# TEA DRINKERS!

---

The true satisfaction of tea-drinking lies in the quality and flavor of the tea you use. Salada Tea is blended by experts for flavor and fragrance from the finest teas of as many as twenty high-altitude gardens in Ceylon, India and Java.

Tea is the most economical beverage in all the world (except water), and Salada Tea is the lowest priced fine tea you can buy.

Why not combine quality with economy and—

*Insist On*

# 'SALADA' TEA

"Fresh from the Gardens"

Number One Hundred and Forty-Four

THE  
(OLD)  
**FARMER'S ALMANACK,**

CALCULATED ON A NEW AND IMPROVED PLAN  
FOR THE YEAR OF OUR LORD

**1936**

Being BISSEXTILE or LEAP YEAR, and (until July 4)  
160th of American Independence.

FITTED FOR BOSTON, BUT WILL ANSWER FOR ALL NEW ENGLAND STATES

Containing, besides the large number of Astronomical Calculations  
and the Farmer's Calendar for every month  
in the year, a variety of

**NEW, USEFUL, AND ENTERTAINING MATTER.**

ESTABLISHED IN 1793

**BY ROBERT B. THOMAS.**

“Observe the circling year how unperceived  
Her seasons change! Behold! by slow degrees,  
Stern winter tam'd into a ruder spring!  
The ripen'd spring a milder summer glows.”

*From the Title Page, Old Farmer's Almanac,  
The Fourth Issue, 1796.*

COPYRIGHT, 1935, BY  
MABEL M. SWAN,  
BROOKLINE, MASS.

Sold by Booksellers and Traders throughout New England and Atlantic States.

## TO PATRONS AND CORRESPONDENTS

CARROLL J. SWAN  
*Publisher of*  
*The Old Farmer's Almanac*  
 1933-1934-1935

THROUGH the death on March 1, 1935, of Colonel Carroll J. Swan, the late publisher of *The Old Farmer's Almanac*, this company has become the present publishers.

Colonel Swan's great interest and belief in the widespread popularity and usefulness of the Almanac has carried its circulation into large figures during the past three years, and yet he never changed the policies or traditions from the old days.

It is the intention of the present publishers to carry on in this same spirit, and this issue, the 144th, is offered to the many friends of the *Almanac* with the wish that 1936 may point the way to a new era of prosperity and happiness for all.

LITTLE, BROWN AND COMPANY

We are honored to bring to the readers of *The Old Farmer's Almanac* this message from the President of the United States:

### THE WHITE HOUSE

WASHINGTON

IT is a pleasure once more to extend good wishes to the readers of *The Old Farmer's Almanac*.

We continue in Washington our endeavors to increase the security and the happiness of a larger number of people in all occupations of life and in all parts of the country; to give them more of the good things of life; to give them a greater distribution not only of wealth in the narrow terms but of wealth in the wider terms.

We have come to realize that, if the farm population of the United States suffers and loses its purchasing power, the people in the cities of necessity suffer with them. Empty pocketbooks on the farm don't turn factory wheels in the city.

It is a good omen for government, for business, for bankers and for city dwellers that the nation's farmers are becoming articulate and that they know whereof they speak.

Very sincerely yours,

*Franklin D. Roosevelt*

August 20, 1935

## SNOW IS THE KINDEST

Snow is the kindest. Foliage is cruel.  
 All things are covered over in the end.  
 Sand covers Egypt and the ocean knows  
 More than we know of history. Let snow  
 Cover my bones, not leaves where the snake dwells  
 But snow and snow in springtime thawing sweetly.  
 The green vine creeps up from the earth, the jungle  
 Dissuades the temples from their gods. Let me  
 Who have seen worlds engulfed luxuriantly  
 Live where the snow will bite the clinging tendril.  
 Death has no terror like the teeming life  
 Of growing green things unmolested. Death  
 Has no terror when the snow at spring  
 Sweetly discloses in a freshet steaming  
 With crocuses and daffodils and squills,  
 Green leaves and with them flowers beyond our dreaming.

ROBERT S. HILLYER,

*Associate Professor of English  
 at Harvard University.*

"It is by our works and not by our words we would be judged: these we hope will sustain us in the humble though proud station we have so long held. . . .

*W. D. Thomas.*

## EXPLANATIONS FOR CALENDAR PAGES.

The Calculations are made for the latitude and longitude of Boston and are in *Eastern Standard Time*, i. e., the time of the 75th meridian West from Greenwich, which is 16 minutes behind Boston mean time; and for general purposes are sufficiently accurate for all parts of New England. If, however, greater accuracy is desired, regard may be had to the following precepts.

The Table given below contains corrections in minutes of time for a number of important places in New England, and any other place in New England can use the correction of the place in the Table which is nearest in longitude to itself.

For the **Rising and Setting of the Sun, Moon and Planets** add tabular quantity if longitude from Boston is West, but subtract it if East; and this will give the value when the place is in or near the same latitude as Boston. When the latitude of the place differs considerably from that of Boston, the correction will also be right when the celestial body is on or near the Equator; but when it is remote from the Equator so much accuracy cannot be expected.

For **Sun Fast**, subtract tabular quantity if longitude from Boston is West, but add it if East.

For **Moon Souths**, add tabular quantity if longitude from Boston is West, but subtract it if East.

	<i>East.</i>		<i>West.</i>		<i>West.</i>

If during any part of the year 1936 there is in operation in any State or City of New England any of the so-called "*daylight saving*" laws or ordinances, proper allowance for that should be made in applying the figures of time given in the Almanac, which figures, as above stated, are all herein given in *Eastern Standard Time*.

The **Times and Heights of the Tides at High Water** are for the Port of Boston (Navy Yard). The times of High Water are given on the left hand Calendar pages under "Full Sea." The heights of High Water in feet and tenths are given among other data on the right hand Calendar pages under "Aspects," &c. The heights are reckoned from Mean Low Water; each day has a set of figures—many of them preceded by the word "Tides." The upper figures give the height of the morning (A.M.) tide, and the lower that of the evening (P.M.) tide.

### Names and Characters of the Principal Planets.

☉☉☉ The Sun.	♀ Venus.	♃ Jupiter.	♆ Neptune.
☾☾☾ The Moon.	♁ The Earth.	♄ Saturn.	♇ Pluto.
☿ Mercury.	♂ Mars.	♅ Uranus.

### TIDE CORRECTIONS.

To obtain the time and height of high water at any place, apply the differences in accordance with the sign given to the daily predictions for Boston (Commonwealth Piers). Where a value in the "height difference" column is preceded by a \*, the height at Boston should be multiplied by this ratio.

	Time Differ- ence h. m.	Height Differ- ence Feet		Time Differ- ence h. m.	Height Differ- ence Feet

So days went on: a week had passed  
 Since the great world was heard from last.  
 The Almanac we studied o'er,  
 Read and reread our little store  
 Of books and pamphlets, scarce a score;

JOHN GREENLEAF WHITTIER

D. M.	D. W.	Aspects, Holidays, Heights of High Water, etc.	Farmer's Calendar.
1	W.	Circumcision. Tides { 9.9 9.4	<p><b>The Farm Inventory</b></p> <p>This is the month for the farmer to make a list or inventory of what he owns on his farm. This should include his livestock, tools and equipment, hay, grain and other consumable supplies.</p> <p>It is not necessary to have a set of complicated records,—in fact the easier and simpler they are, the better. The record book should have four columns, one for the name of the item, a second for the date purchased or produced, a third for the cost, and a fourth for the present estimated value. Of all the different kinds of records for studying the details of the farm business, no account gives more information for the time and work required than does the annual inventory.</p> <p>One of the easiest and best ways for a farmer to secure credit is by taking an inventory of his property and filing a credit statement with his banker. A banker always wants to know what you own as well as what you owe.</p> <p>An annual farm inventory will show a farmer just where he stands financially,—whether he is gaining or losing, and how much. The inventory also provides a valuable property list in case of fire. It is almost impossible for anyone to remember all the articles he owned when making out a list for the insurance adjuster. Write your State College for a copy of a farm inventory and record book.</p>

From the meadow your walks have left so sweet  
 That whenever a March-wind sighs  
 He sets the jewel-print of your feet  
 In violets blue as your eyes,  
 To the woody hollows in which we meet  
 And the valleys of Paradise.

ALFRED. LORD TENNYSON

Or, on that bank, feel the west-wind  
 Breathe health and plenty; please my mind,  
 To see sweet dew-drops kiss these flowers,  
 And then washed off by April showers;  
 Here, hear my Kenna sing a song:  
 There, see a blackbird feed her young,

**A Disinfectant Whitewash**

April is not only the "moving" month but the "clean-up" month. Many places about the premises may be cleaned and improved in appearance by a coat of whitewash. A disinfectant whitewash especially suitable for interior use in poultry houses, stables, garages, cellars, etc., may be cheaply prepared and easily applied.

The following formula is used:—

- Hydrated lime ..1½ pecks
- Table salt .....2 lbs.
- Commercial lime-sulphur ..... 4 gals.
- Water ..... 40 gals.

If a smaller quantity is desired, mix the same ingredients in the following proportions:—

- Hydrated lime ....2 pints
- Salt ... 3 tablespoonfuls
- Lime-sulphur .... 3 pints
- Water ..... 4 gallons

An ounce of alum per gallon of whitewash should be added to increase the adhesiveness. A pound of any ordinary laundry soap dissolved in a gallon of boiling water and added to about five gallons of the thick whitewash will give it a gloss almost like oil paint.

The whitewash may be applied with a brush, but to insure penetration in cracks and crevices, the operation is preferably done with a high-pressure spray pump.

Apple orchards, the trees all cover'd with blossoms;  
 Wheat fields carpeted far and near in vital emerald green;  
 The eternal, exhaustless freshness of each early morning;  
 The yellow, golden, transparent haze of the warm afternoon sun;  
 The aspiring lilac bushes with profuse purple or white flowers.

WALT WHITMAN

D. M.	D. W.	Aspects, Holidays, Heights of High Water, etc.	Farmer's Calendar.
1	Fr.	St. Philip & St. James, $\delta \Psi \text{C. C}$ on Eq. $\{ \begin{smallmatrix} \$8.4 \\ \$8.8 \end{smallmatrix} \}$	<b>Caterpillar Pests</b>
2	Sa.	First sod of Can.-Pac. R.R. turned, 1881. $\{ \begin{smallmatrix} \$8.4 \\ \$9.0 \end{smallmatrix} \}$ Cool, east-	Isn't it a shame to see our forests, shade trees, and fruit trees defoliated by caterpillar pests. While we notice the damage that caterpillars do mostly on trees, the various species feed on practically all plants.
3	D	3rd. S. at. Fas. $\text{C in Apo.}$ $\{ \begin{smallmatrix} \$8.5 \\ \$9.3 \end{smallmatrix} \}$	And isn't it a curious fact that this ugly creepy insect often changes into a beautiful butterfly. The moth, miller or butterfly is the adult form that lays the egg, the caterpillar the larval form or the stage during which the insect makes most of its growth. They are for this reason voracious feeders and soon defoliate a tree.
4	M.	Intern'l Econ. Conf. opened at Gen., 1927. $\{ \begin{smallmatrix} \$8.6 \\ \$9.5 \end{smallmatrix} \}$ early winds.	There are caterpillars of two general classes, namely: (1) those that are general feeders and live on many different kinds of plants such as the brown tail and the gypsy moth; (2) those that live on one plant or a few closely related plants as, for example, the tent caterpillar on apple and wild cherry.
5	Tu.	Wm. Penn published his government for colony of Pa., 1682. $\{ \begin{smallmatrix} \$8.7 \\ \$9.7 \end{smallmatrix} \}$	If the gypsy moth, the browntail and the tent caterpillar could be eliminated, the rest would not trouble us very much, since they are held in check by natural parasites. The first three may be controlled by spraying affected trees with arsenate of lead when the caterpillars are just hatched. Destroying the winter nests of the browntail, and the egg clusters of the gypsy and tent caterpillars also helps. The problem of control is a community problem and can be solved best by combining community and individual efforts.

In June 'tis good to lie beneath a tree  
 While the blithe season comforts every sense,  
 Steeps all the brain in rest, and heals the heart,  
 Brimming it o'er with sweetness unawares,  
 Fragrant and silent as that rosy snow  
 Wherewith the pitying apple-tree fills up  
 And tenderly lines some last-year robin's nest.

Look out for the first sign of Mexican bean beetles and do not let them get ahead of you. Before the flowers have dropped, use a poison spray of magnesium arsenate in the proportion of 2½ level table-spoons to a gallon of water. There are various non-poisonous proprietary sprays to use after the beans have formed, the most effective of them containing the new principle, rotenone or derris. As soon as the bean crop has been gathered, pull up the vines and burn them to destroy beetles and eggs. Lima and pole beans are less subject to this pest than the more tender-leaved kinds. If the weather is dry, give the flower garden a good soaking with the hose, letting it lie in one spot until the ground is wet to a depth of several inches. Merely sprinkling the top of the ground tends to draw the roots to the surface and expose them to the heat and drought. In transplanting tomatoes, cabbages or flower seedlings, do the work, if possible, directly after a good rain. Otherwise soak the young plants thoroughly before lifting, and move them late in the day. Stake up delphiniums and other tall-growing perennials before they are beaten down by storms. Your lilacs will bloom better next year if you snip off the withered flower-clusters.

Margaret S. Watson

JULY hath 31 days.

[1936

When the heat like a mist veil floats,  
And poppies flame in the rye,  
And the silver note in the streamlet's throat  
Has softened almost to a sigh,  
It is July.

In these days of luxury and may we say extravagance, nearly every house lot in the country has a portion of the grounds devoted to ornamental planting. Before undertaking such ornamental planting it is well to stop and consider whether it is going to be possible to give it the needed care. A well tended lot kept smooth and clean is more pleasing to look upon than a more elaborate garden neglected and down at the heel.

If you already have trees or shrubs growing, try to imagine what they are going to become in a few years and plant accordingly. If you are about to plant, consider what you want to accomplish: is there any object which you want to hide? Have you trees which give shade, and do you want the shade where it is? Do not expect a hedge of any kind to grow where trees shade the surface and fill the ground with roots.

Well, then, with some of the above questions in mind, plow or dig over the area you want to plant and sow it to clover in the autumn, then take a rest for the winter and study nursery catalogues and other people's gardens and read your Old Farmer's advice for November.

AUGUST hath 31 days.

[1936

The yellow goldenrod is dressed  
 In gala-day attire;  
 The glowing reedwed by the fence  
 Shines like a crimson fire;  
 And from the hot field's farthest edge  
 The cricket's soft refrain  
 With mellow accent tells the tale  
 That August's here again.

HELEN MARIA WINSLOW

D.M.	D.W.	Aspects, Holidays, Heights of High Water, etc.	Farmer's Calendar.
1	Sa.	Lammas Day. ♀ ♀ ♀. □ ⊕ ⊙. { 8.4 10.1	<p><b>Services and Laws</b></p> <p>There are two groups of "services" every farmer should know about and use. One deals with marketing and regulatory work, the other with farm problems of production, harvesting, feeding, etc.</p> <p>The first are offered by departments of agriculture and include among other things market news—is this information used and of value? Well, you should have heard the protest made when your Uncle Sam decided to eliminate the market news service in 1933, and you should read some of the letters that come to my desk commenting on the market news we broadcast daily.</p> <p>The second group are offered by the extension services. There is a competent staff in every county, and they are always willing to help with your farm and garden problems. If your question concerns dairy, poultry, fruit, or gardening, they will find the correct answer for you. They will also help the rest of the family because the home department staff is there especially for the rural homemaker, and then there are the many 4-H club activities for the boys and girls.</p> <p>During the past year several states have passed "fresh egg" and "potato grading" laws. These laws are of importance to both producer and consumer. Be sure that you know all about them. It pays to keep up with agricultural legislation.</p> <p>E. J. Rowell, Director                      Agricultural Programs WBZ and WBZA.</p>

Graceful tossing plumes of gold,  
 Waving lowly on the rocky ledge;  
 Leaning seaward, lovely to behold,  
 Clinging to the high cliff's ragged edge;  
 Burning in the pure September day,  
 Spike of gold against the stainless blue,  
 Do you watch the vessels drifting by?  
 Does the quiet day seem long to you?

Early September is the best time for dividing peonies and the "last call" for transplanting irises. It is the best time for moving spring-flowering plants of any kind.

Plant *Lilium candidum* (the Madonna lily) as early as you can get the bulbs, so that they can make their rosettes of leaves before cold weather. They need to have only two inches of soil over the tops of the bulbs, and no manure.

Most of the spring-flowering bulbs should go into the ground this month, except the tulips which are better planted during October or even into November if the ground is not frozen.

Take up good plants of nicotiana, African marigold, dwarf ageratum and other annuals for bloom in the sunny window.

Pick pears before they are ripe and spread out in a dark place where you can watch them carefully.

Do not burn the leaves that are raked off the lawn. If not used as bedding for animals, add them to the grass clippings, etc. in the compost heap, where they will make valuable fertilizer.

Fall plowing of the vegetable garden helps materially in destroying such pests as the corn-borer and others which winter over underground.

Margaret S. Watson

OCTOBER hath 31 days.

[1936

October morning! How the sun  
Glitters on glowing shock and sheaf,  
On apple crisp with mellow gold,  
On wonder-painted leaf!

This is a good time to get rid of low producing cows rather than feed and house them during the winter. A small herd of good cows should yield a fair profit over feed costs, but a herd made up of poor cows and good cows will yield small profit, if any.

One good cow will produce 400 lbs. of butter fat in a year. Two and a half poor cows, producing 160 lbs. each per year will produce the same. But the poor cows take two and a half times as much space in the barn, eat two and a half times as much food and require two and a half times as much care. Which is more profitable?

A herd averaging 400 lbs. of fat is rare, but 300 lbs. is not too high an average to aim for. This means an annual production per cow of 5750 lbs. of milk containing 4% of butter fat.

Improve your herd by eliminating all the cows that will not pay their board while in the barn. If you need help to find these boarders consult your County Agent or local Cow Testing Association.

Edward Wigglesworth,  
Meredith Farm,  
Topsfield, Mass.

NOVEMBER hath 30 days.

[1936

Softly breathes the west-wind beside the ruddy forest,  
 Taking leaf by leaf from the branches where he flies.  
 Sweetly streams the sunshine, this third day of November,  
 Through the golden haze of the quiet autumn skies.

Tenderly the season has spared the grassy meadows,  
 Spared the petted flowers that the old world gave the new,  
 Spared the autumn-rose and the garden's group of pansies,  
 Late-blown dandelions and periwinkles blue.

WILLIAM CULLEN BRYANT

D. M.	D. W.	Aspects, Holidays, Heights of High Water, etc.	Farmer's Calendar.
1	D	21st S. a. T. All Saints D. Runs high. {10.5 11.9	<p>On the page for July a medley of hints on planting small lots was given. No general line of action can be laid down without studying the particular lot. Let us imagine an area left properly graded and with a generous depth of good loam.</p> <p>Are we going to plant trees or shrubs or herbaceous plants? Remember that you must decide that question! The present writer will probably never see your garden. If you select trees, give them plenty of space to grow in. The same rule applies to shrubs in a lesser degree; they do not require so much space and are for a long time possible to move.</p> <p>Unless you know already precisely what you want you will do well to do your planting a little at a time, beginning with some favorite plants in prominent positions and filling out at a later date. Do not use too large plants. A nursery or trial ground, if only one hundred square feet, will be very interesting, will enable you to test any plant, and furthermore you can use smaller plants and you will have them at hand to fill vacancies which may occur. Swapping plants has much of the charm of any other exchanges.</p> <p>Weeds you must pursue relentlessly, and any plant you do not like may be counted a weed.</p>

DECEMBER hath 31 days.

[1936

I heard the bells on Christmas Day  
 Their old, familiar carols play,  
 And wild and sweet  
 The words repeat  
 Of peace on earth, good-will to men!

**The Farmer's Readjustments**  
 The farmer, perhaps more than the average citizen, is a creature of habit. He has grown so accustomed to the daily and seasonal routine of his work that he finds it difficult to make any changes.  
 He is often frightened by the chances involved in risking his livelihood on some proposed new line of work or activity. For that reason he is inclined to prefer his present troubles to others of which he knows nothing. However, with the far-reaching changes which are occurring in our economic systems, and especially in agriculture, the farmer must frequently make readjustments and adapt himself to the new conditions.  
 For instance, it may be that there is a decreased demand and a consequent low price for certain crops the farmer has long been producing. In this case he should alter his cropping system and grow something else. The wheat, cotton and potato farmers have found it profitable to grow less of these staples and to diversify with other crops. In locations with good markets, vegetable gardening and small fruits may prove the most profitable.  
 If dairying is not profitable, it should be curtailed and some other form of animal industry, like the production of beef cattle, sheep, hogs, or poultry, given a fair trial. In any event, let the farmer grow more of what he and his family and his animals eat.

## ECLIPSES FOR THE YEAR 1936

In the year 1936 there will be four Eclipses, two of the Sun and two of the Moon. None of these Eclipses will be visible anywhere in the United States of America.

- I. A Total Eclipse of the Moon, January 8, 1936. The beginning will be visible generally in the northeastern part of the Atlantic Ocean, Europe, eastern Africa, Madagascar, Asia, the Indian Ocean, Australia, Polynesia, the western part of the Pacific Ocean, Alaska, northwestern Canada, and the Arctic Ocean; and the ending will be visible generally in the eastern part of the Atlantic Ocean, Europe, Asia, and Africa, the Indian Ocean, Australia except the southeastern part, the western part of the Pacific Ocean, northwestern Alaska, and the Arctic Ocean. Magnitude of the Eclipse (Moon's diameter = 1), 1.022. The total phase will last 23 minutes.
- II. A Total Eclipse of the Sun, June 18-19, 1936. Visible as a partial Eclipse throughout most of Europe, Asia and Greenland, the northeastern part of Africa, the northwestern part of North America, the Arctic Ocean, and the western part of the Pacific Ocean; and as a total Eclipse within a band which begins in the Mediterranean Sea, crosses the Black Sea, Siberia, and northern Japan (Yezo), includes the cities of Athens, Omsk, Tomsk, Kansk, Bratsk, and Nemuro, and ends in the Pacific Ocean. The Eclipse begins on the eastern shore of the Red Sea, in longitude  $38^{\circ} 27'$  east of Greenwich, latitude  $22^{\circ} 58'$  north; and ends in the Pacific Ocean, in longitude  $157^{\circ} 54'$  east of Greenwich, latitude  $14^{\circ} 32'$  north. At the point in Siberia where its duration is longest, the total Eclipse lasts 2 minutes and 32 seconds.
- III. A Partial Eclipse of the Moon, July 4, 1936. The beginning will be visible generally in the Indian and Antarctic Oceans, Australia, the western and southwestern part of the Pacific Ocean, Asia with the exception of the extreme northern part, and the southern and eastern part of Africa; and the ending will be visible generally in the southeastern part of the Atlantic Ocean, Africa with the exception of the northwestern part, eastern Europe, Asia with the exception of the extreme northeastern part, Australia, the Antarctic and Indian Oceans, and the southwestern and western part of the Pacific Ocean. Magnitude of the Eclipse (Moon's diameter = 1), 0.272.
- IV. An Annular Eclipse of the Sun, December 13, 1936. Visible as a partial Eclipse throughout Australia, New Zealand, and New Guinea and in parts of Borneo, Java, the Philippines, and the south Pacific Ocean; and as an annular Eclipse in a band which crosses Australia, northern New Zealand, and a part of the Pacific Ocean and which includes the cities of Broome and Auckland. The Eclipse begins in the Arafura Sea, in longitude  $137^{\circ} 24'$  east of Greenwich, latitude  $10^{\circ} 27'$  south; and ends in the Pacific Ocean, in longitude  $125^{\circ} 47'$  west of Greenwich, latitude  $6^{\circ} 20'$  south. At its maximum duration, the annular phase of the Eclipse lasts 7 minutes and 26 seconds.

