STOCKS OF LEAF TOBACCO OWNED BY DEALERS AND MANUFACTURERS 1/ 2/

Total Stocks of Leaf Tobacco Lower Than A Year Ago

Leaf tobacco stocks in the United States and Puerto Rico totaled 4,854 million pounds (farm-sales weight) as of January 1, 1960, based on the quarterly reports of dealers and manufacturers. This is a decrease of 123 million pounds in leaf inventories compared with the previous January 1, and a substantial 295 million from 2 years ago. During the October-December quarter, marketings of the 1959 crop totaled around 760 million pounds. This brought total marketings of the 1959 crop to approximately 1,560 million, or about 85 percent of total production. (About the same percentage of the previous year's crop was sold in the corresponding period last year.)

Stocks of most types were lower than on the previous January 1, reflecting the smaller production of tobacco in the United States. Flue-cured was down 4 percent; burley, 2 percent; Maryland, 11 percent; fire-cured, 9 percent; dark air-cured, 8 percent; and cigar-filler, 4 percent.

Stocks as of January 1 included about 879 million pounds (farm-sales weight) of leaf tobacco under Government loans down a substantial 199 million pounds from a year ago. Loan stocks as of January 1 were divided as follows: Flue-cured, 592 million pounds; burley, 203 million; Maryland 9.2 million; fire-cured, 43.6 million; dark air-cured, 18.0 million; and cigar-leaf, 13.3 million. More than one-half of the burley holdings on hand as of this January 1 has been sold and this tobacco will move from under price support loans in the near future.

1/ Figures quoted for type totals in this summary are the farm-sales-weight equivalent of reported stocks except foreign-grown leaf which is converted to an unstemmed equivalent basis only. (See tables in body of report for reported weight basis.) This report is issued quarterly.

2/ All Government loan stocks are reported by Grower Cooperatives, which are considered dealers for stocks-reporting purposes.

CIGARETTE-LEAF STOCKS

Flue-cured, Burley, and Maryland Stocks All Lower Than on Last January 1 Foreign-grown Holdings at High Level

Stocks of flue-cured tobacco totaled 2,597 million pounds as of January 1, 1960--a decrease of 95 million from those reported the previous January 1 and 212 million from 2 years ago. Marketing of the 1959 crop was completed by January 1, with producers' sales totaling 1,078 million pounds, approximately the same as the 1958 crop.

Burley tobacco holdings this January 1 were 1,481 million pounds--31 million below the stocks of a year ago (1,512 million). Sales of the 1959 crop of burley leaf on the auction markets prior to January 1 this year totaled about 445 million pounds, or 88 percent of the crop. (About 83 percent of the 1958 crop was marketed through the corresponding date a year earlier.)

Maryland stocks of January 1, 1960, were 62.9 million pounds--a substantial reduction from those reported a year earlier (70.9 million).

Stocks of Foreign-grown cigarette and smoking tobacco (Turkish and other) were 229.0 million pounds--22.2 million pounds greater than inventories of a year ago (206.8 million).

DARK TOBACCO STOCKS

Holdings of Fire-cured and Dark Air-cured Smaller Than on January 1, 1959

Fire-cured tobacco stocks, reported as 112.6 million pounds on January 1, 1960, were significantly smaller than those of a year ago (124.1 million), decreases occurring in all 3 types. Virginia fire-cured holdings on January 1, 1960, were 24.7 million pounds; Eastern District Kentucky and Tennessee fire-cured, 72.8 million; and Western District, 15.2 million. Sales of the 1959 crop of type 21 on the auction markets prior to January 1 totaled 4.9 million pounds, slightly more than was sold the previous year up to the same date. Markets in types 22 and 23, as is customary, did not open until after January 1.

Holdings of dark air-cured tobacco totaled 71.1 million pounds on January 1, 1960--6.1 million less than were reported a year earlier and 17.2 million below 2 years ago. Stocks of each of the dark air-cured types showed decreases. One Sucker stocks on this January 1 were 43.2 million pounds; Green River, 22.3 million; and Virginia sun-cured, 5.6 million. Auction sales prior to January 1 totaled 9.9 million pounds (5.7 million the previous year for the same period).

CIGAR LEAF STOCKS

Holdings of Filler and Binder Kinds Down Slightly; Shade-grown Increases

Imported Cigar-leaf Stocks Considerably Larger

Holdings by dealers and manufacturers of all domestic types of cigar leaf tobacco were reported as 253.6 million pounds (farm-sales-weight) on January 1, 1960 (257.4 million a year earlier). Stocks of foreign-grown cigar-leaf totaled 42.6 million pounds (unstemmed equivalent) on this January 1 reporting date--9.0 million more than holdings on the same date a year earlier (17.6 million compared with 2 years earlier).

Cigar-filler type stocks totaling 145.8 million pounds were 5.3 million under those of a year ago (151.1 million). Holdings of Pennsylvania filler were slightly higher, but lower stocks of Ohio and Puerto Rican leaf more than offset this increase. Pennsylvania Seedleaf stocks this January 1 were 93.1 million pounds; Ohio filler, 15.9 million; and Puerto Rican, 36.7 million.

Stocks of cigar-binder types were 78.3 million pounds on January 1, 1960 (79.3 million on the previous January 1). Stocks of Connecticut Valley Broadleaf this January 1 were 20.4 million pounds; Connecticut Valley Havana Seed, 16.4 million; Southern Wisconsin, 18.9 million; and Northern Wisconsin, 22.6 million.

