N.B.—Persons desiring to see the Almshouse and Hospital at Long Island should secure a pass at the office of the Trustees, 28 Court square.

The steamer "Monitor" leaves Eastern Avenue Wharf (north side of South Ferry) every day, except Sundays and holidays, at 2.15 p. m. The boat is due at Boston on the return trip at 5.20 p. m. The wharf may be reached by any Atlantic avenue Union Station car, or through Fleet street, from Hanover street. The Battery Street Station on the Atlantic circuit of the elevated system is opposite the North Ferry, from which the South Ferry is easily reached by walking about two blocks southward.

The Charlestown Almshouse is situated on Alford street, near the northern end of the Malden Bridge, and may be reached in twenty minutes from Scollay square by any Everett and Malden car, or by transfer from Sullivan square.

Application for admission to either institution should be made to the Institutions Registration Department, 28 Court square, Room 2, where the question of settlement will be determined; office hours, 9 to 5 o'clock; on Saturdays, 9 to 1 o'clock (during the four summer months — June to September — the office closes at 12 o'clock on Saturdays). Any person able to walk should apply at that office. An ambulance and carriage are at the disposal of that office, and will be sent for persons unable to walk to carry them to the boat.

In the case of a person who does not speak English it is desirable that he should be accompanied by a friend who can interpret when he makes his application at 28 Court square.

It is very desirable that application should be made the day before it is intended that the person should go to the hospital, or, if an emergency case, before 12 o'clock, in order that the settlement may be investigated and the ambulance or carriage sent, if necessary.

FOURTEENTH ANNUAL REPORT

OF THE

BOSTON INFIRMARY DEPARTMENT

FOR THE YEAR ENDING JANUARY 31, 1911.

28 Court Square, Boston, Mass., January 31, 1911.

To His Honor the Mayor of the City of Boston:

SIR,— The Boston Infirmary Trustees would respectfully submit herewith their report for the year ending January 31, 1911, in accordance with the provisions of chapter 3, section 24, of the Revised Ordinances.

ORGANIZATION.

The Board of Trustees remains constituted the same as on the date of the previous report with the exception that the term of Mrs. James Alexander expired on May 1, 1910. There has been no change in the superintendency at either of the institutions, the Boston Almshouse and Hospital at Long Island being in charge of Dr. Charles E. Donlan, and the Charlestown Almshouse in charge of Miss Mary A. Morris.

VISITING MEDICAL STAFF.

Dr. James B. Ayer, Jr., and Dr. Theodore J. Eastman have been appointed assistant visiting physicians on the visiting medical staff and Dr. Hans Barkan has been made pathologist of the Long Island Hospital, to succeed Dr. Samuel R. Haythorn, resigned. Dr. Percy Brown, radiologist, has resigned and this important work will be continued by Dr. George W. Holmes, formerly resident physician.

DEPARTMENT APPROPRIATION.

The expenditures of the department have been kept within the appropriation of \$184,130, the original appropriation of \$183,500 having been increased by payments made by the Commonwealth of Massachusetts for condemned cattle — \$590 at Long Island and \$40 at the Charlestown Almshouse. A balance of \$169.95 has been returned to the city treasury.

The enforcement of the weekly payment law at the Boston Almshouse and Hospital made necessary the payment of salaries for thirteen months from the appropriation intended to cover but twelve months. The expenditures at the institution overran the appropriation by the amount of the January pay roll, approximately

\$3,300.

On account of the eight-hour law, it has been necessary to increase the assistant engineers at Long Island by one.

POPULATION.

The average population at Long Island has been 881 and at the Charlestown Almshouse 102, an increase of 15 at the former and 3 at the latter institution over the previous year. The per capita expenditure at Long Island has been \$3.24 per week for the entire institution, \$5.34 for the hospital department and \$2.17 for the almshouse department. The per capita expenditure at Charlestown has been \$3.01 per week. The net cost per week for each inmate at these institutions, after deducting the income, has been \$3.12 at Long Island and \$2.98 at Charlestown.

ALMSHOUSE AND HOSPITAL, LONG ISLAND.

The year has been a very satisfactory one at Long Island. A number of repairs have been made and about 50,000 pine seedlings have been set out under the direction of the state forester. This is but a beginning in the work of reforesting the island.

Dr. James S. Tomkies has been appointed resident physician to succeed Dr. George W. Holmes, resigned. The latter served the institution as house officer in

1906 and on July 1, 1907, took charge of the hospital department as resident physician, and his work there is

to be highly commended.

For several years the need of additional accommodations both for the almshouse and hospital at Long Island has been apparent. The average population at the island has increased from 689 in 1897–98 to 886 in While the average population for the hospital for the past year has been 297, this latter figure does not adequately express the situation, for at the present time there are perhaps one hundred men and nearly as many women in the dormitories who might well be cared for in the hospital department were the accommodations therein sufficient. The pressure of the applications for admission to the hospital is continually increasing. order to meet the ever-growing demand, it is the opinion of the Board that steps should be taken to provide additional buildings for the suitable accommodation of the inmates of the almshouse as well as those of the hospital.