## MORNING AND EVENING STARS, 1936

(A planet is called *Morning Star* when it is above the horizon at sunrise, and *Evening Star* when it is above the horizon at sunset.)

*Mercury* will be most favorably situated for being seen as an Evening Star about January 16, May 7, September 4, and December 29, on which dates it sets 1h 34m, 1h 57m, 0h 47m, and 1h 30m, respectively, after sunset; and as a Morning Star about February 26, June 25, and October 16, on which dates it rises 1h 10m, 1h 11m, and 1h 34m, respectively, before sunrise.

*Venus* will be Morning Star until June 29, and then Evening Star the rest of the year.

*Mars* will be Evening Star until June 10, and then Morning Star the rest of the year.

*Jupiter* will be Morning Star until June 10, then Evening Star until December 27, and then Morning Star the rest of the year.

*Saturn* will be Evening Star until March 3, then Morning Star until September 11, and then Evening Star the rest of the year.

## EARTH IN PERIHELION AND APHELION, 1936

The Earth will be in Perihelion on January 4, 1936, distant from the Sun 91,338,500 miles. The Earth will be in Aphelion on July 3, 1936, distant from the Sun 94,452,100 miles.

## GLOSSARY OF ASTRONOMICAL TERMS

### used in the OLD FARMER'S ALMANAC

*Aphelion.* Point farthest from the Sun.

*Apogee.* Point farthest from the Earth.

*Aspect.* Relative apparent position in the sky (used principally with reference to the planets, the Sun, and the Moon).

*Comet.* A celestial body of diffuse, hazy appearance, which revolves in an orbit around the Sun. A fully developed comet consists of (1) a small, bright nucleus, surrounded by (2) a misty envelope called the coma, which extends on the side opposite the Sun into (3) a luminous tail; but in many comets the nucleus, or tail, or both, are lacking. Most known comets have been visible in the telescope only, but some have been visible to the naked eye and a few were spectacularly brilliant. Their orbits, unlike those of the planets, are mostly of high eccentricity and are inclined at the greatest possible variety of angles to the plane of the ecliptic. Many comets have orbits which, as nearly as can be determined, are parabolic; these comets approach the Sun from vast distances beyond the farthest planet, sweep once around the Sun, and recede into the depths of space. Their appearance in the heavens is of course impossible to predict. Others, moving in elliptic orbits, pass perihelion at regular intervals and can be predicted long in advance.

*Conjunction.* The same right ascension or celestial longitude. Used with reference to any two heavenly bodies, as the planets, the Sun and the Moon.

*Conjunction, inferior.* The conjunction of the planet Mercury or the planet Venus with the Sun is said to be inferior when the planet is between the Earth and the Sun.

*Conjunction, superior.* The conjunction of Mercury or Venus is said to be superior when the Sun is between the Earth and the planet.

*Day's Increase (or decrease).* This quantity, tabulated in the Almanac, is the difference between the length of the day in question and that of the shortest (or longest) day of the year.

*Declination.* Apparent distance north or south of the celestial equator. The Sun's declination, in degrees and minutes, is tabulated at the top of the left-hand pages.

*Dip of the horizon.* The depression of the apparent, or sea horizon below the true, or astronomical, horizon. The dip increases with the observer's height above sea-level.

*Dominical Letter.* The Sunday letter. The letters A, B, C, D, E, F, G being applied to the first seven days of any common year, the dominical letter for that year is the letter thus pertaining to the first Sunday. The intercalation of an extra day in Leap year shifts the dominical letter, for the part of the year which follows February 29, one place backward.

*Eccentricity.* As applied to the orbit of a comet or planet, this term signifies the ratio of the Sun's distance from the center of the orbit to the mean of the perihelion and aphelion distances. It is a measure of the non-circularity of the orbit.

*Eclipse.* The darkening of one heavenly body by another. The Almanac mentions (1) eclipses of the Sun, in which the Moon passes between the Sun and the observer, and (2) eclipses of the Moon, in which the Moon enters the shadow of the Earth. An eclipse may be partial or total according as the body is partly or wholly obscured; or an eclipse of the Sun may be annular, in which case the Moon, though it becomes centered on the disk of the Sun, is so far from the Earth that its apparent diameter is less than the Sun's, so that a ring, or annulus, of sunlight shows around the Moon. By far the most interesting eclipses, and also, for any given locality, the rarest, are total eclipses of the Sun.

*Ecliptic.* The apparent annual path of the Sun among the stars; or, the great circle which is the intersection of the celestial sphere with the plane of the Earth's orbit. It intersects the celestial equator at an angle of  $23\frac{1}{2}^{\circ}$ , at the *equinoxes*.

*Elongation.* Apparent distance from the Sun. The planets Mercury and Venus, in their orbital motion, appear to oscillate from one side of the Sun to the other and back. The times of their greatest elongations are given in the Almanac.

*Epact.* The age of the "calendar Moon" at the beginning of the year. The calendar Moon is a fictitious Moon used in determining the date of Easter, made purposely to differ from the real Moon so that Easter may not coincide with the Jewish Passover. Easter is defined as the first Sunday after the first full "calendar" Moon following the Sun's passage of the vernal equinox.

*Equator, celestial.* The great circle of the celestial sphere midway between the poles.

*Equator, terrestrial.* The imaginary circle on the Earth's surface midway between the Earth's north and south poles. The celestial and terrestrial equators lie in the same plane.

*Full sea.* High water, or high tide.

*Golden Number.* The number of the year in the Metonic cycle. This is a cycle of 19 years established in Greece by Meton in the year 432 BC. It is almost exactly equal to 235 synodic months (a synodic month being the interval between successive new Moons), so that in years which have the same golden number the Moon's phases recur on the same dates.

*Heliocentric latitude.* Apparent distance north or south of the ecliptic, as seen from the Sun.

*Horizon.* The true, or astronomical, horizon is the great circle which is the intersection with the celestial sphere of a level plane passing through the observer's position. The apparent horizon is the line which limits the observer's view of the sky.

*Inclination.* As applied to the orbit of a comet or planet, inclination signifies the angle between the plane of that orbit and the plane of the Earth's orbit, or ecliptic.

*Julian Period.* A period proposed by Joseph Scaliger in 1582 AD to harmonize chronological systems. Its length is 7980 Julian years, being the least common multiple of the solar cycle, the Metonic cycle, and the Roman indiction. The first year of the Julian Period was 4713 BC, which was the year 1 in each of the three component cycles. The designation of a year in the Julian period is intelligible to any chronologist, whatever may be his religion.

*Latitude (of a place on the Earth).* The angle between the direction of gravity at the place and the plane of the Earth's equator. It is a measure of the distance of the place from the equator.

*Length of Days.* Time-interval between sunrise and sunset.

*Longitude (of a place on the Earth).* Arc of the equator between the meridian of the place and another meridian chosen as a standard, usually that of Greenwich, England.

*Meridian.* Great circle of the celestial sphere passing vertically north and south, through zenith and poles. Also, a north-south line on the surface of the Earth.

*Meteor.* A small, solid body which, revolving in an orbit around the Sun, enters the Earth's atmosphere and is made luminous by the consequent sudden stoppage of its swift flight. Often erroneously called a *falling* or *shooting star*. After falling upon the Earth, the body is called a *meteorite*.

*Moon's Place.* As tabulated in the Almanac, this signifies the sign of the zodiac occupied by the Moon.

*Moon Souths.* Moon is on the meridian, due south of the observer.

*Morning and Evening Stars.* A planet is called Morning Star when it is above the horizon at sunrise, and Evening Star when it is above the horizon at sunset.

*Node.* The point at which a heavenly body apparently crosses the ecliptic; *ascending* if northward, *descending* if southward.

*Opposition.* Elongation of  $180^{\circ}$ . At opposition, a planet appears opposite the Sun.

*Penumbra.* Partial shadow.

*Perigee.* Point nearest the Earth.

*Perihelion.* Point nearest the Sun.

*Phases of the Moon.* The four principal phases of the Moon are: (1) *New Moon*, which occurs when, for the month, the Moon is most nearly between the Earth and the Sun; (2) *First Quarter*, which occurs about a week after New Moon when the angle Sun-Moon-Earth is 90° and half the Moon's illuminated side, or a quarter of the Moon, is visible; (3) *Full Moon*, when the Moon is most nearly opposite the Sun; and (4) *Last Quarter*, when the angle Sun-Moon-Earth is again 90°.

*Planet.* An opaque body which revolves around the Sun in a nearly circular orbit near the plane of the ecliptic. The principal planets, in order of distance from the Sun, are Mercury, Venus, the Earth, Mars, Jupiter, Saturn, Uranus, Neptune, and Pluto. Of these, Venus, Mars, Jupiter and Saturn are brilliantly conspicuous to the naked eye, and Mercury also is bright but so near the Sun as to be found only with some difficulty. A planet may be distinguished from the "fixed" stars by its comparatively steady light and, if watched for a few nights, by the fact that it does not remain fixed relative to apparently neighboring stars.

*Pole.* Point in the sky around which the apparent diurnal rotation of the sky takes place; point where the Earth's axis intersects the celestial sphere.

*Quadrature.* Elongation of 90°.

*Refraction, atmospheric.* Bending of the light of a heavenly body within the Earth's atmosphere, which causes the body to seem higher in the sky than it really is.

*Right ascension.* Apparent distance, measured along the celestial equator eastward, from the vernal equinox.

*Rising, setting.* Appearing upon the horizon. The times of rising and setting of the Sun and Moon, given in the Almanac, are the times at which the upper point of the body's disk would appear at the true horizon to an observer at sea level. They are therefore corrected for atmospheric refraction, but not for dip.

*Roman Indiction.* An arbitrary cycle of 15 years used in Roman and ecclesiastical history. The year 1 of the first cycle was the year 313 AD.

*Runs high, runs low.* Has greatest declination, north or south; has greatest or least altitude in the sky at meridian passage. Used in reference to the Moon.

*Signs of the zodiac.* Ancient divisions of the zodiac, each 30° in length, beginning at the vernal equinox and named for the twelve zodiacal constellations.

*Solar Cycle.* A period of 28 years, after which the days of the week, in the ancient Julian calendar, fell on the same days of the year.

*Sun fast, Sun slow.* Difference between local apparent solar time (sun-dial time) and the kind of time (Eastern Standard) used in the Almanac. The Sun is "fast" when the sun-dial indicates noon before Eastern standard noon. At Boston and vicinity the Sun is always "fast," but farther west it is alternately "fast" and "slow."

*Stationary.* Having no apparent motion among the stars. The apparent motion of each planet among the stars is of a zigzag nature, being toward the east for a considerable time, then westward for a shorter time, and then again eastward. At the points of reversal the planet is "stationary."

*Time.* The time of day, or number of hours and minutes since a certain point in the sky, chosen for reference, was on the meridian. For *apparent solar time* (sundial time) the point of reference is the Sun. Since the Sun moves in the sky at a rate which is not constant, it is impracticable to make clocks keep apparent solar time, and so a fictitious "mean sun," which moves in the celestial equator with uniform speed, is used instead, giving *mean solar time*. *Standard time* is the mean solar time of a certain meridian which is chosen as standard for a considerable region; these meridians are chosen at regular intervals from Greenwich, and *Eastern Standard Time* is Greenwich mean solar time *minus* exactly five hours. For further details, see the Almanac for 1934.

*Umbra.* Complete shadow.

*Vernal Equinox.* The point at which, in its apparent annual motion, the Sun crosses the celestial equator from south to north; the point occupied by the Sun at the moment of the beginning of Spring.

*Zodiac.* The belt of sky, eighteen degrees wide, which has the ecliptic as its central line. It contains the twelve zodiacal constellations and, at all times, the Sun, Moon, and principal planets.

## RECENT COMETS

The year 1934 was remarkable for a dearth of comets; it was the first calendar year since 1876 in which no new comets were discovered. During the year which ended June 30, 1935, two old comets were re-detected and two new comets were discovered. No comet, however, was visible to the unaided eye during the year. The comets of the year were as follows:

1. Encke's periodic comet, detected by Jeffers at the Lick Observatory, California, 1934 July 10. It has the shortest period of any known comet ( $3\frac{1}{2}$  years), and this is its 33th observed return since its discovery in 1786.

2. Reinmuth's periodic comet of 1928, detected by Jeffers 1934 November 5 on its first return since its discovery.

3. Comet a 1935, discovered by Johnson at Johannesburg, South Africa, 1935 January 9. Perihelion passage, 1935 February 6, at a distance of 75,000,000 miles from the Sun. Inclination of orbit to ecliptic, 65°. Orbit either a parabola or a very long ellipse.

4. Comet b 1935, discovered by Jackson at Greenwich, England, 1935 June 19. Perihelion passage, 1934 September 20, at a distance of 338,000,000 miles from the Sun. Motion retrograde, inclination of orbit to ecliptic 38°. Orbit parabolic.

## PLANETARIA

The motions of the heavenly bodies, though in reality majestically simple, are for most people difficult to visualize. The reason is that we must view the stars and planets from the surface of the Earth, which is itself a planet moving like the others, so smoothly and silently that, except by careful observation, we are unaware of its having any motion at all. The Earth's rotation on its axis produces the succession of day and night and the apparent diurnal rotation of the whole celestial sphere every twenty-four hours; its revolution around the Sun makes that luminary seem to make the circuit of the ecliptic every year, and complicates our view of the motions of the other planets so that they seem to move zigzag against the starry background—eastward for a time, then westward for a shorter time, and then eastward again; and a conical motion of the Earth's axis, completed in 25,800 years, produces the precession of the equinoxes and a slow revolution of the celestial poles.

Various devices have been invented for demonstrating the nature of the celestial motions. One which was popular in the eighteenth and nineteenth centuries was known as a planetarium or orrery, the latter name being used in honor of the fourth Earl of Orrery who had a famous one made. In this the planet and satellites were represented by balls, the motions of which were controlled by gears operated by a crank or by clockwork. Many orreries, some of intricate and beautiful workmanship, are still preserved, and there is now on the market a similar planetarium in which the Sun is represented by an electric lamp and which is driven by an electric motor. Such planetaria are interesting and valuable, but in none is it practicable to represent the sizes and distances of the bodies correctly, or to include a representation of the stars.

A device of a different nature was suggested some years ago by a German astronomer, and, constructed on a large scale by the firm of Carl Zeiss, is called the Zeiss planetarium. A room large enough to seat several hundred people has a white, hemispherical ceiling which represents the sky. At the center of the room is placed an assembly of many stereopticons, or optical projectors, each of which projects upon the ceiling, as upon the screen of a moving-picture theatre, an image of a part of the sky. All the stars visible to the naked eye are thus represented realistically by dots of light which, by a simple rotation of the projecting apparatus, are made to simulate the diurnal motion so as to represent in a few minutes the passage of a day. As the rotation proceeds, shutters open silently to reveal the rising stars and close as the images approach the western horizon. Other projectors produce images of the Sun, Moon and planets, and each of these is given a motion similar to that of the object which it represents. It is easy to picture, for example, the conjunctions, oppositions, and other configurations of the planets which are predicted in *The Old Farmer's Almanac*. The axis of the instrument may be rotated to demonstrate precession, and tilted to agree with any latitude, so that the appearance of the sky at any time of the day or night, on any day in any year of many thousands, and at any place on the surface of the Earth, may readily be exhibited. The motions are produced quietly by electric motors controlled by switches at the fingers of a lecturer, and the demonstration forms a spectacle which has thrilled and instructed millions of people.

Zeiss planetaria have been in use in many European cities several years. In America there are four, all erected since 1930: the Adler Planetarium at Chicago, the Fels Planetarium of the Franklin Institute at Philadelphia, the planetarium of the Griffith Observatory at Los Angeles, and the Hayden Planetarium of the American Museum of Natural History in New York.

## HOOSIER THOUGHTS ON THE STATE OF MAINE

By BOOTH TARKINGTON

I think I cannot better express a Middle Westerner's admiration for the State of Maine and for the Maine people than to quote from two books of mine that were written with the sincerest affection and respect for that State and for those men and women who have made it perhaps the most American State in the Union.

"Northeastward of the heart of New England there is a broad river that runs widening to the sea, and all along its lower reaches, where it lets in the ocean salt and the tides, it is a boundary marking more than a division between two States of the Union. New England itself seems to end there where the long and staggered coast line of the State of Maine begins; moneyed and sanctified old New England does not appear to cross that salty estuary, nor does the old New England landscape, pastoral, gardened and long completed, survive the interruption of the river. The highways near the coast pass at once into country not so sweetly in order; the farther northward and eastward they go the more rugged lies the land, and, out beyond it, keeping pace with this increasing roughness, so is the sea itself less decorous. The stony land's long buttresses run far out under the tides; reef and rock are everywhere ready to be whitely shrewish. These waters are island-strewn and surge upon an endlessly scalloped and indented coast.

" . . . Away from the tumbled coast and the rocky woodland of pine and juniper, the village itself, like some outpost wandered into alien country, wears the very aspect of that old New England left far to the south and west. There are the little streets of clean, white, green-shuttered houses as old as the great wine-glass elms that drip shadows down upon the roofs; there are the two white churches with columned porticoes and Christopher Wren steeples, and, for the landward borders, there are the stone-walled pastures that early summer powders cheerily with buttercups and daisies. But upon that other village border, the river, the resemblance is melancholy; for here is found only a New England relic, one of those faded ports where sea-borne traffic comes no more . . . "

"There's something about white houses and elm trees, and their both being old, that gets into your system afterwhile and seems to mean to stay there—maybe because they make you remember that your great grandparents lived in such places and must have had quite a feeling for them before having to ride away to the struggle of opening up the West. Yes, sir, it's really no wonder people from our part of the country get to thinking about these old houses and even about the kind of furniture that's in them. . . . There's something about this old New England village that reaches the pleasant part of a person's nature.

"Besides this, I presume I've conveyed the idea that I found these Yankee inhabitants right perplexing at first; but the more I've seen of them and managed to get them better accustomed to me, so that they understood I didn't intend any particular sharp practise or overbearing manners with them, why, the more I saw that there was something mighty attractive and likeable about them. They don't start right in with a stranger and take him on his face value, it's true; but I've come to comprehend they have their own reasons for this—they've had experiences that have ground it into them not to be too impulsive with their cordiality, and naturally quite a number of us people from elsewhere that camp on them in summer strike them as more or less queer till they get used to us. No, sir; the original inhabitants are as likeable as you'd care to know."

A GARDEN PLANTING TABLE FOR AMATEURS

Vegetable	Seed per 100 feet of row	No. of Seed per ft. of row	When to Plant		Distance Between		Days to Maturity	Feet of Row per family of five	Estimated Yield per 100' row
			Early	Late	Rows	Plants			
String Bean	8 oz.	4-6	May 10	July 15	24"	3"-4"	50-75	75-100	75-100 lbs.
Dry Shell Beans	4-8	3-6	May 20	June 10	30"	3"-4"	100	1000	7- 8 lbs.
Beets	½ oz.	10	Apr. 15	July 15	18"	2"	50-70	75	2-3 bushels
1Cabbage	1/20 oz.	Tr.	Apr. 15	July 1	30"	15"-24"	60-90	75	150-200 lbs.
Carrot	1/10 oz.	10	Apr. 15	July 1	18"	2"	60-80	60	3 bushels
6Celery	1/20 oz.	Tr.	May 15	July 15	24"	6"	90-100	50	50 bunches
6Eggplant	1/20 oz.	Tr.	June 1	July 15	24"	18"	90	50	75-100 lbs.
Endive	1/10 oz.	8-10	May 15	July 15	18"	3"-12"	60-80	40	75 pounds
Lettuce	1/10 oz.	3-6	Apr. 16	Aug. 1	18"	6"-15"	60-80	60	75 pounds
Onions	½ oz. or 2 lb. sets	10-12	Apr. 15	June 1	12"	2"	40-80	150	2 bushels
Parsley	1/10 oz.	8-10	Apr. 15	May 15	18"	2"-6"	60	10	50 pounds
Parsnip	¼ oz.	8-10	May 1	June 20	24"	3"	100	50	3 bushels
Pears	½ lb.	5-8	Apr. 15	May 15	24"	2"-3"	50-70	250	50 pounds
6Pepper	1/20 oz.	Tr.	June 1	July 15	24"	18"	75	36	15 dozen
6Potatoes	6 lbs.	Tr.	May 1	June 15	36"	12"	100	800	1½-2 bushels
6Radish	½ oz.	10-12	Apr. 15	Sept. 1	12"	1"-2"	30-50	30-50	100 bunches
Rutabaga	1/10 oz.	3-6	June 1	July 1	24"	4"-8"	100	40	3 bushels
Spinach	½ oz.	8-10	Apr. 15	Aug. 1	18"	1"-4"	40-50	75	100 pounds
6Tomatoes	1/20 oz.	Tr.	June 1	July 1	48"	6"-8"	70-80	200	200 pounds
Corn	¼ lb.	3-4	May 10	July 1	30"	6"-8"	70-80	200	12-15 dozen
3Melons	¼ oz.	(5) 10-12	May 15	June 1	48"	48"	90	50	50-75 lbs.
4Squash	1 oz.	(5) 6-8	May 15	June 10	72"	72"	100	100	150 pounds

Notes: 1—Includes cauliflower, brussels sprouts, broccoli.

2—Includes turnip.

3—Includes cucumbers.

4—Includes winter and summer squash.

5—Per hill: then thin to 4 or 5.

6—Transplanted.

## TIMELY GARDEN HINTS

The cut worms surely did a lot of damage in the home garden this year. Why not make up your mind now not to have this happen again, because it is so easy to control them. Right after you have plowed and harrowed your garden, and before you plant anything sow poisoned bran mash over the garden like you would grass seed. Repeat this application in about three weeks to get the last generation. The bran mash is made by mixing 10 pounds of bran and one pound of lead arsenate or  $\frac{1}{2}$  pound of Paris Green. In a separate vessel mix two gallons of water and a quart of molasses and then mix the wet and dry ingredients thoroughly. The mash should be sown on the garden in the evening after the sun has set. It will not kill birds or cats.

The new Penn State variety of tomato is of the self pruning type. That is, it ends its growth in a fruit cluster. It should therefore never be grown as a stake tomato. It may be planted at least twice as thick as those that make a normal growth. It is very early in maturing and for this reason should be especially valuable for northern New England where the growing season is short.

Do you plant celery in a trench? This is an old-fashioned method that is still followed by some gardeners. It is much better to plant on the surface of the ground away from the subsoil and then to blanch the celery with boards.

The cabbage maggot fly lays eggs on the stem of the early cabbage, cauliflower or radish plants. These eggs hatch into the maggots or "worms" that you find in radishes and will very shortly render radishes inedible, and practically kill the cabbage plants. A mixture of equal parts of tobacco dust and lime put around the cabbage plant when set out and renewed in ten days will prevent damage. Another remedy is to dissolve an ounce of corrosive sublimate in 8 gallons of water and put a cupful around each plant once every two weeks, making three applications all told.

Asparagus may be set in a trench about ten inches deep, but should never be planted any deeper as it takes the asparagus too long in spring to grow up through 12 to 15 inches of cold soil. The Washington variety is still preferred since it is resistant to disease.

Broccoli is easier to grow than cauliflower. However, the green cabbage worms like it so much that fall broccoli is very apt to be full of them. Dusting occasionally with a nonpoisonous insecticide like pyrethrum or rotenone will hold this insect in check on broccoli as well as cabbage and cauliflower.

