UPWARDS OF ONE THOUSAND TESTIMONIALS RECEIVED.

PURE WARM AIR AS SUPPLIED TO

Truro Cathedral; Londonderry Cathedral; Sherborne Abbey; Kilmore Cathedral; Stanley Cathedral, Falkland Islands; Cardiff Catholic Cathedral; the Queen's School Chapel, Eton; Cork Asylum; Leicester Asylum; and to upwards of three thousand Places of Worship; and a great number of Mansions, Houses, Hotels, Hospitals, Schools, Warehouses, Factories, Workhouses; Cork Law Courts, etc., etc.

84, Brook Street, Grosvenor Square, W.; December 8, 1893.

Sir WILLIAM BROADBENT encloses cheque for the "GRUNDY" HEATING APPARATUS supplied to his house, and is glad to say that it has proved very satisfactory for warming and ventilating as required. The principle of the apparatus is most excellent.

To Mr. Grundy.

PROFESSOR TYNDALL writes:—

October 24, 1893; Hind Head House, Haslemere.

Dear Sir,—My house being so well provided with grates and flues for the generation and distribution of pure warm air, I have been thus enabled to spend my winters in England instead of on a foreign shore.—Yours very truly,

DR. GRIEVES says:

Buckhurst Manor, Wadhurst.

JOHN TYNDALL.

I have insisted upon my architect adopting the "GRUNDY" system of pure warm air for Heating and Ventilating Buckhurst Manor. I should not like my house warmed with any other method, for I like plenty of ventilation and do not approve of stagnant air.

Fever Hospital and House of Recovery, Cork Street, Dublin; October 26, 1894.

Dear Sir,—I have much pleasure in informing you that we have found your HEATING APPARATUS a great success in our new Epidemic Hospital, which consists of a two-storey building, each storey containing two large wards, a smaller isolation ward, and two nurses' rooms. It is easily managed, does not cost much for fuel, and the air entering is most pleasant, warm, and free from smell. It is with the full concurrence of the Managing Committee I give you this testimonial.—Yours faithfully,

Now Compiling.

PREFACE.

The Publishers have again to thank the Members of the Medical Profession for their assistance in the compilation of this, the Eighth edition of KELLY'S LONDON MEDICAL DIRECTORY. They have to acknowledge with thanks the receipt of many valuable hints and suggestions ; of some of which they have gladly availed themselves.

In the present volume, normal increase in bulk will be found ; this is, of course, partly due to the constantly increasing number in the ranks of the Medical Profession, but perhaps, to an even larger extent, to the greater fulness with which the contributions of individual members to medical literature are recorded. A number of new Societies, Publications and Institutions also find a place in the present issue, while the details given of many old ones have been amplified.

The Publishers again beg earnestly to invite the assistance of any who may detect errors, or may dissent from the description, or classification, of any Institution, Office, or Individual.

The University is ordained to consist of a Chancellor, a Vice-Chancellor, 36 Fellows, & "Convocation," or such of Graduates in Arts, Laws, Science, Medicine, Music & Literature as are of a certain standing and pay a small fee. Its functions are to examine persons who have attained a competent knowledge in any branch of learning (except Theology) & to confer academical honours & degrees. It is not a teaching body, & therefore no "residence" is required of candidates for Degrees. The Undergraduates are persons who have passed the Matriculation or the subsequent Intermediate Examinations. The Medical Degrees are Doctor of Medicine (M.D.), Bachelor of Medicine (M.B.), Master in Surgery (M.S.) & Bachelor of Surgery (B.S.). For Degree in Medicine (the M.B.) every candidate shall be required:—(1) To have passed the Matriculation Examination not less than five years previously; the Examination is held twice yearly, beginning on the second Monday in January & on the second Monday in June. (2) To have passed the Preliminary Scientific Examination of this University not less than four years previously: this is held twice yearly: for Pass & Honours, beginning on the third Monday in July; for Pass only, beginning on the third Monday in January. (3) To have passed the Intermediate Examination in Medicine two years after passing the Preliminary Scientific: the Intermediate Examination is held twice yearly: for Pass & Honours, beginning on the second Monday in July; for Pass only, beginning on the third Monday in January. (4) To pass the Final Examination in Medicine: the candidate may present himself two years after passing the Intermediate: the Final Examination in Medicine now also takes place twice yearly: for Pass & Honours, beginning on the last Monday in October, & for Pass only, beginning on the first Monday in May. These & all other examinations are open to Women on precisely the same conditions as to Men.

Communications should be addressed to "THE REGISTRAR, University of London, Burlington Gardens, W.," from whom copies of the Regulations for the Examinations may be obtained.

The University Calendar is published in two parts early in April of each year & may be obtained of Messrs. Eyre & Spottiswoode, East Harding Street, E.C.—Price 4s.

IN consequence of the great success of the Dental School and the large increase in the number of Students and Patients, the Governors of the Hospital have erected a new model Building, which satisfies all modern requirements. **THE CONSERVATION ROOM**, on the second floor, is well lighted by numerous windows facing the North-East, and the roof is largely composed of glass. It contains 50 Morrison Operating Chairs, which are in daily use.

THE DENTAL LABORATORY, on the first floor, which is in charge of a skilled Mechanic, who is in constant attendance, is used for the instruction of Students in making Dentures & Mechanical Appliances, which are supplied only to cases within the Hospital. *No charge whatever is made for work done in the Laboratory.*

PRIZES are awarded annually. For First Year's Students a Prize of £10, for Second Year's Students Prizes of £15 and £10, the latter being given for Operative Dental Surgery.

An open **ENTRANCE SCHOLARSHIP IN ARTS**, of the value of £30, will be offered for competition in September, 1896.

Dental Students may join the **STUDENTS' CLUB**, which includes Reading Rooms, and a large Dining Hall, where refreshments may be obtained by Members at moderate charges.

A RESIDENTIAL COLLEGE has been built near to the Hospital, with rooms to accommodate about sixty students, and the rents are reasonable.

AMONGST THE ADVANTAGES PECULIAR TO THIS SCHOOL ARE THE FOLLOWING: 1.—All the special and general lectures can be attended and the practical work done at one Hospital. 2.—All the lectures and demonstrations are given between 9 a.m. and 5.30 p.m. 3.—Beds are provided in the Hospital for the reception of patients suffering from fractures and diseases of the jaws. 4.—The number of poor patients is practically unlimited, as no cards of admission are necessary. 5.—A Residential College and a Students' Club are attached to the Hospital.

For the Prospectus of the School, containing full particulars as to fees, course of study advised, regulations of the Residential College, &c., apply personally or by letter to the

DEGREES IN MEDICINE, SURGERY AND HYGIENE, AND DIPLOMA IN PUBLIC HEALTH.—One Diploma and six Degrees are conferred by the University of Durham—viz., Diploma in Public Health and the Degrees of Bachelor in Medicine, Doctor in Medicine, Bachelor in Surgery, Master in Surgery, Bachelor in Hygiene and Doctor in Hygiene.

Attendance at the University of Durham College of Medicine during one of the five years of professional study, or subsequently to qualification elsewhere, is required as part of the curriculum, for the Degrees, except in the case of Practitioners of more than fifteen years' standing, who have attained the age of forty years, who can obtain the Degree after examination only.

The first two Examinations for the Degree of M.B. may be passed prior to the commencement of attendance at Newcastle.

A candidate who has a recognized qualification, or who has passed the First Examination of the Conjoint Board in England of the Royal College of Physicians of London and the Royal College of Surgeons of England, will be exempt from the First Examination of the University of Durham, except in the subjects of Chemistry and Physics, in which he will be examined.

A Candidate who has passed the First and Second Examinations of the University will be exempt from the First and Second Examinations of the Conjoint Board in England, and will be entitled to present himself for the Final Examination of the Board on the completion of the necessary curriculum.

The Extra Arts Examination must be passed previously to the Candidate's entry for his Final Examination for the Degree.

All information, together with Examination Papers, &c., is given in the Calendar of the University of Durham College of Medicine, Newcastle-upon-Tyne, or may be obtained from the Secretary at the College.

