OpenRefine is a Java-based power tool that allows you t
it with data coming from the web. All from a web browse

Download

- OpenRefine Releases

Snapshot releases

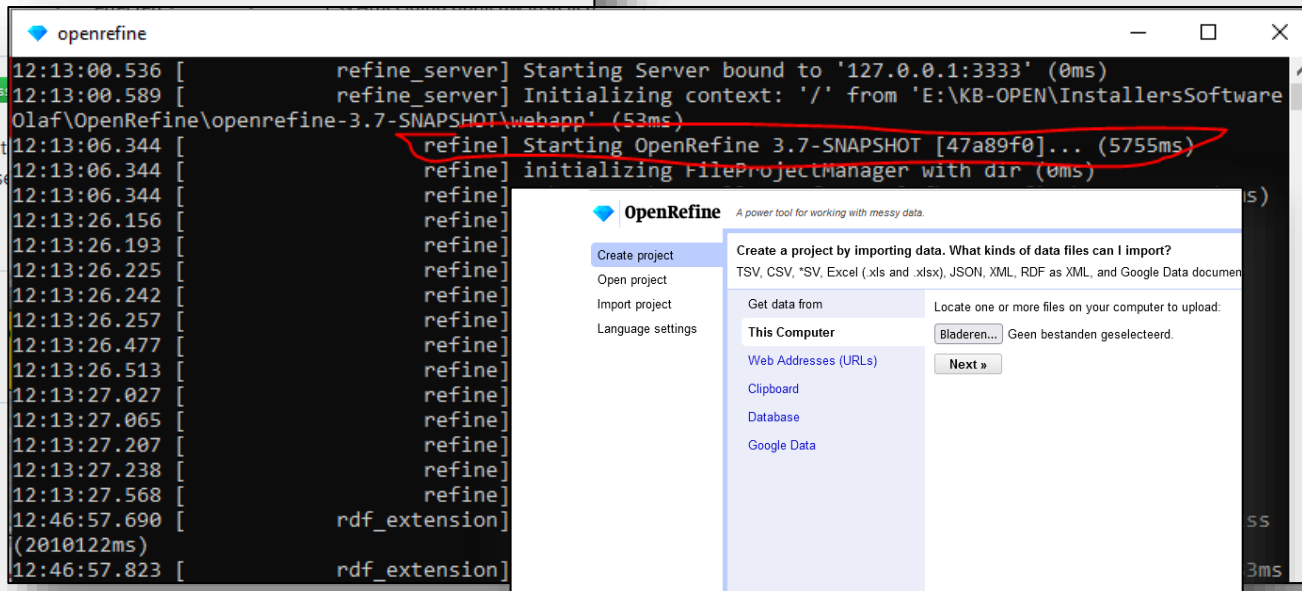
Latest development version, packaged for:

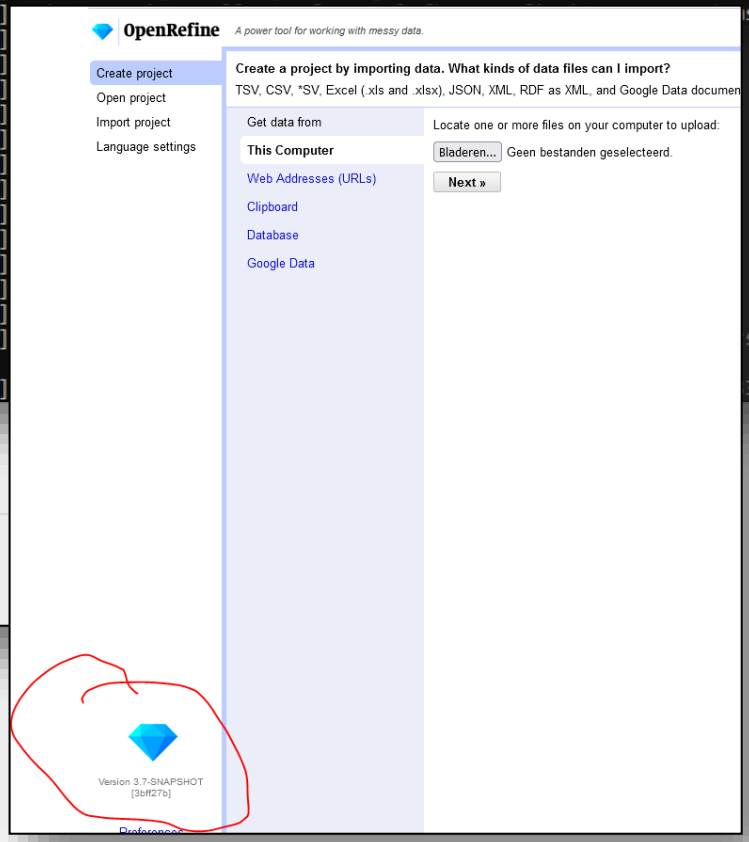
- Linux
- MacOS
- Windows without embedded JRE
- Windows with embedded JRE

Run from source

If you have cloned this repository to your computer, you can run OpenRefine with:

- `./refine` on Mac OS and Linux





Download en unzip workshop repo

Naming conflict between new and existing files on the wiki 12

The file names provided for the new media files should be distinct from any existing file names on the wiki. This is not the case for `Staveren uit de Zuiderzee te zien - Nederlandsche havengezichten enz. - KONB16-533939704 - Prent 15 van 18.jpg`.

New media uploaded 13

This batch will upload new media files. Please make sure the files you upload are admissible on this wiki.
