1. This report has been prepared from a study of aerial photographs and a consideration of evaluated ground information supplied by the Joint Target Group.

2. FUNCTION:

The TOKYO SHIBAURA ELECTRIC COMPANY, JINSEN PLANT is reported to produce heavy electrical equipment; ground information is lacking and no information is available concerning the type of equipment produced.

Examination of available photographs shows a small plant comprising a possible foundry, machine and assembly shops and a number of small buildings.

The presence of a small ship-building yard in the vicinity suggests that the plant may be producing electrical equipment for ships.

3. LOCATION:

The plant is located in the northern outskirts of the seaport town of JINSEN about 20 miles W. S.W. of KEIJO.

4. SERVICES:

A branch line from the JINSEN/KEIJO Railway line runs along the southern boundary of the plant and a spur probably runs into the plant area.

5. IDENTIFICATION OF FACILITIES:
