FIPS PUB 58-1

Foreword

The Federal Information Processing Standards Publication Series of the National Bureau of Standards (NBS) is the official publication relating to standards, guidelines, and documents adopted and promulgated under the provisions of Public Law 89-306 (Brooks Act) and under Part 6 of Title 15, Code of Federal Regulations. These legislative and executive mandates have given the Secretary of Commerce important responsibilities for improving the utilization and management of computers and automatic data processing in the Federal Government. To carry out the Secretary's responsibilities, the NBS, through its Institute for Computer Sciences and Technology, provides leadership, technical guidance, and coordination of Government efforts in the development of standards, guidelines and documents in these areas.

Comments concerning Federal Information Processing Standards Publications are welcomed and should be addressed to the Director, Institute for Computer Sciences and Technology, National Bureau of Standards, Gaithersburg, MD 20899.

James H. Burrows, *Director*
Institute for Computer Sciences and Technology

Abstract

This standard provides uniform time representations based upon both the 12- and 24-hour timekeeping systems. It provides a means for representing local time of the day in digital form for the purpose of interchanging information among data systems. It specifies the time elements and their sequencing, the use of separators between time elements and the representation of the meridiem designator. This standard adopts American National Standard ANSI X3.43-1986, Representations of Local Time of Day for Information Interchange. This revision supersedes FIPS PUB 58 in its entirety.

Key words: ADP standards; computers; data elements and codes; data processing; Federal Information Processing Standard; information systems; local time of day; meridiem designators; separators; sequencing; time elements; timekeeping systems; time representations.

Processing Standards Publication 58-1**

1988 January 27

Announcing the Standard for

**REPRESENTATIONS OF LOCAL TIME OF DAY
FOR INFORMATION INTERCHANGE**

Federal Information Processing Standards Publications (FIPS PUBS) are issued by the National Bureau of Standards in accordance with section 111 (f) (2) of the Federal Property and Administrative Services Act of 1949, as amended, Public Law 89-306 (79 Stat. 1127), Executive Order 11717 (38 FR 12315, dated May 11, 1973), and Part 6 of Title 15 Code of Federal Regulations.

1. **Name of Standard.** Representations of Local Time of Day for Information Interchange (FIPS PUB 58-1).
2. **Category of Standard.** Federal General Data Standard, Representations and Codes.
3. **Explanation.** This standard provides uniform time representations based upon both the 12- and 24-hour timekeeping systems. It provides a means for representing local time of the day in digital form for the purpose of interchanging information among data systems. It specifies the time elements and their sequencing, the use of separators between time elements and the representation of the meridiem designator. This revision supersedes FIPS PUB 58 in its entirety.
4. **Approving Authority.** The Secretary of Commerce.
5. **Maintenance Agency.** U.S. Department of Commerce, National Bureau of Standards, Institute for Computer Sciences and Technology.
6. **Cross Index.**
 - a. FIPS PUB 4-1, Representation for Calendar Date and Ordinal Date for Information Interchange.
 - b. FIPS PUB 59, Representations of Universal Time, Local Time Differentials, and United States Time Zone References for Information Interchange (being revised).
 - c. American National Standard ANSI X3.30-1985, Representation for Calendar Date and Ordinal Date for Information Interchange.
 - d. American National Standard ANSI X3.43-1986, Representations of Local Time of Day for Information Interchange.
 - e. American National Standard ANSI X3.51-1975, Representations of Universal Time, Local Time Differentials, and United States Time Zone References for Information Interchange (being revised).
 - f. International Standard ISO 2014-1976, Writing of Calendar Dates in All-Numeric Form.
 - g. International Standard ISO 2711-1973, Information Processing Interchange—Representation of Ordinal Dates.
 - h. International Standard ISO 3307-1975, Information Interchange—Representations of Time of the Day.
 - i. International Standard ISO 4031-1978, Information Interchange—Representation of Local Time Differentials.
7. **Objectives.** The objectives of this standard are to improve the utilization of data resources of the Federal Government and avoid unnecessary duplications and incompatibilities in the collection, processing and dissemination of data.
8. **Applicability.** This Federal Data Element and Representation Standard is made available for data interchange among executive departments and independent agencies, and for Federal data interchange with the

non-Federal sector including industry, State, local and other governments, and the public at large.

9. Implementation Schedule. This standard becomes effective July 30, 1988. Use by Federal agencies is encouraged when such use contributes to operational benefits, efficiency, or economy.

