STOCKS OF LEAF TOBACCO OWNED BY DEALERS AND MANUFACTURERS 1/ 2/

Total Inventories of Leaf Tobacco Lower Than a Year Ago

Leaf tobacco inventories in the United States and Puerto Rico totaled 4,477 million pounds (farm-sales-weight) as of October 1, 1960, on the basis of the quarterly stocks reports of dealers 2/ and manufacturers. This is a decrease of 91 million pounds compared with a year earlier and 222 million below two years ago. Decreases were reported in the domestic cigarette types, dark air-cured, and cigar binder, and increases in fire-cured, cigar-filler and wrapper, and imported types. Tobacco growers marketed 853 million pounds during the third quarter (July-September, 1960), consisting mostly of flue-cured but including some Maryland and cigar leaf. During the corresponding period last year 80.3 million pounds were marketed by growers.

The marketing year for all kinds of tobacco except flue-cured and cigar wrapper is on an October-September basis (table 3). The indicated total disappearance (exports plus domestic consumption) during the 1959-60 marketing year for all U. S. grown types combined for their respective periods was 1,954 million pounds compared with 1,955 million during the previous year. Estimated domestic consumption of U. S. grown tobacco was 1,450 million pounds, the highest in 5 years. In addition to the U. S. grown tobacco, approximately 163 million pounds (unstemmed equivalent) of imported tobacco was used by domestic manufacturers during the past year. In turn, the U. S. exported an estimated 504 million pounds during the 1959-60 marketing year (536 million during previous year).

Stocks as of October 1, 1960, included about 707 million pounds (farm-sales-weight) of leaf tobacco under Government loans (901 million pounds as of October 1, 1959). These loan stocks were divided as follows: flue-cured, 538 million pounds; burley, 90 million; Maryland, 3.3 million; fire-cured, 43.5 million; dark air-cured, 17.7 million; and cigar-leaf, 13.9 million.

---

1/ Figures quoted for type totals in this summary are the farm-sales-weight equivalent of reported stocks except foreign-grown leaf which is converted to an unstemmed equivalent basis only. (See tables in body of report for reported weight basis).

2/ All Government loan stocks are reported by Grower Cooperatives, which are considered dealers for stocks-reporting purposes.

## CIGARETTE-LEAF STOCKS

### Flue-cured, Burley, and Maryland Stocks Show Decreases

Stocks of flue-cured tobacco on October 1, 1960, were 2,469 million pounds compared with 2,556 million reported on hand a year ago. Marketing of the 1960 crop, currently estimated at 1,235 million pounds, began in July and sales by growers totaled 839 million pounds by the end of September. During the corresponding quarter last year 789 million pounds were sold.

Burley stocks of 1,191 million pounds represented a decrease of about 33 million pounds compared with the previous October 1 (1,224 million). Based on October 1 stocks, total disappearance of burley tobacco during the marketing year just ended (October 1959-September 1960) amounted to 535 million pounds compared with 518 million during the 1958-59 period. Indicated domestic consumption was 499 million pounds (up 16 million), and exports were 36 million (up 1.5 million).

Stocks of Maryland tobacco were 70.9 million pounds, a decrease of 1.1 million from holdings on the previous October 1 (72.0 million). Sales of the 1959 crop on the auction markets were completed in August, 1960. Disappearance of Maryland leaf during the 1959-60 marketing year was 33.4 million pounds, 6 million below the previous year. Both domestic consumption at 21.5 million pounds (24.1 million in 1958-59), and exports at 11.9 million (15.3 million in 1958-59) were below those of last year.

Foreign-grown cigarette and smoking tobacco stocks (Turkish and other) were 209.6 million pounds--about the same as on last October 1 (209.0).

## DARK TOBACCO STOCKS

### Fire-cured Stocks Higher and Dark Air-cured lower than on last October 1

Fire-cured tobacco stocks, reported as 123.4 million pounds, were larger than a year ago (121.8 million). Increases occurred in types 22 and 23, and a slight decrease was reported in type 21. Fire-cured stocks on October 1, 1960, were divided by types as follows: Virginia fire-cured 22.2 million, Eastern District Kentucky and Tennessee fire-cured 82.4 million, and Western District 18.8 million. Disappearance of fire-cured tobacco during the 1959-60 marketing year totaled 51.5 million pounds compared with 54.7 million during the previous year. Exports of 23.7 million pounds were 5 percent lower than during the previous marketing year. Domestic consumption was 27.7 million compared with 29.7 million for 1958-59.

