DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 79019

Hiroshima Local Economic Stabilization Bureau

January 7, 1949

Subject : Actual results of "Economy and Adequate use of Gasoline" Movement.

To : Captain King of Chugoku Military Government Region.

Through : Chugoku Liaison & Coordination Office.

An "Economy and Adequate Use of Gasoline" Movement was carried out under the auspices of the Hiroshima Road Transportation Control Office and a report on the actual results of the movement as per attached is respectfully submitted for your information.

Tokiichiro Takewaka

Tokiichiro Takewaka
Director, Hiroshima Local E.S.B.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. [illegible]

1. Copies of an outline of the "Economy and Adequate Use of Gasoline" Movement were sent on September 17, 1948, to the Directors of the Truck, Bus and Private Motor Car Associations respectively.

2. On September 18, 1948, letters of request for cooperation in the movement were sent out to various public offices as well as to police authorities.

3. A Committee promoting the movement for economy and proper use of gasoline was formed.
   a) On September 20, letters of request were delivered to various circles at the instance of the above-mentioned committee.
   b) At 10 a.m. October 2, the 1st Propelling Committee Meeting was held at the Hiroshima Road Transportation Control Office. All the attendants agreed to strongly support the movement.
   c) A list of the Committee members in Japanese is attached.

4. Explanations on the object of this movement were made at various meetings of the Truck, Bus and Private Motor Car Associations.

5. On October 8, the object of the movement was reported to the Commanders of the Chugoku Military Government Region, Hiroshima Military Government Team and the 17th Engineering Corps of BCOF.

6. Collection of slogans
   Prizes were offered for collecting best slogans for the movement. The 2nd Propelling Committee Meeting was held on October 13, when 6 slogans were selected as best out of the total of 546 sent in.

7. Propaganda through newspaper
   This movement was made public in both the Chugoku Press and the Motor Car(Jidosha) Times.

8. Radio broadcast
   At 10 a.m. October 11, the Chief of the Fuel Section of the Road Transportation Control Office made a broadcast urging the campaign.

9. Distribution of printed matters
   a) Handbills and stacards containing slogans were prepared and distributed.
   b) Leaflets were also distributed.

10. On-the-Spot guidance and inspection of persons engaged in transportation:-
   a) From Oct.20 to Nov. 4, 1948, an on-the-spot guidance and inspection of 64 transportation enterprisers was carried out, when the following points were given special stress:-
      1) Fostering of spirit to economize gasoline.
      2) Special care to be exercised in safe-keeping, consuming and handling of gasoline.
      3) Well-regulating of vehicles.
      4) Putting in good order receipts and disbursements of gasoline.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 778013

10. b) General review of inspection

1) As fuel is of vital importance to those who are concerned in omnibus operation, they are doing their best to economize and properly use gasoline and mobile oil.

2) Motor trucks enterprisers are ~~x~~ just the same as bus operators in economizing and properly using gasoline and mobile oil ~~xx~~ so as to attain the object of the aforementioned movement.

3) Private motor-car owners and chauffeurs, generally speaking, are rather good in the economy of gasoline and mobile oil, excepting some who keep no reliable accounting books. However, special attention of them was urged. The main work of them is to use their vehicles for private travel and to transport things ~~xx~~ of secondary importance. Accordingly, they are apt to undervalue the necessity of economizing their fuel which is required for ordinary transportation works.

11. Official commendation

On December 25, 1948, the following were recognized as excellent as a result of examination and ~~xxxxxxx~~ received commendations from the Chief of the Hiroshima Road Transportation Control Office:-

1) Autobus Enterprisers.
Nikoniko Automobile Co.Ltd. - Fuchu-machi, Ajina-gun.
Bihoku Kotsu Co.Ltd. - Bingo Tokaiichi.
Geiyo Automoblile Co.Ltd. - Hoei-mura, Kamo-gun.
Hiroshima Dentetsu Co.Ltd. - Hiroshima City.

2) Truck Enterprisers.
Nippon Tsuun Co.Ltd, Kure Branch Office.-Kure City.
Sanyo Unyu Co.Ltd. - Mihara City.
Nippon Tsuun Co.Ltd., Hiroshima Branch Office.
Yamasa Unso Co.Ltd. - Kabe-machi.
Nippon Yubin Teiso Co.Ltd., Hiroshima Branch Office.

