EAST, WEST, NORTH and SOUTH our position as MARKET GARDENERS SEEDSMAN is becoming larger each succeeding season, and now embraces more than 25,000 Planters through the country.

Our reputation has been built up by furnishing seeds of the best quality as to purity and germination, and we shall always endeavor to furnish THE BEST SEEDS that can be procured, and make prices as reasonable as possible.

We are in a position to furnish good seeds at as low figures as any reliable house. We can and will meet all prices made by any one offering goods of equal value with ours, but we have no ambition to compete with those offering inferior stocks.

PRICES—Subject to Change. On some lines of seeds prices are going to be high, such as Garden Beans, Seed Corn, Onion Sets, Etc.

Prices on Field Grass Seeds are very reasonable, quality is very fine.

This season we are very well supplied with nearly everything in the seed line and we will be as prompt as we can and try to have your order filled in a few days after receiving same, weather permitting.

We want to urge you to send your order in early; in doing this you will get first choice of the Best SEEDS we have as this will be the greatest planting year in the HISTORY OF THE UNITED STATES, and good seeds are going to be scarce and high. A great many planters of seeds did not know that we depended on foreign grown seeds for our best GARDENS and so we are going to be short, as we cannot get them now.

We grow a great many seeds we sell, as well as contract for same, and the seeds we sell you are FRESH and RELIABLE, TRUE TO NAME AND SURE TO GROW.

We guarantee our seed to please you and if when you receive the seeds you find that they are not True to name, and as we represent them to be, return same to us and we will refund your Money.

I remain,

Yours respectfully,

GENE HAYES.

ARTICHOKES

The New Large Jerusalem Variety, producing from 300 to 600 bushels per acre. An excellent food for hogs, cattle, sheep and milch cows; they are for the production of milk equal if not superior to bran. But their greatest value is food for hogs. Even the labor of feeding is avoided, as the hogs will help themselves if allowed to do so. We consider them the cheapest and healthiest hog food possible to raise, and find that where brood sows have free access to Artichokes they and their pigs invariably do well. Hogs will not only grow, but fatten on them.

Musk Melons - Cantaloupes

Grow "Honey Dew" Melons

The Sweetest Melon Ever Grown.

First introduced in the West in 1915, and is fast becoming a favorite.

The rind is a dull white when ripe. Part of the melons show slight checks in the rind like a tendency to net. This appears when the melon is ready to pick.

The size runs six to seven inches in diameter from top to bottom and eight inches in length. The matured melons are practically all the same.

The flesh is a rich green and very sweet. The melon is the best of all shippers and will be practically no loss from spoiled melons in shipping.

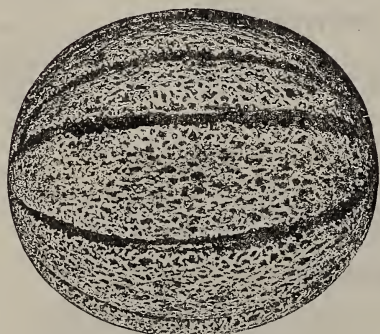

I recommend this melon to market growers.

The vines are vigorous and set six to ten melons to the hill and if proper care is taken to ship only ripe melons a fine market can be established.

My supply of seed is strictly right and grown from carefully selected stock seeds. Price, per pkt., 5c; oz., 15c; lb., \$1.50.

GOLDEN MEATED HONEY DEW.

Habits and growth same as above, only that the flesh is yellow, very sweet. Pkt., 10c; oz., 20c; lb., \$3.00.

ROCKY FORD.

GENUINE ROCKY FORD.

This new musk melon is similar to the oval strain of Netted Gem. The strain here offered originated with the melon growers in the vicinity of Rocky Ford, Colorado, who have shipped this melon from that distant Western point to Eastern markets. The melons grown by them are so fine in quality as to outsell all others, and the demand for such melons has been far beyond the supply. Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 25c; lb., 75c.

BURRELL'S GEM.

It has a thin, tough rind and is closely netted. The meat is of a reddish orange, very thick, fine grained and spicy. The seed cavity is unusually small. All these points combined make it a first class melon both for its good eating and fine shipping qualities. $\frac{1}{2}$ oz., 5c; oz., 10c; $\frac{1}{4}$ lb., 25c; lb., 75c.

JENNY LIND.