Dark air-cured tobacco stocks on this October 1 were 66.2 million pounds, a decrease of 2.4 million pounds compared with holdings a year earlier (68.6 million). Stocks of types 35 and 36 were lower and those of type 37 higher than on the previous October 1. Inventories on this October 1 of One Sucker were 41.0 million pounds, Green River 19.9 million, and Virginis sun-cured 5.2 million. Disappearance of dark air-cured tobacco during the 1959-60 marketing year was 23.9 million pounds, more than 3 million below the figure for the previous year. Exports were 5.8 million--2.0 million less than for the year before, and domestic consumption was 18.1 million (19.7 million for 1958-59).

## CIGAR LEAF STOCKS

### Holdings of Domestic Cigar Leaf higher than a Year ago Stocks of Foreign-grown Cigar Leaf larger

Cigar-leaf stocks of all domestic types including Puerto Rican totaled 281.2 million pounds (farm-sales-weight) on October 1, 1960. This is an increase of about 4 percent compared with total holdings on last October 1 (269.2 million). Stocks of foreign-grown cigar-leaf totaled 62.9 million pounds (unstemmed equivalent) compared with 44.1 million reported the previous October 1.

Stocks of the cigar-filler types increased 8.6 million pounds compared with a year earlier, stocks this October 1 amounting to 172.4 million. Increases were reported in holdings of all types. Pennsylvania Seedleaf stocks this October 1 were 109.7 million pounds, Ohio filler 17.5 million, and Puerto Rican filler 45.2 million. Disappearance of the filler types for the 1959-60 marketing year totaled 79.3 million pounds--considerably lower than was indicated for the previous year (89.2 million). Indicated domestic consumption was estimated at 78.8 million (87.7 million in 1958-59), and exports were estimated at 0.6 million --about a million below the 1958-59 figure.

Cigar-binder stocks were 79.9 million pounds on October 1, 1960, a decrease of 0.8 million from a year earlier (80.7 million). Holdings of type 54 were above those of last year, but stocks of the other binder types were down from October 1 a year ago. Connecticut Valley Broadleaf stocks this October 1 were 19.6 million pounds, Connecticut Valley Havana Seed 13.7 million, Southern Wisconsin 22.2 million, and Northern Wisconsin 24.4 million. Disappearance of the cigar-binder types totaled 29.3 million pounds during the 1959-60 marketing year compared with 31.3 million in 1958-59. Exports were estimated at 2.1 million pounds (3.6 million last year), and domestic consumption was estimated at 27.2 million (27.7 million in 1958-59).

Shade-grown cigar leaf stocks of 29.0 million pounds showed a 17 percent increase over those reported last October 1 (24.7 million). Increases occurred in both types. Holdings of type 61 were 19.0 million, and of type 62, 10.0 million.

Stocks of Cuban leaf (Havana) reported at 43.6 million pounds showed an increase of nearly 50 percent over those of a year earlier (29.4 million); and holdings of Philippine Islands (Manila) stocks at 12.1 million pounds were about 3 million higher than on last October 1 (9.3 million). Stocks of Sumatra and Java leaf amounted to 0.5 million pounds.

### Stocks represented in tobacco sheet show increase

Stocks of leaf represented in inventories of "tobacco sheet" totaled 6.0 million pounds (reporting weight) compared with 3.7 million on the previous October 1. Of the total in "tobacco sheet" this October 1, 4.3 million pounds was for use in cigarettes and smoking tobacco, and 1.7 million for cigar binder including a very small quantity for wrappers.

