IV.—For your Wife when you Marry	261
V.—The Great Tomb	269

SECOND PART

(CONTINUED).

GILLIATT.

BOOK III.

THE STRUGGLE.

EXTREMES MEET.

NOTHING is more threatening than a late equinox.

The appearance of the sea presents a strange phenomenon, resulting from what may be called the arrival of the ocean winds.

In all seasons, but particularly at the epoch of the Syzygies, at the moment when least expected, the sea sometimes becomes sin-

gularly tranquil. That vast perpetual movement ceases; a sort of drowsiness and languor overspreads it; and it seems weary and about to rest. Every rag of bunting, from the tiny streamer of the fishing-boat to the great flag of ships of war, droops against the mast. The admiral's flag, the Royal and Imperial ensigns sleep alike.

Suddenly all these streamers begin to flutter gently.

If there happen to be clouds, the moment has then come for marking the formation of the *cirri*; if the sun is setting, for observing the red tints of the horizon; or if it be night and there is a moon, for looking attentively for the halo.

It is then that the captain or commander of a squadron, if he happen to possess one of those storm indicators, the inventor of which is unknown, notes his instrument carefully, and takes his precautions against the south wind, if the clouds have an appearance like dissolved sugar; or against the north, if they exfoliate

in crystallizations like brakes of brambles, or like fir woods. Then, too, the poor Irish or Breton fisherman, after having consulted some mysterious gnomon engraved by the Romans or by demons upon one of those straight enigmatical stones, which are called in Brittany *Menhir*, and in Ireland *Cruach*, hauls his boat up on the shore.

Meanwhile the serenity of sky and ocean continues. The day dawns radiant, and Aurora smiles. It was this which filled the old poets and seers with religious horror; for men dared to suspect the falsity of the sun. *Solem quis dicere falsum audeat?*

The sombre vision of nature's secret laws is interdicted to man by the fatal opacity of surrounding things. The most terrible and perfidious of her aspects is that which masks the convulsions of the deep.

Some hours, and even days sometimes, pass thus. Pilots raise their telescopes here and there. The faces of old seamen have always an expression of severity left upon them by the

vexation of perpetually looking out for changes.

Suddenly a great confused murmur is heard. A sort of mysterious dialogue takes place in the air.

Nothing unusual is seen.

The wide expanse is tranquil.

Yet the noises increase. The dialogue becomes more audible.

There is something beyond the horizon.

Something terrible. It is the wind.

The wind ; or rather that populace of Titans which we call the gale ; the unseen multitude.

India knew them as the Maroubs, Judea as the Keroubim, Greece as the Aquilones. They are the invisible winged creatures of the Infinite. Their blasts sweep over the earth.

II.

THE OCEAN WINDS.

THEY come from the immeasurable deep. Their wide wings need the breadth of the ocean gulf; the spaciousness of desert solitudes. The Atlantic, the Pacific—those vast blue plains—are their delight. They hasten thither in flocks. Commander Page witnessed, far out at sea, seven water-spouts at once. They wander there, wild and terrible! The ever-ending yet eternal flux and reflux is their work. The extent of their power,

the limits of their will, none know. They are the Sphinxes of the abyss: Gama was their Oedipus. In that dark, ever-moving expanse, they appear with faces of cloud. He who perceives their pale lineaments in that wide dispersion, the horizon of the sea, feels himself in presence of an unsubduable power. It might be imagined that the proximity of human intelligence disquieted them, and that they revolted against it. The mind of man is invincible, but the elements baffle him. He can do nothing against a power which is everywhere, and which none can bind. The gentle breath becomes a gale, smites with the force of a war-club, and then becomes gentle again. The winds attack with a terrible crash, and defend themselves by fading into nothingness. He who would encounter them must use artifice. Their varying tactics, their swift redoubled blows, confuse. They fly as often as they attack. They are tenacious and impalpable. Who can circumvent them? The prow of the Argo, cut from an oak of Dodona's grove,

that mysterious pilot of the bark, spoke to them, and they insulted that pilot-goddess. Columbus, beholding their approach at *La Pinta*, mounted upon the poop and addressed them with the first verses of St. John's Gospel. Surcouf defied them: 'Here come the gang,' he used to say. Napier greeted them with cannon-balls. They assume the dictatorship of chaos.

Chaos is theirs, in which to wreak their mysterious vengeance: the den of the winds is more monstrous than that of lions. How many corpses lie in its deep recesses, where the howling gusts sweep without pity over that obscure and ghastly mass! The winds are heard wheresoever they go, but they give ear to none. Their acts resemble crimes. None know on whom they cast their hoary surf; with what ferocity they hover over shipwrecks, looking at times as if they flung their impious foam-flakes in the face of heaven. They are the tyrants of unknown regions. '*Luoghi spaventosi,*' murmured the Venetian mariners.

The trembling fields of space are subjected to their fierce assaults. Things unspeakable come to pass in those deserted regions. Some horseman rides in the gloom : the air is full of a forest sound ; nothing is visible ; but the tramp of cavalcades is heard. The noonday is overcast with sudden night ; a tornado passes. Or it is midnight, which suddenly becomes bright as day ; the polar lights are in the heavens. Whirlwinds pass in opposite ways, and in a sort of hideous dance, a stamping of the storms upon the waters. A cloud overburdened opens and falls to earth. Other clouds, filled with red light, flash and roar ; then frown again ominously. Emptied of their lightnings, they are but as spent brands. Pent-up rains dissolve in mists. Yonder sea appears a fiery furnace in which the rains are falling : flames seem to issue from the waves. The white gleam of the ocean under the shower is reflected to marvellous distances. The different masses transform themselves into uncouth shapes. Monstrous whirlpools make strange hollows in the

sky. The vapours revolve, the waves spin, the giddy Naiads roll; sea and sky are livid; noises as of cries of despair are in the air.

Great sheaves of shadow and darkness are gathered up, trembling in the far depths of the sky. Now and then there is a convulsion. The rumour becomes tumult, as the wave becomes surge. The horizon, a confused mass of strata, oscillating ceaselessly, murmurs in a continual under-tone. Strange and sudden outbursts break through the monotony. Cold airs rush forth, succeeded by warm blasts. The trepidation of the sea betokens anxious expectation, agony, terror profound. Suddenly the hurricane comes down, like a wild beast, to drink of the ocean: a monstrous draught! The sea rises to the invisible mouth; a mound of water is formed; the swell increases; and the waterspout appears: the Prester of the ancients, stalactite above, stalagmite below, a whirling double-inverted cone, a point in equilibrium upon another, the embrace of two mountains—a mountain of foam ascending, a

mountain of vapour descending—terrible collision of the cloud and the wave. Like the column in Holy Writ, the waterspout is dark by day and luminous by night. In its presence, the thunder itself is silent, and seems cowed.

The vast commotion of those solitudes has its gamut, a terrible crescendo. There are the gust, the squall, the storm, the gale, the tempest, the whirlwind, the waterspout—the seven chords of the lyre of the winds, the seven notes of the firmament. The heavens are a clear space, the sea a vast round; but a breath passes, they have vanished, and all is fury and wild confusion.

Such are these inhospitable realms.

The winds rush, fly, swoop down, dwindle away, commence again; hover above, whistle, roar, and smile; they are frenzied, wanton, unbridled, or sinking at ease upon the raging waves. Their howlings have a harmony of their own. They make all the heavens sonorous. They blow in the cloud as in a trumpet; they sing through the infinite space with the mingled tones

of clarions, horns, bugles, and trumpets—a sort of Promethean fanfare.

Such was the music of ancient Pan. Their harmonics are terrible. They have a colossal joy in the darkness. They drive and disperse great ships. Night and day, in all seasons, from the tropics to the pole, there is no truce; sounding their fatal trumpet through the tangled thickets of the clouds and waves, they pursue the grim chase of vessels in distress. They have their packs of bloodhounds, and take their pleasure, setting them to bark among the rocks and billows. They huddle the clouds together, and drive them diverse. They mould and knead the supple waters as with a million hands.

The water is supple because it is incompressible. It slips away without effort. Borne down on one side, it escapes on the other. It is thus that waters become waves, and that the billows are a token of their liberty.

III.

THE NOISES EXPLAINED.

THE grand descent of winds upon the world takes place at the equinoxes. At this period the balance of tropic and pole librates, and the vast atmospheric tides pour their flood upon one hemisphere, and their ebb upon another. The signs of Libra and Aquarius have reference to these phenomena.

It is the time of tempests.

The sea awaits their coming, keeping silence.

Sometimes the sky looks sickly. Its face is

wan. A thick dark veil obscures it. The mariners observe with uneasiness the angry aspect of the clouds.

But it is its air of calm contentment which they dread the most. A smiling sky in the equinoxes is the tempest in gay disguise. It was under skies like these that 'The Tower of Weeping Women,' in Amsterdam, was filled with wives and mothers scanning the far horizon.

When the vernal or autumnal storms delay to break, they are gathering strength ; hoarding up their fury for more sure destruction. Beware of the gale that has been long delayed. It was *Ángot* who said that 'the sea pays well old debts.'

When the delay is unusually long, the sea betokens her impatience only by a deeper calm, but the magnetic intensity manifests itself by what might be called a fiery humour in the sea. Fire issues from the waves ; electric air, phosphoric water. The sailors feel a strange lassitude. This time is particularly perilous

for iron vessels; their hulls are then liable to produce variations of the compass, leading them to destruction. The Transatlantic steam-vessel 'Iowa' perished from this cause.

To those who are familiar with the sea, its aspect at these moments is singular. It may be imagined to be both desiring and fearing the approach of the cyclone. Certain unions, though strongly urged by nature, are attended by this strange conjunction of terror and desire. The lioness in her tenderest moods flies from the lion. Thus the sea, in the fire of her passion, trembles at the near approach of her union with the tempest. The nuptials are prepared. Like the marriages of the ancient emperors, they are celebrated with immolations. The fête is heralded with disasters.

Meanwhile, from yonder deeps, from the great open sea, from the unapproachable latitudes, from the lurid horizon of the watery waste, from the utmost bounds of the free ocean, the winds pour down.

Listen ; for this is the famous equinox.

The storm prepares mischief. In the old mythology these entities were recognized, indistinctly moving, in the grand scene of nature. Eolus plotted with Boreas. The alliance of element with element is necessary ; they divide their task. One has to give impetus to the wave, the cloud, the stream : night is an auxiliary, and must be employed. There are compasses to be falsified, beacons to be extinguished, lanterns of lighthouses to be masked, stars to be hidden. The sea must lend her aid. Every storm is preceded by a murmur. Behind the horizon line there is a premonitory whispering among the hurricanes.

This is the noise which is heard afar off in the darkness amidst the terrible silence of the sea.

It was this significant whispering which Gilliatt had noted. The phosphorescence on the water had been the first warning ; this murmur the second.

If the demon *Legion* exists, he is assuredly no other than the wind.

The wind is complex ; but the air is one.

Hence it follows that all storms are mixed—a principle which results from the unity of the air.

The entire abyss of heaven takes part in a tempest: the entire ocean also. The totality of its forces is marshalled for the strife. A wave is the ocean gulf; a gust is a gulf of the atmosphere. A contest with a storm is a contest with all the powers of sea and sky.

It was Messier, that great authority among naval men, the pensive astronomer of the little lodge at Cluny, who said, 'The wind comes from everywhere and is everywhere.' He had no faith in the idea of winds imprisoned even in inland seas. With him there were no Mediterranean winds; he declared that he recognized them as they wandered about the earth. He affirmed that on a certain day, at a certain hour, the Föhn of the Lake of Constance, the ancient Favonius of Lucretius, had traversed the horizon of Paris; on another day,

the Bora of the Adriatic; on another day, the whirling Notus, which is supposed to be confined in the round of the Cyclades. He indicated their currents. He did not believe it impossible that the 'Autan,' which circulates between Corsica and the Balearic Isles, could escape from its bounds. He did not admit the theory of winds imprisoned like bears in their dens. It was he, too, who said that 'every rain comes from the tropics, and every flash of lightning from the pole.' The wind, in fact, becomes saturated with electricity at the intersection of the colures which marks the extremity of the axis, and with water at the equator; bringing moisture from the equatorial line and the electric fluid from the poles.

The wind is ubiquitous.

It is certainly not meant by this that the winds never move in zones. Nothing is better established than the existence of those continuous air currents; and aerial navigation by means of the wind boats, to which the passion for Greek terminology has given the name of

'aeroscaphes,' may one day succeed in utilizing the chief of these streams of wind. The regular course of air streams is an incontestable fact. There are both rivers of wind and rivulets of wind, although their branches are exactly the reverse of water currents: for in the air it is the rivulets which flow out of the rivers, and the smaller rivers which flow out of the great streams instead of falling into them. Hence instead of concentration we have dispersion.

The united action of the winds and the unity of the atmosphere result from this dispersion. The displacement of one molecule produces the displacement of another. The vast body of air becomes subject to one agitation. To these profound causes of coalition we must add the irregular surface of the earth, whose mountains furrow the atmosphere, contorting and diverting the winds from their course, and determining the directions of counter currents in infinite radiations.

The phenomenon of the wind is the oscillation of two oceans one against the other; the

ocean of air, superimposed upon the ocean of water, rests upon these currents, and is convulsed with this vast agitation.

The indivisible cannot produce separate action. No partition divides wave from wave. The islands of the Channel feel the influence of the Cape of Good Hope. Navigation everywhere contends with the same monster; the sea is one hydra. The waves cover it as with a coat of scales. The ocean is Ceto.

Upon that unity reposes an infinite variety.

IV.

TURBA TURMA.

ACCORDING to the compass there are thirty-two winds, that is to say, thirty-two points. But these directions may be subdivided indefinitely. Classed by its directions, the wind is incalculable; classed by its kinds, it is infinite. Homer himself would have shrunk from the task of enumerating them.

The polar current encounters the tropical current. Heat and cold are thus combined; the equilibrium is disturbed by a shock, the

wave of wind issues forth and is distended, scattered and broken up in every direction in fierce streams. The dispersion of the gusts shakes the streaming locks of the wind upon the four corners of the horizon.

All the winds which blow are there. The wind of the Gulf Stream, which disgorges the great fogs of Newfoundland; the wind of Peru, in the region of silent heavens, where no man ever heard the thunder roar; the wind of Nova Scotia, where flies the great auk (*Alca impennis*) with his furrowed beak; the iron whirlwinds of the Chinese seas; the wind of Mozambique, which destroys the canoes and junks; the electric wind, which the people of Japan denounce by the beating of a gong; the African wind, which blows between Table Mountain and the Devil's Peak, where it gains its liberty; the currents of the equator, which pass over the trade winds, describing a parabola, the summit of which is always to the west; the Plutonian wind, which issues from craters, the terrible breath of

flames; the singular wind peculiar to the volcano Awa, which occasions a perpetual olive tint in the north; the Java monsoon, against which the people construct those casemates known as hurricane houses; the branching north winds called by the English 'Bush winds;' the curved squalls of the Straits of Malacca, observed by Horsburgh; the powerful south-west wind, called Pampero in Chili, and Rebojo at Buenos Ayres, which carries the great condor out to sea, and saves him from the pit where the Indian, concealed under a bullock-hide newly stripped, watches for him lying on his back and bending his great bow with his feet; the chemical wind, which, according to Lemery, produces thunder-bolts from the clouds; the Harmattan of the Caffres; the Polar snow-driver, which harnesses itself to the everlasting icebergs; the wind of the Gulf of Bengal, which sweeps over a continent to pillage the triangular town of wooden booths at Nijni-Novogorod, in which is held the great fair of Asia; the wind of the Cordilleras,

agitator of great waves and forests ; the wind of the Australian Archipelago, where the bee-hunters take the wild hives hidden under the forks of the branches of the giant encalyptus ; the Sirocco, the Mistral, the Hurricane, the dry winds, the inundating and diluvian winds, the torrid winds which scatter dust from the plains of Brazil upon the streets of Genoa, which both obey and revolt against the diurnal rotation, and of which Herrera said, '*Malo viento torna contra el sol* ;' those winds which hunt in couples conspiring mischief, the one undoing the work of the other ; and those old winds which assailed Columbus on the coast of Veragua, and which during forty days, from the 21st of October to the 28th of November, 1520, delayed and nearly frustrated Magellan's approach to the Pacific ; and those which dismasted the Armada and confounded Philip II. Others, too, there are, of the names of which there is no end. The winds, for instance, which carry showers of frogs and locusts, and drive before them clouds of living things across the ocean ; those

which blow in what are called 'Wind leaps, and whose function is to destroy ships at sea; those which at a single blast throw the cargo out of trim, and compel the vessel to continue her course half broadside over; the winds which construct the circum-cumuli; the winds which mass together the circum-strati; the dark heavy winds swelled with rains; the winds of the hailstorms; the fever winds, whose approach sets the salt springs and sulphur springs of Calabria boiling; those which give a glittering appearance to the fur of African panthers, prowling among the bushes of Cape Ferro; those which come shaking from the cloud, like the tongue of a trigonocephal, the terrible forked lightning; and those which bring whirlwinds of black snow. Such is the legion of winds.

The Douvres rock heard their distant tramp at the moment when Gilliat^t was constructing his breakwater.

As we have said, the wind means the combination of all the winds of the earth.

V.

GILLIATT'S ALTERNATIVES.

THE mysterious forces had chosen their time well.

Chance, if chance exists, is sometimes far-seeing.

While the sloop had been anchored in the little creek of 'The Man' rock, and as long as the machinery had been prisoned in the wreck, Gilliatt's position had been impregnable. The sloop was in safety; the machinery sheltered. The Douvres, which held the hull of the

Durande fast, condemned it to slow destruction, but protected it against unexpected accidents. In any event, one resource had remained to him. If the engine had been destroyed, Gilliatt would have been uninjured. He had still the sloop by which to escape.

But to wait till the sloop was removed from the anchorage where she was inaccessible ; to allow it to be fixed in the defile of the Douvres ; to watch until the sloop, too, was as it were entangled in the rocks ; to permit him to complete the salvage, the moving, and the final embarkation of the machinery ; to do no damage to that wonderful construction by which one man was enabled to put the whole aboard his bark ; to acquiesce, in fact, in the success of his exploits so far ; this was but the trap which the elements had laid for him. Now for the first time he began to perceive in all its sinister characteristics, the trick which the sea had been meditating so long.

The machinery, the sloop, and their master were all now within the gorge of the rocks.

They formed but a single point. One blow, and the sloop might be dashed to pieces on the rock, the machinery destroyed, and Gilliatt drowned.

The situation could not have been more critical.

The sphinx which men have imagined concealing herself in the cloud, seemed to mock him with a dilemma.

‘Go or stay.’

To go would have been madness ; to remain was terrible.

VI.

THE COMBAT.

GILLIATT ascended to the summit of the Great Douvre.

From hence he could see around the horizon.

The western side was appalling. A wall of cloud spread across it, barring the wide expanse from side to side, and ascending slowly from the horizon towards the zenith. This wall, straight lined, vertical, without a crevice in its height, without a rent in its structure, seemed built by the square, and measured

by the plumb-line. It was cloud in the likeness of granite. Its escarpment, completely perpendicular at the southern extremity, curved a little towards the north, like a bent sheet of iron, presenting the steep slippery face of an inclined plane. The dark wall enlarged and grew; but its entablature never ceased for a moment to be parallel with the horizon line, which was almost indistinguishable in the gathering darkness. Silently, and altogether, the airy battlements ascended. No undulation, no wrinkle, no projection changed its shape or moved its place. The aspect of this immobility in movement was impressive. The sun, pale in the midst of a strange sickly transparence, lighted up this outline of the Apocalypse. Already the cloudy bank had blotted out one half the space of the sky: shelving like the fearful talus of the abyss. It was the uprising of a dark mountain between earth and heaven.

It was night falling suddenly upon mid-day.

There was a heat in the air as from an oven-door, coming from that mysterious mass on

mass. The sky, which from blue had become white, was now turning from white to a slatey grey. The sea beneath was leaden-hued and dull. There was no breath, no wave, no noise. Far as eye could reach, the desert ocean. No sail was visible on any side. The birds had disappeared. Some monstrous treason seemed abroad.

The wall of cloud grew visibly larger.

This moving mountain of vapours, which was approaching the Douvres, was one of those clouds which might be called the clouds of battle. Sinister appearances; some strange, furtive glance seemed cast upon the beholder through that obscure mass up-piled.

The approach was terrible.

Gilliatt observed it closely, and muttered to himself, 'I am thirsty enough, but you will give me plenty to drink.'

He stood there motionless a few moments, his eye fixed upon the cloud bank, as if mentally taking a sounding of the tempest.

His *galérienne* was in the pocket of his jacket; he took it out and placed it on his head.

Then he fetched from the cave, which had so long served him for a sleeping place, a few things which he had kept there in reserve; he put on his over-alls, and attired himself in his waterproof overcoat, like a knight who puts on his armour at the moment of battle. He had no shoes; but his naked feet had become hardened to the rocks.

This preparation for the storm being completed, he looked down upon his breakwater, grasped the knotted cord hurriedly, descended from the plateau of the Douvre, stepped on to the rocks below, and hastened to his store cavern. A few moments later he was at work. The vast silent cloud might have heard the strokes of his hammer. With the nails, ropes, and beams which still remained, he constructed for the eastern gullet a second frame, which he succeeded in fixing at ten or twelve feet from the other.

The silence was still profound. The blades of grass between the cracks of the rocks were not stirred.

The sun disappeared suddenly. Gilliatt looked up.

The rising cloud had just reached it. It was like the blotting out of day, succeeded by a mingled pale reflection.

The immense wall of cloud had changed its appearance. It no longer retained its unity. It had curved on reaching the zenith, whence it spread horizontally over the rest of the heavens. It had now its various stages. The tempest formation was visible, like the strata in the side of a trench. It was possible to distinguish the layers of the rain from the beds of hail. There was no lightning, but a horrible, diffused glare; for the idea of horror may be attached to light. The vague breathing of the storm was audible; the silence was broken by an obscure palpitation. Gilliatt, silent also, watched the giant blocks of vapour grouping themselves overhead forming the shapeless mass of clouds. Upon the horizon brooded and lengthened out a band of mist of ashen hue; in the zenith, another band of lead

colour. Pale, ragged fragments of cloud hung from the great mass above upon the mist below. The pile of cloud which formed the back-ground was wan, dull, gloomy. A thin, whitish transverse cloud, coming no one could tell whither, cut the high dark wall obliquely from north to south. One of the extremities of this cloud trailed along the surface of the sea. At the point where it touched the waters, a dense red vapour was visible in the midst of the darkness. Below it, smaller clouds, quite black and very low, were flying as if bewildered or moved by opposite currents of air. The immense cloud beyond increased from all points at once, darkened the eclipse, and continued to spread its sombre pall. In the east, behind Gilliatt, there was only one clear porch in the heavens, which was rapidly being closed. Without any feeling of wind abroad, a strange flight of grey downy particles seemed to pass; they were fine and scattered as if some gigantic bird had been plucked of its plumage behind the bank of cloud. A dark compact roof had

gradually formed itself, which on the verge of the horizon touched the sea, and mingled in darkness with it. The beholder had a vague sense of something advancing steadily towards him. It was vast, heavy, ominous. Suddenly an immense peal of thunder burst upon the air.

Gilliatt himself felt the shock. The rude reality in the midst of that visionary region has something in it terrific. The listener might fancy that he hears something falling in the chamber of giants. No electric flash accompanied the report. It was a blind peal. The silence was profound again. There was an interval, as when combatants take up their position. Then appeared slowly, one after the other, great shapeless flashes; these flashes were silent. The wall of cloud was now a vast cavern, with roofs and arches. Outlines of forms were traceable among them; monstrous heads were vaguely shadowed forth; rocks seemed to stretch out; elephants bearing turrets, seen for a moment, vanished. A

column of vapour, straight, round, and dark, and surmounted by a white mist, simulated the form of a colossal steam-vessel engulfed, hissing and smoking beneath the waves. Sheets of cloud undulated like folds of giant flags. In the centre, under a thick purple pall, a nucleus of dense fog sunk motionless, inert, impenetrable by the electric fires; a sort of hideous foetus in the bosom of the tempest.

Suddenly Gilliatt felt a breath moving his hair. Two or three large spots of rain fell heavily around him on the rock. Then there was a second thunder-clap. The wind was rising.

The terror of darkness was at its highest point. The first peal of thunder had shaken the sea; the second rent the wall of cloud from top to base; a breach was visible; the pent-up deluge rushed towards it; the rent became like a gulf filled with rain. The outpouring of the tempest had begun.

The moment was terrible.

Rain, wind, lightnings, thunder, waves swirl-

ing upwards to the clouds, foam, hoarse noises, whistlings, mingled together, like monsters suddenly unloosened.

For a solitary man, imprisoned with an over-loaded vessel, between two dangerous rocks in mid-ocean, no crisis could have been more menacing. The danger of the tide, over which he had triumphed, was nothing compared with the danger of the tempest.

Surrounded on all sides by dangers, Gilliatt, at the last moment, and before the crowning peril, had developed an ingenious strategy. He had secured his basis of operations in the enemies' territory; had pressed the rock into his service. The Douvres, originally his enemy, had become his second in that immense duel. Out of that sepulchre he had constructed a fortress. He was built up among those formidable sea ruins. He was blockaded but well defended. He had, so to speak, set his back against the wall, and stood face to face with the hurricane. He had barricaded the narrow strait, that highway of the waves.

This indeed was the only possible course. It seemed as if the ocean, like other despots, might be brought to reason by the aid of barricades. The sloop might be considered secure on three sides. Closely wedged between the two interior walls of the rock, made fast by three anchorings, she was sheltered from the north by the Little Douvre, on the south by the Great one; terrible escarpments, more accustomed to wreck vessels than to save them. On the western side she was protected by the frame of timbers made fast and nailed to the rocks, a tried barrier which had withstood the rude flood-tide of the sea; a veritable citadel-gate, having for its sides the columns of the rock—the two Douvres themselves. Nothing was to be feared from that side. It was on the eastern side only that there was danger.

On that side there was no protection but the breakwater. A breakwater is an apparatus for dividing and distributing. It requires at least two frames. Gilliatt had only had time to construct one. He was compelled to build

the second in the very presence of the tempest.

Fortunately the wind came from the north-west. The wind is not always adroit in its attacks. The north-west wind, which is the ancient 'galerno,' had little effect upon the Douvres. It assailed the rocks in flank, and drove the waves neither against the one nor the other of the two gullets; so that instead of rushing into a defile, they dashed themselves against a wall.

But the currents of the wind are curved, and it was probable that there would be some sudden change. If it should veer to the east before the second frame could be constructed, the peril would be great. The irruption of the sea into the gorge would be complete, and all would probably be lost.

The wildness of the storm went on increasing. The essence of a tempest is the rapid succession of its blows. That is its strength; but it is also its weakness. Its fury gives the opportunity to human intelligence, and man

spies its weak points for his defence ; but under what overwhelming assaults ! No respite, no interruption, no truce, no pause for taking breath. There seems an unspeakable cowardice in that prodigality of inexhaustible resources.

All the tumult of the wide expanse rushed towards the Douvres. Voices were heard in the darkness. What could they be ? The ancient terror of the sea was there. At times they seemed to speak as if some one was uttering words of command. There were clamours, strange trepidations, and then that majestic roar which the mariners call the 'Ocean cry.' The indefinite and flying eddies of the wind whistled, while curling the waves and flinging them like giant quoits, cast by invisible athletes, against the breakers. The enormous surf streamed over all the rocks ; torrents above ; foam below. Then the roaring was redoubled. No uproar of men or beasts could yield an idea of that din which mingled with the incessant breaking of the sea. The clouds cannonaded, the hailstones poured their volleys, the surf

mounted to the assault. As far as eye could reach, the sea was white ; ten leagues of yeasty water filled the horizon. Doors of fire were opened, clouds seemed burnt by clouds, and showed like smoke above a nebulous red mass, resembling burning embers. Floating conflagrations rushed together and amalgamated, each changing the shape of the other. From the midst of the dark roof a terrible arsenal appeared to be emptied out, hurling downward from the gulf, pell-mell, waterspouts, hail, torrents, purple fire, phosphoric gleams, darkness, and lightnings.

Meanwhile Gilliatt seemed to pay no attention to the storm. His head was bent over his work. The second frame-work began to approach completion. To every clap of thunder he replied with a blow of his hammer, making a cadence which was audible even amidst that tumult. He was bare-headed, for a gust had carried away his *galérienne*.

He suffered from a burning thirst. Little pools of rain had formed in the rocks around

him. From time to time he took some water in the hollow of his hand and drank. Then, without even looking upward to observe the storm, he applied himself anew to his task.

All might depend upon a moment. He knew the fate that awaited him if his breakwater should not be completed in time. Of what avail could it be to lose a moment in looking for the approach of death?

The turmoil around him was like that of a vast bubbling cauldron. Crash and uproar were everywhere. Sometimes the lightning seemed to descend a sort of ladder. The electric flame returned incessantly to the same points of the rock, where there were probably metallic veins. Hailstones fell of enormous size. Gilliatt was compelled to shake the folds of his overcoat, even the pockets of which became filled with hail.

The storm had now rotated to the west, and was expending its fury upon the barricades of the two Douvres. But Gilliatt had faith in his breakwaters, and with good reason. These barricades, made of a great portion of the fore-

part of the *Durande*, took the shock of the waves easily. Elasticity is a resistance. The experiments of Stephenson establish the fact that against the waves, which are themselves elastic, a raft of timber, joined and chained together in a certain fashion, will form a more powerful obstacle than a breakwater of masonry. The barriers of the *Douvres* fulfilled these conditions. They were, moreover, so ingeniously made fast, that the waves striking them beneath were like hammers beating in nails, pressing and consolidating the work upon the rocks. To demolish them it would have been necessary to overthrow the *Douvres* themselves. The surf, in fact, was only able to cast over upon the sloop some flakes of foam. On that side, thanks to the barrier, the tempest ended only in harmless insult. Gilliatt turned his back upon the scene. He heard, composedly its useless rage upon the rocks behind him.

The foam-flakes coming from all sides were like flights of down. The vast irritated ocean deluged the rocks, dashed over them and raged

within, penetrated into the network of their interior fissures, and issued again from the granitic masses by the narrow chinks, forming a kind of inexhaustible fountains playing peacefully in the midst of that deluge. Here and there a silvery network fell gracefully from these spouts in the sea.

The second frame of the eastern barrier was nearly completed. A few more knots of rope and ends of chains and this new rampart would be ready to play its part in barring out the storm.

Suddenly there was a great brightness; the rain ceased; the clouds rolled asunder; the wind had just shifted; a sort of high, dark window opened in the zenith, and the lightnings were extinguished. The end seemed to have come. It was but the commencement.