The earliest of the green fleshed sorts, and one of the sweetest. It is of flattened form, small size. $\frac{1}{4}$ oz., 5c; oz., 10c; $\frac{1}{4}$ lb., 25c; lb., \$1.00.

EMERALD GEM.

Excellent quality, is of medium size; skin ribbed, though perfectly smooth and of deep emerald green color. Flesh salmon color, thick, very juicy; flavor sweet and luscious. Melons mature extremely early. $\frac{1}{2}$ oz., 5c; oz., 10c; $\frac{1}{4}$ lb., 25c; lb., \$1.00.

HACKENSACK.

Green flesh. A large, round variety, flattened at both ends and well ribbed. $\frac{1}{2}$ oz., 5c; oz., 10c; $\frac{1}{4}$ lb., 25c; lb., \$1.00.

GENUINE BURRELL'S GEM.

MUSK MELONS (Continued)

OSAGE, OR MILLER'S CREAM.

A remarkably fine variety, and a very profitable sort for market gardeners, as it is fully established as a standard sort and will ever remain so. It is of medium size, oval in form, dark green in color, handsomely netted and slightly ribbed. The flesh is extremely and uniformly thick, of firm texture, rich salmon in color; highly flavored and delicious to the rind. Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 25c; lb., \$1.00.

BANANA.

An entirely distinct variety, bearing long, slender, banana-like fruit. Flesh deep salmon color, thick and of good quality. Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 25c; lb., \$1.00.

MONTREAL MARKET.

The Famous Forcing Musk Melon.

Giant, showy melons much used for exhibition purposes, weighing on an average 10 pounds and measuring 8 to 9 inches in diameter. They often, however, weigh 20 pounds each.

It is justly celebrated not only on account of its large size, but also its delicious melting flavor. They are of the green nutmeg type, almost round, heavily netted; deeply and regularly ribbed with thick, luscious flesh. Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 25c; lb., \$1.00.

MANGO MELON, OR VINE PEACH.

About the size of an orange, sometimes called "Orange Melon." Fine for sweet pickles or preserves. Pkt., 5c; oz., 15c.

GARDEN LEMON.

Similar in size and habit of growth to Mango Melon, but with sharper flavor. Pkt., 5c; oz., 15c.

CASABA, OR LEMON PERSIAN.

Long, oval shaped, skin very thin and delicate; flesh extremely tender, rich and sweet. Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 20c; lb., 75c.

PAUL ROSE.

A new sort, possessing several characteristics of the Osage; form slightly oblong, distinctly ribbed, slightly netted; color, when unripe a deep green, turning a golden tint; flesh salmon, and so thick as to show an unusually small seed cavity; flavor like Osage. Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 20c; lb., 75c.

TIP TOP.

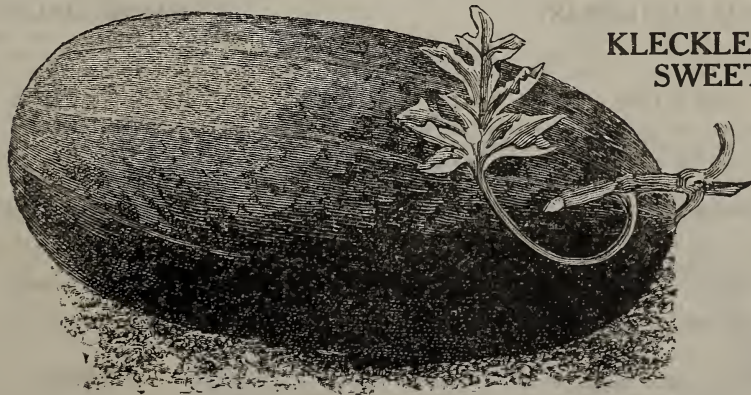

A new melon of recent introduction and very deserving. All who have tried it have pronounced it one of the finest. Flesh yellow and sweet. Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 25c; lb., \$1.00.

HOODOO.

A new melon with many good qualities. Its size is about that of the popular Rocky Ford, which appeals to the shipper, which the delicate flavor of the thick, red flesh should commend it to every private gardener. Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 25c; lb., \$1.00.

