PREFACE TO TWENTY-FIRST EDITION.

TRAVELERS and others making use of this book in recent years have complained of its bulkiness and with the present edition the publishers have begun to condense the matter without curtailing its value, reducing the size of the book by 86 pages. This has been effected mainly by abbreviating the addresses in the alphabetical list, which is supplementary to the state list, where the addresses appear in full. This abridgement, with the unceasing flow of changes and additions, has caused some delay with increased labor and expense but it is the intention to continue the work of contraction in future issues in the hope that the book will be as handy and useful on the road as it is in the office.

We thank all those who have aided in the work of sending in new names and corrected lists and the hope is again expressed that the trade in all quarters will co-operate with us in our endeavor to make the book in every way as reliable as possible, notifying us promptly of all changes in firm names and addresses, and of additions to land or greenhouse area.

CAUTION—The key letters (see pages 15 and 68) should be closely observed in mailing catalogues, circulars and special letters. A good saving in the cost of such printed matter, as well as postage and time, will be made by giving attention to these directions. In addressing the persons or firms named herein, always use the street names and numbers where they are given.

Commercial Floriculture in the United States.

(From the Census of 1910.)

THE great increase of the florist business, both in number of establishments and value of products, in the decade from 1889 to 1909, is shown by the preliminary statement of the results of the thirteenth census as regards this industry. The statement was issued June 25 by the Bureau of Census of the Department of Commerce and Labor, and the report was prepared under the direction of Le Grand Powers, chief statistician, and John Lee Coulter, special agent for agriculture. The report shows that while there was an appreciable increase in number of establishments, the increase in value of products far out-run this. In other words, while there are more florists, they are better off financially, almost twice as rich, as a whole, in fact.

In 1889 there were 8,797 floral concerns, while in 1909 there were 10,614, or 1,817 more. The products of 1889 amounted to but \$18,759,000, against \$34,872,000 in 1909. This means an increase of \$16,113,000, or 85.9 per cent. The percentage of increase in the number of establishments was 20.7. The greatest increase was in the West South Central Division, and there was also a big jump in the Pacific Division.

The following table shows the results of the census taken by States:

Nursery Trade of the United States.

(From the Census of 1910.)

THE number of nursery establishments in 1909, according to the preliminary report of the Census Bureau was 5,582, an increase of 591 or 11.8 per cent in ten years. The value is given at \$21,051,000, an increase of \$10,927,000 or 107.9 per cent in the same decade. This is a very encouraging fact, as it shows the nurserymen to be coming in for a share of the country's increase in wealth. The Middle Atlantic division ranked first and had an increase of 72.6 per cent, which brought the total up to considerably more than four million. However, the greatest increase occurred in the Pacific division, where there was a gain of 377 per cent. In number of establishments the East North Central division led, although falling to fourth in value, not only the Middle Atlantic but the West North Central and Pacific divisions leading it. The greater value of the florist business over the nursery business in the country as a whole was contributed almost entirely by the New England, Middle Atlantic and East North Central divisions. The comparison by divisions and states is shown in the following table:

GRASS SEED AND FLOWER AND VEGETABLE SEEDS.

[Table No. 1. From the Census of 1910].

TABLE No. 1 presents statistics of grass seed and flower and vegetable seeds, by states. As already stated, the acreage from which grass seed and flower and vegetable seeds were raised has not been tabulated. In some cases such acreage was not reported, and in many other cases it would represent a duplication of the acreage reported for hay and forage, flowers and plants, and vegetables. The reported production of flower and vegetable seeds doubtless represents chiefly that of farms producing such seeds for sale, small quantities raised by farmers for their own use presumably being often, if not generally, omitted. Since statements of quantity for all classes of flower and vegetable seeds combined would obviously have no significance, only the total value of these seeds is shown in Table 1. For the country as a whole the value in 1909 was \$1,411,000. The most important states in the production of such seeds in 1909 were California, Illinois, New York, and Ohio.

