CROPS IN ALABAMA -The Mobile Trabus

publishes the following:

Extract of a letter, dated—

"American, Miss, Oct. 15.

"I have just arrived here from South Alabama. This coston coin is universally short in that section of the State, and I think that there will be legalished there than I have ever known before. I have been in this or six counties, and minjurely examined the crops. Many plantstions. I found almost destroyed by the boil worm. In Sumter county there are not a few planters who will fall short of 100 pounds to an acre. I new no crop in all my travels that would more than average half a yield. In Autauga, Cossa, Tallapossa, Chambers and Macon counties, where fine crops were made last year, they have faired this season. Ferry county will probably make about half a crop; Greens will fall far short; the Bigby part of this county will make almost nothing, and the crop in all the cret of it will not than half of owhat it yielded last year.

"I have heard many calculations made with

whe reat of it will not than half of what it yielded last year.

"I have heard many calculations made with regard to the extent of the crop, by men who know nothing of the cultivation gargowth of the staple—all of them basing their estimates on the suppose ion that a last prost will increase the yield; but I have seen no plantation that would be berpfitted if from were delayed till Christmas. The worm has destroyed the whole top crop, and consequently there is nothing left to be majured by a fall ever so favorable. You may set it down as a certainty that the receipt this season in Mobile will, as compared with last year, be dimmished all of 200,000 below. NOO beles.
"The crop in Georgis, will be short, especially in its middle and southern counties. In a word, I have no doubt at all than the whole receipts of the United States will be below \$2,000,000 bales.

neather Concordia, for late Memples papers.

INSULT TO GEN. TAYLOR—It appears, from

the proceedings of an anti-wavery convention, held in Norrietowo, Mass., (eags the Baltimore Cupper,) that Mr. Garrison, the noted abolitonat, had prepared an address to be delivered to he would have applied the most lossing epithets to the President. He read the address to the convention, remarking that "it Zachary Taylor, in view of his wickedness and oppres-sion, had been met with rebukes and railings, instead of cheers and rejricings, he would have

gange to exceedingly offensive as that contem "That office," referring to the Chief Maga-tracy, "was described when the prople elected a Tyran to fit it." You are," says Mr. Gerra-son to President Taylor, in the Address, "you are a successful perpertator of Ribberg, Mag-der, and severy attoony upon a gasnic scale." "You are a man scaler—you are homored, ca-ressed, flottered, but suit you are a man scaler. It is said you are homers, but on homers man would deprive his fellow-man of this liberty. It is said you are brave, but the brave man would not hold in bondage his fellow-man."

Hosticips.—We bean but a min wis killed lert evening on the Gentilly Road, but were unable to find out either the names of the victim or of the ag gressor.
