THE present work was undertaken with a view to illustrate a course of Elementary Lectures on Modern History lately introduced at Harrow School. The Maps and Tables are selected and translated from Monsieur Koch's "Tableau des Révolutions de l'Europe," which may fairly be characterised as the ablest manual of modern history that has yet appeared. A translation of the historical part of that work was published not long since at Edinburgh; but that valuable portion of it which is now offered to the Public was still inaccessible to the English reader:—and it is hoped that the work in its present form may prove a useful companion to the historical works of Gibbon and Russel—of Mr. Hallam and Monsieur Sismondi.

## MAPS.

Under the **SUPERINTENDENCE** of the **SOCIETY** for the **DIFFUSION** of **USEFUL KNOWLEDGE**.

There are already so many collections of Maps published in this country under the denomination of Atlases, and of such various sizes and merits, that it may at first appear unnecessary to provide for the Public any additional work of this description. But in pursuing the objects for which they were originally associated, the **SOCIETY** for the **DIFFUSION** of **USEFUL KNOWLEDGE** find that Geographical Students and Readers of History want an intermediate size between the large and expensive Maps fit only for the Library, and that smaller sort usually adopted in Schools. The inequality in the compilation of most of these collections is another consideration of importance; but, above all, the high price which Maps, when tolerably executed, have hitherto borne, seems to require more than common exertion on the part of the Society to remove so serious an obstruction to the progress of popular Education.

With these views, as well as for the purpose of illustrating the Historical and Geographical Treatises which form part of the Library of Useful Knowledge, it has been determined to publish a Series of Modern and Ancient Maps, on similar scales, moderate in size, yet capable of distinctly showing every place of interest; of unexampled cheapness, yet finished in the best manner; and the accuracy of which may safely be relied upon, from the arrangements made for their composition and execution. They are engraved on Steel: the size is about 11 inches by 14: and two of them are delivered in a Wrapper for One Shilling, or with the Outlines coloured for One Shilling and Sixpence.

The Series will consist of Sixty or Seventy Plates; and a Number appears at intervals of Two Months, or more frequently. Ten Numbers are already published, which contain Two Maps of GREECE, both Ancient and Modern; Two of TURKEY, both Ancient and Modern; Two of ITALY, both Ancient and Modern; Three of ENGLAND; Two of FRANCE; the Kingdom of the NETHERLANDS. Plan of the City of ROME, Ancient; and the same Modern.