MINOR SEEDS—ACREAGE, PRODUCTION, AND VALUE: 1909.

[Table No. 2. From the Census of 1910].

Table No. 2 shows, for 1909, the acreage, quantity, and value of the minor seeds produced in the United States as a whole and in the states which lead in the production of each kind. Mustard seed is used mainly as a condiment and sunflower seed probably largely for poultry feed, but the other classes of seed are for the most part raised for the purpose of planting.

It is probable that the quantities reported do not represent the entire production of these classes of seeds, as they were not listed by name in the census schedule. The combined acreage of all these classes of seeds in 1909 was only 81,308, and the total value \$769,000. Of the total acreage reported, 72,497 were devoted to sorghum cane seed. The quantity produced was reported to be 833,707 bushels, valued at \$544,322. Kansas, Nebraska, Texas, and Oklahoma lead in production.

It is believed that in most cases the acreage shown in this table for seeds is separate from and additional to the acreage of the corresponding products, and therefore does not involve duplication.

GRASS SEED—PRODUCTION AND VALUE.

[Table No. 3. From the Census of 1910.]

Table No. 3 shows, by geographic divisions, for 1909 and 1899, the total quantity and value of grass seed produced, and also, for 1909, the production and value of the leading classes. The acreage of grass seed is not shown, for the reason that in most cases it would involve duplication of the acreage reported for the grasses themselves under hay and forage crops.

The total value of the grass seed produced in 1909 was \$15,138,000, which constitutes 0.3 per cent of the total value of farm crops and rep-

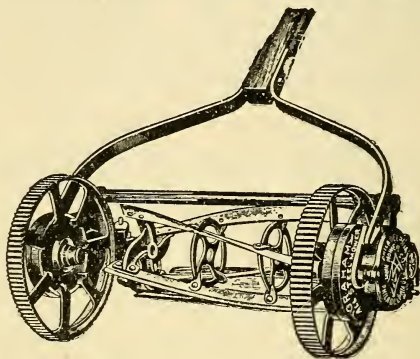

resents an increase of 84 per cent over the value in 1899. Much the larger part of the production of grass seed, considered as a group, was reported from the West and East North Central divisions. As measured by value, clover seed is the most important kind of grass seed, followed by timothy and alfalfa. The East North Central division leads in the production of clover seed, the West North Central in that of timothy seed and millet seed, and the Mountain in that of alfalfa seed.

PARK SUPERINTENDENTS.

While nearly all given in this list have the official title of Superintendent there are some who do not. In some cities the curiosities of city government make one of the Park Commissioners Superintendent in fact, while in others the Chairman of the Park Committee of the Council performs the functions of Superintendent. These are given in the list without comment, as they are the men in charge, and are Superintendents in fact if not in name. We have aimed to give only those who are in charge of parks of some little extent and importance

The MEYER Green

SILKALINE

Used by Retail Florists for mossing funeral designs,
tying bunches, etc. is **The Only Article That Should be**
Used by growers for stringing Smilax and Asparagus, as
it will not fade or rot in the greenhouse. The **Meyer**
Silkaline was the first green thread to be introduced
among Florists and Growers. It is handled by the best
houses everywhere, but it should be ordered by name—
Meyer's Silkaline—to be sure of getting the genuine
article. Do not accept substitutes.

If your jobber cannot supply you, order direct of the
manufacturers. Price for any size or color, \$1.25 per lb. Sizes "F" fine, "FF"
medium and "FFF" coarse.

JOHN G. MEYER & CO., Lowell Thread Mills, Lowell, Mass.
1495 Middlesex St.,
Silkaline also is made in all leading colors, as violet, for bunching violets,
and also for tying fancy boxes.

“Monitor”

Patented.

