## Annual Spring Catalogue

IN presenting this catalogue we desire to announce that we have extended our premises, which enables us to carry a larger stock and facilitate the filling of orders promptly.

## FREE DELIVERY

Within a radius of 100 miles from New York City we deliver free any order entirely composed of Seeds or Bulbs amounting to two dollars or over, providing cash accompanies the order.

We deliver free by mail all flower and vegetable seeds by the packet, ounce and pound.

If beans, corn and peas are wanted by mail, add to remittance at the rate of 5 cents per pint and 10 cents per quart.

Fertilizers, insecticides, sundries, trees and plants are at all times excluded from free delivery.

No charge for packing or delivery to railroad station, steamer or express office.

We do not offer premiums, but enclose with cash orders a liberal collection of seeds for trial.

## ORDER EARLY

We request our customers to order as early as possible on receipt of catalogue. We endeavor to ship all orders immediately on receipt, but during the busy season it is almost impossible; hence, the importance of ordering early.

## GARDENERS AND FARMERS

Parties requiring the services of reliable men, married or single, should consult with us, as we have the names of a number on our register, thoronghly experienced in every branch of the business. We have a large acquaintance among gardeners in this vicinity, and it is seldom that any one who applies to us fails of getting the right party. No fee.

## NURSERY DEPARTMENT

We have published a New Catalogue containing all kinds of

## ROSES, FRUIT TREES, SHRUBS, EVERGREENS, DECIDUOUS TREES AND HARDY PLANTS,

which will be mailed FREE upon request.

## W. E. MARSHALL \& CO.

# NOVELTIES ANDSPECIALTIES IN FLOWER SEEDS 

## ANTIRRHINIUIM Majus "Ruby"

A beautiful new variety with self colored bright ruby-red flowers. Fine for cutting and borders. Pkt., 25.c.

## AQUILEGIA. Coerulea Fl. Pl.—"Rose Queen'"

This novelty attains a height of 12 to 16 inches. Freely branching and fine foliage. The plants produce on long and slender stalks a great profusion of graceful, long and spurred flowers of light to dark rose with white centre and yellow anthers. Pkt., 15c.

## ASTER, "Daybreak"

Flowers are very large and double, of a beautiful shell-pink color, growing about 2 feet in height. Pkt., $10 \mathrm{c} . ; 1 / 4 \mathrm{oz} . ; \$ 1.00$.

## ASTER. Improved Branching.

This superb strain is of American origin, and is especially adapted to our climatic conditions.

The flowers are very large in size and borne on long, stiff stems, 2 to $21 / 2$ feet high. The petals are long, giving a Chrysanthemum-like appearance to the flower. They flower two to three weeks later than the average type. (See illustration on cover.)

We offer the following colors separate:
Crimson, Dark Blue, Light Blue, Pure White, Scarlet, Shell Pink. Pkt., 10c.; $1 / 1$ oz.,
60 c . Collection of six varieties, 50 c .
Finest Mixed. All colors. Pkt., 10c.; $1 / 4$ oz., 50c.

## ASTER, "Snowdrift"

The earliest Aster in cultivation with superb plumy snow-white flowers of the Ostrich-feather type. Pkt., 10c.; $1 / 4$ oz., $\$ 1.00$.

Dimorphotheca Aurantiaca

## COSINOS.

"Lady Lenox"
The flowers are from six to seven inches in diameter and of a delightful pink color. The plant is strong and vigorous, growing six to seven feet high. Pkt., 10c.; oz., \$1.00.

## DIIMOR_

## PHOTHECA

Aurantiaca
This splendid annual is well adapted for groups or borders, and tlowers continually through the summer. Its Marguerite flowers are rich orange-gold with a dark colored dise, measuring two-and-a-half inches in diameter. The plants grow about 15 inches high and very profuse blooming. Pkt., 25 cents.

# NOVELTIES AND SPECIALTIES IN FLOWER SEEDS-Continued 

## GERBERA JAMESONII HYBRIDA

The large, well formed flowers, borne on long and strong peduncles, last a long time in a cut state and furnish fine material for bouquets and decorative purposes. The colors vary from pure white through shades of yellow, pale red and salmon to orange rose, cherry red, scarlet and rich crimson on violet red. Pkt., 50 cents.

## GYPSOPHILA, Elegans Carminea

Splendid carmine rose flowering strain, much brighter than the old Gypsophila elegans rosea. The plants grow about 10 to 12 inches in height, and are very free flowering. By the loose habit of the plants, the delicate thin branches and the small leaves, this makes it very useful for bouquets, vases and other floral arrangements. Packet, 10 cents.

## GYPSOPHILA, Elegans Grandifiora

This is an improved large flowering, pure white form of the annual Gypsophila. Very fine for cutting. Packet, 10 cents; ounce, 50 cents.

## IMPATIENS, Holstii Hybrida

Resembling I. Sultani in foliage and shape of flower, these hybids produce the following colors: bight red or carmine, deep violet, chamois rose, rosy white, white with red center and orange vermilion. The plants grom from $11 / 2$ to 2 feet high, with dark green foliage, and flower from June until Fall. A partially shaded location suits them west.

Suitable also for pot culture.
Mixed Hybrids. Packet, 25 cents.

## IMPATIENS, Holstii nana, Vermilion Orange

A dwarf compact variety of the attractive Impatiens Holstii. It fcrms regularly branched bushes, from 6 to 8 inches in height, and produces bright vermilion orange flowers in great profusion. Foliage and stem light green. Packet, 25 cents.

## IMPATIENS, Holstii nana, Deep Scarlet

Another dwarf variety with dark foliage and stems; flowers about an inch across, of a beautiful deep scarlet. Packet, 25 cents.

# NOVELTIES ANDSPECIALTIES IN FLOWER SEEDS-Continued 

## KOCHIA TRICHOPHILLA (Summer Cypress)

A hardy annual which forms a compact bush about 2 feet high, with feathery light green foliage changing in the autumn to a deep red. Adapted for pots or forming a hedge for the summer. Pkt., 10 cents.

## MIGNONETTE, "New York MLarket"

This variety is the largest, boldest and best for greenhouse culture. The spikes attain, when well grown, to the prodigious size of from 14 to 18 inches in length. The strain we offer has been carefully selected from greenhouse grown stock. Pkt., 25c.; $1 / 8 \mathrm{oz}$., $\$ 1.00$.

## REHIVANNIA ANGULATA

This very beautiful half-hardy herbaceous perennial is very free flowering; the flowers, borne up the stem, are rosy purple about 3 inches in diameter, and have a rich yellow throat dotted with purple. The individual blooms are large, striking and showy. The plant is easily grown, and flowers the first year, if sown early in the year. Pkt., 15 cents.

## SALVIA, "Ball of Fire"

The flowers are a brilliant scarlet, and the plants are very dwarf and compact, attaining a height of only 2 feet to the top of the flower spikes. Makes a fine pot plant. Pkt., 25 cents.

## SALVIA, "Zurich"

This variety, color brilliant scarlet, is very dwarf and compact, free flowering, and seldom exceeds more than 12 inches in height. It flowers early in June and continues till late in the Fall. Pkt., 25 cents.

