ROSPERITY FOLLOWS CLOSE UPON THE HEELS OF PEACE.

\*\*\*\*\*\*\*\*\*\*

WHILE we do not wish to appear egotistical, yet in justice to

\*

THE radical departure that we made last season of selling only direct to consumers, and no longer supplying dealers to sell again, has been most satisfactory to our customers and ourselves. We have received hundreds of letters from customers commending our change of policy, which ensures their receiving the genuine PETER HENDERSON & CO.'S seeds from us direct, instead of having spurious articles foisted upon them by unscrupulous dealers. We beg to thank all our

customers for their kind words and substantial encouragement in this vitally important step that we have taken, and to say that for our part we shall redouble our efforts to merit the support which we have received by supplying only the best and purest stocks at lower prices than ever before,

ourselves and our seeds, and for the benefit of people who have never dealt with us, we claim to be the producers and distributers of the BEST SEEDS IN THE WORLD—it is our business and our profession; and we wish to say, from a business point of view, we know that planters of seeds buy them entirely on confidence; we realize that to lose a man's confidence is to lose his patronage. If you have never used our seeds, TRY THEM THIS YEAR, and we will try and retain your confidence, as we have succeeded in doing with annually increasing thousands for over half a century, and we promise you all that under our new system of ONLY SUPPLYING OUR SEEDS TO THE PLANTER DIRECT, with the dealers' trade and its blighting effect eliminated, we shall spare no expense or trouble to make our seeds even better than ever.

I to portray the conditions as they exist in this country to-day. The glistening bayonets of our victorious regiments and the booming of Dewey's guns are already becoming but a memory. The legions of industry are rapidly coming into the field, peace having been restored by our gallant army and navy, and our great country is entering on a career of prosperity such as the world has never known. The good times that are coming have been largely brought about by the farmers and gardeners of this country. The magnificent crops of the past two years, and the prices that have been realized, are starting the wheels of general industry in all directions, so that it is not unreasonable to expect that

the next five years of our country's history will be as

gloriously prosperous as the past five have been dis-

couraging and disastrous,

PLANTS BULBS

IMPLINING WYORK FERTILES

O.,

PETER HENDERSON & CO.,

35 AND 37 CORTLANDT STREET,

A DDRESSES OF PRIZE WINNERS: In last senson's Catalogues we offered twelve nameless noveltles under aumber, and offered gested by purchasers, viz.: Twelve premiums of \$25 each for the names selected as the best for each of the twelve noveltles, and 144 premiums of \$5 each for the uext best twelve names for each of the same name for the same thing the first received by us to receive the premium. ### THE ABOVE PREMIUMS CANNOT BE ALLOWED ON

Vegetable Seed Collections offered on page 12, Lawn Grass Seeds, pages 189 to 191. Farm Seeds, pages 71 to 75. Potatoes, pages 22, 60 and 61,

Fertilizers, Tools, Implements, Insecticides, Etc., on pages 176 to 188.

Nor can we allow any of these to be selected as premlums.

PREMIUMS MUST BE SELECTED AT THE TIME OF ORDERING.

By PETER HENDERSON. Price, post-paid, \$2.00. 375 Pages. Fully Illustrated. F you wish to grow Vegetables for Sale, read Gardening for Profit. The personal success of its

author during his long career as a market gardener, and the success of thousands from the time he first made his cultural methods known up to the present day, shows the popular estimation of the value set upon this great work. All over the land it opened up the market gardening interest, for It should be always remembered that this was the first work ever written on market gardening in this country. To the South alone its value is almost beyond computation, for the enormous trucking interests already there and which are constanting the land to prove the land to prove the contraction of the value is almost beyond computation, for the enormous trucking interests already there and which are constanting the land to prove the land to p

ests already there, and which are constantly on the lncrease, owe their birth entirely to, and subsequent development mainly to the teachings of Gardening for Profit. While written particularly for the Market Gardener and Trucker, yet it is of equal value for large private gardens. The first edition of Gardening for Profit was published in 1866; it has been revised twice since, and its sale has been so large that up to this time 43 editions have been printed. The lished in 1866; it has been revised twice since, and its sale has been so large that up to this time 43 editions have been printed. present edition is revised and greatly enlarged. Its scope has also been greatly extended since the earlier editions were published. The varieties in vegetables recommended for market culture are kinds in general use at this time.

The Foreing of all Important Vegetables and Fruits under Glass—The Men Fitted for the Business—The Amount of Capital required and Working Force per Acro—Profits of Market Gardening—Location. Situation and Laying Out—Soils, Drainage and Preparation—Manures—The Uses and Management of Cold Frames—Protecting Cloth In lieu of Sashes—Spring Raising of Cabbuge, Canlillower and Lettuco—Formation and Management of Ilot Beds—

Fruits—Monthly Calendar of Operations.

By PETER HENDERSON. 325 Pages. Fully Illustrated. Price, post-paid, \$1.50.

IF you wish to become a Commercial Florist, then of all books you should procure PRACTIOAL FLORIOULTURE. We have any number of complimentary letters from people who actually knewnothing of the florists' business, but who followed the instructions in this work and are now "full-fledged florists." And although written especially for the Commercial Florist, it is equally valuable to the amateur and all having conservatories, greenhouses, window gardens, etc. Practical Floriculture was first issued in 1868, has gone through many editions and had an enormous sale, and is admitted to be the leading American authority on this subject. This present edition is greatly enlarged and revised to keep abreast of the times, as there are now many superior methods of propagation and culture of flowers and plants—and many improved varieties of plants—all of which have been fully treated in this new edition.

How to become a Florist—The Profits of Florieulture—Aspect and Soil—The Preparation for New and the Renovation of Old Lawns—Laying out the Flower Garden—Designs for Ornamental Grounds and Flower Gardens—Planting of Flower Beds—Soils For Potting—Temperature and Moisture—The Potting of Plants—Drainage in Pots—Cold Frames for Winter Protection—Construction of Hot Reds—Greenhous Structures—Glass, Glazing and Shading—Modes of Heating—Propagation of Plants by Soeds—Propagation of Plants by Cuttings—Propagating Roses by Grafting and Budding—Greenhouse Plants most in demand

—Diary of Greenhouse

INTS.

in Spring—Cold Frame Plants most sold in Spring—Plants most in demand for Window Decoration in Winter—Culture of Winter-Ilowering Plants for Cut Flowers—Rose Growing in Winter—Bulbs for Winter Flowers—Plants used for Decoration of Rooms—Construction of Bouquets, etc.—Hanging Baskets—Parior or Window Gardenling—Formation of Rockwork and Plants for Rocks—What Flowers will grow in the Shade—Succession Crops in the Greenhouse—Packing Plants—Plants by Mail—Insects and Diseases Affecting Plants—Mildow—Diarry of Operations for the Year—The Culture of Foreign Grape Vines under Glass.

By PETER HENDERSON. 404 Pages. Fully Illustrated. Price, post-paid, \$2.00.

X/AS written to meet the wants of those desiring information on gardening for private use. Its scope therefore embraces directions for the culture and propagation of Flowers, Vegetables and Fruits. It has had a large sale, and gone through several editions, the present having been revised and greatly enlarged; it exhaustively treats on the Vegetable Garden, Flower Garden, Fruit Garden, Greenhouse, Grapery, Window Garden, Lawn, the Water Garden, etc.

Preparation of the Ground-Walks-The Lawn-Design for Gardens-Planting of Lawn de Flower Beds-Fall or Holland Bulbs, etc.—Propagation of Plants by Seeds—Propagation of Plants by Cuttings—How Grafting and Budding are Done-The Potting of Plants-Windsrehovering Plants-Plants suited for Summer Decoration—Window Gardening—Culture Water Lilies and other Aquatic Plants—The Chrysantbemum—Parlor Gardening or the

Cultivation of Plants in Rooms—Greenhouses attached to Dwellings—Detached Greenhouses, Modes of Heating, etc.—Greenhouses and Pits without Artifielal Heating—Flowers that will grow in the Shade—Insects and other Parasites injurious to Plants—Humbugs in Horticulture—Hardy Grapes—Tho Cold Grapery—The Hot bouse or Forcing Grapery—The Strawberry—The Vegetable Garden—Monthly Calendar of Operations.

By PETER HENDERSON, 526 Pages. Profusely Illustrated. Price, post-paid \$4.00.

HE original Handbook of Plants was issued in 1881; in this new edition, rewritten and enlarged, all the new genera of importance are added. All botanical terms are given, and also a very full list of popular names, and all the generic names are accentuated. The natural system of arrangement is adopted in the descriptions instead of the Linnean or artificial system; and a carefully compiled glossary of the technical terms used in describing plants. A monthly callendar of operations for the greenhouse and mindow gurden former family and higher condensation and a carefully compiled glossary and a carefully condensation of the condensatio window garden, flower, fruit and kitchen garden, will undoubtedly render this edition valuable as a book of reference. Very full instructions are given for the culture and forcing of all Fruits, Flowers and Vege-

tables of importance; in short, there is sufficient matter given on all gardening subjects to allow this book to be termed The American Gardener's Dictionary. And it will be better adapted to the wants of American hortleulturists than any of the more costly foreign works on gardening; for though from a foreign standpoint these are all they claim to be, yet for our American climate much of the information, and especially the gardening instructions, are not only uscless, but actually misleading.

### CONTENTS .-

Ahout 5,000 genera of plants, alphabetically arranged, with their descriptions, individual histories, usefulness, hardiness, requirements, etc., and where their importance justifies it, cultural instructions are given—Local, Popular or Common Names—Correct Prounchatton—Cultivation of principal Vegetables, Fruits and Flowers—Winter Forcing of Roses, Rulbs and other Plants used for Cut Flowers—Winter Forcing of Vegetables and Fruits—Monthly Calendar of Garden Operations.

Annuals, Bedding and Borders, Bouquets, Budding, Cold Frumes and Pits, Color in Flowers, Conservatory, Designs, Draining, Fertilizers, Fountains, Frozen Phants, Giuss and Giazing, Grafting, Grasses, Greenhouse, Hanging Buskets, Heating, Hedges, Herbacous Phants, Herbarium, Hybridization, Insects and Insecticides, Lawn, Manuves, Mulching, Moles,

Orchard, Orchid Culture, Ornamental Planting, Parlor Gardening, Plant Protection, Plants in Rooms, Plants for Shady Places, Plants for Scaside, Poisonous or Unhealthy Plants, Potting, Propagation by Cuttings, Layers, Seeds, etc., Priming, Rock Garden and Rock Work, Rotation of Crops, Serens, Seeds, Shadling, Soil, Sub-soilling, Sub-tropical Garden, Temperature, Transplanting, Trenching, Vases, Ventilating, Wulks, Wurdian Cases, Waterfalls, Waterling, Water Lilies and Water Plants, Weeds, Wintering Plants, Useful Tables and Memoranda on Temperature, Rain, Soil, Manures, Numbers of Plants and Trees to an Acre, Quantity of Seeds required per Acre; for a certain number of Plants; to a given length of Drill, etc.

By PETER HENDERSON and WM. CROZIER. 400 Pages. Profusely Illustrated. Price, post-paid, \$2.50.

A Nacknowledged authority for Farmers. Gives an of the Latest Archiver, etc., etc. It is written Grain, Root Crops, Fruits, etc.; and all about Stock, Farm Machinery, etc., etc. It is written Everything pertaining to scientific or abstruse N acknowledged authority for Farmers. Gives all of the Latest Methods of Growing Grass, subjects has been ignored, the information given being the most direct to make the work of the farm pay. This is perhaps the first book of the kind ever written by two men while actually engaged in the work which, to both, has been such a continued success—hence, their advice is practical This is perhaps the first book of the kind ever written by two men while actually engaged and doubly valuable.

Training for the Business of Farming—Agricultural College Education—Selection of Soils
—Farm Roads—Draining—Manures and the Modes of Application—Special Fertilizers—
Green Manuring—Fertilizing by Feeding—Plowing, Harrowing, Cultivating and Rolling
Land—Use of the Feet in Sowing and Planting—Rotation of Crops—Crops for Soiling and
Fodder—Abortion in Cows—Grass and its Management—Varieties of Grasses—Mixed Grasses
for Pasture and Hay-Cutting and Curing of Hay—Clover Hay—Ensilage—Ensilage—Sailage Compared with Roots—Live Stock of the Farm—Cows for the Dairy—Feed and Care for Milk and

Butter—Young Cattle and their Care—Management of the Bairy—Farm Horses—Swine—Farm Buildings—Fences—Rearing and Keeping Poulity—Pests of the Fartheir Remedies—Farm Machinery—Plows—Harrows—Cultivators—Mowers and Rellaying Machinery—Fodder Cutters—Carts—Farm Cultiver of Vegetables and Fruit bage—Celery—Sweet Corn—Cucumbers for Pickles—Melons as a Market Crop—Or Culture of Small Fruits.

Popular bulbs—Window Gardening—Plants in Rooms—Propaga-tion of Plants by Cuttings, Layers, Divisions and Seed—Rose Grow-ing in Winter—Greenhouse Structures and Heating—Formation and Renovation of Lawns—Onlon Growing for Market—How to Grow Caulifulower for Mar-ket—Growing and Preserving Celery—Strawberry Culture—Root Crops for Farm Stock— Culture of Alfalfa and Lucerne—Mamures and their Application—Market Gardening around New York—The Use of the Feet in Seed Sowing and Planting—Dralning.

Insecticides and Fungicides: How to Mix and Apply Them—Injurious Insects, with Remedies, and the Plants and Trees they smally Attack—Plant Diseases (such as Mildew, Rust, Rot, etc., etc.), with Remedies, and le Plants Usually Affected—Insecticide and Fungicide Ingredients and their Average Cost Spraying Calendar, etc.

Descriptions of Bulbs, alphabetically arranged, with Special Cnitural Instructions for each—Designs for Beds of Tulips and Hyacinths—Naturalizing Bulbs in Lawns, etc.—The Window Garden of Bulbs—Hyacinth Glusses, Croens Pots, etc.—Bulbs in Cold Frames and Pits—When Bulbs should be Taken Up—Preparation and Outside Planting—Spring-flowering Bulbs—Winter-flowering Bulbs—Summer-flowering Bulbs—Foreing Bulbs—Foreing Bulbs—Summer-flowering Bulbs—S

Condensed Vegetable and Flower Seed Culture.

By PETER HENDERSON. Price, post-paid, 10 Ceats.

An eight-page pamphlet, containing, in a condensed form, instructions for the cultivation of Garden Vegetables and Flowers from seeds. Also, full directions for making Hot Beds and Cold Frames.

Special Offer. If ordered at one time, we will supply the full set of ten books, offered on pages 6 and 7 carriage prepaid, for \$10.00. (Separately, they would cost \$13.85). This set of books forms A COMPLETE LIBRARY OF THE GARDEN, GREENHOUSE AND FARM.

### Brief Directions for the Sowing and Culture of

## GARDEN VEGETABLES

For the Private Garden, By Peter Henderson.

### ASPARAGUS.

ASPARAGUS.

German, Spargel.—French, Asperge.—Spanish, Esparragos.

1 onnce for 60 feet of drill.

Asparagns can be grown from seed, but the best way for the amatem to grow it is from roots, which can be planted any time for six to eight weeks from the opening of spring. Besides, a year or more can be saved by planting roots. For private use or for marketing on a small scale, beds should be formed five feet wide, with three rows planted in each, one in the middle and one on each side, a foot from the edge; the distance of the plants in the rows, nine buches. The alleys between the bedsshould be two feet wide. In planting a line is set and a cut made a little slanting to the depth of six or eight inches, according to the size of the plants. The plants are then laid against the side of the trench, at the distance already named (nine luches), care being taken to properly spread the roots. The crown or top of the plant should be covered about three luches. In a week or so after planting the beds should be touched over lightly with a sharp steel rake, which will destroy the germmating weeds. The raking had better be continued at Intervals of a week or so, until the plants start to grow, when the loc or hand-cultivator may be applied between the rows and alleys. The weeds that come up close to the plant must of nearmer that is used the greater will be the crop, for Asparagus is what the gardeners call a gross feeder. An application of one-half pound of sait per square yard annually in spring is very beneficial. benellelal.

BEANS, Dwarf or Bush.

German, Bohne.—French, Harleot.—Spanish, Frijorenano.
1 qt. to 100 feet of drill; 1½ bushels to the acre in drills.
A succession of sowlings can be made every two weeks from the lirst week in May until September. These dates are for the latitude of New York. Further South the first sowling must be done earlier; further North later. Plant in drills about two becks deep, and from eighteen inches to two feet apart, according to the richness of the soil; the poorer the soil the closer they can be planted. The seeds should be dropped about two inches apart in the drills.

BEANS, Pole Lima, or Climbing.

BEANS, Pole Lima, or Climbing.

German, Stangen-Bohnea.—French, Haricot a Rames.—Spanish, Judias.

1 qt. to 150 hills; 10 to 16 qts. to the acre in hills.

These are more tender and require rather more care in culture than the Bush varieties, and should be sown two weeks later. They succeed best in sandy loam, which should be liberally enriched with well-rotted manure in the hills, which are formed, neeording to variety, from three to four feet apart; from live to six seeds are planted in each hill, about two inches deep. As the matured bean is mostly used, the season is too short for succession crops in the North, though it is advantageous to plant succession crops in the Southern States, where the season of growth is often from March to November. Rough cedar or similar poles about seven or eight feet long should be used for Pole Beans, especially the Limas, to climb on. They should be set in the ground at least eighteen linehes, so as to prevent being blown over.

### BEET.

German, Runkel Rube.—French, Betterave.—Spanish, Betteraga.

1 oz. to 50 feet of drill; 5 lbs. to the aere in drills.

The soil best suited for the culture of the Beet is that which is rather light than otherwise, always provided that it is thoroughly enriched with well-rotted manure. For an early supply sow in spring, as soon as the ground is fit to work, in drills about one foot apart and two inches deep. For main crop, sow the first week in May, and for winter use sow in June. These dates are for the latitude of New York. For the South sow earlier; for the North later. When the plants have attained three or four leaves, thin out so that they may stand five or six inches apart. Keep free from weeds. In October the roots may be taken up and stored in cellar or pits outside.

### BRUSSELS SPROUTS.

German, Kopfkohl Gruner.—French, Chou de Bruxelles.
Sow ontside in drills in April or May and transplant two feet apart in July.
Cultivate same as Cabhage; tius it may be had in line condition from October until December, and ia the Sonthern States may be had in use from November

### CABBAGE.

Garman, Kopfkohl.—French, Chou Pomme.—Spanish, Repollo.

1 oz. will produce 1,500 plants; half-pound to transplant for an acre.
The early varieties of Cabbage are cultivated more extensively than any other vegetable. In latitudes where the thermometer never indicates twenty degrees below the freezing point, seed may be sown in the open border in October and planted out on the first opening of spring; but in our Northern States they must either be sown in hot beds in February, or, what is still better, wintered over in cold frames; for this purpose the seed is sown from the 10th to the 20th of September. Attention to date is important; if too soon the plants might run to seed, and if too late they would be too small. In four or five weeks from the time of sowing they will be fit to transplant into the cold frames. In planting it is very important with Cabbage or Cauliflower that the plant is set down to the first leaf, so that the stem is all under ground, for, if exposed, it will be split by the action of the frost, and will be injured in consequence. The plants me usually set out from the middle of March to the middle of April, in rows about two feet apart, and eighteen inches between the plants in rows. This earliest crop matures in June. For second early the early kinds should be sown first each apart, and planted out in May. This crop should mature in July and Angust. The late varieties are usually sown in the early part of May, and the plants are set in July, at distances of three feet between the rows, and two feet between the plants. This crop matures September, October or November.

plants. This crop matures September, October or November,

CAULIFLOWER.

German, Blumea-Kohl.—French, Choufleur.—Spanish, Coliflor.

1 oz. will produce about 1,000 plants.

Any soil that will grow Cabbage will grow Cauliflower, as their requirements are almost shallar; but as the product is more valuable, extra manuring and preparation of the soil will be well repaid.

The seed may be sown in September and wintered over in the same ananner as described for early Cabbage. Where this is not practicable, it may be had aearly as well by sowing the seeds in the hot bed in January or February, and transplaating the plants at two or three Inches apart in boxes or in the soil of

another hot bed, intil such time as they are safe to be planted in the open ground, which, he this latitude, is usually from the 15th of March to the 10th of April. If properly hardened off they are seldom injured by planting out too early. For second early and late crop sow at same date as given in the directions for Cabbage or in tions for Cabbage crop.

### CARROT.

German, Mohre.—French, Carotte.—Spanish, Zannhoria.

1 oz. for 125 feet of drill; 4 lbs. for an acre.

The Carrot, like other root crops, delights in a sandy loam, richly tilled. For early crops sow in spring, as soon as the ground is in good working order; for later crops they may be sown any time mitli the middle of June. Sow in rows about fifteen linches apart, thinning out to three or four inches between the plants. In tield eniture, when grown for horses or cattle, the rows should be two feet apart, so that the crop can be worked with the Horse Cultivator. As Carrot seed is slow to germinate, extra precautions must be taken to firm the seed in the soit.

CELERY.

German, Scleri.—French, Celeri.—Spanish, Apis.

1 oz. for 3,000 plants.

Sow in the open ground as soon as it is fit to work in April, and keep carefully clear of weeds until time of transplanting in June or July. The tops should be shorn once or twice before transplanting, so as to ensure "stocky" plants.

The lower half of the root should also be cut off before transplanting.

After the ground has been prepared, lines are made on the level surface, three feet apart, and the plants set six mehes apart in the lines. If the weather be dry at the time of planting great care should be taken that the roots are properly "itrmed." Our custom is to turn back on the row and press by the side of each plant gently with the foot. This compacts the soil, and excludes the air from the roots until new rootiets are formed, which will usually be in forty-eight hours, after which all danger is over. After the planting of the Celery is completed, nothing further is to be done for six or seven weeks, except going through between the rows with a cultivator or hoe and freeling the plants of weeds until they get strong enough to crowd them down. This will bring us to about the middle of August, by which time we have usually that moist and cool atmosphere essential to the growth of Celery. Then we begin the "earthing up" "necessary for the blanching and whitening of that which is wanted for use during the months of September, October and November. The first operation is that of "handling," as we term it; that is, after all the solihase been drawn up against the plant with a hoe, it is further drawn close around each plant by the hand, firm enough to keep the leaves in an upright position and prevent them from spreading. This being done, noore soil is drawn against the row (either by the plow or hoe, as circumstances require) so as to keep the plant in this upright position. The hlanching process must, however, befuilshed by the spade, which is done by digging the soil from between the rows and banking it up clear to the top

Profit,"fully described on page 6.

German, Welschkorn.—French, Mais.—Spanish, Maiz.

1 qt. for 200 hills; S to 10 qts. in hills for an acre.

All varieties of Sweet or Sugar Cornmay be either sown in rows four and a half feet apart, and the seeds placed about eight inches apart in the rows, or planted in hills at distances of three or four feet each way, according to the variety grown or the richness of the soil in which it is planted. The talier the variety, or the richer the soil, the greater should be the distance apart. We make our first plantings in this vicinity about the middle of May and continue successive plantings every two or three weeks until the last week in July. In more southerly intitudes planting is begun a month earlier and continued a month later.

CRESS, or Pepper Grass.

German, Kresse.—French, Cresson.—Spanish, Mastruco.

A well-known pungent salad. Requires to be sown thickly in rows and covered very slightly. Sow in April in open ground in rows one foot apart and thin out as needed. To keep up a succession, sow frequently, as all varieties detectorate randily. deterlorate rapidly.

### CUCUMBER.

German, Gurke.—French, Concombre.—Spanish, Cohombro.

1 oz. for 60 hills; 2 to 3 lbs. in hills for an acre.

Cucumbers succeed best in warm, rich sandy loam. They should not be planted in the open alr until there is a prospect of settled warm weather—in the vicial ty of New York about the middle of May; plant in hills about four feet apart each way. The hills should be previously prepared, by mixing with the soil of each a shoveful of well-rotted manure. Plant eight or ten seeds is each hill. When all danger from insects is past thin out the plants, leaving three or four of the strongest to each hill. The fruit should be gathered when large enough, whether required for use or not, as, if left to ripen on the vines, it destroys their productiveness. stroys their productiveness

### EGG PLANT.

German, Eierpflanze.—French, Aubergine.—Spanish, Berengena,
1 oz. for 1,000 plants.

The Egg Plant will thrive well in any good garden soil, but will repay good treatment. The seed should be sown in hot beds or warm greenhouse in March or April, and when about an inch high, pot in two-inch pats. Plant ont, about June 1st, two and a half feet apart. If no hot bed is at hand, they can be grown in any light room where the temperature will average seventy-five degrees.

### ENDIVE.

German, Endirica.—French, Chicoree.—Spanish, Endiria.

1 oz. for 100 feet of drill or 2,000 plants.

Endive is one of the best sainds for fall and winter use. Sow for an enrily supply about the middle of April. As it is used mostly in the fail months, the maia sowings are made in June and July and transplanted one foot apart each way when of sufficient size. It requires no special soil or manure, and after transplanting, if kept clear of weeds until the plant has attained its full size, the process of blanching begins. This is effected by gathering up the leaves, and tying them by their tips in a conical form, with Raphia. This excludes the light and air from the laner leaves, which become blanched in the course of from

three to six weeks, according to the temperature at the time. Another and more simple method consists in laying slats or boards on the plants as they grow, which serves the same purpose as the tying np. It can also be grown by sowing the seed and thiming out to one foot npart each way, as recom-

wended for Lettuce.

KALE, or Borecole.

German, Blatter-Kohl.—French, Chou Vert.—Spanish, Breton.

1 oz. will sow 150 feet ol drill.

Kale, or Borecole, may be grown in almost any soil, but the richer it is the more abundant the product. If wanted for use in late fail or early winter, sow early in June and transplant, as directed for Cabhage, middle of July. If needed for spring use, sow Siberlan about middle of Angust and transplant a month later. Of all the Cabhage tribe this is the most tender and delicate, and would be much more extensively grown than it is, if its excellent qualities were generally known. The varieties are all extremely hardy, and are best when erally known. Touched by frost.

Germnn, Lauch.—French, Poireau.—Spanish, Puerro.

1 oz. will sow 100 feet of drill.

The Leek is very hardy and easily chitvated; it succeeds best in a light but well-enriched soil. Sow as early in spring as practicable, in drills one lach deep and one foot apart. When six or eight inelies light they may be transplanted in rows ten luches apart each way, as deep as possible, that the neck, being covered, may be blanched. If fine Leeks be desired, the ground can hardly be made too rich, for the Leek is a gross feeder.

The cultivation of Lettuce is universal by all insects and diseases, it is manageable in the hands of every one. For early crop, seed may be soon in the son and in the plants of soon in the son in t

iate in the season.

MELON, Musk.

German, Melone.—French, Melon.—Spanish, Melon.

1 oz. for 60 bills; 2 to 3 ibs. in bills for an acre.

Melons thrive best in a moderately enriched light soil; the bills should be from three to six feet apart each way, according to the richness of the soil, if soil is poor or sandy, plant at four feet. Previous to planting, incorporate well with the soil in each bill a couple of shovelsful of thoroughly-rotted manure; plant eight or ten seeds in each bill early in May, for latitude of New York, for South earlier, for further North inter, and when well up thin out to three or four of the most promising.

MIELON, Water.

Germnn, Wasser-Melone.—French, Melon & Eau.—Spanish, Sandia.

1 oz. for 30 hills; 4 to 5 lbs. in hills for an acre.

Water Melons require a rich though rather sandy soil for best development, and thrive best in warm latitudes, growing best in the Southern or Southwestern States, although in warm, sandy soils in this latitude fine crops are often obtained from Northern-grown seed. Cultivate exactly as lor Musk Melons, except that the hills should be eight and ten leet apart.

OKRA, or Gumbo.

German, Essbarer.—French, Gombo.—Spanish, Quibombo.

It is of the easiest eulture, mid grows freely, bearing abundantly in any garden soil. It is sown at the usual time of all tender vegetables, in this section middle of May, in drills two inches deep, thinning the plants from two to three feet apart in row.

German, Zwiebel.—French, Oignon.—Spanish, Cebolla.

1 oz. for 100 feet of drill; 5 or 6 lbs. In drills for an acre.

The Onlon thrives best in a rather deep, rich, loany soil. The best culture requires that the ground should be deeply trenched or plonghed and mannied the previous autumn, and laid up in ridges during the whiter to pulverize. As early in the spring as the ground is in working order, commence operations by leveling the ground with a harrow or rake, and roll or tread it firmly; sow thinly in drills about a quarter of an Inch deep and one foot apart; cover with fine soil, and press down with the back of a spade, or a light roller, or with the foot along each row. When the young plants are strong enough, thin gradually so that they stand three or four inches apart. Keep the surface of the ground open and free from weeds by frequent beeing, taking care not to stir the soil too deeply or to collect it about the growing bulbs.

PARSLEY.

German, Petersilie.—Freneh, Persil.—Spanlsh, Peregil.

1 oz. for 150 feet of drill.

Parsley succeeds best in a rich, mellow soil. As the seed germinates very slowly, three or four weeks clapsing sometimes before it makes its appearance, it should be sown early in spring, great care being taken that the drills be not more tinan an inch in depth and that the seed be well pressed down after sowing. Sow thickly in rows a foot apart and half an inch deep. For winter use, protect in a frame or light cellar, or a few plants may be placed in pots or boxes and kept in the house for convenient use in winter.

PARSNIP.

German, Pastinake.—Frenel, Panais.—Spunish, Pastinaca,
1 oz. for 200 feet of drill; 5 to 6 lbs. in drills for an aere.
Sow as early in spring as the weather will admit, in drills eighteen inches apart, covering half an inch deep. When well up, thin out to five or six inches apart in the rows. Unlike Carrots, they are improved by frost, and it is usual to take up in fall a certain quantity for where use, and storeas directed for Turnips, leaving the rest in the ground until spring, to be dug up as required.

PEAS.

German, Erbse.—French, Pois.—Spanish, Guizante.
1 qt. for 75 feet of drill; 2 to 3 bushels in drills for an acre.
Peas come earlier to maturity in light, rich soil. For general crop, a deep loam, or a soil strongly inclining to clay, is best. For early crops, decomposed

leaves or leaf-mold, if convenient, mny be used, or, if the soil is very poor, well-rotted manure should be used. For general crop, a good dressing should be applied, and for the dwarl-growing kinds the soil can hardly be too rich. When grown as a market crop, Peas are sown in single rows, two or three inches deep and from two to three feet apart, according to height of variety or the strength of the soil. When grown in smail quantities for private use they are generally sown in domble rows, six or eight inches apart, and the tail varieties staked up by brish or our Pea Trellis. For an early crop, sow in February, March or April, according to fattude, as soon as the ground can be worked, and make repeated sowings every two weeks for succession. After the first of June sowing should be discontinued until August, when a good crop may sometimes be seemed by sowing an extra early sort for fall use.

PEPPER.

German, Pfeffer.—French, Piment.—Spanlsh, Pimiento.
Requires exactly the same treatment as directed for Egg Plant.
For Exhibitions.—Ruby King, Sweet Spanlsh and County Fair are the most desirable and attractive varieties. The plants should stand two and one-half to three feet apart to admit abundance of smillight. Plenty of manure or fertilizer should be worked into the soil around the roots, and frequent applications of Booke manure when the soil around the roots. should be worked 1mo and Hquid manure should be given.

German, Kurbis.—French, Courge.—Spanlsh, Calabaza.

1 oz. for 30 to 50 hills.

Pumpkins are now principally cultivated for agricultural purposes. They are usually planted in fields of corn or potatoes, but may be profitably raised in fields by themselves. Sow first of May in this latitude, in hills eight feet apart.

RADISH.

German, Rettig, Radieschen.—French, Radis, Rave, Petit Rave.—
Spanish, Rahano.

1 oz. for 100 feet of drill; 9 to 10 lbs, in drills for an aere.
Radishes thrive best in a light, sandy loam. Heavy or clayey solls not only delay their maturity, but produce erops much inferior, both in appearance and flavor. For a continuous supply, sow from the middle of March until September, at intervals of two or three weeks. For an early supply they may be sown in a hot led in February, care being taken to give plenty of ventilation, otherwise they will run to leaves. If plaster is incorporated with the soil in the row at time of sowing the seed, the Radishes will always turn out brighter in color, erisper, and of better quality.

RHUBARR.

German, Rhabarber.—French, Rhubarbe.—Spanish, Ruibarbo Bastardo.
Sow in April, in drills a foot apart, thinning out to about the same distance apart in rows when a few inches high. The following spring transplant into deep, rich soil, about three feet apart each way. If propagated by dividing the roots, it may be done either in fall or spring, plunting it at the same distance apart as given above. The soil cannot be too rich.

SALSIFY, or Oyster Plant.

German, Bocksbart.—French, Salsins.—Spanish, Ostra Vegetal.

1 oz. to 75 feet of drill.

The Oyster Plant succeeds best in light, well-eurlched mellow soll, which, previous to sowing the seeds, should be stirred to a depth of eighteen luches. Sow early in spring, in drills eighteen inches apart; cover the seeds with fine soil an luch and a half in depth, and when the plants are strong enough, thin ont to see helps evaport. to six inches apart.

SPINACH.

German, Spinat.—French, Epinard.—Spanish, Espinaca.

1 oz. for 100 feet of drill; 10 to 12 lbs. In drills for an acre.

Sow thinly in rows about twelve or fifteen inches apart. The main crop is sown in September. It is sometimes covered up in exposed places with straw or salt hay during winter, which prevents it from being cut with the frost, but in sheltered fields there is no necessity for covering. For summer use it may be sown at intervals of two or three weeks, from April to August. Spinach is best developed and most tender and sneculent when grown in rich soil

German, Kurbiss.—French, Courge.—Spanish, Calabasa Tomtanera.

1 oz. for 50 hills; 3 to 4 lbs. in hills for an acre.

It is useless to sow until the weather has become settled and warm. Light, rich soils are best suited to their growth, and it is most economical of manure to prepare hills for the seeds in the ordinary manurer by incorporating two or three shovelsind of well-rotted manure with the soil for each hill, as is done for Melous. For bush varieties, from three to four feet each way, and for the running sorts, from eight to ten feet. Eight or ten seeds should be sown in each hill, thiuning out ofter they have attained their third and fourth lenves, fenving three or four of the strongest plants. three or four of the strongest plants.

German, Liebesapfel.—French, Tomate.—Spanish, Tomate.

1 oz. for 1,500 plants; ¼ lb. to transplant for an acre.

The seed should be sown early in March in a hot bed, greenhouse, or inside the window or sitting-room, where a night temperature of not less than sixty degrees is kept, in drills five inches apart and half an luch deep. When the plants are about two lnehes high they should be set out three inches apart in boxes three inches deep, or potted into three-inch pots, allowing a single plant to a pot. They are sometimes shifted a second time into larger pots, by which process the plants are rendered more sturdy and branching. About the middle of May, in this intitude, the plants may be set in the open ground. They are planted for early crops on light, sandy soil, at a distance of three feet apart, in hills in which a good shovellal of rotted manure has been mixed. On heavy soils which are not suited for an early crop, they should be planted four feet apart. Water freely at the time of transplanting, and shelter from the sun a few days until the plants are established. Tomatoes will always produce greater crops and be of better flavor when staked up, or when trained against walls or fences.

German, Steekruhe.—French, Navet.—Spanish, Naho Coman.

1 oz. to 150 feet of drill; 1 to 2 lbs. per acre la drills.

Turnips do best in highly enriched, light, sandy or gravelly soil; commence sowing the enrilest varieties in April in drills, from tweive to fifteen inches apart, and thin out early to six ornineinches in the rows. For a succession, sow at Intervals of a fortnight until the last week in May for early crop, and from August to September for late. August sowings may be made for the fall and main crops. Turnips may be preserved until spring by cutting off the tops about one inch from the bulb and storing in a cellar or cool shed during where, covering the roots with dry sand; they should be harvested before severe frosts set in, for, though comparatively hardy, few of the varieties will survive the winters of the Northern States in the open ground.

# WVEGETABLE SEEDS

## OF Vegetable Seeds, giving a continuous supply of fresh vegetables throughout the season.

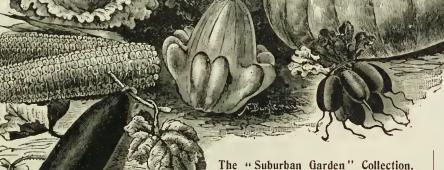

### FOR THE CITY GARDEN, SUBURBAN GARDEN AND COUNTRY GENTLEMAN'S HOME.

The frequent requests from eustomers for an assortment of garden seeds for a garden of small, medlum or large dimensions, that will save them the trouble of selecting, has induced us to offer the collections detailed below. Our long experience in selecting for thousands of eustomers enables us to make up these collections so accurately of the best standard sorts as to be suited to the majority of people who do not wish noveities.

The seeds we put in are of our very best standard sorts, and the quantities are proortioned to meet the requirements of such gardens as the titles indicate. As we make up these collections in quantity before the busy season opens we are thereby enabled to sell them for fully 35 per cent less than they would cost if the articles were selected separately; so if

two or three varieties included should be of no use to you, you will still be getting the remainder for less than eatalogue rates. We can allow no alterations.

With each collection we enclose a pamphlet on the cultivation of vegetables.

The "Country Gentleman's" Collection.

Price, \$5.00. Weight Packed for Shipment, 28 lbs.

Shipment, 12 1bs. TRANSPORTATION TO BE PAID BY CUSTOMER.

Price, \$2.50. Weight Packed for

Cabbage, Early and Late, each I pkt. Carrot, Early searlet, I pkt. Celery, Self-blanching, I pkt. Cucumber, for slichag, I pkt.; for pickles, I pkt. Corn, Sugar, Early and Late, each ½ pt. Egg Plant, I pkt.

Beans, Dwarf, string green pod, 1 qt.; Dwarf, string, yellow or wax pod, 1 qt.; Dwarf Limas, ½ pt.; Climbing Snap, 1 pt. Beet, Round Red Table, 1 pkt. Plant, 1 pkt. Endive, or White Chicory, for salads, 1 pkt. Leek, for soups, 1 pkt. Leetuce, Early heading, 1 pkt., leest for Summer, 1 pkt. Melons, Musk, Sweet green-fleshed, 1 pkt.; Water, Early, 1 pkt. Onions, Early White, for silcing, 1 pkt., Large, for boiling, 1 pkt. Parsley, double curled, for garnishing, 1 pkt. Parsnip, long White, 1 pkt. Peas, Extra Early, Medium and Late, each 1 qt. Pepper, large for Mangoes, 1 pkt. Pumpkin, best for pies, 1 pkt. Balsify, White, 1 pkt.; Rouad White, 1 pkt. Salsify, White, 1 pkt. Spinach, Best Summer, 1 pkt. Squash, for Summer and Fall, each 1 pkt., Tomato, Large smooth scarlet, 1 pkt. Turnip, Round White Table, 1 pkt. TRANSPORTATION TO BE PAID BY CUSTOMER.

Contains 60 Distinct Varieties of Vegetables, viz.:

Beans, Dwarf, Snap, green pod, 2 qts.; Dwarf, Snap, wax or yellow pod, 1 qt.; Dwarf Limas, ½ pt.; Pole Limas, 1 pt.; Pole, Snap, 1 pt. Beets, Early and Late round red, each 1 oz. Cabbage, Early, Medium and Late, each 1 pkt. Cauliflower, Snowball, 1 pkt. Carrot, Early Searlet, 1 oz. Salad, 1 pkt. Celery, 1/2 oz. Corn, Sugar, extra early, 1 pt.; Sugar, medium early, 1 qt.; Sugar, main erop, 1 qt. Cucumber, for slicing, 1 oz.; for pickles, 1 oz. Egg Plant, 1 pkt. Endive, or White Chicory, for subds, 1 pkt. Kohl Rabi, white, 1 pkt. Kale, Dwarf curled, 1 pkt. Lettuce, Early head, 1 pkt.; Best Summer Head, 1 pkt.; Leek, for soups, 1 pkt. Melons, Musk, Early, 1 pkt.; Main com. Let. Water, Feely, 1 pkt.; Nature Com. Let. Water, Feely, 1 pkt.; Nature Lettuck, 1 pkt.; Nature Lettuck crop, 1 oz.; Water, Early, 1 pkt. Nasturtium, for pickles, 1 pkt. Okra, for soups, 1 pkt. Onions, small white, for slicing, 1 pkt.; Large, for bolling, 1 oz.; Large for Wiater, 1 oz. Parsnip, Long White, 1 oz. Parsley, double eurled, for garnlshing, 1 pkt. Pepper, Large for Mangoes, 1 pkt. Peas, Extra Early, Medima and Late, each 2 qts. Pumpkin, for pies, 1 pkt. Radish, Early Round Red, 1 oz.; Early Round White, 1 oz. Spinach, 1 oz. Salsify, white, 1 pkt. Squash, Summer, 1 oz.; for Winter, 1 oz. Tomato, Extra early, 1 pkt.; Large scarlet, 1 pkt. Turnip, Extra early, white flesh, 1 oz.; yellow flesh, 1 oz. Sage, 1 pkt. Thyme, 1 pkt.

Contains 20 Distinct Varieties in All, vlz.:

Beet, round red, 1 pkt. Beans (none of which require staking), Dwarf, string, green pod, ½pt.: Dwarf, string, yellow wax pod, ½pt.; Bush Limas, 1 pkt. Cabbage, Early Wakefield, 1 pkt. Carrot, Early Scarlet, 1 pkt. Corn, Early Sugar. ½pt. Cucumber, for slieing, etc., 1 pkt. Egg Plant, 1 pkt. Lettuce, Best Summer Heading, 1 pkt. Onion, Early White, for sheing, 1 pkt.; Large, for bolling, 1 pkt. Parsley, double curled, 1 pkt. Peas (none of which require staking), Earliest Dwarf, ½pt.; Dwarf, Late, ½pt. Radish, Early Round, 1 pkt. Squash, White Scalloped Bush, 1 pkt. Tomato, Early Smooth Scarlet, 1 pkt. Turnip, Round White Table, 1 pkt.

"I hope you will have a good supply of Metropolitan Sweet Corn to sell next spring. The small package you sent me has made me lungry for more. Every one who tasted it pronounced it delicious, especially for so early a variety."—Edward Way, Middletown, Conn.

HENDERSON'S "EARLY SPRING" CABBAGE.

THE ONLY...

Extra Early Round Flat-Headod CABBAGE in the World!

### COMING IN...

with the Wakefield, and yielding one-third more than any other Extra Early.

Every head as uniform as if moulded, and remarkably solid even when young.

Few and Small Outside Leaves, Small Veins, Fine Texture and Delicate Small

Its great value lies in its being a First Early FLAT cabbage, a type much preferred over pointed heads by most people, and it will readily be seen that this variety, with all of the merits of Early Summer, only a trifle smaller, which can be cut as early as Jersey Wakefield, is destined to secure a prominent and least by a place away weathly as The variety is of prominent and lasting place among vegetables. The variety is of Early Summer type, but about one-fifth smaller, having only four or five outside leaves, and these so small and growing so near to the head, that it may be successfully planted twenty-one inches apart, 13,500 to the aere, as close as any variety we know of. It possesses wonderful uniformity in shape, being round, slightly flattened at top of head. Stem is short and extends but little into the head; this feature is valuable, as it makes almost the entire head edible. The whole plant is finely bred; there is no suggestion of eoarseness whatever; the veining of the leaves and leaf stems is particularly fine, the whole head being perfect throughout. There is no cabbage we know of having a more solid head; but, added to this, it has the peculiarity of heading firmly at an early stage in Its growth, so that the finest cabbage, though small, can be obtained long before it has attained its mature size. It is entirely free from any rankness of flavor. Its uniformity in shape and large yield per acre render it particularly valuable for truckers, and its compact form and good quality will render it the finest Early cabbage for every private garden. (See cut.)

Price, 15c. pkt., 60c. oz., \$2.00 1/4 lb., \$6.00 lb.

EXTRACTS .. FROM .. customers' FEW

### ABOUT HENDERSON'S "EARLY SPRING."

"We have finished cutting the new Early Spring Cabbage, and aust say that it is the earliest of all flat eabbages known to us. Every plant made a perfect head and a good size, averaging thirty-two heads to the crate. We set this cabbage the same distance apart as the Early Summer. This was wrong for it has very little foliage and can be grown as close as the Charleston Wakefield, i. e., about 13,500 plants to the are. It will make one-third more of a crop and be just as early as the Wakefield. It has a double advantage for this section, being early and flat."—Gerraty & Towles, Charleston, S. C.
"Your Early Spring Cubbage is all you claim the year best very aprix

"Your Early Spring Cabbage is all you claim, the very best very early cabbage I have planted in twenty years, every one heading fine, aotwithstanding they were cut down with the late frost. All my customers say, 'Bring me some more Early Spring Cabbage.'"

"The Early Spring Cabbage is the finest I ever saw in this county. I had cabbage two weeks before any of my neighbors."

"We hought one packet of your Early Spring Cabbage last spring and considered them the fluest early Cabbage we ever grew. They were about five days ahead of the Wakefield."

"Your Early Spring Cabbage is the earliest and best I ever saw. The seed I had of you last year gave good results." —E. N. RANDALL, Barton, Vt.

"I had the only Early Spriag Cabbage lust year on our market, and it gave entire satisfaction. I am very much pleased with it. I will send

you another order for other seeds later.
-W. T. McCutchen, Paducah, Ky.

GARDENERS

RUGKERS.

Important Notice.

HENDERSON'S SUPERIOR SEEDS, to be genuine, must be purchased from us direct. We were obliged to discontinue distributing our seeds through storekeepers to

protect many customers who were having other seeds folsted upon them as "Henderson's." As there are now no "middleman's" profits to protect, we are now able to supply you direct at lower prices than ever!

## HENDERSON'S SUPERB...... NEW LETTUCE

## THE "WALDORF."

(Sent out by us last year as No. 2.)

VERY valuable addition to our list of Lettuces, equally useful for forcing as for open-air cultivation. The general color is a clear bright green, which is never bronzed by outdoor growth under any climatic conditions. It is medium in size, the entire plant measuring about ten inches in diameter. It has a peculiar habit of heading, the head standing clear away from the outer leaves, which lie flat on the ground, a valuable feature for outside culture, securing an equable moisture around the root of the plant. It has but little stalk; the head is very solid. The leaves are thin, slightly crumpled, very crisp and entirely without that leavy veining which makes some of the best sorts bitter to the taste. Very valuable for growing under glass, where its delicacy of color and crispness are improved, making it a valuable acquisition to the market grower. (Sec cut.) Price, 15c. pkt.

## MUSK PAUL ROSE."

THIS sort is a cross between the old Netted Gem and Osage (or Miller's Cream) and combines in a remarkable degree the good qualities of both. The our twice

able degree the good qualities of both. In our trials last season, we found it to be worthy of extended cultivation. Its value is primarily as a shipping variety, as the fruit grows very uniformly, and of an attractive and useful size for packing. It is a very heavy eropper, the vines are very healthy and robust, ripening an enormous number of fruits. The flesh is salmon colored, very deep and of fine melting character with thin tough rind and small seed cavity. The flavor is excellent, very sweet and rich. Price, 10c. pkt., 30c. oz., 90c. 1/4 lb.

## WATER MELON, "SWEET HEART."

HIS sort is a perfect form of the round type of Ice Cream, but ls so vastly improved as to make it thoroughly distinct. It is one of the earliest to ripen, making a grand second to our famous Cole's Early.

The fruit is slightly oval in shape. The outer color is very bright, beautifully mottled light green. The rind is thin and tough, and stands shipping well, is an excellent keeper and improves in quality after ripening. The flesh is a light vivid red in color, very solid and crisp, and thoroughly melting. The flavor is exquisite, possessing not only sweetness, but that luscious flavor only found in the best sorts. Price, 5c. pkt., 10c. oz., 20c. 1/4 lb., 60c. lb.

## Henderson's New Pea .... "VICTORY."

(Sent out by us last year as No. 4.)

DOES NOT MILDEW. VIGOROUS HEALTHY VINE.

GRAND late variety of the Shropshire Hero elass. The strong, healthy branching vines are so vigorous, that they must be planted thinly in order to secure best results. Its many good features have shown it to be worthy of addition to our list of Peas. A majority of amateur gardeners will always prefer a dwarf pea to a tail one, everything else being equal. The chief value of this sort lies in the fact that it prolongs successfully the bearing season of dwarf peas, and we can assure our customers that this new pea "Victory" extends the succession among dwarf peas as thoroughly as the succession now exists among tall sorts, and it will now be possible to gather delicious peas from the garden from either dwarf or tall varieties, right up to the time that Lima Beans come in.

In addition to these remarkable qualities, it is entirely free from mildew, an evil so common among late peas, and is the peer of any variety for productiveness, while the flavor of the peas is absolutely beyond criticism. It grows only to a height of 3 feet, so that it needs but little or no "brushing." The pod is handsome and always well filled with from 8 to 10 peas of most attractive coler, size and flavor. (See cut.) Price, 15c. 1/2 pt., 30c. pt., 50c. qt.

UR SEEDS ARE NO LONGER SUPPLIED THROUGH DEALERS. OUR OBJECT: By only supplying the planter direct we protect many customers who have had other seeds foisted upon them as "Henderson's."

# VEGETABLE SEED NOVELTIES... FIGH GRADE

# BOUNTIFUL GREEN BEAN. BUSH.: BEAN.

(Offered last year as No. 1.)

SHOWN ON COLORED PLATE OPPOSITE.

THE FIRST IN SPRING
THE LAST IN FALL
ABSOLUTELY STRINGLESS
PERFECTLY TENDER
ENORMOUS CROPPER
DELICIOUS FLAVOR

vegetable. The one great objection to all bush beans has been that all had more or less "string" and tough skin, causing the bean to become unfit for use unless picked exactly at the right time. "HENDERSON'S BOUNTIFUL" is absolutely stringless. We fully believe that in this variety we have the Ideal Green Bush Bean. It is the result of a careful selection of Long Yellow Six Weeks, and produces pods actually larger, more uniform in shape, and deliciously tender, remaining so for a remarkably long period. It is a prodigious cropper and extremely early; besides this it is remarkably hardy. A customer brought us on November 3d, 1898, a very fine mess picked on that day, and although the vines had been slightly touched by frost, the beans were in perfect condition and of exquisite quality. We are perfectly confident that this variety will give the fullest satisfaction to every grower, whether for market or private use.

"Gentlemen:—I write to report on the new BEAN BOUNTIFUL procured from you. The Beauswere planted May 7th, 1898, and at the same time I planted an equal number of seed of the well-known Stringless Green Pod.

July 2d. picked of HENDERSON'S BOUNTIFUL BEAN, 133; Stringless Green Pod, 113.

"4th, "20; "4th, "10; "10; "10; "1

"Your Beaus were larger, fully as stringless and 25 per cent, heavier. They were a surprise to me, and you have a great acquisition. They were marvelously productive."

E. Hollister, Wellston, Mo.

"Gentlemen:—Your NEW BUSH BEAN BOUNTIFUL is, in my opinion, for ahead of all others, both in earliness and yield. I picked 52 large pods off one plant, and the small ones on same were too numerous to count, the small packet giving us a great many pickings. It is the only Bean 1 ever saw that was stringless."

Price, 15c. pkt., 30c. ½ pt., 50c. pt., 80c. qt.

HENDERSON'S

## GOLDEN HEART RUTA BAGA.

SHOWN ON COLORED PLATE OPPOSITE.

This variety is a true Ruta Baga, possessing all the qualities so well known in this popular vegetable, with added features which make it invaluable for garden culture. It is thoroughly fixed in type and entirely distinct from the ordinary varieties, which are used mainly for stock feeding. The objection to the latter is the rank growth of the tops, which have proved a great drawback for garden culture. Another objection has been that the quality deteriorated as the roots attained size, the liesh becoming woody in texture, showing a stringy character after cooking. These faults are entirely overcome in Henderson's Golden Heart. It has short leaves which grow low on the ground. There is absolutely no neck, a small tap root, and the bulb grows as clean and smooth as a turnip. A reference to our colored plate will show its general shape. The color is pale yellow, with a faint green tinge on that portion which grows out of ground. The flesh is remarkably fine in grain, and of delicious flavor. But the most distinct improvement of all lies in its wonderful earliness. We have had roots, fit for the table, fully grown, within 56 days from date of sowing, and its hardiness is such that it retains its tenderness equally as long as any of the older varieties. We are quite sure that a new type of Ruta Baga has been discovered which will be of great value to all lovers of this vegetable.

Price, 15c. per pkt.

# NEW RADISH TRIUMPH.

SHOWN ON COLORED PLATE OPPOSITE.

This Radish is so unique and comes to us so highly recommended that we have no hesitation in giving it a place on our colored plate. It is exceedingly early, maturing in about 21 days from date of sowing. As indicated by illustration on opposite page, the root is globe-shaped and very small, and the tops are so dwarf and compact that it can be sown very closely, making it invaluable for cultivation under glass, and grown thus the warm moisture renders its peculiar color more prominent.

The flesh is exceedingly crisp and solid, and, owing to its rapid growth, is very mild in llavor, but its ehief characteristic is the unique outer color of the root, which is thoroughly distinct from anything heretofore grown, and is a true ornament on the table. The ground color is pure white, striped and splashed horizontally with bright scarlet. The colored plate gives a fair idea of the striking effect of this combination. It is most attractive in appearance, and we have no doubt that it will find a ready sale for use, not only as a salad, but for garnishing, and to the market gardener it will certainly prove useful on account of its attractive appearance when bunched.

Nearly all the bulbs come true to color, as shown in illustration on opposite page, but under certain conditions a small percentage is apt to come in solid color.

Price, 15c. per pkt.

# New Early TOMATO "FREEDOM."

SHOWN ON COLORED PLATE OPPOSITE.

LMOST every grower and buyer of Tomatoes boasts, with more or less justice, that he has the "earliest Tomato." The claim so often reiterated clearly evidences the absolute need of such a vegetable. Years ago we introduced Early Ruby, which has ever since held a prominent place in the gardeniug world. In common with other varieties, it had a few faults, but we have now secured a sort that will prove to be not only as early, but, so far as we are able to judge, the equal of any sort for form, color, solidity, or any other essential quality. We have tried it now two successive seasons, and in each case it has been as early as Early Ruby and a host of other claimants for earliness. Its value, however, lies not only in the actual time of ripening its first fruit, but that such enormous quantities of fruit be gathered while all other so-called "Earllest" are ripening only a few.

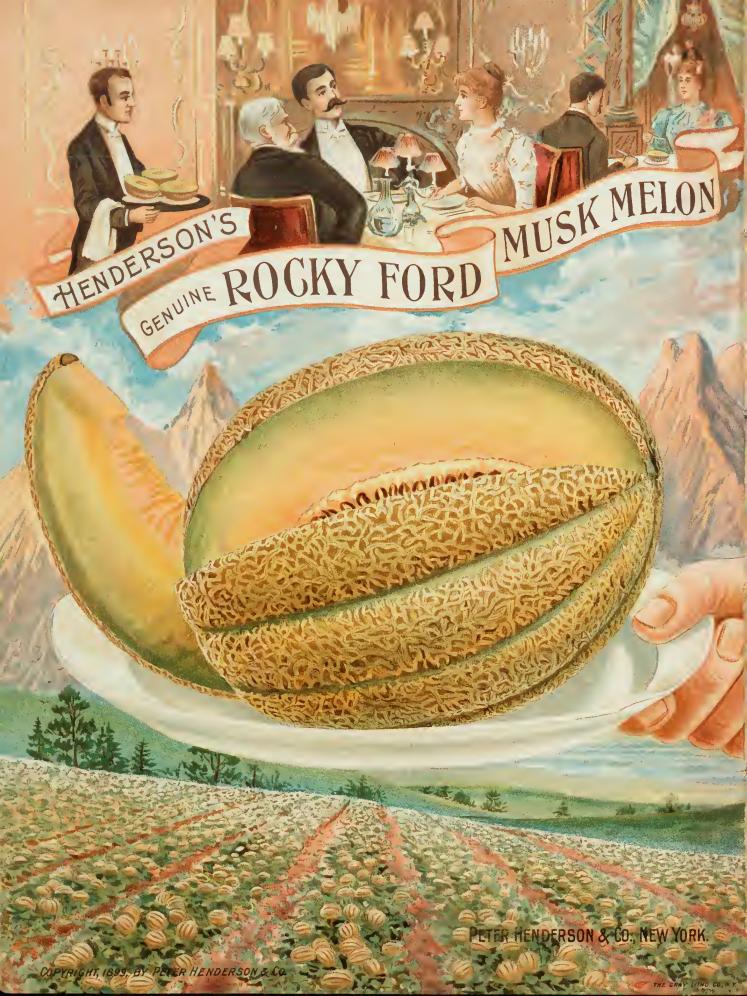

To bring this down to figures, we may say that on August 6th we gathered from one row of Early Ruby 34 fruits, from Acme 14 fruits, while from FREEDOM the number gathered was 46, and they were all sown and transplanted at the same time.

These figures indicate clearly its great and prolific earliness, and this, combined with its handsome appearance, renders it preeminently the best early sort. The plant is medium in size, presenting no peculiarity of foliage or habit. The fruit is borne mainly in clusters, perfectly round, having no sign of concave at base, of a bright dazzling shade of scarlet. We cannot say absolutely what sort of a shipper it will make, as it has never been put to actual experience, but we judge from the texture and toughness of the skin that it will equal any of the varieties in this respect. The flesh is remarkably solid, having but few seeds. The flavor is perfect, absolutely free from any acidity.

We call attention to our illustration on colored plate opposite, for further aequaintanee with this variety, and have no hesitaney whatever in recommending it to any class of growers, not only for extreme early use, but as a good all-round variety, for until quite late in the fall in the two years we have grown it, we have been able to gather good fruit from this variety, while others had long since ceased fruiting.

Price, 20c. per pkt., 6 pkts. for \$1.00, 60c. oz., \$2.00 per 1/2 lb.

# ROCKY FORD **AUSK MELON**

TO. The state of

URING the Autumn months of the last two years there have been shipped to the New York and other Northern markets many carloads of this variety of Melon from the growers of Rocky Ford, Col., from which the name is derived, and we venture to say that the advent of this valuable variety has done more to popularize Musk Melons than any other sort.

