions under which such allowances may be granted;

And they may for the government of their own proceedings make rules not inconsistent with these regulations

6. The benefits of the Pension System will apply to those persons only who are now or hereafter may be in the service of the Company and who have been required to give their entire time and attention to the business of the Company or of the Company and some Controlled Company jointly. In cases of such joint employment the Pension Committee will decide the amount of the Employees pay to be taken into account in determining the Pension allowance.

7. It is intended that in future all officers and employees shall be compulsorily retired on reaching the age of 65 years. The Pension Committee may however, retain any officer or employee, with his consent, in the service of the Company for a further period not exceeding in any case, five years.

8. The Pension Committee shall have power under special circumstances to retire an Employee prior to his reaching the age limited by Article 7, and any Employee after the age of 60 years with not less than 20 years continuous service claiming to be unfitted by reason of permanent physical or mental disability from following his usual or any other suitable employment in the Company's service shall be retired if the Company's Chief Medical Officer shall certify to such disability as aforesaid.

9. Any Employee after 10 years continuous service, who shall become incapable of continuing his service by reason of injuries received whilst actually at work in the employment of the Company, shall, so long as his incapacity shall continue, be eligible for Pensions or Allowances as hereinafter expressed.

10. All Employees aged 50 years or upwards and who shall have been for 15 years or upwards in the continuous service of the Company may on their discharge (otherwise than for misconduct) be considered eligible for Pensions or Allowances as hereinafter expressed.

11. An Employee retiring under Rule 7, provided he shall have been not less than 15 years in the Company's service, and an Employee retiring under Rule 8 or entitled under Rules 9 and 10, may be granted an annual pension or allowance calculated at the rate of 1% for each year of continuous service on the highest average rate of his wages or pay during any ten consecutive years of service, the calculation to be made on the gross amount from time to time credited to the Employee on the Pay Rolls without deduction of any kind.

(Example)—An Employee in continuous service from the age of 30 years to 70 with the highest average rate of wages between 40 and 50 of \$1,000.00 per annum, would receive forty hundredths of \$1,000.00 or \$400.00 per annum.)

12. For the purpose of ascertaining the length of service of an Employee, the period of service, if any, of the Employees under the Grand Trunk Western Railway Company, the Detroit Grand Haven and Milwaukee Railway Company or any other Railway Company controlled by the Company shall be considered as if such service had been for the Company.

13. No Pension shall be at lower rate than \$200.00 per annum.

14. No Employee who sues the Company for damages on account of personal injuries sustained by him in the course of his service will have any claim for pension or allowance under these Rules.

15. Pensions will be payable monthly in arrear at some Station of the Company's System. Pensions at the request of the recipient paid elsewhere will be subject to the deduction of the cost of transmission.

16. The date of the compulsory retirement of any Employee and of the commencement of his Pension will be the first day of the Calendar month following that on which the specified age is attained.

17. Absence on leave, suspension or discharge followed by reinstatement within a year or temporary lay-off on account of reduction of force, when unattended by other employment, will not be considered as a break of continuity of service.

18. No Pension or Allowance shall be assignable, and in the event and during the continuance of any seizure attachment or garnishment, will cease to be paid.

19. The pension Committee may also withhold permanently or temporarily the payment of any pension or allowance in case of any misconduct on the part of the recipient of the same of any action on his part inimical to the interests of the Company.

20. The Secretary shall keep himself informed of the whereabouts of all Employees who have been retired from the service, and shall require satisfactory evidence from each of such Employees at least once a year that he still comes within the Rules and Regulations.

21. The acceptance of a pension allowance does not debar a retired Employee from engaging in other business but such retired Employees cannot so engage in other business nor re-enter the service of the Company except with the consent of the Pension Committee, without forfeiting his pension allowance.

22. It is not intended in future to appoint to the permanent staff of the Company any person above the age of 50 years.

23. It is expressly provided that neither by establishing out of its revenues a system of Pensions by the Company, nor by any other action now or hereafter taken by them or by the Pension Committee, shall it be construed as giving to any Official, Agent or Employee of Company a right to be retained in the service or any legal right or claim to have any pension whatsoever, and the Company expressly reserves its right and privilege to discharge at any time such Official, Agent or Employee when the interests of the Company in its judgment may so require, without liability for any claim for pension or other allowance than salary or wages due or unpaid.

24. The foregoing Rules are not intended to apply to Employees who are now eligible for pensions from the Superannuation and Provident Fund Association established in connection with the Company so long as they remain so eligible, and they will therefore not be deemed entitled to pensions or allowances under these present Rules unless and until they withdraw from the said Superannuation and Provident Fund Association.

RECENT INDUSTRIAL AGREEMENTS.

**Intercolonial and Prince Edward Island Railways—Rules and Rates of Pay for Maintenance-of-Way Employees.**

THE following is the text of an agreement between the Intercolonial and Prince Edward Island Railways and their Maintenance-of-Way Employees, which became effective on April 1, 1907:—

1. All persons who take their orders from the Trackmasters, or from Foremen who are subject to the Trackmasters, will be considered employees of the Maintenance of Way Department.

2. (a) Employees, if competent, will be promoted on the Division on which they are employed to any position that may become vacant, or to any new position in the same class of service that may be created. But when a competent man is not found on the Division on which a vacancy occurs, a man may be transferred or promoted from another Division and in case of such transfer, or promotion, the man shall not lose his seniority. Seniority will govern where both ability and character are equal. The Railway Management shall decide as to competency and character.

(b) A list of all employees will be prepared for each Trackmaster's Division, and such lists will show the seniority standing of each employee. The lists will be revised from time to time to agree with length of service and promotions made, and a copy will be furnished each Trackmaster and the representative of employees. These lists will be subject to correction on proper representation. The several senior qualified men shall be advised of any vacancies in the position of foreman, and their applications, if presented within five days from receipt of such notice, will be considered.

3. Employees refusing promotion that may be offered them become junior to employees accepting such promotion, and need not be further considered, except at the option of the Management.

4. An employee going from one division to another at his own request, will be considered as a new man on the division to which he goes, and he will lose his seniority on the division which he leaves.

5. Employees who are unable to read and write English or French need not be retained or promoted.

6. Persons leaving the service, if again employed, will rank as new men.

7. Ten hours shall constitute a day's work, except for Watchmen, and where two relays of men cover twenty-four hours, in which cases twelve hours shall constitute a day's work.

8. The hours for commencing and quitting work will be at the discretion of the Management.

9. Monthly rated employees will not be entitled to additional pay for extra time worked but will be given consideration in the event of loss of regular time from good cause, all such cases to be decided by the Management.

10. Fractions of a month will be figured upon the working days in the month.

11. Employees will not be required to work more than twenty-four consecutive hours without rest.

12. Employees required to work longer than the specified hours will be paid at the rate of time and a half from their regular quitting time until their regular time for going to work. Time and a half will be paid for Sunday work, except for track walking.

13. For Sunday track walking, when required one day will be allowed on each section at Trackman's rate.

14. An employee relieving a Track Foreman temporarily (by instructions from the Trackmaster), provided the Foreman is not paid for the same time, will receive the Foreman's rate of pay, and twenty-five cents per day additional when away from home.

15. Employees having designated points between which they are to work, when taken from these assigned limits, their time shall count from time they are taken beyond the limits, until they are returned to the limits, excepting any time that is given them for rest.

16. Employees required to attend to and light semaphore and switch lamps, before or after their regular hours, will receive therefor four dollars per month for four or less lamps, and fifty cents per month per lamp for those in excess of four. Where lamps are located at a distance from employee's residence, they will be attended to in regular working hours. The Management may, however, at any time, require all lamps to be attended to within the regular working hours.

17. Employees suspended, fined, or dismissed will be advised of the cause; if they feel an injustice has been done them, they may within fifteen days call for an investigation. The Management agree that an investigation will be held within fifteen days after the application is received. Should the investigation show that the discipline was unjust (the Management to be the judge) the injured employee will be reinstated and paid his full time, but not more than one day in each twenty-four hours. Applications for investigation, or appeals from decisions, must be made in writing to the Trackmaster.

18. Section Foremen in charge of extra gangs (not to mean extra men added to a regular gang) will be paid at extra gang Foreman's rate, and, when away from home, will be paid twenty-five cents per day additional, but no allowance for board or lodging. Other regular employees sent away from home to work on snow or tie trains or other work will be compensated for the additional board or lodging expenses they necessarily incur, but not to exceed twenty-five cents for each meal or bed.

19. Men in charge of wing plows, flangers and yard plows, when in operation, to be paid two dollars and ninety cents per day; other men employed in wing plows, when in operation, will be paid fifty cents per day in addition to their regular rate of wages. Ten hours to constitute a day's work, and time on duty over ten hours to be reckoned *pro rata*. In this case rule No. 12 does not apply.

20. Leave-of-absence and free transportation will be granted over the Government Railways for its employees who may be duly appointed to attend the meetings of their Association, so far as can be done without inconvenience to the Railway.

21. Where the Railway provides houses for its employees, the occupants must keep the closets and surroundings neat and clean.

RATES OF PAY.

	Per d
YARD SECTION FOREMEN at Sydney, North Sydney, Point Tupper, Mulgrave, New Glasgow, Stellarton, Pictou, Halifax, Richmond Truro (No. 14), Truro (No. 147), Springhill Junction, Amherst, Point du Chêne, Moncton, St. John (No. 218), St. John (No. 219), Campbellton, Ste. Flavie, Rivière du Loup, Lévis, Chaudière Junction, Charlottetown, Georgetown, and Summerside	\$2.40

FOREMEN OF TRACK CARPENTERS elsewhere.....	2.75
TRACK CARPENTERS, skilled mechanics with kit of tools.....	2.25
ROUGH CARPENTERS, wharfmen.....	1.50 to 1.70
Where Foremen Track Carpenters are now allowed an amount for expenses, the same will be continued.	

