WIKIMANIA

Martin

- registered in 2005
- administrator in the German (2006) and English Wikipedia (2007)
- Steward on Meta Wiki (2007), also administrator and oversighter (2008/9)
- Board member of WMDE (2011)
- volunteer JS developer

Marius

- registered in 2008
- global rollbacker and global sysop
- administrator on Meta Wiki (2010) and Wikidata (2012)
- volunteer JS, MediaWiki and Wikidata developer
- maintainer of the AbuseFilter and CentralAuth extensions
- currently working on Global AbuseFilter

Stewards

Background

- origin
 - designed in 2005 to lighten the developers' workload
 - no direct access to the databases
 - full access from Meta Wiki to all 800 projects by a web interface

Remember to start the username with a capital letter.

Enter a username:

Edit user groups

Changing user rights of user **DerHexer** ([talk](#) | [contribs](#) | [membership in global groups](#))

You may alter the groups this user is in:

- A checked box means the user is in that group.
- An unchecked box means the user is not in that group.
- A * indicates that you cannot remove the group once you have added it, or vice versa.

Member of: [Oversighters](#), [Stewards](#) and [Administrators](#)

Implicit member of: [Autoconfirmed users](#)

Groups you can change

- bot
- administrator
- bureaucrat
- CheckUser
- steward
- account creator
- importer
- transwiki importer
- IP block exempt
- oversight
- flooder
- autopatroller
- confirmed user
- translation administrator

Reason:

User rights log

- [\(show/hide\)](#) 2012-04-09T15:13:54 [Barras](#) ([talk](#) | [contribs](#) | [block](#)) changed group membership for [User:DerHexer](#) from steward to steward, administrator and oversight (<https://meta.wikimedia.org/?oldid=3629178#DerHexer.40meta> and <https://meta.wikimedia.org/?oldid=3629160>)
- [\(show/hide\)](#) 2011-10-24T06:00:01 [DerHexer](#) ([talk](#) | [contribs](#) | [block](#)) changed group membership for [User:DerHexer](#) from oversight, steward and administrator to steward (*resigned rarely used oversight and sysop access*)

Background

- origin
 - designed in 2005 to lighten the developers' workload
 - no direct access to the databases
 - full access from Meta Wiki to all 800 projects by a web interface
- election
 - once a year in a three week long election
 - $\geq 80\%$ support and ≥ 30 support votes by the global community necessary
 - prerequisites: ≥ 18 years and legally mature, administrator ≥ 3 months; identified to WMF; experience in global tasks desired

Background

- re-election
 - once a year; comments by global community but final decision by an election committee consisting of stewards
- numbers
 - currently 39 stewards, mostly new ones: 28 elected from 2011 to 2013 (∅ voters: 185.2; 58 % successful); only one female steward
 - languages (native or near-native): en 19, de it 4 (scn 2), fr pl zh 3, nl no 2, az bn id fa he ka ml ms mt pt ru sv 1 → 20 languages
 - missing: **es*** **ja*** vi uk ca fi* cs* hu* **ko ar*** **hi ro*** ms **tr*** sr* (* former stewards; **most-spoken languages**)

Background

- How can you reach us?
 - Meta Wiki [[m:Steward requests]]
 - IRC #wikimedia-stewards
 - e-mail stewards@wikimedia.org
- How are we working?
 - steward wiki
 - mailinglist
 - private IRC channel
 - tools
 - patrol edits and account registration

Tasks

- doing all kinds of administrative tasks in smaller projects that cannot be done by the local users
 - mostly anti-vandalism and maintenance work, partly done by global sysops
 - assign local user rights; delete, block, protect and import articles; rename or check users; suppress libel and private information
- apart from that, stewards only implement consensus and act in emergencies

Tasks

- at the beginning, stewards had to change their user rights on each wiki for dealing with cross-wiki tasks
- in April 2008, the unified login (also Single User Login, SUL) and global user groups have been introduced
- global user groups contain rights which can affect a group of or all wikis

Global group management

Existing groups

The following global groups have been configured. You may view or edit the permissions assigned to a group, if you have permission to. A group may be deleted by removing all rights from it.

