The background of the image is a dense, intricate marbled paper pattern. It features a complex, swirling design of fine, overlapping lines in various colors, including deep reds, blues, greens, yellows, and whites, all set against a dark, almost black base. The overall effect is a rich, textured, and visually busy pattern. In the center of this pattern is a rectangular white label with a thin black border. Inside the label, the text is centered and reads: LIBRARY OF THE JOHN G. JOHNSON COLLECTION CITY OF PHILADELPHIA.

## BIOGRAPHICAL NOTES AND INDEX

### LOUIS APOL

Among the band of Dutch artists who began to establish a reputation in the seventies, Louis Apol holds a very distinguished place. He has a special fondness for winter scenes, which he renders in a spirit of realism, with a quiet, contemplative manner and singular taste and purity that characterize the work of the group.

*A WINTER MOON* 37

### J. J. VAN DE SANDE-BAKHUYZEN

Born at The Hague, 1835. Pupil of his father. A landscape painter of great merit, reproducing nature's beauty in a true and simple manner. His subjects are mostly taken from the province of Drenthe, where he studies every summer. His works attracted great attention and admiration at the World's Fair, Chicago, but his greatest popularity is in Holland, where there is scarcely a collection without at least one example of his work.

*COWS AT THE FORD* 77

### NICOLAAS BASTERT

Born at Amsterdam, 1858. Pupil of the Amsterdam Academy. A talented landscape painter. His work is refined and his inspiration received directly from nature. He is at his best when painting still rivers which reflect the trees along their borders. The paintings he sent to the Chicago Exposition were all bought by connoisseurs of the United States. He has exhibited in Paris,

Munich, Chicago, Amsterdam and The Hague with success, receiving a medal in each city.

OCTOBER—HOLLAND

36

MRS. BILDERS-VAN BOSSE

Born in Oosterbeek. Studied principally with her late husband, J. W. Bilders, and Anton Mauve, who taught her to paint direct from nature. She is particularly excellent in her sketches of wood interiors, especially in water color, which are much admired in Holland.

IN A BEECH FOREST

14

BERNARDUS JOHANNES BLOMMERS

Born at The Hague in 1844 and in time became a pupil of its Academy. His first exhibit was made in 1869, when his picture was hung next to one by Israëls. This led to a friendship between them, the influence of which is clearly perceptible in his earlier work. But his temperament is sunny, and while he enters with sympathy into the life of the peasants, his genre pictures of domestic scenes are happier in suggestion than those of the older man. The picture, exhibited at Paris, a large canvas, represented a mother and three children paddling in the shallow waves at sunset; a subject altogether charming in spirit and execution. In Holland, Blommers is highly esteemed, his works hanging in the principal public galleries, while his reputation in other countries is steadily advancing.

35

FRANÇOIS SAINT BONVIN

A French painter of still-life and of interiors in the style of Chardin; born at Vaugirard, Paris, November 22, 1817. His father was a *garde-champêtre*, and Bonvin was educated in the

drawing-school of the Rue de l'École de Médecine. For more than thirty years he was a constant exhibitor at the Salon, gaining the Legion of Honor in 1870. In 1881 he entered the Hospital of Saint Jean de Dieu to be operated on, and for the rest of his life was an invalid. He died in 1888.

*THE CLOISTER*

44

JOHANNES BOSBOOM

Born at The Hague, 1817; died there, 1892. Pupil of B. J. Van Hove. Bosboom is now recognized as one of Holland's best painters. Since his death his works have rapidly been absorbed into collections. He was unexcelled in his specialty of church interiors. Beautifully drawn and executed, they are filled with air and also with the suggestion of those sentiments that are inspired by the grand architecture that has been a silent witness of great events in Holland's history. His landscapes are also full of fine feeling. He received many honors; none that he greater esteemed than to be chosen, as he was in July, 1885, to unveil Rembrandt's masterpiece in the new museum at Amsterdam.

## JOHN CONSTABLE, R.A.

Born in 1776, at East Bergholt, Sussex, fourteen miles from the birthplace of Gainsborough. Son of a well-to-do miller, he was destined for the Church, but preferred the occupation of his father, meanwhile receiving instruction in drawing from a certain Dunthorne, who gave his instruction always in the open air. Finally deciding to be a painter, he entered the Academy schools at the age of twenty-four, and exhibited his first picture two years later. He studied the works of Ruysdael in the National Gallery, from which he came to the conclusion that London could help him little in his art, and that it was nature which he must study, and particularly nature along the banks of his native Stour, which in after years he averred had inspired his desire to be a painter. He set himself right in the midst of green landscape, and was the first to remove every kind of adaptation and arbitrary arrangement in composition, and to paint not only what he saw, but in such a way as to convey the impression of *how* he saw it. Especially did he advance the study of light and air, and for the first time the atmosphere moves and has its being in painted landscape. He was ahead of his time, anticipating the triumphs of the painters of Barbizon, on whom his influence was undeniable. He was happily married, and a legacy to his wife, sufficient for their modest needs, enabled him to work, as he said, for the future. He was elected to the Royal Academy in 1837. His faith in the judgment of posterity has been abundantly justified, and he is now recognized as one of the foremost masters of the *paysage intime*.

## JEAN BAPTISTE CAMILLE COROT

Born in Paris in 1796; the son of a court modiste. He was sent to the high school at Rouen and then apprenticed to a linen draper, his father, after eight years' opposition, finally yielding to his desire to be a painter, and allowing him a yearly maintenance of twelve hundred francs. He studied under Michallon and

Bertin, accompanying the latter in 1826 to Italy. Here with practice he achieved the accomplishment of rapidly portraying the action of moving figures, a skill that he afterwards extended to the delineation of foliage stirred by air. His early pictures, whether of figures or landscape, are of the orthodox academical type, hinting at the future Corot only in the exceeding delicacy of their tonal effects and their increasing regard for the qualities of atmosphere. It was not until he had returned from his third visit to Italy, in 1843, that Corot fell under the influence of Rousseau and discovered the charms of French landscape. In Provence, Normandy and Fontainebleau he studied nature, recommencing his artistic life at the age of forty and studying for eight years before the Corot that the world now recognizes as a master was finally evoked. Communing with nature in Ville d'Avray and painting in his studio in Paris, he produced during the next twenty-five years a series of masterpieces, distinguished as much by truth to nature as by their exquisite poetry. The latter was an effluence of his own quiet, happy spirit, and of the perennial youth of his soul, that found its pleasure in music and in nature and in the companionship of his friends. He lived with his sister, who died in 1874, and the old bachelor followed her the next year. "Rien ne trouble sa fin, c'est le soir d'un beau jour."

#### DAVID COX

Born near Birmingham, England, in 1783. He began his career as a scene painter in a Birmingham theatre, and went to London in 1803, where he became a teacher of drawing and painting, and practised his profession with great success. His name is identified with a flourishing school of English landscape painters, of which he was one of the leaders. In 1844 he settled at Harborne Heath, near Birmingham, where he died in 1859.

## PASCAL ADOLPHE JEAN DAGNAN-BOUVERET

This artist was a pupil of Gérôme, and made his début in the Salon in 1877, and in 1878 received a medal for his "Burial of Manon Lescaut." In 1880 M. Dagnan-Bouveret received a first-class medal; in 1885 the Legion of Honor, and in 1889 the medals of honor at the Salon and the Universal Exposition. More his own country could not do for him, except to support him with her patronage, and this she has honestly done. Commencing on the foundation of neo-classical art which characterizes the Gérôme school, M. Dagnan has created a school of his own, in which he has many followers. Tenacious, patient, persevering, working with the extremest care, leaving nothing to accident, but carrying out each effect as he marked it out to be completed when he began, he is at once one of the most conscientious and one of the most sincere French artists of the present day. He is absolutely free from any of the mannerisms or conventionalities of academic training, and equally free from any personal affectations of technique. Bastien-Lepage, himself an artist of a very similar type, held him in the highest esteem, and since the death of his friend, M. Dagnan comes closer to taking his place than any other artist of the day. M. Dagnan takes his surname Bouveret from his mother, in order to distinguish himself from another artist of the name now deceased.

## CHARLES FRANÇOIS DAUBIGNY

Born in Paris in 1817. After studying with his father, Edmé François, he visited Italy, and on his return spent some time in the studio of Delaroche. From 1838 he was a constant exhibitor at the Salon and became identified with subjects drawn from the Seine, Marne and Oise, navigating these waters in a floating studio. He had spent much of his childhood in the country near L'Isle Adam and, as an artist, turned unreservedly to nature study. The youngest of the Barbizon group, he entered into the harvest of recognition won by the older men. He was not an exacting

analyst, like Rousseau; or elevated in mood, as Dupré; not consciously a poet, as Corot, or a sharer of Diaz's fantastic or exalted conceptions; only, quite simply and normally, a lover of the country.

Such a love of nature is a survival of, or a return to, the simple associations of childhood, and Daubigny in this respect was perpetually a boy. His pictures have the freshness and spontaneity of boyhood, expressed with the virility of a man.

He had more affinity with Corot than with any other of the famous brotherhood—less with Corot's classical spirit and deliberately poetic vein than with his sweet, perennial youthfulness of character. He was by nature lovable, with a heart that kept its sweetness fresh and unsullied to the end. The loveliness is reflected in his work. His death occurred in 1878.

#### KARL DAUBIGNY

Born in Paris, June 9, 1846. Son and pupil of Charles François Daubigny. Formed a style of his own, and received medals at the Salon. His landscapes are highly appreciated in France, but are not very well known in the United States. Died in Paris in 1886.

#### CHARLES H. DAVIS

At the Third Prize Fund Exhibition, at the American Art Galleries in New York, in 1887, the prize of \$2,000 was awarded to a landscape entitled "Late Afternoon." The artist was Charles H. Davis. At the Exposition of 1890, in Chicago, another of the artist's works secured the prize of \$500, donated by Mr. and Mrs. Potter Palmer, for the best landscape. Two exhibitions of the

painter's pictures in New York further introduced him to his public and confirmed his footing. Mr. Davis is a native of Amesbury, Massachusetts, born in 1856, and at twenty years of age began exhibiting pictures in Boston, where he had received instruction at the Museum of Art, under Professor Grundman. He went to Paris in due time, and commenced to qualify himself as a painter of the figure, with Boulanger and Lefebvre for masters. His summer studies out-of-doors aroused in him the latent love of Nature in her rural and pastoral aspects, however, and he finally discarded his original selection and devoted himself entirely to landscape painting. Working upon a capital of skill acquired from the study of the figure, and being independent of the influence of any school or master of landscape painting, he created within himself that simple and charming style which renders his works so captivating.

#### THÉOPHILE DE BOCK

Born at The Hague, 1850. Pupil of Jacob Maris, De Bock has gained from his master a broad and vigorous manner of painting. His skies are admirable. His landscapes are nearly always well composed, and have a certain strength and atmospheric quality that are very attractive. He has in his work the spirit of the modern Dutch school.

16

#### ALEXANDRE GABRIEL DECAMPS

Born in Paris, 1803. At first a pupil of David and Ingres, he freed himself from classic principles of style and from imitation of the antique. As a boy he had spent several years upon a farm, and the love of nature was strong within him. In 1827 he accompanied Garneray, a marine painter, to Constantinople and Asia Minor, and his journey proved a voyage of discovery for French painting. He dared to paint what he saw, and saw every-

thing through the vision of a true painter, fascinated by color and light, and in a spirit of dreamy mystical poetry. His death occurred at Fontainebleau in 1860.

EUGÈNE FROMENTIN

Born at La Rochelle in 1820. He was the son of a successful lawyer and intended to follow his father's profession. But after receiving his diploma in Paris, at the age of twenty-three, he was taken ill, and as a pastime took up the study of drawing. He soon

discovered that his tastes were stronger in the direction of art than toward the practice of law, and he became a pupil of Cabat and Rémond. He had visited Algeria as a youth, and, attracted by Marilhat's paintings of the Orient, now made up his mind to return to that country. He accordingly spent three years there—1846 and 1848 and 1852. In 1847 he first exhibited at the Salon, and in a few years was recognized as the most sympathetic and poetical painter of Oriental subjects, and became, indeed, the leader of a school. Meanwhile he established his reputation as a brilliant and facile writer, not only as a critic of art, but as a novelist. He received medals at the Paris Salon in 1849, 1857 and 1859, and at the Exposition in 1867. He was made Chevalier of the Legion of Honor in 1859 and Officer in 1869. Died in 1876.

45

BALDOMERO GALOFRE

This distinguished Catalonian painter was born in 1848. In 1870 Baldomero Galofre arrived in Madrid with six francs in his pocket and two portfolios of sketches, the result of his study under Ramón Martí. He was employed as a draughtsman on the *Ilustración Española y Americana* till 1873, when he won the Prix de Rome. He was practically self-taught in art, and was extremely independent and exclusive in his habits. He worked in Rome and occupied a leading position among modern Spanish painters. His death occurred at Barcelona on July 26, 1902.

93

WALTER GAY

Born in Hingham, Massachusetts, Walter Gay first became known in Boston as a painter of flowers and still-life pieces. He was a nephew and pupil of Walter Allan Gay, who had studied under Prof. R. W. Weir at West Point, and Troyon in Paris, and had travelled and painted widely in Europe and the East. In 1876 young Gay went to Paris, where he became a pupil of Léon Bon-

nat, and since that time he has devoted himself almost entirely to figure subjects, in a cheerful and pleasing genre, which have won for him a gratifying reputation. At the Salon of 1885 he was accorded an Honorable Mention, and he has received other distinctions at exhibitions in this country. He has been awarded medals in France, Belgium, Germany and Austria, is a member of the Society of American Artists, and was made a Chevalier of the Legion of Honor in 1894. His best known pictures are genre subjects of the eighteenth century, but during the past couple of years he has varied them with realistic motives of modern life, especially in Spain, which show him to be fully abreast with the spirit of the time.

63

#### GUSTAVE GUILLAUMET

Gustave Guillaumet, the chief of modern French painters to explore North Africa as a field for subjects, was born in Paris on March 26, 1840. He studied at the *Ecole des Beaux Arts*, and under Picot and Barrias, and in 1863 won the second Prix de Rome and made the first of his many visits to Algeria. His scenes of life among the nomadic Arabs of the waste and the Arabian husbandmen at once attracted favorable attention in Paris, and secured him various medals at the Salon, and in 1878 the Legion of Honor. All the French museums possess examples of his brush, and he has contributed not a little by his art toward strengthening the bonds by which France is united with her famous African colony. His pictures are essentially truthful and realistic, but are imbued with a certain poetic feeling, and characterized by a mellow charm of color and a tender harmoniousness of tone. His selection of subjects is simple, without any effort at superficial sentiment; calculated, in fact, to be representations of actual life, whose interest is entirely dependent on themselves. It is in this that their strong appeal to the public lies; an appeal which has rendered them the most popular pictures of African life and character painted in modern times.

## AUGUST HAGBORG

Born at Gothenburg, Sweden. Pupil of the Academy of Fine Arts, Stockholm, and of Palmaroli, Paris. Medal, Paris, 1879. "Of majestic stature, with a handsome and characteristic head, one recognizes in him at once the strong man and the artist, the indefatigable fighter and worker, whose eyes, flashing with inspiration and spirit, have in them still that tenderness which belongs to the Swedish eye, tinted with the beautiful blue of the sea. Everything is robust and vigorous in the talent which confirms him as one of the masters of the future."—*August Hagborg*, by A. M. DE BELINA.

## WILLIAM H. HOLMES

Born in Harrison County, Ohio, in 1846. He took up water color drawings at an early age, but without a master. In 1872 he joined the United States Geological Survey of the Territories as artist, and, although turning his attention almost immediately to geologic and archaeological studies, he at all times kept up the practice of his favorite art.

*VENICE*

91

## EUGÈNE LOUIS GABRIEL ISABEY

Born at Paris in 1804. He was the son of a well-known miniature painter, Jean Baptiste Isabey, and was the pupil of his father. He began his career as a genre painter, but shortly began to paint marines, and, indeed, during his whole professional life, more than sixty years, he divided his time between these two branches of art. In 1830 he was appointed royal marine painter with the French expedition to Algeria, and although he executed many important commissions for sea pictures, he continued to paint those remarkably facile, vivacious and rich-toned figure pictures for which he is now chiefly known. He was at one time very successful as a water-color painter and also as a lithographer. He received

medals at the Paris Salon in 1824 and 1827, and at the Exposition in 1855; was made Chevalier of the Legion of Honor in 1832 and Officer in 1852. Died in 1886.

*A SHIPWRECK*

65

### JOSEF ISRAËLS

Born at Groningen, North Holland, in 1824. As a boy he wished to be a rabbi, but on leaving school entered his father's small banking business, and in 1844 went to Amsterdam to study under the fashionable portrait-painter, Jan Kruseman. But it was the ghetto of the city, swarming with life, that affected his imagination. The following year he proceeded to Paris and worked under Picot and Delaroche, entering the latter's studio shortly after Millet had left it. Like Millet, he had no inclination for "grand painting," and, though he tried to practise it upon his return home, it was in the little village of Zandvoort, whither he went for his health, that he discovered his true bent. Again, like Millet, he found his inspiration in the lives of the poor; but, unlike the French master, he invests his subjects with intimate peace and lyrical melancholy, veiling his figures in an exquisite subtlety of subdued atmosphere. Amongst the moderns he is "one of the most powerful painters and at the same time a profound and tender poet."

### CHARLES ÉMILE JACQUE

Last survivor of the Barbizon-Fontainebleau painters, Jacque reached a full meed of dignity and wealth. The varied experiences of his early life, joined to a well-balanced mind and practical character, had enabled him to escape the early harassments which had beset his friends.

Born in 1813, he was by turns a soldier and a map engraver; later practising engraving upon wood, and etching. In these mediums his first exhibits were made at the Salon, and they received

awards in 1851, 1861 and 1863. His influence had much to do with the revival of interest in the art of etching, and examples of his plates are held in high esteem by collectors. Meanwhile, from 1845 he had been training himself to paint, although it was not until 1861 that his pictures received official recognition. His sympathies were with rustic life, and particularly with animals. The pig attracted him as a subject; he not only painted the barn-door fowls, but bred them and wrote a book about them. Yet it is for his representation of sheep that he is most highly esteemed. His experience with the burin and needle had made him a free and precise draughtsman, while his profound study of animals gave him complete mastery over construction and details, as well as the power to represent their character. His fondness for them saves him from any possibility of triviality; he selects the essentials and fuses them into a dignified unity. His pictures have much of the poetry which characterized the Barbizon school, and found ready patrons during his life. He died, 1894.

#### HENRY WRIGHT KERR

A native of Edinburgh. An Associate of the Royal Scottish Academy. His specialty is in characteristic heads, Scottish and Irish, though he also paints landscapes.

#### JACOB SIMON HENDRIK KEVER

Born at Amsterdam, 1857. Pupil of the Amsterdam Academy. While yet a boy his passion for drawing and sketching pointed out his future career. Kever has a great reputation as a painter of Dutch peasant home life, and none has better or more sympathetically painted children. He expresses in his paintings very sweet sentiment with a strong, free brush. His subjects are very simple, but seriously painted. His handling of light, whether in interiors or out-of-doors, is particularly happy, and the tone and color are excellent. His works are steadily rising in the estimation of con-

noisseurs. He received the gold medal of Amsterdam in 1892, and was awarded medals at Munich, Chicago, and other places.

#### DANIEL RIDGWAY KNIGHT

A native of Philadelphia and a student of the Pennsylvania Academy, Knight went to Paris in 1872, and since that date has continued to reside in France. He entered the *Beaux Arts* and studied under Gleyre, later on being received into the studio of Meissonier, the only American who ever enjoyed that distinction. He did not, however, become an imitator of the great Frenchman. Indeed, from the time he made his acquaintance, he ceased to paint the little costume pieces with which he had been identified previously, and devoted himself to studies of peasant life on a larger scale and set in natural surroundings. He early abandoned the artificially lighted studio, and had one constructed of glass in the garden of his picturesque villa at Poissy. Many honors have been conferred upon him both in this country and abroad, including the Cross of the Legion of Honor, and the Cross of the Order of St. Michael at Munich, and a bronze medal at the Universal Exposition of 1900.

#### KONSTANTIN MAKOVSKY

Born in Moscow, 1839. Historical, genre and portrait painter; pupil of the Moscow Academy and the St. Petersburg

Academy, where his "Assassination of Czar Féder Borissovich" was awarded the second prize. He painted portraits almost exclusively for several years, but in 1869 he exhibited the "Carnival in St. Petersburg," now belonging to the Czar. Makovsky is a member of, and Professor in the St. Petersburg Academy.