STOCKS. Ten-Week

## Marshall's Giant Perfection

We have secured an extra fine strain, which has been carefully selected from the choicest flowers. We can recommend this strain with the greatest confidence as being the best ever offered. The plants attain a height of two feet, and are of handsome pyramidal form, with branching habit.

We offer the following colors: Blood Red, Dark Blue, Crimson, Flesh Color, Light Blue, Pure White, Rose, Scarlet and Yellow. Separate colors. Pkt., 15c.; oz., \$1.00.
Mixed, all colors. Pkt., 10c.; $1 / 8$ oz., 75 c .

## STOCKS. Winter Flowering

Beauty of Nice. Very large delicate pink flowers.
Empress Elizabeth. Strong spikes of very large delicate flesh-pink flowers.
Empress Augusta Victoria. Color silverylilac, grand for cutting.
Queen Alexandra. Similar to Beauty of Nice, except in color, which is rosy-lilac. All of the above 25 cts. per pkt.

## SPECIALTIES IN VEGETARLFS

BEAN, Fordhook Bush Lima

This Lima Bean is the only stiffly erect form of the Potato Lima. It is of erect habit, branches freely but withall the branches held upright. The beans are twice the habit, branches freely but with all the branches held upright. The beans are twice the inches in length and contain four or five large beans. Per half pint,.15c.; pint, 25c.; quart, 50 c .

## CAULIFLOWER, First and Best

An exceptionally good variety for forcing under glass, being very dwarf and robust, and producing large heads of snowy whiteness. This is undoubtedly the earliest and best forcing Cauliflower in cultivation. Pkt., 50 c .; $1 / \pm$ oz., $\$ 2.50$; oz., $\$ 8.00$.

## SWEET CORN, Golden Bantam

This is the hardiest and earliest Sweet Corn in cultivation. It is dwarf in growth, the stalks averaging four feet in height. The ears are from five to seven inches in length and the grains are a rich creamy yellow. It has a most delicious sweet flavor. Pkt., 10c.; pt., 15c.; qt., 30c.

## LEEK, Marshall's Giant

The largest and best Leek for exhibition. Highly recommended as the choicest variety in cultivation, of a mild and delicious flavor. Pkt., 10c.; oz., 40c.

## LETTUCE, Eclipse Cos.

A perfectly distinct variety. It is the dwarfest Cos Lettuce, and produces a firm crisp heart quicker than other sorts, and is the most self-folding variety. Pkt., 10c.; oz., 40c.

## LETTUCE, Wayahead

This is the earliest and surest heading Lettuce grown. It is earlier and larger than May King, more tightly folded and with smaller amount of outer foliage. The leaves are light green and heads blanched to a rich yellow tint. Pkt., 10c.; oz., 50c.

## MUSK MELON, Fordhook

This variety is a cross between the Emerald Gem and Jenny Lind. The flesh is very thick, of a deep salmon color. Its flavor is equal to the Emerald Gem, and the fruits are remarkably even in size, weighing from one-and-a-half to two pounds each. Pkt., 10c.; oz., 30c.

# SIPELALILES IN VEGETABLFS-Continued 

O N I O N, Ailsa Craig

This grand English variety can be grown here with as great success as in England, where it often attains a weight of 2 pounds and over. The skin is a pale straw color, and oval in shape. Excellent for exhibition purposes. The seed we offer is imported and grown from a selected strain. Pkt., 10c.; $1 / 2 \mathrm{oz} ., 25 \mathrm{c}$.; oz., 50 c .

## ONION, Cranston's Excelsior

This is the leading English Exhibition variety, and well deserves its popularity. It is very large and handsome, inclined to globular in shape, and of a beautiful straw color. Pkt., 10c.; $1 / 2$ oz., 25̄c.; oz., 50 c.

## P E A, Prince Edward

The pods are produced in great profusion, and attain a length of seven inches, being closely packed with dark green peas of mellow flavor. Branching habit and robust constitution. Height, 4 feet. Pint, 20c.; qt., 35̃c.; peck, \$2.25.

## PEPPER, Chinese Giant

The largest mild Pepper; flesh very mild and thick. Color brilliant glossy scarlet. Pkt., 10c.; oz., 50c.

## PEPPER, Upright Sweet Salad

The best Pepper for family use. The color is bright scarlet and the flesh thick, mild and sweet. Pkt., 10c.; oz., 50c.

## S Q UASH, Delicious

The Delicious Squash, although similar in color and shape to the Hubbard, is a far superior variety for table use. The flesh is remarkably thick, fine grained, sweet and of rich flavor. Pkt., 5c.; oz., 15c.; $1 / 4 \mathrm{lb} ., 50 \mathrm{c}$.

## SQUASH, Giant Vegetable Marrow

An English introduction, being very much larger than the old variety of Marrow. The color is dark green, flesh thick and solid, with small seed cavity. We had on exhibition a specimen grown on Long Island weighing 55 lbs. and of perfect shape. Pkt., 25 cents.

## TOMATO, Coreless

In shape it is almost round and bright red in color. It is immensely productive, bearing clusters of four to seven fruits 6 to 8 inches apart along the stem. Free from green core; ripens all over at once. A splendid slicing sort. Pkt., 10 cts.; oz., 50 cts.

## TOMATO, Marshall's Prolific

For forcing we can strongly recommend it as being the best variety, as it sets very freely and is an exceptionally heavy cropper.

For outside planting it is the earliest variety grown, an enormous cropper, of medium size, producing as many as thirty Tomatoes on a truss. The fruit is a bright scarlet color, perfectly smocth, flesh solid, and contains rery few seeds. Pkt., 25 cts.

## CHRYSANTHEMUMS <br> WELLS' POCKET NOVELTIES FOR 1910.

These varietics are disseninated simultaniously here by an arrangement with Mr. Wells as in England.
Howard Gould. The florets are long and grooved and the flower builds up into an enormous globe. The inside of the petals are bright golden chestnut with a reverse of pure deep gold.
Kara Dow. Chestnut with a bronze reverse. Described by Mr. Pockett as the biggest bronze. in existence.
Miss Alice Finch. A splendid purple crimson flower. Habit perfect, foliage right up to the flower, stem stiff and of medium height.
Mrs. David Syme. The grandest white for the exhibition table. It is as large as Moir, carries its foliage right up to the flower and the stem is perfect. Certificated in England and gold medal in Australia.
Mrs. R. Luxford. Indian red with golden reverse, splendid dwarf grown. Makes an ideal pot plant and is ahead of any other red we now have.
Mrs. W. A. Read. An intense fiery, scarlet crimson, petals standing out stiff; foliage perfect, which is right up to the flower, stiff stem and a tall grower.
Miss Edith King. An improved Mrs. Knox. Color bright canary yellow, very broad florets. The outer petals twist and curve like shavings. Sturdy and robust grower.
Rose Ellis. An improved Lady Hopetown. Flowers enormous, but can only be recommended for the short vase or supported classes.
Onunda. The Gigantic white. The flower staged by Wm. Duckham measured 45 inches in circumference. The stem was fully equal to carrying the flower erect. This variety scored 94 points on the exhibition scale.
W. Woodmanson. The color is not so intense as Pockett's crimson, but the flower is much larger.

