

The image is an abstract geometric composition. It features a teal background in the upper left and lower right. A large black shape dominates the center and right, with several white, angular, paper-like shapes layered on top. One large white shape is on the left, and another is on the right, both appearing to be cutouts or folded paper. The text 'Techmila 1988' is printed in white on the teal background.

Techmila 1988

Similar to the way many RIT students have felt about this school, this year's cover for *Techmila* depicts the school as a cold and harsh, overbearing and downright inhumanistic place to live and work. However, you should not judge this book or the Institution by this cover. Look inside and see the various clubs, greeks, sports, and events which went into making many students' academic and social lives.

As the cover represents one perspective and outlook for the school, we at *Techmila* hope the inside and its contents bring out another. One of enjoyment and appreciation.

### Editor's Note

The yearbook is here! !! The year, the seniors, and I are now RIT's past. I've seen many years go by and many senior classes leave, but I just could not face the reality that this year I was part of the senior class that was graduating. What I consider some of the best years of my life, have come to a close. RIT has given a part of itself to me to remember for the rest of my life. The 1988 Techmila is a part of me that will always be with RIT. Good-bye RIT.

# Halloween

Stuck

Huth

RIT clubs and organizations co-sponsored a monstrous party at the College Union on October 31st. As students entered the Union on Halloween night, they were grabbed by the haunted dance music which filled the dreary air of the union. BACC (Black Awareness Coordinating Committee), one of the contributing clubs, created the haunted house effect in the Clark Dining Room. Students entered the dark filled room unaware of the dangers that awaited them. They were sprayed with water guns, grabbed by the legs, and nearly scared to death by distorted images from under the many tables that mazed the place. The party caught the attention of many RIT students who went out of their way to create "the most original costume," and original they were. To accentuate the party, magician Jim Bush performed a variety of tricks in the Fireside Lounge, and a costume appraisal committee composed the wonderful souls of faculty members, haunted students for a chance to look at their costumes firsthand. The Goulsh gathering concluded with gruesome goblins, male nuns, Freddy Kruger, Elvira, and comic book heroes disappearing into the night to haunt unsuspecting RIT students. Also to celebrate Halloween, 70 RIT student volunteers helped to clean the historic Mt. Hope Cemetery. The event, sponsored by the Community Services in Rochester, was conveniently titled the "Grateful Dead" project. Students fixed damaged headstones, cleaned up broken tree limbs, and also raked leaves.

# Christmas

And you thought Rochester's wintery weather got on everyone's nerves, wrong you were! For RIT students, special activities were conducted to keep the early draft of home sickness from the overcoming them. Volunteers from Alpha Xi Delta sorority and Phi Sigma Kappa fraternity were transformed into elves in Santa's workshop, located in the Complementary Education office. From here they answered telephone calls from over 1,000 Rochester children who called and talked to the elves about the spirit of Christmas. The Ellingson-Peterson-Bell area government hosted a holiday event for the underprivileged children and their families from the Charles Settlement House in Rochester. A buffet dinner for 1,000 people was given in their honor at the CU Dining Room, after which the children and their families decorated the Fireside Lounge Christmas Tree with homemade ornaments. The event was highlighted by a visit from Santa Claus, who sat with the children and gave each of them a special gift. The party ended with everyone singing Christmas carols, led by the EPB representatives. The College of Liberal Arts sponsored a holiday concert featuring the RIT Singers, the RIT Thursday Afternoon Consort and the RIT Men's Octet. Performances were directed by Ed Schell, while the RIT Philharmonic was led by Charles Warren.

# Dennis Miller

The light's went down and the audience began to chant for Miller; Dennis Miller. Students rocked to the funky, mellow sounds of "Inside Out" while eagerly awaiting Miller's entrance. Miller, the Saturday Night Live comedian, found it thrilling and interesting to have an interpreter present at the show. With her help, he began teaching the audience the type of sign language they never learned at home or in class.

Torrents of laughter echoed against the gymnasium walls during the hour and a half long show. Miller kept spectators on the verge of demise with his bombardments on southern intelligence, advertising holy people and holy socks. His show was fantastic, students really enjoyed the crazy act. One thing was made clear during Miller's press conference, when in college he shared the same conflicts most college students presently face, disinterest. When asked "how he spent his college years?" he answered, "Disinterested...I was rather apathetic about college because I wanted to go into comedy right away. It's right for some people and not for others."

## WAYNE COTTER

Nisely

## YOUSUF KARSH

Strong

## JILL FREEDMAN

Huth

The College Activities Board, sponsored comedian Wayne Cotter who has performed on The David Letterman Show, and is now up for an award in recognition of his talent.

The event was held in the college union cafeteria and proved to be very successful. Many students enjoyed this new twist in entertainment on the RIT campus. Cotter's performance attracted a large crowd. Student Ilene Gross commented, "We had a lot of fun that night," which summarized the feelings of many who attended.

The portrait photographer Yousef Karsh, who was this year's speaker for the William A. Reedy Memorial Lecture Series, inspired the audience with a look at his most famous subjects. Karsh told his captivated listeners that the one secret of getting accurate portraits is in pre-preparation; learning everything you can about the subject. He then urged aspiring photographers to go beyond the technical knowledge, and become students of humanities, stating that "The heart and mind are the true lens of the camera". Karsh feels that a photographer should have a personal relationship with his subjects.

Armenian born and now residing in Canada, he has been recognized through numerous awards and medals including the Canada Council Medal, the medal of service of the order of Canada and the Centennial Medal. He is also an Honorary Fellow of the Royal Photographic Society of Great Britain and a member of the Royal Canadian Academy of Arts.

After sharing anecdotes and slides of his experiences; Karsh confessed that even after 50 years, he is still in awe of photography. "I take nothing for granted," he said, because for him, photography is an act of pleasure.

Speaking to second year photo-illustration students, Jill Freedman, a respected documentary photographer showed slides of her work and also conducted a seminar for interested students. Working out of New York City, her photos have been introduced to permanent collections in the Museum of Modern Art, International Center of Photography, Eastman House, Smithsonian Institution, and others. She has published five books to date including her most recent *A Time That Was* in which she tries to capture the spirit of Ireland. A very animated speaker, Freedman made a point of saying that a photographer should understand what he or she is shooting, otherwise it's just pictures. The seminar and lecture proved to be very fun and informative.

# Birthdays

## 75th Anniversary Co-Op and Placement Office

RIT celebrated the 75th anniversary of its Cooperative Education Program in 1987. The paid, full-time experience which enhances classroom instruction is one reason RIT is one of the highest rated schools both by the New York Times and U.S. News and World Report. Of the 1,300 companies currently involved in co-op, five were among the original group which first offered students employment 75 years ago. Today fifty-nine programs allow students in every major to combine classroom learning with job experience. This makes RIT the fifth largest co-op in the world. The RIT Cooperative Education Program has brought fame to the school, and it has served as a model for other colleges and universities to emulate. Its continual growth and success reflects a commitment on behalf of program administrators to make co-op a positive experience for the students and employers.

Miller

## 75th Anniversary Alumni Association

The RIT Alumni Association celebrated its 75th Anniversary this fall with a variety of activities, acknowledging the impact of the Institute's more than 50,000 alumni. Festivities included a Sports Hall of Fame Reception and Dinner held on Thursday, November 5th and on the following day, three different class reunion receptions preceded the RIT Hockey Tournament. On Saturday there was an anniversary luncheon, where the alumni awards were presented. And to wind up the weekend was a tour of the downtown campus, followed by lunch at the Past Time.

## 50th Anniversary School of Printing

What started as a small training program housing 15 linotype machines and a couple of presses has grown into the internationally recognized RIT School of Printing and Management Sciences. Nineteen-eighty-seven marks the School's 50th Anniversary. A year long series of commemorative events began with a major celebration on November 5th and 6th. Noted British author and journalist James Burke delivered a speech entitled "Mechanism of Change: Do Lemons Whistle?", in which he observed that the graphic arts industry's involvement with new technology puts it in position to shape the future as expressed by his statement that "The communication of information seems to be the prime factor in the historical mechanism of change." Digital type design expert Charles Bigelow spoke at the annual Frederic W. Goudy Distinguished Lecture in Typography. Also planned to honor the anniversary was the release of a 500 page book on the history of the School of Printing written by Professor Emeritus Alexander Lawson. The anniversary activities will culminate in a major educational exposition on the imaging arts and sciences, known as Stratagem in November of 1988.

"An  
Is this a quote from the Surgeon General advising methods to lessen the AIDS epidemic? No, these are words from a doctor of a another sort. A doctor who is also a world renowned writer, radio personality, and television star. This of course can only be a description of Dr. Ruth Westheimer.

Through the coordination of the Student Directorate at RIT, the students of this campus were given the chance to see this incredible woman up-close in person. Dr. Ruth's hour and a half presentation attracted an audience that filled Ingle auditorium.

From the moment the four foot, eleven inch Doctor stepped onto the stage, the show was hers. Because of her diminutive size, it was necessary to build her a small stepping block so she would be able to reach the microphone. Dr. Ruth's open and humorous approach to sex creates an instant rapport with all of her audiences. The students at RIT were no exception. Many people eagerly questioned the Doctor or wrote down anonymous concerns that were later asked by the host. Dr. Ruth has mastered the use of a story-telling teaching method and uses it in her public speaking. Each answer at this presentation was a new adventure into her life or the lives of people similar to ourselves. It was easy and entertaining to identify with the characters and remember the lessons of Dr. Ruth.

