

Gathering Together for Digital Language Support

Anna Belew

anna@endangeredlanguages.com

Hello!

First, I'd like to respectfully acknowledge that I am talking to you from the territories of the Multnomah, Wasco, Cowlitz, Kathlamet, Clackamas, Bands of Chinook, Tualatin, Kalapuya, Molalla, and many other peoples who live and travel along the Columbia and Willamette River valleys. Chinuk Wawa is still spoken here.

Hello!

Who I am:

- Outreach Coordinator at the Endangered Languages Project
- Adjunct Assistant Professor at the University of Hawai‘i at Mānoa
- A (socio)linguist who works on language documentation, revitalization, and African languages
- A settler whose language background is... just English 🤔

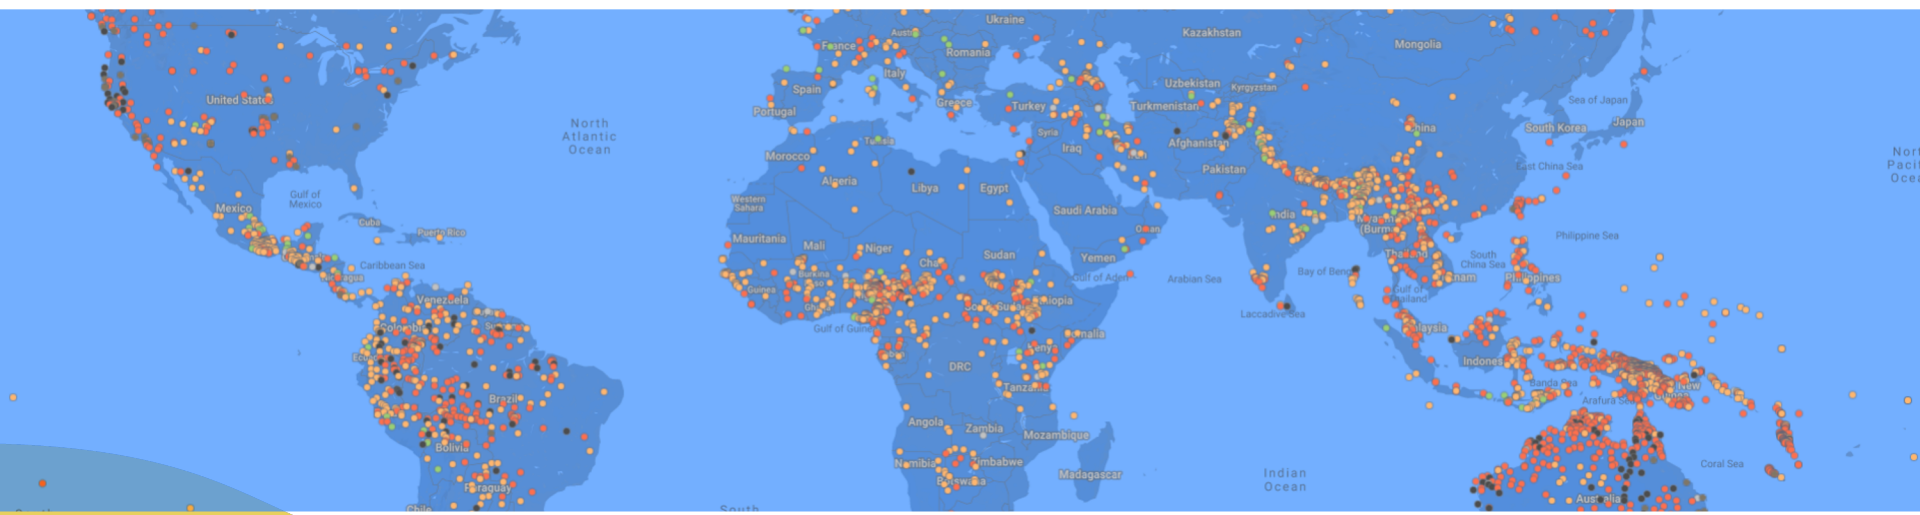

Who ELP is:

- Founding partners are the First Peoples’ Cultural Council (Victoria, BC, Canada) and the University of Hawai‘i at Mānoa (Honolulu, Hawai‘i)
- A global project to support language documentation and revitalization with information, learning resources, and digital community
- More about us at endangeredlanguages.com/about

The worst of times, the best of times

Today, there are about 7,000 languages spoken on Earth¹. Nearly half of them (about 46%) are currently at risk of falling silent.