3) Private (domestic) Automobile Users.
Nippon Kayaku Co.Ltd., Fukuyama Dye Factory.- Fukuyama City.
Sanyo Senko Co.Ltd. - Fukuyama City.
Hiroshima Chuo Seika Co.Ltd. - Hiroshima City.
Hazama Gumi, Hiroshima Branch Office.-Hiroshima City.
Chugoku Shinbun Sha.-Hiroshima City.

12. Opinion Regarding Future Plans

Due to this campaign, public cognition in regard to the importance of petroleum products has been greatly elevated, as may be seen in the adjustments made in ledgers, accurate keeping of receipt and disbursement records, prevention of feul leakage, overhauling of cars and researches in the art of driving, prevention of illegal use etc.. Considerable effect of the result of this campaign is perceiveable both materially and spiritually.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. [redacted]

In fact there are clear and obvious evidences that the consumers have made all endeavours for thrift in consumption and in appropriate utilization.

It is recognized as necessary to carry out similar campaign at least once every year because this sort of campaign acts as a reminder and motive for further endeavour and introspection in using gasoline more economically.

But on the other hand, voices heard from the business world in general are to the effect that there are too many so called, campaign rituals so, the planning and execution of the various campaigns, such as the "Gasoline Consumption Economy Campaign," "Tire Protection Campaign", "Storage-battery Protection Campaign", "Campaign for Improving Transportation", etc., synthetically is a problem that will require due consideration.

Further, it is keenly felt that there is a necessity henceforth, to continuously educate and guide all users of private and domestic automobile.

GENERAL HEADQUARTERS
SUPREME COMMANDER FOR THE ALLIED POWERS
APO 500

AG 463.7 (2 Sep 48)GD
SCAPIN 1930/1

10 January 1949

MEMORANDUM FOR: JAPANESE GOVERNMENT

SUBJECT: Restoration to Private Enterprise of the Operation of Petroleum Secondary Distributing Facilities

JAN 20 RECD

1. References:

a. Memorandum for the Japanese Government from General Headquarters, Supreme Commander for the Allied Powers, AG 463.7 (2 Sep 48)GD, SCAPIN 1930, 2 September 1948, subject: Restoration to Private Enterprise of the Operation of Petroleum Main Terminal Facilities.

b. Articles 15 and 23 of the Petroleum Distribution Kodan Law.

2. For the purpose of this memorandum, Secondary Distributing Facilities are defined as petroleum facilities, other than main terminals, which are necessary for the storage, transportation, and distribution of petroleum products. Secondary facilities include, but are not limited to, upcountry depots, service and filling stations, rail tank cars, coastal shipping and motor trucks.

3. It is considered that conditions with respect to importation and distribution of petroleum products in Japan are such that it is now desirable to initiate the transfer to private operation of all secondary facilities and related equipment such as drums, tins and dispensing pumps now in use, or to be used by the Petroleum Distribution Kodan, whether owned by the Petroleum Distribution Kodan or by other agencies of the Japanese Government.

4. Effective immediately, the Japanese Government will:

a. Through appropriate governmental agencies and in accordance with established procedures, transfer to private operation, all secondary facilities and related equipment such as drums, tins and dispensing pumps now in use, or to be used by the Petroleum Distribution Kodan, whether owned by the Petroleum Distribution Kodan or by other agencies of the Japanese Government.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 77-0[illegible]

b. Should private operators of any secondary facilities which are now operated, used, or leased by the Petroleum Distribution Kodan, or its agents, not be obtained in accordance with established procedures within sixty (60) days of the date of this memorandum, take the necessary action through the Director General of the Economic Stabilization Board to have a private operator assume responsibility for operation of such facilities.

5. Following the transfer of all facilities now in use to private operation, should it be deemed necessary, to accomplish efficient importation and distribution of petroleum products, to bring into use any additional facilities, the Director General of the Economic Stabilization Board shall determine such additional facilities as should be brought into operation, and shall take the necessary action to have a private operator assume responsibility for operation of such facilities.

