**PRINCIPAL MOYSE EXPLAINS IMPROVEMENTS IN THE HIGH SCHOOL AND PROGRAM**

Quite a number of changes have been made in the equipment and accommodations of Glendale Union High school for the coming session. "The building," said Principal Moyse, "has been given a complete renovation. The auditorium has been enlarged to accommodate 450 people by the taking out of the desks at the back and the throwing of the back room into one with the auditorium proper.

"We have also completely made over two of the rooms upstairs for the purpose of making them centers of the Latin and English classes. The Latin room is tastefully kalsomined in Roman style, the friezes on the walls represent the Coliseum, some ancient Roman ruins, and the Bay of Naples with Vesuvius. The English room is tastefully decorated in similar fashion, only the wall ornaments are the bust of Shakespeare, the Anne Hathaway cottage, the Old Curiosity Shop and several coats of arms. These rooms will be meeting places for the upper English and Latin classes.

"Registration up to the present time amounts to between 450 and 500, which is as much as the registration for the whole year last year. It is manifest that we will have a very much larger registration before the year is over. We have students from La Canada, La Crescenta, Monte Vista and other neighboring centers. Students have also come to us this year from Santa Susana and Newhall.

"Mr. Wight, who has charge of the boys' physical culture classes is doing his best to exercise a good influence over his pupils by giving them just enough of a training in personal hygiene to make them capable of looking out for their own physical interest. Much of his work will be done to correct physical defects where such exist.

"We are planning the installation of a cafeteria in connection with the school. This institution will be run with just the amount of profit necessary to pay for the expense of food and service. We expect this will do much to improve the physical condition of the students.

"In connection with the athletic section, we have made vast improvements. The athletic ground, as you see, has been graded and new bleachers erected which will accommodate about 600 persons. The basketball field has been set over in one part of this new ground and we have put down two fine cement tennis courts. This gives us an equipment second to none on the coast.

"All our departments are fuller this year than ever before. We have a full contingent attending the cooking classes and the sewing classes, while the demands on the drawing department are very heavy—so heavy, in fact, that we have had to engage a new teacher. All the work in this section will have a practical end.

"In the commercial department the work has been broadened. In addition to the usual bookkeeping, stenography, typewriting, etc., the students will be able to learn commercial law, business English, salesmanship, advertising and office administration.

"We have also increased the scope of the music department by the addition of a junior orchestra. This will be an institution whence will be drafted trained and competent musicians into the senior orchestra.

"This summer Miss Muller of the art department went to the summer school at Berkeley and there learned the new art of applying decoration to pottery without burning. This art was taught to the summer classes by the famous Lemos brothers of New York. That will be an addition to the art school here this year. There will also be a good deal of practical teaching in connection with work that has to be done for printers, poster work and illustrated work generally.

"In every respect the school has made a great advance this season, and the trustees have spent a deal of money trying to equip it in an up-to-date manner. By and by we hope to have a new auditorium built to the west of the school, and other improvements."

**CHAMBER OF COMMERCE**

The regular meeting of the Chamber of Commerce will be held on Friday, 7:45 p. m.

It will be an interesting meeting and it is hoped every member will be present and bring a friend with you.

**TRUSTEES PROCEEDINGS**

**PETITIONS AND COMMUNICATIONS GIVEN USUAL CONSIDERATION BY BOARD**

The regular weekly meeting of the board of trustees of the city of Glendale was held in the city hall Tuesday evening, Sept. 7, 1915, Monday, the usual day for holding the meeting, being a legal holiday.

Present: O. A. Lane, president of the board of trustees, and Trustees Chas. Grist, J. S. Thompson, A. W. Tower and Geo. Williams.

Also present: T. W. Watson, city manager; J. C. Sherer, city clerk; H. B. Lynch, manager of public service department.

The minutes of the preceding meeting were read and on motion the same were declared approved by the chair.

A communication was read from the manager of the San Fernando Valley Home Telephone company asking permission to connect underground telephone cables with their new office at 912 West Broadway. On motion permission was granted, the work to be done by the city under the supervision of the city engineer.

A communication was read from G. B. Hoffman in regard to the change made in the minutes of the meeting of Feb. 1, 1915, as brought up before the last regular meeting. On motion of Trustee Thompson it was ordered that the communication be filed with the minutes of the meeting of February 1, 1915. The communication is as follows:

Sept. 7, 1915.

