

## What is Creative Commons?

Creative Commons (CC) is a US charitable organisation that develops, supports, and stewards legal and technical infrastructure to maximize digital creativity, sharing, and innovation. CC provides free copyright licences for everyone, from individuals to large companies and governments, to mark their works with copyright permissions allowing others to copy, distribute, and make specified re-uses.

CC licences help the copyright owner to tailor, as they choose, the default "all rights reserved" of copyright to "some rights reserved". By using CC licences the copyright owner may provide non-exclusive permission to copy, remix, and or share their work. These permissions may be restricted or limited, again as the copyright owner chooses; for example by limiting such uses to non-commercial use only.

There are six core CC licences all of which require that the copyright owner receive attribution. For more information on the different types of CC licences see: <http://creativecommons.org/licenses/>

In addition, CC offers two "tools" including the Public Domain Mark and CC Zero, a waiver of all copyrights.

Attribution

Attribution - Share Alike

Attribution - No Derivatives

Attribution - Non-Commercial

Attribution - Non-Commercial - Share Alike

Attribution - Non-Commercial - No Derivatives

Creative Commons was launched in 2002. There are now more than 400 million CC licensed works on the internet from photos, music, to research findings and college courses.

CC's Affiliate Network covers over 70 jurisdictions, including the UK, to ensure that CC licenses conform to local law and to promote CC activities around the world. CC licences are used by Wikipedia, Europeana, JISC, Flickr, MIT OpenCourseWare, Nature Publishing Group, Aljazeera English, The Open University, Global Voices and Whitehouse.gov, among many others.

## *Want to learn more and get involved?*

Contact CCUK at [info@creativecommons.org.uk](mailto:info@creativecommons.org.uk)

**Attribution** - You let others copy, distribute, display and perform your copyrighted work - and derivative works based upon it - but only if they give credit the way you request

**Share Alike** - You allow others to distribute derivative works only under a license identical to the license that governs your work

**No Derivative Works** - You let others copy, distribute, display and perform only verbatim copies of your work, not derivative works based upon it

**Non-Commercial** - You let others copy, distribute, display and perform your copyrighted work - and derivative works based upon it - but for non-commercial purposes

Share, reuse, remix - legally