6. Following assumption of responsibility by private operators for control and operation of the secondary facilities in accordance with the foregoing, petroleum products shall be distributed for Petroleum Distribution Kodan from such facilities under the provisions of service contracts to be entered into between the Petroleum Distribution Kodan and the private operators of such facilities. Such contracts shall provide for fair and adequate fees to be paid to the operators by the Petroleum Distribution Kodan, the provisions of such contracts to be approved in advance by the Director General of the Economic Stabilization Board and by the Supreme Commander for the Allied Powers. In approving the provisions of such contracts, only those fees will be approved which will provide to the operators of facilities fair returns to meet the cost of the operation of such facilities during the period such contracts are in force.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 77801

NR file N°. 17

BASIC: Ltr., Tottori Mil Govt Team, APO 317, file 51, subj: "Allocation of Fuel and Oil for Japanese Public Works and Reconstruction", dtd 15 Oct. 48.

File No.51 2nd Ind RAN/ka

Headquarters, Tottori Military Government Team, APO 317, 10 November 1948.

TO: Commanding Officer, Chugoku Military Government Region, APO 317

1. In accordance with paragraph 1, 1st Indorsement, this headquarters carried out an on-the-spot investigation and interrogation of directors of the Tenjin River project and the following facts were disclosed:

a. The local branch of the Chugoku-Shikoku District Construction Bureau has sufficient amounts of heavy machinery on location to warrant the allocation of fuel and oil as listed in paragraph 1, basic communication.

b. The reasons for such large stockpiles of fuel and oil at the time of the E.I.B. investigation are:

(1) Allocations are not sufficient to keep this machinery in operation at all times which necessitates piling of certain items while awaiting additional allocations of others.

(2) Operations must be suspended during certain periods of the year because of meteorological or geographical conditions.

2. So much of paragraph 1, basic communication as regards the absence of machinery at this project was apparently a mistranslation or mistake on the part of the local E.I.B. As stated in paragraph 1.a. above, machinery is on location, some of which has been there since 1935 when the project was originally started.

CMGR 463.7 (D-Ki) 1st Ind

Headquarters, Chugoku Military Government Region, APO 317, Kure, Honshu, 21 October 1948

TO: Commanding Officer, Tottori Military Government Team, APO 317

1. Basic letter does not contain any information as to what action has been taken by the Japanese authorities, or by your headquarters, on a local level regarding this matter.

2. This matter would appear to come under the Critical Materials program, and as such, action should be taken through the Procurators Office, against the director of the Tottori branch of the Chugoku - Shikoku District Construction bureau for hoarding of critical materials.

3. This headquarters will take up this matter with the head office of the Chugoku - Shikoku construction bureau, and with the petroleum products distribution Kodans, recommending that no further allocations be made until existing stocks have been used, and until the necessary machinery for the project has been received.

4. Headquarters Eighth Army will also be notified of the contents of basic letter and of the action taken by this headquarters.

5. Action taken by your headquarters will be notified to this headquarters at earliest.

File No.51

15 October 1948

SUBJECT: Allocation of Fuel and Oil for Japanese Public Works and Reconstruction.

TO: Commanding Officer
Chugoku Military Government Region
APO 317

1. Investigations by the Economic Investigation Board reveal that excessive quantities of fuel and oil are held by the Branch of the Chugoku-Shikoku District Construction Bureau of the Ministry of Construction and Public Works engaged in the Tenjin River project near Kurayoshi, Tottori Prefecture. Regular monthly allocations of fuel and oil are made thru the Tottori Prefectural Petroleum Distribution Kodan for the operation of trucks, bulldozers and other heavy equipment. However, none of this machinery has yet been received on this project, and, as a result, the following surpluses have accumulated:

	Monthly Allocation	Stock on Hand
Gasoline	1300 litres	3740 litres
Mobile Oil	118 "	1800 "
Machine Oil	50 "	1180 "
Lighting Oil	200 "	2110 "
Light Oil	300 "	1060 "
Cylinder Oil	20 "	270 "
Diesel Oil	60 "	500 "
Grease	20 "	90 "

2. It is recommended that allocations be discontinued until present stocks are exhausted.

CMGR 463.7 (D-Ki)

SUBJECT: Excessive Allocations of Fuel and Oil

TO : Commanding General
Eighth Army
APO 343
(ATTN: Military Government Section)

1. During the course of an investigation by the Tottori Economic Investigation Board, it was discovered that a branch of the Chugoku-Shikoku Construction Board was holding excessive stocks of petroleum products. These stocks ranged from three to twenty times the monthly allocations, which allocations were being made for heavy machinery which was not in the possession of the branch.