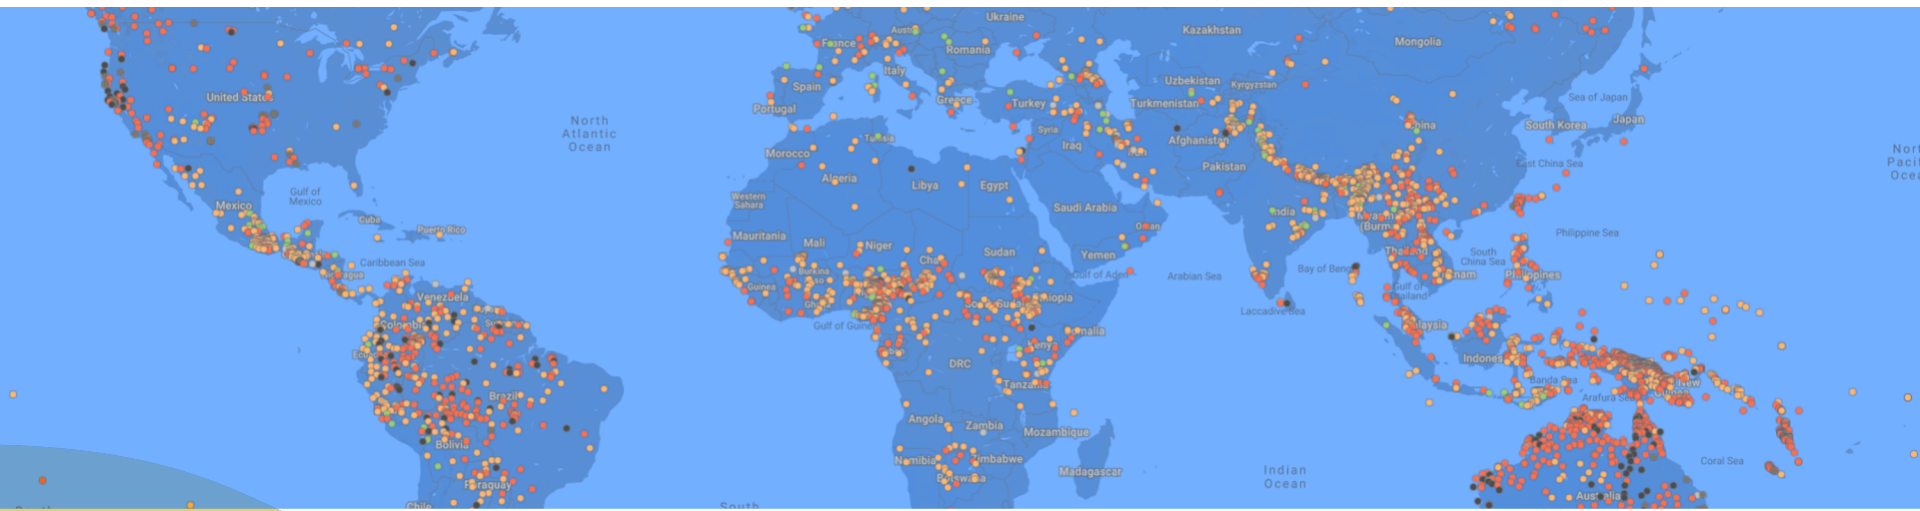

The pressures facing Indigenous and endangered languages are myriad: overt suppression, economic and political disenfranchisement, dispossession of lands, state neglect, stigma, violence...

The worst of times, the best of times

We can't sugarcoat it: the situation of global language diversity is under more threat now than ever.

From all available data, the current rate and scope of language loss is higher than any time in known history. ([Belew & Simpson 2018](#))

The worst of times, the best of times

But the rates of language reclamation and revitalization are also higher than ever.

[Pérez Báez et al. \(2019\)](#) presents an overview of language revitalization initiatives worldwide, drawn from a survey of 245 revitalization programs.

There are probably many existing revitalization initiatives not represented in this survey, and even more which will soon begin!

- (ELP is continuing and expanding the [Global Survey of Revitalization Efforts](#) – we invite you to share knowledge about your revitalization program, if you like!)