### Scale of Prices of Quebec Typographical Union No 302.

The following scale of prices was adopted at a special meeting of Quebec Typographical Union on January 16, 1908, and ratified by the Master Printers, January 17, 1908. The agreement will be in effect from January 20, 1908, to January 20, 1910.

Clause 1st.—No member of this Union shall work for a less sum than \$12.00 per week, forty-eight hours to constitute a week. All deductions for lost time to be made in proportion to the week's wages. All overtime to be paid for at the rate of 33 cents per hour. When men put in their time at night work, their wages to be not less than \$14.25 for forty-five hours per week, seven and a half hours to constitute a night's work. On coming back to work in daytime, the men shall receive a minimum of half a night's pay.

Clause 2d.—The minimum wages for piece hands shall be 35 cents per 1,000 ems. day work, and 40 cents for night work. The duplicate system to be in force.

Clause 3d.—No member of this Union shall be allowed to act as foreman of any office, or in any department of any office, for a less sum than the following: On day work, \$15.00 per week; on morning newspapers, \$17.00 per week. All overtime to be paid for at the rate of 40 cents per hour.

Clause 4th.—Double price per hour shall be paid for work on Sunday, New Year's Day, Christmas and Labour Day, and no piece work shall be permitted.

### LINOTYPE PIECE SCALE.

Agate to Brevier, morning, 10 cents per 1000 ems.
Agate to Brevier, evening, 8 cents per 1000 ems.
Bourgeois and Long Primer, morning, 12 cents per 1000 ems.
Bourgeois and Long Primer, evening, 9 cents per 1000 ems.
Small Pica and Pica, morning, 12 cents per 1000 ems.
Small Pica and Pica, evening, 10 cents per 1000 ems.
Overtime: Price and a half. 7½ hours to constitute a night's work.

### MONOLINE PIECE SCALE.

Agate to Brevier, morning, 11 cents per 1000 ems.
Agate to Brevier, evening, 9 cents per 1000 ems.
Bourgeois and Long Primer, morning, 12 cents per 1000 ems.
Bourgeois and Long Primer, evening, 10 cents per 1000 ems.
Small Pica and Pica, morning, 13 cents per 1000 ems.
Small Pica and Pica, evening, 11 cents per 1000 ems.
Overtime: Price and a half. 7½ hours to constitute a night's work.

### TIME SCALE FOR MACHINES.

Morning: \$16.00 per week. 7½ hours per night, 6 nights to constitute a week. Overtime: 50c. per hour.
Evening: \$14.00 per week. 8 hours per day, 6 days to constitute a week's work. Overtime: 40c. per hour.

Learners on morning papers shall be paid \$12.00 per week, 7½ hours to constitute a night's work. Learners on evening papers, \$11.00 per week, 8 hours to constitute a day's work. Apprenticeship: Twelve weeks.

When machine is out of order or waiting for copy, operator to be paid for the time he worked at the machine as operator, then he will finish his day's work at the case, and will receive the salary of compositors working at the case.

All overtime to be reckoned on scale as printed above.

The news and jobbing departments of the following establishments have signed the above agreement: Le Soleil, L'Evenement, Daily Telegraph, Morning Chronicle, L'Action Sociale, La Libre Parole, and La Vigie. Madame Chasse, T. J. Moore & Co., P. Larose, Laflamme & Proulx and Jos. Mercier have also signed.

IMMIGRATION AND COLONIZATION.

Of special interest in the following statistical tables are the returns showing the total volume of immigration to Canada during the calendar year 1907, the total emigration from Great Britain to British North America, and the total number of homestead entries made in western Canada.

Immigration has shown the large increase of 61,464, or 28%, the gain being entirely in arrivals at ocean ports, arrivals from the United States having shown a decrease of 11% compared with 1906. For the past seven years the returns have been as follows:—

Year.	Tots..
1901.....	49,000
1902.....	67,000
1903.....	127,000
1904.....	131,000
1905.....	150,000
1906.....	216,000
1907.....	277,376

British emigration increased from 141,786 in 1906 to 185,806 in 1907. These are the heaviest returns ever recorded. Homestead entries, on the other hand, were fewer by 12,598 in 1907, than in 1906.

Recent Immigration Returns.

Immigration through ocean ports during December, declared for Canada, was as follows:—

IMMIGRATION RETURNS DURING DECEMBER 1907.

	Male	Female	Children under 12	Total.
Immigrants.....	3,886	1,284	929	6,099
Returned Canadians....	353	105	59	517
Tourists.....	193	14	15	222
Totals.....	4,432	1,403	1,003	6,838

A summary of immigration proper through ocean ports, declared for Canada, from April to December, 1907, is as follows:—

IMMIGRATION BY OCEAN PORTS APRIL, DECEMBER, 1906-07.

	Male	Female	Children under 12	Total
April.....	24,972	5,052	4,414	34,438
May.....	28,744	7,153	6,858	38,755

By ocean ports.....	131,017	
From the United States.....	49,647	180,664
Increase, 1907.....		54,664
Percentage of increase.....		30%
Percentage of increase by ocean ports.....		44%
Percentage of decrease from the United States.....		5%

**Total Immigration to Canada, 1907.**

The total immigration to Canada during the calendar year 1907, compared with the calendar year 1906, was as follows:—

**TOTAL IMMIGRATION TO CANADA CALENDAR YEAR, 1907,-06.**

1907		
By ocean ports.....	220,825	
From the United States.....	56,551	<b>277,376</b>
1906.		
By ocean ports.....	152,130	
From the United States.....	63,782	<b>215,912</b>
Percentage of increase, 1907.....		<b>28%</b>
Percentage of increase by ocean ports.....		<b>45%</b>
Percentage of decrease from the United States....		<b>11%</b>

**British Emigration Returns.**

During the month ended December 31, 1907, the number of passengers leaving the United Kingdom for British North America, according to official returns of the Board of Trade, was as follows:—

**EMIGRATION FROM GREAT BRITAIN, DECEMBER, 1907 and 1906.**

Nationality.	1907	1906
English.....	1,210	1,227
Scotch.....	212	411
Irish.....	58	94
Total of British origin.....	1,480	1,732
Foreign.....	1,292	1,220
<b>Total.....</b>	<b>2,772</b>	<b>2,952</b>

During the calendar year ending December 31, 1907, the total number of passengers leaving the United Kingdom for British North America, according to official returns of the Board of Trade, was as follows:—

**EMIGRATION FROM GREAT BRITAIN DURING CALENDAR YEAR 1907-08.**

Nationality.	1907	1906
English.....	110,287	88,099
Scotch.....	33,376	22,278
Irish.....	7,503	4,412
Total of British origin.....	151,166	114,859
Foreign.....	34,640	26,906
Nationality not distinguished.....		21
<b>Total.....</b>	<b>185,806</b>	<b>141,786</b>

**Homestead Entries During December, 1907.**

The following statement shows the number of homestead entries made in December, 1907, compared with December, 1906:—

Agency.	1907	1906	Increase	Decrease
Battleford.....	214	150	64	
Brandon.....	11	4	7	
Calgary.....	93	84	9	
Dauphin.....	45	39	6	
Edmonton.....	235	177	58	
Estevan.....	58	62		4
Humboldt.....	134	95	39	
Kamloops.....	6	8		2
Lethbridge.....	143	118	25	
Moose Jaw.....	375		375	
New Westminster.....	7	7		
Prince Albert.....	102	83	19	
Regina.....	85	282		197
Red Deer.....	110	109	1	
Winnipeg.....	96	87	9	
Yorkton.....	135	97	38	
<b>Total.....</b>	<b>1,849</b>	<b>1,402</b>	<b>650</b>	<b>203</b>

It will be seen that there has been a net increase in the number of homestead entries made in December, 1907, compared with 1906, of 447.

A statement of the homestead entries during the calendar year 1907, compared with the calendar year 1906, is as follows:—

**STATEMENT OF HOMESTEAD ENTRIES DURING CALENDAR YEARS 1907 AND 1906 RESPECTIVELY.**

Month.	1907	1906	Increase	Decrease
January.....	1,111	1,903		792
February.....	1,033	2,036		1,003
March.....	1,589	4,018		2,429
April.....	2,594	6,189		3,595
May.....	3,253	4,583		1,330
June.....	4,574	5,369		795
July.....	3,690	4,174		484
August.....	2,814	3,388		574
September.....	2,395	2,595		200
October.....	2,252	3,389		1,137
November.....	2,260	2,966		706
December.....	1,849	1,402	447	
<b>Total.....</b>	<b>29,414</b>	<b>42,012</b>	<b>447</b>	<b>13,045</b>

It will be observed that there has been a net decrease of 12,598 in the number of

homestead entries made during the calendar year 1907, compared with the calendar year 1906.

**Nationalities of Homesteaders.**

The nationalities of homesteaders, as reported by the several agencies of the Department of the Interior in Manitoba, Saskatchewan, Alberta and British Columbia, during the month of December, 1907, were as follows:—

**NATIONALITIES OF HOMESTEADERS IN DECEMBER, 1907.**

Nationalities.	No. of Entries
Canadians from Ontario.....	241
“ “ Quebec.....	25
“ “ Nova Scotia.....	10
“ “ New Brunswick.....	4
“ “ Prince Edward Island.....	2
“ “ Manitoba.....	53
“ “ Saskatchewan.....	80
“ “ Alberta.....	35

<b>Totals.....</b>	<b>1,675</b>	<b>478,523.37</b>

In December, 1906, the number of patents issued was 1,215, covering an area of 218,232.89, showing an increase for the month of December, 1907, of 460 in the number of patents issued, and of 260,290,48 acres in the area patented.