Market gardeners like the Viking variety of spinach because it is slow in going to seed. The Bloomsdale Savoy has large green crinkled leaves, preferred by the large markets. The best way to keep spinach from going to seed is to thin it to 4 or 5 inches between plants. This practice is perfectly feasible for the home gardener but too expensive for the market gardener.

Treating vegetable seeds before planting will often increase the germination from 10 to 50%. Various materials are used for the different crops. Thus zinc oxide gives best results with the cabbage family, red copper oxide for beets, spinach and peas, and the organic mercury dusts for corn.

How do you irrigate your garden? If you sprinkle it with a garden hose you probably do more harm than good. There is a porous hose on the market that may be attached to the garden hose and laid between the rows of vegetables to be watered. The water is then allowed to run until the ground is thoroughly soaked. One soaking every ten days helps a great deal more than a light watering every other day.

Remember that a small handful of superphosphate per plant broadcast over the soil at the time that the tomato plants are set will give you much earlier maturity and more tomatoes. Other crops that respond to phosphorus fertilizers are lettuce, celery, corn, potatoes, beets and cabbage.

Do you find that spraying a garden with bordeaux mixture is a terrible chore? Why not use dust? It is so simple and easy compared with spraying. A bordeaux dust may be bought by asking for a 20-80 "copper-lime" dust or by mixing at home, a pound of monohydrated copper sulphate and 4 pounds of hydrated lime. It should be dusted on the plants in the evening after the dew falls. If you wish to make this dust poisonous to kill potato beetles or cucumber beetles, make the dust of  $\frac{1}{2}$  pound calcium arsenate, one pound of monohydrated copper sulphate, and  $3\frac{1}{2}$  pounds of hydrated lime. In small quantities mix these materials in a tin container with a tight cover by rolling for three minutes.

## FERTILIZER FACTS UP-TO-DATE

By means of new methods and processes which our fertilizer chemists have recently devised, we are now able to secure materials which carry much more nitrogen, phosphoric acid and potash than those formerly used. For example, such materials as calurea, cyanamid, double-superphosphate and 60 per cent muriate of potash are now used by our fertilizer men in fabricating the high-grade, concentrated mixtures which are proving so popular and economical.

Ever since commercial fertilizers have been on the market, there have been certain "low-grade" kinds carrying only from 9 to 14 units of plant food per ton—a 3-8-3 for example. These are made up of the lower grade materials and always contain more or less filler or "make-weight." Since the costs of labor, bags and freight on these low-grade goods are just as great as on the high-grade goods, it is quite evident that the cost per pound of plant food in them will be much greater than in the high-grade goods.

Fortunately, today, very few of the low-grade fertilizers are being offered for sale. Most grades are now carrying from 30 to 40 units of plant food per ton, or three or four times as many units as the old low-grade kinds. The new grades are by far the most economical. In other words, if I have \$50 to spend for fertilizer, I am going to buy one ton of a \$50 grade rather than two tons of a \$25 grade. Then I will use only half as much per acre.

The prices of fertilizers now are somewhat lower than a year ago. This is particularly true for potash salts and for nitrogen in the form of cyanamid. These lowered costs are in the main due to improved and cheaper methods of processing which our fertilizer chemists have devised.

If the farmer has the cash or can secure reasonable credit, he should not curtail his fertilizer supplies at current prices for the coming season. Ample fertilization is one of the best forms of crop insurance. This fact was well demonstrated last year in one of our "300-bushel Potato Club" contests when each of the five leading winners used more than a ton of fertilizer per acre and produced more than 500 bushels of the "spuds". The next 20 growers, also using liberal amounts of fertilizers, produced over 400 bushels per acre.

One of the newer nitrogenous fertilizers which is making a name for itself is cyanamid. This carries 22 per cent nitrogen—more than either nitrate of soda or sulphate of ammonia, our former old stand-bys. This material has a dark gray color and comes in either the powdered or granular form. It has perhaps had its greatest use as a top-dressing for hay and pasture lands. It should be applied early before the grass begins to grow and while the ground is still moist. 200 to 300 pounds per acre is the usual rate of application. On the University farm at Durham we have been using it for the past four years at the rate of 200 pounds per acre, and one year with another it increases our hay yield at least one-half ton per acre. We have also found it equally efficient in improving our pasture fields by getting the grass to the grazing stage 10 days or two weeks earlier.

Our apple growers are also finding cyanamid just as effective and a cheaper source of nitrogen for their orchards than nitrate or sulphate. It is not as foolproof as the latter, however, and must be used carefully; that is, not more than eight pounds per mature tree. It must also be applied early, soon after the frost is out in the first part of April. Uniform application out to the droop of the branches is likewise important.

Another new use for cyanamid is on the asparagus patch. Here it serves not only as a fertilizer but as a weed killer. It should be applied in the powdered form at the rate of about 200 pounds per acre, preferably in the morning when there is a little dew. A second application may be made later in the season just before the asparagus shoots are permitted to leaf out.

In addition to their plant food value, most fertilizers have an effect upon the acidity of the soil. In view of the fact that most of our New England soils have an acid reaction, any combination of lime in the fertilizer which will tend to correct this condition is to be commended. Cyanamid is one of these materials and therein lies a part of its value as a fertilizer.

## PEST CONTROL SCHEDULE FOR VEGETABLES

Crop	Pests	Dust	Spray (Per gallon of water)	Time	Notes
Asparagus	Asparagus beetle Rust	Calcium arsenate lime	Calcium arsenate, 4 tsp.	When beetles first appear.	Kill insects on bait plants.
Beans	Mexican bean beetle	Magnesium arsenate lime Rotenone dust for string beans	Magnesium arsenate, 4 tsp.	When true leaves first appear and at 10-day intervals	Plant resistant varieties. Cover underside of leaves thoroughly.
Cabbage and Cauliflower	Anthraxnose Green worms Maggots	Calcium arsenate lime 2 Calomel eypsium dust	Rotenone extract Cupful corrosive sublimate per plant, (1 oz. to 8 gals. water). Nicotine sulphate, 1 tsp.	July 1 and again as needed. At planting time and in 10 days. When aphids are present.	Plant clean seed, destroy plant refuse.
Carrots	Aphis Club root	Nicotine dust			Lime soil. Set disease-free plants
Celery	Cutworm	Poison bran mash		Before planting and around plants.	Plant after July 1.
Cucumber and Melons	Rust fly Blight	1 20-80 copper lime dust 1 20-12-68 copper arsenate lime dust	Bordeaux mixture Calcium arsenate, 4 tsp.	Every 10 days after plant- ing. As soon as plants are up.	Apply twice a week until beetles leave.
Onion Peas	Scab and leaf spot Bacterial wilt	20-80 copper lime dust Same as cabbage maggot	Bordeaux mixture	Every 10 days.	Control cucumber beetles; destroy affected plants. Plant on disease free or new soil.
Potatoes	Maggot Footrot	Finely divided sulphur 20-80 copper lime dust 20-12-68 copper arsenate lime dust 20-12-68 copper arsenate lime dust	Bordeaux mixture Calcium arsenate, 4 tsp.	Once a week. Every 10 days. As often as necessary.	
Radish	Fla beetle	Calomel eypsium dust	Bordeaux mixture and arse- nate, 8 tsp.	After plants appear and every 4 or 5 days until beetles disappear. Apply at seeding and in 2 weeks.	
Squash and	Maegot Fusarium wilt	Nicotline dust	Cupful of corrosive sub- limate per foot of row.		Plant on new or disease- free soil. Trap under boards in early morning.
Pumpkin Tomato	Squash bug		Bordeaux mixture	Every 10 days.	Pick off and destroy worms
Turnip	Striped beetle Nail head disease Tomato worm Maggot	(Same as cucumber beetle) 20-80 copper lime dust (Same as radish maggot)			

<sup>1</sup> See Garden Hints on how to mix dust.

<sup>1</sup> Calomel eypsium dust is made of 1 oz. powdered calomel, 1 1/4 lbs. eypsium or lime.

## OPPORTUNITIES FOR PROFIT IN NEW ENGLAND FORESTRY

[Written for *The Old Farmer's Almanac*]

By A. C. CLINE,

Assistant Director, Harvard Forest, Harvard University

### WHY INTEREST IN PRIVATE FORESTRY HAS DECLINED

Those who have been in close touch with forestry in New England during the past quarter century have witnessed a declining interest on the part of private owners, starting somewhat more than a decade ago. Many are now inclined to sell their land and timber to the state, whenever the opportunity presents itself, and to view with complacency the rapid growth of public forestry and the ever increasing acreage under public ownership. Apparently the private owner feels that forestry is too expensive for him, and that the easiest way out is to let the public treasuries carry the burden of growing timber for the future. This is in contrast to the sentiment of some twenty years ago, when "idle acres" were being planted to pine at the rate of millions of trees annually. Such a change of feeling has been variously attributed to the importation of cheap lumber from other parts of the United States and from foreign countries, to the decline of the wooden box business, to the substitution of such materials as cement and steel in building construction, and to the deteriorated condition of our New England forests. The probable truth of the matter is that, while all of these factors have played some part in lowering stumpage values, and hence in discouraging the investment of private funds in forest management, the last mentioned is the most important. But just what does forest deterioration mean under New England conditions? Is it really as bad as many imagine it to be?

### NEW ENGLAND FORESTS ARE BETTER THAN COMMONLY SUPPOSED

It is true that two hundred years of human occupation and use of the land, marked by the clearing of the original forests, a period of intensive cultivation of farm crops followed by widespread farm abandonment, the reclaiming of the abandoned fields and pastures by forests, and the clear cutting of the second growth stands, have resulted in a great influx of weed trees and a drastic lowering of the average size and quality of the growing stock. But weed trees can be cut out; small sizes become large sizes in time; and limbs fall off and knots are covered over with clear wood, if the stand is properly managed. Rebuilding our "deteriorated" forests is largely a matter of time and a little judicious weeding out of the bad elements to save the good. Admittedly, there are stands which have been so degraded by repeated cuttings or fires, or both, as to require a complete tearing down of the old and a rebuilding with the new, but, by and large, it is difficult to find examples of actual "forest devastation" in New England. Because of favorable climate and soil, and a great variety of trees species, both conifers and hardwoods, new stands almost invariably take the place of the old, and the land continues in forest. Nature has been extremely generous to New England. Not only were the abandoned farms naturally seeded to valuable white pine, but, even more remarkable, the great majority of the cut-over "old field" pine lots have come in to potentially valuable mixed hardwood, or pine and hardwood stands. To be sure, most of the present stands are young and the trees are small, but, if one is willing to put his trust in the future and wait for his investment to yield its return, there still remain innumerable opportunities for profitable private forestry, particularly in the cultivation of hardwood sawtimber crops.

## WHY OPPORTUNITIES FOR PROFITABLE TREATMENT ARE OVERLOOKED

One of the chief reasons for neglect to grasp such opportunities is the inability of the average wood lot owner to judge the future value of an immature stand, especially if the stand is a mixture of hardwoods. Unfortunately, many of the older generation, remembering the profits of the past, still think that pine is lumber and hardwood is cordwood. Nothing could be farther from the truth. The point is that the growing of hardwood sawtimber crops is not at all understood, though the present indiscriminate and untimely cutting of middle-aged stands for cordwood seems to indicate some realization of the fact well known to foresters that "Letting Nature take her course" in hardwoods is a slow, wasteful and profitless process. The pine wood lot grew up without care or treatment, and yet yielded high volumes of sawtimber; but hardwood stands contain too many trees of inferior species, too many forked and crooked trees of the better species, and too many small, spindling trees of all sorts to yield more than a few thousand feet of good lumber in a reasonable length of time. Under New England conditions such an outcome is due, in many cases, simply and solely to the lack of early weeding treatments and some later thinnings to get rid of the weeds and to give the most promising individuals of the most valuable species opportunity to grow to sawtimber size. Under proper conditions such treatments may be expected to bring large returns.

## THE APPLICATION AND RESULTS OF WEEDING AND THINNING

In choosing conditions most favorable for the profitable treatment of young and middle aged hardwood stands the fertility of the soil is of primary consideration. Cut-over lands of good fertility almost always support well stocked stands containing plenty of straight, single-stemmed trees of desirable species to form a final crop of high quality and value. And it is the final crop which one should constantly keep in mind when judging the prospective worth of an immature stand and its adaptability to treatment. When it is realized that sapling stands often contain several thousand trees per acre, and that the final stand, under good management, will consist of not more than 100 dominant crop trees per acre, it is evident that a great number of poor trees may be cut out without reducing the final yield. This fact should never be lost sight of. It is a poor stand indeed which cannot be made to produce a good yield of sawtimber, if taken in time.

The technique of weeding young stands has already been discussed by the writer in *The Old Farmer's Almanac* (for 1934), and the importance of favoring mixtures of species pointed out by the late director of the Harvard Forest, Richard T. Fisher, in the *Almanac* for 1935. With the weeds under control, and a good variety of crop trees of valuable species free to grow, the next treatment needed will be a thinning, ordinarily at around 25 to 30 years of age. The purpose of this is to give the chosen crop trees room to expand their crowns, thus encouraging the rapid production of clear wood in the lower bole. For the most part the trees removed will be long, slim "whips" and other trees of larger size and inferior quality which are crowding the crop trees. Special care will be taken not to cut the subordinate trees (the undergrowth or trainers), since these are of great value in protecting the soil, and aiding in the pruning of the lower branches of the crop trees. Where further thinnings are made, at about 10-year intervals, it is estimated that the final crop at 70 years will consist of trees from 15 to 19 inches in diameter (at breast height), and will yield upwards of 20,000 board feet of sawtimber per acre, approximately one-half of it high grade lumber worth from \$50 to \$100 per thousand at present prices. By acquainting himself with the necessary cultural treatments, and making the most of the products derived from periodic thinnings the private owner may develop a crop having greater value than the best second growth pine, and bringing him a thoroughly satisfactory return on his investment.

## HOUSEHOLD HINTS—1936

A hoop of heavy wire about a foot in diameter with an opening makes a convenient storage place for the varied pieces of twine that many people save from packages. The wads can be shifted around the hoop till the desired one reaches the opening. Between times the hoop can hang on a convenient hook.

A shallow box provided with four smoothly running casters is a great convenience when washing painted floors and avoids all risk of spotting from the pail. It should be big enough to carry pail, scrubbing brush and cloth, and the soap.

When using a biscuit crust on a meat pie, have the meat and sauce boiling hot before floating the biscuit dough on the mixture if you want your biscuits to be light. An easy way to do this is to put the mixture in the oven, in the dish in which the pie is to be made, before you start to make the biscuits.

A large sponge such as that used in washing a car is excellent for washing woodwork, especially because it drips so much less than a cloth.

Steamed puddings are especially good when made in individual glass custard cups. They cook thoroughly in a much shorter time than a big pudding.

To dampen delicate materials evenly for ironing, roll them in a damp Turkish towel for half an hour before pressing.

If you are annoyed because your small utensils such as spoons and paring knives are hard to find, ask your husband to put appropriate partitions in the kitchen drawers.

If you have a piece of a loaf of bread which is too dry to eat, slice it very thin, dry and toast the slices, and store until needed to serve as an accompaniment for soup or salad.

A little coloring in the whipped cream used for garnish on a dessert may help to carry out a color scheme for luncheon.

If a child annoys you by moistening his thumb to turn the pages of a book, suggest using the eraser end of a pencil.

When packing dresses for a trip it pays to use large sheets of soft tissue paper for each dress. It helps to reduce wrinkles to a minimum and makes it easy to slip out a desired dress from the pile.

When making buttonholes in a child's garment in places where there will be a good deal of strain, additional strength can be gained by outlining the buttonhole on the sewing machine using a short stitch. The buttonhole is then cut and worked as usual.

If a plastered closet is so shallow that garments are likely to rub against the wall it may be worth while to paper the walls with a heavy, smooth-surfaced paper.

A yard more or less of inch wide ribbon provides a convenient anchorage for safety pins. It is much easier to find the right size than if one must rummage in a box.

A metal lined tray for the plant window saves much bother in avoiding the necessity for wiping up spots from the floor after watering.

If you have a mechanical refrigerator, try putting a couple of paper towels in the bottom of the hydrator to absorb the drip from washed vegetables.

If spills on the kitchen floor are wiped up at once with a damp cloth or absorbent paper, the intervals between mopping can be much longer.

A pad known as the "request list" which hangs in a convenient place in the kitchen is very popular in one family and a godsend to the meal planner. Anyone who writes on it knows that sooner or later his request will be granted and the cook knows that at least one person will be pleased.

When scrambled eggs are dished for the table, fill the frying pan with salted water if you want it to be easy to wash.

Do you make good use of scissors in the kitchen? Try hanging a sturdy pair where they are visible and handy and see how indispensable they become.

Two of the inexpensive string dish cloths stitched together on three sides make an excellent lettuce bag.

## CHARADES

1

My first does affliction denote,  
Which my second is destined  
to feel;

My whole is the best antidote  
Such affliction to soothe and  
to heal.

2

My first is wise and foolish;  
My second, the physician's study;  
My third, the pleasant ornament  
of a house.

3

My first's a prop,  
My second's a prop,  
My third's a prop.

4

Though my first to my second  
gives birth,  
In their age no distinction  
prevails;

In my whole they are one, which  
on earth,  
As the parent of rest, labour  
hails.

5

My first of mother earth's a  
part;  
Whose bosom oft contains my  
second;

My whole's a keen and subtle  
art,  
Yet fair in war is ever reck-  
on'd.

6

The mighty power of my first,  
How often silent tongues can  
tell;  
Form'd to create the raging  
thirst,

My second can allay so well:  
My third in neat and modest  
guise  
Your table every day attends.

In little space your wants sup-  
plies,  
And at each corner serves  
your friends.

7

My first, where floats the per-  
fumed breeze  
Rich laden from some tropic  
grove,

Bright glancing through the  
dark green trees,  
'Mid leaves and flowers de-  
lights to rove.

My second is a work of art;  
'T is fashioned by a skill  
divine;  
'T is prompted by a mother's  
heart;

Of natural love a holy shrine.  
With treasures placed within  
my whole,

My first is long content to  
stay;

Thence, as successive seasons  
roll,  
Fresh life and beauty float  
away.

8

My first, Napoleon found as his,  
Upon the plains of Waterloo;  
And many, cold and in the dark,  
Have joyed to find it too.

With all your loveliness and  
grace,

With mind still beaming from  
your face,  
There's nought about you I can  
see,

My second I would wish to be.  
And some may think my whole  
are you,

Nor will I say they think not  
true.

My first, then, you may never  
find,  
But surely make one to your  
mind.

9

Deign to accept my humble lay,  
As former poets used to say.

After an evening spent with  
you,

My first is what none wish to  
do.

My second, amid mountain snows,  
Reflects the sun's departing rays;  
With changeful, rosy light it  
glows,

While spreads around the pur-  
ple haze.

Though its good deeds were  
never scored,

My whole a favorite we may  
call;

For, present at the festive  
board,

'T is welcome both to great and  
small.

10

By my first my second is made,  
In my second my first I hold.  
And this, to speak truth, is all  
Of my whole, that needs to be  
told.

11

My first, in the cold, sullen  
north,

Crawls backward o'er the  
sand;

But, in a sunnier clime, goes  
forth

In broad and martial band.

Around my next what soft de-  
lights,

What dreams enchanting  
hover;

The weary whist-player it in-  
vites

From beating to recover.

The whole is oftentimes applied  
To some ill-natured soul;

Pray try that frowning brow to  
hide!

I trust you're not my whole.

The answers to these charades will be found on page 48.

## THE AUTOMOBILE IN NEW ENGLAND

*The laws and regulations relating to the operation of motor vehicles are subject to frequent changes, and some may possibly occur after the time of our going to press.*

*These laws are taken from State Law books and substantiated by the Registrar of Automobiles in each New England State in October, 1935.*

### MAINE

**CAR REGISTRATION:** With Secretary of State. Expires December 31. May be used until March 1. (Except Dealers and Busses.)

**FEES:** Passenger vehicles, 25 cents per horsepower plus 25 cents per hundredweight, 50 cents per hundredweight if solid tires. Motor vehicles used for hire or livery, double these fees. Reduced one-half September 1st.

**DRIVER'S LICENSE:** To persons 15 or over. Between 15 and 18 application requires father's signature if living, otherwise by mother or guardian having custody of minor. Employer may sign when applicant has no father, mother or guardian. Fee \$2.00. Expires Dec. 31. Chauffeur's license issued to persons 18 or over. Fee \$3.00.

**LIGHTS:** From half hour after sunset to half hour before sunrise. Must conform to regulations of Secretary of State. If vehicle is so constructed or controlled that it can exceed a speed of 15 miles per hour, its front lamps must render discernible objects 200 feet ahead on level road and at the same time at least 7 feet to the right of the axis of the vehicle for 100 feet. No part of the light beam when projected 75 feet or more ahead of lamps is to be more than 42 inches higher than surface on which vehicle stands. If vehicle is so constructed or controlled that it cannot exceed a speed of 15 miles per hour, the requirements are less.

**SPEED:** 15 miles per hour when passing school at recess or during opening and closing periods and when approaching within 50 feet of an intersection. 25 miles per hour in business and built-up portions. *Prima facie* lawful speed 35 miles per hour under all other conditions. Must be reasonable and proper so as not to endanger persons or property. Commercial vehicles, pneumatic tires, 35 miles in open country and 12 miles in built-up portions. Equipped with hard tires, 15 miles in open country and ten miles in built-up portions. Bus not to exceed 45 miles per hour.

**NON-RESIDENTS:** Pleasure cars exempt from Maine registration if properly registered in State of owner's residence. Trucks, tractors and trailers not owned by foreign corporations doing business in this State having capacity of  $1\frac{1}{2}$  tons or less, exempt. All others must register. Cars operated for hire require Maine registration.

**MOTOR TRUCKS:** Registration fees: Based on capacity and kind of tires. Range from \$10.00 on 1000 pounds or less to \$400.00 for over 12 tons with hard tires.

**INSURANCE:** In case of conviction of violation of certain sections of the automobile law, proof of financial responsibility required; Registration suspended until furnished. Such proof may be in the form of insurance, bond, real estate lien, collateral or money. Also required of all trucks operated as Interstate, Contract or Common Carriers, and any motor vehicle operated as a public car.

### NEW HAMPSHIRE

**CAR REGISTRATION:** With the Commissioner of Motor Vehicles. Expires April 1.

**FEES:** Vehicles equipped with pneumatic tires, not exceeding 4000 pounds, 35 cents per 100 pounds. The fees increase with weight until they reach 60 cents per 100 pounds on weights of over 8000 pounds. For all vehicles with hard rubber tires 20 cents per 100 pounds is added to the above rates. For all vehicles with iron, steel or other hard tires 40 cents per 100 pounds is added to the above rates.

The minimum fee is \$10 for a passenger vehicle. No motor vehicle owned or controlled by a resident may be registered without a permit from the city or town where such owner resides. Fee for permit varies from 17 mills to 3 mills per \$1 of list price according to year of manufacture. Exemption where applicant for permit has been assessed on property used in purchase of car.

**DRIVER'S LICENSE:** Persons 16 or over. Original license and examination, \$3. Expires December 31; renewals, \$2; chauffeur's license to persons over 18. Fee, \$5; renewals, \$2.

**NON-RESIDENT OWNER:** A non-resident owner of a motor vehicle which is used solely for pleasure and is not used for carrying passengers or property for a profit or for hire, and which has been duly registered for the current year in the state or country of which the owner is a resident, and in accordance with the laws thereof shall not be required to register such motor vehicle in this state.

**OPERATOR'S LICENSE:** No owner of such motor vehicle and no non-resident chauffeur or driver of such vehicle who is the holder of a license to drive such vehicle in the state or country in which he resides shall be required to purchase a license to drive such vehicle within this state.