Hon. Board of Trustees,  
City of Glendale.

Gentlemen: Referring to the minutes of your meeting of Feb. 1, 1915, which I reported in shorthand as minute clerk, I beg to explain the correction therein made in connection with the bids for cast-iron pipe and fittings.

At that meeting the bids for water pipe and fittings to be purchased by the public service department were opened and publicly declared. The American Cast Iron Pipe company being the lowest bidder, the manager of the public service department recommended that its bid be accepted; and my original notes clearly show that the board awarded the contract to that firm. The notes of the stenographer who took my dictation are to the same effect. The name of the American Cast Iron Pipe company, however, does not appear anywhere in connection with the subject, it being represented by J. W. Blair, its agent, who signed the bid. The stenographer, in referring to the bids while writing out her notes, failed to find the name of the American Cast Iron Pipe company, but did note that of the United States Cast Iron Pipe and Foundry company, this firm being one of the bidders; and she concluded that the words "United States" must be what was indicated in her notes as "American," hence inserted the name of the United States Cast Iron Pipe and Foundry company as the firm to whom the contract was awarded.

Upon noting the error (H. B. Lynch, manager of the public service department, having called my attention to it) I had the stenographer make the correction by inserting the proper name. But on reflecting that in the future a question as to the identity between J. W. Blair and the American Cast Iron Pipe company might arise, I ordered a further correction by inserting the words "J. W. Blair, representing the American Cast Iron Pipe company."

The error being simply a typographical one, I did not think it necessary that the board of trustees make an official correction.

Respectfully,  
G. B. HOFFMAN.

Mr. P. A. C. Moore filed an addition to the petition filed at the last regular meeting in regard to the opening and widening of Eighth street. The petition was signed by the majority of property owners along the line of the proposed extension between Adams street and Verdugo road; all of whom agree upon fifty (50) feet as the width of the proposed street. On motion the petition was referred to the city engineer with instructions to bring in the necessary proceedings.

Monthly reports were received from the building inspector, recorder and city clerk, and were ordered to be filed.

The city clerk brought before the board the matter of plumbing license of \$15.00 paid by Mr. McGinnis, who, being about to leave the city, requested that a rebate be made to him on the same. On motion of Trustee Williams, action on the application was deferred to be presented to the city attorney.

The city manager recommended

**RUSSIAN FORCES CHASE DEFEATED GERMAN AND AUSTRIAN TROOPS—8000 GERMANS SURRENDER**

(Special Service to Glendale Evening News)

PETROGRAD, Sept. 9.—Russian forces today are pursuing two German divisions and an Austrian brigade, which were disastrously defeated in the recent battle near Tarnopol, where 8,000 Germans surrendered. In addition to the thirty guns captured in the first day of the rout the Russians took fourteen machine guns today and captured further prisoners. Czar Nicholas wired his felicitations to the victorious army.

**GERMAN AIRMEN BOMBARDED A SUBURB OF PARIS ON WEDNESDAY NIGHT—NO DETAILS AT HAND**

(Special Service to Glendale Evening News)

PARIS, Sept. 9.—Three German Zeppelins suddenly appeared above one of the suburbs of Paris Wednesday night. The French aircraft went in pursuit almost immediately, but were unable to locate the enemy. Several bombs were dropped by the Germans, but details of damage done are not at hand. The Zeppelins beat a hasty retreat.

**NEW YORK FOOTMAN CONFESSES THAT HE KILLED MRS. NICHOLS WITH ASSISTANCE OF THREE MEN**

(Special Service to Glendale Evening News)

NEW YORK, Sept. 9.—Onley Calls, a footman in the service of Mrs. Elizabeth Nichols, the wealthy widow who was murdered in her home, Wednesday, confessed the crime this morning. Calls was arrested on suspicion of being implicated in the murder. According to the police he declared he had done the killing with the assistance of three other men. He also admitted that they took the old lady's diamonds. He gave the police the names of the three men and the force is now hunting them.

Mrs. Nichols was the widow of James E. Nichols, founder of the firm of Austin, Nichols & Co. of Boston. Nichols left an estate of \$3,000,000.