**PROHIBITION OF IMMIGRANTS UNLESS COMING FROM COUNTRY OF BIRTH OR CITIZENSHIP.**

During the month of January, the following order-in-council was passed by the government of Canada prohibiting immigrants from landing in Canada unless they come from the country of their birth or citizenship by a continuous

journey and on through tickets purchased before leaving. (\*).

AT THE GOVERNMENT HOUSE AT OTTAWA,  
WEDNESDAY THE 8TH DAY OF JANUARY, 1908.

Present:

HIS EXCELLENCY THE GOVERNOR GENERAL IN COUNCIL.

WHEREAS Section 10 of the Immigration Act, Chapter 93, Revised Statutes of Canada, 1906, provides that the Governor General in Council may on the recommendation of the Minister of the Interior, make such orders and regulations, not inconsistent with the said Act, as are considered necessary or expedient for the carrying out of the said Act according to its true intent and meaning and for the better attainment of its objects:

AND WHEREAS in pursuance of its objects provision is made in Sections 26, 27, 28, 29 and 30 of the said Act for the exclusion of immigrants whose presence in Canada is for various reasons undesirable;

AND WHEREAS in further pursuance of its objects and in order to meet possible conditions of oversupply of labour at certain seasons, or under certain conditions, and for other reasons, provision is made in Section 20

\* For statement re the application of this exactment see special article elsewhere in the present issue with reference to the recent mission of the Honourable the Minister of Labour to Japan.

for the exclusion by regulation of persons not possessing at least the amount of money fixed in such regulation:

AND WHEREAS ordinarily it is not practicable to enforce the provisions of Section 20 and Sections 26 to 30 inclusive above mentioned except in the case of persons landing in Canada from vessels and coming direct or on through tickets from the country of which they are citizens:

AND WHEREAS present conditions in Canada make it desirable that power should exist to render effective at all times the several provisions of the Immigration Act contained in Section 20 and in Sections 26 to 30 inclusive:

THEREFORE the Governor General in Council is pleased to Order and it is hereby Ordered that whenever in the opinion of the Minister of the Interior the condition of the labour market in Canada is such as to make the application of Section 20 of the Immigration Act desirable, or whenever in the opinion of the Minister of the Interior other conditions exist which in a special degree render necessary the application of Sections 26 to 30 inclusive of the said Act, immigrants may be prohibited from landing or coming into Canada unless they come from the country of their birth, or citizenship, by a continuous journey and on through tickets purchased before leaving the country of their birth, or citizenship.

(Sgd.) RODOLPHE BOUDREAU,  
Clerk of the Privy Council.

THE HONOURABLE  
THE MINISTER OF THE INTERIOR.

## FAIR WAGE SCHEDULE IN GOVERNMENT CONTRACTS AWARDED DURING JANUARY, 1908.

The following is a list of contracts awarded by the Department of Railways and Canals and the Department of Public Works which have received the signatures of both parties, together with the fair wages schedule inserted in each contract, setting forth the minimum rate of wages to be paid to the labourers engaged upon the works. A statement of orders for supplies given by the Post Office Department is added.

### Department of Railways and Canals.

**PAINTING** on District No. 13—New Glasgow to Mulgrave—and on District No. 14—Point Tupper to Sydney—**I. C. Railway**; date of contract, January 8th, 1908; amount of contract, per square yard, buildings, 12c.; bridges, 11c.; contractor, Stephen Veniot, of Pictou, N. S.

#### FAIR WAGES SCHEDULE.

All mechanics labourers or other persons who perform labour in the construction of the work hereby contracted for, shall be paid such wages as are generally accepted as current for competent workmen in the district in which the work is being performed, and if there is no current rate in such district, then a fair and reasonable rate, and shall not be required to work for longer hours than those specified by the custom of the trade in the district where the work is carried on, except for the protection of life or property, or in the case of other emergencies. In the event of a dispute, arising as to what is the current or a fair and reasonable rate of wages, or what are the current hours fixed by the custom of the trade, it shall be determined by the Minister of Labour, whose decision shall be final.

These conditions shall extend and apply to moneys payable for the use or hire of horses or teams, and the persons entitled to payment for the use or hire of horses or teams shall have the like right in respect of moneys so owing to them as if such moneys were payable to them in respect of wages.

In the event of default being made in payment of any money owing in respect of wages of any mechanic, labourer or other person employed on the said work, and if a claim therefor is filed in the office of the Minister of Railways and Canals, and proof thereof satisfactory to the Minister is furnished, the Minister may pay out of any moneys at any time payable by His Majesty under such contract, and the amounts so paid shall be deemed payments to the Contractor.

**Painting** on Districts 5, 6, 8, 9 and 15, **I. C. Railway**, date of contract, January 9th, 1908; amount of contract, schedule rates; contractors, W. S. Kinnear & Son, of Moncton, N. B.

#### FAIR WAGES SCHEDULE.

All mechanics, labourers or other persons who perform labour in the construction of the work hereby contracted for shall be paid such wages as are generally accepted as current for competent workmen in the district in which the work is being performed, and if there is no current rate in such district, then a fair and reasonable rate, and shall not be required to work for longer hours than those specified by the custom of the trade in the district where the work is carried on, except for the protection of life or property, or in the case of other emergencies. In the event of a dispute arising as to what is the current or a fair and reasonable rate of wages, or what are the current hours fixed by the custom of

the trade, it shall determined by the Minister of Labour, whose decision shall be final.

These conditions shall extend and apply to moneys payable for the use or hire of horses or teams, and the persons entitled to payment for the use or hire of horses or teams shall have the like right in respect of moneys so owing to them as if such moneys were payable to them in respect of wages.

In the event of default being made in payment of any money owing in respect of wages of any mechanic, labourer or other person employed on the said work, and if a claim therefor is filed in the office of the Minister of Railways and Canals, and proof thereof satisfactory to the Minister is furnished, the Minister may pay out of any moneys at any time payable by His Majesty under such contract, and the amounts so paid shall be deemed payments to the Contractor.

Public wharf at St. Omer, Que.; name of contractors, P. Nadeau & Sons and N. Arseneau, of Grand Cascaedia, Que.; date of contract, January 28, 1908; amount of contract, \$12,400.

FAIR WAGES SCHEDULE.

Trade or Class of Labour.	Rate of Wages. not less than the following rate:
Foreman carpenters.....	\$2.25 per day of 10 hours.
Carpenters.....	1.50 " 10 "
Blacksmiths.....	2.00 " 10 "
" helpers.....	1.25 " 10 "
Labourers.....	1.25 " 10 "
Driver, 1 horse and cart....	2.00 " 10 "
Driver, 2 horses and wagon.	3.00 " 10 "

Post Office Department.

The following orders for supplies were given subject to the regulations for the suppression of the sweating system, the securing payment of fair wages, and the performance of the work under proper sanitary conditions:—

Nature of Order.	Amount of Order
Making metal dating stamps and type and making other hand stamps and brass crown seals.....	\$ 497.45
Making and repairing rubber dating stamps and type; also other stamps.....	65.46
Supplying stamping material and repairing stamping pads.....	241.04
Making and repairing post office scales....	1,079.50
Supplying mail bags.....	2,514.38
Repairing mail bags.....	1,186.53
Making and repairing mail locks and supply ing mail bag fittings.....	405.65
Repairing portable letter boxes, Railway Mail Clerks' tin travelling boxes and parcel receptacles.....	41.76
Making and repairing miscellaneous articles of Postal Stores.....	83.95
Making up and supplying articles of official uniform.....	9,908.81

## INDUSTRIAL ACCIDENTS DURING THE MONTH OF JANUARY, 1908.

Under this heading account is taken of such accidents only as were sustained by workmen in the course of their employment and resulted in loss of life or limb or other serious impairment to industrial efficiency. The accidents reported are such as have come to the notice of the Department through the press of the country or correspondents of the *Labour Gazette*. The department is also indebted to the Bureau of Mines of Ontario and British Columbia, to the office of the factories' inspectors of the province of Ontario, the Ontario Railway and Municipal Board, and to the Department of Railways and Canals, Ottawa, for their kind assistance in furnishing the Department with the statement of returns of accidents reported to them.

INDUSTRIAL accidents occurring to 267 individual workpeople in Canada during the month of January, 1908, were reported to the Department of Labour. Of these, 94 were fatal and 173 resulted in serious injuries. In addition, 9 fatal accidents were reported as having taken place prior to the beginning of the month, information not having been received by the Department before January, 1908. The number of fatal accidents reported in January, 1908, was 190, being 6 more than in the previous month and 36 more than in January, 1907.

Of 144 returns received during the month giving the ages of the victims of industrial accidents 17 referred to persons under twenty-one years of age, 32 to persons between twenty-one and forty-five, 8 to persons over forty-five years, 87 persons were over twenty-one years of age, but their exact ages were not specified.

The following is a record of the accidents of the month by industries and trades:—

## STATEMENT OF ACCIDENTS DURING JANUARY, 1908, BY INDUSTRIES, AND TRADES.

Trade or industry.	Killed	Injured	Total
Agriculture.....	12	16	28
Fishing and hunting.....	5		5

Miscellaneous.....	3	9	12
Unskilled labour.....	10	9	19
Total.....	94	173	267

## Nature of Fatalities and Accidents.

The chief disasters of the month were, the death of 7 members of a construction gang on the line of the National Transcontinental Railway, near Hawk, Ont.; the killing of 2 farmers at a railway crossing at Cedar Springs, Ont.; a railway wreck at Tilsonburg, Ont., causing the death of two workmen; the cave-in of a gravel pit at Prince Albert, Sask., and an explosion of dynamite at Hawk Lake Ont., killing 2 members of a construction gang.

## Disastrous Explosion of Dynamite Near Hawk, Ont.

On January 16, seven members of a construction gang on the National Transcontinental Railway, near Hawk, Ont., while working in a rock cutting, were killed by a premature explosion of dynamite. Four were blown to pieces and three received such injuries as caused their deaths a couple of days afterwards.