She participated in an autograph session directly after her show. The entire evening with Dr. Ruth was an enjoyable event that the students of RIT will not soon forget.

# Vegas Night

Cards are shuffled, dice rolled, and excitement builds. The thrill of gambling runs through everyone. Jazz music plays in the background as fortunes are won and lost. This was the 5th Annual Vegas Night, sponsored by the Residence Halls Associations. The evening started with a presentation by professional Card Shark, Darwin Ortiz. The attractive door prizes that were offered along with a VCR as a jackpot, captured the attention of all who stacked their winnings. In the end though, everyone was a winner, in the past the proceeds of the night have gone for improvements on the campus and programs for the students. This year all of the proceeds were donated to the future Campus Life Center.

# Ray Boston's Beach Party

Nisely

Golfing, tanning, swimming, eating ice cream and dancing, all in one place during a Rochester winter?!? CAB made it possible in February with Ray Boston's Summertime Beach Party in the CU cafeteria. Ray Boston's one man act, conducted from the top of a life-guard chair, had all the students in attendance participating in making alligator jaws with their arms and unicorn horns on their foreheads. The evening

began at a quick pace by "Walking Like an Egyptian" followed by "Twisting and Shouting" in which the sun lovers, the water babies and golfers all joined in the dancing. One student summed up the party succinctly, "It was so appropriate to have ice cream in the dead of winter, at a beach party in the middle of the CU." The paradox of the occasion so captured the imagination that CAB hopes to make it an annual event at RIT.

RIT's seventh annual Love Day was celebrated this year on the Tuesday before Valentines day.

To begin the activities, nearly 140 RIT volunteers joined Joeann Humbert, Community Services coordinator, in the Fireside Lounge. Students from the Fyle Elementary school in Henrietta, and the George Mather Forbes school No.4, were divided into groups to participate in chosen activities. This year's activities included juggling instruction, tours of campus buildings, cookie baking, sign language games, photograph developing, and t-shirt design.

After a fun-filled hour, all the groups rejoined in the Fireside Lounge to share experiences, write on the graffiti board, and enjoy snacks provided by Tau Kappa Epsilon(TKE) fraternity.

Love Day is helpful to the Rochester community, and provides fun and enjoyment for both the children and the RIT volunteers.

Do you think WITR is run by people with fifteen earrings and purple hair summoning strange technopop squeaks from the speakers? Well, WITR is much more than that.

WITR radio represents what is perhaps one of the most unique qualities of RIT. On any typical day, ten thousand people tune into WITR from somewhere within its 40-mile broadcasting range. The music they hear comes from the 30,000 record library ranging from classic rock to new wave. One of the more popular shows on WITR, “Reggae Sounds” aside from being the only one here on in Rochester, is one of the longest-running reggae shows in the country. Presently the station is in the process of completely revamping the largest of its studios to handle the most immense of tasks, such as mastering, mixing, and live broadcasting.

The former program director, Bart Connelly, describes WITR in his own words. “What we try to do here at WITR is give people an idea of just how much music is out there. We haven’t forgotten the old classics, but they will not be played every hour. WITR is a station that has to be listened to actively. If you don’t like what you hear now, tune back in about five minutes and you might hear something you like.” WITR is proud to be voted “Radio station of the Year” for 1988, in the first annual Idols Awards.

# Spring Jam

RIT celebrated its last academic Saturday before exam week with panache. Side by side with the Farewell to RIT posters was another equally attractive message, "The Jamming Continues." And that was precisely what happened at the Off Campus Students Association sponsored "Spring Jam" on the Racquet Club lawn. Held along side with Farewell to RIT this was the off-campus answer to the binge on-campus.

A study break for many, a spring celebration for the others. The Racquet Club lawns were full of revelers, of good music played by three bands, of refreshing drinks piped out from a truck, of hot dogs and hamburgers, and of sun. For those not inclined to dance and mingle, there was frisbee and mud sliding, or the staple leisure activity on a beautiful sunny day — sun-worshipping.

Photos by Scott Saldinger

# Food Service

## Of Cabbages and Kings....

Of the memories and images of RIT, in the mind of every student, a niche is reserved in particular for Grace Watson Dining Hall or simply put, "Gracies." The food and the environment of Gracie's is unique up front as well as behind the scenes where the meals are prepared. The Gracie's employee upon graduation leaves with a mixed bag of memories. Since Gracie's does not refuse employment, many expenses linger in the minds of many RIT students, whether they may be free-spending freshman or tuition paying seniors. From 6:00 in the morning to 8:00 in the evening when the last mop and pail are put away, there is an unending flow of activity in the kitchens. Over the baking of pizzas, the grilling of burgers, and the chopping of salads, friendships are formed, romances are nurtured and classes are critiqued. It is a sobering as well as an enlightening realization that our digestive mechanisms, to a large extent are subject to the culinary expertise of computer scientists, printers, photographers, designers and engineers. Though the food may not rival in taste to momma's cooking, it sure can rival in intelligence.

all photos by Nisely

Spring Break 1988 in the Bahamas, RIT was there. On February 26th, RIT students were on the beach in Nassau, Bahamas to start a week of fun in the sun. Many students spent the entire week tanning on the white sand beaches and dancing in the numerous disco night spots. Other Spring Break activities included beach parties, banana boat rides, booze cruises, and shopping at the straw market. Everyone who went to the Bahamas got the chance to enjoy the change of culture. From the first moments off the plane, RIT students came to realize that though there was no time difference between snowy Rochester, the native Bahamians had their own way of keeping time: Bahamas Time. Everyone in the Bahamas is on Bahamas time, no deadlines, no rushes (unless in a taxi or jitney), and no cares. The concept of Bahamas time was just what RIT students needed for a Spring Break atmosphere.

# Farewell To RIT

Saldinger

DeMaria

Stuck

Stuck

Let your hair down, immerse yourself in the RIT spirit, and participate in the merrymaking, whether for the first or last time in bidding good-bye to RIT for 1987-88, at Phi Sig's Farewell to RIT. The eleven year old bash, organized one week before examinations has become part of the RIT tradition and accepted as the final binge on the RIT social calendar.

The dormitory complex comes alive to a new beat as freshmen, sophomores, juniors, and seniors, transcending all divisions and differences, join in the togetherness of parting — enmities forgotten, friendships reinforced and new ones forged, keeping in mind the coming year.

The ethos of Farewell to RIT lies not only in its timing but in its mood and composition. The atmosphere is scented with the feeling of nostalgia, of a year spent in the environs and an opportunity for one last splurge to indulge in the craziest of activities, whether it be eating goldfish or pieing the Vice President of Student Affairs. It is the time, it is the moment, it is the feeling to clean off the dross, banish regrets, fulfill incomplete desires, and unwind the spring that keeps us going through three strenuous quarters.

Stuck

Stuck

Friday was rainy, muggy and gloomy. Saturday was great. The afternoon was ideal for the picnic atmosphere that characterizes Farewell. All the other elements of a picnic were equally present in large doses — Food (lots of it), Drinks (non-alcoholic and alcoholic, for those who were legal), and Live Music (Cabo Frio). Activities were abounding whether it be the tug-of-war for the hardy, keg tossing for the adventurous, or softball pitching for the venturesome (supervised by the ever vigilant and accurate Campus Safety radar).

The Phi Sigs recorded another organizational success while the students posted up another participational victory, whose monetary benefits were reaped for the Strong Memorial Outpatient Children's Fund.

Alpha Sigma Alpha is a diversified house that has accomplished much throughout the years. During the 1987-88 academic year we again held our annual philanthropic events, including the one-hundred hour teeter-totter marathon. Two other events we held include our daffodil sale and the date auction. All proceeds from these activities go directly to various charities.

Our chapter, Gamma Iota's four main goals are physical, intellectual, social, and spiritual development. These are of the utmost importance to us. Although these aims are a priority, we also take time to have fun together. Most important to us are the friendships that are cultivated during our four years of college. We know these friendships will keep us sisters for a lifetime.

Alpha Sigma Theta is one of the two hearing impaired sororities on the R. I. T. campus. It was founded in 1984 by fourteen women who helped offer leadership, community services, social activities to any interested women. Since then the sorority has recruited a variety of girls who have each contributed to Alpha Sigma Theta in a unique way. Now AST has about eighty sisters including alumni.

Alpha Sigma Theta can be recognized by the various activities they gave during the year, such as the Mr. Fraternity contest, which is an event to raise money for donations to Cystic Fibrosis. They also hosted the annual Valentine party and costume party with Delta Sigma Phi.

Blind Volleyball is an AST event hosted to challenge the greatest volleyball players to play against other teams. Some of the sisters helped with the Heart Foundation Association. Before Christmas AST got together with Delta Zeta of the University of Rochester to expand our knowledge of other sororities.

Alpha Sigma Theta will continue to support community service and social events, as well as providing opportunities for young women to join Alpha Sigma Theta.

# Alpha Xi Delta

The sisters of the Delta Lambda chapter of Alpha Xi Delta feel that our personal developments and the chapter achievements have increased during the 1987-1988 school year. We feel that our growth gave us a stronger feeling of sisterhood and is preparing us for life after graduation.

Throughout the year we had many educational programs and activities that the entire house participated in. We had a fun-filled parents weekend that included a cocktail party, dinner at Jim Rund's and a Mother's Ceremony. We had a Christmas Party that was visited by Santa Claus. We had socials with other fraternities and sororities at RIT and the University of Rochester. Our major activities for education included an open forum with Fred Smith, Vice President of Student Affairs, an alcohol awareness program and a movie night program where we watched such movies as Ordinary People and Kramer vs. Kramer.