- API High Limit Requestors ([view/edit](#))
- Global bots ([view/edit](#))
- Global rollbackers ([view/edit](#))
- Global sysops ([view/edit](#))
- Indic Bots ([view/edit](#))
- New wikis importers ([view/edit](#))
- Ombudsmen ([view/edit](#))
- Staff ([view/edit](#))
- Abuse filter editors ([view/edit](#))
- Interface editors ([view/edit](#))
- Jimbo Wales' group ([view/edit](#))
- Global IP block exempt ([view/edit](#))
- Recursive export ([view/edit](#))
- Stewards ([view/edit](#))
- System administrators ([view/edit](#))

Create a new group

You can use this form to assign permissions to a new group. Note that a group does not exist unless it has permissions assigned to it.

New group name:

Tasks

- stewards became one of these groups with about 50, mostly passive rights which can be used if necessary without changing user rights

Name of group: steward

Localised name of group: Stewards ([edit](#))Localised name of group members: steward ([edit](#))Member list: [List of users with steward rights](#)Set of wikis where this group is active: ([edit](#))

Assigned permissions:

- View hidden abuse log entries ([abusefilter-hidden-log](#))
- Hide entries in the abuse log ([abusefilter-hide-log](#))
- View the abuse log ([abusefilter-log](#))
- View detailed abuse log entries ([abusefilter-log-detail](#))
- Modify abuse filters ([abusefilter-modify](#))
- Modify abuse filters with restricted actions ([abusefilter-modify-restricted](#))
- Revert all changes by a given abuse filter ([abusefilter-revert](#))
- View abuse filters ([abusefilter-view](#))
- View abuse filters marked as private ([abusefilter-view-private](#))
- Use higher limits in API queries ([apihighlimits](#))
- Edit semi-protected pages ([autoconfirmed](#))
- Have one's own edits automatically marked as patrolled ([autopatrol](#))
- Delete pages with large histories ([bigdelete](#))
- Block other users from editing ([block](#))
- Block a user from sending e-mail ([blockemail](#))
- Be treated as an automated process ([bot](#))
- Search deleted pages ([browsearchive](#))
- Automatically login with global account ([centralauth-autoaccount](#))
- Lock or hide global account ([centralauth-lock](#))
- Merge their account ([centralauth-merge](#))
- Suppress global account ([centralauth-oversight](#))
- Unmerge global account ([centralauth-unmerge](#))
- Manage central notices ([centralnotice-admin](#))
- Check user's IP addresses and other information ([checkuser](#))
- Import pages from a file upload ([importupload](#))
- Bypass IP blocks, auto-blocks and range blocks ([ipblock-exempt](#))
- Mark rolled-back edits as bot edits ([markbotedits](#))
- Merge the history of pages ([mergehistory](#))
- Mark edits as minor ([minoredit](#))
- Alter visibility on the feedback dashboard ([moodbar-admin](#))
- Move pages ([move](#))
- Move root user pages ([move-rootuserpages](#))
- Move pages with their subpages ([move-subpages](#))
- Move files ([movefile](#))
- Not have minor edits to discussion pages trigger the new messages prompt ([nominornewtalk](#))
- Not be affected by rate limits ([noratelimit](#))
- Mass delete pages ([nuke](#))
- Override the spoofing checks ([override-antispoof](#))
- Export pages including linked pages up to a depth of 5 ([override-export-depth](#))
- View a previously hidden revision with Extension:Oversight ([oversight](#))
- Mark versions of pages for translation ([pagetranslation](#))
- Mark others' edits as patrolled ([patrol](#))
- Change protection levels and edit protected pages ([protect](#))
- Bypass automatic blocks of proxies ([proxyunbannable](#))
- Purge the site cache for a page without confirmation ([purge](#))
- Read pages ([read](#))
- Rename users ([renameuser](#))