The change of wind was from the north-west to the north-east.

The storm was preparing to burst forth again with a new legion of hurricanes. The north was about to mount to the assault. Sailors

call this dreaded moment of transition the 'Return storm.' The southern wind brings most rain, the north wind most lightning.

The attack, coming now from the east, was directed against the weak point of the position.

This time Gilliatt interrupted his work and looked around him.

He stood erect, upon a curved projection of the rock behind the second barrier, which was nearly finished. If the first frame had been carried away, it would have broken down the second, which was not yet consolidated, and must have crushed him. Gilliatt, in the place that he had chosen, must in that case have been destroyed before seeing the sloop, the machinery, and all his work shattered and swallowed up in the gulf. Such was the possibility which awaited him. He accepted it, and contemplated it sternly.

In that wreck of all his hope, to die at once would have been his desire; to die first, as he would have regarded it—for the machinery produced in his mind the effect of a living

being. He moved aside his hair, which was beaten over his eyes by the wind, grasped his trusty mallet, drew himself up in a menacing attitude, and awaited the event.

He was not kept long in suspense.

A flash of lightning gave the signal; the livid opening in the zenith closed; a driving torrent of rain fell; then all became dark, save where the lightnings broke forth once more. The attack had re-commenced in earnest.

A heavy swell, visible from time to time in the blaze of the lightning, was rolling in the east beyond 'The Man' rock. It resembled a huge wall of glass. It was green and without foam, and it stretched across the wide expanse. It was advancing towards the breakwater, increasing as it approached. It was a singular kind of gigantic cylinder, rolling upon the ocean. The thunder kept up a hollow rumbling.

The great wave struck 'The Man' rock, broke in twain, and passed beyond. The broken wave, rejoined, formed a mountain of water, and instead of advancing in parallel line

as before, came down perpendicularly upon the breakwater.

The shock was terrific: the whole wave became a roaring surf.

It is impossible for those who have not witnessed them to imagine those snowy avalanches which the sea thus precipitates, and under which it engulfs for the moment rocks of more than a hundred feet in height, such, for example, as the Great Anderlo at Guernsey, and the Pinnacle at Jersey. At Saint Mary of Madagascar it passes completely over the promontory of Tintingue.

For some moments the sea drowned everything. Nothing was visible except the furious waters, an enormous breadth of foam, the whiteness of a winding-sheet blowing in the draught of a sepulchre; nothing was heard but the roaring storm working devastation around.

When the foam subsided, Gilliatt was still standing at his post.

The barrier had stood firm. Not a chain was broken, not a nail displaced. It had exhi-

bited under the trial the two chief qualities of a breakwater ; it had proved flexible as a hurdle and firm as a wall. The surf falling upon it had dissolved into a shower of drops.

A river of foam rushing along the zigzags of the defile, subsided as it approached the sloop.

The man who had put this curb upon the fury of the ocean took no rest.

The storm fortunately turned aside its fury for a moment. The fierce attack of the waves was renewed upon the wall of the rock. There was a respite, and Gilliatt took advantage of it to complete the interior barrier.

The daylight faded upon his labours. The hurricane continued its violence upon the flank of the rocks with a mournful solemnity. The stores of fire and water in the sky poured out incessantly without exhausting themselves. The undulations of the wind above and below were like the movements of a dragon.

Night-fall brought scarcely any deeper night. The change was hardly felt, for the darkness was never complete. Tempests, alternately

darkening and illumining by their lightnings, are merely intervals of the visible and invisible. All is pale glare, and then all is darkness. Spectral shapes issue forth suddenly, and return as suddenly into the deep shade.

A phosphoric zone, tinged with the hue of the aurora borealis, appeared like ghastly flames behind the dense clouds, giving to all things a wan aspect, and making the rain-drifts luminous.

This uncertain light aided Gilliatt, and directed him in his operations. By its help he was enabled to raise the forward barrier. The breakwater was now almost complete. As he was engaged in making fast a powerful cable to the last beam, the gale blew directly in his face; this compelled him to raise his head. The wind had shifted abruptly to the north-east. The assault upon the eastern gullet recommenced. Gilliatt cast his eyes around the horizon. Another great wall of water was approaching.

The wave broke with a great shock; a second followed; then another and another still; then

five or six almost together ; then a last shock of tremendous force.

This last wave, which was an accumulation of forces, had a singular resemblance to a living thing. It would not have been difficult to imagine in the midst of that swelling mass the shapes of fins and gill-coverings. It fell heavily and broke upon the barriers. Its almost animal form was torn to pieces in the shape of spouts and gushes, resembling the crushing to death of some sea hydra upon that block of rocks and timbers. The swell rushed through, subsiding but devastating as it went. The huge wave seemed to bite and cling to its victim as it died. The rock shook to its base. A savage howling mingled with the roar ; the foam flew far like the spouting of a leviathan.

The subsidence exhibited the extent of the ravages of the surf. This last escalade had not been ineffectual. The breakwater had suffered this time. A long and heavy beam, torn from the first barrier, had been carried over the second, and hurled violently upon the projecting

rock on which Gilliatt had stood but a moment before. By good fortune he had not returned there. Had he done so, his death had been inevitable.

There was a remarkable circumstance in the fall of this beam, which by preventing the framework rebounding, saved Gilliatt from greater dangers. It even proved useful to him, as will be seen, in another way.

Between the projecting rock and the interior wall of the defile there was a large interval, something like the notch of an axe, or the split of a wedge. One of the extremities of the timber hurled into the air by the waves had stuck fast into this notch in falling. The gap had become enlarged.

Gilliatt was struck with an idea. It was that of bearing heavily on the other extremity.

The beam caught by one end in the nook, which it had widened, projected from it straight as an outstretched arm. This species of arm projected parallel with the anterior wall of the

defile, and the disengaged end stretched from its resting-place about eighteen or twenty inches. A good distance for the object to be attained.

Gilliatt raised himself by means of his hands, feet, and knees to the escarpment, and then turned his back, pressing both his shoulders against the enormous lever. The beam was long, which increased its raising power. The rock was already loosened; but he was compelled to renew his efforts again and again. The sweat-drops rolled from his forehead as rapidly as the spray. The fourth attempt exhausted all his powers. There was a cracking noise; the gap spreading in the shape of a fissure, opened its vast jaws, and the heavy mass fell into the narrow space of the defile with a noise like the echo of the thunder.

The mass fell straight, and without breaking; resting in its bed like a Druid cromlech precipitated in one piece.

The beam which had served as a lever descended with the rock, and Gilliatt stumbling

forward as it gave way, narrowly escaped falling.

The bed of the pass at this part was full of huge round stones, and there was little water. The monolith lying in the boiling foam, the flakes of which fell on Gilliatt where he stood, stretched from side to side of the great parallel rocks of the defile, and formed a transversal wall, a sort of cross-stroke between the two escarpments. Its two ends touched the rocks. It had been a little too long to lie flat, but its summit of soft rock was struck off with the fall. The result of this fall was a singular sort of *cul-de-sac*, which may still be seen. The water behind this stony barrier is almost always tranquil.

This was a rampart more invincible still than the forward timbers of the *Durande* fixed between the two *Douvres*.

The barrier came opportunely.

The assaults of the sea had continued. The obstinacy of the waves is always increased by an obstacle. The first frame began to show

signs of breaking up. One breach, however small, in a breakwater, is always serious. It inevitably enlarges, and there is no means of supplying its place, for the sea would sweep away the workmen.

A flash which lighted up the rocks revealed to Gilliatt the nature of the mischief; the beams broken down, the ends of rope and fragments of chain swinging in the winds, and a rent in the centre of the apparatus. The second frame was intact.

Though the block of stone so powerfully overturned by Gilliatt in the defile behind the breakwater was the strongest possible barrier, it had a defect. It was too low. The surge could not destroy, but could sweep over it.

It was useless to think of building it higher. Nothing but masses of rock could avail upon a barrier of stone; but how could such masses be detached? or, if detached, how could they be moved, or raised, or piled, or fixed? Timbers may be added, but rocks cannot.

Gilliatt was not Enceladus.

The very little height of this rocky isthmus rendered him anxious.

The effects of this fault were not long in showing themselves. The assaults upon the breakwater were incessant; the heavy seas seemed not merely to rage, but to attack with determination to destroy it. A sort of trampling noise was heard upon the jolted framework.

Suddenly the end of a binding strake, detached from the dislocated frame, was swept away over the second barrier and across the transversal rock, falling in the defile, where the water seized and carried it into the sinuosities of the pass. Gilliatt lost sight of it. It seemed probable that it would do some injury to the sloop. Fortunately, the water in the interior of the rocks, shut in on all sides, felt little of the commotion without. The waves there were comparatively trifling, and the shock was not likely to be very severe. For the rest, he had little time to spare for reflection upon this mishap. Every variety of danger was arising

at once ; the tempest was concentrated upon the vulnerable point ; destruction was imminent.

The darkness was profound for a moment : the lightnings paused—a sort of sinister connivance. The cloud and the sea became one : there was a dull peal.

This was followed by a terrible outburst. The frame which formed the front of the barriers was swept away. The fragments of beams were visible in the rolling waters. The sea was using the first breakwater as an engine for making a breach in the second.

Gilliatt experienced the feeling of a general who sees his advanced guard driven in.

The second construction of beams resisted the shock. The apparatus behind it was powerfully secured and buttressed. But the broken frame was heavy, and was at the mercy of the waves, which were incessantly hurling it forward and withdrawing it. The ropes and chains which remained unsevered prevented its entirely breaking up, and the qualities which Gilliatt had given it as a means of defence

made it, in the end, a more effective weapon of destruction. Instead of a buckler, it had become a battering-ram. Besides this, it was now full of irregularities from breaking; ends of timbers projected from all parts; and it was, as it were, covered with teeth and spikes. No sort of arm could have been more effective, or more fitted for the handling of the tempest. It was the projectile; while the sea played the part of the catapult.

The blows succeeded each other with a dismal regularity. Gilliatt, thoughtful and anxious, behind that barricaded portal, listened to the sound of death knocking loudly for admittance.

He reflected with bitterness that, but for the fatal entanglement of the funnel of the *Durande* in the wreck, he would have been at that very moment, and even since the morning, once more at Guernsey, in the port, with the sloop out of danger, and with the machinery saved.

The dreaded moment arrived. The destruction was complete. There was a sound like

a death-rattle. The entire frame of the breakwater, the double apparatus crushed and mingled confusedly, came in a whirl of foam, rushing upon the stone barricade like chaos upon a mountain, where it stopped. Here the fragments lay together, a mass of beams penetrable by the waves, but still breaking their force. The conquered barrier struggled nobly against destruction. The waves had shattered it, and in their turn were shattered against it. Though overthrown, it still remained in some degree effective. The rock which barred its passage, an immovable obstacle, held it fast. The defile, as we have said, was very narrow at that point; the victorious whirlwind had driven forward, mingled and piled up the wreck of the breakwater in this narrow pass. The very violence of the assault, by heaping up the mass and driving the broken ends one into the other, had contributed to make the pile firm. It was destroyed, but immovable. A few pieces of timber only were swept away, and dispersed by the waves. One passed through the air

very near to Gilliatt. He felt the counter current upon his forehead.

Some waves, however, of that kind, which in great tempests return with an imperturbable regularity, swept over the ruins of the breakwater. They fell into the defile, and in spite of the many angles of the passage, set the waters within in commotion. The waters began to roll through the gorge ominously. The mysterious embraces of the waves among the rocks were audible.

What means were there of preventing this agitation extending as far as the sloop? It would not require a long time for the blasts of wind to create a tempest through all the windings of the pass. A few heavy seas would be sufficient to stave in the sloop, and scatter her burden.

Gilliatt shuddered as he reflected.

But he was not disconcerted. No defeat could daunt his soul.

The hurricane had now discovered the true

plan of attack, and was rushing fiercely between the two walls of the strait.

Suddenly a crash was heard, resounding and prolonging itself through the defile at some distance behind him: a crash more terrible than any he had yet heard.

It came from the direction of the sloop.

Something disastrous was happening there.

Gilliatt hastened towards it.

From the eastern gullet where he was, he could not see the sloop on account of the sharp turns of the pass. At the last turn, he stopped and waited for the lightning.

The first flash revealed to him the position of affairs.

The rush of the sea through the eastern entrance had been met by a blast of wind from the other end. A disaster was near at hand.

The sloop had received no visible damage; anchored as she was, the storm had little power over her, but the carcass of the *Durande* was distressed.

In such a tempest, the wreck presented a considerable surface. It was entirely out of the sea in the air, exposed. The breach which Gilliatt had made, and which he had passed the engine through, had rendered the hull still weaker. The keelson was snapped, the vertebral column of the skeleton was broken.

The hurricane had passed over it. Scarcely more than this was needed to complete its destruction. The planking of the deck had bent like an opened book. The dismemberment had begun. It was the noise of this dislocation which had reached Gilliatt's ears in the midst of the tempest.

The disaster which presented itself as he approached appeared almost irremediable.

The square opening which he had cut in the keel had become a gaping wound. The wind had converted the smooth-cut hole into a ragged fracture. This transverse breach separated the wreck in two. The after-part, nearest to the sloop, had remained firm in its bed of rocks. The forward portion which faced him

was hanging. A fracture, while it holds, is a sort of hinge. The whole mass oscillated, as the wind moved it, with a doleful noise. Fortunately, the sloop was no longer beneath it.

But this swinging movement shook the other portion of the hull, still wedged and immovable as it was between the two Douvres. From shaking to casting down the distance is not far. Under the obstinate assaults of the gale, the dislocated part might suddenly carry away the other portion, which almost touched the sloop. In this case, the whole wreck, together with the sloop and the engine, must be swept into the sea and swallowed up.

All this presented itself to his eyes. It was the end of all. How could it be prevented?

Gilliatt was one of those who are accustomed to snatch the means of safety out of danger itself. He collected his ideas for a moment. Then he hastened to his arsenal, and brought his hatchet.

The mallet had served him well, it was now the turn of the axe.

He mounted upon the wreck, got a footing on that part of the planking which had not given way, and leaning over the precipice of the pass between the Douvres, he began to cut away the broken joists and the planking which supported the hanging portion of the hull.

His object was to effect the separation of the two parts of the wreck, to disencumber the half which remained firm, to throw overboard what the waves had seized, and thus share the prey with the storm. The hanging portion of the wreck, borne down by the wind and by its own weight, adhered only at one or two points. The entire wreck resembled a folding-screen, one leaf of which, half hanging, beat against the other. Five or six pieces of the planking only, bent and started but not broken, still held. Their fractures creaked and enlarged at every gust, and the axe, so to speak, had but to help the labour of the wind. This more than half-severed condition, while it increased the facility of the work, also rendered it

dangerous. The whole might give way beneath him at any moment.

The tempest had reached its highest point. The convulsion of the sea reached the heavens. Hitherto the storm had been supreme, it had seemed to work its own imperious will, to give the impulse, to drive the waves to frenzy while still preserving a sort of sinister lucidity. Below was fury, above anger. The heavens are the breath, the ocean only foam, hence the authority of the wind. But the intoxication of its own horrors had confused it. It had become a mere whirlwind, it was a blindness leading to night. There are times when tempests become frenzied, when the heavens are attacked with a sort of delirium ; when the firmament raves and hurls its lightnings blindly. No terror is greater than this. It is a hideous moment. The trembling of the rock was at its height. Every storm has a mysterious course, but now it loses its appointed path. It is the most dangerous point of the tempest. 'At that moment,' says Thomas Fuller, 'the wind is a furious maniac.' It is at

that instant that that continuous discharge of electricity takes place which Piddington calls 'the cascade of lightnings.' It is at that instant that in the blackest spot of the clouds, none know why, unless it be to spy the universal terror, a circle of blue light appears, which the Spanish sailors of ancient times called the eye of the tempest, *el ojo de la tempestad*. That terrible eye looked down upon Gilliatt.

Gilliatt on his part was surveying the heavens. He raised his head now. After every stroke of his hatchet he stood erect, and gazed upwards almost haughtily. He was, or seemed to be, too near destruction not to feel self-sustained. Would he despair? No! In the presence of the wildest fury of the ocean he was watchful as well as bold. He planted his feet only where the wreck was firm. He ventured his life and yet was careful; for his determined spirit, too, had reached its highest point. His strength had grown tenfold greater. He had become heated with his own intrepidity. The strokes of his hatchet were like blows of

defiance. He seemed to have gained in directness what the tempest had lost. A pathetic struggle! On the one hand, an indefatigable will; on the other, inexhaustible power. It was a contest with the elements for the prize at his feet. The clouds took the shape of Gorgon masks in the immensity of the heavens; every possible form of terror appeared: the rain came from the sea, the surf from the cloud; phantoms of the wind bent down; meteoric faces revealed themselves, and were again eclipsed, leaving the darkness more monstrous: then there was nothing seen but the torrents coming from all sides—a boiling sea; cumuli heavy with hail, ashen-hued, ragged-edged, appeared seized with a sort of whirling frenzy; strange rattlings filled the air; the inverse currents of electricity observed by Volta darted their sudden flashes from cloud to cloud. The prolongation of the lightnings was terrible; the flashes passed near to Gilliatt. The very ocean seemed astonished. He passed to and fro upon the tottering wreck, making the deck

tremble under his steps, striking, cutting, hacking with the hatchet in his hand, pallid in the gleam of the lightning, his long hair streaming, his feet naked, in rags, his face covered with the foam of the sea, but grand still amid that maelstrom of the thunderstorm.

Against these furious powers man has no weapon but his invention. Invention was Gilliatt's triumph. His object was to allow all the dislocated portions of the wreck to fall together. For this reason he cut away the broken portions without entirely separating them, leaving some parts on which they still swung. Suddenly he stopped, holding his axe in the air. The operation was complete. The entire portion went with a crash.

The mass rolled down between the two Douvres, just below Gilliatt, who stood upon the wreck, leaning over and observing the fall. It fell perpendicularly into the water, struck the rocks, and stopped in the defile before touching the bottom. Enough remained out of the water to rise more than twelve feet above

the waves. The vertical mass of planking formed a wall between the two Douvres ; like the rock overturned crosswise higher up the defile, it allowed only a slight stream of foam to pass through at its two extremities, and thus was a fifth barricade improvised by Gilliatt against the tempest in that passage of the seas.

The hurricane itself, in its blind fury, had assisted in the construction of this last barrier.

It was fortunate that the proximity of the two walls had prevented the mass of wreck from falling to the bottom. This circumstance gave the barricade greater height ; the water, besides, could flow under the obstacle, which diminished the power of the waves. That which passes below cannot pass over. This is partly the secret of the floating breakwater.

Henceforth, let the storm do what it might, there was nothing to fear for the sloop or the machinery. The water around them could not become agitated again. Between the barrier of the Douvres which covered them on the west,

and the barricade which protected them from the east, no heavy sea or wind could reach them.

Gilliatt had plucked safety out of the catastrophe itself. The storm had been his fellow-labourer in the work.

This done, he took a little water in the palau of his hand from one of the rain-pools, and drank ; and then, looking upward at the storm, said with a smile, ‘ Bungler ! ’

Human intelligence combating with brute force experiences an ironical joy in demonstrating the stupidity of its antagonist, and compelling it to serve the very objects of its fury, and Gilliatt felt something of that immemorial desire to insult his invisible enemy, which is as old as the heroes of the Iliad.

He descended to the sloop and examined it by the gleam of the lightning. The relief which he had been able to give to his distressed bark was well-timed. She had been much shaken during the last hour, and had begun to give way. A hasty glance revealed no serious injury.

Nevertheless, he was certain that the vessel had been subjected to violent shocks. As soon as the waves had subsided, the hull had righted itself; the anchors had held fast; as to the machine, the four chains had supported it admirably.

While Gilliatt was completing this survey, something white passed before his eyes and vanished in the gloom. It was a sea-mew.

No sight could be more welcome in tempestuous weather. When the birds re-appear, the storm is departing. The thunder redoubled; another good sign.

The violent efforts of the storm had broken its force. All mariners know that the last ordeal is severe, but short. The excessive violence of the thunderstorm is the herald of the end.

The rain stopped suddenly. Then there was only a surly rumbling in the heavens. The storm ceased with the suddenness of a plank falling to the ground. The immense mass of clouds became disorganized. A strip of clear

sky appeared between them. Gilliatt was astonished: it was broad daylight.

The tempest had lasted nearly twenty hours.

The wind which had brought the storm carried it away. A dark pile was diffused over the horizon, the broken clouds were flying in confusion across the sky. From one end to the other of the line there was a movement of retreat: a long muttering was heard, gradually decreasing, a few last drops of rain fell, and all those dark masses charged with thunder, departed like a terrible multitude of chariots.

Suddenly the wide expanse of sky became blue.

Gilliatt perceived that he was wearied. Sleep swoops down upon the exhausted frame like a bird upon its prey. He drooped, and sank upon the deck of the bark without choosing his position, and there slept. Stretched at length and inert, he remained thus for some hours, scarcely distinguishable from the beams and joists among which he lay.

BOOK IV.

PIT-FALLS IN THE WAY.

I.

HE WHO IS HUNGRY IS NOT ALONE.

WHEN he awakened he was hungry. The sea was growing calmer. But there was still a heavy swell, which made his departure, for the present at least, impossible. The day, too, was far advanced. For the sloop with its burden to get to Guernsey before midnight, it was necessary to start in the morning.

Although pressed by hunger, Gilliatt began

by stripping himself, the only means of getting warmth. His clothing was saturated by the storm, but the rain had washed out the seawater, which rendered it possible to dry them.

He kept nothing on but his trousers, which he turned up nearly to the knees.

His overcoat, jacket, over-alls, and sheepskin he spread out and fixed with large round stones here and there.

Then he thought of eating.

He had recourse to his knife, which he was careful to sharpen, and to keep always in good condition; and he detached from the rocks a few limpets, similar in kind to the *clonisses* of the Mediterranean. It is well known that these are eaten raw: but after so many labours, so various and so rude, the pittance was meagre. His biscuit was gone; but of water he had now abundance.

He took advantage of the receding tide to wander among the rocks in search of crayfish. There was extent enough of rock to hope for a successful search.

But he had not reflected that he could do nothing with these without fire to cook them. If he had taken the trouble to go to his store-cavern, he would have found it inundated with the rain. His wood and coal were drowned, and of his store of tow, which served him for tinder, there was not a fibre which was not saturated. No means remained of lighting a fire.

For the rest, his blower was completely disorganized. The screen of the hearth of his forge was broken down; the storm had sacked and devastated his workshop. With what tools and apparatus had escaped the general wreck, he could still have done carpentry work; but he could not have accomplished any of the labours of the smith. Gilliatt, however, never thought of his workshop for a moment.

Drawn in another direction by the pangs of hunger, he had pursued without much reflection his search for food. He wandered, not in the gorge of the rocks, but outside among the smaller breakers. It was there that the Durande,

ten weeks previously, had first struck upon the sunken reef.

For the search that Gilliatt was prosecuting, this part was more favourable than the interior. At low water the crabs are accustomed to crawl out into the air. They seem to like to warm themselves in the sun, where they swarm sometimes to the disgust of loiterers, who recognize in these creatures, with their awkward sidelong gait, climbing clumsily from crack to crack the lower stages of the rocks like the steps of a staircase, a sort of sea vermin.

For two months Gilliatt had lived upon these vermin of the sea.

On this day, however, the crayfish and crabs were both wanting. The tempest had driven them into their solitary retreats; and they had not yet mustered courage to venture abroad. Gilliatt held his open knife in his hand, and from time to time scraped a cockle from under the bunches of seaweed, which he ate while still walking.

He could not have been far from the very spot where Sieur Clubin had perished

As Gilliatt was determining to content himself with the sea-urchins and the *châtaignes de mer*, a little clattering noise at his feet aroused his attention. A large crab, startled by his approach, had just dropped into a pool. The water was shallow, and he did not lose sight of it.

He chased the crab along the base of the rock; the crab moved fast.

Suddenly it was gone.

It had buried itself in some crevice under the rock.

Gilliatt clutched the projections of the rock, and stretched out to observe where it shelved away under the water.

As he suspected, there was an opening there in which the creature had evidently taken refuge. It was more than a crevice; it was a kind of porch.

The sea entered beneath it, but was not deep. The bottom was visible, covered with large

pebbles. The pebbles were green and clothed with *confervæ*, indicating that they were never dry. They were like the tops of a number of heads of infants, covered with a kind of green hair.

Holding his knife between his teeth, Gilliatt descended, by the help of feet and hands, from the upper part of the escarpment, and leaped into the water. It reached almost to his shoulders.

He made his way through the porch, and found himself in a blind passage, with a roof in the form of a rude arch over his head. The walls were polished and slippery. The crab was nowhere visible. He gained his feet and advanced in daylight growing fainter, so that he began to lose the power to distinguish objects.

At about fifteen paces, the vaulted roof ended overhead. He had penetrated beyond the blind passage. There was here more space, and consequently more daylight. The pupils of his eyes, moreover, had dilated; he could

see pretty clearly. He was taken by surprise.

He had made his way again into the singular cavern which he had visited in the previous month. The only difference was that he had entered by the way of the sea.

It was through the submarine arch that he had remarked before, that he had just entered. At certain low tides it was accessible.

His eyes became more accustomed to the place. His vision became clearer and clearer. He was astonished. He found himself again in that extraordinary palace of shadows; saw again before his eyes that vaulted roof, those columns, those purple and blood-like stains, that vegetation rich with gems, and at the farther end, that crypt or sanctuary, and that altar-like stone. He took little notice of these details, but their impression was in his mind, and he saw that the place was unchanged.

He observed before him, at a certain height in the wall, the crevice through which he had penetrated the first time, and which, from the

point where he now stood, appeared inaccessible.

Near the moulded arch, he remarked those low dark grottoes, a sort of caves within the cavern, which he had already observed from a distance. He now stood nearer to them. The entrance to the nearest to him was out of the water, and easily approachable. Nearer still than this recess he noticed, above the level of the water, and within reach of his hand, a horizontal fissure. It seemed to him probable that the crab had taken refuge there, and he plunged his hand in as far as he was able, and groped about in that dusky aperture.

Suddenly he felt himself seized by the arm. A strange indescribable horror thrilled through him.

Some living thing, thin, rough, flat, cold, slimy, had twisted itself round his naked arm, in the dark depth below. It crept upward towards his chest. Its pressure was like a tightening cord, its steady persistence like that of a screw. In less than a moment some

mysterious spiral form had passed round his wrist and elbow, and had reached his shoulder. A sharp point penetrated beneath the armpit.

Gilliatt recoiled ; but he had scarcely power to move. He was, as it were, nailed to the place. With his left hand, which was disengaged, he seized his knife, which he still held between his teeth, and with that hand, holding the knife, he supported himself against the rocks, while he made a desperate effort to withdraw his arm. He succeeded only in disturbing his persecutor, which wound itself still tighter. It was supple as leather, strong as steel, cold as night.

A second form, sharp, elongated, and narrow, issued out of the crevice, like a tongue out of monstrous jaws. It seemed to lick his naked body. Then suddenly stretching out, it became longer and thinner, as it crept over his skin, and wound itself round him. At the same time a terrible sense of pain, comparable to nothing he had ever known, com-

pelled all his muscles to contract. He felt upon his skin a number of flat rounded points. It seemed as if innumerable suckers had fastened to his flesh and were about to drink his blood.

A third long undulating shape issued from the hole in the rock; seemed to feel its way about his body; lashed round his ribs like a cord, and fixed itself there.

Agony when at its height is mute. Gilliatt uttered no cry. There was sufficient light for him to see the repulsive forms which had entangled themselves about him. A fourth ligature, but this one swift as an arrow, darted towards his stomach and wound around him there.

It was impossible to sever or tear away the slimy bands which were twisted tightly round his body, and were adhering by a number of points. Each of the points was the focus of frightful and singular pangs. It was as if numberless small mouths were devouring him at the same time.

A fifth long, slimy, riband-shaped strip issued from the hole. It passed over the others, and wound itself tightly around his chest. The compression increased his sufferings. He could scarcely breathe.

These living thongs were pointed at their extremities, but broadened like the blade of a sword towards its hilt. All belonged evidently to the same centre. They crept and glided about him; he felt the strange points of pressure, which seemed to him like mouths, change their places from time to time.

Suddenly a large, round, flattened, glutinous mass issued from beneath the crevice. It was the centre; the five thongs were attached to it like spokes to the nave of a wheel. On the opposite side of this disgusting monster appeared the commencement of three other tentacles, the ends of which remained under the rock. In the middle of this slimy mass appeared two eyes.

The eyes were fixed on Gilliatt.

He recognised the Devil Fish.

II.

THE MONSTER.

IT is difficult for those who have not seen it to believe in the existence of the 'devil-fish.

Compared to this creature, the ancient hydras are insignificant.

At times we are tempted to imagine that the vague forms which float in our dreams may encounter in the realm of the Possible attractive forces, having power to fix their lineaments, and shape living beings, out of these creatures of our slumbers. The Unknown has

power over these strange visions, and out of them composes monsters. Orpheus, Homer, and Hesiod imagined only the Chimera: Providence has created this terrible creature of the sea.

Creation abounds in monstrous forms of life. The wherefore of this perplexes and affrights the religious thinker.

If terror were the object of its creation, nothing could be imagined more perfect than the devil-fish.

The whale has enormous bulk, the devil-fish is comparatively small; the jararaca makes a hissing noise, the devil-fish is mute; the rhinoceros has a horn, the devil-fish has none; the scorpion has a dart, the devil-fish has no dart; the shark has sharp fins, the devil-fish has no fins; the vesperilio-bat has wings with claws, the devil-fish has no wings; the porcupine has his spines, the devil-fish has no spines; the sword-fish has his sword, the devil-fish has none; the torpedo has its electric spark, the devil-fish has none;

the toad has its poison, the devil-fish has none ; the viper has its venom, the devil-fish has no venom ; the lion has its talons, the devil-fish has no talons ; the griffon has its beak, the devil-fish has no beak ; the crocodile has its jaws, the devil-fish has no teeth.

The devil-fish has no muscular organization, no menacing cry, no breastplate, no horn, no dart, no claw, no tail with which to hold or bruise ; no cutting fins, or wings with nails, no prickles, no sword, no electric discharge, no poison, no talons, no beak, no teeth. Yet he is of all creatures the most formidably armed.

What, then, is the devil-fish ? It is the sea vampire.

The swimmer who, attracted by the beauty of the spot, ventures among breakers in the open sea, where the still waters hide the splendours of the deep, or in the hollows of unfrequented rocks, in unknown caverns abounding in sea plants, testacea, and crustacea, under the deep portals of the ocean, runs the risk of meeting it. If that fate should

be yours, be not curious, but fly. The intruder enters there dazzled; but quits the spot in terror.

