Then these machinery is not used at present.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

6. Necessity for conversion:

a. Since the termination of the war, Kanto Kogyo K.K., having received permission for conversion, had been running the manufacturing business of automobile parts, tool machines of the same, repairing installation of automobiles, general tool machines, bicycle parts and excavator as well as repair of rolling-stocks, but in June, 1949, the company had to close the workshop at last due to the monetary stringency.

b. Our effort, which had been kept for re-openning the plant since then, has brought such fruitful result that a new company was established separately and thus anactual reconstruction of Kanto Kogyo K.K. is aimed at even though the scale is small by calling back the most excellent experts and utilizing every superior machine of the same company.

c. As for the products, both Kiryu Machine K.K. and Pine Sewing machine K.K. are to extend us their every assistance in our manufacturing of spinning machine parts and sewing machine parts and furthermore we will devote ourselves to manufacturing of automobile parts which are specially favored by the Special Procurement Board, while we will produce metallurgic and tool machines in order to meet the demand of machine manufacturing plants in the prefecture.

7. present situation of the company

a. Outlined history
Under the above-mentioned reason, the company shall be formed with the capital 2-million yen.

4. Custodial Area after this Release.

Land Area : 26,468 tsubo

Floor Space: 4,268 "

5. Reason and Purpose of Application:

With the purpose of limiting the custodial area, we concentrated, in accordance with the directive of the Allied Forces, the reparation machinery and equipments which had been located dottedly in the whole area within the area marked in blue ink on the separate map twice in May 1950, and September of the same year. Under the circumstances, we would apply for the release of the land marked in red ink on the map from your designated reparation as well as the buildings and other facilities being located on the same land and its annexed land.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

Additional Remarks

(a) The sub-station is owned by the Kanto Kogyo K.K. except the land and building. It is now in authorized use for distribution of power to the adjacent villages as well as to the company's plant and also to the National Police Reserve in future. As for transmission capacity of electricity of the facilities, there are two transformers respectively of the type of 2,000 KVA or with transmitting capacity of 4,000 KVA in total in addition to two other transformers of the same capacity for reserve. They are well capable of transmitting electricity additionally to the Police Reserve in their existing condition.

The Kanto Industrial Co. has obtained the agreement of Lieutenant-Colonel Hastings with regard to availing of the passage in the premises of the Police Reserve to enter the sub-station either for working or communication. The company will take full responsibility for custodial security of the station as heretofore, which would be secluded from the area of the Police Reserve.

(b) Two ea of boilers-GH and four ea. of coal furnaces-KCMN belong to the Kanto Industrial Co. and respectively under application for melted-down scrap. According to the Police Reserve, they find no trouble on them and allow the company to leave them as they are until approval would be granted for meltdown scrap. The personnel of the police Reserve and Kanto Civil Affairs Region understand the situation.

(c) Boiler-F will be left as it is, because the Police Reserve would use it in future. The Police Reserve is to apply for its authorized use to ESS. SCAP thru Japanese channels.

6. Measure to be taken for Security of Reparations Items after this Release.

Specially fourteen guards will be assigned for thorough custody to meet with the following circumstances: In the new custodial area which would be as big as 26,468 tsubo there are thirteen buildings covering total floor area of 4,268 tsubo and OD-machines numbering 3,503 ea. As for guard posts, two will be set respectively in the north and south, one around the Transformer House in addition to two night watch posts. Different from common plants, this area which is very big has the buildings standing dottedly and visibility is not very good. In addition, there live many jobless people near the area and not a few of them are of radical thought.
Near to the south of the area there is the match manufacturing plant by name of Nissan Agriculture and Forestry Co., Ltd.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

(Note): (1) Area marked in red ink on the separate map denotes land and buildings under application for release from the custody.

(2) Area marked in blue ink denotes custodial area to be continuously placed under custody.

(3) XYZ ~~XXX~~ denote guard posts for daytime and WZ denote guard posts for night-time.

7. Change of Number of Custodial Personnel:

4. Outlined situation of the plant.

Driven into hard maintenance since January, 1949, the plant was closed in June, the same year, at last, resulting in dismissal of all the workers and now it is placed under liquidation by a few personnel remained, while further preparation is being made for re-opening of the factory.

5. Reason for the application.

With the purpose to narrow the area in custody, we having concentrated, on the instruction of the Occupation Forces, the reparation machines and equipments from the buildings scattered in the plant premises into the blue-colored parts on the attached sketch, we are submitting the application for releasing the lands red-colored on the attached sketch, and the buildings and structures located in that land and its annexed land.

6. Remarks.

We are facing much difficulty in guard which is caused by the below listed machines and equipments left in the area covered by this application. We ask your favor to give us

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

your instruction for how to dispose these machines and equipments.

7. Guard policy for the future.

The acreage of the area to be put in custody is 26,468 TSUBO and the buildings to be included in this area are 13, of which floor space is 4,268 TSUBO. The number of

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

the machines is 3,503 designated by OD5/4. The no. of the guard-house is three: one is located at the southern part; one at the northern part; the other at the area around the sub-station. Besides these, there are two night-guard-houses. We would like to take the safest and wisest measures in guarding by increasing the guard strength, because there are scattered many buildings in this area, different from common factories, and accordingly we are unable to enjoy unobstructed view over all parts of the premises, and there live many unemployed people in the neighboring dwelling area and rather many of them seem to have a radical thought, and south to this area there is located Nissan Agricultural & Forestry Industry Co. Ltd. which is manufacturing match.

Note:

1. The parts of the red-color cover the lands and buildings under the application for release.

2. The parts of the blue-color cover the area requiring further custody.

3. The marks of X.Y. and Z are for the guard-houses and W and V for the night-guard-house.

5. Summary of the present situation of the plant.

Subsequent to the growing hardship of operation since January 1949, we had to close our plant and

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

discharge our all employees in June 1949 except small number of them who have been engaging in liquidation work. We are on the preparatory stage for reopening our plant at the present time.

6. Reason for desiring the release.

The items under our application for release have been left as they are since June 1949 when the plant was closed without being used at all these ten months. They are in the broken or age decayed condition because of the leakage of rain in the facilities. If the condition be continued, we are afraid that they would become far more useless.