We have been fortunate in securing sufficient seed of this valuable kind to offer it to our customers, which we do with the greatest confidence, after a series of careful and exhaustive trials. It has proved to be a very valuable sort in every respect, somewhat resembling the old "Netted Gem," but is more oval in shape. The vines are exceedingly healthy and vigorous, bearing an enormous quantity of fruits during the entire season. It is safe to say that no Melon has ever come into the New York markets which has sold so readily and at such high prices as the "Rocky Ford." Enormous prices have been paid for this variety to the exclusion of many others. Our colored plate on opposite page of this cort.

page gives a fairly adequate idea of the general appearance of this sort. It is impossible to overestimate its value, and as an indication of the value of this Musk Melon we may mention that last season a grower in Florida actually cleared a net profit of \$8,000 from 25 acres of this warlety. The ground color of the skin is, when ripe, of a rich greenish gold, the netting is very prominent and is light in color, which makes the outer appearance very attractive. The flesh is very deep, ripening clear to the rind, and it has an exceedingly small seed cavity. It is very sweet and luscious in flavor, and is entirely devoid of any stringy character. Our seed was specially grown for us by a careful grower at Rocky Ford, and is the best type of the genuine Rocky Ford Musk Melon.

Price, 15c. pkt., 35c. oz., \$1.00 1/4 lb.

Insurpassed in Luscious Flavor. Always brings the Highest Price on the Market. Most Desirable Size -Ideal for Dessert. Healthy, Vigorous Grower. Exceedingly Prolific.

## KESKEKEKEKEKEKEKEKEKEKEKEKEKE

HIS variety is of Russian origin. We have been many years working it up to its present perfection, and at last have secured a distinct and valuable sort. Many features of this Melon are absolutely distinct. The fruits are oval in shape, medium in size; the color of the rind is dark green, with faint pencillings of a lighter shade, and though the rind is thin it is very tough. The flesh is very deep, extending to within half an inch of the rind, and is entirely different from anything ever known in a Watermelon. The color can best be described a watermeion. The color can best be described as a rich orange buff, and it is as sweet as any variety in cultivation. The Melon grower in our Northern latitudes is often compelled to lose a large proportion of his crop by reason of prematurely eold weather. Ordinary varieties completely succumb to these early, cold spells, and of course fail to ripen the fruit left on the vines. But this cost has the propularity of vinening. But this sort has the peculiarity of ripening fruits up quickly, even after such a check, and when fruits are only three quarters grown, and ripening them so thoroughly, too, that at the least touch of the knifo they burst open with that peculiarly full ripeness such as is known in the South. Price, 15c. pkt., 35c. oz., \$1.00 ½ lb.

"A T the South Dakota State Fair at Yankton, Sept. 26tb to 30th, first premium for three Watermelons, new variety, was awarded to Henderson'a No. 3 (now named 'Sweet Siberian'), exhibited by G. A. Smith, Gayville, S. D. After being judged I cut these Melons, and the quality was pronounced by all excellent." G. A. SMITH, Gayville, South Dakota.

### EXPERIMENT STATION OF THE Ilinois State Horticultural Society. . . .

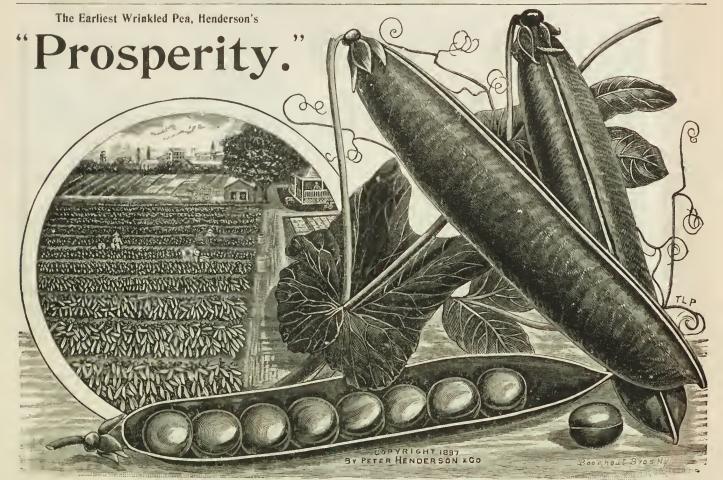

"Alton, Ill., July 22d, 1898.

"I am well pleased with all of the twelve novelties received from you this Spring, but I want to apeak particularly of the Watermelon (Nameless Novelty No. 3, now named 'Sweet Siberian'). It began ripening some two weeks ago, which was earlier than I ever had Watermelons ripen before. It seems to be very productive, and in quality it is most excellent."

EDWIN H. RIEHL.

## HENDERSON'S

The Earliest WRINKLED **PEA** Grown.

Henderson's Earliest:

# Wrinkled PEA "Prosperity."

NORMOUS PEAS, ENORMOUS PODS,

ENORMOUS YIELDER,

AND, ABOVE ALL,

## DELICIOUS QUALITY.

You may now have Large Tender Peas, Sweet and Delicious, in : :

# EARLY

Or as soon as you have heretofore had the ordinary early kinds. ::

Read a few of the testimonials on next page.

E have never yet been able to offer to our patrons an early Pea which possesses in a marked degree more desirable qualities.
On both sides of the Atlantic, specialists in Pea culture have been struggling with the problem how to combine fine quality and product-lyeness with earliness. It must be conceded that hitherto all those efforts have failed, inasmuch as we have only been able to offer for very early use the round or hard-shell types of "Extra Early Peas." These have a value peculiarly their own, but the quality is far below what we would wish. We feel confident that at last a variety has been secured which combines earliness with all the at last a variety has been secured which combines earliness with all the good features of the later "marrow" varieties, viz.: delicious flavor, tender-

ness, sweetness, size and productiveness.

This variety has had very thorough and exhaustive trials conducted in various latitudes and under varied conditions, therefore we have no hesitancy in making the most extravagant claims for its merits, which are supported by the

opinions of expert gardeners.

"Prosperity" Pea grows about 2½ feet in height; the vine is robust, and the foliage is large and vigorous, closely resembling Telephone in general appearance, though dwarfer and very much earlier. The pods, which are as large as Telephone, are produced in great abundance, and are well filled with as Telephone are produced in great abundance, and are well filled with from six to eight peas of enormous size, but, as we have stated, its chief value lies in its earliness, and when we consider that a pea so large and as rich in flavor as any of the later wrinkled sorts can be had three days after Henderson's First of Ali, the best and earliest round or hard-shell variety, its value can be readily seen.

Among those who grow peas for their own use exclusively, there are many who plant only the extra early types, because our short spring and hot summers are not conducive to the free growth of the later varieties. It is to this class of growers that we recommend this variety with confidence. They can now obtain early in the season, while climatic conditions are favorable, as delicious peas as is possible under any conditions in this country or any other. 15c. ½ pint, 30c. pint, 50c. quart, \$3.00 peck, \$11.00 bushel.

IN OUR EXPERIENCE

As seedsmen, for OVER

HALF A CENTURY, we have never received so many eulogistic letters in one season about any one vegetable as for the "1897," or "PROSPERITY" PEA during the past season.

Space only permits us to print the following:

"I picked 'Prosperity' Pea on the list for Aure, It is far superior to any early Pea I have ever grown; there are eight and nine fine large pens to a pod. It certainly is a very fine Pea."

JAMES HORROCKS, Manager, Crumwold Farms.

"I want to say that I had a full crop of 'Prosperity' Peas in exactly 48 days from planting last spring, and unlike the usual 'Extra Enrly'

Offered on Opposite Page.

they were as full, wrinkled, and sweet as any late Pea I evertasted, better than even the Champion of England, which has been always my hobby. They are all you chain, and in future I do not intend to plant any other kind."

CHARLES W. BOWMAN,

Brownsville, Pa.

"My 'Prosperity' Peas are a sight to behold. I picked my first of them on the 7th of this month, picked from the small early ones the 6th, just one day ahead. When the 6th, just one day ahead. When they become known, they will displace all other early Peas. I planted them the same day as the extra early ones, which was tho Itth of March. They will surely become the standard early Peas, as good as the best, and as early as the earliest." ROBERT BIRCH, Market Gardener, Physonath Mich.

Plymouth, Mich.

"The 'Prosperity' Pens I bought of you last year were wonders for size of pod, earliness and produc-tiveness." JOHNE, BARRELL, York Corner, Me.

"The 'Prosperity' Peas I got from you are the best yielding Peas I ever saw; the pods were from six to eight inches long, and nine to ten Pens in a pod."

JOHN S. FINK,

Strinestown, Pa.

"I have never had such good seeds as I got from you. Your new '1897' or 'Prosperity' Pea was the finest and the most pro-ductive that I ever saw." Miss ANNIE SPEAR, North Scituate, Mass.

"I sent to you for some of the 'Prosperity' Pen hast year, and can truly say they were the best I ever had." Mrs. E. KINGSLEY, Poland, N. Y.

"Gentlemen:—I have always had my own garden for sixty years past, and always made a specialty of high grade Pens, and when I saw your advertisement of 'PROSPERITY' PEAS, I ordered seed from you, and, when they blossomed, I did not think they would be very prolific producers, but, when the pods developed a length of 4½ inches, as many did, I began to think differently, and, when shelled, turned out from eight to ten large Pens from a pod; they were a surprise. They are the earliest large Pea I ever knew; with early planting they will mature here by the Lish to 20th of June, as early as nny of the small 'buckshot' sorts. They are the sweetest, tenderest, and most deficions Pea I ever ate."

JAMES R. SLATSON, Racine, Wis.

MASS. HORTICULTURAL SOCIETY
Awarded George D. Moore, of Arlington, Mass., First Prize for "Henderson's 1897" Pea over all other peas, and Mr. Moore writes us:
"Your early 1897" Pea took first prize, and tops anything I have ever seen exhibited at the Mass. Horticultural Society, and the Society is open to all the world. I have given four quarts to several of our Vegetable Commissioners, and they all agree that so far it leads anything yet offered."

## HENDERSON'S

HE above illustration gives an excellent idea of these splendld new Radishes. One is the Red Rocket, which we introduced to successful cultivation a few years ago. We have now been able to secure two other varieties, quite similar in everything but color. These have proved to be so distinct that we offer them, being sure that our patrons will be pleased with the variety in this popular type. A dish composed of these three Rocket Radishes, prepared for the table, presents a most attractive appearance, and we advise every lover of this vegetable to grow some of each. In addition to their bright appearance, it is necessary to state that they are absolutely the earliest varieties grown; they mature at exactly the same time, and grow so quickly that they never take on that strong, rank flavor which we associate with the leter varieties. never take on that strong, rank flavor which we associate with the later varieties.

RED ROCKET. This variety has a very small top, which per
WHITE

mits close planting-a great advantage when grown under glass-

the bulb is smooth, deep scarlet in color, with a very small root. The flesh is erlsp, and of good flavor. (See cut.)

PRICE, 10c. pkt., 20c. oz., 60c. 1/4 lb.

WHITE ROCKET. A trifle heavier than Red Rocket. It

has an equally small top; the bulb is pure white while the color of the flesh is distinct, being of a clear, waxy white. (See cut.)

PRICE, 10c. pkt., 20c. oz., 60c. ½ lb.

WHITE TIPPED ROCKET. This is the ideal first early Radish. For many years the old French Breakfast has held a foremost place among all the varieties offered. We have now to offer a sort that possesses all of its merits, and, in addition, extreme earliness. It has a very small top, which will make it popular where room is limited. The general color of the bulb is clear deep rose, the white tip at the base being very clearly The flavor is delielously mild. (See cut.) PRICE, 10c. pkt., 20c. oz., 60c. 1/4 lb.

## New Extra Early Potato. The "BOVEE."

The Earliest of all, and a Great Cropper.

HEN we introduced The "Bovee" Potato two years ago, our own tests and the opinions of others led us to elaim a good deal for it, and our confidence has not been misplaced. Not only is it the earliest, but it takes a leading place among the heavy eropping varieties, an unusual thing among first earlies. even earlier than Early Ohio, and compares favorably with Triumph, a light cropping variety that has only extreme earliness to recommend it, while the "Bovee," in all competitive trials has outyielded all the early Potatoes, and in many of the tests competitive trials has outyleided and the early Potatoes, and in many of the tests enoducted by Experiment Stations and private growers, it has outyleided even the late varieties. The vine is dwarf and stocky, enabling it to be planted six inches closer than nearly all other varieties, which results in a much larger return per acre, and is a feature of the utmost value where land is valuable. The tubers grow remarkably close, all bunched together in the hill close up to the vine. (See cut.) They size up to a marketable size more evenly than any Potato we ever saw; none too large or too small; practically the whole erop being merchantable and the quality is perfect. We have only one warning—it is apt to prove disappointing on poor soil or with poor eultivation, as it sets so freely the tubers are apt to be small. But on good Potato ground, well fertilized and cultivated, no other early Potato to-day compares with lt.

We give below a few reports selected from hundreds, which will give some idea of

### The World-wide Popularity of The "BOVEE" Potato.

"It would appear that The 'Bovee' is at least twelve days earlier than "It would appear that The Bovee' is at least tweive days earlier than Early Ohio, but, even though no earlier, the almost perfect shape of the Bovee' would win the prize every time over the poorly shaped Early Ohio. It is as perfect in shape as the well-advertised Freeman and less variable. It is probably three weeks earlier, and will yield more per acre, with a smaller proportion of numarketable tubers."—The Rural New-Yorker.

"Uncommonly prolific for such an early variety."-Ohio Agricultural EXPT. STATION.

"Yielded at a rate above any other in trial, and we consider it a very promising new variety,"—Massachusetts Agricultural Experiment Station.

"The 'Bovee' is exceptionally promising." - MINNESOTA AGRICULTURAL EXPT. STATION.

May 12th, 1897.—"The 'Bovee' is the best frame Potato I know of. Its eating quality is extra tine."—N. Butterbach, Gardener to C. N. Bliss, Esq., Secretary of Interior.

"From one pound of Bovee' Potatoes purchased from you, I raised seventy pounds of fine Potatoes, nearly all marketable."—H. Evans, Skaneateles, N. Y.

Aquehogue, L. I., Oct. 16th, 1896,—"The 'Bovee' is the best early Potato we have. It was the best and earliest among ten varieties."—S. O. Benjamin.

From England.—"It is very early and I made a point to try it as soon as large enough to use, and found it quite white and dry."—John Crook, Forde Abbey Gardens, Chard.

From Germany.—"The Bovee' is very satisfactory in every way; the tubers growing close together, are of a fine oval form and almost all of a uniform medium size, fit for table use. Eyes few and flat. The Bovee' was ripe ten days sooner than Early Rose and Paragon, and about a week earlier than our Improved Six Weeks. Quality fine and dry."—Haage & Schmidt, Erfurt.

proved Six Weeks. Quality fine and dry."—Haage & Schmidt, Erfurt.

From Sweden.—'Your new Potato 'Bovee' is a most valuable addition to the many yon have sent out. I had a splendid crop of the finest quality, and it is the best this season out of thirty sorts."—Syensons Frohandel, Stockholm.

From Italy.—'I sincerely believe that your 'Bovee' Potato will become the leading variety in our country. I carefully tested and found them far superior to any of the immerons varieties I have tried to this day. The plant is strong, of quick vegetation and very healthy."—Guberpe Sada, Milan.

From Holland.—"The 'Bovee' seems one of the best varieties grown in this country. The crop was simply marvelous, and there does not exist here a heavier cropping variety. It not only excels in earliness and beautiful shape of the tubers, but the flavor is also excellent."—L. Van Waveren & Co., Hillegom.

From India.—"The 'Bovee' was ready for harvesting quite two weeks

From India.—"The 'Bovee' was ready for harvesting quite two weeks earlier and is of better flavor than any other variety we have here. They were quite free from disease."—Pestonjee Pochajee Pocha, Bombay.

Price, 30c. lb.; 3 lbs., 70c.; 5 lbs., \$1; post or express paid. If by express or freight, \$1.25 peck, \$4 bush., \$8 bbl., by express or freight at purchaser's expense, deduct Sc. lb.

WHAT OUR CUSTOMERS THINK "Crimson Cushion" Tomato.

"I write to let you know how well pleased I am with 'Crimson Cushion' Tomato. They are of good size, very smooth and ripen up well at stemend. Although not the earliest, they are among the best of 110 varieties. "Again thanking you for your kindness in sending seed for trial, I remain, THOS. II. BRINTON, Chadds Ford, Delaware Co., Penna."

"I have been raising your 'Crimson Cushion' Tomato this season, and think them by far the finest tomato for all purposes that I have ever grown. I weighed two last week that weighed ly lbs. each, and measured 17½ inches in circumference and 5½ inches across bottom of bloom-end."

JOHN L. BOARDMAN, Macon, Ga.

"I picked my last 'Crimson Cushion' Tomato from the vines on October 8th; it measured 16 inches in circumference and of the firmest fiesh I ever saw. I consider it the finest Tomato that can be grown in this climate; it is perfection. There are no seeds grown like 'Henderson's,' and if a little higher in price still they are the cheapest, as quality and growth are certain."

R. H. HOAG, Jr., Norcross, Minn.

"The 'Crimson Cushion' is so far ahead of any other varieties that I think they are not worth our notice. I have nice large solid Tountoes when my neighbors have none. I never plant seeds of my own raising but always order from you." MRS. A. H. LOOS, W. Lafayette, O.

"I had one plant of your 'Crimson Cushion' Tomato last summer, planted by a post ten feet high; it grew three feet above the post and was full of fruit from bottom to top. I counted them as they ripened until I counted fifty, but many more ripened after I ceased to count them. After the frost came, I gathered enough green ones to make three gallons of pickle. This seems incredible, but it is nevertheless true."

MRS. J. W. McGOHEE, Clarksville, Tenn.

"Although last season was very unfavorable, especially the latter part, yet I had some very fine 'Crimson Cushion' Tomatoes. I counted on one stalk some forty tomatoes all perfect and some very large." IRWIN WALTHOUR, Greensburg, Pa.

"I planted the 'Crimson Cushion' Tomato last year, and though I have tried many others, I have never seen any that equals the 'Crimson Cushion.'"

B. II. CRAIG, Selma, Ala.

"Last season your 'Crimson Cushlon' Tomato beat anything in this ▼leinity for earliness, size, form and quality."

W. R. MORRISON, 5152 Easton Ave., St. Louis, Mo.

"The Crimson Cushlon' Tomatoes are good enough for me. In fact I never saw their equal. I shall plant only these this year. I sing their praises whenever opportunity offers." I AYLOR, Hamlet. Ill.

"I think the 'Crimson Cushion' Tomato seeds you sell are the best Tomato seeds I have ever planted." MRS. F. G. SPANN,

THE LATEST PRODUCTION of the new "ALMOST SEEDLESS" Class of Tomatoes.

"CRIMSON CUSHION" TOWATO. HENDERSON'S

**HENDERSON'S** THE EARLIEST LARGE TOMATO.

PERFECTION In Tomatoes at "Almost seedless."

- "Solld as becfsteak."
- "Large size."
- "As smooth as an apple."
- Ripens thoroughly at stem-end."

When we introduced the Ponderosa, we hazarded the opinion that that famous variety was the forerunner of a new race of Tomatoes that would eventually displace the seedy, strongly acid sorts in general cultivation, and the advent of this splendid variety verifies this prediction. The "Crimson Cushion" is more symmetrical in shape than the Ponderosa, and is much thicker through from stem to "biossom end"; in fact, so marked is this characteristic that it is frequently almost round. The color is brilliant that it is frequently almost round. The color is brilliant scariet crimson, untinged with purple, and ripens up almost completely to the stem. The "Crimson Cushion," like the Ponderosa, is almost seedless, requiring from 10 to 12 bushels of ripe fruit to produce one pound of seed, whereas a pound of seed is realized from 3 bushels of ordinary Tomatoes. These figures tell better than any description the "seedless" character of this grand variety. The flesh is firm and "menty," and of superb quality. It is enormously prolific and early for so large a Tomato. (See cut.) Price, 15c. pkt., 60c. oz., \$2.00 ½ lb.

### EARLY WHITE MILAN TURNIP.

As early as the Early Purple Top Milan, and possesses all of its good qualities. The entire bulb, inside and out, is clear ivory-white in color; the outer surface is perfectly smooth. It grows so quickly that even the outer surface of the bulb is quite tender.

Its table qualities are unequaled, being of most delicate flavor and tempting appearance.

It will undoubtedly find a welcome in our markets, as, in addition to the heavy erop assured by its adaptability for close planting, it will be found to be fit for use at least a week earlier than any other white variety in cultivation. (See cut.) Price, 10c. pkt., 15c. oz., 35c. 1/4 lb., \$1.00 lb.

EARLY WHITE MILAN TURNIP OUR SEEDS ARE NO LONGER SUPPLIED THROUGH DEALERS. OUR OBJECT: By only supplying the planter direct we protect many customers who have had other seeds foisted upon them as "Henderson's."

oz. to 50 feet of drill. . . . to 6 lbs. to the acre in drills.

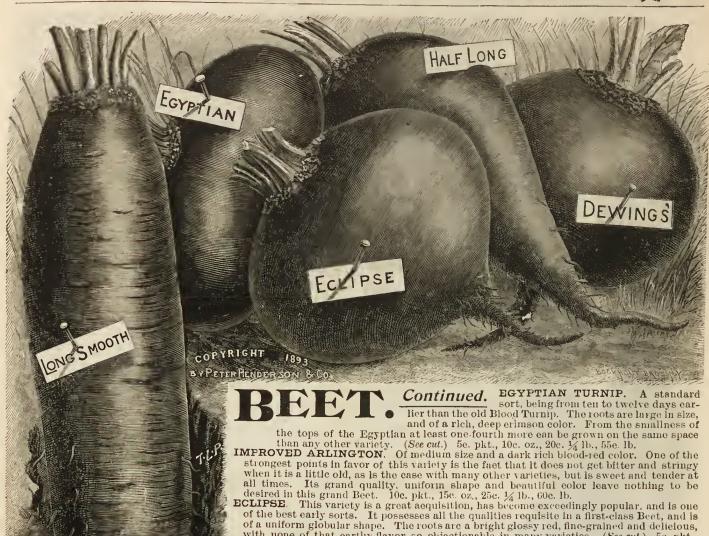

For cultural directions see page 10.

ELECTRIC .- In the Electric we have more good qualities than were ever before combined in one Beet. It is almost round, leaves small and compact, and set very close to the centre; tap-root smail, starting from the bulb without taper; indeed, it combines the maximum of edible bulb with the minimum of root and foliage. The eolor is very dark erimson, changing aiternately into rings of a lighter hue. The eonstancy of coior largely enhances its value. It is extremely early, coming in with Extra Early Egyptian. But it is when prepared for the table that its fine qualities become most apparent, the fine rich color making it conspicuous. The flesh, of delieate texture, rich and sugary. (See cut.) Price, 10c. pkt., 15c. oz., 30c. 1/4 lb., 75c. lb.

S. for 60 ft. of drill. For culture see page 10.

"PALMETTO."

with none of that earthy flavor so objectionable in many varieties. (See cut.) 5c. pkt., 10c. oz., 20c. 1/4 lb., 55c. lb.

DETROIT DARK RED. It has proven to be very valuable because of its wonderful unl-

formity in character. It is medium in size, always smooth and very free from small roots. The tops are about 18 inches in height and of most attractive color. The flesh is tender, fine-grained, and remains so, long after many sorts have become woody. It is admirable for early or late marketing. 5c. pkt., 10c. oz., 25c. ½ lb., 60c. lb.

EDMAND'S. While not strictly a first early Beet, it follows very closely and is the most uniform of all Turnip Beets, with very small tops and short follows of a rich red. The roots are hundered and round, your words of good markets being and for table use no variety.

handsome and round, very smooth, of good marketable size, and for table use no variety ean excel it in fine quality. The skin is deep blood-red; the flesh also is dark red and exceedingly sweet and tender. 5e. pkt., 10e. oz., 20e. ½ lb., 55c. lb.

EARLY BLOOD TURNIP. A well-known standard early variety, following Eelipse in earliness; it is of a rich, deep blood-red color and of excellent quality. 5c. pkt., 10e. oz., 20e. ½ lb., 45e. lb. CROSBY'S EGYPTIAN. A superior strain of the well-known Egyptian, of handsome form, good size, fine quality, deep blood color and quiek, rapid growth. Is preferred to Egyptian or Eelipse. 5c. pkt., 10e. oz., 25c. 1/4 lb., 60c. lb.

DEWING'S IMPROVED BLOOD TURNIP. An improved variety of the Early Blood Turnip, of deep blood-red color, fine form and flavor; an excellent market sort. (See cut.) 5c. pkt., 10e. oz., 20e. 1/4 lb., 55e. lb.

10c. oz., 20c. ½ lb., 55c. lb.

HENDERSON'S HALF LONG. Its shape and general appearance and grand color are unapproachable. The top is medium in size and of a very rich glossy crimson. The bulb is three inches In diameter at shoulder, tapering in pear-shaped form to the slender root, and is entirely free from roughness. No more brilllant color can be desired than is shown on slicing this variety. It is extremely tender and free from woody fibre or tough stringl-ness, and of peerless quality. (See cut.) 10c. pkt., 15c. oz., 30c. 1/4 lb., 75c. lb.

LONG SMOOTH BLOOD-RED. An excellent late varlety; a great improvement on the common Long Blood. (See cut.) 5e. pkt., 10e. oz., 20e. ¼ lb., 45e. lb.

SWISS CHARD, SILVER OR SEA-KALE BEET. (See page 66.) 5e. pkt., 10e. oz., 20e. ¼ lb., 50e. lb.

BASTIAN'S BLOOD TURNIP. A good second early varlety, also like the common second carly varlety, also like the common second sec

elosely following Egyptian and Eelipse. 5e. pkt., 10e. oz., 20e. 14 lb., 50e. lb.

Lentz. An extra early Turnlp Beet with a very small top, produc-

Lentz. An extra early Turnip Beet with a very small top, producing a crop in six weeks from time of planting. It keeps well and its productive. 5e. pkt., 10c. oz., 20c. ½ lb., 50c. lb.

Early Yellow Turnip. Similar to the Blood Turnip, but differing in color; flesh yellow. 5e. pkt., 10c. oz., 20e. ½ lb., 60c. lb.

Early Flat Bassano. Flesh white circled with pink; very sweet and delicate in flavor. Chielly valuable for its earliness. 5c. pkt., 10c. oz., 20e. ½ lb., 45e. lb.

Brazilian Variegated. Beautiful for garnishing and garden decoration, the stems and volus heing righty colored with primson.

ration, the stems and veins being richly colored with erimson, yellow and white. 5c. pkt., 10c. oz., 25c. 1/4 lb., 75c. lb. BEET. Sugar and Mangel. (See Farm Seed Department, page 71.)

WE DELIVER FREE ANYWHERE IN direct to the Planter, all Vegetable Seeds, Flower Seeds and Bulbs, EXCEPT WHERE NOTED,

and more meaty than any of this type; stringless. Another advantage which will recommend it to all is that the beans retain their tenderness much longer than in any other variety we know of. (See cut.) Price, 15c. pkt., 25c. pt., 40c. qt., \$2.00 peck.

## Henderson's Black Valentine.

Possesses all the merits of our old favorite Valentine, and, In addition, has other valuable points. The pod is fully one-third longer than the Red Valentine. The pods are perfectly round and straight, without any "saddle-back," and of a beautifui soft green color.

It is also equally early, but has another advantage in that It is more suitable for late planting. In a test of the Extra Early Refugee, Henderson's Earliest Red Valentine and Black Valentine, conducted in the fall, we found that Black Valen-tine was fully as useful as Extra Early Refugee, being equally as hardy in every respect as the Refugee, while the beans were produced in enormous quantities. For any purpose, or at any time of the year, this bean will be found exceedingly valuable

to all classes of growers. Price, 15c. pkt., 25c. pt., 40c. qt., \$2.00 peck.

Long green pods.

Always solid.

Exceedingly prolific.

## BEANS, DWARF or BUSH.—Continued.

### ...LONGFELLOW ...

Received an AWARD OF MERIT from The Royal Horticultural Society of England, 13th Aug., 1896.

This is an ideal String Bean. The pods are 6½ tnehes long, pale, soft green in color, perfectly straight and round. They are free from that woolly inner lining of tough skin which we associate with old beans, and what little string exists is not developed until the pod is quite old. The flavor is most delicious, and it has the peculiarity of preserving its delleate color almost lntact when prepared for the table. It is remarkably early, being ready for use four days in advance of any variety of merit. Its bearing qualities are unexcelled, and it matures its crop very regularly, even under adverse conditions. (See cut.) 10c. pkt., 20c. pt., 30c. qt., \$1.50 peck, \$5.00 bush.

EARLY WARWICK. One of the earliest, If not the earliest, Green Bush Bean. The pods are stringless until they reach a stage at which they are past maturity for marketing. 10c. pkt., 20c. pt., 30c. qt., \$1.50 peck, \$5.00 bush.

Early Mohawk. Very early and will stand more cold than mest of the bush varieties. This variety is largely grown in the Southern States for Northern markets. The pods are from five to six inches long; the seeds, when ripe, drab with purple spots. 10c. pkt., 15c. pt., 25c. qt., \$1.25 peck, \$4.00 bush.

Rhode Island Dwarf Caseknife. A continual bearer during the summer. Exceedingly early, and, when young, the beans are tender and of very fine flavor. 10c. pkt., 20c. pt., 30c. qt., \$1.50 peek, \$5.00 bush.

REFUGEE, OR THOUSAND TO ONE. This has always been popular; it is a very productive medium or late variety. The young pods are tender, of fine flavor and of handsome appearance. Is extensively grown for picking. 10c. pkt., 15c. pt., 30c. qt., \$1.40 peck, \$4.75 bush.

EXTRA EARLY REFUGEE.—It is similar in every respect to the ordinary Refugee, but is nearly two weeks earlier. It is enermously prolifie, and from its earliness is almost certain to produce a crop, no matter how unfavorable the season. In quality it is unexcelled, being exceptionally free from string, and meltingly tender at all stages of its growth. (See cut.) 10c. pkt., 20c. pt., 35c. qt., \$1.50 peek, \$5.00 bush.

Beans, Peas and Corn we do not deliver free, but will do so if 5c. per pint or 10c. per quart is added to prices.

Early China. An old standard variety that is very early. 10e. pkt., 15e. pt., 25e. qt., \$1.25 peck, \$4.00 bush.

Dwarf Horticultural. A bush variety of the well-known Horticultural Pole Bean. 10c. pkt., 20e. pt., 30e. qt., \$1.40 peck, \$4.50 bush.

WHITE MARROW. The variety so extensively grown for sale in the dry state. It is also valued as a string bean. Seeds are lvory-white. 10c. pkt., 15c. pt., 25c. qt., \$1.00 peek, \$3.50 bush.

Large White Kidney. Excellent as a shell bean. 10c. pkt, 15c. pt., 25c. qt., \$1.00 peek, \$3.50 bush.

BUSH LIMA BEANS

BURPEE'S BUSH LIMA. While nominally a bush form of the Large White Lima, growing about twenty lnehes high, we have lately found Burpee's Bush Lima has a greater tendency to revert to the running variety than any of the other Dwarf Limas. While not so early as Henderson's Bush Lima, its larger size will commend it to many. The pods are about the size of the Large Pole Limas and contain nearly as many beans. 10e. pkt., 15c. ½ pt., 20e. pt., 35c. qt., \$2.00 peek.

DREER'S BUSH LIMA. Dreer's Improved Pole Lima has been grown for years, the beans growing close together in the pods, and being very thick, sweet and succulent; it is generally considered of finer quality than the Large Pole Lima. This bush form is entirely fixed in its character, growing about eighteen inches high and of vigorous habit. This variety, from its abundant foliage, always succeeds better in a dry season, and we would advise planting it two feet apart. 10c. pkt., 15c. 1/2 pt., 20c. pt., 35c. qt., \$2.00 peck.

For the "Henderson" Bush Lima see next page, No. 28.

## ····VEGETABLE

# HENDERSON'S

One of the most valuable characteristics of Henderson's Bush Lima is its EXTREME EARLI-NESS, as it comes in from two to three weeks ahead of any of the other climbing or Bush Limas, thus supplying us with a delicious vegetable at a time when the garden is somewhat barc, filling in, as it does, the gap between Peas and the Pole Limas. The small size of Henderson's Bush Lima, which at first was urged as an objection to it, has proved one co the strongest points in its favor, as the public, rightly enough, prefer small beans, always associating great size in Lima beans with coarser quality. Henderson's Bush Lima is enormously productive, bearing continuously throughout the summer until killed by the frost. Its greatest merit, of course, lies in the fact that it is a true bush variety, requiring no support from stakes or poles, but, at the same time, the experience of all who have grown it has been that it excels as weil in quality, quantity. and earliness. (See cut.) 10c. pkt., 15c. 1/2 pt., 20c. pt., 35c. qt., \$1.75 peck.

Burpee's and Dreer's Bush Limas are offered on preceding page, No. 27.

ETERHENDE

"Seeds of Burpee's Bush Lima Beans, Dreer's Bush Lima and Henderson's New Bush Lima were planted this season, and in so far as one year's trial goes, Henderson's New Bush Lima is decidedly in the lead. It is earlier and more prolific than either of the other two." Bulletin No. 51.

Agricultural Exp. Station, Auburn, Ala. "Your Bush Lima Bean is the only one suited for this section, and ripens plenty of seed every year."

H. H. GROFF, Sincoe, Ont., Canada.

APROVED DWARF or BUSH, WAX POD BEANS. Improved Golden Wax. In the Improved Golden Wax which we now offer we have a bean that possesses all the good points of the oid Golden Wax, but is larger in pod and much more prolific. This imand much more prolific. This improved stock is one of the handsomest beans we have ever seen, being of dark rich golden yeliow color and of perfect shape. It is of grand quality, showing no string or coarseness even when past its best, but is of tender, melting flavor, at all stages of its growth. For market gardeners or private families, no better bush bean can be planted. (See cut.) 10c. pkt., 20c. pt., 30c. qt., \$1.25 pcck, \$4.00 bushel. GOLDEN WAX. A strong-growing, distinct variety, at least a week carlier than the Black Wax. The pods are long, brittle and entirely string-As a snap bean it perhaps exects all others in tenderness and flavor. Soods where visualized and white the strength of the soods where visualized and white strength of the soods where visualized and white strength of the soods where visualized and white strength of the soods where visualized and strength of the soods where the so rlchness of flavor. Seeds, when ripe, purple and white. 10c. pkt., 15c. pt., 25c. qt., \$1.00 peck, \$3.50 bushei.

GOLDEN-EYED WAX. This is an early and vigorous-growing varlety, yielding a great profusion of tender pods of a beautiful waxy appearance. The vine grows about one and a half feet high, holding the pods well off the ground, thus keeping them clean and attractive. It is singularly free from blight and rust. The pods are flat and large. 10c. pkt., 20c. pt., 30c. qt., \$1.25 peck, \$4.25 bushel.

BLACK WAX. When ripe the pods are yellow, averaging 7 inches in length, very tender and of the best quality. Seeds, when ripe, glossy black. 10c. pkt., 15c. pt., 25e. qt., \$1.25 peck,

strains as to be worthy of a new name. By a comparative test in our trial grounds, we proved beyond question that it was earlier than any other stock, was perfectly round-podded, and of an even rich golden eolor. Enormously productive. 10c. pkt., 20c. pt., 30c. qt., \$1.25 peck, \$4.25 bushel.

White Seeded Wax. A variety with roundish flat wax-like pods. 10c. pkt., 20c. pt., 30c. qt., \$1.50 peck, \$5.00 bushel.

CYLINDER BLACK WAX. This is an improved stock of Black Wax, so superior to the ordinary

\$4.00 bushel.

BEANS, PEAS AND CORN WE DO NOT DELIVER PREE. BUT WILL DO SO IF SC. PER PINT OR 10C. PER QUART IS ADDED TO PRICES.

VALENTINE WAX BEAN

FLAGEOLET WAX. This is really one of the most valuable varieties for either private or market garden purposes. It is as early as either the Black or Golden Wax sorts, and has a peculiar value in the fact that it is nearly always exempt from rust. The pods are often a foot in length, exceedingly succulent and tender. It is an enormously productive variety. 10c. pkt, 20c. pt., 30c. qt., \$1.50 peck, \$5.00 bushel.

### TABLE

## MBING OR POLE BEANS.

1 qt. to 150 hills; 10 to 12 qts. to the acre in drills.—For culture see page 10.

Beans, Gorn and Peas we do NOT deliver free, but will do so if

This we regard as far ahead of any other green Pole Bean. In our trial grounds last summer it was fit for the table on August 1st, which was at least ten days earlier than any other green elimbing sort. It is enormously productive, the pods hanging in great elusters from top to bottom of the pole. It is entirely stringless, and the pods are a silvery green color,

resembling the popular Refugee Bush Bean. The pods, though large, cook tender and melting, and we can recommend it as the best green Pole Bean. 15e. pkt., 25e. pt., 40c. qt., \$2.50 peck.

"GOLDEN CHAMPION." This is certain to be the leading Early Wax Pole Bean, as it is fully two weeks earlier than the Golden Cluster Wax Pole, being fit to pick on July 24th of last year. The pods are enormous, resembling the Yosemite Wax in size and form; color light yellow. They are absolutely stringless and cook tender. The Golden Champion was the only Wax Pole Bean that did not rust or spot hadly in

Bean that did not rust or spot badly in our trial grounds last summer. Every garden should contain the "Golden Champion" and "Old Homestead." (See cut.) 15c. pkt., 25c. pt., 40c. qt., \$2.50 peck.

Horticultural or Speckled Cranberry. Popular either in the green state or shelled. 10c. pkt., 20c. pt., 30e. qt.,

SCARLET RUNNER. A great favorite, both ornamental and useful. Height, ten feet, presenting dazzing searlet flowers, from July to October. Used both as a string bean and shelled. Seeds, when ripe, lilae, mottled black. 10e. pkt., 20e. pt., 35e. qt., \$2.00 peek. White Dutch Runner. Similar to the preceding executing seeds and flowers.

preceding, excepting seeds and flowers, which are white. 10c. pkt., 20c. pt., 35c. qt., \$2.00 peek.

German Wax Pole. One of the best

varietles either for snaps or shelled in the green state. 10e. pkt., 20e. pt., 35e. qt., \$2.00 peck.

Our packets of Beans, with few exceptions, are really small square boxes containing nearly half a pint.

ct Bline Begins to bear early in July and continues until frost. The pods are six to eight inches long, are most freely produced,

and are of a beautiful golden yellow; the flavor is most delicious. Can be used either shelled or as a string bean. (See cut.) 15c. pkt., 25e. pt., 40e. qt., \$2.50 peek.

## IMA BEANS.

LARGE WHITE LIMA. With nearly every one the seeds, either green or ripe, of this variety are considered the most tender and delicious of the Bean family, and it is therefore universally grown both for market and family use. The ripe seeds are flattish kidney shape, and have a dull white color. 10e. pkt., 20c. pt., 35e. qt., \$2.00 peck.

DREER'S IMPROVED LIMA. The distinctive features of this are early maturity, large yield and extra quality. The bean itself is thick and round, rather than oval-shaped, as most other Limas are. 10e. pkt, 20e. pt., 35e. qt., \$2.00 peck.

JERSEY EXTRA EARLY LIMA. In our experience with it from year to year, we

have found it invariably ten days to two weeks earlier than any other Pole Llma. The pods of it have been large enough to pick July 24th, and have been sold in the New York markets a week later. The beans are a trifle smaller than those of the Large White Lima, but are all the better on that account, as small beans are always considered preferable, being more tender and delicious. Every one desiring a Pole Lima Bean should plant the Jersey Extra Early, as it combines, better than any other,

quantity, quality and earliness. (See cut.) 15e. pkt., 25e. pt., 40c. qt., \$2.75 peck.

SMALL LIMA OR SIEVA. A variety of the large White Lima. The pods, however, are much smaller, usually about three inches long. It is a little earlier and more hardy. The seeds also are smaller, but of the same color as the Large White Lima.

15e. pkt., 25c. pt., 40c. qt., \$2.50 peek

## GENUINE ONLY DIRECT FROM HENDERSON & CO., NEW YORK ...

For culture see page 10,

TALL FRENCH. Very fine. 5e. pkt., 20c. oz., 60e. 1/4 lb., \$2.00 lb.

DWARF IMPROVED. Avarlety produclng compact sprouts of excellent quality. 10c. pkt., 25c. oz., 75c. 1/4 lb., \$2.50 lb. DALKEITH. It is astonishing

how much more extensively Brussels Sprouts are grown and used in recent years than in the past. Amateurs are findingoutthat this delicious vegetable can be as easily grown as eabbage. This variety is a great Improvement on the old tall-growing sort; It is much more dwarf and compact, and produces "sprouts" of larger size. (See cut.) Price, 10e. per pkt., 25e. per oz., 75e. per 1/4 lb.

HENDERSON'S SELECTED

### EARLY JERSEY WAKEFIELD. THE STANDARD EARLY CABBAGE OF AMERICA.

This variety was first brought into general notice by the late Mr. Peter Henderson in his book, "Gardening for Profit," when it was first published twenty-five years ago. Its merits and characteristics are new so well known as to hardly need repeating here; still, as our catalogue annually falls into the hands of theusands who have not before seen it, we may state that it is universally considered the best early Cabbage in cultivation. Among its merits may be mentioned its large size of head for an early sort, small cut-side follage, and its uniformity in producing a crop. The heads are pyramidal in shape, having a blunted or rounded peak. 5c. pkt., 25c. oz., 80c. ¼ lb., \$2.75 lb.

"Had Peter Henderson done nothing else but introduce the Early
Wakefield Cabbage, it would be a lasting monument to his name.
No better variety is in cultivation to-day among the early kinds."
—COUNTRY GESTLEMAN.

## THE CHARLESTON,

OR LARGE TYPE OF WAKEFIELD. . . . . . THE LARGEST AND BEST "FIRST EARLY" CABBAGE. "Your Summer Cabbage is the fluest I have ever grown, and I do not want to be without it."

-CHARLER RANKIN, Newark, Ohio.

For some years past customers have requested us to procure for them, if possible, a Cabbage which had all the characteristics of the Early Jersey Wakefield, but of a greater size. With this in view, we carefully selected from one of our best stocks of Wakefield a larger type, which is now so fixed in its character that we can offer it with confidence to those desiring a Cabbage of this kind. This selectlen will average about 50 per cent. larger in size than the old type of Wakefield, and Is only two or three days later. (See cut.) 10c. pkt., 35c. oz., \$1.00 1/4 lb., \$3.50 lb.

"Charleston Wakefield cannot be beat for a solid-heading Cabbage. Last spring I sold a lot to one grocer and he said they were the best Cabbages that he had handled

# HENDERSON'S SUCCESSION CABBAGE

## The Grandest Cabbage in Existence!

IN EVERY RESPECT.

The Succession Cabbage we consider one of our most valuable contributions to hortleulture. It would be classed as a second early variety, coming in a fow days later than Early Summer, but it is immeasurably superior to that variety; it is of nearly double the size and is absolutely true to its type under all conditions. In addition to this, it has no tendency whatever to run to seed. We ean say without exaggeration that it is the finest cabbage in existence to-day; whether for medlum early, main erop or late use, it has no equal. It is so finely bred and so true to type that in a field of twenty acres every head appears alike.

We can recommend it either for the market gardener, trucker or private planter, as it is a perfect cabbage in every respect, not only being of the largest size, but of handsomo color and of the finest quality. probably the safest variety for an amateur to plant as it does well at all seasons, and one is almost suro of getting a crop, no matter when it is planted. Our stocks of cabbage of all varieties have for years been the acknowledged standard of excellence in this country, and when we state that we consider Succession to be the most valuable variety that wo have ever intreduced, our opinion of its great merit will be apparent to all. We could fill many pages of our catalogue with unsolicited flattering testi-monials that we have re-

great excellence. Price, 10c. per pkt., 35c. per oz., \$1.00 per ½ lb., \$3.50 per lb.

celved from all sections ef the country in regard to its

# WHAT PEOPLE SAY WHO HAVE GROWN IT: "Let me say a few words about the Succession Cabbage. 200 solid hard heads from 200 plants, 10 to 13 inches in diameter, some weighing 13 and 14 lbs. and the earliest lutown. It is the best Cabbage ever raised where ground is not plenty, for every head counts large. I sold 50 plants which gave the same result; all from one 10 cent packet."

FAMOUS Succession Cabbage

A Del

Henderson's

A Receives nothing but Praise &

From Maine to California\_

From Canada to Florida. HEADS HARD AND UNIFORM, AVERAGING 10 to 12 pounds in weight and 36 inches in circumference. THOSE WHO HAVE GROWN IT WRITE:

The most beautiful type of Cabbage ever raised." "Took First Premium,"

"Always harvests a good crop, even when other varieties fail." J. J. J.

"Your Succession is the best winter keeper."

"Every plant headed; none imperfect."

"The grandest Cabbage ever introduced." "We grew 16 acres of Succession, as fine Cabbage as ever grew."

the same result; all from one 10 cent packet."

W. E. Edwards, Ellington, Ct.

"Your Succession Cabbage is the finest I ever planted. I have one head which measures 18 inches in diameter. It all heads, and all are large heads."

B. M. LAUGHLIS, Olympia, Wash.

"Your Succession Cabbage excels all other Cabbage for this climate and altitude (7,600 feet). I have plenty of heads now, March 9th, 1896, in my cellar that will welgh 20 lbs. each."

A. V. P. Day, Buena Vista, Colo.

"The two rows of Hendersou Succession Cabbage were worth more than the two dozen rows on each side of other strains."

G. F. Josh, N. Tishokle, N. Y.

"I find your Succession Cabbage is the best for Galveston Island. It makes heads when all other kinds fall. I tried it side by side with three other kinds, which failed, while your Succession made fine heads. It is one of the finest Cabbages in existence."

HENRY DECIE, Galvestoa, Texas.

"The Succession Cabbage was the best I

"The Succession Cabbage was the best I ever ralsed; every plant made a fine head. I have bought seed of twenty or more seedsmen, and yours are the best."

II. A. Hawk, Lexington, Okla.

"I find your Succession Cabbage the lest header in this climate at any season. I see it quoted by some dealers as low as \$1.25 per ib., but I want the genuine headquarters seed."

J. H. SNOWBALL, Hitcheock, Texas.

"Your Succession Cabbage is the best I ever saw grow in this country. I got fooled last year by getting from other purities, and I thought I would sen direct to you this year."

ELI WILLIAMS, Osgood, Iad.

"Regarding your Succession Cabbage, I may state, I raised a few plants from a small quantity of seed I got from you, alongside of a lot which came from Philadelphia, but there was so much difference it was like comparing chalk with cheese—yours grew very compactly, headed regularly and very even, making fine, large, very solld heads, while the Philadelphia lot grew very ragged and coarse, making very loose heads and were much later than yours, in fact, there was no comparison between the two strains. I have come to the conclusion that the genuine strain of Succession Cabbage cannot be obtained otherwise than direct from you."

F. W. Krempin, Newcastie, N. S. W.

NOTE.—This peerless variety is so well known and so much sought after that dealers everywhere are offering the "Succession Cabbage." We desire to warn our customers against all such, unless the seed is bought from us direct and in our original packages. This is of vital importance, as many inferior stocks of Cabbage are being offered under the name of "Succession" or "Henderson's Succession."

"Your Autumn King Cubbage was a wonder to all of my friends, and weighed 20 to 23 pounds per head. I shall always use and praise your seeds."—Mrs. John Meyers, Erhart, Ohio.

ernart, Ohio.

"I always find that while your garden seeds are somewhat higher than seeds of the local dealer, they are always also of a higher graine of excellence and always true to name and description, and for your Antunu King Cabage I cannot say bo much in its wates as to productiveness, quality and keeping qualities. I have them now in the cellur in good condition."—F. P. BLANCHARD, Sanford Corner, Me.

"I must say that the Antunn King Cabbage is the only Cabbage that stands the drouth and all kinds of weather, We had a fine yield while all others failed."—J. M. MUIR, West Salem, Ohlo.

"I must say that I have found the Antonin King Cab-bage the best Cabbage for Antonia work I ever Ind."—W. E. TIDY, Springhourne, Bournemonth, England.

"The Antumn King Calibage Seed I have bought from you annually since 1890. I have raised from them Cabbages that could not be surpassed in six and solidity of heads. It has been with me an all-year-round Cabbage."—A. M. KIMBERLIN, Zancsville, Ohio.

"We had 1,000 plants of Antumn King Cabbage from you last year, and, considering the terrible dry season we had, I think there is no other Cabbage tike it citier for pickling or for other winter use."—I'. M. ALEXANDER, Cunton, O.

"The Autimin King Cabbage gave large solid heads, 63 to 18 pounds, as stated in cutalogue. If veryived nothing but praise from all who save it."—Robt. Smith, Louisville, Ky.

"The Autumn King Cabbage is the best late variety for this country I have ever struck. The water was all over my gurden the 9th of November, and I was obliged to gather the Flat Dutch varieties, but the Autumn King is still out and is in good condition. The water being over the heads did not make them burst. It is a King among Cabbage."—WM. RUGG, Bridgeport, Conn.

"From your Antonin King Cabbage Seed I have raised the finest Cabbages that I ever sore. Some of the heads (after being trimmed rendiffer market) iverified 19 jounds in September. It is very tender and of fine flavor."—L. A. Kixo, Mexico, Mo.

"I sent a spectmen of your Antonon King Cabbage to the Sionx City Corn Palace. It weighed 27½ pounds, and I wilt wager \$100 that I can raise mare pounds to the 100 heads than any other grouver can with any other variety. I sudd 200 heads 14 one man that averaged 22½ pounds to the head."—J. W. Kelly, Sanborn, Iowa.

# Henderson's "Autumn King" Cabbage.

Is the superior of all other Winter Cabbages. Interior creamy white, compact and crisp. Enormous solid heads, averaging 15 to 18 lbs. Unequaled for cooking or silcing. Measuring 36 to 40 inches in circumference, and, specially grown, often reaches 25 to 30 lbs, each. Flavor especially fine. It is the best winter keeper.

HIS peerless variety we introduced, and we will say without hesitation, all statements to the contrary notwithstanding, that it is the finest late Cabbage in this country to-day, entirely distinct, and the best keeper; it produces enormous, solid heads of that glaucous green shade that is most desirable in a Cabbage. It has also such small outer leaves that it can be planted much closer together than the ordinary late sorts, and it can be relied upon to produce a greater weight of crop per acre than any other variety, from the fact that it produces very few outer leaves and goes all to head. A distinctive feature of the AUTUMN KING is the peculiarly erimped leaves, which not only add to its appearance, but enable it to be distinguished anywhere. So distinct is the AUTUMN KING that the veriest novice can readily tell it in the trial grounds of a

readily tell it in the trial grounds at a glance, and yet, notwithstanding this distinctiveness, a Long Island grower succeeded in folsting it under a new name on a Philadelphia firm of seedsmen. It is only fair to say that on having their attention called to the matter they have in a way acknowledged their error. We mention this that our customers may not be misled. If you want the true AUTUMN KING CABBAGE, send to us, who introduced it. The engraving gives a good idea of its appearance.

Price, 10c. pkt., 35c. oz., \$1.00 ½ lb., \$3.50 lb.

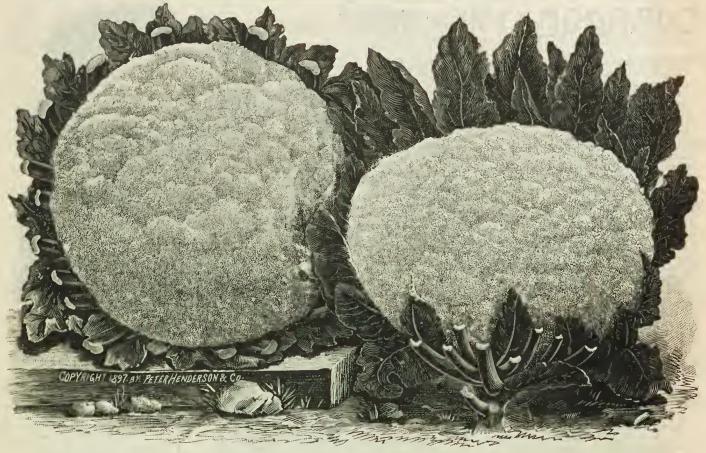

### A Big Preston Co. Cabbage.

"Editors 'Post':—We see in the 'Post' of the 10th inst., notice of a large Cabbage measuring 3 feet in circumference. I this day measured what we think is our largest, and it is just 47 inches, clean solid goods, and weighs 26 lbs. This is the Autumn King variety from Peter Henderson & Co., 35 and 37 Cortlandt Street, New York. Lots of 36 and 40 circumferences and from 18 to 20 pounders." 18 to 20 pounders.

F. M. HUFFMAN, Marquess, W. Va.

# HENDERSON'S

#### ENDERSON'S SNOWBALL AULIFLOWER,

A DELICIOUS **VEGETA**= BLE.

THE GROPS IT HAS PRODUCED

QUESTION THE BEST CAULI- FOR Forcing or Cold Frames.

SNOWBALL CAULIFLOWER

Has produced many a good crop since we first launched it upon the sea of popular favor, but it has also raised a crop of unother kind, not originally contemplated by us. We refer to the swarm of imitators who have been tempted to offer various imita-

swarm of imitate tions of this farmous variety. We wish further to say that we took the troublefive years ago to procure nearly a dozea samples of so-called Early Snowball Cauliflower from other seeds men, which we tested and found that not one was true, and some green nearly three feet high without any tendency to head.

BEWARE OF ...... We have always controlled Henderson's Esrly Snowball Csuilflower, any statement to the contrary notwith the contrary notwith-standing, and unless the seed is bought di-rectly from us, in pack-ages sealed with our Trade-Mark, reproduced herewith, you do not get the genuine, as we do not supply it to dealeys. dealers

THEADS WHERE OTHERS FAIL.

Those who have never succeeded before should grow

LIENDERSON'S SNOWBALL.

It is hardly necessary for us to describe this variety at all, as its name has now become a household word wherever this delicious vegetable is grown. Snowball Cauliflower is the standard dener, and the amateur. While originally recommended and used as an early variety, it has not only supplanted all other sorts for early spring planting, but it has largely driven out the large late sorts for fall use, being much finer in quality, and the only Cauliflower that is absolutely certain to head when the conditions are right, forming a perfect snow-white head, averaging nine inches in diameter. HENDERSON'S EARLY SNOWBALL CAULIFLOWER is superlor to all others. It is the earliest of all Cauliflowers. Its close-growing, compact habit enables one-third more to be planted on the same space of ground than can be done with any other variety. For foreing under glass during winter and spring, this Early Snowball variety is peculiarly well adapted, from its dwarf growth and short outer leaves, and for this purpose no

other Cauliflower is now so largely grown. PRICE, 25c. pkt., \$4.00 oz., \$14.00 1/4 lb.

"Please send me 2 lbs. of Hendersoa's Snowball Cauliflower as promptly as possible. I am a market gardener, and would like to say that I have several times tried other so-called 'Snowballs' alongside of yours, and while some of these samples had not a slagic specimen true to name, yours produced 100% good heads."

JAMES BARRATT, Winnipeg, Manitoba.

"From one ounce of your Snowball Cauliflower seed I raised 3,500 piants. I have tried Cauliflower seed from several seedsmen, but aever have had any success except with the true Henderson Snowball." ARTHUR L. MILLER, Edella, Pa.

## HENDERSON'S AND OTHER EARLY SNOWBALLS.

HAS GROWN & & &

"Henderson's Early Snowball Cauliflower, I am sure, is the best kind in existence, no matter how loud and strong this and that seed-house is praising theirs, claiming them as the best in the world. By my own experience, I know yours is far ahead of all others; yours is not only the eartiest but the surest heading Cauliflower, while other muchlauded kinds were of no value."

A. KATZWINKEL, Market Gardener, Mendota, Ills.

# HEADS

WHERE OTHERS FAIL.

HENDERSON'S INTERMEDIATE. This is certainly the best main erop carrot. Our eut is no flattering representation, but shows it as we have seen it in enormous quantities, and we strongly advise our customers to plant it. It is one of the most uniform in shape that we know, and where the soil is favorable it will always grow cican and free from side roots. The eore is small and very tender, and there is no indication of woody character at any stage of its growth. It is also entirely free from any coarse, rank flavor so common with many sorts. For private purposes it is ideal, and its yielding capacity is enormous, which, with its handsome color and fine appearance, makes it invaluable to truckers. (See cut.) 10c. pkt., 15c. oz., 35e. 1/4 lb., \$1.00 lb.

LONG ORANGE IMPROVED. One of the most desirable for either garden or field culture. It grows to a large size, fair specimens averaging twelve inches in length, and three inches diameter at the top. All who have cattle should raise a surplus

the flow of milk and imparts to the butter a deficious flavor and a rieh golden color. (See cut.) 5c. pkt., 10e. oz., 25c. 1/4 lb., 70e. lb.

DANVERS. (Half Long.) A handsome, cylindrical-shaped earrot of good size and stump-rooted. It is of a rich, dark orange color, grows to a large size, is smooth, and the fiesh very close in texture, with little core. It is a first-class earrot for all soils, and it is claimed that under good cultivation it will yield the greatest weight per aere with the smallest length of

variety, somewhat resembling the well-known Nantes Carrot. but having a larger shoulder and being much more productive.

OXHEART, OR GUERANDE. A French variety of rocent introduction and a decided acquisition. It is intermediate between Haif Long and Horn varieties and perfectly distinct. The shape is nearly oval and the color and quality all that can be desired. (See cut.) 5c. pkt., 10c. oz., 25c. 1/4 lb., 80c. ib.

EARLY FRENCH FORCING. The earliest variety and one largely grown for foreing purposes. It makes a small, almost globe-shaped root of an orange red color. (See cut.) 5c. pkt., 15c. oz., 30c. ½ lb., \$1.00 lb.

EARLY SCARLET HORN. Favorite for early crop, but not large. Sold largely in New York markets bunched. It matures eight to ten days earlier than the Long Orange, and is sometimes used for foreing. (See cut.) 5e. pkt., 10c. oz., 25e. ½ ib., 80e. lb.