WATERMELON SEED OF QUALITY

KLECKLEY'S SWEET

Sweetest Watermelon in the world, large, oblongshape. Skin dark green; rind very thin and brittle; fully ripe melon will always split ahead of the knife. Flesh bright scarlet, sugary and melting in the highest degree. Heart is broad and solid. This melon is not a good shipper, but is the finest table variety for home market. We have the true genuine stock, which is very hard to obtain. Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 25c; $\frac{1}{2}$ lb., 40c; lb., 75c; postpaid.

Genuine Tom Watson Water Melon

WE HAVE THE BEST SEED YOU CAN GET.

No melon ever offered commands so high a price as the Genuine Tom Watson in the leading markets of the North. It finds a ready sale at from \$10 to \$25 per car more than other varieties; while less attractive kinds sit around on the tracks unsold.

We make a specialty of growing this melon for seed purposes and have a true strain of the Original TOM WATSON.

The melons from which we take our seed weigh from twenty to forty pounds or more.

The true type of this melon seed is buff, or a very light brown. A great many seed houses are sending out white seeds for the true strain of Tom Watson. This shows a degeneration of the melon and will not give you the results desired. Plant the true strain. We have it. Price, pkg., 5c; oz., 10c; ¼ lb., 25c; lb., 75c.

ALABAMA SWEET.

A large, dark-skinned melon, flesh red. One of the first to come into the market, being early and of strong growth and will bear longer than any other melon. It is a light seeded melon and first-class for shipping. Good size, though not ungainly. Largely raised in Texas, where it brings extra prices. Pkt., 5c; oz., 10c; ¼ lb., 20c; ½ lb., 35c; lb., 60c; postpaid.

Ohio

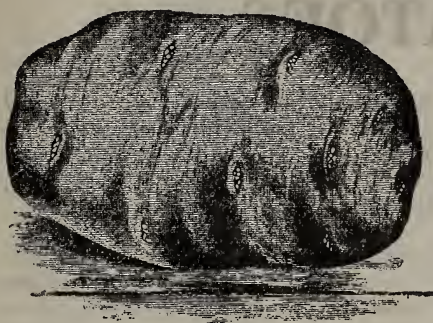

Seed Potatoes of Quality

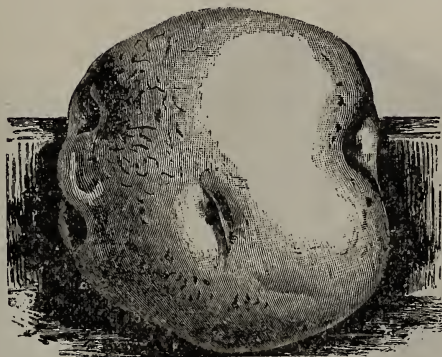

The Early Ohio is the leading potato in the West and is more generally planted than any other variety. It seems to be especially adapted for this section. Red River Early Ohios have given more general satisfaction to our customers than any other potato. Ready for market very early, heavy yielders, good keepers, and one of the finest table varieties. We guarantee our stock to be genuine Northern Red River Valley Grown.

No. 2 Medium Size Red River Ohio will be about 25c per bushel less than No. 1.

On receipt of our price send us your order, and we will ship soon as possible. All prices on potatoes are subject to change. Account of supply and demand good. Seed potatoes are scarce this season.

POTATOES (Continued)**EARLY SIX WEEKS.**

This remarkably early Potato is especially valuable to the market gardener, and for those with a small garden who grow for extra early Potatoes only. It is ready for use ten days ahead of the Early Ohio; of excellent quality; abundant bearers and a good keeper. In shape it is identical with the Early Ohio; color much lighter; skin very smooth, with few very shallow eyes. This should be planted largely and you will be well repaid with results.

**BLISS TRIUMPH POTATO.**

This is positively one of the earliest seed potatoes grown. Produces from 150 to 300 bushels of handsome potatoes per acre any and everywhere. Splendid for all states, especially South. Stock unusually fine this year, though scarce. It's an extremely popular early variety, Red River grower.

**GREEN MOUNTAIN.**

The illustration above shows exactly how it looks. The tubers run rather large with a thick skin, heavily netted, cream color rather than white. The color and the thick netting indicate fine cooking qualities. A Green Mountain is hard to beat for an eating potato, as it always cooks up dry and mealy and has a peculiarly fine flavor. The eyes are rather deep as compared with the Rural type varieties, but the quality is most excellent and then it is a very strong, vigorous grower and heavy yielder. Red River grown.

