Where Nature Smiles

AUGUSTA, GEORGIA

THIS IS OUR **100th** ANNIVERSARY

Fruitland has for the past 100 years stood for the best in quality nursery stock, service, and reliability.

Our pledge to the future:

To continue to uphold quality of merchandise, and to maintain the good will of our many thousand of satisfied customers.

Fruitland is proud to announce the opening of a modern up-to-date garden center for the convenience of our customers. Plenty free parking space—shop at your leisure.

TERMS OF BUSINESS

LOCATION. Main office 2505 Washington Road, also known as U. S. Highway No. 28.

TERMS. Cash with order, unless credit prearranged. If C.O.D. shipment is preferred, order must be accompanied with 50% deposit.

TRANSPORTATION. All our prices are F.O.B. Augusta, and customer pays all shipping costs, except on the items which are marked prepaid.

RATES and WEIGHTS. We have estimated shipping weights of plants, which are shown through the catalog, and with these you can telephone your local Post Office or Express Office and find out the cost of transportation.

MINIMUM ORDER. Due to increased shipping cost, no order will be accepted for less than \$3.00.

SUBSTITUTION. We do not substitute unless so authorized. It is well, therefore, to give us the authority to substitute to save time.

GUARANTEE. We guarantee every tree or plant to be in a perfectly healthy condition, true to name, up to grade and first-class in every respect when leaving our hands. Our Nurseries are free from disease. Certificate of State Entomologist is attached to every shipment. We are not responsible for more than the initial cost of plant involved. **WE HAVE NO AGENTS—** When requesting information or advice please enclose stamped envelope for reply.

WHEN TO PLANT. General shipping season opens in fall after we have had killing frosts and good rains, and continues through April 15. We have many container grown plants which can be shipped at any time of year.

INSPECTION. Our nurseries are inspected annually by the State Plant Board, and we are authorized to ship all over the United States.

COMPLAINTS. Any complaints or errors must be reported within 60 days, otherwise no adjustment will be made. We cannot be responsible for plants dying from lack of water or other things beyond our control.

HOURS. We are open for business every week-day. **WE ARE NOT OPEN FOR BUSINESS ON SUNDAYS,** and there are no salesmen to serve you, but you are welcome to visit the nursery and look around on Sundays, if desired.

PLANTING INSTRUCTIONS:

When to plant. As early as possible after the first killing frost.

Care of Trees on Arrival. If not ready to plant immediately, dig a trench, unpack the trees and heel in, cover the roots with earth and water freely.

Preparing the Trees for Planting. Remove all broken roots. Cut back one-year peach, apple, cherry, pear and plum trees to a naked stem, 1½ to 2 feet high, leaving no side branches. Two-year-old trees should have branches cut back to half their length, the lower limbs shorter than those immediately above, then cutting them shorter as you go upward, leaving a long leader.

Preparing the Soil. Fruit trees succeed best in rich loam.

Make the holes at least 2 feet wide, and 2 feet deep. Cover the roots with surface soil, tamping thoroughly as the hole is filled.

Use thoroughly rotted manure, bonemeal or a good grade of commercial fertilizer. Do not put fresh manure around the roots. Cultivate soil; mulch trees after planting with pine straw at least for first and second years after planting.

BERRIES

PRICE ON ALL BERRY PLANTS (except Strawberries) \$1.60 per 10; \$15.00 per 100 (Wt. per 10 plants, 2 lbs.)

No order accepted for less than 10 of a kind.

All berry canes or runners should be trained on wires or trellis to keep fruit off ground.

BLACKBERRIES

Blackberries do their best in a heavy loam. Fertilizers containing a good proportion of potash are the most desirable. The rows should be 6 to 8 ft. apart and the plants from 3 to 4 ft. in the row.

Early Harvest. Very early and prolific. Fruit hangs on canes well.

Himalaya. Strong grower; very prolific. Should be grown on trellis.

BOYSENBERRY

Very large fruit with delicious flavor. Most prolific. Highest quality.

DEWBERRIES

Dewberries should be mulched to keep the berries from the ground.

Leucetia. Early. Sweet and prolific. Dwarf.

RASPBERRIES

The lighter loams are best for the red sorts, and the heavy loams for the black-caps. Cottonseed meal, pure ground bone, or fertilizers containing a good proportion of potash are best and should be liberally applied during the winter and early spring. Mulch heavily with straw.

Cumberland (Black). Very large, firm berries of high quality. The best mid-season market variety.