The Seed Cleaner Used By 95% of the Largest Dealers

The “Monitor” polishes, cleans and grades seeds, handling practically every variety of field, vine, flower and garden seeds; it will clean and grade more perfectly and with less loss of good seeds than any other machine built today—it is this remarkable adaptability of the “Monitor” which makes it a favorite with practically all of the largest seed growers and dealers in this and many foreign countries. It is also used by seed experts for experimental tests in laboratory work. It can be used for straight cleaning and grading, or for recleaning of screenings, tailings or sweepings which contain valuable seed. The only machine which removes the dead seed in clover and alsyke without loss in shrinkage. **Send for illustrated folder No. 510.**

# KEY.

- F** Florists who do a general local trade, having greenhouses and retailing the product of same.
- G** Florists who grow cut flowers or plants for the wholesale market and who do not sell at retail. Almost always within a short distance of a large city.
- FG** Includes both above classes so far as we are at present advised.
- R** Retail store florists who have no glass of their own. Nearly always in the larger cities.
- D** Wholesale commission dealers in cut flowers.
- N** Nurserymen.
- X** Those who are both Nurserymen and Florists.
- S** Seedsmen.
- SGr.** Growers of seeds or bulbs or other horticultural specialties (mostly on contract).
- Z** Those who are both Seedsmen and Florists.
- U** Those who are both Seedsmen and Nurserymen.
- A** Those who combine all three branches, viz': Florists, Nurserymen and Seedsmen.

**GREENHOUSE CAPACITY.**—Where information has been secured regarding greenhouse glass, the amount is indicated in thousand feet by figures following a dash. Thus—5 after a name signifies that the party named reports about 5,000 square feet of glass. A \* indicates that he has less than 1 000 feet.

**NURSERIES.**—Letter A followed by figure indicates number of acres in nursery. Thus—A. 40 indicates forty acres reported devoted to nurseries.

## KEY.

- F** Florists who do a general local trade, having greenhouses and retailing the product of same.  
**G** Florists who grow cut flowers or plants for the wholesale market and who do not sell at retail. Almost always within a short distance of a large city.  
**FG** Includes both above classes so far as we are at present advised.  
**R** Retail store florists who have no glass of their own. Nearly always in the larger cities.  
**D** Wholesale commission dealers in cut flowers.  
**N** Nurserymen.  
**X** Those who are both Nurserymen and Florists.  
**S** Seedsmen.  
**SGr.** Growers of seeds or bulbs or other horticultural specialties (mostly on contract).  
**Z** Those who are both Seedsmen and Florists.  
**U** Those who are both Seedsmen and Nurserymen.  
**A** Those who combine all three branches. viz': Florists, Nurserymen and Seedsmen.

**GREENHOUSE CAPACITY.**—Where information has been secured regarding greenhouse glass, the amount is indicated in thousand feet by figures following a dash. Thus—5 after a name signifies that the party named reports about 5,000 square feet of glass. A\* indicates that he has less than 1,000 feet.

**NURSERIES.**—Letter A followed by figure indicates number of acres in nursery. Thus—A. 40 indicates forty acres reported devoted to nurseries.

# Firms That Issue Catalogues.

Below we give a list of American Seedsmen, Florists and Nurserymen; also Seed and Bulb Growers for the wholesale trade, that issue catalogues. The letters at the left of the names indicate the branch of the trade represented in the catalogue, and where more than one letter is used the position of each shows the relative importance in that catalogue of the several branches represented therein. Thus, S, indicates that the catalogue is devoted entirely to seeds and the usual garden supplies found in a seedsman's catalogue. S. F. means that the publishers of the catalogue are both seedsmen and florists, but that more space is devoted to seeds than to plants. F. S. N. indicates that the catalogue covers all three branches and that plants have most space, seeds next, and nursery stock the least. And so on through all the various combinations, S. representing the seed division, F. the florist or ornamental plant division, and N. the nursery stock, or tree and shrub department. Where the catalogue is devoted mainly to one specialty, this is given in parenthesis after the name of the firm issuing it.