**PURE EARLY ROSE.**

The good old favorite, which continues in great popularity. A prolific yielder, sure cropper and popular market potato. Every farmer and gardener knows the good Early Rose and nothing more need to be said in its favor. The seed we offer is the purest and best that can be put on the market. Red River grown.

**IRISH COBBLER.**

It is a most excellent extra early variety, maturing good size tubers 7 weeks from the time of planting. It has also the remarkable characteristics of producing very few, if any, small potatoes, all the tubers being of remarkable size. The vines make short, upright growth, so that the hills may be only a short distance apart. Skin is clear and smooth, flesh is pure white and of excellent quality, always cooking very mealy. Red River grown.

SWEET POTATOES

SOUTHERN QUEENS.

We make a specialty of Sweet Potatoes, and have a fair supply to draw from, but they are going to be very scarce and high this season. When you are ready for them **WRITE US FOR PRICES.** WE CAN SAVE YOU MONEY ON THEM.

Buyers will please note that owing to the tenderness of Sweet Potatoes we do not guarantee the safe arrival of Sweet Potato Plants or Seed; however, we use all precautions necessary in packing and time of shipping.

THE NANCY HALL.

This potato was first introduced by us to our Northern growers 30 years ago, and is now rapidly taking the lead over all other varieties. The potato in color is a very pale pink (flesh color). The meat is a rich, sweet golden yellow when cooked, and is one of the best keepers now grown. Prices upon application.

TOWNSEND'S 75-DAY YELLOW DENT CORN.

This grand NEW variety of EXTRA EARLY YELLOW DENT CORN was first introduced in this locality (Shawnee Co., Kansas) by Mr. A. Townsend, one of our leading farmers and stockmen, and is fast becoming a favorite corn where early feed is required. The ears are of handsome appearance, bearing 12 to 14 rows of bright, rich yellow, smooth wedge-shaped kernels, packed closely on a small red cob, from butt to tip. The ears average 8 inches in length and are borne usually two on a stalk. Townsend's Extra Early Yellow Dent is without an equal in the fields of early corn.

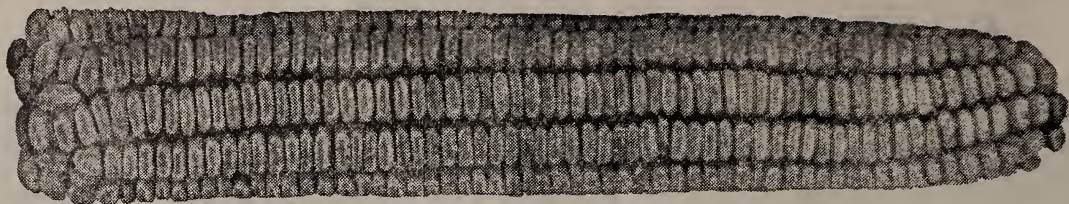

DIAMOND JOE'S BIG WHITE (EARLY).

was brought into our home county (Shawnee), six years ago from Iowa, and it has become thoroughly acclimated with our climate conditions.

DESCRIPTION:—Stalks are large, strong and robust, growing to a height of 8 to 12 feet, dependent upon the land; a great drouth resister; broad blades and many of them; ears 8 to 12 inches long and 7 to 8 inches in circumference; 16 to 20 rows, deep grains, solidly set on a medium size cob; cobs white, matures in about 100 days, every stalk producing one to three good ears. It is not only adapted to good, strong ground, but will do better and return large yields on old, poor, thin or hilly ground than any other variety in existence. In short, it is the embodiment of all the good qualities contained in all the best varieties. It's the sure thing—all we claim for it. Our seed stock of this corn is exceptionally fine this year (extra choice), having been grown from absolutely pure seed stock, and we have made a selection of the most choice ears, and hope to be able to fill every order promptly that comes to us this year.

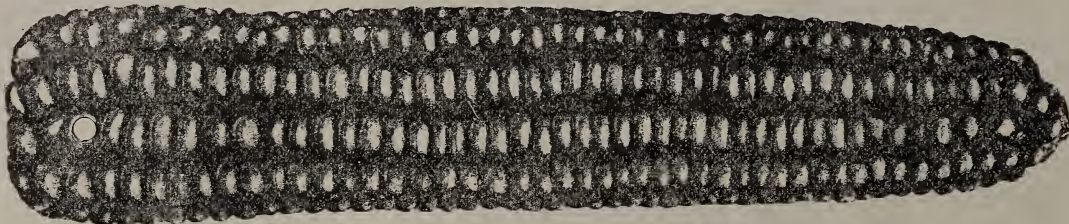

Prices and Samples on Application

GOLDEN BEAUTY.