EARLY HALF LONG SCARLET CARENTAN. The skin is smooth, flesh red, and without any eore or heart. It is excellent for foreing, and for fine quality and perfect shape can hardly be surpassed. 5e. pkt., 10e. oz., 25e. 1/4 ib., 80e. lb.

EARLY HALF LONG SCARLET. (Pointed rooted.) A medium early sort of great value. It is most useful in the younger state, either in soups or cooked whole, and is much fised for bunching. The tops are very smail, which permits close planting. 5c. pkt., 10e. oz., 25e. 1/4 ib., 80c. ib.

WHITE AND YELLOW BELGIAN. See page 71.

BIG CARROTS

From The Watkins Express, Watkins, N. Y., Thursday, November 18th, 1897:—"Mr. Bowers has on exhibition in his store a bushel basket of earrots grown by Mr. Craft, Dr. S. B. Allen's gardener. The combined weight of twelve of these carrots nearly seven pounds. Upon being asked the reason of his success in gardening, Dr. Allen said it was due to the use of good seed, which for the last fifteen years he had purchased of Peter Henderson & Co., of New York. Dr. Allen further remarked that he thought farmers were generally too indifferent in regard to the quality of seed which they used, and that he had found it most economical in the end to purchase the best."

"I will occupy the space left by my wife to say a few words in praise of my Perfected White Plume Celery. I have been using your seed many years, hut I have never had such success as I have this year with the above seed. After a long experience in celery culture, I find nothing comparable to your White Plume."

"You may be interested in knowing that your White Plume Celery took first premium at the Maryland State Fair. My hed is certainly the handsomest thing in celery I ever saw. Some of the feathered hearts measure twenty inches in length when trimmed and hunched for market."

"Your White Plume is the finest celery we have ever seen. At a special dinner of 14 covers, it received the highest encomiums of the guests."—Hoffman House, NEW YORK.

MYRA D. SCALES.

Temple, Me

# CELER

the stalks half-round. When

For Culture see page 10. 300

1 oz. for 2,000 Plants.

DWARF CKLERY

IANT PASCAL. A selection from the Golden Self-blanehing Celery, partaking of the best qualities of that variety, but is much larger and a better keeper. It is of a fine, nutty flavor, being entirely GIANT PASCAL. free from any bitter taste. It grows two feet high; stalks broad, thlek, erisp and stringless; the width and thlekness of the stalks are distinctive features of this variety. It bleaches with but slight "earthing up," and very quickly. A valuable variety for both second early and midwinter use. (See cut.) 10e. pkt., 30c. oz., 75c. ½ lb., \$2.50 lb.

HENDERSON'S GOLDEN DWARF. This, like many other standard varietles of vegetables, was first introduced by ourselves. The Golden Dwarf now constitutes the great bulk of main crop Celery that is produced in all sections of the United States. In the great Celery-growing districts of Kalamazoo, Mich., this variety is planted almost to the exclusion of all others, except the White Plume, which they use for the early crop. Golden Dwarf, when blanched, is of a waxy golden-yellow color; the stalks are cylindrical in shape and meet solid and erisp in quality, and one of the hest keeping of mest solid and erlsp in quality, and one of the best keeping of Celeries. (See cut.) 5c. pkt., 25c. oz., 80c. 1/4 lb., \$2.75 lb.

GOLDEN SELF-BLANCHING. A most valuable variety, partaking of the character of the celebrated White Plume, Inasmuch as it simply needs a slight earthing up or "handling." It is of a beautiful waxy golden color, very selld, and of a rich nutty flavor. 10e. pkt., 40e. oz., \$1.25 1/4 lb., \$4.00 lb.

"The seed that I received from you this spring was very satisfactory, and I was very much pleased with the Golden Selfeblanching Celery. It grew the largest and handsomest Celery I ever saw, and I would like some more of the same seed." THOMAS WOOD, Swansea. Mass.

HENDERSON'S DWARF WHITE. This variety is perfectly solld,

GIANT PASCAL CELERY.

GIANT PASCAL CELERY.

HENDERSON'S HALF DWARF. Entirely selid, possessing a rich nutty flavor, while It has much vitor of growth surposeing most of the large growing source in the stanks flatt-round. When blanched is a yellowish white, crisp, tender, and of line flavor. 5c. pkt., 25c. oz., 70c. ½ 1b., \$2.25 lb. while It has much vigor of growth, surpassing most of the large-growing sorts in weight of bunch. 5c. pkt., 25c. oz., 75c. ½ lb., \$2.50 lb.

BOSTON MARKET. Similar to the Dwarf White, but rather more robust. The leaves are a darker green, the stalks when blanched being nearly white. It is an excellent variety, solid, erlsp and tender. 5c. pkt., 25c. oz., 75c. ½ lb., \$2.50 lb.

GIANT WHITE SOLID. A large-growing sort, attaining a height, under good cultivation, of 3 feet. This variety is most sultable for southern, seetlons of the cultivation, of 3 feet. This varlety is most sultable for southern sections of the eountry, as it grows freely in hot or dry atmosphere. 5c. pkt., 20c. oz., 60e. 1/4 lb., HENDERSON'S GOLDEN ROSE. Golden Rose is a development of the favorite Golden Self-blanehing, and shews its parentage in its strong habit of growth, while its self-blanehing character is strongly fixed. The plant is dwarf and heavy, the stalks are very broad and solid, and are also entirely free from those objectionable ridges which generally accompany stringiness; Indeed, there is so little string that the stalks are pesitively brittle. The general color is about identical with Golden Self-blanching, except that the naturally golden-colored stalks are proposed with a recommendation of the second stalks are proposed with a recommendation of the second stalks are sufficient with the recommendation of the second stalks are sufficient with the recommendation of the second stalks are sufficient to the second stalks are stalks are suffused with a warm, rosy hue, which grad-ually fades towards the top of the stalks, where it assumes a bright golden color when properly blanched and fit for the table. The unique combination of color makes it exquisitely beautiful in appearance, and its self-blanching habit assures lts earliness, while its hardiness and solidity bespeak its abllity to keep for a considerable time. Price, 10c. pkt., 60c. oz., \$1.75 ½ lb. "I have the finest bed of Celery plants from your seed this spring that I ever had. Formerly I pur-chased seed from a Philadelphia house but your seed proves about 50% better." ARTHUR CRAIG, Tennevt, N. J. "I had Celery ready for market August 24th, last full, from your seeds. Every one who saw it said it was the finest they ever saw."

# ..HENDERSON'S.

20,20,20,20

The most beautiful Celery that ever graced a table. Flavor most delicious, crisp and nutty.

So brittle that a stalk held in the hand will almost break of its own weight.

Absolutely solid and free from stringiness. The first and the last Celery that is fit to use.

XXXX

An advance in celeries that merits more than ordinary pralse; it is an intermediate between white and red celerles, combining the good qualities of both. It is practically identical with our famous "White Plume, but with the added merit of the stalks being exquisitely suffused with pink and possessing the crispness, rich, nutty flavor and long-keeping qualities for which red celeries are noted. "PINK PLUME" is also remarkably attractive when trimmed for the table. The solid succulent stalks are IVORY-WHITE SUF-FUSED WITH DAINTY PINK.

It is a strong, healthy, compact grower, with no tendency to rust; stems very solid and crisp, extra early and a long keeper, remaining, when properly trenched, In perfect condition away into the spring. The variegation on the tops does not show quite as early as the "White Plume," but the ceiery blanches and matures that is, it requires but a slight earthing up or banking to prepare this variety for the table. (See cut.)

Price, 10c. pkt., 40c. oz., \$1.25 1/4 lb., \$4.00 lb.

"The New Pluk Plume introduced by Peter Henderson & Co. last spring comes out grandly. There is to me a peculiar charm about all plakish varieties. The color is attractive, while the stalks are usually characterized by especial crispness and unity flavor. I think highly of the new introduction."—AMERICAN GARDENING.

HENDERSON'S NEW ROSE. A first-class celery. The color is a beautiful shade of rose, of exceptionally fine flavor, solid, crisp and entirely free from stringiness. A splendid variety for late use, keeping well. 10c. pkt., 30c. oz., \$1.00 ½ lb., \$3.00 lb. LONDON RED. Is one of the best, having every requisite good quality. 5c. pkt., 25c. oz., 75c. ½ lb., \$9.50 lb.

# GUGUMBER HENDERSON'S NEW GOOL AND GRISP."

Extra Early! Exceedingly Prolific! Bears the whole season! FOR CULTURE SEE PAGE 10.

1 oz. for 50 hills; 2 to 3 lbs. in hills for an acre.

The cut gives a good idea of the shape of this valuable variety. It will be noticed that it is inclined to taper off at the stem-end, and is generally a little pointed at the other end also. This is the most desirable shape for pickles. The cucumbers are straight, long, even and slim, and until they reach their full size they are of a very dark green color, so dark that it might be almost called "black." The peculiar feature of this variety is the knobs or protuberances, upon which the spines are placed, are prominent at all stages of growth, giving the cucumber a very attractive appearance. This variety is the earliest and most prolific of all pickling cucumbers, and is certain to become a standard sort. While primarily a pickling variety, it is one of the very best for slicing, the cucumbers, when fully matured, being of good size and exceedingly tender and crisp. (See cut.) 10c. pkt., 15c. oz., 35c. 1/4 lb., \$1.00 lb.

"I must say a few words in regard to your 'Cool and Crisp' Cucumber. It is a very superior variety. I started the seeds in a cold frame, and had then early, and they continued to bear the whole season until frost killed the vines. I never saw such a bearer, and considering the dry season it astonished everybody."—James L. Balmer, Marysville, Mich.

"I cheerfully endorse the statement of James L. Balmer, in regard to your 'Cool and Crisp' Cuember. It is all that it is represented to be, and a more profific bearer I never saw in such a dry season as last,"—JAMES KIRBY, Hempstead, L. I.

# CUCUMBER.

1 oz. for 50 hills; 2 to 3 lbs. in hills for an acre. For CULTURE see page 10.

IMPROVED EARLY WHITE SPINE. One of the most popular varieties, both for marketing and table use. Vines vigorous, fruiting early and abundantly, frult uniformly straight and handsome, light green, with a few white spines, firsh erisp and of fine flavor. Largely grown for forcing, and extensively grown in the South for shipping to the Northern markets early in the season. 5e. pkt., 10e. oz., 20c. 1/4 lb., 55c. lb.

LIVINGSTON'S EVERGREEN. This new variety is proving of great value. It is very hardy, and probably the most prolific of all varieties. In addition to being so wonderfully prolifie, it is very early, and the cucumbers retain their beautiful green color longer than any other sort. It is one of the very best varieties for slleing, as it is very erisp and of good quality, and as it produces fruits of medium size it is likely to be of much value for pickling purposes. 5e. pkt., 10c. oz., 20c. 14 lb., 55c. lb.

NEW EVER-BEARING. The peculiar merit of this variety lies in the fact that the vines flower and produce fruit continuously until killed by

frost. They exhibit at the same time cucumbers in every stage of growth, but invariably of perfect form, even when very small. The cucumbers are of a fine green color, and are desirable for pickling. 5c. pkt., 10e. oz., 20c. 1/4 lb., 60e. lb.

NICHOL'S MEDIUM GREEN. We consider this a most valuable variety. As a pickle sort it will be found unequaled, and for early forcing, or slicing, As a picklosorth will be found unequated, and for early following, of strong, there is no better. It is exceedingly productive, of medlum-size, and always straight and smooth. 5c. pkt., 10c. oz., 20c. 1/4 lb., 55c. lb. (See cut No. 3.)

EXTRA EARLY GREEN PROLIFIC. Same as a good stock

EXTRA EARLY GREEN PROLIFIC. Same as a good stock

of Green Prolifie, but from ten days to two weeks earlier. Those who grow exclusively for pickling will find in this something they have long desired. 5e. pkt., 10c. oz., 20c. 1/4 lb., 60c. lb. (See cut No. 5.)

LONG GREEN. Long fruit of excellent quality. Dark green, firm and erlsp. 5e. pkt., 10e. oz., 20e. 1/2 lb., 55c. lb.

JAPANESE CLIMBING. While all eucumbers are running

vines, yet this variety Is much more ereeping, or elimbing, in Its habit, so much so that it quickly climbs on poles or trelllses In the same manner as the Pole Lima Bean. It is entirely distinct. The quality is splendid. It is well adapted for pickling, as well as for slieing for salads. The great advantage of having a cueumber which can be trained on a pole or a fence will be apparent to all. 10c. pkt., 15c. oz., 40c. 1/4 lb., \$1.25 lb.

"I don't think I ever got more satisfaction for ten cents than that sent for a package of Japanese Climbing Cucumbers, of which I have planted a few hills every spring, and find them strictly first-class in every particular. One great feature is that a hill requires no more space than a hill of beans."

SHORT GREEN, or GHERKIN. Similar to Early Frame; good for pickling. 5c. pkt., 10e. oz., 20e. ¼ lb., 55e. lb. EXTRA LONG WHITE SPINE. Largely used for foreing.

5e. pkt., 10e. oz., 20c. ½ lb., 60e. lb.

West India Gherkin, or Burr. Used exclusively for pickling. 10e. pkt., 15e. oz., 35c. ½ lb., \$1.00 lb. (See pickling. cut No. 1.)

Long Green Turkey. 5c. pkt., 10c. oz., 20e. 1/4 lb., 60c. lb.

We can also supply the following standard varieties of Cucumbers, which are too well known to need description, at the uniform price of 5c. pkt., 10e. oz., 20e. 1/4 lb., 55c. lb.:

Green Prolific. Early Cluster. Early Frame.

Tailby's Hybrid. Jersey Pickling. Boston Pickling.

"I can get Cucumber seeds from seedsmen, claimed to be perfectly reliable, for much less per lh, than yours, but I must confess I nlways have better results from your seed. I would rather pay more for your seed than ran the risk of obtaining nn inferior grade. I am the largest encumber planter in this section, and it would do you good to see a shipment of the 'cukes' I raise, and I always have to say, when referring to my best lots,' these are of Peter Henderson's seed."

### HENDERSON'S ····VEGETABLE

CORN, PEAS and BEANS we do NOT deliver free, but will do so if 5c. per pint or 10c. per quart is added to prices.

#### FIRST EARLY VARIETIES.

HENDERSON'S EARLY METROPOLITAN. (See Novelties, page 13.) 15e. ½ pt., 30e. pt., 50c. qt.
CORY EARLY (Red Cob). The Cory is undoubtedly the earliest

of ali and the very best extra early Sweet Corn. We have proved it to be five days earlier than the Marblehead, which hitherto has always taken the lead. Those desiring a first early variety ean make no mistake in pianting the Cory. (See cut.) 10c. ½ pt., 15c. pt., 25c. qt., \$1.10 pk., \$3.75 bush.

"WHITE COB" CORY. An extra early variety, identical with Cory Early, except in color. 10c. ½ pt., 15c. pt., 25c. qt., \$1.10 pk., \$3.75 bush.

\$3.75 bush.

EARLY ADAMS, OR BURLINGTON. Never smuts. The most reliable early sort. 10c. ½ pt., 15c. pt., 25e. qt., 90c. pk., \$3.00 bush.

EARLY MINNESOTA. Vory oarly and desirable allke in the market or family garden. Height not over 4½ feet; ears of fair size and good quality. 10c. ½ pt., 15c. pt., 25c. qt., \$1.00 pk., \$3.50 bush.

CROSBY'S EARLY. Early and a great favorite. Rather small ears, but productive and of excellent quality. (See cut.) 10c. 1/2 pt., 15e. pt., 25e. qt., \$1.00 pk., \$3.50 bush.

#### MEDIUM EARLY VARIETIES.

PERRY'S HYBRID. An early twelve-rowed variety, growing only four to five feet high, with ears set very low on the stalk. Kernels white, large, sweet and very tender. 10c. 1/2 pt., 15c. pt., 25c. qt., \$1.00 pk., \$3.50 bush.

EARLY CHAMPION. One of the largest second early varieties, three days earlier than Crosby's; large handsome ears, 10 to 12 rowed. A heavy eropper, free from smutand exceedingly sweet.

10c. 1/2 pt., 15c. pt., 25c. qt., \$1.10 pk., \$3.75 bush.

MOORE'S EARLY CONCORD. Ears large and well filled;

early and unsurpassed for riciness and delicacy of flavor. 10c. ½ pt., 15c. pt., 25e. qt., \$1.00 pk., \$3.50 bush.

STABLER'S EARLY. A valuable second early corn, remarkably large for so early a ripener, closely following the well-known Marbiehead. Yields an abundant erop, is desirable for famliy use, and one of the most profitable for market or eanning. (See cut.) 10c. ½ pt., 15c. pt., 25e. qt., \$1.10 pk., \$3.75 bush.

SQUANTUM. One of the sweetest varieties, and is largely used for market and eanning. It is a general favorite and is wonderfully productive. The Squantum is the variety used almost exclusively at the famous R. I. elambakes, which is sufficient evidence of its quality. 10c. ½ pt., 15c. pt., 25c. qt., \$1.00 pk., \$3.50 bush.

#### LATE OR MAIN CROP VARIETIES.

THE "COUNTRY GENTLEMAN." (See next page.) 15c. 1/2 pt., 25c. pt., 40c. qt., \$1.25 pk., \$4.00 bush.

MAMMOTH. A late varlety, producing ears of very large size and fine flavor. It is unusually productive. (See cut.) 10e. ½ pt., 15c. pt., 30c. qt., \$1.25 pk., \$4.00 bush.

THE "HENDERSON." In the green condition when ready for the table It is always pure white, and of a remarkably sweet and The Henderson ripens about seven days earlier than Stowell's Evergreen. It is one of the most valuable sorts, in fact, with the execption of the Country Gentleman, we know of no better variety for main erop or general use. (See cut.) 10e. ½ pt., 15c. pt., 30e. qt., \$1.10 pk., \$3.75 bush.

ROSLYN HYBRID. Is a very large-growing sort, which ripens ten or tweive days later than Stabler's Early, and the quality of

which is said to be finer than Stowell's Evergreen. 10e. ½ pt.,

15e. pt., 25c. qt., \$1.00 pk., \$3.50 bush. NE PLUS ULTRA. Very sweet and tender. short, but the cob is very small, and the kernels of extraordinary depth, pearly whiteness, and are irregularly erowded together on the eob. 10c. 1/2 pt., 15c. pt., 25c. qt., \$1.00 pk., \$3.50 bu. STOWELL'S EVERGREEN. Now recognized everywhere as a

standard variety, both for home use and market, and is the general favorite. The ears are of a large size, grains deep, exceptionally tender and sugary, and has the advantage of remaining longer in the green state than any other. Our stock has been earefully grown and selected to avoid the tendency to a shorter grain and deterioration in the evergreen character of this best of all late sorts. (See cut.) 10e. ½ pt., 15e. pt., 25e., qt., \$1.00 pk., \$3.50 bush.

WE can also supply the following standard varieties of Corn, which are too well known to need description, at the uniform price of 10c. ½ pt., 15c. pt., 25c. qt., \$1.00 pk., \$3.50 bush.: Extra Early Tom Thumb, Early Marblehead, Shaker's Early, Old Colony, Black Mexican, Hickox Improved.

"I cannot help sending you my testimony as to the result of the New York Lettuce. Of all the Lettuce I ever saw or tasted, I must say this is the very best. I set out quite a large bed, and 23 heads were all I could get in a barrel without hard pressure. I gave it away to anybody and everybody I could, and without an exception, every one said it was the finest in both size and quality they ever saw."

riety, but is one of the best for summer use ever introduced. (See cut.)

Price, 10c. pkt., 25c. oz., 65c. 1/2 lb., \$2.00 lb.

naturally, is erisp, tender and of excellent flavor, and always free from bitterness. The outside color is distinct. It is not a forcing va-

"Henderson's New York Lettuce: very fine and crisp. Good heads; I measured some of them and they were 15 to 16 inches across. It is all you claim for it. It looks like a cabbage head."

"We grew Henderson's New York Lettuce that measured over 18 inches across, and every one at first sight said they were cabbages."
"I have used 'Henderson's New York Lettuce Seed' for the past four years, and to my taste it stands without a rival among all the different arieties I have tried. I have given the seeds to different friends for trial, and from one and all comes the same old story, 'The best I ever tasted.'"
"Your New York Lettuce is something grand. Never saw anything like it in the way of Lettuce."

JUST

...A FEW

TESTIMONIALS

to show what is thought of

Henderson's "New York" Lettuce.

HENDERSON'S ... "MIGNONETTE."

A small, sturdy, russet-colored Lettuee, distinct and unique, and of great value. The entire plant measures only 7 inches in diameter, and is more solid and compact than any existing variety. The outer leaves are few, and these eling so closely to the head that it is almost all head. The few outside leaves are as deeply crumpled as a Savoy Cabbage and ricitly colored with russet-red and bronze-green of varying shades. The cut section shows the character of the solid heart, which is of a ereamy yellow waved with pale greenish white. It is wonderfully hardy, resists drought and excessive moisture—a most valuable feature in our climate. It is fit for use five days after Boston Market, which, combined with its long-standing character, constitutes it an all-seasons variety in a superlative degree. (See cut.)

Price, 10c. pkt., 25c. oz., 75c. ½ lb., \$2.50 lb.

BUTTER LETTUCE.

YELLOW-SEEDED BUTTER. It is a very distinct sort, making a large, dense yellow head, of a very handsome appearance, very crisp and tender and excellent in flavor. 5c. pkt., 15c. oz., 40e. ½ lb., \$1.25 lb.

BLACK. SEEDED BUTTER. Similar to Tennis Ball, but larger. Used extensively as an outdoor variety. 5c. pkt., 15c. oz., 40e. ½ lb., \$1.25 lb.

#### HENDERSON'S PERFECTED SALAMANDER.

THE BEST MEDIUM EARLY HEAD LETTUCE.

One of the best for summer use, forming good-sized, compact heads. Color, light green outside and white inside. It will remain longer in head and stand a greater amount of heat without burning or running to seed than any other variety. In the Southern States it is invaluable. We recommend ltto all. (See cut.) 10c. pkt., 20c. oz., 60c. 1/4 lb., \$2.00 lb.

## HENDERSON'S "NEW YORK."

THE BEST MAIN CROP HEAD LETTUCE AND THE KING OF ALL GARDEN LETTUCE.

It is of unusual size and solidity of head, with but little tendency to run to seed. We have had it, time and again, 18 inches in diameter, and weighing nearly four pounds, with heads almost as solid as an Early Summer Cabbage. The variety blanches itself naturally, is crisp, tender and of excellent flavor, and always free from bitterness. The outside color is distinct. It is not a forcing variety, but is one of the best for summer use ever introduced. (See cut.) 10c. pkt., 25c. oz., 65c. ½ 1b., \$2.00 lb. \$2.00 lb.

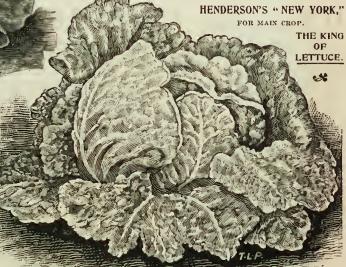

of HENDERSON'S "SUCCESSION" COL-LECTION of the four best Head Lettuces which, if planted at one time, will give a long succession, the "Golden Queen" being the earliest, "Perfected Salamander" following; then comes "Big Boston," and then for main and late crop comes that grand variety, "Henderson's New York."

We will supply I pkt. of each of these for 30c.

BIG BOSTON. MID-SEASON HEAD LETTUCE. Identical in color, shape and general appearance with the famous Boston Market, but is double the size.

PERFECTED SALAMANDER, FOR MEDIUM EARLY.

It is about one week later, but its solidity and greater size make it a most valuable sort. Most desirable either for forcing in cold frames or open-ground plant-ing. Popular with market gardeners and truckers, because it always produces large, solid, salable heads, and commends itself to amateurs, because it heads up at all seasons of the year, and is of crisp, tender quality. (See cut.) 10c. pkt., 25c. oz., 70c.  $\frac{1}{4}$  lb., \$2.00 lb.

# HENDERSON & CO., NEW

#### HEAD LETTUCE—Continued.

BOSTON MARKET. This variety can be planted so close and is so well adapted for the purpose that it is now more generally used for forcing in greenhouses and hot beds than any other. It grows very compact and forms fair-sized hoads, slightly tinged with red on the edge of the leaves. It is also one of the best early varieties for outdoor use. (See cut.) 5c. pkt., 15c. oz., 40c. 14 ib., \$1.25 ib.
TENNIS BALL BLACK-SEEDED. A favorite forcing variety, forming a hard head. It makes but few outer leaves, and for this reason can be planted quite descriptions of the second of t

closely under glass—from six to seven inches apart. It is the variety so largely used in hot beds, forcing pits and greenhouses. 5c. pkt., 15c. oz., 40c. ½ ib., \$1.25 ib. HANSON. Outer leaves bright green, with prominent light-colored veins; inner leaves white and usually curved and twisted at the base. Always sure to make large, handsome heads; quality fine. 5e. pkt., 15c. oz., 40c. ½ ib., \$1.25 ib. MAMMOTH BLACK-SEEDED BUTTER. Resembles the old Black Seeded

Butter very closely, but is much larger, forming an enormous head, every part of which is tender, erisp and sweet. It is a grand sort for all seasons, but particularly

for sowing about August 25th (in this latitude) for late fail use. 10c. pkt., 30c. oz., **CURLED** 80e. ¼ lb., \$2.50 lb.
WALDORF. (See Novelties, page 15.) 15c. pkt. BLACK-SEEDED SIMPSON. Forms large, loose heads of thin and exceedingly tender golden yellow leaves; the best curled variety for forcing or sowing out-of-doors, though

EARLY CURLED SIMPSON. Forms a close, compact mass of curly leaves of a yeilowish green. It is earlier than the head varieties and is the kind that is planted in cold frames aimost exclusively; it is also largely grown in the open.
5c. pkt., 15c. oz., 35c. ½ lb., \$1.10 lb.
COS, ROMAINE, OR CELERY LETTUCE.

"TRIANON." This excess all other lettuces in quality, having a crispness, tenderness and flavor peculiariy its own and unapproached by any other variety. The heads are long and conical. The leaves require to be tied up as shown in the cut, when they soon form solid heads and quickly bleach to snowy whiteness, and become as stiff, crisp and sweet as celery stalks, and are delicious when eaten in the same manner or prepared for salad. (See cut.) 10c. pkt., 25c. oz., 60c. 1/4 lb.,

PARIS WHITE COS. An old standard variety. 5c. pkt., 20c. oz., 50c. 1/4 lb., \$1.50 lb.

We can also supply the following varieties of Lettuce, which are too well-known to need description, at the uniform price of 5c. pkt., 15c. oz., 40c. 1/4 lb., \$1.25 lb.

Boston Curled,

Early Prize Head, Large White Summer Cabbage, Deacon, All the Year Round.

## HENDERSON'S MUSHROOM SPAWN

Is made especially for us three or four times each season, and is always fresh and in proper condition for planting, most profitable crop when successfully grown, and the American market is the best in the world for this most delicious of foods. We shall be pleased to mail free to all purchasers of Spawn our leafet on "Mushroom Cuiture" if requested. English. 15c. ib., 8 lbs. for \$1.00; by mail, 25c. ib.

French. The French Spawn is much more concentrated

than the English, and the Mushrooms are larger, more succeivent and of delicate flavor. (See cut.) In boxes of 2 lbs., 75c. per box; by mail 95c.

#### MARTYNIA.

The seed pods, gathered green and tender, are used for pickling. Proboscidea. 10c. pkt., 30c. oz., \$1.00 1/4 lb., \$3.00 lb.

#### MUSTARD.

WHITE LONDON. Best for salads. 5c. oz., 15c. 1/4 lb., 40c. lb.

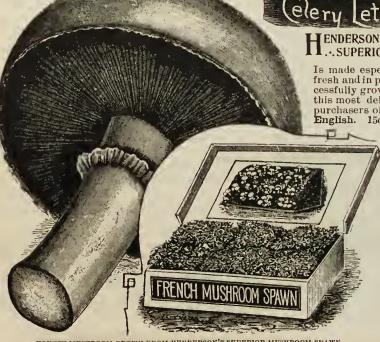

Brown or Black. More pungent in flavor than the white. 5c. oz., 15c. ½ ib., 40c. lb.
Giant Southern Curled. A favorite sort in the South.

10c. oz., 25c. ¼ ib., 75c. lb.

New Chinese. Leaves large and succuient, pleasant, sweet and pungent. 10c. oz., 30c. ¼ lb., \$1.00 lb.

#### NASTURTIUM or INDIAN CRESS.

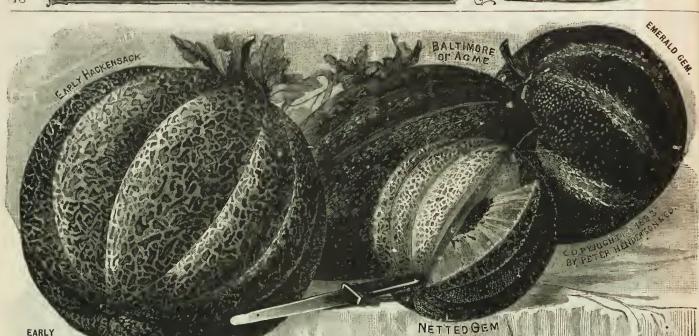

Tall. 5c. pkt., 15c. oz., 40c. ¼ lb., \$1.25 lb. Dwarf. 5c. pkt., 15c. oz., 40c. ¼ lb., \$1.40 lb.

FRENCH MUSEROOM GROWN FROM HENDERSON'S SUPERIOR MUSEROOM SPAWN

EARLY HACKENSACK MUSKMELON

#### TABLE

# "EARLY.. HAGKENSAGK.

The most extensively grown of all Musk Melons.
A reliable and bountiful yielder.
Large, Handsome, Early.
Flesh green, rich and sugary.

We were the first to distribute generally throughout the country the now famous Hacken-This New Early is a selection or improvement almost equal in size to the Hackensack, and at least ten days earlier. Several years' thorough triai has proven it to be the best as well as the carliest of all the netted melons. The melons weigh from four to six pounds each, and are of delicious flavor. (See cut.) 10c. pkt., 15c. oz., 35c. 1/4 lb., \$1.00 lb.

"I wish to thank you for the Early Hackensack Musk Melon seed sent me last spring. I find the vines of this variety remarkably healthy, strong and vigorous, and 'hobling up' wonderfully. They are still green while other varieties in my garden are all dead. They are the most profife melous I have ever raised, the ground being ilterally covered, and every specimen of finesize and shape. In quality they leave nothing to be desired, every melon being fine-grained and possessing the same sweet, delicious flavor. For vigor, productiveness und superb quality they stand at the head of the list of varieties I have yet tried."

#### Seeeeeeeeeeee

MONTREAL MARKET. Excellent late variety of the largest size; we have had them welghing over 10 lbs. In shape almost round, we have had them weighing over 101bs. In shape almost round, flattened at ends, deeply ribbed; skiu green and netted. Flesh green, very thick. 5e. pkt., 10c. oz., 25e. ½ lb., 70c. lb.

SKILLMAN'S NETTED. Form, roundish oval; flesh, deep green, sweet and richly perfumed; an early and delicious variety. 5c. pkt., 10c. oz., 25e. ½ lb., 70c. lb.

Improved Christiania. A very handsome variety. The fruits are somewhat uneven in shape and very deaply ribbed, only slightly.

somewhat uneven in shape and very deeply ribbed, only slightly netted; of a handsome black green color. The flesh is very deep, and though quite solid, is melting in character and of a peculiarly rich flavor. It is mellum early and a reliable allround sort. 5c. pkt., 10c. oz., 25c. 1/4 lb., 70c. lb.

Netted Gem. One of the earliest varieties, generally coming into

the New York markets right after Jenny Lind. Our stock is unsurpassed in purity, and is selected to an oval type which has proved of great advantage. It is very uniform in size, beautifully netted, flesh deep, falriy solid, but deliciously melting in character. The color of flesh is rich green. It is very productive, and a grand sort for general carly use. (See cut.) 5c. pkt., 10c. oz., 25c. 1/4 lb., 80c. lb.

For Culture see page 11. 1 oz. for 60 hills; 2 to 3 lbs. in hills for an acre.

The advent of this variety, grown in Rocky Ford, Col., has done more to popularize the Musk Melon in city hotels and restaurants than any other sort. It is a large and greatly improved oblong form of the Netted Gem, sche soft. It is a large and greatly improved oblong form of the rectaining all its good features, and growing larger and even more symmetrical in shape. We have the very finest stock of this sort on the market, demonstrated by ample trials on our own grounds. (See Novelties and Colored Plate, page 19.) 15c. pkt., 35c. oz., \$1.00 ½ lb.

BALTIMORE, or ACME. A green-fleshed, productive and excellent shipping melon, that can always be found in its season in the best hotels and restaurants in New York, Philadelphia and Baitimore. (See cut.) 5c. pkt., 10c. oz., 25c. 1/4 lb., 70e. lb.

HACKENSACK. It attains a large size, is round in shape and flattened at the ends; skin green and thickly netted; the flesh also is green, rich and sugary in flavor. It is wonderfully productive; very popular with market gardeners. 5e. pkt., 10e. oz., 25c. ½ lb., 70c. lb.

EMERALD GEM. This variety is of rich, delleious flavor and fine quality. Distinct, very early and prolifie; skin ribbed, yet smooth, and of a deep emeraid green, with a few lighter-colored stripes. The flesh is thick, of a suffused salmon color. Specially recommended to those who wish a very high-flavored fruit. (See cut.) 5e. pkt., 10c. oz., 25c. 1/4 lb., 80c. lb.

PAUL ROSE. A very handsome sort, the result of a cross between Netted Gem and Osage (or Miller's Cream), combining in a remarkable degree the best characteristics of both parents. (See Novellies, page 15.) 10c. pkt., 30c. oz., 90c. 1/4 lb.

MILLER'S CREAM (known also as Osage). This is, ln our opinion, one of the very finest red-fleshed varieties in cultivain shape, and handsomely netted. The flesh is extremely and uniformly deep, of a rich salmon color, of peculiarly firm texture, yet thoroughly melting, having no stringy character whatever. 5e. pkt., 10e. oz., 25e. ½ lb., 80e. lb.

Jenny Lind. This is the gem of the Musk Melons. The fruit is small, round-flat in shape, deeply but evenly ribbed, of a most attractive greenish gold color when ripe. It is safe to say that its flavor is unsurpassed by any, and for private use none is better, as it is an enormous eropper, and bears for a longer season than any sort. 5c. pkt., 10e. oz., 25c. 1/4 lb., 80c. lb.

Improved Nutmeg. Fruit, nutmeg shape; skin, deep green, finely netted; flesh, greenish yellow, rieh and sugary. 5c. pkt., 10e. oz., 25c. 1/4 lb., 70c. lb.

ENDERSON'S SEEDS, etc., can only be gennine when . . . . . . PURGHASED FROM US DIRECT-we do not supplydealers.

MUSK MELON OR GANTALOUPE.

THE CARMES.

This Melon was cultivated exclusively by the Carmelite Friars in their convent gardens for many years, and would, we suppose, have been lost to the outer world but for the fact that a small pertion of the seed was given to a gardener by a destitute peasant who had received one of the fruits when seeking alms at the hands of the good Friars.

Once into the world, it grew rapidly in the esteem of the gardening fraternity, and we think ourselves quite fortunate in having secured sufficient to work up a steck, under American cultivation, to offer to our customers.

It is now thoroughly adapted to our climatic conditions. The vine is very vigorous, producing an enormous number of fruits. These are very dark ellve-green in exterior color, slightly netted and generally rough in surface. The ribs are very deep and strongly marked, projecting irregularly at each end, which gives it an uneven appearance. It has but little seed cavity, and the flesh is salmon red and is very deep, ripening clear to the rind. The texture of flesh is perfect, and the delicious flavor is beyond comparison. It is, without doubt, an acquisition worthy of a wide acquaintance. (See cut.) 10c. pkt., 40c. oz., \$1.00 ½ lb., \$3.00 lb.

# 

A RED-FLESHED VARIETY, OF MOST DAINTY AND DELICATE FLAVOR. . .

HIS is an improvement over the well-known Delmenlco Musk Melon which we introduced several years ago. This improved type is almost a perfect globe in shape; the skin is a peculiar grayish green until ripe, when it changes to a bright yellow. The ribs are wide and covered thickly with prominent netting. The melons average about six luches in diameter, have a very small seed cavity, and are exceedingly solid and heavy for their size. The flesh is a deep, rich orange-yellow celor, and is of very fine grain, and of delicate and delightful flavor. 10c. pkt., 20c. oz., 50c. ½ lb., \$1.50 lb.

## \*\*\* NEWPORT. \*\*\*

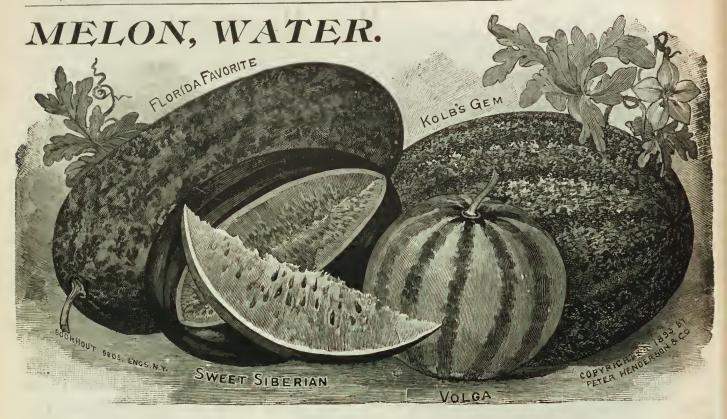

THE HIGHEST FLAVORED, MOST LUSCIOUS GREEN-FLESHED VARIETY GROWN, AND REMARKABLY EARLY.

WERY person who tastes our Newport Musk Melon goes into ecstacles over its rich aromatic flavor, and it certainly is, we think, the most delicious of all the green-fleshed sorts, and as a class the green-fleshed musk melons are more highly flavored than the red-fleshed. The Newpert is a very early melon, ripening with the Jenny Lind, which it somewhat resembles. The fruits are deep and almost round, with a dull green exterior, changing as they ripen te a rich golden color, evenly and closely netted. The ribs are quite shallow. The flesh is of exquisite texture, rich and melting clear to the rind. It is a bountiful yielder, though the melons are net large, but for early family use, when delicious quality is the desideratum, we cannot too highly eulogize Hendersen's Newport (See cut.) 10c. pkt., 20c. oz., 60c. 14 lb., \$1.75 lb.

## wasa BANQUET. wasa

HIS superb melon represents years of careful selection and improvement of a stock of Musk Melon at the hands of the largest and most experienced grower of melons in the world. The raiser regards it as his greatest production and likely to supersede all other red-fleshed melons. "The Banquet" is a medium-sized inclon, flat at both ends and more beautifully netted than any known variety. In quality it has no equal; the flesh is uniformly deep and of that granulated character that always indicates a good melon; the color is a dark, rich salmen. It will produce more fine edible melons to a given area than any other variety. 10c. pkt., 15c. oz., 35c. ½ lb., \$1.00 lb.

For Water Melon Culture see page 11.

One ounce of seed for 30 hills; 4 to 5 pounds in hills for an acre.

SWEETHEART. A perfected form of the old "Ice Cream," possessing all of its good qualities and producing fruits much larger and handsomer in appearance and of most delicious (See Novelties, page 15.) 5c. pkt., 10c. oz., 20c. 1/4 lb., flavor.

SWEET SIBERIAN. Sent out by us last season as the New Water Melon No. 3. Water Meions are very largely cultivated in Southern Russla and this is the finest product of that section. Its most distinctive feature is the color of the flesh, which is a rich orange buff. There is no molon will ripen more fruits than rlch orange buff. There is no motion will ripen more truits than this variety. It is a splendld keeper, is extremely sweet, and according to the expressed opinion of one of the largest melon growers in the United States, is unsurpassed in this respect. (See Novelties, page 19.) 15c. pkt., 35c. oz., \$1.00 ½ lb.

ICE CREAM (White Seeded). This is one of the best for growing in the latitude of New York. In shape it is almost round;

the skin is light green, slightly mottled; flesh bright scarlet, and

very solid. Medium slze, and its delicious flavor leaves nothing to be desired. 5e. pkt., 10c. oz., 20c. 1/4 ib., 60c. lb.

MAMMOTH IRONCLAD. A large size; flesh deep red and of

rlch flavor, holding its fine quality very close to the skin. For shipping and keeping it is unsurpassed. 5c. pkt., 10c. oz., 20c. 14 lb., 55c. lb.

DIXIE. This variety has now been several years on the market

and has given universal satisfaction. It is a very prolific hearer, is unsurpassed for shipping purposes, and for private use, owing to its excellent flavor and brilliant color of flesh, is unexcelled. It is medium early in season. 5c. pkt., 10c. oz., 20c. ½ lb., 55c. lb. THE JONES. This is a splendid melon. The color of the skin is solid green, and the flesh is a very bright red, particularly

sweet, julcy and melting. It grows to large size, frequently attaining the weight of 80 pounds. In shape it resembles Kolb's Gem, and, like that variety, is one of the best shipping sorts. 5e. pkt., 10c. oz., 20c. 1/4 lb., 60c. lb.

JORDAN'S GRAY MONARCH. A magnificent variety of long

oval shape, attaining a tremendous weight under favorable conditions. The outer color is mottled gray. The fiesh is of a brilliant rosy red in color, of excellent, fine texture, thoroughly melting and of most delicious flavor. 5c. pkt., 10c. oz., 20c. 1/4 lb., 60c. lb.

KOLB'S GEM. Largely grown, particularly in the South, for shipment to northern markets. As a shipping melon it has hardly an equal. The fruit is nearly round; rind dark green, somewhat marbled with lighter shades. Weight, 25 to 50 pounds. (See cut.) 5c. pkt., 10c. oz., 20c. 1/4 lb., 50c. lb.

MOUNTAIN SWEET. Fruit oblong, dark green; rind thin; flesh red, solid and sweet. 5c. pkt., 10c. oz., 20c. 14 lb., 50c. lb. THE "BOSS." Oblong in shape, and of nearly the same diameter throughout. Skin very dark green, slightly mottled; flesh deep scarlet and of unusually rich flavor. Early, heavy, productive, and a good shipper. 5c. pkt., 10c. oz., 20c. 1/4 lb., 55c. lb.

CUBAN QUEEN. This is a large varlety, often welghing 80 pounds and upwards. The rind is marked with regular stripes of light and dark green. It is very showy, of fair quality, but an enormous cropper, and though it produces a good crop in midseason, it holds out to the last. A very reliable sort. 5c. pkt., 10c. oz., 20c. 14 lb., 55c. lb.

FLORIDA FAVORITE. One of the largest and best in cultivation. Being scopped days earlier than Kolb's Geom it will sue.

Being several days earlier than Kolb's Gem, it will succeed in a latitude far north of that popular variety. It attains an enormous size; the flesh is a beautiful clear crimson, extending close up to the rind, which is hard, thin and beautifully mottled light and dark green. The shape is oblong, the flavor is sweet and melting, making it one of the best in cultivation. (See cut.) 5c. pkt., 10c. oz., 20c. 1/4 lb., 60c. lb.

ITRON. Fruit round, handsome and small; used in making preserves only. 5c. pkt., 10c. oz., 25c. 1/4 lb., 70c. lb.

SEMINOLE. In shape, this is oblong, slightly tapering at the ends. One of the claims of the grower, which we have proved by testing, is that it is solid, ripening clear up to the rind. The flavor is excellent; in a word, it is one of the best. 5c. pkt., 10c. oz., 20c. ½ lb., 55c. lb.

THE VOLGA. It is perfectly round in shape, averaging about 15 pounds in weight. The skin is light green in color, slightly mottled this and very hard. It will succeed as far north as

mottled, thin and very hard. It will succeed as far north as Montreal. The color of the flesh is bright red and is of a deliclous melting flavor. (See cut.) 5c. pkt., 10c. oz., 20c. 1/4 lb.,

New Water Melon.

COLE'S

FARLY.

WATER MELON—continued.

most delicious and productive variety for the family garden, succeeding in Northern States, where Melons were never matured before.

COLE'S EARLY is positively the finest "all round" Water Melon in existence, and for the private family garden it is without a peer. People, particularly in our Northern States, who have never before been able to grow this most nectareous of fruits, can now enjoy from the beginning to the close of the scason the most delicious of all water melons, for COLE'S EARLY is not only the earliest variety in cultivation, but it continues to bear most bountlfully throughout the entire season.

The fiesh is of a beautiful bright rcd color, crisp, and extremely deilcate in texture—that granulated, cool. sparkling appearance that is so captivating to the eve In flavor it is lusciously sweet and refreshing, no pithlness or stringiness.

The meions are not large, seldom over 12 inches in length by nine inches in diameter, but what they lack in size is more than made up number and solidity. The heart is unusually large; there is little or no cavity, and very few seeds—all solid fiesh, the quality of ln number and solidity. which is sustained clear to the rind.

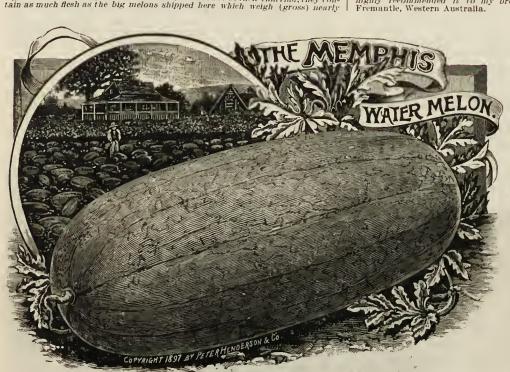

It can be grown, and successfully, too, over a larger latitude than any other water melon, and it will invariably mature large crops in any of the Northern States when the season is as long as that of New York. Price, 10c. per pkt., 20c. per oz., 35c. per 1/4 lb., \$1.00 per lb. (See cut.)

"Cole's Early Water Melon has attracted universal admiration. It has hither to been considered impossible to ripen water melons in Santa Fé, at an altitude of over 7,000 feet above sea-level, on account of the comparatively short summer here and cool nights, the thermometer never averaging over 60° at night even during July and August. From the package of seed 1 grew fitteen hills, that bore some sixty melons weighing from eight to fourteen pounds, and not a single melon failed to ripen fully, and several persons who tried them were manimous in pronouncing them excellent. Sweet, Juley and delicions, far superior to the big coarse melons we get from the South, on account of their thin rind, they contain as much flesh as the big melons shipped here which weigh (gross) nearly

double the weight of Cole's. I am informed that these melons were the only ones successfully raised in this place."—J. F. Wielandy, Santa Fé, New Mexico.

"I have been successful in growing Cole's Early Water Melon in my garden on the summit of the Shawangunk Mountains, at a measured elevation of 1,875 feet above sea-level. The melons matured, and were superior in flavor and sweetness to anything in the market. No melons were ever before matured in this neighborhood."—Mr. C. W. Durham, of 110 West 27th St., New York City.

"The Cole's Early Water Melon I had from you was a great success. I have highly recommended it to my brothers in Florida."—H. Ingram Rogers, Fremantle, Western Australia.

HIS variety came to us from the South very highly recom-mended. We have tried it for two seasons, and are giad to be able to endorse the claims made for its good qualities. It is very iarge in size, oblong in shape; the general outer coior ls paie, with markings somewhat resembling Seminole, but much boider in char-The flesh is brilliant red in color, remarkably crisp, solid, particularly at the heart, of delicious flavor and absolutely free from any stringiness.

Though of Southern orlgin, this variety succeeds well in our own trial grounds, and we have no doubt that it will be found successful in almost any section. We confidently recommend it to all our customers. (See cut.) 10c. pkt., 20c. oz., 40c. ¼ lb., \$1.25 ib.

Complete and Fconomical Garden may be secured at a saving

of 35% by purchasing our

Vegetable Seed Collections offered on

page 12.

WETHERSFIELD LARGE RED. A favorite sort for general erop. A large yielder and a good keeper. (See cut.) 5c. pkt., 20c. oz., 50c. 1/4 lb., \$1.70 lb., 5 lbs. and upward, \$1.60.

Extra Early Flat Red. A light-eolored Onion; good keeper; the

earliest of all. (See cut.) 5c. pkt., 25c. oz., 60c. 1/4 lb., \$1.90 lb.,

YELLOW GLOBE DANVERS. This is the standard variety everywhere, its uniform shape, bright yellow color and fine quality commending it to all. Yellow Globe Danvers is an excellent keeper and is one of the most desirable sorts for either the professional or a mateur gardener. (See cut.) 5e. pkt., 20e. oz., 50e.  $\frac{1}{4}$  lb., \$1.60 lb., 5 lbs. and upward, \$1.50.

ROUND YELLOW DANVERS. An early variety, good keeper and excellent market sort. Good size; has a thin yellow skin.
5c. pkt., 20c. oz., 45c. 1/4 lb., \$1.50 lb., 5 lbs. and upward, \$1.40.
YELLOW DUTCH, OR STRASBURG. A flat, yellow Onion; a good yielder, but not so desirable as other yellow sorts on

account of its color and shape. It is one of the heaviest croppers.

5c. pkt., 20c. oz., 50c. 1/4 lb., \$1.60 lb., 5 lbs. and upward, \$1.50.

WHITE PORTUGAL, OR SILVER SKIN. One of the leading

sorts of white flat Onlons. A most excellent keeper and good yielder. Largely grown for plekling. (See cut.) EASTERN-GROWN SEED ONLY, 10c. pkt., 35c. oz., \$1.10.1/4 lb., \$3.75 lb., 5 lbs. and upward, \$3.60.

#### HENDERSON'S FAMOUS GLOBE-SHAPED ONIONS.

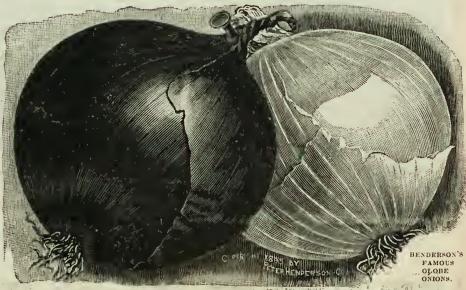

There is such a marked superiority in the Eastern-grown types of the Globe Onlons, commonly known as the Southport strains, over the Western-grown types that we have concluded to offer both types separately, so as to prevent any misunderstanding as to what is being offered by our competitors.

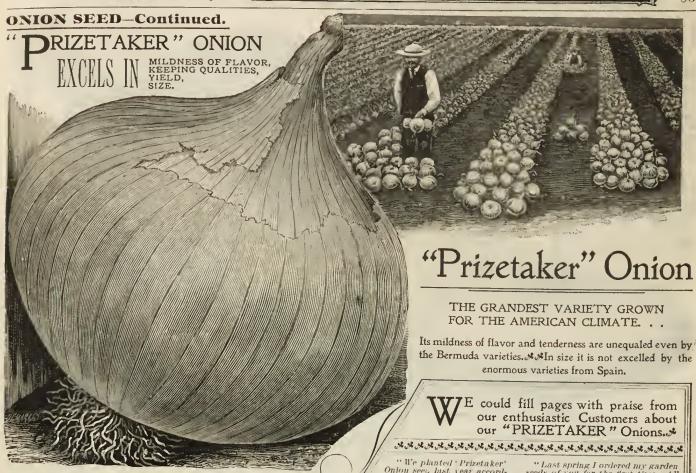

Onion Seed, especially the Southport varieties, is a shorter crop than for many years past. Prices are higher, in consequence. Beware of cheap imported seed.

SOUTHPORT YELLOW GLOBE. Same shape as White Globe; color yellow. An excellent keeper. Our stock of this is, perhaps, the finest in the country. (See cut.) EASTERN-GROWN SEED, 10c. pkt., 30c. oz., \$1.00 1 lb., \$3.00 lb., 5 lbs. and upward, \$2.90. Western-grown Seed, \$2.00 lb., 5 lbs. and upward, \$1 90.

SOUTHPORT WHITE GLOBE. Handsome globular Onion, of mild flavor; good keeper. One of the best. (See cut.) EAST-ERN-GROWN SEED, 10e. pkt., 40c. oz., \$1.25 1/4 lb., \$4.00 lb. WESTERN-GROWN SEED, \$2.75 lb., 5 lbs. and upward, \$2.60. SOUTHPORT RED GLOBE. With the

exception, perhaps, of some of the white varieties, there is no onlon that realizes such large prices as this, its beautiful globe shape and rich purplish erimson color making it extremely desirable. It is a'good keeper and of excellent quality. (See cut.) EASTERN-GROWN SEED ONLY. (See cut.) EASTERN-GROWN SEED ONLY. 10c. pkt., 35c. oz., \$1 00 \( \frac{1}{4} \) lb., \$3.75 lb., 5 lbs. and upward, \$3.60.

RIZETAKER" ...ONION...

HAS now been several years on the market and Is recognized as one of our best standard varieties. Rarely has any vegetable attained prominence

more rapidly. . . Nothing short of actual knowledge of this variety will convey a really adequate idea of its great value, whether considered as a variety for commercial or private culture. . . Its immense size will recommend it to all, particularly when it is known that its keeping qualities are good. The exterior color is pale yellow, and the interior clear sparkling white. . . Section of the part of the par

. . It is easily grown, medium early in maturing, mild in flavor. . . By sowing early in a sheltered spot and transplanting the young plants, it ean be grown to an Immense size.

PRICE, 10c. per pkt., 25c. per oz., 75c. per 1/4 lb., \$2.40 per lb., 5 lbs. and upward, \$2.30 per lb.

"We planted 'Prizetaker'
Onion see, list year according to instructions in your catalogue, I oz. for 100 feet of drill, we even added 20 feet to length of 10w, and the seed came up so thick that the thinning process grew tiresone. The young seedlings, however, were fine for the table, as not only our own family, but a dozen neighbors can testify. If all seed is like that planted last year, I oz. would be sufficient for 200 feet of drill, and then have thinning to do and tender young Onions for summer use."

Miss Louise Teagarden.
Waynesburg, Pa.

"Prizetnker' Onion is the greatest and best Onion that ever was raised. I raised one last year that was over 14 inches around it."

J. M. Gregory, Sunderland, Vt.

"Last spring I purchased ¼ lb. 'Prizetaker' Onion seed from you, and planted one-sixth of nn acre, and raised 185 lushels, and only 2 bushels of them unfit for Spanish Onion crates."

L. E. Brusson,
flymouth, Mich.

"Last spring I ordered my garden seeds of you for the first time. All proved satisfactory. The 'Prize-taker' Onion seed produced a non-derful crop. The senson here was very dry and yet some of the Onions measured IIV<sub>2</sub> inches in circumfer-ence. The warm full caused all other varieties to sprout and grow moreon ence. The warm fall caused all other varieties to sprout and growmore or less, but the 'Prizetaker' has not yet shown a green sprout. Mild in flavor, of large size and a good keeper, it surely is a perfect vegetable."

HIRAM COLLEGE,
HIRAM, Ohlo.

"I wish you could have seen my 'Prizetaker' Onions raised from seed hought of you last season. I raised at the rate of 1,450 bushelsper acre."

A. S. Parson,

Garden City, Kansas.

"By transplanting your 'Prize-taker' from hot bed last year I raised them 13½ inches in diameter, mention of which was unde in many of our Canadian pa-

## TABLE

GIANT WHITE GARGANUS (Sliver King). Single onions of this variety, grown from seed the first season, have weighed as much as 3 bs. It matures early, is a white-skinned and white-fleshed variety, in shape somewhat flat, and of an exceedingly mild and delicate flavor. 10c. pkt., 25c. oz., 70c. 1/4 lb., \$2.00 lb.

NEW MAMMOTH POMPEH (Red Garganus). Is a very fine

Italian variety. It has produced onions weighing 4 to 5 lbs. cach. The skin is a delicate red, the flesh is close-grained and nearly white. Is of a very mild flavor, and in sections where onions can be sown during autumn, this variety, if transplanted in April, will attain a larger size than any variety we know of. 10c. pkt., 20c. oz., 60c. 1/4 lb., \$1.75 lb.

GIANT ROCCA. Very large growing, globe-shaped variety, of a

reddish brown color; flavor, mild and sweet. 5c. pkt., 20c. oz.,

50e. 1/4 lb., \$1.50 lb. NEAPOLITAN MARZAJOLA. An early white, flat onlon of fine flavor. 5c. pkt., 25c. oz., 70c. 1/4 lb., \$2.00 lb.

HENDERSON'S ONION SETS.

WHITE BUNCH. A handsome white variety of vigorous habit, producing large, showy onions of fine quality. This is not a good keeping variety, but for bunching for sale, or using in the green state, it cannot be surpassed. 5c. pkt., 20c. oz., 60c. 1/4 lb., \$2.00 lb.

QUEEN. This is a very early onlon; small, flat, white, and mild-flavored. 5c pkt., 25c. oz., 70c. 1/4 lb., \$2.00 lb.

LARGE WHITE ITALIAN TRIPOLI. An excellent variety,

of quick growth and mild flavor. 5c. pkt., 20c. oz., 60c. 1/4 lb.,

\$1.75 lb.

LARGE RED ITALIAN TRIPOLI. This has the same characteristics as the White Tripoll; distinct in color, however. 5c. pkt., 20c. oz., 50c. 14 lb., \$1.50 lb.

ADRIATIC BARLETTA. A very early, small, pure white

DRIATIC BARLETTA. A very early, small, pure white variety, having a very delicate silver skin; flesh firm, and mild in flavor. Its great merit is its extreme earliness. For pickling purposes it is unexcelled. 10c. pkt., 25c. oz., 70c. 1/4 lb., \$2.25 lb.

Beware of CHEAP Seed of all kinds, especially Onion Seed, as the following will show:

"I raised more Onions from ½ lb. of your seed than one of my neighbors did from 1½ lbs. of Philadeiphia Onion seed." S. SMITH, Oswego, N. Y.

"My Onions from your Onion Seed are a perfect crop, both for size and quality, free from mixture. They are ripe now. There may be other seedsmen just as good, but I would hate to risk a change." ROBERT BIRCH, Plymouth, Mich.

ONION SETS.