This frightful apparition, which is always possible among the rocks in the open sea, is a greyish form which undulates in the water. It is of the thickness of a man's arm, and in length nearly five feet. Its outline is ragged. Its form resembles an umbrella closed, and without handle. This irregular mass advances slowly towards you. Suddenly it opens, and eight radii issue abruptly from around a face with two eyes. These radii are alive: their undulation is like lambent flames; they resemble, when opened, the spokes of a wheel, of four or five feet in diameter. A terrible expansion! It springs upon its prey.

The devil-fish harpoons its victim.

It winds around the sufferer, covering and entangling him in its long folds. Underneath it is yellow; above, of a dull, earthy hue: nothing could render that inexplicable shade dust coloured. Its form is spider-like, but its tints

are like those of the chamelion. When irritated, it becomes violet. Its most horrible characteristic is its softness.

Its folds strangle, its contact paralyses.

It has an aspect like gangrened or scabrous flesh. It is a monstrous embodiment of disease.

It adheres closely to its prey, and cannot be torn away; a fact which is due to its power of exhausting air. The eight antennæ, large at their roots, diminish gradually and end in needle-like points. Underneath each of these feelers range two rows of pustules, decreasing in size, the largest ones near the head, the smaller at the extremities. Each row contains twenty-five of these. There are, therefore, fifty pustules to each feeler, and the creature possesses in the whole four hundred. These pustules are capable of acting like cupping-glasses. They are cartilaginous substances, cylindrical, horny, and livid. Upon the large species they diminish gradually from the diameter of a five-franc piece to the size of a split pea. These small tubes can be thrust out and

withdrawn by the animal at will. They are capable of piercing to a depth of more than an inch

This sucking apparatus has all the regularity and delicacy of a key-board. It stands forth at one moment and disappears the next. The most perfect sensitiveness cannot equal the contractibility of these suckers; always proportioned to the internal movement of the animal, and its exterior circumstances. The monster is endowed with the qualities of the sensitive plant.

This animal is the same as those which mariners call Poulps; which science designates Cephalopteræ, and which ancient legends call Krakens. It is the English sailors who call them 'Devil-fish,' and sometimes Bloodsuckers. In the Channel Islands they are called *pieuvres*.

They are rare at Guernsey, very small at Jersey; but near the island of Sark are numerous as well as very large.

An engraving in Sonnini's edition of Buffon represents a Cephaloptera crushing a frigate.

Denis Montfort, in fact, considers the Poulp, or Octopod, of high latitudes, strong enough to destroy a ship. Bory Saint Vincent doubts this; but he shows that in our regions they will attack men. Near Brecq-Hou, in Sark, they show a cave where a devil-fish a few years since seized and drowned a lobster-fisher. Peron and Lamarck are in error in their belief that the 'poulp' having no fins cannot swim. He who writes these lines has seen with his own eyes, at Sark, in the cavern called the Boutiques, a pieuvre swimming and pursuing a bather. When captured and killed, this specimen was found to be four English feet broad, and it was possible to count its four hundred suckers. The monster thrust them out convulsively in the agony of death.

According to Denis Montfort, one of those observers whose marvellous intuition sinks or raises them to the level of magicians, the poulp is almost endowed with the passions of man: it has its hatreds. In fact, in the Absolute to be hideous is to hate.

Hideousness struggles under the natural law of elimination, which necessarily renders it hostile.

When swimming, the devil-fish rests, so to speak, in its sheath. It swims with all its parts drawn close. It may be likened to a sleeve sewn up with a closed fist within. The protuberance, which is the head, pushes the water aside and advances with a vague undulatory movement. Its two eyes, though large, are indistinct, being of the colour of the water.

When in ambush, or seeking its prey, it retires into itself, grows smaller and condenses itself. It is then scarcely distinguishable in the submarine twilight.

At such times, it looks like a mere ripple in the water. It resembles anything except a living creature.

The devil-fish is crafty. When its victim is unsuspecting, it opens suddenly.

A glutinous mass, endowed with a malignant will, what can be more horrible?

It is in the most beautiful azure depths of

the limpid water that this hideous, voracious polyp delights. It always conceals itself, a fact which increases its terrible associations. When they are seen, it is almost invariably after they have been captured.

At night, however, and particularly in the hot season, it becomes phosphorescent. These horrible creatures have their passions; their submarine nuptials. Then it adorns itself, burns and illumines; and from the height of some rock, it may be seen in the deep obscurity of the waves below, expanding with a pale irradiation—a spectral sun.

The devil-fish not only swims, it walks. It is partly fish, partly reptile. It crawls upon the bed of the sea. At these times, it makes use of its eight feelers, and creeps along in the fashion of a species of swift-moving caterpillar.

It has no blood, no bones, no flesh. It is soft and flabby; a skin with nothing inside. Its eight tentacles may be turned inside out like the fingers of a glove.

It has a single orifice in the centre of its

radii, which appears at first to be neither the vent nor the mouth. It is, in fact, both one and the other. The orifice performs a double function. The entire creature is cold.

The jelly-fish of the Mediterranean is repulsive. Contact with that animated gelatinous substance which envelopes the bather, in which the hands sink, and the nails scratch ineffectively; which can be torn without killing it, and which can be plucked off without entirely removing it — that fluid and yet tenacious creature which slips through the fingers, is disgusting; but no horror can equal the sudden apparition of the devil-fish, that Medusa with its eight serpents.

No grasp is like the sudden strain of the cephaloptera.

It is with the sucking apparatus that it attacks. The victim is oppressed by a vacuum drawing at numberless points: it is not a clawing or a biting, but an indescribable scarification. A tearing of the flesh is terrible, but less terrible than a sucking of the blood.

Claws are harmless compared with the horrible action of these natural air-cups. The talons of the wild beast enter into your flesh; but with the cephaloptera it is you who enter into the creature. The muscles swell, the fibres of the body are contorted, the skin cracks under the loathsome oppression, the blood spurts out and mingles horribly with the lymph of the monster, which clings to its victim by innumerable hideous mouths. The hydra incorporates itself with the man; the man becomes one with the hydra. The spectre lies upon you: the tiger can only devour you; the devil-fish, horrible, sucks your life-blood away. He draws you to him, and into himself; while bound down, glued to the ground, powerless, you feel yourself gradually emptied into this horrible pouch, which is the monster itself.

These strange animals, Science, in accordance with its habit of excessive caution even in the face of facts, at first rejects as fabulous; then she decides to observe them; then she dissects, classifies, catalogues, and labels; then procures

specimens. and exhibits them in glass cases in museums. * They enter then into her nomenclature; are designated mollusks, invertebrata, radiata: she determines their position in the animal world—a little above the calamaries, a little below the cuttle-fish; she finds for these hydras of the sea an analogous creature in fresh-water called the argyronecte: she divides them into great, medium, and small kinds; she admits more readily the existence of the small than of the large species, which is, however, the tendency of science in all countries, for she is by nature more microscopic than telescopic. She regards them from the point of view of their construction, and calls them Cephaloptera; counts their antennæ, and calls them Octopedes. This done, she leaves them Where science drops them, philosophy takes them up.

Philosophy in her turn studies these creatures. She goes both less far, and farther. She does not dissect, but meditate. Where the scalpel has laboured, she plunges the hypo-

thesis. She seeks the final cause. Eternal perplexity of the thinker. These creatures disturb his ideas of the Creator. They are hideous surprises. They are the death's-head at the feast of contemplation. The philosopher determines their characteristics in dread. They are the concrete forms of evil. What attitude can he take towards this treason of creation against herself? To whom can he look for the solution of these riddles? The Possible is a terrible matrix. Monsters are mysteries in their concrete form. Portions of shade issue from the mass, and something within detaches itself, rolls, floats, condenses, borrows elements from the ambient darkness, becomes subject to unknown polarizations, assumes a kind of life, furnishes itself with some unimagined form from the obscurity, and with some terrible spirit from the miasma, and wanders ghostlike among living things. It is as if night itself assumed the forms of animals. But for what good? with what object? Thus we come again to the eternal questioning.

These animals are indeed phantoms as much as monsters. They are proved and yet improbable. Their fate is to exist in spite of *à priori* reasonings. They are the amphibia of the shore which separates life from death. Their unreality makes their existence puzzling. They touch the frontier of man's domain and people the region of chimeras. We deny the possibility of the vampire, and the cephaloptera appears. Their swarming is a certainty which disconcerts our confidence. Optimism, which is nevertheless in the right, becomes silenced in their presence. They form the visible extremity of the dark circles. They mark the transition of our reality into another. They seem to belong to that commencement of terrible life which the dreamer sees confusedly through the loophole of the night.

That multiplication of monsters, first in the Invisible, then in the Possible, has been suspected, perhaps perceived by magi and philosophers in their austere ecstasies and profound contemplations. Hence the conjecture of a

material hell. The demon is simply the invisible tiger. The wild beast which devours souls has been presented to the eyes of human beings by St. John, and by Dante in his vision of Hell.

If, in truth, the invisible circles of creation continue indefinitely, if after one there is yet another, and so forth in illimitable progression; if that chain, which for our part we are resolved to doubt, really exist, the cephaloptera at one extremity proves Satan at the other. It is certain that the wrong-doer at one end proves the existence of wrong at the other.

Every malignant creature, like every perverted intelligence, is a sphinx. A terrible sphinx propounding a terrible riddle; the riddle of the existence of Evil.

It is this perfection of evil which has sometimes sufficed to incline powerful intellects to a faith in the duality of the Deity, towards that terrible bifrons of the Manichæans.

A piece of silk stolen during the last war from the palace of the Emperor of China represents a shark eating a crocodile, who is

eating a serpent, who is devouring an eagle, who is preying on a swallow, who in his turn is eating a caterpillar.

All nature which is under our observation is thus alternately devouring and devoured. The prey prey on each other.

Learned men, however, who are also philosophers, and therefore optimists in their view of creation, find, or believe they find, an explanation. Among others, Bonnet of Geneva, that mysterious exact thinker, who was opposed to Buffon, as in later times Geoffroy St. Hilaire has been to Cuvier, was struck with the idea of the final object. His notions may be summed up thus : universal death necessitates universal sepulture ; the devourers are the sextons of the system of nature. All created things enter into and form the elements of other. To decay is to nourish. Such is the terrible law from which not even man himself escapes.

In our world of twilight this fatal order of things produces monsters. You ask for what purpose. We find the solution here.

But *is* this the solution? Is this the answer to our questionings? And if so, why not some different order of things? Thus the question returns.

Let us live: be it so.

But let us endeavour that death shall be progress. Let us aspire to an existence in which these mysteries shall be made clear. Let us follow that conscience which leads us thither.

For let us never forget that the highest is only attained through the high.

III.

ANOTHER KIND OF SEA-COMBAT.

SUCH was the creature in whose power Gilliatt had fallen for some minutes.

The monster was the inhabitant of the grotto; the terrible genie of the place. A kind of sombre demon of the water.

All the splendours of the cavern existed for it alone.

On the day of the previous month when Gilliatt had first penetrated into the grotto, the dark outline, vaguely perceived by him

in the ripples of the secret waters, was this monster. It was here in its home.

When entering for the second time into the cavern in pursuit of the crab, he had observed the crevice in which he supposed that the crab had taken refuge, the pieuvre was there lying in wait for prey.

Is it possible to imagine that secret ambush?

No bird would brood, no egg would burst to life, no flower would dare to open, no breast to give milk, no heart to love, no spirit to soar, under the influence of that apparition of evil watching with sinister patience in the dusk.

Gilliatt had thrust his arm deep into the opening; the monster had snapped at it. It held him fast, as the spider holds the fly.

He was in the water up to his belt; his naked feet clutching the slippery roundness of the huge stones at the bottom; his right arm bound and rendered powerless by the flat coils of the long tentacles of the creature, and his body almost hidden under the folds and cross folds of this horrible bandage.

Of the eight arms of the devil-fish three adhered to the rock, while five encircled Gilliatt. In this way, clinging to the granite on the one hand, and with the other to its human prey, it enchained him to the rock. Two hundred and fifty suckers were upon him, tormenting him with agony and loathing. He was grasped by gigantic hands, the fingers of which were each nearly a yard long, and furnished inside with living blisters eating into the flesh.

As we have said, it is impossible to tear oneself from the folds of the devil-fish. The attempt ends only in a firmer grasp. The monster clings with more determined force. Its effort increases with that of his victim; every struggle produces a tightening of its ligatures.

Gilliatt had but one resource, his knife.

His left hand only was free; but the reader knows with what power he could use it. It might have been said that he had two right hands.

His open knife was in this hand.

The antenna of the devil-fish cannot be cut;

it is a leathery substance impossible to divide with the knife, it slips under the edge; its position in attack also is such that to cut, it would be to wound the victim's own flesh.

The creature is formidable, but there is a way of resisting it. The fishermen of Sark know this, as does anyone who has seen them execute certain abrupt movements in the sea. The porpoises know it also; they have a way of biting the cuttle-fish which decapitates it. Hence the frequent sight on the sea of pen-fish, poulps, and cuttle-fish without heads.

The cephaloptera, in fact, is only vulnerable through the head.

Gilliatt was not ignorant of this fact.

He had never seen a devil-fish of this size. His first encounter was with one of the larger species. Another would have been powerless with terror.

With the devil-fish, as with a furious bull, there is a certain moment in the conflict which must be seized. It is the instant when the bull lowers the neck; it is the instant when

the devil-fish advances its head. The movement is rapid. He who loses that moment is destroyed.

The things we have described occupied only a few moments. Gilliatt, however, felt the increasing power of its innumerable suckers.

The monster is cunning; it tries first to stupify its prey. It seizes and then pauses awhile.

Gilliatt grasped his knife; the sucking increased.

He looked at the monster, which seemed to look at him.

Suddenly it loosened from the rock its sixth antenna, and darting it at him, seized him by the left arm.

At the same moment it advanced its head with a violent movement. In one second more its mouth would have fastened on his breast. Bleeding in the sides, and with his two arms entangled, he would have been a dead man.

But Gilliatt was watchful. He avoided the antenna, and at the moment when the monster

darted forward to fasten on his breast, he struck it with the knife clenched in his left hand. There were two convulsions in opposite directions: that of the devil-fish and that of its prey. The movement was rapid as a double flash of lightnings.

He had plunged the blade of his knife into the flat slimy substance, and by a rapid movement, like the flourish of a whip in the air, describing a circle round the two eyes, he wrenched the head off as a man would draw a tooth.

The struggle was ended. The folds relaxed. The monster dropped away, like the slow detaching of bands. The four hundred suckers, deprived of their sustaining power, dropped at once from the man and the rock. The mass sank to the bottom of the water.

Breathless with the struggle, Gilliatt could perceive upon the stones at his feet two shapeless, slimy heaps, the head on one side, the remainder of the monster on the other.

Fearing, nevertheless, some convulsive return of his agony, he recoiled to avoid the reach of the dreaded tentacles.

But the monster was quite dead.

Gilliatt closed his knife.

IV.

NOTHING IS HIDDEN ; NOTHING LOST.

IT was time that he killed the devil-fish. He was almost suffocated. His right arm and his chest were purple. Numberless little swellings were distinguishable upon them ; the blood flowed from them here and there. The remedy for these wounds is sea-water. Gilliatt plunged into it ; rubbing himself at the same time with the palms of his hands. The swellings disappeared under the friction.

By stepping farther into the waters he had,

without perceiving it, approached to the species of recess already observed by him near the crevice where he had been attacked by the devil-fish.

This recess stretched obliquely under the great walls of the cavern, and was dry. The large pebbles which had become heaped up there had raised the bottom above the level of ordinary tides. The entrance was a rather large elliptical arch; a man could enter by stooping. The green light of the submarine grotto penetrated into it and lighted it feebly.

It happened that, while hastily rubbing his skin, Gilliatt raised his eyes mechanically.

He was able to see far into the cavern.

He shuddered.

He fancied that he perceived, in the furthest depth of the dusky recess, something smiling.

Gilliatt had never heard the word 'hallucination,' but he was familiar with the idea. Those mysterious encounters with the invisible, which, for the sake of avoiding the difficulty of explaining them, we call hallucinations, are in

nature. Illusions or realities, visions are a fact. He who has the gift will see them. Gilliatt, as we have said, was a dreamer. He had, at times, the faculty of a seer. It was not in vain that he had spent his days in musing among solitary places.

He imagined himself the dupe of one of those mirages which he had more than once beheld when in his dreamy moods.

The opening was somewhat in the shape of a chalk-burner's oven. It was a low niche with projections like basket-handles. Its abrupt groins contracted gradually as far as the extremity of the crypt, where the heaps of round stones and the rocky roof joined.

Gilliatt entered, and lowering his head, advanced towards the object in the distance.

There was indeed something smiling.

It was a death's head; but it was not only the head. There was the entire skeleton. A complete human skeleton was lying in the cavern.

In such a position, a bold man will continue his researches.

Gilliatt cast his eyes around. He was surrounded by a multitude of crabs. The multitude did not stir. They were but empty shells.

These groups were scattered here and there among the masses of pebbles, in irregular constellations.

Gilliatt, having his eyes fixed elsewhere, had walked among them without perceiving them.

At the extremity of the crypt, where he had now penetrated, there was a still greater heap of remains. It was a confused mass of legs, antennæ, and mandibles. Claws stood wide open; bony shells lay still under their bristling prickles; some reversed showed their livid hollows. The heap was like a *mêlée* of besiegers who had fallen, and lay massed together.

The skeleton was partly buried in this heap. Under this confused mass of scales and ten-

tacles, the eye perceived the cranium with its furrows, the vertebræ, the thigh bones, the tibias, and the long-jointed finger bones with their nails. The frame of the ribs was filled with crabs. Some heart had once beat there. The green mould of the sea had settled round the sockets of the eyes. Limpets had left their slime upon the bony nostrils. For the rest, there were not in this cave within the rocks either sea-gulls, or weeds, or a breath of air. All was still. The teeth grinned.

The sombre side of laughter is that strange mockery of its expression which is peculiar to a human skull.

This marvellous palace of the deep, inlaid and incrustated with all the gems of the sea, had at length revealed and told its secret. It was a savage haunt; the devil-fish inhabited it; it was also a tomb, in which the body of a man reposed.

The skeleton and the creatures around it oscillated vaguely in the reflections of the subterranean water which trembled upon the roof

and wall. The*horrible multitude of crabs looked as if finishing their repast. These crustacea seemed to be devouring the carcass. Nothing could be more strange than the aspect of the dead vermin upon their dead prey.

Gilliatt had beneath his eyes the storehouse of the devil-fish.

It was a dismal sight. The crabs had devoured the man : the devil-fish had devoured the crabs.

There were no remains of clothing anywhere visible. The man must have been seized naked.

Gilliatt, attentively examining, began to remove the shells from the skeleton. What had this man been ? The body was admirably dissected ; it looked as if prepared for the study of its anatomy ; all the flesh was stripped ; not a muscle remained ; not a bone was missing. If Gilliatt had been learned in science, he might have demonstrated the fact. The periosteal, denuded of their covering, were white and smooth, as if they had been polished. But for

some green mould of sea-mosses here and there, they would have been like ivory. The cartilaginous divisions were delicately inlaid and arranged. The tomb sometimes produces this dismal mosaic work.

The body was, as it were, interred under the heap of dead crabs. Gilliatt disinterred it.

Suddenly he stooped, and examined more closely.

He had perceived around the vertebral column a sort of belt.

It was a leathern girdle, which had evidently been worn buckled upon the waist of the man when alive.

The leather was moist; the buckle rusty.

Gilliatt pulled the girdle; the vertebræ of the skeleton resisted, and he was compelled to break through them in order to remove it. A crust of small shells had begun to form upon it.

He felt it, and found a hard substance within, apparently of square form. It was useless to endeavour to unfasten the buckle, so he cut the leather with his knife.

The girdle contained a little iron box and some pieces of gold. Gilliatt counted twenty guineas.

The iron box was an old sailor's tobacco-box, opening and shutting with a spring. It was very tight and rusty. The spring being completely oxidized, would not work.

Once more the knife served Gilliatt in a difficulty. A pressure with the point of the blade caused the lid to fly up.

The box was open.

There was nothing inside but pieces of paper.

A little roll of very thin sheets, folded in four, was fitted in the bottom of the box. They were damp, but not injured. The box, hermetically sealed, had preserved them. Gilliatt unfolded them.

They were three bank-notes of one thousand pounds sterling each ; making together seventy-five thousand francs.

Gilliatt folded them again, replaced them in the box, taking advantage of the space which

remained to add the twenty guineas; and then reclosed the box as well as he could.

Next he examined the girdle.

The leather, which had originally been polished outside, was rough within. Upon this tawny ground some letters had been traced in black thick ink. He deciphered them, and read the words 'Sieur Clubin.'

V.

THE FATAL DIFFERENCE BETWEEN SIX INCHES
AND TWO FEET.

GILLIATT replaced the box in the girdle, and placed the girdle in the pocket of his trousers.

He left the skeleton among the crabs, with the remains of the devil-fish beside it.

While he had been occupied with the devil-fish and the skeleton, the rising tide had submerged the entrance to the cave. He was only enabled to leave it by plunging under the

arched entrance. He got through without difficulty; for he knew the entrance well, and was master of these gymnastics in the sea.

It is easy to understand the drama which had taken place there during the ten weeks preceding. One monster had preyed upon another; the devil-fish had seized Clubin.

These two embodiments of treachery had met in the inexorable darkness. There had been an encounter at the bottom of the sea between these two compounds of mystery and watchfulness; the monster had destroyed the man: a horrible fulfilment of justice.

The crab feeds on carrion, the devil-fish on crabs. The devil-fish seizes as it passes any swimming animal—an otter, a dog, a man if it can—sucks the blood, and leaves the body at the bottom of the water. The crabs are the spider-formed scavengers of the sea. Putrifying flesh attracts them; they crowd round it, devour the body, and are in their turn consumed by the devil-fish. Dead creatures disappear in the crab, the crab disappears in the

pieuvre. This is the law which we have already pointed out.

The devil-fish had laid hold of him, and drowned him. Some wave had carried his body into the cave, and deposited it at the extremity of the inner cavern, where Gilliatt had discovered it.

He returned searching among the rocks for sea-urchins and limpets. He had no desire for crabs; to have eaten them now would have seemed to him like feeding upon human flesh.

For the rest, he thought of nothing but of eating what he could before starting. Nothing now interposed to prevent his departure. Great tempests are always followed by a calm, which lasts sometimes several days. There was, therefore, no danger from the sea. Gilliatt had resolved to leave the rocks on the following day. It was important, on account of the tide, to keep the barrier between the two Douvres during the night, but he intended to remove it at daybreak, to push the sloop out to sea, and set sail for St. Sampson. The light breeze

which was blowing came from the south-west, which was precisely the wind which he would want.

It was in the first quarter of the moon, in the month of May ; the days were long.

When Gilliatt, having finished his wanderings among the rocks, and appeased his appetite to some extent, returned to the passage between the two Douvres, where he had left the sloop, the sun had set, the twilight was increased by that pale light which comes from a crescent moon ; the tide had attained its height, and was beginning to ebb. The funnel standing upright above the sloop, had been covered by the foam during the tempest with a coating of salt which glittered white in the light of the moon.

This circumstance reminded Gilliatt that the storm had inundated the sloop, both with surf and rain water, and that if he meant to start in the morning, it would be necessary to bale it out.

Before leaving to go in quest of crabs, he had ascertained that it had about six inches of

water in the hold. The scoop which he used for the purpose would, he thought, be sufficient for throwing the water overboard.

On arriving at the barrier, Gilliatt was struck with terror. There were nearly two feet of water in the sloop. A terrible discovery, the bark had sprung a leak.

She had been making water gradually during his absence. Burdened as she was, two feet of water was a perilous addition. A little more, and she must inevitably founder. If he had returned but an hour latter, he would probably have found nothing above water but the funnel and the mast.

There was not a minute to be lost in deliberation. It was absolutely necessary to find the leakage, stop it, and then empty the vessel, or, at all events, lighten it. The pumps of the *Durande* had been lost in the break-up of the wreck. He was reduced to use the scoop of the bark.

To find the leak was the most urgent necessity.

Gilliatt set to work immediately, and without even giving himself time to dress. He shivered; but he no longer felt either hunger or cold.

The water continued to gain upon his vessel. Fortunately there was no wind. The slightest swell would have been fatal.

The moon went down.

Bent low, and plunged in the water deeper than his waist, he groped about for a long time. He discovered the mischief at last.

During the gale, at the critical moment when the sloop had swerved, the strong bark had bumped and grazed rather violently on the rocks. One of the projections of the Little Douvre had made a fracture in the starboard side of the hull.

The leak unluckily—it might almost have been said, maliciously—had been made near the joint of the two riders, a fact which, joined with the fury of the hurricane, had prevented him perceiving it during his dark and rapid survey in the height of the storm.

The fracture was alarming on account of its size ; but fortunately, although the vessel was sunk lower than usual by the weight of water, it was still above the ordinary water-line.

At the moment when the accident had occurred, the waves had rolled heavily into the defile, and had flooded through the breach ; and the vessel had sunk a few inches under the additional weight, so that, even after the subsidence of the water, the weight having raised the water-line, had kept the hole still under the surface. Hence the imminence of the danger. But if he could succeed in stopping the leak, he could empty the sloop ; the hole once staunched, the vessel would rise to its usual water-line, the fracture would be above water, and in this position the repair would be easy, or at least possible. He had still, as we have already said, his carpenters' tools in good condition.

But meanwhile what uncertainty must he not endure ! What perils, what chances of accidents ! He heard the water rising inexorably. One shock, and all would have

perished. What misery seemed in store for him. Perhaps his endeavours were even now too late.

He reproached himself bitterly. He thought that he ought to have seen the damage immediately. The six inches of water in the hold ought to have suggested it to him. He had been stupid enough to attribute these six inches of water to the rain and the foam. He was angry with himself for having slept and eaten; he taxed himself even with his weariness, and almost with the storm and the dark night. All seemed to him to have been his own fault.

These bitter self-reproaches filled his mind while engaged in his labour, but they did not prevent his considering well the work he was engaged in.

The leak had been found; that was the first step: to staunch it was the second. That was all that was possible for the moment. Joinery work cannot be carried on under water.

It was a favourable circumstance that the

breach in the hull was in the space between the two chains which held the funnel fast on the starboard side. The stuffing with which it was necessary to stop it could be fixed to these chains.

The water meanwhile was gaining. Its depth was now between two and three feet; and it reached above his knees.

VI.

DE PROFUNDIS AD ALTUM.

GILLIATT had to his hand among his reserve of rigging for the sloop a pretty large tarpaulin, furnished with long laniards at the four corners.

He took this tarpaulin, made fast the two corners by the laniards to the two rings of the chains of the funnel on the same side as the leak, and threw it over the gunwale. The tarpaulin hung like a sheet between the Little Douvre and the bark, and sunk in the water.

The pressure of the water endeavouring to enter into the hold, kept it close to the hull upon the gap. The heavier the pressure the closer the sail adhered. It was stuck by the water itself right upon the fracture. The wound of the bark was staunched.

The tarred canvas formed an effectual barrier between the interior of the hold and the waves without. Not a drop of water entered. The leak was masked, but was not stopped. It was a respite only.

Gilliatt took the scoop and began to bale the sloop. It was time that she were lightened. The labour warmed him a little, but his weariness was extreme. He was forced to acknowledge to himself that he could not complete the work of staunching the hold. He had scarcely eaten anything, and he had the humiliation of feeling himself exhausted.

He measured the progress of his work by the sinking of the level of water below his knees. The fall was slow.

Moreover, the leakage was only interrupted ;

the evil was moderated, not repaired. The tarpaulin pushed into the gap began to bulge inside; looking as if a fist were under the canvas, endeavouring to force it through. The canvas, strong and pitchy, resisted; but the swelling and the tension increased; it was not certain that it would not give way, and at any moment the swelling might become a rent. The irruption of water must then recommence.

In such a case, as the crews of vessels in distress know well, there is no other remedy than stuffing. The sailors take rags of every kind which they can find at hand, everything, in fact, which in their language is called 'service;' and with this they push the bulging sailcloth as far as they can into the leak.

Of this 'service' Gilliatt had none. All the rags and tow which he had stored up had been used in his operations, or carried away by the storm.

If necessary, he might possibly have been able to find some remains by searching among the rocks. The sloop was sufficiently lightened

for him to leave it with safety for a quarter of an hour ; but how could he make this search without a light ? The darkness was complete. There was no longer any moon ; nothing but the starry sky. He had no dry tow with which to make a match, no tallow to make a candle, no fire to light one, no lantern to shelter it from the wind. In the sloop and among the rocks all was confused and indistinct. He could hear the water lapping against the wounded hull, but he could not even see the crack. It was with his hands that he had ascertained the bulging of the tarpaulin. In that darkness it was impossible to make any useful search for rags of canvas or pieces of tow scattered among the breakers. Who could glean these waifs and strays without being able to see his path ? Gilliatt looked sorrowfully at the sky ; all those stars, he thought, and yet no light !

The water in the bark having diminished, the pressure from without increased. The bulging of the canvas became larger, and was

still increasing, like a frightful abscess ready to burst. The situation, which had been improved for a short time, began to be threatening.

Some means of stopping it effectually was absolutely necessary. He had nothing left but his clothes, which he had stretched to dry upon the projecting rocks of the Little Douvre.

He hastened to fetch them, and placed them upon the gunwale of the sloop.

Then he took his tarpaulin overcoat, and kneeling in the water, thrust it into the crevice, and pushing the swelling of the sail outward, emptied it of water. To the tarpaulin coat he added the sheepskin, then his Guernsey shirt, and then his jacket. The hole received them all. He had nothing left but his sailor's trousers, which he took off, and pushed in with the other articles. This enlarged and strengthened the stuffing. The stopper was made, and it appeared to be sufficient.

These clothes passed partly through the gap, the sail-cloth outside enveloping them. The sea making an effort to enter, pressed against

the obstacle, spread it over the gap, and blocked it. It was a sort of exterior compression.

Inside, the centre only of the bulging having been driven out, there remained all around the gap and the stuffing just thrust through a sort of circular pad formed by the tarpaulin, which was rendered still firmer by the irregularities of the fracture with which it had become entangled.

The leak was staunch^d, but nothing could be more precarious. Those sharp splinters of the gap which fixed the tarpaulin might pierce it and make holes, by which the water would enter; while he would not even perceive it in the darkness. There was little probability of the stoppage lasting until daylight. Gilliatt's anxiety changed its form; but he felt it increasing at the same time that he found his strength leaving him.