**LIGHTS:** Between half hour after sunset and half hour before sunrise. Lights from front lamps to be visible at least 200 feet in the direction in which the vehicle is proceeding. Headlights must have dimmers.

**SPEED:** *Prima facie* unlawful if exceeding 15 miles an hour passing schools, at intersecting streets, on curves and grades where view is obstructed, and in business districts where there are no traffic officers or signals; exceeding 20 miles on other highways in business districts, or in residence districts; exceeding 35 miles elsewhere.

## VERMONT

**CAR REGISTRATION:** With Commissioner of Motor Vehicles, Montpelier, Vt. Expires March 31.

**FEES:** Motor vehicles, pleasure car type. Manufacturer's weight: 2000 pounds or less, \$12.00; 2001 pounds to 2500 pounds, \$14.00; 2501 pounds to 3000 pounds, \$18.00; 3001 pounds to 3500 pounds, \$21.00; 3501 pounds to 4000 pounds, \$25.00; 4001 pounds to 4500 pounds, \$29.00; 4501 pounds and over, \$33.00.

**DRIVER'S LICENSE:** To persons 18 or over. Junior's license to persons 16 and 17, \$2.50. Expires March 31.

**Restrictions as to Sizes:** Width, 96 inches. Height, 12 feet. Length, Single unit:—50 feet. Tractor, semi-trailer, 50 feet. Other combinations, 50 feet.

**NUMBER OF TRAILERS:** 1 trailer or 1 semi-trailer only permitted.

**MINIMUM AXLE SPACING:** When gross weight is in excess of 20,000 pounds, 40 inches.

**CLEARANCE LIGHTS:**—Required on all motor vehicles having a width in excess of 80 inches. Green at front; red at rear. Left edge.

**Legal limits as to gross weight:** Per inch of tire surface in contact with road: 600 pounds. Per axle: When gross weight is in excess of 20,000 pounds limited to 15,000 pounds per axle. Town roads: All vehicles 16,000 pounds. State aid roads: All vehicles 20,000 pounds. State Highways and their connections on state aid highways: Single unit, 25,000 pounds; 3 axle unit, 30,000 pounds, truck or tractor with trailer or semi-trailer attached, 35,000 pounds. Flags and flares not compulsory but recommended.

**STATE GASOLINE TAX:** 4 cents per gallon.

**SIGNAL REGULATIONS:** Hand signals required. Approved signalling devices may be used.

**GASOLINE TANKS:** Not more than one motor fuel tank, the capacity of which shall not exceed 35 gallons.

**RECIPROCITY:** Full. Registration and operator's license. Exception: Vermont registration and operator's license required for all motor vehicles used for the transportation of persons or property for hire or profit between points within the state or when carrying auxiliary fuel tanks.

**FEES:** Motor trucks: Light weight plus load to be carried at following rates. 50c. per 100 pounds up to and including 7,000 pounds; 60c per 100 pounds, 7,100 pounds to 11,000 pounds; 70c per 100 pounds, 11,100 pounds to 17,000 pounds; 80c per 100 pounds, 17,100 pounds and over; fractional of 100 pounds to be disregarded.

**OPERATOR'S LICENSE:** \$2.50. Examination required for first license. Fee \$2.00.

**MILEAGE TAX:** None.

**SPEED LIMITS:** Capacity 1 to 2 tons, 35 miles per hour; Capacity over 2 tons, 30 miles per hour; Bus, 35 miles per hour.

### MASSACHUSETTS

**CAR REGISTRATION:** Annually with Massachusetts Registrar of Motor Vehicles. Expires December 31.

**FEES:** Less than 30 horse power, \$10 when non gasoline driven and \$3 when gasoline driven; 30 to 40 horse power, \$15 when non gasoline driven and \$4.50 when gasoline driven; 40 to 50 horse power, \$20 when non gasoline driven and \$6 when gasoline driven; 50 horse power or more, \$25 when non gasoline driven and \$7.50 when gasoline driven. From October 1 to December 31 half fee.

For every gasoline driven automobile used for the transportation of goods, wares or merchandise, 15 cents for every hundred pounds of the weight of such vehicle and of its maximum carrying capacity, but in no event less than \$6.

**DRIVER'S LICENSE:** To persons 16 and over. Fee \$4; examination required. Yearly renewal fee, \$2.00.

**LIGHTS:** Between half hour after sunset and half hour before sunrise. Front lights must show 160 feet, must have red light showing in rear and white light illuminating the registration number. No head lamp without a lens approved by the Registrar to prevent glaring rays.

A green light must be attached to the extreme left of the front of a motor truck, trailer, or commercial motor vehicle used solely as such, having a carrying capacity of three tons or over, to indicate the extreme left lateral extension of the vehicle or load.

Every truck or trailer of more than two tons' carrying capacity must be equipped with a red reflector in the rear.

**SPEED LIMITS.**—*Section 17.* No person operating a motor vehicle on any way shall run it at a rate of speed greater than is reasonable and proper, having regard to traffic and the use of the way and the safety of the public. It is *prima facie* evidence of a rate of speed greater than is reasonable and proper if car is operated at rate of speed exceeding 30 miles an hour for the distance of a quarter of a mile, outside of a thickly settled or business district; inside a thickly settled or business district, at a rate of speed exceeding 20 miles an hour for the distance of one eighth of a mile; and in turning corners, approaching intersections, at more than 15 miles an hour. Good judgment and the safety of the public are the best guides to proper speed.

**NON-RESIDENTS:** At the expiration of period of 30 consecutive days after date of entry of vehicles in any one year, or acquisition by non-resident of regular place of abode or business in this state, application for non-resident permit must be made. Permit will be issued without charge, if owner holds policy of liability insurance providing indemnity for death or injury to the limits of at least \$5,000-\$10,000. Car may then be operated for same period allowed Massachusetts residents in state of non-resident's registration.

**INSURANCE:** Compulsory. Motor vehicles cannot be now registered in Massachusetts without being insured to cover personal injuries.

## RHODE ISLAND

**CAR REGISTRATION:** Dept. of Taxation and Regulation, Div. of Motor Vehicles. Expires December 31.

**FEES:** Automobiles with pneumatic tires, minimum fee \$8 for gross weight of 2500 pounds or less. The fee increases with the gross weight. For cars whose gross weight is more than 6000 pounds the fee is \$23.

**MOTOR TRUCK OR TRACTOR WITH PNEUMATIC TIRES:** The fee varies with the gross weight. The minimum fee for vehicles whose gross weight is 3000 pounds or less, is \$12.50 and for vehicles whose gross weight is more than 28,000 pounds it is \$100.

For the registration of every automobile, motor truck or tractor, when equipped with other than pneumatic tires, there shall be added to the above gross weight fees a charge of ten cents for each one hundred pounds of such gross weight.

**DRIVER'S LICENSE:** To persons 16 or over. Examination required. License or renewals, \$2. Valid one year from date of issue.

**LIGHTS:** From one-half hour after sunset to one-half hour before sunrise. Headlights must illuminate objects 200 feet ahead. Register number must be visible sixty feet to the rear.

**SPEED:** No person shall operate a motor vehicle upon the public highways recklessly or at a rate of speed greater than is reasonable or proper, having due regard to the width, street intersections, conditions, traffic, weather or use of such highways, or so as to endanger property or the life or limb of any person. 20 miles per hour in thickly settled sections and 35 miles per hour elsewhere.

## CONNECTICUT

**CAR REGISTRATION:** With the Commissioner of Motor Vehicles. Expires December 31.

**FEES:** Pleasure vehicles, light weight up to 3500 pounds, \$7; 3500 to 4500 pounds, \$9; over 4500 pounds, \$11. No pro-rated reduction, but half fees after seven months.

**DRIVER'S LICENSE:** To persons 16 or over upon examination. Expires last day of February. Fee for license, \$3. For examination, \$2.

**LIGHTS:** From half hour after sunset to one-half hour before sunrise, and when smoke or weather conditions make it impossible to see 200 feet ahead. Headlights must be visible for 500 feet in clear weather and the top of the lights not over 56 inches from the ground. Must have a red light behind and a white light which illuminates number plates.

**SPEED:** Motor vehicles must be operated at a speed that is reasonable, having regard to width, traffic and use of the highway, intersection of streets and weather conditions.

**NON-RESIDENTS:** A non-resident over 16 years of age, who has complied with the laws of his state or country, may operate without Connecticut registration or license for the same period allowed Connecticut cars in his home state or country. Reciprocity is not extended to licensed operators of the State of New York unless they are at least eighteen years of age. Non-residents may operate in Connecticut taxicabs, liveries and charter busses where like privilege is granted by their home state.

**MOTOR TRUCKS:** Registration fees for a pneumatic tired, 30c per cwt. of gross weight up to 20,000 pounds; 40c per cwt. 20,000 to 30,000 pounds; 50c per cwt. 30,000 to 40,000. Having solid rubber or cushion tires, up to 20,000 pounds is 40c per cwt.; 20,000 to 26,000, 50c.

**INSURANCE:** Any person convicted of violating certain specified sections of the law relating to motor vehicles, must furnish the Commissioner with proof of financial responsibility to respond in damages or lose his right to operate. Such proof may be evidence of insurance or a bond or the deposit of money or collateral.

## POETRY, ANECDOTES AND PLEASANTRIES

### MUSKRAT

He wears a handsome furry pelt  
Of bristling hair with underfelt,  
How warming to the back we  
know,  
To backs on which it didn't grow.  
His front feet shaped for art and  
craft,  
Webfooted like a duck abaft,  
The forward hands his living  
earn,  
The motive power in the stern.  
The slough or marsh his habitat,  
His low horizoned world is flat;  
He sounds the depths but scales  
no heights,  
Content to creep, essays no  
flights.

His course across a pond or lake  
Is followed by a rippling wake,  
He swims submerged and only  
shows  
A tiny periscopic nose.

At times he varies his abode,  
With changing seasons, a la  
mode;  
In summer, earthworks under  
ground,  
In winter, mud cemented mound.  
The reeds which serve as 2"x4",  
Delivered at his very door  
By water transport, labelled  
"rush",  
Are laid with water level flush.  
Such quarters sound a little  
musty,  
Somewhat damp and rather fusty,  
A trifle gloomy, dim and dusky:—  
And, oh, how very, very musky!  
—Arthur W. Bell

Some wag has described a phil-  
osopher as a blind man in a dark  
room looking for a black cat that  
isn't there.

### WEATHER

I love grey days of wind and rain  
When all the big trees shout and  
play  
And misty days all filled with  
dreams  
I just love weather anyway.

### BEES

I love it in the country  
But one thing worries me  
The bees work all day Sunday  
Which really shouldn't be.  
"Cheerful Cherub"  
by Rebecca McCann.  
Pub. Covici Friede

To eat is human, to digest divine.  
—C. T. Copeland

The United States consists of  
certain and uncertain portions of  
land, water and mud scattered  
over this and the other side of the  
globe.

The climate is variable, depend-  
ing on its condition, and the  
atmosphere nervous and fluctuat-  
ing. High winds prevail in the  
region of Chicago and other un-  
tamed sections of the West, and  
brain-storms and hot-air currents  
are frequently encountered around  
New York and Pittsburg.

Generally speaking, the surface  
is undulating. The highest ground  
in the world, we are told by real-  
estate agents, lies along Broad-  
way in the City of New York. In-  
deed, there is a very small part of  
the metropolis on the level.

At the time of its discovery the  
country was occupied by the  
American Indians, which race has  
gradually disappeared before the  
murderous march of civilization  
until few remain who have not  
been "benevolently assimilated."  
The last remnants of these  
copper-colored tribes have been  
consolidated by a promoter  
known as Buffalo Bill. This mer-  
ger is called Amalgamated Cop-  
per.

The surviving Indians hold Buf-  
falo Bill in high esteem, for the  
very good reason that since join-  
ing him they have had a show.  
The people who now inhabit the  
United States are called Ameri-  
cans, because they are from every  
place except America.

It is an exceedingly fertile  
country, yielding its products in  
great variety and abundance.  
Some localities produce politi-  
cians and confusion; in other  
sections the natives devote much  
of their time to raising corn, rye  
and mint, and the rest of the time  
to raising Cain. Fish and oysters  
are abundantly supplied to epi-  
cures and lobsters to manicures,  
peaches frequent the cafes and  
fashionable resorts, and lemons  
are distributed with marked ge-  
nerosity.

## SMILING

When the weather suits you not,  
 Try smiling.  
 When your coffee isn't hot,  
 Try smiling.  
 When your neighbors don't do  
 right,  
 Or your relatives all fight,  
 Sure 'tis hard, but then you might  
 Try smiling.  
 Doesn't change the things of  
 course,  
 Just smiling  
 But it cannot make them worse,  
 Just smiling.  
 And it seems to help your case,  
 Brightens up a gloomy place,  
 Then it sort o' rests your face—  
 Just smiling.

## Jonathan's Hunting Excursion

"Did you ever hear of the scrape that I and Uncle Zeke had duckin' onct on the Connecticut?" asked Jonathan Timber-toes, while amusing his old Dutch hostess, who had agreed to entertain him under the roof of her log cottage, for and in consideration of a brand new tin milk-pan. "No, I never did; do tell it," said aunt Punksins. "Well—you must know that I and Uncle Zeke took it into our heads on Saturday's afternoon to go a gunning after ducks, in father's skiff; so in we got and sculled down the river; a proper sight of ducks flew backwards and forwards I tell ye—and by'm-by a few on 'em lit down by the mash, and went to feeding. I caught up my powder-horn to prime, and it slipped right out of my hand and sunk to the bottom of the river. The water was amazingly clear, and I could see it on the bottom. Now I couldn't swim a jot, so sez I to Uncle Zeke, you're a pretty clever fellow, just let me take your powder-horn to prime. And don't you think, the stingy critter wouldn't. Well, says I, you're a pretty good diver, 'un if you'll dive and get it. I'll give you prim-in'. I thought he'd leave his powder-horn; but he didn't but stuck it in his pocket, and down he went—and there he staid"—here the old lady opened her eyes with wonder and surprisc, and a pause of some minutes ensued, when Jonathan added—"I looked down, and what do you think the critter was doin'?" "Lord!" exclaimed the old lady, "I'm sure I don't know." "There he was," said our hero, "setting right on the bottom of the river, pouring the powder out of my horn into hizen."

## ODE TO A COW

When life seems one too many for  
 you,  
 Go and look at a cow.  
 When the future's black and the  
 outlook blue,  
 Go and look at a cow.  
 For she does nothing but eat her  
 food,  
 And sleep in the meadows entirely  
 nood,  
 Refusing to fret or worry or  
 brood  
 Because she doesn't know how.

Whenever you're feeling bothered  
 and sore,  
 Go and look at a cow.  
 When everything else is a fearful  
 bore,  
 Go and look at a cow.  
 Observe her gentle and placid air,  
 Her nonchalance and savoir faire,  
 Her absolute freedom from every  
 care,  
 Her imperturbable brow.

So when you're at the end of your  
 wits,  
 Go and look at a cow.  
 Or when your nerves are frayed  
 to bits,  
 And wrinkles furrow your brow;  
 She'll merely moo in her gentle  
 way,  
 Switching her rudder as if to say:  
 "Bother tomorrow! Let's live  
 today!  
 Take the advice of a cow."

—London News-Chronicle

A man with an uncanny mania  
 for juggling with figures pro-  
 duced pencil and paper and said  
 to a friend:

"Put down the number of your  
 living brothers. Multiply it by  
 two. Add three. Multiply the re-  
 sult by five. Add the number of  
 living sisters. Multiply the result  
 by ten. Add the number of dead  
 brothers and sisters. Subtract  
 150 from the result."

The friend did it.

"Now," said the other with a  
 cunning smile, "the right hand  
 figure will give the number of  
 deaths, the middle figure the num-  
 ber of living sisters, and the left  
 hand figure the number of living  
 brothers."

And it was so.

—Tid-bits, London

Jack and Jill went up the hill  
 At sixty miles or better,

A cop unkind

Was right behind—

They're seeking ball by letter.

## THE NEW FEDERAL TAXES

Enacted August 30, 1935

The 1935 Revenue Act, frequently referred to as the "soak the rich" law in that the increased taxes are imposed only on incomes above \$50,000, was passed in the closing hours of the 74th Congress. The principal increases are to be found in the individual surtax rates and range from 1% to 16%. The highest bracket, over \$5,000,000 has been increased from 59% to 75%. The new rates however apply "only in the case of taxable years beginning after December 31, 1935." In other words, for filing purposes, the old 1934 surtax rates are applicable for the taxable year 1935.

The new Act imposes graduated Corporation Tax rates from 12½% to 15%; higher Excess Profits tax rates; increased Capital Stock, Estate and Gift taxes but decreases rates on penalties and interest.

Actually an amendment to previous Revenue laws, the 1935 Act was approved and signed by President Roosevelt on August 30, 1935 at 6 p.m. and, except as otherwise provided, takes effect upon its enactment.

### INCOME TAXES

Every single person (whether or not head of a family) and every married person not living with husband or wife, earning more than \$1,000 must file a return. Every married person, living with husband or wife, earning \$2,500 or more must file a return. Where the combined earnings of both are \$2,500 or more a return is required, or each may file a return, dividing the exemption in any manner they may agree upon.

If the gross income is \$5,000 or more, a return is required even if the net income is less than the personal exemption. Gross income is defined as gains, profits and income derived from salaries, wages, compensation for personal services, profits from professions, trades, business, commerce, or sales, dealings in property, rent, interest, dividends, securities, or gains or profits derived from any source whatever. In a trading concern gross income means gross sales less the cost of goods sold, such cost, however, not to include overhead which is chargeable to selling or office costs.

### INCOME TAX TABLE FOR 1935 INCOME RETURNED IN 1936 Explanation

The Table following is for a married person or the head of a family, with a personal exemption of \$2,500, having no dependents and receiving no dividends or partially exempt interest.

Income Tax Table			
Net Income	Total Tax	Net Income	Total Tax
\$1,000 .....	0	\$28,000 .....	\$ 3,640.00
2,000 .....	0	30,000 .....	4,100.00
3,000 .....	*\$8.00	35,000 .....	5,310.00
4,000 .....	*44.00	40,000 .....	6,620.00
5,000 .....	*80.00	45,000 .....	8,050.00
6,000 .....	140.00	50,000 .....	8,925.00
7,000 .....	200.00	60,000 .....	12,295.00
8,000 .....	280.00	70,000 .....	16,160.00
9,000 .....	365.00	80,000 .....	21,600.00
10,000 .....	455.00	90,000 .....	26,500.00
12,000 .....	650.00	100,000 .....	31,900.00
14,000 .....	1,060.00	150,000 .....	59,900.00
16,000 .....	1,320.00	200,000 .....	88,400.00
18,000 .....	1,620.00	300,000 .....	146,400.00
20,000 .....	1,960.00	500,000 .....	265,400.00
22,000 .....	2,340.00	1,000,000 .....	572,900.00
24,000 .....	2,760.00	2,000,000 .....	1,449,065.00
26,000 .....	3,180.00	5,000,000 .....	3,789,040.00

To determine the tax of a single person (without dependents, dividends, or partially exempt interest), the total tax as shown in the above table should be increased by \$60.

\*An earned income credit, (10% on salary) has been deducted in computing the tax. This earned income credit of 10% can only be allowed on salaries up to \$14,000.

## TAX RATE COMPARISON TABLE

### Individuals—Normal Income Tax

Personal exemptions	1934 Act	1935 Act
Single .....	\$1,000	\$1,000
Family head or married .....	2,500	2,500
Tax rates	Per Cent	Per Cent
First \$4,000 and over .....	4	4

### Individual—Surtaxes

	1934		1935			1934		1935	
	Act Per Cent	Act Per Cent	Act Per Cent	Act Per Cent		Act Per Cent	Act Per Cent	Act Per Cent	Act Per Cent
First \$6,000 .....	4	4	4	4	62,000 to 68,000 .....	36	36	39	39
\$6,000 to 8,000 .....	5	5	5	5	68,000 to 74,000 .....	39	39	43	43
8,000 to 10,000 .....	6	6	6	6	74,000 to 80,000 .....	42	42	47	47
10,000 to 12,000 .....	7	7	7	7	80,000 to 90,000 .....	45	45	51	51
12,000 to 14,000 .....	8	8	8	8	90,000 to 100,000 .....	50	50	55	55
14,000 to 16,000 .....	9	9	9	9	100,000 to 150,000 .....	52	52	58	58

38,000 to 44,000 .....	24	24	24	24	750,000 to 1,000,000 .....	58	58	72	72
44,000 to 50,000 .....	27	27	27	27	1,000,000 to 2,000,000 .....	59	59	73	73
50,000 to 56,000 .....	30	31	31	31	2,000,000 to 5,000,000 .....	59	59	74	74
56,000 to 62,000 .....	33	33	33	33	Over 5,000,000 .....	59	59	75	75

### Corporation—Income Tax

(Applicable to Calendar Year 1935)

Tax rate .....	1934 Act	1935 Act
Exemption .....	13 3/4 %	13 3/4 %
	None	None

New graduated corporation tax rates will be in effect for all taxable years beginning after December 31, 1935.

### Net Income

Not in excess of \$2,000 ..	12 1/2 %		14 %	%
Over \$2,000 to \$15,000 ..	13 %	Over \$15,000 to \$40,000 ..	15 %	%

A flat rate of 15 3/4 % is imposed on Consolidated returns.

### Stamp Taxes

	1934 Act	1935 Act
<b>Stock Transfers:</b>		
Stock with par value .....	4c per \$100 or fraction thereof	4c per \$100 or fraction thereof
Stock without par value .....	4c per share	4c per share
(If selling price is \$20 or more the rates are 5c instead of 4c.)		
Bond transfers .....	4c per \$100	4c per \$100
<b>Stock Issue</b>		
Stock with par value .....	10c per \$100 or fraction thereof	10c per \$100 or fraction thereof
Stock without par value .....	2c on each \$20 or fraction thereof	2c on each \$20 or fraction thereof
Bond issues .....	10c per \$100	10c per \$100
Conveyances .....	50c per \$500	50c per \$500
Produce futures .....	5c per \$100	5c per \$100

### Excise Taxes

	1934 Act	1935 Act
Lubricating oils .....	4c a gal.	4c a gal.
Automobiles—passenger .....	3 %	3 %
Automobiles—trucks .....	2 %	2 %
Automobile accessories <sup>1</sup> .....	2 %	2 %
Grape concentrates .....	20c a gal.	20c a gal.
If containing more than 35 % of sugar by weight.		
Brewers Wort		
Liquid malt; malt syrup .....	3c per lb.	3c per lb.
Note: Liquid malt containing less than 15 per centum of solids by weight shall be taxable as brewers wort.		
Malt syrups, liquid and extract .....	3c a lb.	3c a lb.
Chewing gum .....	2 %	2 %
Radios and phonograph records .....	5 %	5 %
Toilet preparations <sup>2</sup> .....	10 %	10 %
Jewelry <sup>3</sup> .....	10 %	10 %

### TAX RATE COMPARISON TABLE—Continued

Sporting goods .....	10 %	10 %
Cameras <sup>4</sup> .....	10 %	10 %
Firearms, shells and cartridges .....	10 %	10 %
Mechanical refrigerators .....	5 %	5 %
Furs <sup>5</sup> .....	10 %	10 %
Rubber tires .....	2 ¼ c a lb.	2 ¼ c a lb.
Inner tubes .....	4c a lb.	4c a lb.
Wooden matches <sup>6</sup> .....	2c per M	2c per M
Paper matches in books .....	½ of 1 % per M	½ of 1 % per M

<sup>1</sup> Not including tires and tubes.