2. On 25th October, a conference was held at this headquarters with officials from the Chugoku-Shikoku Construction Board and from the Petroleum Distributing Corporation. It was pointed out that petroleum products are very critical throughout Japan and that hoarding of critical materials is an offence.

3. This headquarters recommended that further investigation be made into this matter by the Petroleum Distributing Corporation and that no further allocations of petroleum products be made until the existing stocks had been used. It was also recommended that the Chugoku-Shikoku Construction Board review all allocations in light of actual requirements and uses.

4. This headquarters also notified other Military Government Teams in the Chugoku Region that action should be taken to insure that all local agencies are not holding excessive stocks of petroleum products, and that demands for petroleum allocations are based upon actual needs.

5. Inclosed are copies of basic letter Tottori Military Government Team and 1st Indorsement from this headquarters.

CMGR 463.7 (D. Ki).

Subject : Reported excessive holdings of Petroleum Products.

To : Commanding General, Eighth Army
(Attn Military Government Section)

1. Reference Letter this headquarters, CMGR 463.7 (D. Ki) subject: "Excessive allocations of fuel and oil" dated 26 October 1948.

2. This headquarters and Tottori Military Government Teams have carried out further investigations into this matter, and now find that the Tottori branch of the Chugoku-Shikoku Construction Bureau is not holding excessive stocks of petroleum products, and that the information received from the Tottori Economic Investigation Board relating to machinery for which the allocations are made, as not being in the possession of the branch of the Construction Bureau was incorrect.

3. The position is that the monthly allocation of ~~petroleum products~~ fuel is not sufficient to enable the machinery to be operated on a full time

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. [illegible]

basis, and this necessitates building up a reserve to enable the machinery to be operated when sufficient fuel is available.

4. Enclosed is a copy of 2nd Indorsement from Tottori Military Government Team in answer to basic letter of this headquarters requesting further investigation to be made.

GENERAL HEADQUARTERS, SUPREME COMMANDER FOR THE ALLIED POWERS,
APO 500, 7 October 1948

TO: Commanding General, Eighth Army, APO 343

1. The Maritime Safety Authorities Bill became operative on 1 July 1948. Chapter 1, Article 1, of this law provides that "for the purpose of insuring Maritime Safety and preventing, detecting and suppressing violations of laws of the Japanese Government in harbors, bays, sounds, and coastal waters on the high seas adjacent to Japan, there shall, by virtue of this law, be established as a separate agency, under the jurisdiction of the Minister of Transporation, the Maritime Safety Board. The area of a port in the mouth of a river shall be established by separate law."

2. As a result of the establishment of the Maritime Safety Board, the National Rural Police and the Water Police were relieved of all water policing duties as of 1 July 1948 and are not now authorized to engage in such activities.

1. During the course of an investigation by the Tottori Economic Investigation Board it was discovered that a branch of the Chugoku - Shikoku Construction Board was holding excessive stocks of petroleum products. These stocks ranged from three to twenty times the monthly allocations which allocation were being made for heavy machinery which was not in the possession of the branch.

2. Petroleum products are very critical throughout Japan and increased demands can be expected for the 1948 fall crop collection program along with continuous requirements for the fishing industry and essential transportation needs. In view of these facts this headquarters is recommending to Chugoku-Shikoku Construction Board that it review all allocations in light of actual requirements and uses.

3. The commanding officers of military government teams will take action to insure that all local agencies are not holding excessive stocks of petroleum and that demands for petroleum allocations are based upon actual needs. Such action taken throughout the region should allow maximum quantities of fuel to be allocated to essential needs.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 77-0019

YAMAGUCHI BRANCH
CHUGOKU LIAISON & COORDINATION OFFICE

YBL No. 48 3 November 1948

TO: THE HEADQUARTERS, YAMAGUCHI MILITARY GOVERNMENT TEAM

FROM: G. Matsumoto, Chief, Yamaguchi Branch, Chugoku Liaison and Coordiantion Office

SUBJECT: Main Works and Services Rendering by Contractors under P.D. in Yamaguchi Prefecture

1. Reference is made to a list "Petroleum Reguirements for Month of Dec 48 Report Control Symbol QDC-29" prepared by Chugoku Military Government Region dated 13 October 1948.

2. The list referred to in para.1 has been checked by the authorities of the Contruction Division, Yamaguchi Prefectural Office whether is it proper or not.

3. The prefectural authorities are of opinion that the figures described in the list seem almost adequate except a few ones to be revised as stated in the attached "inclosure a".

