#### NOTICE.

- A SUPPLEMENT, containing the Reports of the Joint Stock Banks of the United Kingdom, similar to that published on the 18th October, 1873, will be published by the ECONOMIST on the 16th May.
- TO ADVERTISERS .- To ensure insertion for this important number, advertisements should be sent not later than mid-day, Friday, the 15th proximo.

This day is Published No. 4, Vol. IV., New Series, Price 8d; by post, 9d,

THE INVESTOR'S MONTHLY MANUAL The INVESTOR'S MONTHLY MANUAL for April gives the Highest, Lowest, and Latest Prices of Stocks, Shares, and other Securities during the Month, the mode in which the Dividend in each case is payable, the last four Dividends, &c.

It also contains A FINANCIAL RECORD OF THE MONTH; New Capital Created and Called; Table of Railway Traffic Receipts; Notices and Reports of Stocks, Failures, Railway, Banking, Finance, Insurance, and Miscellaneous Companie New Companies and New Capital. Prices made up t April 22. Prices made up to

Advertisements for the next Number, to be published on May 30, must be sent, to insure insertion, on or before May 28.

A few copies of the Double Number of the INVESTOR'S MANUAL, containing the prices of Stocks for the Three pre-vious Years, the Financial History of the Year 1873, &c., &c., may still be had of the Publisher. OFFICE-340 Strand.

position. We have remitted all the taxes which cripple industry, and we have long been in the habit of spending as much as we wish. We suffer very little from our fiscal system, and, therefore, our financiers have little suffering which they can relieve. We have not, like other nations, used this large surplus to achieve great things, because in our money matters those great things have already been achieved.

As was to be expected, much of the debate turned on the possible sanguineness of the estimates. Mr Gladstone very truly observed that we may fairly expect the revenue to be more steady than formerly, because the working classes, who so much contribute to the main part of it, earn larger wages and are more steadily prosperous. But then this change is un-deniably very recent. We have yet to see what would be the deniably very recent. We have yet to see what would be the effect upon it of any really considerable series of adverse events, and it is much more easy to begin a period of "sanguine" finance than to close it. Our institutions have of late years become far more democratic than before, and in consequence it is more important than ever to please the multitude. We cannot but regret that the Conservative party, to whom we are indebted for the immense increase of ignorant voters, should have also set an unfortunate precedent by relinquishing the sober maxims of finance which these voters do not appreciate, and adopting those showy maxims which they admire.

Mr Gladstone justly objected to the repeal of the horse duty. The assessed taxes are, as he says, one of the modes-an imperfect one, no doubt, for all taxes are imperfect-of taxing personal property. Just at a moment when the cry is strong that real property is, in comparison, over-taxed-when there is an unsettled account open between the two kinds of property,-it certainly seems unwise to remove a fair item from the side which is generally thought to require new taxes. If any additional burden should be hereafter imposed on personal property, will it on the whole be liable to less valid objection than the burden which is now removed ? Sir Stafford Northcote showed that there were some defects in the THE ECONOMIST.

tax, but a skilled person has no difficulty in showing that about any one.

The repeal of the sugar duties has, as we anticipated last week, been universally approved. Mr Gladstone, with the predilection for general discussion which always makes his speeches on finance so much more instructive and so much more interesting than those of others, observed that the repeal of this duty raised once more the old controversy whether it was better to levy light customs duties upon many articles or heavy duties only upon a few. Many older political economists, as he justly said, were of the former opinion, and thought that it was easiest to the nation, and safest to the revenue, to diffuse the taxation over many articles. But he avowed himself an advocate of the contrary doctrine, in which the practice of this country incontrovertibly confirms him, and in which he is, as far as we can judge, certainly correct. In this case, as in many others, the older economists decided rightly on the hypothetical case before them, but that case only imperfectly coincides with the facts of the real world. If a great number of customs duties could, as they assumed, be collected from many articles used principally for unproductive consumption, and all of simple character, their preference of such duties would be plausible if not correct. But in the real world there is no sufficient stock of such commodities. An immense and rapidly-augmenting number of articles are used as instruments or material of manufacture, and not as objects of mere enjoyment. Modern science is rendering so many articles of so much use in so many ways that you can hardly tell what kind of production a tax upon them may or may not impede. So important is this in practice that the diffused tariff of the United States, though in many parts maintained as a protection to their domestic industry is, according to the best authorities, very injurious to that industry. The tax on the means of production does more harm than the diminution of foreign competition does good. Then, also, articles in real life are not only less simple in their uses than in hypothetical books, but also much less simple in themselves. All miscellaneous manufactures are, by their intrinsic complexity, unfit for customs duties. You cannot easily tell what the comparative duties on them are to be. If you say that you will tax them ad valorem, you have to say what that value is, and about this there will always be much controversy and many opinions. If you say you will tax articles so much, irrespective of value, you will impose on the chief articles used for the poor an almost prohibitory duty, while you but slightly augment the cost of the articles consumed by the rich. And a tariff on such articles raises, like the sugar duty, the question of protection in a singularly subtle form. You must apportion the duty to the degree of the manufacture, for otherwise you are sure to change the locality of the manufacture ; you will be giving a bounty on manufacturing within the country or without. The involved structure of the miscellaneous world forbids the existence of the diffused tariff which our older economists thought of.

The most unpleasant part of the Budget debate was the evident difference in tone between the First Lord of the Admiralty and the Chancellor of the Exchequer. Of the subject on which they differ we have elsewhere spoken, but the existence of the difference is more important than its nature. It seems to prove that what good observers pre-dicted would be the characteristic weakness of this Government is already beginning to betray itself. It tends to become a departmental Government. For many purposes, a Government is what its Premier makes it; and Mr Disraeli, though he has many rare gifts, and several of those most suitable in his present high place, is not a man of business in detail. By nature he is not inclined to it, and by fixed habit he refuses to engage in it. Of set purpose he keeps his mind pure from minor matters and free to judge of general policy. But such a Minister cannot overlook subordinate Ministers effectually ; any such control is at present a hard task for the best trained and most laborious administrators. All such a Minister as Mr Disraeli can do is to choose-as, being an accomplished judge of men, he is well able to choose-good sub-ordinates, and then let them go their own way. But then comes the difficulty that they will go different ways. The policy of the Government is one thing in one department and the opposite in another department. Even already one great contrast has been seen, and the inherent nature of the Government makes us fear there will be many more.

THE DEBATE ON THE STATE OF THE NAVY. MR WARD HUNT, in introducing this year's Navy Estimates, made the most faulty speech which as yet has fallen from the present Government. He should either have said more or less. If he thought that the Navy was in an unsatisfactory state, he ought to have said so, and to have asked for larger estimates to improve it; if he thought its state satisfactory, he ought to have said so, and to have moved, as he did, the estimates of his predecessor; if he was not sure whether its state was satisfactory or not, he ought to have said so, and to have asked that more money should be kept in hand to meet possible supplementary estimates. But in no case ought he to have moved the estimates of his predecessor and to have hinted at their insufficiency; in no case ought he to have asked for so much money, and yet not asked for enough; in no case ought he to have implied that the state of the Navy was unsatisfactory, and yet taken no steps to make it satisfactory. Nothing is so perilous to the country as uncertainty in so important a matter; nothing is so unsuitable from a responsible Minister as a series of hinted doubts and halfexpressed objections.

Another most obvious criticism on Mr Ward Hunt's statement is that there was far too much in it about the last Conservative Government and the "late Mr Corry." One great danger of party Government is that the vital administration of the country should be postponed to petty controversies between parties and persons. Every Minister ought to be careful not only to consider these questions as impartially as possible, but to discuss them as impartially. But Mr Ward Hunt seemed to care almost as much whether "the "late Mr Corry" did right in 1867 as whether the country has a good navy now. In consequence he has raised an unusual crop of irritating questions on a soil always prone to them.

There is no question more difficult to discuss than the question whether the Navy Estimates are sufficient to keep the Navy in a proper state, because there is no fixed standard of what is a proper state. That we want a sufficient number of ships to protect the country every one admits, but then what is that "sufficient number"? This can only be settled by some reference to the probable attacking force—the navies of other nations. But there is inevitably great difficulty in obtaining accurate information about those navies, and still greater difficulty-especially for a responsible Minister-in liscussing that information publicly in the House of Commons. If an English Minister were to say all he hears or all he thinks about the French Navy or the German Navy, all Europe might be in commotion. In unsettled times such a discussion might easily excite the attack which the Navy is intended to prevent. The very precautions we take against the evil might be the means of exposing us to it. But, nevertheless, so long as the first term in the comparison is wanting-so long as we are discussing whether the Navy is or is not sufficient, without a standard of what sufficiency is-we cannot be said to be proving anything or disproving it. The most laborious accumulation of details proves nothing. It is of no use alleging that we have not certain things unless we are agreed that they are the right things for us to have; it is of no use to say that we have certain other things unless somehow we are sure that we ought to have them. The whole discussion is like an argument whether a known dinner is or is not sufficient for an unknown number of persons.

On a subject so peculiar unusual responsibility falls on the Government. If the head of the Admiralty comes to Parliament and says, more or less plainly :- " My colleagues and "myself have examined the matter, and have collected all " that we could as to the force which can be brought against The " this country, and as to the risk which it is ranning. " result of our consideration is that such defences are neces-"sary ;"-the good sense of the country and of Parliament almost always follows his advice. A Minister who so advises the country ought either to be dismissed or to be followed. But no Minister can expect such confidence unless he has made the requisite investigations and applied the necessary thought. On this occasion Mr Ward Hunt has not had time to do so. No one would have blamed him if he had said that he had not had time to satisfy himself as to the sufficiency of Mr Goschen's estimates, and if he had required provision to be made for reasonable Supplementary Estimates if required. The grave disappointment which we have felt on reading Mr Ward Hunt's speech is that he does not seem either to know

what investigations are necessary or what responsibility belongs to him. He did not say that he had made the necessary inquiries, or was going to make them; he did not say that on a future occasion he would state to the House the amount which he and his colleagues thought sufficient for the defence of the country. He only carped at details, and hinted a vague dissatisfaction without justifying it. Such language from a Minister in such circumstances cannot command any authority, and must excite much mistrust.

A little matter serves to illustrate this better than a great one. Mr Ward Hunt complained that the boilers of a certain number of ironclads were not in first-rate condition, to which Mr Goschen, in substance, replied by asking whether Mr Ward Hunt thought that the boilers of all such ships ought always to be in first-rate condition. As Mr Ward Hunt had not given, and, indeed, had not had time to form a good opinion on the necessary standard in such matters, his criticism could not be defended.

He said, too, that he felt bound to say that urgent appeals for further expenditure were being made to him, and that demands which he did not see his way to resisting were daily pressed upon him. But probably every new head of a great spending department has had innumerable such applications on entering office; he is the natural person to whom every one goes who does not think that enough money is being spent in his favourite way; such persons are very ingenious and very numerous, and a new head of the Admiralty must be very clever indeed if he can at once expose all the unfounded suggestions which are made to him.

Whether the estimates of the late Government were adequate ought certainly to be most scrupulously examined by their successors, and it is precisely on this account that we regret that Mr Ward Hunt should have made a series of remarks which should not have been made if they meant nothing, which ought to have been followed by a demand for more money, and which should have altered the Budget of his colleague if they meant anything,

Since this article was written, Sir Stafford Northcote has explained that the remarks of Mr Ward Hunt do *not* effect his Budget, and this seems as much as to say that Mr Ward Hunt must be taken not to have meant anything.

#### THE SEPTENNAT CONTROVERSY IN FRANCE.

A GREAT political thinker of the last generation used to call attention to the tendency of revolutionary epochs to deal largely in very subtle abstract ideas. Nothing would at first sight have illustrated his view more curiously than the present extraordinary state of things in France. The great question which agitates France at this moment is finer and more abstract, in appearance at least, than most of the discussions of the Schoolmen about quiddities and qualities. It is whether the seven years' power conferred on Marshal MacMahon is a Septennat, or only a postponement-for any period not exceeding seven years-of a Constitutional decision. M. Lucien Brun and the Legitimists are contending that Marshal MacMahon, though he is to be termed, by the law which established the Septennat, President of the Republic during the period for which he is to reign, is not really President of any Republic at all, but a nondescript officer, invented to prevent a real Republic from being proclaimed and a real President of the Republic from being elected. This is the provisional régime which M. Lucien Brun and his friends call by the difficult name of the "Prorogation of powers." They maintain, indeed, that the Septennat does not even imply so much as a postponement of the proclamation of the Monarchy for seven years. On the contrary, if at any time during that period the Monarchy should be proclaimed, they would think it perfectly legitimate,-only Marshal Mac-Mahon need not give up his place to the monarch decided on till the seven years were out, unless he liked. He might, in the meantime, remain in a sort of Lieutenant-Governorship till the period of delay was out. But according to the Right, there is absolutely no need for delay in settling the constitutional question for a day after they can agree amongst them-selves how to settle it. Marshal MacMahon, though by the law of the 20th November he is to be "Chief of the Executive," and is to exercise his power "under the title of President of the Republic," is only a stop-gap, and may, at any moment, be told that he is the Minister of a King who will relieve him of his duties at latest on the 20th November, 1880. Of course the Left Centre and the Left do not

Ta

in the least admit these very curious positions. They maintain that a "Chief of the Executive" appointed for seven years, who is to exercise his power "under the title of Pre-"sident of the Republic," cannot during that period consti-tutionally declare himself, or be declared, the lieutenant of another chief who is also a king; and that he could not, without impropriety and absurdity, exercise a power under the title of "the President of the Republic "which he proposed to hold subject to the authority of a king. Of course the Left Centre and Left have much the best of such a controversy as this. What they maintain is simply that words must mean what they say, while the Right maintain that words can only say what they ought to have meant; and that of that meaning, they, whose votes give the words their legal force, can be the only proper judges. But it is a very significant fact that such a controversy should arise on such a point,-that the majority in a supreme national Assembly like that of France should be reduced to arguing that the power of Chief of the Executive, conferred for seven years, and to be exercised under the title of "President of the Republic," does not make him who holds it the true Chief of the Executive for that period ; that it need not necessarily be interpreted as giving him power for any definite period at all; and that so far from having made him really the President of a Republic, it prevented both the establishment of a Republic and the election of a real President. You can hardly go further than that in the direction of intellectual finesse. And when we consider that the party which uses this language is the party in the possession of power, not the party trying to force its way into power, the phenomenon is still more remarkable. One can appreciate the value of abstract ideas to a people who do not control the Executive, and who can only act in a large way on men's hopes and fears by a reiterated appeal to active feelings and vivid impressions. But when those who have really put the Government in its place try to insert these fine intellectual weapons between the commonsense of a transaction, and the meaning they wish it to bear, one does begin to wonder at the character of a situation which reduces an apparently victorious party to such remarkable straits. Usually the party in power do not care to resort to finesse. They have the game in their own hands, and it is only weakness which tries to refine away the obvious meaning of restrictive laws. However, it is precisely because the party in power in France is really so weak, though it has at present a majority in the National Assembly, that it takes refuge not in the class of abstractions which Revolution puts into the mouths of the people, but in those with which people who have to steer between a moral Scylla and Charybdis are compelled to take up. And even these are rapidly failing the present French Government. No one who watches carefully the present situation can doubt that the seven-years' President is undergoing a kind of conversion from the views of the Right Centre to those of the Left Centre, or that unless the friends of Monarchy in France are much more cautious than they have been, the result of the seven-years' interregnum will be to leave the Monarchical party without any ally in the Executive Government of France.