<sup>2</sup> Excluding soap, dentifrices and mouth washes, on which the rate is 5%.

<sup>3</sup> Does not apply to articles sold after May 11, 1934, for less than \$25.00.

<sup>4</sup> Weighing not more than 100 lbs.

<sup>5</sup> Does not apply to articles sold after May 11, 1934, for less than \$75.00.

<sup>6</sup> Fancy wooden matches having stained or colored stem, 5c per 1,000 matches.

#### Import Taxes

Gasoline .....	1934 Act 2 ½ c a gal.	1935 Act 2 ½ c a gal.
Paraffin and other petroleum wax products .....	1c a lb.	1c a lb.
Lumber .....	\$3 per M ft.	\$3 per M ft.
Coal, coke, and briquets .....	10c per cwt.	10c per cwt.
Copper .....	4c a lb.	4c a lb.

#### Other Taxes

Telegraph messages .....	1934 Act 5 %	1935 Act 5 %
Telephone conversations, when charge is 50c or more .....	10 to 20c	10 to 20c
Leased wire .....	5 %	5 %
Radio and cable messages .....	10c flat	10c flat
Postal rates		
(first class) .....	1c addtl.	1c addtl.
Oil Pipe lines—transportation .....	4 %	4 %
Admissions <sup>7</sup> .....	1c for each	10 cents or fraction thereof
Safe deposit boxes .....	10 %	10 %
Electricity sales .....	3 %	3 %

<sup>7</sup> 40c exemption.

#### Corporations—Capital Stock Tax and Excess Profits Taxes

##### Capital Stock Tax:

Effective for the year ending June 30, 1936, the Capital Stock Tax is increased from \$1 per \$1,000 to \$1.40 per \$1,000 on the declared valuation. A new declaration of value of Capital Stock is allowed Corporations for the year 1936, which valuation thereafter cannot be changed.

##### Excess Profits Tax:

Increased to 6 % on net income in excess of 10 % and not in excess of 15 % and 12 % of net income in excess of 15 % of adjusted declared value. (The 1934 Excess profits tax law applies with respect to income tax years ending on or before June 30, 1936.)

#### Estate Tax

Exemption reduced from \$50,000 to \$40,000. The increased rates range from 2 % upon net estates not in excess of \$10,000 and 4 % upon net estates from \$10,000 to \$20,000, to 70 % on net estates in excess of \$50,000,000. The new provisions are applicable to estates of persons dying on August 31, 1935 and thereafter.

#### Gift Tax

Rates have been increased to approximately three-fourths of the new Estate Tax rates. Exemption has been decreased from \$50,000 to \$40,000 but the yearly exemption from tax of the first \$5,000 of any gift (except future interests in property) has been retained. The 1935 Act is effective as to gifts made January 1, 1936, and thereafter.

# GAME AND FISH LAWS

(Note:—For other information consult the Fish and Game Commissioner of each state. These laws are in force when this Almanac goes to print, November, 1935, and have been substantiated by the Fish and Game Commissioner in each state. All dates inclusive. For laws on Migratory Birds, write to State Game Commissioner or Bureau of Biological Survey, Washington, D. C.)

## GAME LAWS

### MAINE

**MOOSE.** Closed season, except on Bull Moose there shall be an open season in the counties of Knox, Lincoln and Waldo on November 28, 29, 30, 1935. Limit: 1 not less than one year old, having not less than two prongs of not less than 3 inches in length on each horn. Non-resident license fee \$25.25.

**DEER.** May be hunted in the counties of Androscoggin, Cumberland, Kennebec, Knox, Lincoln, Sagadahoc, and Waldo from Nov. 1 to Nov. 30; in York County from Nov. 11 to Nov. 30; in the counties of Washington and Hancock from Nov. 1 to Dec. 15; in the counties of Aroostook, Penobscot, Somerset, Piscataquis, Franklin and Oxford from Oct. 16 to Nov. 30.

**HUNTING** of wild animals is prohibited from one-half hour after sunset until one-half hour before sunrise, with the exception of skunks and raccoons.

**PARTRIDGE.** Open season Oct. 1 to Nov. 15.

**HUNTING** of wild birds is prohibited from sunset to  $\frac{1}{2}$  hour before sunrise. See Federal Laws.

**GRAY SQUIRREL.** Open season Oct. 1 to Oct. 31.

**WILD HARES OR RABBITS.** Open season Oct. 1 to March 1, except in counties of Franklin and Somerset, Oct. 1 to Mar. 31.

**LICENSES:** Any resident and his immediate family may without license hunt on land owned by him, or leased by him and on which he is actually domiciled and which is used exclusively for agricultural purposes.

Resident hunting license, \$1.15 annually. Combination hunting and fishing license, for residents, \$2.15 annually. Fishing license for residents \$1.15 annually.

Non-resident hunting license, for wild birds, rabbits, raccoons, foxes and unprotected wild birds or wild animals only, \$5.15 annually; for both wild birds and wild animals, \$15.15 annually. Junior small game \$2.15; Junior big game \$5.15. Non-resident fishing license \$5.15 for one year, \$3.15 for 30 days, \$1.65 for 3 days. Junior fishing license \$1.15.

Hunting licenses shall not be issued to any non-resident under sixteen years of age unless the written consent of the parent or guardian is attached to the application, but any resident under sixteen years of age may hunt without a license, if accompanied at all times by parent or guardian.

### NEW HAMPSHIRE

**DEER.** Open season: Wild deer, outside of private game preserves, may be hunted and taken after 6:00 a. m. and before 5:00 p. m. in the counties of Coos and Grafton from Nov. 1 to Dec. 1, and in all other counties from Dec. 1 to Dec. 16.

Wild deer shall not be taken by the use of any firearm other than a shotgun loaded with a single ball or loose buckshot within the counties of Hillsborough, Merrimack, Belknap or Rockingham, with the following exceptions: the town of Windsor, Hillsborough, Bennington, Deering, Frankestown, Weare, Antrim, Hancock, Greenfield, New Boston, Lyndeborough, Temple, Sharon, New Ipswich, Greenville, Mason, Wilton and Peterborough in the county of Hillsborough; the towns of Andover, Chichester, Wilmot, Danbury, Canterbury, Hill, New London, Sutton, Bradford, Warner, Salisbury, Newbury, Webster, Allentown, Loudon, Pittsfield, Epsom, Boscawen, Hopkinton, Dunbarton, Bow, Northfield, the eastern part of the town of Hooksett bounded on the northeast by Allentown, east by Deerfield, southwest by Candia and west by the old Portsmouth Railroad, and Henniker in the county of Merrimack; the towns of Sanbornton, Alton, Gilmanton, Barnstead,

Belmont, Meredith, Center Harbor, and New Hampton in the county of Belknap, and the towns of Candia, Auburn, Deerfield, Northwood, Nottingham, Raymond and Epping in the county of Rockingham.

Limit, one deer.

PARTRIDGE. Oct. 1 to Nov. 30.

QUAIL. No open season.

LICENSES: Hunting and Fishing: Resident \$1.85; Non-resident \$15.00.

Fishing: Non-resident \$3.00; 3-day Non-resident \$1.35.

Guide Licenses: Resident \$2.00; Non-resident \$20.00.

#### VERMONT

DEER. One deer with horns not less than 3 inches long, Nov. 21-Nov. 30 (except Sundays).

Landowner, member of his family, or authorized employee may kill deer doing damage to his fruit trees or crops; but person under whose direction a deer is so killed must, within 12 hours, report the matter in a signed statement to nearest fish and game warden. Deer may also be killed at any time in orchard zones established by director, but such killing must forthwith be reported to owner of orchard and county warden.

MOOSE, ELK AND CARIBOU. Closed season.

GRAY SQUIRREL. Open season Oct. 1 to Oct. 31.

HARE AND RABBIT. Open season Oct. 1 to Feb. 28.

PARTRIDGE. Open season Oct. 1 to Nov. 15.

QUAIL. Open season Sept. 15 to Nov. 30.

EUROPEAN PARTRIDGE, UPLAND PLOVER AND WOOD DUCK. No open season.

PHEASANTS. Wednesdays and Saturdays during October. Cock birds only.

LICENSES: Non-resident: Game, \$10.50; fish, \$3.15. (Reciprocal.)

Resident: Game and fish, \$1.50; game, \$1; fish, \$1. Citizens of United States who own \$1,000 taxable property in Vermont pay same fees as resident. Alien resident who has not declared his intention, pays same fees as non-resident; declarant resident for six months in State pays same fees as resident.

Non-resident fishing—Lake Champlain only, 5 consecutive days, \$1.50; Lake Bomoseen, 2 weeks, \$2.15; Lake St. Catherine, 2 weeks, \$2.15.

Hunting licenses not issued to persons under 16 without written consent of parent or guardian. Owners of farm lands and their resident minor children or tenants may hunt without a license on own lands during open season. Fishing license not required of persons under 15.

#### MASSACHUSETTS

DEER. Open season Dec. 2 to Dec. 7. No open season in Barnstable County. Daily closed season one-half hour after sunset to one-half hour before sunrise. No hunting dogs to be at large during open season on deer.

GRAY SQUIRREL. Open season Oct. 20 to Nov. 20.

HARE AND RABBIT. Open season Oct. 20 to Feb. 15; in Nantucket County Oct. 20 to last day of February. Dukes County, Nov. 15 to Feb. 15.

QUAIL. Closed season in Essex, Hampden, Hampshire, Berkshire, Franklin and Nantucket Counties.

PARTRIDGE. Open season Oct. 20 to Nov. 20.

LICENSES: Citizen (resident for six months), sporting, \$3.25; hunting, \$2.00; fishing, \$2.00. Minors and women, fishing, \$1.25; trapping, \$5.25. Minors, trapping, \$2.25.

Non-resident citizens, sporting, \$15.25; hunting, \$10.25; fishing, \$5.25; trapping, \$15.25.

#### RHODE ISLAND

GRAY SQUIRREL. Open season Nov. 1 to Dec. 31.

HARE AND RABBIT. Open season Nov. 1 to Dec. 31.

PARTRIDGE. Nov. 1 to Dec. 31.

QUAIL. Nov. 1 to Dec. 31.

**NEW SHOREHAM PHEASANTS.** Protected except first and third Wednesdays in November and first Wednesday in December. Limit, 2 per day.

**JAMESTOWN PHEASANT.** Limit, 2 per day.

No open season on Hungarian partridge, wood duck, swan, curlew, dowitchers, godwits, knots, phalaropes, sandpipers, stilts, surf birds, turnstone and willet, black breasted and golden plover, greater and lesser yellowlegs.

Sending or carrying out of the State partridge, quail, wood cock, wild duck, wild swan, wild geese, rails, shore marsh or beach birds prohibited. Live game birds or animals may not be brought into the State without a permit.

**HUNTING LICENSES:** Resident, \$2.00; Non-resident, \$10.00; unnaturalized foreign born person, \$15.00.

**FISHING LICENSES:** Resident, \$1.25; Non-resident reciprocal but not less than \$2.50; alien who has resided in State one year, \$2.50; other aliens, \$5.00.

## CONNECTICUT

Governor may suspend *open seasons* during time of drought.

**DEER.** No open season. Owners of agricultural lands, member of family, or employee may kill deer with a shotgun or, under permit, with a rifle, at any time on such lands when deer are damaging fruit trees or growing crops, but such killing or wounding must be reported to the commissioners within 12 hours.

**HARE, RABBIT** (except European, Belgian, or German hare and jack rabbit, no closed season): Nov. 2-Dec. 31, open season.

**GRAY SQUIRREL.** Oct. 20 to Nov. 23, open season.

**PHEASANT** (male only): Oct. 20-Nov. 23, open season.

Hungarian Partridge—Indefinite closed season.

Quail—Oct. 20-Nov. 23, open season.

**HUNTING AND FISHING LICENSES:** Non-resident: Game, \$10.35; game and fish, \$14.35; fish, \$5.35. Resident citizen: Game, \$3.35; game and fish, \$5.35; fish, \$3.35.

Hunting license not issued to persons under 16, and fishing license not required of such persons. Resident and his children may hunt or fish during open season without license on land on which he is actually domiciled, if such land is not used for club, shooting, or fishing purposes. Licensee must report amount of game killed, and must wear license button on outer garment. Alien: Not permitted to hunt. Taxidermist, \$5.

Hunting license exceptions: Non-resident citizen owning improved real estate in Connecticut to the value of \$1,000 or more or any lineal descendant of such non-resident may procure a license for the same fee as a resident.

Fishing license—Non-residents residing in a state the non-resident fee of which is in excess of \$5.35, shall be charged the same fee in this state. Aliens or their lineal descendants owning real estate situated in the state assessed for the purpose of taxation in the amount of \$500 or more and non-residents or lineal descendants of same owning improved real estate situated in the state assessed for the purpose of taxation in the amount of \$1,000 or more may procure a license for the same fee as a resident.

## FISH LAWS.

### MAINE

70	.42	.84	.84	1.47	2.52	3.77	4.95	6.35	7.74

**EXCEPTIONS**

(a) In the first or second zone, where the distance by the shortest regular practicable mail route is 300 miles or more, the rate is 9 cents for the first pound and 2 cents for each additional pound.

(b) On parcels collected on rural routes the postage is 2 cents less per parcel than shown in the foregoing table when for local delivery and 3 cents less per parcel when for other than local delivery.

(c) Parcels weighing less than 10 pounds measuring over 84 inches, but not more than 100 inches in length and girth combined, are subject to a minimum charge equal to that for a 10-pound parcel for the zone to which addressed.

Limit of size for parcels is 100 inches in length and girth combined. Limit of weight is 70 pounds in all zones.

**Library Books.** A special rate is allowed under certain conditions. (Inquire at Post Office as to requirements.)

**SPECIAL HANDLING. (Fourth Class Matter Only)**

Parcels will receive first-class handling if, in addition to regular postage, there is added—

2 lbs. or less .....	.10
Over 2 lbs. and not more than 10 lbs. ....	.15
Over 10 lbs. ....	.20

**SPECIAL DELIVERY FEES**

	First Class	Second, Third or Fourth Class
Up to 2 pounds .....	10c	15c
Over 2 pounds up to 10 pounds .....	20c	25c
Over 10 pounds .....	25c	35c

The prepayment of the foregoing fee on second, third, or fourth class mail entitles it to the most expeditious handling and transportation practicable, and also entitles it to special delivery at the office of address.

**To Canada** (including Newfoundland and Labrador) 20c prepaid in addition to regular postage on letters or articles only prepaid at the letter rate.

For special delivery rates to other foreign countries, consult post office.

**REGISTERED MAIL.**

Not to exceed \$5 .....	\$0.15	Not to exceed \$500 .....	\$0.70
Not to exceed 25 .....	.18	Not to exceed 600 .....	.80
Not to exceed 50 .....	.20	Not to exceed 700 .....	.85
Not to exceed 75 .....	.25	Not to exceed 800 .....	.90
Not to exceed 100 .....	.30	Not to exceed 900 .....	.95
Not to exceed 200 .....	.40	Not to exceed 1000 .....	1.00
Not to exceed 300 .....	.50		
Not to exceed 400 .....	.60		

**POSTAL MONEY ORDERS.**

For Orders		For Orders	
From \$0.01 to	\$2.50.... 6 cents	From \$20.01 to	\$40.00.... 15 cents
From \$2.51 to	\$5.00.... 8 cents	From \$40.01 to	\$60.00.... 18 cents
From \$5.01 to	\$10.00.... 11 cents	From \$60.01 to	\$80.00.... 20 cents
From \$10.01 to	\$20.00.... 13 cents	From \$80.01 to	\$100.00.... 22 cents

## POSTAL RATES.—FOREIGN

**Letters.**—For the places in the following list the postal rate is 3 cents each ounce or fraction. For all other foreign destinations, 5 cents first ounce and 3 cents each additional ounce or fraction: Andorra (Republic), Argentina, Balearic Islands, Bolivia, Brazil, Canada, Canary Islands, Chile, Colombia, Costa Rica, Cuba, Dominican Republic, Ecuador, Guatemala, Haiti, Honduras (Republic), Labrador, Mexico, Newfoundland, Nicaragua, Panama, Paraguay, Peru, Salvador, El; Spain, including Alhucemas Island, Ceuta, Chafarinas or Zafarani Islands, Melilla, Penon de Velez de la Gomera; Uruguay, Venezuela.

**Post Cards.**—Single post cards for places enumerated above 2 cents; maximum size  $6 \times 4\frac{1}{4}$  inches, minimum size  $4 \times 2\frac{3}{4}$  inches. Single post cards for all other foreign destinations 3 cents.

**Printed Matter.**— $1\frac{1}{2}$  cents for each two ounces or fraction. Limit of weight 8 lbs. 12 oz., in general. (Canada, 4 lbs., 6 oz.)

**Samples of merchandise.**—For all foreign destinations,  $1\frac{1}{2}$  cents each 2 ounces or fraction, with a minimum charge of 3 cents. Limit of weight: 18 ounces.

**Commercial papers.**—For all foreign destinations,  $1\frac{1}{2}$  cents each 2 ounces or fraction, with a minimum charge of 5 cents. Limit of weight 4 lbs., 6 oz.

**Maximum dimensions.**—For all foreign destinations on all classes of mail noted above (except Post Cards), 36 inches in length, breadth and thickness combined, the length being limited to 24 inches. When sent in the form of a roll the length (the maximum of which is 32 inches) plus twice the diameter is limited to 40 inches.

**Registration fee.**—For all foreign destinations, 15 cents in addition to postage. When a return receipt is requested there is an additional charge of 5 cents.

### INTERNATIONAL PARCEL POST.

**International (Foreign) Parcel Post.**—For all countries, colonies and places the postage rate is 14 cents a pound. Because of the varying transit charges, surcharges, etc., applicable to most foreign countries, in addition to the regular parcel post rates, it is important that a qualified postal employee handle transactions. Foreign parcel post must not be posted in a letter box; it must be taken to a regular post office and handed to a postal clerk.

### POSTAL MONEY ORDERS.—INTERNATIONAL.

Limit of a Single Order, \$100.

For Orders from—

From \$0.01 to \$10.....	10 cents
From \$10.01 to \$20.....	20 cents
From \$20.01 to \$30.....	30 cents
From \$30.01 to \$40.....	40 cents
From \$40.01 to \$50.....	50 cents
From \$50.01 to \$60.....	60 cents
From \$60.01 to \$70.....	70 cents
From \$70.01 to \$80.....	80 cents
From \$80.01 to \$90.....	90 cents
From \$90.01 to \$100.....	1 dollar

### AIR MAIL SERVICE.

On and after July 1, 1934, the rate on Air Mail in the Continental United States will be 6 cents for each ounce or fraction thereof. This rate is also applicable to Canada on and after July 1, 1934.

The rate to Bahamas, Cuba, Dominican Republic, Haiti, Jamaica, British Virgin Islands, Mexico, Puerto Rico, and Virgin Islands of the United States, is 10 cents for each  $\frac{1}{2}$  ounce or fraction thereof.

## COURTS IN NEW ENGLAND

Below are given the names of the places where the different Court Records are kept in the custody of the Clerks of Court, Registers of Probate or others such officers  
**United States—First and Second Circuits.**

**FIRST CIRCUIT.** Circuit Court of Appeals at Boston;—District Court of Maine at Portland;—of Massachusetts at Boston;—of New Hampshire at Concord;—of Rhode Island at Providence.

**SECOND CIRCUIT.** Circuit of Appeals at New York City;—District Court of Vermont at Burlington;—of Connecticut at New Haven and Hartford;—Northern District of New York at Utica;—Eastern District of New York at Brooklyn;—Southern District of New York at New York City;—Western District of New York at Buffalo.

### Maine.

The Supreme Judicial Court holds eight Law Terms, four at Augusta and four at Portland. This is the Court of last resort. It also meets in these several counties for Equity and other matters as occasion requires. The Superior Court which is a Circuit Court holds terms in the sixteen counties of the State, terms comprising a minimum of two in Lincoln, Piscataquis and Hancock and a maximum of ten in Cumberland County.

Superior Court convenes in the following places: Androscoggin County at Auburn, Aroostook County at Houlton or Caribou, Cumberland County at Portland, Franklin County at Farmington, Hancock County at Ellsworth, Kennebec County at Augusta, Knox County at Rockland, Lincoln County at Wiscasset, Oxford County at South Paris or Rumford, Penobscot County at Bangor, Piscataquis County at Dover-Foxcroft, Sagadahoc County at Bath, Somerset County at Skowhegan, Waldo County at Belfast, Washington County at Machias or Calais, and York County at Alfred.

Superior Court is a trial court. Clerks of the Supreme Judicial Courts in the several counties are also Clerks of the Superior Court.

Probate Courts are County Courts and meet in the County seat of each county.

### New Hampshire.

Supreme Court at Concord;—Superior Court and Probate Courts:—Rockingham Co. at Exeter;—Strafford Co. at Dover;—Belknap Co. at Laconia;—Carroll Co. at Ossipee;—Merrimack Co. at Concord;—Hillsborough Co. at Nashua and Manchester;—Cheshire Co. at Keene;—Sullivan Co. at Newport;—Grafton Co. at Woodsville;—Coos Co. at Lancaster.

### Vermont.

Supreme Court: Montpelier;—County Court and Court of Chancery:—Addison Co. at Middlebury;—Bennington Co. at Bennington;—Caledonia Co. at St. Johnsbury;—Chittenden Co. at Burlington;—Essex Co. at Guildhall;—Franklin Co. at St. Albans;—Grand Isle Co. at North Hero;—Lamoille Co. at Hyde Park;—Orange Co. at Chelsea;—Orleans Co. at Newport;—Rutland Co. at Rutland;—Washington Co. at Montpelier;—Windham Co. at Brattleboro;—Windsor Co. at Woodstock. Probate Courts:—Where the Probate District consists of an entire County its records are in the same places above. Other Probate records as follows:—Addison Dist. at Middlebury;—New Haven Dist. at Vergennes;—Bennington Dist. at Bennington;—Manchester Dist. at Manchester;—Bradford Dist. at Wells River;—Randolph Dist. at Chelsea;—Rutland Dist. at Rutland;—Fairhaven Dist. at Fair Haven;—Marlboro Dist. at Brattleboro;—Westminster Dist. at Bellows Falls;—Windsor Dist. at Ludlow;—Hartford Dist. at Woodstock. The records of each Probate District are in the custody of its Judge of Probate.

### Massachusetts.

Supreme Judicial Court for the Commonwealth at Boston. Supreme Judicial Court, Superior Court, and Probate Courts:—Barnstable Co. at Barnstable;—Berkshire Co. at Pittsfield;—Bristol Co. at Taunton;—Dukes Co. at Edgartown, (see below);—Essex Co. at Salem;—Franklin Co. at Greenfield;—Hampden Co. at Springfield;—Hampshire Co. at Northampton;—Middlesex Co. at Cambridge;—Nantucket Co. at Nantucket, (see below);—Norfolk Co. at Dedham;—Plymouth Co. at Plymouth;—Suffolk Co. at Boston;—Worcester Co. at Worcester;—except that the records of the Supreme Judicial Court in cases arising in the Counties of Dukes County and Nantucket are at Taunton. Land Court at Boston.

### Rhode Island.

Supreme Court at Providence. Superior Court:—Providence and Bristol Counties at Providence;—Kent Co. at East Greenwich;—Washington Co. at South Kingstown;—Newport Co. at Newport. In each City and Town there is a Court having Probate jurisdiction within its limits. In towns which have not elected a Judge of Probate the Town Councils act as Probate Courts.

