FOREWORD

THE Vocational Service for Juniors gives scholarships to boys and girls between fourteen and eighteen years, who would otherwise be forced out of school by economic conditions, to enable them to get the education and training that seem likely to develop their highest powers as men and women and as working members of society.

With the permission of the Department of Education and the helpful cooperation of individual principals, the Vocational Service for Juniors maintains counselors in elementary and Junior High Schools. By means of questionnaires, intelligence and other tests, talks on occupations, conferences with teachers, nurses and parents, and individual interviews, they help boys and girls to make an intelligent choice of their next step in education or if necessary of work.

The Vocational Service for Juniors seeks to complete this process of vocational adjustment through its employment bureaus which place workers under eighteen years of age in investigated positions, chosen as far as possible to meet the needs and ambitions of the individual, and which follow them up when placed.

These three fields of activity afford the Vocational Service for Juniors an opportunity for close relations with adolescent boys and girls and some understanding of their varying interests and problems, as well as a rather intimate knowledge of school and working conditions. To put all the information and data which it thus acquires at the disposal of the community is one of the aims of this organization. It is with this in mind that the study "Bank Positions" and the bibliography "Investigations of Industries in New York City" have been published and that this Directory, thanks largely to the generosity of Mrs. Elsie Borg Goldsmith, has been undertaken.

This foreword is meant not so much to describe the work and aims of the Vocational Service for Juniors as to ask all readers to tell it frankly how it can be of greater use to workers in the same field and to the community at large.

ALICE K. POLLITZER, *Director.*

PREFACE

THIS book is issued in the belief that it will fill the need for a revised edition of the Directory published in 1918 by the Committee for Vocational Scholarships and entitled "Opportunities for Vocational Training in New York." In this book an attempt has been made to show the changes which have occurred in the educational field since 1918, and to mention the schools which have been started since that date, as well as the older schools. Furthermore, a limited number of private schools has been added.

It is expected that this Directory will be of aid to teachers, to counselors, and to parents in guiding adolescent children into the training for vocations best suited to their individual capacities and needs. The book is so simple in form and treatment that it is believed that girls and boys will themselves obtain effective guidance from it.

Since the previous Directory was published some interesting developments have taken place along educational lines. Educational methods and programs have in many instances been improved. On the other hand, comparatively few new schools have been started in recent years, owing to conditions during the war and its aftermath. In fact, several small schools—especially those teaching different branches of art—have been forced to close their doors, at least temporarily.

As this book is a purely vocational directory it deals only with those schools giving vocational courses. No general academic schools or courses are included. Since the Directory is of interest to boys and girls between the ages of about fourteen and twenty years, no primary schools have been mentioned herein. The boroughs covered are Manhattan, Bronx, and Brooklyn, as the largest number of schools are found in these boroughs.

In the subject index the schools have been grouped according to subject matter taught. In the main body of the book they have been grouped under three main headings, although some schools must necessarily appear under more than one heading. (1) Those schools giving commercial courses form one group. (2) Schools giving industrial courses form the second group. (3) Schools giving semi-professional courses fall into the third group. By semi-professional

are meant those schools and courses which do not require a college degree as a prerequisite.

Public vocational and trade schools of secondary grade have been listed. Included among them is the Haaren High School, at Hubert and Collister Streets, which is interesting as the only high school in Manhattan which is run on the "co-operative plan." In Brooklyn, the Manual Training High School maintains industrial courses for boys, conducted in this way, but there is as yet no separate co-operative public school in Brooklyn. Under the "co-operative plan," students divide their school term between vocational work done at schools and the same kind of work done in an industrial plant or business office. In other words, the school procures a part-time paying job for the students, at the same time that they are still learning their vocations at school. This is claimed to result in more practical vocational education, and in greater efficiency and interest on the part of the student.

An attempt has been made to list endowed schools giving vocational courses. A few corporation schools are also listed; very few, however, as only those corporation schools are included which give training so general in its nature as to be useful in any plant of that industry. Many corporation schools are efficiently and carefully run, but in the majority of cases, the training is confined to specific kinds of work carried on within the plan of the particular company served by the school. A few schools, however, offer a broader training in industrial methods and problems.

Besides the types of schools above mentioned, the Directory includes those private schools of which the members of the Vocational Service for Juniors have personal knowledge. Unfortunately it has not been feasible to list all the private schools in view of their very great number. It is earnestly requested that officials who feel that their school should have had a place in this book notify the Secretary of the Vocational Service for Juniors in order that the School be listed in future issues of this Directory.

It will be found on looking over the data contained herein, that the most important questions concerning each school have in all probability been answered. In glancing over the columns marked "Scholarships" and "Remarks," some interesting facts will present themselves. Although some schools have relief funds, or free tuition in exceptional cases, very few offer scholarships to worthy pupils who cannot afford either the time or the funds to take a course of

training. Several schools, however, have a placement bureau and a follow-up system whereby they keep in touch with their pupils during the first years of their industrial careers.

Grateful acknowledgment is made of the valuable assistance of the staff of the Vocational Service for Juniors.

ELSIE BORG GOLDSMITH,
Chairman, Sub-Committee on the Directory.

CONDITIONS UNDER WHICH CHILDREN MAY WORK

CHILDREN under 14 years of age may not be employed in any business or service whatever. This applies equally to work during school hours, before and after school hours, on Saturdays, Sundays, and during vacation. Exception is made for selling or delivering newspapers by boys between 12 and 16 years of age and for theatrical and motion picture film work in which children under 16 may be employed with the consent of the Mayor, but are not allowed to sing or dance. The employment of children under 14 in manufacturing carried on in tenements or in cannery sheds is deemed to be work for a factory, and is subject to factory prohibitions.

Children 14 or 15 years of age may not be employed without an employment certificate obtained from the school authorities. Children under 16 years of age may not be employed in dangerous occupations (Section 146 of the Labor Law).

To obtain an employment certificate a child must be 14 or 15 years of age and must present the following papers:

1. *School Record Certificate:*

Issued on parent's application by principal of school last attended by applicant. To secure this record children must have attended school at least 130 days during the twelve months next preceding their 14th birthday, or during the twelve months next preceding the date of application for the school record certificate. 14-year-old children must be graduates of a public, private, or parochial elementary school. Children 15 years of age must have completed the work of the first six years of the public elementary school or school equivalent thereto.

2. *Evidence of Age:*

One of the following papers must be produced which may be accepted only in the order given:

- (a) Transcript of birth certificate, baptismal certificate or passport.
- (b) Other documentary evidence such as an Ellis Island certificate of arrival, an insurance policy, etc.
- (c) Physician's certificate of age.

3. *A Pledge of Employment:*

This is a statement that the employer who signs the paper will give the child immediate employment and describes the kind of work the child will be required to do and the number of hours per day he will be required to work.

4. *Certificate of Physical Fitness:*

If the above-mentioned papers are approved, the child takes them to the Board of Health and receives a certificate of physical fitness if he passes the examination given by the physician there. The certificate states that the child is in sound health and physically able to perform the work he intends to do.

Factory work is prohibited for children between 14 and 15 before 8 o'clock in the morning or after 5 o'clock in the evening or for more than eight hours in any one day or more than six days in any week. In mercantile establishments the opening hour is 8 A. M., the closing hour 6 P. M., but children may not work in these establishments for more than eight hours daily.