## Tragedy at Cedar Spring Crossing, Ont

On the night of January 11th, a Père Marquette Railway accommodation train, travelling at forty miles an hour, struck a democrat wagon at a level crossing at Cedar Springs, Ont., containing two farmers and the daughter of one of the farmers. The father and daughter were killed instantly, and the other occupant of the vehicle received injuries causing his death on January 13th.

## Railway Wreck at Tilsonburg, Ont.

On the morning of January 2, 1908, two Wabash engines, Nos. 1125 and 1132, were forced to abandon the half of a west bound freight train at Tilsonburg, owing to its proving too heavy to take out of the siding. The engines proceeded to Corinth with the first half of the train, and were on their way back to Tilsonburg for the remainder when they collided with Grand Trunk train No. 93 drawn by engine No. 595, throwing the latter from the rails and overturning it. The engineer of engine No. 595 was pinned under the engine and instantly killed.

and the brakeman received such injuries as caused his death on January 4th, 1908. The verdict of the coroner's jury was that the accident was caused by the negligence of the Wabash train crew in not properly protecting the rear end of their train.

#### Disaster at Prince Albert, Sask.

On January 10th, two labourers working in a gravel pit at Prince Albert, Sask., were instantly killed by a cave-in of gravel.

#### Explosion of Dynamite at Hawk Lake Ont

On January 3rd, two workmen employed on construction work for the Grand Trunk Pacific Railway at Hawk Lake, Ont., were loading a hole that had been sprung when an explosion occurred, killing them instantly.

#### Record by Trades and Industries.

*Agriculture.*—During January, there were 12 fatal and 16 non-fatal accidents to persons engaged in this industry, compared with 20 killed and 21 injured in the previous month, and 5 killed and 16 injured in January, 1907. Of the fatal accidents, 4 were due to railways, and 2 each to runaways, live stock, falling material and falls. Of the other accidents, 5 were due to falling material, 2 each to railways, to falls, to runaways, to live stock, to being run over, and 1 to tools.

*Fishing and hunting.*—During January, 5 fishermen were drowned while engaged in their vocation. In the preceding month, there was 1 drowning, and in January, 1907, two.

*Lumbering.*—There were 8 fatal and 13 non-fatal accidents in this group during January, as against 9 deaths and 7 injuries in December last, and 4 killed and 10 injured in January a year ago. Five of the fatalities were caused by falling material, 2 to machinery, and 1 by drowning. Nine workmen were seriously injured by falling material, 3 by machinery and 1 by a fall.

*Mining.*—Four workmen were killed and 18 injured during January, 1908, compared with 15 killed and 17 injured in the month previous, and 14 killed and 22 injured in January, 1907. Two of the fatalities were due to falling material and two to explosions. Of the serious injuries, 8 were due to explosions, 7 to falling material and 3 to being struck or run over by ore cars.

*Building trades.*—A carpenter in Montreal, Que., died on January 4th from the effects of a fall on December 28th, and 7 other workmen were injured during the course of the month. In December, the numbers were 2 killed and 8 injured, and in January, 1907, 1 killed and 15 injured. Five of the serious injuries were caused by falls and 2 by falling material.

*Metal, engineering and shipbuilding trades.*—Accidents caused 3 deaths in January, 1908, and 30 serious injuries, compared with 6 killed and 50 injured in the preceding month, and 1 killed and 49 injured in January, 1907. Two electrical workers were killed by electric shock and another by falling from a telephone pole. Thirteen workmen were seriously injured by machinery, 10 by falling or flying material, 5 by falls and 1 each by molten iron and by an explosion.

*Woodworking trades.*—A planing mill hand at New Liskeard, Ont., fell on a revolving saw and was killed during January; 11 other workmen were injured. In the preceding month there were 3 killed and 15 injured, and in January, 1908, 9 injured. Ten of the accidents were due to machinery and 1 to falling material.

*Printing trades.*—In January, a pressman at Belleville, Ont., had a hand badly crushed in a press. In December, there were 2 minor accidents, and in January, of last year, 3 minor injuries.

*Clothing trades.*—A garment worker at Berlin, Ont., fell a distance of 10 feet and dislocated his shoulder. In the preceding month, there were 2 minor injuries, and in January, 1907, 1 killed and 1 injured.

DEPARTMENT OF LABOUR, CANADA  
STATISTICAL TABLE SERIES F., No. 51.

TABLE OF FATAL ACCIDENTS DURING THE MONTH OF JANUARY, 1908.

Trade or Industry.	Locality.	Date.	No. killed.	Cause of Fatality.
<i>Agriculture—</i>				
Farmer.....	Westmount, Que.....	Jan. 11	1	In a runaway.
".....	Bennington, Ont.....	" 11	1	Kicked by a horse.
".....	Cedar Springs, Ont.....	" 12	2	Struck by train.
".....	Mar, Ont.....	" 7	1	Tree fell on him.
".....	Low Banks.....	" 14	1	Run over by train.
".....	Newboro, Ont.....	" 23	1	Thrown from horse.
".....	Eganville, Ont.....	" 27	1	Tree fell on him.
".....	Filmore, Sask.....	" 28	1	In a runaway.
".....	Ange Gardien, Que.....	" 29	1	Fell from hay loft.
Farm hand.....	Aldborough, Ont.....	" 3	1	Kicked by horse.
Farmer's daughter.....	Cedar Springs, Ont.....	" 12	1	Struck by a train.
<i>Fishing and Hunting—</i>				
Fishermen.....	Bay of Fundy, N. B.....	" 4	2	Drowned, boat was wrecked.
".....	Sydney, N. S.....	" 15	1	Drowned, boat capsized.
".....	Westport, N. S.....	" 21	2	Drowned, boat capsized.
<i>Lumbering—</i>				
Logger.....	Arnprior, Ont.....	" 21	1	Drowned, fell off logs.
".....	Valdy Island, B. C.....	" 23	1	Tree fell on him.
".....	Malahide, Ont.....	" 23	1	Tree fell on him.
".....	Bass River, N. B.....	" 17	1	Tree fell on him.
".....	Mattawa, Ont.....	" 28	1	Load of logs rolled on him.
Saw mill hand.....	New Liskeard, Ont.....	" 10	1	Fell on circular saw.
Pulp mill worker.....	Grand Mère, Que.....	" 2	1	Emery wheel burst.
".....	Ottawa, Ont.....	" 25	1	Log rolled on him.
<i>Mining—</i>				
Miner.....	Cobalt, Ont.....	" 2	1	Bucket fell on him.
".....	Edmonton, Alta.....	" 7	1	By explosion of gas.
Quarryman.....	Campbellford, Ont.....	" 15	1	Rock weighing 700 lbs. fell on him
".....	Windsor, N. S.....	" 22	1	Explosion of dynamite.
<i>Building trades—</i>				
Carpenter.....	Montreal, Que.....	" 4	1	Died from effects of fall on Dec. 28
<i>Metal, engineering and shipbuilding trades—</i>				
Electrical worker.....	Montreal, Que.....	" 2	1	Electric shock.
".....	Winnipeg, Man.....	" 22	1	Electrocuted.
".....	Toronto, Ont.....	" 27	1	Fell from pole.
<i>Woodworking—</i>				
Planing mill hand.....	New Liskeard, Ont.....	" 9	1	Fell on revolving saw.
<i>Textile Trades—</i>				
Woollen factory hand.....	Paris, Ont.....	" 3	1	Crushed in elevator.
<i>Food and Tobacco preparation—</i>				
Refinery hand.....	Montreal, Que.....	" 20	1	Caught in shafting.
<i>Railway Employees—</i>				
Engineer.....	Tilsonburg, Ont.....	" 2	1	In head-on collision.
".....	Biscotassing, Ont.....	" 3	1	In derailment.
Brakeman.....	Tilsonburg, Ont.....	" 4	1	Head-on collision on Jan. 2.
".....	St. Thomas, Ont.....	" 2	1	Struck by train.
".....	Red Pine Stn., N. B.....	" 12	1	Run over by train.
".....	Rivière à Pierre, Que.....	" 24	1	Run over by train.
".....	Richmond, Que.....	" 22	1	Caught between cars.
".....	St. Catharines, Ont.....	" 28	1	Derailment of train.
".....	Strathmore Stn., Que.....	" 29	1	Run over by train.
Switchman.....	St. Thomas, Ont.....	" 1	1	Run over by train.
Sectionman.....	Charlemagne, Que.....	" 10	1	Fell through a bridge.
".....	Pointe St. Charles, Que.....	" 13	1	Struck by locomotive.
".....	St. Hyacinthe, Que.....	" 15	1	Struck by locomotive.
".....	Toronto, Ont.....	" 20	1	In rear end collision.

DEPARTMENT OF LABOUR, CANADA,  
STATISTICAL TABLE SERIES F., No. 51

TABLE OF FATAL ACCIDENTS DURING THE MONTH OF NOVEMBER, 1907.