The trustees would, therefore, recommend an immediate addition to the hospital which could accommodate about two hundred patients. It is the intention of the Board that this addition should be so built that further additions might be made from time to time as necessity demanded. The trustees also believe that, in connection with this contemplated improvement, a central kitchen should be provided to replace the three large kitchens now in use. They feel that this would be a saving to the city in labor and would prove of material benefit in the handling of supplies. One suitably equipped kitchen could then easily handle the cooking for the entire population. The building of this kitchen would necessitate subways connecting it with the different As soon as estimates of the cost of these additions and improvements can be prepared, a request for a special appropriation will be made. This is work that should not be delayed and prompt action is not only desirable but necessary.

Three band concerts were provided last summer through the courtesy of the Music Commissioners, two at Long Island and one at the Charlestown Almshouse.

TRAINING SCHOOL FOR NURSES.

For many years the need of further facilities for accommodating and properly housing the young women

who attend the nurses' training school has been felt. The present facilities are entirely inadequate. The demand for nurses has greatly increased during the last four or five years and has now grown far beyond the present supply. The Board would, therefore, recommend that either a new building for the nurses be erected or that substantial alterations and additions be made at once to enable them to properly administer this most important branch of the institution's service.

On June 8 diplomas were awarded to twenty-one graduates of the training school by his Honor John F. Fitzgerald, Mayor of Boston. Addresses were also made by Hon. Joseph H. O'Neil, Dr. Francis W. Palfrey, a member of the visiting medical staff, and Mr. Edward M. Gallagher, chairman of the Board of Trustees.

ALMSHOUSE, CHARLESTOWN.

Since the annexation of Charlestown to the City of Boston in 1873, the Almshouse on Alford street, Charlestown, has been maintained for the poor of the city.

The Boston Elevated Railway Company has been granted a location by the Board of Railroad Commissioners which will necessitate the taking of the almshouse by the railway company. It will, therefore, be impossible to continue this branch of the department in Charlestown.