Our philanthropy projects were great fun and included such endeavors as Grateful Dead, which was the clean-up of Mt. Hope Cemetery and raising money for our National Philanthropy the American Lung Association with our "Best Set of Lungs" Contest.

The sisters of Alpha Xi have had a great year and we are anticipating a productive 1988-89 school year.

Delta Alpha Sigma was first established as a local sorority in 1981. Inside Delta Sigma Alpha, we offer opportunities for young women to build strong character and social, intellectual, physical and spiritual development. Our sisters are also encouraged to get involved in activities ranging from NTID Student Congress, sports, and professional clubs in the RIT/NTID community. One of our goals is to help bridge the gap between the hearing and deaf communities. We hosted the biannual Playboy Club Ball with the brothers of Sigma Kappa Tau. In the fall we participated in Bowl for Kid's Sake in which we earned the highest amount of money on the RIT campus. Our sorority also hosted a big party for the Writer Olympics called "The Earlybird Open Ceremony." Both of the events were a great success. We have consistently volunteered for the Hillside Children's Center. We were honored at the Greek Council Banquet with two awards, for the highest overall G.P.A. in an RIT sorority and for community service.

Delta Sigma Phi is a transformed fraternity composed of hearing-impaired students who were originally known as Zeta Pi Mu. Our goals are to fulfill college life and to integrate into the Greek community. We were established as a chapter on May 9, 1987.

At the present time we have forty-six active brothers on campus and we are growing rapidly. Academics is our top priority, along with leadership and athletics, and of course what no one can manage without...the social life!

At the fall of 1987 National convention, we won two awards for donations to help the March of Dimes fund. Social events of the year include our annual "Funky Punky Party" with Delta Alpha Sigma. We are enthusiastically involved with Greek Week, happy hour, and sports to improve the relationship between hearing and hearing-impaired students.

# Phi Delta Theta

Phi Delta Theta's New York Eta Chapter began its second full year of existence with strong surges of growth. The brothers worked to establish the chapter firmly in RIT's Greek system and to develop as a strong chapter within Phi Delta Theta, one of the three most prestigious national fraternities in the world.

Led by the president Steve Knopfke, internal restructuring of the organization was coupled with renovations of the house. The energized group produced results highlighted by a beautiful new bar and a totally new library/chapter room. In the Greek community the chapter established scholarship programs to promote sound learning. They made strong showings in all sports and in Greek Week, including champion-like performances in volleyball and floor hockey, and a victory in the house skit competition. The chapter also saw Bob Gram become Greek Council Vice-President. The social scene saw the return of "The Friday Night Tradition" of weekly parties. Celebration highlighted the kick off of the chapter's alumni newsletter and the establishment of an alumni club. A weekend long celebration heralded their founders day and second anniversary on February 7th.

The brothers participated in and sponsored events benefitting the United Way, Communities Partners for Youth, the Lou Gerhig's Disease Foundation, and other local groups. All of this work was recognized when the Phi Delta Theta National bestowed the coveted Outstanding Improvement Citation on the chapter.

Friendship and Brotherhood are words which symbolize the greatest of the intangible assets of a fraternity. Phi Kappa Tau has given them a definite, tangible form expressed through the togetherness of the brothers.

When to this are added the enshrined goals of Phi Kappa Tau, a scholarship program, leadership and self development, inspiration to work as a team, and you have Phi Kappa Tau.

The friendships that emerge out of Phi Kappa Tau, hold a special place in the heart of all the brothers and those that pass into the rank of alumni. These bonds cannot be defined, they spring from living and working in close proximity, but will remain an everlasting tribute to Phi Kappa Tau.

# Phi Sigma Kappa

Phi Sigma Kappa has had another successful year at RIT. The Upsilon Tetartion chapter just initiated the 600th brother since our founding in 1960. Phi Sig is traditionally competitive in Greek sporting events and this year has been no exception. Soccer, floor hockey, and football are just a small sample of the sporting events participated in by our brothers.

"Phi Sig Cafe" has been adopted as the theme for the house parties. Several additions, such as a pool and a new bar are being built to add to the cafe atmosphere.

Phi Sig's commitment to charities and special causes is continually demonstrated. This year through programs such as Jail and Bail and Farewell to RIT, we raised over \$5000 for charities.

Warren Sackler stepped in this year as our new advisor. We welcome him and know he will support us and the motto of brotherhood, "Phi Sig's work hard - Phi Sig's play hard."

"Infinity, my brothers, not only extend outwards but inwards into hearts of each and every human beings."

With all the activities offered at RIT, academically, socially, athletically and culturally; we, Sigma Kappa Tau, have maintain the high ideals of participation in and around the Institute both as an unique group of brothers and individuals. In every avenue of college life, we also have sought to be in all creative learning environments which have enabled us to develop courage and wisdom. These two key words have been inscribed into our young minds as we prepare for manhood in a mainstream of both deaf and hearing worlds.

# Sigma Pi

Sigma Pi is an international social fraternity with chapters throughout the United States and Canada. Its members come from all walks of life and are bound by a single bond...brotherhood.

Aside from our weekly "bashes", Sigma Pi is continually involved with community service, fund raising and charitable organizations.

Sigma Pi operates on a committee system. Each brother is responsible for a certain committee and it is his job to make things run smoothly. Weekly meetings tie all these committees together to form a coherent organization.

Sigma Pi participates in a variety of Greek and international sports. Sports are just one of many examples how the brothers get together and have a good time. Some of the best times in a brother's college career can be attributed to Sigma Pi.

On January 18, 1959, the Epsilon Nu chapter of Tau Epsilon Phi was founded on the RIT campus. In our twenty nine years we have maintained our ideals of friendship, chivalry and service. This year was no exception, we bowled with the children from the Hillside Children Center and held a raffle and flower sale with our Little Sisters for the Humane Society. The whole house participated in the Teeter Totter for Cystic Fibrosis Foundation and raised about \$1500, and we were involved with fund raising for AIDS Awareness Week.

Throughout the year we emphasize academic achievement, athletic competition and social interaction. Our brothers were very active in sports, showing well in floor hockey, soccer, B-league ice hockey, softball, and basketball. We pride ourselves on our ability to maintain the essential balance between a social and academic atmosphere. Last year our National recognized our achievements by naming Epsilon Nu the Outstanding Tau Epsilon Phi chapter nationwide.

# Tau Kappa Epsilon

Stuck

The 1987-88 academic year has been quite successful and enjoyable for Tau Kappa Epsilon. Through several sporting, philanthropic and social events, this has proven to be a great year.

We continued our competitive spirit in sports this year by winning two championships. We took first place in football and the TKE Kegglers won the Greek bowling competition in the winter. The TKE basketball team also had a successful season by making the championship.

The house had a busy philanthropic calendar this year. For Halloween we set up a haunted house in the city for the Camp Fire Boys and Girls of Rochester. We also worked with the Red Cross to run the Blood Drive in the fall. During the winter TKE held a Ski-A-Thon from which all the proceeds were donated to the Leukemia Society.

Theta Xi is a social fraternity whose purpose is to provide a home environment for its brothers while at college. Theta Xi life opens up a world of opportunities and experiences not attainable in the dorms or apartments. Through athletics, democratic self-government, and the best social life available, each brother enriches his life in college and beyond.

1987 marked the return of Pole-Sit to Theta Xi and RIT. This was a ten day event which raised over \$5500 for Rochester area Multiple Sclerosis. Brothers sat on top of the thirty-three foot pole 24 hours a day for the duration of the event. Visits from all three local television stations, both newspapers and WCMF radio, and an outdoor concert highlighted the activities.

Theta Xi also holds many annual events throughout the year. The Sweetheart '88 where we crown our sweetheart was held on Valentine's day weekend at Holidome. Other events include Parent's Weekend, Faculty Night, and a Spring Dinner Dance.

1987-88 was a great year for Theta Xi. We have set high standards for ourselves and even higher goals. The Viking has landed.

# Triangle

Triangle Fraternity is an organization that combines the ideals of a social and professional fraternity to create an atmosphere that is conducive to outstanding achievement. Our desire for success in the highly competitive fields of engineering and science is complemented by a full circle of academic, social, philanthropic, and athletic activities. The list of activities and accomplishments of Triangle is endless, from being the recipient of Outstanding Greek Chapter Award this year. This is due to our high academic standing, open and private campus parties, private formal events, and road trips to our annual Softball Tournament and Bed-A-Thon, in which over \$2,500 was raised for the American diabetes Association. Triangle continued its excellence in interfraternity sports this year by receiving the All Greek Sports Trophy, illustrating our commitment to achievement in all areas.

The brothers of Triangle are committed to Brotherhood. We find a sense of friendship, unity, and pride among each other that lasts forever. In Brotherhood we excel as leaders and accomplish our goals. It is a feeling among Triangle brothers that cannot be fully appreciated until it is actually experienced.

## Community for Nuclear Awareness

The RIT Community for Nuclear Awareness is an association of students, focusing on issues dealing with the arms race, nuclear power and US domestic and foreign policy. Activities last year included participation in ten protest rallies on issues like Contra Aid, Apartheid and US Intervention abroad, a peace wave on campus simultaneously with an international wave. The Community also sponsored lectures and coffee houses with various speakers from Greenpeace, ROCLA, and Women's Peace Encampment.