Trade or Industry.	Locality.	Date.	No. Killed	Cause of Fatality.
Conductor	Medicine Hat, Alta.	Jan. 18	1	Caught between cars.
"	St. Catharines, Ont.	" 28	1	Head-on collision.
Construction hands	Hawk, Ont.	" 5	2	Explosion of dynamite.
"	Hawk, Ont.	" 15	7	Explosion of dynamite.
"	Clover Bar, Man.	" 28	1	Burned to death on bridge.
Grievance committee man, C. P. R.	Toronto Junct., Ont.	" 4	1	Run over by train.
Car shop hand.	Montreal, Que.	" 28	1	Car fell on him.
Station hand.	North Battleford, Sask.	" 23	1	Suffocated in station fire.
<i>Navigation—</i>				
Ship carpenter.	Victoria, B. C.	" 8	1	Drowned, washed overboard.
Stevadore.	St. John, N. B.	" 20	1	Fell into ship's hold.
Steamboatman.	Mattawa, Ont.	" 7	1	Drowned, fell from bridge.
Sailor	Port Dufferin, N. S.	" 20	1	Drowned, washed overboard.
"	Port Townsend, B. C.	" 28	1	Drowned, blown overboard.
"	St. John, N. B.	" 31	1	Drowned, knocked overboard by rope.
Ship labourer.	St. John, N. B.	" 21	1	Crate of goods fell on him.
<i>General Transport—</i>				
Street car conductor.	Port Arthur, Ont.	" 16	1	Fell from street car on head.
"	Paris, Ont.	" 15	1	In derailment of car on trestle.
Teamster.	Three Rivers, Que.	" 18	1	Telegraph pole fell on him.
"	Sussex, N. B.	" 7	1	Jumped from moving train.
Carter.	Montreal, Que.	" 21	1	Struck by engine.
<i>Civic Employees—</i>				
Civic employee.	St. Thomas, Ont.	" 14	1	Fell into a sewer.
Fireman	Montreal, Que.	" 12	1	Wall fell on him.
"	Hamilton, Ont.	" 21	1	Wall fell on him.
<i>Miscellaneous—</i>				
Domestic servant.	Vancouver, B. C.	" 13	1	By ignition of coal oil in can.
Hotel employee.	Winnipeg, Man.	" 3	1	Fell down stairs, broke neck.
Clerk.	Toronto, Ont.	" 28	1	Fell 55 ft. down elevator shaft some time ago—died Jan. 28.
<i>Unskilled labour—</i>				
Labourer	Ottawa, Ont.	" 3	1	Crushed to death in excavation.
"	West Garafraxa, Ont.	" 9	1	Cave-in of gravel pit.
"	Prince Albert, Sask.	" 11	2	Cave-in of gravel pit.
"	Paris, Ont.	" 4	1	Crushed in elevator.
"	Rosemount, Que.	" 20	1	Explosion of dynamite.
"	Cote St. Paul, Que.	" 21	1	Cave-in of frozen sand.
"	Cap Rouge, Que.	" 25	1	Cave-in of earth.
"	Toronto, Ont.	" 8	1	By falling debris.
"	Megantic, Que.	" 4	1	Struck by freight train.

FATAL ACCIDENTS HAPPENING IN PREVIOUS MONTH, BUT ONLY REPORTED TO THE DEPARTMENT IN JANUARY.

Farmer.	Alsa Craig, Ont.	Dec. 31	1	Wood pile fell over on him.
Loggers.	Near Roch Bay, B. C.	" 30	2	Drowned, slipped from logs.
Miner	Falleville, Ont.	" 31	1	Struck by cars.
"	Cumberland, B. C.	" 24	1	By fall of coal.
Construction hands.	Field, B. C.	" 31	3	Explosion of dynamite.
Engineer in glue factory	Brantford, Ont.	" 30	1	Caught in belting.

*Textile trades.*—A woollen factory hand at Paris, Ont., was crushed to death in an elevator, and 9 other workmen were seriously injured, all by machinery. The record in December last was 1 injured. In January, 1907, there were no accidents.

*Food and tobacco preparation.*—A refinery hand in Montreal, Que., became entangled in belting and was killed, and 4 others were injured, 2 by live stock and 2 by machinery. There was 1 workman injured in the previous month and 6 injured in January of last year.

*Railway service.*—There were 29 railway employees killed and 26 injured in January, 1907, compared with 20 killed and 27 injured in December, and 23 killed and 22 injured in January a year ago. Nine of the fatalities were due to explosions, 5 to being run over, 4 to collisions, 3 to being struck by cars, 2 each to derailments, to being caught between cars, to fires, and 1 each to falls, and falling material. Seven of the accidents were due to being run over, 5 each to collisions and falls, 4 to explosions, 3 to being caught between cars, and 1 each to being struck by a passing object and to machinery.

*Navigation.*—During January, there were 7 killed and 1 injured in this group, compared with 7 killed in December, and 3 killed and 1 injured in January, 1907. Five of the deaths were caused by drowning and 1 each to a fall and to falling material. A boiler rolled on to

the arm of a longshoreman at Vancouver, B. C., and it had to be amputated.

*General transport.*—Five of these workers met death by accident and 10 were injured during January, compared with 2 killed and 11 injured in the preceding month, and 2 killed and 10 injured in January, 1907. Two of the fatalities were due to falls and to railways, and 1 to falling material.

*Civic employees.*—There were 3 civic employees killed and 8 injured during January, 1908, compared with 11 injured in December and 11 injured in January, 1907. Two of the deaths were caused by falling material and 1 by a fall. Falling material injured 5 of these workers, railways 2, and being run over 1.

*Miscellaneous.*—Three fatal and 10 non-fatal accidents occurred. In the previous month there were 3 killed and 10 injured, and in January a year ago, 2 killed and 13 injured. Two of the fatalities were due to falls and 1 to an explosion of coal oil. Falls caused 3 injuries, machinery 2, an explosion 1, railways 1, an elevator 1, and falling material 1.

*Unskilled labour.*—Seven of the fatalities were caused by cave-ins or falling material, 1 by an elevator, 1 by an explosion, and 1 by railways. Falling material injured 5, machinery 2, railways 1, and a fall 1. In December, and in January, 1907, there were 7 of these workers injured.

### TRADE DISPUTES DURING THE MONTH OF JANUARY, 1908.

THERE was an increase in the number of trade disputes in Canada during January compared with the previous month, but none of them involved as many as 500 employees. The most serious dispute was at Collingwood, Ont., where an establishment employing 450 men was closed down indefinitely. A significant feature was the fact that five out of six of the new disputes of the month arose from reductions in wages.

#### Analysis of Trade Disputes During the Month.

*Number and magnitude.*—The total number of disputes reported to have been

in existence in Canada during January was 9, an increase of 3 compared with the previous month, and a decrease of 4 compared with January, 1907. About 9 firms and 1,418 employees were affected by these disputes, 6 firms and 1,094 being involved in the disputes which began in January.

*Loss of time in working days.*—The loss of time to employees through trade disputes during January was approximately 21,040 working days, compared with 10,775 in December, and 12,144 in January, 1907.

*Trades affected by new disputes.*—The

following table shows the trades affected by the new disputes of the month, and the number of working people affected in each group of trades:—

Trades.	Number of disputes	Number of Workers
Lumbering.....	1	200
Metal and Shipbuilding trades.	3	814
Woodworking and furnishing .	1	17
Food and Tobacco preparation	1	63
<b>Total.....</b>	<b>6</b>	<b>1,094</b>

*Localities affected by new disputes.*—The new disputes of the month occurred in the following Provinces of the Dominion:—

Province.	Number of disputes.
Quebec.....	3
Ontario.....	3
<b>Total.....</b>	<b>6</b>

*Causes of disputes.*—The following were the causes of the new disputes of the month:—

Cause.	Number of disputes.
Against reduction of wages.....	5
Against employment of non-unionists.....	1
<b>Total.....</b>	<b>6</b>

*Methods of settlement.*—Of the 9 disputes in existence during January, six were terminated in the course of the month, leaving three still in existence at the close. One dispute was settled by conciliation, and two were settled by negotiations between the parties concerned. In one case, work was resumed on the employers' terms without negotiations, and in another the strikers secured work elsewhere and their places were filled. In the remaining dispute, the company decided to close their works indefinitely, until they could obtain better prices for their products.

*Results of disputes.*—Of the six disputes that were terminated, three resulted in favour of the employers, two resulted in a compromise, and in one the result was indefinite.

**Disputes which Commenced Prior to the Beginning of the Month.**

The trade disputes in existence during January, which began in previous months, affected boilermakers and helpers at Halifax, N. S., corset workers at St. Hyacinthe, Que., and shoe workers at Levis, Que. A brief account of these disputes is given below:—

**Strike of Boilermakers and Helpers at Halifax, N. S.**

No change was reported with regard to a strike of 100 boilermakers and helpers employed by the Halifax Graving Dock Company, which began on September 28 on account of the refusal of the employers to grant a demand for an increase in wages.

**Dispute of Corset Workers at St. Hyacinthe, Que.**

A dispute affecting the Eastern Townships Corset Company at St. Hyacinthe, Que., which began on December 13, was terminated on January 28. The cause of the dispute was the refusal of the employees to sign an agreement providing that they should leave in the hands of the Company 10% of their wages until the sum for each person amounted to \$80.00, when they would receive a share of the Company's stock worth \$100.00, the company agreeing to pay interest semi-annually at the rate of 5% on the money so left in their hands. The employees stated that their wages being very low, they could not afford any deduction. In the course of the dispute, several interviews were held between the employers and their employees, in which several prominent citizens of St. Hyacinthe took part. Finally the employees agreed to accept the Company's terms, and work was resumed on January 28.

TABLE OF TRADE DISPUTES DURING THE MONTH OF JANUARY.

Occupation.	Locality.	Alleged Cause or Object.	No. of Firms or Establishments affected.		Approximate No. of Employees affected.				Date of termination.	Result.
			Directly.	Indirectly.	Directly.		Indirectly.			
					Males	Females	Males	Females		
			Directly	Indirectly	Males	Females	Males	Females		
			Indirectly							
DISPUTES WHICH COMMENCED PRIOR TO THE BEGINNING OF THE MONTH.										
<i>Metal and shipbuilding trades—</i> Boilermakers and helpers.....	Hali fax, N.S.....	For increase in wages, mechanics from \$2.50 to \$3.50, helpers from \$1.80 to \$2.50 per day.....	1		89		100		Sept. 25	No settlement reported at end of month.
<i>Clothing trades—</i> Corset workers ....	St. Hyacinthe, Que..	Demand of Co., that employees should sign agreement for a deduction from wages for investment in stock of Co. ....	1		100				Dec. 13	Work resumed on employers terms.
Shoe workers.....	Levis, Que.....	Demand of an employee for an increase in wages, others stopped work in sympathy.....	1		57		38	40	Dec. 3	No settlement reported but conditions ceased to be effected.
DISPUTES WHICH BEGAN DURING THE MONTH.										
<i>Lumbering—</i> Planing mill hands.	St. Romuald, Que ..	Objection to a reduction in wages.....	1		150		50		Jan. 17	Agreement signed through friendly intervention of the Registrar of the Bureau of Conciliation and Arbitration of Quebec.....