He had again set to work to bale out the hold, but his arms, in spite of all his efforts, could scarcely lift a scoopful of water. He

was naked and shivering. He felt as if the end were now at hand.

One possible chance flashed across his mind. There might be a sail in sight. A fishing-boat which should by any accident be in the neighbourhood of the Douvres, might come to his assistance. The moment had arrived when a helpmate was absolutely necessary. With a man and a lantern all might yet be saved. If there were two persons, one might easily bale the vessel. Since the leak was temporarily staunched, as soon as she could be relieved of this burden, she would rise, and regain her ordinary water-line. The leak would then be above the surface of the water, the repairs would be practicable, and he would be able immediately to replace the stuff by a piece of planking, and thus substitute for the temporary stoppage a complete repair. If not, it would be necessary to wait till daylight—to wait the whole night long; a delay which might prove ruinous. If by chance some ship's lantern should be in sight, Gilliatt would be able to signal it from

the height of the Great Douvre. The weather was calm, there was no wind or rolling sea; there was a possibility of the figure of a man being observed moving against the background of the starry sky. A captain of a ship, or even the master of a fishing-boat, would not be at night in the waters of the Douvres without directing his glass upon the rock, by way of precaution.

Gilliatt hoped that someone might perceive him.

He climbed upon the wreck, grasped the knotted rope, and mounted upon the Great Douvre.

Not a sail was visible around the horizon; not a boat's lantern. The wide expanse, as far as eye could reach, was a desert. No assistance was possible, and no resistance possible.

Gilliatt felt himself without resources; a feeling which he had not felt until then.

A dark fatality was now his master. With all his labour, all his success, all his courage, he and his bark, and its precious burden, were

about to become the sport of the waves. He had no other means of continuing the struggle ; he became listless. How could he prevent the tide from returning, the water from rising, the night from continuing ? The temporary stoppage which he had made was his sole reliance. He had exhausted and stripped himself in constructing and completing it ; he could neither fortify nor add to it. The stop-gap was such that it must remain as it was ; and every further effort was useless. The apparatus, hastily constructed, was at the mercy of the waves. How would this inert obstacle work ? It was this obstacle now, not Gilliatt, which had to sustain the combat, that handful of rags, not that intelligence. The swell of a wave would suffice to reopen the fracture. More or less of pressure ; the whole question was comprised in that formula.

All depended upon a brute struggle between two mechanical quantities. Henceforth he could neither aid his auxiliary, nor stop his enemy. He was no longer any other than a mere spectator of this struggle, which

was one for him of life or death. He who had ruled over it, a supreme intelligence, was at the last moment compelled to resign all to a mere blind resistance.

No trial, no terror that he had yet undergone, could bear comparison with this.

From the time when he had taken up his abode upon the Douvres, he had found himself environed, and as it were possessed by solitude. This solitude more than surrounded, it enveloped him. A thousand menaces at once had met him face to face. The wind was always there, ready to become furious; the sea, ready to roar. There was no stopping that terrible mouth the wind, no imprisoning that dread monster the sea. And yet he had striven, he, a solitary man, had combated hand to hand with the ocean, had wrestled even with the tempest.

Many other anxieties, many other necessities had he made head against. There was no form of distress with which he had not become familiar. He had been compelled to execute great works without tools, to move vast burdens

without aid, without science to resolve problems, without provisions to find food, without bed or roof to cover it, to find shelter and sleep.

Upon that solitary rock he had been subjected by turns to all the varied and cruel tortures of nature; oftentimes a gentle mother, not less often a pitiless destroyer.

He had conquered his isolation, conquered hunger, conquered thirst, conquered cold, conquered fever, conquered labour, conquered sleep. He had encountered a mighty coalition of obstacles formed to bar his progress. After his privations there were the elements; after the sea the tempest, after the tempest the devilish, after the monster the spectre.

A dismal irony was then the end of all. Upon this rock whence he had thought to arise triumphant, the spectre of Clubin had only arisen to mock him with a hideous smile.

The grin of the spectre was well founded. Gilliatt saw himself ruined; saw himself no less than Clubin in the grasp of death.

Winter, famine, fatigue, the dismemberment of the wreck, the removal of the machinery, the equinoctial gale, the thunder, the monster, were all as nothing compared with this small fracture in a vessel's planks. Against the cold one could procure—and he had procured—fire; against hunger, the shell-fish of the rocks; against thirst, the rain; against the difficulties of his great task, industry and energy; against the sea and the storm, the breakwater; against the devil-fish, the knife; but against the terrible leak he had no weapon.

The hurricane had bequeathed him this sinister farewell — the last struggle, the traitorous thrust, the treacherous side blow of the vanquished foe. In its flight the tempest had turned and shot this arrow in the rear. It was the final and deadly stab of his antagonist.

It was possible to combat with the tempest, but how could he struggle with that insidious enemy who now attacked him?

If the stoppage gave way, if the leak reopened, nothing could prevent the sloop foundering. It

would be the bursting of the ligature of the artery; and once under the water with its heavy burden, no power could raise it. The noble struggle, with two months' Titanic labour, ended then in annihilation. To recommence would be impossible. He had neither forge nor materials. At daylight, in all probability, he was about to see all his work sink slowly and irrecoverably into the gulf. Terrible, to feel that sombre power beneath. The sea snatched his prize from his hands.

With his bark engulfed, no fate awaited him but to perish of hunger and cold, like the poor shipwrecked sailor on 'The Man rock.

During two long months the intelligences which hover invisibly over the world had been the spectators of these things; on one hand the wide expanse, the waves, the winds, the lightnings, the meteors; on the other, a man. On one hand the sea, on the other a human mind; on the one hand the infinite, on the other an atom.

The battle had been fierce, and behold the abortive issue of those prodigies of valour.

Thus did this heroism without parallel end in powerlessness; thus ended in despair that formidable struggle; that struggle of a nothing against all; that Iliad against one.

Gilliatt gazed wildly into space.

He had no clothing. He stood naked in the midst of that immensity.

Then overwhelmed by the sense of that unknown infinity, like one bewildered by a strange persecution, confronting the shadows of night, in the presence of that impenetrable darkness, in the midst of the murmur of the waves, the swell, the foam, the breeze, under the clouds, under that vast diffusion of force, under that mysterious firmament of wings, of stars, of gulfs, having around him and beneath him the ocean, above him the constellations, under the great unfathomable deep, he sank, gave up the struggle, lay down upon the rock, his face towards the stars, humbled, and uplifting his joined hands towards the terrible depths, he cried aloud, 'Have mercy.'

Weighed down to earth by that immensity, he prayed.

He was there alone, in the darkness upon the rock, in the midst of that sea, stricken down with exhaustion like one smitten by lightning, naked like the gladiator in the circus, save that for circus he had the vast horizon, instead of wild beasts the shadows of darkness, instead of the faces of the crowd the eyes of the unknown, instead of the Vestals the stars, instead of Cæsar the All-powerful.

His whole being seemed to dissolve in cold, fatigue, powerlessness, prayer, and darkness, and his eyes closed.

VII.

THE APPEAL IS HEARD.

SOME hours passed.

The sun rose in an unclouded sky.

Its first ray shone upon a motionless form upon the Great Douvre. It was Gilliatt.

He was still outstretched upon the rock.

He was naked, cold, and stiff; but he did not shiver. His closed eyelids were wan. It would have been difficult for a beholder to say whether the form before him was not a corpse.

The sun seemed to look upon him.

If he were not dead, he was already so near death that the slightest cold wind would have sufficed to extinguish life.

The wind began to breathe, warm and animating: it was the opening breath of May.

Meanwhile the sun ascended in the deep blue sky; its rays, less horizontal, flushed the sky. Its light became warmth. It enveloped the slumbering form.

Gilliatt moved not. If he breathed, it was only that feeble respiration which could scarcely tarnish the surface of a mirror.

The sun continued its ascent; its rays striking less and less obliquely upon the naked man. The gentle breeze which had been merely tepid became hot.

The rigid and naked body remained still without movement: but the skin seemed less livid.

The sun, approaching the zenith, shone almost perpendicularly upon the plateau of the Douvres. A flood of light descended from the heavens; the vast reflection from the glassy

sea increased its splendour: the rock itself imbibed the rays and warmed the sleeper.

A sigh raised his breast.

He lived.

The sun continued its gentle offices. The wind, which was already the breath of summer and of noon, approached him like loving lips that breathed upon him softly.

Gilliatt moved.

The peaceful calm upon the sea was perfect. Its murmur was like the droning of the nurse beside the sleeping infant. The rock seemed cradled in the waves.

The sea-birds, who knew that form, fluttered above it; not with their old wild astonishment, but with a sort of fraternal tenderness. They uttered plaintive cries: they seemed to be calling to him. A sea-mew, who no doubt knew him, was tame enough to come near him. It began to caw as if speaking to him. The sleeper seemed not to hear. The bird hopped upon his shoulder, and pecked his lips softly.

Gilliatt opened his eyes.

The birds dispersed, chattering wildly.

Gilliatt arose, stretched himself like a roused lion, ran to the edge of the platform, and looked down into the space between the two Douvres.

The sloop was there, intact; the stoppage had held out; the sea had probably disturbed it but little.

All was saved.

He was no longer weary. His powers had returned. His swoon had ended in a deep sleep.

He descended and baled out the sloop, emptied the hold, raised the leakage above the water-line, dressed himself, eat, drank some water, and was joyful.

The gap in the side of his vessel, examined in broad daylight, proved to require more labour than he had thought. It was a serious fracture. The entire day was not too much for its repair.

At daybreak on the morrow, after removing the barrier and re-opening the entrance to the

defile, dressed in the tattered clothing which had served to stop the leak, having about him Clubin's girdle and the seventy-five thousand francs, standing erect in the sloop, now repaired, by the side of the machinery which he had rescued, with a favourable breeze and a good sea, Gilliatt pushed off from the Douvres.

He put the sloop's head for Guernsey.

At the moment of his departure from the rocks, any one who had been there might have heard him singing, in an under-tone, the air of 'Bonnie Dundee.'

THIRD PART.
DÉRUCLETTE.

BOOK I.

NIGHT AND THE MOON.

I.

THE HARBOUR CLOCK.

THE St. Sampson of the present day is almost a city; the St. Sampson of forty years since was almost a village.

When the winter evenings were ended and spring had come, the inhabitants were not long out of bed after sun-down. St. Sampson was an ancient parish which had long been accustomed to the sound of the curfew-bell, and which

had a traditional habit of blowing out the candle at an early hour. Folks there went to bed and rose with the day. Those old Norman villages are generally great rearers of poultry.

The people of St. Sampson, except a few rich families among the townfolk, are also a population of quarriers and carpenters. The port is a port of ship repairing. The quarrying of stone and the fashioning of timber go on all day long; here the labourer with the pickaxe, there the workman with the mallet. At night they sink with fatigue, and sleep like lead. Rude labours bring heavy slumbers.

One evening, in the commencement of the month of May, after watching the crescent moon for some instants through the trees, and listening to the step of Déruchette walking alone in the cool air in the garden of the Bravées, Mess Lethierry had returned to his room looking on the harbour, and had retired to rest; Douce and Grace were already a-bed. Except Déruchette, the whole household were sleeping. Doors and shutters were everywhere

closed. Footsteps were silent in the streets. Some few lights, like winking eyes about to close in rest, showed here and there in windows in the roofs, indicating the hour of domestics going to bed. Nine had already struck by the old Roman clock, surrounded by ivy, which shares with the church of St. Brélade at Jersey the peculiarity of having for its day four ones (IIII), which are used to signify eleven hundred and eleven.

The popularity of Mess Iethierry at St. Sampson had been founded on his success. The success at an end, there had come a void. It might be imagined that ill-fortune is contagious, and that the unsuccessful have a plague, so rapidly are they put in quarantine. The young men of well-to-do families avoided Déruchette. The isolation around the Bravées was so complete, that its inmates had not even yet heard the news of the great local event which had that day set all St. Sampson in a ferment. The rector of the parish, the Rev. Ebenezer Caudray, had become rich. His uncle, the

magnificent Dean of St. Asaph, had just died in London. The news had been brought by the mail sloop, the 'Cashmere,' arrived from England that very morning, and the mast of which could be perceived in the roads of St. Peter's Port. The 'Cashmere' was to depart for Southampton at noon on the morrow, and, so the rumour ran, to convey the reverend gentleman, who had been suddenly summoned to England, to be present at the official opening of the will, not to speak of other urgent matters connected with an important inheritance. All day long St. Sampson had been conversing on this subject. The 'Cashmere,' the Rev. Ebenezer, his deceased uncle, his riches, his departure, his possible preferment in the future, had formed the foundations of that perpetual buzzing. A solitary house, still uninformed on these matters, had remained at peace. This was the Bravées.

Mess Lethierry had jumped into his hammock, and lay down in his clothing.

Since the catastrophe of the *Durande*, to get

into his hammock had been his resource. Every captive has recourse to stretching himself upon his pallet, and Mess Lethierry was the captive of his grief. To go to bed was a truce, a gain in breathing time, a suspension of ideas. He neither slept, nor watched. Strictly speaking, for two months and a-half—for so long was it since his misfortune—Mess Lethierry had been in a sort of somnambulism. He had not yet regained possession of his faculties. He was in that cloudy and confused condition of intellect with which those are familiar who have undergone overwhelming afflictions. His reflections were not thought, his sleep was no repose. By day he was not awake, by night not asleep. He was up, and then gone to rest, that was all. When he was in his hammock forgetfulness came to him a little. He called that sleeping. Chimeras floated about him, and within him The nocturnal cloud, full of confused faces, traversed his brain. Sometimes it was the Emperor Napoleon dictating to him the story of his life; sometimes there were several

Déruchettes; strange birds were in the trees; the streets of Lons-le-Saulnier became serpents. Nightmares were the brief respites of despair. He passed his nights in dreaming, and his days in reverie.

Sometimes he remained all the afternoon at the window of his room, which looked out upon the port, with his head drooping, his elbows on the stone, his ears resting on his fists, his back turned to the whole world, his eye fixed on the old massive iron ring fastened in the wall of the house, at only a few feet from his window, where in the old days he used to moor the *Durande*. He was looking at the rust which gathered on the ring.

He was reduced to the mere mechanical habit of living.

The bravest men, when deprived of their most cherished idea, will come to this. His life had become a void. Life is a voyage; the idea is the itinerary. The plan of their course gone, they stop. The object is lost, the strength of purpose gone. Fate has a secret discretionary

power. It is able to touch with its rod even our moral being. Despair is almost the destitution of the soul. Only the greatest minds resist, and for what?

Mess Lethierry was always meditating, if absorption can be called meditation, in the depth of a sort of cloudy abyss. Broken words sometimes escaped him like these, 'There is nothing left for me now, but to ask yonder for leave to go.'

There was a certain contradiction in that nature, complex as the sea, of which Mess Lethierry was, so to speak, the product. Mess Lethierry's grief did not seek relief in prayer.

To be powerless is a certain strength. In the presence of our two great expressions of this blindness—destiny and nature—it is in his powerlessness that man has found his chief support in prayer.

Man seeks succour from his terror; his anxiety bids him kneel.

But Mess Lethierry prayed not.

In the time when he was happy, God existed

for him almost, in visible contact. Lethierry addressed Him, pledged his word to Him, seemed at times to hold familiar intercourse with Him. But in the hour of his misfortune, a phenomenon not unfrequent--the idea of God had become eclipsed in his mind. This happens when the mind has created for itself a deity clothed with human qualities.

In the state of mind in which he existed, there was for Lethierry only one clear vision--the smile of Déruchette. Beyond this all was dark.

For some time, apparently on account of the loss of the *Durande*, and of the blow which it had been to them, this pleasant smile had been rare. She seemed always thoughtful. Her birdlike playfulness, her childlike ways were gone. She was never seen now in the morning, at the sound of the cannon which announced daybreak, saluting the rising sun with 'Boom! Daylight! Come in, please!' At times her expression was very serious, a sad thing for that sweet nature. She made an

effort, however, sometimes to laugh before Mess Lethierry and to divert him; but her cheerfulness grew tarnished from day to day—gathered dust like the wing of a butterfly with a pin through its body. Whether through sorrow for her uncle's sorrow—for there are griefs which are the reflexions of other griefs—or whether for any other reasons, she appeared at this time to be much inclined towards religion. In the time of the old rector, M. Jaquemin Hérode, she scarcely went to church, as has been already said, four times a year. Now she was, on the contrary, assiduous in her attendance. She missed no service, neither of Sunday or of Thursday. Pious souls in the parish remarked with satisfaction that amendment. For it is a great blessing when a girl who runs so many dangers in the world turns her thoughts towards God. That enables the poor parents at least to be easy on the subject of love-making and what not.

In the evening, whenever the weather permitted, she walked for an hour or two in the

garden of the Bravées. She was almost as pensive there as Mess Lethierry, and almost always alone. Déruchette went to bed last. This, however, did not prevent Douce and Grace watching her a little, by that instinct for spying which is common to servants; spying is such a relaxation after household work.

As to Mess Lethierry, in the abstracted state of his mind, these little changes in Déruchette's habits escaped him. Moreover, his nature had little in common with the Duenna. He had not even remarked her regularity at the church. Tenacious of his prejudices against the clergy and their sermons, he would have seen with little pleasure these frequent attendances at the parish church. It was not because his own moral condition was not undergoing change. Sorrow is a cloud which changes form.

Robust natures, as we have said, are sometimes almost overthrown by sudden great misfortunes; but not quite. Manly characters

such as Lethierry's experience a reaction in a given time. Despair has its backward stages. From overwhelmment we rise to dejection ; from dejection to affliction ; from affliction to melancholy. Melancholy a twilight state ; suffering melts into it and becomes a sombre joy. Melancholy is the pleasure of being sad.

These elegiac moods were not made for Lethierry. Neither the nature of his temperament nor the character of his misfortune suited those delicate shades. But at the moment at which we have returned to him, the reverie of his first despair had for more than a week been tending to disperse ; without, however, leaving him less sad. He was more inactive, was always dull ; but he was no longer overwhelmed. A certain perception of events and circumstances was returning to him, and he began to experience something of that phenomenon which may be called the return to reality.

Thus by day in the great lower room, he did not listen to the words of those about him, but he heard them. Grace came one morning quite

triumphant, to tell Déruchette that he had undone the cover of a newspaper.

This half acceptance of realities is in itself a good symptom, a token of convalescence. Great afflictions produce a stupor; it is by such little acts that men return to themselves. This improvement, however, is at first only an aggravation of the evil. The dreamy condition of mind in which the sufferer has lived, has served, while it lasted, to blunt his grief. His sight before was thick. He felt little. Now his view is clear, nothing escapes him; and his wounds reopen. Each detail that he perceives serves to remind him of his sorrow. He sees everything again in memory, every remembrance is a regret. All kinds of bitter after-tastes lurk in that return to life. He is better, and yet worse. Such was the condition of Lethierry. In returning to full consciousness, his sufferings had become more distinct.

A sudden shock first recalled him to a sense of reality.

One afternoon, between the 15th and 20th

of April, a double-knock at the door of the great lower room of the *Bravées* had signalled the arrival of the postman. Douce had opened the door; there was a letter.

The letter came from beyond sea; it was addressed to Mess Lethierry, and bore the postmark 'Lisboa.'

Douce had carried the letter to Mess Lethierry, who was in his room. He had taken it, placed it mechanically upon the table, and had not looked at it.

The letter remained an entire week upon the table without being unsealed.

It happened, however, one morning that Douce said to Mess Lethierry:

'Shall I brush the dust off your letter, sir?'

Lethierry seemed to arouse from his lethargy.

'Ay, ay! You are right,' he said; and he opened the letter, and read as follows:—

'At Sea. 10th *March*.

'To Mess Lethierry of St. Sampson.

'You will be gratified to receive news of

me. I am aboard the 'Tamaulipas,' bound for the port of "No-return." Among the crew is a sailor named Ahier-Tostevin, from Guernsey, who will return and will have some facts to communicate to you. I take the opportunity of our speaking a vessel, the "Herman Cortes," bound for Lisbon, to forward you this letter.

'You will be astonished to learn that I am going to be honest.

'As honest as Sieur Clubin.

'I am bound to believe that you know of certain recent occurrences; nevertheless, it is, perhaps, not altogether superfluous to send you a full account of them.

'To proceed, then.

'I have returned you your money.

'Some years ago, I borrowed from you, under somewhat irregular circumstances, the sum of fifty thousand francs. Before leaving St. Malo lately, I placed in the hands of your confidential man of business, Sieur Clubin, on your account, three bank-notes of one thousand

pounds each; making together seventy-five thousand francs. You will no doubt find this reimbursement sufficient.

‘Sieur Clubin received your money, including interest, in a remarkably energetic manner. He appeared to me, indeed, singularly zealous. This is, in fact, my reason for apprising you of the facts.

‘Your other confidential man of business,

‘RANTAINÉ.

‘*Postscript.*—Sieur Clubin was in possession of a revolver, which will explain to you the circumstance of my having no receipt.’

He who has ever touched a torpedo, or a Leyden-jar fully charged, may have a notion of the effect produced on Mess Lethierry by the reading of this letter.

Under that envelope, in that sheet of paper folded in four, to which he had at first paid so little attention, lay the elements of an extraordinary commotion.

He recognized the writing and the signature.

As to the facts which the letter contained, at first he understood nothing.

The excitement of the event, however, soon gave movement to his faculties.

The effective part of the shock he had received lay in the phenomenon of the seventy-five thousand francs entrusted by Rantaine to Clubin; this was a riddle which compelled Lethierry's brain to work. Conjecture is a healthy occupation for the mind. Reason is awakened: logic is called into play.

For some time past, public opinion in Guernsey had been undergoing a reaction on the subject of Clubin: that man of such high reputation for honour during many years; that man so unanimously regarded with esteem. People had begun to question and to doubt; there were wagers pro and con. Some light had been thrown on the question in singular ways. The figure of Clubin began to become clearer, that is to say, he began to be blacker in the eyes of the world.

A judicial inquiry had taken place at St.

Malo, for the purpose of ascertaining what had become of the coastguard-man, number 619. Legal perspicacity had got upon a false scent, a thing which happens not unfrequently. It had started with the hypothesis that the man had been enticed by Zuela, and shipped aboard the 'Tamaulipas' for Chili. This ingenious supposition had led to a considerable amount of wasted conjecture. The short-sightedness of justice had failed to take note of Rantaine; but in the progress of inquiry the authorities had come upon other clues. The affair, so obscure, became complicated. Clubin had become mixed up with the enigma. A coincidence, perhaps a direct connection had been found between the departure of the 'Tamaulipas' and the loss of the Durande. At the wine-shop near the Dinan Gate, where Clubin thought himself entirely unknown, he had been recognized. The wine-shop keeper had talked; Clubin had bought a bottle of brandy that night. For whom? The gunsmith of St. Vincent Street, too, had talked. Clubin had

purchased a revolver. For what object? The landlord of the 'Jean Auberge' had talked. Clubin had absented himself in an inexplicable manner. Captain Gertrais-Gaboureau had talked; Clubin had determined to start, although warned, and knowing that he might expect a great fog. The crew of the *Durande* had talked. In fact, the collection of the freight had been neglected, and the stowage badly arranged, a negligence easy to comprehend, if the captain had determined to wreck the ship. The Guernsey passenger, too, had spoken. Clubin had evidently imagined that he had run upon the Hanways. The Torteval people had spoken. Clubin had visited that neighbourhood a few days before the loss of the *Durande*, and had been seen walking in the direction of Pleinmont, near the Hanways. He had with him a travelling-bag. 'He had set out with it, and come back without it.' The birds'-nesters had spoken: their story seemed to be possibly connected with Clubin's disappearance, if instead of ghosts they supposed

smugglers. Finally, the haunted house of Pleinmont itself had spoken. Persons who had determined to get information, had climbed and entered the windows, and had found inside—what? The very travelling-bag which had been seen in Sieur Clubin's possession. The authorities of the *Douzaine* of Torteval had taken possession of the bag and had it opened. It was found to contain provisions, a telescope, a chronometer, a man's clothing, and linen marked with Clubin's initials. All this in the gossip of St. Malo and Guernsey became more and more like a case of fraud. Obscure hints were brought together; there appeared to have been a singular disregard of advice; a willingness to encounter the dangers of the fog; a suspected negligence in the stowage of the cargo. Then there was the mysterious bottle of brandy; a drunken helmsman; a substitution of the captain for the helmsman; a management of the rudder, to say the least, unskilful. The heroism of remaining behind upon the wreck began to look like roguery. Clubin

besides had evidently been deceived as to the rock he was on. Granted an intention to wreck the vessel, it was easy to understand the choice of the Hanways, the shore easily reached by swimming, and the intended concealment in the haunted house awaiting the opportunity for flight. The travelling-bag, that suspicious preparative, completed the demonstration. By what link this affair connected itself with the other affair of the disappearance of the coast-guard-man nobody knew. People imagined some connection, and that was all. They had a glimpse in their minds of the look-out-man, number 619, alongside of the mysterious Clubin—quite a tragic drama. Clubin possibly was not an actor in it, but his presence was visible in the side scenes.

The supposition of a wilful destruction of the *Durande* did not explain everything. There was a revolver in the story, with no part yet assigned to it. The revolver, probably, belonged to the other affair.

The scent of the public is keen and true.

Its instinct excels in those discoveries of truth by pieces and fragments. Still, amidst these facts, which seemed to point pretty clearly to a case of barratry, there were serious difficulties.

Everything was consistent ; everything coherent ; but a basis was wanting.

People do not wreck vessels for the pleasure of wrecking them. Men do not run all those risks of fog, rocks, swimming, concealment, and flight without an interest. What could have been Clubin's interest ?

The act seemed plain, but the motive was puzzling.

Hence a doubt in many minds. Where there is no motive, it is natural to infer that there was no act.

The missing link was important. The letter from Rantaine seemed to supply it.

This letter furnished a motive for Clubin's supposed crime : seventy-five thousand francs to be appropriated.

Rantaine was the *Deus ex machinâ*. He had descended from the clouds with a lantern in his

hand. His letter was the final light upon the affair. It explained everything, and even promised a witness in the person of Ahier-Tostevin.

The part which it at once suggested for the revolver was decisive. Rantaine was undoubtedly well informed. His letter pointed clearly the explanation of the mystery.

There could be no possible palliation of Clubin's crime. He had premeditated the shipwreck; the proofs were the preparations discovered in the haunted house. Even supposing him innocent, and admitting the wreck to have been accidental, would he not, at the last moment, when he had determined to sacrifice himself with the vessel, have entrusted the seventy-five thousand francs to the men who escaped in the longboat. The evidence was strikingly complete. Now what had become of Clubin? He had probably been the victim of his blunder. He had doubtless perished upon the Douvres.

All this construction of surmises, which were

not far from the reality, had for several days occupied the mind of Mess. Lethierry. The letter from Rantaine had done him the service of setting him to think. He was at first shaken by his surprise; then he made an effort to reflect. He made another effort more difficult still, that of inquiry. He was induced to listen, and even seek conversation. At the end of a week he had become, to a certain degree, in the world again; his thoughts had regained their coherence, and he was almost restored. He had emerged from his confused and troubled state.

Rantaine's letter, even admitting that Mess Lethierry could ever have entertained any hope of the reimbursement of his money, destroyed that last chance.

It added to the catastrophe of the *Durande* this new wreck of seventy-five thousand francs. It put him in possession of that amount just so far as to make him sensible of its loss. The letter revealed to him the extreme point in his ruin.

Hence he experienced a new and very painful sensation, which we have already spoken of. He began to take an interest in his household,—what it was to be in the future—how he was to set things in order; matters of which he had taken no heed for two months past. These trifling cares wounded him with a thousand tiny points, worse in their aggregate than the old despair. A sorrow is doubly burdensome which has to be endured in each item, and while disputing inch by inch with fate for ground already lost. Ruin is endurable in the mass, but not in the dust and fragments of the fallen edifice. The great fact may overwhelm, but the details torture. The catastrophe which lately fell like a thunderbolt, becomes now a cruel persecution. Humiliation comes to aggravate the blow. A second desolation succeeds the first, with features more repulsive. You descend one degree nearer to annihilation. The winding-sheet becomes changed to sordid rags.

No thought is more bitter than that of one's own gradual fall from a social position.

Ruin is simple enough. A violent shock; a cruel turn of fate; a catastrophe once for all. Be it so. We submit, and all is over. You are ruined: it is well; you are dead? No; you are still living. On the morrow you know it well. By what? By the pricking of a pin. Yonder passer-by omits to recognize you; the tradesmen's bills rain down upon you; and yonder is one of your enemies, who is smiling. Perhaps he is thinking of Arnal's last pun; but it is all the same. The pun would not have appeared to him so inimitable but for your ruin. You read your own sudden insignificance even in looks of indifference. Friends who used to dine at your table become of opinion that three courses were an extravagance. Your faults are patent to the eyes of everybody; ingratitude having nothing more to expect, proclaims itself openly; every idiot has foreseen your misfortunes. The malignant pull you to pieces; the more malignant profess to pity. And then come a hundred paltry details. Nausea succeeds to grief. You have

been wont to indulge in wine; you must now drink cider. Two servants, too! Why, one will be too many. It will be necessary to discharge this one, and get rid of that. Flowers in your garden are superfluous; you will plant it with potatoes. You used to make presents of your fruits to friends; you will send them henceforth to market. As to the poor, it will be absurd to think of giving anything to them. Are you not poor yourself? And then there is the painful question of dress. To have to refuse a wife a new ribbon, what a torture! To have to refuse one who has made you a gift of her beauty a trifling article; to haggle over such matters, like a miser! Perhaps she will say to you, 'What! rob my garden of its flowers, and now refuse one for my bonnet!' Ah me! to have to condemn her to shabby dresses. The family table is silent. You fancy that those around it think harshly of you. Beloved faces have become clouded. This is what is meant by falling fortunes. It is to die day by day. To be struck down is

like the blast of the furnace ; to decay like this is the torture of the slow fire.

An overwhelming blow is a sort of Waterloo, a slow decay, a St. Helena. Destiny, incarnate in the form of Wellington, has still some dignity ; but how sordid in the shape of Hudson Lowe. Fate becomes then a paltry huckster. We find the man of Campo Formio quarrelling about a pair of stockings ; we see that dwarfing of Napoleon which makes England less. Waterloo and St. Helena ! Reduced to humbler proportions, every ruined man has traversed those two phases.

On the evening we have mentioned, and which was one of the first evenings in May, Lethierry, leaving Déruchette to walk by moonlight in the garden, had gone to bed more depressed than ever.