JACOB MARIS

The eldest of the three brothers, whose father and teacher was an able artist of the last century, was born at The Hague, 1837. Pupil of Stroebel, van Hove, de Keyser and Hébert. Jacob Maris was greatly impressed, while in Paris studying with Hébert, with the works of Daubigny, Millet, Rousseau, Dupré and Corot. Returning to Holland, his serious nature was drawn towards the Dutch landscape, its windmills, towns, canals; also to the seashore with its picturesque fishing-boats. He was regarded by all his brother artists as the greatest living landscape painter in Holland. His pictures have steadily grown in the estimation of connoisseurs. He died in 1899.

WILLEM MARIS

Born at The Hague, 1843. Brother and pupil of Jacob Maris, but taught more by nature. There is no artist who can depict so well the delicious atmosphere that envelopes Holland on a summer day. His favorite subject is a pasture with the sunlight resting on the backs of cows standing dreamily near ponds, or ditches or in milking corners. He is seldom satisfied with his own work. His art is wonderful, and the brush with which he has charmed so many lovers of nature is handled with ease and as by magic. Let one who wishes to understand the work of Willem Maris take a walk from one of the villages of Holland to some neighboring farm, sit

down on the roadside between the pastures, enjoy the country in all its beauty, inhale the balmy perfume of the land, and then he will feel the sentiment that Willem Maris so well interprets.

#### ANTON MAUVE

“It was truly said when Anton Mauve died that Holland had sustained a national loss. Though comparatively a young man, he had made a powerful impression on the art of his country, and did more than any of his contemporaries to infuse into the minds of his fellow-artists higher aims and to lead them toward that close sympathy with nature which was his own inspiration. He loved the Dutch farms, dykes and heaths, and he painted them lovingly and tenderly in a direct, simple way. To him his country was not always dull, gray and damp, as other artists would have us believe. He saw and felt, and shows us, its light and sunshine, too. Through his pictures we may know Holland as it is, with its peaceful peasant life in both field and cottage—not that life of hard and hopeless toil that Millet so often painted, but the life of peaceful and contented labor which, happily, is, after all, the peasant’s more frequent lot.

“Mauve was born at Zaandam, September 18, 1838, and died at the house of his brother, in Arnheim, February 5, 1888.

“Though he was for a short time in the school of P. F. Van Os, he was mainly a self-taught artist.”—W. MACBETH.

## HANS MEMLINC

Memline was born about 1430-35 at Mumling, near Aeschaffenburg, in the principality of Mentz, or at Memline, near Alekmaar, in North Holland. He probably settled in Bruges in or before 1467. In May, 1480, he was in possession of two houses in the street leading from the Flemish bridge to the ramparts, now called St. George's Street. In the town accounts of 1480 he appears among the two hundred and forty-seven burgesses who advanced money (a forced loan) to the municipality towards the expenses of the war between Maximilian and the King of France. Memline was married; his wife's Christian name was Anne, and she bore him three sons: John, Nicholas and Cornelius. Anne died in 1487, and Hans on August 11, 1494. Memline most likely served his apprenticeship under some master-painter at Mentz or Cologne. He must have worked in the latter city as a journeyman, and probably for several years prior to coming into the Netherlands. Guicciardini says that Memline was the pupil of Roger de la Pasture (Van Der Weyden) of Tournay, who settled in Brussels in 1435, and judging by the many points of similarity in their works, this may possibly be true. These points of resemblance are, however, almost entirely confined to pictures representing the Adoration of the Magi and the Presentation in the Temple, and it is noteworthy that a triptych by Roger with these subjects and the Annunciation, now in the Gallery at Munich, formerly adorned an altar in the church of St. Columba at Cologne, where Memline probably saw and studied it. There is no contemporary document proving that he worked with Roger, nor any other evidence, for the mention in the inventory of pictures belonging to Margaret of Austria, of a triptych, the centre of which was by Roger, and the wings by Master Hans, is no proof that he worked with him even for a time. Many triptychs have shutters painted by masters in no way connected with the author of the centre. It is quite as probable that he worked with Simon Marmion at Valenciennes. Memline is known to have had two apprentices—John Verhanneman in 1480, and Passchier Van der Meersch—but neither of them became masters. For harmony of color and purity of expression Memline surpasses all the masters who settled in Bruges.

### JEAN FRANÇOIS MILLET

Born at Gruchy, in the Commune of Gréville, France, in 1814. He worked on his father's farm until he was twenty years of age, and as he was constantly drawing in his leisure moments, it was decided that he should study art. He consequently went to Cherbourg and became a pupil of Mouchel and Langlois. He had been in Cherbourg but two months when his father died, and he was obliged to return to the plough. However, he kept on with his drawing, and three years later the municipality of Cherbourg voted him a subsidy to pursue his studies at Paris. He accordingly entered the *Ecole des Beaux Arts* there in the studio of Delaroche. But he had no sympathy with academic art, and soon left the school and began to paint small pictures. In 1848 he sold his first picture, "The Winnower," and went to Barbizon. His pictures, at first unrecognized, gradually gained public attention and esteem, and at the Exposition of 1867 his reputation was finally assured. He finished only about eighty oil paintings in all. He received medals at the Salon in 1853 and 1864, the Grand Medal at the Exposition in 1867, and was made Chevalier of the Legion of Honor in 1868. He died on January 20, 1875, and was buried near Rousseau in the churchyard of Chailly.

## THOMAS MORAN, N.A.

Commencing in his youth as a wood engraver's apprentice, in Philadelphia, Thomas Moran taught himself to paint in water colors and afterwards in oils. He had some inspiration and encouragement in his work from his elder brother, Edward, who, under instruction from James Hamilton and Paul Weber, had acquired sufficient proficiency to set himself up as a landscape and marine painter. In 1862 Thomas Moran visited England, of which country he was a native, having been born in Lancashire and brought to the United States when a boy of seven years of age. He devoted this visit to the study of the old masters in the English galleries, and brought back a vivid impression of Turner's works, which was reflected in his paintings of this period. In 1866 he made another European tour, this time travelling extensively in France and Italy, and in 1871 made those explorations of the great West, with Professor Hayden's expedition, which resulted in his "Grand Cañon of the Yellowstone," now in the Capitol at Washington, and other powerful works, including the celebrated "Mountain of the Holy Cross." He became a National Academician in 1884, and among other societies is a member of the Pennsylvania Academy of Fine Arts and of the Artists' Fund Society of Philadelphia; of the American Water Color Society, the New York Etching Club, and the Society of American Etchers.

## ALPHONSE MARIE DE NEUVILLE

Born at Saint Omer, France, in 1836. His parents, who were rich and influential, intended him for an official career, but from the first his tastes inclined to the army, and finally he was sent to the military school at Lorient. During his brief stay there and also in the law school in Paris, where he attended to please his parents, he spent most of his time sketching, and finally determined to become a painter, notwithstanding the remonstrances of his family and friends. He studied with Delacroix and Picot, more as a friend than as a student, but his first pictures were not successful. The Franco-Prussian War gave him, however, the neces-

sary stimulus and opportunity, and his pictures of that epoch are among the most remarkable war pictures ever painted. It is said that upon his bed of death he thought himself once more on fields of battle, and imagined, in his last hours, the reality of the pictures in which he had made his country's heroism immortal. Before his fading sight floated the smoke of Magenta; in his dull ears roared the cannon of Buzenville; he heard, in the echoing chambers of his memory, the crackling fusillade of Le Bourget, and the shouts of victory in the guttural German tongue. He received medals at Paris in 1859 and 1861; was made Chevalier of the Legion of Honor in 1873 and Officer in 1881. Died in 1885.

### ALBERT NEÛHUÛS

Born in Utrecht, 1844. Pupil of the Antwerp Academy and of G. Craeyvanger. All his life he has been a student in the school of nature. His subjects treat of the familiar life of the Dutch people. His works show a thorough understanding of the life of the humbler country people and personal sympathy with them. They also show great technical skill and are steadily increasing in estimation. He has received many honors.

GEORGE POGGENBECK

Born at Amsterdam, 1855. A true artist, with Mauve's tender feeling for the harmony and sentiment that are in nature, though different from Mauve in subject and manner. There is a beautiful simplicity and a refined poetic feeling in his landscapes. He is very conscientious and produces fewer works than most of his brother artists. His painting is very pure and his technique subtle and charming. He is one of the best water-color painters in a country notable for this art.

## SIR JOSHUA REYNOLDS, P.R.A.

A native of Plympton in Devonshire, where he was born in 1723, Reynolds went to London at the age of seventeen and became apprenticed to Hudson. Two years later he established himself as a portrait-painter in Devonport, and in 1744 moved his studio to London. In 1749 Commodore (afterward Admiral) Keppel invited the young painter to accompany him to the Mediterranean, and he was thus enabled to spend four years in Italy, during which he studied the old masters to such purpose that his own work reproduced their qualities. Subsequently he added to his research of Italian art that of the Dutch, and in his discourses delivered before the Academy proved himself a master of penetrating criticism. He founded "The Club," and in 1768 was elected first President of the Royal Academy. Angelica Kauffmann having declined his hand, he remained a bachelor, and in his splendid house in Leicester Square lived luxuriously, on terms of familiarity with the greatest men of his day. He died in 1792, and received a public funeral in St. Paul's Cathedral.

## MISS MARGARETHE VOGEL ROSENBOOM

Born at The Hague; died there 1897. A master in the art of painting flowers. Her broad, free and sympathetic touch and exquisite sense of color have given to her floral compositions an artistic quality far beyond the mere copying of the objects set before her. She has received honors in different countries. Her loss will be deeply felt in the world of art.

## THEODORE ROUSSEAU

Born in Paris in 1812. He was the son of a tailor, and, having a taste for mathematics, he was intending to enter the polytechnic school, but, fortunately for art, he entered the *Ecole des Beaux Arts* instead, and became the pupil of Lethière. Like many others, he could not accept the traditions of the Academy, and,

leaving the school, went direct to nature. He first went to Fontainebleau in 1833, and in the following year painted the first picture, which attracted much attention, the "Côtes de Grandville." During twelve or fifteen years following this success he was unrecognized by the artistic institution. These had been years of penury, in which, however, his powers had ripened fully, and he had become recognized as the "Eagle" of the little group at Barbizon. But he still had to contend with the prejudice of officialdom and of the public, and it was only at the *Exposition Universelle* of 1855 that the world began to realize that he was indeed a master. By this time the evening of life was upon him, and it was clouded by the domestic sorrow of his wife's insanity. In tending her he spent his strength, and when, at the Exposition of 1867, the officership in the Legion was withheld—an honor that was his due, since he had served as president of the jury—his spirit was broken, and he died the same year. He lies buried in the churchyard at Chailly, on the edge of the Forest, and upon the "Barbizon Stone" a panel in bronze, executed by Chapu, bears the sculptured portraits of himself and Millet.

#### VICTOR LÉON FERDINAND ROYBET

When, at the Salon of 1866, the "Jester of Henry III" won for its painter his first medal, France hailed in Roybet a new prophet in current art. His cavaliers and ladies, his groups and cavalcades, were not only picturesque in themselves and realized with remarkable vividness and vitality, but they were presented in picturesque incidents and surroundings. The painter is a native of Uzès, in the Garde, and was born in 1840. He had begun the study of art at the *Ecole des Beaux Arts* at Lyons, and settled in Paris long before his début at the Salon. An immediate favor followed the warm critical reception of his first works, and he entered upon a career of success which years have only added to, and which has made his name familiar throughout the civilized world.

## FRANÇOIS PIETER TER MEULEN

Born at Bodegraven, Meulen became a pupil of Van de Sande-Bakhuyzen the elder. He works at The Hague, devoting himself to landscape, often with flocks and figures introduced. They are painted "loosely," with charming suggestion of atmosphere and light, and at times have a fresh and tender tone more than a little reminiscent of Mauve. His "Guardian of the Flock" was one of the most agreeable pictures in the Dutch gallery at the recent Universal Exposition.

Born in Holland, 1860. One of the rising young artists of Holland. He is working for art's sake. All subjects are handled by him with tenderness and feeling. The Museum of The Hague possesses a very fine canvas by him, as also does the Pinakothek of Munich. He has already received honors at various exhibitions.

## CONSTANT TROYON

Born at Sèvres in 1810. He worked for a while painting porcelain in the manufactory at Sèvres, at the same time with Diaz and Dupré, and, like them, soon determined to devote himself to landscape art. He studied under Riocreux at Paris, and first exhibited at the Salon in 1833. Up to the time of his visit to Holland, in 1847, he painted landscapes exclusively, and became well known in this branch of art. His studies in the Netherlands apparently changed his purpose thoroughly, and from that time on he made his landscapes subordinate to his cattle. His "Oxen Going to Work," now in the Louvre, was painted in 1855, and represents him in the apogee of his career. He was a legitimate successor of Brascassat, but his art has no rival in its grandeur of simplicity, virility and serenity. "While Troyon excelled in paint-

ing a variety of animals, as dogs, sheep, and even barnyard fowls, still it was as a painter of cattle that he reached his greatest height. Nor was it merely their outward forms that he portrayed. He had a realizing sense of their character, their habits, their life, as the willing servants of man. To us, those heavy-yoked oxen, with bent necks and measured tread, dragging the plough along the furrows, are living, breathing creatures; and those great awkward cows lazily resting their heavy bodies on the ground, and contentedly chewing their cud, are absolutely so alive and real that an expert could tell at a glance how much they weigh; and the spectator almost fears that a near approach might bring them slowly to their feet, and they would walk out of the canvas. In a word, 'His cattle have the heavy step, the philosophical indolence, the calm resignation, the vagueness of look, which are the characteristics of their race.'” He received medals at the Salon in 1838, 1840, 1846, 1848 and 1855, and was made Chevalier of the Legion of Honor in 1849. Troyon died in Paris, 1865.

#### SIR ANTHONY VAN DYCK

Born of a good family at Antwerp, 1599, the seventh child of twelve. His father was a silk merchant, his mother skilful as a

flower painter and embroiderer. When ten years old he was apprenticed to Hendrik van Balen, and in 1615 entered the Academy of Rubens, remaining five years as pupil and assistant. The master procured him an introduction to James I, whose portrait he painted at Windsor, and assisted him to visit Italy. Here he painted the portrait of Cardinal Bentivoglio, now in the Pitti Gallery. After five years' stay he returned to Antwerp, and again Rubens helped him to favor. He paid an unsuccessful visit to England in 1627, and for three years lived in Antwerp and Brussels, painting religious pictures and portraits and etching the portraits of painters. In 1632 he accepted the invitation of Charles I, painted portraits of the king, queen and royal family now at Windsor, was knighted and appointed Court painter. He lived in sumptuous style at Eltham, and in the winter at Blackfriars. Here he died in 1641, and was buried in the old Cathedral of St. Paul, near the tomb of John of Gaunt.

The ease with which he overcame the first difficulties of painting showed his natural aptitude for his profession. His landscapes faithfully depict the scenes of Holland, and often with much sentiment. He is also an animal painter, his well-drawn and expressive lions and tigers having given him a reputation in a field heretofore occupied by few artists.

### RICHARD WILSON, R.A.

Son of the parson of Pinegas, Montgomeryshire, where he was born in 1714, Wilson's taste for drawing attracted the attention of Sir George Wynn, who introduced him to a portrait-painter in London named Wright. In the same branch of art he contrived to make a living until 1749, when he visited Italy; and by the advice of Zuccarelli devoted himself to landscape. After six years' stay in Italy he returned home to find Zuccarelli worshipped and himself neglected. In 1760, however, his "Niobe" made a great impression, and at the foundation of the Academy in 1768 he was one of the thirty-six original members. His struggle with poverty was slightly alleviated by his appointment as Librarian of the Academy, but it was not till he received a legacy in 1780 that he was able to return to a pleasant home in Llanberris, where he died two years later. It has been reserved for posterity to hail him as one of the great masters of landscape.

<i>TIVOLI</i>	83

### ALEXANDER H. WYANT, N.A.

The Adirondacks was the school in which Alexander Wyant found his art. He was a tolerable painter when he started from his home in Ohio for study in Düsseldorf, and there, also, must have added something to his craftsmanship. But it was face to face with nature, as far removed as possible from conventions of the artistic workshop, or of any other kind, that he learned the secret of expression. Nature had much to say to him and he to her, and little by little he found the means to record their com-

munings. So far as the world is concerned, the life of a true landscape artist, like that of a happy nation, has little history. It is recorded in his works.

He was a National Academician, a member of the Society of American Artists, one of the founders of the American Water Color Society, and a contributor to all the exhibitions. So were other painters, much less memorable. These facts are merely milestones in his life. For the life itself—what it meant to him and the use he made of it—one must search his works. In these one finds the qualities of poetry; not of the dramatic, kindling style, but tender, alluring and infinitely delicate in expression. And withal, there is strength, only it is held in firm reserve. He was fond of gray and sombre effects, but could be sunny and buoyant when the mood was on him—in a manner most spontaneous and sympathetic. Born, 1836; died, 1892.

#### ROBERT WYLLIE

Born in the Isle of Man, 1839. Died in Brittany, 1877. Brought to America when a child. Pupil of the Pennsylvania Academy, Philadelphia, the directors of which sent him in 1863 to study in France. Medal at Paris, 1872.

To Robert Wylie is due the discovery and development of Brittany as a mine of artistic material. He it was who first settled to study and paint at Pont Aven, where, now that he is dead, has sprung up one of the most extensive permanent art colonies in Europe. Brittany affords material for the painter of figures of cattle, of landscape, and of the sea. Its picturesqueness is endless, and its variety of pictorial wealth inexhaustible. The people in particular, preserving, as they do, the manners and costumes of the past, and being but lightly modernized in spirit, furnish the artist with abundant material. It was among them that Wylie found the successes which made him famous.

THE SAND CART

The last light hovers pale along the horizon, and the scene is wrapt in gathering darkness, except where a faint reflection shows on a pool of water in the sandy foreground. A two-wheeled cart drawn by a brown and white ox is moving across toward the right. As the driver walks beside it, his head and shoulders appear above the animal.

At the bottom of the hill, upon the right, two men are busy with a cart, to which a brown horse is harnessed, while a white one, loosed from the traces, stands facing it. Coming round the foot of the hill, on the left, appears a man in charge of three donkeys. Beyond them lies a pool of blue water, on the edge of which a donkey, ridden by a man in a white shirt, is drinking. On the left of the middle distance rises an eminence, upon which a white house shows among the trees, two of the latter being poplars. Another white house dots the plain which stretches back to the horizon. Shaggy dark clouds drive across the sky, which, however, grows lighter toward the right and shows a glimpse of blue.

SHEEP COMING OUT OF THE FOREST

Except for a patch of white and pale blue sky in the left top corner, the back of the picture is filled in with pine trees, between the trunks of which appear vertical slits of light. The sheep are streaming out from under the trees on to the pale sandy-colored grass, the light falling on their backs while their sides are in shadow. “Sheep Coming Out of the Forest,” by Anton Mauve, is another fine example of Dutch art. Mauve must have loved sheep; he paints them with such feeling. He seems to have known all their ways and to have delighted to portray them shyly huddling together, confidently following their leaders or on the roadside. This picture was the one for which the artist received his medal in the Salon of 1887. At the same time he exhibited a much larger and some thought a more important picture, which is now owned by Mr. Joseph Jefferson. Many persons are under the impression that the latter picture received the medal. Mr. Richard N. Brooke, the Washington artist, informs me that when he was in Larens in 1890 Mme. Mauve assured him that it was the smaller picture, in the Salon of 1887,

which won the medal. To assure him that she was not mistaken she offered to conduct Mr. Brooke to the spot itself from which the picture was painted to which she referred. This she did, and Mr. Brooke saw before him the exact background of Mr. Waggaman's picture. As Mme. Mauve was with her husband when he painted both pictures and when he received his medal, it is not probable that she was mistaken in the matter.—L. E. To MR. WAGGAMAN, Washington, D. C.

*Dear Sir:* It was a great pleasure for me to know that one of my pictures of the Chicago exhibition [was] owned by you. I did not know which it was, but I asked Mrs. Mesday; it was "A Frugal Meal." I have given myself much trouble for that picture, I have worked a long time at it, and I have studied a long time the characters in their poorly domestic life, and I think I have succeeded in my efforts.

The other is, besides the great force of colour, the subject of a mother by

the cradle of her child; the child is sleeping and she makes use of this opportunity to mend the clothes.