All firms that issue catalogues are requested to mail a copy to our Directory Department.

N. B.—Most of those marked S Gr. or B Gr. (bulb growers), and F Gr. do not issue Retail Catalogues.

# SOCIETY OF AMERICAN FLORISTS.

## ITS ORGANIZATION.

The Society of American Florists was born at Chicago, Ill., on June 19, 1884. Previous to this time there had been no organization of any kind among the florists and gardeners of the country, although many of them were identified with the various horticultural societies and a few were members of the Nurserymen's Association. To a few far seeing individuals it seemed that the florists were numerous enough and their business strong enough to maintain a separate national organization of their own. So in response to a call, about thirty or forty gentlemen assembled in Chicago on the 19th of June, 1884, and there laid the foundations of the Society of American Florists. One of the objects sought to be accomplished by organization was some plan for insurance of glass houses against injury by hail; indeed it is doubtful if the Society had materialized for many years had it not been for this impetus. At the Chicago meeting a preliminary organization was effected and an executive committee met at Pittsburg, Pa., in February, 1885, where the program and other arrangements were prepared for the first annual convention to be held in Cincinnati, O., in the following August.

The society was incorporated by special act of Congress, March 4, 1901.

## AMERICAN CARNATION SOCIETY.

The American Carnation Society was organized at Philadelphia, October 15, 1891, with an initial membership of 50. The aims of the Society are as follows: To increase the general interest in the cultivation and use of the carnation; to improve the standard of excellence in the flower; to improve the methods of cultivation and methods of placing it upon the market; to increase its use as a decorative flower; to improve the methods of growing plants and rooted cuttings and marketing the same; to infuse into the grower a more thorough understanding of the general rules of successful business management; to properly supervise nomenclature; to stimulate the growing and introduction of improved seedlings and crosses, by a system of exhibitions and awarding valuable prizes. At the Philadelphia meeting arrangements were made for a general meeting at New York City the following month.

The society has adopted the following scale of points for judging carnations at its exhibitions:

### SCALE OF POINTS FOR JUDGING CARNATIONS.

|                |     |
|----------------|-----|
| Color.....     | 25  |
| Size.....      | 20  |
| Calyx.....     | 5   |
| Stem.....      | 20  |
| Substance..... | 15  |
| Form.....      | 10  |
| Fragrance..... | 5   |
| Total.....     | 100 |

To secure a certificate or preliminary certificate a carnation must score eighty-five or more points. In the general classes a score of eighty-five or more will be required to award a carnation first premium. This is made a rule so as to bring and keep the shows up to the highest possible standard.

## FLORISTS' HAIL ASSOCIATION OF AMERICA.

The Society of American Florists, in their preliminary address to the florists of America; which was issued soon after the first preliminary meeting in Chicago June 19, 1884, included the following: "One of the first intentions of the Society of American Florists is to provide in the best manner an insurance against loss of glass by hail."

The Society thus having had its inception, subjected itself to provide in the best manner an insurance against loss by hail. Several, if not all, of its original charter members felt in duty bound to make an attempt to carry out some plan of this kind, and of course when that seemed most feasible. It was in this spirit that in spite of many objections the Florists' Hail Ass'n was at last organized.

This first definite action which resulted in the organization of this Association was taken by the Society Friday, Aug. 20, 1886, being a close vote of the Society (67 to 55), after full discussion the evening of Aug. 20, 1886, in Horticultural Hall, Philadelphia, when the following committee was appointed by President Craig: J. M. Jordan, St. Louis, Mo., chairman; Henry A. Siebrecht, New Rochelle, N. Y.; E. G. Hill, Richmond, Ind.; J. G. Esler, Saddle River, N. J.; J. C. Vaughan, Chicago, Ill.

The committee met in New York City a short time after this, and formulated a plan of organizing, a constitution and by-laws, and in the spring of 1887 the Florists' Hail Association of America was incorporated by an act of the Legislature of the state of New Jersey.

The first officers were: J. M. Jordan, President; Edwin Lonsdale, Vice-President; E. G. Hill, Treasurer, and J. G. Esler, Secretary. Directors: J. D. Carmody, J. C. Vaughan, Jas. Horan, B. F. Dorrance, Edwin Lonsdale, Peter Henderson and J. M. Jordan.

From this organization the growth of this Association has been steady, and notwithstanding heavy losses have been paid, all assessments have been promptly met. The expenses of the organization in the way of salaries, etc., are very light.

# THE AMERICAN ASSOCIATION OF NURSERYMEN.

[Until 1887, the American Association of Nurserymen, Florists and Seedsmen.]

## ITS ORGANIZATION.

At the Crystal Lake meeting of the Northern Illinois Horticultural Society in January, 1876, a proposition was made by Dr. John E. Ennis, of Clinton, Iowa, for a National Centennial meeting of Nurserymen, Florists, Seedsmen and kindred interests, to be held in the city of Chicago at some day to be agreed upon. The proposition was received with favor and the following committee appointed for the purpose of carrying it out: Dr. John E. Ennis, Clinton, Iowa; L. K. Scofield, Freeport, Ill.; J. S. Stickney, Wauwatosa, Wis.; A. R. Whitney, Franklin Grove, Ill.; Edgar Sanders, Chicago, Ill.; D. Wilmot Scott, Galena, Ill.; Lewis Ellsworth, Naperville, Ill.

At an informal meeting in Chicago, the following temporary officers were elected: Edgar Sanders, President; D. Wilmot Scott, Secretary; A. R. Whitney, Treasurer. A call was issued to Nurserymen, Florists, Seedsmen, Horticultural Implement makers and dealers in supplies for Nurserymen and Florists in the United States, for a Centennial meeting in the Exposition Building, Chicago, commencing Wednesday, June 14, 1876, at 10 A. M., and to continue two days.

### FIRST ANNUAL MEETING, CHICAGO, June 14 and 15, 1876.

**OFFICERS.**—President, E. Moody, Lockport, N. Y.; Secretary, D. Wilmot Scott, Galena, Ill.; Treasurer, A. R. Whitney, Franklin Grove, Ill.

**EXECUTIVE COMMITTEE.**—T. S. Hubbard, Fredonia, N. Y.; L. K. Scofield, Freeport, Ill.; J. J. Harrison, Painesville, O.

Vice-Presidents were appointed for a portion of the States, the remainder being left for action by the Executive Committee. Sixty-three members were enrolled. No essays were read at this meeting. In the way of local hospitalities a trip to the South Parks was given the members of the Association.

### SECOND ANNUAL MEETING, CHICAGO, June 20, 21 and 23, 1877.

**OFFICERS.**—President, J. S. Stickney, Wauwatosa, Wis.; First Vice-President, J. J. Harrison, Painesville, O.; Secretary, D. Wilmot Scott, Galena, Ill.; Treas., A. R. Whitney, Franklin Grove, Ill.

**EXECUTIVE COMMITTEE.**—T. S. Hubbard, Fredonia, N. Y.; Dr. J. E. Ennis, Clinton, Ia.; Chas. E. Bowen, Detroit, Mich.; H. E. Hooker, Rochester, N. Y.; E. Moody, Lockport, N. Y.

Though matters of interest to the trades represented were discussed, no essays were read at this meeting. Fifty-eight members responded to the call. Mr. John B. Drake, of the Grand Pacific Hotel, entertained the members of the Association at a banquet; a visit was again paid to the South Parks, and to the conservatory on the roof of the Palmer House.

[We have been unable to obtain the records for 1878 and 1879, though we have tried every source we could think of. The record that we give was gathered piecemeal from various ones, and the history of this important organization seemed in a fair way to be lost thus early. Though the proceedings of every meeting were printed, we found no one who possessed a complete set of the reports.]

### FIFTH ANNUAL MEETING, CHICAGO, June 16, 17 and 18, 1880.

**OFFICERS.**—President, N. H. Albaugh, Tadmor, O.; First Vice-President, G. B. Brackett, Denmark, Ia.; Secretary, D. Wilmot Scott, Galena, Ill.; Treasurer, A. R. Whitney, Franklin Grove, Ill.

# THE AMERICAN SEED TRADE ASSOCIATION.

The idea of holding a Seed Trade Convention originated with those of the trade resident at Rochester, N. Y., who, early in May, 1883, issued a call which was sent to the seedsmen generally throughout the country. As stated in the call, the objects of the Convention were to discuss: 1st. Protection against unjust claims for damages; 2d. Postage on seeds; 3d. Tariff on seeds. The project met with such general favor that no time was lost in calling a meeting, which was held in New York City, June 12, 13 and 14, 1883.

The minutes of the Convention show that when it was called to order, and list of invitations read, thirty-five gentlemen were present and responded, and upon organization R. A. Robbins (Johnson, Robbins & Co.), Wethersfield, Conn., was elected president, and James Y. Murkland (Young & Elliott), New York, secretary and treasurer.

The introductory to the records of the first meeting reads:

"It is hoped that the American Seed Trade Association will become just what it ought to be; what it is intended to be—a national organization. We desire to enroll every worthy seedsman from Maine to California, and respectfully invite you to apply for admission. An annual gathering will induce many to attend, even for the sake of personal contact, and from all points of the compass we hope to see the seedsmen of our land exchange courtesies which may enable them in the future to transact business with greater confidence."

The Second Annual Convention was held in Boston, June 10 to 12, 1884. C. H. B. Breck (Jos. Breck & Sons), Boston, was elected president; J. A. Bolgiano (J. A. Bolgiano & Sons), Baltimore, vice-president, and Mr. Murkland, re-elected. Fifty-three members were enrolled.

The Third Annual meeting was at Rochester, N. Y., June 9 to 11, 1885, when the present Constitution and By-Laws were adopted. The officers elected were C. W. Crossman, Rochester, president; J. W. Bolgiano, re-elected; W. H. Maule, Philadelphia, second vice-president; and James Y. Murkland, re-elected; with C. L. Allen, Garden City, N. Y., as assistant secretary. Sixty-three members were enrolled.

The Fourth Annual Meeting was held at Niagara Falls, N. Y., August 3 to 5, 1886. The officers elected were John Fottler, Jr., Boston, president; F. E. McAllister, New York, first vice-president; W. Atlee Burpee, Philadelphia, second vice-president; Albert McCullough, Cincinnati, secretary and treasurer; and C. L. Allen, re-elected. Membership was the same as at the preceding meeting.

The Fifth Annual Convention was held in Philadelphia, June 14 to 16, 1887. The following officers were elected: Wm. Meggat, Wethersfield, Conn., president, W. Atlee Burpee, Philadelphia, first vice-president; Geo. S. Haskell, Rockford, Ill., second vice-president; Albert McCullough and C. L. Allen, re-elected. Eighty-three members were enrolled.

The Sixth Annual Convention was held in Chicago, June 12 to 14, 1888. Officers elected were Geo. S. Haskell, Rockford, Ill., president; Jno. H. Allan, Picton, Ont., vice-president; Albert McCullough, secretary and treasurer.

The Seventh Annual Convention was held in Washington, June, 1889. Officers elected: Herbert W. Johnson, Philadelphia, president; J. C. Vaughan, Chicago, vice-president; Albert McCullough, re-elected secretary and treasurer.

Eighth Annual Convention at Saratoga, N. Y., June 10, 1890. Officers elected: Albert McCullough, Cincinnati, president; Z. De Forest Ely, Philadelphia, vice-president; John Fottler, Jr., Boston, secretary and treasurer.

Ninth Annual Convention at Cincinnati, O., June, 1891. Officers elected: F. Barteldes, Lawrence, Kan., president; Z. De Forest Ely, Philadelphia, vice-president; A. L. Don, New York, secretary and treasurer.

The Tenth Annual Convention was held in Hartford, Conn., Allyn House, June 14 to 16, 1892. Officers elected: J. C. Vaughan, Chicago, president; Z. De Forest Ely, Philadelphia, vice-president; A. L. Don, New York, re-elected secretary and treasurer.

FIFTH ANNUAL MEETING AND EXHIBITION, NEW YORK, 1914.

CHRYSANTHEMUM SOCIETY OF AMERICA.

This society was organized at Buffalo, N. Y., August 22, 1889, under the name of American Chrysanthemum Society, which was changed to Chrysanthemum Society of America at the meeting at St. Louis, Mo., Aug. 10, 1893.

The aims of the society are to supervise the dissemination of new varieties, and prevent as far as possible the introduction to commerce of poor or worthless varieties, and to insure correct nomenclature; to stimulate the formation of local chrysanthemum societies; to encourage better methods of culture.

The principal work that the society has so far taken in hand is the revision of nomenclature, a very important matter in view of the fact that the number of seedlings now annually introduced is very large. Before names of chrysanthemums are published in catalogues, or in any way the new varieties are offered for sale, they should be submitted to the secretary of this society to ascertain whether or not such names have been already appropriated. Priority of claim can be established by means of the official register of chrysanthemum names kept by the society. In this way duplication of names is avoided. The society in addition to providing means for the prevention of innocent duplication of names keeps careful watch for other synonyms, and when such are discovered at once points them out to its members and the trade generally.

The meetings of the society were held during the annual conventions of the S. A. F. from 1889 to 1901; in 1902 the first annual convention, with a lengthy programme of important papers, was held at Chicago, November 11-15, with an exhibition in connection with the annual exhibition of the Horticultural Society of Chicago. At the annual meeting in 1894, committees, of three members each, were appointed from the membership at, or near, Boston, New York, Philadelphia, Chicago and Cincinnati, to be in session in those cities each Saturday during October and November, to judge new varieties submitted to them. The work of these committees has been continued each year to the close of last year under a scale of points which was revised at the Detroit meeting of 1899, as follows:

# Deming Hand and Power Pumps

For Greenhouse Water Systems

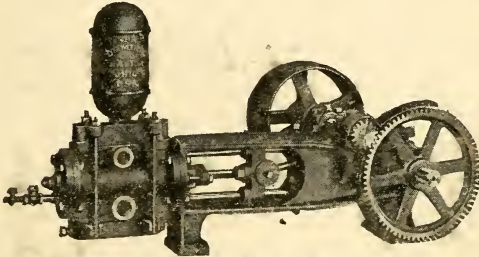

Fig. 708 horizontal double-acting power pump for operation by gasoline engine or electric motor. Good for 100 lbs. pressure.

IT often is much more economical to install a private greenhouse water supply system than to buy water from the city. We make a line of hand and power pumps especially adapted for this purpose.

☞ If you are interested in spray pumps, write also for our complete spray pump Catalogue.

# Burpee's Blue List

## FOR 1913

**T**HIS the most complete catalogue published for Market Gardeners, Truckers and Florists. For the planter who "knows" it contains complete lists of all that is best in vegetables and flowers, while the grower who is uncertain as to the best varieties suited for his purpose may be guided by the bull's-eye  placed after what is known to be best. In addition full descriptions are given of many new and most valuable varieties.

### Burpee's Blue List for 1913

contains 148 pages with hundreds of half-tone and engraved illustrations. Within the pages of this catalog we have condensed an experience of thirty-four years both in handling and the actual growing of seeds.

If you garden for profit (that is, sell your products in the market) you are entitled to a copy of this complete and easily understood catalog, but if you are a private planter please do not ask for a copy, as we must protect the Market Gardener, Trucker and Florist.