Prices of all the above novelties, $\$ 2.00$ each; $\$ 20.00$ per dozen.

## NEW CHRYSANTHEMUMS

Our stock of new Chrysanthemums are grown for us by C. H. Totty, which is sufficient guarantee that all plants will be strong, clean and healthy.

Price 50c. each, $\$ 5.00$ dozen, except where otherwise priced.
Captain Julyan. Bright primrose yellow, splendid grower and a very satisfactory variety to handle when grown as a pot plant or as a spray. Comes good on any bud.
Gladys Blackburn. A large handsome flower of the Carnot type, buff color, a very easy doer and an all round good thing. Height 3 feet; crown bud for a large flower.
Hetty Wells. Old rose shade of bronze and apricot. This variety is hardly big enough for an exhibition flower but makes a fine pot plant or spray.
Keith Luxford. Wine red, very distinct in color. This variety is not a monster but it is very beautiful and the color is unique; has splendid habit, medium height. Crown bud after August 10th.
Miss Muriel Smith. Salmon terra cotta, charming color, large flowers on stiff stems, Hardly large enough for exhibition but one of the most beautiful varieties grown.
Mrs. A. R. Peacock. A Beatrice May seedling. The style and shape of the flower is much the same as its parent with the added advantage of perfect foliage. A splendid keeper. Certificate C. S. A.

## NEW CHRYSANTHEMUMS-Continued

Mrs. H. Stevens. Golden salmon bronze. This is a magnificent variety and will be very popular as a show flower. Size is enormous, stem and foliage perfect. Any bud after August 15th.
Mrs. W. Arnold. A first class commercial white. Petals very stiff, stem and foliage perfect, flower a splendid keeper and shipper.
Mrs. Wm. Wincott. A fine early pink. Every bud comes perfect and as a commercial pink ranks high. Certificated C. S. A.
R. F. Felton. The deepest possible shade of yellow. The flower is medium in size, stem and foliage perfect, the latter being carried right up to the flower and the nower itself never damps. Every grower should try this sterling novelty.
Wells Late Pink. One of the finest things sent out in many years, flower is extra large, stem and foliage absolutely perfect.
W. Holston. Golden salmon. Every bud produces a perfect flower. Stem is perfectly stiff and the foliage is carried right up to the flower.
W. J. Higgs. Mahogany bronze. This is a perfect incurved flower and as a direct incurved it makes a large flower of its type, dwarf, handsome grower, perfect stem and foliage.
W. Meade. Bright rosy red. One of the very largest in size and a valuable exhibition variety. Carries the foliage well up to the flower, dwarf habit.
Yellow Ivory. This is a yellow sport of Ivory. One of the best and most largely grown commercial varieties in the country.

Price, 25c. each; $\$ 2.50$ per dozen.

## EXHIBITION CHRYSANTHEMUMS

Beatrice May. Splendid white.
Cheltoni. Yellow sport of N. Pockett.
C. H. Totty. Glowing chestnut scarlet.

Col. Appleton. The best yellow.
Glenview. A splendid bronze.
Mary Donnellan. Yellow.
Merza. A grand white.
Morton F. Plant. Very large pink.
Merstham. Large pure white.

Mrs. C. H. Totty. Beautiful pink.
Mrs. H. Partridge. Crimson.
Mrs. Norman Davis. The best white.
Mrs. O. H. Kahn. Fine bronze.
Miss Clay Frick. White.
Miss M. Hankey. Late pink.
Pockett's Crimson. Crimson.
Reginald Vallis. Deep rose.
W. Duckham. Splendid pink.

We shall be pleased to supply any other varieties not named above.
Plants from $21 / 2$ inch pots. Each 15c.; dozen $\$ 1.50$.

## SINGLE CHRYSANTHEIMUIMS

Alice Coomber. Salmon bronze.
Alice Supp. Pink, beautifully quilled.
Adelaide. Bright pink, white eye.
Albert Williams. Golden amber.
Annie Betts. Light pink.
Annie Stevens. Rose pink.
Bessie Payne. Bright clear pink.
Ena Reimer. Terra cotta.
Grace. Beautiful white.
S. H. Bevins. Bright crimson.

Jane Russel. Golden yellow.
Julius Roehrs. Chestnut red.

Katie Covell. Maroon.
Major Hart. Chestnut scarlet.
Merstham White. Large white.
Mrs. E. Partridge. Deep pink.
Mrs. W. Turner. Light pink.
M. J. Osborne. Pink, white eve.

Pretoria. Deep yellow.
Rev. W. E. Renfrey. Crimson maroon.
Rob. Roy. Blush on white ground.
Thirza Sandford. Star shaped white.
Wyndham. Pure white.
Winnie Sherring. Apricot.

Plants from $21 / 2$ inch pots. Each 15 c .; dozen $\$ 1.50$.

## EARLY SINGLE CHRYSANTHEMUM SEEDS

We have a selected strain of these in Wells's original packets which will flower the same season as planted. Pkts. 25c. and \$1.00.

## HARDY CHRYSANTHEMLMS

## Hardy Large Flowering Varieties

The Hardy Chrysanthemum should be in every garden as they give an abundance of flowers late in the fall. Plants should be set out in April and May to flower the same year.

Allentown. Golden bronze.
Dinizula. Light rose.
Dundee. Dark red.
Fred. J. Red orange.
Globe d'Or. Dwarf, clean yellow.
Gloire de France. Silver pink.
Hester. White shaded flesh.
Hijos. Beautiful primrose pink.

Julia Lagravere. Crimson maroon.
King Henry. Straw white..
King Philip. Rich rose pink.
Mrs. Porter. Bright bronze.
Prince of Wales. Pure white
Stratagem. Dark red orange.
St. Illoria. Silver rose.
St. Almo. Splendid white.

Plants-each 10 c ; dozen $\$ 1.00 ; 100 \$ 7.00$.

## Hardy Large Flowering Open Centre Varieties

Bertha. Large white.
Bohemia. Fine pure yellow.
Boston. Golden bronze.
Gertrude. Pure white.

Gladys. Flushed pearl.
Mrs. Porter. Bright bronze.
Sir Michael. Lemon yellow.
The Hub. Fine white.

Plants-each 10c.; dozen $\$ 1.00 ; 100 \$ 6.00$.

## Hardy Pompon or Button Varieties

A.galia. Light orange, shaded pink.

Alice Cary. Pure yellow.
Cerise Queen. Cerise pink.
Dawn. Daybreak pink.
Eleganta. Deep rose, shaded white.
Henrietta. Bronze, yellow edge.
James Boone. Pure white. Little Pet. Rich violet red, Lyndhurst. Deep scarlet bronze. Rhoda. Pink, shaded white. Rufus. Crimson maroon.
Sunshine. Bright golden yellow. Plants-each 10 c.; dozen $\$ 1.00 ; 100 \$ 6.00$.

## NOVELTIES IN BULIBS <br> GLADIOLUS Primulinus Hybrids

A very rare species from South Africa. Extremely vigorous aud healthy grower, blooming inJuly and August. Grows 3 to 5 feet high, with long spikes of richly colored blooms, rarying in color from clear yellow to crimson, the latter with large soft nange or golden throats.

Each, 20c.; dozen, $\$ 2.00 ; 100, \$ 12.00$.