10. Specifications. This standard adopts American National Standard ANSI X3.43-1986, Representations of Local Time of Day for Information Interchange. The latter was approved on June 23, 1986 as a revision of ANSI X3.43-1977, and is published by the American National Standards Institute, 1430 Broadway, New York, NY 10018.

11. Where to Obtain Copies. Copies of this publication and the adopted specifications are available for sale by the National Technical Information Service, Springfield, VA 22161. (Sale of the specifications is by arrangement with the American National Standards Institute.) When ordering, refer to Federal Information Processing Standards Publication 58-1 (FIPS PUB 58-1) and title. When microfiche is desired, this should be specified.

☆ U.S. GOVERNMENT PRINTING OFFICE: 1988-0-212-066

NBS *Technical Publications*

Periodical

Journal of Research—The Journal of Research of the National Bureau of Standards reports NBS research and development in those disciplines of the physical and engineering sciences in which the Bureau is active. These include physics, chemistry, engineering, mathematics, and computer sciences. Papers cover a broad range of subjects, with major emphasis on measurement methodology and the basic technology underlying standardization. Also included from time to time are survey articles on topics closely related to the Bureau's technical and scientific programs. Issued six times a year.

Nonperiodicals

Monographs—Major contributions to the technical literature on various subjects related to the Bureau's scientific and technical activities.

Handbooks—Recommended codes of engineering and industrial practice (including safety codes) developed in cooperation with interested industries, professional organizations, and regulatory bodies.

Special Publications—Include proceedings of conferences sponsored by NBS, NBS annual reports, and other special publications appropriate to this grouping such as wall charts, pocket cards, and bibliographies.

Applied Mathematics Series—Mathematical tables, manuals, and studies of special interest to physicists, engineers, chemists, biologists, mathematicians, computer programmers, and others engaged in scientific and technical work.

National Standard Reference Data Series—Provides quantitative data on the physical and chemical properties of materials, compiled from the world's literature and critically evaluated. Developed under a worldwide program coordinated by NBS under the authority of the National Standard Data Act (Public Law 90-396).

NOTE: The Journal of Physical and Chemical Reference Data (JPCRD) is published quarterly for NBS by the American Chemical Society (ACS) and the American Institute of Physics (AIP). Subscriptions, reprints, and supplements are available from ACS, 1155 Sixteenth St., NW, Washington, DC 20056.

Building Science Series—Disseminates technical information developed at the Bureau on building materials, components, systems, and whole structures. The series presents research results, test methods, and performance criteria related to the structural and environmental functions and the durability and safety characteristics of building elements and systems.

Technical Notes—Studies or reports which are complete in themselves but restrictive in their treatment of a subject. Analogous to monographs but not so comprehensive in scope or definitive in treatment of the subject area. Often serve as a vehicle for final reports of work performed at NBS under the sponsorship of other government agencies.

Voluntary Product Standards—Developed under procedures published by the Department of Commerce in Part 10, Title 15, of the Code of Federal Regulations. The standards establish nationally recognized requirements for products, and provide all concerned interests with a basis for common understanding of the characteristics of the products. NBS administers this program as a supplement to the activities of the private sector standardizing organizations.

Consumer Information Series—Practical information, based on NBS research and experience, covering areas of interest to the consumer. Easily understandable language and illustrations provide useful background knowledge for shopping in today's technological marketplace.

Order the above NBS publications from: Superintendent of Documents, Government Printing Office, Washington, DC 20402.

Order the following NBS publications—FIPS and NBSIR's—from the National Technical Information Service, Springfield, VA 22161.

Federal Information Processing Standards Publications (FIPS PUB)—Publications in this series collectively constitute the Federal Information Processing Standards Register. The Register serves as the official source of information in the Federal Government regarding standards issued by NBS pursuant to the Federal Property and Administrative Services Act of 1949 as amended, Public Law 89-306 (79 Stat. 1127), and as implemented by Executive Order 11717 (38 FR 12315, dated May 11, 1973) and Part 6 of Title 15 CFR (Code of Federal Regulations).

NBS Interagency Reports (NBSIR)—A special series of interim or final reports on work performed by NBS for outside sponsors (both government and non-government). In general, initial distribution is handled by the sponsor; public distribution is by the National Technical Information Service, Springfield, VA 22161, in paper copy or microfiche form.