Your drawing is a real piece of poetry, the old woman is worn out, only the shadow of life remains; all is old, the walls, the chimney, the floor, that all speaks for passed sufferings. To make the contrast, your other drawing is sunshine; the happy family is sitting in the room where a sunbeam smiles on the conscientious little figures.

This is a short description of four of the most remarkable pictures made by,

Yours very truly,

VIRGIN AND CHILD AND DONORS  
A TRIPTYCH

Centre Panel: The Virgin sits enthroned, with the Child upon her lap, her right hand supporting its nude body, and the left held under its feet, which are crossed, the one over the other. Around the neck of her blue robe is a narrow border of gold lace, edged with little pearls, and studded with larger pearls, alternating with gold circular ornaments, each of which has a concave quatrefoil, enamelled red. But only a small part of the robe is visible behind the Child's body, for a white veil covers the Virgin's head, and over this is a rose-colored mantle that descends from her head, concealing the arms and the rest of her figure in its ample folds. Its edges are decorated with a border similar to the one upon the robe, except that the quatrefoils are enamelled blue, and there is an addition of delicate needlework in gold thread upon the fabric of the cloak.

The Child, seated upon a white cloth, holds the first finger of its left hand to its mouth, while the right arm hangs straight down. Upon the floor, on the right, stands a blue and white vase holding a spray of lilies.

Behind the figures hangs a dossal, suspended from two tree trunks, of which the right-hand one only is visible. But their foliage spreads above the Virgin's head and frames in a distant landscape, showing in tones of delicate gray a river, winding past a series of rocky hills, one of which is crowned with a tower and spire. The dossal itself is of dark green damask silk, with gold floral designs, among them of snowdrops and primroses, repeated in regular succession. It is painted with a mi-

nuteness of realism that represents the weave of the fabric. The landscape and dorsal are continued through the side panels.

**Left Panel:** A little hill in the landscape with two spires upon it rises just above the head of the donor, as he kneels with his hands together before the book upon the prayer desk. By a comparison of the face with that of a panel by Memline in the Brussels Museum, it is clear that the donor in this votive picture is the celebrated Burgomaster, William Morecl. Over a tunic of peacock blue bordered with brown fur, he wears a drab-gray coat, with brown fur upon the broad collar and down the inner edges of the garment. A gold ring encircles the first finger of his right hand.

**Right Panel:** The daughter of the donor kneels before her prayer desk holding an open book, a gold ring showing on the first finger of her left hand. Upon her head, projecting from the back of it, is a stiff cap, cylindrical in shape, covered with damask silk, the pattern of which is composed of alternate rows of gold and white diamond forms. Over it floats a white transparent veil. Gold needlework decorates the neck of her chemisette, over which is a rose bodice, while over this again is a blue gown cut very low in front. It has a border of drab material, which also appears as the lining of the pendulous sleeves, that are turned back to form a broad cuff.

The antique frame, surmounted by a heavy cornice with circular rise in the centre, under which the valves of the side panels fit when closed, is painted bluish black with lines of gilding, faint with age.

The shadows of evening are creeping over the ground, in contrast with which the sky is glaring. Roofed over with dull, greenish-gray clouds, its middle part is streaked with layers of blue and white, dark underneath, where a warm, creamy light stretches across the horizon. Strongly silhouetted against it is a dark clump of trees, from which a road descends and mounts upon the right of the scene. Here, among a retinue of foot-soldiers, appears Saul, seated on a white horse, wearing a dull red mantle, stretching out his arm toward the figure of David in the shadow of the left side of the picture. The two are separated by a tract of broken, slabby rocks, with fissures, impassable to a horseman. The youth, with one foot advanced, extends his arms in mocking invitation. THE VIRGIN, INFANT CHRIST AND  
ANGELS

Clothed in a dark blue raiment, the Virgin sits enthroned, the Infant Christ standing on her lap, nude except for the white drapery which the mother's hand holds as it supports His body. His head is turned toward an angel on the left, who, clad in a robe of geranium red, is playing a lute. On the right of the group another angel, in brownish plum-colored drapery, plays upon a violin, held at the level of her waist. In the clouds at the foot of the picture appears the Serpent, breathing out fire. From the Infant's head pours upward a golden radiance, which surrounds the head of the Virgin and is enclosed within the circle of her floating veil.

*Height, 64 inches; width, 52 inches.*

1170  
The above-described painting was obtained by Mr. Waggaman from Mr. V. G. Fischer of Washington, who has furnished the following information relating to the picture:

"As to the Van Dyck which I bought myself in London, I give you this information.

"The painting was sold in London in 1804, in the Bryan Sale, by Lord Exeter, for £375. It again appeared in a sale in 1863 in the collection of J. Allan, and was bought by a dealer named Cockburn, who sold it to Lady Bloomfield, and was again sold four or five years ago at Robinson Fisher's, London."

This is said to be the finished study for the master's picture in the Accademia di San Lucea, at Rome. The latter varies from the present picture in being a proportionately wider composition, and yet the left arm of the angel, which plays the lute, is excluded, the canvas terminating in a line that passes through the hand, the fingers of which are alone exposed. The head also of the Virgin in the San Lucea picture is still more inclined to the right, and the direction of the eyes is toward the angel with the violin. The latter, moreover, holds the instrument to her shoulder, and the right hand, balancing the bow, is shown.

HOPE

Study for window, New College Chapel, Oxford.

This is a study for the lights of Sir Joshua's famous window representing the Seven Virtues. The figure of Hope is standing with her back to the spectator, beside the base of a column, pointing upward with her left hand toward the shaft. Her right hand embraces a child, whose head appears under her arm, while he holds his hands together, as if in prayer. To the right is another boy, with his face turned toward the front, holding aloft a torch, which lights the group with a rosy golden glow. Above it is a dark blue sky.

*Height, 84 inches; width, 36 inches.*

Purchased by Lord Normanton of Lady Thomond, the niece of Sir Joshua, in 1821. Afterwards in Lord Northbrook's collection, and sold by Lord Northbrook to Messrs. Laurie & Co., Bond Street, and then to Mr. Angus at Montreal, from whom it was secured by Mr. T. J. Blakeslee of New York and sold to Mr. Waggaman. The painting was inherited by Mary Palmer, niece of Sir Joshua (afterwards Lady Thomond).

*When exhibited at a Loan Exhibition in Montreal some years ago, the above example was described as follows:*

“Another Reynolds comes from Mr. Angus. It is an upright panel, one of three decorative designs made by Sir Joshua for stained-glass windows for the chapel of New College, Oxford. In 1773 the college had conferred on him

the honorary degree of D. C. L. In 1779 he painted three compositions representing 'Faith,' 'Hope' and 'Charity,' respectively, for the chapel windows, as well as a large picture of 'The Nativity' for the same purpose. The latter was bought by the Duke of Rutland for 1,200 guineas, and was burnt in the fire which destroyed Belvoir Castle. The other three were bought by Lady Thomond, and purchased at the sale of her pictures by the Earl of Northampton for 2,550 guineas. This special panel is the 'Hope.' It is an upright, deep in tone and rich in color, with a graceful female figure for which Mrs. Richard Brinsley Sheridan, 'the beautiful Mrs. Linley,' posed."

WARMING DOLLY'S HANDS

Before a cheerful fireplace, on the right of the picture, furnished with high globe-topped andirons, a little girl is sitting with her feet on the raised hearthstone. As she leans back in her chair, sideways to the spectator, she holds her doll toward the fire. To her left, close up to the side of the fireplace, a smaller child, with a bib round her neck, stoops forward to warm her hands, at the same time turning her head toward the doll with a smile. On the floor to the left of the group lies a copy of the newspaper "Il Secolo."

On the right of the picture, lurking in the shadow of an open-air stall, is a man holding a club threateningly. Round the corner, in the street, is the proprietor, who has caught up a big flounder, while he kicks out with his left foot at a cat, which is disappearing with a leap into the stall, after overturning a basket of fish and vegetables. To the right a dog is escaping, with his tail between his legs. Behind the group extends a narrow street, terminating with a tower.

HEAD OF A WOMAN

The picture shows the head and bust of a lady; the bust being full to the front, the head turned toward the left. Over her black hair lies a soft brown velvet bonnet. She wears a lace fichu, low down on the shoulders and bosom, fastened in front with a bunch of flowers. A glimpse of a lavender silk gown appears on the right.

TRIUMPH OF CHRIST

Represented as if in a masque, Christ and the Virgin are being drawn along in a triumphal car by dignitaries and emblematic figures. Pulling at the head of the cortège, on the right, are a bull, a lion, eagle and winged man, emblematic, respectively, of the four evangelists, SS. Matthew, Mark, Luke, and John. On the side of the car, facing the spectator, the front wheel is being propelled by a pope, crowned with the tiara and vested in a cope of cloth of gold, the hind wheel by a cardinal. Beside the corresponding wheels, on the farther side, appear the head and shoulders, respectively, of a bishop and a soldier. The latter, possibly Longinus, who pierced the sacred side, turns his head adoringly to the Christ, who, clad in a white cloak and rose-colored robe, holds an orb in His left hand, and raises the right in blessing. Facing the Christ on a lower seat is the Virgin. Clothed in light blue, with a white veil over head and shoulders, she holds her hands in prayer.

NOTRE DAME UNIVERSITY,  
NOTRE DAME, INDIANA,  
Jan. 27, 1896.

*My dear Mr. Waggaman:* In the notes to Longfellow's translation of Dante's *Purgatorio* I found a description of a painting, or rather of a window in the Church of Notre Dame de Brou, which seems to be the original of your "Triumph of Christ." Longfellow says (notes to Canto XXIX) that in Didron's *Christian Iconography* (translated by Millington) this account is given: "In the centre of all rises the Hero of the Triumph, Jesus Christ, who is seated in an open car with four wheels. He alone is adorned with a nimbus formed of rays, departing from each point of the head, and which illumines everything

around. . . . His face resembles that drawn by Raphael and the masters of the period of Renaissance . . . it is serious and gentle. In the centre of the chariot is placed a starry globe traversed by the ecliptic, on which the twelve signs of the zodiac are brilliantly figured." (I do not remember whether this globe is shown in your picture or not.) "This globe is symbolic of the world, and forms a throne for Christ; the Son of God is seated on its summit. The car is placed upon four wheels, and drawn by the four attributes or symbols of the Evangelists. The angel of St. Matthew, and the eagle of St. John are of celestial whiteness; the lion of St. Mark, and the ox of St. Luke, are of a reddish yellow. . . . The eagle and the angel do, in fact, fly; while the lion and the ox walk. Yet upon the painted window all the four have wings. A rein of silver, passing round the neck of each of the four symbols, is attached to the pole of the chariot. The Church, represented by the . . . four chief Fathers, St. Gregory, St. Jerome, St. Ambrose, and St. Augustine, urge on the car." As far as I can remember this is a close description of your picture with perhaps a few changes in minor details. The picture at Brou seems to be a central picture on a large stained-glass window. Brou is a small town in the Department of Eure et Loir, about sixty miles southwest of Paris.

Always very sincerely yours,  
(Signed) AUSTIN O'MALLEY.

VENICE

Water Color

In the foreground floats a barge with high-peaked stem and pointed stern. The space between its two masts is occupied by an arched roof, over part of which hangs a red and yellow striped awning. These colors are reflected in the water, which stretches back to a distant view, on the right of the horizon, of the Campanile, rising above the group of adjacent palaces.

GOSSIP BY THE RIVERSIDE

On the right of the scene, a girl, who is wheeling a barrow filled with laundry, has halted. By her side is another girl, carrying a zinc bucket. They are turning to talk to a man who sits, fishing, in a punt moored close to the rushy edge of the water on the left. The river from this point extends back, until it winds round underneath some low hills and disappears on the left behind a group of houses that are interspersed with poplars. On the river's bank beyond the fisherman some women are washing linen. The sky overhead is broken up into gray, rolling clouds.

BESIDE THE BAY OF NAPLES

Water Color

In the centre of the foreground of sand, gleaming white in the sunshine, three boats have been beached. Fishermen are busy unloading or lolling round them, while a white and a brown donkey stand waiting for their burdens. Nearer the front a man squats on the sand, attending to a seine net. The strip of blue sea which stretches across the picture beyond the group is dotted with two specks of sails and a distant steamer. The sky, passing from white to blue, quivering with luminous warmth, is carried high above the horizon.

MEETING THE BOAT

The fishing smack lies grounded in the shallow water at the back, keeling over, so that her two masts point inland. Coming from her across the sand is a man in the middle distance with a burden on his back. On the right of the foreground, the skipper is shaking the hand of an old man, at whose side stands a woman with a baby.

VIEW OF WINDSOR CASTLE

The castle, with its prominent features of Cæsar's tower and St. George's chapel, rises in the distance against the sky. It has been viewed from a point near that which Turner selected: in the meadows adjoining a little tributary that flows into the Thames. In the foreground is a stretch of grass, bordering upon the stream, which runs diagonally across the picture.

949—THE FAMOUS "OSTRICH-EGG" VASE

Described by Captain Brinkley in the Catalogue of his Collection, which was sold in New York, May 9, 1903, as follows:

(2606) Large vase of soft-paste Fên-Ting ware (technically known as the Ostrich-Egg Vase), made to imitate a bronze. The color is light buff; the glaze shagreened in the orange-skin style. Round the body is a belt of arabesque in relief, and round the shoulder a belt of knobs. The paste is soft. This vase must be referred to the close of the Sung Dynasty when the manufacture of the celebrated Ting-yao had been carried to a point of great excellence. Blackwood stand.

*Height, 18 inches; circumference, 29½ inches.*

NOTE BY CAPTAIN F. BRINKLEY, R.A.—This vase is absolutely unique. I have never seen another like it, and I consider it a most remarkable specimen of early period ware. You will not find another like it, I am confident, in any American collection. I bought it many years ago in Shanghai. Dr. Hirth, who has written so much about celadon, had been trying to buy it, but the price was too much for him.

ANTIQUE JAPANESE POTTERY

### NOTE

THE interesting information relating to Japanese Pottery, used in connection with the foregoing descriptive matter, has been copied from the "Catalogue of the Morse Collection of Japanese Pottery in the Museum of Fine Arts, Boston," and has been used by permission of the author, Professor E. S. Morse, who purchased many of the specimens for Mr. Waggaman, and has done much work in identifying the specimens in his collection.

### ANTIQUÉ JAPANESE POTTERY

#### PROVINCE OF AWAJI

But few records are obtainable concerning the pottery of this province. In the last twenty years an enormous amount of pottery with clear green and yellow glazes undecorated has been made for the foreign market. The province can preserve with pride the memory of Mimpei, one of the great potters of Japan.

MIMPEI.—In 1830 Shuhei, the Kyōtō potter, went to Igano village, and there became acquainted with a doctor named Mimpei, who, interested in the potter's art, studied with Shuhei, and travelled about Awaji in search of clays. In this experience Mimpei became a potter. His work shows taste and originality, though the Kyōtō influence is strongly marked. Examples of his work are extremely rare.

#### 1366—BOWL

(1350) Awaji porcelain. Flambé glaze in brilliant green, purple and yellow on white. Made by Kaju Mimpei at Igano, province of Awaji. Mark, small square characters in blue. 1830.

*Height, 2½ inches; width, 5¾ inches.*

#### 1367—TEA BOWL

(1351) Awaji faïence of creamy-white texture. Over the glaze are flowers and plants delicately painted in green, black, gold, red, pink and purple. Made by Kaju Mimpei at Igano, island and province of Awaji. Mark, Mimpei, impressed. 1830.

*Height, 3 inches; width, 4 inches.*

1368—TEA POT

(1352) Awaji faïence of fine yellowish-gray clay. Creamy-white, crackled glaze, with decoration of flowers painted in gold and coral red over the glaze. Made at Igano, island of Awaji. Mark, Mimpei, painted in red. 1830.

*Height, 4 inches.*

1369—TEA BOWL

(3007) Awaji faïence. Fine cream-white glaze, with an over-decoration of prawn in bright red with touches of gold. Mimpei, impressed.

*Diameter, 4½ inches.*

### PROVINCE OF BIZEN

This province produces in its hard, reddish-brown pottery one of the most characteristic types in Japan. Once recognized, it can rarely be confounded with the pottery of other provinces. There are many varieties, yet a certain gradation can be seen from the earlier forms, resembling in color an over-burned brick, to the slaty-blue, and through various shades of red to specimens resembling bronze. The evolution of these varieties from a primitive form can be easily traced. The old Bizen, going back six hundred years or more, is rough and unsightly, being rudely potted and imperfectly stoved. From this rude type, with better wheels and ovens, the work gradually improved.

IMBE.—The name Imbe, as applied to pottery, is derived from the name of the village in which it is made. Pieces recognized under this name are made of a hard, dark gray clay, with a dark brick-red or brownish-red exterior, usually with fawn-colored spots of overglaze, and in rarer cases completely covered with this overglaze; in other instances it may resemble dark bronze, or even appear quite black with glistening and roughened surface. Such are a few of the varying features of this unique pottery. Nearly every piece bears a mark of some kind, usually impressed. These marks are often in the form of circles, squares and lozenges, within which are the characters for 1, 2, 3, 10, etc., and hence called maru ichi, maru ni, maru san, maru ju, etc. Pieces almost absolutely identical will often bear different marks. These represent the work of individual potters who baked in a communal oven. Ninagawa, in a visit to Bizen, got from an old antiquarian a list of these marks purporting to represent successive generations of potters. As I have had access to other lists of marks, equally authoritative, with successive generations indicated, and as there is not the slightest accordance between any of them, either as to name or date, they have all been rejected. A few of the marks are always associated with the best work. The earliest forms are rough and unsightly. The height of the art was evidently attained in the eighteenth century; at least specimens assigned to that period are much finer than subsequent work. Those of the

best period resemble bronze, or have a rich fawn-colored glaze with a surface like polished wood.

1370—TEA JAR

#### PROVINCE OF BUZEN

Though little pottery is made in Buzen to-day, yet in past times its first important advance, like that of Satsuma, Higo and other provinces, dates from the advent of Korean potters in the latter years of the sixteenth century. Since that time potteries have been started in Kalaru and other places.

AGANO.—The pottery known as Agano takes its name from the town in which it originated. Kijō, a Korean potter brought from Korea with Hideyoshi's army, built an oven in Agano, and began making pottery with coarse clay and black glaze after Korean models. Later a reddish clay was used and a thick purplish-brown glaze with a surface which the Japanese in their descriptions likened to a melon. No signature is known. This early oven became long since extinct.

Within sixth years an oven was started in Agano, where large bowls of extraordinary lightness were made of a light yellow clay and transparent glaze. Other bowls were of a harder clay and white glaze. In some is seen an overglaze of robin's-egg-blue running from the rim or radiating inside from the

*Height, 20 inches.*

PROVINCE OF CHIKUGO

Scant information is available concerning the pottery of this province. Brief references are made to it by Ninagawa, and allusions to it are found in the book *Tōkikō*. The enormous quantities of blue and white porcelain made in the adjacent province of Hizen doubtless overshadowed the efforts of the Chikugo potters. A white stone pottery in the form of incense-boxes, with moulded diaper and light blue glaze, is said to have been made within recent years in the town of Kurume. A single piece in the collection is believed to be Kurume, but the evidence is conflicting, and it is therefore included among the doubtful objects.

YANAGAWA.—A number of bowls in the collection, suggesting Karatsu, and bearing the impressed mark Yanagawa, were made in the town of that name in the early part of this century. Mr. Takewara, a native of the province, told me that the oven was established by order of Prince Yorimori Arima. A potter was employed who first learned the art from one of the Kyōtō Raku potters.

1414—INCENSE BOX

PROVINCE OF CHIKUZEN

In the latter part of the sixteenth century two potters from Korea were brought to Chikuzen, and erected an oven in Takatori village. These potters were known as Hachizō and Shinkuro. They were afterwards assisted by a skilful potter, named Igarashi Jizayemon, who is said to have resigned his position in Karatsu, Hizen, and come to Chikuzen as a wanderer. According to Ninagawa, Hachizō with his son journeyed to Kyōto, or more accurately to Fushimi, and there came under the influence of the great master of the tea-ceremony, Kōbōri Eushū. By his advice the Chikuzen potters carried back with them either the veritable objects or the suggestions of the kinds of pottery and forms of utensils most desirable in the tea-ceremony. Thus it was that the early productions of Takatori took so high a rank. Records show that the descendants of these potters moved from place to place.

There are many forms of pottery, with many marks, recognized as Takatori; but little information, however, is at hand to separate the material into distinct ovens and makers. Many of the marks are evidently for the same purpose as those of Bizen, namely, single characters or conventional marks of individual potters who baked in some communal oven.