## LYCORIS Squamigera

This plant also known as Amaryllis Halli produces in the early spring attarctive green foliage which grows until July when it dies off. After a months rest flower stalks two to three feet, develop with lily shaped flowers 3 to 4 inches across of it delicate lilac pink, shaded with clear blue color. The bulbs can be planted in the Fall or Spring.

Strong bulbs, 20c, each; \$2.00 dozen.

## GIANT FLOWERING IMONTBRETIAS

George Davison. The stems are three feet high with eight to ten branches and pale wrange yellow flowers three inchs across. Early flowering. Bulbs 25c. each; \$2.50 per dozen.
Hereward. Late giant flowering. Flowers light orange yellow. Bulbs $\$ 1.00$ each; $\$ 10.00$ per dozen,
King Edmund. Grows from three to four feet in height. Flowers orange yellow with. crimson center; rery free flowering. Bulbs $\$ 1.00$ each; $\$ 10.00$ per dozen.
Prometheus. A grand rariety growing three to four feet high, covered with a mass of remarkably large flowers, about three inches across, of a handsome bright orange color, with a wide reddish brown stripe at the base of the segments. Bulbs $\$ 1.00$ each; $\$ 10.00$ per dozen.

## Select Vegetable Seeds.

## WITH GENERAL DIRECTIONS FOR CULTIVATION.

W. E. Marshall \& Co. give no warranty, express or implied, as to description, quality, productiveness or any other matter of any seeds, bulbs or plants they send out, and they will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms, they are at once to be returned.

We Deliver Free all Vegetable Seeds in packets, ounces and quarterpounds, when ordered by mall from this Catalogue.
When Seeds in bulk are ordered by mail, postage must be added to catalogue prices at the rate of 8 c . per pound; 15 c . per quart for peas or beans, and 10 c . per quart for corn.

Unless postage is sent with mail orders for these items we shall be obliged to reduce quantities to make up the deficiency.

## ARTICHOKE.

One ounce will sow 100 feet of row, and produce about 500 plants.
A rich sandy loam is best adapted for this plant. The seed should be sown in drills $11 / 2$ inches deep and one foot apart: Transplant to rows 3 feet apart. They reach maturity the second year, protect in winter by a covering of leaves or coarse manure.

Large French Globe. Heads large, fleshy and of rich flavor. Pkt., 5 cts.; oz., 35 cts.
Jerusalem. Grown for the tubers, which resemble potatoes, and are cultivated in a similar manner. but the rows should be at least four feet apart. $Q t$., $20^{\circ}$ cts.; ; pk., $\$ 1.25$; 2 lbs., by mail, 50 cts.

## ASPARAGUS.

One ounce will sow about 50 feet of drill.
Sow in Autumn or in Spring as soon as the soil is in good working condition. At one or two years transplant to permanent beds.
$\begin{array}{llll}\text { Per Pkt. } & \mathrm{Oz} . & 1 / 4 \mathrm{Lb} . \\ \begin{array}{l}\text { Conover's Colossal. } \\ \text { lific and tender. }\end{array} & \text { Very large pro- }\end{array}$
The Palmetto. A fine variety, pro-
ducing large green asparagus. .05 . 10

## ASPARAGUS ROOTS.

A saving of two years is affected by planting roots. For family use, beds should be formed five feet wide, with three rows planted in each, distance between the plants in the rows nine inches.
$\begin{array}{llll} & \text { Per } 100 & \text { Per } 1000 \\ \text { Conover's Colossal. Strong 2-year-old roots. } & \$ 0 & 80 & \$ 6.00 \\ \text { The Palmetto. Strong 2-year-old roots...... } & .80 & 7.00\end{array}$

PALMETTO ASPARAGUS.

## BEANS.

Beans like a well-drained, rich and light loam. Plant about the middle of April when warm and favorable, and at intervals throughout the season for a succession until the later part of August. Bush varieties should be planted in drills 2 feet apart, and from two to six plants to the foot in a row. Keep them well cultivated and draw the earth up to the stem.

## ENGLISH OR BROAD BEANS.

One quart will plant 100 feet of drill.

## DWARF GREEN-PODDED SNAP BEANS.

One quart will plant 100 feet of drill.

## Pole, or Running Beans.

Sow from the first day of May (for all except Limas) to the latter part of May, in hills 4 feet each way. Limas should not be planted until warm weather has fairly set in. One quart of Limas will plant about 100 hills, allowing four or five beans to a hill, and of the smaller sorts about 200 hills. Poles 8 to 10 feet long should pe firmly set in the hills beîore planting seed.

Set poles 4 feet apart each way, and plant 4 to 6 Beans about 1 inch deep, around each pole. Thin out to 3 plants to a pole, if the soil is rich; pinch off the ends of plants when they overrun the top of the poles, to effect more perfent growth below.

FIRST AND BEST CAULIFLOWER.

## Cauliflower.

## One ounce of seed produces about 3.000 plants.

By sowing the early varieties in a hotbed in February or March, or later in a cold frame, fine heads can be obtained quite early. For a later supply, sow in a prepared bed in May, choosing a cool, moist place. When large enough, transplant, making the rows about two and a half feet apart and eighteen inches between the plants. Transplanting should be done in moist weather. In dry seasons the crop must be watered.

## CARDOON

Sow early in Spring, and transplant in trenches. When full size, earth up same as celery. Large Solid Per package, 5 cts ; ounce, 30 cts ; $1 / 4$ pound, 75 cts.

## CELERY

One ounce will sow about 800 feet of a row and produce about 5,000 plants.

Sow in the open border early in April, in rich ground. Wnen the plants are 8 inches high. transplant 4 inches apart into temporary bods of soft rich soil until they acquire sufficient strength for planting out. Plant in rows 3 feet apart, and set 3 inches apart in the rows. After the planting nothing further is necessary for 6 or 7 weeks, except running through between the rows with the cultivator or hoo, and freeing the plants from weeds. About the middle of August earthing up is necessary for blanching and whitening of that which is wanted for early use. After the soil has been drawn up against the plant with the hoe it is further pressed close around each plant by the hand, firm enough to keep the leaves upright and prevent them from spreading, using care to prevent the soil falling into the heart of the plant.

## CUCUMBER.

One ounce to fifty hills; two to three pounds to one acre.

IMPROVED WHITE SPINE CUCUMBER.

For very early use, seed may be started in heat and the plants set out in May. Pieces of inverted sod are an excellent medium for starting and growing early cucumber plants, as they can readily be lifted from the hot-bed to the garden without disturbing the young plants growing upon them. For main crop, plant in hills four feet apart, at the end of May. Keep the young plants safe from the striped bug by dusting with dry plaster or powdered hellebore. Leave four strong plants to each hill.

## ENGLISH CUCUMBERS FOR FORCING.

Telegraph, Marquis of Lorne, Duke of Edinburgh, Tender and True, Covent Garden Favorite, Lockies' Ferfection.

Pkt. of 10 seeds 25 cts.

## DANDELION.

The Dandelion affords one of the earliest and most healthful Spring greens or salads. It is best when blanched. Sow early in Spring, in drills 18 inches apart, and thin out to 6 inches in the drills. Keep clear of weeds, and the following Spring it will be fit for the table.
Improved French. Pkt., 5c.; oz., 20c.; $1 / 4 \mathrm{lb} ., 60 \mathrm{c}$.