**GERMAN AIRCRAFT BOMBARD HISTORICAL CENTER OF ENGLISH CAPITAL—20 KILLED AND 80 WOUNDED**

(Special Service to Glendale Evening News)

LONDON, England, Sept. 9.—German Zeppelins raided the east county towns and the city of London last night. The press bureau announces total casualties of 106. Twenty are known to be dead in London and 80 wounded. Private messages indicate that the raiders reached Trafalgar square, in the very heart of London. All round that quarter many Americans reside. The new gray invisible paint used to color the Zeppelins makes it next to impossible to locate them especially at night. The aeroplanes that went up were unable to find them. They apparently traveled at a great rate of speed as bombs were dropped at considerable distances from each other in an almost negligible measure of time.

**GERMAN CONSUL AT SAN FRANCISCO DENOUNCES THE ADVERTISING DESCRIBING THE LUSITANIA DISASTER SHOW**

(Special Service to Glendale Evening News)

SAN FRANCISCO, Sept. 9.—All officialdom at the exposition is aroused by a wordy conflict that has arisen on the part of the German consul here in connection with a show that has just been put on at the zone. Immediately after the sinking of the Lusitania some enterprising Americans realizing how the indignation of the country had been aroused over the affair, started out to get up a scenic reproduction of the torpedoing of the liner and the drowning of the passengers. They succeeded in producing a realistic show, which attracts great crowds and has badly affected the feelings of some of the German colony.

Headed by Consul-General Franz Pott, this element has taken exception, not to the show itself but to the advertising describing the production, which is now in full swing on the zone. In the description of the show the word "assassin" is used to describe the submarine that sank the liner. In a letter today to president Moore of the exposition the German consul demands that the wording of the bills be changed or the Lusitania show closed at once.

ROME, Sept. 9.—Field-Marshal Conrad Von Hutzenborss, commander-in-chief of the Austrian forces operating against the Italians near Trieste, has been stricken with cholera, according to a Udine dispatch today. This dispatch is unconfirmed as yet, but it is known here that cholera is sweeping through the Austrian armies.

**CITY SCHOOLS OPEN**

**SUPERVISING PRINCIPAL WHITE GIVES INFORMATION TO PARENTS**

The Glendale city schools open on Monday, Sept. 13. At that time children ready to begin first grade work will be admitted. The legal age for a child to enter school is six years. However, an allowance of three months is made. This means that in order to enter the first grade the child would have to be six on or before Dec. 3. The allowance of three months means three school months. No beginners will be admitted after the close of the first month of the term—i. e., Oct. 8.

Parents are urged to study the district lines as given below and to send their children to the school in whose district they reside, on the first day of the term. Please note carefully also the grades that each school will enroll.

It is necessary that each child be perfectly regular in attendance. Any absence will be a serious menace to a child's standing in his classes. Also since the state and county apportionments of funds are based upon the average daily attendance, absence on the part of the child means a direct financial loss to the district.

**Kindergartens**

Kindergartens will be opened at the Columbus Ave., Colorado Street and Broadway schools. The law states the kindergarten age to be from four and a half to six. This law has been interpreted to mean that the child must be four and a half before the close of the third month of the school term, i. e., in this case on or before Dec. 3. No allowance is made for over-age. Any child who is six years old or older on the day the term begins will not be admitted to the kindergarten. Such child may, of course, enter school if the parents so desire.

In order that the parent may have a choice between the kindergarten and the school, the child must be between five years and nine months and six on the day the term begins.

Any child in the Glendale city school district who is of the proper age may attend one or another of these kindergartens. Those residing in the Colorado street and Pacific avenue school districts will attend the Colorado street kindergarten; those residing in the Columbus avenue and Central avenue school districts will attend the Columbus avenue kindergarten; those residing in the Broadway school district and in the Doran street school district east of Jackson street will attend the Broadway kindergarten; those residing in the Doran street school district west of Jackson street will consult with the supervising principal.

**THEY ATE NO FLESH**

**SEVENTH-DAY ADVENTISTS HAD VEGETARIAN CAFE AT HUNTINGTON BEACH CAMP**

Twelve thousand loaves of bread, 700 pounds of butter, six tons of potatoes, eight tons of watermelons, 2000 pies, 40 gallons of salad oil, 3000 pounds of grapes, 2000 cantaloupes, 250 gallons of soup, 450 gallons of milk, 2000 pounds of tomatoes, 25 boxes of apples and 250 pounds of rice have been required to feed the throng of Seventh-Day Adventist campers in the tent city at Huntington Beach during the ten days of the gathering. The cafeteria was crowded to capacity daily, 30 employes having been kept busy preparing and serving food. Among these were a chef and two second cooks. No flesh food whatever was served upon the grounds during the encampment, as the Adventists almost without exception do not use meat. Their chief reason for this is that flesh food is diseased and therefore dangerous to use as food.