Shade-grown cigar wrapper stocks this January 1 were 29.5 million pounds --2.6 million more than were reported a year earlier (26.9 million). Stocks of both types 61 and 62 were higher, compared with the previous January 1. Stocks of Connecticut Valley Shade on January 1, 1960, were 18.8 million pounds, and of Georgia and Florida Shade, 10.7 million. It appears likely that all of the 1959 crop of 18.6 million pounds was in stocks on January 1, 1960.

Stocks of foreign-grown cigar leaf, as of January 1, 1960, were divided as follows: Cuban, 26.2 million pounds; Philippine Islands (Manila), 11.1 million; Sumatra and Java, 21 thousand pounds; and miscellaneous foreign-grown cigar leaf, 5.2 million.

LEAF REPRESENTED IN STOCKS OF TOBACCO SHEET (see table 5)

Stocks Represented in Tobacco Sheet Show Increase

Stocks of leaf represented in inventories of "tobacco sheet" totaled 4.6 million pounds (reporting weight) compared with 2.9 million on the previous January 1. Of the total in "tobacco sheet" this January 1, 2.8 million pounds was for use in cigarettes and smoking tobacco, 1.8 million for cigar binder and a very small quantity for wrappers for small cigars.

1/ Information in this table taken from U. S. Department of Agriculture Circular 435, Tobacco Shrinkages and Losses in Weight in Handling and Storage, issued in July 1937. 2/ Factors for converting unstemmed stocks to farm-sales weight are adjusted on the basis of an average loss on the reported weight and should not be taken as indicative of full shrinkage after handling, sweating, and storage. 3/ See footnote 2 on page 7 for conversion factors to farm-sales-weight equivalent for cigar leaf except Type 46. 4/ Foreign-grown stocks not converted to farm-sales-weight equivalent.

1/ Totals include stocks of leaf reported in tobacco sheet. See separate reporting in tables 4 and 5.

2/ For factor used in converting weights see table 1 except for cigar leaf. The instructions for reporting unstemmed cigar-leaf of the domestic types require dealers and manufacturers to indicate the weight basis on which the tobacco is reported, namely farm-sales weight, marked weight, or sweated weight. The stocks are converted to the farm-sales-weight equivalent on the basis of the amount reported in these three categories. The conversion factors by types of tobacco for January 1, 1960 are as follows: Type 41, 106; Types 42-44, 112; Type 51, 105; Type 52, 106; Type 54, 104; Type 55, 105; Type 61, 108; Type 62, 112. January 1, 1960 figures subject to revision.

3/ For explanation of stocks included in this classification, see footnote 5 on page 15.

4/ Foreign-grown leaf is converted to an unstemmed equivalent basis only.

1/ Annual disappearance for a type is calculated for the marketing year established for that type, the year beginning on the quarterly reporting date on which stocks of the type are at their lowest point and before the new crop enters stocks.

2/ The carry-over stocks have been tabulated separately according to broad groupings of ownership, namely manufacturers, under loan, and all other. "Other" reflects stocks reported by tobacco dealers and stocks held in the United States by representatives of foreign manufacturers. The quantities shown as owned by dealers may include some tobacco held by dealers which is earmarked for sale to domestic manufacturers or for export.

3/ December 1 estimate, U. S. Crop Reporting Board.

Table 4.--Stocks of leaf tobacco, including leaf in tobacco sheet 1/, by types and, where applicable, by groups of grades, owned by dealers and manufacturers, January 1, 1960 compared with January 1, 1959, and October 1, 1959

1/ Represents leaf tobacco in stocks of reconstituted or processed tobacco sheet.

2/ Subject to revision.

3/ Summary according to groups of grades reflecting a broad quality breakdown of total cigar leaf stocks.

4/ Includes Puerto Rican on the Island, Type 46.

5/ Although Type 73 is defined as all domestic types of tobacco not otherwise classified, the bulk of the stocks reported in this type consists of cuttings, clippings, and trimmings. This is the result, in most instances, of the inability of reporters to designate cuttings, clippings, and trimmings in the "S" group of the types to which they properly belong.

6/ Does not include Sumatra and Java leaf held for sale in the Free Trade Zone.

* Revisions in October 1, 1959 report.

1/ Total includes stocks of leaf reported in tobacco sheet. See separate reporting in tables 4 and 5.

2/ These statistics represent the quantity of leaf tobacco reported as owned by all leaf tobacco dealers, manufacturers, quasi-manufacturers, growers' cooperative associations, warehousemen, brokers, holders, and owners subject to provisions of the Tobacco Stocks and Standards Act approved January 14, 1929, and the amendments thereto passed in the 72nd and 74th Congress. The quantities owned by dealers and manufacturers have been tabulated separately on a type total basis.

3/ This table should be considered as representing only the approximate quantities owned respectively by dealers and manufacturers. The quantities shown as owned by manufacturers include tobacco which is held under dealer registries of manufacturers and also tobacco held by dealers and known to be purchased on order for foreign or domestic manufacturers. The quantities shown as owned by dealers may include some tobacco held by dealers which is earmarked for sale to domestic manufacturers or for export. All Government loan stocks are included as dealer holdings.

4/ Includes stocks on the Island of Puerto Rico.

5/ For explanation of stocks included in this classification see footnote 5 on page 15.