Typical Takatori is a most characteristic pottery. Its fine clay, rich brown glaze and delicious overglaze readily distinguish it from other kinds of pottery. The tea-jars are particularly refined and delicate, though these objects have been successfully paralleled in other provinces, notably in Zeze, Ōmi and in Agano, Buzen. In late years there have been produced large numbers of pieces, among which may be found mythological figures made for the export trade. Some clever modelling is seen at times, but their recent issue may be recognized at a glance.

1419—TEA JAR.

(1394) Takatori stoneware. Globular shaped, covered with brown metallic glaze, with white glaze round neck. Made at Takatori, province of Chikuzen. Thread mark. 1800.

PROVINCE OF HARIMA

The pottery of this province is most characteristic. Surrounded as Harima is by provinces famous for their pottery, such as Bizen on the south, Tamba on the west, Settsu on the north, Yamashiro but a few leagues away and Awajo just off the coast, it is somewhat remarkable that up to within a few years its pottery, with the exception of that of Tōzan, has remained unaffected. Indeed,

one has to go four hundred miles north to find the nearest approach to it. The pieces are readily identified, as most of the work bears a mark of some kind, though sometimes two marks are combined on one piece in a puzzling manner.

SUMA.—A modest gray or light brown pottery in the form of bowls, cups, etc., bearing the mark of Suma, was made in a village of that name about five miles from Akashi. Examples are not common.

1462—SAKE CUP

(1414) Suma stoneware of coarse gray clay. Covered with a crackled gray glaze, and decorated with two bands of brown. Made at Suma, province of Harima. Suma, impressed. 1840.

*Height, 1½ inches.*

MAIKO.—The origin of this pottery dates from the middle of the last century. The clay is usually grayish in color, the glaze olive-brown or gray mottled with brown dots. Many of the pieces are modelled by hand and are in the form of dishes with crenulated edges, leaf-like forms of irregular contour, etc. The pottery is unique in many ways. Within recent years there has been made some pottery after Awata style, which is, however, without merit.

1464—LEAF-SHAPED TRAY

(1413) Maiko stoneware. Yellowish-gray glaze, flecked with brown splashes of gray-green. Made at Maiko, province of Harima. Maiko, impressed. 1840.

*Height, 1¼ inches.*

1465—SQUARE-SHAPED BOWL

(1411) Maiko faïence. Covered with splashes of yellow, purple, green, and fawn-color enamels. Made at Maiko, province of Harima. Totoken, impressed. 1840.

1467—SAKE BOTTLE

(1415) Maiko stoneware. Indented surface covered with a mottled brown and splash glaze. Made at Maiko, province of Harima. 1840.

*Height, 7 inches.*

1468—OVAL TRAY

(1417) Maiko stoneware of gray clay. Covered with a mottled brown glaze with a pine branch modelled in low relief. Made at Maiko, province of Harima. Maiko, impressed. 1800.

*Diameter, 8 inches.*

AKASHI.—Akashi pottery is said to have been first made by Seisuke, a pupil of Ninsei. The oldest specimens in the collection date back over two hundred years. The early work is superior in every way to the more recent products, and bears evidences of a skilful hand.

1469—TEA BOWL

(1416) Akashi stoneware. Fine gray clay, creamy-white crackled glaze, chrysanthemums and waves in gold, blue, and green enamels over the glaze. Inner surface of light brown crackle. Made at Akashi, province of Harima. Akashi stamped. 1700.

*Diameter, 5 inches.*

1470—CAKE DISH

(1419) Akashi stoneware. Gray glaze with pronounced crackle, slight decoration of bamboo in brown. Made at Akashi, province of Harima. Akashi, impressed. 1800.

*Diameter, 6½ inches.*

1471—SAKE BOTTLE

(1412) Quadrilateral. Akashi stoneware of dark gray texture. Covered with a yellow glaze and decoration of figures, flowers and diaper patterns, modelled in low relief. Made at Akashi, province of Harima. 1780.

*Height, 7 inches.*

PROVINCE OF HIGO

The pottery of Higo, as we know it to-day through the exquisite productions of Koda, began with the introduction of Korean potters, after the Japanese invasion of Korea in the last years of the sixteenth century. Before this, tea utensils after Seto models were probably made. Antedating these by untold centuries, however, the platycemic savage had left the evidences of his rude skill in the shell heaps. Hosakawa Sansai brought back from Korea potters who were first settled in Agano, Buzen. Afterwards they were brought to Koda, near Yatsushiro, and here they began the making of pottery, which has continued to the present day. At the outset the work was rude. At what date

the Mishima type of decoration began to be made it is difficult to say. A Japanese authority of 1700 says, "Nothing is baked in Higo but tea-jars, and these are made in great quantities." But little reliance can be placed on this statement, as he was a Chajin, and consequently ignored the pottery of the people.

1472—INCENSE BOX

(1424) Yatsushiro stoneware. Yellowish-brown glaze, with radiating lines in white inlaid under the glaze. Made at Kōda, province of Higo. 1850.

PROVINCE OF HIZEN

"The keramic products of Hizen are known the world over through its famous porcelain. After China, its 'blue and white' and 'polychrome' stand preëminent. During the early days of the Dutch commerce with Japan, the porcelain ovens near Nagasaki turned out large numbers of huge vases and plaques made expressly for the Dutch trade. The famous collection at Dresden is made up almost exclusively of these big vases in polychrome. When one considers the beautiful work, made in accordance with the refined taste of the Japanese, which the Dutch merchants might have obtained, the contemplation of the Dresden collection is simply disheartening."

BOGASAKI.—An oven was established in the little village of Bogasaki, near Nagasaki, in 1830. The potter's name was Hidekichi Kamachi. He was a poet as well as a potter, and on many of his pieces are incised or written poetic inscriptions. His pieces were made for the tea-lover, and though somewhat rough show considerable taste and skill. The work continued with numerous interruptions for ten years. Some of his unsigned work has been variously identified by Japanese experts as Shigaraki, Sōma, and even Izumo.

1486—SAUCER

(1437) Bōgasaki faïence of reddish-brown texture. Decoration of a dragon inlaid in white under the glaze. Made at Bōgasaki, Nagasaki, province of Hizen. Bōgasaki, incised. 1840.

*Diameter, 4 inches.*

1487—*FAN-SHAPED TRAY*

(1438) Bōgasaki faïence of soft buff texture. Covered with a gray glaze, decorated with Chinese characters reading: "The hills in the front, and the long harbor at the foot, give pleasure whether one looks up or down." Made at Bōgasaki, Nagasaki, province of Hizen. Bōgasaki, impressed. 1840.

1488—*WATER POT*

(1439) Bōgasaki stoneware. Hard reddish texture, unglazed, Greek fret border in pale blue enamel. Made at Bōgasaki, province of Hizen. Bōgasaki Tsukuru, incised. 1840.

*Height, 9 inches.*

KAMEYAMA.—A hard stone pottery bearing the written mark Kameyama was made at Irahayashi Kuchi, Nagasaki, in the first half of the century. Porcelain was also made, and though many of the pieces were in good taste, the work did not attain special excellence. In 1830, or thereabouts, clay was imported from China, and many forms were made. Typical Kameyama pottery has a hard, fine reddish clay, and an even, pale bluish-gray glaze, with decoration of flowers, diapers, as well as stanzas of poetry, in a darker blue.

1489—*BRUSH REST*

(1443) Kameyama porcelain. Floral scrolls and Greek fret borders in blue under the glaze. Made at Kameyama, Nagasaki, province of Hizen. 1840.

1490—*MELON-SHAPED BOWL*

*Height, 6½ inches.*

1491—*SAKE DECANTER*

(1440) Kameyama stoneware of dark texture. Pale gray glaze, and decoration of storks in blue and white enamel. Made at Kameyama, Nagasaki, province of Hizen. Mark, written in brown under the glaze, Kameyama Nite Kitsuroku Tsukuru (made by Kitsuroku, at Kameyama). 1850.

*Height, 7 inches.*

1492—WRITERS' TABLE SCREEN

(1442) Kameyama porcelain of thick sonorous texture. Landscape and mountain scenery in under-glaze blue and engraved fret border. Made at Kameyama, Nagasaki, province of Hizen. 1840.

*Height, 8 inches.*

ŪTSUTSUGAWA.—This village is near Yagami, and not far from Nagasaki. In the sixteenth century a Korean potter worked here for a while. In the early part of the seventeenth century the oven was again started by Tanaka and Shigodomi, and continued until the eighteenth century, when work again ceased. Within recent years a peculiar pottery has been made of fine red clay, chocolate glaze and white over-glaze applied with wave motions of the brush, and slight decoration in color.

1493—BOWL

(1447) Utsutsugawa stoneware of fine reddish texture. Coated with a brown glaze intermixed with white. Made at Utsutsugawa, province of Hizen. 1700.

1498—LARGE SAKE BOTTLE

(1444) Oviform, with tall tubular neck. Utsutsugawa stoneware of dense texture. Dark brown glaze, with brush marks in green and blue under the glaze. Made at Utsutsugawa, province of Hizen. 1650.

*Height, 22 inches.*

KARATSU.—Under this name a very wide range of hard pottery is included. This pottery is designated by different names, according to age or variety. I have found it difficult to harmonize conflicting opinions among Japanese experts, and shall avoid making further confusion by considering the entire group under the generic name of Karatsu.

In the ancient town of Karatsu pottery has been made from remote times. Records show that glazed pottery was made in Karatsu in 1200 or thereabouts. Korean potters were at work there as late as the sixteenth century. The pottery varies greatly in the color and the quality of the glaze. If decorated at all, the painting is done in black or brown, in the rudest manner; if in Mishima style, the designs are simple. Despite the hard, rough clay, which presents in many pieces a resemblance to cast iron, and the archaic appearance of the pottery, there is a certain charm about it, which increases with study. The older pieces belong to the past; they are like fossils, never again to be reproduced. The quarries from which the clay was derived are exhausted; the formulæ for the glaze are lost. Old Karatsu pottery is therefore unique. The earliest forms have a bluish-black clay and glaze. Subsequently Korean potters settled in Karatsu, and objects made by them are known as Oku Kōrai (distant Korea). The pottery resembling Korean work is known as Chosen (Korea) Karatsu. Castaways dug up from the ruins of old ovens are recognized under the name of Horidashi (dug-up) Karatsu. Those decorated with rough sketches, or rude splashes in black, are called Ye (painted) Karatsu. And those with a broad brush-mark of white are termed Hakeme (brush-marked) Karatsu. The designs, incised or impressed, and filled with clay of contrasting color, either white or black, are known under the general name of Mishima Karatsu. Certain forms of fine clay, rather delicately made, for the purpose of presenting to some Daimyō, are called Kenjo (present to superior) Karatsu. Many of these distinctions are absurd as well as useless, for they rarely indicate either special potters, ovens or periods; and at the same time the distinctions are

often so vague that native experts differ in distinguishing them, and even in defining them.

PROVINCE OF KAGA

The name of this province, like that of Satsuma, has become widely known through its faience and porcelain. The output of the Kaga ovens in furnishing pottery for the world's demand is very great. Yet just in proportion to the

effort to fill this demand is seen a corresponding deterioration in the work. One had only to compare the exhibit of Kaga potters at Chicago in 1893 with a similar exhibit in Philadelphia in 1876 to realize this deterioration. There is little variation to be seen in the pottery. One piece of the bright red and gold decorated faïence of Kaga will stand as a type for the thousands of pieces exported. The difference between this modern stuff and the original red is very striking.

KUTANI.—The pottery derives its name from the village in which it was first made. Pieces in the form of tea-bowls, tea-jars and the like were first made by Tamura Gouzayemon in the first half of the seventeenth century. His work followed Seto models, and it is possible that some of the tea-jars above catalogued were made by him. In 1650 Gotō Saijirō began the making of porcelain after his return from Hizen, to which place he had gone to learn the secrets of the art. He worked with Kakiyemon, and went so far as to marry his daughter in order the more readily to learn the mysteries of porcelain decoration. The famous artist came to Kaga at this time and made many designs for porcelain decoration. Mr. Takano, an intelligent citizen of Kaga, told me that Yoshiya Hachiroyemon, a native of Kaga, in the early part of the century, copied designs from an old book in which were pictures of famous Chinese inks. These sticks of ink had in relief pictures of dragons and other mythological creatures, and hence in old red Kutani one sees these subjects used as motives in decoration. Native authorities say that green Kutani dates back to 1680 or thereabouts, and that red Kutani began in the early years of this century with Hachiroyemon. In 1815, owing to a disastrous landslide, the ovens were removed from Kutani to the village of Yamashiro, some distance from Kutani, and here they have remained, though the product is still signed with the old mark Kutani. There are a number of other places in Kaga where red Kutani is made. It is said that the Kutani showing a cloudy or mottled red was decorated in Kaga, while the red applied evenly has been decorated in Tōkyō.

ANTIQUÉ JAPANESE POTTERY

PROVINCE OF KII

The pottery of this province is widely known abroad through the clear light blue and other colored glazes, notably the yellow, green and purple, with which the western market has been flooded. Pottery similar to this, though of poorer quality, has been made elsewhere in Japan, but the stuff originated in Wakayama. The early work had considerable merit.

KAIRAKUYEN.—At Nishihama, a little west from Wakayama, was the villa of a former Daimyō of the province. The garden of this place was known as Kairakuyen, and here, in the beginning of the century, an oven was built, and pottery was made for the tea service. Precisely what kinds were made before the advent of Zengoro Hōzen, in 1828, I have not learned. With the advent of Hōzen (the eleventh Yeiraku) it is said an improvement took place in the character of the pottery; at all events the Daimyō of Kii, in acknowledgment of the new glazes introduced by Hōzen, presented this celebrated potter with two seals, a silver and a gold one, on which were the characters Kahi Shiru and Yeiraku respectively. Whether these were impressed on pottery made in Kairakuyen, or were used after he returned to Kyōtō, I have never clearly ascertained. Specimens thus signed are placed with the family's work under Kyōtō. Authorities say that on the death of the Daimyō, in 1844, the oven was closed. I learned, however, at the place that the work continued until 1868. The pottery is also known as Oniwa (Honorable Garden), but the name Kairakuyen is retained, as all the pieces are thus signed.

1637—INCENSE BOX

(2349) Lion in repose. Kishū porcelain. Turquoise glaze. Made at Otokoyama, province of Kii. Mark, Nanki Otokoyama, in blue. 1850.

*Size, 2 x 3½ inches.*

1638—CAKE DISH

(2348) Turtle of longevity. Kishiu porcelain, covered with a white glaze and decorated in cobalt blue. Made at Otokoyama, province of Kii. Mark, Nanki Otokoyama. 1850.

*Height, 5 inches; length, 11½ inches.*

1639—OKIMONO

(2347) Genius with a rat. Kishiu porcelain. Dull celadon glaze. Made at Otokoyama, province of Kii. Mark, Nanki Otokoyama, painted, and Semba, impressed. 1850.

*Height, 6½ inches.*

1640—WATER JAR

(1736) Gourd-shaped. Kairakuyen faïence of red texture. Covered with a turquoise blue and mottled brown glaze, incised archaic designs. Made at Kairakuyen, province of Kii. 1830.

*Height, 6½ inches.*

1641—TEA JAR

(1729) Kairakuyen faïence of gray texture. Covered with a running glaze of blue and purple over gray. Made at Kairakuyen, province of Kii. 1830.

*Height, 4½ inches.*

1642—TEA BOWL

(1737) Kairakuyen faïence of fine gray texture. Thick running glaze of green, purple, blue and white. Made at Kairakuyen, province of Kii. 1830.

*Diameter, 5 inches.*

1643—CYLINDRICAL JAR

(1738) Kairakuyen porcelain. Rich purple, turquoise-blue and yellow glazes, with flowers in relief under the glaze. Made at Kairakuyen, province of Kii. 1800. Black lacquer cover.

*Diameter, 5 inches.*

1644—SAKE BOTTLE

(1730) Globular-shaped. Kairakuyen faïence of pale yellow texture. Covered with a turquoise-blue glaze, which is minutely crackled; splashes of purple round neck and at shoulder. Made at Kairakuyen, province of Kii. 1830.

*Height, 5 inches.*

1645—SAKE BOTTLE

(1728) Gourd-shaped. Kairakuyen porcelain of thin white texture. Covered with an opaque yellow glaze; vine modelled in relief and glazed in pale green. Made at Kairakuyen, province of Kii. Kairakuyen Sei, impressed. 1830.

*Height, 7 inches.*

1646—OVIFORM VASE

(1731) Kairakuyen porcelain. Fine purple and turquoise-blue running glaze, mouth rimmed with silver. Made at Kairakuyen, province of Kii. 1830.

*Height, 9½ inches.*

OTOKOYAMA.—The oven was opened in the early part of the last century. A variety of pottery was made, including blue and white porcelain. The work ceased in 1830. In 1850 an attempt was made to produce typical Kairakuyen signed with the mark Nanki Otokoyama. This work shortly after stopped. In 1870 a new company was formed, and Tanzen, of Kyōtō, was placed in charge of the work. After a year's trial, and failure, the oven was closed again. After this the old potters of Otokoyama began again, only to close shortly after loss. The sequence of the work is as follows: Blue and white, beginning of the century; Kairakuyen style, 1850; Awata-like bowls, under Tanzen, 1870.

1647—SMALL BOTTLE-SHAPED VASE

(1734) Otokoyama porcelain. Leafy scrolls in blue enamel over a metallic brown glaze. Made at Otokoyama, province of Kii. Nanki Otokoyama in blue. 1850.

*Height, ½ inches.*

1648—BOTTLE-SHAPED VASE

(1735) With tubular handles for hanging. Otokoyama porcelain. Brocade and other designs in blue under the glaze. Made at Otokoyama, province of Kii. Mark, Nanki Otokoyama, in blue. 1850.

*Height, 6 inches.*

1649—OVIIFORM VASE

(1733) Otokoyama porcelain of thin texture. Symbols, floral scrolls and various borders engraved in low relief in the paste and covered with turquoise-blue glaze on an orange yellow ground. Made at Otokoyama, province of Kii. Mark, Nanki Otokoyama, in blue. 1850.

*Height, 9½ inches.*

PROVINCE OF MUSASHI

The potteries of this province are mostly within or near the city of Tōkyō. In glancing at the case containing the pottery of Musashi one fails to see any characteristic feature or cachet, so to speak. The Musashi pottery in this respect stands in marked contrast to the pottery of other provinces. One has only to recall the pottery of Iwaki, Iga, Harima, Bizen, Higo and certain other provinces to note their pronounced individuality. The absence of this individuality in Musashi is easily understood. With the enforced presence in Yedo in past times of the Daimyōs of every province, with the retainers, potters, metal workers and other artificers forming part of the retinue, the diversity is readily accounted for. In many instances ovens were erected in the Yashiki, and potters of skill were brought from various provinces, each continuing, with slight changes, his own peculiar methods. Thus potters from Yamashiro, Owari, Omī, Kii and other provinces introduced their own provincial styles. Tōkyō, also, being a great commercial centre, naturally attracted potters from various parts of the empire. As a result of these circumstances a great diversity is seen in the character of the pottery. It is recorded that the first oven in Tōkyō was built at Akasaka in 1630, by order of the third Shōgun, Iyemitsu, potters from Ōsaka being ordered to make pottery after the style of their Ōsaka work. Previous to the above date, however, roofing tiles had been made in the last years of the sixteenth century. After the Ōsaka potters, came respectively the potters of Imado, notably Hanshichi; the Ise potter at Kommemura, and the Kyōtō potter, Kenzan, at Iriya. The work of the Tōkyō potters was altogether too recent, and perhaps too poor, to gain recognition from the lovers of the tea-cult; consequently the labor of ascertaining the history of the early Tōkyō potteries has been difficult and uncertain.

SUMIDAGAWA.—In the beginning of the century a potter known as Kikkutei established an oven in Sumidagawa, Yedo, and made a soft Raku pottery. The work of the first generation was quaint and interesting. In 1875 the third generation was at work, and the pottery shows the usual deterioration.

1650—TEA BOWL

(1756) Sumidagawa faïence of soft reddish texture. Salmon color glaze, with cherry blossoms outlined in white. Made at Sumidagawa, Tokio, province of Musashi. Mark, obscure. 1850.

*Diameter, 4¼ inches.*

1651—TEA BOWL

(1754) Sumidagawa faïence of soft, reddish texture. Red Raku glaze. Made at Sumidagawa, Tokio, province of Musashi. Mark, Rokujuichi Tsukuru (made at 61st year), incised, and a seal impressed, obscure. 1850.