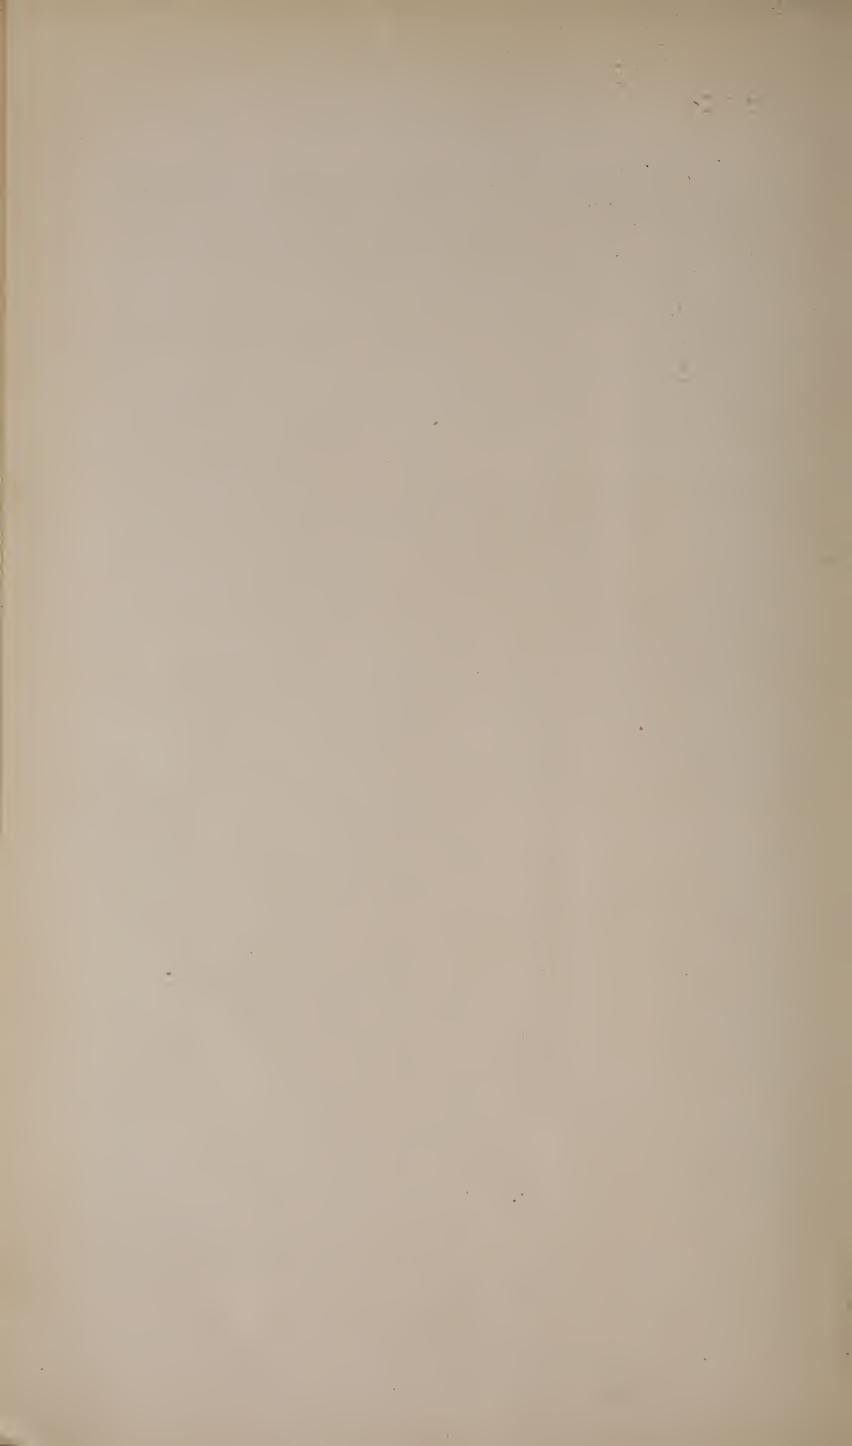

Plans are now being prepared and it is hoped that suitable quarters will be provided for all who have hitherto been cared for in Charlestown. It may be of interest to note here that at the present time there are only four of the hundred odd inmates who were ever residents of this district.

DEPARTMENT STEAMER.

During the past year a much needed improvement has been made in the building of the steamer "George A. Hibbard" to replace the "John Howard," which for some years has been unsafe and unfit for service. The new boat is of about the same dimensions as the "Howard," 77 feet long, 17 feet beam, and will carry seventy-five passengers. On the recommendation of his Honor the Mayor the boat has been equipped as a fireboat in order that additional protection might be given to the harbor islands.

CONSUMPTIVES' HOSPITAL FOR MEN.

The new boat has been named in honor of Boston's late mayor, the Hon. George A. Hibbard. She was launched on October 7, made her trial trip on November 28 and went into commission on December 9, 1910.

Respectfully submitted,

Edward M. Gallagher.
Mary A. Dierkes.
James A. Dorsey.
Thomas A. McQuade.
Nathaniel W. Emerson.
Arthur Berenson.

REPORT OF THE SUPERINTENDENT OF THE BOSTON ALMSHOUSE AND HOSPITAL, LONG ISLAND.

Long Island, January 31, 1911.

To the Boston Infirmary Trustees:

I have the honor to submit the annual report on the institutions at Long Island for the year ending January thirty-first, nineteen hundred eleven. The usual dry statistical details may be found in the appended tables, but for our present purposes they may be summarized in a statement that the average population has been four hundred nine women and four hundred forty-nine men, and of the total about thirty-five per cent were in the hospitals. The nursery population averaged twenty-seven children. The weekly per capita expenditure was five dollars and thirty-four cents in the hospitals and two dollars and seventeen cents in the almshouses.

The average annual population for the last five years of the past decade is no indication of actual conditions in the institutions, and invites misconstruction, especially along the line that the necessity for increased quarters is not pressing. This impression would be distinctly erroneous.

One reason for the apparently slight variation is that it has long been impossible to increase, owing to lack of accommodation; another is that the old rule of holding inmates six weeks has not been enforced, except for disciplinary purposes, so that the strain has been relieved numberless times by the discharging of cases able to go to the city temporarily in order to admit those in more abject condition, but who were no longer welcome at Tewksbury.

The present unavoidable transfer of the inmates of the Charlestown Almshouse merely increases and accentuates the exigency of increased quarters here. The only rational disposition of the institutions under our charge, if a desire exists to have an institution on the mainland, would be to make the latter a purely chronic hospital and devote the entire island institutions to almshouse purposes, and even this would bring about a

hardship greater than any benefit derived, by reason of the frequent transfers between the hospital and almshouse, since of those who are not constantly in need of hospital treatment, the majority require it intermittently.

Pending legislation, some phase of which will in all probability be enacted into law tending to make the acquirement of settlements easier, presents a new prob-

lem to us of an abnormal increase in population.

These imminent conditions, together with the present congested state of the institutions, which alone is vitally necessitous, make imperative a rearrangement of the present and the construction of new buildings.

I therefore urge again, and insistently, after careful thought, the following recommendations in sequence:

First. Move and locate the present main brick institution building (with the exception of the old power house, which will be razed) to a point about four hundred feet south of its present location, fronting as it now does on the harbor to the west, there to be occupied solely as a home for all the male indigents.

Second. Construct on the site of this building a new general hospital for men, a portion of which will be devoted to individual strong rooms for cases mentally deranged from any cause; this structural unit to be so plotted as to permit extensions to meet the increased demands for space in the future without

marring the symmetry of the scheme.

Third. The male hospital for tuberculosis to remain undis-

turbed for the present.

Fourth. The present Nurses' Home, both on account of its construction, size and contiguity to the above hospital, be converted in hospital quarters for women suffering from pulmonary tuberculosis, thereby relieving the strain on the east wing of the present general hospital, where an entire ward now has to be given over to this purpose.

Fifth. Construct a new Nurses' Home to contain approximately 100 rooms, including lecture and recreation rooms, at a point not less than two hundred feet south of the nearest

hospital.

