THE OCEAN TELEGRAPH. The most favorable point for the Western terminus of the transatiantic telegraph is ascertamed to be Trinity Bay, Newfoundland. The line will be rin direct from that point (under water) in a South-westerly direction, (unfer water) in a South-westerly direction, passed main failed to souther main failed to southering a four indies, crossing the narrow sthmus of four indies at Trinity Bay, by the man of an underground wire. The New York correspondent of the National Intelligence says that this route has been chosen rather than the mire circuitous one through Nova Scotia, (where the wire is already completed and in operation) in order to avoid the possibility of an interruption from local business, and to issure an Independent line to the triangular control of the possibility of an interruption from local business, and to issure an Independent line. for the transmission of European dispatches. The construction of the additional four hundred notes of wire will be commenced at

with the other and more importants passes of the work.

Commenting upon the immense troportant with the constraint of the work.

Commenting upon the immense troportant of the great enterprise, the Washington dull.

Succeeding the constraint apprehensions which we deem well founded. We may well fear says that able journal, that in the hands of unserquious commencial speculators, allow gether unrestricted and irresponsible, and without reliable Nouchers for the truth of their communications, it may become a fear the communications of the communications and the river is rising slowly.

LOUISIANA LEGISLATURE.

BATON ROOM, For Note, The weather is quite moderate, and the river is rising slowly.

LOUISIANA LEGISLATURE.

BATON ROOM, For Note, The work of the city of Jefforson which was referred.

Mr. Olivers bill in regard to reclaiming swamp lands, drainage, &c., was also referred. arrangement bo made with Groat Britan that no commercial news whatever be allowed to pass over the line, of which the correctness has not been certified by a highly responsible oblice of our government, such as a consul, or other commercial agent.— Thero seems to be no other possible way of swoding the threatened danger. As an indicateneous medium for the communication of truth on any subject, the telegraph is, unduritedly, the missi valuable discovery of my age as a servant of harmful falseheed, it has often provide adversive of the best it has often proved subversive of the best it has often proved subversive of the best public and provate interests. This perverse of fise great a good should not be, where it is possible to prevent it; and a due regard for the interests of our commercial community requires of our commercial community requires of our government some effort to secure them against all possibility of many from this source.

CONGRESS.

CONGRESS.

Washisators, January 26.—Senate.—After the usual morning business, the Somate resumed the consuderation of the bill from the fluxes of Representatives authorizing the establishment of a mayal depot on Blythe listand, at Brunswick, on the coast of Georgia, and for other purposes. The motion to recommend the fill was necatived—yeas 18, have 71 and the bill read a third time and passed, after a lieng debate, in which the comparative merits of Beautort, North Carolina, and Ship bland. Miss series were urged by various somalors in embedding which is the highest of the following which the highest of the following with the following with the highest of the following with the following wit with a population of the with the following with the following

WEAP Opes Does It MARK WEFFERS FOR CALL IT BY ARTHUR OB BURKING.—Prof. Youman, in a learned lecture on chemistry, and it.—What is the relation of crysten to the living body? Byery mitmai is busy frawing in and throwing out air—an increasing tidal sobs and throwing out air—an increasing tidal sobs and flow. The oxygen of the air passes shough the membranes of the sanges, is taken up by the Blood, and carried to ail parts of the body. It does here what it does everywhere—It burks. Slow combustion goes on in the body, and carried to all parts of the body. It does here what it does everywhere—the burks. Slow combustion goes on in the body, and carried is necessary to keep up heat and fever, and the oxygen of the air must have carrion and hydrogen, in the form of food and drisk, to feed upon. Cut of sman from everything but air, and the oxygen at every breath will cut away a portion of his own frame. The most combustible parts are first consumed; he grows lighter and more emaciated every hour. First, the fat disappears, then the muscles are assafied, and listly, the devouring giant, oxygen, at tasks the brain and nerves, delirium ensues, and death choose the senoe. Men say he has starved to death, but the scientific truth is that he has been burned to cinders.

The application of the large in the form of foods and listing the death of the science of the senoth of the scientific truth is that he has been burned to cinders.