*Diameter, 5¼ inches; height, 2½ inches.*

1652—BOWL

(1742) Sumidagawa faïence. A mass of cherry blossoms delicately painted in colors on a creamy white crackled glaze. Made at Sumidagawa, Tokio, province of Musashi. 1860.

*Diameter, 5½ inches.*

KENZAN.—From a late manuscript of Ninagawa the following information is derived: Kenzan (Ogata Shūshō) came from Kyōtō and built an oven in Iriya, Tōkyō. Here he made a kind of soft pottery in the form of square trays, rarely bowls. These were decorated with flowers, etc., in dark brown or black, poems were also inscribed upon them, and the signature of the potter was written on the bottom in the bold characters in black. In one case, at least, his brother, the famous artist Kōrin, decorated a piece, signing his name as painter (see Catalogue No. 4035). Kenzan died in 1743, at the age of eighty-one. A pupil of Kenzan inherited his name, and continued making the same kind of pottery, signing with the name of Kenzan. In 1767 he gave the name of Kenzan to his pupil Miyasaka, who continued the work in precisely the same spirit, signing his pieces Kenzan. He finally transferred this family name and oven to his wife in 1810.

1653—NAPKIN VASE

(1745) Cylindrical-shaped. Iriya faïence. Chrysanthemum flowers in colors over a creamy-white glaze. Made by Kenzan in Iriya, Tokio, province of Musashi. Kenzan, in brown. 1730.

*Height, 2¼ inches.*

1654—SQUARE CAKE TRAY

(1744) Iriya faïence of soft yellow texture. Winter landscape in low tones in a pale gray glaze. Poem in brown on reverse. Made by Kenzan at Iriya, in Tokio, Musashi. Mark, Kenzan Shokosai sei Shosu, in brown. 1730.

*Diameter, 6½ inches.*

1655—CAKE DISH

(1743) Lozenge-shaped. Iriya faïence of soft white texture. Narcissus and a verse in Chinese characters painted in brown on a yellow-white glaze. Made by Kenzan at Iriya, in Tokio, province of Musashi. Kenzan sei, painted. 1730.

*Diameter, 6¾ x 5 inches.*

KIKKŌ.—Kikkō of Osaka came to Yedo in 1855 and built an oven at Mukōjima, using Kikkō and Jūsan Ken as signatures. He died in 1861. His adopted son, Ichiro, with the pseudonym of Shogetsu, continued the work, using the incised mark Bokusui-hen sei, and sometimes Ichiro. He died in 1864, aged forty-four. His widow continued the work until 1868. Since then inferior pottery has been made bearing the mark Kikkō. As to the generations of this family, it is difficult to state. The best work was done by the original Kikkō in Settsu, Suō and Shinano.

1656—OKIMONO

(2371) Turtle. Kikkō faïence. Soft yellowish clay, covered with yellow glaze. Made by Kikkō at Osaka, province of Settsu. Mark, Kikkō, impressed. 1850.

*Height, 2¼ inches; length, 6½ inches.*

1657—TEA BOWL

(1749) Kikkō faïence. Two crests incised and filled with gold leaf, on a thick black Raku glaze. Made by Kikkō in Tokio, province of Musashi. Kikkō, impressed. 1850.

*Height, 2¼ inches; length, 6½ inches.*

1658—CAKE DISH

(1748) Leaf-shape. Kikkō faïence of soft reddish texture. Covered with an apple-green opaque glaze over a pronounced crackle. Made by Kikkō in Tokio, province of Musashi. Mark, Kikkō, impressed. 1860.

*Diameter, 6¾ inches.*

1659—LARGE PLATE

(1759) Chrysanthemum-shaped. Kikkō faïence of soft reddish texture. Covered with a thick salmon color raku glaze. Leaf in rich dark green and seed pod in golden yellow. Made by Kikkō at Sumidagawa, Tokio, province of Musashi. Mark, Kikkō, impressed, and "Boko-no hotori-ni oité Korewo Seisu," incised. 1860.

*Diameter, 13½ inches.*

RAKURAKUYEN.—In the Yashiki of the Daimyō of Ōwari was a garden known as Rakurakuyen. An oven was built in this garden by direction of the old prince of Ōwari in 1804, and potters from Seto, Ōwari, were called to take charge of it. The essays were mostly in true Seto style of that date, with some departures near the end of the work. The signature was Rakurakuyen, impressed. Masaki of Nagoya was in charge for a while, and pottery made by him bore the additional mark Masaki. The clay was at one time brought from a quarry near Seto, and pieces made from this clay have the mark Sobokai accompanying that of Rakurakuyen. The pottery was vigorous, tasteful and in rigid adherence to the tea-cult. The work ceased in 1830.

1660—OKIMONO

(2351) Sacred lion with ball. Rakurakuyen stoneware. Hard gray clay covered with a yellowish-brown glaze. Made at Rakurakuyen in Tokio, province of Musashi. Mark, Rakurakuyen Sei, impressed. 1830.

*Height, 3 inches.*

1661—TEA BOWL

(1753) Rakurakuyen stoneware. Covered with a pale green crackle glaze. Young pines in white under the glaze. Made by Masaki at Rakurakuyen, Tokio, province of Musashi, with clay from Sobokai, Owari. Sobokai, stamped, and Masa incised. 1830.

*Diameter, 3½ inches.*

1662—CYLINDRICAL WATER JAR

(1752) Rakurakuyen stoneware. Dark blue glaze, with splashes of white. Lacquer lid. Made at Rakurakuyen, province of Musashi. Rakurakuyen sei, impressed. 1820.

*Height, 6 inches; diameter, 5¼ inches.*

1663—OKIMONO

(2352) Group of eight turtles on rock. Rakurakuyen stoneware of gray texture. Covered with a mottled brown glaze. Made by Masaki at Rakurakuyen Tokio, province of Musashi. 1820.

*Height, 6 inches; diameter, 11 inches.*

1664—CYLINDRICAL WATER JAR

(1751) Rakurakuyen stoneware of hard gray texture, of dull gray crackle glaze: lacquer lid. Made at Rakurakuyen, Tokio, province of Musashi. Marks, Rakurakuyen and Matsu kaze no sato, impressed. 1820.

*Height, 6¼ inches; diameter, 5½ inches.*

1665—CAKE DISH, POMEGRANATE DESIGN

(1750) Rakurakuyen stoneware. White hard paste. Decorated in blue under the glaze. Made at Rakurakuyen, Tokio, province of Musashi. Rakurakuyen sei, impressed. 1820.

*Diameter, 6½ inches.*

KENYA.—Miura Kenya, a potter of Tōkyō, began his work in Asakusa in 1830. Kenya was a great admirer of Haritsu and of the early Kenzan. He followed these artists as guides. His pottery signed Kenya shows the Kenzan spirit. If the records regarding the Kenzan generations are reliable, then many of the pieces made within forty years signed Kenzan may be the work of Miura Kenya.

1666—TEA BOWL

(1747) Kenya stoneware of hard reddish texture. Invested with a mottled tea color and gray glaze. Made by Kenya at Asakusa, Tokio, province of Musashi. Kenya, impressed. 1850.

*Diameter, 4¼ inches; height, 2½ inches.*

1667—FIRE BOWL

(1757) Kenya faïence of soft texture. Pale yellow-green and dense brown glaze over a crackle surface, and plum blossoms, painted in black, brown, and blue. Made by Kenya at Asakusa, Tokio, province of Musashi. Mark, Kenya, in purple. 1850.

*Diameter, 4 inches.*

1668—HEXAGONAL FIRE JAR

(1761A) With open-work metal cover. Kenya faïence of hard gray texture. Finely crackled gray glaze and decoration of coast scene, rocks, large spreading pine and pheasants in lapis blue over the glaze. Made at Asakusa, Tokio, province of Musashi. Mark, Kenya, in large circle, incised. 1830. Teakwood stand.

*Height, 7 inches; width, 6¾ inches.*

IMADO.—Under this general name must be included the productions of a number of potters who have, so far as I can ascertain, entitled their individual work Imado. The pieces are rarely signed. Some of the pottery is in the form of fire-vessels, soft, unglazed, with polished black surface; other forms have a beautiful mottled glaze with hard ringing clay. A number of red Raku pieces occur unsigned.

1669—VOTIVE OFFERING

(2350) Group of seven gods of happiness. Modelled in Imado faïence of soft yellowish texture and invested with lacquer in imitation of bronze; varnished with lacquer. Made by Benshi at Imado, in Tokio, province of Musashi. Mark, Benshi, impressed. 1772.

*Height, 3½ inches.*

1670—OKIMONO, FIGURE OF AN ARIHAT

(2354) Imado faïence, decorated in green and red enamels of low tone. Fine gray clay. Made by Karaku at Tokio, province of Musashi. Mark, Karaku Kojitsukuru, incised. 1850.

*Height, 6 inches.*

1671—INCENSE BURNER, ON TRIPOD

(1758) Lotus-shaped. Imado faïence of yellow texture. Opaque green glaze over a raku red glaze. Made by Shirai Hanshichi at Imado, Tokio, province of Musashi. Shirai Hanshichi, impressed. 1750.

*Diameter, 6 inches.*

1672—INCENSE BURNER

(2355) Form of elephant. Imado faïence. Soft yellowish-white clay, decorated in dull white, red, and green. Made by Ritsuo, at Imado, province of Musashi. Mark, Kwan (imp.). 1700.

1673—SHALLOW BOWL

(1760) Imado faïence of soft red texture, incised under surface. Made at Imado, province of Musashi. 1800.

*Diameter, 7¼ inches.*

## PROVINCE OF NAGATO

With the exception of the province of Bizen there is no province in Japan where there is such uniformity in the general appearance of its pottery as in that of Nagato. A hundred—a thousand—specimens brought together only make more striking the slight variation between them. The Japanese experts seem readily to separate the pottery of Nagato under the names of Hagi, Matsumoto and Fukagawa, yet these distinctions become confusing when a large number of objects is brought together. The distinctions that they make between Matsumoto and Hagi are frivolous. Fukagawa certainly has a softer clay. An authority of 1700 mentions Hagi only. Ninagawa says Hagi is the general name for Matsumoto and Fukagawa; and yet Fukagawa is a separate town from Matsumoto. To make the discriminations more difficult, Nagato pottery is rarely signed; furnace-marks even are not seen; and so in many cases distinctions are impossible.

HAGI.—Japanese antiquarians make a distinction between Hagi and Ko Hagi, and though the distinction amounts to nothing save as a matter of age, there is yet a marked difference in the appearance of the older forms. Tōkikō says that Ko Hagi is often mistaken for early Ozumo, and this is doubtless due to Korean influence in both instances. According to Ninagawa and other authorities, the first potter of Hagi was a Korean named Rikei, afterwards called Sake Koraizyemon. The descendants of Rikei attained the rank of Samurai.

### 1674—TEA CUP

(1764) Hagi stoneware of coarse sandy red texture. Pinkish-white glaze, applied in a manner to imitate shark's skin. Made at Matsumoto, province of Nagato. 1830.

*Height, 2¼ inches; diameter, 2¾ inches.*

### 1675—TEA BOWL

(1770) Hagi stoneware of hard sandy texture. Inside glazed with mottled black and white enamels which partially runs over on the outside. Made at Matsumoto, province of Nagato. 1800.

*Diameter, 3½ inches.*

### 1676—TEA BOWL

(1775) Hagi stoneware. Streaks of white and brown glazes interwoven. Made at Matsumoto, province of Nagato. 1800.

*Diameter, 4 inches.*

(1772) Hagi stoneware of hard reddish texture. Thick, white, running glaze. Made at Matsumoto, province of Nagato. 1800.

*Diameter, 4¼ inches.*

1678—TEA BOWL

(1776) Hagi faïence of light gray texture. Bluish-white *soufflé* glaze. Made at Matsumoto, province of Nagato. 1700.

*Diameter, 4¾ inches.*

1679—TEA BOWL

(1774) Hagi stoneware of pale brown texture. Opaque, light brown glaze, with purple shading. Made at Matsumoto, province of Nagato. 1750.

*Diameter, 5 inches.*

1680—CAKE DISH

(1767) Shape of rice bag. Hagi stoneware of fine gray texture. Dull white crackled glaze, with incised patterns. Made at Matsumoto, province of Nagato. 1800.

*Diameter, 7 inches.*

1681—CYLINDRICAL VASE

(1765) Hagi stoneware of dense texture. Covered with a thick bluish gray crackle glaze. Made at Matsumoto, province of Nagato. 1750.

*Height, 5¼ inches.*

1682—TEA BOWL

(1771) Hagi stoneware of coarse gray texture. Salmon pink crackle glaze. Made at Matsumoto, province of Nagato. 1750.

*Diameter, 5½ inches; height, 3½ inches.*

1683—SAKE BOTTLE

(1768) Gourd-shaped. Hagi stoneware of fine gray texture, with fluted body. Covered with blue-white crackled glaze. Made at Matsumoto, province of Nagato. 1750.

*Height, 6 inches.*

1684—SHALLOW BOWL

(1773) Hagi stoneware of soft brown texture. Covered with a gray crackled glaze. Made at Matsumoto, province of Nagato. 1750.

*Diameter, 7 inches.*

1685—LARGE HANGING JAR

(1769) Globular-shaped. Hagi stoneware of dense texture. Fine creamy-white crackled glaze. Made at Matsumoto, province of Nagato. 1800.

*Height, 14½ inches; diameter, 13½ inches.*

PROVINCE OF ŌMI

The merit of Ōmi pottery, like that of many other provinces in Japan, is that it has been true to its traditions. The large tea jars with typical Shigaraki clay have been the dominant form of its pottery for five hundred years. The luminous glazed tea jars and the delicate glazes seen in others are all good. With the invasions of Kyōtō potters at Beppo and Hikoue, and a consequent introduction of Kyōtō styles, there has, nevertheless, been no sign of Ōmi potters degrading their art by appealing to the extraordinary tastes of foreigners. The typical pottery, Shigaraki, and probably the oldest pottery in the province (save that mentioned under early historic pottery), was made nearly a thousand years ago. With the exception of slightly different forms and the grime of age, this varies but little in general appearance from that made to-day.

SHIGARAKI—In the village of Shigaraki are the ruins of one of the oldest ovens in Japan. Ninagawa figures a little plate made of typical Shigaraki clay, dug up on the site of this oven, which he believes to be nearly nine hundred years old. He also figures a rough jar, to which is accorded an age of five hundred years; and in the collection there are specimens of Shigaraki showing successive periods up to the present day. They are all strikingly alike in clay and rough way of potting. In the latter part of the sixteenth century large jars for holding tea-leaves became very popular, as it was believed that the tea preserved better in pottery of this kind. Typical Shigaraki is unmis-takable; the rough slightly reddish tinge to the clay, the coarse granules of silica partially fused, and, in recent specimens, the thin, transparent glistening glaze, with sometimes a thicker running over-glaze, render the pottery very distinctive. There are many forms of Shigaraki. In some the clay is finely sifted, and green, brown or glistening black glazes are used. These are rarely decorated. The tea-jars are either typical Shigaraki, or glazed after Seto style.

KOTŌ.—Pottery known as Kotō was made at Sawayama, east of Hikone castle, by order of the Hikone family. The oven was started in 1818, and a potter from Kyōtō was placed in charge of it. No special merit was shown in the work until within recent years, when a number of potters from Kyōtō and Seto were engaged. This accession resulted in a new departure, and pottery after Seto and Kyōtō models, with porcelain and celadon as well, and suggestions of green and red Kutani were among the essays. The work was of short duration, for, on the assassination, by Mito Rōnins, of the head of the Hikone family, the oven was abandoned.

## PROVINCE OF OWARI

The potters of Kyōtō and environs far outnumber those of any other region in Japan. Owari stands next in the number of its potters, yet when one comes to gather information regarding the potters of these respective regions the difference is very great; for, while the history of nearly every Kyōtō potter is known, but little information of Owari of a reliable nature is at hand, outside the potters whose names are classical. The reason probably is that Kyōtō, being the art capital of the empire, the former residence of the Mikados and court nobles, with all the elegance and luxury accompanying their surroundings, the potters possessed an added dignity by being within this great circle.

OFUKE.—A pottery marked by rich running glazes of brown, yellow and sometimes blue on a dark Seto-brown glaze, is accredited to an oven built within the castle grounds of Nagoya. Other pieces, varying from the above, are also recognized as Ofuke. These were made in 1830-40 by Shuntai, and bear the marks Fuke, Fuke yaki, Fuke sei and Hachi.

SHINO.—Pottery commonly known as Shino is a rough, hard pottery with coarse, white crackled glaze, and, if decorated, showing hasty brush-marks in black. The work is usually seen in the shape of bowls, plates and incense boxes, rarely water-jars, tea-jars or bottles. The earliest forms look archaic, and some of them are attractive from their quaint and distinctive qualities. Records state that the earliest pieces recognized under the name of Shino date back to 1700 or before, and are due to Shino Saburo or Shino Oribe (pseudonym Shino So-on), a tea-lover who made them by order of his prince. The type of pottery must have been made long before this date, as the gray, white-inlaid Shino is accorded an age of three hundred and fifty years. The older pieces are very thick and heavy.

1711—TEA BOWL

(1850) Shino stoneware. Finely crackled gray glaze, with vertical lines of orange and brown. Made at Seto, province of Owari. 1800.

PROVINCE OF OSUMI

Certain specimens of finely crackled white Satsuma, in some cases almost crystalline in appearance, bearing evidences of considerable age, are referred to Chōsa, Ōsumi, by Japanese experts. It is recorded that at this place the Korean potters who settled in Satsuma first discovered the white clay, and made the white crackled faïence. This was the origin of the famous white Satsuma. It is said that the making of this pottery continued as late as 1789.

PROVINCE OF TOSA

The pottery of this province presents but few types, and these with rare exceptions are unsigned. The usual form is seen in simple bowls with decoration of bamboo, plum and pine in pale blue, under a yellowish-white or bluish-white glaze. Within recent years large pieces, with bluish-white crackled glaze and elaborate carving, have been made.

SHŌHAKU.—The records are conflicting in regard to Odo pottery. Ninagawa, in one account, says that among the artisans brought back from Korea in 1598 was a potter named Shōhaku, who settled in the village of Odo and made pottery, following Korean models, and shortly after, discovering a good clay near Odo, began the making of tea-bowls with colored enamels. Another memorandum of Ninagawa says that the Korean's name was Butsuami, and his successor was Shōhaku, who first studied with the Korean and afterwards with Ninsci. Another expert, Mr. Tanimura, informed me that the first Odo potter was Shōhaku, who was succeeded by Saburobe, and that successive generations were known by the latter name; finally, the author of Tōki Shōshi definitely states that Odo pottery was established by Kimo Shōhaku, a pupil of Ninsci, in 1653. He shortly after went to Ōsaka, to which place, in 1673, a potter by the name of Morita Mitsuhiwa was sent by the lord of Tosa to study under Shōhaku. Morita also visited other potteries, and returning to Odo

made tea-bowls and other utensils. In 1804 the oven was removed to Nochazan, and the pottery was known under that name.

PROVINCE OF TŌTŌMI

The pottery of this province up to within recent years has rigidly adhered to the traditions of the tea cult. It is absolutely without decoration. Simple forms, quiet autumn browns and yellows for colors of glaze, with surfaces like the inside of a nutshell, are among the characteristics of this pottery. I have been unable to get records of the individual potters, though there must have been many of them, as the work covers at least three centuries. Yet, with rare exceptions, the pottery bears only the impressed mark Shidoro.

SHIDORO.—Pottery known as Shidoro has continued to be made since the time of Tokugawa Iyeyasu. Records show that this wise Shōgun wrote to Enshū, of Shidoro, in 1589, giving him permission to make pottery, and from that time to the present the mark Shidoro has been used. As a matter of fact the oven was established at Yokuoka village, not far from Shidoro, where the

pottery had been made in ancient times. The older forms, as in so many instances, are the finest, the latest specimens being very poor. The only mark I have ever seen associated with Shidoro is that of Tetsugi. This is found on a slender tea-jar with an age of forty or fifty years. Many years before the time of Enshū a pottery was made, bearing an impressed mark which has never been deciphered. Old books publish the mark, and Tōkikō repeats it with little resemblance to the original. The only two specimens of which I have any record are in the collection. Ninagawa confessed to me that he had never seen a specimen, nor had he heard of the existence of one. Recent Shidoro covers two distinct types: the one in the form of thin double gourd-shaped wine bottles with medallion decoration in black, unglazed or partially glazed with transparent green; the other consisting of heavy forms of deep cups or double gourd-shaped bottles with bright orange and green glaze intermixed. These latter bear the impressed mark Shidoro.