Onion Sets we do NOT deliver free but will do so it 10c. per quart or 50c. per peck is added to the following prices:

Red, 25c. qt., \$1.25 pk. White, 30c. qt., \$1.50 pk. Yellow, 25c. qt., \$1.25 pk Potato Onions, 35c. qt., \$1.75 pk. Top, or Button Onlons, 30c. qt., \$1.50 pk. Shallots, 35c. qt., \$1.75 pk. Garlic Sets, 40c. lb.

OKRA, or GUMBO.

For Gulture see page 11.

The Pods, when young, are used in Soups, Stews, etc.

WHITE VELVET. The pods are round and smooth, and are much larger than those of any other Okra; are never prickly to the touch, and are produced in the greatest abundance. 5c. pkt., 10c. oz., 25c. 1/4 lb., 70e. lb.

Dwarf Prolific. Dwarf, very early. 5c. pkt., 10c. oz., 25c. ½ lb., 65c. lb. Improved Dwarf Green. 5c. pkt., 10c. oz., 20c. ½ lb., 50c. lb. Long Green. 5c. pkt., 10c. oz., 20c. ½ lb., 50c. lb.

LARGE BELL, or BULL NOSE. An early variety of mild flavor, a favorite for pick-ling and for use in the natural state. 5c. pkt., 25c. oz., 75c. ½ lb., \$2.50 lb. GOLDEN DAWN. Of same shape and size

as the Large Bell, but of more delicate flavor; color, yellow. 5c. pkt., 25c. oz., 75c. 1/4 lb., \$2.50 lb.

SWEET MOUNTAIN, or MAMMOTH. Slmllar to the Bull Nose, but larger and milder in flavor. Used to make stuffed "Mango" pickles. 5c. pkt., 25c. oz., 75c. 1/4 lb., \$2.50 lb.

HENDERSON'S COUNTY FAIR. The

best of all horn-shaped Peppers. It is par-ticularly sweet and mild, thicker in fiesh than any other sort and enormously productive. We know of no pepper equal to it in quality and productiveness. It is strikingly handsome, of medium size, very solld, and "meaty," entirely free from any bltlng or burning taste. (See cut.) 10c. pkt., 30c. oz., \$1.00 1/4 lb.

PEPPER RUBY KING. An exceedlngly large and handsome Pepper

of mild flavor; the fruits are of a bright ruby red, from 41% to 6 lns. long by 9 to 12 ins. in clr-cumference. It can be sliced for salad or eaten with salt and vinegar

llke tomatoes and cucumbers. (See cut.) 10c. pkt., 25c. oz., 75c. 14 lb., \$2.75 lb. CARDINAL. This Pepper is slightly

scimiter shaped, and is a glossy bright red color; 5 to 6 inches in length, being about an inch broad at the top and tapering to a point. Very sweet and thickfleshed. 5c. pkt., 40c. oz., \$1.25 \( \frac{1}{4} \) lb.

RED CLUSTER. Bears a profusion of red clusters of very thin, pungent peppers in an upright position. It forms a small, compact plant about a foot high. A single plant has been known to produce a thousand peppers. 10c. pkt., 30c. oz., \$1.00 ½ lb.

LONG RED CAYENNE. The variety of commerce. Pods small, cone-shaped; scarlet red when ripe. Qulte a late varlety; the pods are as frequently used for pickling green as when ripe. 5c. pkt., 25c. oz., 75e. 1/4 lb., \$2.50 lb.

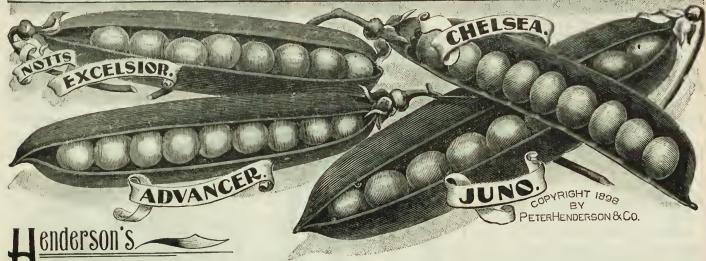

CHILI. Very small and prollife; generally used for making pepper sauce. 5c. pkt., 25c. oz., 75c. 1/4 lb.
CHERRY RED. Fruit round, searlet. 5c. pkt., 25c. oz., 75c. 1/4 lb.

For Pepper plants see page 175.

HENDERSON'S COUNTY FAIR PEPPER

'Succession" Gollection of Four Best Dwarf Peas...

THE varieties comprising this collection have been selected by us as the best of the dwarf wrinkled Peas from the Extra Early, Early, Medium and Lato maturing sections. None of them requires to be "brushed" or grown on trellis, and, in consequence, are particularly adapted for gardens where it is inconvenient to procure such supports. If sown at one time, and conditions are favorable, the first picking for the table can be made in from 5 to 6 weeks, and successive pickings from the 4 sorts will supply the table with luselous peas for several weeks after the first picking.

#### \*\* NOTT'S EXCELSIOR. \*\*

THE MOST VALUABLE OF ALL DWARF EARLY WRINKLED PEAS. SURPASSING IN EARLINESS, YIELD AND QUALITY.

This is an extra early dwarf wrinkled Pea, usually ready for table in 40 to 45 days from planting, only a few days later than the early round sorts. It grows about 14 inches high, or about half as tall again as the American Wonder. It is of vigorous constitution, and wonderfully productive. (See cut.) 10c. per ½ pt., 20c. pt., 30c. qt., \$1.50 peck. \$5.00 bushel.

#### \*\* McLEAN'S ADVANCER. \*\*

A second early variety, attaining a height of 2½ feet, a great favorite with growers in this neighborhood, among whom it is often known as the Dwarf Champion. It is a green wrinkled variety of fine flavor. (See cut.) 10c. per ½ pt., 20c. pt., 30c. qt., \$1.25 peck, \$4.00 bushel.

#### SS CHELSEA. SS

It grows about 15 inches in height and is of compact, short-jointed habit, thus requiring no brushing or staking. The pods are remarkably handsome, being gracefully curved and much longer than any other early dwarf kind. They are well filled, each containing 8 to 10 good-sized peas of exquisito quality, which, when cooked, are rich, sugary, and of marrow-like flavor. (See cut.) 10c. per ½ pt., 20c. pt., 30c. qt., \$1.50 peck, \$5.00 bushel.

#### \*\* "JUNO." \*\*

A DWARF MAIN CROP WRINKLED MARROW PEA. .

ENORMOUSLY PROLIFIC, SUPERB FLAVOR.

We have now had several years' acquaintanee with "Juno" Pea, and every year we esteem it more highly. It is a main crop variety, of vigorous constitution, which shows itself in the strong, handsome, branching plant. It is 2 feet in height, requiring little or no brushing. It produces an abundance of the finest peas possible, the vines being actually laden with pods. These are stout and heavy in form, very little curved, dark green, usually growing in pairs, containing from 7 to 9 peas of the finest quality, which so thoroughly fill the pod as to make it almost cylindrical in shape. The peas, too, possess the admirable merit of preserving their tenderness and superb flavor long after they are young, and also retain their attractive dark green color when served at table. (See cut.) 10c. per ½ pt., 20c. pt., 30c. qt., \$1.50 peck, \$5.00 bushel.

# Henderson's "Succession" Gollection of Four Best Tall Peas.

THE varieties comprising this collection have been selected by us as the best of the tall wrinkled Peas from the Extra Early, Medium and Late maturing sections. They require to be "brushed" or grown on treilis, but this is well worth the extra trouble, for tall peas are much more productive than very dwarf varieties. If sown at one time, and conditions are favorable, the first picking for the table can be made in from eight to nine weeks, and successive pickings from the four sorts will supply the table with juscious peas for several weeks after the first picking.

## \*HENDERSON'S NEW EARLY \* \* \* \* WRINKLED PEA, "PROSPERITY."

Introduced as No. 1897. (See cut and full description in Novelties, pages 20 and 21.) This is the carliest tail wrinkled or marrow Pea grown! Pianted at the same time as the earliest tail "round" or hard-shell Peas—such as Alaska, Daniel O'Rourke, etc.—it is usually ready for picking at the same time or within three or four days after. Reports show that "Prosperity" sown from the middle to latter part of April was ready for the table early in June. The advantage of procuring deliciously-flavored wrinkied or marrow peas, tender, melting and sweet, so early in the season is too apparent to need comment from us. "Prosperity" grows about 2½ feet filgh, is vigorous and robust; a large yielder of immense pods, filled with extra large and luscious peas. (See cut.) 15c. ½ pt., 30c. pt., 50c. qt., \$3.00 pk., \$11.00 bu.

### \*TELEPHONE. \* \*

A taii, wrinkled marrow, enormously productive and of the best quality. It is a strong grower, averaging eighteen pods to the stalk. The pods are of the largest size and contain six or seven large peas. A desirable sort for the family garden. Height. 4½ feet. (See cut.) 10c. ½ pt., 20c. pt., 30c. qt., \$1.40 peck, \$4.50 bush.

### \*AMERICAN CHAMPION. 🖋

The number of testimonials we received favorable to the American Champion Pea only confirms the high opinion we had formed of it in our trials before offering it for sale. It is one of the largest of all Peas, enormously productive, and its flavor and quality closely approach that of the well-known Champion of Eugland. The pods are produced in pairs and are well filled. Each pod contains from nine to twelve large, fine peas. It is a tall-growing sort, of branching habit; it should be sown thinly. Height, 4½ feet. (See cut.) 10c. ½ pt., 20c. pt., 30c. qt., \$1.75 peck, \$6.00 bush.

#### \* CHAMPION OF ENGLAND.

Aeknowledged to be the best of the late tall varieties. The pods and poas are of the largest size and excellent quality. (See cut.) Height, 5 feet. 10c. ½ pt., 15c. pt., 25c. qt., \$1.25 peck, \$4.00 bush.

#### DWARF EXTRA EARLY PEAS.

BLUE BEAUTY. Of a uniform height of 11/2 feet, so smooth and level in its growth that a row of it resembles a well-kept hedge. It is a blue, round pea, and is nearly as early as the American Wonder. In quality and flavor Blue Beauty cannot be surpassed. 10c. pkt., 15c. pt., 25c. qt.,

Beauty cannot be surpassed. 10c. pkt., 15c. pt., 25c. qt., \$1.00 peck, \$3.50 bushel.

Tom Thumb. Remarkably dwarf and early, of excellent quality. Height, 1 foot. 10c. pkt., 20c. pt., 30c. qt., \$1.50 peck, \$5.00 bushel.

\*AMERICAN WONDER. Better suited to the private than the market garden. Very early; extremely dwarf growth. Of the finest quality. Height, 12 inches. 10c. pkt., 20c. pt., 30c. qt., \$1.25 peck, \$4.25 bushel.

\*PREMIUM GEM. A very fine dwarf Pea of the Little Gem type, on which it is a great improvement. Height, 15

Gem type, on which it is a great improvement. Height, 15 lnches. 10c. pkt., 15c. pt., 25c. qt., \$1.25 peck, \$4.00 bushel. \*LITTLE GEM (McLEAN'S). A green wrinkied variety which comes into use a few days later than the First of All or Improved Daniel O'Rourke. 18 inches high, very prolific, and of exceilent flavor. 10c. pkt., 15c. pt., 25c. qt., \$1.25 peck, \$3.75 bushel.

> HORSFORD'S MARKET GARDEN PEA.

#### EXTRA EARLY PEAS OF MEDIUM HEIGHT.

HENDERSON'S FIRST OF ALL. This variety is unequalled for excellence, yield, size of pod and regularity of ripening. Height, 2½ feet, or fully six inches dwarfer than the Philadelphia Extra Early, and produces pods of good size, which are well filled with round, smooth peas of splendid flavor. It is a produced before and in the extrame earliness consists its diglous bearer, and in this last feature and in its extreme earliness consists its great value to market gardeners and truckers. At the same time we know of no other variety that is more popular than Henderson's First of Ail in private

no other variety that is more popular than Henderson's First of Ail in private gardens. This variety is sent out only in sealed packages and bags. (See cut.) 10c. pkt., 20c. pt., 30c. qt., \$1.00 peck, \$3.50 bushel.

IMPROVED DANIEL O'ROURKE. A favorite extra early variety. Height, 3 feet. 10c. pkt., 15c. pt., 25c. qt., \$1.00 peck, \$3.25 bushel.

\*LAXTON'S ALPHA. Of fine quality, very prolific; pods large and well filled. Height, 3 feet. 10c. pkt., 15c. pt., 25c. qt., \$1.25 peck, \$3.75 bushei.

ALASKA. The carliest blue Pea. The dark green color of the pods makes it extremely desirable, as it can be carried long distances without iosing color, which quality, combined with its earliness and uniformity of ripening, makes it a most desirable Pea for market gardeners. Height, 2 feet. 10c. pkt., 15c. pt., 25c. qt., \$1.00 peck, \$3.25 bushel.

### MEDIUM OR SECOND EARLY PEAS.

\*HORSFORD'S MARKET GARDEN. A grand wrinkled variety, coming in between Little Gem and Advancer. The vines are two feet high, very regular in growth. It is a prolific bearer, and has yielded more shelled peas per acre than any other American variety. The pods, aithough of medlum size, are numerous, and are literally packed with peas of a delicious sweet flavor. (See cut.) 10c. pkt., 15c. pt., 25c. qt., \$1.00 peck, \$3.25 bushel.

ABUNDANCE. A second carly variety, attaining a height of 3 fect. Pods, 3 to 3½ inches long, roundish and well filled, containing 6 to 8 large wrinkled peas of excellent quality. This variety is remarkable for branching directly from the roots. 10c. pkt.,

quality. This variety is remarkable for branching directly from the roots. 10c. pkt., 15c. pt., 25c. qt., \$1.00 peck, \$3.50 bushei.

FILLBASKET. This variety is one of the best second early Peas in cultivation; a heavy cropper; of excellent flavor. Height, 3½ feet. 10c. pkt., 15c. pt., 25c. qt., \$1.25 peck, \$4.00 bushei.

\*SHROPSHIRE HERO. SHROPSHIRE HERO. A robust grower, about 3 feet high, producing long, hand-some and well-filled pods in abundance. Flavor exquisite. We recommend it. 10c. pkt., 15c. pt., 25c. qt., \$1.00 peck, \$3.25 bushei.

\*THE ADMIRAL. The heavlest cropping second early Pea extant. Grows to a height of from 3½ to 4 feet; with a great profusion of pods from top to bottom of the vine. 10c. pkt., 15c. pt., 25c. qt., \$1.00 peck, \$3.50 bushel.

# PEAS, Medium or Second Early,

**HENDERSON'S** 

## == "HEROINE." = =

OUR GUSTOMERS WRITE OF IT:

"We much prefer the HEROINE." "The choice of all large-podded, wrinkled Peas."
"Peas large and very prolific, oftea 10, sometimes 12 peas to a pod."
"HEROINE Pea is a marvel." "Fairly melting in your mouth for sweetness."

Combines quantity and quality in a degree possessed by no other variety. The Heroine is a medium early, green wrinkled Pea, grows uniformly about two and one-half feet high and is literally covered with its long, heavy, pointed pods—in fact, so striking and distinct is this variety that it would be picked out at once in a field of one hundred other varieties. In the cut we show the size and form of the peas, which come eight or nine in a pod. The quality of this Pea is simply perfection—that rich, buttery, marrow-like flavor for which the peas grown in the gardens of Oid England are celebrated. (See cut.)

10c. pkt., 20c. pt., 30c. qt., \$1.25 peck, \$4.50 bushel.

THE GENUINE FRENCH PEA, "PETIT POIS." The genuine small French Pea. We have had frequent calls from customers for the real French Peas, such as they have eaten in Paris. This we have succeeded in getting. The pods are long and slim and contain 8 to 10 small peas of tender, delicate quality. The vines are vigorous and branching, attaining a height of from 3 to 4 feet. This varlety is medium early, and extremely proific. 10c. pkt., 20c. pt., 30c. qt., \$1.50 peck, \$5.00 bushel.

\*STRATAGEM. By many this variety is considered the best of the English Peas. It is a dwarf, wrinkled, blue marrow, a very heavy cropper, and

produces large, well-filled pods of excellent flavor. Height, 2 feet. 10c. ½ pt., 20c. pt., 30c. qt., \$1.50 peck, \$5.00 bushel.

The pods and foliage rich dark green; very hardy and prollife. The pods are very large, seimeter-shaped and packed close with good-sized peas of delicious, melting quality. This variety can be depended on for a main crop or late sort, giving large pickings of peas after all others are done. 10c. ½ pt., 20c. pt., 30c. qt., \$1.50 peck, \$4.50 bushel. BLACK-EYED MARROWFAT. An old-time favorite; large, hand-some pods; enormous cropper. Height, 5½ feet. 10c. pt., 20c. qt., 75c. pock. \$2.00 bushel.

75c peck, \$2.00 bushel.

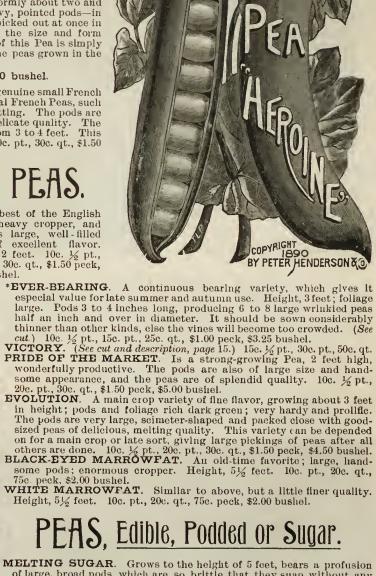

WHITE MARROWFAT. Similar to above, but a little finer quality. Height,  $5\frac{1}{2}$  feet. 10c. pt., 20c. qt., 75c. peck, \$2.00 bushel.

# PEAS, Edible, Podded or Sugar.

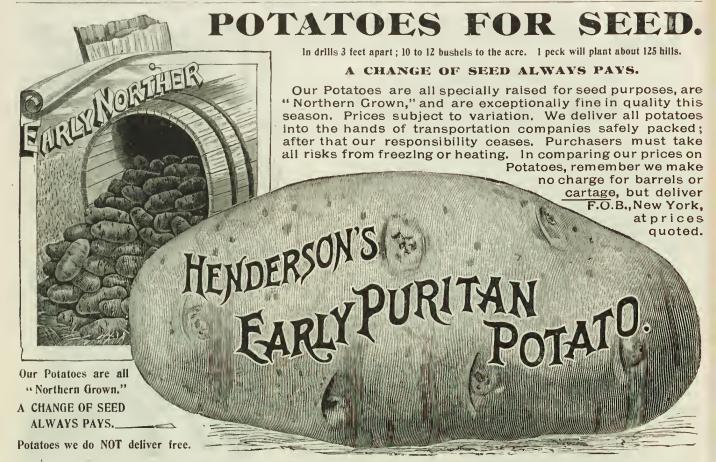

MELTING SUGAR. Grows to the helgit of 5 feet, bears a profusion of large, broad pods, which are so brittle that they snap without any string. It should be used in much the same way as a Wax Bean. The pods when cooked are very sweet and tender. 15c. pkt., 25c. pt., 40c. qt., \$2.50 peck.

VERY DWARF SUGAR. Unusually dwarf, very similar in habit to the American Wonder. The pods are beautifully crimped, are of unusual size for such a small-growing sort, and are of exquisite, melting quality. 15c. ½ pt., 25c. pt., 40c. qt., \$2.50 peek.

# ....VEGETABLE

## EARLY VARIETIES.

"EARLY NORTHER." Several days earlier than the Early Rose, and equally prolific; a most desirable sort. It is a strong, vigorous grower, and the pototoes are bunched well together in the hills. In shape it resembles the Early Rose; the eyes are few and shallow. Its table qualities cannot be excelled, cooking dry and floury, whether baked or boiled. Seems to do well everywhere. (See cut.) 60c. peck, \$1.75 bush., \$3.50 bbl.

"The Early Norther Potatoes I planted last spring have proved to be the best I have ever had, both in quantity and quality."

"Your Early Norther Potatoes I got of you last spring have done splendidly for me. I think them just perfect."

THE "BOVEE." (See Novelties, page 22.) 1 lb. 30c., 3 lbs. 70c., 5 lbs. \$1.00, postpald. If by freight or express, deduct 8c. per lb. \$1.25 peck, \$4.00 bush., \$8.00 bbl.

QUEEN. A grand potato of recent Introduction, closely resembling Beauty of Hebron in appearance, color, size and shape, but is much earlier and a heavier yielder. 60c. peck, \$1.75 bush., \$3.50

ROCHESTER ROSE. Of recent years the Early Rose has not done well in some sections. The Rochester Rose, which we now offer, is a seedling of the Early Rose, and is an improvement in every respect. It will average larger in size, is not quite so early, and is a much heavier yielder. 60c. peck, \$1.75 bush., \$3.25 bbl. HENDERSON'S EARLY PURITAN. One of the most valuable

early varieties, entirely distinct from all other early sorts, the skin being nearly pure white. It cooks dry and floury, and is unequaled in quality. Awarded the medal of excellence at the American Institute Fair. (See cut.) 60c. peck, \$2.00 bush.,

"From the one peck of Early Puritan Potatoes that I purchased from you last spring I dug IS bushels."
"In the spring I bought one peck of Henderson's Early Puritan Potatoes from you. They were planted on my Island Farm on April 1st and dug July 16th. The yield was 33 pecks. They are large, smooth, and could easily have been dug a month ago."

"Our potatoes from your Early Puritan were the very finest potatoes I have ever eaten. They kept finely, though every one around lost by rot."

EARLY OHIO. Tubers almost round; flesh solid; cooks dry and

mealy; very early. 60c. peek, \$1.75 bush., \$3.50 bbl.

EARLY ROSE. The leading variety for earlness, quality and productiveness. 60c. peek, \$1.75 bush., \$3.25 bbl.

BEAUTY OF HEBRON. One of the best early sorts; productive

and of excellent flavor; a good keeper; pure white skin and flesh. 60c. peck, \$1.75 bush., \$3.25 bbl.

CLARKE'S No. 1. Earlier than the Early Rose and very pro-

ductive. Cooks mealy. 60c. peck, \$1.75 bush., \$3.25 bbl.

### MEDIUM EARLY VARIETIES.

NEW IDEAL. Yields a very much heavier crop than any of the earlies; in fact, it outylelded several of the late potatoes. It is a handsome potato, having a pink russet skin; it is one of the best cooking or baking potatoes, the flavor being excellent; the vines are large, stocky and healthy; its keeping qualities are of the best. 60c. peck, \$2.00 bush., \$3.75 bbl.

RURAL NEW-YORKER No. 2. Large and smooth variety, of excellent quality; white skin and flesh, with few and shallow

60c. peck, \$1.75 bush., \$3.25 bbl.

CARMAN No. 3. A new seedling raised by Mr. Carman. It is of perfect form, even in dry seasons, almost every potato being of uniform size and shape, averaging nearly a pound each in weight. It has but few eyes, and they are very shallow. The skin and flesh are extremely white, no hollow or dark parts, and Its cooking qualities are exceptionally fine; a remarkably hand-some potato and enormously prolific. 60c. peck, \$1.75 bush., \$3.25 bbl.

CARMAN No. 1. Introduced five years ago and created a sensation on account of its very large size, uniform shape, handsome appearance and immense yield. Its cooking qualities are of a high order. 60c. peck. \$1.75 bush., \$3.25 bbl.

SIR WALTER RALEIGH." (See page 61.) 1 lb. 30c., 3 lbs. 70c., 5 lbs. \$1.00, delivered. If by freight or express, at parachaser's

expense, deduct 8c. per lb., or buyer paying translt, 75c. peck, \$2.50 bush., \$5.00 bbl.

MAIN GROP POTATOES "UNCLE SAM."

It is the handsomest Potato grown. ITS COOKING QUALITIES are Superior-WHITE, DRY AND FLOURY. 000

> A luxuriant, healthy grower, free from disease, blight, scab or rot. & & & & &

IT OUTYIELDS all other Potatoes nearly two to one! ITS SHAPE AND SIZE are wonderfully uniform...

"UNCLE SAM" possesses more desirable qualities than any other Potato. Its cropping qualities are phenomenal, and we believe it to be the heaviest yielding Potato known, not even excepting several varieties worthless in every other respect than their heavy eropping qualitles—varieties which produce coarse, waxy and unpalatable tubers. On clay or heavy soils "UNCLE SAM" is not a satisfactory Potato and Is apt to get coarse and unshapely, but on a loam

or sandy soil there is no Potato which will outyield it or give more satisfactory results. Its productiveness is largely attributable to or salely soft there is no rotate which will outyled it or give more sa isfactory results. Its productiveness is largely attributable to the uniform size of the Potatoes, nearly all sizing up alike, noue too large and few too small, but its crowning merit is its superb cooking qualities, which will ultimately place "UNCLE SAM" on every table where quality in Potatoes is appreciated. Its hand-some, pure white, floury appearance attracts the attention of all. It is a medium late variety, ripening along with Rural New-Yorker No. 2, and has most luxuriant foliage, completely shading the ground. The tubers are oval, with pure white russet skin, with very shallow eyes near the surface, and are so handsome in appearance and perfect in form that they will always bring an enhanced price upon the market. (See cut.) 60c. peck, \$2.00 bushel, \$4.00 bbl.

"I hought ten pounds of your 'Uncle Sam' and it has proved to be a good yielder with me. I have twenty-one bushels grown from the ten pounds of seed."

GUY W. CRAWFORD, Letcher, S. Dakota.

"We sent last year for three lbs. of your' Uncle Sam' Potato and were very much pleased with the result. We raised about seventy pounds from the three pounds."

but far more productive. 60c. peck, \$1.75 bush., \$3.50 bbl.

MRS. ROBERT BICKERTON, West Elizabeth, Pa

"I got three pounds 'Uncle Sam' Potatoes and I got ninety pounds last spring."

JONEPH EDGAR, Hopewell Center, N. Y.

"We are enjoying the nice pointoes. About eight bushels from the ten pounds of 'Uncle Sam."

C. L. QUIGLEY, Martinsburg, W. Va.,

"From the 'Uncle Sam' Potato of which I got three pounds, I dug two bushels, and would have had as many more but for an accident."

F. L. HUNTLY, New Hartford, Iowa.

LATE PURITAN. In the LATE Puritan we have a potato which is identical with the Early Puritan in appearance, color and quality,

"I got two pounds of your Late Puritan Potatoes last Spring and planted them. I have 1101/2 lbs.; some of them weighed over one pound." JOSEPH EDGAR. Hopewell Center, N. Y.

"If you are interested in hearing of your Late Purltan Potatoes, I am happy to say that not only have they outyielded everything in this part of the country and are first taking the place of the old standard varieties, such as White Star, etc., but also the consumers pronounce them the best potatoes they have ever used.",

E. D. KASSON, Gloversville, N. Y. A GRAND NEW\_ MAIN CROP POTATO.

CARMAN'S BEST.

THE ONLY SEEDLING OF THE WELL-KNOWN RURAL NEW-YORKER NO. 2 THAT IS BETTER THAN ITS PARENT.

The best of Mr. Carman's introductions, and Mr. Carman has raised some of the best and most popular varieties, notably the great pairs, Rural Blush and Rural New-Yorker No. 2, and the Carman No. 1 and No. 3. In most respects it closely resembles Rural

New-Yorker No. 2, but is more uniform and yields practically no small tubers, every one being market. able. It is from four to slx days later than the Rural New-Yorker; the color of the skin is the same, but the flesh is whiter and of better quality; in fact, it is the whitest-fleshed and finest-grained Potato, excelling even the Snowflake. It is unquestionably the best of its type, and will soon supersede all others for main erop. (See cut.)

FROM EDITORIAL COLUMNS:
"RURAL NEW YORKER," Nov. 5th, 1898:
"At present All things considered, we are inclined to regard
the 'Sir Walter Raleigh' as the best Potato we have ever tried."

Those who have tried our "Sir Walter Raleigh" Potato write: "I am of a decided opinion that 'Sir Walter Raleigh' will be the coming Potato for main crop. It has certainly far exceeded my expectations. I have grown all of Mr. Carman's Potatoes, and believe that in 'Sir Walter Raleigh' Mr. Carman has ex-celled all his previous efforts."

J. L. CONOVER, Wickatunk, Monmouth Co., N. J.

"The 'Sir Walter Raleigh' is a grent yielder; all large Po-tatoes, no small ones; vines grow strong and upright." C. W. BEARDSLEY, Milford, Conn.

"'Sir Walter Raleigh' is an immense yielder, of fine quality and very few small ones."

Si O. BENJAMIN, Aquebogue, Long Island, N. Y.

"I grew 'Sir Walter Raleigh' and 'Bovee' Potatoes last year. I have tried many kinds, but they are the best varieties I know. In both cases the yield was remarkable." JAMES HOOD, Chittenango, N. Y.

PRICE, 30c. 1b.; 3 lbs., 70c.: 5 lbs., \$1.00, Post or Express Paid. If by freight or express, at purchaser's expense, deduct 8c. per lb. PRICE, 75c. peck, \$2.50 bush., \$5.00 bbl.,

By express or freight at purchaser's expense.

# DISH.

1 oz. for 100 feet of drill; 9 to 10 lbs. in drills for an acre. For culture see page 11.

#### EARLY OLIVE-SHAPED VARIETIES.

FRENCH BREAKFAST. A great favorite; beautiful bright scarlet with pure white tip, ovai in shape, fine for open ground or forcing. 5c. pkt., 10c. oz., 20c. ½ lb., 60c. lb.

RED ROCKET. An old and tried variety introduced by us.

Shape is long-oval, color very attractive, very bright, flavor good. One of the very best early varieties. (See Novelties, page 21.) 10c. pkt., 20c. oz., 60c. ½ lb.

WHITE ROCKET. Very similar to Red Rocket, but is pure waxy white throughout. (See Novelties, page 21.) 10c. pkt., 20c. oz., 60c. 14 lb.
WHITE-TIPPED ROCKET. Has general appearance as two preceding, color

brilliant searlet with white tip; flavor delicious. (See Novelties, page 21.) 10c. pkt., 20c. oz., 60c. \( \frac{1}{3} \] lb.

YELLOW OVAL-SHAPED. A second early sort, uniquo in appearance, color is bright golden yellow, shape oval, but tapering at base. Very mild, and

Is bright golden yellow, shape oval, but tapering at base. Very mild, and remains tender for a long time. 5c. pkt., 10c. oz., 25c. 1/4 lb., 75c. lb.

OLIVE-SHAPED SCARLET. One of the oldest of this type, but very useful. Matures in 25 days, color bright, flesh is crisp and tender. A great favorite. 5c. pkt., 10c. oz., 20c. 1/4 lb., 60c. lb.

OLIVE-SHAPED WHITE. A white form of preceding. 5c. pkt., 10c. oz., 20c. 1/4 lb., 60c. lb.

1/4 lb., 60c. lb.

### WINTER VARIETIES.

These sorts should be sown about July 1st and thinned out to 6 inches apart.

HALF-LONG BLACK SPANISH WINTER. Greatly in demand in the New HALF-LONG BLACK SPANISH WINTER. Greatly in demand in the New York markets. A medlum long, heavy, densely colored sort, singularly mild in flavor, and is certainly the best black sort. 5c. pkt., 10c. oz., 25c. ½ lb., 75c. lb. ROSE CHINA WINTER. Bright rose color; flesh firm and plquant; oblong in shape; fine for winter use. 5c. pkt., 10c. oz., 25c. ½ lb., 70c. lb. LONG BLACK SPANISH WINTER. One of the hardlest and best for winter use. 5c. pkt., 10c. oz., 26c. ½ lb., 60c. lb. CALIFORNIA MAMMOTH WHITE WINTER. A white-fleshed Radish of excellent quality. 5c. pkt., 10c. oz., 25c. ½ lb., 75c. lb.

excellent quality. 5c. pkt., 10c. oz., 25c. 1/4 lb., 75c. lb.

CELESTIAL—Known also as White Chinese. The flesh is firm, solid and pure white, skin creamy white, and is very attractive in appearance. 10c. pkt., 15c. oz.,  $40c. \frac{1}{4}$  lb., \$1.00 lb.

1 oz. to 30 or 50 hills.

For culture see page 11.

We have given this variety a very thorough distri-CALHOUN. bution and wherever heard from it gave the highest satisfaction. The outside color is a creamy brown; the inside flesh is a deep salmon yellow; the flesh is wonderfully thick and fine-grained, and the seed cavity very small. It cooks very yellow and makes pies of a high, rich color and of the finest quality. 5c. pkt., 10c. oz., 30c. ½ ib., 75c. lb.

JONATHAN. A large bottle-shaped variety, with a crook neck;

of most attractive appearance. It is very prolific, and the flesh is flue, clear and sweet, making it valuable for pies and other table uses. Its hard shell makes it an excellent keeper. 5c. pkt.,

10c. oz., 25c. 1/4 lb., 60c. lb.

JUMBO. This is the variety to be grown where "the blggest pumpkin" ls wanted. We have seen specimens weighing 250 pounds. The color of skin is a deep yellow, the flesh being of & lighter shade. Notwithstanding its enormous size it is delicious in quality and generally desirable. 10c. pkt., 25c. oz., 50c. 1/4 lb., \$1.50 lb.

Large Tours, or Mammoth. Grows to an Immense size, often weighing over 100 lbs. 5c. pkt., 10c. oz., 30c. ½ lb., 80c. lb. Connecticut Field. Very productive; largely grown for feeding stock. 5c. pkt., 10c. oz., 20c. ½ lb., 50c. lb. SUGAR. This variety is smaller than the Large Field, but of finer grade connections are the suggestion of the connection.

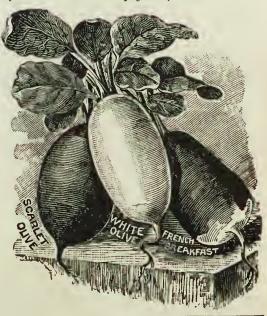

graln, sweeter and very prolific. 5c. pkt., 10c. oz., 25c. 1/4 lb., 60c. lb. LARGE CHEESE. A well-known variety, lts fine flesh and rich eolor making it valuable for pies and table use, while its productiveness renders it useful for stock-feeding. 5c. pkt., 10c. oz.,

20c. 16., 50c. lb. WINTER LUXURY. This we recommend as one of the best ple pumpkins; an excellent keeper and enormously productive. is very finely netted and ln color it is a golden russet. (See cut.) 10c. pkt., 15c. oz., 30c. 1/4 lb., 80c. lb.

ST. MARTIN'S. A new Scotch variety. It is immensely productive, one of the earliest, and has a rich spley flavor very slmilar to the gooseberry when used for pies or tarts. (See cut.) 10c. pkt., 50c. oz., \$1.75 ½ lb. ictoria. Very large, later than the Llnneus. 5c. pkt., 20c. oz.,

Victoria. 50c. 1/4 lb., \$1.50 lb.

Linnæus. Early and tender. 5c. pkt., 20c. oz., 50c. 1/4 lb., \$1.50 lb. (For Rhubarb Roots see page 175.)

Henderson's Seeds, etc., are genuine ONLY when purchased from us direct.

FOR GULTURE SEE PAGE 11.

Bush sorts, 1 oz. for 50 hills, 5 to 6 lbs. per acre. Running varieties, 3 to 4 lbs., in hills, for an acre.

#### =GROOKNEGK SQUASH.=

MAMMOTH BUSH SUMMER CROOKNECK. The crookneck class of Squashes surpasses in quality any of the summer varieties, and in the Mammorii we have the delicious buttery flavor of the original sort, but of just double the size. (See cut.) 10c. pkt., 15c. oz., 30c. 1/4 lb., 70c. lb.

YELLOW BUSH SUMMER CROOKNECK. A much-esteemed variety. The fruit is orange yellow, covered with warty exereseences. It is considered the best flavored of the summer varieties. 5c. pkt., 10c. oz., 20c. 1/4 lb., 55c. lb.

HENDERSON'S NEW "CREAM-COLORED" CROOKNECK. A new, beautiful and distinct variety of the old favorite Summer Crookneck. It has a compact, bushy habit, producing Squashes twice the size of the common sorts, the average length being eighteen inches to two feet, and they often weigh five and six pounds each. The cream-colored exterior is very attractive, Although so much larger than the old variety, it is equally early and very productive; flesh dry and of a most agreeable flavor, especially so when picked at the right time

able flavor, especially so when picked at the right time (as all Squashes of this class should be), before the shell has formed or can be broken by the thumb nall. Price, 10c. pkt., 15c. oz., 30c. 1/4 lb., 80c. lb.

> VEGETABLE MARROW. A favorite English sort. The fruit is very variable in size, from nine to eighteen Inches in length, and from four to six luches in diameter. Skin a greenish yellow, flesh white, soft and of rich flavor. This is entirely distinct from all other varieties of Squash. Plant eight feet apart. (See cut.) 5c. pkt., 15c. oz., 40c. 1/4 lb., \$1.00 lb.

EGETABLE MARROW BQUARD

Exceeds in size any of the scalloped sorts, frequently two

feet in diameter. A dark rich golden yellow. Quality excel-lent. It grows in bush form, wonderfully productive. 10c. pkt., 15c. oz., 30c. 1/4 lb., 70c. lb.

GALLOPED VARIETIES.

SQUASH. LONG ISLAND WHITE BUSH.

A selection of the old White

Bush Scallop, and a vast im-

provement, having loss prom-

inent ridges and being much

deeper, so that a single Squash actually contains

nearly twice as much weight

as the old sort. In addition to this, it is of finer quality

and very prolific. 10c. pkt., 15c. oz., 30c. 1/4 lb., 80c. lb. GOLDEN CUSTARD BUSH.

or

"PATTYPAN"

SILVER CUSTARD. A fitting companion to the Golden Custard Bush Squash. Grows to an immense size, often producing single Squashes 18 inches in diameter, of a delicate white color, and of finest quality. 1/4 lb., 70c. lb. Very productive. (See cut.) 10c. pkt., 15c. oz., 30c.

WHITE BUSH SCALLOPED. "Cymling." This and the Yellow Bush Scalloped are esteemed the carliest, and are grown almost exclusively for first crop. From the hard texture of the rind it is well suited for shipping, and they are grown exclusively at the South for that purpose. 5c. pkt., 10c. oz., 25c. 1/4 lb., 60c. lb.

YELLOW BUSH SCALLOPED. Differs from the white only in color.

5e. pkt., 10e. oz., 25e. 1/4 lb., 60e. lb.

## WHAT OUR .... of .. Henderson's Squash Seed.

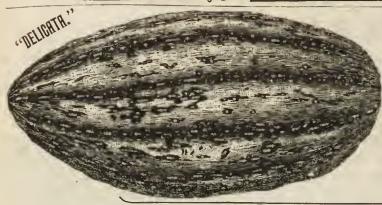

"The Mammoth Summer Crookneek Squash succeeded well with me, and pleased me so much that I would like to procure more of the same seed I received, if possible. This Squash is not only early, but of particularly good quality for a summer squash, and produces most attractive golden-orange Squashes; they would take a premium at any fur for their beauty, and besides they were the most vigorous and productive among seven or eight other varieties that T grew."

"Henderson's Delicata Squash is a wonderful Squash. It is one of the most deliclously fine-flavored Squashes I ever atc. Two hills of three vines each produced twenty sweet, perfect Squashes."

"I wish you could have seen the field of Hubbard Squash that I grew from your seed. It was a wonder to every one. Lots of people asked me where I got my seed. I told them of Peter Henderson of New York—that all my seeds grow just that way. I had a field of five acres of Hubbard Squash. They were immense in every way, the Squash running in size from 10 to 25 lbs. each."

MAMMOTH BUSH SUMMER CROOKNECK SQUASH

AUTUMN ANDSSS WINTER.

#### HENDERSON'S "DELICATA."

FOR BOTH SUMMER AND WINTER USE.

The Most Deliciously Flavored Squash Grown. . . . .... Dry, Sweet and Rich. Wonderfully Prolific.

HE exterior of this beautiful Squash is orange yellew, splashed and striped with durk green. The flesh is rich and dry; the quality is particularly fine. For private use we can recommend it as surpassing in richness of flaver any of the large, old-fashlened serts. The

Delicata is the earliest of any vine Squash that we have ever tested, and is se prolific that last season, from twelve hills of two plants each, 352 perfect Squashes were

gathered; it is ef small size, but this is a desirable feature as it is net tee large fer an erdinary family. the Summer Squashes, and for early use will doubtless supplant this class on account of its superior dry-

This variety is wenderfully solid and heavy, the seed eavities being very small; it is also extremely early, maturing about the same time as ness and ilavor, while its extreme selidity renders it fully as good a

"The Delicata is the best Squash for frying we ever tried, so sweet and dry."

keeper as any of the winter varietles. (See cut.) Price, 10c. pkt., 15c. oz., 30c. ½ lb., 70c. lb.

ESSEX HYBRID. This is not only one of the releast-flavored, finest-grained and sweetest ef all Squashes, but it is also one of the very best keepers that we knew of. Short eylindrical shape, having on the blossem end a small eap-shaped enlargement. The flesh is dry, sweet and thick, and of a bright orange color. Leng keeper. Those desiring a "dry" good-flavored Squash should grew ESSEX HYBRID. 5e. pkt., 10c. oz., 20e. 1 b., 60e. lb.

BOSTON MARROW. Secend early, service in about ten days after the

What our customers think of ...

"I cannot let another day go past without letting you know how we have enjoyed your Delicata Squash. I con-sider it one of the best Squashes ever sent out. It brings one in mind of the English Vegetable Marrow, only 50 per cent better. A good grower and good cropper."

"We tried your Delicata Squash last season and think they are far ahead of anything else in the Squash line. They are correctly named."

"I never enjoyed myself eating Squash as well as your Delicata Squash, so dry, so rich and so sweet. We have a few of them yet."

"The Delicata is the best Squash for frying we ever tried, so sweet and dry."

HENDERSON'S "DELIGATA."

coming in about ten days after the Bush and Creekneck serts. Skin yellewlsh, very thin; the flesh dry and fine-grained, and of unsurpassed flaver. 5c. pkt., 10c. oz., 20c. 1/4 lb., 50c. lb. HUBBARD. A general favorite and

mere largely grown as a late sort than any other; It is ef large size, often weighing frem nine te ten peunds. Celor bluish green, eccasionally marked with brownish crange er yellew. Flesh fine-grained, dry, and of excellent flaver. It can be had In use frem September te May. (See cut.) 5e. pkt., 10e. ez., 25c. ½ lb., 60e. lb.

HENDERSON'S TESTED SEEDS (Genuine only), Direct from New York.

HENDERSON'S EARLY PROLIFIC MARROW.

(3) EARLY PROLIFIC MARROW.

eemparatively new fall or winter variety of New England erlgin, but which has been very generally tested in different parts of the ceuntry; it is shaped somewhat like the Beston Marrew, but it is a deelded improvement on it, belng much earlier and more productive. These characteristics will commend the variety to market gar-deners, while its brilliant orange red coler and fine keeping and cooking qualities will make it popular with the consumer.

The rind is very hard but thin, and the flesh deep, fine-grained and of delicieus quality. (See cut.) Price, 5c. pkt., 10e. ez., 25c. ½ lb., 60c. lb.

MARBLEHEAD. An excellent variety resembling the Hubbard. The flesh is rather lighter in color than that variety, while its cembination of sweetness, dryness and delicieus flavor is remarkable. Its yield is equal to the Hubbard and its kealing with the statement of the second to the second second its leading with the second se

Hubbard, and its keeping qualities are better. 5c. pkt., 10c. ez., 25c. 1/4 lb.,

MAMMOTH CHILI. The largest of all Squashes, growing to an immense size—eften weighing ever two hundred pounds—while its rich, fine-flavored flesh insures its value for all purposes. Its size makes it valuable for stock feeding. (See cut.) 10e. pkt., 15e. ez., 35e. ½ lb., \$1.00 lb.

# ABLE

SPINACH.

loz. for 100 feet of drill; 10 to 12 lbs. in drills for an acre.

HENDERSON'S NORFOLK SAVOY LEAVED. In appearance the leaf is wrinkled in the same way pecullar to the Savoy Cabbage. Hence the name. It should not, however, be sown in spring in the latitude of New York, as it is almost eertain to run to seed if then sown. 5e. pkt., 10e. oz., 15e. 1/4 lb.,

THICK LEAVED. One of the best marketsorts. Produces large, thick, strong green leaf, somewhat erumpled, and possesses the valuable quality of standing a long time before running to seed. (See cut.) 5e. pkt., 10e. oz., 15e. 1/4 lb., 40c. lb.

## SWISS CHARD.

SILVER OR SEA KALE BEET.

This variety is grown for its leaves only; the middle of the leaf is cooked and served like Asparagus; the other portions of the leaf are used like Spinach. Cultivate about the same as Spinach by sowing the seed early in spring in drills about a foot apart. (See cut.) 5c. pkt., 10c. oz., 20e. 1/4 lb., 50e. lb.

#### Or OYSTER PLANT.

For culture see page 11.

WHITE FRENCH. 5e. pkt., 15e. oz., 35e. 1/4 lb.,

MAMMOTH SANDWICH ISLAND. new and Improved type, producing roots of nearly double the size and weight of the old varlety, and of equally good quality. It has been extensively grown for the markets of many of the large cities, entirely superseding the old sort. (See cut.) 10c. pkt., 20c. oz., 40c. 1/4 lb., \$1.00 lb.

## SCORZONERA.

Or BLACK OYSTER PLANT.

Culture same as Saisify. See page 11. 10e. pkt., 25e. oz., 75e. 1/4 lb., \$2.50 lb.

SPINACH (Continued).

VICTORIA. Valuable for spring sowing, its long-standing quality making it absolutely the best for that purpose. We have frequently seen other varieties go to seed, before this variety had made any sign of bolting; while Its attractive dark green color and hardy character make it practically an "all-seasons" Spinaeh. 5c. pkt., 10c. oz , 15c. ½ lb., 40c. lb. LONG STANDING. A valuable sort with a

most attractive eoior, and thick fleshy leaves; stands long before going to seed. 5c. pkt., 10c. oz., 15c. 14 lb., 35c. lb.

ROUND LEAVED. Generally entityated for

winter use, being very hardy, standing our severest winters without injury. 5c. pkt., 10c. oz., 15c. 1/4 lb., 35c. lb.

NEW ZEALAND. Produces leaves in great abundance throughout the summer; should be raised in heat and transplanted three feet apart each way into light rich soil. 5c. pkt., 10c. oz., 30c. ¼ lb., \$1.00 ib.

LARGE ROUND LEAVED VIROFLAY.

A newer sort with very large thick leaves. 5c. pkt., 10c. oz., 15c. 1/4 lb., 35c. lb.

PRICKLY. Although usually sown in spring and summer, it also stands well in winter, but

SKA KALE.

gives less bulk per aere than the others named. 5c. pkt., 10e. oz., 15e. 1/4 lb., 40e. lb.

## SEA KALE.

Cultivated for its blanched shoots, which are cooked as Asparagus. A supply may be had all winter, by planting the roots closely in a warm eellar before frost. (See cut.) 10e. pkt., 30e. oz., \$1.00 ½ lb., \$3.50 lb. For Sea Kale Roots see page 175.

#### SORREL.

BROAD LEAVED. Used for salads. 5c. pkt., 20e. oz., 40e. 1/4 lb., \$1.25 lb.

and have a beautiful velvety green lawn ready for cutting in from 6 to 8 weeks time. See page 190.

PURPLE TOP WHITE GLOBE. An early varlety, globe shaped, heavy eropper; in other respects similar to the Red Top Strap A handsome-looking bulb, and Is rapidly taking the lead

of all other varieties of early Turnip for market garden purposes. 5c. pkt., 10e. oz., 20c. 1/4 lb., 55c. lb.

RED TOP STRAP LEAF. Rapid grower and of mild flavor; the most popular variety for early use, either for the table or

for stock. (See cut.) 5c. pkt., 10c. oz., 20c. ¼ ib., 50c. lb. Early White Strap Leaf. Differs from the Red only in color. 5c. pkt., 10c. oz., 20c. ¼ lb., 50e. lb.

LONG ISLAND

IMPROVET RUTA BAGA. WHITE EGG. Its shape is nearly oval or egg; flesh very firm and fine-grained; thin and perfectly smooth skin, and both flesh and skin are of snowy whiteness. Its flavor is of the very best, mild and sweet. 5c. pkt., 10c. oz., 20c. ½ lb., 50c. lb. EARLY PURPLE TOP MILAN. The earliest variety in cultiva-

tion. The color is bright reddish purple above ground and clear white underneath. 5c. pkt., 10c. oz., 25c. ½ lb., 75c. lb. EARLY WHITE MILAN. (See Novelties, page 23.) 10e. pkt., 15. oz. 35c. ½ lb. dt. oz.

15e. oz., 35e. 1/4 lb., \$1.00 lb.

SCARLET KASHMYR. This variety is a "first early," small, rarely exceeding three inches in diameter; shape inclined to flat. The leaves are few and small. The outer color ls rich crimson scarlet, the Interior pure white; flesh crisp, tender, fine-grained and exceedingly solid. 10e. pkt., 15c. oz., 35e. ¼ lb., \$1.00 lb.

Early Snowball. A medium-sized, round, pure white variety of excellent flavor. For early sowing this is one of the best, being erisp, tender and sweet, maturing In six weeks from

tilme of sowing. (See cut.) 5c. pkt., 10e. oz., 20c. ½ lb., 60c. lb.

Early Flat Dutch. An excellent garden variety, resembling White Strap Leaf; the best variety for spring sowing. 5e. pkt., 10c. oz., 20e. ½ lb., 50c. lb.

GOLDEN BALL or ORANGE JELLY. This is the most distinct yellow Turnip we know.

The flesh is of very fine texture, making it one of the best table varieties. Its beautiful eolor and fine flesh have earned for it the synonym of "Orange Jelly," which well describes its appearance when ready for the table. The bulb is of medium size, with small tap roots,

its appearance when ready for the table. The bulb is of medium size, with small tap roots, and is early in maturing. (See cut.) 5e. pkt., 10c. oz., 20c. ½ lb., 60c. lb.

YELLOW STONE. One of the best and most popular yellow-fleshed varieties for table use; it is equally good for feeding stock. 5c. pkt., 10e. oz., 20e. ½ lb., 55c. lb.

YELLOW GLOBE. One of the best varieties for general crop; flesh very firm and sweet, and keeps well until late in spring; grows to a large size, and is excellent both for stock and table use. 5c. pkt., 10e. oz., 20e. ½ lb., 55c. lb.

Purple Top Yellow Aberdeen. Very hardy and productive, good keeper, globe-shaped and fine quality. 5c. pkt., 10c. oz., 20e. ½ lb., 55c. lb.

LONG WHITE or COW HORN. Matures very quickly; roots long, half above ground; flesh white, fine-grained and of excellent quality for table use. 5e. pkt., 10e. oz., 20e. ½ lb., 50e. lb.

#### RUTA BAGA, RUSSIAN or SWEDISH TURNIP.

Sow 2 to 3 lbs. per acre.

Long Island Improved. This is undoubtedly the finest variety of purple top Ruta Baga, and is purely of American origin. It is twice the size of ordinary American stocks. (See cut.) 5e. pkt., 10e. oz.,

25e. ¼ lb., 65e. lb. Large White French. A superlor variety for table or stock; flesh firm, white, solid and rich. 5e. pkt., 10e. oz., 20e. ¼ lb., 60e. lb.

Improved American. Very hardy and productive; flesh yellow, solid, sweet; good for stock or table use. 5e. pkt., 10e. oz., 20e. ½ lb., 55e. ib.
Laing's Improved. An excellent garden variety. 5e. pkt., 10e. oz., 20e. ½ lb., 50e. lb.

lto, possessing many good qualities. It follows close after Early Ruby, and is the first of its typo to ripen. Fruit is of medium size, very solld, and in color is purplish pink. 5c. pkt., 20c. oz., 60c. ¼ ib., \$1.80 lb.

THE MIKADO. Notwithstanding that It produces very large. frult, it is at the same time one of the very earliest to ripen The tomatoes are produced in immense clusters, are perfectly solid, generally smooth, but sometimes lrregular. The color is purplish red. Foliage distinct from any other variety. 5c, pkt., 25c, oz., 70c. 14 ib., \$2.25 lb.

DWARF CHAMPION. Most distinct and valuable. Dwarf, stiff habit, dark-groon follago, scarcely needing any support. It is very early and wonderfully prolific. Color same as Acme. It is perfectly round and smooth; of medium size.

5c. pkt., 25c. oz., 70c. 1/4 lb., \$2.25 lb.

"Please send me one ounce Dwarf Champion Tomato seed. I have found this to he the best tomato as to quality, I have ever raised up here. It is profific and early to ripen as well."

Henderson's Table Queen Tomato.

FAVORITE. Large and most perfect shape. Ripens evenly and early, and holds its size to the end of the scason. It is scariet in color, very prolific, has few seeds, solid flesh, and bears shipping long distances. (See cut.) 5c. pkt., 20c. oz., 60c. ¼ ib., \$1.75 ib.

TROPHY, EXTRA SELECTED. Saved only from specimens of perfect form. 10c. pkt., 25c. oz., 75c. ¼ lb., \$2.50 lb.

PEACH. Very distinct; fruit of uniform size, resembling a peach in shape, size bloom and color which is a deep evenes roce. 10c. pkt. 25c. oz. 75c.

size, bloom and color, which is a deep orange rose. 10c. pkt., 25c. oz., 75c. 1/4 lb., \$2.50 lb.

PERFECTION. IRFECTION. The fruit is almost round, ripens clear up to the stem, is solid and rich in flavor. The skin is both thin and tough, making it a good shipper, while its clear, bright scarlet color makes it most attractive. 5c. pkt., 20c. oz., 60c. 1/4 lb., \$1.75 lb.

ACME. Early, of medium size, perfectly smooth, very solid and a great earer. Color crimson, with a pinkish tinge. 5c. pkt., 20c. oz., 60c. ¼ lb., \$1.75 ib. GOLDEN SUNRISE. It has all the good qualities of the best red varieties and is of a beautiful golden-yellow color, making it invaluable for silcing and mixing with red varieties for table use. 5c. pkt., 25c. oz., 70c. ¼ ib., \$2.50 ib.

We can also supply the following standard varieties of Tomatoes, which are too weil known to need description, at the uniform price of 5c. pkt., 20e. oz., 65c. 1/4 ib., \$2.25 lb.:

PARAGON, STRAWBERRY, or WINTER CHERRY, THE LORILLARD, PEAR-SHAPED RED. IGNOTUM.

Favorite. Tomato.

The Grandest

Tomato Grown!

# ENDERSON'S PONDEROSA TOMAT

IT EXCELS IN MAGNIFICENT SIZE.

OF SURPASSING FLAVOR

For Slicing it has no Equal. As Solid and Meaty as Beefsteak.

ALMOST FREE FROM SEEDS.

The PONDEROSA possesses every good quality to be found in a tomato. The vines are strong and vigorous and easily earry their enormous weight of fruit. Its massive, ponderous fruits are almost perfect in form, and so free from ridges or corrugations as to seem nearly as smooth as glass; and when we come to size, weight and solidity, no other tomato begins to approach it. The skin is exceedingly firm, which will cause it to be largely grown for shipping purposes. The color, a rich crimson, permeates the fruit from elreumference to eentre, so that when slieed for the table its rare beauty never fails to elieit general admiration. Its remarkable solidity is happily expressed in one of our testimonlals, which says "that it is nearly as firm as an apple." A marked peculiarity of this variety is that it is almost seedless, and while this characteristic commends lts use to delieate persons, this same peculiarity makes us pay five times as much to have the seed grown as that of any other sort. Large fruits or vegetables are usually obtained at the expense of earliness, but here the PONDEROSA again at the expense of earliness, but here the FONDEROSA again steps in and floors our preconceived ideas on this point by demonstrating that it is as early as most of the older sorts whose only merit is that they are early. One patron writes that he had splendld tomatoes of the PONDEROSA in 96 days from sowing the seed. Its flavor is delicious, whether used raw or eooked. A canner

who grew it last year says it is going to be a grand sort for him. (See cut.) PRICE, 10c. pkt., 60c. oz., \$2.00 1/2 lb.

"I have been disappointed in the Ponderosa Tomato the last two years. I got the seed from other parties, and they are not like the ones I got from you. Please send me the true seed, and send as soon as you can."

"We have raised the Ponderosa Tomnto for several years and consider it the fluest Tomato ever raised. We have taken first premiums at the county fairs each year. The largest Tomatoraised by us weighed over 3 lbs." Mrs., M. H. Gilbert, New London, Wis.

A FEW OF THOUSANDS OF ENCOMPLINE

Henderson's Ponderosa Tomato.

ABOUT

"Ponderosa takes well to our climate. For size, solidity, flavor and general excellence nothing has ever been able to come near it in these colonies."

REV. J. BONGERS, Campbelltown, New South Wales.

Henderson's Ponderosa Tomnto is a splendid acquisition; hard to bent."
E. G. Kinsell, Green Spring Furnace, Md.

"I used the Ponderosa Tomato last season and found it to excel anything in the market. Ponderosa Tomato sells first in market." J. B. Smitu, Atlanta, Ga.

M. M. Munger, Secretary Pruit Growers' Association, brought in a basket of Tomatoes Monday morning, ten of which weighed 13 pounds. They were of the Ponderosa and Crimson Cushion varieties. He obtained the seed from Peter Henderson & Co. of New York: He informs us that not n drop of irrigation has been given the vines and no particular eare has been taken. He raised some tomatoes that weighed over two pounds."

Eureka Springs, Ark.

"We have planted your Ponderosa Tomato for two years and find it to be the best yielding and the threst Tomato we ever used, as well as the best keeping when canned, and find your seeds are all that they are recom-nended."

LUCY ELLER, AUXVASSE, NO.

"I have raised the Ponderosa for the last three seasons and have I have raised the Fondeross for the last three sensons and have had splendld success with them. I think they are far superior to any other, both as to size and quality. I have raised some of the finest I ever saw. I raise different kinds each year, but none that compare to the Ponderosa."

F. D. Swan,

Little M. C. Swan,

Pelliam, N. C.

MISCELLANEOUS FARM SEEDS.