Cuthbert (Queen of the Market). The best and most reliable of the red-fruited varieties. Fruit large, red, and of excellent quality; ripens middle of May. Prolific bearer. Fine shipper.

YOUNGBERRIES

Youngberries. Fruit larger than dewberries, with a decided flavor of raspberry. Splendid for home use, but will not ship well.

STRAWBERRIES

Blakemore. Uniformly large, bright red berries. Early. Good bearer.

Klondyke. Large, firm berries. A profitable variety. Early bearing on vigorous, upright growth.

ABOVE TWO VARIETIES \$3.00 per 100.

Due to increased shipping costs, no order will be accepted for less than \$3.00.

CAMELLIA JAPONICA

from the FRUITLAND Collection

(The letter following each Camellia denotes the blooming period. E-early; L-late; MS-Midseason).

- **IMBRICATED:** Petals overlapping from center outward; no stamens showing.
- **SEMI-DOUBLE:** Loose formation, having more than six petals; stamens showing.
- **PEONYFORM:** Full center, usually rather loose formation.
- **SINGLE:** One row of petals with stamens in center.

CULTURE OF CAMELLIA JAPONICA

Camellias will grow in full sun if protected for the first few summers with a lattice frame. However, an ideal place for planting is where the plants get only a half day's sun. Do not plant in full shade, as they will not blossom as freely. If the soil is not fertile, use the following mixture: one-half good garden soil; one-fourth well-rotted cow manure; one-fourth peat or leaf-mold, well mixed. After planting, mulch with half-rotted leaves or peat. Each

spring Camellias should be fertilized with well-rotted cow manure and A-C fertilizer. Keep the plants well mulched and watered.

The foliage is sometimes attacked by a scale-insect, which may be readily controlled by spraying with Volck. Be sure to wet the underside of leaves. This and other spray materials may be obtained at our Garden Center at the nursery.

GROUP NO. 1

PINK BUSH ROSES

Cecile Brunner. (Sweetheart). H. Poly. Rosy-pink on rich, creamy white ground, shaded light salmon. Profuse bloomer.

Columbia. HT. Pink, deepening to glowing shade of pink as the bud opens. A peculiarity is that the shades become more intense until full maturity of flowers.

Editor McFarland. HT. A strong growing variety of upright habit. Flowers clear deep rose-pink. Good form. See cut, Page 44.

Mrs. Charles Bell. HT. A shell-pink sport of the well-known Radiance. Very desirable.

Paul Neyron. HP. The flowers are immense, probably the largest of all Roses. Bright shining pink, double.

Picture. HT. Perfect pink buds and flowers. Heavy petalage; fragrant; long-lasting.

Radiance. HT. Brilliant rosy carmine, shaded with rich pink tints; large and full. Strong, upright stems.

The Doctor. HT. Sparkling pink buds, pointed. One of the largest of all blooms, 5 to 6 inches across.

RED BUSH ROSES

Ami Quinard. HT. Deepest velvety red, sometimes called "The Black Rose." Tall grower.

Better Times. HT. Excellent red. Has pointed buds; long stems; fragrant. A grand cut-flower and should be in every garden.

Christopher Stone. HT. Red, fragrant, velvety-textured. Free bloomer.

Etoile de Hollande. HT. Flower bright red, of medium size, fairly full, deliciously perfumed. Upright, vigorous plant. We consider this the best red rose grown.

Floradora. Floribunda. Quantities of vivid, geranium-red 25-petaled blooms are produced all season.

Louis Philippe. C. Dark crimson; fine for massing. Excellent bloomer. Old-time rose.

Poinsettia. HT. Long pointed bud. Double, open, slightly fragrant, brilliant scarlet. Does not fade. Has glossy foliage. Is an abundant and continuous bloomer.

Red Radiance. HT. A splendid, even shade of clear red. Vigorous grower and a remarkable bloomer.

Rouletti. C. Very dwarf, red. Excellent for rock gardens or pot culture. Miniature blooms and foliage.

THE POPULAR TWO-TONED ROSES

Condesa de Sagato. HT. Bud is like a ball of gold with brilliant red stripes. Has spicy odor. Strong upright grower.

Countess Vandal. HT. First show of color is brilliant bronze, lightening toward gold at base. Long slender buds. Unfolds into lovely carmine-pink, buff and gold. Blooms erect, ideal for cutting.

President Hoover. HT. Maroon, orange, and gold.

Talisman. HT. Golden yellow, stained with copper-red and orange; rose on the inside of petals.

UNUSUAL ROSES