Sixth. The whole of the present general hospital to be used for women patients and the nursery.

Seventh. The present dormitory for women should remain unchanged either in construction or uses.

Eighth. Convert the cottage, south of the morgue, into a

contagious hospital.

Ninth. Move the comparatively new frame building now located near the reservoir to a point about one hundred feet west of the chapel, there to be used as a general store for the receiving and distributing of all supplies.

Tenth. Construct a central kitchen on the oval adjoining the west side of the power house, with an ice plant and refrigerator of sufficient size.

Eleventh. Arrange a system of subways connecting all in-

habited buildings.

The foregoing recommendations are suggested because they are not only essentially valuable to the city now but because they anticipate and meet remote but inevitable conditions which economically can best be met at present.

My reason for asking you to attack this problem on so broad a scale is that we may not unconsciously fall into the grave errors of those who in previous times had in charge the matter of extensions and who with no idea of future development temporized with the then

present.

At the time the new department steamer went into commission I brought to your attention the certainty of damage which will occur to the superstructure of the boat if compelled to lie broadside to a northeast storm, and there is now no place where she can lie with protection at such a time. The remedy is to build a bulkhead at a right angle with the southern face of the pier which will cost approximately seventeen hundred dollars.

During the spring about fifty thousand pine seedlings were planted in a band sixty feet wide and three miles long surrounding the southern half of the island, and I believe that eighty per cent survived the summer, and were showing a healthy growth at the time snow covered the ground. If they survive this winter, we may hope to see a change in the bleakness of that portion of the island within a few years. In addition to this six hundred shrubs were planted in the populated section.

As soon as the frost is out of the ground we will commence laying the miniature railway which will relieve the strain on the teams now hauling coal and other freight up the steep incline from the east wharf.

The west wing lavatories and the east and west wing diet kitchens have been completely made over, with new appurtenances, terazzo floors and ceramic tile walls. On account of our very limited appropriation this is one of the works on which we can do only a limited amount annually, and for the coming year the center wing diet kitchen and the center and west wing lavatories have been apportioned.

Any institution in existence for a quarter century will feel two difficulties from which we are not free,—the insufficient ventilation due to overcrowding, and appliances to relieve it either incompetent or obsolete. This has been relieved to an appreciable degree, however, in three instances by installing large electric exhausts, although the initial expense as well as the expense of the

additional load on the dynamos is material.

The telephone service with the city is inconceivably bad, and for this condition it would appear the telephone company is more culpable than any adverse conditions of the elements under which the service may be called upon to work. The local service here between departments is antiquated, and the remedy for this is the installation of a switch board, which would involve additional employment. In any event an additional trunk line is necessary in order that the business of the

hospital be conducted expeditiously.

A serious hardship under which we labor is a law placed on the statute books last year (chapter four hundred fourteen of the Acts of nineteen hundred ten), presumably at the instance of the Prison Commission, which virtually compels us to buy from the correctional institutions anything which they may turn out in the way of manufactures. While I appreciate that they must have an outlet for their products, it is wholly unfair to an institution of the character of a hospital—which necessarily produces nothing—to buy an inferior article at a price at which superior goods can be bought in open market.

One subject that has come up spasmodically has been that of voluntary visitors, and if I understand their duties correctly, I am free to say that their activities

are superfluous and apt to be dangerous.

Where public institutions are carefully supervised, by governing boards and paid inspectors from foreign supervisory boards, it is patent that any condition that might need improvement is early known and the remedy

easily compelled.

Without wishing to point out to others where they might do good to the greatest advantage, I am unable to lose sight of the thought that these willing helpers who give generously of their time and energy might better keep in touch with broader opportunity for good, with organizations of the character of health boards and district nursing institutions who have intimate knowl-

edge of unhappy conditions prevailing in homes, especially in such districts as are commonly known as slums.

In this connection there is one class of young girls who need moral aid and assistance and very recently I have seen a start made in this direction. The ultimate solution of this serious question will be reached only with an institution for the purpose of restraining indefinitely one subclass of this set.

With reference to the radiological and fluoroscopic work, which has been taken up on a scale very much larger this year than heretofore, I feel that it is sufficient to say that the benefits accruing are in excess of any

outlay we may make in that direction.

Frankly, the pathological work done at Long Island for the three years prior to nineteen hundred ten warranted the nominal amount expended. Since then it has keenly impressed itself on my mind that this work has been conducted rather with a view to benefit the medical school and its laboratory, than our hospital and its resident staff, who have the first claim upon the results to be obtained by this expenditure.

We owe much to our resident medical staff; in order to keep its supply excellent and complete there should be no hesitancy in the granting of any reasonable

request where expense is balanced by result.

It has been especially gratifying to me in the year just passed to note the interest taken by the younger members of the visiting medical staff in the hospital and its internes, often at a very considerable sacrifice to themselves.

I rarely favor increases in compensation for wages and in no case recommend them without the most careful consideration. I did this year, however, send to you a list of increases that I felt was justified in every instance and, although approval of it was withheld after it left my hand, I still feel as strongly as I did at that time and submit it to you again unchanged.