### Connecticut.

Supreme Court of Errors:—All sessions at Hartford. Superior Court:—Hartford Co. at Hartford;—New Haven Co. at New Haven and Waterbury;—Fairfield Co. at Bridgeport and at Danbury;—New London Co. at Norwich;—Litchfield Co. at Winsted;—Middlesex Co. at Middletown;—Windham Co. at Putnam;—Tolland Co. at Rockville. Courts of Common Pleas for such Counties as have these Courts are as follows:—Hartford Co. at Hartford;—New Haven Co. at New Haven;—Fairfield Co. at Bridgeport;—New London Co. at Norwich;—Litchfield Co. at Litchfield and Common Pleas Court, for Waterbury Judicial District. There are 113 Probate Districts;—84 of these Districts consist of one town only; each of the remaining Districts comprises more than one town. The records of each District are in the custody of its Judge of Probate.

## STATE ELECTIONS IN NEW ENGLAND.

In all the New England States, Legislatures and Governors are now elected every second year. The next elections will be in 1936. All these elections are on the Tuesday next after the first Monday in November, except that in Maine, which is on the second Monday in September.

## LEGISLATURES IN NEW ENGLAND.

SESSIONS COMMENCE AS FOLLOWS :

**Maine.** First Wednesday of January, 1937, and each alternate year.

**New Hampshire.** First Wednesday of January, 1937, and each alternate year.

**Vermont.** Wednesday after the first Monday of January, 1937, and each alternate year.

**Massachusetts.** First Wednesday of January, each year.

**Rhode Island.** First Tuesday of January, each year.

**Connecticut.** Wednesday after the first Monday of January, 1937, and each alternate year.

## HOLIDAYS IN NEW ENGLAND.

The following days are legal Holidays. If the day falls on Sunday the day following is usually kept as a Holiday. Thanksgiving and Fast are appointed by State or National authority.

**Maine.** Jan. 1, Feb. 22, Apr. 19, May 30, July 4, 1st Mon. Sept., Nov. 11, Thanksgiving and Christmas. **New Hampshire.** Jan. 1, Feb. 22, 4th Thurs. April, May 30, July 4, 1st Mon. Sept., Oct. 12, Nov. Election Day, Nov. 11, Thanksgiving and Christmas. **Vermont.** Jan. 1, Feb. 22, May 30, July 4, Aug. 16, 1st Mon. Sept., Oct. 12, Nov. 11, Thanksgiving and Christmas. **Massachusetts.** Jan. 1, Feb. 22, Apr. 19, May 30, June 17 in Suffolk Co. only, July 4, 1st Mon. Sept., Oct. 12, Nov. 11 Thanksgiving and Christmas. **Rhode Island.** Jan. 1, Feb. 22, 2d Fri. May, May 30, July 4, 1st Mon. Sept., Oct. 12, Nov. Election Day, Nov. 11, Thanksgiving and Christmas. **Connecticut.** Jan. 1, Feb. 12, Feb. 22, Fast, May 30, July 4, 1st Mon. Sept., Oct. 12, Nov. 11, Thanksgiving and Christmas.

## UNITED STATES WEATHER BUREAU.

**Small Craft Warning.** A red pennant indicates that moderately strong winds that will interfere with the safe operation of small craft are expected. No night display of small craft warnings is made.

**Northeast Storm Warning.** A red pennant *above* a square red flag with black center displayed by day, or two red lanterns, one above the other, displayed by night, indicates the approach of a storm of marked violence with winds beginning from the *northeast*.

**Southeast Storm Warning.** A red pennant *below* a square red flag with black center displayed by day, or one red lantern displayed by night, indicates the approach of a storm of marked violence with winds beginning from the *southeast*.

**Southwest Storm Warning.** A white pennant *below* a square red flag with black center displayed by day, or a white lantern *below* a red lantern displayed by night, indicates the approach of a storm of marked violence with winds beginning from the *southwest*.

**Northwest Storm Warning.** A white pennant *above* a square red flag with black center displayed by day, or a white lantern *above* a red lantern displayed by night, indicates the approach of a storm of marked violence with winds beginning from the *northwest*.

**Hurricane, or Whole Gale Warning.** Two square flags, red with black centers, one above the other, displayed by day, or two red lanterns, with a white lantern between, displayed by night, indicate the approach of a tropical hurricane, or of one of the extremely severe and dangerous storms which occasionally occur.

## "THERE NEVER WAS A GOOD WAR"

By FREDERICK J. LIBBY

Executive Secretary, National Council for Prevention of War,  
Washington, D. C.

Good old Ben Franklin, author of Poor Richard's Almanac, used to say, "There never was a good war nor a bad peace." His fellow patriots seem pretty generally to have agreed with him. The ideals men fight for may be excellent. The war method of achieving them is undeniably bad.

George Washington hated war. In 1785, after a ripe experience with two wars, he wrote to David Humphreys:

"My first wish is to see this plague to mankind banished from the earth and the sons and daughters of this world employed in more pleasing and innocent amusements than in preparing implements and exercising them for the destruction of mankind."

Thomas Jefferson, author of the Declaration of Independence and President of the United States for two terms, was a great Pacifist. His intelligence, like Franklin's, revolted against war. He saw that there were better ways for nations to achieve righteous ends. He wrote:

"I love peace and I am anxious that we should give the world still another useful lesson by showing them other modes of punishing injuries than by war, which is as much a punishment to the punisher as to the sufferer . . . Those peaceful coercions which are in the power of every nation, if undertaken in concert and in time of peace, are more likely to produce the desired effect."

General Grant might mistakenly be supposed to have approved of war, but such is not the case. In his memoirs Grant described our war with Mexico as, in his opinion, "one of the most unjust wars ever forced by a strong nation upon a weak one." Of the Civil War Grant said:

"There never was a time nor a day when it was not my desire that some just and fair way should be established for settling difficulties, instead of bringing innocent persons into conflict, and withdrawing from productive labor able-bodied men."

Grant foresaw a World Court such as has now been set up: "I look forward to a day when there shall be courts established that shall be recognized by all nations, which will take into consideration all differences between nations, and settle by arbitration or decision of such courts, these questions."

Americans have been in part responsible for many of the most notable achievements in the long process of substituting law for war. President Washington signed the first modern arbitration treaty, the famous Jay Treaty of 1794. Richard Rush, an official in our State Department, devised and negotiated the agreement that disarmed the long border between the United States and Canada more than 100 years ago. President Lincoln patiently pressed to successful arbitration the dangerous case of the Alabama Claims. Elihu Root is the spiritual father of the World Court. President Wilson will be remembered in history as the founder of the League of Nations. Secretary of State Frank B. Kellogg was, with M. Briand of France, responsible for the Kellogg-Briand Pact, ratified by 63 nations.

In this great historical document, usually known now as the Paris Pact, and the recognized cornerstone of America's foreign policy, war is renounced as an instrument of national policy and we agree to "seek the settlement or solution of all disputes or conflicts, of whatever nature or of whatever origin they may be," only by peaceful means.

The violation of this agreement can no more destroy it than the violation of the Ten Commandments can destroy them. This Pact was forced by peoples upon their Governments, not by Governments upon peoples. It expresses one of the deepest longings of the human heart.—the longing for security. Men can be fooled as to the best method of gaining security and their folly may bring upon them another war. They can still be propagandized by selfish interests into fighting wars for others to profit by. Even the world's present swollen armaments are, in large measure, a misguided attempt at peace. But a host of people now see the folly, wickedness and futility of war as clearly as Jefferson, Washington and Franklin once saw it; and the right of a man to "sit under his vine and under his fig tree with none to make him afraid" cannot be permanently denied.

Useful and appetizing recipes specially prepared for

## THE OLD FARMER'S ALMANAC

by America's famed home-maker and cooking expert

### JESSIE MARIE DeBOTH

#### DINNER MENU

Cream of Fresh Mushroom Soup  
 Roast Prime Ribs of Beef  
 Browned Potatoes  
 Buttered Beans  
 Stuffed Banana Salad  
 Cherry Angel Cake

#### CREAM OF FRESH MUSHROOM SOUP

1 quart mushrooms	2 tablespoons flour
1 quart water	1 quart hot milk
2 tablespoons butter	1 pint mushroom liquor
Salt and pepper to season	

**METHOD:** Cook cleaned mushrooms in boiling water until tender. Drain, saving liquor. Press mushrooms through a sieve. Melt butter, add flour gradually then the milk and mushroom liquor. Season with salt and pepper and stir in mushroom pulp. Boil up once and serve.

#### ROAST PRIME RIBS OF BEEF

4 or 5 standing ribs	Browned potatoes
salt and pepper	Green Beans

#### Garnish

Meringue Pears: 2 egg whites, 2 tablespoons sugar, 6 large pear halves.

**METHOD:** Wipe meat with damp cloth. Sear in hot oven, 500° F., season with salt and pepper, reduce heat to moderate, 325° F.-350° F., Cook 20-22 minutes per pound.

**GARNISH:** Par-boil medium sized, peeled potatoes. Brush with butter, place around roast to brown and finish cooking, at least 20 minutes. Heat green beans, season with butter, salt and pepper.

For the pears: beat egg whites, add sugar and pile on top of pear halves. Bake in moderate oven, 350° F. Place roast in middle of platter and artistically arrange potatoes, beans and pears around it.

#### STUFFED BANANA SALAD

Select small bananas, one for each person. Cut a strip about ½ an inch wide and as deep, almost from one end to the other. Scoop out the banana. Cut a thin strip from the under side so it will "stand." Dip the banana in fruit juice—lemon, pineapple, grapefruit, etc.—to prevent discoloration. Fill cavity with crumbled Roquefort cheese mixed with whipped cream. Garnish with pimiento and little flowers of truffles or figs. Arrange on thin slices of tomato and serve with mayonnaise.

#### CHERRY ANGEL CAKE

1¼ cups egg whites (10-12 eggs)	¼ teaspoon almond or rose extract
¼ teaspoon salt	1 cup pastry flour
1 teaspoon cream of tartar	½ cup chopped maraschino cherries
1¼ cups fine granulated sugar	Red vegetable coloring

**METHOD:** Beat egg whites frothy, add salt and cream of tartar, continue beating until stiff but not dry. Beat in the sugar and flavoring. Lightly fold in flour, which has been sifted five times, and the cherries. Tint the cake a delicate pink. Turn into ungreased tube pan and bake in a slow oven 50 to 60 minutes. Invert and allow to cool in pan. Remove from pan and frost with icing made by mixing a little of the cherry juice with confectioner's sugar. Some cherries may be chopped and added to the frosting if desired.

**DINNER MENU**

Melon Ball Cocktail  
 Pork Tenderloin, au Dressing  
 Pittsburgh Potatoes  
 Baked Beets  
 Carrot and Orange Emerald Salad  
 Pistachio Parfait

**PORK TENDERLOINS, AU DRESSING**

2 pork tenderloins  
 Moist bread dressing with 1 cup pecan meats

**METHOD:** Leave tenderloins whole but flatten lengthwise. Brown well in hot fat in heavy fry pan. Season with salt and pepper. Over the top of each lay the moist dressing. Add  $\frac{1}{2}$  cup water to the pan, cover, and cook about 45 minutes. Add more water as it is needed to keep meat from becoming dry. Remove to large platter and pour the pan gravy over the meat.

**PITTSBURGH POTATOES**

2 cups raw potato cubes                      1 cup white sauce  
 1 small onion, chopped fine              1 cup mild cheese  
 1 pimiento, cut fine                       $\frac{1}{2}$  teaspoon salt  
     Few grains pepper

**METHOD:** Peel potatoes, cut in  $\frac{1}{3}$  inch cubes, add onion and cook 5 minutes in boiling salted water; add pimiento and cook 7 minutes. Drain. Turn potatoes into greased baking dish, cover with cheese, cut in small pieces, sprinkle with salt and pepper and pour white sauce over all. Bake until potatoes are soft. Old cheese which has become dry may be used if put through food chopper or grated.

**BAKED BEETS**

4 beets     $\frac{1}{8}$  teaspoon pepper  
 1 tablespoon butter                      1 teaspoon sugar  
 $\frac{1}{2}$  teaspoon salt                              1 tablespoon vinegar

**METHOD:** Select beets of uniform size, scrub them well, taking care not to break skins. Rub them with lard or drippings and place on wire rack in a dripping pan. Bake slowly until tender, then peel and chop fine. Dress with sauce made of butter, salt, pepper, sugar and vinegar. Place over fire to re-heat. If desired, sauce may be thickened with 1 teaspoon flour.

**CARROT AND ORANGE EMERALD SALAD****First half emerald colored**

1 envelope lime flavored gelatin 1 cucumber, diced  
 2 cups boiling water                      Green food coloring

**METHOD:** Dissolve gelatin in hot water. Add green coloring for desired shade, then allow to cool. Add diced cucumber and fill individual salad molds  $\frac{1}{2}$  full. Allow to set firm in refrigerator.

**Second half orange colored**

1 envelope orange flavored              2 cups boiling water  
   gelatin                                      1 cup grated carrot

**METHOD:** Dissolve gelatin in hot water; allow to cool. Add carrots and pour over the set lime salad. Allow to set firm. Unmold into cups of lettuce and garnish with nuts, apples, celery and mayonnaise.

**PISTACHIO PARFAIT**

1 cup sugar                                      Few drops pistachio  
 1 cup water                                      flavoring  
 3 egg whites, beaten stiff               $\frac{1}{2}$  cup pistachio nuts,  
 2 cups whipped cream                      chopped  
     Green coloring

**METHOD:** Cook sugar and water until it threads. Pour gradually over egg whites. Add to cream and then add flavoring, nut meats and enough green coloring to tint delicately. Freeze.

## DINNER MENU

Grapefruit Juice Cocktail  
 Roast Duck, Potato Dressing  
 Asparagus Ring with Cauliflower Center  
 Fresh Mushrooms and Peas in Cream  
 Head Lettuce with Russian Cheese Dressing  
 Butterscotch Sundae Cake

## ROAST DUCK, POTATO DRESSING

A dressed duck	Potato Dressing	Salt and pepper
3 cups mashed potatoes	3 tablespoons bacon drippings	
1½ cups fine bread crumbs	1 onion, minced	
½ cup celery, chopped	Salt, pepper, poultry seasoning	
	1 egg, beaten	

**METHOD:** Singe and clean duck; wash well, wipe dry and stuff. When trussing, the legs should be tied in such a way as to be an inch apart. Because of amount of fat, it is not necessary to dredge duck with flour. Rub with salt and pepper. Brown in hot oven (450° F.) breast down. Reduce heat to 350° F. add 1 cup water, cover and bake until tender—about 25 minutes to the pound. Baste occasionally and prick skin to let out fat. Finish roasting breast side up. Skim most of the fat from the pan to make a water gravy.

**DRESSING:** Mix all ingredients well.

## ASPARAGUS RING

2 bunches asparagus tips	Few grains pepper
2 tablespoons butter	½ cup evaporated milk
3 tablespoons flour	½ cup water
½ teaspoon salt	4 eggs, separated
	Cooked Cauliflower

**METHOD:** Cut asparagus in 1 inch pieces. Make white sauce of butter, flour, salt, pepper and milk, diluted with water. Pour sauce onto the well beaten egg yolks. Cool. Fold in stiffly beaten egg whites and the asparagus. Place in a well-greased ring mold, set in pan of boiling water and bake in a slow oven, 300° F. until set, about 40 minutes. Remove to hot platter, place cauliflower in center and serve with a paprika sauce.

## RUSSIAN CHEESE DRESSING

4 tablespoons mayonnaise	1 hard-cooked egg, chopped
2 tablespoons chili sauce	2 tablespoons pimiento cheese

**METHOD:** Blend all well.

## BUTTERSCOTCH SUNDAE CAKE

3 egg whites	Grated rind ½ lemon
¾ cup sugar	¾ cup pastry flour
3 egg yolks	1 teaspoon baking powder
Juice ½ lemon and enough warm water to make ½ cup	Few grains salt
	Hot Butterscotch Sauce

**METHOD:** Beat egg whites stiff, add sugar gradually, beating well. In another bowl, beat yolks lemon colored, add lemon juice and water. Combine with egg whites, add rind and fold in sifted dry ingredients. Bake in rectangular pan in moderate oven, 350° F. for 30 minutes. On cooled cake spread ice cream to about ½ inch thickness and pour over all a hot butterscotch sauce.

## BUTTERSCOTCH SAUCE

1½ cups brown sugar	2 teaspoons butter
¼ cup corn syrup	½ cup thin cream

**METHOD:** Stir ingredients together, then cook until it starts to thicken.

## HELPS FOR PARENTS

### Reasonable Obedience

by Gertrude S. Hasbrouck, Child Welfare Lecturer and Author.

The most universally-appreciated habit in child training is obedience. Yet, the earnest efforts of conscientious parents frequently meet with puzzling disappointments due to a lack of understanding of mental development, of what is right to demand at a given age, and of the best methods by which to secure obedience.

Before the age of four the child may be commanded **not to do**: as, "You must not go out of the yard." But when he is desired **to do**, it is better to **request** than to **command**. He may fail because he does not understand what is required, or how to co-ordinate his powers to accomplish the task. The request gives him a choice. If he does not comply, no issue is raised and no punishment is necessary. The matter may be dismissed with hope of future success. On the other hand, a command raises an issue. If he does not obey, a conflict is precipitated and punishment must follow, with the possibility of generating rebellion and stubbornness. Not until the child is perfectly familiar with what is expected can he, in fairness, be commanded **to do**.

Children frequently fail to comprehend what is required because instructions are buried in an avalanche of words. A child's powers of attention and concentration are poorly developed. In a maze of words his attention fags; the command is confused or lost altogether. As a result he is pronounced "disobedient", and punished. Only when the child's full attention is secured should commands and requests be given—stated simply and in few words.

It is difficult for adults to realize how frequently a child's understanding is handicapped by his limited vocabulary. The teacher who seated a new pupil, saying, "You may sit here for the present", never dreamed that, when no gift was forthcoming, she had destroyed a child's faith in her integrity.

Demanded obedience must be reasonable. To command a little child to "sit still" is neither intelligent nor fair. He cannot sit still, and it should not be required of him. He is behaving normally when in constant action. Nagging is harmful; dammed-up energy is a promise of misbehavior.

Blind obedience should be the child's response to faith in his parents' rightness. That faith will be strongest in the child who has explained to him the reasons for rules he must obey. Instead of an arbitrary command that forbids swinging on the gate, explain how his weight will loosen screws in the hinges, and cause the gate to sag so that it will no longer close. The new interest in the gate will enlist his co-operation, and obedience will be easier. To a child, arbitrary commands too often savor of capricious adult domination. Little Jo's mother when about to punish him, asked, "Do you know why I am going to whip you?" "Yes," said Jo, "because you are bigger than I am."

Obedience must not be made too hard. Test the command fairly against the child's probability to succeed. Too frequent failures make disobedience a habit.

To aim to "break a child's will" is an inexcusable stupidity on the part of the parent; a calamity to the child. The child who is made to cringe and cower is being trained in trickery and vengeful retaliation.

Never should a command or request suggest disobedience. To say, "You will not climb the ladder, will you?" suggests that you expect him to disobey. Children usually live up to our expectations.

The supreme parental virtue that makes for obedience is consistency: rules, laws, and approvals—the same yesterday, today, and tomorrow. Why expect obedience when the child "gets by" on one occasion for what he is punished for on another?

Obedience is a difficult lesson to learn. The difficulty lies in the **parent—not in the child**.

## THE COUNTRY'S GREATEST ASSET— ITS CHILDREN

About 400 B.C. Socrates was credited with the following in an address to the Athenians: "Why do ye turn and scrape every stone to gather wealth and pay so little heed to your children to whom some day ye must relinquish all?" Two thousand years pass by and finally, only twenty years ago, our government formed a children's bureau. They put on an intensive campaign to save the Seventh Baby.

The following 1934 figures, published July 1, 1935 by the Children's Bureau, show what has been accomplished in twenty years in New England.

Deaths in entire U. S. area of registration was 59.9 per 1000 live births.

Deaths by states during first year, per 1,000 live births in

	1915	1934 (Latest statistics)		1915	1934 (Latest statistics)
Maine	105	71	Massachusetts	101	50
New Hampshire	110	61	Rhode Island	120	54
Vermont	85	53	Connecticut	107	49

This is about 1 in 18 infants dying the first year of life in New England against the whole United States figures of one in seven in 1915 and one in 16.8 in 1934.

The Central Atlantic coast state figures are as follows:

	1915		1934
New York	99		55
		First registration	
New Jersey		1921	74
Delaware		1921	98
Maryland		1916	121
District of Columbia	111		70
			65

This group shows a mortality of 1 in 17.

It is interesting to note that for the first time in many years the United States birth rate has increased.

In 1933 there were 16.6 births per thousand population—1934 is up to 17.1 per thousand, making a total of 2,158,919 new inhabitants in 1934. New York leads in number of births with 185,615—Pennsylvania second with 160,238.

Births per 1,000 population in 1933 and 1934:

	1934	1933		1934	1933
Maine	19.6	18.9	New York	14.2	14.4
New Hampshire	16.7	15.7	New Jersey	12.9	13.4
Massachusetts	14.7	14.7	Delaware	16.5	16.3
Rhode Island	14.7	14.7	Maryland	16.4	16.5
Connecticut	13.4	13.6	Dist. of Columbia	20.4	20.1

Though the Iowa birth rate is 17.1 per thousand population (the exact normal for the entire country) Iowa City stands first of all cities of 10,000 population and over in the country with a birth rate of 79.4 in 1934 and 65.9 in 1933.

The movie colony of Beverly Hills, California, of which Will Rogers was mayor, has a birth rate of 4 per thousand population.

The raising of babies today is an exact science. In many states mothers pay a monthly fee to their doctor whose service consists of one call per month and as many telephone calls as the mother wants to make. They do not wait for the baby to become ill. Much has been accomplished in twenty years.

We can still materially cut down mortality. Our greatest example of conservation of infant life is New Zealand. Their latest mortality figure is one death in 31.2, or 32 per thousand against the New England average of 56 per thousand. Place your prenatal self in competent medical hands early. Place your baby in the hands of a competent pediatrician for a regular check-up and advice. Health means happiness and a happy baby in the home is one of life's greatest joys.

G. F. Earnshaw, *Editor*,  
Earnshaw Publications.

## HORSES AND HORSE RACING

The development of professional horse racing in New England has been one of the most remarkable by-products of the so-called depression. Huge throngs numbering as high as 70,000 people in a single day participate in the Pari-Mutuels at the magnificent racing plants at Rockingham Park in New Hampshire which started off the rush to the betting windows in 1933; at Narragansett Park in Rhode Island which was opened in 1934; at Suffolk Downs, only a few miles from the Massachusetts State House, and Agawam near Springfield, the last two both launched in 1935. The Pari-Mutuels have also spread during this year to the various fair grounds in the State of Maine.

"It is a difference of opinion that makes horse racing," an old saw, and true. But breeding—that's something else again. Several blood-lines show the same noteworthy characteristics over scores of years.

Look at the line of STOCKWELL, a dynasty that has endured for eight decades and shows no sign of decay. Omaha, winner of the 1935 Kentucky Derby, is a member of this line. Omaha was by Gallant Fox, a "smasher" from the start, who in 1930 won over \$328,325. Gallant Fox goes straight back to Stockwell.

Now Stockwell had no peer at the stud. He was the father of 412 living foals, an average of 27 each season; his stock won 1150 races and \$1,794,945. In 1870 Stockwell died, at the age of 22. He had a habit of rearing up when entering the covering yard, and one spring day in 1870 he acted according to his custom, but became over-balanced and fell backwards breaking his spine about four joints from the crupper. Despite his agony he arose, served the mare, and was led back to his box where nine days later he fell to the floor dead. The mare had a chestnut colt by Stockwell the following spring, but he died when he was a few days old.