The last result of the refinements by which the Right have striven to prove that they may still restore the Monarchy at any moment, has been, as our readers are probably aware, a Circular from the Minister of Justice, M. Depeyre, warning the Legitimist and Imperialist Press that it is no more open to them than to the Republican Press to question the validity of the Septennial power, freely and unconditionally accorded by the National Assembly to Marshal MacMahon, - in other words, that they shall not be allowed with impunity to argue that the Marshal is a mere stop-gap, whose position might at any time be wholly changed by a resolution of the Assembly restoring the Monarchy even within the term of his government. It is said on all hands, and we suppose, truly, that this circular was not issued without a very critical debate in the Cabinet,-a debate during which the President showed himself unexpectedly firm, and intimated to his Ministers that while he regarded himself as the legal Chief of the Executive for the whole of his term of seven years, he could and would do without them, if they did not support him with the firmness he had a right to expect. Such a situation implies a very considerable change of front on the part of Marshal MacMahon, and one which must have great results in favouring the permanence of the Republic. It is not so long since he told the Assembly that he would not separate himself from the Right, who had raised him to power,

#### THE ECONOMIST.

#### [April 25, 1874.

and that though he regarded it as his duty to do justice between all parties, he considered himself committed to a Conservative policy, and the organ of the Conservative party. No doubt he may still in some sense hold the latter language, but it is clear, at all events, that he has made up his mind to serve the Right Centre only on condition that he can control its policy, and secure France against any further monarchical conspiracies, during the tenure of his office. Of course the Republicans see the immense advantages which this resolve of the President's gives to them. M. Laboulaye, one of the ablest of the Republican leaders, has written, this week, a letter in the Débats, assuring the Marshal of the complete confidence which the Republicans feel in his present rule, and of their complete readiness to support him, on condition he secures France against the repetition of these disquieting plots to bring back the Throne under cover of a Republican Septennat. It is true, he adds, that the Republicans feel sure that seven years of Republican rule under Marshal MacMahon will be equivalent to a guarantee of a Republic after the seven years have expired, and that they wish to see the proper constitutional laws for the organisation of the provisional Republic enacted at once, which would practically ensure a quiet transition from the provisional regime of the seven years, to the permanent Republic which must follow the seven years. In other words, they would like to have a Vice-President of the Republic elected, and some principles laid down defining the President's powers in relation to the dissolution of the Assembly, and so forth. This bid of the Republicans for Marshal MacMahon has again alarmed the Legitimists and Imperialists, and it is probable that they will say less for the present about their right to proclaim a Monarchy, being, of course, very unwilling to precipitate the President into the arms of the Left Centre. But what has happened must happen again, and we suspect must end in the complete defeat of the Right, so long as the Left Centre play their game carefully, and allow themselves to be guided by men as keen and sober as M. Laboulaye. It is impossible that the Legitimists can allow a dissolution of the Assembly to take place without another serious effort to get the Monarchy proclaimed. All the signs appear to show too clearly that France is utterly opposed to their wishes, and that a dissolution of the present Assembly would be a termination to their hopes. Now, they cannot return to their Monarchical plans without offending the Marshal; and they cannot give them up without giving up their dream. Which-ever they do, their cause is lost. But being what they are, it is pretty certain that they will lose it in the worst manner, by driving Marshal MacMahon to rely more and more on the Conservative Left for his strength in the Assembly. No result could be, on the whole, better for France. If the various dreams of reaction could be crushed, and crushed by a leader who has such a reputation for Conservatism as Marshal MacMahon, that fatal association of ideas which connects in France the name of a Republic with a violent Radical propaganda, would probably be at last dissolved. And Republicanism can hope nothing better than to be adopted by the French people as a shelter and refuge against the rash conspiracies of Monarchical revolutionists.

#### THE NEW TURKISH BUDGET.

THE Budget which the Turkish Government has just published for the present year is put forward with unusual pretensions to authority as a complete exposition of the actual state of Turkish finance. It has been submitted to a financial commission composed of the principal functionaries of the State, and the bankers and directors of the leading financial establishments of Constantinople, whose imprimatur, in the shape of a long report, accompanies it, and who are of opinion that "a complete and true exposition of the "financial situation, even in its most unfavourable details, "can alone inspire legitimate confidence." Let us see what Let us see what the situation is as thus expounded, and how far the account may be relied on as complete.

At the outset we must renew our protest against the con stant attempt of Turkey and other semi-barbarous Governments to make budgets stand in place of yearly financial accounts. A budget is practically of very little use without the past accounts to interpret it. What the actual revenue has been from specified sources, and what has been the actual expenditure, and on what objects, are essential to the formation of an opinion regarding the estimate of the future. It is only in this way we can perceive whether that estimate

is a random one or the reverse. Indeed, it would be requisite for full assurance on the latter point to have a series of past budgets, and of the final accounts for the years referred to, before us. By this means we should get to a knowledge of the habit of a Government in making its estimates, whether of revenue or expenditure, and this would be an additional help in assigning a value to the new estimate. No such accounts have yet been issued by the Turkish Government. We are informed by the Commission in their report that for the old taxes they have compared the actual receipts in preceding years with the budget estimates, and they have also had before them a comparative table of the actual receipts for each year from 1862-3 to 1871-2. But this is not enough. In such matters the public ought not to be asked to take anything at second hand, no matter what the authority is. If the information could be supplied to the commission, it might as well be published. As it is, no independent critic has the opportunity of considering whether the data supplied to the Commission were at all complete, or justified them in giving their approval to the new estimates.

We must also demur to the authority of the Commission itself. The report is signed as follows :-

oussouf (Director-General of the Administration of Forests and Mines). Edib (President of the Court of Accounts). Ohannès Tchamitch (Governor of the General Debt).

Bedros Couyoumjian (Ancient Director-General of the Administration of the Forests)

Christaki Zographos (Banker).

Agop Keutchoglou (Banker).

Georges Zarifi (Banker).

Thomas C. Bruce (Administrator of the Imperial Ottoman Bank), for himself and for H. Foster (Director-General of the Imperial Ottoman Bank).

Em. Deveaux (Director of the Imperial Ottoman Bank). S. Fernandez (Director-General of the Société Générale de l'Empire Ottoman). B. Tubini (Director-General of the Credit General Ottoman)

Georges Coriono (Administrator of the Bank of Constantinople)

We confess we are not overwhelmed by the weight of this authority. With all respect for the English members of the Commission individually, we do not think the composition of it is in any respect satisfactory. The object being to inform English creditors of the true condition of Turkish finance, it must surely be evident that certificates of soundness from a commission composed of Turkish officials, Constantinople bankers, and the directors of establishments identified, justly or unjustly, in the public mind with the interests of the Turkish Government, cannot be worth the paper they are written upon. If the Turkish Government is to gain authority for its budgets at all, the commission appointed to report should consist of English financiers of repute, if possible with a Parliamentary reputation, and above all known to be independent by the mass of English creditors of Turkey. Even with such a commission, it would be injudicious not to publish all the data as to past receipts which the present commission has had before it.

These remarks are the more necessary, because the new Budget, while exhibiting many improvements upon its predecessors, and justifying completely the inferences formerly drawn by us from the past imperfect budgets as to the magnitude of former deficits, is also vitiated by some of the old errors. There is, for instance, as we shall see, a serious omission in the estimate of the debt interest. The omission is so far rectified in the report, but as the Budget must often be referred to apart from the report, the misleading effect of the omission is most serious.

The *first* point which we think deserves attention is the great increase of the total on both sides of the account compared with former years. The totals for the last four years are as follows :--

		Revenue.		Expenditure.
		£		£
1874-5	**********	22,552,000		22,850,000
1873-4	******	19,181,000	***********	23,806,000
1872-3	********	18,761,000		19,459,000
1871-2		17,455,000		20,696,000

During the last two years an expenditure of about four millions a year greater than before is admitted, and the result being a deficit of that amount in 1873-4, new sources of revenue are alleged to have been found for 1874-5 to make it good. This increase of the items must be recognised as one of the merits of the present estimate, which is so far not vitiated by defects which were only too glaring before. It shows, however, that our calcu-lation last year, when the Turkish loan was brought

#### THE ECONOMIST.

out, that the deficit was at least  $4\frac{1}{4}$  millions annually, was not an over-estimate. In point of fact the deficit for the year 1873-4 is now put at 4,625,000*l*, which is more than we said, while we have no data for judging how far the revenue was over estimated, and the expenditure under estimated, so that the actual deficit may have been worse.

Second,-it is also noticeable with regard to this increase of expenditure that our suspicion of the impossibility of economising in the items for administration, which were so much talked of at one time, was well founded. The amount set aside in successive Budgets for administration was, in our opinion, so small as to deprive the estimates of all title to confidence on that head. The increase of expenditure now shown is largely owing, it appears, to the discovery that the general expenditure was under estimated. In 1872-3, the estimate of expenditure, apart from the debt and the Sovereign's Civil List, was 9,123,0001; for the current year it is 12,461,000l-an increase of 3,338,000l and about 37 per cent. No more damaging criticism could be passed on the estimates of former Budgets, or on the incurable difficulties of Turkish administration. Except for an increase of 800,000*l* in the annual amount payable under the railway guarantee, the additions made are in the items of expenditure of the various ministries-in other words, in the expenditure for the general government of the country. We are bound to suppose, therefore, either that the estimate for 1872-3 and former years was grossly deceptive, or that, in the face of accumulating financial difficulties, the Turkish Government has chosen to increase its ordinary expenditure, apart from the debt interest, by nearly forty per cent.

The worst of the matter is that even so far as the present estimates are concerned, the Financial Commission vouches for nothing. They say that having no function to discuss the wants of the services, they accept the credits given in block for each chapter, leaving to the Ministry and the Council the responsibility of the sums which appear to them necessary. In the absence of all accounts of what the Turkish Government has spent in former years, how can we know that it is possible to govern the Empire for even twelve millions ? This is, perhaps, the very crux of the Turkish financial difficulty, and while our suspicion that the former sum of about nine millions was entirely misleading is confirmed, it is difficult to feel altogether sure that the Turkish Ministers have not even now kept back something from a too complacent Commission.

Third,—the financial position of Turkey, admitting the correctness of the single items of the present estimates, must still be very difficult. This does not appear on the surface :—

	is estimated at	22,850,000 22,552,000	
T. C. 11		202.000	

#### 

-which is far from an unmanageable sum. But the estimate, we think, ought to be corrected in at least two ways, apart from any corrections which might be suggested if we had all the data before us. There is (1) an obvious and grave omission in the estimate of the annual interest on the debt. It certainly struck us as very singular that the charge for the debt is no greater now than it was for 1872-3:--

In 1872-3 it was estimated at And it is now estimated at	£ 8,593,000 8,580,00 <b>0</b>
Increase	13,000

To say the least, this is a singularly small increase in two years for a country with an average annual deficit of four to eight millions, and which has to borrow at 20 per cent. interest and upwards. It appears that a loan of 5,000,000l has been paid off, which reduces the charge for the permanent debt, but other debt has increased, while the amount allowed in 1872-3 was itself insufficient, as we have more than once shown in our comments on that budget. On investigation we find that the reason of the debt charge being stationary is the omission to include any estimate for the current year on account of the interest on the 1873 loan, or on the floating debt which it was intended to extinguish. The matter is referred to in the report of the Commission, who foresee that the interest on the 1873 loan, as well as of other "titles" which may be created to extinguish the floating debt, must enter into the budget of expenditure for 1875-6, and add about 21 millions to it. But why should

these items be left out now? Apparently there is some notion that the floating debt is a thing utterly apart, that a budget has only to do with permanent debt ; the Commission complain "that the loans of the floating debt are often guaranteed by special assignments of revenues which ought " to meet the regular expenditure, and the receipt of these "revenues to the profit of the floating debt, deranges "the normal services, and falsifies the estimates of the "Budget." But the amateur financiers who penned this sentence must know very little how a budget ought to be drawn up. To be worth anything such a budget should plainly include everything-the interest on the debt, whether floating or permanent, being a charge for the year; and the omission of such interest is a serious mistake. The charge for the debt, and the total expenditure in the present budget, ought therefore to be increased by 21 millions each if the estimates are to be approximately correct. This would raise the debt charge to nearly eleven millions, and the total expenditure to 25,090,000*l*. This last sum is the annual expenditure of Turkey by the admission of the Turkish Government itself and its financial commission. No doubt a large sum in this expenditure, viz., 1,530,000/, is a repayment of debt, and might be struck off in a fair balance of revenue and ex-penditure; but to make an explanation of this kind is a very different thing from leaving out altogether items to which this explanation does not apply.