While the pay roll should in no case be the incentive to thorough service in an employee, conscientious and

willing work should be rewarded.

This institution for the year just closed has shown marked and material progress. With the proper support of the city, which at all times and under the most favorable conditions must necessarily be restricted, it will maintain that standard which should always be approached.

What we ask for are not in any sense luxuries, but vitally necessary to the work we are carrying out. Measured by definitely accomplished good and the possibilities of infinitely greater good which may be achieved by a sane and firm furtherance of the policy now existing, the hospitals and institutions are on an enviable basis. The solution lies in striking the medium between excessive economy and extravagance.

Respectfully,

Charles E. Donlan, M. D.,

Superintendent.

REPORT OF THE SUPERINTENDENT OF THE ALMSHOUSE, CHARLESTOWN.

Charlestown District, Boston, Mass., January 31, 1911.

To the Boston Infirmary Trustees:

The report of the Charlestown Almshouse for the year ending January 31, 1911, is herewith respectfully submitted.

During the year there were 87 admissions, the daily average population being 102. The general health of the inmates has been very good, and of course for this we are thankful. There were four deaths during the year, and in each case the person was over sixty years of age.

Kind friends connected with churches in the vicinity have on many occasions furnished entertainment, and to these people we wish to extend our sincere thanks.

The officers of the institution have shown untiring energy and devotion in their work, and are deserving of

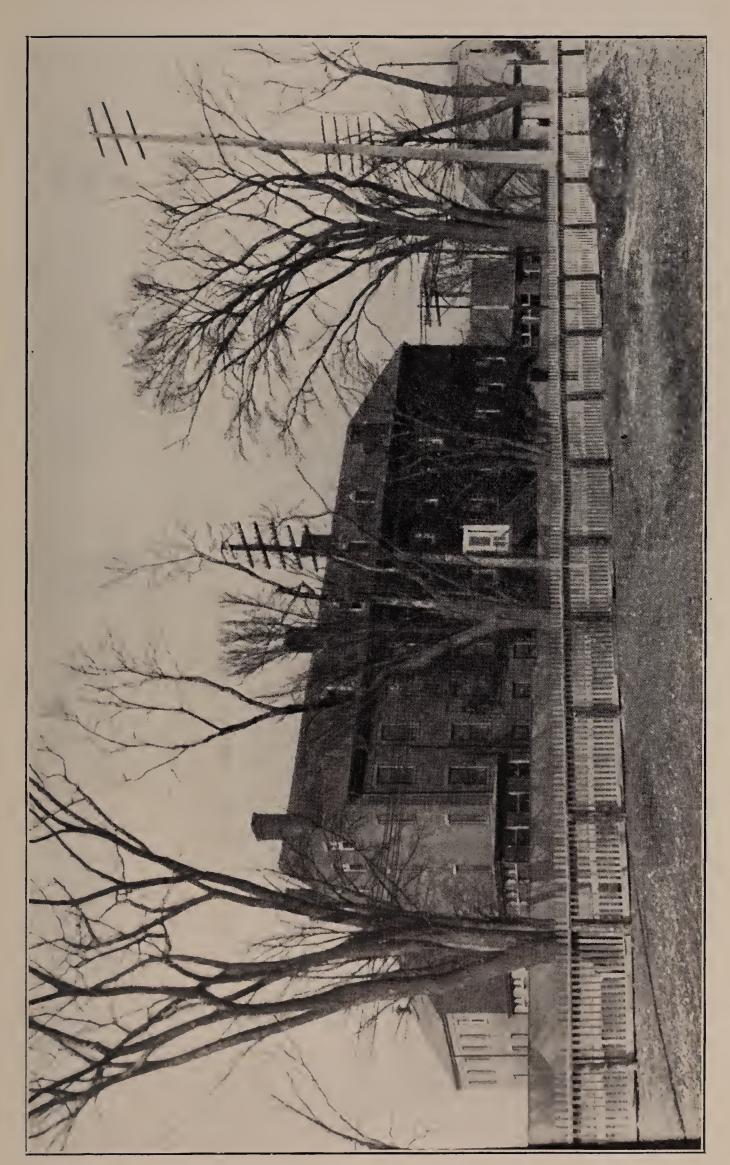

the highest praise.

During the year very little has been accomplished in the way of repairs, primarily because of the meager appropriation, and also because of the tentative plans to transfer the property to the Boston Elevated Railway for use in connection with the extension of the elevated structure from Sullivan square to Everett. At present the indications are that before the end of the year this institution will be merged with the Long Island institution.

As this report will probably be the last sent out from here, a brief résumé of the history of the Charlestown

Almshouse might be of interest.