<i>Metal and Ship-Building Trades—Machinists</i> .....	Objection to a reduction in wages of 20 per cent.....	1	18	.....	Jan.	20	22	Settlement reached, a compromise. Particulars not received.
Tin workers.....	Objection to a reduction of wages.....	1	80	16	.....	Jan.	14	Work resumed on employers terms by many strikers, places of others were filled.
Shipbuilders.....	Objection to a reduction in wages of 15 per cent.....	1	450	.....	Jan.	7	.....	Co. decided to close works until better prices prevailed.
<i>Woodworking and furnishing trades—Upholsterers</i> .....	Objection to a reduction in wages.....	1	16	.....	Jan.	10	.....	No settlement reported at end of month.
<i>Food and tobacco preparation—Cigarmakers</i> .....	Strikers alleged employees had repudiated an agreement, employers stated that they had decided to conduct an open shop.....	1	50	13	.....	Jan.	14	No settlement reported at end of the month.

\* Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where after the declaration of a strike, some of the original strikers have returned to work or had their places filled with new hands, or where establishments affected have found that for either of these reasons, or both, or for other causes, their business is no longer seriously affected. In such cases while, in one sense, it may be true that a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon the business interests of the community is concerned a record of the continuance of such a dispute might be misleading. The list of trade disputes published in the present table, therefore, includes mention only of such disputes as during the month or at its termination affected, to an appreciable degree, the carrying on of the industrial or business operations of the firm or establishments concerned. Mention moreover, is not made of disputes involving less than six employees, or less duration than 24 hours.

### Strike of Shoemakers at Levis, Que.

No settlement was reported in the case of a strike of shoemakers employed by the firm of Messrs. J. B. Blouin and Son, which took place at Levis, Que., on December 3. but conditions ceased to be affected by this dispute, the strikers securing work elsewhere, and others being engaged to fill their places. About 57 men were directly affected by the dispute, and indirectly about 38 men and 40 women workers. The strike arose from the refusal of the management to grant a demand made by an employee for an increase in wages, the others going out in sympathy with him.

### New Disputes.

The new disputes of the month comprised strikes of shipbuilders at Collingwood, Ont., planing mill hands at St. Romuald, Que., tin workers at Montreal, Que., cigarmakers at Montreal, Que., machinists at Ottawa, Ont., and upholsterers at Guelph, Ont.

### Strike of Boilermakers and Shipbuilders at Collingwood, Ont.

On January 6, a strike of about 450 boilermakers and shipbuilders, employed by the Collingwood Shipbuilding Company, Limited, took place at Collingwood, Ont. According to a report received from the Company, it was stated that they were compelled, through reduction in prices for their output, to reduce wages 15%, and that the employees refused to accept this reduction. The Company claiming that they were unable to compete against other shipbuilding firms without reducing the cost of labour, decided to close their works until better prices prevailed. There was no resumption of work in the course of the month.

### Strike of Planing Mill Hands at St. Romuald, Que.

On Friday, January 17, a strike took place affecting the employees of the Gravelle Lumber Company at St. Romuald, Que., which was caused by a dispute over wages. It was stated that early last summer, an increase in wages was

granted by the employers upon the demand of their men. On January 1, the employees were informed that the mill, having no orders on hand, would close down indefinitely, unless they accepted a decrease in wages of about 20%, the decrease to remain in force only so long as the mill was working for stock. This was accepted by the men. Not having sufficient employment for the four wood sorters in the mill, the Company gave them work as snow shovellers, paying them 20 cents a day less than those in the mill. Later, one of these four was sent back to work in the mill at the same rate as he had been receiving for shovelling snow. The other employees objected and went on strike, to the number of 150 men. About 50 employees were indirectly affected by the dispute. On January 22, work was resumed under an agreement arrived at through the friendly intervention of the Registrar of the Board of Conciliation and Arbitration of Quebec. The terms of the agreement provided for the reference of any disputes to a Committee of Conciliation, composed of seven employees, three of whom would be chosen by each party, and the seventh by the six so chosen. The wages of the employees would be 14 cents per hour from January 22, 1908, to May 1, 1909, but cullers would be paid 16 cents per hour, except when employed at other work, when they would receive 14 cents. The agreement provided for an open shop, and for the discharge of any employees for violation of the rules of the establishment, to be posted up in different parts of the building.

### Strike of Tin Workers at Montreal, Que.

On January 9, about 96 employees of the Thomas Davidson Manufacturing Company at Montreal, who were employed on enamel, galvanized and stamp work, declared a strike, refusing to accept a reduction in their wages. The strikers included 80 men and 16 female employees. About 250 employees were indirectly involved, but 400 others were not affected by it. It was claimed by the company that on January 13, those whose places had not been filled returned to work unconditionally.

**Strike of Iron Foundry Workers at  
Ottawa, Ont.**

On January 20, 18 employees of the Chaudiere Machine and Foundry Company of Ottawa, Ont., declared a strike, refusing to accept a reduction of 20% in their wages. Two days later, a settlement was reached between the Company and the whole staff of the shop, numbering 25 men. The terms of the settlement were not reported, but it was stated to be in the nature of a compromise.

**Strike of Upholsterers at Guelph, Ont.**

On January 10, 16 upholsterers employed by the firm of Messrs. Morlock Bros. at Guelph, Ont., declared a strike. The dispute arose from the refusal of the employees to accept a reduction of about 10% in their wages on old work, and about 40% on new designs in furniture. One employee was indirectly affected by the dispute. It was alleged by the strikers that the management refused to deal with a committee of their employees, but discharged the members of the committee immediately. No settlement of the dispute was reported during the month.

**Strike of Cigar-Makers at Montreal, Que.**

On January 4, a strike of cigar-makers employed by the firm of Granda Hermanosy Ca. took place at Montreal, Que. According to a report received from the Company, it was stated that the cause of the dispute was its decision to conduct an open shop, and that it was engaging all who applied. It was alleged by the Cigarmakers' Union that the dispute arose from the repudiation by the employer of an agreement which had been formerly concluded with them. It was stated by the Company that 75 men were directly affected by the dispute. According to the employees, 50 men were directly affected, and 13 women workers were indirectly affected by the dispute. No settlement was reported in the course of the month.

The table published herewith is a compilation of the trade disputes of the Dominion of Canada which began or were in continuance during the month of January, and which have been reported to the Department.

**CANADIAN BANK CLEARINGS.**

THE unprecedented volume of general trade in Canada during 1907 is well illustrated by the record of bank clearings in the various cities in which clearing houses are in operation. Compared with 1906, which was the heaviest year recorded previously, there was a marked increase in every locality, as will be seen from the following statement:—

	1906	1907
Montreal.....	\$1,533,597,600	\$1,555,712,000
Toronto.....	1,219,125,359	1,228,905,517
Winnipeg.....	504,585,914	599,667,576
Halifax.....	91,837,507	93,587,138
Hamilton.....	78,480,620	88,104,108
St. John.....	60,024,760	66,150,414
Vancouver.....	132,606,358	191,734,480
Victoria.....	45,615,615	55,330,588
Quebec.....	92,934,213	107,460,897
Ottawa.....	135,866,734	156,527,805
London.....	57,863,782	65,760,473
	<b>\$3,925,530,309</b>	<b>\$4,208,940,996</b>
Calgary.....		69,745,006
Edmonton.....		45,716,792
		<b>\$4,324,402,794</b>

According to the above statement, the clearings of Canadian banks during the year 1907 showed a total increase over those of the previous year of \$256,410,687. Exclusive of the Calgary, Alta., and Edmonton, Alta., houses, which were not in operation during 1906, the increase amounted to 6 per cent. During the year 1906, there was a gain of 18.49 per cent compared with the year 1905.

According to the monthly record, increases during the first six months of the year were very heavy in most cases; during the closing six months, some losses were recorded.

## REPORTS OF DEPARTMENTS AND BUREAUS.

The following reports of departments and bureaus were received at the Department of Labour during January, 1908.

### DOMINION REPORTS.

#### Railway Statistics.

Railway statistics of the Dominion of Canada for the year ended June 30, 1907, Ottawa, King's printer, 1908, page 139. Price 10c.

ACCORDING to a report of the controller of railway statistics, the total railway mileage in Canada during 1907 was 22,452, an addition of 1,099 over the previous year. The number of miles of railway actually under construction was not reported, but was estimated at 3,000. The population in Canada to each mile of railway was 289, compared with 381 in the United States; 358 in New Zealand and 686 in New South Wales, showing that Canada has a very high mileage compared with the population of the country. The amount of capital invested in Canadian railways is \$1,171,937,808. The capitalization of the Canadian railways is \$56,995 per mile, compared with \$67,936 per mile in the United States, and \$273,437 in the United Kingdom. The traffic during 1907 showed substantial gains. In freight there was an increase of 5,899,422 tons, compared with the previous year, and in passengers an increase of 4,147,537.

#### Mining Conditions in Canada.

Summary report of the Geological Survey for the calendar year 1907, Ottawa, King's printer, 1908, page 132. Price, 10 cents.