Revisions of Burley Stocks

The farm-sales-weight equivalent of burley stocks have been revised from 1956 to date, reflecting a slight lowering of the factor for converting stemmed stocks to the farm-sales-weight equivalent. Conversion factors are based on average yield experiences of tobacco dealers and manufacturers. A recent survey was conducted to determine current redrying and stemming yield experiences for the different types of tobacco. Information secured in this survey indicated that stocks of stemmed burley tobacco were being slightly over-converted. Accordingly, the factor for converting stemmed stocks of burley to an unstemmed equivalent has been lowered to 1.330 from 1.351. The stocks have been revised back to 1956 based on the lower or revised factor.

The revised farm-sales-weight equivalents of burley stocks beginning with January 1, 1956 are shown in the table below:

1/ Totals include stocks of leaf reported in tobacco sheet. See separate reporting in tables 4 and 5.

2/ For factor used in converting weights see table 1 except for cigar leaf. The instructions for reporting unstemmed cigar-leaf of the domestic types require dealers and manufacturers to indicate the weight basis on which the tobacco is reported, namely farm-sales weight, marked weight, or sweated weight. The stocks are converted to the farm-sales-weight equivalent on the basis of the amount reported in these three categories. The conversion factors by types of tobacco for October 1, 1960 are as follows: Type 41, 105; Types 42-44, 112; Type 51, 104; Type 52, 106; Type 54, 105; Type 55, 105; Type 61, 108; Type 62, 110. October 1, 1960 figures subject to revision.

3/ For explanation of stocks included in this classification, see footnote 5 on page 15.

4/ Foreign-grown leaf is converted to an unstemmed equivalent basis only.

\* Revisions. (In connection with revisions shown for burley, see explanation on page 6.)

1/ Annual disappearance for a type is calculated for the marketing year established for that type, the year beginning on the quarterly reporting date on which stocks of the type are at their lowest point and before the new crop enters stocks.

2/ The carry-over stocks have been tabulated separately according to broad groupings of ownership, namely manufacturers, under loan, and all other. "Other" reflects stocks reported by tobacco dealers and stocks held in the United States by representatives of foreign manufacturers. The quantities shown as owned by dealers may include some tobacco held by dealers which is earmarked for sale to domestic manufacturers or for export.

3/ Subject to revision.

4/ November 1 estimate, U. S. Crop Reporting Board.

Table 4.--Stocks of leaf tobacco, including leaf in tobacco sheet 1/, by types and, where applicable, by groups of grades, owned by dealers and manufacturers, October 1, 1960 compared with October 1, 1959, and July 1, 1960

1/ Represents leaf tobacco in stocks of reconstituted or processed tobacco sheet.

2/ Subject to revision.

3/ Summary according to groups of grades reflecting a broad quality breakdown of total cigar leaf stocks.

4/ Includes Puerto Rican on the Island, Type 46.

5/ Although Type 73 is defined as all domestic types of tobacco not otherwise classified, the bulk of the stocks reported in this type consists of cuttings, clippings, and trimmings. This is the result, in most instances, of the inability of reporters to designate cuttings, clippings, and trimmings in the "S" group of the types to which they properly belong.

6/ Does not include Sumatra and Java leaf held for sale in the Free Trade Zone.

\* Revisions.

1/ Total includes stocks of leaf reported in tobacco sheet. See separate reporting in tables 4 and 5.

2/ These statistics represent the quantity of leaf tobacco reported as owned by all leaf tobacco dealers, manufacturers, quasi-manufacturers, growers' cooperative associations, warehousemen, brokers, holders, and owners subject to provisions of the Tobacco Stocks and Standards Act approved January 14, 1929, and the amendments thereto passed in the 72nd and 74th Congress. The quantities owned by dealers and manufacturers have been tabulated separately on a type total basis.

3/ This table should be considered as representing only the approximate quantities owned respectively by dealers and manufacturers. The quantities shown as owned by manufacturers include tobacco which is held under dealer registries of manufacturers and also tobacco held by dealers and known to be purchased on order for foreign or domestic manufacturers. The quantities shown as owned by dealers may include some tobacco held by dealers which is earmarked for sale to domestic manufacturers or for export. All Government loan stocks are included as dealer holdings.

4/ Includes stocks on the Island of Puerto Rico.

5/ For explanation of stocks included in this classification see footnote 5 on page 15.
