On February 26, Mrs. E. F. Williams saw from her front dining room window a deer without horns bounding across her grounds between the house and fence through the light sand. It continued the length of the place keeping about the same distance from the fence and sprang over the wire fence into the Dunbar place and was lost to sight.

This morning, Feb. 27, I was at the house. Mrs. Williams showed me where the deer had gone and we went out and I examined the tracks which were perfectly distinct.

MEMORANDA

I heard on Feb. 28 that a deer had been caught in Cambridge on the 27th Feb. & so torn by contact with wire fences that it had to be killed. This was of course the animal of Feb. 26 seen by Mr. E. F. Williams on her lawn.

This A.M. (March 19) Mr. & I met a policeman corner of Appleton & Highland Sts. He said that on Feb 27 he saw the deer, badly wounded by wire fences, on Hume Ave by Fresh Pond. It was found up there that morning, and was reported to Police Headquarters. Men were sent up and the poor creature was put out of its misery. I don't know what became of the body —

The Mergansers made a beautiful display, standing on the ice or swimming & the Blk Ducks looked very handsome standing with head erect on the ice. Among them was a ♂ Mallard.

In a small opening near the shore but about 30 ft. off was a wounded Blk. Duck swimming with one wing erect -
