Letters from Great vail Lake have been received in New York and are published by the leading papers. They are as late as the beginning of March, and contain frightful narratives of the outrages and atrocities committed by the populace under the instigation of that heavy lescher, Buromar Yorke. Prominent among recent occurrences are the breaking up and dispersion of the United States Court by a body of armed men, oreatures of Youne and the Pricethood, and known as the "Danites." The circumstances attending this violent and lawless act are related in the annexed correspondence, which we give in full, as a single specimen of the villainy deliberately practised by the Saints:

Judge Stiles reoponed the Court the next day, the 18th of February, in pursannee of the notice given, and proceeded to business. The Territorial Marshal, Alexander McKay, occupied the proper station of the United States Marshal, they giving the Court an entrely Mormon aspect, with Mr. Burr as the only Gentie within the bar. The journal of the preceding day was then read. Finding that it recorded the Court as adjourned—and to smooth the court as adjourned—and to smooth the court as adjourned with the smooth the Court as adjourned—and that instead of adjourning on this order, and that instead of adjourning on the court day of the court in the court morning—that be had adjourned the Court. Much interest te secited here by the arrival of Hos. W. Drummond, late Judge of Utah Territory, who is now a guest of Brown's Hotal. The Judge, who is 'the observed of all observers.' is, in his personal appearance, very different from what the ocemanity have generally conceived. In height he is not quite six hest tail. It was generally known in Sak Lake that y several of their leaders, isoluding Young, contemplated a trip somewhere during the munth of April, taking with them some three hundred men. One rumor was that they issended to take possession of Blutz Root Valid, in Mushington Territory. Another rusted to take possession of Blutz that they one will be more probable one at, that they one will be more probable one at, that they can be more probable one at, that they to explice the more probable one will resist in casts in anticipated situation to the United States troops. The vegue report that Toung had field the Territory probably graw out of these facilities.