- View the checkuser log (`checkuser-log`)
- Save books as community page (`collectionsaveascommunitypage`)
- Save books as user page (`collectionsaveasuserpage`)
- Create new user accounts (`createaccount`)
- Create pages (which are not discussion pages) (`createpage`)
- Create discussion pages (`createtalk`)
- Delete pages (`delete`)
- View deleted history entries, without their associated text (`deletedhistory`)
- View deleted text and changes between deleted revisions (`deletedtext`)
- Delete and undelete specific revisions of pages (`deleterevision`)
- Edit pages (`edit`)
- Edit the user interface (`editinterface`)
- Edit other users' CSS files (`editusercss`)
- Edit other users' CSS and JavaScript files (`editusercssjs`)
- Edit other users' JavaScript files (`edituserjs`)
- Make global blocks (`globalblock`)
- Bypass global blocks (`globalblock-exempt`)
- Disable global blocks locally (`globalblock-whitelist`)
- Edit membership to global groups (`globalgroupmembership`)
- Manage global groups (`globalgrouppermissions`)
- Remove global blocks (`globalunblock`)
- Hide revisions from administrators with Extension:Oversight (`hiderevision`)
- Block a username, hiding it from the public (`hideuser`)
- Import pages from other wikis (`import`)
- Overwrite existing files (`reupload`)
- Override files on the shared media repository locally (`reupload-shared`)
- Quickly rollback the edits of the last user who edited a particular page (`rollback`)
- Send e-mail to other users (`sendemail`)
- Lock and unlock the database (`siteadmin`)
- Perform CAPTCHA-triggering actions without having to go through the CAPTCHA (`skipcaptcha`)
- View private logs (`suppressionlog`)
- Not create redirects from source pages when moving pages (`suppressredirect`)
- Review and restore revisions hidden from administrators (`suppressrevision`)
- Override the title blacklist (`tboverride`)
- Override the username blacklist (`tboverride-account`)
- Bypass automatic blocks of tor exit nodes (`torunblocked`)
- Edit using the translate interface (`translate`)
- Change workflow state of message groups (`translate-groupreview`)
- Import offline translations (`translate-import`)
- Manage message groups (`translate-manage`)
- Review translations (`translate-messagereview`)
- Unblock themselves (`unblockself`)
- Undelete a page (`undelete`)
- View a list of unwatched pages (`unwatchedpages`)
- Upload files (`upload`)
- Upload files from a URL (`upload_by_url`)
- Edit all user rights (`userrights`)
- Edit user rights of users on other wikis (`userrights-interwiki`)
- Use of the write API (`writeapi`)

Reason:

Global rights log

- [\(show/hide\)](#) 2012-02-26T13:45:48 [Vituzzu](#) ([talk](#) | [contribs](#) | [block](#)) changed group permissions for [Special:GlobalUsers/steward](#). Added `abusefilter-hide-log`; Removed `(none)` (*non controversial: rights of the oversighter groups are already included among stewards' right, btw this addition is meant to let the stewards*)

Martin Rulsch, Marius Hoch, Global administration and tools, Hong Kong, 2013-08-10

Tasks

- stewards became one of these groups with about 50, mostly passive rights which can be used if necessary without changing user rights
- global blocks prevent logged-in and logged-out users (IPs) from vandalizing multiple wikis

Globally block an IP address

([List of globally blocked IP addresses](#) | [Remove a global block](#) | [Change local status for a global block](#) | [Edit block reasons](#))

You can use this page to block an IP address on all wikis.

Block an IP address globally

IP address:

Expiry:

Other time:

Reason:

Other/additional reason:

Options: Block anonymous users only

Global user manager

Manage user data

User name:

[Suppress local users](#)

Global user info

- **User ID:** 217
- **Registered:** 2008-03-25T10:19:24 (4 years ago)
- **Home wiki:** en.wikipedia.org
- **Total editcount:** 226,622
- **Locked:** no
- **Hidden level:** no

Set global account status

You can use this form to change the status of this global account.

Locked: Account is not locked
 Account is locked from editing

Hidden: Account is not hidden
 Account is hidden from public lists
 Account is hidden completely. This will suppress only the username in edits on all wikis, but will not affect the edits themselves.