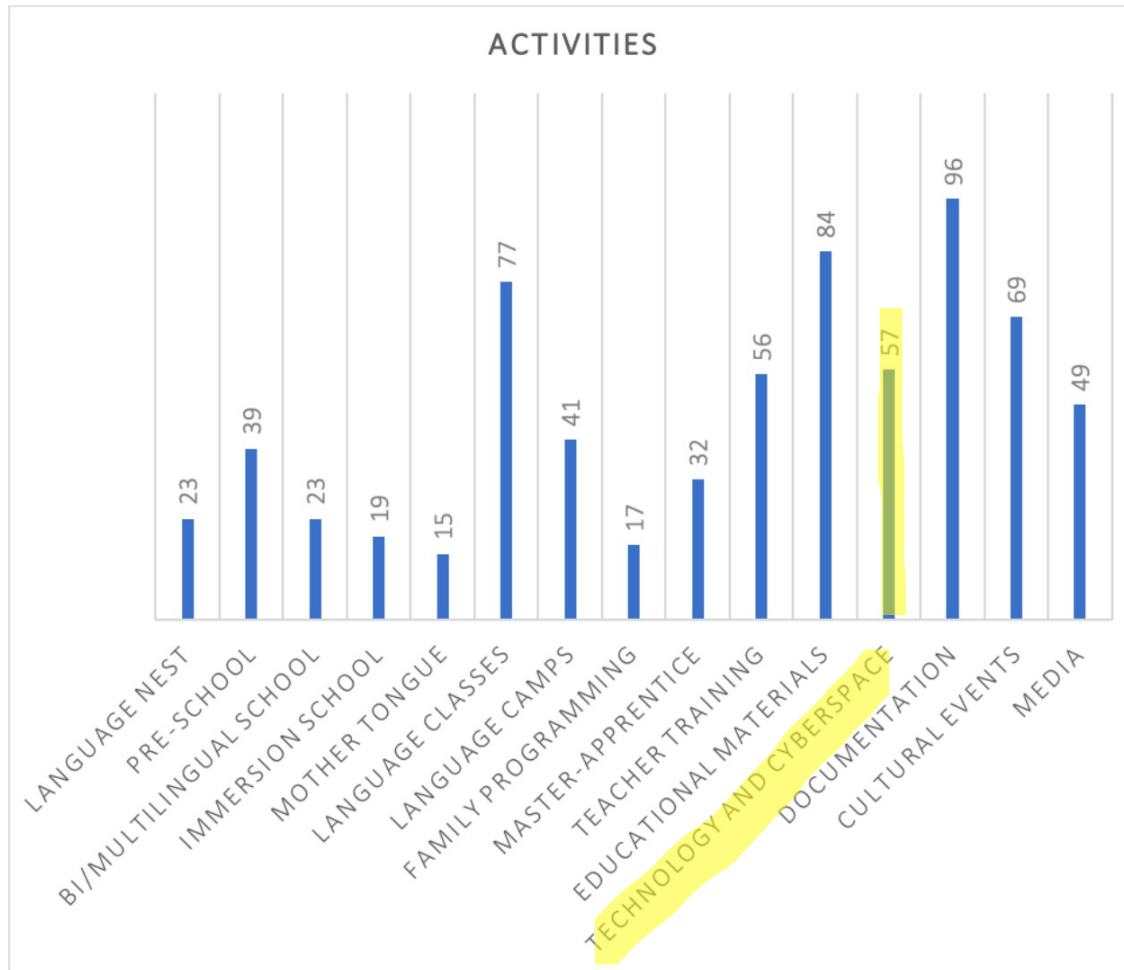

The worst of times, the best of times

About 2/3 of known revitalization efforts have begun since 2000, and almost 1/3 of efforts have launched since 2010:

Percentage of revitalization programs by year begun (adapted from Pérez Báez et al. 2019)

The worst of times, the best of times (for language tech)

Digital initiatives* are the fifth most common activity in revitalization programs.

*broadly speaking – “presence of the language on the Internet or in phone apps, social media, video games, etc., or use of these platforms for language learning”

The worst of times, the best of times (for language tech)

And while this conference may not be specifically about revitalization of “endangered” languages, the underlying goal is shared:

To ensure that every language has the resources and support structures needed to thrive, now and in the future.

(Tech isn't a “magic bullet” for sustaining language, but it sure is a useful tool!)