(2.) The present estimates of revenue appear unreliable, on account of the large amount of new matter they contain. There is an increase of five millions as compared with 1871-2, of 3,800,000l as compared with 1872-3, and of 3,400,000l as compared with 1873-4. There is thus a sudden increase of  $3\frac{1}{2}$  millions in a year, after a more moderate augmentation in the previous two years. The augmentations as compared with last year, are mainly a wholly new item, called "Impôt "foncier. Patentes et autres revenus de Constantinople," estimated to yield 681,000*l*; an increase of the tithes from 6,364,000*l* to 7,954,000*l*, or an increase of 1,590,000*l*; and an increase of the tobacco duty from 977,000l to 1,363,000l, or 386,000l. How can it be known for certain that these large new taxes and additions to previous taxes will yield what is expected ? We confess we should have liked very much to see the data upon which the Commission base their judgment; but the presumption, even in the best administered country, would be against such estimates coming up to expectation, and we think that in a case like the present the public are bound to consider the temptation under which all concerned with sanctioning the present estimates have been to make the best of the matter. Suppose the new taxes should only yield a portion of what is expected, how can Turkey possibly carry on with an expenditure of twenty-five millions

Altogether the prospect of Turkish finance seems rather dismal.

#### Making a total deficit of..... 5,938,000

-which will only be reducible one-half if the new taxes come in as expected. It is possible, however, that it may be increased, for the estimated expenditure, apart from the debt, of which even the Commission had no information, may be exceeded, and the old revenue may also prove to be over estimated, against which occurrence we have no more than the simple assurance of the Commission without the data they possessed. The cost of the floating debt is besides a most difficult matter, and may be such as to make the omission of part of the debt charge more serious than it is. The probabilities of a serious deficit for the present year are thus very great, though it is impossible to say what the exact amount will be. As the Turkish Government by its own misconduct has deprived itself of the necessary credit for covering its deficits easily, the "hitches" which have lately frightened the foreign creditor on the eve of each great coupon payment are easily accounted for. There is yet no visible end to the trouble.

The following are the Turkish Budgets for the last four years. The last two, for 1873-4 and 1874-5, are taken from the Budget and report which have just been published, and the first two-1871-2 and 1872-3-from the report

#### BUSINESS NOTES.

THE INTEREST ON EXCHEQUER ADVANCES .- We have already expressed our opinion in favour of treating as income of the year the item of "interest on advances," now amounting to 450,000l per annum, which has been so treated for the first time in the new Budget. There can be no question that the sum is as much a part of the national income as the receipt from the Crown Lands or the Telegraphs. It is the income of a part of the national property, and should always be treated as such. The application of the sum towards the extinction of the debt is also a very proper one, but the explanation appears to be required that this application is not strictly an entirely new application in the sense that a new vote of 450,000l out of old revenue would have been. The money when it was received before would not be locked away in a chest out of sight, for if it had an accumulated sum would now exist applicable to the debt as well as the sum expected in the current year. The country, in fact, must have had the benefit of the receipt of the money in some way. This was pointed out by Mr Gladstone on Thursday night and admitted, in substance, by Sir Stafford Northcote ; and the weekly account of the receipts and expenditure for the last five years may be referred to for a full account of the matter. In that period the annual receipts under the head of "advances repaid," which we are now told has included interest as

Year En	ding-	Advances Repaid. £		Advances Issued. £		Excess of Advances Repaid. £		Excess of Advances Issued. £
Iar. 31,	1870	2,083,000	***	1,619,000		464,000	***	***
	1871	1,988,000	***	1,413,000		575,000		***
	1872	2,526,000		1,743,000		783,000	***	
	1873	2,941,000		2,654,000	***	287,000		***
-	1874	2,275,000		3,448,000	***	***	***	1,173,000
Dedi	tet			10,877,000				1,173,000

Net excess of payments ..... 936,000

Thus, on the whole, the net sum received in the five years, viz., 936,000l, has been much less than the annual interest would have come to, as that interest at 450,000l a year would in five years have amounted to upwards of 2,000,000l. The difference, therefore, has been re-advanced, that is, has been invested reproductively by the Government, which is un-doubtedly as beneficial an operation as the direct repayment of the debt. If the advances could always be increasing, and the Exchequer, as it has done of late, could find the money without new borrowing, those who wish to see the debt reduced might be very well content with the operation. As regards the net sum of 936,000/ received, moreover, it is clear that the Exchequer must be so much richer than it was five years ago, and it must have been able to reduce its floating debt proportionately, or increase its cash balances. In point of fact, it will be observed that until last year the advances repaid were always in excess of the advances issued, that it is only last year the issues have exceeded the repayments; and this constant addition to the balances of the Exchequer must have helped it to effect the large reduction of the floating debt which has, in fact, occurred during the five years, but principally in 1869-70 and 1871-72. The following is a statement of the reduction of this debt year by year, exclusive of an additional reduction effected out of surpluses :-

NET AMOUNT OF EXCHEQUER BILLS and BONDS PAID OFF in EACH YEAR, after Deducting New Issues, and Exclusive of Sums Applied out of Surplus Income towards Repayment.

4.4.	* * * * * * *	
		Amount.
Year En		£
March 31,	1870	3,134,600
	1871	70,500
	1872	936,000
	1873	326,000
	1874	350,000
Tot	al	4,817,100

Total ..... What has become of the interest on advances hitherto received is therefore no mystery. It has until last year been au unnoticed cause of improvement in the position of the Exchequer as regards its cash and floating debt, and to a certain extent it has been reinvested in new advances, the whole amount received last year having in fact been so applied, and the Exchequer having advanced out of its accumulated cash 1,173,000l more. The application of 450,000l therefore to buy annuities is only the diversion of money which was applied in an equivalent manner before, and though the effect of the purchase of annuities will be to reduce the debt more in future years, the country cannot take credit to itself for doing anything more this year than has lately been done. It is quite clear too that if this interest is in future to be annually treated as income, the tendency will be to alter the position of the Exchequer as regards its cash balance and floating debt for the worse. If the advances issued should for a series of years exceed the advances repaid, including interest, as much as they did last year, the tendency will be to compel the Exchequer to increase its floating debt, and if we should not have large surpluses on the scale of recent years the contingency must be provided for. All this, it should be understood, is no argument against treating the item of interest in the way now proposed, but it shows clearly that the change is mainly one of account, that it must not be supposed a new annual income of half a million has been found, and that the application of the money directly to extinguish debt will affect the Exchequer adversely as compared with the former mode of employing it.

THE VETO OF THE AMERICAN CURRENCY BILL.—President Grant's veto of the Currency Bill of the inflationists has illustrated the accidentally fortunate influence in a question

#### THE ECONOMIST.

like the present of what is really a defect in the American constitution. This is the separation between the Executive and Legislative Departments of the Government. The Executive Government in the United States cannot be changed by a vote of either House of the Logislature, or by the votes of the two combined; nor has the Executive any power to bring the Legislature into harmony with itself by means of a dissolution. The result is that a conflict of opinion may readily arise, in which, as the President has the power of veto, the Legislature may want one thing and be unable to pass the necessary legislation to effect it, while the Executive may want another, which the Legislature absolutely opposes-the consequence being a complete dead-lock. Such an arrangement is usually most mischievous, the essence of a strong and efficient Parliamentary Government being the existence of a final authority from which there is no appeal; but in the present instance the United States is undoubtedly saved from very great dangers, at any rate for a time, by means of it. In the present temper of the two Houses of Congress, there can be little doubt that the measure of inflation, which we described a fortnight ago, would have been passed by an efficient Parliament. An Executive would have been formed in accordance with the wishes of the majority, and if necessary there would have been a dissolution, in which we fear the vote of the people for inflation would have been secure. But with a President elected for four years, who happens to have a common-sense prejudice in favour of specie payments, the inflationists are checked for a time, and the country is committed to what is perhaps the easiest mode at present of preparing for the convertibility of the greenbacks, viz., letting things alone, trusting to the rapid increase of population to have all the effect of a gradual contraction on a currency which cannot be enlarged. Anything but the most gradual contraction would probably be most costly. and though a quick contraction might be worth the cost, it would perhaps be hopeless to expect any country to bear it. The result of President Grant's veto, therefore, is the adoption for a time of the most practicable means towards the restoration of a proper currency in America. If the conflict between the Executive and the Legislature can only be maintained long enough to prevent anything being done for some years, the Americans will probably wake up some day to find that the greenback is at par with gold, and that the Treasury is able to maintain its convertibility. Politically the mode of obtaining this result will be as bad as it can be, and it is possible that in the long run the Americans would gain as a people by the sharp teaching of experience which the power of committing mistakes by means of an efficient Parliamentary mechanism would give ; but for the present the economic gain is considerable, and the Americans may so far be congratulated on the fortunate accident which gives them it.

THE IRON TRADE FAILURES IN GLASGOW .- With reference to our remarks on this subject last week, and particularly on the fact of bills having been discounted which had been drawn for Stock Exchange differences, we receive the following communication :-

#### TO THE EDITOR OF THE ECONOMIST.

April 26, 1874. April 26, 1874. SIR,—In your remarks on Saturday last on the disclosures made under the bankruptcy of Watson and Campbell at Giasgow, while rightly denouncing the reckless speculations of the bankrupts, you add—" What we are most surprised to find is the facility apparently given to these hazardous speculations by some of the Glasgow banks." This is a misapprehension, the banks having been in no way engaged in facilitating the operations; and as the importance of the disclosures chiefly rests in the fact that such enormous speculations were secretly carried on, you will, perhaps, allow me to explain the matter more fully. The bankrupts employed six or eight brokers on the Stock Exchange, and, through their instrumentality, were "Bulls" of half-a-million of stock of the most speculative kinds. They never took delivery of any stock they had bought, nor had a loan from any bank in connection with the purchases. The whole affair was conducted within the Stock Exchange, and was a matter of "Bulling and Bearing," or, in more in-telligible English, of gambling. April 26, 1874.

Exchange, and was a matter of "Bulling and Bearing," or, in more in-telligible English, of gambling. . When the bankrupts could no longer pay their "differences," they had recourse to discounting bills; and this was done not by the stock brokers drawing upon them, as you naturally suppose, but by procuring other parties in the iron trade with whom legitimate transactions were in dependence, but who were also deeply involved in share speculations, to join with them in the manufacture of bills, whereby the banker was

The really important question suggested by the disclosures appears to be, Is it right or safe that there should be tolerated in a mercantile community an institution in which gambling on such a scale can be secretly conducted? In the case in question the bankrupts succeeded, within two years, in losing 200,000/, without the slightest knowledge

on the part of their bankers or trade creditors that they were engaged in Stock Exchange transactions to any extent whatever.—I am, Sir, your very obedient servant, A VICTIM,

THE EASTER PASSENGER TRAFFIC. - A comparison of the traffic returns of the principal railways for the fortnight including Good Friday and Easter Monday, with the returns for the corresponding period of last year, shows that this year there has been a very fair increase of passenger business. The passenger traffic of the fortnight in 1873 of the undermentioned railways amounted to 764,000l, but in the fortnight of 1874 it has been 802,000l, showing a net increase of 38,000l, or about 5 per cent. As the holidays have occurred in nearly the same weeks of the two years the comparison is a fair one, and allowing for differences of weatheralthough this allowance as regards the metropolis and southern lines in Good Friday week would be in favour of and not against this year-the result is indicative of a steady growth of passenger business, which has not yet been checked by the decline in trade we hear so much of. Even if the increase should be largely accidental, the result is beneficial to the railways for the current half-year, and is all the more satisfactory on account of the apprehensions which remain as to the increase of working expenses. The following is a comparison in detail of the principal lines, the variations from the average in individual instances being very great :--

The above return, compared with that of the preceding week, exhibit

T s	ona the tonowing changes.	
	INCREASE	francs.
	Circulation	6,086,970
	Private deposits	4,284,606
	Cash	6.678,680
	Decrease.	francs.
	Treasury account	1,449,866
	Discounts	8.329,483

A feature in this return is the addition of a new entry on the creditor side, the "employ of the special reserve." It had been known for some time past that the Bank was buying Rente with the 24 millions forming that reserve, but no entry had before appeared in the balance sheet. The Treasury has reimbursed a further sum of 10 millions, and the discounts have again decreased by 8 millions, but in consequence of the above-mentioned operation the circulation has increased by above-mentioned operation the circulation has increased by 6 millions.

The dulness of trade in Paris is reflected by the falling off in the receipts on all the lines of railways, by the scarcity of trade bills, and the abundance of money seeking temporary investment. The balance sheets for the end of March issued by the great banking companies also show, with few exceptions, a diminution in the portfolio and an augmentation in their a diminution in the portfolio and an augmentation in their deposits. The foreign exchanges are generally heavy. London, short, is lower, at  $25f 17\frac{1}{2}c$  to 25f 20c, but the long has become firmer, as the probability of a rise in the Bank rate grows more remote; the price yesterday was  $25f 28\frac{1}{2}c$  to 25f 24c. Little paper on Berlin is offered, and  $367\frac{1}{2}$  to 368 is obtained; the long is  $\frac{1}{2}$  higher. St Petersburg continues to advance, gaining 2 in the week; the rates are now from 342 to 345 the 100 works. 100 roubles. Spanish, on the other hand, is offered, and

buyers are rare: long Madrid is quoted 502½ to 505 the 100 dollars; the short, 1 to 2 higher. Italy has again im-proved ½, and bills lose only 12 to 12½. The market for Rente was heavy at the commencement of

the market for hence was heavy at the commencement of the week, but has been firmer the last two days, and last week's rates have been maintained. The variations have, however, been small, the Fives not falling below 95f 15c, or rising above 95f 30c. It is remarked that the bankers are generally sellers in order to diminish their holdings of Rente in the constructive of relitical differentiate on the measurement. in the eventuality of political difficulties on the re-assembling of the Chamber next month. The sales are made, however, with great precaution, the offers ceasing as the prices recede towards 95f, and the realisations commencing as they recover towards 95½f. Those appear to be the limits within which prices will oscillate to the end of the month, when the coupon will be detached, should no unforeseen incidents occur. Italian has gained another 1, and is buoyed up by the improvement in the exchange. The depreciation in Italian paper will be further diminished if as is expected a railway loan of 300 mil-lions is raised abroad. The resumption of the military operations before Bilbao has given firmness to Spanish, which have gained 4. Turkish are better, with the exception of the 1873 bonds, which have lost 6<sup>1</sup>/<sub>2</sub> at 223f 50c. Egyptian have been steady, and the rise of last week has been maintained. Credit companies and railways have also generally improved, Lombard being the most marked exception among the latter. Holders of Suez Canal shares show great confidence in the issue of the present dispute, and prices have gained 13f 75c in the week. Subjoined are to-day's quotations for the account :-April 22.