## ENDIVE.

One ounce of seed for 75 feet of drill.
One of our best salad plants. For a first crop, sow about the middle of April; for succession, small sowings may be made every month till August, when the main planting is made. Set out the plants one foot apart, in rows, and when well grown effect blanching by folding the leaves in their natural position around the heart, and tying the outer leaves together by their tips in cone form.
Green Curled. Hardy, finely curled; easily blanched, one of the best. Pkt., 5c.; oz., 15c. ; $1 / 4 \mathrm{lb} ., 50 \mathrm{c}$. White Curled. Blanches rapidly; excellent, and very tender ....... Pkt., 5c.; oz., 15c.; 1/4 1b., 50c.

## We deliver FREE, by mail, all seeds in Packets and Ounces.

## LETTUCE

## One ounce will sow 200 feet of drill.

Sow in the open ground as early as possible. barely covering the seed. If the hot-bed is used, let it be started quite early. Give but little heat and plenty of water and air on fine days. Let plants in the bed be about four inches apart. As they increase in size thin them out, or they will become weak. Lettuce generally runs to seed very early in the season, so that after warm weather sets in it is difficult to find a good head of Lettuce in most gardens. The remedy is to plant for late use in a cool, partially shaded place, in rich soil.

## MELON, MUSK.

## One ounce will plant 80 hills.

After all danger of frosts is over and the ground has become warm and dry, plant in hills 4 to 6 feet apart each way, 6 to 12 seeds to a hill. When up, and all danger of insects has passed, pull out all but 3 plants. Cultivate until the vines cover the ground, and pinch the ends of the growing shoots to induce early fruiting. Asbes, lime, or even dry road dust, is excellent to sift over young plants when the dew is on, to prevent the attacks of insects.

## MUSHROOM SPAWN.

T'en pounds will spawn about ten feet square.

Mushroom beds may be made in a warm, dry cellar, or in any building where the frost does not penetrate, and in the open air during the Summer and Fall months. Having procured the spawn, the next thing to be attended to is to make preparation for the beds. About a fortnight or three weeks before the beds are to be made collect a quantity of fresh horse manure without the straw; place it in a heap under cover, and as it heats keep turning it over once or twice a week, until the fiery heath has become exhausted, which will require from ten to fourteen days time. When the manure is in a condition to be made up, lay out your bed according to your requirements, say three feet wide, ten feet long, and from two to three feet deep; beat it down well with the back of the spade as the process of building goes on. When the bed has been made some time, say a week or thereabouts, and the heat sufficiently declined to a temperature of 65 or 75 degrees, the spawn may be put into it. Break the spawn in pieces two inches square, and put them six inches apart, all over the bed; then cover the bed with two inches of rich soil, the stronger the better, but of a loamy quality, beating it down firmly with a spade. The soil used for this purpose should be in pliable condition, and not too wet or over-dry. Cover the bed with a foot of dried straw or hay; examine once a week to see if the manure is not heated while in this condition; if so, it will destroy the spawn, and necessitate spawning a second time. If everything goes on well, you may expect mushrooms in about five or six weeks. When the soil looks dry, give a gentle watering with tepid water, using a rose on the watering pot. If the beds are made out-of-doors, protect them from rain by covering them with shutters or sashes. Good crops of mushrooms can be obtained by spawning the hot-beds in spring. They can also be raised in pots, boxes or anything capable of keeping the materials together, and placed in a cellar, closet or green-house.
Marshall's English Spawn. Lb. 15 cts., 10 lbs . $\$ 1.25$. Prices of larger quantities on application.
Pure Culture Spawn (American). Lb. 15 cts., 10 lbs . $\$ 1.25$. Prices of larger quantities on application.

If by mail, add 10 cts. per pound for postage.

## MUSTARD.

One ounce will sow 75 feet of drill.
For early crops the seed may be sown in a hotbed in March, and for general crop at frequent intervals through the Spring, in drills from eight to twelve inches apart.
$\dot{W}^{W}$ ite London. The best variety for salad....................Per oz. 5c., $1 / 4 \mathrm{lb} .10 \mathrm{c} ., \mathrm{lb}$. 30 c . §iant Southern Curled. Very large leaves...................." ". 5c. ". 10c. " 30c.

## OKRA, OR GUMBO.

## One ounce will plant 100 hills.

This plant is extensively cultivated for its green pods, which are used in soups and stews, and are very wholesome and nutritious. Now about the middle of May in drills three feet apart, and thin out the plants to one foot apart.

## ONION

## One ounce will sow 100 feet of drill.

Sow in drills one foot apart and cover about one-third of an inch, treading or rolling after sowing s. that the hot dry armosphere may not destroy the sproutmy seed. When three inches high thin to two inches apart. Stir the ground freely without disturbing the young plants and keep free from weeds.

Sugar peas have edible pods which are eaten when young.
Equal in flavor to the best string beans.

We supply packets of peas at 10c. each, postpaid.
If ordered to go by Mail, add 15c. per quart for postage.

## Potatoes

# GROWN EXPRESSLY FOR SEED. 

## Ten bushels cut tubers will plant one acre.

The potato, like all robust-growing vegetables, can be grown with varying success on soils of all kinds and in all conditlons of fertility, but the soil best suited to it is a sandy loam. Manure is applied either in rows or hills, or broadcast over the hills and ploughed in-the latter in most cases being preferable. In highly-enriched soils the plants are more liable to disease than when grown in soil that is naturally good. Plant as early in Spring as the ground can be had in fair working order, in hills or ridges, about three feet apart, cover lightly with soil, about four inches deep.

WHITE BUSH SCALLOP SQUASH

PERFECTION TOMATO.

EARLY RUBY TOMATO.

## TOMATO.

## One ounce will produce one thousand plants.

Sow thinly about the first week in March in a hot-bed, greenhouse, window or sittingroom, where the temperature is never below $60^{\circ}$. When two inches high set out the plants in boxes about four inches apart, or pot singly. About the first of Juno they may be transferred to the open ground. Set them deeply four feet apart, and a shovelful of rotted manure should be mixed in the earth of each hill. If the vines are trained on trellis the fruit will be finer and larger.
Marshall's Prolific. The finest medium-sized tomato in exicjence, either for forcing or out-door planting. It is an enormous cropper, producing large clusters of bright scarlet fruit. The quality and flavor is excellent, flesh solid, having very few seeds, smooth and medium size.
Stirling Castle. Excellent for forcing as well as out-door culture. Fruit is of medium size, reddish-scarlet in color, and of very delicious flavor.
Best of All. An exellent sort for forcing, or early out-door crop. Sets freely and an immense crupper. Color deep scarlet.
Lorillard. Chiefly valuable for forcing under glass $\qquad$
Acme. Medium size fruit; of a purplish-pink color, tinged with purple
Beauty. Large, smooth, dark-pinkish red; thick flesh; regular...........
Crimson Cushion. Extra large, handsome; bright crimson. $\qquad$
Dwarr Champion. The plant is of dwarf and compact growth
th...
Early Ruby. The earliest large tomato grown; of good form, rich crimson color
Favorite. Large, smooth, productive and a good shipper $\qquad$
Golden Queen. A really good yellow sort of first-class quality; large and solid..
Matchless. Extra-1arge, smooth and handsome; bright red; very solid.
Mikado. Very large, fairly smooth; color purplish red $\qquad$
Perfection. Early, regular and productive; reddish scarlet. $\qquad$
Ponderosa. The largest variety in cultivation; very solid and meaty.
Stone. Very large, perfectly smooth; fine bright scarlet $\qquad$
Trophy, selected. One of the best; fruit large, smooth, bright red solid and of good flavor.
Yellow Plum. Round and regular; bright yellow; used for pickles....
Red and Yellow Pear-shaped. Fine for preserving and pickling
Yellow Peach. Very Handsome in form, and of a beau'iful clear yelow color
Red and Yellow Cherry. Small fruits used for pickles: very handsome
Strawberry, or Winter Cherry. A distinct species with small fruit incased in a husk