The first almshouse in Charlestown was established about 1795 on a site now known as Wallace court, the first superintendent being Cornelius Felton, his successor being Captain Foster. Some years later the almshouse was moved to a point on Bunker Hill street, just above the old cemetery, and here Mr. Alexander Eaton served as superintendent. In 1849 the construction of the present almshouse was begun and here

CHARLESTOWN ALMSHOUSE; ERECTED IN 1849; BECAME PROPERTY OF THE CITY OF BOSTON IN 1873, WHEN CHARLESTOWN WAS ANNEXED TO BOSTON,

Capt. George Cairns was superintendent for a number of years. Mr. James R. Gerrish, who up to a few years ago was master of the Suffolk County House of Correction, succeeded Captain Cairns. Mr. Chandler Eastman followed Mr. Gerrish as superintendent, and my immediate predecessor, Miss Sarah G. Weeden, occupied the position from 1898 to 1907.

I wish to thank the Board of Trustees for their co-operation in everything pertaining to the adminis-

tration of this institution.

Respectfully,

Mary A. Morris,
Superintendent.

REPORT OF THE VISITING MEDICAL STAFF OF THE LONG ISLAND HOSPITAL.

Boston, January 31, 1911.

To the Boston Infirmary Trustees:

The past year has been uneventful so far as the medical work of the hospital is concerned. In spite of the distance of the institution and the consequent difficulty of making visits, the services of the hospital have been maintained in a satisfactory way and the needs of the patients met as heretofore. With the general development of the hospital, its reputation has naturally spread, with the result that the house officer positions are sought with increasing eagerness and with corresponding improvement in the medical and surgical care of the patients. It is desirable that the attractiveness of this service should be still further enhanced for the benefit primarily of the institution which must profit by the better medical attainments of the men who constitute its house staff. The service, as at present organized, is attractive from the facts that its length is one year and that it includes experience both in surgery and medicine, and in their various subdivisions, in a way not obtainable in any other hospital in or about Boston. The disadvantage of the service is its remoteness, through its separation by water, from other institutions. Partially to compensate for this manifest disadvantage, it has long seemed to the staff that certain forms of amusement and possibilities of exercise should be provided for the house staff. For example, squash courts could easily be built at small expense, which would afford a needed and healthful recreation for the house officers. We would, therefore, recommend to your Board that one or more such courts be provided. It would be well also to provide some definite form of outdoor amusement for the nurses.

The growth of the hospital has demanded more adequate accommodations for the increased number of nurses. We have in previous reports urged that this matter be given serious consideration and we are accordingly gratified to learn that provision is soon to be

made for the enlargement of the Nurses' Home. We have repeatedly alluded to the peculiar difficulties of nursing at Long Island, which renders it still more desirable that the nurses, when off duty, should have

every legitimate comfort.

The hospital is at present provided with an adequate and attractive ward or nursery for infants. This department of the hospital work has developed in a most satisfactory way during the past ten years. The babies are well cared for and many lives are undoubtedly saved through the attention which has been given to their peculiar needs. There are, however, also in the hospital a considerable number of children ranging from the ages of six to fourteen years. For these children no adequate provision has hitherto been made; they have of necessity been cared for in the wards with This, we believe, to be unfortunate and unde-We would, therefore, suggest that a separate ward be provided for such children to the end not only of securing a better classification of patients, but also that such children may not be exposed to the possible demoralizing influence of certain of the adult patients.

Certain changes have been made in the resident and visiting staffs during the past year, the most notable of which was the resignation of Dr. George W. Holmes as resident physician. Doctor Holmes's connection with the hospital has extended through four years, beginning as a house officer and demonstrating at that early time his capacity for thorough medical work and administration, he later, on July 1, 1907, became resident physician. In this latter capacity he served the institution with exceptional judgment and loyalty. It is largely due to his enthusiasm and untiring efforts toward improvement of the medical service, supported and encouraged by the superintendent, that the hospital has reached its present state of high efficiency. Doctor Holmes gave up his work at Long Island to accept a position in the X-ray department of the Massachusetts General Hospital and to undertake private work of like character. He has since received the appointment of radiologist at the Long Island Hospital which will give him an opportunity to continue investigations already begun and to develop further this important branch of the hospital work.

Dr. James S. Tomkies, a former house officer, has been appointed resident physician in Doctor Holmes's

place. Dr. Hans Barkan has been appointed pathologist in the place of Dr. Samuel R. Haythorne, resigned, and Dr. James B. Ayer, Jr., and Dr. Theodore J. Eastman have been appointed assistant visiting physicians.

We have again to acknowledge the continued cooperation of your Board, of the superintendent, and of the other officers of the institution in their encouragement of the hospital idea which we have always believed should dominate at Long Island.

Respectfully submitted,

E. W. Taylor, Secretary, for the Visiting Medical Staff.

REPORT OF THE VISITING PHYSICIAN THE ALMSHOUSE, CHARLESTOWN.

Charlestown, Mass., January 31, 1911.

MISS MARY A. MORRIS,

Superintendent Charlestown Almshouse, Charlestown, Mass.:

My report for the year ending January 31, 1911, is

hereby respectfully submitted.

We have had about the usual busy year, both in the hospital and the dispensary. Every case has been

carefully attended to.

We have transferred thirteen patients to Long Island Hospital, two patients were committed for mental disease. Four women died during the year, two as the result of heart disease, ages, sixty-seven and eighty; one from cerebral hemorrhage, age seventy-five, and the fourth from cerebral thrombosis, age eighty-four.