Then there is the famous line of SUNDRIDGE, of which Sun Briar, who was imported to this country in 1916, is a descendant. Sun Briar's stock won \$1,464,716 in over 600 races; one of his sons was Sun Beau who retired to the stud in 1930—sound as a bell of brass at the age of six—having raced five seasons in which he accounted for \$376,744. Sun Beau's stud fee was placed at \$5,000.

But the most enduring lines in this country were: imported AUSTRALIAN, imported BONNIE SCOTLAND and imported ECLIPSE. All three were brought to this country just after the Civil War.

The Australians are noted for their speed, their sound feet and flinty bone and their ability to race to advanced ages. But they have bad dispositions traceable to Hastings, premier sire in 1885. Man-of-War is of this line, the "greatest race horse" of all time. "Never warmed up" in any race. He held five American records. His famous father, Fairplay, brought \$100,000 when August Belmont, who bred him, sold him to Mr. Widener. Fairplay's sons and daughters earned over three million dollars.

The line of BONNIE SCOTLAND: these are little horses, but long lived. Queen Mary, a hardy mare who appears early in this line, reached an advanced age of 29 years and had her last foal when 27. Ben Brush (in 1909 the premier sire in this country) when he was 25 years old (1918) was bred to a mare. Two hours later the gallant little stallion was dead. The mare, however, produced a living foal the following year.

The following table comprising four members of the line proves that the Scotlands are noted for longevity:

Horse	Foaled	Died	Age
Bonnie Scotland	1853	1880	27
Bramble	1875	1901	26
Ben Brush	1893	1918	25
Broomstick	1901	1931	30

The line of ECLIPSE has been noted for: Equipoise, Sarazen, Domino, Commando, Peter Pan, Black Toney. This line has the best chance for enduring for descendants are many and thriving. Something of the hardihood of the Bonnie Scotland line and the Australian line is lacking—their forte is speed. They are usually best as two-year-olds; many of its members die prematurely. They have extremely pleasant dispositions and are popular with owners, trainers and the public alike.

## A FEW FACTS ABOUT FLYING

By DANIEL ROCHFORD

Aviation Editor, Boston Evening Transcript, formerly Director  
Public Relations, Pan American Airways System

**T**HE United States in 1935 had 14,177 licensed pilots which total includes several hundred regular army and navy pilots who have taken the civil license. There were 8,883 airplanes for them to fly, including 47 autogiros. There were at the same time 482 gliders and 111 licensed glider pilots. Superficially the glider pilots have more than four craft each to fly as against something over half an airplane apiece for the airplane pilots. Actually many of these gliders are used for preliminary instruction and sport by licensed airplane pilots who require no glider license.

These figures show a gain from the year before of 455 pilots and 46 aircraft.

Despite a few conspicuous women flyers, men still rule the airways. Only 370 women were licensed pilots. Of these 70 were transports, 25 limited commercial, 234 private, and 41 amateur. Of all Department of Commerce licensed pilots, including women, fifty percent or 7132 were transport pilots; seven percent or 828 were limited commercial, four tenths of a percent or 5 were industrial (this classification has been discontinued); thirty-eight percent or 5395 were private; and six percent or 717 were amateur.

\* \* \*

New England's aviation situation may be measured by the following pilot and airplane statistics of 1935. Maine had 59 planes and 56 pilots; New Hampshire had 27 planes and 37 pilots; Vermont had 29 planes and 24 pilots; Massachusetts had 233 planes and 419 pilots; Connecticut had 105 planes and 211 pilots. By comparison, New York had 916 planes, 1398 pilots. California led all states with 911 planes and 2555 pilots.

\* \* \*

Chief advances in transport flying the past year were in the appearance of larger and faster airplanes; the development of huge flying boats for trans-oceanic service; and the practical application of the instrument flying developments of the previous half dozen years with governmental airport installations promised at Atlanta, Buffalo, Cheyenne, Indianapolis, Los Angeles, Newark, St. Louis, and Washington, D. C., permitting airplanes to glide down a radio beam and land safely even when the pilot can not see the ground.

\* \* \*

After the failure of an ambitious autogiro sales and advertising campaign in 1932, 1936 promises to see a revival of autogiro manufacture and sales, due to the development of the controllable vane giro. The new autogiros have been used to land on roofs in the heart of large cities and their scheduled use as air mail shuttle planes between outlying airports and suitable landing platforms on city postoffice roofs is possible. The new giros can be maneuvered more surely than the earlier ones.

\* \* \*

Sport flyers and individuals owning their own airplanes were cheered, as were the airlines, by the development and public sale of a radio homing device by which a pilot aloft can tune in on any radio station of known location, and a needle on his dashboard will signal to him whether he is aiming toward it or not.

\* \* \*

Total seating capacity of all U. S. civilly licensed airplanes in 1935 totalled 16,897. This includes airplanes used both within and without the continental United States. The seating capacities were distributed as follows: monoplanes, 603 in two placers; 986 in threes; 2071 in fours; 572 in fives; 980 in sixes; 1099 in seven to tens; 1456 in eleven to fifteens; 1152 in sixteens and over; in biplanes, 807 in twos; 4412 in threes; 891 in fours; 240 in fives; 70 in sixes; 296 in sevens to tens; 300 in elevens to fifteens; and 1452 in sixteens and over.

By contrasting the adult population of the United States with the available airplane seats, you can see only a negligible proportion of the population would have to fly regularly to keep every airplane in the country busy.

## THE SUPREME COURT AND THE CONSTITUTION

[Written for *The Old Farmer's Almanac*]

By CHARLES WARREN

Author of *The Supreme Court in United States History; Congress, the Constitution and the Supreme Court; The Making of the Constitution.*

Americans will never fully understand their American Constitution and their American form of Government, unless they understand the part which the Supreme Court was expected and intended to play in that Government. What is the Constitution? It embodies the form of a National Government which the peoples of the several States in 1787 and 1788 were willing to adopt in order to provide for a strong, just and adequate control of national and foreign affairs, while at the same time reserving to the States control of their local affairs and problems and power to regulate them, each according to the particular habits, ideas, needs and conditions of its own citizens. This form of a Government is a republic with limited powers. But the Constitution provides for grants of further power, if and when desired by the people in the several States, through the process of a Constitutional Amendment.

The Constitution divides the Government into three branches. In the Legislative branch, the Congress, there was vested power to legislate on certain specific and limited subjects—the only subjects which the people in the several States in 1787 and 1788 were willing to place under control of the National Government; and these have remained the only subjects which the people of the States have hitherto been willing to confide to Congress (except the subject of alcoholic beverages by the 18th Amendment, now repealed).

In addition, the people of the States placed in the original Constitution prohibitions on Congress from legislating on ten specific subjects; they also imposed fifteen prohibitions upon the power of the States; moreover, the first ten Amendments to the Constitution contained further restrictions on the National Government forbidding it to violate rights of citizens, such as freedom of speech, freedom of religion, jury trial, protection of property, etc. And finally, by Article X, "the powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States respectively, or to the people."

The second or Executive branch of the Government was constituted by vesting "the Executive power" in a President, with certain express provisions and limitations as to the exercise of that power.

The third or Judicial branch was constituted by vesting "the judicial power" in a Supreme Court and in such inferior courts as Congress should establish. But it is to be noted that, while the Constitution sets forth the jurisdiction of the court, i.e., the classes of cases which they may decide, it nowhere defines what the judicial power consists of; and it apparently assumes that the courts will exercise such powers as the State courts were in the habit of exercising when the Constitution was adopted.

This division of the Government into three branches was regarded as essential; for it was believed that any Government in which one body (whether King or other ruler or Legislature) both makes, defines, and executes the law is an arbitrary and despotic Government. Hence, the Congress cannot exercise the duties or functions of the President, or transfer to him its legislative functions; neither can Congress act as a Court and decide the legal rights of citizens. Nor can the President or the Court make laws to regulate the Government or the conduct of the citizens.

Thus, it will be seen—and this is most important for a real comprehension of our Government—that the Constitution consists largely of specific and limited grants of power to the Congress and to the President; of prohibitions, restrictions and checks on the power and actions of the Congress and of the President; and of prohibitions and restrictions on the power and actions of the States. Now, such checks, limitations, restrictions, and prohibitions contained in an instrument of Government do not and cannot necessarily execute themselves. Yet, clearly, they were intended to operate and to be enforced; for, otherwise, the Constitution would only be an ineffective sheet of paper.

How did the framers of the Constitution expect and intend that it was to be enforced? What was there in it which would enforce its provisions? The answer is—the Supreme Court, acting under two specific provisions, one (Article VI, clause 2) that "this Constitution and the laws of the United States which shall be made in

pursuance thereof . . . shall be the supreme law of the land"; the other (Article III, Section 2) that "the judicial power shall extend to all cases, in law and equity, arising under this Constitution, the laws of the United States . . ." The manner in which the Supreme Court enforces the Constitution is not by a decision on an abstract question put to it as to whether a specific Act of Congress is or is not constitutional; the Court acts only through its decisions in actual cases brought before it by parties having an actual controversy and asserting rights against each other which they ask to be settled. The case may be a civil one involving only private citizens or corporations as parties; or if it may be a civil or criminal action involving the United States itself, or a State, as one of the parties. But, in any case, if A, as one of the parties, rests his or its claim or defence on an Act of Congress or on a State law, and if B, the other party, rests his defence or claim on the Constitution asserting that the Act of Congress or on the State law relied on by A is violative of the Constitution, then the Supreme Court, in deciding whether A or B is entitled to prevail in the suit, must of necessity decide whether the law enacted by Congress or by the State does or does not conflict with the Constitution. In other words, the Court must hold the Constitution to be "supreme" and any law which conflicts with it to be not supreme, i.e., not to control in the settlement of the rights of the party relying on it. Moreover, if the two opposing parties differ as to the interpretation of the Constitution—if they differ, for instance, as to the meaning of the words "to regulate" or "commerce among the several States," or "direct tax," or depriving a person of his property "without due process of law," etc.—then the Court must itself decide what is the legal meaning of the words involved.

This, then, is the method by which the limited grants and the prohibitions contained in the Constitution are enforced. Unless the Supreme Court had this power to decide when and how far the Congress or a State had exceeded its Constitutional authority, then every Congress and every State would be judge of the extent of its own powers and of the meaning to be given to the words of the Constitution. But if Congress should have such uncontrolled power, then the limitations and restrictions of the Constitution would have no force, for they could be disregarded at any time by any Congress. If any Congress, by a majority vote (or by a two-thirds vote over a Presidential veto) should be allowed to set aside the provisions of the Constitution, without control by the Supreme Court, then it is no longer the Constitution which is the "supreme law of the land," but it is the Congress, which will have supreme authority over the States and their local affairs, and over all rights of the individual citizens. Under such conditions, the American Government might still be a republic, i.e., a Government elected by the people; but it would be a republic with a consolidated and autocratic government—a government in which the States and the citizens would have no power and no right save such as the Congress saw fit to leave to them. That, certainly, was not the form of government which was intended by the framers of the Constitution or which would be long tolerated by free American citizens. If anyone imagines that the Congress is not likely to attempt to violate the citizens' Bill of Rights (the first ten Amendments) or the rights of the States, or to exceed its granted powers, he should read the history of the Court; and he will find that in a number of important instances, Congress has, in fact, made such attempts, and has only failed because of decisions of the Supreme Court holding the Acts of Congress unconstitutional, in notable cases many of which have strikingly influenced the course and development of the history of the United States.

Finally, if the power of the National Government under the present Constitution, as determined by any decision of the Supreme Court, seems to the people not sufficient; if they believe that the National Government should be granted additional power and that their States should, as a result, be deprived of power, then the people can, by Amendment to the Constitution, at any time, grant or lessen such powers. An Amendment to the Constitution, however, by the people of the States will be the subject of deliberate thought and full discussion; whereas a mere Act of Congress may frequently register only the views of a temporary majority or two-thirds of a Congress, impelled by prejudice, sentiment, or sectional or class feeling. It was to guard against the latter kind of action that the framers of the Constitution made the careful provisions contained in it as to the manner of its amendment.

## THE POLITICAL OUTLOOK—1936

By ROBERT LINCOLN O'BRIEN

Former Editor of The Boston Herald  
Now Chairman U. S. Tariff Commission

The Presidential election of 1936 is sure to be one of the most spirited in our history. The man elected will, for the first time, be inaugurated in January, instead of on the conventional March fourth, which has been the date of the inauguration of all our Presidents since George Washington, who did not get around to take the oath of office until April thirtieth. This change, due to the passage of the so-called "Lame Duck Amendment" which Senator Norris for years urged incessantly, brings the election and the assembling of Congress, also chosen in November, closer together.

The two great political parties will hold National Conventions presumably in June of 1936. The Republicans will have selected the time and place for holding their Convention before the New Year begins. The Democratic National Committee will make its selections early in the New Year. The Republicans customarily hold their Convention first. Just why, nobody knows. The old theory was that the party in power should lead off, the opposition taking up the gauge thus thrown down, but when the Democrats became the party in power they seemed disinclined to assume the earlier play.

How many extra nominations so-called third parties will make, cannot now be foreseen. Since the death of Senator Long of Louisiana, the likelihood of a formidable third party movement has materially lessened. But Father Charles E. Coughlin, with his Union For Social Justice, and Dr. Townsend, with his so-called Old Age Plan, may effect a re-alignment of parties in some way. Either of the old parties may suffer from diversions of strength due to a nomination unsatisfactory to some considerable group of its membership. These possibilities are all in the lap of the future.

The forty-eight states in the Union cast 531 electoral votes, each state having as many as the number of its senators and representatives combined. Each state now votes as a unit in the electoral college. The electors from each state are chosen on a general ballot and are nearly always entirely of a single party. Division in the electoral ticket in exceedingly close contests has been known, but is rare.

With 531 electoral votes, 266 will be necessary to elect. If any candidate fails of a majority, the election goes to the House of Representatives for the President, and to the Senate for the Vice-President. But that has not happened since John Quincy Adams's time and is not likely to happen now.

By all the precedents, President Roosevelt will be necessarily accorded a renomination by his party. It is a nearly invariable rule that the President in office can, as the saying is, "nominate himself."

The question that the Republicans must face is the selection of a contender, someone who will effectively challenge Mr. Roosevelt's right to a second term. Among the men who are conspicuously mentioned as the old year nears a close are Senator Borah of Idaho, already seventy years old, but vigorous and outstanding; Senator Vandenberg of Michigan, fifty-one years old, keen and aggressive; Frank Knox, proprietor of the Chicago Daily News, a determined opponent of the New Deal; and Governor Landon of Kansas, who has made an excellent record as an administrator, and then, of course, there are the eastern conservatives, like Ogden Mills and James W. Wadsworth. It is unlikely that Mr. Hoover will allow his name considered by the Convention. It is not improbable that someone will be nominated whose name does not appear on this list.

Talk of a coalition candidate, like Lewis W. Douglas, who was director of the Budget under Roosevelt, an Arizona Democrat, receives some attention. Others suggested as coalitionists include Henry Ford, the automobile manufacturer whose party status is not altogether clear; and Senator Byrd, a Democrat from Virginia. Charles A. Lindbergh might be considered except for his indignity on account of age. He will not reach the constitutional thirty-five years until several weeks after the date of the next President's inauguration, under the new arrangement.

The Democrats will start out with the nearly assured vote of the Southern states, even though the so-called solid South was broken in '28. Governor Smith lost Virginia, North Carolina, Florida, and

Texas, as well as Tennessee and Kentucky, which not infrequently break into the Republican column. But by and large the Democrats have a strong hold on the South. Its leadership is even more in evidence in Congress than in the electoral college. The Chairman of the Finance Committee of the Senate is Harrison of Mississippi; of the Ways and Means Committee of the House, Doughton of North Carolina. The leader of the Senate is Joseph T. Robinson of Arkansas, and the Speaker of the House is Joseph W. Byrns of Tennessee.

The rest of the country is open to the fortunes of political war. In September Maine will choose its Congressmen and so virtually foreshadow its place in the Presidential line-up. Then, we shall know how New England is likely to go, as well as getting a hint on prevailing sentiment elsewhere. The New England states stood by Hoover in '32 better than any other section. He carried Maine, New Hampshire, Vermont, and Connecticut. Then come to New York, the "Empire State" and often the Umpire State, with its large electoral vote, capable of swinging from one side to the other. It gave Roosevelt a huge majority in '32, Hoover a majority four years earlier, and in the preceding elections of '24, '20, and '16, it gave its vote to Republican candidates, Coolidge, Harding, and Hughes, respectively.

The great Middle West is always debatable and on its decision more than anything else the result of the contest will depend. Then there is the West of the Missouri region where the agricultural policies of the Administration will be on trial. Nor can the Pacific Coast be overlooked. Its largest state, California, virtually decided the election of 1916 in favor of Wilson, although his carrying Ohio was necessary to put him where California's slender majority would give him victory. The border states must be taken into account, Maryland, Kentucky and Missouri, which are less Democratic than the lower South, but normally inclined that way.

An aged editor has once said that in 1876, the Hayes-Tilden campaign, and the electoral contest that followed, was the great sporting event of the year, taking much the place in popular thought that the World's Series has lately offered. It seems entirely likely that the contest of 1936 will be another equivalent in popular appeal.

## PRESIDENTS OF THE UNITED STATES

## BROWN'S TROCHES

BROUGHT to public notice over eighty years ago and long recognized throughout the world as a preparation of superior merit having great efficacy in minor throat troubles.

¶Allay irritation of the throat induced by the coughing-spells incident to Bronchitis, Asthma, and affections of the lungs, giving grateful relief.

¶Invaluable to Singers, Speakers and Teachers for clearing the voice, allaying hoarseness and soothing throat irritation caused by vocal exertion.

¶Containing no opiates or harmful drugs, Brown's Troches may be used as occasion requires, without injurious effect, in all cases where cough or voice lozenges are useful.

¶There are no special directions to follow. Allow one of the Troches to dissolve in the mouth and repeat as necessary.

¶Sold by druggists generally at 15¢, 35¢, 75¢ and \$1.00 per box. Not sold in bulk.

Observe  
fac-simile

*John I. Brown & Son*

on the  
wrapper.

## BROWN'S CAMPHORATED SAPONACEOUS DENTIFRICE

A superior time-tested Tooth Powder. Its daily use will aid in keeping the teeth and gums in healthy condition.

Price 30¢ per bottle

## BROWN'S VERMIFUGE COMFITS

A pleasant tasting tablet for an ailment in childhood.

Price 30¢ per box

JOHN I. BROWN & SON, INC., BOSTON, MASS.

*Samples mailed on request. Mention Old Farmer's Almanac.*

FROM ALL OVER NEW ENGLAND COMES  
THIS CHORUS

"GIVE US  
B&M BAKED BEANS  
FOR HOME-BAKED  
FLAVOR"

B&M Brick Oven Baked Beans are baked the good old fashioned way. All day long, in real brick ovens. With brown sugar, spices and juicy pork to give them unmatched flavor.

Not until they are tender,

brown and delicious are they put in tins for you. No wonder New Englanders insist on B&M—the beans with the *real* home-baked flavor. Try them with B&M Brown Bread. That's a feast you'll never forget!

Burnham & Morrill Company, Portland, Maine

Many girls are ambitious and want to secure some sort of employment which will be interesting, pleasant, and pay well. For a majority of these girls, *secretarial training* offers the largest opportunities for success in the greatest number of fields. Many women who are now successful as interior decorators, buyers in department stores, school executives, advertising specialists, insurance underwriters, etc., to say nothing of those who are executive, personal, or social secretaries to statesmen, professional men, and industrial leaders, got their start by securing a broad, intensive, secretarial-training course.

What some girls do not understand is that a secretary needs more than skill in shorthand and typewriting. The fact is that while these two subjects are important, a thorough knowledge of English, training in secretarial service, the use of office equipment, proper telephone technique, and the ability to impress people favorably can make or break a girl's chances for success.

The Chandler School trains girls for success in business. For fifty-two years its graduates have gone out and made good in well-paying, pleasant, secretarial positions. There is a one-year course and a two-year course; the school year extends from September to June, and six subjects are prescribed each year. There is a regular social program.

The Marlborough Division is more a specialized school. Here girls may enter any Monday, may elect their own subjects, and get through as soon as they are able. The courses are so intensive that no social program is offered.

Classes at both schools are held in the lovely buildings owned by the Chandler-Marlborough Schools in Boston's famous Back Bay. Visitors are cordially invited to drop in and see the schools any time.

Full information regarding either or both schools will gladly be sent if requests are addressed to

The Registrar  
Chandler-Marlborough Schools  
245 Marlborough Street  
Boston, Mass.

# THE OLD FARMER AND HIS ALMANACK

By GEORGE LYMAN KITTREDGE

FEW volumes can claim so intimate an association with the people of New England as the *Old Farmer*. Year after year, for nearly a century and a half, it has mirrored our changing face. The variations from issue to issue have been so small, indeed, that only when one looks back at the very earliest years does one realize how we have altered. As a matter of fact, those early Almanacks are filled with odds and ends of news, quaint scraps of scientific information, reflections of homely wisdom, bits of real humor, that reveal the very form and fashion of the time.

All this scattered material has been woven together by Professor Kittredge into one of the most delightful works on New England antiquities now available. Here you will find out just who Robert B. Thomas was and how he compiled his first Almanacks. Then you will learn something about his correspondents, and their difficulties with the postal system. Other chapters take up astrology, lawyers, folk-lore, early attempts to manufacture salt, the prevention of fire, methods of reviving apparently drowned persons, education, amusements, inns and inn-keepers, roads, books and reading, and Indians. There is hardly an aspect or phase of life in New England that is not touched on and illuminated.

"It is no exaggeration," says the *Montreal Standard*, "to say that there is not a dull page in this book. Learning and wit have combined to produce a most entertaining and instructive work. As we read, old New England seems to take shape before our eyes. In some ways, the life depicted was narrow and rather unlovely, but it did not favor the multiplication of weaklings. Hard work, thrift, ingenuity taxed to its utmost in the struggle with adverse natural conditions, produced men and women whose strength of character is still a national asset."

"The reviewer's task would be an unbroken delight," says the *Springfield Republican*, "and life would never lack for zest if all the new books were comparable to Professor Kittredge's *The Old Farmer and His Almanac*. . . . He shows everywhere that alacrity of appreciation, sagacious estimate of values, pungency, common sense, and gift of apt phrase, with a method characterized by proportion and arrangement, that would be expected by anyone familiar with his more serious scholarship."

A French reviewer, writing from a vast geographical and spiritual distance, said of the book, "We are grateful to Professor Kittredge for having cleared up so many unknown facts, so many points of history, so many obscure literary allusions, and at the same time assembled material so full of wisdom, savor, delight, wit, and real penetration into the eternal psychological values of human nature."

## A BIRD'S REASON

An appreciative reader, a man of considerable scientific knowledge, inquires whether I have ever made any observation upon birds which would help solve the mystery of nest building. He writes, "Have your eyes ever lighted on any evidence of how birds make nests—whether by instinct or by tuition?"

I will say that I do know a little of how nests are built, because a bird and I once built a nest together; and I know what I did and what the bird did.

Here are the facts. I was sitting at the table eating breakfast and looking out of the window on a very windy day in spring. As you probably know, a robin likes a flat place to build on, and it usually picks out a shelf-like situation. A robin, recently arrived, had chosen the flat top of a cedar fence post near the window.

The wind was so very strong that no straws or twigs that the robin brought would stay where she put them, but would immediately blow away. I was interested to observe that she met this condition by poking the pieces of dry grass or hay down into the cracks on the top of the post. This held them and would serve for an anchorage to weave and fasten to. We have all seen robins build in cigar boxes and in all sorts of protected and shelf-like places; but this robin, when the wind blew her material away, knew how to handle the situation.