Australian Salt Bush. A valuab forage plant on alkall solls.
25c. oz., \$2.00 lb.

Bean, Velvet. 75c. peck, \$2.50 bushel.
Celery Seed. For flavoring. 25c. fb.
Cotton, Sea Island. 15c. fb., 100 lbs. \$10.00.
Cotton, Upland. 15c. lb., 100 lbs. \$10.00.
Full list of ehoice named varieties of cotton mailed free on application.

WILD RICE (Zizania Aquatica). Mucb sought after, owing to its having attractions for waterlowl. 20c. lb., 100 lbs. \$16.00.

Australian Salt Bush. A valuable forage plant on alkall solls. 25c. oz., \$2.00 lb. Lupins, of Sorts. 15c. lb., 100 lbs. \$12.00. Ramie (Bohmeria or Urtica) Nivea. 50c. oz. Sainfoin. A very nutritious lodder plant, somewhat resembling clover. Thrives best on ilmestone solls. 12c. lb., 100 lbs. \$10.00.

Teosinte (Reana able fodder piant \$1.00 lb., 10 ibs.

luxurians). A valu-for hot ellmates. 90c.lb.

LONG ISLAND IMPROVED RUTA BAGA,

Vetch, Spring. (Viela Sativa.) Generally sown in mixture with oats for feeding green to cattle. 10c. 1b., \$2.75 bush. of 60 lbs.

**SUNFLOWER, LARGE RUSSIAN.** 10e. lb., \$2.00 bush., 100 lbs. \$7.50.

BUT WHEN SMALL QUANTITIES ARE WANTED BY EXPRESS OR MAIL, if 86. PET ID. is added to the prices.

Farm Seeds we do NOT deliver free,

#### ARM

# HENDERSON'S SPECIAL

#### WHAT OUR CUSTOMERS SAY:

#### IN MAINE.

I did not succeed in getting four tons or more per acre, but I did get more than from anything else, and it is splendid hay.—G. M. HOLMES.

#### IN NEW JERSEY.

The Special Grass Mixtures have been most successful, in spite of an unusually trying senson. Yielded a crap of huy mure than twice as great per acres the timothy, which I soured alongside at the same the timothy which I soured alongside at the same the timothy, which I sowed time.-R. V. LINDABURY.

#### IN IOWA.

Your Grass Mixture has done exceedingly well, especially in this year of drouth. It yielded about turies as much as timothy, and cattle seemed to do better on it.—W. WATSON.

#### IN NEW YORK.

Your Permanent Mixture is the finest piece of gruss anywhere about here. An old furmer told me last neek it would cut 3\(\frac{1}{2}\) times to the Archards.

#### IN VERMONT.

Your Grass Seeds are easily the best of any in the market, F. C. KIMBALL.

#### " IN RHODE ISLAND.

The forty-bushel sowing of Permanent Grass Seed which I purchased from you is to-day the best field of grass in Rhode Island.—BRADFORD NORMAN.

#### IN PENNSYLVANIA.

The green appearance of the field attracted universal attention. It has far surpassed clover and timothy in the amount it yields,—J. B. CUMMINGS.

#### IN VIRGINIA.

My manager is enthusiastic over your Mixture for Hay and Permanent Pasture. He claims this year he at 3 tons per acre the first cutting, 13t to the second, and will cut 2 tons the third. The field is a grund sight; people come for miles around to see it.—EDWARD E. BANNEY.

#### IN CONNECTICUT.

There is a decided contrast between Timothy and your Special Grass Mixture for has in favor of your Mixture, which is the best field of grass I ever suc,—C. R. FISHER.

#### IN OHIO.

The Special Grass Mixture has given us the very best of satisfaction; it produced the finest piece of grass I ever saw and has given us a large amount of hay and pasture per acce.—W. J. HAYES.

We are headquarters for all kinds of

#### RECLEANED GRASS SEEDS,

And have made the subject of Hay and Pasture a special study. We invite corre-spondence, and will advise the best grisses to use and make up special mixtures where

#### FOR HAY AND PERMANENT PASTURE

WILL LAST TWENTY YEARS WITHOUT RENEWAL,

Consisting of the following varieties: Orchard Grass, Meadow Foxtail, Sheep's Fescue, Rhode Island or Creeping Bent, Hard Fescue, Sweet Scented Vernal (True Perennial), Meadow Fescue, English Rye Grass, Italian Rye Grass, Red Top, etc., as recommended in our book, "How the Farm Pays," blended in proportions which, we have found from actual use, give the most satisfactory weakly. actual use, give the most satisfactory results.

On ordinary fertile soil 3 bushels of this mixture is sufficient to seed an acre, but where the land is poor a larger quantity will be necessary. Taking one soil with another a fair average

would be 3 bushels to the acre.

For Hay and Permanent Pasture for Light soils..... Medium soils.... Heavy soils .... " Orchards and Shady Places.....

" Hay only. Specially recommended for large hay crop Pasture only. Will stand close eropping without

injury.....

\$2.50 per bushel of 14 lbs.

20 bushel lots, \$2,45 per bushel. 66 50 2.40 100 2.35

To these mixtures, intended for either Mowing Lands or Pasture (but which on account of their greater weight should be sown separately), are to be added 10 lbs. of Mixed Clovers, comprising White, Manimoth Percinial or Cow Grass, Alsike, Trefoll, etc., but these should only be sown in the spring, as they are rather tender in this latitude if sown in the fall.

FULL DIRECTIONS FOR SOWING ENCLOSED IN EVERY BAG.

The quantity needed (10 lbs.) of MIXED CLOVERS to sow an acre we will sell for \$2.00.

#### OPINIONS OF THE PRESS.

Country Gentleman says: "Below the taller grasses was a thick mat of finer kinds, and the close, rich tarf hid every particle of soil."

American Agriculturist says: "Such mixtures are far superior to Timothy, or 'Timothy and Clover,' or any one grass, costing but a little more, lasting much longer, and giving frequently more than double the yield."

Farm and Home says: "The enormous yield of nearly four and one-half tons of good hay per acre should convince any one that more hay and better pasture can be grown with mixtures than with Timothy and Clover alone, as under the very same conditions the latter yielded less than a ton and a half per acre."

How the Farm Pays says: "Far in advance not only of Timothy but of any other Grass we have thus far in cultivation."

At our Farm one of these Mixtures yielded (first cutting, 5,888 lbs.; second cutting, 4,320 lbs. per acre) a total of 10,208 LBS. CURED HAY PER ACRE, while Timothy growing alongside under same conditions yielaed only one cutting of 2,400 lbs. per acre.

At first sight, \$7.50 to \$10.00 per aere appears to be a high price for the seeding of a pasture, but bear in mind that it is a permanent pasture that we have in view, and nowhere ean a permanent pasture be laid down properly for a less original outlay than that we name.

FARM SEEDS WE DO NOT DELIVER FREE.

COMPLETE LIST OF

# GRASSES AND CLOVERS.

Prices subject to variation. Special quotations for large quantities.

For full description see "Henderson's American Farmers' Manual," free on application.

At the World's Fair we received over thirty medals and awards, fourteen of which were granted to Grasses and Clovers for superior quality and purity of sample.

A FARMER who pays little attention to the selection of Timothy, Clover and other grass seed, but buys

ITALIAN RYE GRASS

from country merchants (who, however well-intentioned, seldom have sufficient expert knowledge in this matter to protect their customers), will in a few years invariably find that he is growing more weeds than grass, and naturally concludes farming is a failure. On the market there is a much larger quantity of foul than of pure seed which will find its way to the farmer through some channel, the ultimate results of which must be appalling.

Besides offering Grass Seeds and Clover by the lb., 100 lbs. and bushel, we give the standard weight per bushel.

# <u>The "Henderson" Ensilage combination</u>

A GOLD MINE ON EVERY DAIRY FARM.

Corn is undoubtedly the most serviceable crop that has been used for ensilage, but however well preserved in the silo, it is an incomplete food for cattle. Its carbohydrates or heat-producing parts are proportionately in excess of its albuminoids or flesh-forming parts.

in excess of its albuminoids or ficish-forming parts.

The farmer has in the past, at the expense of his purse, supplied the deficiency by feeding grain grown on the farm, or by buying oil cake, cotton-seed meal or other feed rich in albuminoids. This expense can be avoided by using The "Henderson" Ensilage Combination, which is composed of two parts Fodder, Corn or Japanese Millet to one part Early Soja Beans. An equal acreage of each will produce about the right proportion, and the mixture may be made at time of cutting the fodder and filling the silo.

Mixed in the above proportions it is a complete balanced ration for

and filling the silo.

Mixed in the above proportions it is a complete balanced ration for milch cows without the addition of grain or other purchased feed. It will mean a saving to the farmers of hundreds of thousands of dollars, and will revolutionize dairying in the Northern States.

No up-to-date dairy can be profitably operated without a silo, and no silo should be filled with corn alone while the Early Soja Bean can be grown in special of the United States.

any part of the United States

The Soja Beans and Japanese Millet are offered on this page; the Fodder Corn on page 75.

#### FIELD BEANS AND

FOR FODDER AND GREEN MANURING.

PEAS FOR FODDER.

PEAS FOR FODDER.

Peas could be made to bring more nitrogen to the sons of this country every year than is now purchased annually by the farmers at a cost of millions of dollars."—(Yearbook of the U.S., Department of Agriculture.)

For the Northern States there is more neplected, which can only be attributed to a lack of knowledge as to its merits. Whether for fodder, in mixture with oats, sown at the rate of two bushels each per acre, or the Peas sown alone at the rate of three bushels per acreior plowing under, there is no crop that we can so strongly recommend for more extended culture.

Like all leguminous crops, Peas have the power of extracting uitrogen from the air, and the soil from which a crop of Peas has been harvested is richer in nitrogen than before the Peas were sown upon it, and there is no kind of live stock on the farm to which Peas and Oats in mixture cannot be fed with positive observers. Peas and Oats in mixture cannot be fed with positive advantage,

The Mummy. Very heavy cropper, \$2.00 bushef; 10-bushef lots, \$1.85 bushef.

Large Marrowfat. Of immense growth, the best of the Field Peas for fodder. \$1.60 bushel; 10-bushel lots, \$1.50 bushel.

Canada White. (See cut.) 50c, peck, \$1.40 bushel of 60 lbs.; 10 bushel lots, \$1.30 bushel.

Canada Bine. 50c. peck, \$1.50 bushel of 60 lbs.; 10-bushel lots, \$1.40 bushel.

Cow Peas. Of great value in the Southern States and also in the Northern States as a green summer feed for sheep, and as a green crop for plowing under. \$2.00 bushel of 60 lbs.; 10-bushel iots, \$1.90 bushel.

# the South is too late to be of value in the Northern States, This variety ripens even in Massachusetts, where it grew nearly four feet in height, was heavily podded and yielded over ten tons per nere. It is a very valuable fodder variety either for feeding green or for the silo, It is a rich uitrogenous feed, is unsurpassed as a feast former, and, like the Clovers, is a soil improver, deriving its nitrogen from the air. (See cut.) 15c. ib., \$1.25 peck, \$4.00 bushel of 60 lbs. Boston Small Pea. \$1.00 peck, \$3.00 bushel of 60 lbs. Burlingame Medium. \$1.00 peck, \$3.00 bushel of 60 lbs. White Marrowfat. \$1.00 peck, \$3.50 bushel of 60 lbs. Improved Red Kidney. Improved Red Kidney. Improved Red Kidney. NARE DWARF ESSEX RAPE.

Under favorable conditions Rape is ready for pasturing sheep or cattle within six weeks from time of sowing, and on an average one acre will carry twelve to ifficen sheep six weeks to two months. When on the Rape they should at all times have access to sait; but water is not necessary. In the Northern States it should be sown from May to the end of August for fall pasturing, but as it thrives best in cool weather, it should not be sown in the Southern States until September or October for winter pasture. In the latitude of New York, July or August is the best time to sow. Its fattening properties are probably twice as good as those of Clover, and for sheep the feeding value of Rape excels all other plants we know of. Sow 4 lbs. per acre broadcast, 2 to 3 lbs. per acre in drills. (See cut.) 10e. lb., \$4.00 bushel of 50 lbs., 100 lbs. \$8.00. If by mail, add 8c. lb.

#### SAND OR WINTER VETCH. (Vicia Villosa.)

Is perfectly hardy throughout the United States, remaining green all winter, and should be sown during August and September, mixed with Rye, which serves as a support for the plants, or in spring with Oats or Barley.

It grows to a height of 4 to 5 feet and is the earliest erop for cutting, being nearly a month earlier than Scarlet Clover, and a full crop can be taken off the land in thue for planting spring crops. Being much hardler than Scarlet Clover, this is the forage plant to sow in the Northern States where Scarlet Clover winter kills, though it is equally valuable in the Sauth. valuable in the South

valuable in the South.

It is exceedingly nutritious, much more so than Clover, is enten with relish, and may be fed with safety to all kinds of stock.

Sow one bushel per acre with one-half bushel of Rye or Wheat. (See eut.) 10c. lb., \$1.25 peck, \$4.00 bushel of 60 lbs., 100 lbs. \$6.00. If by mail, add Sc. per lb.

#### MILLET.

German or Golden. 10c, lb., 100 lbs. \$3.00, \$1.50 bushel (50 lbs.); 10-bushel lots, \$1,40.

\$3.00, \$1.30 bushel (30 lbs.); 10-bushel lots, \$1.40.

Hungarian, 10c, lb., 100 lbs. \$2.75, \$1.40 bu, (48 lbs.); 10-bushel lots, \$1.30.

Pearl, 12c, lb., 100 lbs. \$10.00.

Japanese. Sown from middle of May to end of July brondeast at the rate of 12 lbs. per nere, or in drills 8 lbs. per acre, it will grow 6 to 8 feet in height and yield 12 to 20 tons per acre, it unay be siloed, fed green or cured into hay, and its feeding quality is superior to fodder corn. Ensilage composed of two parts of this Millet to one part of Soja Beansisa complete balanced ration for milde cows without the addition of grain. (See cut.) 10c, lb., 10 lbs. 80c, 100 lbs. \$7.00.

SORGHUM. For full descriptions see Henderson's American Farmers' Manual, free on application. Price Price per lb. 100 lbs.

Early Amber Sugar Cane.
One of the most valuable forage plants, and will yield several cuttings a season.

#### FODDER CORN.

Southern Horsetooth. Specially adapted forensilage, \$1.20 bush.; 10 bush. lots, \$1.10 Improved Early Horsetooth. Being aearly two weeks earlier, this variety is better adapted for fodder and ensilage in the Northern States. \$1.30 bu.; 10 bush. lots, \$1.20 bu. Eural Thoroughbred, Suckers and branches, yields heavily, early. \$1.50 bush.

es, yields heavily, early. \$1,50 bush. Sweet Fodder. \$1.75 bu.; 10 bu. lots, \$1,60 bu. AND CONTRACTOR OF THE PROPERTY 

#### FIELD CORN.

15c. qt., 50c. peck, \$1.60 bush.; 10 bush. lots, \$1.50, except where noted.

#### DENT VARIETIES.

Early Butler. A well-known very early variety. Henderson's Eureka. A grand aew midseason variety. Safe to plantin latitude N.Y. City. Enormous cropper, ears perfect; result of 20 years' selection by one of the best farmers in Pean., who takes a pride in his corn. (Seecut.) 20c. qt., 75c. peck, \$2.50 bushel.

**Bickory King.** Largest grains of any white corn, with extremely small cobs.

Early Mastodon. Early, with very large ears. Extra Early Huron. The earliest Dent.

Golden Beauty. Surpasses all in size and appearance.

Hundred-Day Bristol. Large enr, early and

Queen of the Prairie. The ears grow 8 to 10 inches in length, 12 to 14 rows. Improved Leaming. Of good size, cob small.

with large grain. White Cap Yellow. Early, large and a very heavy cropper.

#### FLINT VARIETIES.

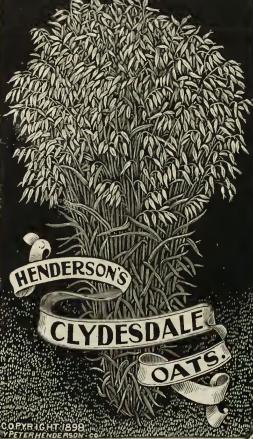

King Philip. Reddish copper-colored grala. Longfellow. The largest yellow field corn, safe to plaat in the latitude of Massachusetts. Compton's Early. Very early and prolific.

White Plint. Handsome, large ears.

Large Yellow Flint. Very productive and of good quality.

FLLMAN FIFE

SPRING WHEAT

#### BUCKWHEAT.

Japanese. (latroduced by us.) Distinct and superior to all other varieties. (See cut.) \$1.30 bush.; 10 bush. lots, \$1.20.

#### BARLEY.

White Hulless. Sow at the rate of 1½ bush, per acre. It is two or three weeks earlier than ordinary Barley, grows about the same height, and will not shatter in the field even if very ripe. The grain is not unlike Wheat, and weighs about 60 lbs. per bu. 75e. pk., \$2.00 bu. of 48 lbs.; 10 bu. lots, \$1.80.

Vermont Champion. Two-rowed, early and prollife. 50c. peck, \$1.60 bu.; 10 bu. lots, \$1.50.

Two-rowed Duck Bill. 50c. peck, \$1.60 bush.; 10 bush. lots, \$1.50.

Spring. An excellent catch crop when the fall-sown has been winter-killed. \$2.00 bush.; 10 bush. lots, \$1.85.
Winter. Prices on application.

A change of Seed Oats is quite as necessary as a change of Seed Potatoes, and stock should be renewed at least every second or third year.

Oats grown on the same soil or la the same adighborhood, year after year, soon become light, chaffy and unprofitable.

light, chaffy and unprofitable.

HENDERSON'S CLYDESDALE. (Imported.) The grandest White Oat in cultivation, weighing 50 lbs. to the bushel; very early nad productive. We offer these oats for sale at 50 lbs. per bush., exactly as grown for us, so that those purchasing will actually receive for every bushel over one and one-half bushels, according to the American standard. (See cut.) \$1.00 peck, \$2.50 bush. of 50 lbs., 3 bushels for \$7.00; 10 bush. at \$2.25 per bush.; 100 bush. at \$2.15 per bush.

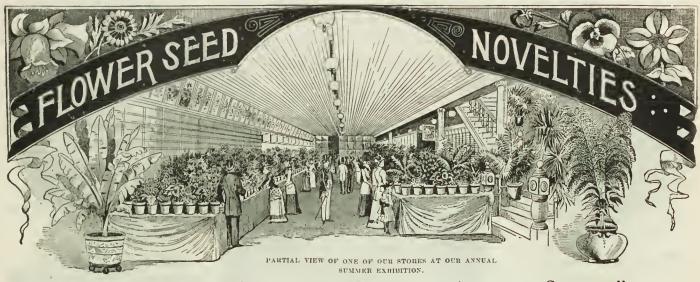

AMERICAN - GROWN CLYDESDALE. Thoroughly recleaned, and greextracholce and

\*\*AMERICAN - GROWN CLYDESDALE.
Thoroughly recleaned, and arrextracholee and heavy, free from all fonl seeds and light and imperfect grains. \$1.20 bush. (32 lbs.); 10 bush. at \$1.100. PROBSTEIEE. A leadlag white variety. It is very productive and henvy, and straw very strong. 85c. bush. (32 lbs.); 10 bush. at 80c.; 100 bush. at 75c. BLACK TARTARIAN. The most prolific Black Oat. Early, long and strong-strawed. 40c. peck, \$1.00 bush. (32 lbs.); 10 bush. at 40c. LINCOLN. It is early and less susceptible to rust than any other. \$1.00 bush. (32 lbs.); 10 bush. at 90c.; 100 bush. (32 lbs.); 10 bush. (32 lbs.); 10 bush. (32 lbs.); 10 bush. at 90c.; 100 bush. at 85c. WHITE RUSSIAN. Grain plump and heavy, leads large, straw stout, stools freely. 90c. bush. (32 lbs.); 10 bush. at 85c.; 100 bush. at 80c.
WINTER OATS. 40c. peck, \$1.15 bush. (32 lbs.); 10 bush. at \$1.10.

Prices of all Farm Seeds subject to change without notice.

## NOVE SEED

#### Adenophora Potanini.

Lovely new shrubby Campanulacea, producing elegant and slender flower-spikes, 2 to 3 feet in height, during the months of July and August, which are garnished with numerous, large, bell-shaped flowers, 1¼ inches in diameter and of a beautiful light blue color. Spiendid new hardy perennial.

Pkt. 25

#### Agrostemma Hybrida Walkeri.

#### Ajuga Metallica Crispa.

This novelty excited the admiration of all visitors to our grounds. It is distinguished by most percuishing eurled foliage, distinctly observable in the illustration. The very dwarf, regular, compact habit in combination with the curious and beautiful structure of the dark green leaves with a metallic gloss, fand-the short pyramidal-shaped flower-stalk closely set with small flowers of a beautiful ultramarine-bine, edges, a decrease determing appearance to the alput. Worderful set with small flowers of a beautiful ultramarine-blue, give a charming appearance to the plant. Wonderful effects are obtained with this novelty in forming carpet-beds, borders, etc., especially when in bloom. Height of plant and flower-stalk about 4 to 5 inches. The seed is sown in pots or in the frame, the seedlings transferred to small pots, and fater on planted in the garden at a distance of from 3 to 4 inches apart. Comes quite true from seed. (See cut.)........Pkt. 25

#### NEW ANEMONES.

"St. Brigid." These beautiful Irish Poppy-flowered

#### NEW BALLOON VINE.

(CARDIOSPERMUM HIRSUTUM.)

A very pretty and graceful annual elimbing plant; from seed sown early in the house and transplanted to the open in the month of May, they reach a height of about 18 to 25 feet; the flowers are fragrant and hang in white bunches. But it is most interesting on account of its 'triangular hillated seed pods, which resemble winged balloons.

## Asparagus Sprengerii.

#### NEW BALSAMS.

#### Barbieria Glabella.

NEW BEGONIAS.

Double Vernon. The Single B. Vernon has been favorably known for several years as a showy bedding or pot plant, compact, leafy and a free bioomer, both foliage and llowers being of a rich metallic red when grown in the warm sunlight. This new variety with double flowers is a great acquisition. About 50 per cent. will come double.

Pkt. 25

#### Bidens Atrosanguinea Superba.

#### Browallia Jamesoni.

A charming plant for the cold greenhouse, well branched with numerous leaves, which are oval and of a deep shiny green, producing clusters of large flowers of purplish orange of splendid effect.....Pkt. 25

#### NEW GIANT CARNATIONS.

Chaband's Giant Fancy, Perpetual Flowering. Mixed Colors. Have been produced by Monsienr B. Chaband, the famous French. "Carnatlonist," who has done more to improve this class of flower than any one in the world, and these, his latest and best creations, surpass all the race in richness of coloring, the combinations of which are surprisingly heantiful and indescribable. Heretofore this grand type of Carnation only flowered once a year—15 to 18 months after sowing—but now, thanks to Monsieur Chaband's scientific hybridization, we have Fancy Pinks, with all of the qualities of the old so-called Perpetual Carnation, flowering continuously after 6 months from sowing. Plants thickset and bushy, of regular height; stalks stiff and upright, bearing immense double blossoms of perfect regularity, some with fringed edges, some smooth, some with rich, solid colors, others tinted and blended, and others with featherings and pleotee markings, and all perfuning the air with their sweetness. They are of incontestable nacrit for flowering in winter as well as hardy enough for garden culture. Pkt. 50

NEW BUSH VERBENAS. These differ from the old types—of sprawling habit—by grow-ling into upright, candelabra-branched, compact bushes, which

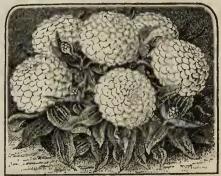

are well covered with oval clusters of flowers of several colors, such as carmiae, with white eye; blood-red, plnk, scarlet and white in mixture. (See ent.)..Pkt. 20

#### NEW LARGE ... SINGLE VIOLETS.

Grand improvements in these favorite, fragrant hardy perenulals, now so popular for growlag in frames for cut flowers.

Zinnia, "Double Miniature."

The smallest Zinala in existence. Plants only 4 luches high, and in habit, foliage and bloom are perfection. The small leaves stand closely together, and immediately above them are formed the small, perfectly double flowers of the following colors: white, scarlet, crimsoa, purple, dark rose and yellow. Elegant for small groups, borders, beddings, etc. At the General Hortlealtural Exhibition at Hamburg, 1897, this novelty was awarded an extrá prize........Pkt. 20.

ZINNIA, DOUBLE MINIATURE.

# 

SHOWN IN COLORS ON OPPOSITE PLATE.

F all annuals grown, Asters are the greatest favorites, of easy culture, succeeding with every one and growing in any good soil, responding to a rich, loamy one, with a mulching of rotted manure around the plants to insure sufficient moisture and protect the roots which are produced near the surface from the hot sun. For garden beds no other annual can equal Asters in perfection of flowers and rich and varied colors. The new sorts we offer this year are great advances.

## California Giant Branching Comet Asters.

SEE COLORED PLATE OPPOSITE.

Comet Asters, a comparatively new type, are winning enthusiastic admiration from all who see them. They are so large, so beautiful, so unique in their charming grace, so free from the formal stiffness heretofore characteristic of Asters, it would seem the highest possible perfection has been attained. The flowers of immense size, averaging 4 to 5 inches across, and even 6 inches across, are very double, composed of long, wavy, twisted petals, arranged into loose yet dense half-globes, resembling Japanese Chrysanthemums, and being borne on stems, 16 to 24 inches long, gives them an added value when cut for vases. The plants of these new California Giant Branching Comet Asters (see cut) are of strong, healthy and luxuriant growth, attaining a height of about 2 feet, branching out freely into well-formed bushes, each plant bearing from 50 to 75 magnificent flowers.

# New Dwarf Mignon

See Colored Plate opposite.

The Mignon Asters are a comparatively new class which have been worked up from the Victorias, on which they are a great improvement, which is saying much, for the Victorias have long been considered one of the best types grown. In this New Dwarf Mignon Aster we offer one of the best dwarf Asters grown, differing from the tall Mignons only in habit. The plants grow about 10 inches high, branching out just above the soil, the long stalks carrying gracefully-poised large semiglobular flowers of perfect shape.

## Tom Thumb Comet Aster—White.

SEE COLORED PLATE OPPOSITE.

This heautiful new Aster is the result of a cross between the Glant Comet and the Dwarf Chrysanthemum-flowered Asters. From the former it has inherited the elegant form and size and doubleness of its pure white flowers, measuring 4 inches across, while from the latter it gets its dwarf, compact habit of growth, which does not exceed 8 inches in height, thus making it especially valuable as a pot plant, as well as for garden decoration. One particularly good point about this Aster is its earliness—the flowers open early in July, even before the "Queen of the Market"; it is, therefore, the earliest of all large-flowering white Asters. Price per packet, 25c.

## DOUBLE SWEET PEAS.

The flowers of these do not all come The flowers of these do not all come double, but usually produce from 20 to 40 per cent, of double blossoms. In some uncongenial ocalities or situations they have proved very inconstant, producing no double flowers at all, but in such cases they make up for the deficiency in doubles by producing in greatest profusion large single flowers of beautiful colors. Only with this understanding with purchasers do we supply the seeds. Such flowers as do do we supply the seeds. Such flowers as do come double are of incomparable beauty. Sometimes they will all come double on one stem, sometimes all single, but generally doubles and singles are borne about half-and-half on each stem.

Double Apple Blossom. Rose and Double Apple Blosson.

Henderson's Popular Collection of six named Sweet Peas, 25c.; twelve named sorts, 40c.

#### WER SEE · · · · · FLO

## DWARF LARGE-FLOWERING DOUBLE TEN WEEKS.

These popular flowers are easily grown, and are so highly fragrant and of such great beauty, and have so muny good qualities, that they deserve a place in every garden. They should be given good rich soll to grow in, and will amply reward good treatment with remarkably large pyramids of bloom; the flowers represent a great diversity of color. The Double Large-flowering Ten Weeks Stocks are great improvements over the dillillowers of the olden times, the flowers being much larger and more densely double, and there is also a much larger variety of colors and shades than there used to be.

sliver half-dollar; leaves only 2 to 3 .50

tuberosa Improved. Strong-growing Northwestern white Pond Lily......50

WATER HYACINTH

HE ease with which Water Lilies and Aquatics are cultivated, the certainty of handsome results the same season they are planted, the magnificent flowers of great variety of form and color, their delicate perfume and the great fascination in growing them, is making the water garden widely popular. All of the varieties may be grown in half-barrels or tubs two-thirds full of well-enriched soil covered with an inch or two of sand, filled with water and placed in a sunny position in the lawn or a fountain basin, though the cultivator generally becomes so enthusiastic in a season or two that an artificial pond is created, which is easily done and at small cost. We cannot send out Water Lily plants until warm weather, about the middle of May.

#### HARDY NELUMBIUMS, OR LOTUS.

Noble aquatics, immense double flowers and gigantic leaves, both borne from 3 to 6 feet above the surface. The flowers are frequently a foot across; easily cultivated in either ponds or tubs. (See eut.)

n. American Yellow Lotus. luteum. Bright sulphur yellow.....

#### TENDER NYMPHÆAS.

#### TABLISHED SUMMER FLOWERING BULBS....

## PANCRATIUM GALATHINUM.

Handsome clusters of large striking, very fragrant, pearly white flowers. Bulbashould be kept warm and dry, and planted out in the middle of May. They will then commence flowering in July. It is also admirably adapted for pot culture, and can be forced into flower in 6 to 8 weeks' time. (See cut.) 25c.

## MILLA BIFLORA.

(Mexican Star or Frost Flower.)

A beautiful Mexican summer-blooming buth. A group of them is always in flower after the middle of summer and very attractive. Flowers, star-shaped, 2 inches across, clear waxy white, of great substance, enlivened by a frost-like sparkle; the fragrance is delightful. Place a stalk in water and the flowers will all open; we have seen 11 stalks shoot up successively from one buth. The buths flower profusely and with great certainty. Height, 12 to 18 inches. For an effective display, groups of 12 to 25 or more should be planted about 6 inches apart in a sunny bed. 3 for 10c, 30c, per dox, \$2.00 per 10c. (Securt.)

OXALIS, Summer-Flowering.
Valuableforedging walks, flower beds, etc. Bulbs planted 3 inches apart form rounded rows of delicate follage, about 1 foot high, which produce flowers in endiess succession, Lasiandra. Rosy pink, 15c, per doz., \$1.00 per 100.

Deippa. Rosy white, 15c, per doz., \$1.00 per 100.

## -- TIGRIDIAS. --

(Pencock or Shell Flower.) Extremely handsome summer-flowering bulbs, growing about 2 feet high, producing targe, gorgeous flowers, exquisitely spotted; they flower very freely throughout the summer. (See cut.) Conchifora. Dark yellow, large red spots. 5c. each, 40c. ner doz.

Conchifiora. Dark yellow, large fed spots. Secretary, 40c. per doz.

Pavonia Grandiflora. Large bright crimson, eentre mottled with yellow. 5c. each, 40c. per doz.

Grandiflora Aiba. Pearly white, with a yellow cup gorgeously spotted with crimson. 5c. each, 50c. per doz.

Grandiflora Lilacea. Large-flowering fliac with purple and wide spots in centre. 5c. each, 50c. per doz.

Grandiflora Rosea. Bright rose, large-flowering. 5c. each, 50c. per doz.

each, 50c. per doz. Grandiflora Aurea. Pure deep golden yellow. 5c.

each, 50c. per doz.

Grandifiora Immaculata (new). Pure spotiess white.

10c. each, \$1.00 per doz.

1 Bulh each of the above 7 for 30c.

TIGRIDIA

This pure white, perfectly domble, delightfully fragrant flower, invaluable for bonquets, is too well known to need any description. It delights in a strong, rich, deep, well-drained warm soil; manner, heat and water are essential to its perfect development. This variety, which we introduced and named, grows only 24 inches, about half the height of the old double sort, and the flowers are nearly twice the size (often two inches in diameter), and imbricated like a Camellia; deliciously fragrant, (See eat.) Extra size bulls, 4c, each, 35c, per doz., or by express, purchaser paying earriage, 25c, per doz., \$1.75 per 100.

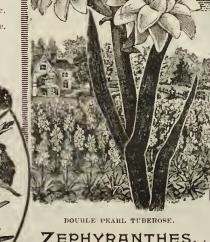

## EARLY-FLOWERING BRANCHING

TUBEROSE, "ALBINO."

A single white Tuberose. The flower spikes are very large and evenly filled; flowers in July and August, throwing from two to five flower stems from a single bulb, and these again are often branched. The petals recurve gracefully, which adds greatly to the size of the individual flower; it is entirely free from the browa tint common to the old sort on the back of the petals, being of the purest waxy white, making it most valuable for cut flowers. When first seen, it might be said to resemble a Stephanotis, or some species of Jessamine as much as a Tuberose, both in appearance and fragrance, for the odor is less heavy than that of the ordinary Tuberose. 5c. each, 50c. per doz.

## TUBEROSE, "Silver Leaf."

Showy and effective, even when not in bloom, the foliage being distinctly striped, white and green. Each hulb frequently throws up two or more spikes, 3 to 4 feet high, each bearing from 25 to 40 pure white, waxy flowers, much like an orange flower or Stephanotis, with a delicate and enchanting perfume. They flower several weeks earlier than double Tuberoses, and the bulbs bloom year after year. 5c, each, 50c, per doz.

## ZEPHYRANTHES.

Beautiful dwarf huibous piants, flowering in

Beantiful dwarf hulbous plants, flowering in profinsion durlag the summer.

Atamasco. White, suffused with flesh color; hardy.

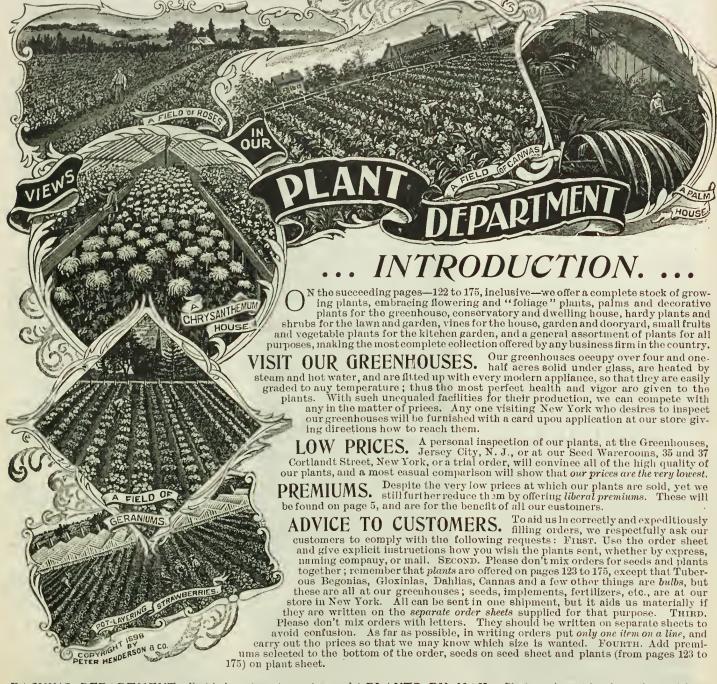

3 for 10c., 25c. per doz., \$1.50 per 100.

Candida. Large-flowering, pure white. 3 for 10c., 30c. per doz., \$2.00 per 100.

Rosea. Large flowers, 3 to 4 laches across, of the most exquisite rose pink. (See cat.) 5c. cach, 40c. per doz., \$2.50 per 100.

# PETER HENDERSON & CO., NEW YORK ... FOUNDED 1847.

PACKING DEPARTMENT. Next in Importance to growing good plants by reach the purchaser without injury. The system of packing plants that obtains to-day was evolved by the founder of our house and perfected by him. Our plants almost invariably reach the purchaser as fresh as when they left our greealtonses.

SAFE ARRIVAL ASSURED. We guarantee the safe arrival of all plaats sent by express. Should anything be injured in transit we would urge our customers to notify us at once on receipt of the goods, and in every case send us a list of what has been damaged, so that we can replace them without delay. But when they arrive in good condition on responsibility censes, and if from inattention or other canses they fall and complaint is then made, we cannot replace them. Plants sent other than by express are entirely at the risk of the purchaser.

**EXPORT ORDERS.** The packing necessary to provide for the safety of plants going on long journeys to foreign countries compels us to charge 25 per cent, extra for packing.

PLANTS BY MAIL. Plants can be sent free, by mall, except large other plants of large size, when instructions to that effect accompany the order, otherwise they will be sent by express (bnyer to pay charges); but as we always add enough plants gratis to cover these charges customers will see the great advantage of havlag plants seat by express, for not only can we send larger plants, but they arrive in better condition than if sent by mail.

LOW EXPRESS RATES. Under the new rullag of the leading Express Companies, advocated and secured by us, plants packed in closed boxes or baskets will now be carried at the "General Special" rate. This rate means a reduction of 20 per cent. from the regular merchandlise rates to all polats where no "General Special" exists. Shipments weighing less than 100 lbs. receive the beaefit of the rate per 100 lbs., but the minimum charge is 35c. For instance, where the regular merchandlise rate is \$4.00 per 100 lbs., a box of plants weighing 25 lbs. would be carried for 80c.—a saving of 20c. on one shipment. It is not necessary to prepay charges to secure this rate, as we guarantee charges to the express companies, and, as a consequence, they allow the reduction.

**IMPORTANT.** We ship all orders for plants immediately upon receipt. We will reserve plants for future shipment, but instructions to that effect must accompany the order. This applies specially to plants ordered in winter.

ARECA LUTESCENS. One of the grandest and most useful Palms in cultivation, full of grace and beauty. Very thrifty and quick growing ln living rooms. (Seecut.) 1st size, 50c. each; 2d size, 25c. each. DRACÆNA INDIVISA. Eminently fitted to contrast with alms and other decorative plants. Frequently called "The Palms and other decorative plants. Frequently called "The Fountain Plant." (See cut.) 1st size, 50c. each; 2d size, 25c. each. BOSTON FERN. This has attained very wide popularity, and deservedly, as it is one of the most attractive house plants in

cultivation. (See cut.) 1st size, 75c. each; 2d size, 25c. each.

COCOS WEDDELLIANA. A charming variety of slender, graceful habit, largely used for the centres of small jardinieres for table. (See cut.) 1st size, 75c. each; 2d size, 35c. each.

PANDANUS UTILIS. Pandanus is perhaps the most useful

PANDANUS UTILIS. Pandanus is perhaps the most useful of our ornamental foliage plants. As a vase plant or single specimen in greenhouse or conservatory it cannot be surpassed. (See cut.) Price, first slze, \$1.50 each; young plants, 25c. each.

LATANIA BORBONICA. (Fan Palm.) The typical Palm and recognized as being indispensable in every collection. The second size will not have the fan shaped (also called character) leaves; they develop the second year. This fact is important to remember. (See cut.) First slze, 75c. each; second size, 25c. each.

GREVILLEA ROBUSTA. (The Silk Oak.) A magnificent plant for decorative purposes of proid easy growth finely cut foliage.

for decorative purposes, of rapid, easy growth, finely cut foliage, rivaling a rare fern. First size, 50c. each; second size, 25c. each.

SPECIAL OFFER. First size, 7 strong plants from 4 and 5 lnch pots......\$4.00, (If bought separately would cost \$5.25.) Second size, 7 " " 2 " 3 " " ....... 1.00, (" " " " 1.85.) Pamphlet of Instructions on the care of Palms in dwelling-houses sent free to purchasers of either of the above collections.

## LARGER PALMS AND OTHER DECORATIVE PLANTS.

LATANIA BORBONICA. (See cut and description above.) 4-Inch pots, 50c. each; 5-inch pots, 75c. each; 6-Inch pots, \$1.25 each; 7-Inch pots, \$2.00 each; 8-inch pots, \$3.00 each; 10-inch pots, \$5.00 each. CYCAS REVOLUTA. (Sago Palm.) A magnificent Palm, combining majesty and grace. It is probably the most valuable decoration.

tive Palm grown, both for lawn and house decoration. The heavy, glossy, deep green fronds resist alike the gas, dust and cold to which decorative plants are frequently exposed. Price, plants from 9-inch pots, 10 to 12 fronds (or leaves) each, 18 to 20 inches long, \$3.00 each.

ARECA LUTESCENS. (See cut and description above.) Fine, bushy plants, 8-Inch pots, 3 In a pot, 3 to 3½ feet hlgh, \$3.00 each; 2½ to 3 feet, bushy plants, 7-Inch pots, 3 In a pot, \$2.00 each; 2 feet, 6-Inch pots, 3 In a pot, \$1.50 each; 1½ to 2 feet, 5-Inch pots, 3 in a pot, \$1.00 each, \$9.00 per doz.; 16 to 20 Inch plants, 4-Inch pots, 3 In a pot, 75c. each, \$7.50 per doz.

PANDANUS VEITCHII. This grand decorative plant, with its green and green white varlegation, is indispensable in every

itz green and creamy white varlegation, is indispensable in every collection. 6-ln. pots, \$2.00; 7-in. pots, \$3.00; 8-in. pots, \$4.00 each. CYPERUS ALTERNIFOLIUS. (The Umbrella Plant.) The

leaves radiate from the stem and curve downward in graceful

fashion. First size, 50c. each; second size, 25c. each.

C. GRACILIS. Similar to above, but of more graceful and slender habit. 1st size, 75c. each; 2d size, 30c. each.

DRACÆNA FRAGRANS. A grand ornamental plant; deep green, broad, gracefully drooping leaves. Plants from 6-inch pots, \$1.50 each; 5-inch pots, \$1.00 each; 4-inch pots, 60c. each.
DRACÆNA LINDENII. Broad, strong leaves, gracefully re-

DRACÆINA LINDENII. Broad, strong leaves, gracefully recurved, heavily banded with creamy white and yellow on deep green ground. 5-lnch pots, \$1.50; 4-lnch pots, \$1.00 each.
DRACÆINA SANDERIANA. A very pretty variegated variety, marked green and white. 50c. each.
RUBBER PLANTS. 12 to 15 lnches, 50c. each; 15 to 20 lnches, 75c. each; 2 to 2½ feet, \$1.00 each; 3 feet, \$1.50 each.
LIVISTONIA ROTUNDIFOLIA. One of the prettlest Palms in cultivation, especially suited for table decoration. The follows.

in cultivation, especially snited for table decoration. The follage ls similar to Latania Borbonica, but smaller. Fine plants, 15 to 18 Inches high and broad, 4 to 5 character leaves, \$2.00 each.

KENTIA BELMOREANA. The Kentlas are among the best of the Palm species for general cultivation. Price, fine plants from 7-inch pots, 3 to 3) feet high and bushy, \$5.00 each; a lighter grade at \$4.00 each; from 6-inch pots, \$2.50 each; plants from 5-inch pots, \$1.50 each, \$15.00 per doz.; from 4-inch pots, 75c. each, \$7.50 per doz. Made-up plants (3 plants in each pot), 7-inch pots, \$3.50 each; the same from 6-inch pots, \$2.50 each.

KENTIA FOSTERIANA. Similar to above, but of more rapid growth, 6-inch pots, \$2.00 each; 5-inch pots, \$1.25 each.

# PETER HENDERSON & CO., NEW YORK. FOUNDED 1847.

The above cut shows the luds of this fine new hardy, ever-blooming garden Rose, and it is equally valuable for winter blooming. For full description and prices of Mrs. Robert Garrett Rose, see page 140, See Colored Plate, page 141.

# Leading Specialty.

E have for years made ROSES our leading specialty, and sell annually over half a million plants. We pay particular attention to their culture, so that our ROSES are famed for their thrifty condition; besides, we offer nothing but varieties of established merit and new sorts which have been thoroughly tested by us; hence we offer unequaled advantages to buyers of ROSES.

# OUR CLAIM: THE SIZE OF OUR ROSES. We claim that we send out larger and finer

Roses than any other firm in the business. Our smallest size is larger than the plants usually sent out by the mailing trade throughout the country, and our cold system of growing Roses makes them infinitely better.

our cold system of growing Roses makes them infinitely better.

We grow our Roses in different sizes. This gives purchasers the opportunity of procuring a plant of large size which will make a show at once, or smaller plants at prices which place them within the reach of all. Our Roses are graded as follows: First size are usually 15 to 20 inches high and branched; second size, 10 to 15 inches; and third size, 5 to 10 inches.

We will send, free of charge, to any one ordering Roses, our pamphiet of instructions on "THE GARDEN CULTURE OF THE ROSE." This gives in a concise manner the principles of Rose culture in the Garden.

Facts to Remember about Roses. The hardy Roses, unstated in the description, are not ever blooming. They only produce one erop of flowers, in June, with an oceasional bloom in autumn. This applies to elimbing as well as bush Roses.

The Tea or Monthly Roses are ever blooming, but are not hardy in our Northern climate.

The smallest size (the third) of our Roses, in the Tea or Monthly section, will produce flowers the same season they are planted, but the larger plants will flower more and earlier.

The small size (the third) of the hardy Roses, both bush and elimbing, rarely bloom the same season they are planted.

IMPORTANT. The monthly or ever-blooming sorts undoubtedly give better satisfaction than the Hybrid Perpetuals—flowering continually—but, not being hardy north of Maryland, require protection (which is best done by covering the roots in December with leaves or coarse litter, to about six inches in depth). The Hybrid Perpetuals are perfectly hardy, but do not bloom perpetually, as the name would indicate, giving only one profuse bloom in June and a partial bloom afterward.

## A FEW NEW ROSES FOR THE SEASON. For others, see succeeding pages.

L'INNOCENCE. (Hybrid Tea.) Flowers large, full and globular, pure white, double, borne on long straight stems, very few thorns, large, bronzy green, handsome foliage.

BEAUTÉ LYONNAISE. (Hybrid Tea.) Raised from Baroness Rothschild, which it resembles in character. It flowers most profusely, color white, on a ground slightly tinted with pale yellow.

FERDINAND JAMIN. (Hybrid Tea.) Another very promising new Rose, color rosy carmine shaded with salmon. Large globular flowers, full and double; desirable for cut flowers.

MME. CADEAU-RAMEY. (Hybrid Tea.) This fine new Rose is of vigorous habit, forming thick spreading bushes, foliage deep green, flowers large and full, perfect in form, color rosy flesh shaded with yellow at the base and bordered with rosy carmine. Very free blooming and adapted for forcing.

MERRIE ENGLAND. (H. P.) A charming Rose, totally distinct from every other variety; eelor rosy erimson, very distinctly and plentifully striped silvery blush; form and quality good.

PERLE DES ROUGES. (Polyantha.) Growth dwarf and bushy; flowers medium size, very full; color velvety crimson, reflex of petals bright eerise; a very pretty variety and an invaluable addition to this useful class of Roses.

MARIE FAVIE. (Polyantha.) Although not a new Rose, yet it is so little known that we jucked it here. It is the most valuable Rose of its elass for garden flowers, low, vigorous, spreading habit, wonderfully free blooming, large double flowers, ercamy white, tinted warm blush. First-size plants, 75e. each; young plants, 20e. each, \$2.00 per doz.

CLIMBING KAISERIN AUGUSTA VICTORIA. A "sport" from that fine garden and greenhouse whose name it bears (see cut page 134), and identical with it in hardiness, freedom of bloom, color and size of flowers. The value of this grand addition to our rather meagre list of high-class ellmbing Roses can scarcely be overestimated. Price, for new Roses (except where noted), first size, \$1.00 each; second size, 75c. each; third size, 50c. each, \$4.50 per doz.

## New Many=Flowered Rose, "Snowball."

OVELTIES among Roses are always acceptable, and in "Snowball" we have one of the most charming acquisitions imaginable. Of a dwarf, compact habit, with rich, green foliage, and a bounteous blooming quality which is really wonderful. Twenty-five to fifty blossoms, white as snow and resembling a Camellia in compactness and purity of color, are produced in large clusters, literally covering the plant, and emitting a sweet, delicate odor. As a pot or border plant, its abundance of flowers, vigorous constitution, and attractive fragrance give it advantages beyond all others in this section of Roses. (See cut.) Large 2-year-old plants, \$1.00 each; young plants, 30c. each, \$3.00 per doz.

## New Hybrid Tea Rose, "Clara Watson."

HIS is one of the most beautiful winter-flowering roses, of the largest size, very fragrant and fine form. The predominating eolor is salmon pink, blended with blush pink on the outer edge of the petals, with just enough yellow at the base to bring out the whole, making it a very artistic and distinct flower. It is a very strong grower and very free flowering, and must become a general favorite. It is also a grand summer-bedding rose, good strong grower, fine substance and free bloomer. Price, first size, \$1.00 each, \$9.00 per doz.: second size, 75c. each, \$7.50 per doz.; third size, 30c. each, \$3.00 per doz.

NEW MANY-FLOWERED ROSE, "SNOWBALL."

# GOLD MEDAL ROSE,

JUBILEE.

IT is a true Hybrid Remontant Rose, perfectly hardy, blooming in the fall as well as in the early summer, very vigorous, large, dark green foliage, one of its distinguishing features; short-jointed, long flower stems, and branches freely, blooms most abundantly, three flowers and over on each shoot, the ideal habit for a hardy garden Rose. The flowers are very large, reaching six inches across under good culture; outer petals partially reflexed and recurved, the centre petals upright and

very gracefully disposed, giving grace and finish without showing the centre; they last a long time when cut. The buds are long and rounded, the petals falling away gracefully, revealing the rich velvety texture. The fragrance is strong, delightfully rich and very lasting.

Its Wealth of Color.—A pure red in its deepest tone, shading to deep erimson red and velvety maroon red in the depths of the petals. "The coloring is alive," as one expressed it. "It fairly glows in its rich warmth of coloring," another said. The rich velvety finish to the petals is all its own, and is not even approached by any other Rose yet introduced. It is admirable, unique, and, as Mr. F. Schuyler Matthews, the eelebrated artist, said, "This Rose contains the darkest color, combined with pure color, of which nature is capable." It required centuries and the skill of the world's hybridizers to produce this peerless Rose, perfect in all its attributes, peerless in its magnificent color, and it is fair to assume that it will again require the centuries to produce its equal—if it ever is produced—for nature is not prolific in repetitions. (See cut.)

Price, first slze, 60c. each, \$6.00 per doz.; second slze, 50c. each, \$4.50 per doz.; third slze, 15c. each, \$1.50 per doz.

GOLD MEDAL ROSE, ' JUBILEE."

"PETER HENDERSON & CO., NEW YORK" FOUNDED 1847.

#### South Orange Perfection. (40, 1 in cut.)

Double flowers, soft blush changing to white, about one and ene-half inches in diameter. Perfect rosettes in shape. This is a very pretty variety and entirely distinct from the others.

#### The Double White "Idemorial Rose." (180. 2 in cut.)

(Manda's Triumpb.)

This is the gem of the collection, and may well be called the Double "Memorial Rose," as it preserves the color of the parent, with its characteristics of growth and foliage, but the flowers are double and very fragrant. They are produced in clusters of from twelve to eighteen flowers on each cluster on small side shoots, literally covering the plant and standing well above the foliage.

#### Double Pink "Idemorial Rose." (Mo. 3 in cut.)

(Universal Favorite.)

A fitting companion to the double white "Memorial Rose"; identical in growth, double flowers one and one-haif to two inches in dlameter, of a soft, light pink, and very fragrant.

#### Dink Roamer. (40. 4 in cut.)

This variety shows undoubted traces of descent from the Sweet Brier, both in the color and the shape of the blossom and in its exquisite fragrauce. The flowers, single, are over two inches in diameter, a bright rich pink, with a large, silvery-white centre and orange red stamens, producing a most charming effect.

NOTE OUR REDUCED PRICES FOR THIS SEASON. Price, 1st size, 50c. each, \$4.50 per doz.; 2d size, 30c. each, \$3.00 per doz.; 3d size, 10c. each, \$1.00 per doz. Special Offer of the set of four Roses, 1st size, for \$1.50; 2d size, for \$1.00; 3d size, for 35c.

# "Memorial") Roses for 1898.

We have pleasure in offering the following new Roses In this section, a great advance, inasmuch as they bring new colors and forms and are entirely distinct from those already introduced. They are equally hardy and vigorous in growth, equally free in blooming.

GARDENIA. (Wichuraiana X Perle des | Jardins.) Strong grower with large, green follage, flowers produced singly on stems one half to one foot long. Flowers in bud, bright yellow, and hardly distinguishable from Perie des Jardins in form; when open, cream color, and three to three and one-haif Inches in diameter, incurving toward evening to perfect imitation of a Gardenia (Cape Jessamine) as to shape and color-hence its name. Flowers are delightfully fragrant and produced freely. A grand Rose for any purpose.

Price, young plants, \$1.00 each, \$10.00 per doz.; one-year plants, \$2.50 each; two-year plants, \$5.00 each.

EVERGREEN GEM (Wichuraiana X Madame Hoste) is not only evergreen, but grows during mild weather in winter. Stems, long, branching, rich bronze color, covering the ground closely. Foliage deep green, the young leaves fine, rich bronze color, closely matted; flowers double, produced singly on stems, yellow, buff in bud, opening to almost white, two or three inches in diameter, perfectly double, and with a delicate Sweet Brier fragrance. This will be found most valuable for landscape work.

Price, young plants, 60c. each, \$6.00 per doz.; one-year plants, \$1.50 each; two-year

plants, \$2.50 each.

JERSEY BEAUTY (Wichuralana X Perie des Jardins.) Extremely vigorous grower, foliage of thick, leathery substance, shiny. Flowers produced singly or in clusters, large, single, three inches in diameter, opening paie yellow, with eluster of bright yellow stamens, very fragrant, and produced in greatest profusion, covering the piant entirely and having the appearance of a yellow (thereby a Rose A great cavicities) Cherokee Rose. A great acquisition, and the most striking variety of the set.

Price, young plants, 60c. each, \$6.00 per doz.; one-year plants, \$1.50 each; two-year plants, \$2.50 each.

A set of three varieties, one of each, for \$2.00; three sets, four of each, for \$7.50. A set of one-year plants, one SPECIAL OFFER. of each, for \$5.00. A set of two-year plants, one of each, for \$9.00.

PETER HENDERSON & CO., NEW YORK .... FOUNDED 1847.

Every one of which is also pre-eminently adapted for garden culture,

MERIGAN BEAUTY. In "American Beauty" we have a hardy Rose of the largest size, having the ever-blooming qualities of the Tea Rose, with the delicious odor of the Damask or Moss Rose, consequently equally valuable for winter or summer flowering. In color It is a deep, brilliant pink, shaded toward the centre with rich carmine each, \$4.50 per doz.; 3d size, 20c. each, \$2.00 per doz.; 2d size, 50c.

Bridesmaid. Another Rose of American origin, a "sport" from C. Mermet, and possessing all the good qualities of the parent variety. It surpasses it in color, being a deep, brilliant pink and constant in color under all conditions. It is invaluable for winter.

Belle Siebrecht. (See page 133 for price and description)
Catherine Mermet. This charming Rose deserves and receives recognition from all Rose lovers. The color is a delicate rosy pink unapproached by any other. The buds are large, long and pointed, of great substance and most delicious fragrance.

Christine de Noué. A Rose of pronounced merit, largest size, full and double and remarkably fragrant. The color is brilliant red at the base, toning upward to brilliant rose madder.

Kaiserin Augusta Victoria. (See page 134 for price and description.)
La France. Beautiful peach pink, large, fragrant flowers; one

of the most desirable for summer or winter.

Souv. du Pres. Carnot. (See Colored Plate and page 140.)

Mrs. Robt. Garrett (new). (See Colored Plate and page 140.)

Mrs. Pierpont Morgan. A sport from Madame Cusin, and is in every way very much superior to that variety, being a much more robust grower; the flowers are very much larger and very double. The color is intensely bright cerise, or rose pink, with porcelain rose shadings. It is a grand Rose for winter forcing, and of equal if not greater value for summer gardens, as its fine double flowers are eminently adapted to our hot, dry summers, and its vigorous habit and free-flowering qualities easily entitle it to a front rank.

On this page we offer the best varieties for winter-forcing in the greenhouse. These are the sorts grown for the New York markets and cannot be surpassed for that purpose. They are also among the best for summer blooming.

Mme. Caroline Testout. A magnificent Rose, equally valuable for summer or winter blooming; flowers full, very large, globular form; coior clear satin rose; very fragrant.

Madame Hoste. This is a ereamy white shade with a clear

amber centre, a handsome Rose, and very free bloomer.

Meteor. This is a remarkably rich, dark velvety crimson Rose; so dark, Indeed, that under certain conditions it is blackish crim-For winter flowers it is a most valuable variety.

Niphetos. The White Rose par excellence-large-pointed buds -very free flowering. Invaluable for winter and summer.

Papa Gontier. This is a useful winter-flowering Rose, equally

valuable for summer. Color, a glowing carmine crimson.

Perle des Jardins. No yellow Rose is more valuable than this.

Tens of thousands of It are grown in the vicinity of New York for

winter flowering; it is equally valuable for summer.

Souvenir de Wootton. This fine Rose is invaluable for winter blooming. The color is a beautiful shade of crimson, deli-

winter blooming. The color is a beautiff shade of crimson, deficiously fragrant, a constant and most prollfic bloomer.

Sunset. This exquisite orange yellow variety is one of the finest Tea Roses grown. The flowers are large and double. It is deliciously fragrant, a strong-growing and free-flowering variety.

The Bride. "The Bride" is a pure white Rose of large size and most perfect form. This variety has the most delicious Tea fragrance, and is equally valuable either for summer or winter.

Price. All the Roses on this page (except where noted), 50c., 30c., 10c. each; \$4.50, \$3.00, \$1.00 per doz.; \$30.00, \$20.00, \$8.00 per 100, for 1st, 2d and 3d sizes.

No. 6. This is a grand bedding Rose. Its rich. Malmaison. No. 6. This is a grand of thimense size, are produced in abundance, and withstand perfectly our hot, dry summers. (See cut.)

Duchesse de Brabant. This Rose never fails to produce flowers, and a beautiful shade of soft, rosy flesh, deepening to warm plnk and bright rose.

"The Brlde" is a pure white Rose of large size and The Bride. "The Bride is a pure winte Rose of large size and most perfect form. It has delicious Tea fragrance, a strong-growing, free-blooming Rose.