For its members, the International House is away of life. During the year, the International House organizes and implements programs in order to reach out to the RIT community and convey our purpose. The house organized many events during International Week. Planning to initiate more programs in the future, the house is the international ambassador on campus.

An NCAA Division III championship eluded RIT's soccer team this season. Coach Doug May's Tigers recorded an impressive 14-4-1 record this fall. Enroute to the winning campaign, RIT captured its fifth straight Independent College Athletic Conference (ICAC) championship and appeared in the NCAA Division III playoffs for a sixth consecutive year.

In the NCAA's, the Tigers took the measure of Binghamton and Ithaca before losing to the eventual champion, University of North Carolina at Greensboro.

RIT's record over the past six years has been impressive. Coach May has guided his squad to an 87-14-10 record. This year, RIT saw its ICAC win streak stopped at 27 with a 0-0 regular season tie against Ithaca. The Tigers are currently unbeaten in 28 straight ICAC games.

Offensively, sophomore Joe Dioguardi was the scoring leader. He finished with 11 goals, one assist for 23 points. Dioguardi also led the team in game winning goals with four. Newcomer Scott Wilson was a welcome addition, responding with four goals and three assists for 11 points. V.J. Penisse had two goals, five assists for 9 points, followed by Matt Chura and Grant Perry each with three goals, two assists for 8 points.

A determined defense this year held the opposition to 14 goals while tallying 41. Ten of the goals RIT yielded came in three losses.

# Women's

It was a disappointing season for Coach Paul Carcaci's women's soccer team. Early season injuries plagued the Tigers. RIT managed to score 13 goals while yielding 46 in the 14 contests. Leading the way in the scoring column was Donna Eberhardt, who saw action on forward and defense. Eberhardt finished with three goals and three assists for nine points. Kelly Carroll was second with one goal and four assists for six points.

Defensively, Terri Hawley, Jennifer Davidhazy, Stephanie Beegan, and Jennifer Knox were the mainstays.

Goalkeeper Jill Turner completes her soccer career. Turner was 2-12. She added two shutouts to her career total and now boasts a school record of 19 over four seasons. Early in the year Turner set a new single game save record, stopping 23 shots against LeMoyne.

RIT ended on a positive note with a 2-0 decision over St. Bonaventure.

### Men's X-Country

At the outset, Peter Todd referred to 1987 as a rebuilding year for his men's cross country team. By season's end, the Tigers had enjoyed another banner year. Competing mainly in invitationals, RIT came on strong down the stretch to capture four straight titles. The Tigers won the Geneseo, Upper New York State (UNYS), ICAC and Eastern College Athletic Conference (ECAE).

In the NCAA Regional Qualifier, the Tigers had to settle for fourth spot; and for the first time in many years, RIT did not send a representative to the NCAA championship.

Individually, Andy Coots set the pace as the season wound down. Coots captured the 21st annual UNYS Championship at RIT. In that race, RIT dominated the scoring, taking the first eight places. The following week at the ICACs, Coots took second place. At the ECACs, Coots placed third, one second off the winning pace.

Sophomore Steve Ranck was a helpful addition. He began the season on the JV squad and quickly worked his way up the ladder to rank as second man on the varsity team. Other top runners included Kevin McKee, Jason Urckfitz, Pete Jensen, and Tom Turkington.

Coach Peter Todd completed his 23rd cross country season and boasts a 221-74 record.

The womens tennis team was off to an impressive start, capturing their first six matches. Following a loss to Buffalo, RIT downed Oswego and lost to William Smith in the season finale. William Smith went on to win the ICAC crown.

Pacing RIT in singles were Stephanie Hutson, Shelly Lussier, Fifi Ma, and Sarah Forstrom. Hutson boasted a perfect 8-0 dual match record in the third singles slot. She finished with an overall 12-2 record. Lussier, who moved up to first singles, was 7-2 in dual matches and 8-4 overall. Ma was 7-2 in dual matches and 7-4 overall. Forstrom played fifth singles and posted a 6-1 dual match record and 9-3 overall mark. In doubles competition, Hutson and Forstrom teamed up for a 6-1 dual match record and 8-3 overall mark. Dehlia Dunn combined with Lussier for a 5-1 doubles record.

Coach Ann Nealon guided her tennis squad to a 7-2 record and runner up honor in the ICAC championship. In the NYSWCAA Championship the Tigers had to settle for ninth place.

Coach Nealon completes her 17th season at RIT and has a 113-41-2 career record.

Under first year coach Ben Guiliano, the RIT women's volleyball team enjoyed one of its most successful years. RIT qualified for the New York State Women's Collegiate Athletic Association (NYSWCAA) playoffs, but were a disappointing 0-4 for the tourney. Twice during the year RIT pulled together five-game winning streaks.

Offensively, the Tigers were paced by the hitting Wendy Clontz, Valerie Childs, Anita Magill, Monica Przemielewski, Cindy Reynolds, Rhonda Arnold, and Susan Pakkala. Handling the blocking chores were Childs, Clontz, Magill, Przemielewski, and Reynolds. The Tigers boasted a 32-21 record, finishing runner up in the Brockport and Alfred Tournaments.

With a relatively young squad, Coach Bruce Devanthal's hockey team posted a 14-15-1 overall mark and a 14-8-1 record in the ECAC. The Tigers found the early going tough as they lost the first five contest to Division I opposition. Three of those losses came by one goal margins.

RIT opened with a trip to Alaska and dropped doubleheaders to Anchorage and Fairbanks. Following a loss to Merrimack in the Potsdam Tournament, the Tigers got on track with victories over Potsdam, Geneseo, and St. Anselm.

The season ended with an 8-4 loss at Elmira. For the second straight year the Tigers failed to gain a spot in the NCAA championships.

The Tigers did outscore their opposition by a 150-141 margin. RIT averaged 5.0 goals per game. RIT also had a 53-34 edge in power play goals.

Scott Brown led the team in scoring, tallying 21 goals and 30 assists for 51 points. Freshman Chris Palmer made his presence known as he collected a team-leading 27 goals and 14 assists for 41 points total. James Cotie came on strong to finish with 17 goals, 19 assists for 36 points. He also led the team with four game-winning tallies. Senior Pete Schroder topped 100 points as he finished his career moving into ninth place on the all time point list. Kevin Cassells and Tim Cordick led the defensive corps, collecting 21 and 20 points respectively.

Coach Delventhal completes his fourth season at RIT and improves his record to 87-39-2.

For the third straight year, the RIT women's hockey team earned their place in the ECAC playoffs. After winning the opener against McMaster University, RIT suffered four straight losses. Things took a turn in RIT's direction as the women responded with five victories and a tie in as many outings. A victory over Harvard vaulted RIT into the ECAC's, where they fell victim to Providence to close the books on 1988-89. Coach Glen Collins guided his squad to a 9-8-1 overall season that ended with the 5-2 ECAC playoff loss.

Three seniors were chosen to play in the American Women's Hockey Coaches Association (AWHCA) annual All-Star game. Named to compete were goalie Julie Handzel, forward Bettijane Morgan, and defender Jill Turner. The three complete illustrious college hockey careers. Morgan became RIT's all time scoring leader.

Pacing RIT in 1988-89 were Dawn Cline, Janet Testa, Cheryl Bourgeois, Carrie Greco, Wendy Stibitz, and Bettijane Morgan. Cline, a freshman, led RIT in scoring with 25 points while Testa ended with 22 points. Bourgeois, Greco, and Stibitz each finished with 16 points. Coach Collins completes his fifth season and improves his record to 39-34-3

A much improved wrestling squad grappled its way to a 3-6 dual meet record. Coach Earl Fuller's matmen scored victories over Binghamton, Cortland, and Potsdam. Early in the season the Tigers hosted the 22nd annual RIT invitational and finished 15th.

RIT sent three wrestlers to the NCAA Division III Championship. Kevin Sampson (142), Curt Jenkins (158) and Chris Madden (167) earned the trip with strong performances in the NCAA qualifier at New York University. RIT managed two points in the nationals to finish tied for 56th place.

Jenkins paced RIT this season with a 21-14 overall and Madden posted a 14-11 overall record.

In the New York State Championship held at RIT, the Tigers place 16th. Jenkins was RIT's only place winner, nabbing sixth spot.

In the final New York State Wrestling Poll, RIT moved into 15th place. The poll includes schools from all divisions. Chris Madden ranked fifth at 157, Jenkins ranked sixth at 158, and Sampson was eighth at 142.

Earl Fuller completes his 40th year as head coach. He has 187 career wins at the RIT helm.

It was a season of ups and downs for Coach McVean's men's basketball team. Coming so close to winning the Independent College Athletic Conference (ICAC) this year, RIT fell short to St. Lawrence by an 85-76 margin. The Tigers ended their season with an overall 10-14 record. This put them second in the league tied with Ithaca and Hobart.

Leading the way in scoring were Marco Golding pacing the squad with 16.4 points per game, Jeff Haskell with a 15.0 average, Shenan Hennrich averaging 9.6, and Doug Murdock in his first varsity season, averaged 9.3 points. The team averaged 76.2 points total for the season.

This year five seniors and one sophomore were chosen for the ICAC All-Academic Basketball Team. To be considered for this honor, a member of the varsity squad must maintain a cumulative GPA of at least 3.0. Those honored seniors are Sherman Hennrich, Chris Bowden, Shawn McLaughlin and Rich Setter. Sophomore Mike Scampini, hindered by injuries this season, was also selected.

Coach McVean had a team to be proud of, as he completed his fifth season as head coach.

