MICHELL'S HIGHEST QUALITY BULBS

Lilium Harrisii.

True Bermuda Easter Lily. Our "Superior Strain." Grown by the most reliable Grower in Bermuda.

This stock is selected with the greatest care. No flowers have been cut from these bulbs, and the bulbs have not been weakened in consequence.

Wholesale and Retail.

POTTSVILLE, PA., April 10th, 1899.

MR. HENRY F. MICHELL,

Dear Sir:—I take the pleasure to inform you regarding the Harrisii Lilies. I was never so pleased with anything that I bought from you, as I was with those bulbs. They were really the finest looking lot of lilies I ever saw in my life; they bore from two to nine flowers on a stem, and the loss by disease was no more than two per cent.; the height of them being from three to four feet.

Trusting that you will furnish me with 1000 as good a bulb for next year.

Yours truly,
CARL E. TAUBE.

The following sorts have proven to be the very best for the florist for growing in pots. They produce well shaped, full and compact spikes, and every pot will bring the best price, on account of its fine quality. It pays the florist to plant only the named sorts, as they are far superior to the regular separate color quality.

CINERARIA.

SCHOOL LANE, GERMANTOWN.
 The Cineraria seed I had from you has given excellent results. The colors were all that could be desired, while many of the blooms measured 11 inches in circumference. It is the best strain of Cineraria seed I have handled.
 Yours very truly,
 JOHN McCLEARY,
 Gardener to Wm. Weightman, Esq.

Please accept a testimonial of praise from the undersigned for Michell's Giant Prize Cineraria seed. My plants have over 100 flowers on each and measure the enormous size of 4 inches in diameter, or 12 inches in circumference.
 Respectfully,
 PAUL REINHART,

MAIN BUILDING, NATIONAL EXPORT EXPOSITION

"Expositions of American Industries have always been successful and of incalculable benefit to our manufactures."

—CHAUNCEY M. DEPEW.

NATIONAL EXPORT EXPOSITION

*** For the advancement of
American Manufactures and
the extension of Export Trade.
Philadelphia, September 14 to
November 30, 1899.*

The National Export Exposition is an Exposition of American Manufactures for the Extension of Export Trade, and it will be the first National Exposition of that character ever held in the United States.

It is under the joint auspices of the Philadelphia Commercial Museum and the Franklin Institute, two great public institutions in Philadelphia, whose standing is such as to assure its success. The Franklin Institute, during its career of seventy-five years, has conducted thirty successful exhibitions.

Sanction and financial support have been given to the Exposition by the National Government, the State of Pennsylvania and the City of Philadelphia.

Every line of American manufactured products which is, can or might be exported, from locomotives and the heaviest machinery to the smallest novelties, is to be exhibited.

There is also a department of foreign manufactured goods, consisting of collections of samples made in the commercial countries of Europe and successfully sold in all foreign markets.

Commissioners of the Exposition now abroad, aided by the entire consular service of the United States, are selecting and purchasing these samples. They will show our manufacturers just what competition they must meet, as well as the peculiarities in the demands of every foreign market.

A third department will show how American goods must be packed, labeled and shipped, in order to meet the requirements of foreign trade.

On October Tenth an International Commercial Congress will convene in the Exposition Auditorium, in connection with the meeting of the International Advisory Board of the Philadelphia Commercial Museum.

Delegates from Chambers of Commerce and other commercial organizations all over the world will be present. Every foreign government has been invited, through the State Department at Washington, to send an official representative.

The Philadelphia Commercial Museum has also invited 20,000 foreign business houses with which it is in close correspondence, to send representatives to the Exposition.

An epitome of the manufactured products of this country, of the highest grade and quality which American genius, skill and experience can produce, will be displayed at the Exposition for the inspection and study of these foreign delegates and buyers.

Thousands of articles made in the United States, the result of the genius and ingenuity of its people and considered indispensable by them, have never been heard of in many parts of the world.

In the Main Building, which is 1,000 feet long, there are 12 acres of floor space. A special building for exhibits of Agricultural Implements and Machinery, Vehicles and Furniture, contains 72,000 square feet of space.

Four tracks in the Transportation Building furnish 1,800 lineal feet for exhibits. Fifty acres are available for detached structures, special exhibits and amusement features.

