Currentness as Quality

C. Scott Ananian, Wikimedia Foundation
Wikimania Stockholm, 18 August 2019
How up-to-date are our articles?

How quickly after an event/discovery are articles updated to reflect it?
How badly do sister projects lag?
Who gets updated first? Last?
Can we quantify this?
One idea:

Correlate recent changes
One idea:

Correlate recent changes

Modern machine translation scores texts

Help! — ¡Hela!
Hello! — ¡Hola!
Hero! — ¡Ola!
For each edit to article X, find the **most likely corresponding edit** to article Y

**Filter**: match certainty, presence of numerical quantities, etc

Score based on **time difference** between edits to X and Y
What happens if we aim for currentness?
Aiming for currentness

- Wikidata-based infoboxes
- Suggested edits feed
- Greater wiki parity
- Other ideas?
THANK YOU