PROVINCE OF SANUKI

Sanuki pottery seems to be entirely unfamiliar to the Japanese collector. The name of the province has rarely appeared in Japanese works on pottery, and never in books on the subject published abroad. Even Ninagawa has no reference to it in his classical work, though, had he lived to publish another part, a few plates for which had been prepared, Sanuki would certainly have been included, as among his manuscript notes he had references to a number of Sanuki potters. I have seen in collections Sanuki pottery identified by Japanese experts as Izumi; Awaji; Kyōtō; Suruga; and Ōhi, Kaga. The shallow green glazed plates made on moulds have been invariably identified either as Awaji or Izumi. As a number of potters have at various times established ovens in the province, I have made special efforts to clear up the sequence of these potters and their relations to one another, and to identify their work.

YASHIMA.—This oven was first opened by Mitani Rinsō in the beginning of the century. Rinsō first baked at Shido. In 1880 the third generation was at work. Green, yellow and red glazes were used on a soft, loose clay. There were two branches of this family, Mitani Rinsō and Yotsuya Sōshiro, and this

may account for the variety of marks impressed, incised and written, which are found on the pieces.

TAKAMATSU.—Pottery was made in the town of Takamatsu in the middle of this century. The two pieces in the collection might be mistaken for coarse blue and white Kiyomizu.

SHIDO.—A pottery, which may be known under the name of Shido from the place of the oven, was first made by Hirage Gennai in 1780. His work was in the form of round or square plates, haisen, etc., moulded, with green or yellow glazes. The impressed marks Min, Shunmin, Shido Shunmin and Hirage Shunmin are found. This work is generally identified by the Japanese as Izumi or Awagi. Hirage Gennai went to Yedo for a short time, and it is barely possible that pottery of a similar nature, accredited to Tokyō, may be his work.

1893—TEA BOWL

(1975) Sanuki faïence of soft reddish texture. Cracked Raku glaze. Made at Yashima, province of Sanuki. Mark, Yashima, impressed, and Kuju Hichi Rinsō tsukuru (made by Rinsō in his ninety-seventh year, incised). 1850.

PROVINCE OF TAMBA

The pottery of this province in past times, while adhering to the simple severity demanded by the more insistent devotees of the tea-cult, possessed a richness of glaze and depth of color unequalled by any pottery in Japan. The old tea-jars, particularly, combined the beauty of Takatori, the sobriety of Seto and the solidity of Shidoro, and superadded to these qualities a variety of features in form and glaze, which have made them most attractive objects for the collector.

ONOHARA.—The earliest forms of glazed pottery were made in Onohara. Large-bodied jars with brown glaze and blistered surface are known as Ko (old)

Tamba, and are said to date back to 1550. Specimens are exceedingly rare. Pieces equally old have reddish clay, light fawn glaze, with simple decoration in gray under the glaze. They are all stained by age, and bear evidences of considerable antiquity. These are probably the ones mentioned in Tōkikō as resembling old Nage. This resemblance is doubtless due to influences from the same source, namely Korea. Tea-jars also were made at Onohara before 1600. These were glazed in Seto style.

NAOSAKU.—In 1835 Masamoto Naosaku made oil-bottles, but more particularly wine bottles of a peculiar form, so that when filled with wine they would float in hot water. Similar forms have already been described above. These bear the definite mark Naosaku, and his work may properly be separated from similar pottery classified as Tachikui.

TACHIKUI.—In 1660 the Onohara oven was removed to Tachikui, and here were made many forms of tea-utensils, beside the curious floating wine bottles. These latter objects bear a variety of marks, evidently the signatures of individual potters baking in a common oven. As no information has been obtained in regard to these marks they will be considered under Tachikui, as they were probably made in this village. The Japanese also recognized, under the name of Kenjo (*i. e.*, present to a superior), Tachikui pottery of a more delicate and refined character. The two specimens of this nature in the collection bear a heron, after Ōkio, vigorously portrayed.

ANTIQUÉ JAPANESE POTTERY

PROVINCE OF TSUSHIMA

The island of Tsushima, lying between the southern end of the Korean peninsula and Japan, has been for hundreds of years the home of potters who have followed Korean models in their work. Information in regard to the early potters and their places of work is meager. Among the contemporary potters of Enshū's time, seven potters of Tsushima are mentioned as worthy of recognition. The typical pottery is most characteristic and unmistakable. The clay is soft, light fawn in color, sometimes with pinkish areas, often with white Mishima decoration, rarely black, and glaze generally without luster. Specimens are occasionally seen which are likely to be confounded with early Satsuma, or with early Tosa, this confusion resulting from the Korean strain, if I may use the expression, which runs through all these essays.

*1920—COVERED TEA JAR*

(2029) Tsushima faïence of pale brown texture. Cord design round the neck, and conventional crest design on the body in black. Made at the island of Tsushima. 1700.

PROVINCE OF YAMASHIRO

Kyōtō, the capital of the Mikados for over a thousand years; the home of court nobles, or artists, poets and historians, and artisans of the highest skill, what wonder that the refining influences of such an august assemblage should reflect itself in the character of the art hand-work of this centre! The potter's art here found its highest expression; and the names of Kōyetsu, Ninsei, Kichizayemon, and later Zengoro, Kenzan, Mokubei, Hōzan, Dōhachi, Rokubei, Kitei and others are known throughout the empire, and some of these have a world-wide reputation. From this centre potters at various times in the past have been called to neighboring, as well as far-distant, provinces, there to establish new ovens or to influence the work already established. The fame of the Kyōtō potters led to a preservation of their family histories. Their essays were usually signed, and thus the identification and classification of Kyōtō pottery is comparatively easy.

AWATA.—Typical Awata was first made in Awata district, Kyōtō. The early pieces are not signed. They are grayish in color and undecorated. Specimens of early Awata reveal in the glaze under an ordinary lens air bubbles closely crowded together. Decorated Awata appeared in 1630, and much of the early work is attributed to Niusei. The mark Awata first appeared at this time, and this mark has been used since by various Awata potters unaccompanied by their own signature.

1924—SAKE-CUP STAND

(2043) Awata faïence. Covered with a finely crackled creamy-color glaze, with pine branch and chrysanthemum crest, painted in brown and blue under the glaze. Made at Awata, Kioto, province of Yamashiro. 1800.

1928—TEA BOWL

(2041) Awata faïence of pale-yellow texture. Covered with crackled creamy glaze. Tokugawa crests painted in black under the glaze and in green and blue enamels over the glaze. Made at Awata, Kioto, province of Yamashiro. 1800.

*Height, 2½ inches; diameter, 4½ inches.*

1929—SMALL TEA POT

(2061) Awata faïence. Minutely crackled creamy-white glaze, with bamboo in blue and brown under the glaze. Made by Kinkozan at Awata, Kioto, province of Yamashiro. Mark, Kinkozan, impressed. 1800.

*Height, 3½ inches.*

1930—HEXAGONAL INCENSE BURNER

(2040) With cover. Awata faïence. Pierced panels and brocade designs in fine enamel color of low tone and gold and silver. Made at Awata, Kioto, province of Yamashiro. 1800.

*Height, 3¼ inches.*

KINKOZAN.—The family of which the modern Kinkōzan is a representative begun work in Iwakurayama, and afterwards moved to Awata, and for the first time used the signature Kinkōzan. Another account says that the first

generation was represented by Kobayashi Tokuyemon, who worked in Awata in 1646. The early work departed from typical Awata models, and a variety of forms, glazes and decorations were made. The small bowls and jars with rich dark brown overglaze, and the light brown glazes with light decoration were particularly rich, and these were among the chef-d'œuvres of the family seventy years ago. In 1877, or thereabouts, the representative of the family, Sōbei Kinkōzan, with a large staff of crude potters and decorators, flooded the foreign market with profusely decorated Awata, signed with the painted mark Kinkōzan in red.

1931—TEA BOWL

(2051) Awata faïence of gray texture. Covered inside and out with a soft creamy-white glaze over a network of brown crackle, with flowering sprays in brown and blue. Made by Kinkozan at Awata, Kioto, province of Yamashiro. Kinkozan, impressed. 1850.

*Height, 3½ inches; diameter, 4¼ inches.*

1932—TEA BOWL

*Height, 3½ inches; diameter, 5 inches.*

TAIZAN.—The first generation of this famous family was one Takahashi Tōkurō, who came from Ōmi, and built an oven in Awata in 1673. The second generation was known as Yohei, and this family name remained in all the subsequent generations. Yohei's work consisted of tea-utensils only; the third generation made tea and wine utensils; the fourth generation (1789-1892) first used dark blue glaze; the fifth generation (1804-1817) made blue pottery vases for the Imperial household; the sixth generation (1830-1838) introduced a regular style of painting for decoration. He was a friend of the famous artists of that time, among whom were Keibun and Toyohiki. The work Tōki Shōshi, from which the above information has been derived, also mentions the seventh, eighth and ninth generations. Ninagawa says that the mark Taizan was first used in 1760. A variety of marks are seen on the pottery, but it has been impossible to sub-divide them according to different families. The pottery shows great refinement and skill.

1933—FIRE BOWL, FOR SMOKER

(2037) Awata faïence of gray texture. Floral and leaf scrolls in dark blue, white and green enamels, thickly applied over an unglazed surface. Made by Taizan at Awata, Kioto, province of Yamashiro. Taizan, impressed. 1750.

NINSEI.—Nonomura Seibei, son of Seiyemon, of Ninwaji village, stands foremost in the ranks of Japanese potters. His pseudonym was compounded from the first character of his birthplace, Ninwaji (some authorities state that he was born in Tamba), and the first character of his name, Seibei. Artists in Iizen claim the distinction of first decorating in vitrifiable enamels in 1650. The secrets of their methods, though well guarded, came into the possession of Ninsai, and through him to the knowledge of contemporary and subsequent potters who studied under him. Ninsai's influence so elevated the art in Kyōto that it became at that time, and has since remained, the ceramic art centre of

Japan. Early records vary as to whether Ninsei learned the rudiments of the art from Shōhaku, of Tosa, or imparted his knowledge to Shōhaku. The fact that Ninsei was active in 1680 is attested by evidences from other sources. Ninsei was a skilful painter as well, and in Japanese works is recorded as an artist with date of activity.

## PROVINCE OF SETTSU

The province of Settsu has attained but little celebrity for its ceramic products. In early years the delicate and refined essays of the Nanwa oven, and before these even, the Takahara pottery, following Korean models, were justly appreciated. In later years the Sanda celadon has given some fame to the province; the other potteries have established a local reputation only. Indeed, nearly all of these were brought into note by the efforts of Kyōtō potters.

KOSOBÉ.—This pottery is said to have been first made in the latter half of the last century by Shirobei Shimbei. Kyōtō models were followed in the work. The second generation, Shinzō Shimbei, used glaze similar to Tamba and Karatsu, and also made imitations of Korean work. The third generation, Shingorō Shimbei, imitated the work of Rokubei of Kyōtō. The fourth generation, Yosojirō, was at work in 1878. Some of his large cups and bowls were decorated by Komatsuya Tasuke, an artist and writer of Osaka. He signed with the pseudonym Tainen.

PROVINCE OF HIZEN

The ceramic products of Hizen are known the world over through its famous porcelain. After China, its "blue and white," and "polychrome" stand prominent. During the early days of the Dutch commerce with Japan, the porcelain ovens near Nagasaki turned out large numbers of huge vases and plaques made expressly for the Dutch trade. The famous collection at Dresden is made up almost exclusively of these big vases in polychrome. When one considers the beautiful work, made in accordance with the refined taste of the Japanese, which the Dutch merchants might have obtained, the contemplation of the Dresden collection is simply disheartening.

DŌHACHI.—The name of Dōhachi is justly celebrated in the annals of Kiyomizu potters. The founder of the family was one of a group of famous potters who studied under Yeisen.

2145—SMALL INCENSE BOX

ASAHI.—Accounts vary greatly as to the origin of the pottery bearing the impressed mark Asahi. Records state that it was first made at Uji in 1624-1644. Absolute plainness of form and glaze characterize the earlier work. Matsubayashi Chōbei, claiming to be the fifteenth generation, revived the work in 1852. The present generation, Matsubayashi Matsunosuke, is the grandson of Chōbei. Miserable imitations with counterfeit mark made by Zōroku were common in the bric-à-brac shops of Japan in 1882-1883.

PROVINCE OF YAMATO

This province has within its limits the time-honored town of Nara, famous from having been the ancient capital of Japan and the residence of a long line of emperors. With the exception of Nara there are but few towns of any size or importance in the province, and the sparsely settled country has not favored the growth of the pottery industry.

AKAHADA.—According to authorities, pottery was made in Akahada as early as 1624, though the site of the oven is not known. (This does not include the earlier historic pottery already catalogued.) In 1781 an oven was started by potters from Kyōtō, and in the early part of the present century the mark Akahada was first used. In Tōkikō, however, it is stated that the ovens of Akahada were reopened in 1789, and the old marks were used in signing the pieces. The earlier marks were incised, and the first pottery made might easily be mistaken for Bizen. The first impressed mark was in the form of a symmetrical double gourd; later a symmetrical double gourd formed the outline. Successive marks of the same form, but varying in outline and size, were used. From the great variety in the form of these marks, it would seem

that each individual potter had his own mark. Other signatures occur, but there are no records at hand in regard to their significance.

2162—INCENSE BOX

(2115) Otafuku. Akahada porcelain. White glaze, decorated in colored enamels over the glaze. Made at Akahada, province of Yamato. Mark, Akahadayama Mokuhaku, incised. 1840.

MINATO.—The founder of Minato pottery is said to have been Doraku, known as Kichibei, a brother of the third Raku. He came to Sakai in 1655. Having no son to succeed him, he adopted a Kyōtō potter named Yahei, who is recognized as the second generation. The third generation, known as Kichiyemon, died in 1750, the fourth in 1787, the fifth in 1831, the sixth in 1849, the seventh in 1852. All these were known as Kichiyemon. The eighth generation assumed the name of Kichibei, and died in 1861-1864. The present generation resumed the family name of Kichiyemon. For these statements I am indebted to Mr. Yamanaka. Ninagawa says that in the latter half of the eighteenth century the yellow glazes were introduced, and the mark Minato was first used. Still later, the mark Minato Yaki was impressed upon the pieces. I have not been able to separate the work of the various generations and have classified them simply by their appearance of age. The pottery was after the nature of Raku, being soft and light, and usually having a transparent underglaze and a dull dark yellowish overglaze. In some cases a bright green glaze occurs, and in the smaller pieces white, yellow, and green glazes are seen together. The rarest are the early gray and the purple and blue glazes. Unglazed specimens are also known.

PROVINCE OF IGA

The pottery of Iga is very characteristic. It is extremely plain, usually undecorated, and often rough and primitive in appearance. The close resemblance between the pottery of Iga and Ōmi arises from the similarity of the clay used in the work. The clay of Iga pottery is not so reddish as that of Ōmi, and in some cases the material is almost a clayey-white.

In the village of Makiyama a serviceable unglazed pottery, in the form of kitchen utensils, braziers, and the like, has been made within twenty years. Examples of this work are placed in that portion of the collection representing different objects made in pottery.

#### PROVINCE OF ISE

The modern pottery of Ise is known throughout the world under the common name of Banko, and the objects are almost invariably signed with the impressed mark of Banko. The product is usually in the form of tea-pots, little flower-vases, and the like, either modelled by hand or moulded; the walls delicate, with twigs modelled in relief, or flowers in a few vitrifiable enamels on an unglazed surface, or the body may be made of different colored clays. The foreign taste has been captivated by the novelty of this pottery and its cheapness. Ninagawa says this modern work for export was not made until after 1868. By the material thrown on the market to-day no one can have the least idea of the remarkable pottery made in this province in past times. There is hardly any method or style that the Ise potters could not successfully imitate; and if the pottery of this province alone survived, a fair idea of the pottery of Japan would be given.

BANKO.—Great diversity of opinion is found in the various records published, and in manuscripts in regard to the origin and the history of the pottery bearing the mark of Banko. A general agreement seems to give the credit of the first making of Banko to Numanami, surnamed Gozayemon, who was a man of wealth, lived in Kuwana, studied flower arrangement, and finally began to experiment with the making of pottery. He is said to have served an apprenticeship with Kenzan, in Kyōtō, and if this is a fact we get a clue to the date of Numanami's work, as Kenzan died in 1743. His skill soon attracted notice, and the attention of the Shōgun being called to him, he was invited to Yedo, where he erected a furnace in Kommemura. His first work was made with clay and glazing materials imported from China. He died in the latter years of the last century. One of his sons worked with him for a while, but a servant continued the pottery for some time after the master's death. Three specimens figured by Ninagawa are supposed to have been the work of Numanami in Yedo, and hence called Yedo Banko. As there is no absolute evidence of the origin of the specimens they are here classified with other objects bearing the mark of Banko. The round stamp has also been considered as indicating Yedo Banko, but that mark, varying in character, has been used within recent years.

It would seem that many potters in Kuwana, Yokka-ichi, and other places used the common mark Banko, and the relative age of this work can only be judged in the usual way. Of these marks there is a great variety in form, size, and style of writing the characters. With the exception of Fueki and Nihon Yūsetsu it is not usual to see other names associated with this mark. In 1878 there were twenty-one different potters of Ise represented in the Paris Exposition. There is no mark under which a greater variety of pottery is found than that of Banko. This statement does not refer to the variety of

form or decoration, but to leading types of pottery, such as Karatsu, certain varieties of Satsuma, shino, Ki Seto, Raku, Koda, and others. A study of the pottery shows that the oldest forms bear the mark without the oval border. Banko, then, not only runs over a period of perhaps a hundred and fifty years, but must have been made by many potters in many places. There is apparently no way of tracing the origin of the various pieces, and so they are reluctantly included under one name.

#### PROVINCE OF IWAKI

The pottery of this province is widely known through the rough lathe-turned and subsequently finger-modelled bowls recognized as Sōma. The bowls usually bear as a decoration a tethered horse as well as the crest of the house of Sōma. The pieces are commonly signed with the impressed marks of Sōma, or Kaneshige, though many other marks occur on Sōma bowls.

The founder of Sōma pottery was Tashiro Goyemon. In 1624 the lord

of Sōma accompanied the Shōgun (third Tokugawa, Iyemitsu) in his annual visit to the emperor at Kyōtō. In his suite was Tashiro Goyemon, who, if not a potter, was probably an artist, for his master being greatly impressed with the remarkable character of Ninsei's work selected Tashiro as the proper one to become an apprentice of this famous potter.

SŌMA.—The first Sōma with horse decoration was made by the second generation of Seijiyemon in 1650. The bowl figured by Ninagawa was probably made by the third generation of this family, as a typical Sōma in the collection, with drawing of horse, seems much nearer in clay and age to the work of Seijiyemon above described. True Sōma was made in Nakamura by successive generations of the founder. Within recent years the name Tashiro has been impressed on Sōma pottery, and pieces bearing this mark will be considered under that name. True Sōma, with the exception of the recent Tashiro's work, and one piece in which the mark is incised, bears no signature. The early pieces show more vigorous drawing and are characterized by a certain refinement of form and style. The old name for Sōma pottery was Otomi, meaning "honorable monopoly."

NAKAMURA.—Under this name may properly be included a number of forms which are referred to the village of Nakamura, and doubtless made by Sōma potters. They differ from true Sōma in form and decoration, and are rarely signed. In a few cases a resemblance is seen to Maiko pottery.

2342—SMALL GOURD-SHAPED BOTTLE

(1659) Soma stoneware. Dark brown glaze known as "rain-drop." Made at Nakamura, province of Iwaki. 1800.

*Height, 3¼ inches.*

*Diameter, 7¾ inches.*

PROVINCE OF KAGA

The name of this province, like that of Satsuma, has become widely known abroad through its faience and porcelain. The output of the Kaga ovens in furnishing pottery for the world's demand is very great. Yet just in propor-

tion to the effort to fill this demand is seen a corresponding deterioration in the work. One had only to compare the exhibit of Kaga potters at Chicago in 1893 with a similar exhibit in Philadelphia in 1876 to realize this deterioration. There is little variation to be seen in the pottery. One piece of the bright red and gold decorated faïence of Kaga will stand as a type for the thousands of pieces exported. The difference between this modern stuff and the original red is very striking.