Scholarships, &c.—A University of Durham Scholarship, value £100, for proficiency in Arts awarded annually to full Students in their first year only. The Dickinson Scholarship—value, the interest of £400 and a Gold Medal—for Medicine, Surgery, Midwifery, and Pathology. The Tulloch Scholarship—value, the interest of £400—for Anatomy, Physiology, and Chemistry. The Charlton Scholarship—value, the interest of £700—for Medicine. The Gibb Scholarship—value, the interest of £500—for Pathology. The Goyder Memorial Scholarship (at the Infirmary)—value, the interest of £325—for Clinical Medicine and Clinical Surgery. The Luke Armstrong Scholarship, interest on £680, and the Stephen Scott Scholarship, interest on £1,000. Heath Scholarship—The late George Yeoman Heath, M.D., M.B., D.C.L., F.R.C.S., President of the University of Durham College of Medicine, has bequeathed the sum of £4,000 to found a Scholarship in Surgery, the interest to be awarded every second year. Gibson Prize—value, the interest of £225—for Midwifery and Diseases of Women and Children. At the end of each Session a Prize of Books and Honours Certificates are awarded in each of the regular Classes. Assistant Demonstrators of Anatomy, Prosectors, and Assistant Physiologists are elected yearly. Pathological Assistants, Assistants to the Dental Surgeon, Assistants in the Eye Department, Clinical Clerks, and Dressers are appointed every three months.

The Royal Infirmary contains 280 beds. Clinical Lectures are delivered by the Physicians and Surgeons in rotation. Pathological Demonstrations are given as opportunity offers by the Pathologist. Practical Midwifery can be studied at the Newcastle Lying-in Hospital, where there is an Out-door Practice of about 500 cases annually.

Society for Training Teachers of the Deaf, and Diffusion of the "German" System.

FOUNDED 1876. INCORPORATED 1886.

PRESIDENT—HIS GRACE THE ARCHBISHOP OF CANTERBURY.

The "German" or Pure Oral System teaches spoken and written language to the Deaf and "Dumb." It dispenses entirely with signs and the finger alphabet, and with the necessity in after-life of using pencil and tablets. Lip-reading taught to persons becoming deaf in adult life.

The Training College and School of the Society is situated at Castlebar Hill, Ealing, Middlesex.

Applications for the admission of Students and Pupils should be addressed to

Mrs. ARTHUR KINSEY, *Lady Superintendent & Secretary.* (6).

QUERIES WHICH HAVE REFERENCE TO THE TRUE PRINCIPLES OF SCIENTIFIC DISINFECTION.

- 1.—Whether the best safeguard to the Contraction of Disease is a condition of Cleanliness?
- 2.—Whether wherever there is dirt or foulness of any kind, a condition favourable to the propagation of low germ life that generates disease must exist?
- 3.—Whether a System of Baking dirt into infected articles of Bedding or Clothing is a satisfactory and effectual mode of disinfection?
- 4.—Whether a System of Baking or Steaming articles packed closely in Bales or Bags can recommend itself to any Sanitary Authority?
- 5.—Whether mere cheapness is sound economy where Safety to the Public Health is involved?
- 6.—Whether it is not more economical in the long run to employ ARMFIELD AND SONS' perfect system of Disinfection and Purification, which not only destroys all disease germs but also cleanses the goods of all dirt, and returns them to the owner in a condition of absolute purity ready for immediate use, affording the maximum of comfort and best safeguard against further illness?

Every article is submitted to 40 lbs. (288° Fahrenheit) High Pressure Steam, afterwards cleaned and in case of Bedding re-made equal to new, allowing for actual wear.

THE annexed engravings illustrate our latest and greatest improvements in Artificial Legs for Amputation *Above and Below the Knee.*

These Limbs can be specially recommended for their great strength and durability. The joints are so constructed, that they act with mathematical precision, and are calculated to wear twice as long as any other kind without repairs.

The new Patent Adjustable Tendon will be found a great boon to wearers who have been inconvenienced by the stretching of the Tendons. By the use of this invention anyone can, in a few moments, regulate the length of the Tendon so that a high-heeled boot can be worn as easily and comfortably as a slipper.