4. The main works and services being rendered at present by contractors under procurement demand are as listed in the attached "inclosure, b", according to repoorts received from prefectural office and contractors concerned.

G. Matsumoto

(MATSUMOTO Giro)

Chief, Yamaguchi Branch
Chugoku Liaison& Cordination Office.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 77013

ENCLOSURES:

a. Petroleum Reguirements for Month of Dec 48.

b. Main Works and Services Rendering by Contractors under P.D. in Yamaguchi Prefecture.

Inclosure a.

TO: Commanding General, Eighth Army, APO 343
(ATTN: Military Government Section)

1. Forwarded for your information.

2. This headquarters has taken this problem up with the Hiroshima Economic Stabilization Board, and has made recommendations, that checks be made on the allocation of petroleum products tickets, and also that a greater degree of supervision be made over the distribution and use of these products. The Hiroshima E.S.B. is taking steps to improve the situation but owing to shortage of staff, it will be some considerable time before any definite progress can be made.

3. The following recommendations are submitted;

a. That a more efficient and foolproof system of distribution be set up to enable control and supervision to be properly maintained.

b. That the special allocations of fuel for contractors, working for the occupation forces, be placed under control of the Special Procurement Board, who will be responsible for the issuing of allocation tickets and supervision of the distributing Kodans.

c. That a system of work tickets or drivers trip tickets be introduced, so that a check can be made on the actual quantities of petroleum products issued, and used by contractors working for the occupation forces.

File No: HMGT 463.7

SUBJECT: Petroleum Products Distribution Difficulties in Hiroshima Prefecture

THRCUGH: Commanding Officer
Chugoku Military Government Region
APO 317

TO : Commanding General
Headquarters
Eighth U.S. Army
APO 343
(ATTN: Military Government Section)

1. The following report is submitted for your information and any action deemed necessary.

2. During the months of June, July and August 1943, this headquarters placed a high priority on the surveillance of Petroleum Products in all phases. The purpose of placing such a priority was for the reason of determining whether or not the system in use was as efficient as it looks on paper; and also for the purpose of trying to get the various petroleum products into the hands of the people and organizations that are working to provide the necessities of life and aiding in the economic recovery of this prefecture and Japan.

3. The following is a brief summary of irregularities disclosed during the many inspections made, and conferences held:

a. The receiving phase of the current system works very smoothly as far as getting the petroleum into the hands of the Prefectural Branch of the Petroleum Distribution Kodan (P.D.K.). A large gap then enters the picture for the reason that the P.D.K. distributes petroleum to it's various branch distribution stores in exchange for cancelled allocation tickets. The allocation tickets are issued by the chiefs of the various sections and subsections of the prefectural government in accordance with the amount that their section is allocated to distribute. These section chiefs allocate the petroleum products without any type of check-up on the applicant's application. The result of such haphazard issuance of certificates by the various section chiefs has resulted in

0292

8307

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 776019

individuals and firms obtaining petroleum products for non-existant and inoperative vehicles.

b. The Hiroshima Branch Office of the Land Transportation Section (a part of the J.G.R.) was found to be issuing most of their certificates to the Nippon Express Company, The Japanese Government Railway and various taxi companies, while essential private express companies were forced to purchase 90% of their necessary petroleum products on the black market. This has been corrected by 50%.

c. At the beginning of June it was found that there was no method of allocating the amount of various petroleum products to different types of vehicles. This was corrected, however, and a table worked out to care for the needs of all types of vehicles. This table is now in use to some extent but is not efficient.

d. It was found that large amounts of petroleum products are consumed by taxi companies. (Taxi companies play no essential part in the economy of this prefecture except that they are used to haul people around the large cities. The fee charged for such services are so high that only the class of people known as the "New Yen" class are able to use them, therefore taxies are not deemed essential).
Also large amounts of petroleum products are used for the purpose of recreational driving.

4. Another phase of distribution that was found to lack efficiency was that in which special allocations of petroleum products are issued to Japanese contractors for use on contracts for the occupation forces (Reference: Circular No.154, Headquarters, Eighth U.S. Army, dated 23 September 1947). During the various inspections in accordance with the referenced circular the following irregularities have been found:

a. Contractors have received amounts of the various types of lubricating oil and greases in excess by as much as ten times their needs for the vehicles that are used on the contracts for occupation forces.

b. Contractors have applied for and received both gasoline and diesel fuels for wood burning and gasoline fueled vehicles.

c. Contractors have received petroleum products for contracts that have been completed.

d. Contractors are able to receive allocations of petroleum products, for the same vehicles, from the ordinary civilian allocation system and also the special petroleum products system although the vehicles are used only on the procurement demand contract every day.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 719015

e. It has been found that there is no system now in effect to assure the Japanese government that reports of vehicles used on occupation force contracts are actually used on these contracts.