ŌHI.—Pottery known as Ōhi is made in a village by that name in the eastern part of Kanazawa, which is thirty miles from Yamashiro village. It is said that the first Ōhi pottery was made by Chōzayemon, a brother of Ichiyu, one of the Raku family. This was in 1683. The earliest pieces had the impressed mark Raku. Early bowls of this potter have a close spiral line cut on the outside of the vessel. The only ones I have seen of this character appear to be imitations. In 1780 the mark Ōhi was first used. There is a variety of these marks continuing from that time to the present day. There is one form of the mark Ōhi always associated with the earliest and best examples of the work. Ōhi pottery is a characteristic soft Raku, usually having a deep rich reddish-yellow, or "honey glaze," as it is called by the Japanese. The pottery which nearest resembles it is a form made at Shizuhata, Suruga, and so closely does this resemble Ōhi that in the classical collection brought together by Japanese experts for the Philadelphia Exposition, which formed the material for the famous catalogue of the South Kensington Collection by Dr. Franks, is included a specimen of Suruga, under Ōhi, the mark having been interpreted Senki, the Sinico-Japanese way of pronouncing the characters, which should be read Shizuhata.

2362—SQUARE TEA JAR

(1682) Ōhi faïence of dense texture. Coated with a black glaze, with a deep, violet iridescence. Made at Ōhi, province of Kaga. 1750.

*Height, 3¾ inches.*

*4 x 8 inches.*

2364—TEA BOWL

(1677) Ōhi faïence of reddish brown texture. Covered with a red-brown glaze and inside incised spiral mark. Made by Chozayemon, Ōhi, province of Kaga. 1700.

*Diameter, 4½ inches; height, 3¼ inches.*

2365—WATER POT

(1685) Ohi faïence of thin reddish texture. Reddish-brown glaze, with depressed finger marks. Made at Ohi, province of Kaga. 1800.

*Height, 1½ inches; diameter, 6 inches.*

2366—TEA BOWL

(1681) Ohi faïence of soft reddish texture. Coated with a salmon-pink glaze, slightly marked with green. Made at Ohi, province of Kaga. Ohi, stamped. 1800.

*Diameter, 4¾ inches.*

2367—FIRE BOWL

(1679) Ohi faïence of soft texture. Mottled brown glaze, with rich purple iridescence. Made at Ohi, province of Kaga. 1800.

*Diameter, 5 inches; height, 3 inches.*

2368—TEA BOWL

(1678) Ohi faïence of soft reddish texture. Mottled brown, white, and green, running glaze, thickly applied. Made at Ohi, province of Kaga. 1750.

*Diameter, 5¼ inches; height, 3¼ inches.*

2369—CYLINDRICAL VASE

(1683) Ohi faïence of soft dense texture. Crudely fashioned, and covered with a brown glaze. Ohi, province of Kaga. Ohi, stamped. 1750.

*Height, 9½ inches.*

2370—LARGE GLOBULAR FIRE BRAZIER

(1684) Ohi faïence of dense soft texture. Coated with a brown-red glaze, elaborate ornamentation of chrysanthemum flowers and leaves carved in relief, and enamelled green, yellow, and white. Made at Ohi, province of Kaga. Ohi, stamped. 1800.

*Height, 10 inches.*

2371—FIRE BOX

(3000) Ohi faïence. Barrel-shaped, with cylindrical cup extending half-way down the inside, God of Longevity with his stag and wave designs carved in the paste. Covered with a deep brown iridescent glaze. Made at Ohi, province of Kaga.

*Height, 2¼ inches.*

BAIRIN.—In the beginning of the century an oven was built in the hamlet of Beppo, at the southern limit of the old castle-town of Zentokor. A Kyōtō potter was employed; and while the essays were after Kyōtō models, they were original in design and treatment. The objects were usually glazed in two colors, either green and yellow, green and purple, or claret and yellow blending at the point of juncture. The Japanese have only recorded the mark of Bairin, which means plum blossom. The mark Ōkei also occurs on this pottery. This is another poetical name, meaning nightingale. The plum blossom and nightingale are often associated in pictures. Specimens are exceedingly rare.

2373—DISH, WITH HANDLE AND SPOUT

(1789) Bairin faïence. Glazed, with splashes of yellow, green, white, and purple. Made at Bairin, province of Omi. Bairin, impressed. 1800.

*Diameter, 6½ inches.*

FUKAGAWA.—The pottery attributed to the village of Fukagawa (pronounced, in the province, Fukawa) has a finer and smoother glaze than Hagi; its color is warmer, and often pinkish in hue, this being particularly so with recent work. It is difficult to make distinctions in the older work. The pottery of Fukagawa originated from Hagi, and doubtless the same clay and glaze, or similar materials, were used. Certainly the methods were the same.

2374—TEA CUP

(1763) Fukagawa stoneware of gray texture. The outside covered with dark brown and gray glazes interwoven, the inside with grayish-blue glaze. Made at Fukagawa, province of Nagato. 1864.

*Diameter, 2¼ inches; height, 2½ inches.*

PROVINCE OF NAGATO

With the exception of the province of Bizen there is no other province in Japan where there is such uniformity in the general appearance of its pottery as in that of Nagato. A hundred—a thousand—specimens brought together only

make more striking the slight variation between them. The Japanese experts seem readily to separate the pottery of Nagato under the names of Hagi, Matsumoto, and Fukagawa, yet these distinctions become confusing when a large number of objects is brought together. The distinctions that they make between Matsumoto and Hagi are frivolous. Fukagawa certainly has a softer clay. An authority of 1700 mentions Hagi only. Ninagawa says Hagi is the general name for Matsumoto and Fukagawa; and yet Fukagawa is a separate town from Matsumoto. To make the discriminations more difficult, Nagato pottery is rarely signed; furnace-marks even are not seen; and so in many cases distinctions are impossible:

FUKAKUSA.—The general name Fukakusa is applied to pieces of pottery unglazed or lacquered bearing various marks. Whether these marks indicate separate potters, or whether they belong to the Matsumoto family, is not known. For the present they will be grouped under the general name Fukakusa.

2375—OKIMONO, DARUMA

(2397) Fukakusa faïence. Yellowish clay, unglazed and lacquered. Made at Fushimi, province of Yamashiro. Mark, Hokikudo. Shujin Kinsha (copied by the owner of Hokikudo). 1850.

*Height, 6 inches.*

2376—INCENSE BURNER

(2399) Pheasant on rock. Fukakusa faïence of gray texture. Enamelled in various colors, dark green predominating. Made at Fushimi, province of Yamashiro. 1800.

*Height, 9 inches.*

2377—INCENSE BURNER, HAWK ON ROCK

(2400) Fukakusa stoneware. Finely modelled in hard gray texture. Covered with a dull white glaze and touched with black. Made at Fukakusa, in Fushimi, Yamashiro. 1850.

*Height, 13½ inches.*

2378—COVERED BOWL

(1861) Horaku faïence. The outside covered with Nashiji lacquer, and decorated with chrysanthemums in gold, the inside covered with a gray cracked glaze. Made by Toyosuke at Nagoya, Owari. 1820.

*Diameter, 3¾ inches; height, 4¼ inches.*

2379—BOTTLE-SHAPED VASE

(1862) With lion's-head handles. Horaku faïence. Covered with a brilliant, thin green glaze, with amber-brown splash round the neck. Made by Toyohachi at Nagoya, province of Owari. 1830.

*Height, 6 inches.*

2380—OKIMONO

(2331) Miniature carp. Finely modelled in Higo porcelain and covered with bluish-white glaze. Made at Tsunadayama, province of Higo. Mark, Higo Udo-no-Kori Tsunadayama Sei, in blue. 1800.

*Height, 1½ inches; length, 3 inches.*

2381—INCENSE BOX

(2332) Figure of Daruma. Higo porcelain. Covered with a bluish-white glaze. Made at Tsunadayama, province of Higo. Mark, Tohi, in blue. 1800.

*Height, 1¾ inches.*

HIRA.—Pottery bearing the mark of Hira was made in the village of that name on the eastern side of Lake Biwa. The pieces are small, delicately made, and slightly decorated. The clay is yellowish or reddish; glaze thin and dull. Decoration, when present, in iron-rust color. It is said that a pupil of Ninsei first started the work.

2382—TEA CUP

(1791) Hira faïence of red texture. Ferns painted in black, and covered with thin opaque glaze. Made at Hira, province of Omi. Hira, impressed. 1850.

*Diameter, 3 inches; height, 2¼ inches.*

(1889) Hagi-yama faïence of soft gray texture. Covered with a soft yellow glaze. Made at Nagoya, province of Owari. Marks, Hagi-yama-yaki (imp.). 1830.

*Diameter, 5 inches.*

TŌZAN. —A pottery was established in the town of Himiji in 1826, by order of the governor. Dōhachi was invited to take charge of it. The work is not without merit, though the best feature is the vigorous decoration in blue seen on some of the bowls. The name, Tōzan, is derived from a mountain of that name from whence the clay was obtained. Specimens are rare.

2385—KORO

(1420) Himeji porcelain. White hard paste. Landscape, figures and inscription finely painted in cobalt blue under the glaze. Made at Tozan, province of Harima. Tozan, painted. 1831.

*Height, 7 inches.*

JAPANESE PICTORIAL ART  
RARE SCREENS, PRINTS AND PAINTINGS

## NOTE

THE exceptional nature of a part of this small but choice pictorial group perhaps merits special note. The dispersal of important collections of Japanese art, paintings and prints is becoming year by year more of an event in the European world. In America it has never before occurred, so far as I know, that works on such a large scale, representing the highest achievement of Oriental masters, have come up for public sale. The collector enjoyed special opportunity for acquiring rare pieces, in commanding for years the services of the noted Japanese expert and critic, Mr. Hironichi Shugio.

The specimens of central interest are, of course, the screens painted by the great Kano artists for the Shoguns, by the arch-impressionist Korin, and by the incomparable Sesshu, steeped in Chinese poetry and art and the vivid impressions of Chinese scenery. All this is the Mural Painting of the East; contemporary with the early Venetians, Raphael, and their eclectic followers. It was Korin who decorated with life-size flower-masses in gold and flowing color the sliding doors of the aristocratic yashikis of Tokugawa daimio. It was Yeitoku and Sanraku who girdled the lofty walls of Hideyoshi's palaces with painted panoramas of Chinese court-scenes, enamelled in deep glowing pigment upon colossal gilded backgrounds. And it was Sesshu who in the sombre days of Ashikaga made the stately living and reception rooms of meditating priests mirror the sacred Chinese peaks and valleys where the founders of the Zen sect had drawn from Nature herself their illuminating inspiration.

Of the prints, many rarities, especially of the earlier day when design relied more on splendor of line and cunning mosaic of contrasted tones, are to be found. Moronobu, who, like his European predecessor, Dürer, worked in black and white; the early Torii, with their closely woven "symphonies," as a modern critic might express it, in rose and green; Koriusai and Shigemasa, with their muffled gleam of strange oranges, blues and olives; and Utamaro, with his riotous delight in the personal meanings of incident and human grouping—all are here represented by brilliant and unusual examples.

2—*PRINT* MORONOBU, Seventeenth Century  
(97) Dark ink outline group of three figures. This is one of the finest early works of the famous Oishigawa Moronobu, the father of single-sheet printing in Japan. It is an early impression, altogether exceptional in sharpness and tone, and must be dated as far back as 1680. A splendid specimen. Extremely rare.

TORII KIYOMASU, Eighteenth Century

(98) This print of an actor on the early Yedo stage is a good specimen of what is called "Urushiye," having in print only the outline which has been filled in with color by hand. This style prevailed during the first half of the eighteenth century, before the invention of color-printing. Kiyomasu was one of its most celebrated masters. About 1730.

4—*PRINT*

TORII KIYONOBU, Eighteenth Century

(99) Fine Urushiye actor print in yellows, about 1725. Kiyonobu, the elder of Kiyomasu and founder of the Torii family and school, was about the first of the Ukiyo-ye artists who worked for the people and not for the Yashikis of the nobles. He became the first of a long series of draughtsmen of scenes from the theatre. He was probably the inventor of Urushiye.

5—*PRINT*

TORII KIYOTOMO, Eighteenth Century

(100) A very fine and rare example of early Urushiye, without a background. The figure is of distinguished pose; the color exceptionally rich, in yellow, rose and black. Kiyotomo is a rare early pupil of Kiyonobu. Date about 1720.

6—*PRINT*

KIYONAGA, Eighteenth Century

(101) Kiyonaga, an adopted pupil of the Torii, raised himself to the central and most powerful figure of Ukiyo-ye, by the end of the century. The decorative use in printing of many color-blocks, invented in 1765 by Harunobu, Kiyonaga softened and subordinated to realistic effects, about 1780, the approximate date of this work. It represents a Chinese scene of boys playing, and not the usual Japanese female figure.

7—*PRINT*

TORII KIYONOBU, Eighteenth Century

(102) This large Urushiye is in the narrow tall form called *Kake-mono-ye*, used for hanging against narrow panels and pillars. Its use began near the middle of the century. The date is about 1745, for such large works as this, hand-coloring being retained after the invention of color-printing. The piece is rare.

8—*PRINT* TORII KİYOTSUNE, Eighteenth Century

(103) Here the Torii, in a weaker generation, have followed the new lead of Harunobu. Date about 1772.

9—*PRINT* TORII KİYOHİRO, Eighteenth Century

(104) This well illustrates the first color-print designing in two tones, rose and green, which followed the discovery about 1742. The disposition of these few tones, with the black of the outline block and the white of the paper, is very beautiful. Kiyohiro was one of the successors of Kioyomasu. Date about 1750.

10—*PRINT* TORII KİYOMITSU, Eighteenth Century

(105) Another actor print in two colors, very finely spaced. Kiyomitsu, the greatest master of color-printing in three tones, succeeded Kiyomasu in headship of the family. Date about 1750.

11—*PRINT* KİYONAGA, Eighteenth Century

(106) Large square print of the Temmei form, but with the color faded and rubbed. The design shows Kiyonaga's power of drawing. Date about 1787.

12—*PRINT* TORII KİYOMITSU, Eighteenth Century

(107) Actor print, in two colors, pale rose and gray. A beautiful specimen, of date about 1758.

13—*PRINT* KİYONAGA, Eighteenth Century

(108) Kakemono-ye, of a tall woman with a fan. A good example of about 1782.

14—*PRINT* TORII KİYOMITSU, Eighteenth Century

(109) Kakemono-ye, originally in three colors. The design is very fine, though the color has faded. Date about 1763.

15—*PRINT* KİYONAGA, Eighteenth Century

(110) Actor print, two figures in grays and black. About 1786.

- 16—*PRINT* UTAMARO, Eighteenth Century  
(111) One of his many portraits of girls carefully done against a silvery background, about 1796. A fine specimen of this middle period of an artist who was Kiyonaga's most worthy successor as virtual leader of Ukiyo-ye.
- 17—*PRINT* UTAMARO, Nineteenth Century  
(112) A triptych, single design on three large square sheets. Shows well Utamaro's strong late drawing, but has lost some of its color. Date about 1805.
- 18—*PRINT* UTAMARO, Nineteenth Century  
(113) A strong early impression of a late work, about 1804.
- 19—*PRINT* UTAMARO, Eighteenth Century  
(114) A fine impression of one of the silvery backed portraits, and of a beautiful, rarely soft golden tone. 1796.
- 20—*PRINT* UTAMARO, Eighteenth Century  
(115) Girl with pipe, another of the same set. Fine impression. 1796.
- 21—*PRINT* UTAMARO, Eighteenth Century  
(116) Girls in kitchen, blowing fire in stove. A strong specimen of Utamaro's unique genre design, and in fine impression of warm yellow ground. About 1798.
- 22—*PRINT* KIKUMARO, Nineteenth Century  
(117) Pupil of Utamaro. About 1809.
- 23—*PRINT* SHUNCHO, Eighteenth Century  
(118) Kakemono-ye, girl in zokin. Strong work by Kiyonaga's greatest pupil. About 1790.

- 24—*PRINT* UTAMARO, Nineteenth Century  
(119) One of the same set, in triptych, as No. 18. Exceptionally strong impression. About 1804.
- 25—*PRINT* UTAMARO, Eighteenth Century  
(120) Man and two girls in holiday dress, faded yellows, against a gray silver ground. Fine impression. 1796.
- 26—*PRINT* UTAMARO, Nineteenth Century  
(121) Very late style, about 1806.
- 27—*PRINT* SHUNSHO, Eighteenth Century  
(122) Actor print, showing a young man and woman under an umbrella. By this date, 1779, the prints of theatrical scenes had passed out of the hands of the Torii, and been assumed by the Katsukawa academy, of which Shunsho was founder and head. Their color design was an extension of the method started by Harunobu. Some of the most beautiful prints to be found in Japanese art occur in this series. This is one of the finest specimens of the school, being a splendid early impression, with clear values and beautiful color.
- 28—*PRINT* SHUNKO, Eighteenth Century  
(123) Actor print of the Katsukawa type by the greatest of Shunsho's pupils. Good example. 1778.
- 29—*PRINT* SHUNYEI, Eighteenth Century  
(124) Kakemono-ye, of two fine figures in grays and purples set against a ground of architecture and landscape. Shunyei is one of the leading pupils of Shunsho, and this piece shows that the school did not confine itself to designs of actors. About 1782.
- 30—*PRINT* SHUNCHO, Eighteenth Century  
(125) Kakemono-ye. Kitchen scene with two women. Style of Kiyonaga. Good impression, quiet color. About 1790.

- 31—*PRINT* SHUNTEI, Nineteenth Century  
(126) Actor. Shuntei was probably a pupil of Shunko, and shared in the great degeneration of the early nineteenth century. About 1815.
- 32—*PRINT* SHUNCHŌ, Eighteenth Century  
(127) Set of two prints, mounted. Fine soft colors. About 1778.
- 33—*PRINT* SHUNCHŌ, Eighteenth Century  
(128) Large portrait heads of actors. A rare and late subject for this artist. Fine Utamaroish color, in gray and orange pink. About 1794.
- 34—*PRINT* TOYONŌBU, Eighteenth Century  
(129) This fine two-color print goes back to the days of Kiyohiro and Kiyomitsu. It is a rarely clear impression, and an unusually close composition with its crossing of hands. Toyonobu was one of the greatest leaders of the middle of the century, and the master of the early Utagawas. A noble example. Date 1752.
- 35—*PRINT* HARUNŌBU, Eighteenth Century  
(130) Three figures. Harunobu was the man who invented the many color block process. He introduced backgrounds, atmosphere, and soft intermediate tones. This is a good example, with strange coloring in greens and olives. About 1770.
- 36—*PRINT* KORIUSAI, Eighteenth Century  
(131) Boys playing at archery. Fine early impression, in beautiful colors. Koriusai was the chief pupil of Harunobu. About 1769.
- 37—*PRINT* KORIUSAI, Eighteenth Century  
(132) Group of small square sheet. Color faded. About 1778.
- 38—*PRINT* YEIZAN, Nineteenth Century  
(133) Group of two girls. About 1816.

- 39—*PRINT* YEIZAN, Nineteenth Century  
(134) Hair arranging. Good action. About 1820.
- 40—*PRINT* YEIZAN, Nineteenth Century  
(135) Ordinary example. 1820.
- 41—*PRINT* YEIZAN, Nineteenth Century  
(136) Yeizan was unfortunate to fall into the most degenerate period, when ugly types and careless dressing were fashionable. His color, as here, sometimes redeems him.
- 42—*PRINT* YEISHO, Eighteenth Century  
(137) Belle with two attendants. A very fine example of a rare man, who is always interesting. He was a pupil of Yeishi, but very original. This is a magnificent print, of clear impression, and brilliant effect of rose against black. About 1799.
- 43—*PRINT* YEIRI, Eighteenth Century  
(138) Kakemono-ye. Two girls walking, fine long lines. Yeiri, also a pupil of Yeishi, is as original as Yeisho. His work is influenced by Hokusai. The color here is faded, but fine in effect. An unusual print. About 1797.
- 44—*PRINT* YEICHO, Eighteenth Century  
(139) Yeicho is the third of Yeishi's famous pupils. This large head is even more striking than Utamaro's, on which it is based. Good impression. About 1798.
- 45—*PRINT* YEISHI, Eighteenth Century  
(140) Girl writing on fan. Color good, on pale yellow ground. Yeishi first followed Kiyonaga, then branched out as a rival to Utamaro. About 1798.