Years ago, in the early days of the organization, the Adventists gave up the use of swine's flesh and shell fish, basing their action upon Leviticus 11, and upon the unwholesome nature of these things as articles of diet. Later, however, they have almost universally given up the use of any flesh whatever, although this is not a test of fellowship in the church. The Adventists do not fellowship, however, those who use either liquor, tobacco or habit-forming drugs.

Two tons of books were shipped to the camp from Los Angeles for exhibition and sale in the book tent. These were in nine languages. The Adventists now publish their literature in 88 languages, among them such strange tongues as the Sintebele, Javanese, Urdu, Suaheli, Raratongan, Maori, Icelandic, Zulu, Wapare and Hindi. All the European languages are included.

**Colorado Street School**—All grades through the sixth. The district of this school is all that part of the Glendale city school district enclosed by the following described line:

**Broadway School**—All grades through the sixth. The district of this school is that part of the Glendale city school district east and north of the following described line:

Starting at the intersection of the southerly prolongation of Everett street and the Tropic city limits, the line runs north along the southerly prolongation of Everett street and then in the same direction along Everett street itself to Colorado street, west on Colorado to Glendale avenue, north on Glendale avenue to Fifth street, west on Fifth to Isabel, north on Isabel to First, west on First to Jackson, north on Jackson and the northerly prolongation thereof to the north boundary of the Glendale city school district.

**Columbus Avenue School**—All grades through the sixth. The district of this school is that part of the Glendale city school district enclosed by the following described line:

Starting at the intersection of Broadway and the San Fernando road, the line runs east on Broadway to Brand boulevard, north on Brand to Second, east on Second to Louise, north on Louise to First, east on First to Jackson, north on Jackson to the easterly prolongation of Burchett, west on said prolongation and on Burchett street to the San Fernando road, south on the San Fernando road to Broadway.

**Central Avenue School**—Grades B1, A1, B2, A2, B3, A3, B4, A4, B5, B6. The district of this school is all that part of the Glendale school district lying north of Burchett street and the easterly and westerly prolongation thereof and west of the northerly prolongation of Jackson street. GLENDALE, CALIFORNIA, THURSDAY, SEPTEMBER 9, 1915

SEED OF CHRISTIANITY IN JAPAN

That Japan is ready to make one of the great Christian brotherhood of the world may be read in the story of the Rev. Danjo Yebina, which he told at a meeting of the International Religious Congress recently held in Oakland.

Mr. Yebina believes in the brotherhood of the human race and regrets deeply that any dispute should have occurred between Japan and California.

He states that these ideas have been working in the heart of the Japanese nation for the last fifty years like the leaven which was hid in the meal.

It is undoubtedly true that the spread of the gospel has been obstructed in China and Japan by the wars of conquest waged by Christians and by their greed for commercial gain and supremacy.

Happily those conditions are passing away and Christian character is beginning to have its influence all over the Orient, and the Japanese and Chinese are beginning to have some faint appreciation of what Christian brotherhood means.

UTILIZATION OF WASTE FRUIT

At a meeting of the La Canada Association not long ago Miss Godfrey, a citizen of the valley, made the excellent suggestion that all the dwellers in the valley should save their waste fruit; preserve it by canning or drying and send it to the Belgians.

It seems rather shortsighted in these days when there is so much distress and need for economy even in the United States that any kind of food should be allowed to go to waste.

No one can go far through California without becoming aware that a great deal of fruit is allowed to go to waste.

Naturally it is right to protect property; but equally naturally it is criminal to waste or destroy the product of that property.

In any case California, which God has blessed with abundance of natural products, should see to it that none of the fruits of the earth go to waste.

(Continued from Page 1) that Messrs. A. and R. Berger be given notice to appear before the board to show why their license for conducting automobile passenger service should not be revoked.

The following communication was read from Mr. Hoffman: On motion it was ordered that the license of Mr. Berger be temporarily suspended at once, and notice given him to appear before the board next Monday evening to show cause, if possible, why the suspension should not be made permanent.