The summary report of the Geological Survey branch of the Department of Mines contains an account of the exploration work carried on by the different members of the staff during the year. There were 20 parties engaged in explorations during the last season, and their work extended over every Province of the Dominion except Prince Edward Island, and also over the Yukon district. In co-operation with McGill University, the Geological Survey has

undertaken a systematic investigation of the coals of the Dominion, the main work of which will be completed in 1908. Economic tests as to the value of the different kinds of coal will be made out, as well as a complete series of chemical analysis of the coal and its products.

#### The Grain Trade of Canada.

Report of the Royal Commission on the grain trade of Canada, 1906, Ottawa, King's Printer, 1908, pages 39.

The report of the Royal Commission on the grain trade of Canada, which was appointed in 1906, contains much valuable information with regard to the handling and shipment of wheat in Western Canada. For the improvement of conditions, various recommendations were made. In order to provide against a shortage of cars, it was recommended that legislation should be passed providing that after a reasonable time from the ordering of a car, the railways be chargeable with demurrage until the car be furnished. It was found by the Commissioners that an agreement existed between certain elevator companies for the pooling of their receipts and earnings at the different points where the elevators came into competition with one another. This pooling arrangement was considered to constitute a menace to those who had to sell grain to these elevators, and to unduly limit competition. It was recommended that provision be inserted in the Grain Act prohibiting such arrangements among elevator companies. An account is given of the operations of the Winnipeg Grain and Produce Exchange and the North-West Grain Dealers' Association. The objects of the former are to provide facilities for its members in doing business, and the making of and passing of by-laws and regulations for the systematizing of trade among its members. The Northwest Grain Dealers' Association is a corporation existing under charter from the Province of Manitoba, composed of elevator owners and grain dealers. The main object of the Association is the regulat-

ing of the buying of grain in the country. The only business in which it engages is the purchasing of supplies for the country elevators and its members, and the sending out of joint telegrams to all buying points, thus saving a large amount to its members each year.

## ONTARIO REPORTS.

### Mineral Production of Ontario.

The 16th Annual Report of the Bureau of Mines of Ontario, Part I, 1907. Toronto, King's Printer, 1907, pages 256.

Part I of the report of the Ontario Bureau of Mines for 1907 contains statistics relating to the year 1906. In that year, the metallic production of the Province amounted to the value of \$13,353,080, and the non-metallic to \$9,035,303 making a total value of \$22,388,383, compared with \$17,854,296 in 1905. The total number of employees engaged in mining during 1906 was 12,551, compared with 11,151 in the previous year. The wages paid amounted to \$6,048,328 in 1906, and \$5,082,653 in 1905. Among the minerals, the greatest amount of wealth was derived from pig iron, which was produced to the value of \$4,554,247. The next highest was nickel, the value of which amounted to \$3,839,419. The value of silver produced was \$3,689,286. Of the nonmetallic minerals, the chief products were brick, to the value of \$2,157,000, and Portland cement, of which there is produced 1,598,815 barrels, valued at \$2,381,014.

## OTHER REPORTS RECEIVED.

*Canada.*—Second report of the Board of Railway Commissioners for Canada for the year ended March 31, 1907.

*Ontario.*—A report relating to the registration of boards in the Province of Ontario for the year ending 3rd of December, 1905 (being the 36th annual report).

## RECENT LEGAL DECISIONS AFFECTING LABOUR.

The following synopses of recent cases affecting labour are based upon the latest reports of legal proceedings and other legal records of the different Provinces of Canada.

### QUEBEC CASES.

#### Important Verdict in Damage Suit.

Michelo Sangala, a labourer, brought suit in the Superior Court at Montreal to recover from defendants \$3,635 damages resulting from injuries sustained while in the employ of the latter. The jury found that the accident was due neither to the fault of the plaintiff or

the defendant; consequently, there being no one responsible for the accident, no damages were awarded. Apart from its principal issue, the verdict in the case contained an interesting appreciation of what may constitute interruption of prescription. In April, 1906, plaintiff was hired by defendants to work at excavating in streets for the purpose of laying water mains. While he was working in the bottom of the trench, a considerable portion of the wall of the trench fell in on him, fracturing his leg. Three weeks after the accident, plaintiff's son went to see Mr. Treffe Bastien, who

was interested in the contract, and asked for assistance on behalf of his father. Mr. Bastien then and there gave him \$10 to purchase food, and later it was arranged that the injured man would receive \$7 a week. This was paid for over a year, but finally plaintiff decided to sue for an indemnity. Defendant, whose partner Bastien subsequently became, pleaded that such suit was prescribed after the expiration of a year, but plaintiff contended that the payment of \$7 a week was an acknowledgement on the part of defendants of their liability, and that such payment constituted an interruption of prescription. After two days' trial, in the course of which difficulty was experienced in getting out the evidence owing to the use of three languages, the jury found that the accident was a purely fortuitous event. In the list of questions submitted to the jury, they were asked if the money paid over to plaintiff prior to the institution of the action had been paid out of charity, or for the purpose of avoiding suit. They answered that the \$10 had been paid for charity's sake but that the \$7 a week paid for one year was for the purpose of avoiding suit. This answer was tantamount to a finding that prescription had been interrupted.

(Sangalla vs. Laurin & Co.; 9th January, 1908; Denvers, J.)

### Bound Over for Using Threats.

On 4th December, 1907, Fred Madley, in the employ of Wallace McGinnis, lost his situation. Angered at this, Madley made use of the words, "I will do for you, even if I have to go to the penitentiary for it." He was brought before the Court and bound over in the sum of \$200 to keep the peace for one year.

(Rex vs. Madley; 10th January, 1908; Choquet, J.)

### Contributory Negligence.

Plaintiff, who was in the employ of defendants, in the course of his employment was thawing out some water pipes. He had occasion to get up on the top of a tank, when he fell into the tank, which

contained boiling brine, and was injured. He brought suit in the Superior Court at Montreal to recover damages, which he estimated at \$1,500. He was awarded \$212, as he had contributed to his mishap by his own imprudence.

(Martineau vs. Montreal Stock Yards Co.; 14th January, 1908; Hutchison, J.)

### Criminal Negligence.

Some time since, Henri Rousseau, an employee of the Thomas Davidson Manufacturing Co., Limited, at Montreal, was killed in the course of his employment by falling into a fly wheel which was unprotected. A coroner's jury brought in a verdict at the inquest that Mr. T. Charles Davidson, an official of the Company, was criminally responsible for the death of Rousseau. Consequent thereon, a charge of manslaughter was laid against Mr. Davidson, but the Crown Prosecutor, on the case being called, announced that he did not intend to proceed with the charge, and it was dismissed. The reason for this action on the part of the Crown, as given by the Crown Prosecutor, was that if any crime had been committed, it was the Company which was answerable, and not its official.

(Rex vs. Davidson; 16th January, 1908; Choquet, J.)

### Judgment in Damage Suit.

On 20th October, 1904, plaintiff's son, while in the employ of the defendants, was killed in the course of his employment, and in consequence, an action was brought by his parents to recover an indemnity of \$4,000 from the defendants on the ground of the negligence of the latter. Deceased was engaged in removing ashes underneath a locomotive, when it was put in motion by some person as yet unknown, and deceased sustained such injuries that he died. The presiding Judge awarded plaintiffs \$1,500 damages, and expressed the opinion that criminal proceedings should be taken against whoever was responsible for the locomotive being put in motion.

(Riccio et ux. v. C. P. R. Co., 17th January, 1908; Mathieu, J.)

### Duty of Employers to See Instructions Carried Out.

On 15th September, 1906, plaintiff, an employee of defendants, sustained injuries in the course of his employment and subsequently brought action to recover an indemnity of \$7,500, claiming that he was disabled for life. Plaintiff claimed that although hired as a helper, he was ordered by the foreman to feed a machine used for grinding old rubber, and that the grinder having become clogged by a piece of pneumatic tire which was too big to go through, he attempted to extricate it, with the result that his hand was caught between the rollers and crushed. The injury was such that his hand had afterwards to be amputated. The negligence alleged by plaintiff was that he was not engaged to feed the machine, but to serve as a helper; that the person who cut the rubber did not perform his duty properly, but allowed lumps to pass through, and finally that he was not instructed as to the operation of the grinder, or warned of its danger, or provided with a hook with which to withdraw any lump that might clog the rollers. The defendants pleaded that the accident was due to plaintiff's own carelessness in putting his hand into dangerous proximity with the moving machinery, when he had been repeatedly cautioned not to do so; that the rubber was cut partly by plaintiff himself, who assumed this task of his own accord in order to have more rubber to feed to the grinder, and thereby obtain more remuneration for piece work; that it was not his duty to cut the rubber for the grinder, and finally, that the machine was in good working order and constituted no danger to the employee operating it if he carried out the instructions given him, which they claimed was done in the case of plaintiff. The case was first tried in October last, when the jury disagreed. After deliberation, the jury found that both plaintiff and defendants had been at fault; plaintiff in imprudently trying to extricate the piece of rubber with his hands while the machine was in motion, which he was not supposed to do, and defendants in not seeing that its instructions were carried out. They held,

in conformity with the jurisprudence on the point, that it was not sufficient for employers in such cases to warn of danger, but that they were bound to see that such instructions were properly carried out. They estimated that plaintiff had sustained damage to the extent of \$3,500, but arrived at the conclusion that he was entitled to \$2,000 less owing to his own negligence, and awarded the sum of \$1,500.

(Karakoviris vs. Canadian Rubber Co; 18th January, 1908; Saint Pierre, J.)

### Justifiable Dismissals.

In the Recorder's Court at Montreal, recently, plaintiff sued defendant for wages, alleging that she had been hired for four months and had been dismissed before the expiration of this period. Defendant proved that plaintiff had been dismissed for cause. In giving judgment dismissing the case, the Recorder said: "Even although you should have been engaged for life, from the moment that you did not give satisfaction, your master had the right to dismiss you. Each party to a contract is bound to fulfil his engagements, and the default of one to fulfil his part discharges the other from the corresponding obligation."