Suez Canal		25		1211.00	

The French press has taken up with some warmth the cause of M. de Lesseps and the Suez Canal Company, and is now endeavouring to make of this question a national grievance. The point especially insisted on is the procedure followed in the International Commission composed solely of the maritime Powers, the interests of which are opposed to the company, and in which the company was neither heard nor represented. The friends of the company maintain that the precedent now created may have consequences seriously prejudicial to the spirit of enterprise; the Powers to whom the dispute was referred being the customers of the canal, they have thus been judges and parties in the same suit. They are in the position of debtors left to fix the amount of their debt without the creditor being admitted to support his claim. It is contended that this was a case for the application of the system of arbitration, which England herself has done much to propagate. The dispute would have been then decided in an impartial and competent manner, after a contradictory hearing. Instead of this England, Italy, Austria, Germany, and Holland, the customers of the canal, have been allowed to fix, on their own<sup>\*</sup> authority, the tariffs of the canal they use, and which they did not make. The rigour of those Powers towards the shareholders of the canal is contrasted with their liberality in the settlement of the Sound dues, for the redemption of which a sum of 100 millions of francs was paid, yet that passage was simply a work of nature; the Suez Canal is, on the contrary, the work of a man of genius and of capi-talists who have conferred a benefit on humanity by their sacrifices; and while the Peninsular and Oriental, the Messacrines; and while the relation and other maritime companies are paying dividends of from 7 to 12 per cent., the shareholders of the canal, who have expended 344 millions of frances on the undertaking, are receiving neither interest nor dividends on their outlay, and have 30 millions of coupons overdue. The compromise proposed by the International Commission is shown to be of so little advantage to the company that its interest would be for the traffic to remain stationary at 2,100,000 tons, rather than exceed 2,600,000 tons. A group of

#### THE ECONOMIST.

the shareholders have now put in circulation among their fellow-proprietors a petition to the board of directors, inviting these last to submit to the Syndicate of Agents de Change the refusal of the Turkish Government to examine the late proposals of M. de Lesseps, and to refuse to admit any new Ottoman loans to the Paris Bourse until satisfaction has been afforded to French capitalists who are shareholders. So far, the Canal Company has abstained from admitting or contradicting the exactitude of the telegraphic dispatches from Constantinople published by the *Times*. The official organ of the company, however, now alludes to that information, in a note which appears to intimate that the company is resolved to resist to the last. After quoting two of those telegrams, according to one of which M. de Lesseps declared that he would submit provisionally to the decision of the Commission, while by the other he menaced to close the Canal, the note says: "The most complete reserve is imposed on the Direction of the Suez Canal; it can neither confirm nor deny any of the statements put in circulation. Each statement is an obvious snare, a sort of question put intentionally by the adversaries of the Canal to obtain a reply. No answer will be given to them. Things will follow their natural course until a settlement is forced on by circumstances. Will those parties who wish to oppose might to right continue to give to the world the scandalous spectacle of their violent attitude? The President of the Company, faithful to those who entrusted him with their capital to dig the Canal, the defender of the contract which he holds, and which is the guarantee of the shareholders, will oppose right to might."

The quarterly returns of the traffic on the French railways by the French Ministry of Public Works may not be expected for some time hence, but the publication by the great companies of their receipts for the thirteenth week of the year, exhibits the amount of the earnings since the 1st January, and shows a diminution on most of the lines compared with the first quarter of 1873. With the exception of the Western, both networks, and the new only on the Orleans, Lyons, and Southern, the receipts on all the lines have decreased. The Northern, old network, fell from 24,539,132f to 22,790,535f, a loss of 7·12 per cent. per kilometre; the new network from 2,571,200f to 2,487,077f, or 3·27 percent. less; thedecrease on the Orleans was from 21,747,458f to 19,723,497f or 9·30 per cent.; the new network shows an increase of 162,717f, or from 8,556,947f to 8,718,665f, but as 64 kilometres of new line were in working, the receipts per kilometre diminished by 1·20 per cent. The same may be said of the new network of the Western, on which the receipts increased by 99,700f, or from 6,143,614f to 6,243,314f, while the earnings per kilometre diminished by 3·63 per cent.; on the old network there was a gain of 68,998f, from 13,733,576f to 13,802,574f, or of 0·50 per cent. per kilometre. The receipts on the Eastern line in 1874 were 8,605,951f on the old network from 63,019,828f to 59,325,643f, or a loss of 544,781f and 5·9 per kilometre on the one, and 453,340f and 8·91 on the other. The Paris to Mediterraneanfell on the oldnetwork from 63,019,828f to 59,325,643f, or a diminution of 7·46 per cent. per kilometre on the new the receipts improved from 2,632,144f to 2,927,483f, or 6·88 per cent.; the Southern shows a small diminution from 10,685,632f to 10,661,082f, or 0·22 per cent. per kilometre on the old network; but an increase from 3,716,621f to 4,009,575f, or 4·52 per cent. on the new. The total receipts on all the above lines, old and new networks, in the thirteen weeks was 170,682,194f in 1874, against 178,338,423f in

The Eastern Railway Company has fixed its dividend for 1873 at 33f, or  $6\frac{3}{5}$  per cent.

The Banque de Paris et des Pays Bas will propose, at its meeting to be held on the 18th May, a dividend for last year of 50f per share of 1,000f, one-half paid up. The dividend for 1872 was 60f.

The following are the latest quotations of the produce markets at Havre per 50 kilos (1 cwt), duty paid :--

Corros.—New Orleans low middling, 100f; good ordinary, 94f; Georgia, 98f and 92f; Brazil Sorocaba fair, 97f; Oomrawuttee, good fair, 72f; Tinnevelly, 72f; Bengal, 52f. Sales last week, 16,588 bales; importations, 5,830; stock, 142,580 bales, of which 113,710 from the United States, against 158,980 and 48,170 at the same date last year.

COFFEE (in bond).—Hayti, 95f; Rio, 100f; Santos, 95f; Port au Prince, 92f. Importations last week, 3,975 bags; deliveries, 3,278 bags and 31 tierces; stock, 177,695 bags and 69 tierces, against 69,719 and 123 at same date last year.

HIDES.-Buenos Ayres, dry cow, 156f; Monte Video dry ox and cow, 125f; New York salted, 59f; Lima, 72f.

Woot.-Monte Video, 232f 50c to 270f; Buenos Ayres, 180f to 212f 50c per 100 kilos. Stock on 15th April, 10,091 bales. TALLOW.-Monte Video ox, 46f 50c; La Flata sheep, 45f.

Clearing-house return	***	79,884,000	95,552,000	139,675,000	107,477,000

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1864, a deficiency of 6,792,843l; in 1871, a deficiency of 249,531l; in 1872, a deficiency of 3,064,411l; and in 1873, a deficiency of 6,045,764l. In 1874, there is a deficiency of 1,905,420l.

In 1864, more stringency was felt, and a rise was made in the Bank rate, the drain on its reserve arising from a more permanent cause than the periodic demands of trade. The Duke of Newcastle had retired from political life. A Mexican and a Russian loan were issued to the amount of twelve and six millions respectively, but were received with less favour here than on the continent.

In 1871, money continued to be abundant here ; but as the signs increased of an end to the Communist struggle, any confidence of continued plethora would have been ill-founded.

In 1872, quietness continued in the money market, and that fact appeared to be the main cause of a general firmness in the value of public securities. English railways were no exception, although the serious rise in the value of raw materials attracted attention.

In 1873, the week had been one of great suspense in the money market, owing to an expected advance in the Bank rate, which did not, however, occur, the return from country circulation having neutralised the continued foreign drain of bullion.

The account of the Bank of France for the week ending the Fall

DISCOUNT AND MONEY MARKET .- The money market has again been easy in consequence of the extraordinary absence of demand, but the causes which have lately caused the opinion to prevail that rates would harden for a little have again come more into prominence this week. Silver has again risen in consequence of the contraction of Council drafts upon India, and the Paris Exchange has tended still farther to decline, leading to a farther export of French gold coin to Paris. It is understood also that the Indian Government has been calling in a part of its balances in anticipation of the repayment of the proprietors of the 101 per Cents. on the 30th inst. In consequence short money became rather scarce yesterday, the rate at call on English Government securities suddenly advancing from 2 to 3 per cent.; and to-day this scarcity of short money has continued, while there has also been a better demand in the discount market at 33 as the minimum, which is  $\frac{1}{5}$  higher than the minimum a week ago. The Paris exchange has farther fallen to-day, and is now so low as to render profitable the purchase of bullion on the market for export to Paris, so that part of the Australian gold just arrived will not be taken to the Bank, while additional withdrawals of French coin are anticipated.

The Bank return shows few material changes, the small efflux of coin to the country, which is corroborative of the slackness of trade, being again remarkable. There has, in fact, been a small influx this week, the addition above stated being 5001, and the withdrawal for export on balance during the week having been 12,000/, so that the sum of 12,500/ has come back. In consequence of the decrease of 261,000l in the circulation the reserve is better than a week ago by that amount, though still very small, viz., 11,063,000l, and the proportion of reserve to liabilities is also rather better, the changes in the aggregate deposits being immaterial. These last changes are an increase of 1,996,000l in the public deposits and a decrease of 1,766,000l in the private deposits. The change in the private securities is unimportant, being a reduction of 17,000/ only. But for the neutralising effect of diminished trade, the next returns would probably show a large diminution of the bullion in consequence of the usual withdrawals for Scotland which are now in progress.

THE STOCK MARKETS .- Business is still very restricted in the Stock markets, but in several respects there has been more animation than was lately the case, and there have been some sharp movements. This has been especially the case in speculative Foreign Stocks, and principally in Peruvian, in which the rise established last week has been preserved and increased, the market having all the appearance of a large speculation for the rise based upon definite information. In other foreign stocks there has been a rather more active business; but large realisations have been made and there is not the same buoyancy. In other departments the tendency has been mostly downwards until yesterday, when

#### THE ECONOMIST.

the approach of the account began to induce operators for the fall to close, this movement being more especially decided in English railways. There seems little doubt that at the next settlement, which begins on Monday, the indica-tions will be those of a large speculation for the rise in some foreign stocks, and a rather large speculation for the fall in railways, the set of speculation in both directions having become pronounced during the last fortnight. As there is little buying of stock for the public on the one hand, and little realising on the other, the speculation is at most rather contracted, and in the few cases where it is extended is probably very unsound, so that the public ought now to beware of acting in the direction which the rather loose speculation of the Stock Exchange is follow-The general tendency will probably now be for things ing. to improve, though slowly, and this slow improvement is a reason both for not parting with stock actually held, and for being in no hurry to buy any stock on which, for the moment, the speculative mania may fasten. To-day the active movement in Peruvian stocks has continued, and the tone in almost all departments was good until nearly the close, when there wos a slight reaction.

ENGLISH GOVERNMENT SECURITIES .- In this department the tendency at first was adverse after the recent rise, and on the announcement of the increase of the famine loan for India, but there was afterwards a recovery, and Consols close only  $\frac{1}{8}$  lower than last week.

COLONIAL GOVERNMENT SECURITIES .- Prices are steady and a rise has occurred in :-Queensland, 1882-5, 1; ditto, 1891-6, 1; Victoria, 1883-5, 1/2; ditto, 1894, 1/2.

FOREIGN GOVERNMENT SECURITIES .- In this department, as we have stated, the chief movement has been in Peruvian Stocks, the speculation in which is attracting increased attention. Not a month ago the 1870 loan was quoted about 59, and the 1872 loan at 49, but within a few days they rose between 5 and 7 per cent., closing last week at 66 and 56 respectively, and this week there has been a further advance of between 3 and 4 per cent., the market being hardly ever languid, except for a moment, upon realisations, and the advance being usually most decided. The report is that official accounts of a favourable kind of the guano deposits have actually been received at the Foreign Office, in which case the delay in publication is perhaps rather singular; but whatever may be the truth on this point, the confidence diffused among speculators is apparently unbounded. In Egyptian stocks, which appeared to be the object of a similar movement last week, the promise has not been held, large realisations having been made; Turkish have also barely maintained their ground; and in these cases, as well as in the more speculative Foreign stocks generally, the tendency has been decidedly weak, though the feeling has again been better to-day in sympathy with the active movement in Peruvian. French have also been less steady in consequence of the imminence of political difficulties in France when the Assembly meets, and this weakness has helped to depress the other markets. Russian and the better South American securities maintain their firmness as investment stocks, and Argentine 1868 have farther risen 1 per cent, this stock having been very scarce for delivery. To-day, the continued rise in Peruvian securities has attracted great attention, the buying having been most general and decided, although with very little knowledge cn the part of many who are buying actively of the grounds for the advance.

rian 6 %, 1783..... Fé. 7 %..... 24 7 pm ... 3 34 1 ENGLISH RAILWAYS .- In this department the fluctuations have been sharp, the variations for the week being, however, mostly upwards in consequence of the closing of accounts for the

fall on the approach of the settlement. This course appears to be rendered expedient by the backwardations for the loan of stock which had to be paid last account, and unless in the interim sales by the public have been made, which is not believed, the settlement which begins on Monday will no doubt show a largely oversold account. The traffic returns this week, comparing with Easter week last year, have been considered moderately favourable, and a good impression has also been produced by the monthly statement of traffic and ex-penses of the Sheffield line, showing that there is no increase of working expenses there causing a diminution of the net earnings. To-day, the market after opening strong and remaining weak until midday, afterwards became less firm in tone, but there is finally a general improvement as compared with last week.