6. Because of the surveillance by this headquarters, the following measures are now in effect for the purpose of improving the petroleum products distribution and further recommendations are forwarded for your information:

a. Conferences have been held with the officials concerned and amendments adopted for the improvement of the distribution. Amendments to the system have not been carried out because a change in the national system is not authorized on a prefectural level.

b. Contractors working on occupation force P.D. contracts have received cuts up to 80% in some instances and 100% in all others.

Recommendations:

1. That a study of the present distribution system be made and then so revised that it will be more efficient and foolproof.

2. That some organization be given the authority and responsibility for checking on the proper use of petroleum products with the Japanese economy as the primary benefactor for every gallon used.

3. That taxies and other nonessential passenger-cars, motor-scooters, racing motor-cycles, racing cars and two wheel motor-cycles be not permitted to use petroleum products under any circumstances.

4. That trucks and busses being used for recreational purposes be not permitted to use petroleum products as fuel for that purpose.

5. That all motor vehicles, except those of the police, fire and health departments be banned from use between the hours of 1800 and 0530 in order to prevent joy riding on scarce petroleum products.

6. That all day time use of vehicles be prohibited except for specific purposes of earning a living or conducting a business that is deemed essential.

7. That the present system of special allocations of fuel for the use of Japanese contractors working for the occupation forces be abolished immediately and the local branch of the Special Procurement Board be made

DECLASSIFIED E.O. 12065 SECTION 3-402/NNJG NO. [illegible]

responsible for the issuance of certificates for this purpose. This same branch should also be responsible for the accounting for every item used on the various contracts by the submission of sworn certificates of legal use to be presented to the Petroleum Distribution Kodan prior to the issuance of a new allocation.

T. M. CLOWARD

CMGR 463.7 (D-Ki) 1st Ind

Headquarters, Chugoku Military Government Region, APO 317, Kure, Honshu, Japan, 3 September 1948

TO: Commanding General, Eighth Army, APO 343
(ATTN: Military Government Section)

1. Forwarded for your information.

2. The following action has been taken by Hiroshima Military Government Team to endeavor to remedy this situation:

a. Conferences with the local Japanese authorities to endeavor to obtain release of supplies of surplus petroleum products reported in inventories of critical materials. The Prefectural Economic Stabilization Board could not authorize this release without permission from the central E.S.B.

b. The head of the Prefectural National Rural Police phoned to his headquarters and requested that they contact the Central E.S.B. to obtain this release, but the Central E.S.B. would not approve.

c. A letter was written to the Petroleum Distribution Kodan (Agriculture and Forestry Section, Marine Transportation Section) asking for replacement of the fuel used, and making recommendations for future emergencies (attached as inclosure).

3. This headquarters contacted Headquarters, Eighth Army, reference this matter, emphasizing the results obtained in this raid by the water police, and asking whether replacement of the fuel used in the raid, could be made, and also asking that the monthly allocations of petroleum products be increased to enable more efficient use of the water police.

4. In view of the importance of getting foodstuffs delivered into legal channels, and the curbing of blackmarket activities, this headquarters concurs in the recommendations made in paragraph 4 of basic letter.

5. As the present allocation of petroleum products to the water police is only sufficient for operating for approximately 14 days per month, and in view of the large amount of blackmarket activity in Hiroshima Prefecture, this headquarters recommends that the amount of petroleum products be increased to twice the present allocation.

It is also recommended that surplus stocks of petroleum products, shown in inventories of critical materials, be made available to the Prefectural Police, to set up an emergency pool to take care of any similar raids which may occur in the future.

D/EMN /mn

23 August 1948

File No: HMGT 463.7

SUBJECT: Fuel for Water Police Craft in Hiroshima Prefecture

THROUGH: Commanding Officer
Chugoku Military Government Region
APO 317

TO : Commanding General
Eighth Army
APO 343
(ATTN: Military Government Section)

1. The Water Police craft operating in the Inland Sea in this prefecture are twenty-four (24) in number and at present are confined to routine duties of a limited nature due to scarcity of fuel.