All these mean and repulsive details, peculiar to worldly misfortune ; all these trifling cares, which are at first insipid, and afterwards harassing, were revolving in his mind. A sullen load of miseries ! Mess Lethierry felt that his

fall was irremediable. What could he do? What would become of them? What sacrifices should he be compelled to impose on Déruchette? Whom should he discharge—Douce or Grace? Would they have to sell the Bravées? Would they not be compelled to leave the island? To be nothing where he had been everything; it was a terrible fall indeed.

And to know that the old times were gone for ever! To recall those journeys to and fro, uniting France with those numberless islands; the Tuesday's departure, the Friday's return, the crowd on the quay, those great cargoes, that industry, that prosperity, that proud direct navigation, that machinery embodying the will of man, that all-powerful boiler, that smoke, all that reality. The steam-boat had been the final crown of the compass; the needle indicating the direct track, the steam-vessel following it. One proposing, the other executing. Where was she now, his Durande, that mistress of the seas, that queen who had made him a king? To have been so long the man of ideas in his own country,

the man of success, the man who revolutionized navigation; and then to have to give up all, to abdicate! To cease to exist, to become a by-word, an empty bag which once was full. To belong to the past, after having so long represented the future. To come down to be an object of pity to fools, to witness the triumph of routine, obstinacy, conservatism, selfishness, ignorance. To see the old barbarous sailing cutters crawling to and fro upon the sea: the outworn old-world prejudices young again; to have wasted a whole life; to have been a light, and to suffer this eclipse. Ah! what a sight it was upon the waves, that noble funnel, that prodigious cylinder, that pillar with its capital of smoke, that column grander than any in the Place Vendôme, for on that there was only a man, while on this stood Progress. The ocean was beneath it; it was certainty upon the open sea. And had all this been witnessed in that little island, in that little harbour, in that little town of St. Sampson? Yes; it had been witnessed. And could it be, that

having seen it, all had vanished to be seen no more.

All this series of regrets tortured Lethierry. There is such a thing as a mental sobbing. Never, perhaps, had he felt his misfortune more bitterly. A certain numbness follows this acute suffering. Under the weight of his sorrow he gradually dosed.

For about two hours he remained in this state, feverish, sleeping a little, meditating much. Such torpors are accompanied by an obscure labour of the brain, which is inexpressibly wearying. Towards the middle of the night, about midnight, a little before or a little after, he shook off his lethargy. He aroused, and opened his eyes. His window was directly in front of his hammock. He saw something extraordinary.

A form was before the window ; a marvellous form. It was the funnel of a steam-vessel.

Mess Lethierry started, and sat upright in his bed. The hammock oscillated like a swing in a tempest. Lethierry stared. A vision

filled the window-frame. There was the harbour flooded with the light of the moon, and against that glitter, quite close to his house, stood forth, tall, round, and black, a magnificent object.

The funnel of a steam-vessel was there.

Lethierry sprang out of his hammock, ran to the window, lifted the sash, leaned out, and recognized it.

The funnel of the *Durande* stood before him.

It was in the old place.

Its four chains supported it, made fast to the bulwarks of a vessel in which, beneath the funnel, he could distinguish a dark mass of irregular outline.

Lethierry recoiled, turned his back to the window, and dropped in a sitting posture into his hammock again.

Then he returned, and once more he saw the vision.

An instant afterwards, or in about the time occupied by a flash of lightning, he was out upon the quay, with a lantern in his hand.

A bark carrying a little backward a massive block from which issued the straight funnel before the window of the Bravées, was made fast to the mooring-ring of the Durande. The bows of the bark stretched beyond the corner of the wall of the house, and were level with the quay.

There was no one aboard.

The vessel was of a peculiar shape. All Guernsey would have recognized it. It was the old Dutch sloop.

Lethierry jumped aboard; and ran forward to the block which he saw beyond the mast.

It was there, entire, complete, intact, standing square and firm upon its cast-iron flooring; the boiler had all its rivets, the axle of the paddle-wheels was raised erect, and made fast near the boiler; the feed-pump was in its place; nothing was wanting.

Lethierry examined the machinery.

The lantern and the moon helped him in his examination. He went over every part of the mechanism.

He noticed the two cases at the sides. He examined the axle of the wheels.

He went into the little cabin; it was empty.

He returned to the engine, and felt it, looked into the boiler, and knelt down to examine it inside.

He placed his lantern within the furnace, where the light, illuminating all the machinery, produced almost the illusion of an engine-room with its fire.

Then he burst into a wild laugh, sprang to his feet, and with his eye fixed on the engine, and his arms outstretched towards the funnel, he cried aloud, 'Help.'

The harbour-bell was upon the quay, at a few paces distance. He ran to it, seized the chain, and began to pull it violently.

II.

THE HARBOUR BELL AGAIN.

GILLIATT, in fact, after a passage without accident, but somewhat slow on account the heavy burden of the sloop, had arrived at St. Sampson after dark, and nearer ten than nine o'clock.

He had calculated the time. The half-flood had arrived. There was plenty of water, and the moon was shining; so that he was able to enter the port.

The little harbour was silent. A few vessels

were moored there, with their sails brailed up to the yards, their tops over, and without lanterns. At the far end a few others were visible, high and dry in the carenage, where they were undergoing repairs; large hulls dismasted and stripped, with their planking open at various parts, lifting high the ends of their timbers, and looking like huge dead beetles lying on their backs with their legs in the air.

As soon as he had cleared the harbour mouth, Gilliatt examined the port and the quay. There was no light to be seen either at the Bravées or elsewhere. The place was deserted save, perhaps, by some one going to or returning from the parsonage-house; nor was it possible to be sure even of this; for the night blurred every outline, and the moonlight always gives to objects a vague appearance. The distance added to the indistinctness. The parsonage-house at that period was situated on the other side of the harbour, where there stands at the present day an open mast-house.

Gilliatt had approached the Bravées quietly,

and had made the sloop fast to the ring of the Durande, under Mess Lethierry's window.

He leaped over the bulwarks, and was ashore.

Leaving the sloop behind him by the quay, he turned the angle of the house, passed along a little narrow street, then along another, did not even notice the pathway which branched off leading to the Bû de la Rue, and in a few minutes found himself at that corner of the wall where there were wild mallows with pink flowers in June, with holly, ivy, and nettles. Many a time concealed behind the bushes, seated on a stone, in the summer days, he had watched here through long hours, even for whole months, often tempted to climb the wall, over which he contemplated the garden of the Bravées and the two windows of a little room seen through the branches of the trees. The stone was there still; the bushes, the low wall, the angle, as quiet and as dark as ever. Like an animal returning to its hole, gliding rather than walking, he made his way in. Once

seated there, he made no movement. He looked around; saw again the garden, the pathways, the beds of flowers, the house, the two windows of the chamber. The moonlight fell upon this dream. He felt it horrible to be compelled to breathe, and did what he could to prevent it.

He seemed to be gazing on a vision of paradise, and was afraid that all would vanish. It was almost impossible that all these things could be really before his eyes; and if they were, it could only be with that imminent danger of melting into air which belongs to things divine. A breath, and all must be dissipated. He trembled with the thought.

Before him, not far off, at the side of one of the alleys in the garden, was a wooden seat painted green. The reader will remember this seat.

Gilliatt looked up at the two windows. He thought of the slumber of some one possibly in that room. Behind that wall she was no doubt sleeping. He wished himself elsewhere, yet

would sooner have died than go away. He thought of a gentle breathing moving a woman's breast. It was she, that vision, that purity in the clouds, that form haunting him by day and night. She was there! He thought of her so far removed, and yet so near as to be almost within reach of his delight; he thought of that impossible ideal drooping in slumber, and like himself, too, visited by visions; of that being so long desired, so distant, so impalpable—her closed eyelids, her face resting on her hand; of the mystery of sleep in its relations with that pure spirit, of what dreams might come to one who was herself a dream. He dared not think beyond, and yet he did. He ventured on those familiarities which the fancy may indulge in; the notion of how much was feminine in that angelic being disturbed his thoughts. The darkness of night emboldens timid imaginations to take these furtive glances. He was vexed within himself, feeling on reflection as if it were profanity to think of her so boldly; yet still constrained, in spite of himself,

he tremblingly gazed into the invisible. He shuddered almost with a sense of pain as he imagined her room, a petticoat on a chair, a mantle fallen on the carpet, a band unbuckled, a handkerchief. He imagined her corset with its lace hanging to the ground, her stockings, her boots. His soul was among the stars.

The stars are made for the human heart of a poor man like Gilliatt not less than for that of the rich and great. There is a certain degree of passion by which every man becomes wrapped in a celestial light. With a rough and primitive nature, this truth is even more applicable. An uncultivated mind is easily touched with dreams.

Delight is a fullness which overflows like any other. To see those windows was almost too much happiness for Gilliatt.

Suddenly, he looked and saw her.

From the branches of a clump of bushes, already thickened by the spring, there issued with a spectral slowness a celestial figure, a

dress, a divine face, almost a shining light beneath the moon.

✓ Gilliatt felt his powers failing him : it was Déruchette.

Déruchette approached. She stopped. She walked back a few paces, stopped again : then returned and sat upon the wooden bench. The moon was in the trees, a few clouds floated among the pale stars ; the sea murmured to the shadows in an under-tone, the town was sleeping, a thin haze was rising from the horizon, the melancholy was profound. Déruchette inclined her head, with those thoughtful eyes which look attentive yet see nothing. She was seated sideways, and had nothing on her head but a little cap untied, which showed upon her delicate neck the commencement of her hair. She twirled mechanically a ribbon of her cap around one of her fingers ; the half light showed the outline of her hands like those of a statue ; her dress was of one of those shades which by night look white : the trees stirred as if they felt the enchantment which

she shed around her. The tip of one of her feet was visible. Her lowered eyelids had that vague contraction which suggests a tear checked in its course, or a thought suppressed. There was a charming indecision in the movements of her arms, which had no support to lean on; a sort of floating mingled with every posture. It was rather a gleam than a light—rather a grace than a goddess; the folds of her dress were exquisite; her face, which might inspire adoration, seemed meditative, like portraits of the Virgin. It was terrible to think how near she was: Gilliatt could hear her breathe.

A nightingale was singing in the distance. The stirring of the wind among the branches set in movement, the inexpressible silence of the night. Déruchette, beautiful, divine, appeared in the twilight like a creation from those rays and from the perfumes in the air. That widespread enchantment seemed to concentrate and embody itself mysteriously in her; she became its living manifestation. She

seemed the out-blossoming of all that shadow and silence.

* But the shadow and silence which floated lightly about her weighed heavily on Gilliatt. He was bewildered; what he experienced is not to be told in words. Emotion is always new, and the word is always enough. Hence the impossibility of expressing it. Joy is sometimes overwhelming. To see *Déruchette*, to see her herself, to see her dress, her cap, her ribbon, which she twined around her finger, was it possible to imagine it? Was it possible to be thus near her; to hear her breathe? She breathed! then the stars might breathe also. Gilliatt felt a thrill through him. He was the most miserable and yet the happiest of men. He knew not what to do. His delirious joy at seeing her annihilated him. Was it indeed *Déruchette* there, 'and he so near? His thoughts, bewildered and yet fixed, were fascinated by that figure as by a dazzling jewel.' He gazed upon her neck—her hair. He did not even say to himself that all

that would now belong to him, that before long—to-morrow, perhaps—he would have the right to take off that cap, to unknot that ribbon. He would not have conceived for a moment the audacity of thinking even so far. Touching in idea is almost like touching with the hand. Love was with Gilliatt like honey to the bear. He thought confusedly; he knew not what possessed him. The nightingale still sang. He felt as if about to breathe his life out.

The idea of rising, of jumping over the wall, of speaking to Déruchette, never came into his mind. If it had, he would have turned and fled. If anything resembling a thought had begun to dawn in his mind, it was this: that Déruchette was there, that he wanted nothing more, and that eternity had begun.

A noise aroused them both—her from her reverie—him from his ecstasy.

Someone was walking in the garden. It was not possible to see who was approaching on account of the trees. It was the footstep of a man.

Déruchette raised her eyes.

The steps drew nearer, then ceased. The person walking had stopped. He must have been quite near. The path beside which was the bench wound between two clumps of trees. The stranger was there in the alley between the trees, at a few paces from the seat.

Accident had so placed the branches, that Déruchette could see the new comer while Gilliatt could not.

The moon cast on the ground beyond the trees a shadow which reached to the garden seat.

Gilliatt could see this shadow.

He looked at Déruchette.

She was quite pale; her mouth was partly open, as with a suppressed cry of surprise. She had just half risen from the bench, and sunk again upon it. There was in her attitude a mixture of fascination with a desire to fly. Her surprise was enchantment mingled with timidity. She had upon her lips almost the light of a smile, with the fullness of tears in

her eyes. She seemed as if transfigured by that presence; as if the being whom she saw before her belonged not to this earth. The reflection of an angel was in her look.

The stranger, who was to Gilliatt only a shadow, spoke. A voice issued from the trees, softer than the voice of a woman; yet it was the voice of a man. Gilliatt heard these words:

‘I see you, mademoiselle, every Sunday and every Thursday. They tell me that once you used not to come so often. It is a remark that has been made. I ask your pardon. I have never spoken to you; it was my duty; but I come to speak to you to-day, for it is still my duty. It is right that I speak to you first. The “Cashmere” sails to-morrow. This is why I have come. You walk every evening in your garden. It would be wrong of me to know your habits so well, if I had not the thought that I have. Mademoiselle, you are poor; since this morning I am rich. Will you have me for your husband?’

Déruchette joined her two hands in a suppliant attitude, and looked at the speaker, silent, with fixed eyes, and trembling from head to foot.

The voice continued :

‘I love you. God made not the heart of man to be silent. He has promised him eternity with the intention that he should not be alone. There is for me but one woman upon earth. It is you. I think of you as of a prayer. My faith is in God, and my hope in you. What wings I have you bear. You are my life, and already my supreme happiness.’

‘Sir,’ said Déruchette, ‘there is no one to answer in the house!’

The voice rose again :

‘Yes, I have encouraged that dream. Heaven has not forbidden us to dream. You are like a glory in my eyes. I love you deeply, mademoiselle. To me you are holy innocence. I know it is the hour at which your household have retired to rest, but I had

no choice of any other moment. Do you remember that passage of the Bible which some one read before us; it was the twenty-fifth chapter of Genesis. I have thought of it often since. M. Hérode said to me, you must have a rich wife. I replied no, I must have a poor wife. I speak to you, mademoiselle, without venturing to approach you; I would step even farther back if it was your wish that my shadow should not touch your feet. You alone are supreme. You will come to me if such is your will. I love and wait. You are the living form of a benediction.'

'I did not know, sir,' stammered Déruchette, 'that any one remarked me on Sundays and Thursdays.'

The voice continued:

'We are powerless against celestial things. The whole Law is love. Marriage is Canaan; you are to me the promised land of beauty.'

Déruchette replied, 'I did not think I did wrong any more than other persons who are strict.'

The voice continued :

‘God manifests his will in the flowers, in the light of dawn, in the spring; and love is of his ordaining. You are beautiful in this holy shadow of night. This garden has been tended by you; in its perfumes there is something of your breath. The affinities of our souls do not depend on us. They cannot be counted with our sins. You were there, that was all. I was there, that was all. I did nothing but feel that I loved you. Sometimes my eyes rested upon you. I was wrong, but what could I do. It was through looking at you that all happened. I could not restrain my gaze. There are mysterious impulses which are above our search. The heart is the chief of all temples. To have your spirit in my house—this is the terrestrial paradise for which I hope. Say, will you be mine. As long as I was poor, I spoke not. I know your age. You are twenty-one; I am twenty-six. I go to-morrow; if you refuse me I return no more. Oh, be my betrothed; will you not?’

More than once have my eyes, in spite of myself, addressed to you that question. I love you; answer me. I will speak to your uncle as soon as he is able to receive me; but I turn first to you. To Rebecca I plead for Rebecca; unless you love me not.'

Déruchette hung her head, and murmured:

'Oh! I worship him.'

The words were spoken in a voice so low, that only Gilliatt heard them.

She remained with her head lowered as if by shading her face she hoped to conceal her thoughts.

There was a pause. No leaf among the trees was stirred. It was that solemn and peaceful moment when the slumber of external things mingles with the sleep of living creatures; and night seems to listen to the beating of Nature's heart. In the midst of that retirement, like a harmony making the silence more complete, rose the wide murmur of the sea.

The voice was heard again.

‘Mademoiselle!’

Déruchette started.

Again the voice spoke.

‘You are silent.’

‘What would you have me say?’

‘I wait for your reply.’

‘God has heard it,’ said Déruchette.

Then the voice became almost sonorous, and at the same time softer than before, and these words issued from the leaves as from a burning bush:

‘You are my betrothed. Come then to me. Let the blue sky, with all its stars, be witness of this taking of my soul to thine; and let our first embrace be mingled with that firmament.’

Déruchette arose, and remained an instant motionless, looking straight before her, doubtless in another’s eyes. Then, with slow steps, with head erect, her arms drooping, but with the fingers of her hands wide apart, like one who leans on some unseen support, she advanced towards the trees, and was out of sight.

A moment afterwards, instead of the one

shadow upon the gravelled walk, there were two. They mingled together. Gilliatt saw at his feet the embrace of those two shadows.

In certain moments of crisis, time flows from us as his sands from the hour-glass, and we have no feeling of his flight. That pair on the one hand, who were ignorant of the presence of a witness, and saw him not; on the other, that witness of their joy, who could not see them, but who knew of their presence—how many minutes did they remain thus in that mysterious suspension of themselves? It would be impossible to say. Suddenly a noise burst forth at a distance. A voice was heard crying ‘Help!’ and the harbour bell began to sound. It is probable that in those celestial transports of delight they heard no echo of that tumult.

The bell continued to ring. Any one who had sought Gilliatt then in the angle of the wall would have found him no longer there.

BOOK II.

GRATITUDE AND DESPOTISM.

I.

JOY SURROUNDED BY TORTURES.

MESS LETHIERRY pulled the bell furiously, then stopped abruptly. A man had just turned the corner of the quay. It was Gilliatt.

Lethierry ran towards him, or rather flung himself upon him; seized his hand between his own, and looked him in the face for a moment silent. It was the silence of an explosion struggling to find an issue.

Then pulling and shaking him with violence, and squeezing him in his arms, he compelled him to enter the lower room of the *Bravées*, pushed back with his heel the door which had remained half opened, sat down, or sank into a chair beside a great table lighted by the moon, the reflection of which gave a vague pallor to Gilliatt's face, and with a voice of intermingled laughter and tears, cried :

‘ Ah ! my son ; my player of the bagpipe ! I knew well that it was you. The sloop, *parbleu* ! Tell me the story. You went there, then. Why, they would have burnt you a hundred years ago ! It is magic ! There isn't a screw missing. I have looked at everything already, recognized everything, handled everything. I guessed that the paddles were in the two cases. And here you are once more ! I have been looking for you in the little cabin. I rang the bell. I was seeking for you. I said to myself, “ Where is he, that I may devour him ? ” You must admit that wonderful things do come to pass. He has brought

back life to me. Tonnerre! you are an angel! Yes, yes; it is my engine. Nobody will believe it; people will see it, and say, "It can't be true." Not a tap, not a pin missing. The feed-pipe has never budged an inch. It is incredible that there should have been no more damage. We have only to put a little oil. But how did you accomplish it? To think that the Durande will be moving again. The axle of the wheels must have been taken to pieces by some watchmaker. Give me your word that I am not crazy.'

He sprang to his feet, breathed a moment, and continued:

'Assure me of that. What a revolution! I pinched myself to be certain I was not dreaming. You are my child, you are my son, you are my Providence. Brave lad! To go and fetch my good old engine. In the open sea, among those cut-throat rocks. I have seen some strange things in my life; nothing like that. I have known Parisians, who were veritable demons, but I'll defy them to have done

that. It beats the Bastille. I have seen the *gauchos* labouring in the *Pampas*, with a crooked branch of a tree for a plough and a bundle of thorn-bushes for a harrow, dragged by a leathern strap; they get harvests of wheat that way, with grains as big as hedgenuts. But that is a trifle compared with your feats. You have performed a miracle—a real one. Ah! *gredin!* let me hug you. How they will gossip in St. Sampson. I shall set to work at once to build the boat. It is astonishing that the crank is all right. Gentlemen, he has been to the Douvres: I say to the Douvres. He went alone. The Douvres! I defy you to find a worse spot. Do you know, have they told you, that it's proved that Clubin sent the Durande to the bottom to swindle me out of money which he had to bring me? He made Tangrouille drunk. It's a long story. I'll tell you another day of his piratical tricks. I, stupid idiot, had confidence in Clubin. But he trapped himself, the villain, for he couldn't have got away. There is a God above, scoundrel!

Do you see, Gilliatt, bang! bang! the irons in the fire; we'll begin at once to rebuild the *Durande*. We'll have her twenty feet longer. They build them longer now than they did. I'll buy the wood from Dantzic and Brême. Now I've got the machinery they will give me credit again. They'll have confidence now.'

Mess Lethierry stopped, lifted his eyes with that look which sees the heavens through the roof, and muttered, 'Yes, there is a power on high!

Then he placed the middle finger of his right hand between his two eyebrows, and tapped with his nail there, an action which indicates a project passing through the mind, and he continued:

'Nevertheless, to begin again, on a grand scale, a little ready money would have been useful. Ah! if I only had my three bank-notes, the seventy-five thousand francs that that robber Rantaine returned, and that vagabond Clubin stole.'

Gilliatt silently felt in his pocket, and drew out something which he placed before him. It was the leathern belt that he had brought back. He opened, and spread it out upon the table; in the inside the word 'Clubin' could be deciphered in the light of the moon. He then took out of the pocket of the belt a box, and out of the box three pieces of paper, which he unfolded and offered to Lethierry.

Lethierry examined them. It was light enough to read the figures '1000,' and the word 'thousand' was also perfectly visible. Mess Lethierry took the three notes, placed them on the table one beside the other, looked at them, looked at Gilliatt, stood for a moment dumb; and then began again, like an eruption after an explosion :

'These too! You are a marvel. My bank-notes! all three. A thousand pounds each. My seventy-five thousand francs. Why, you must have gone down to the infernal regions. It is Clubin's belt. Pardieu! I can read his vile name. Gilliatt has brought back engine

and money too. There will be something to put in the papers. I will buy some timber of the finest quality. I guess how it was; you found his carcass; Clubin mouldering away in some corner. We'll have some Dantzic pine and Brême oak; we'll have a first-rate planking—oak within and pine without. In old times they didn't build so well, but their work lasted longer; the wood was better seasoned, because they did not build so much. We'll build the hull perhaps of elm. Elm is good for the parts in the water. To be dry sometimes, and sometimes wet, rots the timbers; the elm requires to be always wet; it's a wood that feeds upon water. What a splendid Durande we'll build. The lawyers will not trouble me again. I shall want no more credit. I have some money of my own. Did ever any one see a man like Gilliatt. I was struck down to the ground, I was a dead man. He comes and sets me up again as firm as ever. And all the while I was never thinking about him. He had gone clean out of my mind; but I

recollect everything now. Poor lad! Ah! by the way, you know you are to marry Déruchette.'

Gilliatt leaned with his back against the wall, like one who staggers, and said in a tone very low, but distinct :

'No.'

Mess Lethierry started.

'How, no!'

Gilliatt replied :

'I do not love her.'

Mess Lethierry went to the window, opened and reclosed it, took the three bank-notes, folded them, placed the iron box on top, scratched his head, seized Clubin's belt, flung it violently against the wall, and exclaimed :

'You must be mad.'

He thrust his fists into his pockets, and exclaimed :

'You don't love Déruchette? What! was it at me, then, that you used to play the bagpipe?'

Gilliatt, still supporting himself by the wall,

turned pale, as a man near his end. As he became pale, Lethierry became redder.

‘There’s an idiot for you! He doesn’t love Déruchette. Very good; make up your mind to love her, for she shall never marry any but you. A devilish pretty story that; and you think that I believe you. If there is anything really the matter with you, send for a doctor; but don’t talk nonsense. You can’t have had time to quarrel, or get out of temper with her. It is true that lovers are great fools sometimes. Come now, what are your reasons? If you have any, say. People don’t make geese of themselves without reasons. But, I have wool in my ears; perhaps I didn’t understand. Repeat to me what you said.’

Gilliatt replied :

‘I said, No!’

‘You said, No. He holds to it, the lunatic! You must be crazy. You said, No. Here’s a stupidity beyond anything ever heard of. Why, people have had their heads shaved for much less than that. What! you don’t love

Déruchette? Oh, then, it was out of affection for the old man that you did all these things? It was for the sake of papa that you went to the Douvres, that you endured cold and heat, and was half dead with hunger and thirst, and ate the limpets off the rocks, and had the fog, the rain, and the wind for your bedroom, and brought me back my machine, just as you might bring a pretty woman her little canary that had escaped from its cage. And the tempest that we had three days ago. Do you think I don't bear it in mind? You must have had a time of it! It was in the midst of all this misery, alongside of my old craft, that you shaped, and cut, and turned, and twisted, and dragged about, and filed, and sawed, and carpentered, and schemed, and performed more miracles there by yourself than all the saints in paradise. Ah! you annoyed me enough once with your bagpipe. They call it a *binion* in Brittany. Always the same tune too, silly fellow. And yet you don't love Déruchette? I don't know what is the matter with you. I

recollect it all now. I was there in the corner ; Déruchette said, "He shall be my husband ;" and so you shall. You don't love her ! Either you must be mad, or else I am mad. And you stand there, and speak not a word. I tell you you are not at liberty to do all the things you have done, and then say, after all, "I don't love Déruchette." People don't do others services in order to put them in a passion. Well ; if you don't marry her, she shall be single all her life. In the first place, I shall want you. You must be the pilot of the *Durande*. Do you imagine I mean to part with you like that ? No, no, my brave boy ; I don't let you go. I have got you now ; I'll not even listen to you. Where will they find a sailor like you ? You are the man I want. But why don't you speak ?'

Meanwhile the harbour bell had aroused the household and the neighbourhood. Douce and Grace had risen, and had just entered the lower room, silent and astonished. Grace had a candle in her hand. A group of neighbours,

townspeople, sailors, and peasants, who had rushed out of their houses, were outside on the quay, gazing in wonderment at the funnel of the *Durande* in the sloop. Some, hearing Lethierry's voice in the lower room, began to glide in by the half-opened door. Between the faces of two worthy old women appeared that of *Sieur Landoys*, who had the good fortune always to find himself where he would have regretted to have been absent.

Men feel a satisfaction in having witnesses of their joys. The sort of scattered support which a crowd presents pleases them at such times; their delight draws new life from it. *Mess Lethierry* suddenly perceived that there were persons about him; and he welcomed the audience at once.

'Ah! you are here, my friends? I am very glad to see you. You know the news? That man has been there, and brought it back. How d'ye do, *Sieur Landoys*? When I woke up just now, the first thing I spied was the funnel. It was under my window. There's not a nail

missing. They make pictures of Napoleon's deeds; but I think more of that than of the battle of Austerlitz. You have just left your beds, my good friends. The Durande has found you sleeping. While you are putting on your night-caps and blowing out your candles there are others working like heroes. We are a set of cowards and donothings; we sit at home rubbing our rheumatisms; but happily that does not prevent there being some of another stamp. The man of the Bû de la Rue has arrived from the Douvres rocks. He has fished up the Durande from the bottom of the sea; and fished up my money out of Clubin's pocket, from a greater depth still. But how did you contrive to do it? All the powers of darkness were against you—the wind and the sea—the sea and the wind. It's true enough that you are a magician. Those who say that are not so stupid after all. The Durande is back again. The tempests may rage now; that cuts the ground from under them. My friends, I can inform you that

there was no shipwreck after all. I have examined all the machinery. It is like new, perfect. The valves go as easily as rollers. You would think them made yesterday. You know that the waste water is carried away by a tube inside another tube, through which comes the water for the boilers; this was to economize the heat. Well; the two tubes are there as good as ever. The complete engine, in fact. She is all there, her wheels and all. Ah! you shall marry her.'

'Marry the complete engine?' asked Sicur Landoys.

'No; Déruchette; yes; the engine. Both of them. He shall be my double son-in-law. He shall be her captain. Good day, Captain Gilliatt; for there will soon be a captain of the Durande. We are going to do a world of business again. There will be trade, circulation, cargoes of oxen and sheep. I wouldn't give St. Sampson for London now. And there stands the author of all this. It was a curious adventure, I can tell you. You will read

about it on Saturday in old Manger's "Gazette." Malicious Gilliatt is very malicious. What's the meaning of these Louis-d'ors here?'

Mess Lethierry had just observed, through the opening of the lid, that there was some gold in the box upon the notes. He seized it, opened and emptied it into the palm of his hand, and put the handful of guineas on the table.

'For the poor, Sieur Landoys. Give those sovereigms from me to the constable of St. Sampson. You recollect Rantaine's letter. I showed it to you. Very well; I've got the bank-notes. Now we can buy some oak and fir, and go to work at carpentering. Look you! Do you remember the weather of three days ago? What a hurricane of wind and rain! Gilliatt endured all that upon the Douvres. That didn't prevent his taking the wreck to pieces, as I might take my watch. Thanks to him, I am on my legs again. Old "Lethierry's galley" is going to run again, ladies and gentlemen. A nut-shell with a

couple of wheels and a funnel. I always had that idea. I used to say to myself, one day I will do it. That was a good long time back. It was an idea that came in my head at Paris, at the coffee-house at the corner of the Rue Christine and the Rue Dauphine, when I was reading a paper which had an account of it. Do you know that Gilliatt would think nothing of putting the machine at Marly in his pocket, and walking about with it? He is wrought-iron, that man; tempered steel, a mariner of invaluable qualities, an excellent smith, an extraordinary fellow, more astonishing than the Prince of Hohénlohe. That is what I call a man with brains. 'We are children by the side of him. Sea-wolves we may think ourselves; but the sea-lion is there. Hurrah for Gilliatt! I do not know how he has done it; but certainly he must have been the devil. And how can I do other than give him *Déruchette*?'

For some minutes *Déruchette* had been in the room. She had not spoken or moved

since she entered. She had glided in like a shadow, had sat down almost unperceived behind Mess Lethierry, who stood before her, loquacious, stormy, joyful, abounding in gestures, and talking in a loud voice. A little while after her another silent apparition had appeared. A man attired in black, with a white cravat, holding his hat in his hand, stood in the doorway. There were now several candles among the group, which had gradually increased in number. These lights were near the man attired in black. His profile and youthful and pleasing complexion showed itself against the dark background with the clearness of an engraving on a medal. He leaned with his shoulder against the framework of the door, and held his left hand to his forehead, an attitude of unconscious grace, which contrasted the breadth of his forehead with the smallness of his hand. There was an expression of anguish in his contracted lips, as he looked on and listened with profound attention. The standers-by having recognized M. Caudray, the rector

of the parish, had fallen back to allow him to pass; but he remained upon the threshold. There was hesitation in his posture, but decision in his looks, which now and then met those of Déruchette. With regard to Gilliatt, whether by chance or design, he was in shadow, and was only perceived indistinctly.