The following shows the principal changes for the week in the quotations of ordinary stocks, comparing the latest unofficial prices :-

JOINT STOCK BANKS .- The shares of home companies have been irregular in market value, other features being unimportant. National Provincial are 7 higher; Central of London, 1; London and County, 1/2; London Joiut Stock, 1; Bank of South Australia, 1; New South Wales, 1; Anglo-Austrian, 1; Anglo-Hungarian,  $\frac{1}{2}$ ; Bank of Constantinople,  $\frac{1}{2}$ . On the other side, Anglo-Egyptian have fallen  $\frac{1}{2}$ ; Bank of Roumania,  $\frac{1}{4}$ ; Imperial Ottoman,  $\frac{1}{4}$ ; London and Provincial,  $1\frac{3}{4}$ ; Imperial, 1/2; London Chartered of Australia, 1/2; National of New Zealand, 1.

TELEGRAPHS .- Fluctuations have occurred in these shares generally, but on balance prices are supported. Eastern Debentures have advanced 1; Great Northern, 4; Submarine, 5; Submarine Trust, 1. The following have fallen:

Anglo-American,  $\frac{1}{2}$ ; West India and Panama,  $\frac{1}{4}$ ; Ditto, Preference,  $\frac{3}{2}$ ; West India and Brazilian,  $\frac{1}{2}$ .

MINES .- The British market shows reaction after the strong advance of last week. Wheal Bassett have risen 21; East Lovell, 2; East Caradon, 1/2. On the other side, Tin Croft are 41 lower; South Wheal Frances, 3; Assheton, 1; West Bassett, 1/2; Wheal Grenville, 1/2. Foreign mines are a little irregular, and the following have advanced on balance :--Colorado,  $\frac{1}{4}$ ; Flagstaff,  $\frac{1}{2}$ ; Last Chance,  $\frac{1}{2}$ ; Linares,  $\frac{1}{4}$ ; Vancouver Coal,  $\frac{1}{2}$ . On the reverse side, Almado and Tirito are  $\frac{1}{8}$  lower; Eberhardt,  $\frac{1}{2}$ ; Panulcillo,  $\frac{1}{4}$ ; Rio Tinto,  $\frac{1}{4}$ ; Richmond,  $\frac{1}{4}$ ; Sweetland Creek,  $\frac{1}{4}$ .

MISCELLANEOUS .- Beyond a rise in the value of tea companies' shares there has been no general movement in this department, but special changes have occurred of some importance, among which are a rise of 1 in United States Rolling Stock, on the reported election of a new Board of Directors in New York, a fall of 61 in Glasgow Engineering, and of 2 in Native Guano. Among bonds, &c., Madras Irrigation show a rise of 1; Roumanian Bridges, 2; St Louis City, 2<sup>1</sup>/<sub>2</sub>. Share Investment Preference Certifi-cates are 1 lower. In coal and iron shares there is a rise of 1 in Nerbudda Coal and Iron, on the issue of the report, and of 2 in New Sharlston Collieries. On the other side, Bessemer Steel have fallen  $\frac{1}{2}$ ; Fairbairn Engineering,  $\frac{1}{4}$ . Huntingdon Copper and Sulphur are 1 lower; United Discount Corporation show a fall of 1/4. In land shares, Scottish Australian have advanced 5; Van Diemen's land,  $\frac{1}{2}$ . South Australiaa are 1 lower. Merchant Shipping are 2 higher; Royal Mail, 3. National Steam has fallen 1. Among tea companies, Assam have advanced 2; British Indian,  $1\frac{1}{2}$ ; Jorehaut, 2; ditto, 14 paid, 1; Lebong,  $\frac{1}{4}$ . Tramway shares are steady, and London General Omnibus have advanced 1.

BULLION .- The following is taken from the circular of Messrs Pixley and Abell on the transactions in bullion during the week :-

Gold .- A decline in the French Exchange caused a withdrawal of Gold.—A decline in the French Exchange caused a withdrawal of 232,000/, in Napoleons, from the Bank for transmission to Paris; and this has been the principal feature of the week. There is no general demand for bars to export, and a great portion of the  $330,670\ell$  from Australia, delivered to-day, will be retained here. The Bank has received during the week 271,000/, principally in sovereigns, and  $30,000\ell$  has been taken for Bombay. The Otage has brought  $33,250\ell$  from New Zealand; the Neva 119,610\ell from the Brazils; the Allemania  $3,045\ell$  from the West Indies; and the European  $6,000\ell$  for the Cape. The Overland Mail, due on 15th June, is bringing  $398,000\ell$  for England.

Silver .- The announcement that the amount of the Council drafts on Silver.—The announcement that the amount of the Council drafts on India to be tendered for on the 6th proxo. will be 200,000/, instead of 400,000/ as expected, and the probability of a still further reduction has caused a somewhat sudden rise in the price of silver during the week. We quoted in our last circular  $58\,_{12}^{-2}d$  per oz, but from that rate it gradually rose until  $59\frac{1}{2}d$  per oz was obtained, and purchases for the steamer leaving to-day were completed at this price. As usual the market is quiet to-day, no fresh transactions having been entered into. It is difficult to foretell the course of the market for the next few days, and we therefore content ourselves with quoting  $59\frac{1}{2}d$  per oz standard as the last price. We have received about 76,000/ from New York, chiefly Doré silver. The Cathay, leaving to-day, takes out 565,300/ to the East. the East.

Mexican dollars.—A few small parcels, received by the steamers from America, have been sold at the last price, 573d per oz, and the market is now bare of this description of coin. The Cathay takes 154,560l to China and the Straits.

Exchange .- On India for Banks' drafts at 60 days' sight is 1s 1044 per rupee.

Quotations for Bullion.—Gold.—Bar gold, 77s 9d per oz std; ditto fine, 77d 9d per oz std; ditto refineable, 77s 11d per oz std; Silver-Bar silver, fine, 4s 114d per oz std, last price; ditto, containing 5 grains gold, 4s 118d per oz std, last price; Mexican dollars, 4s 94d per oz, last price.

#### NOTICES AND REPORTS.

#### RAILWAY COMPANIES.

Alleghany Valley Railroad 7 per Cent, Currency, or 6 per Cent. Gold Bonds.-Messrs J. S. Morgan and Co. have invited applications for 600,000l in Bonds to bearer of 200l (\$1,000) each, at  $\$7\frac{1}{2}$  per cent., or 175l per bond, redeemable in 1910, and principal and interest to the extent of 6 per cent. being guaranteed by the Pennyslvania Bailroad Company. The present issue will be a first sqarge upon a branch line just completed, from Mahoning to Driftwood, where it forms a junction with the Philadelphia and Erie Railroad. This issue will complete the amount which can be raised under the first

will complete the amount which can be raised under the first mortgage of 2,000.000*l*. Copiapo.—The Revenue for 1873 was \$599,283, a decrease of \$7,772; and the expenses were \$393,538, an increase of \$34,552; a dividend of 7 per cent. leaves \$244,392, as against \$242,647 brought into the account.

Demerara.—The profit for the half-year amounted to 6,863/, making, with 610/ brought forward, a total of 7,473/, from which a dividend is recommended at the rate of 4 per cent. per annun, and after the payment of the preference dividend 248/ is carried forward. The profits were considerably reduced during the six months by the severe drought in the colony. *Eastern of France.*—The dividend for 1873 is officially at the

rate of 63 per cent. per annum.

Canada .- The following resolutions were Great Western of That this meeting sanctions and confirms the creation and issue of

1,999,419t of Perpetual 5 per cent. Debonture Stock, including an amount of 223,719t stock net yet issued. That of the unissued share capital authorised by the Acts of 1858 and 1869, 320,000t be now issued as stock bearing a preferential dividend at the rate of 5 per cent. per answerk bearing a proferencial dividend at the first of the period of the period of the period of the last January, 1880, into ordinary shares, at the rate of five ordinary shares for each 100/ of such preference stock; and that with regard to the said 223,719/ debenture stock, and 320,000/ preference stock, and in the stock and stock

the said 225, 197 docenture stock, and 520,000 presence stock, the directors be authorised to issue the same at such rates and in such manner as they may deem advisable. *Highland*.—The receipts for the half-year ended the 28th February amounted to 134,288/, and the expenditure to 68,707/, leaving an available balance of 65,581/. From this is deducted 15,754/ for interest on debentures, &c., 26,734/ for divided 15,754/ for interest on debentures, &c., 26,734/ for deducted 15,754' for interest on debentures, &c., 26,734' for dividends on the preference stocks, and 22,978' for dividend on the ordinary stock at the rate of 4 per cent. per annum, leaving 115' to be earried forward. The dividend for the corresponding half of the preceding year was at the rate of 44 per cent., plus a bonus of 14 per cent. The increase in the receipts for the past half is 7,480'. The working expenses show an increase of 9,931', and the interest account of 985'. The works of the Sutherland and Caithness Railway are making progress, and it is expected the line will be opened on 1st July. Capital expended 3,095,349', leaving a balance of 30,542' against the account. 1st July. Capital expended 30,542l against the account.

Honduras Interoceanic,-The first ordinary meeting has been

held, and adjourned for a short time, " with satisfactory assurances from the chairman and directors that the conce the company by the Honduras Government had been ratified by the new congress, and that important negotiations were then pending for the completion of the line from La Pimienta to the Pacific.

Lima Railways Company, Limited .- The eighth annual report, for the year ending Dec. 31st, 1873, shows that the gross receipts obtained from the two lines of railway were 196,431*l*, against 218,637*l* in 1872; and that the working expenses in Linna amounted to 113,824*l*, against 105,246*l*. The net receipts, with deductions for exchange and London expenses, are 75,421l, and a fourth dividend of 3 per cent., or 12s per share, is recommended, making 10 per cent, of the year. The amount carried forward is 3382.

Manchester, Sheffield, and Lincolnshire Railway—New Stock.— The instalments on the new "5 per Cent. Convertible Prefer-ence Stock, 1874," for 1,080,000l are payable—20 per cent. on the 1st May; 20 per cent. on 1st August; 20 per cent. on 1st December; 20 per cent. on 1st August; 20 per cent. on 1sth July, 1875; 20 per cent. on 15th December; 1875. Interest at 5 per cent. per annum to commence from the date when each call becomes due.

Montrose and Bervie .- The directors recommend a dividend of 1 per cent. per annum on the ordinary stock, free of income tax.

Sagua La Grande .- Bonds to the amount of 4,800l have been drawn, and will be paid, with the coupon, on the 1st May.

Tunis Railways.—A resolution has been passed in favour of a scheme for reconstructing the undertaking. Union Pacific.—The net earnings for two months ending 28th February last amount to \$543,790.68, showing an increase of \$168,627.89 on the corresponding period of 1873.

Zealand .- It is notified that the excess dividend for 1873 of 2 per cent, or 8s per shaze, over and above the interest guaranteed by the Danish Government, will be paid by Messrs C. J. Hambro and Son.

#### BANKS.

Bank of Constantinople.—At the meeting at Constantinople on the 7th instant, a dividend for the year ending 31st Decem-ber, 1873, was declared at the rate of 48th piastres, or 8s 9d

per share, payable on the 1st May at the offices. Bank of Victoria.—At the half-yearly meeting held at Mel-bourne on 3rd February, a dividend at the rate of 10 per cent., and a bonus at the rate of 2 per cent. per annum, were declared.

declared. Chartered Mercantile of India, London, and China.—The profit for the year, including 477l brought forward, amounted to 66,661l, from which a dividend at the rate of 8 per cent. per annum was paid for the half-year ended June. A dividend at the same rate is now declared for the past six months, or 8 per cent. for the year. 5,000*l* is added to reserve, and 1,661*l* carried forward.

National of India.—A dividend has been declared for the half-year of 6 per cent., making, with that'already paid, 12 per cent. for the year. The reserve fund has been increased by 25,0001.

National Provincial of England .- The annual meeting will National Provincial of England.—The annual meeting will be held on 14th May, when a resolution will be proposed for the registration of the undertaking as an unlimited company under the Companies' Acts 1862 and 1867, and for the divi-sion of each of the original 100*l* shares, on which 42*l* has been paid up, into two shares of 50*l*, on each of which 21*l* chall be taken to have been paid up. shall be taken to have been paid up.

Standard of British South Africa.—A profit is shown for the half-year, including 2,101l brought forward, of 48,184l, from which a dividend is proposed at the rate of 10 per cent. per annum, the sum of 14,215l to be applied to rebate on bills discounted, 10,000l to reserve, and to carry forward 3,553l. To provide for the increasing business of the company, it is proposed to make calls upon the new shares to the extent of 15l in three instalments of 5l each, at intervals of three months, the first call to be payable on the 1st July next. It is further intended to obtain authority to dispose of 1,069shares (25*l* paid) which were forfeited some years ago.

*Lawy and the set of t* 

#### MISCELLANEOUS COMPANIES.

Argentine Tranways.—An available balance is shown of 12,180l, and a dividend is recommended of 10s per share, less income tax, making, with the interim payment,  $7\frac{1}{2}$  per cent. for the year. It is proposed to add 900/ to reserve and carry forward 37l.

Australian Meat Agency (Tallerman's) .- Applications are invited for 2,500 shares of 5l each at 5s per share premium. The present position of the company is described as being "highly satisfactory," two dividends at the rate of 10 per cent. per

annum baving been paid. Cardigan Steel, Iron, and Wire.—A loss is shown on the year of nearly 12,000l, and a committee of investigation has been appointed, but the dividend of 12½ per cent. guaranteed by the vendors has been paid.

Crystal Palace District Cemetery, Limited.—Capital, 25,000l, in shares of 5l each. It is proposed to provide a cemetery for the district, which, as the burial board of Croydon have passed a resolution reserving theirs for the exclusive use of their own parishioners, it is stated is much needed.

East Suffolk Tramways .- The directors have called a meeting for the 25th inst. to propose a voluntary winding-up, "which has become necessary by the pressure brought to bear by some of the creditors and other causes, which have hampered the business of the company" business of the company.

Fairbairn Engineering.—The profits for the year ended 31st March amount to only 2,429l, which, with the balance, 1,737l, brought forward, makes a total of 4,166l. As the sum of 2,902l was paid as interest in October, the balance is insufficient for any further dividend.