On motion of Trustee Grist, Resolution No. 852, "A resolution of the board of Trustees of the city of Glendale declaring weeds growing upon and in front of certain lots in said city to be a public nuisance," was declared adopted as read, by the following vote:

Ayes: Grist, Lane, Thompson, Tower, Williams.

A report was received from the city engineer in regard to construction of the crossings of the Pacific Electric railway on Brand boulevard at Chestnut and Seventh streets.

On motion of Trustee Thompson the city engineer was ordered to proceed at once to do this work at an expense of not in excess of four hundred (\$400) dollars.

On motion it was ordered that the building inspector be instructed to make investigation as to the condition of the partially burned building on the corner of Broadway and Glendale avenue, belonging to Mr. Collier, and if found to be unsafe or in any way a menace to the public safety, to write to the owner requesting that immediate action be taken to remedy the conditions complained of.

The city engineer requested a two weeks' leave of absence in order to attend the national convention of engineers at Oakland.

Trustee Grist stated that he had been requested by the manager of the Knights of Pythias picnic to express appreciation of those conducting the affair of the co-operation of the city trustees in making it a success.

On motion of Trustee Tower a motion was adopted to the effect that when the board adjourn it be to meet at 5:30 p. m. Thursday, Sept. 9.

The following demands were referred to the finance committee.

FOR SELF DEFENSE

HENRY D. ESTBROOK, NEW YORK LAWYER, SAYS NO NATION CAN BE TOO PROUD TO FIGHT

Speaking before the American Bankers' Association at Seattle today, Henry D. Estbrook, a New York lawyer, characterized President Wilson's admonition to new citizens that "there is such a thing as being too proud to fight," as being "absurd and puerile."

The attorney was speaking on the subject of "Self-Defense." He declared the European war no concern of America except as some of the belligerents have trampled on American rights.

"No nation threatens us in so many words; but who is oblivious to hints and intimations that speak louder than words? We boast our strength to repel attack when we know we are weaker than dishwater. While every other nation has been preparing for aggression, we have not made ready even for defense.

"And yet I would heartily advocate Mr. Bryan's Quaker policy of non-resistance rather than a policy of half-heartedness. I had rather scrap every gun and warship we own if we are not to add to them.

"To say that we are too big or too proud to fight in self-defense is, with all respect to the estimable but mistaken gentleman who said it, absurd and puerile. To say that a mob of a million or so of untrained citizenry could leap to arms and put to flight the bullet-tested soldiery of Asia or of Europe is worse than puerile—it is perverse stupidity.

"A free people, says Washington, should be armed and disciplined according to some well-adjusted plan. Whose plan? I should say that the recommendations in the first instance should come from our military experts, and that in so far as their recommendations were unanimous they should be adopted without much debate and regardless of cost.

"There is approximately 1 per cent of nitrogen in coal, but it is all lost when coal burns. When coke is made about one-fifth of the nitrogen can be saved as sulphate of ammonia, which commands a high price and is free from certain disadvantages of nitrate of soda.

About 60,000 tons of cyanamid, a new nitrogen fertilizer, is made per year at Niagara Falls. It is made by exposing carbide, the source of acetylene gas, to an intense heat in an electric furnace in the presence of nitrogen from the air.

According to Dr. Lipman of the New Jersey Experiment Station, who spoke at the Fruit Growers' convention at the exposition, 34 cents per year is spent for every man, woman and child in the world for nitrogen, our most valuable plant food, in fertilizer. He states that in the United States in twenty years \$500,000,000 per year will be spent for commercial fertilizer.

PRESIDENT IS WISE President Wilson is far more patriotic in striving to keep this country at honorable peace with all nations than if he were hasty in judgment and bellicose in disposition. Quiet, but unmistakable firmness oftentimes has the desired effect where bluntness might provoke a breach. The best testimonial to the effectiveness of President Wilson's method of handling our foreign relations is the fact that this country is not at war and that danger of war seems to be passing.—Pasadena Star.

**WON FAIR HONORS**

One of the most remarkable personalities who has ever visited Glendale is Miss Elizabeth Garrett of Las Cruces, N. M. Miss Garrett is the daughter of the famous Sheriff Garrett, who distinguished himself in the frontier days of New Mexico by his daring arrests of bad men and his general efficiency as a sheriff at a time when officers of the law went with their lives in their hands from day to day. Her early days were spent in the midst of the excitement of the frontier towns. Her mother's life was a romance itself, full of adventures and thrills.