At first Mess Lethierry did not observe Caudray, but he saw Déruchette. He went to her and kissed her fervently upon the forehead; stretching forth his hand at the same time towards the dark corner where Gilliatt was standing.

‘Déruchette,’ he said, ‘we are rich again; and there is your future husband.’

Déruchette raised her head, and looked into the dusky corner bewildered.

Mess Lethierry continued:

‘The marriage shall take place immediately, if it can; they shall have a licence; the formalities here are not very troublesome; the dean can do what he pleases; people are married before they have time to turn round. It is not

as in France, where you must have bans, and publications, and delays, and all that fuss. You will be able to boast of being the wife of a brave man, whom no one can say a word against. I thought of him from the day when I saw him come back from Herm with the little cannon. But now he comes back from the Douvres with his fortune and mine, and the fortune of this country. A man of whom the world will talk a great deal more one day. You said once, "I will marry him;" and you shall marry him, and you shall have little children, and I will be grandpapa; and you will have the good fortune to be the wife of a noble fellow, who can work, who can be useful to his fellow-men; a surprising fellow, worth a hundred others; a man who can rescue other people's inventions, a providence! At all events, you will not have married, like so many other silly girls about here, a soldier or a priest, that is, a man who kills or a man who lies. But what are you doing there, Gilliatt? Nobody can see you. Douce, Grace, everybody there!

Bring a-light, I say. Light up my son-in-law for me. I betroth you to each other, my children : here stands your husband, here my son, Gilliatt of the Bâ de la Rue, that noble fellow, that great seaman ; I will have no other son-in-law, and you no other husband. I pledge my word to that once more in God's name. Ah ! you are there, Monsieur the Curé. You will marry these young people for us.'

Lethierry's eye had just fallen upon Caudray.

Douce and Grace had done as they were directed. Two candles placed upon the table cast a light upon Gilliatt from head to foot.

'There's a fine fellow,' said Mess Lethierry.

Gilliatt's appearance was hideous.

He was in the condition in which he had that morning set sail from the rocks ; in rags, his bare elbows showing through his sleeves ; his beard long, his hair rough and wild ; his eyes bloodshot, his skin peeling, his hands covered with wounds ; his feet naked. Some of the blisters left by the devil-fish were still visible upon his arms.

Lethierry gazed at him.

‘This is my son-in-law,’ he said. ‘How he has struggled with the sea. He is all in rags. What shoulders; what hands. There’s a splendid fellow!’

Grace ran to Déruchette and supported her head. She had fainted.

II.

THE LEATHERN TRUNK.

AT break of day St. Sampson was on foot, and all the people of St. Peter's Port began to flock there. The resurrection of the Durande caused a commotion in the island not unlike what was caused by the 'Salette' in the south of France. There was a crowd on the quay staring at the funnel standing erect in the sloop. They were anxious to see and handle the machinery; but Lethierry, after making a new and triumphant survey of the whole by

daylight, had placed two sailors aboard with instructions to prevent any one approaching it. The funnel, however, furnished food enough for contemplation. The crowd gaped with astonishment. They talked of nothing but Gilliatt. They remarked on his surname of 'malicious Gilliatt;' and their admiration wound up with the remark, 'It is not pleasant to have people in the island who can do things like that.'

Mess Lethierry was seen from outside the house, seated at a table before the window, writing with one eye on the paper and another on the sloop. He was so completely absorbed that he had only once stopped to call Douce and ask after Déruchette. Douce replied, 'Mademoiselle has risen and is gone out.' Mess Lethierry replied, 'She is right to take the air. She was a little unwell last night, owing to the heat. There was a crowd in the room. This and her surprise and joy, and the windows being all closed, overcame her. She will have a husband to be proud of.' And he had gone on with his writing. He had already finished

and sealed two letters, addressed to the most important shipbuilders at Brème. He now finished the sealing of a third.

The noise of a wheel upon the quay induced him to look up. He leaned out of the window and observed coming from the path which led to the Bû de la Rue a boy pushing a wheelbarrow. The boy was going towards St. Peter's Port. In the barrow was a portmanteau of brown leather, studded with nails of brass and white metal.

Mess Lethierry called to the boy :

‘Where are you going, my lad?’

The boy stopped, and replied :

‘To the ‘Cashmere.’’

‘What for?’

‘To take this trunk aboard.’

‘Very good; you shall take these three letters too.’

Mess Lethierry opened the drawer of his table, took a piece of string, tied the three letters which he had just written across and across, and threw the packet to the boy, who caught it between his hands.

‘Tell the captain of the “Cashmere” they are my letters, and to take care of them. They are for Germany—Brême *viâ* London.’

‘I can’t speak to the captain, Mess Lethierry.’

‘Why not?’

‘The “Cashmere” is not at the quay.’

‘Ay!’

‘She is in the roads.’

‘Ay, true; on account of the sea.’

‘I can only speak to the man who takes the things aboard.’

‘You will tell him, then, to look to the letters.’

‘Very well, Mess Lethierry.’

‘At what time does the “Cashmere” sail?’

‘At twelve.’

‘The tide will flow at noon; she will have it against her.’

‘But she will have the wind,’ answered the lad:

‘Boy,’ said Mess Lethierry, pointing with his forefinger at the engine in the sloop, ‘do you see that? There is something which laughs at winds and tides.’

The boy put the letters in his pocket, took up the handles of the barrow again, and went on his way towards the town. Mess Lethierry called ‘Douce! Grace!’

Grace opened the door a little way.

‘What is it, Mess?’

‘Come in and wait a moment.’

Mess Lethierry took a sheet of paper, and began to write. If Grace, standing behind him, had been curious, and had leaned forward while he was writing, she might have read as follows:—

‘I have written to Brème for the timber. I have appointments all the morning with carpenters for the estimate. The rebuilding will go on fast. You must go yourself to the Deanery for a licence. It is my wish that the marriage should take place as soon as possible; immediately would be better. I am busy about the Durande. Do you be busy about Déruchette.’

He dated it and signed ‘Lethierry.’ He did

not take the trouble to seal it, but merely folded it in four and handed it to Grace, saying :

‘Take that to Gilliatt.’

‘To the Bâ de la Rue ?’

‘To the Bâ de la Rue.’

BOOK III.

THE DEPARTURE OF THE 'CASHMERE.'

I.

THE HAVELET NEAR THE CHURCH.

WHEN there is a crowd at St. Sampson, St. Peter's Port is soon deserted. A point of curiosity at a given place is like an air-pump. News travel fast in small places. Going to see the funnel of the Durande under Mess Lethierry's window had been, since sunrise, the business of the Guernsey folks. Every other event was eclipsed by this. The death of the Dean of

St. Asaph was forgotten, together with the question of the Reverend Mr. Caudray, his sudden riches, and the departure of the 'Cashmere.' The machinery of the Durande brought back from the Douvres rocks was the order of the day. People were incredulous. The shipwreck had appeared extraordinary, the salvage seemed impossible. Everybody hastened to assure himself of the truth by the help of his own eyes. Business of every kind was suspended. Long strings of townsfolk with their families, from the 'Vesin' up to the 'Mess,' men and women, gentlemen, mothers with children, infants with dolls, were coming by every road or pathway to see 'the thing to be seen' at the Bravées, turning their backs upon St. Peter's Port. Many shops at St. Peter's Port were closed. In the Commercial Arcade there was an absolute 'stagnation in buying and selling. The Durande alone obtained attention. Not a single shopkeeper had had a 'handsell' that morning, except a jeweller, who was surprised at having sold a wedding-ring to

‘A sort of man who appeared in a great hurry, and who asked for the house of the Dean.’ The shops which remained opened were centres of gossip, where loiterers discussed the miraculous salvage. There was not a foot-passenger at the ‘Hyvreuse,’ which is known in these days, nobody knows why, as Cambridge Park; no one was in the High Street, then called the ‘Grande Rue;’ nor in Smith Street, known then only as the Rue des Forges; nobody in Hauteville. The Esplanade itself was deserted. One might have guessed it to be Sunday. A visit from a Royal personage to review the militia at the Anresse could not have emptied the town more completely. All this hubbub about ‘a nobody’ like Gilliatt, caused a good deal of shrugging of the shoulders among persons of grave and correct habits.

* The church of St. Peter’s Port, with its three gable-ends placed side by side, its transept and its steeple, stands at the water’s side at the end of the harbour, and nearly on the landing-place itself, where it welcomes those

who arrive and gives the departing 'God speed.' It represents the capital letter at the beginning of that long line which forms the front of the town towards the sea.

It is both the parish church of St. Peter's Port and the chief place of the Deanery of the whole island. Its officiating minister is the surrogate of the bishop, a clergyman in full orders.

The harbour of St. Peter's Port, a very fine and large port at the present day, was at that epoch, and even up to ten years ago, less considerable than the harbour of St. Sampson. It was enclosed by two enormous thick walls, beginning at the water's edge on both sides, and curving till they almost joined again at the extremities, where there stood a little white lighthouse. Under this lighthouse, a narrow gullet, bearing still the two rings of the chain with which it was the custom to bar the passage in ancient times, formed the entrance for vessels. The harbour of St. Peter's Port might be well compared with the claws of a huge lobster opened

a little way. This kind of pincers took from the ocean a portion of the sea, which it compelled to remain calm. But during the easterly winds the waves rolled heavily against the narrow entrance, the port was agitated, and it was better not to enter. This is what had happened with the 'Cashmere' that day, which had accordingly anchored in the roads.

The vessels, during the easterly winds, preferred this course, which besides saved them the port dues. On these occasions, the boatmen of the town, a hardy race of mariners whom the new port has thrown out of employment, came in their boats to fetch passengers at the landing-place or at stations on the shore, and carried them with their luggage, often in heavy seas, but always without accident, to the vessels about to sail. The east wind blows off the shore, and is very favourable for the passage to England; the vessel at such times rolls, but does not pitch.

When a vessel happened to be in the port, everybody embarked from the quay. When

it was in the roads they took their choice, and embarked from any point of the coast near the moorings.

The 'Havelet' was one of these creeks. This little harbour (which is the signification of the word) was near the town; but was so solitary, that it seemed far off. This solitude was owing to the shelter of the high cliffs of Fort St. George, which overlook this retired inlet. The 'Havelet' was accessible by several paths. The most direct was along the water's side. It had the advantage of leading to the town and to the church in five minutes' walk, and the disadvantage of being covered by the sea twice a day. The other paths were more or less abrupt, and led down to the creek through gaps in the steep rocks. Even in broad daylight, it was dusk in the Havelet. Huge blocks overhanging it on all sides, and thick bushes and brambles cast a sort of soft twilight upon the rocks and waves below. Nothing could be more peaceful than this spot in calm weather; nothing more

tumultuous during heavy seas. There were ends of branches there which were always wet with the foam. In the spring time, the place was full of flowers, of nests, of perfumes, of birds, of butterflies, and bees. Thanks to recent improvements, this wild nook no longer exists. Fine, straight lines have taken the place of these wild features; masonry, quays, and little gardens have made their appearance; earthwork has been the rage, and taste has finally subdued the eccentricities of the cliff, and the irregularities of the rocks below.

II.

DESPAIR CONFRONTS DESPAIR.

IT was a little before ten o'clock in the morning. The crowd at St. Sampson, according to all appearance, was increasing. The multitude, feverish with curiosity, was moving towards the north; and the Havelet, which is in the south, was more deserted than ever.

Notwithstanding this, there was a boat there and a boatman. In the boat was a travelling bag. The boatman seemed to be waiting for some one.

The 'Cashmere' was visible at anchor in the roads. As she did not start till mid-day, there was as yet no sign of moving aboard.

A passer-by, who had listened from one of the ladder-paths up the cliffs overhead, would have heard a murmur of words in the Havelet, and if he had leaned over the overhanging cliff might have seen, at some distance from the boat, in a corner among the rocks and branches, where the eye of the boatman could not reach them, a man and a woman. It was Caudray and Déruchette.

These obscure nooks on the seashore, the chosen places of lady bathers, are not always so solitary as is believed. Persons are sometimes observed and heard there. Those who seek shelter and solitude in them may easily be followed through the thick bushes, and, thanks to the multiplicity and entanglement of the paths, the granite and the shrubs which favour the stolen interview, may also favour the witness

Caudray and Déruchette stood face to face,

looking into each other's eyes, and holding each other by the hand. Déruchette was speaking. Caudray was silent. A tear that had gathered upon his eye-lash hung there and did not fall.

Grief and strong passion were imprinted in his calm, religious countenance. A painful resignation was there too—a resignation hostile to faith, though springing from it. Upon that face, simply devout until then, there was the commencement of a fatal expression. He who had hitherto meditated only on doctrine, had begun to meditate on Fate, an unhealthy meditation for a priest. Faith dissolves under its action. Nothing disturbs the religious mind more than that bending under the weight of the unknown. Life seems a perpetual succession of events, to which man submits. We never know from which direction the sudden blow will come. Misery and happiness enter or make their exit, like unexpected guests. Their laws, their orbit, their principle of gravitation, are beyond man's grasp. Virtue conducts not to

happiness, nor crime to retribution : conscience has one logic, fate another ; and neither coincide. Nothing is foreseen. We live confusedly, and from hand to mouth. Conscience is the straight line, life is the whirlwind, which creates above man's head either black chaos or the blue sky. Fate does not practise the art of gradations. Her wheel turns sometimes so fast that we can scarcely distinguish the interval between one revolution and another, or the link between yesterday and to-day. Caudray was a believer whose faith did not exclude reason, and whose priestly training did not shut him out from passion. Those religious systems which impose celibacy on the priesthood are not without reason for it. Nothing really destroys the individuality of the priest more than love. All sorts of clouds seemed to darken Caudray's soul. He looked too long into Déruchette's eyes. Those two beings worshipped each other.

There was in Caudray's eye the mute adoration of despair.

Déruchette spoke.

‘You must not leave me. I shall not have strength. I thought I could bid you farewell. I cannot. Why did you come yesterday? You should not have come if you were going so soon. I never spoke to you. I loved you; but knew it not. Only that day, when M. Hérode read to us the story of Rebecca, and when your eyes met mine, my cheeks were like fire, and I thought only of how Rebecca’s face must have burnt like mine; and yet, if any one had told me yesterday that I loved you, I might have laughed at it. This is what is so terrible. It has been like a treason. I did not take heed. I went to the church, I saw you, I thought everybody there was like myself. I do not reproach you; you did nothing to make me love you; you did nothing but look at me; it is not your fault if you look at people; and yet that made me love you so much. I did not even suspect it. When you took up the book it was a flood of light; when others took it, it was but a book. You raised your eyes sometimes; you spoke of archangels; oh! you

were my archangel. What you said penetrated my thoughts at once. Before then, I know not even whether I believed in God. Since I have known you, I have learnt to pray. I used to say to Douce, dress me quickly, lest I should be late at the service; and I hastened to the church. Such it was with me to love some one. I did not know the cause. I said to myself, how devout I am becoming. It is from you that I have learnt that I do not go to church for God's service. It is true; I went for your sake. You spoke so well, and when you raised your arms to heaven, you seemed to hold my heart within your two white hands. I was foolish; but I did not know it. Shall I tell you your fault? It was your coming to me in the garden; it was your speaking to me. If you had said nothing, I should have known nothing. If you had gone, I should, perhaps, have been sad, but now I should die. Since I know that I love you, you cannot leave me. Of what are you thinking? You do not seem to listen to me.'

Caudray replied :

‘ You heard what was said last night ? ’

‘ Ah, me ! ’

‘ What can I do against that ? ’

They were silent for a moment. Caudray continued :

‘ There is but one duty left to me. It is to depart.’

‘ And mine to die. Oh ! how I wish there was no sea, but only sky. It seems to me as if that would settle all, and that our departure would be the same. It was wrong to speak to me ; why did you speak to me ? Do not go. What will become of me ? I tell you I shall die. You will be far off when I shall be in my grave. Oh ! my heart will break. I am very wretched ; yet my uncle is not unkind.’

It was the first time in her life that Déruchette had ever said ‘ my uncle.’ Until then she had always said ‘ my father.’

Caudray stepped back, and made a sign to the boatman. Déruchette heard the sound of

the boat-hook among the shingle, and the step of the man on the gunwale of the boat.

‘No! no!’ cried Déruchette.

‘It must be,’ replied Caudray.

‘No! never! For the sake of an engine—impossible. Did you see that horrible man last night? You cannot abandon me thus. You are wise; you can find a means. It is impossible that you bade me come here this morning with the idea of leaving me. I have never done anything to deserve this; you can have no reproach to make me. Is it by that vessel that you intended to sail? I will not let you go. You shall not leave me. Heaven does not open thus to close so soon. I know you will remain. Besides, it is not yet time. Oh! how I love you.’

And pressing closely to him, she interlaced the fingers of each hand behind his neck, as if partly to make a bond of her two arms for detaining him, and partly with her joined hands to pray. He moved away this gentle restraint, while Déruchette resisted as long as she could.

Déruchette sank upon a projection of the rock covered with ivy, lifting by an unconscious movement the sleeve of her dress up to the elbow, and exhibiting her graceful arm. A pale suffused light was in her eyes. The boat was approaching.

Caudray held her head between his hands. He touched her hair with a sort of religious care, fixed his eyes upon her for some moments, then kissed her on the forehead fervently, and in an accent trembling with anguish, and in which might have been traced the uprooting of his soul, he uttered the word which has so often resounded in the depths of the human heart, 'Farewell!'

Déruchette burst into loud sobs.

At this moment they heard a voice near them, which said solemnly and deliberately :

'Why should you not be man and wife?'

Caudray raised his head. Déruchette looked up.

Gilliatt stood before them.

He had approached by a bye-path.

He was no longer the same man that he had appeared on the previous night. He had arranged his hair, shaved his beard, put on shoes, and a white shirt, with a large collar turned over, sailor fashion. He wore a sailor's costume, but all was new. A gold ring was on his little finger. He seemed profoundly calm. His sunburnt skin had become pale: a hue of sickly bronze overspread it.

They looked at him astonished. Though so changed, Déruchette recognized him. But the words which he had spoken were so far from what was passing in their minds at that moment, that they had left no distinct impression.

Gilliatt spoke again :

‘Why should you say farewell? Be man and wife, and go together.’

Déruchette started. A trembling seized her from head to foot.

Gilliatt continued :

‘Miss Lethierry is a woman. She is of age. It depends only on herself. Her uncle is but her uncle. You love each other——’

Déruchette interrupted in a gentle voice, and asked, 'How came you here?'

'Make yourselves one,' repeated Gilliatt.

Déruchette began to have a sense of the meaning of his words. She stammered out :

'My poor uncle!'

'If the marriage was yet to be,' said Gilliatt, 'he would refuse. When it is over he will consent. Besides, you are going to leave here. When you return he will forgive.'

Gilliatt added, with a slight touch of bitterness, 'And then he is thinking of nothing just now but the rebuilding of his boat. This will occupy his mind during your absence. The Durande will console him.'

'I cannot,' said Déruchette, in a state of stupor which was not without its gleam of joy. 'I must not leave him unhappy.'

'It will be but for a short time,' answered Gilliatt.

Cadray and Déruchette had been, as it were, bewildered. They recovered themselves

now. The meaning of Gilliatt's words became plainer as their surprise diminished. There was a slight cloud still before them ; but their part was not to resist. We yield easily to those who come to save. Objections to a return into Paradise are weak. There was something in the attitude of Déruchette, as she leaned imperceptibly upon her lover, which seemed to make common cause with Gilliatt's words. The enigma of the presence of this man, and of his utterances, which, in the mind of Déruchette in particular, produced various kinds of astonishment, was a thing apart. He said to them, ' Be man and wife ! ' This was clear ; if there was responsibility, it was his. Déruchette had a confused feeling that, for many reasons, he had the right to decide upon her fate. Caudray murmured, as if plunged in thought, ' An uncle is not a father.'

His resolution was corrupted by the sudden and happy turn in his ideas. The probable scruples of the clergyman melted, and dissolved in his heart's love for Déruchette.

Gilliatt's tone became abrupt and harsh, and like the pulsations of fever.

'There must be no delay,' he said. 'You have time, but that is all. Come.'

Caudray observed him attentively; and suddenly exclaimed:

'I recognize you. It was you who saved my life.'

Gilliatt replied:

'I think not.'

'Yonder,' said Caudray, 'at the extremity of the Banques.'

'I do not know the place,' said Gilliatt.

'It was on the very day that I arrived here.'

'Let us lose no time,' interrupted Gilliatt.

'And if I am not deceived, you are the man whom we met last night.'

'Perhaps.'

'What is your name?'

Gilliatt raised his voice:

'Boatman! wait there for us. We shall return soon. You asked me, Miss Lethierry, how I came to be here. The answer is very

simple. I walked behind you. You are twenty-one. In this country, when persons are of age, and depend only on themselves, they may be married immediately. Let us take the path along the water-side. It is passable; the tide will not rise here till noon. But lose no time. Come with me.'

Déruchette and Caudray seemed to consult each other by a glance. They were standing close together motionless. They were intoxicated with joy. There are strange hesitations sometimes on the edge of the abyss of happiness. They understood, as it were, without understanding.

'His name is Gilliatt,' whispered Déruchette.

Gilliatt interrupted them with a sort of tone of authority.

'What do you linger for?' he asked. 'I tell you to follow me.'

'Whither?' asked Caudray.

'There!'

And Gilliatt pointed with his finger towards the spire of the church.

Gilliatt walked on before, and they followed him. His step was firm ; but they walked unsteadily.

As they approached the church, an expression dawned upon those two pure and beautiful countenances, which was soon to become a smile. The approach to the church lighted them up. In the hollow eyes of Gilliatt, there was the darkness of night. The beholder might have imagined that he saw a spectre leading two souls to Paradise.

Caudray and Déruchette scarcely took count of what had happened. The interposition of this man was like the branch clutched at by the drowning. They followed their guide with the docility of despair leaning on the first comer. Those who feel themselves near death easily accept the accident which seems to save. Déruchette, more ignorant of life, was more confident. Caudray was thoughtful. Déruchette was of age, it was true. The English formalities of marriage are simple, especially in primitive parts, where the clergyman has

almost a discretionary power ; but would the Dean consent to celebrate the marriage without even inquiring whether the uncle consented ? This was the question. Nevertheless, they could learn. In any case there would be but a delay.

But what was this man ? and if it was really he whom Lethierry the night before had declared should be his son-in-law, what could be the meaning of his actions ? The very obstacle itself had become a providence. Caudray yielded ; but his yielding was only the rapid and tacit assent of a man who feels himself saved from despair.

The pathway was uneven, and sometimes wet and difficult to pass. Caudray, absorbed in thought, did not observe the occasional pools of water or the heaps of shingle. But from time to time Gilliatt turned and said to him, 'Take heed of those stones. Give her your hand.'

III.

THE FORETHOUGHT OF SELF-SACRIFICE.

IT struck ten as they entered the church.

By reason of the early hour, and also on account of the desertion of the town that day, the church was empty.

At the farther end, however, near the table, which in the reformed church fulfils the place of the altar, there were three persons. They were the Dean, his evangelist, and the registrar. The Dean, who was the Reverend Jaquemin Hérode, was seated; the evangelist and the registrar stood beside him.

A book was open upon the table.

Beside him, upon a credence-table, was another book. It was the parish register, and also open; and an attentive eye might have remarked a page on which was some writing, of which the ink was not yet dry. By the side of the register were a pen and a writing-desk.

The Reverend Jaquemin Hérode rose on perceiving Caudray.

‘I have been expecting you,’ he said. ‘All is ready.’

The Dean, in fact, wore his officiating robes.

Caudray looked towards Gilliatt.

The Reverend Doctor added, ‘I am at your service, brother;’ and he bowed.

It was a bow which neither turned to right or left. It was evident from the direction of the Dean’s gaze that he did not recognize the existence of any one but Caudray, for Caudray was a clergyman and a gentleman. Neither Déruchette, who stood aside, nor Gilliatt, who was in the rear, were included in the salutation.

His look was a sort of parenthesis in which none but Caudray were admitted. The observance of these little niceties constitutes an important feature in the maintenance of order and the preservation of society.

The Dean continued, with a graceful and dignified urbanity :

‘I congratulate you, my colleague, from a double point of view. You have lost your uncle, and are about to take a wife ; you are blessed with riches on the one hand, and happiness on the other. Moreover, thanks to the boat which they are about to rebuild, Mess Lethierry will also be rich ; which is as it should be. Miss Lethierry was born in this parish, I have verified the date of her birth in the register. She is of age, and at her own disposal. Her uncle, too, who is her only relative, consents. You are anxious to be united immediately on account of your approaching departure. This I can understand ; but this being the marriage of the rector of the parish, I should have been gratified to have

seen it associated with a little more solemnity. I will consult your wishes by not detaining you longer than necessary. The essentials will be soon complied with. The form is already drawn up in the register, and it requires only the names to be filled in. By the terms of the law and custom, the marriage may be celebrated immediately after the inscription. The declaration necessary for the licence has been duly made. I take upon myself a slight irregularity; for the application for the licence ought to have been registered seven days in advance; but I yield to necessity and the urgency of your departure. Be it so, then. I will proceed with the ceremony. My evangelist will be the witness for the bridegroom; as regards the witness for the bride——

The Dean turned towards Gilliatt. Gilliatt made a movement of his head.

‘That is sufficient,’ said the Dean.

Caudray remained motionless; Déruchette was happy, but no less powerless to move.

‘Nevertheless,’ continued the Dean, ‘there is still an obstacle.’

Déruchette started.

The Dean continued :

‘The representative here present of Mess Lethierry applied for the licence for you, and has signed the declaration on the register.’ And with the thumb of his left hand the Dean pointed to Gilliatt, which prevented the necessity of his remembering his name. ‘The messenger from Mess Lethierry,’ he added, ‘has informed me this morning that being too much occupied to come in person, Mess Lethierry desired that the marriage should take place immediately. This desire, expressed verbally, is not sufficient. In consequence of having to grant the licence, and of the irregularity which I take upon myself, I cannot proceed so rapidly without informing myself from Mess Lethierry personally, unless some one can produce his signature. Whatever might be my desire to serve you, I cannot be satisfied with a mere message. I must have some written document.’

‘That need not delay us,’ said Gilliatt. And he presented a paper to the Dean. The Dean took it, perused it by a glance, seemed to pass over some lines as unimportant, and read aloud: ‘Go to the Dean for the licence. I wish the marriage to take place as soon as possible. Immediately would be better.’

He placed the paper on the table, and proceeded:

‘It is signed, Lethierry. It would have been more respectful to have addressed himself to me. But since I am called on to serve a colleague, I ask no more.’

Caudray glanced again at Gilliatt. There are moments when mind and mind comprehend each other. Caudray felt that there was some deception; he had not the strength of purpose, perhaps he had not the idea of revealing it. Whether in obedience to a latent heroism, of which he had begun to obtain a glimpse, or whether from a deadening of the conscience, arising from the suddenness

of the happiness placed within his reach, he uttered no word.

The Dean took the pen, and aided by the clerk, filled up the spaces in the page of the register; then he rose, and by a gesture invited Caudray and Déruchette to approach the table.

The ceremony commenced. It was a strange moment. Caudray and Déruchette stood beside each other before the minister. He who has ever dreamed of a marriage in which he himself was chief actor may conceive something of the feeling which they experienced.

Gilliatt stood at a little distance in the shadow of the pillars.

Déruchette, on rising in the morning, desperate, thinking only of death and its associations, had dressed herself in white. Her attire, which had been associated in her mind with mourning, was suited to her nuptials. A white dress is all that is necessary for the bride.

A ray of happiness was visible upon her face. Never had she appeared more beautiful. Her features were remarkable for prettiness rather

than what is called beauty. Their fault, if fault it be, lay in a certain excess of grace. Déruchette in repose, that is, neither disturbed by passion or grief, was graceful above all. The ideal Virgin is the transfiguration of a face like this. Déruchette, touched by her sorrow and her love, seemed to have caught that higher and more holy expression. It was the difference between the field daisy and the lily.

The tears had scarcely dried upon her cheeks; one perhaps still lingered in the midst of her smiles. Traces of tears indistinctly visible form a pleasing but sombre accompaniment of joy.

The Dean, standing near the table, placed his finger upon the open book, and asked in a distinct voice whether they knew of any impediment to their union.

There was no reply.

‘Amen!’ said the Dean.

Caudray and Déruchette advanced a step or two towards the table.

‘Joseph Ebenezzer Caudray, wilt thou have this woman to be thy wedded wife?’

Caudray replied ‘I will.’

The Dean continued :

‘Durande, Déruchette Lethierry, wilt thou have this man to be thy wedded husband?’ .

Déruchette, in an agony of soul, springing from her excess of happiness, murmured rather than uttered—

‘I will.’

Then followed the beautiful form of the Anglican marriage service. The Dean looked around, and in the twilight of the church uttered the solemn words :

‘Who giveth this woman to be married to this man?’

Gilliatt answered, ‘I do!’

There was an interval of silence. Caudray and Déruchette felt a vague sense of oppression in spite of their joy.

The Dean placed Déruchette’s right hand in Caudray’s; and Caudray repeated after him :

‘I take thee, Durande Déruchette, to be my

wedded wife for better for worse, for richer for poorer, in sickness and in health, to love and to cherish till death do us part; and thereto I plight thee my troth.'

The Dean then placed Caudray's right hand in that of Déruchette, and Déruchette said after him :

' I take thee to be my wedded husband for better for worse, for richer for poorer, in sickness or in health, to love and to cherish till death do us part; and thereto I plight thee my troth.'

The Dean asked, ' Where is the ring ? ' The question took them by surprise. Caudray had no ring; but Gilliatt took off the gold ring which he wore upon his little finger. It was probably the wedding-ring which had been sold that morning by the jeweller in the Commercial Arcade.

The Dean placed the ring upon the book; then handed it to Caudray, who took Déruchette's little trembling left hand, passed the ring over her fourth finger, and said :

‘ With this ring I thee wed ! ’

‘ In the name of the Father, and of the Son, and of the Holy Ghost,’ continued the Dean.

‘ Amen,’ said his evangelist.

Then the Dean said, ‘ Let us pray.’

Caudray and Déruchette turned towards the table, and knelt down.

Gilliatt, standing by, inclined his head.

So they knelt before God ; while he seemed to bend under the burden of his fate.

IV.

'FOR YOUR WIFE WHEN YOU MARRY.

