Background

Incubator projects’ dilemma

- Numerous projects are left to fend for themselves
- Lack of help from knowledgeable member of communities
- Lack of centralized resources, especially most used templates, modules, etc.
Background

Indonesian Incubator projects of 2022-2023

Seven communities had been working hard since early this year for their projects to be launched before Wikimania 2023

Background

Indonesian Incubator projects of 2022-2023

- Other smaller Wiki projects have a hard time prospering and very little chance of making it out of Incubator
- Each new communities had to be helped with large amount of supports

Ideas for Wikisources @Incubator
New Wikisource @Multilingual Wikisource

- Different than the rest of the Wiki sister projects
- Need documentations for how to proofreading
- Need forms for index
- Need a lot of templates for styling

- 11 new Wikisources since 2013
- Compare to
  - 50 new Wikipedias per year since 2013
  - 23 new Wiktionaries since 2013
  - 2 new Wikibooks since 2013
  - 8 new Wikiquotes since 2013
  - 10 new Wikivoyages since 2013
The problem of exporting new project

When a new project is still in Incubator / Multilingual WS, editors can use various templates/modules available in those sites. When being exported, all templates used will be exported as well. Afterwards, all new templates/modules must be copied painstakingly from other languages.
Let’s add more resources!
