

PHILOSOPHICAL  
TRANSACTIONS  
OF THE  
ROYAL SOCIETY OF LONDON.

SERIES A.

CONTAINING PAPERS OF A MATHEMATICAL OR PHYSICAL CHARACTER.

VOL. 216.

---

LONDON:

PRINTED BY HARRISON AND SONS, ST. MARTIN'S LANE, W.C.,

Printers in Ordinary to His Majesty.

JULY, 1916.

# CONTENTS.

(A)

VOL. 216.

List of Illustrations . . . . .	page v
Advertisement . . . . .	vii

I. <i>The Monoclinic Double Sulphates Containing Ammonium. Completion of the Double Sulphate Series. By A. E. H. TUTTON, D.Sc., M.A., F.R.S., President of the Mineralogical Society . . . . .</i>	page 1
II. <i>The Electrical Conductivity and Luminosity of Flames containing Salt Vapours. By H. A. WILSON, F.R.S., Professor of Physics, Rice Institute, Houston, Texas, U.S.A. . . . .</i>	63
III. <i>The Threshold of Vision for Different Coloured Lights. By Sir W. DE W. ABNEY, K.C.B., D.C.L., D.Sc., F.R.S., and Prof. W. WATSON, D.Sc., F.R.S. . . . .</i>	91
IV. <i>On Certain Linear Differential Equations of Astronomical Interest. By Prof. H. F. BAKER, F.R.S. . . . .</i>	129
V. <i>Discussion of Kew Magnetic Data, especially the Diurnal Inequalities of Horizontal Force and Vertical Force, from Ordinary Days of the Eleven Years 1890 to 1900. By C. CHREE, Sc.D., LL.D., F.R.S., Superintendent, Kew Observatory . . . . .</i>	187
VI. <i>On the Law of Distribution of Molecular Velocities, and on the Theory of Viscosity and Thermal Conduction, in a Non-uniform Simple Monatomic Gas. By S. CHAPMAN, M.A., D.Sc., Fellow and Lecturer of Trinity College, Cambridge. Communicated by Sir JOSEPH LARMOR, F.R.S. . . . .</i>	279

VII. *The Newtonian Constant of Gravitation as Affected by Temperature.* By P. E. SHAW, B.A., D.Sc. Communicated by C. V. BOYS, F.R.S. . . . page 349

VIII. *The Combining Volumes of Hydrogen and Oxygen.* By F. P. BURT, D.Sc., and E. C. EDGAR, D.Sc., Senior Lecturers in Chemistry in the University of Manchester. Communicated by Prof. H. B. DIXON, F.R.S. . . . . 393

IX. *Mathematical Contributions to the Theory of Evolution.—XIX. Second Supplement to a Memoir on Skew Variation.* By KARL PEARSON, F.R.S. . . . 429

X. *On the Distribution of Intensity in Broadened Spectrum Lines.* By J. W. NICHOLSON, M.A., D.Sc., Professor of Mathematics in the University of London, and T. R. MERTON, D.Sc. (Oxon), Lecturer in Spectroscopy in the University of London, King's College. Communicated by Prof. A. FOWLER, F.R.S. . . . . 459

*Index to Volume* . . . . . 489

LIST OF ILLUSTRATIONS.

---

Plate 1.—Prof. KARL PEARSON on Mathematical Contributions to the Theory of Evolution.—XIX. Second Supplement to a Memoir on Skew Variation.

Plate 2.—Prof. J. W. NICHOLSON and Dr. T. R. MERTON on the Distribution of Intensity in Broadened Spectrum Lines.

THE Committee appointed by the *Royal Society* to direct the publication of the *Philosophical Transactions* take this opportunity to acquaint the public that it fully appears, as well from the Council-books and Journals of the Society as from repeated declarations which have been made in several former *Transactions*, that the printing of them was always, from time to time, the single act of the respective Secretaries till the Forty-seventh Volume; the Society, as a Body, never interesting themselves any further in their publication than by occasionally recommending the revival of them to some of their Secretaries, when, from the particular circumstances of their affairs, the *Transactions* had happened for any length of time to be intermitted. And this seems principally to have been done with a view to satisfy the public that their usual meetings were then continued, for the improvement of knowledge and benefit of mankind: the great ends of their first institution by the Royal Charters, and which they have ever since steadily pursued.

But the Society being of late years greatly enlarged, and their communications more numerous, it was thought advisable that a Committee of their members should be appointed to reconsider the papers read before them, and select out of them such as they should judge most proper for publication in the future *Transactions*; which was accordingly done upon the 26th of March, 1752. And the grounds of their choice are, and will continue to be, the importance and singularity of the subjects, or the advantageous manner of treating them: without pretending to answer for the certainty of the facts, or propriety of the reasonings contained in the several papers so published, which must still rest on the credit or judgment of their respective authors.

It is likewise necessary on this occasion to remark, that it is an established rule of the Society, to which they will always adhere, never to give their opinion, as a Body,

upon any subject, either of Nature or Art, that comes before them. And therefore the thanks, which are frequently proposed from the Chair, to be given to the authors of such papers as are read at their accustomed meetings, or to the persons through whose hands they received them, are to be considered in no other light than as a matter of civility, in return for the respect shown to the Society by those communications. The like also is to be said with regard to the several projects, inventions, and curiosities of various kinds, which are often exhibited to the Society ; the authors whereof, or those who exhibit them, frequently take the liberty to report, and even to certify in the public newspapers, that they have met with the highest applause and approbation. And therefore it is hoped that no regard will hereafter be paid to such reports and public notices ; which in some instances have been too lightly credited, to the dishonour of the Society.