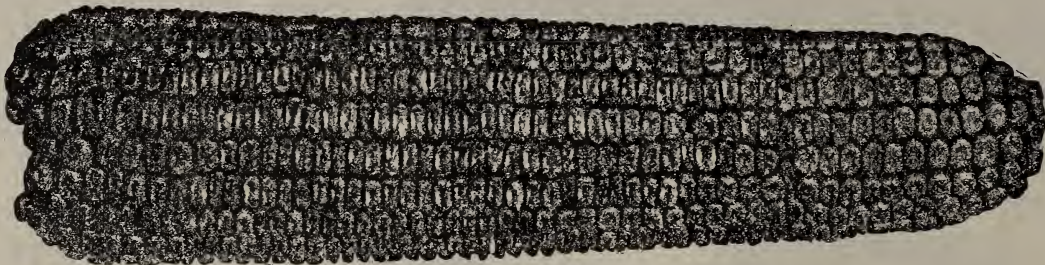

The ears are of perfect shape, with from ten to fourteen straight rows of bright golden yellow grain, remarkable in size and filled out completely to the extreme end of the cob. The richness of color and fine quality of grain make it vastly superior for grinding and feeding. Matures in 100 days. Write for prices.

BLOODY BUTCHER (White Cap).

This corn is much sought after by the farmer who finds it necessary to replant his corn in June or July. Is a good yielder, making as high as 65 bushels to the acre.

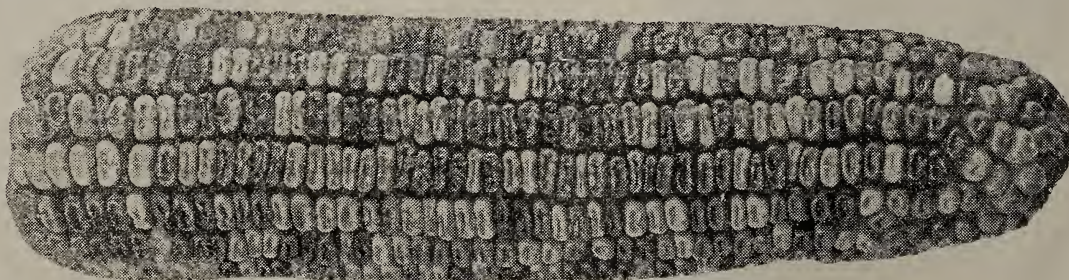

DESCRIPTION—Color deep cherry-red with white cap, generally 14 rows of pure red white cap corn on a small cob. Long, slender ears 10 to 12 inches. Stalks medium height, fairly heavy, grains always dented and sometimes rough. Matures in about 80 days. Write for prices.

CALICO OR STRAWBERRY CORN.

Old Fashioned Red, White and Yellow.

DESCRIPTION—This peculiarly colored corn is obtained by breeding together strong, vigorous red, white and yellow types of rich feeding stock, producing a kernel showing stripes of the three colors. Ears large, deep grain and small cob, 9 to 12 inches in length, and 7 to 8 inches in circumference. Matures in about 90 days. Write for prices.

IMPROVED INDIAN SQUAW CORN.

0 Holds more records for wonderful performances under difficult conditions than any corn ever grown. It has an extremely early variety, maturing in 85 days. Perhaps the most wonderful quality of this corn is its power to resist drouth, and it does equally as well in wet seasons. Ears large, 10 to 12 inches and two on every stalk. The kernels are of different colors. Blue pins and red and white, giving the ears a curious beautiful mottled appearance. Order early. We always sell out. Write for prices.

We Have the Best Seed Corn Grown

IOWA SILVER MINE.

DESCRIPTION—Silver Mine is deep grained, pure white, rough-topped, with a small white cob. This corn is a drouth resister. Frequently bearing two ears weighing 1 to 1½ pounds each. Matures in 100 days. Price, per single bushel, \$2.50, shelled and graded.
