Report on Shore Patrol Boats of Japanese Governments delivered to Occupation Forces

LOCATION:		QUANTITY:
1.	Tokyo Prefecture	Four
2.	Kanagawa Prefecture	Seven
3.	Osaka Prefecture	Five (not two as previously reported)
4.	Miyagi Prefecture	One
5.	Mie Prefecture	One
6.	Kyoto Prefecture	One
7.	Hiroshima Prefecture	One
8.	Ehime Prefecture	One
9.	Tokushima Prefecture	One
10.	Oita Prefecture	Two
11.	Shiga Prefecture	One
	Total	Twenty Five

1. Tokyo Prefecture.(Tokyo Harbor):

a. Name, tonnage and date delivered.

"Kamome"	(Motor boat)	7 tons	Sept. 19 1945
"Katori"	(Motor boat)	11.3 "	Sept. 12 1945
"Hakuto"	(Motor boat)	1.12 "	June 12 1946
"Nitari"	(Motor boat)	25 feet	June 25 1946

b. Requisition on verbal insturction.

Regarding names of requesting, receiving officers and present location of the boats, no information is obtainable.

c. "Hakuto" was handed over to some U.S. Army unit then located at No.4 Tsukishima, Tokyo, but which has been since moved.

2. Kanagawa Prefecture.(Yokohama Port):

a. Name, tonnage and date delivered.

"Asakage"	(Motor boat)	3.8 tons	
"Hayabusa"	(Motor boat)	2.0 "	Oct. 15 1945
"Shirasagi"	(Motor boat)	5.0 "	Oct. 18 1945
"Sakura"	(Motor boat)	5.0 "	Nov. 20 1945
"Tsubame"	(Motor boat)	5.0 "	Nov. 24 1945
"Hibari"	(Motor boat)	5.0 "	Nov. 28 1945
"Uguisu"	(Motor boat)	3.0 "	Dec. 1945

b. Requisition on verbal instruction.

Regarding names of requesting, receiving officer and present location of boat, no information obtained.

3. Osaka Prefecture:

a. "No. 2" (Motor boat) 6.5 tons
"No.-21" (Motor boat) .6 tons) MP units #7

Delivered to a MP unit of the 25th Division by procurement demand O.S.K.E.-1023.

b. "Alcatraz" (Motor boat) 8 tons
"Civilians" (Motor boat) 8 "
"Empire State" (Motor boat) 5 ") Using

Delivered to Osaka Military Government Team on procurement demand O.S.K.E.-519.

4. Miyagi Prefecture:

QC 011

"Kezety" (lauch) 10 tons

Requisitioned by 11th Airborne Division (Lt. Frank L. Gills, 2nd Lt. Thomas T. Whalen) in May 1946 without procurement demand.

Location of boat - Shiogama Port.

5. Mie Prefecture:

"Kamizima-Maru" (fishing boat) 34.7 tons Using IC 829

Requisition on procurement demand JPNO-2695. Receiving Officer is Mie Military Government Team.

6. Kyoto Prefecture:

"Reg. No.1616" (launch) length 15 meter.

Requisitioned by Maj. Scott (Maizuru Mobilization Office) Detachment of 35th Regiment, Maizuru, without procurement demand. Now, Maj. Richmond of the same unit is controlling.

7. Hiroshima Prefecture:

One boat - Formal requisiton IC 844

So far no detailed information received.

8. Ehime Prefecture:

"2nd Ehime-Maru" (diesel engine) 50.25 tons. IC 852

Requisitioned by Ehime Military Government Team based on M.G.6 ~~Military Government Team~~ dated January 8, 1946.

Since June 1948 when ~~Military Government Team~~ M.G. 6 was cancelled the above Team is still using the boat.

9. Tokushima Prefecture:

"K.B. 503" 17 tons KB503

Requisitioned by Tokushima Military Government Team without procurement demand.

10. Oita Prefecture:

a. "Yu-Maru" 250 tons

Requisitioned by B.C.O.F. in Beppu on December 12 1946 without procurement demand. Later transferred to B.C.O.F. in Kure.

b. "E-307" (launch) 5 tons

Requisitioned by Capt. Pirritt, New Zealand Army in May 1947 without procurement demand. now in Beppu but not in navigable condition. The boat is

11. Shiga Prefecture:

"Hayabusa" (Motor boat) 6 tons - 10 meter.

Requisitioned by 35th M.P. Otsu without procurement demand. Now, Capt. Herbert of above M.P. is controlling.

N.B. The boat in Hokkaido, indicated in the former list has been returned to Japanese Government by Sapporo C.I.C. already.

AG 560 (27 Feb 48)GCS 3rd Ind

GENERAL HEADQUARTERS, SUPREME COMMANDER FOR THE ALLIED POWERS, APO 500,
16 April 1948

TO: Commanding General, Eighth Army, APO 343

1. General Headquarters, Supreme Commander for the Allied Powers, has approved draft legislation, which is now under consideration by the National Diet, for establishment of a Maritime Safety Service. When this legislation is enacted the following conditions will prevail relative to water operations of the police:

a. The National Rural Police will surrender all vessels to the Maritime Safety Service.

b. The National Rural Police will cease to have functions on the water.

c. The independent municipal police forces will continue law enforcement functions on waters within their respective jurisdictions. Law enforcement elsewhere on coastal waters of Japan will be performed by the Maritime Safety Service.