AS they left the church they could see the 'Cashmere' making preparations for her departure.

'You are in time,' said Gilliatt.

They chose again the path leading to the Havellet.

Caudray and Déruchette went before, Gilliatt this time walking behind them. They were two somnambulists. Their bewilderment had not passed away, but only changed in

form. They took no heed of whither they were going, or of what they did. They hurried on mechanically, scarcely remembering the existence of anything, feeling that they were united for ever, but scarcely able to connect two ideas in their minds. In ecstasy like theirs it is as impossible to think as it is to swim in a torrent. In midst of their trouble and darkness they had been plunged in a whirlpool of delight; they bore a paradise within themselves. They did not speak, but conversed with each other by the mysterious sympathy of their souls. Déruchette pressed Caudray's arm to her side.

The footsteps of Gilliatt behind them reminded them now and then that he was there. They were deeply moved, but could find no words. The excess of emotion results in stupor. Theirs was delightful, but overwhelming. They were man and wife: every other idea was postponed to that. What Gilliatt had done was well; that was all that they could grasp. They experienced towards

their guide a deep but vague gratitude in their hearts. Déruchette felt that there was some mystery to be explained, but not now. Meanwhile they accepted their unexpected happiness. They felt themselves controlled by the abruptness and decision of this man who conferred on them so much happiness with a kind of authority. To question him, to talk with him seemed impossible. Too many impressions rushed into their minds at once for that. Their absorption was complete.

Events succeed each other sometimes with the rapidity of hailstones. Their effect is overpowering; they deaden the senses. Falling upon existences habitually calm, they render incidents rapidly unintelligible even to those whom they chiefly concern; we become scarcely conscious of our own adventures; we are overwhelmed without guessing the cause, or crowned with happiness without comprehending it. For some hours Déruchette had been subjected to every kind of emotion: at first, surprise and delight at meeting Caudray

in the garden; then horror at the monster whom her uncle had presented as her husband; then her anguish when the angel of her dreams spread his wings and seemed about to depart; and now her joy, a joy such as she had never known before, founded on an inexplicable enigma; the monster of last night himself restoring her lover; marriage arising out of her torture; this Gilliatt, the evil destiny of last night, become to-day her saviour! She could explain nothing to her own mind. It was evident that all the morning Gilliatt had had no other occupation than that of preparing the way for their marriage: he had done all: he had answered for Mess Lethierry, seen the Dean, obtained the licence, signed the necessary declaration; and thus the marriage had been rendered possible. But Déruchette understood it not. If she had, she could not have comprehended the reasons. They did nothing but close their eyes to the world, and—grateful in their hearts—yield themselves up to the guidance of this good demon. There was no time

for explanations, and expressions of gratitude seemed too insignificant. They were silent in their trance of love.

The little power of thought which they retained was scarcely more than sufficient to guide them on their way—to enable them to distinguish the sea from the land, and the ‘Cashmere’ from every other vessel.

In a few minutes they were at the little creek.

Caudray entered the boat first. At the moment when Déruchette was about to follow, she felt her sleeve held gently. It was Gilliatt, who had placed his finger upon a fold of her dress.

‘Madam,’ he said, ‘you are going on a journey unexpectedly. It has struck me that you would have need of dresses and clothes. You will find a trunk aboard the ‘Cashmere,’ containing a lady’s clothing. It came to me from my mother. It was intended for my wife if I should marry. Permit me to ask your acceptance of it.’

Déruchette, partially aroused from her dream, turned towards him. Gilliatt continued in a voice which was scarcely audible :

‘I do not wish to detain you, madam, but I feel that I ought to give you some explanation. On the day of your misfortune, you were sitting in the lower room ; you uttered certain words ; it is easy to understand that you have forgotten them. We are not compelled to remember every word we speak. Mess Lethierry was in great sorrow. It was certainly a noble vessel, and one that did good service. The misfortune was recent ; there was a great commotion. Those are things which one naturally forgets. It was only a vessel wrecked among the rocks ; one cannot be always thinking of an accident. But what I wished to tell you was, that as it was said that no one would go, I went. They said it was impossible ; but it was not. I thank you for listening to me a moment. You can understand, madam, that if I went there, it was not with the thought of displeasing you. This is a thing, besides, of old date. I know

that you are in haste. If there was time—if we could talk about this, you might perhaps remember. But this is all useless now. The history of it goes back to a day when there was snow upon the ground. And then on one occasion that I passed you, I thought that you looked kindly on me. This is how it was. With regard to last night, I had not had time to go to my home. I came from my labour; I was all torn and ragged; I startled you, and you fainted. I was to blame; people do not come like that to strangers' houses; I ask your forgiveness. This is nearly all I had to say. You are about to sail. You will have fine weather; the wind is in the east. Farewell. You will not blame me for troubling you with these things. This is the last minute.'

'I am thinking of the trunk you spoke of,' said Déruchette. 'Why do you not keep it for your wife, when you marry?'

'It is most likely, madam,' replied Gilliatt, 'that I shall never marry.'

‘That would be a pity,’ said Déruchette; you are so good.’

And Déruchette smiled. Gilliatt returned her smile.

Then he assisted her to step into the boat.

In less than a quarter of an hour afterwards, Caudray and Déruchette were aboard the ‘Cashmere’ in the roads.

V.

THE GREAT TOMB.

GILLIATT walked along the water-side, passed rapidly through St. Peter's Port, and then turned towards St. Sampson by the seashore. In his anxiety to meet no one whom he knew, he avoided the highways now filled with foot passengers by his great achievement.

For a long time, as the reader knows, he had had a peculiar manner of traversing the country in all parts without being observed. He knew the bye-paths, and favoured solitary and winding

routes ; he had the shy habits of a wild beast who knows that he is disliked, and keeps at a distance. When quite a child, he had been quick to feel how little welcome men showed in their faces at his approach, and he had gradually contracted that habit of being alone which had since become an instinct.

He passed through the Esplanade, then by the Salerie. Now and then he turned and looked behind him at the 'Cashmere' in the roads which was beginning to set her sails. There was little wind ; Gilliatt went faster than the 'Cashmere.' He walked with downcast eyes among the lower rocks at the water's edge. The tide was beginning to rise.

Suddenly he stopped, and, turning his back, contemplated for some minutes a group of oaks beyond the rocks which concealed the road to Vale. They were the oaks at the spot called the Basses Maisons. It was there that Déruchette once wrote with her finger the name of Gilliatt in the snow. Many a day had passed since that snow had melted away.

Then he pursued his way.

The day was beautiful ; more beautiful than any that had yet been seen that year. It was one of those spring days when May suddenly pours forth all its beauty, and when Nature seems to have no thought but to rejoice and be happy. Amidst the many murmurs from forest and village, from the sea and the air, a sound of cooing could be distinguished. The first butterflies of the year were resting on the early roses. Everything in nature seemed new—the grass, the mosses, the leaves, the perfumes, the rays of light. The sun shone as if it had never shone before. The pebbles seemed bathed in coolness. Birds but lately fledged sang out their deep notes from the trees, or fluttered among the boughs in their attempts to use their new-found wings. There was a chattering all together of goldfinches, pewits, tomtits, woodpeckers, bullfinches, and thrushes. The blossoms of lilacs, May lilies, daphnes, and melilots mingled their various hues in the thickets. A beautiful kind of water-weed

peculiar to Guernsey covered the pools with an emerald green; where the kingfishers and the water-wagtails, which make such graceful little nests, came down to bathe their wings. Through every opening in the branches appeared the deep blue sky. A few lazy clouds followed each other in the azure depths. The ear seemed to catch the sound of kisses sent from invisible lips. Every old wall had its tufts of wallflowers. The plum-trees and laburnums were in blossom; their white and yellow masses gleamed through the interlacing boughs. The spring showered all her gold and silver on the woods. The new shoots and leaves were green and fresh. Calls of welcome were in the air; the approaching summer opened her hospitable doors for birds coming from afar. It was the time of the arrival of the swallows. The clusters of furze-bushes bordered the steep sides of hollow roads in anticipation of the clusters of the hawthorn. The pretty and the beautiful reigned side by side; the magnificent and the graceful, the

great and the little, had each their place. No note in the great concert of nature was lost. Green microscopic beauties took their place in the vast universal plan in which all seemed distinguishable as in limpid water. Everywhere a divine fullness, a mysterious sense of expansion, suggested the unseen effort of the sap in movement. Glittering things glittered more than ever; loving natures became more tender. There was a hymn in the flowers, and a radiance in the sounds of the air. The wide-diffused harmony of nature burst forth on every side. All things which felt the dawn of life invited others to put forth shoots. A movement coming from below, and also from above, stirred vaguely all hearts susceptible to the scattered and subterranean influence of germination. The flower shadowed forth the fruit; young maidens dreamed of love. It was nature's universal bridal. It was fine, bright, and warm; through the hedges in the meadows children were seen laughing and playing at their games. The fruit-trees filled

the orchards with their heaps of white and pink blossom. In the fields were primroses, cowslips, milfoil, daffodils, daisies, speedwell, jacinths, and violets. Blue borage and yellow irises swarmed with those beautiful little pink stars which flower always in groups, and are hence called 'companions.' Creatures with golden scales glided between the stones. The flowering houseleek covered the thatched roofs with purple patches. Women were plaiting hives in the open air; and the bees were abroad, mingling their humming with the murmurs from the sea.

When Gilliatt arrived at St. Sampson, the water had not yet risen at the further end of the harbour, and he was able to cross it dry-footed unperceived behind the hulls of vessels fixed for repair. A number of flat stones were placed there at regular distances to make a causeway.

He was not observed. The crowd was at the other end of the port, near the narrow entrance, by the Bravées. There his name was

in every mouth. They were, in fact, speaking about him so much that none paid attention to him. He passed, sheltered in some degree by the very commotion that he had caused.

He saw from afar the sloop in the place where he had moored it, with the funnel standing between its four chains; observed a movement of carpenters at their work, and confused outlines of figures passing to and fro; and he could distinguish the loud and cheery voice of Mess Lethierry giving orders.

He threaded the narrow alleys behind the Bravées. There was no one there beside him. All curiosity was concentrated on the front of the house. He chose the footpath alongside the low wall of the garden, but stopped at the angle where the wild mallow grew. He saw once more the stone where he used to pass his time; saw once more the wooden garden seat where Déruchette was accustomed to sit, and glanced again at the pathway of the alley where he had seen the embrace of two shadows which had vanished.

He soon went on his way, climbed the hill of Vale Castle, descended again, and directed his steps towards the Bû de la Rue.

The Houmet-Paradis was a solitude.

His house was in the same state in which he had left it in the morning, after dressing himself to go to St. Peter's Port.

A window was open, through which his bagpipe might have been seen hanging to a nail upon the wall.

Upon the table was the little 'Bible' given to him in token of gratitude by the stranger whom he now knew as Caudray.

The key was in the door. He approached; placed his hand upon it; turned it twice in the lock, put the key in his pocket, and departed.

He walked not in the direction of the town, but towards the sea.

He traversed his garden 'diagonally, taking the shortest way without regard to the beds, but taking care not to tread upon the plants which he placed there, because he had heard that they were favourites with Déruchette.

He crossed the parapet wall, and let himself down upon the rocks.

Going straight on, he began to follow the long ridge of rocks which connected the Bâ de la Rue with the great natural obelisk of granite rising erect from the sea, which was known as the Beast's Horn. This was the place of the Gild-Holm-'Ur seat.

He strode on from block to block like a giant among mountains. To make long strides upon a row of breakers is like walking upon the ridge of a roof.

A fisherwoman with dredge-nets, who had been walking naked-footed among the pools of sea-water at some distance, and had just regained the shore, called to him, 'Take care; the tide is coming.' But he held on his way.

Having arrived at the great rock of the point, the Horn, which rises like a pinnacle from the sea, he stopped. It was the extremity of the promontory.

He looked around.

'Out at sea a few sailing boats at anchor were

fishing. Now and then rivulets of silver glittered among them in the sun: it was the water running from the nets. The 'Cashmere' was not yet off St. Sampson. She had set her maintopsail, and was between Herm and Jethou.

Gilliatt rounded the rock, and came under the Gild-Holm-'Ur seat, at the foot of that kind of abrupt stairs where, less than three months before, he had assisted Caudray to come down. He ascended.

The greater number of the steps were already under water. Two or three only were still dry, by which he climbed.

The steps led up to the Gild-Holm-'Ur seat. He reached the niche, contemplated it for a moment, pressed his hand upon his eyes, and let it glide gently from one eyelid to the other—a gesture by which he seemed to obliterate the memory of the past—then sat down in the hollow, with the perpendicular wall behind him, and the ocean at his feet.

The 'Cashmere' at that moment was passing

the great round half-submerged tower, defended by one serjeant and a cannon, which marks the half way in the roads between Herm and St. Peter's Port.

A few flowers stirred among the crevices in the rock about Gilliatt's head. The sea was blue as far as eye could reach. The wind came from the east; there was a little surf in the direction of the island of Sark, of which only the western side is visible from Guernsey. In the distance appeared the coast of France like a mist, with the long yellow strips of sand about Carteret. Now and then a white butterfly fluttered by. The butterflies frequently fly out to sea.

The breeze was very slight. The blue expanse, both above and below, was tranquil. Not a ripple agitated those species of serpents, of an azure more or less dark, which indicate on the surface of the sea the lines of sunken rocks.

The 'Cashmere,' little moved by the wind, had set her topsail and studdingsails to catch the

breeze. All her canvas was spread, but the wind being a side one her studdingsails only compelled her to hug the Guernsey coast more closely. She had passed the beacon of St. Sampson, and was off the hill of Vale Castle. The moment was approaching when she would double the point of the Bû de la Rue.

Gilliatt watched her approach.

The air and sea were still. The tide rose not by waves, but by an imperceptible swell. The level of the water crept upward without a palpitation. The subdued murmur from the open sea was soft as the breathing of a child.

In the direction of the harbour of St. Sampson, faint echoes could be heard of carpenters' hammers. The carpenters were probably the workmen constructing the tackle-gear and apparatus for removing the engine from the sloop. The sounds, however, scarcely reached Gilliatt by reason of the mass of granite at his back.

The 'Cashmere' approached with the slowness of a phantom.

Gilliatt watched it still.

Suddenly a touch and a sensation of cold caused him to look down. The sea had reached his feet.

He lowered his eyes, then raised them again.

The 'Cashmere' was quite near.

The rock in which the rains had hollowed out the Gild-Holm-'Ur seat was so completely vertical, and there was so much water at its base, that in calm weather vessels were able to pass without danger within a few cables' lengths.

The 'Cashmere' was abreast of the rock. It rose straight upwards as if it had grown out of the water; or like the lengthening out of a shadow. The rigging showed black against the heavens and in the magnificent expanse of the sea. The long sails, passing for a moment over the sun, became lighted up with a singular glory and transparence. The water murmured indistinctly; but no other noise marked the majestic gliding of that outline. The deck was as visible as if he had stood upon it.

The steersman was at the helm; a cabin-boy was climbing the shrouds; a few passengers leaning on the bulwarks were contemplating the beauty of the scene. The captain was smoking; but nothing of all this was seen by Gilliatt.

There was a spot on the deck on which the broad sunlight fell. It was on this corner that his eyes were fixed. In this sunlight were Déruchette and Caudray. They were sitting together side by side, like two birds, warming themselves in the noonday sun, upon one of those covered seats with a little awning which well-ordered packet-boats provided for passengers, and upon which was the inscription, when it happened to be an English vessel, 'For ladies only.' Déruchette's head was leaning upon Caudray's shoulder; his arm was around her waist; they held each other's hands with their fingers interwoven. A celestial light was discernible in those two faces formed by innocence. Their chaste embrace was expressive of their earthly union and their purity

of soul. The seat was a sort of alcove, almost a nest; it was at the same time a glory round them; the tender aureola of love passing into a cloud.

The silence was like the calm of heaven.

Caudray's gaze was fixed in contemplation. Déruchette's lips moved; and, amidst that perfect silence, as the wind carried the vessel near shore, and it glided within a few fathoms of the Gild-Holm-'Ur seat, Gilliatt heard the tender and musical voice of Déruchette exclaiming: —

‘Look yonder. It seems as if there were a man upon the rock.’

The vessel passed.

Leaving the promontory of the Bû de la Rue behind, the ‘Cashmere’ glided on upon the waters. In less than a quarter of an hour, her masts and sails formed only a white obelisk, gradually decreasing against the horizon. Gilliatt felt that the water had reached his knees.

He contemplated the vessel speeding on her way.

The breeze freshened out at sea. He could

see the 'Cashmere' run out her lower studding-sails and her staysails, to take advantage of the rising wind. She was already clear of the waters of Guernsey. Gilliatt followed the vessel with his eyes.

The waves had reached his waist.

The tide was rising: time was passing away.

The sea-mews and cormorants flew about him restlessly, as if anxious to warn him of his danger. It seemed as if some of his old companions of the Douvres rocks flying there had recognized him.

An hour had passed.

The wind from the sea was scarcely felt in the roads; but the form of the 'Cashmere' was rapidly growing less. The sloop, according to all appearance, was sailing fast. It was already nearly off the Casquets.

There was no foam around the Gild-Holm-Ur; no wave beat against its granite sides. The water rose peacefully. It was nearly level with Gilliatt's shoulders.

Another hour had passed.

The 'Cashmere' was beyond the waters of Aurigny. The Ortach rock concealed it for a moment; it passed behind it, and came forth again as from an eclipse. The sloop was veering to the north upon the open sea. It was now only a point glittering in the sun.

The birds were hovering about Gilliatt, uttering short cries. Only his head was now visible. The tide was nearly at the full. Evening was approaching. Behind him, in the roads, a few fishing-boats were making for the harbour.

Gilliatt's eyes continued fixed upon the vessel in the horizon. Their expression resembled nothing earthly. A strange lustre shone in their calm and tragic depths. There was in them the peace of vanished hopes, the calm but sorrowful acceptance of an end far different from his dreams. By degrees the dusk of heaven began to darken in them, though gazing still upon the point in space. At the same moment the wide waters round the Gild-Holm-'Ur and the vast gathering twilight closed upon them.

The 'Cashmere,' now scarcely perceptible, had become a mere spot in the thin haze.

Gradually the spot, which was but a shape, grew paler.

Then it dwindled, and finally disappeared.

At the moment when the vessel vanished on the line of the horizon, the head of Gilliatt disappeared. Nothing was visible now but the sea.

THE END.

MARCH 30, 1866.

SAMPSON LOW & Co.'s
NEW NOVELS.

UNCONVENTIONAL. By THOMAS SUTTON, B.A.
3 vols., post 8vo, 24s.

The WHITE FAVOUR. By HENRY HOLL, Author of
'The King's Mail.' 3 vols., post 8vo, 24s.

A CASUAL ACQUAINTANCE. By Mrs. DUFFUS
HARDY. 2 vols., post 8vo, 16s.

The STORY of KENNETT. By BAYARD TAYLOR.
2 vols., post 8vo, 16s.

NEW BOOKS.

A BIOGRAPHY of ADMIRAL SIR B. P. V. BROKE,
Bart., K.C.B. By the Rev. JOHN G. BRIGHTON, Rector of Kemp
Town. Dedicated, by express permission, to His Royal Highness
Prince Alfred. With numerous Illustrations. 8vo, cloth, 20s.

A CATALOGUE of all the BOOKS published in GREAT
BRITAIN during the Year 1865; with the Size, Price, Pub-
lisher, and Month of Publication. 8vo. [Just ready.]

SOCIAL LIFE of the CHINESE; with some Account
of their Religion, Governmental, Educational, and Business
Customs and Opinions. By the Rev. J. DOOLITTLE, Fourteen
Years Member of the Fuhchou Mission of the American Board.
With 150 Illustrations. 3 vols., 8vo, 24s.

'The book before us supplies a large quantity of minute and valuable information concerning a country of high commercial and national importance, and as to which the amount of popular information is even more than ordinarily scanty. The Author speaks with the authority of an eye-witness; and the minuteness of detail which his work exhibits will, to most readers, go far to establish its trustworthiness.'
—SATURDAY REVIEW.

'We have no hesitation in saying that from these pages may be gathered more information about the social life of the Chinese than can be obtained from any other source. The importance of the work as a key to a right understanding of the character of so vast a portion of the human race ought to insure it an extensive circulation.'—ATHENÆUM.

London: SAMPSON LOW, SON, & MARSTON, Milton House,
Ludgate Hill.

Sampson Low & Co.'s New Books—continued.

TURKEY. By **J. LEWIS FARLEY, F.S.S.,** Author of 'Two Years in Syria.' With a Portrait of His Highness Fuad Pacha. 8vo. 12s.

'The Author, who has been long acquainted with the country, aims to give a fair insight into its rise, progress, and present condition; and in one chapter furnishes the most coherent statement of its fiscal system and financial liabilities that has yet been presented.'—TIMES.

'Mr. Farley has produced a sound and solid work on the actual state of the Ottoman Empire; he has access to official papers; and he brings a large personal experience of the country to bear upon the topics discussed.'—ATHENÆUM.

LETTERS on ENGLAND. By **LOUIS BLANC.** 2 vols., post 8vo, 16s.

A THOUSAND MILES in the 'ROB ROY' CANOE, on the Danube, Moselle, Rhine, Reuss, Aar, Marne, Thames, Main, Seine, Meuse, and the Lakes of Constance and Lucerne, &c. By **J. MACGREGOR,** Trin. Coll., Cambridge, Barrister-at-Law. With Illustrations. Small post 8vo, 5s.

TRAVELLING in SPAIN. 8vo. Illustrated. [*Next month.*]

A HISTORY of SAVINGS BANKS: with an Account of the Origin and Progress of Mr Gladstone's Financial Measures for Post Office Banks, Government Annuities, and Government Life Insurance. By **WILLIAM LEWINS,** Author of 'Her Majesty's Mails.' Dedicated by permission to the Chancellor of the Exchequer. 8vo. [*Shortly.*]

The STRUCTURE of ANIMAL LIFE. By Prof. **LOUIS AGASSIZ.** 1 vol. 8vo, with 46 Illustrations, 10s. 6d.

Contents.

1. Four Different Plans of Structure among Animals.
2. Relative Standing or Gradation of the Animal Kingdom.
3. Remote Antiquity of Animal Life as Shown in the Coral Reefs.
4. Physical History of the Earth—Man the Ultimate Object.
5. Triple Coincidence in the Succession, Gradation, and Growth of Animals.
6. Evidence of an Intelligent and constantly Creative Mind in the Plans and Variations of Structure.

London: **SAMPSON LOW, SON, & MARSTON,** Milton House, Ludgate Hill.

MILTON HOUSE, LUDGATE HILL, LONDON.

When the price is not given, the work was not ready at the time of issuing this list.

[February 1, 1866.]

NEW ILLUSTRATED WORKS.

THE GREAT SCHOOLS OF ENGLAND. A

History of the Foundation, Endowments, and Discipline of the chief Seminaries of Learning in England; including Eton, Winchester, Westminster, St. Paul's, Charterhouse, Merchant Taylors', Harrow, Rugby, Shrewsbury, &c; with notices of distinguished Scholars. By Howard Staunton,

Esq. With numerous Illustrations. One volume 8vo., handsomely bound in cloth, price 12s.

"The book is as full of solid matter as of gossiping narrative and pleasant anecdote. As a handbook to our great schools Mr. Staunton's volume will have a wide class of readers."—*Athenaeum*

"Cannot fail to be interesting to all fathers and mothers, and it appeals to the sympathies of everyone who has been a boy, and has been educated at a public school. Good store of anecdote, amusing and pathetic, has been provided; and the exquisite letters written to the famous poet, soldier, and great man, Sir Philip Sydney, by his father and mother, when the future Scipio, Cicero, and Petrarch of his time was a boy at Shrewsbury, are wonderfully moving, and worthy of the attention of every father, every mother, and every son."—*Illustrated London News*.

"The work is so full of practical information on the details of school life at these great foundations that it may be regarded as a guide book to all who contemplate sending their sons thither. For all such the volume must have a solid value, as enabling them to compare the several systems prevailing at different places, and to determine beforehand which offers the greatest advantages. The subject, however, is interesting to all intelligent Englishmen, and the book has, therefore, a general attraction beyond the circle which it specially addresses."—*London Review*.

The Pleasures of Memory. By Samuel Rogers. Illustrated with Twenty Designs, forming a volume of "Cundall's Choice of Choice Books." Small 4to. price 5s.

The Divine and Moral Songs of Dr. Watts; a New and very choice Edition. Illustrated with One Hundred Woodcuts in the first style of the Art, from Original Designs by Eminent Artists; engraved by J. D. Cooper. Small 4to. cloth extra, price 7s. 6d.

Pictures of Society, Grave and Gay; comprising One Hundred Engravings on Wood, from the Pictures of Eminent Artists; including J. E. Millais, A.R.A., F. W. Pickersgill, R.A., C. W. Cope, R.A., J. D. Watson, George Thomas, Marcus Stone, &c. Illustrated by the Pens of Popular Authors; including Mrs. S. C. Hall, E. K. Hurvey, Barry Cornwall, Tom Hood, Edward Levein, Noel Jones, Cuthbert Bede, J. H. Friswell, Walter Thornbury, &c. Beautifully printed by Messrs. Dalziel Brothers. Handsomely bound in cloth, with an elaborate and novel Design, by Messrs. Leighton and Co. Royal 8vo. price One Guinea.

The Twenty-Third Psalm: with richly-coloured Emblematic Borders. Small 4to. bevelled boards, price 12s.

The Three Kings of Orient: a Christmas Carol. Illuminated. Small 4to. Bevelled boards, price 12s.

Christ was Born on Christmas Day: a Carol. With Illustrations by John A. Hows. Illustrated and illuminated. Small 4to. bevelled boards, price 12s.

An Entirely New Edition of Edgar A. Poe's Poems. Illustrated by Eminent Artists. Small 4to. cloth extra, price 10s. 6d.

Poems of the Inner Life. Selected chiefly from Modern Authors, by permission. Small 8vo. 6s. Choicely printed.

A History of Lace, from the Earliest Period; with upwards of One Hundred Illustrations and Coloured Designs. By Mrs. Bury Palliser. One volume, 8vo. choicely bound in cloth. 31s. 6d.

Pictures of English Life; illustrated by Ten folio page Illustrations on wood, by J. D. Cooper, after Drawings by R. Barnes and E. M. Whimperis, with appropriate descriptive Poems, printed in foretated borders. Imperial folio, cloth extra, 14s.

"This handsome volume is entirely in the English taste."—Spectator.

"Pictures that do you good to look at them."—Illustrated Times.

"An elegant volume, containing speaking pictures that might have owned the parterre of Gainsborough or Morland; thoroughly national in character and detail."—Reader.

Pictures for the People: the same Engravings beautifully printed on thick paper. Adapted by their price to the adornment of Cottage walls, and by their artistic beauty to the Drawing-room Portfolio. One Shilling each.

Favourite English Poems. Complete Edition. Comprising a Collection of the most celebrated Poems in the English Language, with but one or two exceptions unabridged, from Chaucer to Tennyson. With 300 Illustrations by the first Artists. Two vols. royal 8vo. half bound, top gilt, Roxburgh style, 11. 18s.; antique calf, 31. 3s.

* * * Either Volume sold separately as distinct works. 1. "Early English Poems, Chaucer to Dyer." 2. "Favourite English Poems, Thomson to Tennyson." Each handsomely bound in cloth, 11. 1s.; or morocco extra, 11. 15s.

"One of the choicest gift-books of the year. "Favourite English Poems" is not a toy book, to be laid for a week on the Christmas table and then thrown aside with the sparkling trifles of the Christmas tree, but an honest book, to be admired in the season of pleasant remembrances for its artistic beauty; and, when the holidays are over, to be placed for frequent and affectionate consultation on a favourite shelf."—Athenæum.

Schiller's Lay of the Bell. Sir E. Buxton Lytton's translation; beautifully illustrated by forty-two wood Engravings, drawn by Thomas Scott, and engraved by J. D. Cooper, after the Etchings by Retsch. Oblong 4to. cloth extra, 14s.

"A very elegant and classic Christmas present."—Guardian.

"The work is a standard picture-book, and of its success there can be no doubt."—Examiner.

The Poetry of Nature. Selected and Illustrated with Thirty-six Engravings by Harrison Weir. Small 4to. handsomely bound in cloth, gilt edges, 12s.; morocco, 11. 1s.

- A New Edition of Choice Editions of Choice Books.** Illustrated by C. W. Cope, R.A., T. Creswick, R.A., Edward Duncan, Birket Foster, J. C. Horsley, A.R.A., George Hicks, R. Redgrave, R.A., C. Stonehouse, F. Taylor, George Thomas, H. J. Townshend, E. H. Wehnert, Harrison Weir, &c. Crown 8vo. cloth, 5s. each; bevelled boards, 5s. 6d.; or, in morocco, gilt edges, 10s. 6d.
- | | |
|---------------------------------|----------------------------------|
| Bloomfield's Farmer's Boy. | Keat's Eve of St. Agnes. |
| Campbell's Pleasures of Hope. | Milton's l'Allegro. |

| Coleridge's Ancient Mariner. | Shakespeare's Songs and Sonnets. |
| Goldsmith's Deserted Village. | Tennyson's May Queen. |
| Goldsmith's Vicar of Wakefield. | Wordsworth's Pastoral Poems. |
| Gray's Elegy in a Churchyard. | |

"Such works are a glorious beatification for a poet. Such works as these educate townsmen, who, surrounded by dead and artificial things, as country people are by life and nature, scarcely learn to look at nature till taught by these concentrated specimens of her beauty."—Athenæum.

LITERATURE, WORKS OF REFERENCE, AND EDUCATION.

 **THE English Catalogue of Books:** giving the date of publication of every book published from 1835 to 1863, in addition to the title, size, price, and publisher, in one alphabet. An entirely new work, combining the Copyrights of the "London Catalogue" and the "British Catalogue." One thick volume of 900 pages, half morocco, 45s.

Like unto Christ. A new translation of the De Imitatione Christi, usually ascribed to Thomas à Kempis—forming a volume of *The Gentle Life Series*. Small post 8vo. 6s.

The Gentle Life: Essays in Aid of the Formation of Character of Gentlemen and Gentlewomen. Small post 8vo. Seventh Edition, 6s.

A Second Volume of the Gentle Life. Uniform with the First Series. Second Edition, 6s.

About in the World: Essays uniform with, and by the author of "The Gentle Life." Small post 8vo. 6s.

Essays by Montaigne. With Vignette Portrait. Small post 8vo. 6s.

