SUBJECT: - Re: The Revised Supplementary Application.
(Reference: - Supplementary Application for Conversion of
(& Report on Industrial Facilities, dated 1/7/1946, from
(Maizuru Dock Yard & Ind. Works, Iino Sangyo Kaisha, Ltd.

In compliance with the instructions of K.M.G.T. with regard to submission of Application for manufacturing, we solicit you earnestly for your prompt kindest consideration for the same, placing before our full explanations on the recent situation of our operations. You will see we have made some revisions for the additional productions, in accordance with the instructions.

(1) Real records of operations done since the beginning on the 1st April, 1946. By several permits and directives of SCAP and 1 Corps, the following operations are being done by us: -

	Monthly
(a)Repair of merchant marine & mine sweeping ships: -	¥0,000 Gr. T.
(b)Salvaging of ships: -	3,000 " "
(c)Scrapping of ships: -	1,500 " "
(d)Construction & repair of Freight Cars:-	some quantity,
(e)Making of mine sweeping implements: - 945 sets	
(f)Scrap melting of Destroyed War-implements by el. furnaces: -	some quantity,

---------- X ----------

Practical business records(1/4/46 to end/10/46).
(a)Repairs of Ships:- about 340,000 Gross tons,
(b)Salvaging of ships: - 13,00 Gross tons,
(c)Scrapping(same of Ex. N.S."Yakumo" started since 20/7/46:- 3,800 Tons
(d)Repair of Freight Cars:- 32 cars(started at Mid/7/46)
(e)Making of mine sweeping equipments: - 795 sets,
(quantity of output, recently decided 945 sets in all)
(f)Scrap melting of destroyed War-implements(from Mid/7/46):- abt.680 tons

Respecting the scrapping of Ex. N. S. "Yakumo", this was begun at the Mid. of July, 1946 and is scheduled to be completed on 1/4/47, according to the directive of "COMNAVJAP". We however expect this to be finished by the end of coming Decr., as the progressing degree of work is quite speedy.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775 013

(2) Preservation of machines & implements in our yards. This is still being done by us, according to the directive of the 20th Jan., 1946. We could not get any better result of this at its commencement, as there are very wide ranges of the same and considerable number of them. We however are now doing this almost perfectly and streanuously, since the end of June, in order to comply with the instructions and warnings of the above detachment. We shall below state the details of machines and tools under our control: -

	abt.
(a)Metal working machines: -	4,800.
(b)Electric machineries & apparatus: -	360.
(c)General purpose Ind. machineries & equipments: -	650.
Total: - about.....	5,810.

(3) Cleaning of our yards. As Nippon Seitetsu K. K.(Japan Steel & Iron Mfg. Co., Ltd.), Maizuru Branch, is now loading big quantities of scrap on freight cars, to make the transportation here and also doing scrap melting of destroyed war-implements in our yards, for disposal of the same, we have experienced very big difficulties in performing the command of Maizuru Detachment. Altho' we have almost completed this operation for our main yard, we are now doing this streanuously for the area of "Karimata", as we have recently been commanded further by the Detachment, this. We expect this will be finished too later soon.

Thanking you in anticipation for your best consideration for our sincere solicitation,

We beg to remain,

MAIZURU DOCK YARD & INDUSTRIAL WORKS,
(IINO SANGYO KAISHA, LTD.)

GENERAL MANAGER.

(15). Remarks: - Snowy and rainy weather in Maizuru is a tremendous handicap to carry out the out-door work and repair of ships as its peculiarities that requirements for repairs of ships are quite uncertain(uneven throughout the year) somtime very busy and but somtime not so busy, rather very little to do. Moreover number of ships to be repaired, salvaged and scrapped, will be decreasing and therefore we are very desirous to carry out some additional productions to utilize our plant capacity and supply of skilled labour. Additional production and maximum production for each item which we hope to be authorized are as per the details already stated in Chapter (5),(a) Principal products (3) planned for 1946/47. These operations are to be carried out within the limit of machines and facilities necessary for only repair of ships, salvaging, scrapping, construction and repair of freight cars, scrap melting of destroyed war-implements and making of mine sweeping equipments, which we were already authorized by the permits: that is to say that we are to carry out these by the machines which have been used up to now, not using any other one than the above and not to effect the status of O.D. # 5 machinery now set forth.