A sample copy of the illustrated weekly *Bulletin* of the Exposition will be sent to your address, upon application to the Department of Publicity and Promotion.

Blank applications for space and special information of every character can be procured from

MASTICA

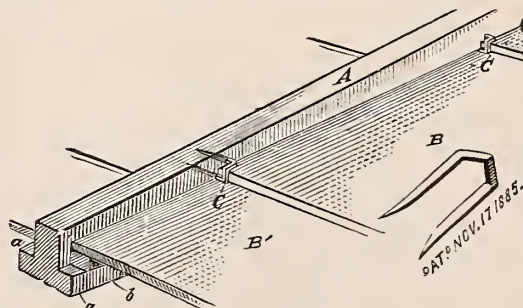

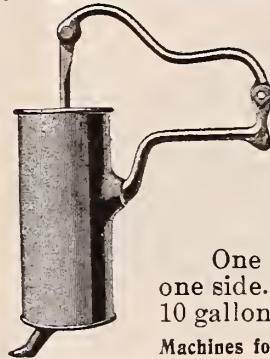

FOR GLAZING GREENHOUSES.

(NEW OR OLD.)

Elastic, adhesive, easy to apply. Used now extensively and highly recommended by all the up-to-date gardeners and florists. Immense quantities were used last season.

One gallon will cover about 300 running feet, one side. Per gal. \$1.25; half gal. 60c.; 5 gals. \$5.75. 10 gallons and over, \$1.10 per gallon.

Machines for applying Mastica \$1.00.

The Van Reyper Perfect Glazing Points.

Made of steel wire and galvanized, having double points and lap over the glass in such a manner as to positively keep it from sliding. They may be used on either side of the sash bar, thus preventing the annoyance of rights and lefts.

Per box of 1000, 60c. 5000 lots at 55c. per 1000. Pincers for driving, 50c.

OILED MUSLIN OR FIBRE CLOTH.

Light grade, 4c. per yd.; piece of about 65 yards, 3 1/2 c. per yd. Medium grade, 8c. per yd.; piece of about 60 yards, 7c. per yd. Heavy grade, 10 1/2 c. per yd.; per piece of about 40 yards, 10c. per yd. These goods are now extensively used by florists for shading the greenhouses in preference to the old style of whitewashing the glass.

MAC MICHAEL'S "PEERLESS" SULPHUR BLOWER.

Price \$4.75 Each.

This Sulphur Blower has no equal for applying sulphur to the foliage in rose houses. It does the work quickly and perfectly, the distribution of the sulphur being so even that every leaf receives its due proportion, and none being wasted, thus making it more economical than the bellows.

The blower will also distribute with equal facility and thoroughness Tobacco Dust, Slug Shot, Lime, or any other powdery substance used in greenhouses. It is a great labor saver, as a 200-foot rose house can be sulphured in less than five minutes.

It is easily handled, is strong and durable, and is *Guaranteed for Ten Years.*

Read the following Letters from Leading Growers who have used the Blower:

PHILADELPHIA, PA., September 13, 1898.

The MacMichael Sulphur Blower purchased of you and which we are now using, is the best apparatus for the purpose we have ever used; does the work very quickly and well.

ROBERT CRAIG & SON,
Forty-ninth and Market Sts.

SOUTHAMPTON, PA., September 1898.

Permit me to say the MacMichael Sulphur Blower is giving me entire satisfaction. It is not only what you claimed for it when I purchased it of you, as a saver of sulphur, but it is a saver of labor as well. I consider it a great improvement on the old-fashioned bellows. The sulphur can be put on much more evenly and with much less trouble.

STEPHEN MORTENSEN.

JENKINTOWN, PA., September 14, 1898.

With MacMichael's Sulphur Blower which we purchased of you, we now only use one-half of the quantity of Sulphur and Grape Dust, and do the work in about half the time; the work is also better done. Thank you for calling my attention to it.

JOSEPH HEACOCK.

DEAR SIR:

We have one of your Sulphur Blowers and consider it the best thing we ever had to apply Sulphur in the greenhouses

CHICAGO, May 18, 1898.

Respectfully,
GEO. WITTBOLD.