I have enjoyed the same faithful assistance as in

several years past.

Very truly yours, JOSEPH E. McDermott, M. D.

LONG ISLAND HOSPITAL TRAINING SCHOOL FOR NURSES.

This training school is established to give a systematic two years' course of training and practice to women

desirous of becoming professional nurses.

The school is connected with the Boston Almshouse and Hospital on Long Island, in Boston Harbor. hospital buildings are modern in all their appointments

and contain three hundred beds.

The superintendent of the almshouse and hospital has the general supervision of all matters relating to the school, and application for admission should be made to The superintendent of nurses has the immediate charge of all the nursing in the hospital, of all persons employed in the wards, and also is responsible for the instruction and management of the pupils in the training school.

The course of training requires two years and includes general medical, surgical, maternity and infant nursing.

A fixed course of instruction is given, including lectures and demonstrations on practical points by the medical and surgical staff, recitations on these and from textbooks, but chiefly the daily instruction from the superintendent of nurses and the graduate head nurses and the accurate daily drill in the wards and operating room. The instruction includes the general care of the sick and the usual detailed instruction common to all hospital training schools. Maternity nursing is taught by practice in the confinement rooms, which includes digital examination of patients.

Candidates will be received between the ages of twenty-one and thirty years. They must be of sound health. They should send a brief personal history, and give the names and addresses of responsible persons, not of their own kin, who know their good character and capabilities. Upon the approved recommendation of the superintendent they will be received for two months

on probation.

At the end of the two months candidates, if considered satisfactory to the authorities in charge of the

hospital, are permitted to join the school upon signing an agreement to complete the prescribed course of two

years and to conform to all rules.

The right is reserved by the authorities of the hospital to terminate at any time the connection of any pupil for inefficiency, misconduct, generally unsatisfactory record, or for any other reason which may be deemed sufficient.

While the education and training which are afforded are intended to be a full equivalent for their services, there is given the pupils, toward defraying their necessary personal expenses, \$10 per month during the first year and \$12 per month for the second year.

If pupils successfully fulfill the requirements for the full term of two years, and pass the necessary examination they will, upon the termination of their service,

receive the diploma of the hospital.

There are no fixed dates for the beginning of service, but accepted candidates may enter whenever vacancies occur. Pupils are required after they join the school to wear the training school uniform and regulation shoes.

Training School for Nurse Attendants — Oneyear Course.

LIST OF GRADUATES.

Average	996	976	890	841	800	807	831	829	845	892	948	974
Maximum	1,018	997	922	866	815	824	839	840	873	923	967	995
Minimum	970	942	859	817	792	791	822	815	823	865	921	960

Average, 886 *.

Maximum, 1,018.

Minimum, 791.

* The average here given shows the average number recorded as inmates, and includes those on leave of absence; whereas the average population on which the per capita expenditure and cost is based (881) is the number actually in the institution, excluding those on leave.

Note.— The above figures give the morning census. On January 31, 1911, there were three admissions and five discharges, which would make the morning census for February 1, 1911, 993.

^{*} Of the 41 discharged and readmitted, 2 died after readmission, 13 were discharged and 26 were in the institution on January 31, 1911.

Note.—These categories, though not given as medical statements, are yet, we believe, accurate for all practical purposes, and have been carefully determined by the superintendents of the two institutions. Each individual is counted in one category only, although many might fairly appear in two or even three categories; as, for instance, a man who is old may be lame, and also be suffering from acute bronchitis, which would place him under three categories, while he appears in this chart under but one.

APPENDIX II.

Chapter 395 of the Acts of 1897, as Amended by Chapter 451 of the Acts of 1897.

AN ACT TO ESTABLISH SEPARATE DEPARTMENTS OF THE CITY OF BOSTON FOR THE CARE OF CHILDREN, PAUPERS, INSANE PERSONS AND CRIMINALS.

Be it enacted, etc., as follows:

Section 1. The Children's Institutions Department, the Pauper Institutions Department, the Insane Hospital Department and the Institutions Registration Department, of the City of Boston, are hereby created as departments of said city, and shall be under the charge of the officers herein designated therefor. Said officers shall be citizens or taxpayers of said city, and shall be appointed by the mayor of said city without confirmation by the board of aldermen. The provisions of chapter two hundred and sixty-six of the Acts of the year eighteen hundred and eighty-five, and of all other acts relating to the departments of the City of Boston, or the officers or employees thereof, except as otherwise herein provided, shall be applicable to said

departments and the officers and employees thereof.