## TURNIP.

One ounce will sow 150 feet of drill.
Turnips do best on highly enriched, light, sandy or gravelly soil. Commence sowing the earliest varieties in April, in drills, from twelve to fifteen inches apart, and thin out early to six or nine inches in the rows. For a succession, sow at intervals of two weeks, until the middle of August.

## Lawn Grass Mixtures

## Marshall's Special Lawn Grass Mixture

Marshall's Special Lawn Grass Seed produces a perfect and enduring lawn of luxuriant richness, with closely interwoven, firm and elastic turf, and it is usually ready for cutting in six weeks from time of sowing. This Lawn Grass is composed of a combination of various fine-leaved, deep-rooting grasses of interweaving habit, that flourish under our varied conditions, soils and climates, growing during different seasons of the year, so that a deep green, smooth and velvety sward, free from clumps, is maintained without burning brown in Summer.

Price: Per peck, $\$ 1.50$; per bushel, $\$ 5.00$.

## Central Park Lawn Grass

Our Central Park Lawn Grass will produce an even, dense growth of permanent sward as early in the season as it is possible to do. This mixture contains no annual grasses for making quick show to the detriment of a good lawn, but only those of lasting value and hardiness, which, when once established, need no reseeding for years. Our seed, which we know to be as pure as can be found anywhere, is of the best varieties, best suited for even and permanent growth; it is carefully cleaned and as free as it is possible to make it from foreign matter.

One pint will sow $10 \times 15$ feet. Per pint, 10 cts ; by mail, 13 cts .
One quart will sow $15 \times 20$ feet. Per quart, 20 cts.; by mail, 25 cts. Four quarts will son $35 \times 50$ feet. Price, 60 cts ; by mail, 80 cts . One peck will sow 50 x oc feet. Price, $\$ 1.10$.
One bushel ( 20 lbs .) will sow $100 \times 100$ feet. Price, $\$ 4.00$.

## Marshall's Shady Place Lawn Grass.

Usually it is quite difficult to obtain a satisfactory growth of grass under trees and in shady places; for sowing in such places we recommend the use of this special mixture. It will quickly produce an abundant and even growth of beautiful green grass. The grasses used in making this special mixture are only those that are well adapted for growing in shade. It has been successfully used on some large operations where a green sward was desired on land partially shaded by old trees.
Price, per quart, 25 cents; by mail, 30 cents. 4 quarts 90 cts. Per peck, $\$ 1.65$; per bushel ( 20 lbs .), $\$ 6.00$.

## Marshall's Terrace Mixture Lawn Grass.

A special mixture of grasses best suited for sowing on terraces and side hills-grasses that produce strong spreading roots, thus preventing heavy rains from washing them out; that will withstand drought and exposure, thrive on shallow soils, and at the same time produce a rich, green turf throughout the season.

Price, per quart, 30 cents; per peck, $\$ 1.75$; per bushel ( 20 lbs .) $\$ 6.00$.

## Permanent Grass for Golf Links. Fair Green Mixture.

For the grounds in general. Per bushel ( 20 pounds), \$3.00.

## Putting Green Mixture.

A mixture of extra-fine grasses that will make a close, firm, green and lasting turf, which will improve with tramping.

Per peck, $\$ 1.75$; per bushel ( 24 lbs .), $\$ 6.00$.

## Tennis Court Mixture.

A mixture of extra-fine grasses peculiarly adapted for tennis courts. This mixture will make a firm, green and lasting turf of the finest texture that will improve with tramping. Per peck, $\$ 1.75$; bushel ( 24 lbs .), $\$ 6.00$

## Marshall's Special Mixture, for Meadows and Perma= nent Pasture.

Our Pasture Mixture is made up of the Grasses best calculated to afford an abundant and nutritious food supply for stock. For all ordinary permanent pasturage it will be found entirely satisfactory. If your fields are old and worn out, it will pay to plow up and seed again with Permanent Pasture Mixture, after which you will soon be cutting heavy crops. You will be able to cut two good crops, each year, whereas from Timothy only you can cut but one.

Sow three bushels to acre. In ordering state whether for light or heavy soil.

## GRASSES AND CLOVERS.

Prices subject to market chánges.

| Weigth per Bush. Lbs. |  |  | $\begin{aligned} & \text { Bush. } \\ & \$ 3.50 \end{aligned}$ |

NAME AND DESCRIPTION.

Plants from seeds sown in the open ground in May bloom finely in September and October, when the flowers are seen at their best. For July and August flowers, sow in March or April, in cold frame, spent hotbed, or pots or boxes in the house. Cover the seeds about half an inch deep with rich, light soil, and when the plants have three or four leaves transplant about 18 inches apart each way into well-prepared beds.

## SWEET PEAS

There are no Annual Climbers that are more popular or more admired by everybody than Sweet Peas. They are of the easiest culture, unrivaled for cutting, delightfully fragrant and of the brightest and daintiest colors imaginable. As soon as the ground can be worked in the Spring, sow the seed in trenches at least 6 inches in depth, then as the plants grow fill in the soil about one inch at a time until the trenches are full, taking care not to cover the young plants. Liquid manure applied occasionally will be found very beneficial. Pick the flowers frequently, for if allowed to form seed the plants will soon stop blooming.

## BEDDING PLANTS

During May and June we have a large variety of plants suitable for Bedding and Window Boxes.

## AQUATIC PLANTS FOR AQUARIUMS AND FOUNTAINS

EACH. DOZ.

Cyperus alternifolius. An excellent plant for growing in water or damp places. $\$ 0.15$ \$1.50
Eichhornia crassipes major (Water Hyacinth). A very showy floating aquatic, bearing flowers of a delicate lilac-rose in trusses like a Hyacinth.
Limnocharis Humboldti (The Water Poppy). A pretty little aquatic with oval leaves and yellow flowers. Fine for growing in shallow water or an aquarium
. 20
2.00

Nelumbium speciosum (Egyptian Lotus). The well-known species. The flowers, which are about a foot across when fully opened, are of a deep rose color, creamy white at base of petals; exquisitely fragrant.