Souvenir de Wootton. The color is a beautiful shade of crimson, deliciously fragrant, a constant and most proiifle bloomer. Hardy in the latitude of New York.

Clothilde Soupert. No. 4. The color is a French white, deepening to rosy blush in the centre. Compact, vigorous habit and

Perle des Jardins. No. 5. No Rose of its color is more valuable than this. Its color is a rich shade of yellow, large size and

perfect form, Tea fragrance, a healthy, free grower. (See cut.)

Madame Hoste. This is a creamy white shall place amber centre, a very handsome Rose. This is a creamy white shade with a clear

Madame de Watteville. A beautiful shell-pink, deepening to bright rose at the edge of the petals, the body of the flower being creamy white.

Sunset. This exquisite orange-yellow variety is one of the finest Tea Roses grown. The flowers are large and double, deliciously fragrant and free flowering.

Special Offer. The "CASHMERE" Collection of twelve Roses. 1st size, \$4.50; 2d size, \$3.00; 3d size, \$1.00. Single plants of any of the above, 1st size, 50c.; 2d size, 30c.; 3d size, 10c. each. 

color under all conditions. (See cut.)

wonderful profusion of bloom. (See cut.)

Jubilee. No. 6. The grandest hardy dark red Rose yet offered. (See cut and special description, page 125.)

John Hopper. Among the many Roses which from year to year grow in popularity there are none which increases in esteem more rapidly than this. A Rose of the highest order, large and fuil, color bright rose with carmine centre.

Paul Neyron. Probably the largest of ail Roses; color, clear dark plnk, shaded carmine. Form of flowers, bold and handsome; very fragrant.

Prince Camille de Rohan. One of the grandest hardy red Roses and unapproached in eolor. It is best described as a blackish crimson. In the bud it is darkest; as the flower exposes, vivid, smoky erimson shades are brought to light, giving it a very rich effect

Ulrich Brunner. A beautiful hardy Rose in flower and foliage.
The former is large and cupped, bright cherry red and very fragrant. The flowers are borne on long flower stalks almost devoid of thorns.

La France. Flowers large and beautiful, either in the bud form or when expanded; peach-blossom color, shaded pink and silvery rose. It is very free blooming, every shoot forming a beautiful flower, and most deliciously fragrant. This should be protected far north in winter.

Magna Charta. Bright deep plnk, very large and fragrant. A grand Rose.

#### SPECIAL OFFER.

The "POLAR" Collection of twelve hardy Roses, 1st size, \$6.00; 2d size, \$4.50; 3d size, \$1.50.

## STABLISHED **DEPARTMENT····**

**Redding Rose**,

#### "CLIMBING WOOTTON."

This is a grand addition to our list of hardy ever-blooming climbing Roses. It is a "sport" from that fine American-raised hybrid Tea Rose, Souvenir de Wootton (see page 140), and has the same large deep crimson flowers, richly perfumed. It is a very vigorous grower, clean and healthy, almost impervious to mildew, ever blooming, so that flowers may be expected from well-established plants throughout the season. Price, 1st size, 75c. each, \$7.50 per doz.; 2d size, 50c. each, \$4.50 per doz.; 3d size, 20c. each, \$2.00 per doz.

#### MADAME ABEL CHATENAY. (HYBRID TEA.)

Flowers large and full, petals recurved and of a beautiful creamy rose shaded with rose vernilion and tinged with salmon; the base of the petals is very highly colored, being a combination of the foregoing shades strongly accentu-This will undoubtedly make a line garden Rose because of its substance and hardiness. The flowers are borne on long stems, so that it is exceedingly well adapted for vases of cut llowers. Price, 1st size, 50c. each, \$4.50 per doz.; 2d size, 30c. each, \$3.00 per doz.; 3d size, 10c. each, \$1.00 per doz.

#### BELLE SIEBRECHT.

valuable for winter forcing as for summer blooming. The color is a unlque shade of pink, clear and constant, just the shade long desired. Price, 1st slze, 50c. each, \$4.50 per doz.; 2d size, 30c. each, \$3.00 per doz.; 3d slze, 10c. each, \$1.00 per

#### MAMAN COCHET.

The growth is free and vigorous, very free blooming, flowers of splendid substance and a delightful shade of deep plnk. The buds are long and pointed, full and firm, lasting a long time when cut. As the flowers expand, the centre of the Rose discloses depths of salmon pink, with light orange tints, while the older petals iessen to pearl plnk, glving a combination of tints and tones unequaled in their beauty. Price, 1st size, 50c. each, \$4.50 per doz.; 2d size, 30c. each, \$3.00 per doz.; 3d size, 10c. each, \$1.00 per doz.

#### PRINCESS BONNIE.

One of the most prolific-blooming Roses we know; the color is a grand, solid crimson, just the shade wanted in the ever-blooming section, the base of the inner petals prettlly marked with clear white. Price, 1st size, 50c. each, \$4.50 per doz.; 2d size, 30c. each, \$3.00 per doz.; 3d slze, 10c. each, \$1.00 per doz.

This variety will, we believe, provo to be one of the most satisfactory Roses we have ever offered. It is as free blooming as a Tea Rose and hardy as a Perpetual, a union of the two most desirable qualities in Roses. It is equally

A seedling from that premier Bedding Rose, Clothilde Soupert, of which we have spoken so highly, and which will be found on page 130. "Pink Soupert" inherits all the grand garden qualities of its parent and is a clear pink through-out, bright and attractive; the coloring deepens in some flowers to cherry red, and in others it lessens to light clear pink. The profusion of bloom ls wonderful, the wholo plant being a mass of llowers. No Rose can possibly excel this for outdoor bedding, and none can be more attractive. It is compact and sturdy in habit, and so hardy for an ever-blooming Rose that It will remain out all winter safely with slight protection. (See cut.) Price, 1st size, 50c. each, \$4.50 per doz.; 2d size, 30c. each, \$3.00 per doz.; 3d size, 10c. each, \$1.00 per doz.

Jew Pink Ever-blooming

PINK SOUPERT.

## Wonderful New\_\_\_\_ ...Many=colored Rose, INCONSTANT BEAUTY.

A wonderful new Rose, derlying its name of "Inconstant Beauty" (Beauté Inconstante) from its quality of producing flowers of different shades on the same plant. The colors vary from crimson to light plnk, through shades of tawny red, light yellow with orange and citron red centre, pale flesh with plnk centro, orange chrome and deep rose, all these colors being frequently seen on one bush at the same time. The beauty of color effects is indescribable. Plant strong and vigorous, flowers full and double. It is a true Tea Rose, consequently ever blooming and deliciously fragrant. (See cut.) Price, 1st size, 50c. each, \$4.50 per doz.; 2d size, 30c. each, \$3.00 per doz.; 3d size, 10c. each, \$1.00 per doz.

## HE YELLOW CLOTHILDE SOUPERT, --"MOSELLA."

A new Rose of exceptional merit, a fitting companion to that fine bedding variety, Clothilde Soupert (included in our "Cashmere" Collection on p. 130) and the Pink Soupert (see cut). Mosella is a beautiful light yellow, shading to a light buff in the centre and creamy white towards the ends of the petals. Like the "Soupert," it is dwarf and bushy in hablt, but is even more graceful. It blooms in clusters, full, double flowers of large size, and flowers most abundantly. With these valuable traits it cannot fall to become very popular. (See cut.) Price, 1st size, 50c. each, \$4.50 per doz.; 2d size, 30c. each, \$3.00 per doz.; 3d size, 10c. each, \$1.00 per doz.

# PETER HENDERSON & CO., NEW YORK.... FOUNDED 1847.

KAISERIN

AUGUSTA VICTORIA

Best White Ever-blooming Garden Rose.

Mr. Weber in the Duchess of Monaca's gardens, whose Roses are famous throughout Europe. Price for this grand new Rose, 1st size, 50c. each, \$4.50 per doz.; 2d size, 30c. each, \$3.00 per doz.; 3d size, 10c. each, \$1.00 per doz.

NOTE.—The third size of all Roses is the only one that can be sent safely by mail. The first and second sizes had better be sent by express with soil on the roots.

ing to rich blush. This Rose must not be confounded with another of the same name from a French source. The Rose we offer was raised by

Varieties not offered elsewhere in this Catalogue. Examine the list carefully; it contains the very finest of the old standard sorts.

*.* LTHOUGH we do not offer as long a list of varieties of Roses as some, yet our stock in quality, condition and extent Is unequaled, and we contend that our customers are safer in selecting from our list of choice tested varieties than if we offered a long list, which would of necessity contain many inferior sorts. SEE PRICES AT END OF LIST.

## A Quartet of Bedding Roses.

These are the finest bedding sorts, and a bed of them will give flowers all summer loug. Even the smallest size will bloom abundantly this season.

#### AGRIPPINA. Crimson.

Second only to "Hermosa" in hardiness and prolusion of bloom. Color, rich shade ol crimson.

#### BON SILENE. Carmine.

Although an old Rose, this is still one of the most satisfactory for bedding. It is very vigorous, blooms in wonderful profusion all summer long, beautifully formed buds of a rich carmine shade. During the full season it is superb.

#### THE QUEEN. Pure White.

A splendid ever-blooming garden Rose, benutilul in the bud and grand in the open flower. A very vigorous, healthy grower.

#### HERMOSA. Pink.

A grand bedding Rose, prollfic in blooming, and almost entirely hardy, hnvlng lived lor years in the New York cemeterles.

1st size, set ol 4 lor \$1.50; 6 sets lor \$8.00; 12 sets lor \$15.00 2d " " 1.00; 6 " 5.00; 12 " 9.00 3d " " 40; 6 " 2.00; 12 " 3.50 1st size, 50c.; 2d, 30c., and 3d, 10c. each, \$4.50, \$3.00, \$1.00 per doz.

## Dwarf Bedding Roses.

Polyantha or Muitiflora Class.

Ol great value for bedding. They are of dwarf habit, and are continuously la flower during the entire season. They bloom in clusters of from 25 to 100 flowers in each cluster, the single flowers being about 1½ inches across. These Roses are hardy in this latitude with slight protection, and are particularly valuable for planting on the borders of beds of tailer-growing sorts. They are also largely used for borders in cometery plots.

Clothilde Soupert. (See "Cashmere" Collection, page 130.) George Pernet. This variety is the best of its class. Color, bright pink with George Pernet. This variety is the best of its class. Color, I coppery yellow at the base of the petals.

yellow Rose; best of its eolor. (See cut.)

Prince Camille de Rohan. erlmson maroon, almost black.

Ulrich Brunner. Cherry-red: a grand Rose; very free blooming.

DORMANT ROSES.

PERSIAN YELLOW

ALL BUDDED LOW ON BRIER STOCKS. 

GAIN we offer a fine grade of A dormant hardy Roses, to satisfy a demand from many eustomers for plants that ean be planted outside early in spring, before it is safe to set out plants that are growing in pots, and consequently are in full leaf. The illustration shows the character of the plants we supply;

the character of the plants we supply; also the method of planting and pruning them after being planted. We can supply these from the time this catalogue is issued up to April 15th; after that time they can only be supplied from pots, at the prices quoted at the end of the list. If planted

as shown in the illustration, these Roses, although budded, will emit roots where the true Rose joins the Brier stock, and will eventually become established on their own roots. The great value of these budded Roses lies in the fact that they produce better flowers and make stronger plants in a shorter period than those grown from euttings; and the advantage is that having no soil on the roots and being dormant, they are of little weight and can be sent cheaply by express. Buy early and store in cellar until ground is ready.

grand Rose in every way. Anna de Diesbach (Gloire de Paris).

Rich carmine. Ball of Snow (Boule de Neige). Large, pure white, globular flowers, very fragrant, almost ever blooming, very long stems; one of the most useful

of the class BARON DE BONSTETTEN. Blackish crimson, with vivld red shadlngs. (See cut.)

Alfred Colomb. Carmine crimson, a | Baroness Rothschild. An exquisite

shade of satiny pink. apt. Christy. Delleate flesh eolor, Capt. Christy. Delleate flesh color, deepening in shade toward the eentre; one of the most beautiful of Roses. The foliage is quite distinct;

very free in flowering.
oquette des Alpes. White, tinged
blush, medium-slzed flower, semi-Coquette des Alpes. eupped in form, a fine variety.

Countess of Oxford. Vory profuso; soft, rosy carmine.

See prices at end of list above.

Dormant Plants of the above, shown in illustration, purchaser's selection, 30e. each, \$3.00 per doz., \$20.00 per 100. Our selection, 25e. each, \$2.25 per doz., \$16.00 per 100. Full set of 29 sorts for \$6.00. Cannot be supplied after

April 15th.

Price for plants growing in 5 and 6 inch pots, ready April 15th: Extra Selected Plants, 75e. each, \$7.50 per doz. Collection of 29 grand Roses for \$15.00. Second Grade of the above, the price of the second fine plants, 50e. each, \$5.00 per doz. Set of 29 sorts for \$10.00.

BARON DE BONSTETTEN.

LIBERAL PREMIUMS FOR PRESENT 5. Please consult it before ordering.

# PETER HENDERSON & CO., NEW YORK.

AUGUSTINE GUINOISSEAU.

(White La France.)

A "sport" from that fine hardy Rose, "La Franco," and similar to it in every respect, excepting coior, which, in this new sort, is a unique shade of fiesh white; hence its title of "White La France." On account of its great freedom of bloom, deliclous fragrance and hardlness, it has become very popular. Price, 1st size, 60c. each, \$6.00 per doz.; 2d size, 50c. each, \$4.50 per doz.; 3d size, 20c. each, \$2.00 per doz. (See cut.)

## ROSES.

General ... ... Collection.

We offer below a fine assortment of Hardy Roses carefully selected from our large stock, ail inferior varieties having been discarded.

NOTE.—All these Roses are grown on their own roots.

A. K. Willams. Carmine red, changing to magenta.

Alfred Colomb. Very large and giobular; clear bright cherry.

Anna Alexieff. Very pretty shade of rose; large and fuil.

Baron de Bonstetten. Biackish crimson, vivid red shadings.

Caprice. The llowers are large, ground color soft satiny pink, distinctly striped and dashed with white and carmino. Of the many striped hardy Roses introduced, this is easily the best, being the most constant in its character and most distinctly marked.

the most constant in its character and most distinctly marked. Cho (new). Satin blush; very fine in every way.

Capt. Hayward. Rich carmine crimson; extra good.
Countess of Oxford. Soft rosy carmine.
Coquette des Blanches. Puro white; very free blooming.

Duke of Edinburgh. Dark velvety crimsou maroon.

James Veitch. Rosyred, over blooming.

Luxembourg. Crimson searlet.

All plants are sent by express (buyer paying charges), unless otherwise ordered. See page 122.

1st size, 50e. each, \$4.50 per doz.; 2d slze, 40c. each, \$4.00 per doz.; 3d size, 15e. each, \$1.50 per doz.

SWEET BRIER.

# HENDERSON'S "AURORA" COLLECTION

(For Season of 1899-See Colored Plate Opposite.)

#### SIX SUPERB HARDY EVER=BLOOMING ROSES.

Roses that will live out all winter lightly covered. Roses that will bloom all summer properly cultivated. Roses that are fragrant, thrifty and bright colored.

#### "Mademoiselle Germaine Trochon"

Among the many new Roses imported by ns of late years there are none, in our opinion, which are liable to have a wider popularity than this. It is an entirely new color in the Hybrid Teaclass, and it has proven hardy in our climate. The best description we could give of the Rose is that given to the Tea Rose "Sunset," which we introduced some years ago and which created a profeund sensation. Technically described, it is orange yellow, with shades of buff, fawn and light yellow; the interstices between the petals show depths of coloring approaching what is very frequently seen in our snnset skles and which originally suggested the name for the "Sunset" Rose. Price, 1st size, 60c. each, \$6.00 per doz.; 2d size, 50c. each, \$5.00 per doz.; 3d size, 30c. each, \$3.00 per doz.

## "Souvenir de Wootton"

The continued influx of new varietles, the popular demand for noveltles, has a result occasionally of, for a time at least, relegating to comparative obsenvity some other meritorious sort. This, in a measure, is true of Souvenir de Woetton, one of the best all-round Roses ever raised in this country. The Introduction last year of that fine Rose, Mrs. Robert Garrett, which we show on the colored plate (see page 141), must direct attention to the other fine Roses raised by the same grower, and it is partiy for that reason, but principally because of the intrinsic merit of the variety, that we give prominence this year to Souvenir de Wootten—or "Woetton," as it is popularly called.

The color is a beautiful shade of carmine crimson, and in the open ground in the fall and in spring, befere extreme warm weather sets in, it is, in most cases, a very rich crimson without any carmine shades, almost the equal of the famous "Jack" Rose (Gen. Jacqueminot). Like all Roses of this color, it is liable to iose it, to a great extent, in very warm weather, but it retains it better than any Rose of its class. It is deliciously fragrant, perfectly hardy, a constant and most prolific bloomer, every new shoot forming a llower bud, equally valuable for summer and winter blooming, and is one of the most satisfactory Roses for the garden or greenhouse. Price, 1st size, 50c. each, \$4.50 per doz.; 2d size, 30c. each, \$3.00 per doz.; 3d size, 10c. each, \$1.00 per doz.

#### "Souvenir du President Carnot"

A Hybrid Tea Rose of the greatest promise. It is unquestionably the linest Rose of its color introduced in a decade. Whether considered from the standpoint of the commercial cut-llower grower or from its fitness for garden work, this Rose is without a superior, and it is doubtful if it has an equal. The growth is vigorous, the foliage dark green and very handsome, but the glory of the variety is in its flower. It is very large, both in the bud and in the expanded flower, double to the centre and opens beautifully. Technically described, it could be called a rosy flesh, very soft in the centre, and shaded with a lighter flesh at the end of the petals. It has taken from rank already in the metropolis. Price, its size, 50c. each, \$5.00 per doz.; 2d size, 40c. each, \$4.00 per doz.; 3d size, 15c. each, \$1.50 per doz.

#### "White Maman Cochet"

What has been so long desired, viz.: a pure white, hardy, everblooming Rose, has been at length obtained in this grand variety. It has all the requisites of a perfect garden Rose—substance, size, fragrance, hardiness, vigor and profusion of bloom—rivaling the best of the monthly ever-blooming Roses in the latter all-important quality. It is a "sport" from the well-known and mnch-vajued Rose "Maman Cochet," Inheriting all its fine qualities, full and firm buds, long and pointed, the ideal shape for a Rose, and keeping a long time when cut. Wherever fine Roses are grown or a hardy white ever-blooming Rose is wanted the White Maman Cochet should be planted. Price, 1st size, 75c. each, \$7.50 per doz.; 2d size, 50c. each, \$5.00 per doz.; 3d size, 20c. each, \$2.00 per doz.

## "Mrs. Robert Garrett"

In introducing this grand Rose last year, we promised that it would prove to be adapted to our climate, and that promise has been fulfilled. The Mrs. Robert Garrett was raised by Mr. John Cook, the veteran raiser of line Roses, including Souvenir de Wootton and several others, and is a cross between Sombreuil and Mad. Caroline Testout. With two such parents this fine result might be anticlpated.

The following description was written by our artist, after study-

ing It for the Colored Plate:

"It is a difficult matter to describe the coloring of a Rose; much of the coloring is due to its form and its semi-transparency, and is generated as it were in the Rose itself. A shallow Rose cannot have the beautiful color effects seen in a Rose like Mrs. Robert Garrett, which is of remarkable depth, even in the fully opened llower. Its petals are of great substance, containing more than the ordinary amount of coloring matter. Speaking broadly, the general color effect of this Rose may be described as being a glowing shell-like pink. It is marvelously beautiful, whether considered as a single specimen or in a bunch, but to be thoroughly appreciated should be seen in the diffused light of outdoors, with all its manifold charms accentuated and reinforced by its own background of living green." Price, 1st size, strong 2-year-old plants, 75c. each, \$7.50 per doz.; 2d size, 50c. each, \$4.50 per doz.; 3d size, 25c. each, \$2.25 per doz.

#### "La France"

There are many new Roses which might be put in the "Aurora" Collection and be worthy of a place in it, but there are none, old or new, which could successfully dispute the claim of "La France" to a place in it.

to a place in it.

We cannot speak too highly of this superb Rose, which every year becomes more popular. Flowers large and beautiful, either in the bud form or when expanded; peach-blossom color, shaded pink and slivery rose. It is very free blooming, every shoot forming a beautiful llower. In addition to this, it is entirely hardy with a slight protection of leaves, and most deliciously fragrant, thus combining in a marked degree all the qualities of a perfect garden Rose. Price, 1st size, 50c. each, \$500 per doz.; 2d size, 40c. each, \$4.00 per doz.; 3d slze, 15c. each, \$1.50 per doz.

PRICES:—First size, The "Aurora" Collection of six hardy ever-blooming Roses............\$3.00. (If bought separately would cost \$3.60.)

Second " " " " " 2.60.)

Third " " " " " " 1.15.)

Chrysanthemums.

FAIR HARVARD. (Offered last year as No. 9.)
For details of Name Contest see page 3. The rich crimson variety shown on colored plate opposite, flowers very large and deep, measuring naturally, when well grown, 7 implies and even serves and preserves deep.

7 inches and over across and nearly as deep. The color is an exceedingly rich shade of reddish crimson, with a velvety finish, very rich; the petals are broad and very gracefully arranged, failing away from the centre In graceful curves while the centre petais remain partlaliy upright, giving an artistic, informal appearance to the flower, in striking contrast to many of the very

formal varieties. The stem is strong, the flowers being held upright, the foliage is first-class, and, taken altogether, it is easily the best in its color.

Price, 25c. each.

CROWNING GLORY. The yellow "Ostrich Plume" variety shown ou colored plate oppo-

site. This is by far the best of its class and color as yet introduced. Flowers of the largest size, as yet introduced. Flowers of the largest size, fine form and invariably covered densely with its unique "halry" growth, which is its "Crowning Glory." Price, 35e. each.

The massive variety with rose

FAIR DAWN. pink and white daintly blended, shown on the colored plate op-

posite. A grand seedling, which we have grown for two years, and superlor to anything In Its color we have yet seen. The flowers are enormous; with petals stretched they have measured fourteen inches. Petals extra broad, incurved, and fluted slightly, color white flushed with rose pink, daintly and charmingly distributed. A fine grower, foliage and stem all that could be desired. Price, 40c. each.

THE DEPOLICEOU The unique

THE BARRINGTON. maroon and silver variety shown on

the colored plate opposite. It is unique in its grand coloring and magnificent in lts great size and depth of flower, majestic in its broad petals and grand foliage. Price, 25c. each.

Special Offer.

The "Peerless" Quartet of New Chrysanthemums for \$1.00; three sets, 12 plants, for \$2.50; six sets, 24 plants, for \$4.50. These can be sent free by mail, if desired.

New Chrysanthemums of the Season.

Carefully Selected from the Leading Growers Alice F. Carey. A beautiful light shade of plnk reflex, having

New Chrysanthemum, "Fair Harvard," Formerly No. 9. (% Natural Size.)

SANTHEMUN

excellent keeping qualities, with extra good foliage and stem.
A grand commercial flower. Season, middle of November.
Autumn Glory. A beautiful shade of pink, and a grand exhibition variety. There is nothing like it in color; deep reddish saimon upon opening and gradually changing to a soft shrimp when fully finished. This variety has no touch of lavender.

Black Hawk. Largest and most beautiful dark crimson scarlet yet raised; looks like crimson veivet; the color long desired.

Soundless Snow. Requires no staking, very large and of Inter-Ocean type; color, white flushed pink, changing to pure white.

Frank Hardy. (White "Good Gracious.") This superb variety is destined to become popular and in large demand, both for exhibition and for the cut-flower trade. The flower is pure white, full, deep and solid; petals incurving in graceful folds.

H. W. Longfellow. A finely rounded incurving white variety.

H. W. Longfeliow. A finely rounded, incurving white variety, flushed with pearl-pink, broad petais, large size; stiff stem. Mrs. Arthur J. Caton. A large, incurved Japanese; color, bright bronze, shaded red on inside of the petal; flower of the largest

size for an early; growth and stem fine; foliage of great beauty.

Mra. C. H. Peirce. A soft, deep yellow; of robust habit, model strength of stem; heavy foliage up to the flower; uniform size. Large, full flowers of globular form, with straight petals curved in at the tip. Best November 6th to 25th.

of the Country. All Prize-Winning Varieties.

Madeline Pratt. Snowy white, high built, incurved bloom. A beautiful flower. Best from terminals, grown cool.

Miss Gladys Vanderbilt. Pearl-white, with lemon-shaded centre; an exceedingly fine and decided novelty, both in form and generai build. In season 1st to 15th of November.

Pennsylvania. Brilliant clear yeliow, same form and bulld as Philadeiphia; a grand flower in every way.

Robert G. Carey. A very beautiful globular, incurved white of good substance and good keeping qualities. Very valuable as a late white of good form. In season 15th to 20th of November.

Snow Queen. A large, nicely finished snow-white flower of rounded form, full to centre, slightly pointed petals and of great substance, strong stem and foliage. Oct. 20th to Nov. 5th.

Solar Queen. Heavily foliaged from the ground up to the flower;

an extra fine, early variety for "single stem pot plant"; a very large bloom; color golden-yellow. Very distinct.

Spotswood. A beautiful high-built, Incurved light yellow. This

variety will certainly make a reputation for itself, both as an exhibition and commercial flower. An extra good late yellow.

Wm. H. Chadwick. Certificated at Chicago, Boston, New York and Philadelphia. Immense, graceful bloom, waxy-wilte, tinted with Chawth, health atom and failure simply reputation. pink. Growth, habit, stem and foliage simply perfect. It cannot be praised too highly. Midseason or later.

Mme. Gastelier. Pure white, a large fluffy flower; one of the

earliest to bloom. (See cut.)

Mme. Marie Constans. Slivery white, eentre lemon yellow.

Mme. Mathilde Bettzich. Creamy white and rose, lemon centre.

Mme. Ve. Pasquier. Cream, with white edges and rose. Mrs. Chas. W. Woolsey. Pure white. In bloom October 5th. Price for any of the above, 15c. each, \$1.50 per doz., or the full set of 25 sorts for \$3.00.

The following varieties were selected from over 40 new seedlings, they, in turn, being a careful selection of the best out of the hundreds of new seedlings raised by Mr. Thos. H. Spaulding, from whom we purchased the

M. Valery Larbaut. Creamy white and rose, lemon centre. Prof. Welter Croz. Petals curled, white, earmine centre.

Vve. Chiquot. Centre brick red, edged brilliant yellow. (Pompon.)

eedling (Incusanthemums of entire stock upon his retirement from business. Some of the finest varieties in commerce came from him, and these are worthy of the raiser,

Anna Held. A pleasing shade of rosy pink, large flowers, can be grown to 10 inches, broad petals, flat flower, slight anemone centre; very attractive for exhibition purposes.

Bird's Nest. Clear yellow, slight anemone centre of deep yellow, petals incurving loosely, forming what looks like a bird's nest, hence the name. A very distinct variety.

Florence Turner. Pale primrose yellow, rellexed petals incurving with age, foliage and stem good. This will indoubtedly make a distinct and good exhibition variety, well grown.

Idol's Eye. A fine shrimp pink, perfect globular llowers, petals

eupped and incurved; very beautiful at night.

Klondike. Execedingly rich golden yellow, reflexed petals, large solld flower, stem and foliage first-class.

make a capital variety for exhibition or cut blooms.

Matterhorn. Pure white, reflexed, drooping petals, large double flower, stem and foliage first-class. Well grown, this should

Mrs. C. F. Diehm. Large blush white with petals irregularly marked with pink; a high-built globular flower. Fine stem and follage.

Mrs. Wm. Massie. Soft, white, deeply tinged with light rosy pink, a large globular llower, finishing to a perfect dome, petals broad and eupped; a fine variety. Seored 81 points at New York with only moderately developed blooms.

Setting Sun. Deep yellow, shaded bronze, large broad petals slightly cupped, flower of great depth and substance, rigid stem, foliage up to llower. This is the most brilliant yellow we have yet seen; when well grown, it must prove of great value, either commercially or for exhibition.

sserfall. Very good rellexed white, in bloom October 10th; valuable for its earliness and purity of eolor. Wasserfall.

Price for new seedling Chrysanthemums, 20c. each; set of 10 for \$1.50.

Mrs. Perrin. The nearest approach to true plnk. Globular form, incurved, full, and with a finish as fine as satin. It secred 100 points before the New York Committee. Received first prize

wherever shown as best pink.

w York. Very large Incurved Japanese, filling up well to the New York. centre; of great substance and regular outline; color white, follage and stem first-class. Certificate and silver medal at Phlladelphla. Certificated two years at New York.

Day Dawn. A grand, large, early white, eentre creamy lemon upon opening, gradually becoming pure white; full and double. Received eertificate at Boston.

Infatuation. Clear white, changing to creamy white with age; a new and distinct type. Fine, bold, perfectly globular llower, with extra good stem and follage. Obtained 80 points at New York. A distinct exhibition variety.

Price, 15c. each; set of 4 for 50c.

mums as now offered will be sure to give satisfaction to purchasers.

Beau Ideal. A bright rose pink, without lavender shadings.
Beauty of Exmouth. Ivory-white, of great substance.
Bronze Giant. A mammoth incurved Japanese; color rich golden yellow, heavily shaded and intermingled with deepest crimson.
Charles Davis. Grand size and form; rich yellow, shaded buff.
Clinton Chalfant. A magnificent golden yellow.
Col. W. B. Smith. A grand, deep yellow of finest form and size. Dawn. Delicate rosy blush; flowers of the largest size. Dorothy Toler. Deep rose plnk; grand globular form.
Eugene Dailledouze. Large, full, double, intensely bright yellow. Flora Hill. Extra fine late white, very large and deep. Gettysburg. This is a deep crimson variety; petals broad.
GOLDEN WEDDING. This is undoubtedly the grandest golden yellow variety ever introduced. It is a remarkably vigorous grower and has such strength of stem that it carries its great globular llowers erect, glving it a bold majestic appearance. Good Gracious. The color is a very good shade of peach-pink.

G. W. Childs. Deep velvety crimson; large llat flower.

H. L. Sunderbruch. One of the very finest of exhibition yellows. Inter-Ocean. Color, glistening pearly white, suffused pink petals. Iora. A beautiful, dlsheveled, light salmon pink.
Ivory. Puro white; a splendid free-flowering variety. Joey Hill. Color, deep cardinal red, faced with old gold. J. Shrimpton. Bright crimson, of largest size and perfect form. Major Bonnaffon. Grand incurved yellow of largest size. Marie Louise. Beautiful recurving white, with interlacing petals. Mand Dean. An extra large-flowered variety; petals broad and Maud Dean. An extra large-flowered variety; petals broad and incurving; color, pink, almost rose, an unusual shade.
Mayflower. A grand, bold white; very largo and incurving; strong stem; good foliage; fine exhibition sort.

Titmouse. Tubular rays, white, pink tinted; centre paic yeliow. Toucan. An odd shade of reddish buff: well-formed centre, bright yellow within, pale yellow without.
Yellow Hammer. Flower large, bright chrome yellow; rays

broad, slightly twisted in two rows; centre compact.

Price, 10c. each, \$1.00 per doz.; set of 15 sorts for \$1.25.

# PETER HENDERSON & CO., NEW YORK. FOUNDED 1847.

T is difficult to concelve anything more unique, more pleasing, or more satisfying than this new plant fresh from the Orient. It is easily grown, and must become immensely popular. There is nothing approaching it, with its soft, crimson-scarlet, fluffy, tall-like blossoms, 20 to 30 inches long, on specimen plants. We have had it growing

Insure greenhouses, and can indorse all the introducer says below. For window, greenhouse and conservatory its value cannot be overestimated. It will add a new charm to the garden.

"We have great pleasure in offering this, the best, new, flowering plant of the century. For all purposes of ornament and decoration, this large crimson-scarlet-flowered Acalypha amply fulfils every requirement. For the plant houses, conservatories or rooms—and under all and every condition where a startling and beautiful effect is needed—nothing can equal it. Its easy culture, freedom of growth and perpetual flowering characters are indispensable recommendations. From January to December it can be had in blossom, and with quite ordinary attention.

"To speak of this plant as superior to Poinsettla pulcherrima or Anthurium Scherzerlanum is faint praise, seeing that neither of these plants is as handsome, and each has a season of bloom only, while the Acalypha, by a much simpler and quite easy culture, can be had always in bloom, young and dwarf plants flowering as freely as the more matured plants. It can be grown on single stems, as bushes, as standards, or trained to almost any shape. Its elegance and beauty in all positions is such that it must be seeu to be realized; it is perfectly true to say that it is a sensational plant and haffles description

it is perfectly true to say that it is a sensational plant and baffles description.

"For table decoration and for cutting, each long, brilliant, searlet-crimson inflorescence will prove indispensable; their highly ornamental effect cannot be overestimated. We can thoroughly recommend this novelty. Until we flowered it we could scarcely believe the description sent by our collector, Mr. Micholitz, who wrote that the medium-sized plant, with its countless dazzling flower spikes, was the most striking object he had met with on his travels." (See cut.) Price, 75c. each, \$7.50 per doz.

# AGERATUM, PRINCESS PAULINE.

A most distinct and novel variety of dwarf, compact habit, rarely exceeding five inches in height, its peculiarity being that both colors, blue and white, are combined in the same flower, the body of the flower being white, while the stamens are of a light sky-blue; one of the most distinct new bedding plants. (See cut.) Price, 15c. each, \$1.50 per doz.

NEW AGERATUM, PRINCESS PAULINE.

doz., \$12.00 per 100.

\_SAVITZII.\_\_

# CHINESE AZALEAS (Azalea Indica).

No plant has increased in popularity during recent years with such amazing rapidity as the Chinese Azalea. A few years ago the annual importation of these from Belgium and Holland into the United States would hardly exceed twenty-five thousand, to-day it probably reaches two hundred and fifty thousand. At Easter they are seen in every church and in the windows of our finest residences throughout the country. Keep outdoors in a shady place in summer. DOUBLE-FLOWERED AZALEAS.

Apollo. Large seml-double flower; blood-red. Very showy. Bernard Andrea Alba. Very fine double white. Concorde d'Orange. A grand double red, the best extant. Dame Matson. Clear white, red markings. Very showy. Deutsche Perle. Pure white; fine for forcing. Very early. Docteur de Moor. Intense rose and violet. Empereur de Bresil. Double pink, edged white.

Illustration. Pink, marked white. A very pretty sort.

Imperatrice des Indes. Rose, edged white.

Mme. Camille. White, striped and stained red. Mme. Van der Cruyssen. Bright rose. (See cut above.) Niobe. Fine double white of extra substance. Raphael. Purc white, double flower of fine form; late bloomer. Simon Madner. Large flower; intense rose. Vervaeniana. Exquisite form, splendid habit, very free-blooming, and one of the very best for forcing. A beautiful rose, deeply edged with white and spotted slightly with rosy red on the lower part of the upper petals, the white delicately feathered with rosc where the two colors join.

SINGLE-FLOWERED AZALEAS.

Apollon. Large, single white, sparingly lined red. Eugene Mazel. Salmon rose, upper lobes.

Mme. de Grevy. Flesh color, spotted crimson.

Queen of Whites. Very fine, pure white.

Roi d'Hollande. Blood-red, spotted black.

Sigismond Rucker. Lilac rose, striped white.

Versicolor. Pure white, heavily striped and stained deep red. Fine plants, 14 to 16 inches across, \$1.50 each, \$15.00 per doz.; 12 to 14 inches, \$1.00 each, \$9.00 per doz.; 10 to 12

inches, 60c. each, \$6.00 per doz.
SPECIAL.—Specimen plants, 18 to 24 inches wide, \$3.00, \$4.00 and \$5.00 each, according to size; small plants (unnamed), 20c. each, \$2.00 per doz.

This unique variety is well shown in the illustratlon below, which represents a plant growing in a 6-inch pot, demonstrating its fitness as a pot plant for window or conservatory. The contrast between the green and white is sharp, and the habit of the plant is dwarf. It will be of exceptional value for edging subtropical beds, as the general style of the plant is such that it harmonizes splendldly with Palms, Dracenas, and especially with Crotons, for it bears full exposure to the sun with splendid results: it also grows in shade. Price, 20c. each, \$2.00 per

ABUTILON.

## ABUTILONS (Flowering Maples). General Collection of Standard Sorts.

Boule de Neige. Pure white, the best ln its color. Darwinii. Bright orange flowers, veined red. Eclipse. Golden spotted leaves, semi-drooping. Brecta. Bright rink, orange velns, flowers erect. Golden Bells. Deep, rich yellow, very free.

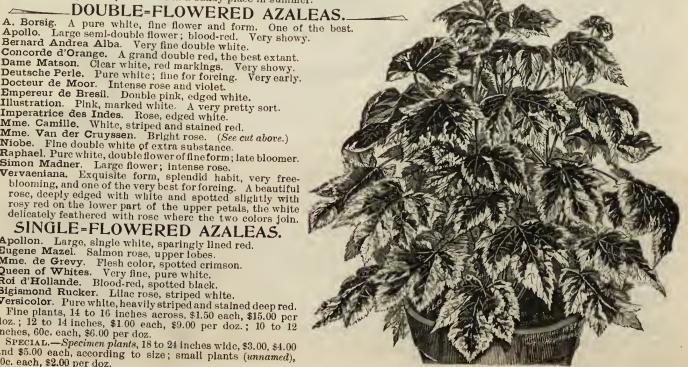

Erecta. Bright rink, orange ...
Golden Bells. Deep, rich yellow, very free.
Mary Miller. Deep rose, pretty pendulous flowers.
Megapotamicum (Syn. Vexillarium). A running
variety; bright red, yellow and brown centre.
Megapotamicum, var. Leaves spotted yellow.
Rosæflora. A pretty pinkish rose, flowers freely.
Spow Storm. Pure white, semi-dwarf in growth. Snow Storm. Pure white, semi-dwarf in growth. Santana. Deep red, fine flowers.

Thompsonii plena. Golden spotted leaves, double orange flowers. One of the most distinct. Souvenir de Bonn. Beautifully variegated leaves of good size, regularly and evenly marked with white and green; orange-colored flowers.

Price, 10c. each, set of 12 for \$1.00.

# =DWARF ABUTILONS.=

Distinct from the others, growing only about 18 Inches high and covered with flowers the entire season. Calypso, white; L'Africain, dark crimson; Infanta Eulalie, beautiful light blush plnk. Price for the above, 15c. each, 3 for 40c. Special Offer.—Set of 17 Abutilons, Including the new Japanese maple-leaved variety, for \$1.50.

NEW JAPANESE MAPLE-LEAVED ABUTILON, SAVITZII.

# PETER HENDERSON & CO., NEW YORK....

Beautlful flowering bulbs, which should find a place in every

window. They are admirable for pots.

# DEPA

"SPECIMEN" PLANT TUBEROUS BEGONIA.

# TUBEROUS BEGONIAS.

ALL SELECTED BULBS.

These are now the most popular plants for beds of summer flowers, oraspot plants for the greenhouse,

bulbs are all sound, well matured and of good size. For a time it was generally supposed that these could not be grown in the open air with success, but extensive plantings of them In various sections of the country have demonstrated their adaptability for this purpose. Nothing can exceed the brilliancy and richness of their flowers. From the time the first blossom appears until all growth is stopped by frost they are never out of bloom. (See cut.)

SINGLE TUBEROUS BEGONIAS. Separate colors. Scarlet, Yellow, Crimson, White, Pink and Salmon.

Price, dry bulbs, up to May 15th, 10c. each, set of 6 for 50c., \$6.00 per 100.

Growing plants, ready May 1st, 20c. each, set of 6 for \$1.00. By express only.

DOUBLE TUBEROUS BEGONIAS. In separate colors. Scarlet, Pink, white, Yellow, Crimson, Sal-mon. Price, free by mail, 30c. ea., set of 4 sorts, \$1.00, for dry bulbs, up to May 15. Growing plants, ready May 1st, 40c. ea., set of 4 for \$1.50. By express only.

BEGONIA REX. Valuable for the grand and varied markings of the leaves. 20c. each, 3 for 50c., \$2.00 per doz.

# BEGONIAS—FLOWERING SORTS.

Exceedingly useful plants for the garden or for pot culture in the house. They are never out of bloom and have graceful, waxy flowers.

Alba. Pure white. Alba Picta. Dark green leaves, lance-shaped, silvery spots. Argentea Guttata. Rich bronzy

green, silver-spotted.

B. de Chateau Rocher. Rich waxy red, very free blooming.

Erfordtii. Waxy pink flowers.

Fuchsoides Alba. Waxy white.

Hybrida. White flowers.

Hybrida Multiflora. Rosy pink.

Ingramii. Rose color.

Manicata Aurea. Green foliage, Irregularly marked yellow. 25c. Metallica. Crimson and maroon follage, pink and white flowers. Nitida Alba. Waxy white flowers. Rubra. Dark coral color. Saundersonii. Bright waxy red. Scandens. Trailing, bright red.

Thurstonii. Plnk and white. Vernon. A splendid bedding variety, waxy white and pink.

## Price, 10c. each, \$1.00 per doz.; set of 19 Begonias for \$1.75. NEW BEGONIA, GLOIRE DE LORRAINE.

This grand variety makes graceful plants about one foot high, foliage regular and of a bright green; the plant is loaded with rose-colored flowers of great beauty, remaining for many weeks without falling, and borne in large drooping panicles. It flowers from October to May in a shaded greenhouse, or sitting-room window.

The French, English, American and German horticultural papers have been unanimous in their praise of this magnifleent variety. It is grown by the thousand for the Paris and London markets, and will be equally popular here. Price, 50c. each, \$4.50 per doz.

## CALLA LILIES.

LITTLE GEM Calla Lily. This variety rarely exceeds 12 inches in height. The flowers are correspondingly smaller than the tall-growing sort, and are useful for loose bunches and bouquets. It is far superior as a house plant to the tall-growing variety. Price, 15c, each, 4 for 50c. Large plants, 40c. each.

White Calla Lily. Pure white, large, splendid flower. Price, 30c. each; smaller plants, 15c. each, 4 for 50c.

Spotted Leaf Calla. Dark green leaves, beautifully spotted with white; the flowers are white with a purple throat. Price, 20c. each, 3 for 50c.

lack Calla. A remarkable species, producing large purplish, velvety-black flowers with coal-black spathe. The foliage is stately. Price, 30c. each, \$3.00 per doz. Black Calla. Sct of four Callas, 1st size, for \$1.00.

## CAMELLIA JAPONICA.

We offer splendld plants of these bushy, well-grown It is seidom that such fine plants are offered for sale; all in splendid health, and of thrifty, clean growth. The varieties are the best extant, the pick of a Continental collection, and embrace double white, double pink, double red and double variegated. Fine, bushy plants well set with buds. Price, \$1.25 each, set of 4 for

# NEW GIANT BROWALLIA.

A most valuable addition to our list of summer-blooming plants. Most people are familiar with the old form of Browallia, and would scarcely recognize this grand new variety as of the same family. The flowers are Indigo blue, fully 2 inches across, and cover the plant when in bioom. Invaluable for summer beds of flowers or for

# OUNDED PETER HENDERSON & CO., NEW

## CANNA, PRESIDENT CLEVELAND.

This variety has attracted widespread attention the past season, and is conceded to be one of the very finest introductions of late years. Color is bright, distinct orange searlet; one of the showiest varieties. It is a fine, compact, vigorous grower, producing immense trusses and flowers of very large size. (See cut.) Growing plants, 40c. each, \$4.00 doz. Dormant roots, 30c. each, \$3.00 doz.

## CANNA, ROSEMAWR.

A grand new pink Canna. Its enormous masses of flewers and exquisite color attract immediate attention. The flowers are large, frequently two lnches across. The color is bright, rosy pink, elegantly mottled with rose, shaded rich golden-yellow at throat. The trusses are immense and borne just the right distance above the foliage to show to best advantage. piant makes a vigorous, handsome growth, averages about three feet in height, and is an early and continuous bloomer. (See cut.) Price, growing plants, 60e. each, \$6.00 per doz.

## CANNA, AUGUSTA.

A very striking and distinct new gilt-edge variety. Flowers five inches across, intense scarlet, widely bordered with clear golden-yeilow. Grows

about 3 feet high, and bears large, open spikes of rich and handsome flowers. Largest gilt-edge variety to date and entirely different from all others in color and form. (See cut.) Price, 60e. ca., \$6.00 doz.

## JAMES WOOD.

We have pleasure in offering this fine new Canna, raised by Alexander Marshall, gardener to Mr. John B. Dutcher, Pawling, N. Y., and was named by the latter gentieman in honor of his friend, Mr. James Wood, of Mount Klseo, N. Y., President of the Eastern New York Horticultural Society. The color is very distinct, being a true burnt-orange, the shade so popular at the present time. It is handsome in foliage and habit, blooms mest profusciy, grows in ordinary seasons about four to four and onehalf feet high. The substance of the petals is one of its excelling merits; the flowers, though large and of fine finish, hold on better than most Cannas, and so withstand the summer winds. These two latter features are very pro-nounced in this fine new Canna. Price, 75e. each, \$7.50 doz.

Caprice. Pink and white. Petals creamy white, heavily spotted with liae rose. Lower petai bright cherry red.

EVELAND

CANNAS.

PRES.C

Defender. Clear yellow, striped with bright scarlet; 3 to  $3\frac{1}{2}$  feet high. An early and very profuse bioomer, pro-ducing fine, large heads of broad-petaled flowers.

Giowing Giant Crimson. crimson, spotted with maroon. Grand spikes of large flowers, with well-rounded petals 11/2 inches wide. Very vigorous, bold foliage of deep green, growing fully 5 feet high.

Golden Pearl. Some flowers are goiden-yeilow, others are yeilow streaked and shaded red and illac. Very dwarf. A profuse bloomer.

Klondike (California). Pure gilded orange. A color much sought for for bedding. Flowers enormous; petals 21/4 ins. wide, well rounded, incurved. Trusses compact, erect, frequentiy 1 footacross. Densely crowded with flowers.

crimson with scariet shading. Dwarf habit, growing only 2½ to 3 feet high in rich soil. Trusses large, deep green foliage.

Topaz. The first pure yellow-flowered Canna of large size. A green of connection of the connection of th

ROSEMANR

COPYRIGHT 1899 BY PETER HENDERSON & CO.

grand Canna for effect. Bright green foliage, 3 feet.
Victoria. Immense trusses of large flowers on bold, heavy The three upper segments paie lemon-yellow, feathered, in centre only, with rose spots on pink ground. Lower petal is rich yellow with a distinct and hold design of velvety amaranth red.

Duke of Marlborough. This is decidedly the darkest and richest colored Canna in existence. The flowers are a deep, rich crimson maroon with a velvety appearance and good substance, the

almost black buds and very close head giving it a still darker look.

Duchess of Marlborough. This is of much stronger growth
than the Duke, the leaves being over 3 feet in length and a foot wide. It is a most conspicuous and attractive Canna, producing immense, branching spikes, often expanding 250 flowers on a single flower stem. The color is a pure rich pink, and being produced in such immense quantitles the effect is certainly grand and unique.

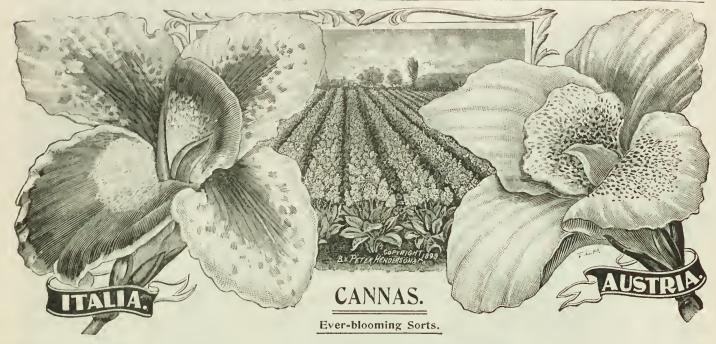

Price for any of the above, 40c. each, \$4.00 per doz. Set of 14 New and Rare

Cannas on this page, all growing plants from pots, for \$5.00.

# ESTABLISHED 52 YEARS. ....PLANT DEPARTMENT

# FOUNDED PETER HENDERSON & CO., NEW YORK

#### The Mew Giant Iltalia. .... Orchid=flowered Canna.

The coloring is gorgeous in the extreme, rich golden yellow with great patches of brilliant reddish erlmson and bregular spots of the same shade on the upper petals. It is strikingly unique, surpasses even an Orchid in color effects, and has a rich, oriental appearance. The flowers are six to eight inches across. The growth is stately, in ordinary seasons reaching six feet, broad and massive, beauty and strength combined, a wealth of graceful foliage and gorgeous flowers. (See cut.) Price, growing plants, ready May 1st, 40e. each, \$4.00 per doz. Dormant roots, 25e. each, \$2.50 per doz.

#### Austria. The New Giant .... .... Golden Lily=flowered Canna.

The claim of Italia to the title of Orchid-flowered is not better than this to Lily-flowered. It is, in truth, a giant, with flowers six to eight inches across, a giant in its superb growth, young plants set out in June forming dense spreading elumps, with 20 to 25 stems six feet high, and every stem surmounted with a spike of its glorious, golden, Illy-like flowers, a giant in its grand foliage, a magnificent giant in its every attribute. (See cut.) Price, growing plants, ready May 1st, 30e. each, \$3.00 per doz. Dormant roots, 20c. each, \$2.00 per doz.

## Selected Sorts of Recent Introduction. Foreign Varieties.

ADMIRAL AVELLAN. The best of the comparatively new dark-leaved varieties. Orange searlet, overlaid with salmon, a rleft, luminous appearance.

ALEMANNIA. Truly a "Giant" flowering Canna. The foliage

alone would be sufficient to render the plant beautiful. The flowers are enormous and surpass in size even those of the Canna "Italia." Outer petals scarlet, with a very broad yellow border, Inside searlet and dark red. 50e. each, \$5.00 per doz. MERICA. The first "Giant" flowering dark-leaved Canna. The beautiful foliage is of a bronze color with dark red hues and shining as if varnished. The flowers are enormous, beautiful glowing purpilsh red, flamed and striped. 50e. each, \$5.00 per doz. MIJULES CHRETIEN. Glossy rose selmon, sheding toward.

AMI JULES CHRETIEN. Glossy rose salmon, shading toward the edges to a deeper color; the base of each segment relieved by a light yellow blotch, and the reverse by a much larger one.

AURORE. Entirely distinct, orange salmon flowers of large size

and very heavy trusses, follage rich green. 4 feet.

CZAR ALEXANDER III. Very large flowers, brilliant carmine, produced in heavy spikes, green follage. 3½ feet.

DEPUTE RAVARIN. A magnifleent variety, spreading flowers of very rich erlmson. It resembles Alphonse Bouvier, except that the trusses of flowers are erect and larger, 5 to 6 feet.

F. NEUVESSEL. A splendid sort, a soft pleasing shade of earming treed size, excellent habit, follage dark green with bronzy.

mine; good size, excellent habit, follage dark green with bronzy markings; of strong robust habit, growing 41/2 feet. Very effective.

FRANZ BUCHNER. Entirely distinct from all others; color a deep orange suffused with searlet, with a delicate wavy fringe of yellow around the edge of the petals; dwarf, compact habit

FURST HOHENLOHE. Upper petals purest yellow, the lower slightly marked with erimson. Its excelling points are its great abundance of bloom, its neat, compact, uniform growth and its large splkes of flowers. 3 feet.

GRAF OSWALD DE KERCHOVE. Intense rich orange searlet, very bright; bronzy green foliage.

HORTENSE BARBEREAU. An exceptionally good bright eherry red, with large, heavy trusses of good-sized flowers.

For price see end of next column.

MAD. LEON LECLERC. This is a bright orange searlet with a heavy tip and narrow margin of yellow on each petal; entirely distinct from anything yet Introduced and a most pleasing addition.

MDLLE. BERAT. A most distinct and novel variety, being the nearest approach to a clear, rich pink yet introduced, a very soft shade of rosy carmine, unique; foliage green.

MME. A. BOUVIER. Flower large and spreading, a medium shade of red, dotted with deep crimson. Yellow edge and throat.

MME. PAVRICHON. A most prolific-flowering variety, flowers satiny carmine, with a peculiar orange sheen.

MME. SALLIER. An entirely distinct, variegated yellow variety. Flowers large, ground color a clear yellow, with bright scarlet stripes running through the petals, very distinct.

PAPA. Considered by many the finest red yet introduced. Grows about three feet high, with immense spikes of flowers of glant size and of fiae form; heavy, light green foliage.

PAUL MEYLAN. A beautiful shade of orange red, with golden

edge, there being just sufficient of this yellow border to intensify the orange; a most desirable free flowering variety.

J. BERCKMANS. A grand, robust growing Canna, large, deep green foliage, flowers a rich shade of earmlne crimson, soft and yet brilliant, broad petals and very large trusses.

ROBERT OWEN. A medium slze flower, quite distinct in color,

upper petals being of a light canary yellow, lower petals being irregularly striped and spotted with red.

ROI DE ROUGES. M. Crozy calls this the king of the reds, and it is certainly one of the finest of the many reds yet introduced; the flowers are of good size, with heavy petals, and are produced on stout, thickly-set stems; foliage green. 3 feet.

SIR TREVOR LAWRENCE. Large, round flowers, carmine rose with yellow border; foliago green. 4 feet.
SOUV. DE MAD. CROZY. Garnet red flowers, border and centre

brilliant yellow, green foliage. 4 feet. VICE-PRESIDENT LUIZET. Exc Excellent for massing, rich

cherry-red, large, compact spikes; follage green.  $3\frac{1}{2}$  feet. Price except where noted, dormant roots, 25c. each, \$2.50 per doz.; growing plants, ready May 1st, 40c. each, \$4.00 per doz.

# CARNATIONS.

# .....STANDARD SORTS.

Pure white, the leading variety for winter blooming. An invaluable variety for white.

Aramazindy. Snow-white, lightly penciled seariet.

Daybreak. Beautiful blush pink, very attractive.

El Dorado. Yeilow, penciled red. One of the best yellows.

Emily Pierson. Deep red, fine flowers of great substance. Harrison's White. A pure white Carnation of the largest size, long stems, very fragrant.

Lizzie McGowan. One of the best white varieties we have. Mayor Pingree. A fine light yeilow variety.

Meteor. Deep crimson, very free blooming.
Scarlet Wave. A "sport" from Tidal Wave.

grower and bright rosy red flowers.

Victor. A 'sport' from Daybreak, considered superior to it by many. Deep saimon pink.

WM. SCOTT. Flowers large and non-bursting, of a deep pink;

stems long, of good strength. (See cut.)

Price, 1st size plants, for summer blooming, 30e. each, \$3.00 per doz.; 2d size, 10e. each, \$1.00 per doz., \$6 00 per 100.

"MALMAISON." A wonderful Carnation, unequaled for size. measuring four inches across, and a beautifui shade of blush, similar to the Maimaison Rose. The fragrance of the "Malmaison" is exquisite, the most delicious of Carnations. This is largely grown for the London market.

Note.—We ean also supply dark pink Malmaison. Price for Malmaison Carnations, both colors same price, 30c. each, \$3.00 per doz.

# MARGUERITE MONTHLY CARNATIONS.

A new race of monthly Carnations which is of the greatest value for summer blooming. They bloom freely all summer, and the flowers aro mostly all double; they are all elegantly fringed and deliciously fragrant. Price, mixed colors only, 10c. each, \$1.00 per doz., \$6.00 per 100.

## HARDY GARDEN CARNATIONS.

Every eolor known in Carnations is represented, but having been grown from mlxed seed we cannot supply any special color. They give only one heavy crop of flowers in June. Price, 10c. each, \$1.00 per doz., \$6.00 per 100.

These make grand plants in pots for the conservatory or greenhouse and are becoming more popular yearly. They also do splendidly in beds outdoors in a shady place and in rich, light, free soil.

Augusta Carpentier. Spotted rose and crimson, red centre. Candidum. Bright pea-green, spotted with white.
Chelsonii. Pea-green, irregularly spotted carmine red. Fritz Kochelin. Veins white, body of leaf overlaid white. Guze de Paris. Green veins, surface silvery white, suffused pink. J. C. Box. Light green, spotted and veined pink and cream. Leopold Robert. Green, white and red spots.

Mme. de Halevy. Green ground, thickiy speckied with white and plnk.

Mme. Groult. Rich green ground, palo pink centre. Very pretty.

Meyerbeer. Red and white spotted. A fine variety.

Raymond Lemonier. Light green, veined and marked rosy pink. Souvenir de Paris. Rosy centre and biotehes, green ground. Viscount de la R. Ordan. Light green, webbed white and plnk.

Price, growing plants, ready April 1st, 40e. each, \$4.00 for set of 13.

# NEW GIANT TRICOLOR CUPHEA.

A grandly improved variety of the Cuphea Llavae with flowers almost twice the size, and a constitution vastly improved, perfectly healthy and vigorous. Three colors are combined in each flower, intense scarlet, indigo blue and white; tho tube is bronzy green and mossed like a Moss Rose. The plant grows about 15 inches high, partly trailing; is exceedingly useful for summer flowering in beds or vases. This grand acquisition is of the greatest value. (See cut.) Price, 15c. each, \$1 50 per doz., \$10.00 per 100.

LARGE FLOWERING.

HENRYII. A pure white, large-llowering variety, of fine form, and recognized

SPECIAL NOTICE. On account of the brittleness of the bark on Clematis it cracks very easily, and many people believe the plant to be permanently injured when such is not the case. We issue this notice on account of the numerous letters we get on the subject. We wish to say, also, that we examine all plants carefully before shipping, to see that they are in good condition, and if they die after being planted, as must sometimes happen, we do not agree to replace them. as by far the finest of the single white sorts. It is a much stronger grower than most of the other varieties, and is entirely hardy. Excellent for ceme-

terles or wherever a hardy climber is desired. (See cut below.) Large strong plants, 60c. each, \$6.00 per doz.; 2d grade, 40c. each, \$4.00 per doz.

Duchess of Edinburgh. This variety is perfectly double, Ilke a rosette. It is sweetly fragrant, and equally hardy and vigorous with the others. Price, 1st size, large plants, 60c. each, \$6.00 per doz.; 2d grade, 40c. each, \$4.00 per doz.

ARGE FLOWERING (Assorted), Belle of Woking. Slivery gray,

double flowers; very fine. Jackmanii Superba. Deep vlolet

purple. A grand variety.
Ramona. Lavender. Very large.
Alexandra. Violet, light centre.
Star of India. Reddish plum color.
General Grant. Rich purplish red. Countess of Lovelace. Bright bluish lilac, double flowers.

Sieboldii. Beautlful lavender. Lanuginosa Candida. Pure white. Miss Bateman. Silvery white, dark

anthers. An attractive sort.
Lilacina Floribunda. Lilae, very free. Gipsy Queen. Rich velvety purple. Price, large two-year-old plants, 60c. each, \$6.00 per doz.

FANCY COLEUS. Our stock of Fancy Colous Is unsurpassed; many of the finest varieties in cultivation originated with us, and we alm to keep only such as will give satisfactory results. Price, 10c. each, \$1.00 per doz., \$6.00 per 100.

COBÆA SCANDENS. growing A rapidvine, bearing large bell-shaped flowers, deep blue; will grow twenty feet and over in one season. Price, 20c. each, \$2.00 per doz.

Gorgeous-CROTONS (Assorted). follage plants, suitable for subtropleal bedding, and splendld for warm conservatorles and greenhouses. We offer a fine collection. Price, 50c. each, \$5.00 per

doz.

CLEMATIS PANICULATA.

## SMALL FLOWERING

# OLEMATIS

Paniculata. One of the most beautiful of our hardy fall-blooming vines. The flowers are pure white, very fragrant, borne in large clusters fairly covering the plant, so that it is a mass of fleecy white; the fragrance is delicious. (See cut.) Coccinea. Bright vermillon

scarlet; llowers cone-shaped. Flowers bell-shaped, purplish blue, very fragrant.

Flammula (Virgin's Bower). Pure white blooms in clusters, delicate fragrance.

Graveolens. A yellow-flowered varlety, very pretty.

Price for the above, 20e. each, 3 for 50c., 7 for \$1.00. Set of 5 small llowering Clematls for 75c.

# NEW RED

Madame Edouard Andre. entirely distinct and most novel variety, and the nearest approach to a bright red ever sent out. The plant is a strong, vigorous grower, being a hybrid of the popular Jackmanli, which it resembles in freedom of bloom, strong, vigorous growth and shape and size of llower, but is of a distinct carmine red color of a most pleasing shade, entirely different from all other varietles. Price, 60c. each, \$6.00 per doz.; 2d grade, 40c. each, \$1.00 per doz.

NEW OLEMATIS. PINK

CLEMATIS JACKMANH.

Mme. Baron Veillard. A unique shade ln Clematis, a pretty lavender pink, a fine

contrast to the stronger-colored sorts. Rapid In growth and slender, graceful habit. Price, 60c. each, \$6.00 per doz.; 2d grade, 40c. each, \$4.00 per doz.

The best-known and most valued variety of this JACKMANII.

The described in and most valued valuely of this popular family. A perfect mass of bloom when in full flower. Color, dark, rich, royal purple. The above engraving gives a good idea of this superb clematis. 1st size, 60c. each, \$6.00 per doz.; 2d grade, 40e. each, \$4.00 per doz.

A. W. Tait. Pure white, petals deeply toothed.

Asia. A delicate peach pink; it is very early in bloom, flowers large, very distinct in form, and very free in bloom. Black Prince. Rich maroon, almost black, velvety texture, marvelously large flower, and superb in every particular. Blanche Keith. The petals are long and twisted, very full and evenly arranged, and of a uniform rich yellow.

Baron Schroder. This is distinct from all others; petais of great substance and of a rich glowing imperial purple. Beauty of Eynsford. A very pleasing and distinct color; rich buff, shaded with chestnut, deeper in the centre.

Beauty. Snow-white, of perfect form and good texture;

always fuli to the centre; one of the very finest whites.

Beauty of Brentwood. This is difficult to describe, but may be classed as a purple magenta of a pronounced shade, very deep and rich. An odd and attractive variety.

Cochineal. Richest crimson scarlet.
Clifford W. Bruton. A clear, rich yellow with not a trace of green in the centre, perfectly double, outer petals re-

flexed, forming a very deep flower. 35c. each.

Crimson Giant. Deep crimson, and, as indicated by its name, a very large and superb variety.

Delicata. A lovely shade of pink, shading towards the

centre to a pale yeilow, a most beautiful combination.

Gioire de Lyon. Pure white, very free, and a large flower. Glare of the Garden. Intense scarlet.

Lyndhurst. Dark, dazziing crimson scariet.

Maid of Kent. The ground color is a rich crimson, the tips

of the petals are a pure snow-white; very unique.

Mrs. Hawkins. Rich sulphur-yeilow, shading to light

canary towards tips.

Mrs. J. Douglas. A distinct pinkish saimon.

Mrs. George Marshall. Flower large, deep rich magenta, heavily edged with velvety crimson.

Mrs. G. Reid. Pure white, conspicuously edged with rose lake, forming a charming combination.

Nymphæa. A beautiful variety of the "Cactus" type, delicate pink, shading to blush at the centre.

Oban. Very large ilowers, rosy lavender, overiaid silvery fawn; strong grower, an early and continuous bioomer.
Ionstrosum. Rich purplish crimson, very large flowers, Monstrosum.

6 inches and over across, broad ribbon-like petals. Professor Baldwin. Bright orange; very iong stems.

Robert Maher. Medium size, rich golden-yellow. Rayon d'Or. Bright orange, with a band of white.

Wm. Agnew. The grandest red Cactus Dahiia ever produced, and one that will eventually find its way into every collection. The flowers are of large size, sometimes measuring more than 7 inches in diameter, and always fuil to the centre; of perfect form and exquisite quality and finish. 35c. each.

Wm. Pearce. Rich suiphur-yeilow. One of the very best of this type. Zulu. Intense veivety maroon, almost black; large, fine ilower.

Price, except where noted, 15c. each, \$1.50 per doz.; set of 29 sorts for \$3.50.

Note.—We furnish dormant pot-grown roots up to about April 15th. We send growing plants from pots whenever our stock of roots is exhausted. The plants from pots are equally as good as the roots; we plant them by the thousand annually. As the price for both is identical wo will fill orders from either, as stock permits, when the order is filled. This applies also to Dahlias on next page.

NEW DAHLIA, SUNBURST. Offered last year as No. 10. For details of name contest see page 3.

A grand new Dahlia, bright orange red, very double, the petais reflexing back to the stem, forming a perfect ball 4 to 5 inches in diameter. The plant is haif dwarf, growing 3 to 4 feet high, flower stems 10 to 14 inches long, standing well above the foliage, which is very strong and a rich deep green. It is a wonderful bloomer, the freest ln our grounds. Price, 25c. each, 5 for \$1.00, 12 for \$2.25.

# NEW DAHLIA, POLAR STAR.

A grand, new, targe-flowered double Dahlia of which we purchased the entire stock. It was an unnamed seedling when it came into our possession, and as an appropriate title we have ealled it Poiar Star. The ground color is pearly white, that is the base of the petals is white and the centre of the flower is white, also; the color of the upper part of the petals is deep carmine, shading down to the white gradually, so that it leoks like a white ball surrounded by a halo of rosy light. A very decided acquisition, and very unique and distinct. Price, 50c. each, \$4.50 per doz.

FERN-LEAVED BEAUTY. A great acquisition and probably the finest of all bedding Dahiias, being a new and distinct type with fern-like foliage and a dwarf branching liabit; color creamy white, with a distinct margin of crimson around each petal. 20c. each, \$2.00 per doz.

GILT EDGE. A variety somewhat similar ln character to the above. The markings in this variety are white and gold, the latter shade being on the outer edge of each petal. 25c. each, \$2.50 per doz.

## FIELD-GROWN ROOTS, IN COLORS.

For those who wish large field-grown roots of Dahilas, and are not particular about named varieties, we offer separate colors without names, all large double flowers, as foliows: Yellow, White, Pink, Purple, Red, Variegated.

Price, 30c. each, or 6 large roots, one of each color, for \$1.50. By express only, buyer to pay charges.

# Twelve Best Double Dwarf Dahlias.

Those differ from the Large varieties in being more dwarf in growth, with smaller flowers and added profusion of bloom.

Beauty Inconstant. Rich yel-

low, striped vermillon. Black Dwarf. Maroon.

Ben Butler. Crimson maroon. Bredowillard. Golden-yellow. Dr. Stein. Crimson and plnk. Exquisite. Orange and scarlet.

German Boy. Salmon red. Little Prince. Red, mottled erlmson.

Snowflake. Pure white.

Little Valentine. Rich searlet. Laura. Magenta plnk. Miss L. Kramer. Carmine red. Price, 15c. each; set of 12 for \$1.50.

Ruby Queen. Clear ruby red, richly shaded; a general favorite.

Saturn. Rich eardlnal red; a magnificent variety. Souv. de Mme. Moreau. Immense size, deep pink, perfect form.

Sheik. Splendld deep yellow, very showy, very profuse.

Village Maid. Soft primrose yellow, blended, pencilled and suffused soft plnk and rosy earnine.

Vesta. Snow-white, large globular flowers, very fino.

Price, 15c. each; set of 26 sorts for \$3.00; any 6 for 75e.; any 12 for \$1.50.

See note on page 157 about Roots and Plants. A BOOK ON DAHLIAS, giving complete cultural instructions, may be had as a premium on orders. (See page 5.)

hemisphere. Grow in a shady place in summer, in soil composed largely of leaf mold or sandy peat. Grow in a sunny window in winter and turn frequently to the light to preserve the symmetry of the plant. Give free ventilation, moderate watering and a temperature of 65° Fahr.

# Double Fuchsias.

Cervantes. Deep prune eorolla; crimson sepals. Fine habit. Genius. Deep plum-eolored eorolla; dark crimson sepals.

Jos. Rosain. Dark plum eorolia; red sepals. A very showy sort.

MOLESWORTH. White corolla; erimson sepals. (See cut No. 2.) Mme. Thibaut. Pure white eoroila; crimson sepals, very large.

Mme. Bruant. Exquisite Illae mauve, streaked and veined with rose; sepals bright red. A very unusual varlety.

Prince Napoleon. Deep plum eolor; crimson sepals, follage golden.

Pres. Carnot. Rich mauve corolla; deep crimson sepais.
PHENOMENAL. Dark plum color, enormous size. (See cut No. 4.) Pres. F. Gunther. Light prune corolla; rich red sepals.
Rozains Patrie. White corolla; deep earmine sepals.
Storm King. White corolla; rich seariet crimson sepals.
Sapaly Freres. Rich purplish violet corolla; deep crimson sepals.

Vlolet blue eorolla; very dark red sepals, waxy lustre. Price, 10c. each; set of 14 Double Fuehsias, \$1.00.

# Single Fuchsias.

Annie Earle. Carmine corolla; white tube and sepals. Very free. Black Prince. Tube and sepals waxy earmine. Very distinct. Beacon. Carmine eoroiia; scarlet sepals. A distinct, charming sort. Brilliant. Searlet eorolla; white sepais. A tistinet, enarming sort. Brilliant. Searlet eorolla; white sepais. A very brilliant variety. Ernest Renan. Carmine corolla; white sepais. A handsome variety. LORD LYONS. Dark plum corolla; red sepais. (See cut No. 3.) Earl of Beaconsfield. Deep orange corolla and sepais; long tube. Injunitable. Violet caselles princes carried Divertes respectively. Inimitable. Violet corolia; erimson sepais. Dwarf, compact habit. Lottie. Carmine corolia; tender roso sepals. Cream-colored tube. MRS. MARSHALL. Carmine corolla; white sepals. (See cut No. 1.) Oriflamme. Prune-colored corolla; erlmson sepals. Speciosa. Orange scarlet eorolla; white sepals. A standard varlety. Price, 10e. each; set of 12 Single Fuchslas, \$1.00.

SPECIAL OFFER.—The full set of 26 Fuchslas for \$2.00.

# New Hybrid Gloxinias.

The handsomest of our summer-blooming plants, the rich and varied coloring of the flowers being beautiful in the extreme, many of them beautifully speckled; flowers three inches long by two inches In diameter, npright and pendulous; colors various and exceedingly rich appearance. Price, 20c. each, 3 for 50c., 7 for \$1.00, 12 for \$2.00.

SPECIAL.-GloxInlas in separate colors, as follows: white, red, violet, red white edge, and violet white edge. Price, 30c. each; set of 5 for \$1.25.

# House Ferns.

Our collection contains the choicest of the "Malden-hair" varieties, the "Sword Fern," and best basket and vase sorts. They are of the easiest culture, and nothing beautifles a home more than Ferns. Price, 1st size, 25c. caeh, \$2.50 per doz.; 2d sizo, 15c. caeh, \$1.50 per doz.

Adiantum Cuneatum. The best known of the "Maldenhair" Ferns. Price, plants from 3-ineil pots, 20c. each, \$2.00 per doz. Young plants, 10c. cach, \$1.00 per doz.

Globe Fern. (Davallia Bullata.) We offer this prepared in globe shape ready for hanging up. Price, \$1.00 each.

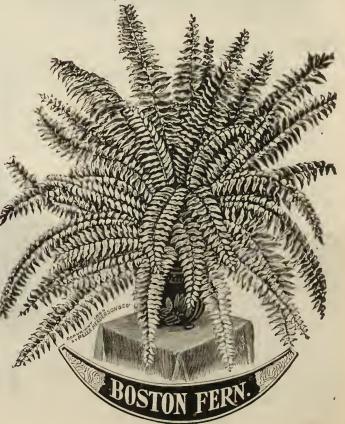

Moss Fern. (Selaginella Emiliana.) A very handsome variety

of upright habit, more like a Fern. Very graceful and pretty, and useful for jardinières or single speclmens in small Japanese pots. Price, 1st size, 25c., \$2.25 per doz.; 2d size, 15c., \$1.50 per doz.

# The "Boston" Fern. (Nephrolepis Bostoniensis.)

One of the most useful and ornamental of the "Sword Ferns." It is now grown by the thousand for the market ln ail tho largo eitles, and is steadily increasing in popularity. In well-grown speelmens the fronds attain a length of 6 or 7 feet, like plumes arelling over in every direction, in a most graceful manner. This beautiful Fern ls exceiient for outsido planting in shady borders. It is a very fine plant for langing pots or baskets on the plazza in summer and conservatory or window in winter. (See cut.)

Price, plants from 7 and 8 inch pots, \$1.50 each; 6-inch pots, \$1.00 oach; 5-inch pots, 60c. each, \$6.00 per doz.; 4-inch pots, 35c. oach, \$4.00 per doz.; 3-inch pots, 15c. each, \$1.50 per doz.

# FOUNDED PETER HENDERSON & CO., NEW YORK.

# NEW HYBRID GERANIUM, FLASHLIGHT.

(P. multibracteatum + P. Zonale.)

Offered last year as No. 11. For details of name contest see page 3.

Pelargonium multibracteatum is a distinct and handsome species found in Thibet and the warmer parts of central Asia.

After Innumerable attempts to hybridize it with the Improved Zonale bedding "Geraniums," the raiser secured a single vlable seed, pollenized with the variety Gettysburg. The result proves a com-plete fusion of the most desirable qualities of both parents, being larger in all its parts, and much stronger in growth than multibracteatum. The handsome, palmate foliage reaches five inches in diameter, borne aloft on long, graceful petioles, and is velvety green in color, usually marked with a light bronzy zone. The flowers are produced in a light or only zone. The howers are produced in the greatest profusion on stiff stems, averaging nearly a footlong and are poised in light, alry umbels of fifteen to twenty fiorets. The florets are usually more than an inch across and of a brilliant but tender carmine color, bright and unchanging until the petals drop, which does not occur until the last floret expands. The flowers are very desirable for cutting; they do not fall from the truss like ordinary Geraniums, the bright umbels on long stems re-sembling gigantie and highly colored trusses of

Price, 25c. each, \$2.25 per doz., \$12.00 per 100.

# DOUBLE IVY=LEAVED GERANIUMS...

These are the grandest of all house plants, or for baskets or vases they can be grown to droop or climb as desired. The flowers are very desirable for bouquets.

Cæsare Costa. Deep currant red; a grand variety.

Camille Flammarion. Deep rose color, large, full flowers.

Eden Marchii. Beautiful salmon pink.

Gallilee. Beautiful elear rose, slightly marked a deeper shade at base of upper petals. A very pretty and attractive variety.

Joan of Arc. The llowers are perfectly double, white as snow, and literally cover the plant when in full bloom.

La Rosiere. Immense trusses of large flowers, salmon pink. Mme. Thibaut. Very rich, deep rose. Large, magnificent trusses.

P. Crozy. Brilliant scarlet; a new departure lu this class.

Souvenir de Chas. Turner. Deep pink, feathered maroon on the upper petals, individual florets 2½ to 3 lucies across, and trusses 6 to 8 inches. By ali odds the finest variety extant at present. Price, 15c. each, any 4 for 50c.; set of 10 for \$1.25.

# «UNIQUE TYPES OF GERANIUMS.»

Silver Leaved. Beautiful pot plants; also valuable for bedding. Very telling in any collection. 10e. each, \$1.00 doz.

Bronze Geraniums. A very desirable class, equally valuable for pot plants or bedding. Mostly golden yellow foliage with rich bronze zone. 10c. each, \$1.00 per doz.

bronze zone. 10c. each, \$1.00 per doz.

Golden Tricolor. Gorgeously variegated, gold and bronze. Excelient pot plants for greenhouse and conservatory. 25c. each, \$2.25 doz.

Scented Geraniums. Rose, Variegated Rose, Nutmeg, Mint, Shrubland Pet, Mrs. Taylor (scarlet llowers), Citron, Lemon, Apple, Skeleton, Pennyroyal, Little Pet. 10c. each, set of 12 for \$1.00.

L'Elegante (Ivy-leaved). Variegated foliage. 15c. each.

Snowflake (Ivy-leaved). Green centre, banded white. 15c. each.

Happy Thought. Centre yellow, margin deep green. 15e. each.

Mme. Solleroi. Dwarf, follage green and white. 10c. each.

# "PANSY" GERANIUMS.

"THE WEDDING SET."

We take pleasure in being able to offer plants of these very useful Pelargoniums. There is nothing that gives better returns for a little care, when grown in the window garden, than these; literally covered with flowers and frequently remain in bloom nearly all summer; low, spreading habit and very easily grown.

The Bride. Large flowers, upper petals bright carmine, feathered white, lower ones white, suffused blush.

Bridesmaid. Upper petals maroon, lower ones clear white; this projects is shown in our below. An exceedingly pretty verify,

variety is shown in cut below. An exceedingly pretty variety. Bridegroom. Lavender pink, darker on upper petals, with dark blotches. Price, 20c. each. The "Wedding Set" of 3 for 50c.

New GERANIUM, "PROFUSION."

(See cut at bottom of page.)

A grand new Geranium, a seedling from Beaute Poitevine, which it resembles in color, but it is dwarfer in habit and much freer in bloom, being, in fact, unusually prolific in the production of flowers, a characteristic so marked that no other name seemed to fit it so well as "Profusion." It is a grand variety for bedding out in summer and equally valuable for pot plants, and we feel must become a standard variety for both purposes. Price, 25c. each, \$2.25 per doz., \$12.00 per 100.

# NEW "AUREOLE" GERANIUMS.

This peculiar and most beautiful type of Geraniums, which began with "Souvenir do Mirande," is now looked upon as the most charmingly unique of the entire race. The name "Aurcole" has been bestowed upon them as the most descriptive, indicating as it does their distinct centre with the outer border of a contrasting color.

# \_\_\_MADAME BRUANT.\_\_\_

(See accompanying cut, which is reduced nearly one-half from natural size.)

A grand variety, wholly distinct from any other in cultivation. White, veined with carmine take, florets regularly bordered with bright solferino; the arrangement of color is exquisite, often intermingling and producing a striped effect; the trusses are large and beautifully formed; the plant is a good, healthy grower and very free flowering. Everything considered, this is the most distinct and wonderfully colored variety ever sent out, and certainly the finest plant novelty of the year. Price, 25c. each, 5 for \$1.00, 12 for \$2.00.

# \_\_\_COLUMBIA.\_\_\_\_

A fitting companion to the above but a striking contrast. A light, high scarlet of dazzling brightness, two upper petals white shading to scarlet on the edges, extremely showy. Very valuable on account of its bedding qualities; does not lose its color in brightest sunshine. Price, 25c. each, 5 for \$1.00, 12 for \$2.00.

# \_\_\_FREEDOM.\_\_

A seedling from "Souvenir de Mirande," the first of this wonderful "Auroole" type of single Geraniums. It is a striking variety, the centre pure white surrounded by a band of the most dazzling rosy scarlet, which shades down into the white producing the "Aureole" effect in its greatest brilliancy. Price, 25c. each, 5 for \$1.00, 12 for \$2.00.

SPECIAL OFFER. The set of three "Aureoles" for 50c.

NEW DOUBLE GERANIUM, "PROFUSION."

For price and description see head of this column.

# COLLECTION OF NEW GERANIUMS.

## DOUBLE VARIETIES.

Pres. Leon Picas. A dwarf variety and abundant bioomer; bright ruby red, shaded dark violet. Very distinct and attractive. Comtesse de Castries. Flowers of very large size, petals elegantly

undulated, very bright soft roso marked with white.

Edw. Danglede. Large spherical trusses, beautiful magenta, base

Edw. Danglede. Large spherical trusses, beautiful magenta, base of upper petals marked orange.

Francis Magnard. Flowers large, maroon crimson brightened with violet, base of upper petals marked orange; very showy.

Docteur Dujardin-Beaumetz. A robust free-flowering variety

Docteur Dujardin-Beaumetz. A robust free-flowering variety with brilliant scarlet flowers; a magnificent variety.

Md. Jaulin. This is an entirely distinct color in the Bruant or bedding type. Centre of flower very delicate pink bordered with

bedding type. Centre of flower very delicate pink bordered with pure white, semi-double. The finest variety offered in years.

J. Ricaud. A double variety, enormous trusses, purplish crimson of a very intense shade, centre very distinctly marked white.

Hedwige Buchner. A very fine double white variety. Dwarf, compact habit and excellent either for pot culturo or garden. Price, 25e. each; set of 8 new Double Geraniums for \$1.50.

## SINGLE VARIETIES.

Camille Bernardin. Rosy peach, velned with bright rose, stroaked and marbled with pure white. One of the grandest Geranhaus. H. Dauthenay. Very distinct ceppery orange-red, with white eye. J. D. Cabos. Plant dwarf, color soft rose. A grand bedding sort. Docteur Argueyrolles. Flowers and trusses large, at first clear rose veined with very bright rose, white centre feathered violet. Alphonse Chardin. Beautiful nankeen rose with dark velns. L'Aube. Energous trusses suow-white. The hest of all single whites.

L'Aube. Enormous trusses, snow-white. The best of ail single whites. Fleur Poitevine. Large single flowers; brilliant rosy earmine, marbled and striped pure white, producing an aureole of deep orange carmino at the centre. A very distinctly colored variety.

J. Sallier. Trusses very large, single flowers, edges of petals carmine iake, tints of rose and bluish heliotrope in centre; upper

carmine lake, tints of rose and bluish heliotrope in centre; upper petals veined carmine and marked with orange at the base. SPECIAL OFFER. The "Sunshine" Collection of 16 New Geraniums for \$2.50; 25c. each if bought singly.

# GERANIUM, DOUBLE NEW LIFE.

A novel and distinct variety divided into two parts; the outer florets, which are large, are of a brilliant red. In the centre of these appears another semi-double pure white floret, effecting a charming contrast difficult to realize unless seen, and having the appearance of being produced artificially.

Price, 15c. oach, 4 for 50c., 12 for \$1.50.

.'.STANDARD SORTS.'.

offered last year, is fully reported on PAGE 3.3.3.3.

# DEPARTM

DOUBLE HOLLYHOCK.

# ē EW GIANT-FLOWERED HELIOTROPE. INGLE JAPAN IRIS.

# GIANT-FLOWERED HELIOTROPES.

Czar. A very dwarf-growing variety with black stems and enormous panicles of dark velvety violet bloom; very rich in color and of the "Giant type." Czarina. A fine companion for the above. A little taller grower; deep indige blue with white eye; enormous trusses of the "Giant type."

Le Cid. Semi-dwarf and very robust: panicles very large, and the florets of the very largest size yet obtained. Mauve passing to lilac and tender rose, with clear white eye. A very beautiful and attractive variety.

Le Poitevine. Enormous florets compose the very large truss of bloom; color, mauve, violet and azure with shadings of rose; a robust, semi-dwarf grower; very free and continuous in bloom, Price, 25c. each. Mixed Giant Heliotropes, 15c. each, \$1.50 per doz.

Note.—We can supply the ordinary Heliotropes, all fine sorts, fragrant, blue, lavender and white, at 10c. each, \$1.00 per doz.

## ...HENDERSON'S DOUBLE HOLLYHOGKS...

HENDERSON'S SUPERB. This grand strain of Hollyhocks we have secured only after years of careful selection. We grow annually thousands of these, and have for years selected those that show the most perfect form, largest size and purest color. We offer the following colors: Lavender, Blush, Light Apricot, White with Violet centre; Purple, Crimson, Pink, White, Yellow, Salmon, Maroon, Deep Rose. Young plants, from pots, 20c. each, 3 for 50c.; set of 12 for \$2.00. 2-year plants, mixed, 40c. each.

....HARDY GRASSES....

Arundo Donax. A giant reed, growing 10 or 12 feet high. Arundo Donax, Var. A variegated form of the above. Gynerium Argenteum. The "Pampas Grass." Gynerium Argenteum. The "Pampas Grass." Eulalia Gracillima. Narrow green foliage. Eulalia Zebrina. Marked with golden bars. Eulalia Japonica, Var. Leaves striped white.

Phalaris, Var. (Gardeners' Garters). Striped green and white. 2 feet (15c. each).
Price, 30c. cach, \$3.00 per doz.

# THE TRAILING LANTANA. (LANTANA DELICATISSIMA)

An old favorite and very useful when grown in hanging baskets as it will trail or climb as desired. It is entirely distinct from the bush Lantanas, smaller in foliage and lighter stems. Grown as a single specimen in a pot it is very attractive when trained to stakes or a pot trellis. The flowers are produced in marvelous profusion all season, a unique shade of pinkish illac, and fairly cover the plant. It is also very useful in the garden and makes a fine border plant for summer beds. (See cut.) Price, 15c. each, \$1.50 per doz.

# LANTANAS, TALL AND DWARF.

Lantanas, Tall. We have few continuous-blooming plants that afford a greater variety of colors than the Lantana. Twelve distinct talt varieties. Orange, crimson, yellow, lilac, rose, white, etc. 10c. each, set of 12 for \$1.00.

Lantanas, New Dwarf. Of great value for bedding, growing only 10 to 12 inches high and covered with flowers the whole summer

long. Price, 15c. each, set of 4 for 50c.

## LILY OF THE VALLEY.

Pips, 5c. each, 50c. per doz.; clumps, 50c. each, \$4.50 per doz.

## MOON FLOWER VINES.

The Moon Flower. So called from its rare peculiarity of blooming best at night, although it also expands its llowers In dull days. They are pure white, 5 to 6 Inches across, emitting a rich

Jessamine-like odor. Price, 15c. each, 4 for 50c.

Blue Dawn Flower. Intense violet blue, with reddish purple rays, 6 inches across. It blooms in the morning and on cloudy days. Price, 15c. each, 4 for 50c.

## OTAHEITE ORANGE.

A dwarf Orange, which bears a profusion of fragrant flowers and edible fruit. One of the most effective plants for the house. Price, large plants, 50c. each. Young plants, 15c. each, \$1.50 per doz.

## PELARGONIUMS.

Grand plants for pot culture. We offer a fine collection of twelve named sorts. Price, 30c. each, set of 12 for \$3.00.

## PHLOX DRUMMONDII. (Ready May 1st.)

One of the most popular of our summer-blooming plants. They flower Incessantly, varied colors. 10c. each, \$1.00 per doz.

## PRIMULA OBCONICA GRANDIFLORA.

The old Primula Obconica has long been a favorite pot plant for house and eonservatory enlture on account of its wonderful blooming qualities, flowering nearly all the year through. These varieties are great improvements, producing trusses of flowers nearly double the size of the older type. Price, 25c. each, \$2.25 per doz.

## PENLOPETES PHOENICIA.

A Japanese plant of great beauty flowering incessantly through the summer and fall. Saucer-like flowers, 11ch burnt-orange color. A very attractive garden or pot plant. Price, 25c. each, \$2.25 per doz.

## DOUBLE HERBACEOUS PÆONIES.

Magnificent hardy plants, almost rivaling the Rose in perfume, brilliancy of color and perfection of bloom. They are perfectly hardy, require little or no eare, and produce larger and finer blooms when well established. We offer double white, rose and crimson. Price, 30c. each, \$3.00 per doz., set of 3 for 75c.

#### PANSIES.

Henderson's Superb Strain. Grown from selected seed and offered as unequaled for size, form and color. 10c. each, 75c. per doz., \$4.00 per 100.

## "CHINESE LANTERN PLANT." (Physalis Francheti.)

A remarkably showy plant, covered with large, bright red globes; at first light green, gradually changing to yellow, orange and crimson. Price, 15c. each, \$1.50 per doz.

# HARDY PHLOXES, Fall Blooming.

We have taken great pains to have this collection contain the very best only.

Claude Gelee. White, suffused purple. Czarina. Pure white, dwarf. Cross of Honor. Lilac, margined white.

Dominican. Dark rose. Eclaireur. Salmon rose, dwarf.

E. Chatrain. White, shaded maroon. Harry Menier. White, crimson eye. Josephine Gerbeaux. White, pinklsh

centre. A very pretty variety.

Jeanne d'Arc. Dwarf, clear white. L'Avenir. Purplish rose.

La Nuit. Purplish maroon, very dark.
La Soleil. Soft rose pink, very charming.
Laure. Fine white, dwarf and compact.
La Vague. Beautiful, soft, light pink.
Lothair. Salmon pink, red eye.
Mme. C. Nillson. White, pink eye.
Mrs. Laing. Light purple, carmine eye.
Richard Wallace. White, carmine eye.
Sir Edwin Landacer. Brilliant carmine. Sir Edwin Landseer. Brilliant carmine. WHITE LADY. Pure white. (See cut.) Wm. Robinson. Salmon, rosy eye.

Price, 15c. each, set of 21 for \$2.50.

# HARDY PHLOXES, Early Flowering.

This group is very dwarf, 18 inches to 2 feet in height, llowering in June. Mrs. Miller. Reddlsh purple. Belle Pyramide. Lavender rose. Miss Taylor. Flesh white. Hercules. Rosy purple.

Price, 15c. each, set of 4 for 50c.

HARDY PHLOX, WHITE LADY.

MRS SANDER

SUPERB, & & & DOUBLE FRINGED

N N N N N

N calling attention to our Double Fringed Petunias, we feel a pardonable pride in alluding to our number of years, towards improving this very useful and beautiful race of plants. To none which we cultivate do we devote more care and labor, employing only the most skillful hands, and hybridizing the tens of thousands of

flowers by hand, a slow and expensive process, but justified by the results. When it is considered that the varieties offered were selected from over a thousand plants, and that they, in turn, are a selection from over ten thousand

scedlings, some estimate can be formed of the scrupulous and watchful care we exercise in selecting. They are of the easiest cuiture, growing in any soil which will maintain plant life, and producing the most showy flowers in wonderful profusion. The flowers are very useful for table decoration, iaid on a flat dish and carrished with their own follows:

a flat dish and garnished with their own foliage.

MRS. F. SANDER. For the first time we are character offer a pure pink Double Fringed Petu-For the first time we are enabled to nia. At rare intervals we have had varieties of a lavender plnk shade, but this is the equal in color of the finest Carnations.

MRS. JEFFREYS. (The Carnation Petunia.) Distinct from all others. Free growing and branching, producing numbers of perfectly double, pure white flowers about 2½ inches across, not fringed. For florists' summer flowers as a groundwork for designs it will be invaluable.

The greatest achievement of the hybridizer in Double SEA FOAM. The greatest achievement of the hydriged variety of Petunias is to produce a fine double fringed variety of a pure white; this we have occasionally succeeded in doing, but never have we obtained one that for purity of color, form, size and vigor of growth was the suporlor of "Sea Foam."

The varlety on the upper right-hand corner of the engraving. SUNRISE. The variety on the upper right-hand deepening to rosy pink, with here white, suffused with a faint flush and deepening to rosy pink, with here and there a potal biotched with carmine pink.

VOLUNTEER. This fine Double Pctunia is bold and handsome in flower and habit. The color is a rich rosy purple changing to violet, having beautiful lustre; the petals are marked with pearly white.

MANILA. A grand variety, deeply iringed, large the ble, pure willte irregularly splashed with carmine. A grand variety, deeply fringed, large and vory dou-

SANTIAGO. An extra large, line, double tringed violet crimson with a velvety finish and a silvery An extra large, fino, double fringed variety, deep sheen on the back—the sliver lining to the cloud.

HELEN GOULD. Another fine variety, and one of the most distinct in our collection. Vory finely tringed, very double, clear white with a beautiful shade of carmine rose in the centro, changing to evening purple.

SAN JUAN. A large, solidly bullt flower, without fringe, and one of the most attractive in the collection. Color pearly white, liberally splashed with violet crimson.

MERRIMAG. One of the most unique and beautiful in the white edges, veined and marbled with brownish crimson.

Price for any of the above Double Petunias, 20c. each, \$2.00 per doz.; set of 10 distinct sorts for \$1.75. ·\*·\*

DOUBLE SEEDLING PETUNIAS. Plants grown from the same strain of seed which produced the above varieties, but not all of them are certain to be double. Such of them as come single will, however, be certain to be large and brillantly colored.

Price, 15c. each, \$1.50 per doz., \$8.00 per 100.

DOUBLE FRINGED PETUNIAS.

SINGLE SEEDLING PETUNIAS. These are grown from seed of our own saving, and are the same strain as those we use in our hybridizing to obtain double flowers. Many of them will be finely fringed, and most of them are sure to be highly colored varietles. Price, 10e. each, \$1.00 per doz., \$6.00 per 100.

# SEEDS OF HENDERSON'S SUPERB DOUBLE FRINGED PETUNIAS.

As an illustration of the care necessary to produce this seed, we state that it costs us in labor aione \$200.00 PER OUNCE, or about eleven times its weight in gold. We have a limited quantity of this seed for sale, and offer It at 50c. per packet.

# DEPARTMEN

SWAINSONIA VIOLACEA. A new shade in this popular house plant. Best described as pinkish lavender; equally thrifty as the white and red. Price, 20c. each, \$2.00 per doz.

NEW HARDY WHITE PINK, "Her Majesty." This is one of the finest hardy Pinks in any color yet raised, and cannot fail to please all lovers of fine flowers. It has become most popular, and is grown by the acre to supply the demand for cut flowers. Low growing, with flowers of the purest white, as large as a Carnation and of rich Clove fragrance. (See cut.) Price, large clumps, 30c. each, 4 for \$1.00; young plants, 15c. each, 4 for 50c.

BORDER PINK, "Abbotsford." The flowers are beautifully formed, very double and exceedingly useful for cutting; one of the freest in bloom and a fine companion to Her Majesty. The color is a soft illac pink, a very pleasing shade. Price, large clumps, 30c. each, \$3.00 per doz.; young plants, 15c. each, \$1.50 per doz.

HARDY CLOVE PINKS. We can supply a fine collection of the old favorite garden plants, white, pink, rose, variegated, etc. Price, strong clumps, 25c. each; young plants, 10c. each, \$1.00 per doz.

SUMMER PINKS. Ready May 1st. Dianthus, or Summer Garden Plnks, spiendid plants for the garden. Price, 10c. each, \$1.00 per doz., \$6.00 per 100.

SMILAX VINES. Familiar to every one. Easily grown if trained to strings; will grow in a sunny window. Price. 10c. each, 75c. per doz., \$4.00 per 100.

## THE BLUE CLIMBING SOLANUM.

(Solanum Seaforthlanum.)

Bright, illac-blue flowers in clusters like a Wistaria. The blossoms are followed by dark red seed fruits, which remain a long time on the plant, adding greatly to its beauty. Price, 15c. each, 4 for 50c. Note—We can also supply a white variety at the same price. The two Solanums for 25c.

## SOLANUM WENDLANDII.

One of the most superb summerilowering Vines it is possible to eouceive; it blooms continuously, not stray biossoms, but great masses of flowers, each one nearly 3 inehos across, as many as 100 being in each cluster. The color ls an attractive shade of lavender blue, strikingly beautiful. No one who loves a beautiful Vine should be without it. Price, 25c. each, 5 for \$1.00, 12 for \$2.00.

# Rudbeckia, "Golden Glow."

A giorlous new hardy herbaceous plant, and one that should flud a place in every garden. It is of fine habit, vigorous growth, with early, continuous and immense blooming qualities; it will be found excellent also for cut-flower purposes. The stems are long and gracefully poised; the foliage is abundant and ornamental. It attains a height of from 6 to 8 feet, and a small plant set out in the spring will produce hundreds of blossoms during August and September, each one as large as a fair-sized Chrysanthemum. (See cut.) Price, 15c. each, 4 for 50c., 9 for \$1.00, 12 for \$1.25.

SPIRÆA, ANTHONY WATERER. Perhaps no hardy

plant of recent introduction combines so many good qualities as this. It is well adapted for edg-lng shrubbery, forming as it does a low, bushy plant, rarely exceeding 12 inches. The flowers are of the richest crimson, borne in deuse, flat clusters in profusion from early summer to frost. It will prove of great value for pot culture. (See cut.) Price, 4-inch pots, 50c. each, \$4.50 per doz.; 3-inch pots, 20c. each, \$2.00 per doz.

SALVIAS. Assorted.

Bonfire. This variety, without question, is the finest scariet Saivla yet introduced. Growth compact, about 2½ feet high, long, erect spikes of brilliant scariet flowers; over 200 spikes to a plant is not unusual.

Wm. Bedman. Rich scarlet, a dwarf, compact grower.

Patons, Doub him the finest scalar invariable at Faranch.

Patens. Deep blue, the finest color imaginable. 15c. each.
Splendens. (Seariet Sage.) Intense scarlet, valuable for large bods.
Splendeus Alba. Similar to above, but pure white.

Price, except Patens, 10c. caeh, \$1.00 per doz., \$6.00 per 100.

SWAINSONIA GALEGIFOLIA ALBA. A plant which is becoming very popular for house culture. Foliage as graceful as an Acacia; flowers pure white, produced In sprays of 12 to 20 flowers each, and resembling Sweet Peas. It is of the easiest culture and ever blooming. It climbs readily and is splendid for the window garden. Price, 20c. each, \$2.00 per doz.

SWAINSONIA GALEGIFOLIA ROSEA. A fine contrast to the above; rlch, rosy red flowers. Price, 20c. each, \$2.00 per doz.

SPIRÆA, ANTHONY WATERER.

# "PETER HENDERSON & CO., NEW YORK"

# ammoth Verbenas.

One of our specialties. The ilst we offer cannot be excelled. No garden is complete without a col-lection of Verbenas.

Beauty of Oxford. Deep pink. Glow-worm. Crimson. Invincible. Rich purplo. (See cut.) Iona. Deep plnk. Lerona. Dark red, large flower.

Miss Arthur. Scarlet. Mrs. Cieveland. White. Mrs. James. Pink, striped white. Negro. Dark maroon.

Neptune. Lilac, striped white.
Perfection. Bright plnk.
Snow Storm. White, dwarf habit.
Summit. Light purple, white eye. White Beauty. Purc white, very fino. Willie Desmond. Bright scarlet. Price, 10c. oach; any 6 for 50c.; set of 15 for \$1.00.

These popular flowand will amply reward good treatment with remarkably large pyramids of bloom; the flowers represent a great diversity of color. The Double Large-flowering Ten Weeks Stocks are great improvements over the Gillillowers of the olden times, the flowers being much larger and more densely double, and there is also a much larger variety of colors and shades than formerly. Pure White, Canary Yellow, Sky Blue, Blood Red, Laven-der, Violei, Chamois, Brighi Rose.

Price, 10c. each, \$1 per doz., \$6 per 100.

HARDY DOUBLE ENGLISH VIOLET.

This Violet is entirely hardy, perfectly double, a deep violet-purple color and most deliciously fragrant. It surpassos the well-known "Marie Louiso" Vlolet in richness of color, being many shades darker, and far excels it in its delightful odor; this is one of its greatest merits. It is entirely free from diseaso of any kind, will grow and bloom in any garden and in any situation. Nothing is more appropriate for cemetery plots than the Hardy Double English Violet. (See cut.) Price, 1st size, large-flowering clumps, 35e. each, 3 for \$1.00; \$3.50 per doz. Young plants, 20c. each, 3 for 50c., 7 for \$1.00.

WINTER-FLOWERING VIOLET. Marie Louise. This is the variety which is grown by the hundreds of thousands to supply the cut-flower markets of the country. It is not hardy in the north. Color a rich purple, flowers large and double, stem long and foliage a soft, rich, dark green.

Price, large plants, 20c. each, 6 for \$1.00. Young plants, 10c. each, 75c. per doz., \$5.00 per 100.

"California Violet." This has large single purple flowers, when SINGLE VIOLET. "California Violet." This has large single purple flowers, when well grown as large as a sliver dollar, and deliciously fragrant. 5 for \$1.00. Small plants, 10c. each, 3 for 25c., 12 for \$1.00.

Vinca Major Variegata. A useful drooping plant for baskets and vases. Distinctly Vinca Major Variegata. A useful drooping plant for baskets and vases. Distinctly marked, creamy white on a green ground.

Price, 10c. each, \$1.00 per doz.

Vinca Minor Alba. (Creeping Myrite.) Vory hardy, will grow in shade, and spiendid for cemeterles. Pure white flowers. (See price below.)

Vinca Minor Cerulea. Similar to above in every respect, but has blue flowers.

Price, large clumps, 25c. each. Small plants, 10c. each, \$1.00 per doz.

# FLOWER GROWERS' AND GARDENERS' REQUISITES.

Henderson's Prepared Potting Soil. One of the principal elements of success in the growing and flowering of plants and bulbs is proper soil. This "Prepared Potting Soil" is the same that we use in our extensive greenhouses. As needed we mix with it peat, sand and pure raw ground bone meal—it is then friable, rich, and will cause plants to grow and bloom luxuriantly.

Leaf Mold. One of the most essential ingredients in plant growing, in fact indispensable for Ferns, etc.

Sphagnum Moss. Extensively used for filling fern and orehid baskets, mixing with potting soli, covering tops of pots to preserve moisture, packing plants and cuttings, etc., etc.

Rotted (Sandy) Peat. Fine for lightening soil, for sowing fine seeds, for Azaieas, Palms, Begonias, etc., mixed with garden soil.

Fibrous Peat. Used for potting Orchids, Ferns, etc.; very useful for many purposes. Price of Potting Soil, Moss, Peat and Leaf Mold, 25c. per peck bag, \$1.00 per bushel bag, \$2.00 per bag containing about one barrel (purchaser to pay freight).

Bamboo or Cane Stakes. Six to ten feet long and largely used for staking Chrysanthemums, Roses, etc. Price, \$1.25 per 100, \$10.00 per 1,000 (purchaser to pay freight).

## OUNDED "PETER HENDERSON & CO., NEW

## FOR HARDY CLIMBING ROSES, SEE PAGE 136. CLEMATIS, SEE PAGE 156.

MONG the most important decorative and flowering plants none are more A necessary than Hardy Vines. The collection we offer contains, we believe, the best climbing plants for permanent effects known at present time. Particular attention is called to the Climbing Hydrangea, Hardy Yellow Jasmine, "Boston" or "Japan" Ivy (Ampelopsis Veitehii), and Heneysuckies.

# AMPELOPSIS VEITCHII.

(Sometimes called "Boston Ivy" and "Japan Ivy.")

Entirely hardy in the most exposed places, attaining a height of 20 to 30 feet in two or three years, clinging to stones, brick or wood work with the greatest tenacity. It is a great protection to houses, as the leaves lapping over each other like slates on a roof effectually prevents rain from penetrating the walls. For covering dead trees, gate posts, boundary walls, etc., it has no equal. In the summer the foliage is a rich shade of green, but in the fall it assumes the most gorgeous tints of scarlet, crimson and orange, so dazzilng as to be seen at a great distance. Price: 1st size, extra strong pot-grown, 30c. each, \$3.00 per doz.; 2d size, pot-grown, 20c. each, \$2.00 per doz.

# HARDY YELLOW JASMINE.

(Jasminum nudiflorum.)

The pretty and fragrant flowers render this a general favorite, and it has an additional claim to popularity in the fact that it is in flower very early in the spring; when other eilmbing plants are yet in wlnter attire this is gay with its bright yellow, fragrant biossoms, glving a welcome tinge of color to the sombre surroundings of the garden. Price, 30c. each, 4 for \$1.00, 12 for \$3.00.

# HONEYSUCKLES.

Lonicera Belgica (Monthiy Fragrant or Dutch Honeysnekie). Flowers bright red with yellow and buff markings at the ends of the tubes. 50c. each, 5 for \$2.00. Lonicera Flexuosa (Japan Sweet scented Honeysuekle). Large flowers; paie

yellow and white. Follage numerous and dark-eolored.

Lonicera Halleana (Hall's Japan Honeysuekle). Pure white llowers, changing to yellow. Very free blooming and fragrant.

Lonicera Brachypoda (Evergreen Sweet-scented Honeysuckie). Flowers buff,

yeilow and white. One of the most vigorous and hardy,

Lonicera Brachypoda Aurea. (Golden-leaved Honeysuckle). Flowers yellow. Price, except where noted, large plants, 25c. each, 5 for \$1.00, \$12.00 per 100. Young plants, 10c. each, \$1.00 per doz.

Note.—When trained to a wire frame, Honeysuckles make a good hedge, and are largely used for that purpose.

# THE CLIMBING HYDRANGEA. (Schizophragma Hydrangeoides.)

A beautiful hardy climber introduced from Japan some years ago but which has been almost jost to commercial floricuiture. It is a handsome, rapid-growing plant with almost all the characteristles of the Hydrangea, having similar white flowers as the shrubby species. It clings with great tenacity to any tree or building by which it may be planted and attains a height of fifty feet. It blooms about July and remains a long time in flower. The illustration was made from a photograph of a plant growing on the beautiful Ames Estate, North Easten, Mass., and fairly represents it. (See cut.) Price, 1st size plants, \$1.50 each; 2d size, \$1.00 each; 3d size, 50c. each, \$5.00 per doz.

# Hardy Climbing Plants.

Actinidia Polygma (Cilmblng Hawthorn Flower). A grand hardy cilmbing plant, strong, vigorous grower, handsome foliage, creamy white racemes of flowers having a perfume ilke English Hawthorn and followed by bunches of red berries. Price, 50c. each, \$5.00 per dozen.

Ampelopsis Quinquefolia. The old Virginia Creeper. 30c. each, 4 for \$1.00. Large plants,

Akebia Quinata. Rich dark green toliage and curious dark brown flowers, delieious odor. 30c. each.

Apios Tuberosa (Tuberous-rooted Wistaria). Clusters of rich, deep purple flowers, which have a strong, delicious violet fragrance. 15c. each.

Aristolochia Sipho (Dutchman's Pipe). Large, showy, light green foliage; flowers long and pipe-shaped; makes a dense screen. 35e. each.

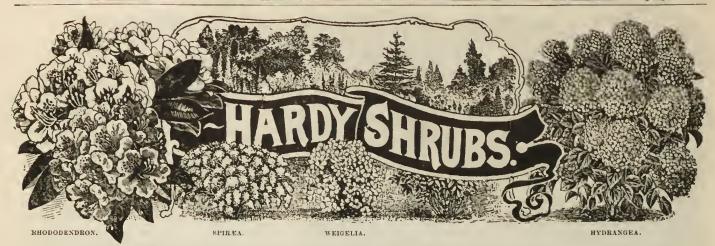

BignoniaRadicans(TrumpetCreeper). Rich orange scarlet. 25c. each. Chinese Matrimony Vine (Lycium

Chinense). Bright purpleilowers, suceeeded by brilllant scarlet berries. 2-year-old plants, 30e. each. Young plants, 15e. each, \$1.50 per doz. Celastrus Scandens (Bitter Sweet). A well-known, handsome climbing plant. 40c. each, 3 for \$1.00.

Ivy (Euglish). 25e, each, 5 fer \$1.00. Hardy White Jasmine (Jasminum Officinalis). Very sweet-seented and highly deslrable. 25c. each. Wistaria Sinensis. White, Flowers borne in long,

drooping elusters, pure white. 50c. each. Wistaria, Blue. Flowers In drooping clusters, soft

named below, and make the following astonishingly low offer:

We have on hand a grand lot of three-year-old shrubs of the varieties B, "25 "25 " 4.50 include Magnelias, Rhododendrons, named below, and make the following "C, "50 "30 " "8.00 Japan Maples or Azaleas. Prices for D, "100 30

12.00 iarger quantities on application.

# ASSORTED SHRUBS.

THE MONTHS NAMED GIVE THE PERIODS OF BLOOMING. Aithea, Double White. White flowers. Angust and September. Aithea, Double Red. Red flowers. August and September. Aithen, Double Red. Red flowers. August and September. Azalen, Hardy. Assorted. May and June. \$1.00 cach. Berberry, l'urpie. Purpie foilage, searlet berries. Berberrs Thunbergii. Showy red fruit, very ornamental. Calycantins Floridus. Strawberry-scented shrub. June. Corchorus Japoniea. Single yellow flowers. July to October. Corchorus Jap. Alba. Pure white flowers. July to October. Corchorus Jap. Var. Variegated white and green. July te October. Cornns Floridus. (Flowering Dogwood) White flowers. June. Deutzla Chaulida fl. pl. Double white flowers. June and July. Deutzla Creunta. Pure white. Tinged rose color. June and July. Deutzla Gracillis. Pure white thronghout; low, compact habit. June. Dogwood. Red flowering; exceedingly handsome. \$1.00 cach. Deutzia Graellis. Pure white throughout; low, compact habit. June. Dogwood. Red flewering; exceedingly handsome. \$1.00 each. Exochorda Grandiflora. Pure white flowers; a grand shrub. May. Forsythia Viridissima. Yeilow flowers; blooms very early. April. Forsythia Suspensa. (Weeping Fersythia.) April. Japan Maples. Wonderfully colored foliage. \$1.50 each. Kerria Japonica. Double yellow flowers. July to October. Magnolia Soulangeana. Extra fine trees at \$3.00 each. May. Philadelphus Coronarlus. The popular Mock Orange. June. Pruna Pisardi. (Purpie-leaved Pium.) Foliage, fruit and shoots of bright purplish red. retaining its celor during summer.

Pyrus Japonica. (Japan Quinee.) Scarlet flowers. Rhodotypus Kerrloides. Single white flowers. May. Ribes. (Flowering Currants.) Assorted colors. April and May. Sambucus Aurea. (Golden-leaved Elder.) Handsome foliage.

Spirae Callosa. (Superba.) Large, flat clusters of pink flowers.

A grand shrub. June to October.

Spirae Douglasi.

Beautiful rose-colored flowers in July and Aug.

of bright purpish red, retaining its eelor during summer.

Spira Pointifolia. (Bridal Wreath.) Pure white. May and June. Spirae Thunbergii. White flowers, neat, graceful habit. May. Spiraen Van Houtteii. Flowers pure white, the best in its class. June. Syringa. (Lilae.) The well-known purple variety. May. Syringa Persica Alba. (The White Persian Lilae.) May. Viburnum Opulus. (Snowball.) Large, drooping white flowers. Weigelia Candida. Pure white flowers. June to October. Weigella Rosea. Rich rose-colored flewers. June and July. Weigelia Rosea var. Variegated follage. June and July.

All the above shrubs 25c. each, \$2.50 per dozen, except where noted. JAPAN SNOWBALL. (Viburnum Plicatum.)
flowers; very handsome, dark green corrugated foliage. There are flowers; very handsome, dark green corrugated foliage. often twenty balis on an 18-inch branch. June. 21/2 to 3 feet, 50e. each, \$4.50 per doz.; 2d size, 12 to 18 lnches, 30c. each, \$3.00 per doz.

One of the most sat-CALIFORNIA PRIVET. One of the most satisfactory plants for hedges known at the present time. Glossy green foliage, with white flowers. Easily kept in shape and of fine, symmetrical habit naturally. Price, strong 3-year-old plants, 2½ to 3 feet high and well branched, \$1.00 per doz., \$6.00 per 100; 2 feet, \$4.00 per 100.

# RHODODENDRONS.

These are among the grandest of our hardy-flowering shrubs, and cannot be surpassed for lawn decoration. The flowers range through shades of rose, pink, crimson, white, etc., 9 to 12 inches in dlameter. Price, plants with 8 to 12 buds, \$1.50 each; set of six distinct named serts for \$7.50. Plants with 4 to 8 buds. \$1.00 each; set of six sorts for \$5.00. May and June. (See cut above.)

## HYDRANGEA PANICULATA GRANDIFLORA.

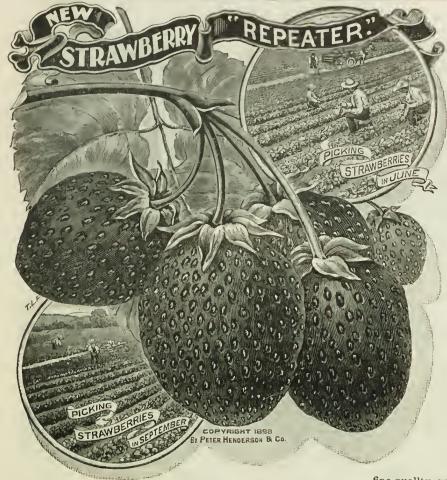

The flowers are formed in large white panicles, 9 inches long, which change to a deep plnk at the base as the season advances. It grows 5 to 7 feet high and wide, and, as the flowers slightly droop, few plants have the grace and beauty of this grand shrub. Used largely In eemeteries. (See cut.) Strong bushes, 1½ feet high, 25c., \$2.50 per doz.; 2½ to 3 feet high, 50e., \$4.50 per doz.; 3½ to 4 feet high, 75c., \$7.50 per doz. August and September.

HYDRANGEA PANICULATA GRANDIFLORA

ARBOR=VITAE (American) for hedging, the best EVERGREEN for making a close, symmetrical hedge. Strong plants, 21/2 to 3 feet high, for sale at \$15.00 per 100.

# NEW STRAWBERRY, "REPEATER."

FOR DETAILS OF NAME CONTEST SEE PAGE 3.

## TWO CROPS PRODUCED IN ONE SEASON.

For several seasons past our attention has been called to a Strawberry which made its appearance in the New York market in September, and we were at first loath to believe that the fruit could be obtained under natural conditions at that season of the year. Investigation, however, showed that such was the case; the fruit was picked in the open field from the same plants that produced a bountcous crop in June. The only special cultivation given was to manure the beds after the crop was picked, and the vigor of the variety (which we offer herewith as No. 12) is such that it responded at once and produced a paying crop, not for one season alone, but for three seasons. As a further proof of this marvel, we may state that the leading market varieties, grown under precisely the same conditions failed to fruit the second time under precisely the same conditions, falled to fruit the second time In the same season. The vigor of this variety is marvelous. Last season, during the long dry spell, it grew continuously, never showing the slightest tendency to rest while standard varieties in the same field ceased growing and rusted badly, another proof of lts wonderful vitality—the secret, we believe, of its ability to bear a second erop. The commission merchant in New York who sells the fruit says that even in June it is the best seller he handles, finding sale for it at an advanced price among the most fastidious of his eustomers. The fruit is very large when well grown, a glossy crimson, delicious flavor, and a great point in its favor is that It is very easily hulled. It is a perfect-flowered variety, medium to late. Price, 3 plants for 25c., 12 for \$1.00, 25 for \$2.00, 50 for \$3.75, 100 for \$7.00.

AMBROSE LOCK WOOD, Brockton, Mass., wrote October 30th:
"I picked berries from the new Strawberry, No. 12, September
5th. I think they will prove a good thing. The plants were set out
in March." 

# TRAWBERRY

WANTED BY MAIL ADD 25c. per 100.

# TRANSPLANTED LAYERS.

From our oxtensive collection we have selected the varieties offered as the best for general use. The Strawberry plants we offer, being strong, layered plants which wero transplanted into cold frames in the fall, if planted out any time before May 5th, will, under proper eonditions, give quite a niee iot of fruit the present year. The plants here offered are far superior to the untransplanted "layers" usually

Those marked with the letter P are plstlllate varieties and must have a row of a perfect-flowered sort planted every 9 or 12 feet apart among them, to polienize their blossoms.

# SELECT STRAWBERRIES.

BISMARCK. An improvement upon Bubach No. 5, being more robust and stocky and more productive. Berries very large, bluntly conieal, bright searlet, firm and solid and of excellent quality. A grand berry in every way. BRANDYWINE. (Midscason to very late.)

Brandywine is already world-famous; in fact, we doubt if any Strawberry ever before has received such enthusiastic praise over so wide an extent of territory. The berries are of large size, glossy searlet, very firm, solid and shapely, of delightful aroma, rich, juicy and luseious, and wonderfully productive. CLYDE. This is the great shipping berry, a

money-maker for the gardener and a boon for tho amateur, as it does well where all others fall. Berries roundish-conical, bright scarlet,

fine quality, very productive. (Early to midseason.)

JERSEY MARKET. (P.) An ideal market berry, combining firmness, bright color, good keeping qualities, productiveness, good flavor, uniformly good size and vigorous growth.

MARGARET. A remarkable berry in many respects, large slze, fine flavor, late in boaring, plant of wonderful strength and great productiveness. All who have tried it are delighted with it.

MARSHALL. (Midseason.) The berries are very beautiful and averago extraordinarily large-often 14 will fill a quart measure. As a berry for home use it is peerless. It is the first of the extra large varieties to ripen, and although of great size the fruit is rarely ever misshapen. The color is a rleh glossy erimson that every one admires, the surface color running weil into the flesh, and the quality is far above the average.

McKINLEY. (Midseason.) Conspicuous for its size, shape, color and quality. Shape roundish, inclining to conical, but sometimes flattened or cockseombed; color crimson; flesh moderately firm, and quality extra good. Plant is vigorous and healthy.

firm, and quality extra good. Plant is vigorous and healthy. MICHIGAN. The latest of all berries and should be planted by

all who desire to extend the Strawberry season to its utmost limits. Large slze, prime quality and deliclous flavor. Form bluntly conical, color bright rich crimson.

NIC. OHMER. A giant among Strawberries, it is never mlsshaped. Dark glossy red, firm and of excellent flavor. Plant large and

healthy, sending out a wealth of runners and rooting deeply.

RIDGEWAY. The ideal berry for the family table or home market. Quality unsurpassed, the size will average large to very berries nearly round, bright crimson with golden seed.

WM. BELT. Another new Strawberry that is sure to make its mark. For size alone it ranks among the best, producing berries twelve of which will fill a quart measure. The fruit is conical, rather long, regular in outline, bright red and glossy. The quality is excellent, plant strong and prolific.

Price for any of the above, 40e. per doz., \$2.50 per 100, \$20.00 per 1,000. Special quotations given on larger quantitles.

Note.—The Strawberry plants offered in this catalogue cannot be supplied after May 15th. Our Summer list of Pot-Grown Strawberries is usually ready about June 15th, and is malled free to eustomers, or may be had upon application by mail when ready.

# HENDERSON'S FAMILY FAVORITY FAMILY FAVORITE"

# CTRAWBERRY. Bisexual—Midseason.

This is one of the finest and most attractive varieties grown for the home garden—the berries average very large, perfectly formed and of rich, glossy crimson color, permeating the flesh almost to the centre, rendering it the ideal dessert strawberry, and unsurpassed for canning and preserving. The flavor is exceptionally sweet. The plant is a strong, healthy have an always he depended more to yield, healthy, luxuriant grower; it can always be depended upon to yield a bountiful crop. It is a second early variety, perfect flowering, and bears continuously for several weeks. Price, 75c. per doz., \$4.00 per 100.

Glen Mary. This new Strawberry is the best berry for large size, good quality and large yield that has ever been offcred to the American people, and in these three respects we believe it has no equal. We especially recommend it for the home garden and nearby market. In productiveness it is unsurpassed. In size the berries average extra-

ordinarily large; in shape the berries are broadly heartshaped; eolor, dark glossy erimson, fairly firm and of excellent quality; plant strong and healthy.

Bederwood (Rackster). (Early.) A valuable early Straw-

berry; an enormous bearer, large size, light searlet.

Bubach No. 5 (P). (Midseason.) A prominent Strawberry grower says "If all varieties were culled out but ten, he would place Bubaeh No. 5 at the head of the list on account

of its large, bright berries, immense yield and fine flavor." Haverland (P). One of the best berries in existence; extra

early and marvelously productive. Bright glossy crimson, large handsome fruit of fine quality.

Jessie. (Midseason.) This fine Strawberry has given unly versal satisfaction. Fruit large and of excellent quality.

Lovet. (Early.) Brightest erimson, of superb quality.

Michel's Early. (Early.) This is a robust grower; yields
bountifully; berrics medium to large, color, bright scarlet. Parry. (Midseason.) A fine berry, uniformly large, firm. Sharpless. (Midseason.) One of the most popular. Plant

exceedingly vigorous, very productive; fruit large, crimson, firm and of good quality. Grand for market and home.

"The Gandy." (Late.) One of the best late Strawberries ever introduced. Strictly faney. The fruits are uniformly large, perfect in form, and firm; color, bright erimson and are glossy as if vernished. Onelity superity delighted. as glossy as if varnished. Quality superb, delightful aroma, suggestive of both strawberries and peaches.

Timbrell (P). (Late.) Called "The Queen of Strawberries."

Immense elusters of fruit of the largest size and delightful flavor, rieli, juiey and sprightly.

All the Strawberries on this page (except where noted), 30c. per doz., \$1.50 per 100, \$10.00 per 1,000. (Transplanted plants.) If wanted by mail, add 25e. per 100 for postage.

6 sold at dozen rate, 25 at 100 rate, 250 at 1,000 rate.

Note.—Those marked with the letter P are pistillate and must have a row of a perfect-flowered sort every nine or twelve feet among them to pollenize their blossoms. Those not marked are perfect-flowered.

# ACKBERRIES.

6 sold at dozen rate, 25 at 100 rate, 250 at 1,000 rate.

Lovett's Best. A thoroughly reliable Blackberry of largo size, with a cane of ironelad hardiness; ripeulng early, great productiveness, entire freedom from discase; strong, vlgorons growth, extra high quality. 60e. per doz.. \$4.00 per 100. Wilson Junior. Takes the place of the old Wilson's Early. ERIE. Canes of ironelad hardiness, strongest growth, free from all diseases and wonderfully productive. Berry largest size, excellent quality, handsome and firm; early. Price,

60e. per doz., \$4.00 per 100, \$25.00 per 1,000. Early Harvest. Berries uniform, glossy black. Very early. Kittatinny. Once the most popular of all Blackberries. Snyder. Wonderfully productive; sweet and juley.

DEWBERRY, Lucretia (or Creeping Blackberry). Conceded to be the finest of its class, as early as Early Harvest, and as large as the Erle Blackberry. The quality Is superb. Price (except where noted), 50c. per doz., \$3.00 per 100, \$15.00 per 1,000. Blackberries by mail, 10c. per doz. extra.

We are slow to RATHBUN BLACKBERRY. praise a new fruit. New varieties appear so rapidly and are usually such a slight Improvement on the standard sorts that eaution is necessary; but after a trial of this we are so impressed by lts great value that we unhesitatingly recommend lt. No matter from what standpoint it is judged it will bear the most rigid inspection. The plant is very vigorous, branching naturally, producing an abundance of fruiting canes and an abundance of large, luscious fruit. It "suckers" but slightly, the roots are strong and branching, penetrating deeply into the soll, a valuable characteristic in dry seasons and locations. The fruit is very large and handsome, intense black with a very high polish and without any hard eoro, juley, high-flavored; of so superior a quality that it is in a class by itself. Those accustomed to the old varieties would scarcely recognize it for a Blackberry. For table use, for eauning or for culinary purposes it is equally desirable. It literally melts in the mouth.

# HARDY GRAPES IN VARIETY.

"BRIGHTON." This still remains the best grape in its color for table use; in fact, too much cannot be said in praise of it as to quality and other properties. In color, form and size of both bunch and berry, it resembles Catawba, but ripens early—with the Delaware. Vinc a free grower and productive. Two year vines 25% and \$2.50 pender. ductive. Two-year vines, 25c. each, \$2.50 per doz.

"EATON." This excellent grape is superior to Concord in aimost every respect; bunch and berry are much larger and more attractive. Bunelies vary in weight from tweive to twenty-five ounces, compact, double shouldered; berries very large and round, generally one inch in diameter, jet-black, covered with a heavy blue bloom; adheres firmly to the stem; skin thin but tough; pulp tender, separating freely from the seeds and dissolving easily in the mouth. Very juley; ripens with Concord or a little earlier. Two-year vines, 30c. each, \$3.00 per doz.

MOORE'S "DIAMOND." This is the product of a cross between that grand old variety, "Concord," and the highly esteemed "Iona," combining in one kind the two qualities most desired in a grape, viz.: vigor and hardiness of vine with high quality of fruit. In vigor of growth, color and texture of foliage, with hardiness of vine, it is the equal of its parent, "Concord," while in quality the fruit is equal to many of our hothouse grapes. It is among the oarliest and rlpens from two to four weeks ahead of "Concord." Two-year-

old vines, from original stock, 30c. each, \$3.00 per doz.

Agawam. (Rogers' No. 15.) Berries large, of bronze color; bunches of good size and form. 25c. each, \$2.50 per doz.

Concord. One of the best old sorts. Bunch and berries large; color black with a rich bloom. 20c. each, \$2.00 per doz.

Delaware. Red; bunches compact; berries small, sweet and of the most excelient ilavor. 25c. each, \$2.50 per doz.

Golden Pocklington. Very large; deep amber in color. One of the most attractive grapes grown. 25c. cach, \$2.50 per doz.

Gaertner. (Rogers' No. 14.) Bunch iarge; berry vory iarge, round, skin thick; color a beautiful light red, with rich bloom, fruit almost travers round. fruit almost transparent; pulp sweet, tender, rich but sprightly and pleasant. The showlest grape to be found and should be in every collection for its appearance alone. Vine vigorous and productive. Desirable for ail purposes, either for private or commercial uses. 25c. cach, \$2.50 per doz.

Lingley. (Rogers' No. 9.) Bunch medium; color a rich shade of red; ilesh tender, sweet, with a rich aromatic flavor. 25c. each,

\$2.25 per doz.

Moore's Early. Resembling the Concord In style of growth and berry, ripening two weeks earlier. 30e. each, \$3.00 per doz. Martha. One of the best greenish white grapes; oxquisite flavor.

20c. each, \$2.00 per doz.

20c. each, \$2.00 per doz.

Merrimack. (Rogers' No. 19.) Large berry; jet-black; fine quaity. One of the best of the Rogers' grapes. 25c. each, \$2.50 per doz. Niagara. A grand white grape; hardy, fine quality. This is unsurpassed in its color. 25c. each, \$2.50 per doz.

Salem. (Rogers' No. 53.) A splendid coppery red grape, ripening with Concord; delicate flavor, sweet, tender and juicy. One of the very best table grapes. 25c. each, \$2.50 per doz.

Worden. Black; very juicy, large size; early. One of the grandest grapes for family use. 25c. each, \$2.50 per doz.

Wilder. (Rogers' No. 4.) An excellent variety. Berries medium; bunches large; color black. 25c. each, \$2.50 per doz.

Special Offer. Fuil set of 16 Hardy Grapes for \$3.50. (If wanted by mail, add 25c. per set.)

## FOREIGN GRAPE VINES.

e are only suitable for glass-covered graperies. The letters "H. C." after descriptions indicate that the variety may be grown either in a hot or cold grapery. The letter "H." indicates that the variety will only do well in a hot grapery. A hot grapery is one with artificial heat; a cold one, without it.

MUSCAT OF ALEXANDRIA. Large grape of light golden color; the most popular of the white kinds. H. C.

BLACK HAMBURG. The standard black hothouse grape;

grown most extensively of any. H. C.

Muscat Hamburgh. Black. H. Mrs. Pince's Muscat. Black. H.

Maddresfield Court. H. C. Black, flavor flue in the extreme.

Bowood Muscat. H. Bright amber, muscat flavor.

Barbarossa. (Gros. Gulliaumo.) H. Black, produces enormous

bunches, keeps very late.

Splendid one-year vines, \$1.00 each, \$9.00 per doz.

## CURRANTS.

(If wanted by mail, add 15c. per doz.)

FAY'S PROLIFIC. This is decidedly the best red current we have. It has been widely planted and has given general satisfaction. Fruit large, bright red, and of good fiavor, and less acid than Cherry, which it is rapidly superseding. Two-year plants, \$1 50 per doz., \$10.00 per 100.

LARGE RED CHERRY. The most popular market sort, and uniformly the largest of all red currants, except Fay's Prolific.

Bunches large; berries very large, bright, very acid.

WHITE GRAPE. The largest and decidedly the best white variety, and one of the best of any for the home garden. Bunch large and long; berry large, handsome, translacent white.

BLACK NAPLES. A fine black current and a general favorite.

Two-year plants (except Fay's), \$1.00 per doz., \$6.00 per 100.

# ASPBERRIES.

(If by mail, add 10c. per doz.)

#### RED VARIETIES.

MILLER. The Miller Is as vigorous and sturdy in cane as the Cuthbert and Mariboro, with equally abundant and luxurlous foliage, berries as large and profuse as either; as early as Thompson's Early Prolific.

Beautiful and brilliant color, and In sweet, luscious flavor and hardiness fully equal to Turner-just what we have all been wanting so long. (See cut.) Price 10c. each, 3 for 25c., 75c. per doz., \$4.00 per 100.

Thompson's Early Prolific. A fine, early red raspberry for general cultivation. An excellent grower; canes hardy, bright crimson, very productive.

The leading market variety. Canes hardy; large, healthy follage. Cuthbert. Berries large, dark crimson, quite firm and of good flavor.

Mailboro. The largest of the early red raspberries. The canes are hardy and fairly productive. Fruit exceedingly large, bright crimson, and of fine quality. Turner. (Southern Thornless.) Very desirable as an early sort for the home garden. Berries of good size, bright crimson, soft and of honeyed sweetness.

Golden Queen. (Yellow.) The most popular and best yellow raspberry yet Introduced. Of large size, great beauty, high quality, hardness and productiveness. Price for the above (except Miller), 5c. each, 50c. per doz., \$3.00 per 100, \$15.00 per 1,000.

#### CAPS." BLACK RASPBERRIES.

COLUMBIAN RASPBERRY. Most deslrable for the garden, a seedling of the Cuthbert, which grew near a Gregg. Tested by leading horticulturists, it has proved vigorous, hardy, productive; fruit of large size and great excellence. Price, 15c. each, 12 for \$1.00, 100 for \$6.00.

Gregg. A popular market sort. Canes of strong, vigorous growth. Berries very large,

eovered with heavy bloom. Shaffer's Colossal. Canes are of wonderful vigor and size, hardy and enormously productive. Berries large, rather soft, but luscious and of a rich, sprightly flavor.

Progress. (Pioneer.) A profitable market sort. Berries firm, good quality.

Palmer. Very early and a grand fruit for either family or market, vigorous and hardy.

Ohio. Exceedingly productive, very hardy, and free from disease; berries of good size, jet-black and of excellent quality.

Souhegan, or Tyler. Very early. vigorous and hardy; wonderfully productive. Fruit of good size, firm, sweet and pleasant. All the above Raspberries, except Columbian, 50c. per doz., \$3.00 per 100, \$15.00 per 1,000. (If wanted by mail, add 10c. per doz.)

# GOOSEBERRIES.

(These cannot be sent by mail, only by express.)

Keepsake. A very large, straw-colored variety of excellent flavor; a good shipper. It is one of the earliest sorts and must become a favorite for the market as well as home use. 2-year plants, 15c.

each. \$1.50 per doz., \$10.00 per 100.

Industry. A fino red variety, a vigorous grower and lmmenso yielder. We confidently recommend it for the garden and market. 2-year plants, 15c. each, \$1.50 per doz., \$10.00 per 100.

Downing. The best of the American sorts and a vast Improvement upon the Houghton, of which it is a seedling. Fruit large, pale green, and of excellent quality, both for cooking and table use. Bushes stocky, vigorous, hardy, very prolific. 10c. each; 2-year plants, 10c. each, \$1.00 per doz., \$7.50 per 100.

Houghton's Seedling. A nativo variety, prolific bearer, light-colored fruit, impervious to mildew. 75c. per doz., \$5.00 per 100.

SIX OF ANY VARIETY SOLD AT DOZEN RATE, 25 AT 100 RATE, 250 AT 1.000 RATE.

# Bone Fertilizers.

Containforty to fifty percent, phosphate of time, and Decompose slowly in the soil and, therefore, form excellent permanent improvement, being less likely than almost any other kind of manne to waste in rainy sensons, particularly on sandy soils. There is no danger of burning the plants, whether applied as top-dressing or directly to the roots. Excellent for top-dressing lawns and grass lands, for garden and field

dressing lawns and grass lands, for garden and field crops.

Quantity required. For permanent pasture and mosting lands, ½ to 1 ton per acre. For trees and wines, 2 to 4 quarts each. For top-dressing, 1,000 to 1,500 lbs. per acre. For field and garden crops, ¾ to 1 ton broadcasted and harrowed in. For rose beds, pot plants, etc., 1 part to about fifty ofsoil.

Raw Bone Meal. This is ground very fine, decomposes more rapidly in the soil than the coarser grades, and ls, therefore, more quickly beneficial. Parce, 1 lb. package, 10c. (or by mil, 25c. per lb.); 5 lb. package, 30c.; 10 lb. package, 50c.; 25 lb. bng, \$1.00; 50 lb. bag, \$1.50; 100 lb. bag, \$2.50; 200 lb. bag, \$4.25; per ton of 2,000 lbs., \$37.00.

Raw Ground Bone. This is anoderately fine and particularly adapted for general fertilizing; the finer particles are immediately beneficial, the coarse keeping up the supply of plant food for a long period. Pincs, per 100 lb. bag, \$2.25; 200 lb. bag, \$4.00; per ton of 2,000 lbs., \$35.00.

Raw Crushed Bone. Slow but permanent in action, indispensable in the preparation of grapevine borders—for fruit trees, small fruits, etc.—where a lasting fertilizer is required.

Price, per 100 lb. bag, \$2.50; 200 lb. bag, \$4.50; per ton of 2,000 lbs., \$42.00.

# Bone Superphosphate.

Renefits crops quickly, readily available, promoting early maturity, affording constant nonrishment during their entire season's growth. In case of rotation of crop it is nearly as valuable for the last asfor the first.

Quantity required. For garden and field crops, 500 to 600 lbs. per acre; for garden crops it is best drilled in nt seed-sowing time. For top-dressing grass, 600 lbs., per acre.

l'mee, per 100 lb. bag, \$2.00; per bag of 200 lbs., \$3.50; per toa of 2,000 lbs., \$32.00.

# Blood and Bone.

A very coacentrated source of nitrogen, yielding am-A very concentrated source of nitrogen, yielding am-mentla, etc., by gradual decoapposition, and, in conse-quence, is superior for immediate as well as for pro-longed results; it is of exceptional value for garden crops, root crops, corn, grain, grasses, fruit trees, small fruits, grape vines, and, in fact, all kinds of vegetation

smail fruits, grape vines, and, in fact, all kinds of vegetation.

Quantity required. When broadcasted and harrowed in use from ½ to 1 ton per acre. For garden crops drill in 300 to 500 lbs. per nere.

Prace, per 100 lb. bag, \$2.25; 200 lb. bag, \$4.00; per ton of 2,000 lbs., \$36.00.

HENDERSONS AND flowers.

Strictly high-grade, containing all of the elements screety high-grade, containing an of the elements aceded by vegetables and dowers for their quick growth, early maturing and perfect development. The Ingredients are quickly soluble and Immediately conanence to feed the plants, stimulating them into healthy, luxuriant growth, and it continues to feed them until the and of the scene.

the end of the season.

Highly concentrated, fine, dry and free from objecthought odor, easily applied, either before or after planting, by sprinkling over the surface of the soil and raking in; or it can be alixed with water (stirring well) raking in; or it can be alixed with water (stirring well) and applied as a liquid annure. If something especially fine in vegetables or flowers is desired, two or three additional applications, ande at intervals, will produce magnifient results. A 10 lb. package is sufficient for a space 15 x 20 ft. for one application, or 500 to 600 lbs. per acre. Instructions on each package, Prices, 5 th. package, 25c.; 10 lb. package, 45c.; 25 lb. bag, \$1.00; 50 lb. bag, \$1.75; 100 lb. bag, \$3.00; 200 lb. bag, \$5.00; per ton, \$45.00.

A safe, clenn and high-grade fertilizer, free from disagreeable odor, prepared especially for feeding plants grown in pots. It is a wonderful invigorator, producing luxurlant, healthy growth, foliage of rich texture and larger and more brilliant flowers. It countlas in a highly concentrated form all of the ingredients of plant food essential to the highest development of plants and flowers. It is very soluble and is readily assimilated so that marked improvement is usually noticed in ten days' time. It is fine and dry, clean and easy to apply, either sprinkled over the surfuse of the soil as a top-dressing, or dissolved in water (stirring well). Detailed directions on each package. each package, Price, 1 lb. package, sufficient for 25 ordinary sized

plants for 1 year, 20c., or by mail, 35e

## Imperial Liquid Plant Food.

Immediately available as food for plants, producing quick and lasting results, and adapted to all garden and pot plants, lawns, etc. Before using dllute with 50 times its bulk of water, and apply with watering-pot. Prace (not mailable), plnt, 25c.; quart, 40c.; 1 gallon, \$1.25; 5 galloas, \$5.00; barrel of 30 gallons,

Pure Pulverized Sheep Manure. A pure aatural manure, and most nutritious for A pure antural manure, and most nutritious for plants. Its effect is immediate and lasting. Excellent for mixing with the soil for greenhouse plants (one part annure and six parts soil). Strewn over and dup into the vegetable garden, or placed directly in drills or hills, it promotes a rapid, steady growth until anturity. It makes a rich, safe and quick Liquid Manure; one pound to five gallons of water can be used daily, if necessary, with safety.

Price, 100 lb. bag, \$2.00; per ton, 2,000 lbs., \$30.00. Ia packages of 2 lbs., 15c.; 10 lbs., 50e.; by and 1.15e. th. extra

aiail, 15e. lb. extra

## Cotton Seed Meal.

The elements of plant food are quickly available and push the crop along vigorously. Especially adapted to early crops. Use one-half to 1 ton per acre broadcast; 500 to 1,000 lbs. in drills.

Proc. \$2.25 per 100 lb. bag; \$4.00 per 200 lb.bag;

\$35,00 per ton.

Ashes.

Canada Unleached Hard Wood. Coatain all fer-tillizing elements except nitrogen. They drive away insects, and are indispensable for all crops requiring potash. They are very beneficial for garden and field erops, and are of high value for eabbage, potatoes, onlons, strawberries, fruit trees, corn, clover, wheat, beans, grass lands and lawns.

beans, grass lands and lawns.

Quantity required. Apply 1 to 2 tons per nere, as one heavy application will help much more than the same quantity would, applied in fractions.

Price, per bbl. of about 200 fbs., \$2.00; per ton of 2,000 fbs., in bbls., \$18.00. Special prices lu bulk.

# Nitrate of Soda.

Valuable solely for the nitrogen it contains, equal to twenty per eent. of ammonia. It is chiefly astimulant; it is used in addition to other fertilizers. It is very quick in action and hastens the maturity of crops.

Quantity required. Being extremely soluble it should not be applied until the plants are above ground, when 100 to 500 pounds per acre, mixed with wood ashes or land plaster, for convenience in applying, are generally used.

Price, per 5 lb. package, 30c.; 10 lb. package, 50c.; 25 lb. bag, \$1.25; 50 lb. bag, \$2.00; 100 lb. bag, \$3.50; per ton, \$55.00.

# "THE HENDERSON (QUICK-ACTING) LAWN ENRICHER."

A clean, portable and convealent lawn dressing which we have found to be never-failing in inducing a rapid and rich green growth. It should be sown broadcast in the spring or fall, though it can be put on during the summer without injury or danger of burning the grass, and a remarkable improvement will soon be observed. It is in every way more desirable than manner, which is so often full of weed seeds. The use of "Henderson Lawn Enricher" entirely does away with the old practice of top-dressing lawns with stable manure, which was so objectionable on account of unsightliness and disagreeable odors.

A 10 lb. package is sufficient to go over nn area of 300 square feet, or for forming a new in wn, from 1,000 to 1,500 lbs. per acre, or half an old one. Price, 5 lb. package, 25c.; 10 lb. package, 45c.; 25 lb. bag, \$1.00; 50 lb. bag, \$1.75; 100 lb. bag, \$3.25; 200 lb. bag, Quantity Required. the quantity for renovating an old one. \$6.00; per ton of 2,000 lbs., \$50:00.

Powders, Soaps and Pastes (those offered by the pound)—non-poisonous—can be sent by mail, if 15e, per ib, is added to the prices, to pay postage. Fluids (those offered by the quart, etc.,) are not mailable.

ANT DESTROYER. A non-poisonous powder which, sprinkled nround their haunts, will destroy or drive away black ants from lawns, trees, plants, houses or other affected locality. Price, ¼ lb. can, 25c.; 1 lb. cnn, 75c.

BORDEAUX MIXTURE, Improved. Rendy for use by simply adding cold water. An indispensable Fungleide, curing and preventing black rot, mildew, blight, rust, seab and all fungoid diseases on fruits and plants. (1 lb. makes 5 gallons of sprsy.) Price, 1 lb., 20c.; 5 lbs., 75c.; 10 lbs., \$1.25; 25 lbs., \$2.50; 100 lbs. or over nt 9c. lb. extra.

CATERPILLAR LIME, Imported German. For the prevention of erawling insects from going up or down the trunks of trees; prevents the laying of eggs on the bark, and the hatching of those already ind; prevents borers, scale, etc., and keeps all animals from gnawing the trees; it remains sticky and efficacious from 3 to 5 months, and is easily and cheaply applied. (Little booklet, giving rall information, mailed on application.) Price, 5 lb. ean, \$1.00; 10 lb. cnn, \$1.75; 25 lb. keg, \$3.75.

"CATTLE COMFORT" protects horses, cattle, dogs, etc., from files, guaix, mosquitoes, horse-fly and other insects, is healing to sores, destroys head ilee on fowls, etc. Prices, 1 quart, 45c.; 1 gallon, \$1.15; 5 gallons, \$5.00.

COPPER SOLUTION, AMMONIATED. A Fungleide, the same as Bordeaux Mixture, the essential ingredient, "Carbonate of Copper," being dissolved in ammonia in this, while in Bordeaux it is counteracted by llme. Bordeaux is the cheaper and most popular for all ordinary purposes, but for late sprayings, when fruits are nearing maturity, or plants in bloom. Copper Solution is usually used as there is no limy sediment left to be washed off by rain or hand before marketing. One quart is sufficient for 25 gallons of spray. Prices, 1 quart, 50c.; 1 gallon, \$1.50; 5 gallons, \$6.00.

PIETTREE OIL A popular Insecticide for greenhouse and honse plants; it frees plants of nearly all insects to which they are subject, nnd for the following it has no superior: Menly bug, scale,

HELLEBORE, Powdered White. For the destruction of slugs, worms, caterpillars, etc. Less

polsonous than Paris Green and London Purple, and

by the pound)—non-poisonous—can be sent by mail, if I luids (those offered by the quart, etc.,) are not mailable poisonous than Paris Green and London Purple, and safer to use when fruits or vegetables are nearly ripe. Can be used as a powder or dissolved 1 oz. in 3 gailons water. Price, 20c. per lb.

KEROSENE EMULSION. A paste, ready for use by simply adding water. I lb. to 10 gailons. For emblage worm, scale on trees, caterpillars, meion ionse, rose bugs, green dy and lice of ali kinds, all sucking insects, either on plants or animals. Price, 1 lb., 20c.; 5 lbs., 75c.; 25 lbs., \$2.50.

LAUREL GREEN. A Combined Insecticide and Fungicide. Contains about 6 per cent. Arsenic and 10 per cent. Copper. It does the work both of Paris Green and Bordeans Mixture combined, and saves the labor of applying both separately. It is neutral, and is in a fine powdery condition for dissolving in water or hlowing on dry. (Full directions on each package.) It is a deadly poison to the worms and insects that entit, having all the qualities for that purpose that Paris Green contains. Its Copper Salts net as a preventive against the spread of fungi and the mildews that destroy so much fruit and ruin so many crops. The cost of Laurel Green is about half that of Paris Green, and the iahor is half, as one spraying serves two purposes. Itkills bugs and prevents the rot. Price, 1 lb. packages, 15c., \$1.25 doz.; 50 lb. keg., \$4.00; 300 lb. bbl., \$18.00.

PARIS GREEN. A poisonous, insoluble powder, indispensable on the farm or garden, for preventing the ravages of potato bugs, codiliug moth, worms, enterpillars, slugs and bugs. Applied as a powder it should be mixed with pinster or flour, 100 parts to 1 part of Paris Green; in solution mix 1 lb. In 200 to 300 gallons water. Price, 25e. per lb.

PERSIAN POWDER for DOGS and POULTRY. This eclebrated, non-poisonous, disinfecting insect to 1 part of Paris Green; in solution mix 1 lb. in 200 to 300 gallons water. Price, 25e. per lb.

"P.D.Q."POWDER for DOGS and POULTRY. This eclebrated, non-pois

of water. Full instructions for the various methods of applying, including testimonials from leading florists, are given in our "Rose Lear" pamphlet, mailed on application. Pint cni, 30c.; quart can, 55c.; gallon can, \$1.50; 5 gailon can, \$5.50.

55c.; gallon can, \$1.50; 5 gallon can, \$5.50.

SLUG SHOT. A non-polsonous powder and a very popular insecticide; it requires no further mixing or preparation, easily applied and not injurious or dangerous to animals, the person applying it, or fruits and vegetables trented. Very effectant in destroying pointo bugsand becties, green and black fly, slugs, worms, caterpillars, etc. Price, per keg of 125 lbs. net, \$5.00; per barrel of 235 lbs. net, \$8.50; in 10 b. packages, each 50c.; 5 lb. packages, 30c.; in the canister, with perforated top for applying, 25c. each.

TREE PROTECTING BANDS—"Pillar Cat-

TREE PROTECTING BANDS—"Pillar Catter"—Is very effectual for preventing insects, caterpillines, etc., from erawling up the trunks of trees. It consists of a strip of waterproof paper 4 inches wide, with a row of cotton battling on the under side stitched to each edge. The centre of the paper is coated with a sticky substance, which will not melt, yet remains sticky for months. When tacked around the tree no insect can pass this protector. Price, 18c. per yard; 10 yards and over, 16c. per yard; 25 yards and over, nt 15c. per yard.

WHALE OIL SOAP. Makes an excellent wash for trees and plants where insects and eggs affect the bark, nud for smearing on the trunks of trees to prevent worms from erawling up. Price, 15c. per ib.; 2 ibs., 25c.; 5 ibs., 50c.; 25 ibs. and over, at Se. per lb. TREE PROTECTING BANDS-"Pillar Cat-

# HENDERSON'S FLUID WEED DESTROYER.

The Best, Cheapest and Safest Destroyer of Weeds, Moss, Grass, etc., in Garden Walks and Carriage Drive.

It completely destroys all weeds, wherever applied, and by its effects on the ground prevents the growth of fresh ones for a year afterwards, thus saving an im-mense amount of labor in hoeing, etc.

Its application is easy, being in a fiquid form and only requiring to be mixed with water and applied with a watering ean. Four gallons mixed with a hundred gallons of water will cover an area of about 50 yards square. Full directions for use with each package.

Quart Can, sufficient to make 6 galloas of liquid, 50c. Gallon Can, sufficient to make 25 gallons of liquid, \$1.25. 5-Gallon Keg, sufficient to make 125 gallons of liquid, \$4.00.

#### READE'S WORM ERADICATOR.

For Immedialely removing Worms of every kind from Lawns, Garden Plots, Flower Pois, eic., without injury to the Mosl Delicate Plant or Flower.

Directions for Use: Mix no once of the Eradicator (about two table spoonfals) with one gallon of water in a watering can and use freely in the ordinary way of watering. The worms will immediately rise to the surface of the lawn or pot, and should at once be picked up and burned, as if left about they would in jure birds or fowls.

\$1.00 Bottle makes 25 callons of liquid.
\$3.00 Boile makes 80 gallons of liquid.

Mr. E. B. CURTISS, Captain of the Fairfield County Golf Club, Greenwich, Conn., writes October 28th, 1897

"Gentlemen —I am so pleased at the effect produced by the first application of yoser Worm Destroyer' made to-day that I cannot refrain from writing you. Three quarts of the Worm Destroyer' mixed with 60 yallons of water sprinkled on the surface of a Putling Green, 60 feet square, covered it is a fifty with countless syntraing nuisances. We feel now that there is a way of escape from what did seem an incircable with."

#### HENDERSON & CO., NEW YORK ····

SPRAY

BENDERSON BUCKET PUMP.

"Fruitall" Spraying Outfit.

A simple, high grade, up-to-date pump, embodying several important improvements. All working partisof brass. It can be mounted on or removed from barrel by two thumbscrews. Air chamber of musually large capacity. A long, adjustable handle, I tislow down and within the barrel, offering no obstruction to limbs, and is not top-beavy. The pump is large, but easily operated by a single person. The agitator is mechanical in action, nuch superior to the old "return discharge." The most efficient and sallsfactory spray pump ever offered. (See ent.) "Fruitali" Outit "A." Pump with one lead to feet ½-inch discharge hose with "Vermorel" Spray Nozzle and Agitator, \$8.50; or, fitted to barrel, \$10.00.

Iron Extension Pipe, 8 feet, with stopcock, to reach top of trees, filled to attach to nozzle and lose, each \$1.25 extra.

"Henderson" Hand Rucket Pump. A sluple, high grade, up-to-date pump, em-

This is the best and most durable portable hand pump. Working parts of solid brass; large air chamber; is double-acting, throwing a continuous stream, either solid or in a fine spray, as desired; very light and easily carried, and works from any bucket or tub. Just the thing for throwing liquid insecticides and fungleides on low trees, shrubs, plants, etc., and by altering the nozzle it can be used for washing earringes, windows, etc. (See carl.) Price. earriages, whidows, etc. (See cut.) Price, \$3.50; or, with extra 7 feet section of hose and pole connection for tree spraying, \$4.50.

Clamps to the chine orside of any barrel, but le make particularly for our Water Barrel and Truck outfits, offered on page 187. The "Gen" Islutended to fill a want for a low-priced pump. It has not the power or capacity of the larger and more expensive spray pumps, but where there are only a few trees, bushes, vines, etc., to be treated. It will answer admirably for both to be trented. It will answer admirably for both applying insectleides and fungleides, and by altering the nozzle it is adapted for sprinkling walks, watering flower-beds, washing windows, earriages, etc. The pump can be quickly removed from the barrel.

PRICIS (without barrel or truck):

Gem Outfit "A." Primp fitted with two feet of suction pipe and brass strainer, 5% feet by-luch hose and nozzle, \$5.00.

Gem Outfit "B" is the same as "A," excepting the hose is 12½ feet long, fitted with pole connection to spray tree, \$6.00.

For prices with barrel and truck, see page 187.

#### Little Giant Powder Gun.

Little Giant Powder Giin.

For applying any dry powder, such as Parls green, hellebore, insect powder, plaster, etc., on plants or trees, the powder being evenly distributed over a wide space and with the least possible waste, the work being more rapidly done than by any other known implement. It is 24 inches long, with extra tubes for dusting trees, and holds one quart of powder. By turning the crank a fan is rapidly revolved, which forces a current of air through the tubes, that earrles with it a small portion of powder. The quantity may be increased or diminished, as desired. (See cut.) Price, complete, \$4.00.

A Knapsack Sprayer and Bucket Sprayer Combined.

For applying fungleides and insectleides in a nilst-like spray, for the trentment of mildew, block tot on grapes, as well as for potato blight, etc. With it a man can spray five to six acres of vlues in a day. The machines are made entirely of copper and brass, and the chemicals will not corrode or rust them. The air chamber keeps up a stendy pressure, so a continuous discharge is given. The new improvements enable this sprayer to be used either as a knapsack or bucket sprayer. They are provided with a mechanical agitator. The Pump may be worked with either the right or left hand. Any leakage around the plunger is returned into the tauk, and does not run down the operator's back. The attachment shown at A is for underspraying.

t A ls for underspraying.

Price, complete, as shown in cut, \$10.00.

# The "Lenox" Sprayer.

A five-gallon galvaulzed from sprayer for applying polsonous finids to vines, bushes, potatoes, etc. Can be carried either on the back or by hand. The full of flows through the rubber tube and is forced ont in a spray by pressing the rubber bulb held in the hand; this spray will reach 10 to 12 feet. Price, \$2.50; or, with double sprinkling attachment for two rows at once, \$2.50.

double springling attachment for two rows at once, \$3.50.

The "Lenox" Sprayer is not adapted for throwing fungicides, such as Bordeaux Mixture, as the spray is not fine enough nor continuous, as in the Knapsack Sprayer offered

#### Woodason's Donble Cone Powder Bellows.

For dusting plants with dry powders. Can be held in any direction without wasting powder, and does not clog up. The best bellows for destroying insects in conservatory, garden, orchard or field; it dusts under the leaves as well as on top. (See cut.) Price, \$2.75.

# Single Cone Powder Bellows.

Price, large size, \$1.75, Small size (for eon-servatory and house use), \$1.00.

# Woodason's Fluid Vaporizing Bellows.

For spraying plants with fiuld decoctions for insects and fungus. Throws a spray as fine as mist. (See cut.) Price, large size, \$2.00. Small size (for house ase), \$1.25.

## The Asbestos Torch.

Attach the torch to the end of a pole of sultable length; saturate with kerosene oil, light and hold under the enterpillars' nests and pass quickly along the branches and around the trunk of the tree where the lusects lodge. The heat Instantly destroys the lusects and will in no way injure the tree. Price, 50c. each; or lay mail 66c. by mall, 60c.

#### Norton's Plant Duster.

For dusting potatoes, vines, etc. An alr-chamber prevents clogging. The dust guard prevents the powder from escaping beyond the plant being treated. Price, \$1.00 each

## Henderson's Atomizing Syringe.

For spraying fiulds or powders. The reservoir of heavy copper is not corroded by chemicals. Just what is needed for applying insecticides and fungi-cides in a mist-like vapor. Holds one pint; length of barrel, 19 ins.; diameter, 1% lns. Each, \$1.00.

ASBESTOS TORCH

NORTON'S PLANT DUSTER.

Our Implement Catalogue (mailed free on application,) illustrates and describes a full line of Hand Power Spraying Implements.

### THE "CASE-KEELER" SEEDER, CULTIVATOR, Etc. FOR HAND POWER. It sows in a continuous row or plants in hills, 6, 12, 18 or 36 luches apart, as desired, and as fast as Prices, a man enu walk. Complete sows or plaats, with absolute regularity, all kinds of seeds, fine or coarse. It successfully handles with Cultivating Tools, ns showu In cut, \$12.00

it successfully handles beans, beet, cabbage, carrot, celery, corn, lettuce, onlons, pars-nlp, peas, salsify, spln-ach, turnlp, etc., etc. It will plant encumber and melon, scattering the seeds in each hill slx luches, if desired.

It sows or plants any desired depth, drops the seed, covers it, rolls it and marks out the aextrow, all in one operation. The Seeder is entirely removed while the other tools are being used.

## PLANET, JR., NEW NO. 5 SEEDER. ::

LARGE CAPACITY FOR HAND POWER.

Especially adapted for large private gardens and market gardeners.

This is our largest Hand Garden Seed Sower and is adapted for unrket gardeners' use and large hotel or private gardens. It drops all kinds of garden seeds from

sage. It is the latest improved and one of the best seeders in our list, insuring a good crop with the smallest amount of seed; it will sow equally well with a full hopper or when containing only a single paper of seed; it can be thrown out of gear and the flow of seed stopped instantly; it can be set to sow various kinds of seed quickly, accurately and easily, and will not get out of order.

No cultivating or hoeing tools can be attached to this machine.

Price,

Gem of the Garden Hand Cultivator and . . . . Wheel Hoe.

as Seeder alone

\$9.00

family gar-dens this splendid little implement gives unbounded satis-faction. The five culti-

vator teeth are stamped from one piece of steel and do thorough work la loosening and pulverizing the soil— the scufile hoesent off weeds, clean walks, etc., while

the two plows hill up potatoes, furrow ont, etc. **Frice**, plain, with five teeth only, \$3.00; or complete, with Seuffle Hoes, Plows and Cultivator Teeth, as shown in cut, \$4.25.

The Universal Four=Blade Hoe. Hns four blades with elliptical cutting

edges. fastened to arms, each working independent of the others and adjusting themselves to their work by springs. For general hoeing and cultivating it is indispensable. Will do better work with greater case and four times as fast as a hand hoe. A light, handy hoe that has had a large sale and is very popular. **Price**, \$3.00.

Price,

complete as shown in the cut, No. 15,

\$6.00.

Planet, Jr., New No. 4 Seeder, Cultivator, Hoe, Plow, Etc. Especially adapted for the family garden. Sows either in hills Price, in a contin-

This is an unequaled machine for the family garden This is an unequaled machine for the family garden. It sows all garden seeds from the smallest up to peas and beaus in a continuous drill, or will drop in hills 4, 6, 8, 12 or 24 inches apart. It sows with the utmost accuracy as to quantity, distance and depth, opening the furrow, dropping the seed, covering and rolling it and marking for the next row in one operation. It is instantly thrown out of gear and the discharge completely stopped automatically, either by wheeling round on the roller, by raising the handles, or by running backwards. The hopper holds two quarts of seed, but it will sow a small quantity just as well.

The nopper holds two quarts of seed, but it will sow a small quantity just as well.

In addition to the Seeder, the complete machine is the cutivating and hoeing tools, as shown in the cut above; to use the latter the Sower is removed, leaving a perfect wheel hoe, with malleable rapid change frame.

## :: GEM :: Hand Seeder

For Small Sowings and Hot Beds.

It will open the drill,

It will open the drill, sow and cover beet, cabhage, carrot, celery, lettuce, radish, turnip and
all such seeds with perfect regularity. It sows
much more evenly and
ten times as rapidly as by
hand. The quantity to be sown can quickly be
regulared and also the depth. It is the only drill
made for sowing in hot leeds. Will sow a small
packet of seeds as well as larger bulks. Simple,
easily understood, and cannot get out of order.

Price, \$1.50.

:: The :: Weed Slayer. For Hand Power.

A very light and handy wheel weeding hoe, with sharp, steel, flat cutting blade that will cut off all weeds, grass, etc., below the surface. For hoeing walks and roadways it is unsurpassed. It can be run from ½ inch deep to 1½ inches, as desired, and cuts 7 inches wide. Handles adjustable in height to suit tall or short person. **Price**, \$2.00 each.

Price,

\$8.00.

complete, as

shown in the ent, No. 11,

## Planet, Jr., New Single Wheel Hoe, Cultivator, Rake

FOR HAND POWER. This is the very latest and best of the Planet single wheel cultivating implements. The wheel is inrger and can be raised or lowered and can be set on one side for hoeing two sides

· and Plow. ·

of a row at one; the handles are change-able lu height. The outfit consists of one land side plow for land slde plow for shallow plowing, fur-rowing, covering, hill-ing, etc.; three rakes for shallow cultiva-tion, fining, leveling and pulverizing soll; three cultivator teeth

deep stirring of soil; four flat lices of different widths for loosculug crust

and cutting off weeds, and a leaf guard—a most valuable machine.

Prices: No.15, complete, as shown in cut, \$6.00; No.16, less one pair hoes and one rake, \$5.00; No. 17, less one pair hoes, rakes and leaf lifter, \$4.00; No. 18, with only one pair six-inch hoes, \$3.00.

Planet, Jr., New Double Wheel Hoe, Cultivator, Rake and Plow.

FOR HAND POWER.

The latest improved double wheel machine, with several desirable new features. The wheels, 11 inches in diameter, can be set 9 or 11½ inches apart for narrow rows, and 4 inches apart when used as a single-wheel Hoe; the frame is malleable, with a quick change device so the position of the tools may be changed without removing thenuts; the arch is 20 inches high, allowing it to straddle crops when

high, allowing it to straddle crops when well grown. The outfit of tools comprises the greatest variety and all of the latest designs, covering every possible need. They are as follows: One pair each of 4 and 6 inch hoes, one pair each of 3-tooth and 5-tooth rakes, one pair of plows, one pair each of narrow and wide cultivating teeth, and one pair of leaf guards. It is an unequaled garden implement and, although costing you more than some others, you will have the best tool of its kind manufactured.

Prices: No. 11, complete, as shown in cut. \$8.00; No. 12, less rukes and one pair hoes, \$6.00; No. 13, with only one pair 6-inch hoes, \$4.00.

## FOUNDED "PETER HENDERSON & CO., NEW YORK"

## The Henderson Chilled Plow.

The shape is exactly right to do perfect work with grentest ease to team and plowman—the moid is harder than steel, scours like glass in any soil and harder than steel, scours like glass in any soil and turns a beautiful furrow. All improvements, heinding inclining land side, adjustable beam and wheel. Shin piece removable for sharpening; reversible self-sharpening slip share; for all ordinary soils is a grand thing. When the slip point wears round, it can be turned over in a minute. For rocky or sticky soil, use the common share. Either kind furnished as desired.

HOLD.

# HIGH WHEEL

# THE HENDERSON "BALL-BEARING" Hand Lawn Mo

INVENTION'S RIPEST FRUIT! HAS BEARINGS LIKE A BICYCLE! THE LIGHTEST WORKING MOWER MADE!

A 24-inch cut pushes as easily as an ordinary Mower of only 16-inch cut. . . . .

A lawn may now be mown in one-half the time required with old style narrow-cut Mowers.

The Henderson Ball-bearing Lawn Mower is superior to all other Mowers in the following respects: The axles of the revolving cutter, like the axles of a bleyele, work in "ball-bearing" journal boxes or cups, which reduces the friction enormously. These parts are made of the finest case-hardened steel, and will last for years, though we have provided against wear should there be any—so that any one, by simply loosening one screw and tightening another, can force the cup and balls higher up the cone-shaped ends of the revolving shaft, thereby taking up all possible wear. This adjustment is so simple, yet positive, that it can be set to a hair. Our Mower is also built scientificially correct in other respects, resulting in a phenomenally light running Mower. A 24-linch cut cuts the grass as easily as a 16-linch cut old style Mower. Your gardener will not now compline about your Mower being "too large and a man killer," if you supply him with a "Henderson Ball-bearing" Mower, even of wide cut. On the contrary, the gardeners to whom we sent these Mowers last summer for testing, were enthusiastic about them. As one gardener expresses it: "I can cut my lawn in four hours and not be half as tired as I used to be with my old Mower when I took a day for it." Another gardener said: "When the hoss' comes home he don't wonder what I have been doing all day now. I like the Mower because it shows so much work done, and runs so easy." Another one states; "We only used to keep the lawn cut around the house for a ways, and let the rest grow up in grass, but now I can mow the whole place in half a day, and I tell you it makes our grounds look fine."

A wide-cut Mower, in addition to doing the work a great deal quicker,

NDERSON

house for a ways, and let the rest grow up in grass, but now I can mow the whole place in half a day, and I tell you it makes our grounds look fine."

A wide-cut Mower, in addition to doing the work a great deal quicker, insts much longer than a narrow-cut Mower, for there is less wear; in other words, if it requires 100 times around with a 12-inch Mower to cut a dawn, it will only take fifty times around to cut it with a 24-inch Mower.

The "Henderson Ball-bearing" is strictly a high-class Mower; we have not endeavored to make it "chenp," but the best we know how—from the highest quality of iron and steel, which has enabled us to very materially reduce the weight. The castings are lathe-turned and bored, and the journals machine-trimmed, which insures trueness in fitting and smoothness in working, with no irregularities to wear off and leave rattle and play. The knives are of the finest steel and temper, being made especially for our Mowers by Loring Coes, long renowned as the maker of the finest, though most expensive, knives in America. Our knives are sharp and cut like razors, and will keep so if the under knife is kept tightened up to the revolving knives, for then the blades wear to the same bevel, and, in consequence, are self-sharpening. Simply bear in mind that a Lawn Mower, like a pair of shears, cuts by one blade rubbing over another. With shears, if the blades are apart, they bend the cloth over and do not cut; with a Lawn Mower, if the blades are apart, they bend the grass over without cutting it, or pull it, loosening the roots. The remedy is the same in both cases—simply tighten up and bring the cutting blades together. With most Mowers this is a didicult operation, and hard to understand, but in our new Ball-benring Mower we have so simplified this adjustment that even those ignorant of mechanics will have no trouble in always keeping our Mower in fine cutting order, and the lawn in uninjured condition.

The Henderson Ball-bearing Mower has drive wheels 11 inches high, a large, open, non-clogsin

with cheap Mowers

## PRICES OF THE HENDERSON "BALL-BEARING" LAWN MOWERS. Strictly net; no charge for packing or cartage,

15-inch cut \$10.00 21-inch cut 18-inch cut 11.00 24-inch cut

Note.—The 24-inch cut renders it unnecessary for ns longer to make the small size horse Mowers. It will be found very useful on large lawns, even if you have a horse Mower, as there are often times when the ground is too moist and soft to work a horse over it without marring the surface.

## \* "Henderson".... Horse Lawn Mower.

THE LATEST AND BEST.

Side draught keeps horse off uncut grass.

Knives can be raised or lowered instantly.

This is the best horse-power mower

Price for the Henderson Horse Lawn Mower, 36-inch cut, complete with seat, shaft and side draught, \$65.00. (Strictly net; no charge for cartage HORSE BOOTS, improved, best quality, \$9.00 per set of 4.

## UNIVERSAL PRICE LAWN MOWER.

For the benefit of those who want a low-price mower, and for those who have but little grass to cut, we, this season, are offering the best cheap mower made. While the prices are as low as "department store" prices, yet this mower will be found much better, both in quality of knives and quality of work. These mowers, of course, do not compare with our Henderson High Wheel Bail-Bearing Mower, either in perfection of work, durnbility, or case of operation; yet, for a low-price mower they are superior to most others on the market.

# HENDERSON'S BORDER MOWE A THE PROPERTY OF THE PARTY OF

## HENDERSON'S EASY BORDER MOWER.

Especially designed to cut the grass on borders—the aarrow strips of sod, sometimes only a few inches wide—between flower beds and walks, where n side-wheel mower would have one wheel down in the gutter, and, in consequence, the alower would cut into the sod. In our Border Mower a large light cylinder extends the full width of the alower and prevents and keeps the anachine level with the surface and does perfect work. This machine is also useful for regular lawn work. It is very light-running, and will give thorough satisfaction.

Prices for Henderson's Easy Border Mowers: (Strictly net; no charge for boxing or cartage.)

The English Golf Nower you sent me last week is the finest thing of the kind I have ever seen. It has been simply the making of our greens at the Salem County Club.

DA'ID M. LITTLE,

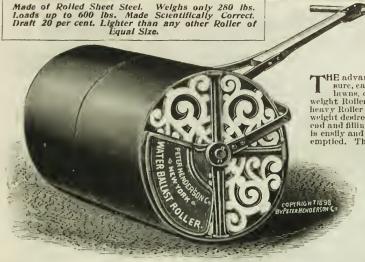

34 Chestnut Street,
Aug. 31st, 1898.

Salem, Mass.

## THE ENGLISH GOLF MOWER.

# ... PETER HENDERSON & CO., NEW YORK...

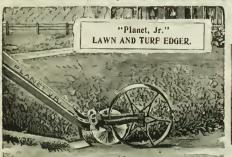

## THE "HENDERSON" WATER BALLAST ROLLER.

THE advantages of a Roller, the weight of which can be increased or lightened at pleasure, can scarcely be overestimated. Often on light or sandy soll, or on newly-made lawns, or line early spring when the ground is moist, or after a rainy spell, a lighter weight Roller is a uecessity; then on thick sward or on hard soil, on walks and roads, a heavy Roller is needed. With the Henderson Water Ballast Roller one can secure any weight desired, between 280 and 600 pounds, by simply removing a thumb-cap from each end and filling the two hollow sections with as much water or sand as may be needed, which is ensily and quickly done with a hose or through a funnel; and the Roller is as quickly emptied. The inside being heavily galvanized, it will inst for years.

But the Henderson Water Ballast Roller has other important merits: As a integer diameter lightens the draft, our roller drums, being of cold rolled sheet steel, are made twenty-four inches in diameter (six feet circumference), and are still lighter than cast-from drums twenty inches in diameter (e), and are still lighter than cast-from drums twenty inches in diameter five feet circumference); in consequence, the Henderson Water Ballast Roller pullsfully twenty per cent. easier than a cast-from Roller of equal weight, and being in two sections, it handles easily and turns without rubbing the grass. The superiority of our Roller is especially pronounced when rolling moist, plinble ground, when rolling is most effective, as the steel drums are smooth and will not gather soil or grass, and, besides, there is no danger of a stone punching a hole through the face, as sometimes happens with cast Rollers. The axles are steel shafting working in inthe-bored journals, making the Roller almost noiseless; the handle is counterbalanced and stands erect when not in use; the sections fit closely and are perfectly round—in fact, it is a perfect Roller, and does perfect work on lawus, teunls courts, golf ast Steel Roller, twenty-four loches

grounds, roads, walks, etc. (See cut.) Price, Henderson's Water Ballast Steel Roller, twent, wide in two sections, twenty-four inch diameter, weighing 280 lbs., loads to 600 lbs., \$25.00. twenty-four loches

Lawn Poor Worn Out

Then it needs fertilizerwhich can be broadcasted on evenly, and at any time of the

## Henderson's " MODEL" Hand Lawn SWEEPER.

A A A A A A A

Designed for use on lawns, small parks, tennis courts, etc. The brush revolves

very rapidly, the litter backward from its under surface. Immediately behind the brush, and parallel with It, a thin shoe passes along over the ground, with its upper surface hellned.

The operation involves the principle of "dust-pan and broom." In addition to this, the revolving brush creates a strong current of air that blows the litter back into the rear of the hopper. If sticks, stones or leaves are encountered, the shoe does not allow them to pass under it, but provides a passage was it into the hopper.

over it into the hopper.

The revolving brush is pressed against the ground, allowing the machine to be used on clipped and unclipped lawns, over rough or smooth ground. The machine does nice, clean work. It does not tear the sod nor dig up the enrth like a rake, but leaves the grass clean and veivety. The bopper can be dumped or taken out and emptled. It takes only a few minutes to go over a large lawn. (See cut.)

The machine weighs twenty-eight lbs., is twenty-five luches wide, twenty-oue luch brush. Price, \$10.00.

STEVENS HAND FERTILIZER SOWER.

Which does the work perfectly, sowing all kinds of lawn dressing and other commercial fertilizers, wood ashes, lime, etc., in large or very small quantities. It can also be successfully used for fertilizing strawberry beds and other garden and field work; is excellent for sifting wood or coal ashes, sawdust, or dry sand on ky walks; will also sow damp saud by removing two blades. The hopper is 34 inches long and holds one and a half bushels. Weight of unchine, 83 pounds. It is well made and ulcely paluted. Price, \$12.00.

#### HENDERSON'S "BEST PARA" RUBBER HOSE.

This is the highest grade of garden hose, being made This is the highest grade of garden hose, being made entirely from New Para Rubber, and will outlast cheap hose three times over. We gnarantee it to staad a 200-pound water pressure. Every length is fitted with the new water-tight couplings, without extra charge. (Hose is furnished only in 25 feet and 50 feet lengths; the sizes 34 and 1 inch refer to the internal diameter of the bore. 34 inch is the usual garden size.)

% inch, per 25 foot length, \$4.00; 50 foot length....\$7.50 1 " 25 " 5.50; 50 " 1....10.00

## "STANDARD QUALITY" RUBBER HOSE.

While it is a good hose and will stand a 75-pound pressure, yet it is not warranted. Each length is fitted with the regular couplings, without extra charge. 34 lnch, per 25 foot length, \$3.00; 50 foot length....\$5.75

### THE "BONNET" LAWN SPRINKLER.

Will Sprinkle either a half or full circle.

It can be placed close to a walk, and while wetting the lawn yet nllows one to pass on a dry wnik.

Price (with spurtostick in the ground),

\$1,50; or by mail, \$1.65.

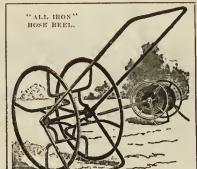

## HENDERSON'S "4-Arm and 8-Arm" LAWN SPRINKLERS.

Serve the double purpose of a beautiful Serve the double purpose of a beautimi fountain and of saturating the lawn or gardea. The water is distributed over an area of 60 to 100 feet in circumference, according to the pressure. An ornamental standard, about 4 feet high, is surmounted with long perforated arms, which revolve, so the beautiful sprays are constantly changing. **Prices**, for a 4-arm sprinkler, \$2.75; for an 8-arm, \$3.25.

BALL and BASKET. The water keeps the ball dancing in the alr. Price, \$2.50 extra

THE HENDERSON LAWN SPRINKLER.

STOTT'S FERTILIZER DISTRIBUTER.

## THE "COMET" LAWN SPRINKLER.

Will Sprinkle an Area FOUR TIMES Greater than any other. The revolving arms and gears earry a nose nozzle around, from which a stream of water is thrown far beyond that thrown by the arms; it will sprinkle a space of 80 feet in diameter. The hose nozzle and tips on eads of arms are adjustable, so that it can be adapted to as small a space as desired. **Price**, \$5.00.

## THE "WATER WITCH" LAWN SPRINKLER.

The water flows with unimpeded force, seattering in fine drops and evenly over a circular area of 25 to 40 feet diameter. It works more satisfactorily with a very low pressure of water than nuy sprinkier we know of.

Price, with spur to stick in the ground (see cut), 75c, enci; by mail, 85e, each.

THE "WATER WITCH" LAWN SPRINKLER.

### HOSE REELS.

"All-Iron" Hose Reel. Is constructed entirely of iron, and is indestructible. It is light in weight, frictioniess, and the wheels being high make it easily manipulated; a good, strong, handsome and convenient reel.

## Stott's Fertilizer and Insecticide Distributer.

Stott's Fertilizer and Insecticide Distributer.

Fili the cells with the Henderson Garden Fertilizer or Lawn Enricher (offered on page 176), or any good commercial fertilizer, which will be gradually dissolved and diffused by the water passing through the Distributer. Fertilizer applied in this manner is immediately available as a plant food; the effects are quick and iuxurfant growth. It can also be used for applying such insecticides as Whale Oil Soap, Tobacco Soap and Fir-tree Oil Soap (offered on page 177.)

The Distributer is made of copper, divided into perforated cells, into which fertilizer or insecticide shaserted. A teach end of the machine hose is attached, one end connecting with the hydrant and the other to an ordinary lose nozace or lawn sprinkler; the water, being forced through, is consequently impregnated.

PRICES:

### PRICES:

2 Cell...\$3.00 | 3 Cell...\$4.00 | 4 Cell...\$5.00

## "COMMON SENSE" LAWN SPRINKLER.

No moving parts to get out of order, no arms to get bent, stopped up, etc. The most beautiful water effect is produced, there being a large unprella spray us well as jets nearly upright, that in falling, break the numbrella spray up into fine drops. The diameter of the circle will vary with the water pressure, from 20 to 40 feet in diameter. Price, \$1.25 each.

"COMMON SENSE" LAWN SPRINKLER.

For watering lawns, flower iteds, etc. The hose is held firmly and can be adjusted to any elevation.