Reason:

Other/additional reason:

Delete account

Deleting the global account will delete any global preferences, unattach all local accounts, and leave the global name free for another user to take. All local accounts will continue to exist. The passwords for local accounts created before the merge will revert to their pre-merge values.

Please do not delete any vandal accounts; **lock them** and if a wiki wants to rename it, unmerge the selected from the *Fully merged accounts* even if that account is only unified on one wiki.

Reason:

Unmerge local accounts

◆	Local wiki	◆	Attached on	◆	Method	◆	Blocked	◆	Edit count	◆
<input type="checkbox"/>	aa.wikipedia.org		2008-03-25T19:19:02		admin-merged account (?)		—		12	
<input type="checkbox"/>	aa.wikibooks.org		2008-03-25T10:19:24		confirmed by password (?)		—		2	
<input type="checkbox"/>	ab.wikipedia.org		2008-03-25T10:19:24		confirmed by password (?)		—		2	
<input type="checkbox"/>	ab.wiktionary.org		2008-03-25T10:19:24		confirmed by password (?)		—		2

- system administrator

Reason:

Global rights log

- [\(show/hide\)](#) 2011-06-20T20:01:06 [PeterSymonds](#) ([talk](#) | [contribs](#) | [block](#)) changed global group membership for [User:Hoo man](#) from [Global_rollback](#), [Global_sysops](#) to [Global_rollback](#), [Global_sysops](#), [editinterface](#) (*IRC request*)
- [\(show/hide\)](#) 2011-06-20T15:28:11 [Dungodung](#) ([talk](#) | [contribs](#) | [block](#)) changed global group membership for [User:Hoo man](#) from [Global_rollback](#), [Global_sysops](#), [editinterface](#) to [Global_rollback](#), [Global_sysops](#) (*he's done, again*)

Global sysops

Global sysops

- Origin
 - there were always too few active stewards while many more users helped online
 - not all all of them fulfilled the prerequisites or were bold enough to go through a long election process
- Background
 - in March 2010 the global user group “Global sysops” has been created (the second one after “Global rollbackers” to assist stewards)
 - open election on Meta Wiki, consensus determined by stewards

Global sysops

- Tasks
 - they can do administrative tasks on wikis with < 10 Admins or < 3 active sysops or upon request of local communities
 - this is why they have ~ 40 user rights like block, delete, protect, abusefilter, etc. which they can use on ~ 740 smaller wikis, in ~ 115 larger not
 - it is recommended to work as a global sysop before applying for steward rights—many of the new stewards have been global sysops before

Tools

Global Rename (upcoming)

- will allow a global account and all attached local accounts to be renamed
- upcoming, hopefully in fall
- going to be deployed prior to the SUL finalization

Global AbuseFilters

- AbuseFilters managed from meta which apply to multiple wikis
- currently active on test, test2, mediawiki.org and meta
- can be configured and used like local filters (only Stewards can edit them)
- global filter hits appear on both the meta AbuseFilter log and the one of the local wiki

Global AbuseFilter Log

Stalk toy^{beta}

View global details about a user across all Wikimedia wikis. You can provide an account name (like [Pathoschild](#)), an IPv4 address (like [127.0.0.1](#)), an IPv6 address (like [2001:db8:1234::](#)), or a CIDR block (like [212.75.0.1/16](#) or [2600:3C00::/48](#)).

Who shall we stalk?

- Show wikis where account is not registered.
- Show relevant global groups for each wiki.

Global account

Home wiki: [en.wikipedia.org](#)

Status: okay

Registered: 2008-03-25 10:19 (account #217)

Groups: [steward](#)

Statistics: 241716 edits on 852 wikis.

Most edits on [de.wikipedia.org](#) (128373).

Oldest account on [de.wikipedia.org](#) (2005-09-12 12:51).

Smart Rollback

- provides several useful functions for rollback.
- allows using predefined or custom edit summaries for reverts
- mark rollbacks as bot edits (for all rollbacks on page)
- mass revert (uses all rollback links on the current page)
- https://meta.wikimedia.org/wiki/User:Hoo_man/Scripts/Smart_rollback