The worst of times, the best of times (for language tech)

[Plans](#) for the upcoming UN

2022-2032 | INTERNATIONAL DECADE OF

Indigenous Languages

highlight the importance of tech in supporting Indigenous and less-resourced languages:

“Language Technology is not just a niche issue, but something that has true impact on [Indigenous language] endangerment and can therefore help reverse those trends.”

The worst of times, the best of times (for language tech)

The work needs to be done, so how do we go about doing it? Where can we turn for learning?

This is a fairly new field – we've only got about 2 decades of widespread internet use behind us, and even less experience building tech tools for less-resourced languages.

We can turn to each other. We'll need to share ideas, inspiration, and lessons from our own work – and we'll need to do it internationally, **across borders and boundaries.**

Inspiration from around the world: digital activism

Social media and digital language activism are recognized as a key part of supporting languages:

“Currently, digital activism plays a significant role in processes of language revitalisation, using information and communication technologies to increase the visibility of indigenous languages and populations and combat the stigma of IL as lacking or unsuitable for the modern era.”

([UNESCO IYIL2019 assessment report](#))

Inspiration from around the world: information access

Wikis have been an invaluable tool in disseminating information in less-resourced languages, and nurturing digital space for their use. (As y'all know.)

Inspiration from around the world: computational tools

Computational linguistics is increasingly taking up the work of providing tools and resources for languages other than the largest ones. (Thank you all!)

And, importantly, we're seeing more computational linguists coming from Indigenous and less-resourced language communities.

Inspiration from around the world: guideposts

Technology presents immense opportunities and resources for sustaining languages.

It also presents unique new risks and challenges – ones that are beginning to be spoken and addressed among Indigenous and less-resourced language communities.

Dr. Te Taka Keegan, Māori
computational linguist

The New Corporate Threat to Indigenous Languages

First Nations, not companies like Google, should be in control of data, conference told.

[\(Link at The Tyee\)](#)

Inspiration from around the world: guideposts

Coming together to clearly establish terms around data sovereignty, access rights, intellectual property, and the needs and goals of language communities isn't just a nice idea, if we have time for it.

It's **necessary** to make this work useful, sustainable, and ethical.

Inspiration from around the world: guideposts

And it's the **coming together** to discuss these things that will allow us to...

- Learn from each other's hard-won lessons
- Gain inspiration from other successful initiatives
- Draw on the different strengths of different people, approaches, programs, and ways of thinking
- And form **relationships** that will keep us going through the challenges of achieving our language goals.

Inspiration from around the world: guideposts

The role of social media and online spaces in language work isn't only to disseminate information – it's to form community.

This can be profoundly lonely work.

It can feel like you're the only one in your community, or province, or even country, who cares about keeping languages strong, and upholding language rights.

But **you're definitely not alone.**

Inspiration from around the world: guideposts

Some of us are lucky enough to have attended physical events that bring together language technology and revitalization practitioners ([ICLDC](#), [ComputEL](#), [HELISSET TFE SKÁL](#), [LT4All](#), [AmericasNLP...](#))

“Nuk'want'uwal'wi – let us help each other. Gathering together lifted the spirits of the people so that they could continue doing the amazing, incredible, life-giving work that they’re doing in their communities. We need to be able to share our knowledges, the ways we’ve created to save our languages.”

-Dr. Lorna Wanosts'a7 Williams

Inspiration from around the world: guideposts

But access to these physical gatherings has been very unequal – especially when these events take place in the global north...

One more project: towards a Revitalization Helpdesk

People engaged in language work in different parts of the world sometimes feel like they're working in isolation.

A new initiative from ELP aims to help connect language champions with **information, resources, and a digital community of practice.**

One more project: towards a Revitalization Helpdesk

It's daunting to begin a language revitalization or maintenance initiative!

Where to start? What methods would work for our language? What resources are needed? How do we fund this?

There's a lot of great information out there – but it's not always accessible.

- Paywalled or not online
- Jargon or academic language
- Not in your language
- Not relevant to your cultural context
- Tough to navigate or apply to your language situation

One more project: towards a Revitalization Helpdesk

The ELP Revitalization Helpdesk will be a free online resource, supporting language revitalization workers with:

Connections
& community

Information &
training

Stories &
paths

Personalized
assistance

(You can learn more in [this talk](#))

If you'd like to get involved, or share your knowledge:

Please write! We'd love to highlight your work, learn from your experience, translate resources into your languages, and talk about how this project can best support you.

anna@endangeredlanguages.com

Thank you! Akéva!
Mahalo! Mahsie!