Miss Garrett was born blind, but gifted with the most exquisite sense of music. To all appearance she has never suffered any serious inconvenience from what would have been a disability to so many persons. Her intellect is remarkably quick and active and she has wonderful gifts of musical composition and poetry. Her many songs have stirred the state of New Mexico by their beauty, and one of them is now adopted as the state song.

Miss Garrett has been in Glendale for some time as a visitor to Miss Helen Beatrice Cooper of the Cooper School of Music. They are old friends. During her stay in Glendale Miss Garrett went to the San Diego fair as a representative from New Mexico. While there she composed a song on San Diego. This composition she sang at the great gathering in the exposition grounds on New Mexico day. The vast audience was thrilled to the heart by the exquisite beauty of the music and by the charm of the words.

From the great gathering there burst forth at the conclusion of Miss Garrett's singing one of the most spontaneous tributes of applause ever heard at the grounds. The judges who recently awarded a substantial money prize for a San Diego song told Miss Garrett that if she had presented her song it would undoubtedly have won first prize, as it was immensely superior to the one adopted. Miss Garrett started for her home at Las Cruces Tuesday, and left Glendale and Southern California with much regret.

Owing to the passing of Mrs. Frank E. Peters, who was a prominent member of the Tropic Thursday Afternoon club, the meeting of the board of directors scheduled to be held this afternoon at the home of Mrs. C. H. Woolsey has been postponed indefinitely.

The entire community was shocked this morning when the news passed from lip to lip and over the telephone that Mrs. Frank E. Peters passed out about 2 o'clock this morning at her home on Glendale avenue. Her friends who spent yesterday afternoon with her were all the more surprised and grieved from the fact that she was apparently perfectly well and her usual and happy self. Mrs. Peters is survived by the widower, Mr. Frank E. Peters, and her mother, Mrs. M. Moller, who has resided with her daughter since coming to Tropic to reside. Mrs. Peters was prominently identified with the Tropic Thursday Afternoon club and all philanthropic and social work. Arrangements for the interment will be made later.

**WASTE OF VITALITY**

**POINTS TO DANGER IN INCREASING ORGANIC DISEASE**

Various alarms were sounded by speakers before the annual session of the American Public Health Association in Rochester, N. Y., this week, attended by public health officers and medical men from all parts of the United States. Probably the most startling statistics presented were those offered by E. E. Rittenhouse of New York on "Increasing Organic Disease," which he declared is the new public health problem.

"The increasing waste of American vitality and life from the degenerative diseases among wage-earners and other classes is rapidly reaching the magnitude of a national menace," said Dr. Rittenhouse. "Surely the doubling of the mortality rate from this cause should be a matter of serious public concern."

"In three decades the death rate from the breaking down or wearing out of the heart, arteries and kidneys has increased 100 per cent. In the period from 1900 to 1910 the increase has been as high as 38 per cent in some states and no less than 17 per cent in every state. In the preceding ten years the increase was 52 per cent among the more than four million men in mechanical industries and in the laboring, servant and agricultural classes combined."

The condition described, said Dr. Rittenhouse, is local to America, not being found in European countries.

"There are constantly approximately 15,000,000 Americans in the 'development period,'" said the speaker. "This period ranges from a few weeks to several years in which the disease may be checked or cured. Most of these people are drifting into disease unknowingly. They are unformed, unwarmed. If the state can afford to fight germ diseases, why not degenerative disease? If it can teach community hygiene to check one, why not individual hygiene to check the other? Action is needed."

Dr. Eugene Lyman Fisk of New York said that in 1913 130,000 persons died of chronic disease of the vital machinery—all preventable or postponable. The figures reflect widespread degeneration, impairment and premature decay, he said. He recommended:

- First—Avoidance of physical or mental overstrain.
- Second—Moderation in eating, especially of meat.
- Third—Avoidance of stimulating, highly seasoned food.
- Fourth—Abstinence from alcohol and tobacco.
- Fifth—Regular exercises within the individual limits.

**NO NEED TO GROW OLD**

A man is as old as his soul. Dr. Jas. Peebles and Dr. Newo New New thus explained how they came to be 95 and 85 years young, at the New Thought Science World Congress in the Civic Auditorium of San Francisco. Dr. New, head of the New Thought Science movement, says the teachings of his society make it possible for every man to be his own "fountain of youth." Dr. New, although 85, appears to be under 60. "Man need not age," he explained. "You see, each of us has immortality with us if we but know how to preserve it."