Stuck

Stuck

In their initial varsity season, the women's basketball team played to a 2-13 record. Coach Mark Storm's squad put its first victory ever in the record book with a 42-40 decision at home against Elmira. The second win also came in the George H. Clark Gymnasium with a 69-31 thrashing over Roberts Wesleyan.

The Tigers were also impressive in losses to Hamilton (82-67), Union(69-60), and Geneseo (59-48).

Cheryl Quinn and Kristin Coon lead RIT in scoring, averaging 11.8 and 11.4 per contest. Wendy Clontz was the board leader, pulling down 8.9 per game. Carin Obad led the team in assists with a 4.5 average.

The Lady Tigers averaged 50.4 points for the season.

The men's swim team came ever so close to an undefeated season in 1988-89. In the final meet of the campaign, the Tigers needed a victory. In the final event, RIT fell less than a second short as the Ithaca College Bombers came from behind to win the 400 yard free-style relay with a time of 3:18.23. The Tigers were clocked at 3:19.15.

Despite the 105-104 loss in the finale, Coach Gary Mauks' sharks had an impressive season. Leading up to the Ithaca loss, RIT boasted wins over Buffalo, Cortland, Hobart, Niagra, Nazareth, and Alfred. In the ICAC championship, RIT had to settle for fourth.

The Tigers peaked for the Upper New York State Championship and won fourth place honors. Chris Martin led RIT in the state meet, collecting 99 points and a school record in the 10 yard breaststroke. Martin finishes his career with 870.17 points, moving into fourth on the all time scoring list.

Diver Gregg Sheibley was equally impressive in the state meet, he placed third in one meter diving and fourth in the three meter competition. Earlier in the season Sheibley qualified for the nationals at Emory University in Atlanta, Georgia. He is RIT's lone qualifier.

Martin led the team in scoring this year with 372.75 points. Mark Klare (292.75), Glen Endress (281.75), Kevin Bradbury (260.25), Mike Constantino (210.05), Andy Kingdon (201), and Scott Ingwers (192.30) followed.

Gary Mauks completes his fourth season and improves his record to 19-13.

Bashaw

With Nancy Dowdall leading the way, the women's swim team posted a 5-6 dual meet record, and placed ninth in the NYSWCAA Championship and 11th in the ECACs. Dowdall is RIT's lone national qualifier, achieving the standard in the 50 and 100-yard butterfly.

Dowdall was at her best in the post-season championships. At the state meet (NYSWCAA), she captured top honors in the 100-yard butterfly and the 50-yard butterfly, breaking one of her own records in the latter.

Other top performances at the states came in the 800-yard freestyle relay (Heather Lewis, Krista Slavik, Coleen Larkin, and Ann Marie Lozito) and the 200-yard freestyle relay (Sue Kullberg, Debbie Ah Chick, Debbie George, and Dowdall).

In dual meet competition this year, the Tigers recorded wins over Mansfield, Wells, Buffalo State, Niagara, and Alfred. In the ICAC championship RIT placed third.

Dowdall was the team scoring leader this year. Other top scorers of the season include Sue Kullberg, Debbie Ah Chick, and Krista Slavik.

Kathy Robords completes her eighth season as head coach and betters her overall record to 52-40

RIT was 12-11 in the regular northern season this year, following a 2-5 mark during a trip to Florida. The longest winning streak came early in the campaign when they took the measure of Penn State Behrend (twice) and Niagara.

Leading the way at the plate were Rob Grow, Dave Rogers, Chuck LaPree, and Bil Spath. Newcomer Scott Wilson leads the Tigers pitching corps.

This years softball team showed improvement compiling a 6-15 record. The Tigers were victorious over Union, Oswego, Elmira, Penn State Behrend, and St. John Fisher. Six of the losses were by one or two-run margins.

Leaders in the hitting department were Karen Hill, Stacey Winter and Marci Krauth. On the mound, newcomer Robin Desrosiers appeared in 17 games. She pitched 97 innings.

This marks the sixth season for coach Janet Jones.

Kim Colclough, Samone McDade and Bridget Connolly set the pace for women's track this spring. Under Coach Ron Hardy, the women competed in invitational.

Colclough, named Athlete of the week twice, captured the 100-meter hurdles and 400-meter intermediate hurdles at the Hartwick Invitational. She was timed in :17.5 for the 100, and 1:10.6 for the 400. Colclough qualified for the state championship but failed to place in either event.

At the Geneseo Invitational, Colclough took third place in the 100 hurdles and fifth in the 400-meter event. Bridget Connolly was sixth in the 1,500 meters with a time of 5:25.87.

Earlier in the season, Samone McDade won two events in the RIT Invitational. She took the 1,500 meters in 5:46.0 and the 800 in 2:46.41.

Ron Hardy completed his fifth season as the women's track coach.

Huth

Leading the way this season were Greg House, John Wagner, Greg Utley, Morgan Esser, and Rattana Chhay. Competing only in invitationals, the Tigers strive for the nationals. As of the time of this writing, no one had yet to qualify for the NCAA's.

House is the leader in the 3,000-meter steeplechase competition. Wagner has shown well in distance events, while Utley continues to excel in the hurdles. Esser leads the Tigers in the javelin and Chhay is the one winning the pole vault. Despite finishing fourth in the pole vault at the ICAC's, senior Matt Frechette had an impressive jump.

Peter Todd completes his 23rd year as track coach during the 1988 season.

For the first time in six years, the Tiger stickmen failed to earn a berth in the NCAA Division III playoffs. The squad did post a 11-16 overall record and won their fourth straight ICAC title. The Tigers accepted a bid to the ECAC Upstate playoffs. In spite of everything, RIT still enjoyed a successful campaign. Pacing the Tigers offensively were Tom Kraft, Chris Guild, Steve Schmidt, Brett Bradley, Phil Elliot, and John Wigsten. Sophomore Mike Wojnovich was an important factor in RIT's success. He led the team with a school record of 156 ground balls this year. Dave Doughty handled netminding duties and posted an 11-6 record.

This marks the fourth season for Bill Glennon who improved his coaching record to 48-14.

Bashaw

Volleying their way to a winning record, the Tigers enjoyed success this season. In the ICAC's though, they had to settle for fourth.

Captain Terry Delmarsh handled third singles and finished 6-4 in duals and 7-5 overall. Returning Jeff Ensminger led the Tigers with a 7-3 singles mark and senior Jon Reichelt was 6-2 in the fifth singles.

Only two players graduate this year which gives coach Sleeman an optimistic outlook for next year. Completing his third season at RIT Sleeman improved his record to 14-20.

This year's squad has been really active in trying to raise school spirit. Not only did they cheer at the basketball games, as they traditionally do, the RIT cheerleaders also raised the spirits at hockey and soccer games. They have tried to become involved more this year than previous years. Do to this involvement, the Athletic Department has provided much support and appreciation.

A larger group of girls helped with making the team a stronger unit and more noticeable. New stunts and cheers were possible this year, which made time outs a bit more interesting. Let's hope next season brings even more spirit!

## AN INSPIRATIONAL ATTRACTION

Admiring you from afar...  
A glimpse of curiosity only sets  
a moment of shyness in my part.  
I am overwhelmed with a figure of beauty,  
a vision of innocence in my heart.

Does she know what I am really feeling....Am I  
at a disadvantage?

Finally, a sign of communication, a smile  
of interest or in politeness.  
Can I be the only one here experiencing this  
omen of attraction?

As I gazed into her eyes I was filled  
with emotion - so blue and deep, yet so  
fragile, as a fine delicate crystal sculpture.

Small gestures of humor make the introduction  
seem as though I'm greeted a long time friend.  
As the night diminished, we both regretted this  
meeting must end.

An attractive inner beauty as well as outer,  
conveying a true moral - as if one is being tested  
for actual continuity to flow purely, without  
resistance of trust.

As we converse our hearts grow fonder.  
Memories seem so trivial when we exchange  
honest facts of life to ponder.

Can we ignore the possibility of contentment...  
to be happy with reversals of a different lifestyle,  
or must we continue to let comfortable habits  
detain wishes at a subservient trial.

In the end...a kiss...passionate as love itself  
but with the innocence intended in the beginning.  
A fulfillment of a promise made without acknowledging  
its existence, as I admired you from afar....

CARMEN SPAGNUOLO  
DECEMBER 1987

ARTIST ENGINEER

J.Burke

Joe,

If you had the same type of view out your plane as I have, we are well above the clouds; they appear solid. A frozen ocean or deep furrows in a gnomes forehead; they go on forever. They don't seem to be changing no matter how long I look; they aren't even there the way I see them, it's just water. You get this strange feeling, more than awe or amazement – it verges on an engineer's anger. I see where I can build a house (a true test of a good atmosphere). This is the ultimate place to live, without a doubt, partly because it can't be done. This is why I must fly – it is still too much to take in, it's one of those things that make everything else seem useless.

Jim,

When you have wings,  
you don't need hands

AFTER A DREAM... I THINK

When I awoke  
 I felt the energy  
 From all of the stars  
 and all of the moons  
 and all of the forces  
 In the universe  
 was inside me.  
 I had seen the stars  
 I had seen the moons  
 Together we were  
 All of the forces  
 in the universe.  
 But in an instant  
 The star began to shoot  
 Across the sky  
 of your empty heart and  
 fade in the blackness  
 That filled you.  
 And in less than a moment  
 Your footsteps  
 With the weight of  
 Ten thousand horses  
 Wore paths through the moons  
 That inspired me.  
 And like a demon  
 Stealing my breath  
 as I slept  
 You sucked the forces from within me  
 where they had dwelled forever.

RAIN

It's 2 a.m.  
And I hear you calling  
I suppose  
Any normal person would stay in bed  
But you beckon me  
So gently  
To come out and play,  
Like a small child  
anxiously awaiting the arrival of a holiday  
I eagerly sneak out  
To join you.  
Thrilled at your icy touch  
I try to listen  
To any secrets you might tell me  
in your soft chatter.  
You have reopened my eyes  
To childlike wonder.  
Shivering  
With a huge, dripping grin  
I decide that playtime is over  
But I'll be waiting for you  
To come and rescue me again  
From becoming too much of an adult.

Dear Graduates:

The class of 1988 now joins a long line of RIT graduates destined to make their mark on the world.

You begin your professional career as well prepared as any of your contemporaries, and far better than most, I would quote George Wilson Hoke's statement in 1937 when he stated the purpose of RIT is to provide: "An education for the making of a living and the living of a life — not as two processes — but as one."

Hoke's statement was appropriate then and it is today, fifty years later. You enter a different world from that of your predecessors. Basic concepts of honesty and integrity are being challenged as never before.

We live in a free society. The concept of freedom goes far beyond the personal freedoms we enjoy. It carries a basic assumption of truth that people who obey the laws voluntarily will be honest in all transactions. In essence, that we will be as good as our work—that we will exercise integrity.

Ambition is a wonderful attribute. It is at the heart of the free enterprise system, yet there are values that are higher than personal success or money. I am not suggesting that success and integrity are mutually exclusive, but what I am saying, as clear as I can is that true success — ultimate success — will depend on our integrity, both individually and collectively, as a people.

It is in the final analysis a highly personal matter, for we can fool others but we can't fool ourselves. Only we know what we have done in these matters. In those quiet moments when we look within ourselves we know integrity.

My parting request for you is to ask each of you to commit yourselves to a life of personal and professional integrity and I pray that you will know the inner peace and happiness that such honesty will bring.

You have my best wishes as you pursue your goals in life.

Dr. John Paliouras  
College of Science

NTID Members of the RIT Class of 1988,

Some time ago, I heard a commentator on National Public Radio distinguish between success and excellence. I found the distinction intriguing and it led me to commit some thoughts to paper.

It seems to me that success can be, and often is, fleeting — the exhibition of some behaviors that might eventually blossom into excellence. It is more often than not, measured by comparison to others and marked by competition with others. Excellence, on the other hand, requires a commitment in perpetuity, to being the best one is capable of being, irrespective of the actions being taken by the competition. Excellence requires a commitment to improving service, even though one may be at the top compared to the competition. Excellence is marked by a resistance to short term 'profit taking,' even short term hardship, in order to make an investment in the future possible. As John Gardner suggests, excellent individuals extend themselves, challenge themselves, and demand the very best of themselves.

Excellence is not measured by 'star quality' or 'notoriety', but rather by consistent and ever improving contribution. A commitment to success is a commitment to being at the top, while a commitment to excellence is a lifetime commitment to quality. To paraphrase the philosopher Toulmin, excellent people analyze their practices not simply for what they are, but for what they might be made to be.

As you graduate, I wish you success in your quest for excellence.

Dr. James DeCaro  
National Technical Institute for the Deaf

Congratulations to all the graduates from the College of Liberal Arts! This year for the first time graduates from our Professional and Technical Communication program and our Masters in School of Psychology program join with graduates from our other three degree programs in Criminal Justice, Social Work, and Economics. These programs are among the fastest growing areas of study at RIT.

At a time when professional career education and a national concern regarding the liberal arts are the contending forces in higher education, this college's graduates have the best of both worlds: career-oriented education in a College of Liberal Arts within an Institute of Technology. We believe that both aspects of this education will serve our graduates in good stead not only in their professional careers, but with equal importance in their life activities as genuinely educated persons.

Stanley McKenzie  
College of Liberal Arts

Dr. E. C. McIrvine  
College of Graphic Arts and Photo

Dear Graduating Seniors:

For a university and its graduating seniors, graduation is a very special time. It is a time for congratulating graduates, thanking parents and family, saying good-bye and reflecting on the future.

Graduation symbolizes both an ending and a beginning for you. As graduates, your educational program at RIT has come to an end, but as young professionals about to enter your chosen field, your professional life is just beginning.

We are very proud of you and the quality you represent both as students and professionals. May the hopes and plans you carry with you today become for you, tomorrow's realities.

Please accept my sincere congratulations to each of you as you graduate from RIT's College of Business.

Dr. Donald Baker  
College of Continuing Education

Dear Graduates,

You have my congratulations and best wishes as you begin a career in your chosen field. The majority of your working life will be spent in the 21st century. Whether you will be working the area of photography, printing, or imaging science, you will undoubtedly face rapid technological change all of your life. I hope that we have properly prepared you for challenges of the future. Keep in touch. Let us know what we did right (or wrong). Good luck.

Dr. Walter McCanna  
College Of Business

Dear RIT Graduates:

It is a pleasure to share some thoughts with the students who are graduating from RIT this year. I believe, though, that my message is as appropriate for those of you who have more years ahead before moving to a new phase in your life.

My message is simply put: While the completion of a degree from RIT is a great achievement, it is also the beginning of a lifetime of learning.

Continuing one's education has never been more necessary than in today's society. This results from two factors: the rapid advances that are being made in the sciences and technologies as well as the increased competition that is faced by industry. Industry itself has recognized this fact and annually spends in excess of \$40 to \$100 billion dollars on training programs for its work force. Over 38.8 million individuals at all levels of employment are involved in this industry sponsored training. In order to succeed in the factories of the future and to accomplish increased expectations for productivity, employees must continually keep up with the changes that are occurring.

This is not meant to diminish the relevance of the education that you have earned at RIT. Rather, the firm background in a professional or technical field combined with a strong foundation in the liberal arts and the sciences that characterizes each RIT degree program, forms the basis on which you will be able to continue to grow and to learn and ultimately to change along with the changes in technology that are inevitable.

Dear Graduates:

Congratulations on completing the requirements for your RIT engineering degree. The journey of the past five or six years has seemed at times a long and arduous one and it has carried you from the classroom to a variety of different corporate locations as you moved back and forth between academic pursuits and co-op. Now you leave to make your mark in the world as RIT engineers. You will find yourself well equipped to "make a living and live a life" but you also enter a world not at all certain of where it is headed and in need of all the technical expertise you bring to it as well as all of the cultural values and social insights you have gained throughout your life and education.

Believe you can make a difference in the world and you will. I recently attended the movie 'Stand and Deliver', the story of a class of minority high school students in Los Angeles whose teacher took them from basic mathematics through AP calculus — successfully. The message of the film was simple and clear — students can and will live up to their teachers' expectations, therefore, we should set our expectations high. We have high expectations of you and we are proud to send you forth. We know that you will be a credit to yourselves and to your alma mater.

Best wishes for a successful professional career and a rewarding personal life. We wish you God speed in the years ahead.

Dr. Richard Kenyon  
College of Engineering

Dear Friends:

The students graduating from the College of Fine and Applied Arts are an exceptional group of young adults ready to make their individual contribution to the professional world of art, design, and craft. They have completed and mastered a significant body of knowledge, been subjected to a rigorous courses of study, worked with a distinguished faculty, and have passed the required body of knowledge to be certified, by the faculty and administration, for graduation. They have been exposed to ethics and to values, in part, by the examples and role models of the faculty. Each of these seniors has grown since coming to the Rochester Institute of Technology and is a different person than the person who arrived some years ago.

The graduates have learned about the world of work, but have also learned about the quality of life within their chosen professions. They are better prepared to live a good life, to contribute to others, and to begin to try to make the world, as they impact it, a better place. The seniors have learned about cooperation and responsibility. They have mastered technical and scientific material and have been exposed to the "state of the art" equipment within their chosen professional areas. They are talented and good at what they do.

Each will begin the next chapter of their lives and continue to study, grow, and learn. It will be a pleasure for all of us in the college of Fine and Applied Arts to observe and enjoy their progress. Godspeed.

Dr. Robert Johnston  
College of Fine and Applied Arts

Members of the RIT class of 1988,

Commencement is the season for those at their zenith, or beyond, to advise those at their threshold on how to guide their careers and to live their lives. I find this difficult since, after half a century on this planet, I have learned mostly the extent of my ignorance. However, one must fulfill tradition.

All I know, or believe to know, comes from one pervading observation: ours is becoming a performance based society, rather than a tradition based society. I say this without judgement: it is, in effect, a tradeoff of security for opportunity. In this context, I offer the following maxims. — Forever, remain a student. Learning limbers the mind. Since change is both cause and effect of a performance based society, those whose brains stiffen, or shut down, are left by the roadside. — There is no magic. Some part of us forever remains the child. When faced with adversity, frustration, or defeat, we often revert to the belief that someone, or something, will, or should, make things right. In a performance based society, reason (with sweat) makes right. — Know the difference between what is and what should be. Otherwise, we labor in a room of mirrors. A performance based society deals in realities, not ideals. — We are what we do, not who we are. This is the definition of a performance based society. Excellence, not elitism. Excellence is the fruit of a performance based society. Elitism is its curse.

What I have said, you already know. It is what you have been learning at RIT for the past few years. For RIT's tradition is performance. You need only not forget what you've learned. However, as RIT graduates, I charge you with one more task. Be more than good workers. Be leaders. Too few of your cohorts have learned the performance ethic. America needs you.

# F O L L I O

Each artist always leaves his mark on every work of art he creates. Not in the actual mark of a fingerprint, but in the unique style that he has developed.

The cover of this year's Folio emphasizes and glorifies that personal touch of each individual artist.

# Good Morning RIT

# Good Luck Graduates!

From

Ed Ingerick Management

The  
Future  
is  
Yours!

Congratulations from  
the Brothers of  
Phi Sigma Kappa

# Congratulations Class of 1988 !

from the

Learning  
Development Center

# Good-bye Seniors!

We will miss you.

RIT  
Ambulance

# Great Job Seniors!

From the  
RIT American Marketing  
Association

# Congratulations Graduates!

You are the Future.

From the  
RIT Association of  
Collegiate Entrepreneurs

# Why It Pays to Keep in Touch

## 1. You Never Know Who Might Be Looking For You

Now that you've graduated from RIT, your career could take you across the country or around the world. Make sure Alumni House can tell old friends and favorite teachers how to track you down.

## 2. We Keep Track of Career Opportunities

If there's a hot job opening in your field, RIT probably knows about it. And we'll tell you about it. All you have to do is ask.

## 3. You'll Hear What's Happening at RIT

As an RIT graduate you're part of a professional network of about 58,000 alumni. We want to keep each and every one of you informed about RIT through *Alumni News* and other publications and mailings.

### *Congratulations and Best Wishes to the Class of 1988!*

Call us anytime at **716-475-ALUM** or **716-475-2764 (TDD)**, or write to the address below. Hope to hear from you soon.

Rochester Institute of Technology

Alumni Relations  
One Lomb Memorial Drive  
P.O. Box 9887

# The Varden Portrait™

It's What You Want It To Be.

The Varden Portrait is a timeless commemorative of your graduation.

Your Varden portrait will speak with distinction. For over 30 years, the name Varden has meant the ultimate in portraiture. When you graduate, don't settle for less.

**Varden™**  
Studios, Inc.

The Faculty, Staff and  
Administrators of the National  
Technical Institute of the Deaf  
want to wish this years  
graduates good luck and success  
in future endeavor.

*You're looking smarter than ever.*

# CHOOSE CAREFULLY

At the new AT&T, we think you should know that there's a difference between AT&T and some of these new telecommunications companies that just fell off the tree. After all, when you're the company that planted the seeds of the information age, you just naturally set a standard that's a cut above the rest.

We're the people who brought the world the telephone, the transistor, the solar cell, the laser, sound motion pictures, high fidelity recording and much more. And today, we're leading the way in new technologies such as microelectronics, photonics, software and digital systems.

Our streamlined new company is full of high-tech opportunities just right for the picking. Meeting the research challenges of our world-famous

AT&T Bell Laboratories. Developing computer and telecommunications products. Pioneering long distance voice and data services. Providing state-of-the-art network systems for the industry.

We've always been able to deliver high quality products and services because we've always attracted people of high quality.

Whether it's telephones, information or network systems, long distance services or computers, AT&T is the right choice.

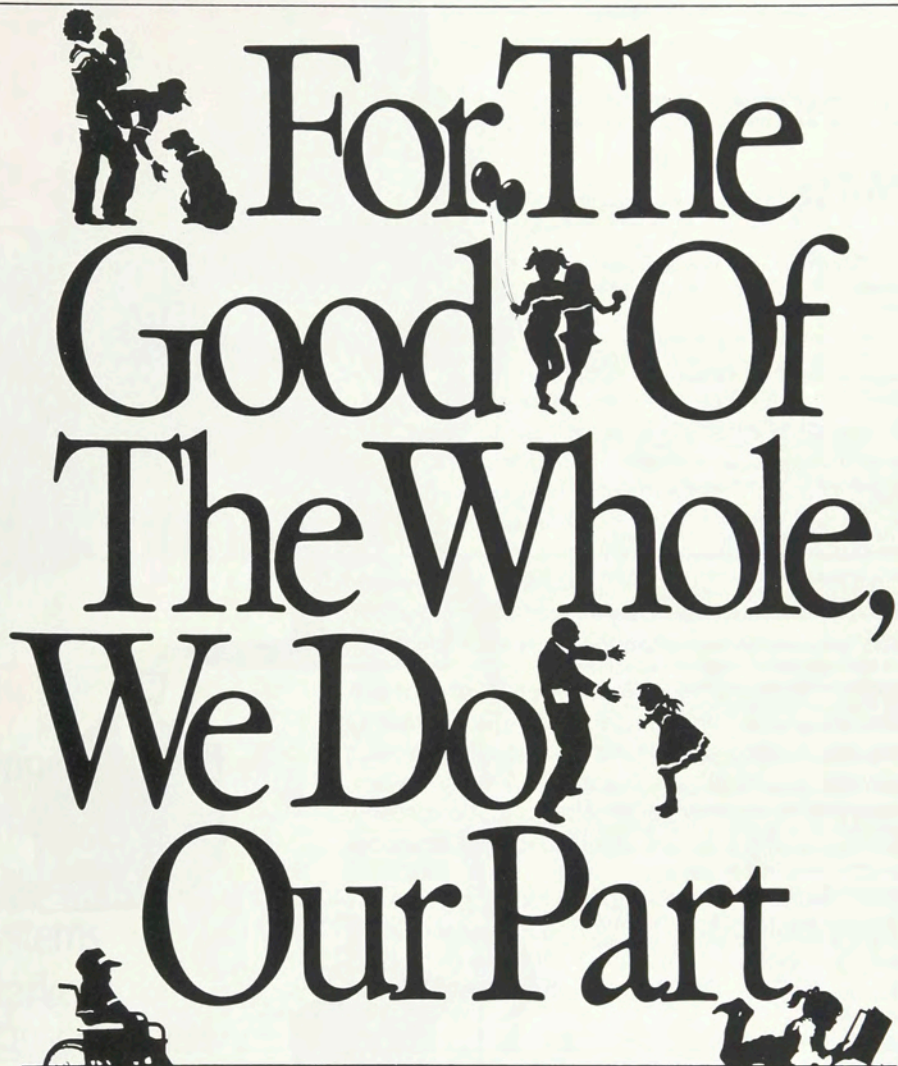

**AT&T**

The right choice.

An Equal Opportunity Employer.

©AT&T 1986.

The text "For The Good Of The Whole, We Do Our Part" is written in a large, serif font. Silhouettes of various people and a dog are integrated with the letters. A man and a child are on the left, a dog is below them. A woman and child are on the right, with a balloon between them. A man and child are on the right, with the man reaching out. A person in a wheelchair is on the left, and a dog is on the right.

# For The Good Of The Whole, We Do Our Part

We at Chase Lincoln First Bank are committed to improving our community and the daily lives of its people. Both corporately and through the good works of our own employee volunteers, we support dozens of national, state, and local organizations who care. We hope you do, too.

 **CHASE**  
**Lincoln First**

Computer Scientists

**MYTH:** At NSA, you must choose one specialty and then stick with it.

**FACT:** NSA encourages you to diversify.

Many myths have arisen about careers at the National Security Agency. The facts, however, are these:

- NSA has broad and challenging opportunities for MATHEMATICIANS, ELECTRONIC ENGINEERS, and COMPUTER SCIENTISTS.
- NSA opportunities allow you to diversify your experience. You can move around within the agency and try different disciplines—we'll even train you for each transition.
- NSA plays a key role in protecting our national security. We process foreign intelligence information . . . safeguard our government's communications . . . and secure our nation's computer systems.
- NSA work involves leading edge research and the latest technology. Our computer complex is among the largest in the world. Our work in communications sets the pace for the industry.
- NSA salaries are competitive.
- NSA offers much more than job security. Benefits include paid vacation and holidays, insurance options and tuition reimbursement. In addition, our employees enjoy the attractive lifestyle of the Baltimore-Washington area.
- NSA performs work that is critical to our nation's security. It is work you'll be proud to do.

For more facts, or to apply, send your resume today.

NSA. The opportunities are no secret.

National  
Security  
Agency

immediate family members.

# Why would you want to work for Johnson Controls?

There's no point in leaving your career to chance . . . so use our checklist to see how you'll profit from a career with Johnson Controls.

Look at stability; Johnson Controls has been successful for over a century, and our future looks better than ever. Look at our systems—energy management, building automation, fire protection, security. Look at the way we respond to our markets' needs for integration, ease of use, adaptability to change. Look at the opportunity, professionalism, and growth you'll enjoy where your ideas get a thorough hearing, where you get feedback on your achievements, where your career aspirations are part of the planning process.

And then look at your choices for location. 100 Branch Offices throughout North America, each offering our customers full service capabilities—sales, application and service. A headquarters facility in Milwaukee where product development, design, marketing and technical support complement our Branch Offices.

We are always looking for individuals with the desire to excel. We have opportunities available for engineering, marketing and business professionals with undergraduate and graduate degrees.

# It's Not Easy Being #1

And staying number one is just as challenging. Because when you're the best in the industry, you always have to stay at least one step ahead of the competition. As the number one manufacturer of positive photoresists, Shipley is chosen time and time again by companies around the world.

What makes us different from everybody else? Commitment—to product quality, reliability, on-time delivery, service and innovation. At Shipley, our growing microelectronics division is responsible for developing some of today's most advanced products. Our new Microposit and Developer has set new industry standards in tight photospeed control, and our advanced MICROPOSIT SAL 600 E-BEAM PROCESS performs up to ten times faster than standard diazoquinone based novolac systems. With the introduction of MICROPOSIT S1400 Engineers can now design state-of-the-art circuits to tighter tolerances without compromises to accommodate the lithography. Product innovations like these are just some of the ways that Shipley stays on top of the field.

And with any great success, there come opportunities. Challenging opportunities for talented professionals who want to explore new and rapidly changing areas in the microelectronics industry. Have you got what it takes to work with the best? Then consider an opportunity with the Shipley Company.

If you'd like to find out more, forward your resume to Russ Sullivan, Shipley Company Inc., 2300 Washington Street, Newton MA 02162. An equal opportunity employer.

## ***TEAM UP WITH THE BEST***

To have an impact on the communications revolution, you need full research and development capabilities on your team — plus expertise in applying the newest findings to a vast and rapidly growing market.

That's why the best application for your degree is the team of Northern Telecom and BNR (Bell-Northern Research).

BNR's technical excellence has helped to make Northern Telecom the world's largest supplier of fully digital telecommunications equipment. Northern Telecom's full-range of communications products represents theoretical advancements proven in everyday use.

This is the team which set the course of the industry toward a digital standard. This is the team which is leading the integration of voice, data and image information in fully compatible systems. This is the team to join to assure your career growth now and later.

To find out more information on our career opportunities send your resume to: BNR, Professional Staffing, MS-C100, 685A E. Middlefield Road, P.O. Box 7277, Mountain View, CA 94034-7277.

Northern Telecom and BNR are equal opportunity employers.

# The Intel Influence

**We're everywhere.  
In microelectronic systems.  
Components. And business.  
And we can help you launch a  
great career at a company  
that sets the standards.  
For ourselves and virtually  
everyone else.**

**I**ntel. A name that stands for excitement and technological innovation. Let us be your springboard to the future.

At Intel, we've created one microelectronic "first" after another. In order to further our leadership role, we seek high achieving college graduates, like you, about to take that all important first step.

Over the past two decades, our standards have influenced the way our industry thinks and performs. So if you have a technical or business degree, enjoy challenge and have a desire to excel, come to Intel. A company where your efforts will make a big difference.

See us on campus or send your resume to College Relations at the Intel location of your choice.

# HARDCORE SOFTWARE

OK. Enough theory. It's time to get hardcore about your career in software. With Microsoft.

We'll give you all the resources you want. Tens of millions in R&D funding. Along with one of the most elementary tools for thinking — a door, leading to your own private office. All backed by management that truly *does* speak your language, because they probably helped write it.

We're serious about software design. If you are, too, now you know the perfect place to start — Microsoft.

## Software Design Engineers

We're working on everything from compilers, operating systems, and networking to sophisticated graphics, powerful productivity software, CD-ROM technologies and some things that can't be mentioned in print. You could be, too, if you're about to graduate with a BS in Computer Science, Math, or a related major, with provable understanding of micros, "C", the 8086 family, UNIX<sup>™</sup>/XENIX<sup>®</sup>, or MS-DOS<sup>®</sup>.

## Here's How to Get Hardcore.

Join Microsoft, and you'll not only have the opportunity to work with the world leader in microcomputer software, but also the opportunity to live in the beautiful Seattle area. And, while you've probably heard a lot about the gorgeous scenery around Puget Sound, you may not know that Seattle boasts the most active live theater west of Broadway. A cultural calendar filled with everything from film festivals to jazz concerts. As well as major league baseball, football and basketball.

To all of that, Microsoft adds a stunning modern campus, with amenities such as workout facilities, a parcourse and membership in a nearby health club. Plus an array of benefits.

How do you get hardcore? Begin by sending your resume to College Relations, Dept. QUAD, MICROSOFT CORPORATION, 16011 N.E. 36th Way, P.O. Box 97017, Redmond, WA 98073-9717. We are an equal opportunity employer.

# Microsoft<sup>®</sup>

Trademarks are registered to their respective companies.

# Why Maxim?

In choosing your first job, shouldn't your first question be, "Why should I choose this company over all others?"

At Maxim, we're working on some of the toughest problems in the following areas: satellite communications, information processing, radar, and reconnaissance systems. If you want to work with some of the brightest scientists and engineers, people creating breakthrough technology, look to Maxim.

At Maxim, we're working on developing hardware — actually evolving new equipment to test our advanced theories. If you want to work on the scientific edge of discovery, look to Maxim.

In addition, we offer our employees a focused environment where stock participation and excellent salaries and benefits attract top professionals. If you want to have a stake in our future growth and yours, look to Maxim.

Our Corporate Headquarters is just a few miles South of Stanford. To learn more send your resume to: **MAXIM Technologies, Inc., Dept: STFD., 3930 Freedom Circle, Santa Clara, CA 95054; or phone Dave Thomas at (408) 748-1130.** An equal opportunity employer. U.S. Citizenship Required.

# Why not!

# Help create the first 21st century company.

Apple Computer, Inc. has always been a little ahead of its time. From the introduction of the first popular personal computer, to the first system to use graphical user interface, to the first desktop publishing system, our goal has always been the same: to change the world with computers.

That goal results in a company that is every bit as advanced as its products. In many ways, Apple is well on its way to becoming the first 21st century company in the Fortune 500.

Where the typical company emphasizes hierarchy, at Apple we stress networks. Instead of mandates coming down from the top, ideas percolate throughout the organization. We give our people unusual amounts of responsibility. Extraordinary tools to let them do their best work. And an eclectic environment conducive to changing the world.

Add to that unusual environment all of the resources a major corporation can provide. Sophisticated management. Astute marketing. International distribution. And you have the elements of the first company of the next century: Apple.

If you're ready to lead the way beyond the year 2001, and you want to do it in technical sales/marketing, finance, or engineering, consider yourself welcome. Join the people who think like you do.

Send your resume now to APPLE COMPUTER, INC., Human Resources, Dept. SQ, MS-9C, 20525 Mariani Avenue, Cupertino, CA 95014. An equal opportunity employer.

The power to be your best.™

# We Created An Industry — Imagine What We Can Do For Your Career.

At KLA, the success and growth we've experienced for over a decade has been extraordinary. As a result, we've cemented our position as a leader in automated optical inspection systems. In fact, we've captured and maintained over 70% of the market share in both our two major product lines. Our sales have risen from \$42 MM to approximately \$90 MM in just the last four fiscal years.

KLA develops products which integrate advanced hardware and software image acquisition systems, precision mechanics, optical engineering, robotics, and electron-beam technology. Our complex systems, which acquire images, process them, and provide a decision maker with better information, target a very high-growth market segment which crosses industry lines. The strength of both our technology and our management superbly positions KLA for continued growth. Independent stock analysts forecast KLA to grow at a 25-30% per annum rate over the next several years. KLA's stock is currently rated as a "1" in the Instrumentation group.

Since our inception, KLA has been continually recognized for excellence:

- Products named in the nation's top 100 list of science innovations, *Science Digest*, 1986, 1987.
- KLA is reported to be the 17th most profitable company based in the Silicon Valley, *Mercury News*, 1987.
- Kenneth Levy (KLA President), recognized as one of the top 10 executives in the U.S., *Electronic Business*, 1986.
- KLA is ranked as one of the top 100 small high-growth companies in the U.S., *Business Week*, 1985.
- Kenneth Levy and Robert Anderson (KLA founders, President and Chairman of the Board, respectively), are recognized as entrepreneurs of the year, *Harvard Alumni Association*, 1985.

If you want more opportunities than guidelines, more potential than protocol, and more of a career than you'll find anywhere else, consider KLA. Call (408) 988-6100 locally or (800) 538-5485 to find out about current position openings. KLA Instruments Corporation, 3530 Bassett Street, P.O. Box 58016, MS 5000, Santa Clara, CA 95052. We are an equal opportunity employer.

# Every day, Hewlett-Packard helps IBM, DEC and Sun realize their true potential.

*we never stop  
asking*

*What if...*

We've been planning it for years. A way to make your present computers work hand in glove with HP systems. So we can build multi-vendor networks that let your departments function as a perfect team.

Our system is as advanced as its name: AdvanceNet. For the first time, it provides the connections you need to integrate PCs, servers, minicomputers and mainframes. In a single office or around the world.

Only HP has what it takes to build systems like this. Powerful computers, instruments, software, printers and plotters. And networking to keep the information flowing.

One key part of the plan made it possible: the decision to design around standards. That protects your investment today and far into the future.

Call us at (716) 223-9950, Ext. 613. We'll show you how to make the most of your potential.

 **HEWLETT  
PACKARD**

# TO THE GRADUATING CLASS OF 1988 — CONGRATULATIONS

Starting with the introduction of the Z-80 microprocessor in 1976, Zilog has stood at the forefront of Integrated Circuit Engineering and product creativity.

Zilog, in our continued commitment to provide customers with the most advanced and cost-effective solutions to their design requirements, has developed the advanced CMOS VLSI Technology needed to integrate more microprocessor and peripheral functions onto a single silicon chip. The benefits are numerous: lower product cost, reduced device size, higher reliability, reduced assembly and test costs, and lower power dissipation.

For Zilog 1988 should show record sales, profits, and order backlog.

If you are interested in learning more about Zilog, contact us. We would like to talk with students who are about to graduate with degrees in:

- Electrical/Electronic Engineering
- Computer Science
- Material Science

Please send your resume to Zilog, Inc., Professional Staffing, Dept. CS, 210 Hacienda Avenue, Campbell, CA 95008. An Equal Opportunity Employer.
