MCIAXA - Section File

Olyton, Ohio.

March 7, 1950.

Gentlemen: On Saturday March 4<sup>th</sup>, 1950  
 a few minutes before noon C.S.T. a cluster  
 of objects (4 or 5) were seen to hang in the  
 sky over this small city population 2500.  
 A few minutes after being cited two of these  
 objects moved off slowly in a south-  
 westerly direction from Cross Plains. As  
 they moved slowly thru the air one  
 was seen to do a "bored roll"  
 while the other followed travel in  
 regular fashion. These objects were  
 white to silvery in color and probably  
 were flat and elliptical in shape.  
 No noise or exhaust gas or flame was  
 cited here from the objects.

Any other information that could be  
 given to scientist would be glad to furnish  
 These objects are locally believed to be  
 "flying saucers"

Very truly yours,
