

SITUATION OVERVIEW

- In 2018, **154 527** suspected cholera cases reported
 - The number of suspected cholera cases has been increasing for 13 consecutive weeks
 - In the high-risk areas of Al Hodeida* and Ibb governorates, nearly **400 000** people received the first dose of Oral Cholera Vaccine (OCV) in early August
- * OCV conducted in Hodeida thanks to 4 days of tranquillity negotiated with all parties to the conflict*

Cholera attack rate 2018 Number of cases / population at risk (per 10 000)	Community support sanitation activities % of coverage (reached people vs targeted people 2018)	System support sanitation activities % of coverage (reached people vs targeted people 2018)
0 - 150	< 25 %	< 25 %
151 - 300	25 - 50 %	25 - 50 %
301 - 600	50 - 75 %	50 - 75 %
601 - 1000	75 - 100 %	75 - 100 %
1001 - 2548