Improved Wood Pavement.-The accounts for the year ended December 31st, after writing off 1991 for depreciation, and 10 per cent from the preliminary expenses, show a balance of profit amounting to 255l to be carried forward. The negotia-tion with the vendors for the reduction of the purchase money has been brought to a satisfactory termination, and the necessary steps taken for obtaining the legal approval of the resolution passed for reducing the capital from 200,000/ to 100,000/. The pavement is stated to have given great satisfac-tion, and the directors expect that important works will be confided to the company during the current year.

North Australian Company .- The annual meeting is called for the 5th May, to declare a dividend and to propose resolutions in favour of winding-up the undertaking. Pacific Steam Navigation.— At the meeting, the chairman stated in October last a dividend was paid amcunting to

93,7971, the estimated loss on the year's working up to the 31st December last was 143,7501, and after deducting those two sums from the balance on the 31st December, 1872, there remained an estimated surplus of undivided profits of 65,4361 to the good. With regard to the liabilities, they had power to call upon shares at present issued a sum of 164,000*l*. By a resolution of the proprietors they had power still to borrow 200,000*l* in round numbers, and in order to meet fairly all the liabilities of the company a further sum of 250,000/ would be required. A resolution was passed that the consideration of the accounts be postponed, and a committee of shareholders be appointed to inquire into the present position of affairs, to confer with the directors, and to report at an adjourned meeting. The chairman said the proceedings would render necessary some change in the position of the directors.

Saratov Waterworks, Limited.—Subscriptions are invited for 6,000 6 per cent. original shares of 20/ each, the interest being estimated to be covered by a guarantee of nearly 10,000/ per annum from the municipality. The undertaking has been formed for the purpose of supplying waterworks to the city of Saratov, South Russia, a concession having been obtained by which the company will have the monopoly for 40 years, and receives free of cost the necessary lands for erection of works, which are likewise to be free from all municipal taxes. The population of the town is over 100,000. Under the contract the works are to be opened by the end of the year. Singapore Gas.—The available total amounts to 1,806/; out

of which a dividend is recommended at the rate of  $7\frac{1}{2}$  per cent. per annum on the preference capital, and 7 per cent. on the original capital, less income tax; surplus 62/. South Carolina Rice Plantations Trust, Limited.—Capital,

original capital, less income tax; surplus  $62\ell$ . South Carolina Rice Plantations Trust, Limited.—Capital,  $500,000\ell$ , in shares of  $10\ell$  each, 25,000 of which are now offered. A bonus certificate of  $10\ell$ , redeemable by annual drawings, being given with each share. It is proposed to develop some large freehold rice plantations and naval store timber tracts, situated on the North Sautee, and Ashepoo Rivers, stated to comprise an area of 36,666 acres, and to be of great richness and fertility. The sum of  $440,000\ell$  is to be paid for the property including  $250,000\ell$  in fully paid-up shares. paid for the property, including 250,000/ in fully paid-up shares which are to be held in trust, and receive no dividend until the certificate-holders, in addition to dividends on their shares up to 10 per cent. per annum, are paid back the whole amount subscribed as a bonus, the shares being still retained, and participating in all future profits.

Submarine Cables Irust.—The revenue for the year ended 15th inst. amounted to 33,525/, and the expenses to 1,924/, leaving a balance of 31,601/. Of this 21,564/ has been applied to payment of coupons due 15th Oct., 1873, and 15th April, 1874, and the balance carried to redemption fund. Certifi-cates to the value of 8,800/ have been purchased during the year, making 650 certificates cancelled, thus reducing the capital of the trust from 420,000l to 355,000l, the value of the reversionary coupon attached to the outstanding certificates being proportionately increased. An income of 23,300l is now sufficient to pay the coupons on the outstanding certificates and current expense

Union Steamship .- During the six months ended 28th Feb. the receipts were greater than in any corresponding period since the establishment of the company, but the increase in the expenditure has been so heavy, owing to the high price of coal and increased cost of stores and wages, that the

directors are unable to recommend the usual interim dividend.

Western and Brazilian Telegraph .- A circular has been issued stating that the sum of 100,000/ is required by the Central American Company to complete the connecting lines, and as the Western and Brazilian Company have acquired nearly one-half of the capital of the Central American Company, and the interests of the two companies are thus nearly identical, it is proposed to advance that sum, the shareholders being invited to subscribe on the following terms :---

The advance to be made for twelve months, bearing interest at the

The advance to be made for twelve months, bearing interest at the rate of 10 per cent. per annum. The payments to be made as follows :--Of every 100/ subscribed--50/ on the 1st May, 20/ on the 15th May, and 30/ on the 15th June. For each payment a promissory note of the Central American Com-pany will be given at twelve months' date, and shares of the Central American Company will be deposited with the subscriber for double the amount of his subscription as collateral security. The repayment at the end of twelve months is guaranteed by this

If this company should hereafter decide, by consent of a general

meeting, to issue 7 per cent. debentures to the amount of 100,000/, in order to repay this loan taken by the Central American Company, those now subscribing will have the preference in allotment of the same.

#### MINING COMPANIES.

Bilston and Crump Meadow Collieries, Limited. - Capital, 100,000l, in shares of 10l each. It is proposed to purchase for 75,000l in cash, 25,000l in shares, and 30,000l in 6 per cent. debentures, some old-established collieries in Gloucestershire. The debentures are to be paid off or transferred at the rate of 5,000l per annum, and the vendors guarantee 10 per cent. per annum for five years on the capital of 100,000l. Britannia Iron Mining and Spiegeleisen, Limited.—Creditors are

required to send in their claims to the liquidator by 30th May. Nerbudda Coal and Iron,-The estimated "known coal" is

now augmented to 214,500 tons. The receipts during 1873 were 10,635/, an increase of 3,162/. A new contract has been entered into with the Great Indian Peninsula Company to deliver 200 tons per week at a higher price. Overseal Colliery.—At the second meeting the report was

unanimously adopted, and great satisfaction expressed with the work done. It was decided to work the Ell seam of coal, which has been reached, and a call of 1l per share was ordered to be made.

Wheat Bernard Silver, Tin, and Copper, Limited,-Creditors are required to send details of their claims to the liquid itors at Tavistock.

#### COMMERCIAL EPITOME. FRIDAY NIGHT.

The promise of forcing weather which was given by the early spring of this year has been carried out most completely as far as the past week is concerned; spring sowing, where backward, has been all but completed, and the growing crops are reported on most favourably from all parts of the kingdom. Ice has been removed early from the principal foreign

#### [April 25, 1874

sources of supp'y, and there is now no important check to free importations. Still the grain trade is very firm, and prospects are decidedly against any want of steadiness during the next few months; for, with all the favourable conditions as to coming plenty both at home and abroad, the fact remains, and is the more conspicuous as the season advances, that stocks have become barer. A rise rather than otherwise is generally expected in the value of wheat; but to what extent depends on the amount of stocks in the hands of native holders. It is clear that present rates are not sufficient to bring forward large supplies from abroad, and as our requirements are anything but small at home, and France will require some two million quarters before the end of the season, home supplies of breadstuffs must be trenched on more largely than their apparent capacity will admit. Continental markets are steady, but not firm, least of all for future delivery, quotations running for the autumn 10 per cent. below actual prices. New York market is flat.

In the cotton trade prices are now unsteady. Business at Liverpool has as usual been chiefly affected by advices from America, but attention is less exclusively directed to the arrivals of new cotton, the state of the weather more influencing speculation in view of the planting for next season, and the more or less favourable conditions under which the seeds are got in. There has been less rain of late, and the raw material has consequently lost some of the firmness which was apparent in the earlier part of the week on that account. As to the extent of land to be planted, it is remembered that the late rise in prices has done much to prevent a great diminution in the area for cultivation. At Manchester the tone has been steady, and the amount of business sufficient to clear off stocks to a certain extent, low-priced goods being neglected, but neither home nor foreign demand shows any great strength. Some failures and serious losses which have occured in the woollen districts early this week have affected that trade adversely. Demand for goods has been extremely limited notwithstanding the fine weather and the firmness in cotton. The approaching sales of colonial wool are looked forward to with interest, and in the meanwhile advices from Leipsie are unsatisfactory to holders.

The circular quotations from the iron trade of South Staffordshire have confessed to a reduction in the prices of finished iron, but it is supposed that very few orders have been secured, and those without profit. Works and furnaces continue to be stopped on account of the difficulty of getting orders and the scarcity of coal. Reductions which have as yet been made are apparently not sufficient to beat back Belgian competition, and little hope is held out to the colliers on strike that a compromise can be effected, the tendency being to wait till coal becomes much cheaper. The heavy iron districts are rather less depressed, but there is as yet no general activity to report. In South Wales another extensive strike may possibly occur among the steam colliers who object to a reduction in wages; on the 14th prox. a decision will be come to, but the bulk of the men have already acceded to a fall of 10 per cent. The colliers on strike in South Staffordshire, whose numbers have been reduced by the offers of smaller mine-owners of the old rate of wages in order to take advantage of the bare market, have been joined by 2,000 miners of Warwickshire, who oppose an attempted reduction of 10 per cent. in wages.

A better tone is apparent in the produce markets, and speculation is sustained though not active, no forced sales having occurred. The demand for sugar has improved, but prices have hardly corresponded, and the market has felt no sudden access of activity. The excise duty on sugar used in breweries will be raised to 11s 6d per cwt in order to place it on an equality with malt. A recovery has occurred in the coffee market, having its origin in the better prices obtained at the monthly Dutch sale this week. Rice is dull. A moderate business has been done in tea, at steady prices on the whole; the clearances for consumption are stated to be unusually large. In oils and tallow the improving tone continues, and transactions passing are on a more extensive scale. The market for metals has been firmer than at the close; in tin a reaction has occurred from the highest prices to which speculation forced that metal early in the week.

#### EXTRACTS FROM TRADE CIRCULARS.

(Fron Messrs Alex. Collie and Co.'s Monthly Prices Current, dated Manchester, April 23.)—Prices have remained totrably firm at the advance previously established, and as cotton estimates have been assuming a reliably moderate figure, some improvement in business has latterly been noticeable in the better classes of gray shirtings and yarns for the East. The continental and South American markets continue unusually dull, and from this cause an accumulation of stock in first hands is occasionally observable. The home trade buyers have hitherto been operating to the extent of only momentary requirements, but there is a disposition to

ye

18 5-11 increase orders, which will have a relieving effect upon the position of producers.

(From Messrs Goldsbrough's Wool Circular, dated Melbourne, Feb. 25.)—At the date of our report of last month the season was almost closed, and the sales held since have been comparatively unimportant, the total sold being about 4,150 bales. A large and satisfactory business has been transacted during the season now nearly terminated. At the auctions held in Melbourne and Geelong, 117,753 bales have been catalogued, and over 71,000 bales sold, being an increase on the quantity disposed of last year; and no doubt a considerably larger number of bales would have been sold had it not been for the disputes between buyers and sellers on the draft question at the commencement of the season. During the progression of these diaputes, many clips, which otherwise would have been offered in this market, were shipped to England for sale on growers' account, consequently the quantity available for disposal here was materially lessened. As soon as the satisfactory settlement was made there was a marked improvement, and the subsequent sales have progressed in a favourable manner, competition having been well sustained, and good prices realised. There have not been any great fluctuations in prices during the season. The sales commenced at a reduction of about one penny per pound. About the middle of November prices declined about one penny. Since then there has been little if any alteration. We look forward to large operations in this market for America next season.

#### THE COTTON TRADE.

#### LIVERPOOL .- APRIL 23.

Cotton has been in extensive demand throughout the week, and, though there has been rather a quieter market yesterday and to-day, quotations of some descriptions show a further slight advance. In Sea Island the business has again been small; prices without change. American continues to be freely offered, but has further partially advanced ½d per lb. For Brazilian the demand has been fair, but the quotations are difficult to obtain. Egyptian continues in good demand, at the quotations of last week, with a large supply offering. West Indian and Peruvian are dull of sale, without change in prices. East Indian has been in good demand, and useful qualities are partially ½d per lb dearer. Common descriptions, from their extreme scarcity, command an advance of ½d to ¼d per lb.

In cotton "to arrive" and for future deliveoy the buainess has been active, particularly for East Indian, at rather higher rates, but with less firness at the close.

The sales of the week, including forwarded, amount to 102,460 bales, of which 13,850 are on speculation and 10,340 declared for export, leaving 78,270 bales to the trade.

APRIL 24.—The sales to-day will probably amount to about 12,000 bales, the market without change.

#### THE ECONOMIST.

# In speculation there is an increase of 34.840 bales. The imports this week have amounted to 47,342 bales, and the quantity of American cotton reported at sea for Great Britain (including cable advices to date) is 256,000 bales, against 226,000 bales at the corresponding period last year. The actual exports have been 6,864 bales this week.

#### LONDON.-APRIL 23.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association :--

The market in the earlier part of the week was firm, with a fair demand for arrivals; latterly there has been less inquiry, but prices at the close are maintained. PRESENT QUOTATIONS

#### MARKETS IN THE MANUFACTURING DISTRICTS.

MANCHESTER, April 23 .- Our market still retains its strong tone, though the amount of business actually offering is less than last week, owing to buyers having now satisfied their wants for the time being. The position of manufacturers of most staple makes is now much stronger, as they have generally taken advantage of the demand and sold freely; at the same time, though quotations are higher, buyers do not seem disposed to follow, being content to watch the turn of affairs. Yarns for export remain steady from similar causes, but little business is before us. For the home trade a moderate trade is going on, and values have advanced from a farthing to a halfpenny per pound. Comparative Statement of the Cotton Trade.

the all-wool superfine, orders are not so numerous as a month ago

ROCHDALE .- The plain flannel trade has undergone considerable improvement, and buyers evinced far more freedom

in placing orders than has been noticeable for some time past. NOTTINGHAM.—There is less doing in the lace trade generally this week; indeed, business is more quiet now than it has been for years past. The hosiery trade is quiet. Hosiery yarns maintain recent rates. BIRMINGHAM.-No real improvement can be reported in

the iron trade, which, between the want of trade and dearth of coals, is now reduced to a worse state of depression than has been experienced in this district since 1866. Merchants maintain that a fair export trade will be forthcoming so soon as the standard for branded iron is brought down to 101, and a dwor of 21 per ten therefore would optice the bring about a drop of 2l per ton, therefore, would suffice to bring about the recovery predicted by shippers. Best sheets have been reduced 1/ per ton.