2. Recently, during a surprise raid on blackmarket operations held at night, more than two million yen worth of blackmarket materials and foodstuffs were confiscated and returned to legal channels. During this raid, the increased activity of blackmarket operations held at night was especially noted and it was felt that more raids of this nature would effectually curb illegal operations, especially the unauthorized transportation of fish to larger cities where better prices are paid.

3. However, this one raid practically exhausted the limited supply of fuel available for the month of August and future raids of this sort will be impossible unless an increase of fuel is allocated for this type of activity.

4. Due to the increased activity of blackmarket transportation on the Inland Sea at night, this headquarters firmly believes that an increased allocation of fuel for at least one surprise night raid a week is important towards the control of blackmarket activities in this prefecture and requests that additional amounts of fuel and oil, in addition to the present monthly allotment, be allocated for this purpose.

7930

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 78013

BASIC: Ltr. Hiroshima MG Team, APO 317, HMGT 463.7, dtd 23 August 48, Subject: "Fuel for Water Police Craft in Hiroshima Prefecture", Continued.

At present, the allocation for 24 craft, one of which is steam powered, is 5,000 liters of gasoline a month. There is none available for emergency use.

5. The amount of gasoline and oil needed for one raid of twelve (12) hours duration for twenty-three (23) boats is:

Gasoline	-	3,290 liters
Diesel Oil	-	6,202 liters
Mobile Oil	-	948 liters

Total amount required for four (4) raids during a month are:

Gasoline	-	13,160 liters
Diesel Oil	-	24,808 liters
Mobile Oil	-	3,792 liters

Another phase of distribution that was found to lack efficiency was that in which special allocations of petroleum products are issued to Japanese contractors for use on contracts for the occupation forces (Reference: Circular No.154, Headquarters, Eighth U.S. Army, dated 23 September 1947). During the various inspections in accordance with the referenced circular the following irregularities have been found:

a. Contractors have received amounts of the various types of lubricating oil and greases in excess by as much as ten times their needs for the vehicles that are used on the contracts for occupation forces.

b. Contractors have applied for and received both gasoline and diesel fuels for wood burning and gasoline fueled vehicles.

c. Contractors have received petroleum products for contracts that have been completed.

d. Contractors are able to receive allocations of petroleum products, for the same vehicles, from the ordinary civilian allocation system and also the special petroleum products system although the vehicles are used only on the procurement demand contract every day.

DECLASSIFIED E.O. 12065 SECTION 3-402/NND NO. [illegible]

e. It has been found that there is no system now in effect to assure the Japanese government that reports of vehicles used on occupation force contracts are actually used on these contracts.

6. Because of the surveillance by this headquarters, the following measures are now in effect for the purpose of improving the petroleum products distribution and further recommendations are forwarded for your information:

a. Conferences have been held with the officials concerned and amendments adopted for the improvement of the distribution. Amendments to the system have not been carried out because a change in the national system is not authorized on a prefectural level.

b. Contractors working on occupation force P.D. contracts have received cuts up to 80% in some instances and 100% in all others.

Recommendations:

1. That a study of the present distribution system be made and then so revised that it will be more efficient and foolproof.

2. That some organization be given the authority and responsibility for checking on the proper use of petroleum products with the Japanese economy as the primary benefactor for every gallon used.

3. That taxies and other nonessential passenger-cars, motor-scooters, racing motor-cycles, racing cars and two wheel motor-cycles be not permitted to use petroleum products under any circumstances.

4. That trucks and busses being used for recreational purposes be not permitted to use petroleum products as fuel for that purpose.

5. That all motor vehicles, except those of the police, fire and health departments be banned from use between the hours of 1800 and 0530 in order to prevent joy riding on scarce petroleum products.

6. That all day time use of vehicles be prohibited except for specific purposes of earning a living or conducting a business that is deemed essential.

7. That the present system of special allocations of fuel for the use of Japanese contractors working for the occupation forces be abolished immediately and the local branch of the Special Procurement Board be made

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 778013

responsible for the issuance of certificates for this purpose. This same branch should also be responsible for the accounting for every item used on the various contracts by the submission of sworn certificates of legal use to be presented to the Petroleum Distribution Kodan prior to the issuance of a new allocation.