Sect. 2. Each of said departments, except the Institutions Registration Department, shall be under the charge of a board of seven trustees, at least two of whom shall always be women; during the current year one of said trustees for each of said departments shall be appointed for the term of five years, two for the term of four years, one for the term of three years, two for the term of two years and one for the term of one year, beginning with the first day of May in the year eighteen hundred and ninety-seven; and hereafter in the year in which any term or terms shall expire a trustee or trustees shall be appointed for the term of five years, beginning with the first day of May in the year of appointment; any vacancy occurring among said trustees shall be filled by appointment of a trustee as aforesaid for the remainder of the term. Said trustees shall serve without compensation, but all expenses reasonably incurred by them in the performance of their duty shall be paid by said city if approved by a recorded vote of the board of which the trustee incurring such expense is a member. They shall organize on the first Monday of May in each year, or as soon thereafter as may be, by the choice of a chairman who shall be one of their number and of a secretary who may or may not, at their discretion, be one of their number. No such trustee, nor any person in the employ of any of said trustees or departments, shall be interested in a private capacity, directly or indirectly, in any contract or agreement for labor or for articles

furnished for any of said departments.

SECT. 3. The board of trustees for the Children's Institutions Department shall be known as the trustees for children, and shall have, exercise and perform all the powers and duties relating to children, or to any institution or place in which they are confined or detained or cared for, including the House of Reformation, now conferred by the statutes of this Commonwealth upon the institutions commissioner of the City of Boston, except as to children lawfully committed to or detained in institutions established for the care and custody of the adult insane paupers and criminals.

SECT. 4. The board of trustees for the Pauper Institutions Department shall be known as the pauper institutions trustees, and, except as otherwise provided by section three of this act, shall have, exercise and perform all the powers and duties relating to poor and indigent persons, or to any institution or place in which they are confined or detained or cared for, now conferred by the statutes of this Commonwealth upon the

institutions commissioner of the City of Boston.

Sect. 5. The board of trustees for the Insane Hospital Department shall be known as the insane hospital trustees, and shall have the general care and control of the Boston lunatic hospital established by the City of Boston under the provisions of chapter one hundred and thirty-one of the Acts of the year eighteen hundred and thirty-nine, and all other hospitals that said city has established, or may hereafter establish, for the care or treatment of the insane, and the same shall hereafter be known as the Boston Insane Hospital; and said trustees shall have all the powers relating to the insane and to the institutions in which they are confined, conferred by the statutes of the Commonwealth upon the institutions commissioner of the City of Boston.

SECT. 6. The Institutions Department of the City of Boston shall hereafter be styled the Penal Institutions Department, and the institutions commissioner shall hereafter be styled the penal institutions commissioner, and he shall continue to have, exercise and perform all the powers and duties now conferred by the statutes of this Commonwealth upon the institutions commissioner of the City of Boston not conferred by this act upon any other officer or board of trustees. The penal institutions commissioner may, with the approval of said mayor,

appoint one assistant.

Sect. 7. The Institutions Registration Department shall be under the charge of the institutions registrar, who shall investigate all questions relating to the settlement of paupers, to the commitment of the insane, or to the agency for discharged prisoners, or to any rights, duties or liabilities connected there-

with, and report thereon to the department interested therein; and shall perform such services relating to the accounts and to the collection, registration and tabulation of statistics relating to said departments, or any of them, as may be required of him by said mayor or by the officer or trustees in charge of any of said departments, with the approval of said mayor. Said registrar shall receive an annual salary of three thousand dollars, or such other salary as may be fixed by ordinance.

Sect. 8. Said mayor shall quarterly, in the months of June, September, December and March, and at such other times and at such places as he shall appoint, hold conferences, at which may be present said penal institutions commissioner, said institutions registrar, two members of each of the aforesaid boards of trustees, to be selected by such boards severally, and two members of the board of overseers of the poor, to be selected by such board, to consider any subjects relating to the work of said departments, or of any two or more of them, or to the co-ordination of such work, and at said conferences said mayor shall preside.

SECT. 9. The City of Boston may take and hold any real or personal property which may be given, granted, bequeathed or devised to and accepted by it for the benefit of any one or more of said departments or of the persons under the care thereof. Such property or the income thereof shall be used, applied and disposed of according to the lawful directions of the donor thereof, by the officers in charge of such department or departments.

Sect. 10. Any officers or employees of the Institutions Department of the City of Boston, whose tenure of office or position may be affected by this act or the carrying out thereof, may be appointed to similar positions in said city at any time within six months of the passage of this act, without civil service examination or enrolment.

Sect. 11. No veteran holding an office in the Institutions Department of the City of Boston shall be removed or suspended, or shall without his consent be transferred from such office or employment, except after a full hearing before the mayor, and at such hearing the veteran shall have the right to be present and to be represented by counsel. Such removal, suspension or transfer shall be made only upon the written order of the mayor.

[Approved May 13, 1897.

Chapter 393 of the Acts of 1908.

AN ACT TO CHANGE THE NAME OF THE PAUPER INSTITUTIONS DEPARTMENT IN THE CITY OF BOSTON.

Be it enacted, etc., as follows:

Section 1. The pauper institutions trustees, as established by chapter three hundred and ninety-five of the Acts of the year eighteen hundred and ninety-seven, shall hereafter be known as the Boston infirmary trustees, and the Pauper Institutions Department shall be known as the Boston Infirmary Department.

SECT. 2. This act shall take effect upon its passage.

[Approved April 15, 1908.