(Mercier vs. Lazure; 23rd January, 1908; Recorder.)

A mantle designer, named Auld Weinberg, was engaged by defendant for a year, dating from January 1st, 1907, at a salary of \$35 per week. Mrs. Weinberg was also hired to take charge of the skirt department, her salary being \$12 per week. In the middle of April, both Weinberg and his wife were dismissed, wrongfully, as they claimed, and they brought action to recover \$282 damages from defendant. The latter claimed that Weinberg's models did not fit and had to be re-made. He remonstrated with Weinberg several times, and finally discharged him, as he was losing money. In the Superior Court, at Montreal, the Court dismissed the action, holding that the dismissal was justified.

(Weinberg et ux. v. Lafrance; 18th January, 1908; Loranger, J.)

### Fellow Workmen not Criminally Responsible for Death.

An inquest was held at Montreal into the circumstances surrounding the death of Joseph Richard dit Brule, who died as the result of injuries sustained in the course of his employment after lingering for some time in the hospital. Richard was a young man of 18 years of age, and worked in the shops of the Locomotive and Machine Co., at Longue Pointe. On the 17th December last, while at his work, he was struck by a large piece of iron, weighing at least 2,000 pounds, and was crushed between it and a boiler, from which injuries he died. After hearing all the evidence adduced, the coroner's jury returned a verdict that the two men who were working with deceased at the time were not criminally responsible for his death.

(Inquest re Richard dit Brule; 21st January, 1908; McMahon, Coroner.)

### Damages for Loss of Finger.

Plaintiff brought action in the Superior Court at Montreal to recover \$1,999 damages on account of his minor son having had the first finger of his right hand cut off in the course of his employment with defendants, owing, as alleged, to the negligence of the latter. The young man was operating a tin-cutting machine when the accident happened. The Court held that the machine was defective, and the employers must be held responsible. Damages to the amount of \$600 were awarded to plaintiff.

(L'Heureux vs. McClary Man'fg Co.; 24th January, 1908; Bruneau, J.)

## ONTARIO CASES.

### Claim for 30 Years' Wages Settled

At the Toronto non-jury Assizes recently, an action brought by Mrs. Lydia Vanderburg, of Richmond Hill, against Mrs. Euphemia Brown, an elderly widow, of Toronto Junction, came up for trial. Plaintiff claimed the sum of \$2,000, or else that she should be remembered to that amount in defendant's will. She said that thirty years ago, when a girl

of thirteen, she went to stay at the Browns' farm, and did the work of a hired girl from that time until March, 1906. For a part of the time she was paid wages, but for nearly the whole of the thirty years that she had been with Mrs. Brown on the farm, and later in helping her run boarding houses in Toronto, she had received no wages, Mrs. Brown having said she would do "the right thing" by plaintiff, and remember her in her will. After hearing evidence from both parties, and at the suggestion of the presiding Judge, the parties agreed to come to terms between themselves, and the action was dismissed by consent.

(Vanderburg vs. Brown; 20th January, 1908; Meredith, C. J.)

### A Fisherman is not a Seaman.

An interesting decision was rendered recently at St. Thomas. Plaintiff had recovered judgment against defendant for \$22.60 and costs, and garnisheed the wages owing to the latter by Capt. A. C. Brown. It was proved that defendant was employed as a fisherman by Brown on the tug "Gordon Brown," and there was about \$40 coming to him. On defendant's behalf, the contention was raised that the wages of a fisherman cannot be garnisheed, as under the Shipping Act of Canada, a seaman's wages are exempt. On plaintiff's behalf, it was contended that the Act does not apply to the Province, and even if it did, the defendant was not a seaman. The presiding Judge decided that the Act was not applicable, and that a fisherman cannot claim the exemption as a seaman, and gave judgment for plaintiff with costs.

(Going vs. Fritzeley; 28th December, 1907; Erma-tinger, Co., J.)

### Illegal marking of Apples.

In the Police Court at Picton recently, Messrs. H. E. Groff and T. D. Onderdonk, of the firm of Groff & Onderdonk, Trenton, were fined for selling illegally marked and packed apples, and A. E. Brown, of Ameliasburg, and W. Miron, of Northumberland County, buyer and packer respectively, were convicted and fined

the costs of the Court. The fine imposed upon Groff and Onderdonk aggregated some \$23.

(Rex vs. Groff et al.; 24th January, 1908; Currie, P. M.)

### Coroner's Juries Condemn Employers.

At an inquest held on the body of William Lappage, who was killed in the C. P. R., repair shops at Toronto Junction by a car falling on him, evidence was given by the Divisional Superintendent that the car had been first put on trestles on December 6th, and that the cause of the accident was the thawing of the frozen ground and the consequent settling of the car on its supports. He also made the statement that the foremen were responsible for the acts of the workmen. The verdict of the jury was that "the deceased came by his death on December 10th, while in the discharge of his duties on the C.P.R. We condemn the Company for the bad system in protecting their men repairing the car the deceased was killed by."

(Inquest re Lappage; 19th December, 1907.)

The coroner's jury charged with the investigation of the cause of the death of August Wank, who was killed owing to a collision between a street car and a C. P. R., freight train on 3rd January, brought in the following verdict:

"That August Wank came to his death on January 3rd, on Beechwood Avenue, as a result of a collision between a C.P.R., freight train and car No. 58 of the Ottawa Electric Railway Company. If rule No. 15 of the rule book of the Ottawa Electric Railway Company, and section 278 of the Railway Act, had been carried out, no collision would have occurred. We also censure the Ottawa Electric Railway Company for not seeing to it that the rule was enforced, and the C.P.R., for running trains backwards on its main line at so great a speed within the city."

(Inquest re Wank; 21st January, 1908; Coroner's Jury.)

An inquest was held at Cobalt, Ont., on the body of George Kelly, who was killed by a falling bucket at the Tretheway mine on New Year's night. Evi-

dence was given to the effect that the Mining Act regulations had not been complied with. The jury's verdict was that "George Kelly came to his death as a result of an iron ore-bucket falling from the fifty-foot level to the bottom of the shaft, about forty feet below, where he was on duty. The cause of the bucket falling was gross negligence and incompetency of the night shift boss, and gross negligence on the part of the Tretheway Mining Company."

(Inquest re Kelly; 2nd January, 1908.)

### Disagreement of Jury in Conspiracy Case.

Louis P. Bouvier, envelope manufacturer, was committed for trial in the Police Court at Toronto in September last on a charge of conspiracy and agreeing to combine and conspire with the W. J. Gage Co., Limited, Benjamin Pearce and Bernard F. Knapp, to injure and prevent Maud McCann from carrying on her trade as an envelope-maker. According to the story told by the complainant, she had been deprived of the privilege of working at her trade in Toronto. She worked for Bouvier for three years, and for the greater part of the time received a weekly wage. She was put on piece work, but she was scarcely able to make enough money to keep her, so she sought employment elsewhere. She was engaged by the Gage Co., and after working there for a short time, she was dismissed, she says, at the instance of Bouvier. When she was notified to cease working by this firm, she was informed that they had found her to be a capable envelope-maker, but they were obliged to dismiss her for certain reasons. She then applied to Mr. Pearce for work. He couldn't accommodate her at the time, but after being idle about ten days, he put her to work in his shop. She was in his employ about three months, when she was again notified that her services were no longer required. Complainant said the latter told her that he had to dismiss her because he couldn't afford to have trouble with Bouvier, as they had a certain arrangement. Complainant claimed that Bouvier also visited Knapp's factory in search of her,

claiming that she had been employed by him.

The case came on for trial in the General Sessions at Toronto recently, but the jury disagreed, and were discharged, which means that the case will have to be re-tried.

(Rex v. Bouvier; 16th January, 1908; Winchester Co., J.)

### Damage Suits Dismissed.

Plaintiff brought action at the recent Winter Assizes at Hamilton to recover \$1,000 damages for personal injuries sustained by him while in the employment of defendants, owing, as alleged, to the negligence of the latter. On 22nd August, 1907, plaintiff, while at work in defendant's factory operating a power press, lost two of his fingers. He claimed that the machine was defective, and that his instructions were such that in following them he lost the fingers. The jury returned a verdict for defendants, freeing them from all blame for the accident.

(Windill vs. Norton Manufacturing Co., 16th January, 1908.)

At the Winter Assizes at Ottawa, an action brought by the widow of Edward Ruddick, an engineer, in the employ of the defendants, to recover damages for his death, caused, as alleged, by the negligence of the defendants, was tried without a jury by consent. Deceased was the driver of a freight train running from Ottawa to Montreal on 20th June, 1907, when a collision occurred at a diamond crossing near Lachute, in the Province of Quebec. The negligence alleged by plaintiff was that the engine was defective, and that owing to this defect, deceased met his death. After reserving judgment, the presiding Judge held that the accident was caused by the failure of the deceased to see the danger signal, or, if he saw it in time, by his unaccountable failure to stop his train; the result is that he was the author of his own misfortune, and his widow therefore cannot recover against defendants.

(Ruddick vs. C. P. R. Co., 11th January, 1908; Riddell, J.)

In the case noted at page 619 of the November number of the *Labour Gazette*,

an appeal by defendants from the judgment at the trial in plaintiff's favour was dismissed.

(Lawson vs. Packard Electric Co., 30th December, 1907; Court of Appeal)

### Damage Suits Settled Out of Court.

William Fraser, a Grand Trunk brakeman, accepted \$3,000 in full of his claim for \$10,000 against the Railway Company. Fraser was making a coupling recently on a siding when a shunting engine bumped against the cars, causing one of his legs to be cut off.

(26th December, 1907; London.)