TYNE AND WEAR.—Manufacturing coals continue to get weaker in the market. The great source of anxiety at present, however, is the wages question. It seems now very certain that the Durham coalowners intend to stand out for the full reduction which they have claimed, viz. 20 per cent.

#### CORN.

#### AMERICAN GRAIN AND FLOUR MARKETS. NEW YORK-APRIL 10.

The flour market has during the past week continued to show an upward tendency, and in quotations there is some further advance. The receipts have been pretty free, but the export demand has been good, not only from Great Britain but from the British provinces, and from the West Indies and South America. Some little pseculative feeling that was infused into the market caused a more active demand from the home trade also. The wheat market has been active

#### April 25, 1874.

## THE ECONOMIST.

at rather firmer prices. Indian corn has come forward much at rather inner prices. Indian corn has come forward much more freely by rail, but the increased supplies were met by an active export demand, and prices have ruled firm. The re-ceipts at the West last week were comparatively large; lat-terly, however, there is some falling off in this particular, still the market closed a little weak. Rye has advanced. There has been a partial resumption of the navigation of the great lakes, but they are still a good deal obstructed by heavy ice. No official announcement has yet been made of the time when the Erie Canal will be re-opened, but probably not before the 1st of May.

The following are the closing quotations :-Flour: Superfine State and Western, \$6.00 to \$6.25; extra State, &c., \$6.50 to \$6.85; Western spring wheat extras, \$6.40 to \$6.75; ditto winter \$6.85; Western spring wheat extras, \$6.40 to \$6.75; ditto winter wheat extras and double extras, \$7.00 to \$10.25; city shipping extras, \$6.65 to \$7.00; city trade and family brands, \$8.75 to \$10.00; Southern bakers' and family brands, \$8.25 to \$10.25; Southern shipping extras, \$7.00 to \$7.75; rye flour, superfine, \$5.35 to \$5.85; corn meal, Western, &c., \$3.75 to \$4.25 per brl. Grain: Wheat, No. 1 spring, \$1.61 to \$1.65; white, \$1.70 to \$1.90. Corn, Western mixed, 84c to 90c. Rye, \$1.05 to \$1.10. Oats, mixed, 62c to 64½c. Peas, Canada, \$1.05 to \$1.30 per hushel. bushel.

#### LONDON MARKETS.

#### STATE OF THE CORN TRADE FOR THE WEEK. MARK LANE, FRIDAY EVENING.

The brilliant weather which has prevailed during the week has been most beneficial to the growing crops, and has not been without its influence upon the trade, rendering buyers more cautious in their operations. Business has in consequence become more contracted, and the tone, especially towards the close, more subdued. Any adverse movement in quotations is, however, retarded by the very moderate supplies at present available, or likely to be for some time yet. Of the liberal quan-tity of wheat on the way, as we have shown before, something like two-thirds at least are from distant ports. From the like two-thirds at least are from distant ports. From the Eastern Sea Board of America shipments are not heavy. St Petersburg is at length open, and the first steamer will leave Hull, it is understood, for that port on Monday next. It must, therefore, be some three weeks before much can be done in the way of obtaining any supplies worth naming from that was a straining any supplies worth naming from that quarter. Meantime, our farmers, although well forward with field work, and with very favourable weather fortkrashing out their grain, do not avail themselves of the opportunity afforded of sending forward their produce more freely, and the last official returns show a further falling off in the deliveries generally, but of wheat more especially. The effect of the weather has therefore been no more than to counteract the upward movement noticed at the close of last week, and a partial advance of 1s to 2s per qr obtained in several of the country markets has since been lost. At Mark lane there is very little, if any, deviation from the values current on Friday last. If anything, the tendency is possibly rather in favor of the consumer. Notwithstanding the restriction of demand, it has been sufficient to take off the small quantity of English It has been sumcient to take off the small quantity of English wheat to hand, and to prevent any material accumulation of foreign on offer. There is consequently no attempt to press sales, and whilst dull the market is not depressed. The flour trade [remains without essential change. Notwithstanding the advanced period for malting there is still a fair demand for barley, and with the reduced supplies offering all grades are fully as dear as on this day week. Grinding descriptions also hold their value firmly the tendency being rather accient also hold their value firmly, the tendency being rather against buyers. Beans are well held, and stiffer rates have been paid for good qualities of foreign. Peas meet only a limited demand, but rates are upheld by the smallness of stocks. Arrivals of oats have been very light all the week, and with moderate seles cuptations are form. Main and the meek, and with moderate sales quotations are firm. Maize and granary is to be bought only at full prices.

be bought only at 1011 prices. Mr J. E. Beerbohm's Evening Corn Trade List states that the arrivals of grain and seed laden vessels at ports of call since Friday last have been 31 in number. Total last week, 15; total since January 1, 798; total to same time last year, 805. Wheat—The arrivals have been moderate, con-sisting of 18 cargoes, including 1 steamer. The market was year, 805. Wheat—The arrivals have been mouther, was sisting of 18 cargoes, including 1 steamer. The market was very firm on Friday and Saturday. Since then the fine weather has produced a quieter tone, and prices of American spring must be considered 1s 6d to 2s lower. Maize spring must be considered 1s 6d to 2s lower. Maize-12 arrivals. The demand has been more quiet, and there is a decline of 1s 6d on the price of 42s 6d per 480 lb tale quale, which was paid on Monday. Barley—No cargoes have arrived during the week. The trade has been strong for good quali-tics which was paid on the price of the strong for good qualities, which are scarce.

#### COLONIAL AND FOREIGN PRODUCE MARKETS. TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SHE POSTSCRIPT.

#### MINCING LANE, FRIDAY MORNING.

MINCING LANE, FRIDAY MORNING. SUGAR.—The market has been very firm, with prices rather in favour of the importers generally; but there is still an absence of speculation, on account of the exceedingly heavy stocks. Restining qualities of West India and Mauritus are occasionally 6d per ewt. dearer. Low brown sugars have been rather more readily saleable. A good business is reported in floating cargoes for the United King-dom. 973 bags crystalised Demerara and Berbice by auction sold at 28s to 30s for the former, middling to fine yellow, and 27s 6d for the latter, consisting of low middling yellow. 1,568 casks West India sold to yesterday. The duty will cease on the 1st, and, as regards refined, on the 21st proximo, the date originally proposed by the Government. Further contracts have been made in French loaves for this market. The deliveries are of course confined to the actual requirements of the trade, pending the new duties coming into force. Stock in the United Kingdom by latest return 287,503 tons; against 134,000 tons hast year, and 87,100 tons in 1872 at same date.

 								-

Mauritius.-4,541 bags by auction found buyers as follows:-Soft grey and yellow, 22s 6d to 25s 6d; grainy and crystalised, 26s to 28s 6d. About 6,500 bags privately; brown, 18s 9d to 19s; other kinds as above quoted.

Madras .- 2,278 bags Native were taken in and since part sold ; prices not given.

Jaggery.-2,000 bags by private contract at 16s.

Bengal .- 200 bags superior yellow Gurpatta at 27s to 28s.

Penang.-5,479 bags soft brown at public sale were bought in at 18s to 18s 6d. Privately, 400 baskets sold at 16s 6d.

China .- 2,545 bags low brown withdrawn.

Egyptian.-2,043 bags sold as follows:-Brown, 17s to 19s 6d; syrup, 22s to 26s; a few lots grainy white at 30s to 30s 6d.

Manila .- 9,004 bags sun dried Ilo Ilo sold at 20s 6d to 21s 6d. 5,320 bags lown brown ditte at 18s 6d.

Other Foreign.-158 cases 1,407 bags Bahia were withdrawn, and since sold at 17s 6d to 21s 6d for brown.

Floating Cargoes .- The following have sold for the United Kingdom :-One of 2,850 bags Pernam at 20s; one of Havana, 2,000 boxes, clayed, 24s 3d; molasses sugar, 18s 9d; grainy, 25s 3d; one Cuba, 520 casks, at 2's 10½d; 92 casks 217 boxes clayed, at 24s; one Trinidad de Cuba at 20s 6d; and one Porto Rico, at 21s 6d per cwt.

Refined.—The home market has been firmer for dry goods, and further business reported in French loaves for delivery at 29s 9d to 30s 6d. Clyde crushed sugars are steady. 1,000 French loaves by auction sold at 33s per owt.

Molasses — A parcel of St Vincent's sold at 12s. At auction 187 casks Australian at 9s 6d to 10s. 250 casks Australian treacle at 15s to 16s per cwt.

RUM.—There has been a good demand, with sales chiefly in Demerara at 1d advance, viz., 2s 2d to 2s 3d; Leewards, 2s 2d. Jamaica steady.

COFFEE.—The consumers who have long held small stocks are at length buying rather freely, and the Datch sale having gone higher than anticipated, viz., 533 to 54 cents for good ordinary Java, prices in this market have risen 3s to 5s since last Friday. Stocks here have in this market have risea 35 to 37 cents for good ordinary back, prices further increased, but the deliveries must soon exhibit marked im-provement. At auction 1,215 casks 65 barrels 640 bags Plantation Ceylon all sold as follows: grey and palish to middling colory, 102s to 103s, 40 casks and barrels 876 cases 1,256 bags East India: Wynaad, 104s 6d to 112s 6d, small in proportion; Courtallum, 101s 6d to 105s; fine Mysore, 115s to 120s 6d; small dito, 112s to 114s. 90 casks 47 barrels 751 bags Jamaica chiely sold: fine ordinary, 82s 6d to 89s; low middling to good colory, 94s 6d to 114s, 151 half frazils Mocha sold at 100s 6d to 102s 6d for small greenish. 122 hags Costa Rice colory, 95s to 101s. 3,236 bags other foreign were chiely bought in; a portion sold, Guatimala, 85s 6d to 98s 6d; Bahia, 84s to 86s; Rio, 84s; low, 70s. In the early part of the week 101 bags good native Ceylon sold at 84s to 85s. A floating cargo of Rio reported at 75s 3d for a near port; one of Santos at 82s for the same; and 150 tons Porto Rice to arrive, no price reported.

no price reported.

70s to 90s per cwt. TEA.-The market has become quiet, the dealers making heavy TEA.—The market has become quiet, the dealers making heavy clearances from the warehouses immediately after it became known that the duty would not be reduced. Prices do not exhibit any material change, but common green teas by auction continue to sell at low prices. Scented teas have not maintained their former value, especially for Capers. About 8,500 packages China have been offered in the public sales. Of Indian the supply keeps liberal; 5,800 packages went without much animation, at rather lower quotations.

## THE ECONOMIST.

[April 25, 1874.

RIGE.—Rather a large quantity has sold on the spot, prices being in your of buyers. The Rice Brokers' Weekly Circular reports the sales RICE.—Rather a large quantity has sold on the spot. Frices being in favour of buyers. The Rice Brokers' Weekly Circular reports the sales as follows:—4,500 bags Bengal at 10s 9d to 14s. 11,500 bags Japan at 11s 3d. 21,500 mats Saigon old erop at 9s 9d ex quay, and 29,000 bags Rangoon at 10s to 10s 6d. 2,883 bags white Bengal, and 13,069 packages Japan by auction were bought in. A few cargoes of new season's Rangoon, March and April shipment, have sold at 10s 9d and 11s per cwt for Rangoon, open charter.

ewt.

cwt. TAPIOCA.—1,376 bags Penang, about half sold at  $2\frac{1}{2}$ d per lb; a few lots at  $2\frac{5}{8}$ d per lb for good quality. 604 bags Singapore were taken in. BLACK PEPPER.—A few parcels have changed hands by private contract during the week upon former terms. Yesterday 350 bags Singapore by auction sold at easier rates, from  $5\frac{1}{2}$ d to  $5\frac{5}{2}$ d for common, and  $4\frac{1}{2}$ d to  $4\frac{5}{2}$ d for Rhio. The sound portion of 1,316 bags Penang withdrawn. 1st class sea-damaged sold at  $4\frac{7}{4}$ d to  $4\frac{5}{4}$ d. 262 bags Siam and Alexy withdrawn withdrawn. 1st class s and Aleppy withdrawn.

WHITE PEPPER .- 530 bags good Penang sold at the reduced price of 63d per lb.

OTHER SPICES.—121 packages nutmegs sold steadily. Penang 65's, 4s ld; 79 to 77's, 3s 5d to 3s 6d; low, 2s 11d per lb. 18 cases ordinary Java Mace were bought in at 3s 3d. 18 cases Penang chiefly sold at 3s to 3s 4d, and 2s to 2s 4d per lb for low and broken. 55 bales Zanzibar to 3s 4d, and 2s to 2s 4d per lb for low and broken. cloves from Hamburg, were withdrawn. Privately 1s 2d to 1s  $2\frac{1}{3}d$ per lb paid. 170 boxes unworked cassia lignea sold at 65s for fair quality. There were 823 bags pimento in vesterday's public sales, which sold at last week's quotations, from  $2\frac{5}{3}d$  to  $2\frac{7}{3}d$ fair quanty. These public sales, which sold at last week's quotations, from 2gen to -gen per lb. Common qualities of Jamaica ginger show a further reduction of about 3s. 86 barrels chiefly sold at 55s to 60s, and middling at 74s. 123 cases 41 bags Cochin at the recent decline; fair scraped, 81s to 82s; small 73s; rough, good ordinary to bold, 68s to 71s. 108 bags Malabar were bought in at 50s. Of 632 bags African, and lot sold at 47s per owt.

SALTFETRE,-Some business has been done in Bengal; refraction, 22 to 20, 17s 9d to 18s; 6 to 41, 21s to 21s 3d per cwt.

SHELLAC is quiet and rather lower. 318 chests by auction went as follows:—A C garnet, 10l 5s to 10l 12s 6d; other garnet, 9l 15s to 9l 17s 6d. Privately, 14l to 14ls 5s per cwt paid for D C orange.