Here entered another side of the problem. There were a lot of sparrows about which I had not been able to get rid of; and a pair of these began carrying away the material as soon as it was deposited on top of the post. They came back time after time, while the robin was absent, so that she made no headway at all in spite of her constant work. I saw that in this state of affairs the robin would never get her nest built. And I kept watching even after breakfast was over.

This finally got my ire up. I decided to shape a nest myself of about the robin size, with plenty of material, and place it out on the post with the edges tucked firmly into the cracks. And then the humor of the situation struck me and my wife. How would the robin act, and what would she think when she came back and saw all that had been done in the few moments since she left?

I shaped a nest of assorted materials—mostly coarse, stiff grass and small twigs. There was some sphagnum moss lying about, which had come around the roots of some nursery trees recently arrived, and I worked this in, together with a few pieces of white string; but I think now that this was very poor practice, because I have not noted that a robin uses such fine, flimsy material in the bulk or body of the nest.

When it was all ready, and good enough to lay eggs in so far as I could see, I watched till the robin had flown away on another trip, whereupon I hastily anchored my nest in place. And then I waited at the window, anticipating the fun of seeing the robin eye the work, and wondering what puzzlement and what final outcome would develop.

The bird came back, and after a very little inspection of my handiwork she set to work and rebuilt the nest right there, without having to go for any more material. She accepted my work as a whole, but corrected mistakes here and there, sewing and stitching till she had quite made it over. A bird's bill, with a string or piece of grass held near its tip, is virtually a needle and thread. She would take a loose end and poke it right into or through the nest, and take another piece and weave it up into the edge, and so she worked away for quite a while; and of course she had the whole framework finished in a mere fraction of the time it would usually take a robin to build a nest. With this done, she flew away and came back with a little pile of mud on the end of her bill; and she kept this up till the interior had received the usual coat of wind-proof plastering. Then came the finer lining, the material for which she brought herself, a very little of this being required. When all was done a clutch of eggs was laid and a family of robins successfully raised.

*The 5th generation is now using*

## **BURNETT'S** *pure* **VANILLA**

For nearly one hundred years people have been saying, "My mother always used Burnett's," or "There was never any vanilla but Burnett's in our house when I was a youngster." That's a good record and we've always been proud of it. Two other Burnett products with fewer years, but just as much quality are Burnett's Liquid-Mix and Burnett's Ready-Mix for making real ice cream at home in the refriger-

ator. Whether you prefer the liquid or the powder, you *know* that they are both the most delicious of their kind.

• • •

Send fifteen cents today for our *new* recipe book, "Rounding Out The Meal." Beautifully illustrated in color, with a water and stain-resisting cover, it shows more than 150 ways to use Burnett's Pure Vanilla, spices, ice cream preparations, and other products.

**SAY,  
NEIGHBOR!  
WHY NOT  
TRY  
SOME?**

There's a brand of  
Agrico especially  
made for each crop

**F**OLKS, here's the fertilizer for farmers who aren't satisfied with "ordinary" crops and ordinary crop income. It's Agrico—

the fertilizer with the extra plant foods. Specially formulated for cold New England soils and short growing season. A brand for each crop with just the right amounts of Nitrogen, Phosphorus and Potash—plus extra plant foods that *increase the plant-feeding efficiency of the old stand-by plant-food elements and give Agrico its EXTRA crop-producing power.*

Why not do as thousands of others have done—try some Agrico alongside the fertilizer you usually use? Then let the crop show you how Agrico increases yields and boosts crop income. Try Agrico this year—you'll never regret it. Any A.A.C. Dealer can supply you.

**Remember — Agrico is manufactured only by  
The AMERICAN AGRICULTURAL CHEMICAL Co.**

## DON'T BE A STRANGER TO NEW YORK

**Y**OU'RE missing the time of your life if you don't visit the great metropolis! You'll enjoy every minute of it—the shopping, the theatres, the museums, the sightseeing—and the vivid, pulsing life of the city itself.

You will feel right at home here, too. There is a friendly staff of 200 at the Hotel Times Square ready and eager to serve you—and help you have a better time. Our location in the very center of New York will save you time and money.

For as little as \$2 a day single and \$3 for two people, we offer a cheerful room, with deep-slumber bed and R.C.A. radio—one of the best values in New York.

Our Service Bureau will plan a visit so that you get the most out of it. This special 3-day tour is an example.

**ENJOY** *the Gay Sights  
and bright lights of*  
**NEW YORK for . . .**  
**3 THRILLING \$10**  
**DAYS complete**

Like a good host, we want you to have an enjoyable stay, so we have arranged this **SPECIAL YEAR-ROUND** tour, which enables you to see everybody worth seeing and doing everything worth doing in the magnificent Playground of New York. Everything the City has to offer is yours for \$10—no extras.

### *Here's Exactly What You Get—*

- 1** Room, 3 days, 2 nights—private bath and radio.
- 2** 1 dinner, 2 breakfasts, 2 lunches in Main Dining Room of the hotel.
- 3** Dinner at Paradise Restaurant, a Broadway Night Club with dancing and floor show.
- 4** Orchestra seat for afternoon or evening performance at the internationally famous Radio City Music Hall.
- 5** Trip to Observation Roof of Rockefeller Center.
- 6** A guided tour through National Broadcasting Studios, or a trip to the new Hayden Planetarium.
- 7** A thrilling sightseeing trip of New York in a glass-roofed bus.

*Get details from your local travel agent,  
or write for free illustrated folder OFA.*

# FRIENDLY LETTERS

**I**N our newspaper advertisements recently, we told of the Company's birthday and said no doubt there were lots of people who had traded with First National for years. What a spark that proved to be! Letters began to pour into our headquarters, friendly, warm letters. Customers wrote them voluntarily. There was no inducement of any kind offered.

Here are extracts from a few of these letters:—

*All my eight children have been brought up on your foods and they're pictures of health . . . After 18 years as a missionary I came back East to live and I shopped around with great care to find the best place to shop; I chose First National . . . My children, now my grandchildren, are growing on your foods . . . 18 years ago I started housekeeping with your goods . . . The best turn I do for young brides is to take them to my First National market and get them started right . . . I've bought for 20 years in the same First National and always have been satisfied . . . The quality and the economical prices have kept me 18 years, long life to First National! . . . Since I've been a shut-in, one of the things I miss most is my daily trip to the First National . . .*

and many, many more in like vein.

Such preference, voluntarily expressed, must have a reason. The three chief ingredients in this reason:

UNFAILING QUALITY  
ATTRACTIVELY LOW PRICES  
FRIENDLY AND COURTEOUS SERVICE

**FIRST NATIONAL STORES INC.**

# GOLDEN GRAINS of KNOWLEDGE

*Make Up Your Success*

Of course you want to be successful. That means acting on *knowledge*—facts, not guess.

Garner those golden grains of facts daily from The Christian Science Monitor and you have a *true* picture of world events—of markets, music, art, home management, education, etc. And a bit of fun is thrown in for good measure.

Once you get the "Monitor habit" you'll wonder how you ever did without it.

## THE CHRISTIAN SCIENCE MONITOR

One, Norway Street, Boston, Massachusetts

Write for a month's subscription,  
75c, including the Weekly Magazine  
Section appearing every Wednesday.

# IMPORTANT FACTS

## ABOUT BOSTON'S REBUILT

# Copley Square Hotel

1. Twin beds and bath for four and a half.
- \*2. No liquor served at table or privately.
3. Owned, managed and staffed by New Englanders.
4. Completely renovated to meet the highest standards of comfort, convenience and service.
5. Complete Dining Room Service by Patten's famous New England Restaurant Organization, assuring our guests of the highest standards of quality and service at prices in keeping with Patten's long-established policy.
6. Nearly 100 rooms with twin beds and bath. A greater percentage than any other Boston hotel.
7. Located on Huntington Ave. at Exeter St., near many points of interest. (See "time table" below.)
8. A Home Away From Home. No request too small or too large to receive complete and courteous attention of the management.
9. Heir to a Fine Old Name—this friendly and efficient hotel is for those who do not wish the glamour and rush of the city to follow them into their dwelling place.
10. A quiet hotel for those who prefer the charm and serenity of a perfectly appointed and well-managed home.

## DON'T SUFFER FROM TENDER SORE MUSCLES

*Rub away  
the Pain with  
Absorbine Jr.*

**F**OR forty years and more Absorbine Jr. has been giving farmers and outdoor men quick relief from pain caused by sore muscles, muscular aches, bruises and sprains.

The minute you start rubbing the sore place with this good old reliable liniment you feel a soothing warming glow spreading all around the spot of pain. Swelling begins to go down. Congestion starts to fade away. Soon you enjoy the comfort of real relief.

Don't ever let yourself be caught without a bottle of Absorbine Jr. handy. *When you need it, you need it badly.* And thousands will tell you that nothing else can take its place.

Absorbine Jr. is economical to use. A little of it goes a long way. All druggists have Absorbine Jr. for sale at \$1.25. *For free sample, write W. F. Young, Inc., Springfield, Mass.*

*Absorbine for horses.* Remember this famous old standby, the favorite liniment of thousands of horse owners. Economical. A little goes a long ways. \$2.50 at druggists and dealers.

# FACTORY TO YOU

## LATEST MODEL REMINGTON TYPEWRITERS

# 10¢ A DAY

**Money Back Guarantee  
10-Day Free Trial Offer**

BRAND NEW, latest model Remington for only 10c a day! Here is your opportunity to get a perfect writing machine at an amazingly low price direct from the factory. Every essential feature of large office typewriters—standard 4-row keyboard, standard width carriage, margin release, back spacer, automatic ribbon reverse. Act now while this special opportunity holds good. Send coupon TODAY for details.

### YOU DON'T RISK A PENNY

We send you the Remington Portable, Model 5, direct from the factory with 10 days' free trial. If you are not satisfied, send it back. We pay all shipping charges.

### ● FREE TYPING COURSE

With your new Remington we will send you—absolutely FREE—a 19-page course in typing. It teaches the Touch System, used by all expert typists. It is simply written and completely illustrated. Instructions are as simple as A, B, C. Even a child can easily understand this method. A little study and the average person, child or adult, becomes fascinated. Follow this course during the 10-Day Trial Period we give you with your typewriter and you will wonder why you ever took the trouble to write letters by hand.

### ● FREE CARRYING CASE

Also under this new Purchase Plan we will send you FREE with every Reming-

ton Model 5 a special carrying case sturdily built of 3-ply wood. This handsome case is covered with heavy du Pont fabric. The top is removed by one motion, leaving the machine firmly attached to the base. This makes it easy to use your Remington anywhere—on knees, in chairs, on trains. Don't delay . . . send in the coupon for complete details!

### MONEY-MAKING OPPORTUNITIES

**OPEN.** Hundreds of jobs are waiting for people who can type. A typewriter helps you put your ideas on paper in logical, impressive form . . . helps you write clear, understandable sales reports, letters, articles, stories. A Remington Portable has started many a young man and woman on the road to success.

### A GIFT FOR ALL THE FAMILY.

If you want a gift for birthday, Christmas or graduation . . . one Father, Mother, Sister or Brother will, use and appreciate for years to come . . . give a Remington Portable. We will send a Remington Model 5 to anyone you name, and you can still pay for it at only 10c a day. Few gifts are so universally pleasing as a new Remington Portable. Write today.

### SEND COUPON WHILE LOW PRICES HOLD

# NYOIL

IS

**ODORLESS · STAINLESS · COLORLESS**

*Why NYOIL is Superior*

First it contains no perfumery to cover-up the strong odor of inferior oils. NYOIL is absolutely neutral because it is pure oil, expertly blended from only the purest ingredients. NYOIL can be used not only with perfect safety as a lubricant, but likewise as a rust preventive or as a furniture polish. NYOIL flows freely at low temperatures.

*Who uses NYE OILS?*

**Fishermen** and **Hunters** find it excellent for all their gear.

**Motorists** use it for "spot" oiling to insure perfect lubrication—often as a polish and also in the radiator to prevent the formation of rust.

**Housewives** have long considered this a quality oil especially for their sewing machines and other household requirements.

*Try NYOIL and other NYE Lubricants. If your dealer or department store cannot supply you, write us direct and we will send you a Handy Can for 35c., postpaid.*

**Service Without Charge**—Our 90 years' experience is at your disposal, free of charge, on any problem pertaining to the lubrication of delicate mechanism or instruments of precision. Simply address (mentioning The Old Farmer's Almanac).

**WILLIAM F. NYE, INC., NEW BEDFORD, MASS.**

*Other Products:* Gun Grease (put up in collapsible tubes), Sperm Oil, Whale Oil, Fish Oil, Cod Liver Oil, (both U.S.P. Medicinal, as well as Poultry and Stock Feeding), Olive Oil, Medicinal Oils, such as Castor and Russian Oil,

and special  
oils for  
delicate  
Mechanism.

# THE ATLANTIC MONTHLY

*was reviewed in these words  
in August, 1858*

"This able and interesting monthly has now accomplished its first half year, having from the start achieved a brilliant success. This is the more remarkable, as it commenced in a season of great depression, when other magazines were shaking in the wind, or falling before the blast. It is ably sustained by the very best writers in the country. . . . Its politics will suit some classes of readers; its genial humor and sparkling wit will suit all. . . .

"We do not see how any family that has a taste for the cream of American literature, can dispense with this monthly visitor. To have it come regularly to your parlor is like receiving periodical visits, and holding periodical confabs with Holmes, Longfellow, Lowell, Hawthorne, Tuckerman, Whittier, and a score or two of kindred spirits whose presence and influence would throw a sort of halo about your door. . . ."

# NATIONAL BROADCASTING COMPANY, INC.

A RADIO CORPORATION OF AMERICA SUBSIDIARY

HOTEL BRADFORD  
BOSTON, MASS.

PROGRAM MANAGERS  
OF  
BROADCASTING STATIONS  
WBZ AND WBZA

December 1, 1935

Dear Friends,

Agricultural conditions have changed in a thousand ways since the first copy of the Old Farmer's Almanac was issued 144 years ago. But more important to you are the changes taking place in modern agriculture. The agricultural programs of WBZ and WBZA keep listeners abreast of modern agricultural thought, practice and market conditions.

While these programs are especially planned to benefit the farmers of the New England states, they also have proved helpful to hundreds of home owners, back-yard gardeners and city consumers of foodstuffs.

Our broadcasts daily offer this varied audience the official weather forecast, some outstanding agricultural leader as guest speaker; and buying and selling news about the more important farm products in the producing sections and on the wholesale markets of New England's greatest cities.

These WBZ and WBZA programs are New England's "Bulletin Board of Agriculture". They are yours for the listening.

Faithfully yours,

*C. J. Rowell*

Director,  
New England Agricultural Programs

# OUTDOOR ADVERTISING

## *The Oldest and the Newest Advertising Medium*

THE history of Outdoor Advertising so closely parallels the history of civilization that it ranks easily as the world's oldest form of advertising. Yet when Greek and Roman merchants of old whitened the walls of their homes and on these "albums" scratched the symbols of their trade, they were employing the same principle which makes Outdoor Advertising today the world's most modern advertising medium.

### *Traffic Means Trade*

For today, as never before, the civilized world is an *out-of-doors* world. We live in more densely populated centers than our ancestors, yet we spend less time inside our homes. We travel farther . . . and more often . . . to work, to shop, to play. We have more leisure. We may be more restless. We are certainly more *mobile!*

1848-1936

Keeping pace with all such changes which the world has seen, Outdoor Advertising has traveled a long way in the last 2000 years. As in other fields, the last century has brought the greatest changes and improvements, and for the last 88 years advertisers in New England have looked to THE DONNELLY WAY for the newest and the best in Outdoor Advertising.

To merchants and manufacturers, and to the people of New England, JOHN DONNELLY & SONS pledges its continued efforts to keep Outdoor Advertising in this corner of the world on the same high plane.

- **LEISURE** appeals to everyone who wants to get more out of life. It is packed full of countless substitutes for boredom. Every month its pages point to new and interesting *things to do*, featuring pleasurable activities in season.
- **PARENTS**, Educators, and Group Leaders are unreserved in their praise of **LEISURE**.
- **A FATHER**:—"It is a bully magazine and made a great hit with the kids as well as Dad."
- **A COLLEGE DEAN**:—"A magazine like yours can do much to save our young people from finding unwholesome outlets for their surplus energies by putting before them in attractive and authoritative form the many fields of activities which will satisfy their cravings for adventure, for creation, for co-operation, and for leadership."
- **A CAMP DIRECTOR**:—"You have indeed developed a splendid idea and I have been amazed at the way your magazine has grown in its brief existence."
- **LEISURE** is the only magazine catering to the leisure tastes of every member of the family. It is educational without being scientific. It opens the way to a fuller life and greater happiness. You find new introductions to

# Helpful Hints to Housewives

Each season carries with it duties that each housewife faces reluctantly, often with dread; for in every home are arduous duties of house cleaning, and yet—the resourceful housewife seeks and finds many helpers to lighten the load of house cleaning.

## Household Forecasts

The new year enters in the dead of winter. Fires are crackling in the open hearth and furnaces are going at full blast, all through the winter furnace dusts and grime make window cleaning a problem. Here the housewife quickly learns the value of RED CAP WIND-O-WASH that dustless cleaner that removes dust and grime so quickly from the glass with such little effort.

Washing clothes during the winter is a problem, often clothes must be dried inside. Here, again, the housewife learns that RED CAP AMMONIA loosens the dirt and makes washing easier while RED CAP BLEACH helps to restore the snowy whiteness of fine linens.

Many sumptuous dinners create still more problems to the busy housewife. Here RED CAP SILVER CLEANER is a never failing friend. It cleans so quickly, yet it does not scratch or injure the silver. It contains no coarse abrasives or acids. And when the two house cleaning seasons finally arrive—Spring and Autumn — Red Cap household cleaners enter into the work like a battalion of soldiers. Dust, grime and grit on windows, bathroom fixtures, tile, porcelain or enamel and white woodwork disappear like magic before the active cleaning qualities of Red Cap WIND-O-WASH—the cleaner with a thousand uses.

## Saving Labor in the Home

### RED CAP

#### WIND-O-WASH

Quick acting cleanser for windows, tile, porcelain and enamel finishes and white woodwork. Apply with wet cloth—allow to dry—then wipe off the white film with a clean cloth. The quickest and easiest cleaner known.

### RED CAP

#### AMMONIA

Stronger — more powerful — more economical. It softens water, loosens the dirt in clothes and makes washing easier. The full strength of the product is retained indefinitely through the use of a new style container cap.

### RED CAP

#### BLEACH

A new bleaching water that makes white clothes glisten spotlessly—a wonderful cleaner for all the stubborn cleaning jobs you dread most.

### RED CAP

#### SILVER-CLEANER

A new and better cleaner for all silver. Contains no coarse abrasives or acid to scratch or injure fine silver or to wear off plated ware. Cleans quickly, leaving no blue film.

## *An Invitation . . .*

THIS year THE OLD FARMER'S ALMANAC is published under a new management and a new editor, but with a strong conviction on the part of all concerned that the same policies and traditions which have brought success to THE ALMANAC for over a hundred years should be strictly maintained.

On the other hand an almanac, perhaps more than any other type of publication, should recognize The March of Time and the changing conditions which govern everyday life.

For this reason the publishers will welcome any suggestion for improvement in the publication. If our readers feel that there is further information or data which should be added to the present contents or that a rearrangement of the subject-matter would be advantageous, do not hesitate to write us.

For this is in every sense YOUR almanac—if we make it conform as nearly as possible to the wishes of our reading public, if we give them *what* they want in the *way* they want it, we shall have fulfilled our most important duty as its publishers.

# Five Books Worth Owning

## GOOD-BYE, MR. CHIPS

By JAMES HILTON

This exquisite brief life of an English schoolmaster continues to make friends daily. *William Lyon Phelps* says: "It is a masterpiece and ought to be so regarded a hundred years from now." Now in its 147th thousand. \$1.25. Illustrated edition. An Atlantic Book \$2.00

## DAILY STRENGTH FOR DAILY NEEDS

Selected by MARY W. TILESTON

"If you have a friend who is discouraged, laden with heavy cares or weak of body or faith, give him a copy of 'Daily Strength for Daily Needs;' two minutes in the reading, one minute of thought or prayer, and his day will have a fresher note."—*Bishop Lawrence of Massachusetts* in his introduction of this edition. \$1.50

## IF YOU WANT TO GET AHEAD

By RAY W. SHERMAN

Get over the idea that success is due to a mysterious quality that some men have and others have not. Success is made up of simple things—the simple things that most men don't do. This book is full of simple, practical, definite suggestions that almost any man can carry out, and that will almost inevitably help him to get ahead. \$1.50

## COOKING FOR TWO

By JANET MCKENZIE HILL

Here is a new revised edition of this popular cook book—one that has been for twenty years a boon to tens of thousands of housewives. *Good Housekeeping* says: "It would be hard to find a better book to put into the hands of a young wife or a bachelor girl." \$2.50

## HEALTHY BABIES ARE HAPPY BABIES

By JOSEPHINE HEMENWAY KENYON, M.D.

A complete handbook for modern mothers by one of the best-known pediatricians in New York City. Every mother will find it a most complete, practical and up-to-date book on the care, health, feeding and training of her child. An Atlantic Book. \$1.50

LITTLE, BROWN & COMPANY  
Boston

# Firestone

## A NAME YOU CAN TRUST IN FOOTWEAR

There is a store in your neighborhood that you trust. It sells only good merchandise at fair prices. And stands back of everything it sells. You deal there instinctively.

Although Firestone is a vast business organization, it has not forgotten the friendly, trustworthy way of doing business. It is like your favorite store. You can trust it. So when you buy rubber footwear with the FIRESTONE trademark, you can be sure of getting your full money's worth—in wear, comfort and satisfaction. And like your store, FIRESTONE stands back of everything it sells.

### CHECK THIS CALENDAR FOR YOUR RUBBER FOOTWEAR NEEDS

**JANUARY:** Warm Firestone Gaiters to prevent colds. Firestone Rubber Boots for farm work.

**FEBRUARY:** Snow. Thaws. A dangerous time. Play safe by keeping the family well provided with Firestone Gaiters and Boots.

**MARCH:** Firestone Farmsters defy the slush and mud, seem lighter and easier to wear. And Firestone Rubbers come in handy as the ground dries out.

**APRIL:** Avoid the showers and wet feet of April with FIRESTONE Light Rubbers. Remember that fishing season opening means Firestone Fishing Boots for more comfort and real sport.

**MAY:** Rains are over—the sun shines brightly. And the children need new canvas shoes for work and play. See Firestone Canvas Shoes for values.

**JUNE:** If the children haven't already got Firestone Canvas Shoes, they'll surely need them in this sunny month. And smart Deb Sandals delight the girls. Remember tennis—if you play, Firestone Tennis Shoes help your game.

**JULY:** Deb sandals flicker on every smart feminine foot at the beaches. And *all* the family is wearing various Firestone Canvas Shoes.

**AUGUST:** Hotter and hotter goes the weather. Check over your Canvas Shoe needs and see your Firestone dealer.

**SEPTEMBER:** Cooler days—and school begins. Firestone Gym Shoes for the scholars.

**OCTOBER:** Get ready for cold weather. Match your new leather shoes with Firestone rubbers. And remember Firestone Hunting Boots for the Fall shooting.

**NOVEMBER:** Now's the time for replenishing your supply of Firestone Gaiters. These heavier shoes withstand Old Man Winter's worst blasts.

**DECEMBER:** Ideal Christmas presents—useful and sensible—are Firestone Gaiters and Boots.

If your dealer hasn't the Firestone Footwear you want, he can get it from