**FATHOMS DEEP**

The boy yawned over his geography.

"How deep is the ocean?" he inquired, pointing to the center of the Pacific.

"Thousands of fathoms, my son—thousands."

"Well, how much is a fathom?"

"A fathom is—er—er—are you looking at the Pacific? Well, your Uncle Karl years ago was shipwrecked in the Pacific, and the pirates came out after him, and the cannibals—but I'm too busy now to tell you the story. Run along to bed."—St. Louis Post-Dispatch.

Mrs. Gottlieb Fischer entertained a number of friends at her pleasant home at the corner of Hill street and Walnut drive last Friday at a musical.

S. D. Percy, who had been spending a number of weeks at Long Beach and vicinity returned to his ranch on Saturday of last week and Mrs. Percy and family are expected to return from Long Beach the latter part of this week. Mr. Percy reports a most enjoyable vacation, he having spent a great portion of his time on fishing trips in the vicinity of Long Beach and San Pedro and one rather long trip to Santa Cruz island. Local fishermen and sportsmen will be interested to know that Santa Cruz is a most enjoyable resort. The island is really a better fishing point than Catalina. The Santa Cruz island is about twenty miles from Santa Barbara, and comprises over 62,000 acres and measures 32 miles in length and is from five to 14 miles in length. The island is pretty much under cultivation—being the location of the famous Santa Cruz vineyard of 6000 acres and is also quite heavily stocked. Mr. Percy's fishing expeditions were made with Long Beach friends and were extremely successful, a great many bass and yellow tails being caught. The yellow tails hooked were of good size. Mr. Percy landed a 20-pounder while one of the party had the good fortune to catch one weighing a strong 25 pounds.

REGULAR TOWN MEETING

The town meeting held last Friday evening was the first under the changed date and was held in conjunction with the lecture by George Maxwell. Moderator Fred M. Ashby called the meeting to order and told about the plan for securing of grapes from which raisins could be made by the people of the colony; and urged the people to take hold of the project. A. D. Kirschman was asked to state his experience in the raisin making business; and his talk led to remarks by George Maxwell; Rev. W. H. Wieman; Dr. B. F. Kearney and others upon this interesting question. Upon motion of E. Darlington it was voted to ask Mr. Kirschman to ascertain the price for which the grapes for making the raisins could be procured and to report at the next meeting. The moderator then spoke of the possibilities for success in the establishment of a cannery, and asked all those interested in the movement to meet at the post office Saturday night. Mr. Ashby then stated that he wished to be put on record as favoring the establishment of a passenger transportation line to be owned by the people of the colony. The present facilities being in his opinion wholly inadequate and that a more complete and spacious equipment is vitally important to the success of the colony.

George M. Maxwell the speaker of the evening then held the attention of the audience by an earnest, instructive and eloquent speech. He said that if the people thought that he was able to do all the talking they were mistaken. He desired to learn from others as well as to give a little light on subjects with which he was familiar himself. He told of his visit at the home of a family of Swiss extraction living in the suburbs of Los Angeles, and that the visit was of great inspiration to him. The members of this family, nine in all, had made a wonderful success of their 50x150 lot in the way of planting and harvesting etables. He wished to arouse again the spirit and idea upon which the Littlelands colony was founded, and nourished; namely the intention of making each family independent of the wage system which has destroyed and which will destroy all nations that grow upon the false plan of civilization which has prevailed since the duration of history.

A discussion as to the best methods of carrying out the various new ideas as to rotation or successive planting and various other affairs of the colony was then held. On motion of Wm. Miles, seconded by Geo. Slusher it was voted that at the next meeting an executive committee of three should be nominated from the floor and elected, to have power to select sub-committees to act with them in carrying out the plans to be arranged upon. At the conclusion of the meeting each person was given a planting of peas that had been inoculated with the proper producing fluid through the kindness of M. V. Hartrauf.

A meeting of the Board of Trade followed the town meeting. President Ashby called the meeting to order, and the secretary, W. R. Mohard read a set of resolutions sent from the Monte Vista Chamber of Commerce setting forth the need of co-operation and friendly feeling between the neighboring settlements. The resolution was accepted and filed. The question of having sign posts and boards erected was taken up and a committee of two, Geo. C. Buck and W. H. Weiman, were appointed to procure and put up suitable signs at Montrose and between that point and Littlelands.