INDIGO.—The quarterly sales were brought to a conclusion on the 20th inst., and prices did not exhibit any further alteration. Of the total quantity offered (10,490 chests,) 5,980 were withdrawn, and 747 bought in, leaving 3,763 chests sold in the room, to which must be added about 1,300 chests of the withdrawn and bought in, making the added about 1,300 chests of the withdrawn and bought in, making the total quantity disposed of 5,000 chests. Annexed are the prices—Bengal, fine purple and blue, 8s 8d to 8s 10d; fine violet, 8s 3d to 8s 6d; good violet and red, 7s 8d to 8s 2d; middling ditto, 7s 4d to 7s 8d; ordinary ditto, 7s 3d to 7s 4d; good violet and copper, 7s 6d to 8s; middling ditto, 7s 3d to 7s 6d; consuming, middling to fine, 6s 7d to 7s 8d; low to good ordinary, 5s 4d to 6s 6d per lb. Madras—Good middling to fine native, 3s 4d to 5s 3d; good ordinary to middling ditto, 2s 3d to 5s 2d; ordinary and low ditto, 1s 1d to 2s 2d per lb. Kurpah—Good middling to fine (native), 5s 3d to 6s; good ordinary to middling, 3s to 5s 2d; low to ordinary, 1s 6d to 3s 9d per lb. OTHER DEYSALTERY GOODS—Cutch is firmer. Some business has been done in good Pegue at 22s to 22s 6d. No change in Gambier, the market being steady. The sound portion of 527 bags Bougal turmeric was taken in at 18s. 138 bales Bengal safflower were chiefly withdrawn.

been done in good Pegue at 228 to 228 to ... No enange in Camper, the market being steady. The sound portion of 527 bags Beogal turmeric was taken in at 18s. 138 bales Bengal safflower were chiefly withdrawn. A few bales sold at 5/ per cwt, being rather lower. METALS.—There was a further improvement in business during the first half of the week, but the markets have since become quiet, and the partial advance is not maintained. A rather large quantity of Chili correct here add at 74/10s to 75/10s for anyment condity. Subscience, the second state of the second state of the second state of the second state.

the partial advance is not maintained. A rather large quantity of Chili copper has sold at 74/10s to 75/10s for current quality. Subsequently a reaction set in owing to advices of heavy charters. Australian about the same as last quoted. The upward movement in Straits tin last referred to made further progress until 104/ to 105/ was attained, and 100/ to 102/ for Australian. A quiet tone afterwards prevailed, and 95/ to 99/ accepted on the spot, 93/ to 95/ for Australian, English 103/ to 104/ yesterday. Lead and spelter were quiet. Sectch pig iron at one time during the week sold at 71s 6d, and afterwards at 78s 6d, with an active market. JUTE.—There has been rather a large quantity sold for arrival, partly

after wards at 788 6d, with an active market. JUTE.—There has been rather a large quantity sold for arrival, partly for France, and some on speculative account. Sales affoat amount to about 30,000 bales (including some not reported last week), at 12/ 10s to 19/. A moderate quantity sold on the spot. The Dundee market for jute and manufactured goods is less depressed than of late, on account of the expected decrease in the production next season. The public sales here went flatly, as usual, and 7,485 bales offered on Wed-nesday were chiefly bought in for the sound portion. Some new crop sold at up to 22/, and a few parcels fresh-water damaged at 9/ to 17/ per ton. per ton.

LINSEED.-No change in the market. Calcutta quoted 61s 6d to 2s 6d per quarter. The tone of business has been rather quiet. 62s 6d per quarter.

Oils.—A moderate inquiry prevails for olive at recent low rates. Seville and Malaga, 40/10s to 41/; Mogadore, 37/10s. Common fish oils quiet. Cod has sold at 36/. Pale seal quoted the same. The Greenland seal fishery has been favourable. Lindseed oil rather quiet Creentand seal instery has been favourable. Lindseed of rather quiet at 28/15s to l; next two months, 29/5s. The market for English brown rape shows farther depression. On the spot, 29/10s to 29/15s; next four months, 30/15s sellers; last four months, 31/15s; at the latter price a good business done. Refined, 30/10s to 31/15s. Foreign,

34/. Lard firmer. English refined, 48/ to 49/. The market for cocca-nut issteady. Ceylon, 35/. For arrival, 36/ paid in one instance. Cochin dull. Palm dull, being influenced by the Liverpool market. Fine Lagos can be bought at 35/ per tun. PERROLEUM firmer at 11<sup>1</sup>/<sub>2</sub>d to 11<sup>3</sup>/<sub>4</sub>d; American refined. For arrival in the last four monthe, business at 1s 1d to 1s 1<sup>3</sup>/<sub>4</sub>d per gallon. Stock your large viz 134 300 hereads

very large, viz, 134,300 barrels. TURPENTINE.—American spirits at one time sold at 32s, now quoted 31s 3d to 31s 6d per cwt.

TALLOW.--The market for Russian has assumed a more steady appearance, and the supplies of Australian by auction to-day are mode-rate. This morning quotations for Petersburg are 38s spot and June; 41s 3d Oct. to Dec.; and 41s 9d Dec., or 9d to 1s per cwt higher than a Bridge left. on Friday last.

POSTSCRIPT. FRIDAT EVENING. SUGAR.—The market has been firm. 1,062 casks West India sold. Stork.— The market has been firm. 1,052 casks West findla sold, including various parcels crystalized Demerara by auction at a range of 27s 6d to 31s 6d, making 2,630 casks for the week. 1,059 bags at rates in proportion. 8,517 bags Mauritius went steadily, a considerable part fluding buyers; grainy, 26s to 29s 6d; soft brown and yellow, 20s to 26s. 1,885 bags Egyptian, part sold on former terms; 50 tons low brown China have sold at 15s 6d.

brown China have sold at 155 6d. COFFEE.—4 cases 2,028 bags East India sold at 106. to 1128 6d for Coorg and Wynaad, with small in proportion. 183 packages Mocha, at 1038 6d to 1058 for small greenish. 273 casks 21 barrels 75 bags Plantation Ceylon, grey to bold colory, 1038 to 1138 6d; 827 bags Costa Rice at 938 to 1068 6d; 244 bags Guatimala at 1018 to 1068. Prices generally 18 to 28 per cwt higher than yesterday. Rice — No further change. RICE

RICE.—No further change. METALS.—Tin, Straits, 96/ to 98/; Scotch pig iron, 77s 3d per ton cash.

DRYSALTERY GOODS.—160 bales Bengal safflower, about one-third part sold at 10s decline, from 3/2s 6d to 6/12s 6d. 880 boxes cutch sold at 22s 3d to 22s 9d. 587 packages gambier sold chiefly at 35s 6d for fine pressed cubes. OILS.-720 casks, &c., cocon-nut by auction were chiefly bought in.

OILS.-

180 casks palm part sold at 31/ to 32/ per tun for Loanda. TALLOW.—No change in town melted. 1,091 casks Australian chiefly sold at 6d advance. Mutton, 36s 6d to 37s 6d; beef, 34s 3c to 35s 6d per cwt for fair to good.

#### ADDITIONAL NOTICES.

GREEN FRUIT.—The report of Messrs Keeling and Hunt states that the season for oranges from St Michael's is finished, and those from Spain, Portugal, and Sicily are realising good rates. Lemons are in demand, with good supply. Barcelona nuts advancing in price; black Spanish nuts lower. French Walnuts without inquiry. West India coker nuts required.

Coker hurs required. DRY FRUIT.—Business in the market is very dull; but dealers are clearing their stocks rapidly, and all articles are firmly held. ENGLISH WOOL.—Very little business, and lower prices being taken. COLONIAL WOOL.—Market quiet. The public sales commence Tues-day, 28th inst.; about 234,000 bales have arrived. Prices unchanged. Error Market page dull.

FLAX.—Market very dull. HEMP.—Market for Russian is steady. Manila very dull. SEEDS.—The demand for seed has improved for most descriptions,

and prices have ruled firm.

SILK.—Market very depressed, and prices weaker. TOBACCO.—There is no change to report in the market for American tobacco, and the sales have been of a very limited character. The absence of fine classes has much interfered with the operations of buyers, who generally are desirous of supplying themselves with fair quality; what is offering of such quality is held for full prices. In In

substitutes and segar tobacco a large business has been done. METALS.—A moderate amount of business has been transacted this week. Copper has been dealt in daily, and notwithstanding advices of further heavy charters from Chili, there has been firmness in prices. Iron is in small demand. Tin has fluctuated greatly, advancing about 15l per ton, and again receding from 5l to 10l a ton in a few days. Spelter and lead are but little inquired for. Tin plates rather firmer prices.

#### METROPOLITAN CATTLE MARKET.

MONDAY, April 20.—The total imports of foreign stock into London last week consisted of 18,133 head. In the corresponding week last year we received 15,768; in 1872, 16,733; in 1871, 14,733; in 1870, 5,953; and in 1869, 12,632 head.

Depression has been the feature of the cattle trade to-day, and the tendency of prices has been in favour of buyers. Full average supplies of beasts have been on offer, and the condition of the home breeds has been good. Throughout the market has been in a dull state, and prices have generally ended 2d per 8 lbs lower. Occasionally the best Scots have made 5s 10d, but this figure has been quite exceptional, 5s 8d per 8 lbs being the more general ton quotation. From Norfolk, Suffolk. 8 lbs being the more general top quotation. From Norfolk, Suffolk, Essex, and Cambridgeshire we have received about 1,800, from other parts of England about 250, and from Scotland 110. The foreign side Essex, and Cantorlagesnira we have received about 1,500, the parts of England about 250, and from Scotland 110. The foreign side of the market has been only moderately supplied with beasts. There have been about 250 Dutch, 320 Gothenburg, and a few Spanish. Sales have progressed heavily at depressed currencies. The show of sheep has been good. Transactions have been on a limited scale, and forced sales have only been concluded on lower terms. The best downs and

#### THE ECONOMIST.

half-breds in the wool have made 6s 6d, and ditto clipped 5s 4d per 8 lbs. Lambs have changed hands at 7s 6d to 8s 6d per 8 lbs. The calf trade has been quiet, at about late rates.

#### THE ECONOMIST.

HUBBUCK'S PATENT WHITE ZINC PAINT Is the most durable and beautiful paint known, does not stain or discolour with the atmo-sphere of large towns, and by their process, which is patented, is cheaper than White Lead. It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an analgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zine Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

LIGHT DESE WORK. Each Cask of Pure White Zinc is stamped— "HUBBUCK'S, LONDON, PATENT." THOMAS HUBBUCK and SON, WHITE LEAD, OLL, PAINT, and VARNISH WORKS, 24 LIME STREET. "For public schools, and all rooms occupied by children there will now be no excuse for using poisonous paints. Parents have remarked that their children on returning from the country to newly-painted houses have suffered in hea'th. The reason is evident—the breath extracts the insidious poison from paint, and the langes fraw in the deadly vapour."—Journ BULL, September 14, 1850.

FURNISH YOUR HOUSE WITH THE BEST ARTICLES DEANE'S. A.D. 1700.

Any one can use them, and with-al pain. Price 10s 6d, sent carriage free.—ALEX. Ross, 248 High Holborn, London. Pamphlet sent for for stamps.

OLLOWAY'S OINTMENT AND HOLLOWAY'S OINTMENT AND PILLS effect wonderful cares of bad legs and old wonds. If these medicines be used according to the directions which are wrapped round each pot and box, there is ne wound, bad leg, or ulcerous sore, however obstinate, that will not yield to their curative properties. Thousands of persons who had beeu patients in hospitals without deriving the least benefit from the care of emi-ment surgeons, have been cured by Holloway's ointament and pills, after other remedies and treatment had signally failed. For glandular swellings, tamours, scuvy, and diseases of the skin, there is no medicine that can be used with so good an effect. Though potent for good, it is powerless for harm ; and though the cure effected is apild, it is also complete and permanent.

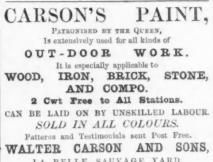

LONDON AND SAINT KATHARINE DOCKS COMPANY. The Directors are prepared to receive proposals of Loans on Debenture Bonds, bearing Interest at the rate of 4 per cent. per annum, for 5, or 7 years, to replace others which have to be paid off. This undertaking, which has the sanction and support of the Governor of the State of south Carolina and many of its chief citizens, is for the purpose of rehabilitating and hen ficially developing large freehold rice planka-tions and naval store timber tracts, thrown out of culti-vation by the late war.

vation by the late war. These lands are composed of rich alluvial soil of great depth, yearly renewed by the deposits brought down by the rivers, and thus made practically inexhaustible and independent of artificial manures; they are well known to be among the best rice pl-mations in the State. The value before the war, with clean rice at one-half its pre-sent price, was from 150 dols to 300 dols (£30 to £60) per acre, and their average production from 50 to 70 bushels per acre—a yi ld which created and yearly added to the great wealth of their proprietors, and which must be again equalled under renewed cultivation with fresh capital. The estates comprise an area of 36 total

fresh capital. The estates comprise an area of 36,666 acres of free-hold land, of which 10,113 acres are rice lands under bank, 8,700 acres rice land not under bank; 2,790 acres cleared upland for corn, cotton, &c., and 15,065 acres on which there are pine forests for rosin, turpentine, &c., besides much heavy timber, such as live oak, while oak, cedar, &c., invaluable for slipbuilding and other com-mercial purposes. Upon the estates there are 18 dwell-ings for managers and overseers, with all necessary out-buildings; about 200 labourers' cottages 30 barva, and many other buildings, together with ten steam threshing

In inviting subscriptions for the above hares, the Directors draw attention to the ve y cheering and sub-stantial success that has been realised upon the Com-pany's operations, and to the great a vantage of aro-viding capital as the sphere of its usefulness extends and is appreciated. Since its formation the Company has vaid to the shareholders two dividends at the rate of ten ar cent. Its present position is highly satisfactory, a d it is in consequence of the rapid increase of business that the Directors have resolved to provide additional capital, which they have every reason to believe can be more profitably employed.

profitably employed. Forms of appli ation, together with full prospectus and reports, will be forwarded on application to GODFREY A. TALLERMAN, Secretary.
