

## The Freedom Charter for Post-Russian Space

Inspired by the glorious City of Brotherly Love, where independence was declared and the great country of the United States of America constituted, we remember these historic words:

*We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable Rights, that among these are Life, Liberty and the pursuit of Happiness.--That to secure these rights, Governments are instituted among Men, deriving their just powers from the consent of the governed, -- That whenever any Form of Government becomes destructive of these ends, it is the Right of the People to alter or to abolish it, and to institute new Government, laying its foundation on such principles and organizing its powers in such form, as to them shall seem most likely to effect their Safety and Happiness.*

*United States Declaration of Independence, 1776*

### **We declare that:**

1. Muscovy's imperialism, with its genocides, repressions, deportations, wars and isolation, has no place in the free, civilized world of the 21st century. **Russia, which is no federation, must cease to exist in 2023**
2. The captive nations and regions of the "Russian Federation" that Muscovy occupies, which it exploits as colonies, have the natural, legal right not only to their freedom and uniqueness, not only to their identity and culture, but also to political self-determination, that is, the **right to create their own sovereign, independent states**
3. Those working on behalf of the Kremlin's regime are war criminals. **The "Russian Federation" is not only the last empire in Europe, but also a terrorist state.** Therefore, all cooperation with any representatives of this misanthropic, illegal regime should cease. As a terrorist state, it should experience complete ostracization and isolation. Any communications with it should be reduced to specific conditions and deadlines pertaining to its swift and complete elimination
4. For the process of liberation from Moscow's imperialism **to proceed in as controlled and non-violent a way as possible, there must be constant, systematic active communication, coordination and synchronization of actions and strategies, constant dialogue and implementation of concrete solutions by all involved parties.** These parties include members of movements of captive nations and colonized regions, the national governments in (temporary) exile, and representatives of free world states. This is an absolute necessity
5. **We urge all citizens and governments of the free world to support our anti-colonial national liberation struggles,** to recognize our independent states in the near future and to establish diplomatic relations with them and to develop political, economic, trade and cultural ties of partnership