Familiar Words; an Index Verborum, or Dictionary of Quotation of Sentences and Phrases which have become embedded in our English tongue. Second Edition, revised and enlarged. Post 8vo. [Shortly.]
"Not only the most extensive dictionary of quotations which we have yet met with, but it has, moreover, this additional merit, that in all cases an exact reference is given to every chapter, act, scene, book, and number of the line."—Notes and Queries.

The Complete Poetical Works of John Milton, with a Life of the Author; and a Verbal Index containing upwards of 20,000 references to all the Poems. By Charles Dexter Cleveland. New Edition. 8vo. 12s.; morocco, 21s.

Life Portraits of Shakspeare; with an Examination of the Authenticity, and a History of the various Representations of the Poet. By J. H. Friswell, Member of the National Shakspeare Committee. Illustrated by Photographs of authentic and received Portraits. Square 8vo. 21s.; or with Photograph of the Will, 25s.

Memoirs of the Life of William Shakspeare. With an Essay toward the Expression of his Genius; and an Account of the Rise and Progress of the English Drama. By Richard Grant White. Post 8vo. cloth, 10s. 6d.

Her Majesty's Mails: a History of the Post Office, and an Industrial Account of its Present Condition. By Wm. Lewins, of the General Post Office. 2nd edition, revised, and enlarged, with a Photographic Portrait of Sir Rowland Hill. Small post 8vo. 6s

"A book we strongly recommend to those who wish to be fully informed on the subject, as an interesting and generally accurate account of the history and working of the Post Office."—Edinburgh Review.

"Will take its stand as a really useful book of reference on the history of the Post. We heartily recommend it as a thoroughly careful performance."—Saturday Review.

A History of Banks for Savings; including a full account of the origin and progress of Mr. Gladstone's recent prudential measures. By William Lewins, Author of 'Her Majesty's Mails.' With a Photograph of the Chancellor of the Exchequer. 8vo. cloth.

Varia: Rare Readings from Scarce Books. Reprinted by permission from the *Saturday Review* and *Spectator*. Beautifully printed by Whittingham. Fcap. cloth.

The Origin and History of the English Language, and of the early literature it embodies. By the Hon. George P. Marsh, U. S. Minister at Turin, Author of "Lectures on the English Language." 8vo. cloth extra, 16s.

Lectures on the English Language; forming the Introductory Series to the foregoing Work. By the same Author. 8vo. Cloth, 16s. This is the only author's edition.

Man and Nature; or, Physical Geography as Modified by Human Action. By George P. Marsh, Author of "Lectures on the English Language," &c. 8vo. cloth, 14s.

Mr. Marsh traces the history of human industry as shown in the extensive modification and extirpation of animal and vegetable life in the woods, the waters, and the sands; and, in a concluding chapter, he discusses the probable and possible geographical changes yet to be wrought. The whole of Mr. Marsh's book is an eloquent showing of the duty of care in the establishment of harmony between man's life and the forces of nature, so as to bring to their highest points the fertility of the soil, the vigour of the animal life, and the salubrity of the climate, on which we have to depend for the physical well-being of mankind."—Examiner.

English and Scotch Ballads, &c. An extensive Collection. Designed as a Complement to the Works of the British Poets, and embracing nearly all the Ancient and Traditionary Ballads both of England and Scotland, in all the important varieties of form in which they are extant, with Notices of the kindred Ballads of other Nations. Edited by F. J. Child, new Edition, revised by the Editor. 8 vols. fcap. cloth, 3s. 6d. each.

The Handy-book of Patent and Copyright Law, English and Foreign. By James Fraser, Esq. Post 8vo. cloth, 4s. 6d.

A Concise Summary of the Law of English and French Copyright Law and International Law, by Peter Burke. 12mo. 5s.

Index to the Subjects of Books published in the United Kingdom during the last Twenty Years—1837-1857. Containing as many as 74,000 references, under subjects, so as to ensure immediate reference to the books on the subject required, each giving title, price, publisher, and date. Two valuable Appendices are also given—A, containing full lists of all Libraries, Collections, Series, and Miscellanies—and B, a List of Literary Societies, Printing Societies, and their Issues. One vol. royal 8vo. Morocco, 11. 6s.

The American Catalogue, or English Guide to American Literature; giving the full title of original Works published in the United States of America since the year 1800, with especial reference to the works of interest to Great Britain, with the size, price, place, date of publication, and London prices. With comprehensive Index. 8vo. 2s. 6d. Also Supplement, 1837-60. 8vo. 6d.

Dr. Worcester's New and Greatly Enlarged Dictionary of the English Language. Adapted for Library or College Reference, comprising 40,000 Words more than Johnson's Dictionary, and 250 pages more than the Quarto Edition of Webster's Dictionary. In one Volume, royal 4to. cloth, 1,831 pp. price 31s. 6d. The Cheapest Book ever published.

"The volumes before us show a vast amount of diligence; but with Webster it is diligence in combination with fancifulness,—with Worcester in combination with good sense and judgment. Worcester's is the soberer and safer book, and may be pronounced the best existing English Lexicon."—*Athenæum*, July 13, 1861.

The Publishers' Circular, and General Record of British and Foreign Literature; giving a transcript of the title-page of every work published in Great Britain, and every work of interest published abroad, with lists of all the publishing houses.

Published regularly on the 1st and 15th of every Month, and forwarded post free to all parts of the world on payment of 8s. per annum.

The Ladies' Reader; with some Plain and Simple Rules and Instructions for a good style of Reading aloud, and a variety of Selections for Exercise. By George Vandenhoff, M.A., Author of "The Art of Elocution." Fcap. 8vo. Cloth, 5s.

The Clerical Assistant: an Elocutionary Guide to the Reading of the Scriptures and the Liturgy, several passages being marked for Pitch and Emphasis: with some Observations on Clerical Bronchitis. By George Vandenhoff, M.A. Fcap. 8vo. Cloth, 3s. 6d.

The Art of Elocution as an essential part of Rhetoric, with instructions in Gesture, and an Appendix of Oratorical, Poetical and Dramatic extracts. By George Vandenhoff, M.A. Third Edition. 5s.

Latin-English Lexicon, by Dr. Andrews. 7th Edition. 8vo. 18s.

The superiority of this justly-famed Lexicon is retained over all others by the fulness of its quotations, the including in the vocabulary proper names, the distinguishing whether the derivative is classical or otherwise, the exactness of the references to the original authors, and in the price.

"Every page bears the impress of industry and care."—*Athenæum*.

"The best Latin Dictionary, whether for the scholar or advanced student."—*Spectator*.

"We never saw such a book published at such a price."—*Examiner*.

How the House was Built.

Dog Toby and Artistical Arthur.

The Frog's Parish Clerk; and his Adventures in strange Lands. A Tale for young folk. By Thomas Archer. Numerous Illustrations. Small post 8vo. 5s.

Choice Editions of Children's Fairy Tales. Each illustrated with highly-finished Coloured Pictures in facsimile of Water-colour Drawings. Square, cloth extra, price 3s. 6d. each.

Cinderella and the Glass Slipper. Puss in Boots. Beauty and the Beast.

Under the Waves; or the Hermit Crab in Society. By Annie E. Ridley. Impl. 16mo. cloth extra, with coloured illustration. Cloth, 4s.; gilt edges, 4s. 6d.

"This is one of the best books we know of to place in the hands of young and intelligent persons during a visit to the seaside."—Reader.

Also beautifully Illustrated:—

Little Bird Red and Little Bird Blue. Coloured, 5s.

Snow-Flakes, and what they told the Children. Coloured, 5s.

Child's Book of the Sagacity of Animals. 5s.; coloured, 7s. 6d.

Child's Picture Fable Book. 5s.; or coloured, 7s. 6d.

Child's Treasury of Story Books. 5s.; or coloured, 7s. 6d.

The Nursery Playmate. 200 Pictures. 5s.; coloured, 9s.

The Boy's Own Book of Boats. By W. H. G. Kingston. Illustrations by E. Weedon, engraved by W. J. Linton. Fcap. 8vo. cloth, 5s.

"This well-written, well-wrought book."—Athenæum.

How to Make Miniature Pumps and a Fire-Engine: a Book for Boys. With Seven Illustrations. Fcap. 8vo. 1s.

- The Cruise of the Frolic.** By W. H. G. Kingston. Illustrated. Large fcap. 8vo. cloth, 5s.
"Who does not welcome Mr. W. H. G. Kingston? Here he is again with an admirable boys' book. If boys do not love this book, there is no truth in boyhood, and no use in reviewing; it is just the book for a present."—Illustrated Times.
- Also by the same Author, well illustrated.*
- The Boy's Own Book of Boats.** Illustrated by Weedon. 5s.
Ernest Bracebridge; or, the Boy's Book of Sports. 5s.
Jack Buntline: the Life of a Sailor Boy. 2s.
 The Fire Ships. [Shortly.]
- Golden Hair; a Story for Young People.** By Sir Lascelles Wraxall, Bart. With Eight full page Illustrations, 5s.
"Full of incident and adventure, and sure to please boys home from school quite as much as his 'Black Panther' of last year."—Reader.
"A thoroughly good boy's book, the story is full of incident and always moves on."—Spectator.
- Also, same price, full of illustrations:—*
- Black Panther: a Boy's Adventures among the Red Skins.**
Life among the Indians. By George Catlin.
The Voyage of the Constance. By Mary Gillies.
Stanton Grange. By the Rev. C. J. Atkinson.
Boyhood of Martin Luther. By Henry Mayhew.
Stories of the Woods. From Cooper's Tales.
The Story of Peter Parley's own Life.
- Noodle-doo.** By the Author of "The Stories that Little Breeches told." With 16 large Engravings on Steel. Plain, 5s.; coloured, 7s. 6d.
"Among all the Christmas bookmen Mr. Charles Bennett ranks first, for he who best pleases children has the best right to priority in a notice of Christmas books, and to all his productions we venture to prefer 'Noodle-doo;' it will make the youngsters crow again with delight."—Standard.
- Also, now ready, same size and price, and full of illustrations.*
- Great Fun for our Little Friends.** By Harriet Myrtle.
More Fun for our Little Friends. By the same Author.
The Book of Blockheads. By Charles Bennett.
The Stories that Little Breeches told. By the same Author.
Mr. Wind and Madame Rain. Illustrated by Charles Bennett.
- Paul Duncan's Little by Little; a Tale for Boys.** Edited by Frank Freeman. With an Illustration by Charles Keene. Fcap. 8vo. cloth 2s.; gilt edges, 2s. 6d. Also, same price,
Boy Missionary; a Tale for Young People. By Mrs. J. M. Parker.
Difficulties Overcome. By Miss Brightwell
The Babes in the Basket: a Tale in the West Indian Insurrection.
Jack Buntline; the Life of a Sailor Boy. By W. H. G. Kingston.
- The Swiss Family Robinson; or, the Adventures of a Father and Mother and Four Sons on a Desert Island.** With Explanatory Notes and Illustrations. First and Second Series. New Edition, complete in one volume, 3s. 6d.
- Geography for my Children.** By Mrs. Harriet Beecher Stowe. Author of "Uncle Tom's Cabin," &c. Arranged and Edited by an English Lady, under the Direction of the Authoress. With upwards of Fifty Illustrations. Cloth extra, 4s. 6d.

Stories of the Woods ; or, the Adventures of Leather-Stocking :
A Book for Boys, compiled from Cooper's Series of "Leather-Stocking Tales." Fcap. cloth, Illustrated, 5s.

"I have to own that I think the heroes of another writer, viz. 'Leather-Stocking,' 'Uncas,' 'Hard Heart,' 'Tom Coffin,' are quite the equals of Sir Walter Scott's men;—perhaps 'Leather-Stocking' is better than any one in Scott's lot."—W. M. THACKERAY.

Child's Play. Illustrated with Sixteen Coloured Drawings by E. V. H., printed in fac-simile by W. Dickes' process, and ornamented with Initial Letters. New edition, with India paper tints, royal 8vo. cloth extra, bevelled cloth, 7s. 6d. The Original Edition of this work was published at One Guinea.

Child's Delight. Forty-two Songs for the Little Ones, with forty-two Pictures. 1s.; coloured, 2s. 6d.

Goody Platts, and her Two Cats. By Thomas Miller. Fcap. 8vo. cloth, 1s.

Mark Willson's First Reader. By the Author of "The Picture Alphabet" and "The Picture Primer." With 120 Pictures. 1s.

The Picture Alphabet ; or Child's First Letter Book. With new and original Designs. 6d.

The Picture Primer. 6d.

HISTORY AND BIOGRAPHY.

THE Conspiracy of Count Fieschi : an Episode in Italian History. By M. De Cesena. Translated by David Hilton, Esq., Author of a "History of Brigandage." With Portrait. 8vo. [Shortly.]

A Biography of Admiral Sir B. P. V. Broke, Bart., K.C.B. By the Rev. John Brighton, Rector of Kent Town. Dedicated by express permission to His Royal Highness Prince Alfred. [Shortly.]

A History of Brigandage in Italy ; with Adventures of the more celebrated Brigands. By David Hilton, Esq. 2 vols. post 8vo. cloth, 16s.

A History of the Gipsies, with Specimens of the Gipsy Language. By Walter Simson. Post 8vo.

A History of West Point, the United States Military Academy and its Military Importance. By Capt. E. C. Boynton, A.M. With Plans and Illustrations. 8vo. 21s.

The Twelve Great Battles of England, from Hastings to Waterloo. With Plans, fcap. 8vo. cloth extra, 3s. 6d.

George Washington's Life, by Washington Irving. 5 vols. royal 8vo. 12s. each Library Illustrated Edition. 5 vols. imp. 8vo. 4l. 4s.

Plutarch's Lives. An entirely new Library Edition, carefully revised and corrected, with some Original Translations by the Editor. Edited by A. H. Clough, Esq. sometime Fellow of Oriel College, Oxford, and late Professor of English Language and Literature at University College. 5 vols. 8vo. cloth. 2l. 10s.

"Mr. Clough's work is worthy of all praise, and we hope that it will tend to revive the study of Plutarch."—Times.

Life of John Adams, 2nd President of the United States, by C. F. Adams. 8vo. 14s. Life and Works complete, 10 vols. 14s. each.

Life and Administration of Abraham Lincoln. Fcap. 8vo. stiff cover, 1s.; with map, speeches, &c. crown 8vo. 3s. 6d.

TRAVEL AND ADVENTURE.

WALK from London to the Land's End. By Elihu Burritt, Author of "A Walk from London to John O'Groats;" with several Illustrations. Large post 8vo. Uniform with the first edition of "John O'Groats." 12s

A Walk from London to John O'Groats. With Notes by the Way. By Elihu Burritt. Second and cheaper edition. With Photographic Portrait of the Author. Small post 8vo. 6s.

Social Life of the Chinese: with some account of their religious, governmental, educational, and Business customs and opinions. By the Rev. Justus Doolittle. With over 100 Illustrations, in two vols. Demy 8vo. cloth, 24s.

A Thousand Miles in the Rob Roy Canoe, or Rivers and Lakes of Europe. By John Macgregor, M.A. With numerous Illustrations. Post 8vo. cloth, 5s.

Captain Hall's Life with the Esquimaux. New and cheaper Edition, with Coloured Engravings and upwards of 100 Woodcuts. With a Map. Price 7s. 6d. cloth extra. Forming the cheapest and most popular Edition of a work on Arctic Life and Exploration ever published.

"This is a very remarkable book, and unless we very much misunderstand both him and his book, the author is one of those men of whom great nations do well to be proud."—Spectator.

"If Capt. Hall should survive the perils of the journey on which he is now engaged, we are convinced he will bring home some news, be it good or bad, about the Franklin expedition. He can hardly be expected back before the autumn of 1865. But if he has gone he has left us his most interesting volumes, which contain much valuable information, as we have said, concerning the Esquimaux tribes. These volumes are the best that we have ever met with, concerning the people and things to be found among the thick rible' ice."—Standard.

"The pen of Wilkie Collins would fail to describe in more life-like terms of horror the episode of the cannibal crew escaped from a whaler who boarded the 'George Henry' on the outward passage of that ship. We are tempted to reute how an Inuit throws a summersault in the water in his kayak, boat and all, and to introduce our readers to our Author's dogs, including the famous Barbekeek; but we must pause, and refer to this most interesting work itself, which will repay perusal."—Press.

A Winter in Algeria, 1863-4. By Mrs. George Albert Rogers. With illustrations. 8vo. cloth, 12s.

Ten Days in a French Parsonage. By Rev. G. M. Musgrave. 2 vols. post 8vo. 16s.

Turkey. By J. Lewis Farley, F.S.S., Author of "Two Years in Syria." With Illustrations in Chromo-lithography, and a Portrait of His Highness Foad Pasha. 8vo. [Shortlyy.]

Letters on England. By Louis Blanc. 2 vols. post 8vo. [Shortlyy.]
House and Home in Belgium. By Blanchard Jerrold. Author of "At Home in Paris." Post 8vo. [Shortlyy.]

The Story of the Great March: a Diary of General Sherman's Campaign through Georgia and the Carolinas. By Brevet-Major G. W. Nichols, Aide-de-Camp to General Sherman. With a coloured Map and numerous Illustrations. 12mo. cloth, price 4s. 6d.

Cape Cod. By Henry D. Thoreau. 12mo. cloth, 7s. 6d.

Arabian Days and Nights; or, Rays from the East: a Narrative. By Marguerite A. Power. 1 vol. Post 8vo. 10s. 6d.

"Miss Power's book is thoroughly interesting and does much credit to her talent for observation and description."—London Review.

Wild Scenes in South America; or, Life in the Llanos of Venezuela. By Don Ramon Paez. Numerous Illustrations. Post 8vo. cloth, 10s. 6d.

- After Icebergs with a Painter; a Summer's Voyage to Labrador. By the Rev. Louis L. Noble. Post 8vo. with coloured plates, cloth, 10s. 6d.

- The Ordeal of Free Labour in the British West Indies. By William G. Sewell. Post 8vo. cloth, 7s. 6d.
- The Progress and Present State of British India; a Manual of Indian History, Geography, and Finance, for general use; based upon Official Documents, furnished under the authority of Her Majesty's Secretary of State for India. By Montgomery Martin, Esq., Author of a "History of the British Colonies," &c. In one volume, post 8vo. cloth, 10s. 6d.
- Colonial Essays. Translated from the Dutch. post 8vo. cloth, 6s.

The Cotton Kingdom: a Traveller's Observations on Cotton and Slavery in America, based upon three former volumes of Travels and Explorations. By Frederick Law Olmsted. With a Map. 2 vols. post 8vo. 1l. 1s.

"Mr. Olmsted gives his readers a wealth of facts conveyed in a long stream of anecdotes, the exquisite humour of many of them making parts of his book as pleasant to read as a novel of the first class."—*Athenæum*.

- A History of the Origin, Formation, and Adoption of the Constitution of the United States of America, with Notices of its Principal Framers.** By George Ticknor Curtis, Esq. 2 vols. 8vo. Cloth, 1l. 4s.
"Mr. Curtis writes with dignity and vigour, and his work will be one of permanent interest." - Athenæum.
- The Principles of Political Economy applied to the Condition, the Resources, and Institutions of the American People.** By Francis Bowen. 8vo. Cloth, 14s.
- A History of New South Wales from the Discovery of New Holland in 1616 to the present time.** By the late Roderick Flanagan, Esq., Member of the Philosophical Society of New South Wales. 2 vols. 8vo. 24s.
- Canada and its Resources. Two Prize Essays, by Hogan and Morris.** 7s., or separately, 1s. 6d. each, and Map, 3s.

SCIENCE AND DISCOVERY.

DICTIONARY of Photography, on the Basis of Sutton's Dictionary. Rewritten by Professor Dawson, of King's College, Editor of the "Journal of Photography;" and Thomas Sutton, B.A., Editor of "Photograph Notes." 8vo. with numerous Illustrations. [*Shortly.*]

The Physical Geography of the Sea and its Meteorology; or, the Economy of the Sea and its Adaptations, its Salts, its Waters, its Climates, its Inhabitants, and whatever there may be of general interest in its Commercial Uses or Industrial Pursuits. By Commander M. F. Maury, LL.D. Tenth Edition, being the Second Edition of the Author's revised and enlarged Work. Post 8vo. cloth extra, 8s. 6d.; cheap edition, small post 8vo. 5s.

This edition, as well as its immediate predecessor, includes all the researches and observations of the last three years, and is copyright in England and on the Continent.

"We err greatly if Lieut. Maury's book will not hereafter be classed with the works of the great men who have taken the lead in extending and improving knowledge and art; his book displays in a remarkable degree, like the 'Advancement of Learning,' and the 'Natural History' of Buffon, profound research and magnificent imagination."—*Illustrated London News.*

The Structure of Animal Life. By Louis Agassiz. With 46 Diagrams. 8vo. cloth, 10s. 6d.

The Kedge Anchor; or, Young Sailor's Assistant, by William Brady. Seventy Illustrations. 8vo. 16s.

Theory of the Winds, by Capt. Charles Wilkes. 8vo. cl. 8s. 6d.

Archæia; or, Studies of the Cosmogony and Natural History of the Hebrew Scriptures. By Professor Dawson, Principal of McGill College, Canada. Post 8vo. cloth, cheaper edition, 6s.

Ichnographs, from the Sandstone of the Connecticut River, Massachusetts, U. S. A. By James Deau, M.D. One volume, 4to. with Forty-six Plates. cloth, 27s.

The Recent Progress of Astronomy, by Elias Loomis, LL.D. 3rd Edition. Post 8vo. 7s. 6d.

An Introduction to Practical Astronomy, by the Same. 8vo. cloth. 8s.

Manual of Mineralogy, including Observations on Mines, Rocks, Reduction of Ores, and the Application of the Science to the Arts, with 260 Illustrations. Designed for the Use of Schools and Colleges. By James D. Dana, A.M. Author of a "System of Mineralogy." New Edition, revised and enlarged. 12mo. Half bound, 7s. 6d.

- The Ocean Telegraph Cable ; its Construction, &c. and Submer-
sion Explained. By W. Rowett. 8vo. cloth, 3s. 6d.
Cyclopædia of Mathematical Science, by Davies and Peck. 8vo.
8sheep. 18s.

**TRADE, AGRICULTURE, DOMESTIC
ECONOMY, ETC.**

RAILWAY PRACTICE, European and American ;
comprising the economical generation of Steam, the adapta-
tion of Wood and Coke-burning Engines to Coal Burning,
and in Permanent Way, including Road-bed, Sleepers, Rails,
Joint-fastenings, Street Railways, &c. By Alexander L.
Holley, Joint Author of Colburn and Holley's "Permanent Way," &c.
Demy folio, with 77 Engravings, half-morocco. 3l. 3s.

- Hunt's Merchants' Magazine (Monthly). 2s. 6d.
The Book of Furin Implements, and their Construction ; by John
L. Thomas. With 200 Illustrations. 12mo. 8s. 6d.
The Practical Surveyor's Guide ; by A. Duncan. Fcp. 8vo. 4s. 6d.
Villas and Cottages ; by Culvert Vaux, Architect. 300 Illus-
trations. 8vo. cloth. 12s.
Bee-Keeping. By "The Times" Bee-master. Small post 8vo.
numerous Illustrations, cloth, 5s.

The Bee-master has done a good work, which outweighs a cartload of mistakes, in giving an impetus to bee-keeping throughout the country. Here is a simple and graceful amusement, which is also a profitable one. The keeping of bees needs no great skill and but a small outlay. The result, however, besides the amusement which it affords is a store of honey that in the present state of the market may make a considerable addition to the income of a poor colter, and may even be worthy the ambition of an underpaid curate or a lieutenant on half-pay. —Times, Jan. 11, 1865.

- The English and Australian Cookery Book. Small post 8vo.
Coloured Illustrations, cloth extra, 4s. 6d.
The Bubbles of Finance : the Revelations of a City Man. Fcap.
8vo. fancy boards, price 2s. 6d.
The Times of May 21st in a leading article referring to the above work, says :— " We advise our young friends to read some amusing chapters on 'accommodation' and 'borrowing' which have appeared within the last two months in Mr. Charles Dickens's All the Year Round."
Coffee : A Treatise on its Nature and Cultivation. With some
remarks on the management and purchase of Coffee Estates. By Arthur
R. W. Laseelles. Post 8vo. cloth, 2s. 6d.

The Railway Freighter's Guide. Defining mutual liabilities of
Carriers and Freighters, and explaining system of rates, accounts,
invoices, checks, booking, and permits, and all other details pertaining
to traffic management, as sanctioned by Acts of Parliament, Bye-laws,
and General Usage. By J. S. Martin. 12mo. Cloth, 2s. 6d.

THEOLOGY.

THE Land and the Book, or Biblical Illustrations drawn
from the Manners and Customs, the Scenes and the Scenery
of the Holy Land, by W. M. Thomson, M.D., twenty-five
years a Missionary in Syria and Palestine. With 3 Maps and
several hundred Illustrations. 2 vols. Post 8vo. cloth. 1l. 1s.

- Missionary Geography for the use of Teachers and Missionary
Collectors. Fcap. 8vo. with numerous maps and illustrations, 3s. 6d.
A Topographical Picture of Ancient Jerusalem ; beautifully col-
oured. Nine feet by six feet, on rollers, varnished. 3l. 3s.

Nature and the Supernatural. By Horace Bushnell, D.D. One vol. New Edition. Post 8vo. cloth, 3s. 6d. Also by the same Author.

Dr. Bushnell's Christian Nurture. 1s. 6d.

Dr. Bushnell's Character of Jesus. 6d.

Dr. Bushnell's New Life. 1s. 6d.

Dr. Bushnell's Work and Play. 2s. 6d.

Five Years' Prayer, with the Answers: comprising recent Narratives and Incidents in America, Germany, England, Ireland, Scotland, &c. By D. Samuel Irenæus Prime. 12mo. cloth, 2s. 6d.; and a Cheap Edition, price 1s. Also by the same Author.

The Power of Prayer. 12mo. cloth, 1s. 6d.

The Light of the World: a most True Relation of a Pilgrimage travelling towards Eternity. Divided into Three Parts; which deserve to be read, understood, and considered by all who desire to be saved. Reprinted from the edition of 1698. Beautifully printed by Clay on toned paper. Crown 8vo. pp. 593, bevelled boards, 10s. 6d.

A Short Method of Prayer; an Analysis of a Work so entitled by Madame de la Motte-Guyon; by Thomas C. Upham, Professor of Mental and Moral Philosophy in Bowdoin College, U.S. America. Printed by Whittingham. 12mo. cloth. 1s.

Christian Believing and Living. By F. D. Huntington, D.D. Crown 8vo. cloth, 3s. 6d.

"For freshness of thought, power of illustration, and evangelical earnestness, these writers [Dr. Huntington and Dr. Bushnell] are not surpassed by the ablest theologians in the palmiest days of the Church."

Calcutta Mercury.

Life Thoughts. By the Rev. Henry Ward Beecher. Two Series, complete in one volume, well printed and well bound. 2s. 6d. Superior edition, illustrated with ornamented borders. 8m. 4to. cloth extra. 7s. 6d.

Dr. Beecher's Life and Correspondence: an Autobiography. Edited by his Son. 2 vols. post 8vo. with Illustrations, price 21s.

"One of the most real, interesting, and instructive pieces of religious biography of the present day."—*Nonconformist.*

"We have waited for the publication of the second and last volume of this interesting, we may well say entertaining, biography, before introducing it to our readers. It is now complete, and furnishes one of the most various and delightful portraits of a fine, sturdy, old representative of antique theology and earnest piety, relieved by very sweet and engaging pictures of New England society in its religious circles, and the ways and usages of the men and women who lived, and loved, and married, and had families, nearly a century since. . . . And now we must lay down these very delightful volumes. We trust we have sufficiently characterized them, while there are, of course, reminiscences, pictures of places and of persons, we have been unable even to mention. It was an extraordinary family altogether, a glow of bright, affectionate interest suffuses all in charming sunshine. It was a life of singular purpose, usefulness, and determination; and we think ministers especially, and of ministers young students especially, might read it, and read it more than once, to advantage. . . . Without attempting any more words, we hope we have sufficiently indicated our very high appreciation of, and gratitude for, this charming and many-sided biography of a most robust and healthy life."—*The Eclectic.*

"All that the old man writes is clever and sagacious."—*Athenæum.*

"If the reader can imagine the Vicar of Wakefield in America, this memoir will give a very good idea of what he would be among Yankee surroundings. There is the same purity, sincerity, and goodness of heart, the same simplicity of manner and directness of purpose in Dr. Ferris and Dr. Beecher, though the go-ahead society in which the latter divine lived failed not to impress its character upon him. This is an instructive and charming a book for family reading as can be taken up for that purpose."—*Daily News.*

"A hundred pleasant things we must pass by; but readers of these charming volumes will not do so."—*Wesleyan Times.*

Life and Experience of Madame de la Mothe Guyon. By Professor Upham. Edited by an English Clergyman. Crown 8vo. cloth, with Portrait. Third Edition, 7s. 6d.

By the same Author.

Life of Madame Catherine Adorna; 12mo. cloth. 4s. 6d.

The Life of Faith, and Interior Life. 2 vols. 5s. 6d. each.

The Divine Union. 7s. 6d.

LAW AND JURISPRUDENCE.

WHEATON'S Elements of International Law; with a New Supplement to May 1863; comprising Important Decisions of the Supreme Court of the United States of America, settling authoritatively the character of the hostilities in which they are involved, and the legal consequences to be deduced from them. Royal 8vo. cloth extra, 35s.

History of the Law of Nations; by Henry Wheaton, LL.D. author of the "Elements of International Law." Roy. 8vo. cloth, 31s. 6d.

Commentaries on American Law; by Chancellor Kent. Ninth and entirely New Edition. 4 vols. 8vo. calf. 5l. 5s.; cloth, 4l. 10s.

Treatise on the Law of Evidence; by Simon Greenleaf, LL.D. 3 vols. 8vo. calf. 4l. 4s.

- Principles and Practice of Dental Surgery; by C. A. Harris. 6th Edition. 8vo. 24s.
- Chemical and Pharmaceutical Manipulations; by C. and C. Morfit. Royal 8vo. Second Edition enlarged. 21s.

FICTION AND MISCELLANEOUS.

R. Charles Reade's celebrated Romance, *Hard Cash*. A new and cheap Standard Edition. Price 6s. handsomely bound in cloth.

"There is a freshness and reality about his young people, and a degree of warmth and zest in the love-making of these impetuosities, which make the first chapter of his book most enjoyable reading. The description of the boat-race at Henley is beyond anything of the kind we have ever seen in print, and the repulse of the two pirates by the old Agra is a perfect masterpiece of nautical painting."—Saturday Review.

New Popular Novels, to be obtained at all Libraries.

- Passing the Time. By Blanchard Jerrold. 2 vols. post 8vo. 16s.