2. Considering the above, it would not be practicable to supply the National Rural Police with additional boats or increase fuel allotments. Municipal harbor police law enforcement functions are confined to ordinary land law enforcement practices, and should be carried out with existing equipment and facilities until such time as the respective municipalities are capable of filling their requirements through local financing.

KYUSHU MILITARY GOVERNMENT REGION
HEADQUARTERS & HEADQUARTERS DETACHMENT
Fukuoka, Kyushu, Japan

APO 929
27 February 1948

SUBJECT: Police Boats and Police Boat Communication, Kyushu

THRU : Commanding General, I Corps, APO 301
(Attn: Military Government Section)

TO : Supreme Commander for the Allied Powers, APO 500
(ATTN: Communications Section, Capt. Blankenship)

1. Forwarded as requested.

2. The attached inclosures (1 through 7), show the number of police boats, where stationed, tonnage, horsepower, speed, type of engine, availability of radio equipment, and remarks on all police boats from all prefectures, Kyushu.

3. The total number of police boats (Water Police and Harbor Police) for all of Kyushu is 76. Only one boat is equipped with radio gear.

4. Police boats are required to navigate in open waters under all weather conditions. Minimum requirements as regards specifications are as follows:

a. Displacement - over 25 tons

b. Speed - over 12 knots p/h in speed

c. Radio equipped

Considering the above, it is of interest to note that only one boat has all of the above qualifications. Four other boats have two of the qualifications (a & b), but one of the four is laid up for repair and another is a borrowed boat subject to being returned to its owner, which leaves only three vessels capable of being considered. Further, lack of fuel keeps all police boats tied up at the docks 50% of the time which further reduces the effectiveness of an already inadequate arrangement.

5. Further, 39 of the total of 76 boats, (over 50%) are borrowed from commercial and private enterprises or individuals.

BASIC: Ltr Kyushu Mil Govt Region, APO 929, dtd 27 Feb 48,
subj: "Police Boats and Police Boat Communication, Kyushu"

The police force is thus not entirely free from obligation to individuals and enterprises. A situation such as this is not conducive to remaining aloof from, or showing favoritism to, those individuals or enterprises to whom they are obligated.

6. From the information contained in the attached inclosures, it can be seen why the Japanese water police cannot intercept, run down, and apprehend smuggling ships and ships engaged in illegal entry traffic. With the craft available, police boats can do little more than navigate in sheltered waters. When one considers that the average boat engaged in commercial fishing has a speed of 10 to 15 knots, little can expected of the water police as far as apprehension of illegal transactions of fish at sea are concerned. The same holds true for smuggling and illegal entry. The water police are the laughing stock of every smuggler and blackmarket operator engaged in illegal transactions that require water travel.

7. It is most difficult to maintain prestige necessary when the police boats cannot travel fast enough to overtake even a fishing boat. This has a crushing effect on police morale and serves to be little the Occupation Forces who (according to the Japanese way of thinking) control the occupation of Japan through the Japanese police.

8. The new autonomous police system which is now being effected can easily be unbalanced and its total success jeopardized by the inability of the water police to effectively handle their share of the burden. The Occupation can ill afford any failures; and the solution to this problem must be completed before the heavy illegal entry traffic this coming Spring has a chance to catch the new police system at a total disadvantage.

9. The conference with the Japanese police and police communications officials from all prefectures, Kyushu, on 17 January 1948, substantiated the opinions of this headquarters and that of all Military Government Teams, Kyushu. The Japanese water police are ill-equipped to cope with the situation. In view of this, the following recommendations are submitted:

a. That the Japanese water police be equipped with vessels of 40 - 75 tons, 20 - 35 knots per hour in speed, and engines of sufficient horsepower to handle the ships without undue strain on the engine and propulsion mechanism.

b. That the Japanese harbor police be equipped with vessels of 5-10 tons and be capable of a speed of 15-25 knots.

BASIC: Ltr, Kyushu Mil Govt Region, APO 929, dtd 27 Feb 48,
subj: "Police Boats and Police Boat Communication, Kyushu"

c. That a ship-shore radio net be established so that all prefectures can control their patrol boats not only in their home prefectural waters, but to send them to adjacent prefectural waters to cope with any emergency that may arise. It is recommended that this ship-shore radio net be handled on the inter-prefectural police radio net, so that close coordination can be maintained between all prefectural police stations and all water police boats. An output of 100 - 150 watts can handle this very efficiently.

d. That the Japanese water police boats be equipped with two-way radio (CW and phone) for constant radio contact. The ability to direct the water police can well spell the success or failure in the control of smuggling and illegal entry.

e. That sufficient fuel be allocated to run the police boats on a full time basis.

f. That the harbor police boats be equipped with two-way radio (15 - 20 watt phone) and be controlled from the prefectural radio station, the same as the water police boats. The shore station could handle the communication with the harbor police on reduced power. An output of 15 - 20 watts (phone) could very effectively handle the harbor police communication with sufficient power to transmit the local messages, yet not interfere with the water police boats (long range net) on the same frequency.

10. In view of the above, and in consideration of the circumstances that exist on this island (geographical location, etc.) request that favorable consideration be given to the recommendations contained in paragraph 9. It is imperative that an early solution to these problems be effected without delay.
