FUTURE

RELEASE

FOR RELEASE TO P.M.'s OF DECEMBER 5, 1945

JOINT ARMY - NAVY RELEASE

ARMY-NAVY "E" AWARD TERMINATION SEES
AWARD GRANTED TO 5% OF ELIGIBLE PLANTS

War workers in 4283 of the nation's top-flight war production facilities earned the Army-Navy "E" Award for their part in the defeat of the Axis Powers, it was announced today by the War and Navy Departments. This number includes the Navy "E" Awards made prior to July 1942 when the Navy "E", the Army "A" and the Army-Navy Munitions Board "Star" Awards were merged and became known as the Army-Navy "E" Award.

Representing only 5% of the estimated war plants in the nation, those plants meeting the stringent eligibility requirements ranged in size from a one-man plant to large corporations and included facilities that converted from peace to war production, as well as new plants built especially for war purposes. Both prime and subcontractors were eligible for and received the Award. Approximately 50% of the Awards went to plants having less than 500 employees, generally considered as "smaller war plants".

The Army-Navy "E" Award was granted only to facilities which were particularly outstanding in production for the War and Navy Departments. Excellence in quality and quantity of production were two of the determining factors in granting Awards. Others included: (a) overcoming of production obstacles; (b) low rate of absenteeism; (c) avoidance of work stoppages; (d) maintenance of fair labor standards; (e) training of additional labor forces; (f) effective management; (g) record on accidents, health, sanitation, and plant protection; (h) utilization of sub-contracting facilities; (i) cooperation between management and labor as it affected production; and (j) conservation of critical and strategic materials.

Nominations for the Army-Navy "E" Award were the responsibility of the Technical Services of Army Service Forces, the Army Air Forces, the Bureaus of the Navy Department, the Coast Guard, or the Marine Corps, whichever had the largest contractual interest in the plant. Thus, if the Army had the largest volume of business in the plant, it nominated the plant. If the Navy had the largest interest, it nominated the plant.

For the Army, the nomination originated with the field procurement officer in closest touch with the plant. Thus, the field procurement officer of the service having the largest contractual interest in the plant, such as the Ordnance Department, Chemical Warfare Service, or other technical service of the Army, or the Army Air Forces, recommended a plant for the Award. From the local inspector or District Office, this recommendation was forwarded to the Office of the Chief of the Service for review prior to submission to the Army Board for Production Awards.

The Navy followed a similar procedure. The cognizant inspector or supervisor, such as the Inspector of Naval Aircraft, the Inspector of Naval

Material, the Naval Inspector of Ordnance, or the Supervisor of Shipbuilding, initiated the recommendation which was forwarded to the appropriate Bureau of the Navy Department for further review prior to submission to the Navy Board for Production Awards. The action of either Board had to be concurred in by the other Board before an Award was granted.

The members of the Navy Board for Production Awards at the time of the termination of the Award program were: Admiral C. C. Bloch, U.S.N. (Retired), Chairman; Rear Admiral W. T. Cluverius, U.S.N. (Retired); Rear Admiral George H. Rock, (CC) U.S.N. (Retired); and Lieutenant James S. Copley, U.S.N.R., Secretary. The members of the Army Board for Production Awards were: Major General William H. Harrison, Chairman; Major General Edward M. Powers; Brigadier General Hugh C. Minton; Brigadier General Alexander G. Gillespie; Colonel Ralph F. Gow; Mr. Edward F. McGrady; and Lt. Colonel Robert B. Clark, Jr., Recorder.

Plants which maintained an outstanding record of performance for six months after receiving the original Army-Navy "E" Award were granted a Star Award, indicated by a white star on their "E" flag. Additional stars could be won by continued outstanding performance for succeeding six-month periods until the flag carried four stars, after which the interval was increased to one year.

Of the 4283 plants which were granted the Award, eight had won six Star Awards when the program ended. Four of these had retained their original Navy "E" Awards and were as follows: Cameron Iron Works, Houston, Texas; General Motors Corporation, Fisher Body Division, Die & Machine Unit, Detroit, Michigan; Midvale Company, Nicetown, (Philadelphia), Pennsylvania; and Northern Ordnance, Inc., Minneapolis, Minnesota. The other four, which had converted from the Navy "E" Award to the Army-Navy "E" Award, were as follows: Arma Corporation, Brooklyn, New York; Ford Instrument Company, Inc., Buildings 1, 2, 3, and 4, Long Island City, New York; Keuffel & Esser Company, Hoboken, New Jersey; and Miehle Printing Press and Manufacturing Company, Chicago, Illinois.

Of the remaining Awards, 763 had been granted one Star Award, 723 had been granted two Star Awards, 776 had been granted three Star Awards, 820 had been granted four Star Awards, and 206 had been granted five Star Awards.

The final Awards were granted at the August meetings of the Army and Navy Boards for Production Awards and both Boards have subsequently been dissolved.

Plants which have won the Award are at liberty to continue flying the Army-Navy "E" Award flag, and to make use of the Award insignia in their publicity and advertising, while their employees, entitled to receive Army-Navy "E" Award pins, may continue to wear them.

- END -

DISTRIBUTION: Aa, Af, B, D (Except Do), K, La, M, N, A&NPA.

ARMY-NAVY "E" AWARD WINNERS

This list includes all plants which won the Army-Navy "E" Award or the Navy "E" Award for outstanding production of war materials, but does not include plants whose Awards were withdrawn or cancelled.

The list is divided into two sections, the first, listing war production plants, and the second, listing war construction projects.

In those instances in which an Award includes the employees of another plant, this is indicated parenthetically under the listing of the original plant. In such cases, where the second plant is in another state, it is listed under that state with a cross reference to the original plant. Such a listing does not constitute a separate Award. For this reason, the number of plants given on this list will not conform with the official count given in the press release.

The number of Star (renewal) Awards made to a plant is listed at the right of the company listing.