Each 75c. and
1.50

Iuteum (American Lotus, Water Chinquepin). A superb variety with yellow flowers. This variety is indigenous in the Western and Southern States. It has been introduced into the Eastern States, where, as a rule, it grows as freely as any native plant
.75
Nymphæa odorata. This is the fragrant Pond Lily of the Northeastern United States. Flowers white
odorata gigantea. Rice-field Water Lily of the Southeastern United States; leaves large, 12 to 16 inches across, green, under side at times tinged purplish toward margin, edge often turned up, flowers 4 to 7 inches across, pure white. A superb variety.
odorata sulphurea. One of the very best hybrid Nymphæas. The greatly fragrant flowers are sulphur-yellow, standing 3 to 4 inches out of the water; leaves floating, as in the type, but blotched reddish on the under side; distinct.
Pistia Stratiotes (Water Lettuce)..................................................... ornamental aquan plant; forms a rosette of light green velvety leaves.

## FERNS AND DECORATIVE PLANTS

AGAVE Americana. Fine for lawn and porch decorations. 50 cts.; specimens, $\$ 2.50$ to $\$ 10.00$.
A. Americana varlegata. 75 cts.; specimens, $\$ 2.50$ to $\$ 5.00$.
ARAUCARIA excelsa (Norfolk Island Pine). 6-inch pots, extra fine, $\$ 2.00$ each; $\$ 20.00$ per doz.
ASPARAGUS plumosus nanus. Graceful climbing Asparagus; beautiful bright green feathery foliage. Succeeds under almost any condition. Strong plants, 15 cts. each, $\$ 1.50$ per doz.; extra size, $31 / 2$-inch pots, 25 cts. each, $\$ 2.50$ per doz.
ASPIDISTRA lurida. Fine, dark broad green leaves; very robust grower and invaluable for the house. $\$ 1.00$ to $\$ 2.00$.
A. lurida variegata. Foliage striped with white; a charming variegated form of the above. $\$ 1.25$ to $\$ 2.50$.

DRACAENA indivisa. Long graceful foliage; extensively used for vases. Stands full sun exposure. 25 cts . to $\$ 2.50$.
FICUS elastica (Rubber Plant). One of the best plants for room decoration. 50 ets. to $\$ 1.00$.
PANDANUふ Veitchii. Graceful curved light green leaves beautifully marked with broad stripes and bands of pure white. Distinctly ornamental. Fine plants, 5-inch pots, $\$ 1.50 ; 6$-inch pots, $\$ 2.00$.
BOSTON FERN. One of the most useful and ornamental of the "Sword Ferns.', Each 35 cts. to $\$ 1.00$.
NEPHROLEPIS SCOTTII (New Scott Fern). Fine for house decoration. Each 50 ets. to $\$ 2.00$.
TABLE FERNS. In variety for fern dishes and ferneries. Each 8 cts.; $100 \$ 6.00$.

## PALMS

COCOS Weddellana. The most graceful of the smaller growing Palms. Admirable for fern dishes and table decoration. Fine plants, 3 -inch pots, 25 cts. each.
KENTIA Belmoreana. The most popular parlor palm grown. Nice bushy plants. $21 / 2$-in. pots, 25 cts . each; 4 -in. pots, 75 cts . each; 5 -in. pots, $\$ 1.50$ each.
KENTIA Forsteriana. The best Palm for all purposes, and the most graceful for decorations. Nice bushy plants, 4 -inch. pots, 75 cts. and $\$ 1.00$ each; 5 -in. pots, $\$ 1.50$ each; 6 -in. pots, $\$ 2.00$ each.

## JAPAN FERN BALLS

## Davallia Bullata

Fern Roots, about the size of a pencil, woven outside and around a ball of moss.
The roots produce beautiful sprays of ferns from eyes, or buds, at nearly every inch of their length. Thus the whole surface soon becomes covered with fern sprays.

Dormant balls, 5 -inch diameter. Each, 35 cts.
Dormant balls, 7 to 9 -inch diameter. Each, 50 cts.
New importation arrives in December.

## "PLANET JR." TOOLS FOR 1910

Space will not permit illustrating and describing all of the "Planet Jr."' Tools, but we will gladly send fully illustrated catalogue free for the asking to any address. Remember, "Planet Jr." machines are the recognized standards throughout the world, and are guaranteed by the manufacturers.

## No. 16 SINGLE WHEEL HOE <br> Price $\$ 6.00$

A light, inexpensive and extremely efficient tool. Fitted with plow, two hoes, three cultivator teeth, two rakes and leaf lifter, which are all easily adjusted.

No. 17 SINGLE WHEEL HOE
Price $\$ 5.25$
This tool is identical with No. 16, but has only a pair of 6 -inch hoes, a plow and a set of cultivator teeth-an outfit sufficient for most garden work.

## No. $171 / 2$ SINGLE WHEEL HOE

## Price $\$ 4.75$

This machine is similar to No. 16, except it has no plow, but it has a leaf lifter. Thousands of them are sold annually for cultivating sugar beets and onions.

## No. 18 SINGLE WHEEL HOE

Price $\$ 3.75$
Is the same tool as above, but has one pair of 6 -inch hoes only.
No. 11 DOUBLE WHEEL HOE Price $\$ 9.50$
One pair 6 -inch hoes; one pair 4 -inch hoes; two pairs hollow steel cultivator teeth; one pair plows; two 3 -tooth rakes; two 5 -tooth rakes, and two leaf lifters.

## No. 12 DOUBLE WHEEL HOE

 Price $\$ 7.35$
"Planet Jr." No. 11.

The same as No. 11, but does not have the 7 -tooth rake and the pair of short hoes.

No. 4 COMBINED SEEDER AND WHEEL HOE

Price $\$ 11.50$
The drill is the same style as the No. 3 Seeder, but smaller. By moving only one bolt the drill is taken off and the tool frame attached, making it one of the best of the "'Planet Jr."' Single Wheel Hoes. This gives you the "whole business"' in one tool.

## No. 3 SEEDER <br> Price $\$ 11.00$

Planting in rows and thinking afterward is a terrible time-waste. The No. 3 Seeder puts the seed right on the spot where the hill is wanted. Plants $4,6,8$, 12 or 24 inches apart, or in a continuous row if desired. Changed in a moment.

GRASS EDGER

## Price $\$ 6.25$

It will do either straight or curved edging at a speed of a mile an hour. It should be the constant companion of the lawn mower. Strawberry growers will find the Grass Edger, with the hoes removed, a rapid and perfect tool for cutting off surplus runners.

## "FIREFLY" PLOW

## Price $\$ 2.50$

Invaluable for use in small gardens. Moldboard of tempered and polished steel. The depth is easily and quickly changed.

# Coldwell's Grand Ball Bearing Lawn Mower 

## The Grand Ball-Bearing Lawn Mower

The "Grand"' is the best BallBearing Mower on the market. It has 10 -inch drive wheels; five blades in the revolving cutter, which is of large diameter, thus enabling it to cut high grass. The adjustment of this machine is accomplished by means of a single screw conveniently located in the end of revolving cutter. This one screw does it all.

## NET PRICES

## LAWN IMOWER GRASS CATCHERS

Net Prices: 12 in., $\$ 1.50$; 14 in., \$1.60; 16 in., $\$ 1.85$; 18 in., \$2.00; 20 in., \$2.15.

## LAWN MOWER PARTS

We can supply parts of any of the Mowers we list at reasonable prices. When ordering give the number of the part and name of machine or send the broken part.

## CHAIN ROLLER GOLF MIOWER

This mower is made to meet the demand for a machine that will more perfectly cut borders, verges, etc., and yet retain all the other features necessary in a mower for general work. The great advantage of this mower is the substitution of a bicycle chain for the gears generally used in this style of mover. This reduces the friction to a minimum. The machine with six blades is highly recommended by most of the leading golf clubs in America for work on put-ting-greens.

## NET PRICES

## HORSE BOOTS

Made of heavy leather, preventing injury to the sward by the horse's feet. Price, set of four, $\$ 9.00$.

## VICTORY BALL-BEARING LAWN MOWER

This mower is fitted with Ball-Bearings. The gear is entirely closed, so that no dirt or cut grass can find its way into the pinions and clog them. The cutter bar is easily removed for sharpening without disturbing the frame. The knives cut the instant the mower is moved.

> Ball-Bearings, 10 -inch Wheels,
> Triple Gear, Four-Bladed Reel.

## THE "CADET" LAWN MOWER

This mover is made by the Coldwell Lawn Mower Co. for the benefit of those who want a cheap mower, and those who have but a little grass to cut. It is a very strong and durable machine, and will be found far superior to the mower usually sold in "department stores" at the same prices.

## NET PRICES

## SPRAY PUMPS AND SPRAYERS

## THE LITTLE

## WONDER SPRAYER

This Sprayer is gotten up to fill the want of a small sprayer for house use. It has a drip cup, so that all liquid dropping goes back in can. With spray overhead as well.

Applies insect and fungus killing fluids to plants in a most satisfactory manner with no waste of material, covering uniformly every portion and crevice.
Each. . . . . . . . . . . . 50c.

Spraying Under the Leaves.

## LENOX SPRAYER

For spraying plants indoors and out the Lenox Sprayer is one of the most serviceable devices. It substitutes a misty shower that supplies the plant most naturally and completely, which is necessary to real success with house plants. As a sprayer for using iusecticides it is invaluable, ejecting a misty spray and reaching under the leaves where insects thrive.

> Price, 50c. each. By Mail, 60c. postpaid.
> Extra Rubbers, 20 c . each.

## BLIZZARD HIGH-PRESSURE SPRAYER

An air-force sprayer for potatoes, fruit trees, etc. It is first charged with air and then it does the spraying with very little work. Galvanized iron tank.

[^0]
## "AUTO-SPRAY", PUMP

Eight to ten strokes of plunger in air chamber will compress enough air to discharge the entire contents and make a continuous spray for nine minutes. This means that the 'AutoSpray' can be charged in fifteen seconds, when it will work uninterruptedly long enough to spray a quarter-acre of potatoes. Capacity 8 gallons.

"Success" Sprayer.

## "SUCCESS"' KNAPSACK SPRAYER

This Sprayer is undoubtedly the best and most improved on the market. The tank holds 5 gallons and is made of copper throughout. Pump is fitted with bronze valves and mechanical agitator. This sprayer can be used as a bucket pump by detaching the hand lever. Pump handle can be worked either right or left hand, and drip cup is so arranged that the liquid cannot run over on the operator. The attachment $A$ is used for underspraying.

Price
. $\$ 15.00$

# "POMONA" BARREL SPRAY PUMP <br> Very Powerful and Large Capacity-All Working Parts Bronze. 

The best Orchard Barrel Sprayer. It is unsually powerful and of large capacity, fully capable of supplying four leads of hose and eight nozzles. There is nothing about the Sprayer to get out of order, and with ordinary care it will last a lifetime.

The blades are 9 inches long, and the handles 5 feet long.
Price, $\$ 1.25$.

## FARMOGERM <br> HIGH-BRED NITROGEN FIXING BACTERIA.

All the Nitrates you need for $\$ 2$ per acre. Reduce your fertilizer bill $75 \%$.
The use of Farmogerm on the seeds of Peas, Beans, Clovers, Alfalfa, and all other legumes means an earlier and bigger crop and a large amount of Nitrates added to the soil to benefit future crops of other kinds. Ready to use simply by moistening the seeds before planting.

Farmogerm makes nodules on the roots of the plants. Nodules are $8 \%$ pure nitrates. Nitrates mean big crops. Wm. Hanna Thompson, M. D., L. L. D., says in the August number of "Everybody's Magazine," "'The results reported by numerous farmers show from fifty to one hundred per cent. increase in yield of inoculated seeds over seeds without such preparation.' '

Raise the biggest and best crop of peas, beans, sweet peas, clovers, alfalfa or vetches you ever had.

Improve your land by the use of Farmogen HighBred Bacteria which add nitrogen to the soil for future crops.

Prepared for:

| Clover, | Canadian Field Peas, |
| :--- | :--- |
| Alfalfa, | Soy Beans, |
| Garden Beans, | Cow Peas, |
| Garden Peas, | Vetch, |

and all other legumes.
In acre sizes, $\$ 2.00$ per acre.
In garden sizes, 50c. each.
In ordering state what legume you wish to plant.
It is impossible to explain this subject fully on a single page of our catalog. Write for our thirtytwo page book.

## THE DOWLEN TUB-LIFTER

The Dowlen Tub-Lifter consists of one pair of apparatuses as illustrated; operated on opposite sides of the tub and enables the operators to lift heary and bulky Plant Tubs with a greater ease and security than any other device or contrivance known.

The Tub-Lifter is constructed in a substantial manner, and of the best material, by means of its upper movable guard, keeps the tub from swaying and enables it to handle tubs of various heights, and will last for a lifetime. No one who has even only one Hydrangea in a tub can afford to be without a tub-lifter.

Price, per pair.

## PERFECTION TOMATO SUPPORT

This is the most practicable support on the market. It is made of wood and will not burn the vines in hot weather, or cut them off when swayed by the wind.

The height is 36 inches and width 12 inches. It can be unfolded after use without damage and stored away for the following season.

Each 30c.; dozen \$3.00.

## W E E D KILLERS

Weedicide. Valuable for killing weeds on walks, court yards, drives, etc. One gallon dilutes to 15 or 20 gallons of water. Saves many times its cost in labor, and more effective. Gal. $\$ 1.00,5$ gals. $\$ 4.00$.
Sterlingworth Weed Killer. In powder form, to be dissolved in water. 1 lb . makes 15 gals., sufficient for 50 square yards. $1 \mathrm{lb} . \mathrm{pkg}$., $50 \mathrm{c} . ; 3 \mathrm{lb} . \mathrm{pkg}$., $\$ 1.25$; $5 \mathrm{lb} . \mathrm{pkg} ., \$ 2.00$.

## ADJUSTABLE GARDEN CULTIVATOR

The most useful hand garden tool on the market

It will pull out the weeds, pulverize the ground thoroughly, leaving it level, works where other implements fail.

It will work between the rows, or the center shovel can be removed, and straddle the row if desired.

It is adjustable in width by sliding the top plate.

It is the lightest, weighing but 3 pounds complete, with long handle, and the strongest, as the blades are forged out of a solid steel rod. $\$ 1.25$.