- 46—*PRINT* YEISHI, Eighteenth Century  
(141) Girl leaning back with pipe in hand. Another of the same set, even finer. The lines are fine and dark, set against a lovely scheme of peachy colors. About 1798.
- 47—*PRINT* HOKUSAI, Nineteenth Century  
(142) Landscape; one of his Fuji series. Color blue and orange.
- 48—*PRINT* HOKUSAI, Nineteenth Century  
(143) Landscape; high bridge. Bluish.
- 49—*PRINT* HIROSHIGE, Nineteenth Century  
(144) Fishes swimming. About 1845.
- 50—*PRINT* YEISEN, Nineteenth Century  
(145) Figures. Yeisen was pupil of Yeizan. About 1820.
- 51—*PRINT* SHIGEMASA, Eighteenth Century  
(146) Boy playing on a drum. Shigemasa was one of the greatest masters of Ukiyo-ye, contemporary with Harunobu and Shunsho. His drawing, as here, is second only to Kiyonaga's. This is a remarkable impression, and altogether a most splendid print. 1778.
- 52—*PRINT* SHUNMAN, Eighteenth Century  
(147) Women beating cloth, in white and gray. Shunman, originally pupil of Shigemasa, fell, as here, under the influence of Kiyonaga. This design is good in line. About 1786.
- 53—*PRINT* KUNINOBU, Eighteenth Century  
(148) Kakemono-ye. Boy and girl walking with lantern. Pupil of Harunobu. About 1770.

- 54—*PRINT* SHUNSEN, Nineteenth Century  
(149) Genuine, but ordinary. About 1810.
- 55—*PRINT* TOYOKUNI, Nineteenth Century  
(150) Large actor print. From about 1790 the delineation of theatrical subjects passed from the hand of Shunsho to that of Toyokuni. The olive tone of this is good. About 1800.
- 56—*PRINT* HARUNOBU, Eighteenth Century  
(151) Small square; greens and purples. Late work. Color a little cold and faded. 1772.
- 57—*PRINT* SHIGEMASA, Eighteenth Century  
(152) Children playing with dolls. A most beautiful specimen of Shigemasa, in the clear green Harunobu coloring. A very early and rare impression. About 1771.
- 58—*PRINT* SHIGEMASA, Eighteenth Century  
(153) Children rolling a snowball. One of same series, and similar qualities. About 1771.
- 59—*PRINT* TOYOKUNI, Nineteenth Century  
(154) The first Toyokuni lived till quite a late date, contemporary with Yeizan. About 1812.
- 60—*PRINT* TOYOKUNI, Eighteenth Century  
(155) This is one of Toyokuni's earlier works, in which he is more dignified, still under the influence of Kiyonaga. The patterns on the court dress are specially fine. About 1796.
- 61—*PRINT* YEISHIO, Eighteenth Century  
(156) Kakemono-ye. About 1797.

- 62—*PRINT* SHUNCHO, Eighteenth Century  
(157) Kakemono-ye. Typical. Lines of motion good. About 1792.
- 63—*PRINT* SHUNCHO, Eighteenth Century  
(158) Kakemono-ye. Time of Kiyonaga. Good purples and grays. About 1788.
- 64—*PRINT* KORIUSAI, Eighteenth Century  
(159) Group in small square sheet. In spite of being somewhat rubbed, the color is specially fine. About 1774.
- 65—*PRINT* SHUNCHO, Eighteenth Century  
(160) Kakemono-ye. Though the color be rubbed, the line is specially good. About 1790.
- 66—*PRINT* KORIUSAI, Eighteenth Century  
(161) Kakemono-ye. In this style of narrow composition Koriusai is the greatest master of Ukiyo-ye. It specially suited his genius, and this is the high-water mark of his work in it. The two tall figures are most dignified in line, and the warm rosy tones, unusually fresh, exhibit the master's powers as one of the greatest colorists. And this is the moment of his greatest power, the year 1778.
- 67—*PRINT* KUNIYOSHI, Nineteenth Century  
(162) After Yeizan, Kuniyoshi, pupil of Toyokuni, is one of the leaders of the revival.
- 68—*ALBUM OF PRINTS* HOKUSAI, Nineteenth Century  
(163) A set of five sheets representing ghosts. This late work, in rich colors, shows well the master's power of imagination. The set forms one of his rarest works, but well known to connoisseurs, forming a group that is now very seldom found unbroken. It is in perfect condition.

(161) An album of actor prints, falling between 1810 and 1830.

(165) This album collection forms a portion of the illustrations in color to a well-known book of Harunobu's of about 1768.

(166) A set of three kakemone paintings of flowers. These are rough specimens, dark and somewhat coarse, but rich in tone.

(167) Painting on kakemono of a blossoming plum-tree.

(168) Two kakemono of figures. Probably by some pupil of the school of Cho Densu.

(169) Rough painting on panel of a dove with bamboo. An ordinary specimen of the Tanyu school.

(170) Painting on panel of heron and iris.

(171) Two painted landscapes mounted on panels. These are in ink, and for both subject and execution show the famous old work of the great Tanyu at its best for vividness and beauty. They are rarely fine paintings of the Kano school, and are to be ascribed to Tanyu's strong middle age, about 1645.

(NOTE.—The above will be sold separately, one with the privilege of the pair. One represents Fuji, the other a mountain landscape in snow.)

- 77—*PRINTS* HIROSHIGE, Nineteenth Century  
(172) A set of eight prints, showing views of Lake Biwa. This set is rarely found intact.
- 78—*PRINT* KIYONAGA, Eighteenth Century  
(173) Print showing the interior of a shop. About 1790.
- 79—*PRINT* SHUNZAN, Eighteenth Century  
(174) Print, small square. Shunzan as a designer of prints followed Kiyonaga. About 1795.
- 80—*PRINT* KORIUSAI, Eighteenth Century  
(175) Kakemono-ye. Good specimen. 1779.
- 81—*PRINT* Probably TOYOKUNI, Eighteenth Century  
(176) Kakemono-ye. Good, with fine grays. Shows the effort of the pupils of all schools to come over and adopt the experiments of Kiyonaga at this date, 1782.
- 82—*ALBUM* KANO PUPIL, Nineteenth Century  
(177) Small paintings of landscapes, birds and fish.
- 83—*ALBUM* GIOKUSEN, Nineteenth Century  
(178) Small sketches of various subjects. Giokusen is one of the living representatives of the Shijo school in Kyoto.
- 84—*ALBUM* UNKNOWN, Eighteenth Century  
(179) Portraits of the thirty-six poets.
- 85—*ALBUM*  
(180) Samples of bits of brocade, mostly of the nineteenth century.

on a key from black to gold is quite characteristic of the gorgeous palaces of Hideyoshi. The painting of the folding screens forming part of the subject is masterly. The drawing of the seabirds on these is quite like Sanraku. The bits of ink landscape are in the style of a late pupil of Motonobu. The work may be by several hands, of whom Sanraku is probably one.

94—SIX-PANELLED SCREEN KORIN, Seventeenth Century

(44) Korin was the great impressionist of his day, who worked for the Tokugawa daimios. This is a powerful and unusually large work by Korin. The lines are like the lead inlay of his boxes, magnified. The green touches are like splinters of malachite. This form of tree is borrowed from the school of Tanyu, being quite like the plum-trees of the seventeenth century still growing in Count Katsu's garden. The execution is purely Korin's. One of the first examples of this master in America.

95—TWO-PANELLED SCREEN MORIKAGE, Seventeenth Century

(45) Blackbirds flying over trees massed in heavy snow. A large moon shines above. The breadth and power of this work show the school of Kano Tanyu at its best. Morikage was Tanyu's greatest follower, and this is typical of Morikage at his best, and in his rise to mural scale.

96—TWO-PANELLED SCREEN KANO SOSHU, Sixteenth Century

(46) This is a fine example of the richly colored figure work used by the school of Kano Yeitoku on Hideyoshi's palaces. The subject and all the details are of course Chinese. Though not by Yeitoku, it must be assigned to one of the strongest of the school, probably to Soshu, Yeitoku's older brother.

97—TWO-PANELLED SCREEN KIOSAI, Nineteenth Century

(47) A crow with a hint of waves below a rock. Rough painting on coarse cloth. Kiosai was a humorous painter, a pupil of the third Kano Yeitoku, who survived late into the century.

(48) Sesshu is the greatest master of the black and white school of painting which came into Japan in the fifteenth century as a precious legacy from the great Sung Dynasty of China. Great in all subjects, he was especially transcendent in landscape, building his work on the Chinese *Kakei* of Sung. He went to China and studied from the very scenes where *Kakei* painted. He so surpassed the contemporary artists of Ming that the Chinese Emperor invited him to paint on the walls of his palace. And yet he was no mere copyist of any artist's style. He stands as an independent master side by side with the Sung leaders. He has probably had more influence on the whole subsequent course of Japanese art than any other one man.

Genuine works by Sesshu, even small *kakemono* and album pieces, have always been rare, and esteemed as the gems of Japanese collections. Large examples like this on screens showing Sesshu's mural scale, have been regarded by Japanese as the greatest treasures of their national art. That is why so few have reached foreign countries. There are only two others in America, a pair in the Boston Art Museum collection; I do not know of any in Europe. This is said to have belonged to Prince Tokugawa, the feudal lord of Owari.

This shows a rich Chinese mountain landscape, with all the accessories of tree, rock, distant range, cloud, river, hamlet, temple, scholar and peasant. It is a complete panorama of the sort of romantic life that surrounded the court of Sung at its southern capital of Hanchow in the twelfth century. This, too, is in the *Shin* or "true" style of execution, which attempts the full rendering of parts, and is not content with a rough broad impression. Strong oppositions of values are not aimed at, rather does it bring out the fulness and variety of nature's soft gray textures, subtly differentiated as in the middle tones of a clear photograph. Each smallest passage is a realistic study, though falling into place in the grand panorama. When this work was first exhibited at the Art Museum of Boston, in 1894, I wrote of it in the catalogue: "The grand masses of its toppling crags, the stormy waves of its distant peaks, the feathery breadth of its middle foliage, and the stern outlines of its foreground trees and temple-roofs, are typical

of the greatest qualities in Sesshu's work." The signature is genuine and strong.

99—*SIX-PANELLED SCREEN* School of KANO KOI, Seventeenth Century

(49) This landscape screen shows remotely the influence of Sesshu, as it had come down through one hundred and fifty years in the works of Masanobu, Motonobu and Yeitoku. Koi was the pupil of Yeitoku's eldest son, Mitsunobu, and this is by one of Koi's pupils.

100—*PAINTINGS ON TWO PANELS* KORIN, Seventeenth Century

(50) These chrysanthemums and pine-tree show the ordinary quality of Korin in smaller work, not rising to the exceptional grandeur of the screen No. 44.

101—*PAINTINGS ON TWO PANELS* SOSEN, Nineteenth Century

(51) Sosen was perhaps the greatest of the animal painters of the realistic or Shijo school, who followed Okio in the eighteenth and nineteenth centuries. Here is a new method in painting furry surfaces never tried by the old Kano masters. Sosen is world-famous for his monkeys, but he drew all kinds of animals, birds and landscapes. Here we have a very fine example of his monkeys, and also a cat which is very rare in his works. The foliage is boldly drawn. These pieces are in his late manner, and of style midway between his broad and minute methods of execution.

102—*PAINTING, ON A PANEL* HOITSU, Nineteenth Century

(52) Hoitsu kept up the traditions of the Korin technique down to modern times, but aimed more at grace, having been influenced by Okio's realism. This small painting of Chrysanthemums, originally made for a fan, has been mounted in kakemono form for better preservation. The execution is typical, clear and crisp.

103—*PAINTING, ON A PANEL* MORONOBU, Seventeenth Century

(53) This is an example of the Ukiyo-yo or genre school of the common people, which loved to depict the reigning belles of the

hour. It is typical of the late style of the seventeenth century, but is probably not by the great Moronobu who founded the Hishigawa branch of Ukiyo-ye, but by one of his pupils. The former wrote the last part of his name, "nobu," with quite a different character from this "nobu" meaning "faith." The signature seems genuine, but the style is weaker than that of the founder.

104—*PAINTING, ON A PANEL*

HOKKEI, Nineteenth Century

(54) This unsigned work, showing a female dancer, is doubtless by Hokkei, one of Hokusai's best pupils, though in a rough style. Its date must be about 1815.

105—*KAKEMONO*

KORIN, Seventeenth Century

(55) A bit of Mount Fuji, with green trees below. In Korin's very rough style.

106—*KAKEMONO*

SOSEN, Nineteenth Century

(56) Deer under a pine tree. A very delicate and pure example of Sosen's work, in his most realistic style. Deer are the animals he loves best after monkeys. The tree drawing is strong and crisp.

107—*KAKEMONO*

KANO SANSETSU, Seventeenth Century

(57) Rough landscape. Chinese style, in ink. This is in the very late manner of Sansetsu, and influenced in composition by Koi. (It is the companion piece of No. 115, and ought to make a pair with it.)

108—*KAKEMONO*

Design by SHUBUN, Fifteenth Century

(58) This is a pure Chinese landscape of the Sung type, with garden below, wild geese on marsh in middle, and fishing boats in distance. It is a copy by some Kano of the nineteenth century.

(59) This is the famous old Chinese subject called "The Three Laughers." It is in the priestly style of the Zen sect, probably by some monk of the late fifteenth or early sixteenth century.

(60) This Chinese landscape, in slight color over ink, though suggesting Shohaku, must be a work of the recent revival, the "Kang-wakwai" school, of which the lamented Hōgai was the leader.

(61) Painting in full color of two girls supporting a Chinese princess. Tessan was one of the greatest pupils of Okio, the founder of the realistic "Shijo" school of Kioto. The outlines are typical of Shijo drawing; the action fine. This is a superior work of the master.

(62) A wonderfully beautiful and complete landscape, though but a few inches square. A line of small green pines on a shore leads up to a drum bridge in the distance. Okio was one of the most original reformers in modern Japanese art. He came at a time when the ancient national schools had withered away, and every kind of extravagant experiment was being tried. He chose a new lead in realism, and invented, with the suggestion of the old Chinese realists of Yuen, an adequate technique that aimed to render the very texture of things. In all subjects he was famous, but in landscape he was most original. Unfortunately these are rare among his works. So great was his influence, even during his life, that it was said that out of a hundred paintings claiming to be his ninety-nine were forgeries. The proportion is greater to-day.

This is a wonderful example of Okio's most delicate landscape work on silk, in this size of extreme rarity. The signature, so often forged, is most beautifully written, and might serve for a standard.

113—*KAKEMONO*

SOSEN, Nineteenth Century

(63) Another genuine monkey drawing by Sosen, but this time in his rough style, and more formal in execution. The master preferred, for his own taste, to work, as here, on paper.

114—*KAKEMONO*

School of KANO MOTONOBU, Sixteenth Century

(64) A bit of flower drawing, evidently a fragment cut from an old screen painted by a pupil of the Kano patriarch at the end of the sixteenth century.

115—*KAKEMONO*

KANO SANSETSU, Seventeenth Century

(65) A rough ink landscape of Chinese cliffs and temples, in Sansetsu's very late style. (Evidently forming one of a set with No. 107.)

116—*KAKEMONO*

Copy from KANO MOTONOBU, Nineteenth Century

(66) This ink landscape on a fan exhibits a fine design of Motonobu, but in a comparatively recent copy.

117—*KAKEMONO*

Copy from KAN NAONOBU, Nineteenth Century

(67) Such rough designs of swallow and willow are common in Naonobu's work. This is a copy by some recent Kano pupil.

118—*KAKEMONO*

KANO YOSEN, Eighteenth Century

(68) Rough ink drawing of wild geese and moon, very plain, but poetical and full of the feeling of space. The birds fly over flooded marshes. A good genuine specimen of this artist.

119—*KAKEMONO*

UNKNOWN, Fifteenth Century

(69) This is a Buddhist altar-piece, representing the Bodhisattva Monju on a lion. It is a rough work of the late Buddhist period, and in parts retouched.

(70) This is a beautiful old Buddhist altar-piece, showing in minute delicate painting the buildings and grounds of the ancient Shinto temple of Kasuga in Nara. The small sacred deer below are delicately painted, as also the Tosa trees in the lower right corner. Their values lie clear and soft like a delicate mosaic. The style is quite like that of Keion, one of the founders of the Tosa school, but from its peculiar tenderness may be better ascribed to the man who was probably his nephew, the great Tsunetaka. Outside of Boston, such early specimens are extremely rare in America.

(71) This is the sort of mystic altar-piece called "Mandara." Here, too, there is a garden, with cherry-trees and bridges, showing the ancient style of Japanese landscape before Sesshu and the Kanos. This piece has been attributed to Tosa Hirochika, but is perhaps not identifiable.

(72) This is a still more mystic Mandara, supposed to hold in itself the great power of nature spirits, symbolized by the many foxes. It is an interesting typical specimen, but not individual enough to be ascribed to any of the great masters.

(73) An altar-piece of the standing Buddha of Healing, Yakushi. The tracery, mostly in gold, is rather coarse but skillful, showing a late period of the Buddhist schools. The Kose school of religious painters has descended from Kanaoka of the tenth century, and in its late work is always more formal than the contemporary Tosa.

(74) This shows an old Chinese Emperor, of Tang, amusing himself in his palace grounds. It is a subject much used for mural

work by the painters of the upstart Hideyoshi. It has been attributed to Mitsunobu, the nephew of Soshu; and indeed their styles are very like. This is evidently a single panel torn from a screen.

125—*KAKEMONO* Chinese Artist of Ming, Fourteenth Century

(75) It represents a Semin, or Taoist magician. It imitates the style of the famous Ganki of Yuen, without being a direct copy.

126—*KAKEMONO* School of KANO MOTONOBU, Sixteenth Century

(76) Ink sketch, two birds on rock, with bamboos and camellia flowers. This is not a copy, but a rough typical school work by some disciple of the master.

127—*KAKEMONO* School of SOTATSU, Seventeenth Century

(77) A beautiful strong, rich painting of large red and white Japanese poppies. This school, identified with the name of Korin, and expanding the suggestions of old Tosa work to modern mural scale, executes the greatest flower painting in Japanese art, and perhaps in the world. Sotatsu is an early one of its four great masters, and this, though not a copy, is a fine contemporary work in his style.

128—*KAKEMONO* Pupil of KANO UTANOSUKE, Sixteenth Century

(78) A typical landscape bit of the early Kano school, in the manner which combines ink with color. Utanosuke was the famous younger brother of Motonobu, and especially a painter of landscape and flowers. This is almost good enough to be his own, but is more safely to be ascribed to prominent pupil.

129—*KAKEMONO* UNKNOWN, KANO, Seventeenth Century

(79) Flowers and birds of the four seasons. It follows the change in the Kano style inaugurated by Tanyu, but is amateurish and not identifiable.

130—*KAKEMONO* School of KWAZAN, Nineteenth Century  
(80) Fishes. Very rough. A sample of modern Chinese impressionism in Japan. Kwazan was one of its leaders. We suppose this to be a copy.

131—*KAKEMONO* KEIBUN, Nineteenth Century  
(81) Small brown bird on a mimosa branch. Keibun was one of the famous masters of the Okio school, and especially celebrated for flower drawing. This is an ordinary specimen, but probably genuine.

132—*KAKEMONO* HARUSHIGE, Eighteenth Century  
(82) A Yedo belle, in the style of Ukiyo-ye. Harushige is not well known among the masters of this school, but it is a good work, and to be dated as far back as 1710, just after Moronobu.

133—*KAKEMONO* KATSUNOBU, Eighteenth Century  
(83) A Yedo belle, in costume specially loved by this artist, showing fine woven pattern of old Japanese poems on white panels. Katsunobu is well known, but not by so early a work as this, about 1710.

134—*KAKEMONO* CHOSHUN, Eighteenth Century  
(84) Another typical Ukiyo-ye belle, of a slightly later date, about 1715. Choshun is the most celebrated master of this school at this period, who devoted himself to painting and neglected prints. Signature genuine.

135—*KAKEMONO* CHOSHUN, Eighteenth Century  
(85) Girl looking up, in red dress of pattern in blue and green leaves. It is an odd design, the attitude being specially fine. This must date nearly as far back as 1705, and is more like the Torii school than Choshun's ordinary work. It is not signed, but is to be ascribed to Choshun.

- 136—*KAKEMONO* KWAIGETSUDO, Eighteenth Century  
(86) One of the largest and strongest paintings of women, of this interesting period, about 1710. The large blue patterns of plum branches thrown across the red and white ground are typical of this well-known master's bold work.
- 137—*KAKEMONO* School of HOKUSAI, Nineteenth Century  
(87) This painting of an eagle is too coarse for the master, and must be either a copy or the original work of a pupil.
- 138—*KAKEMONO* School of HOKUSAI, Nineteenth Century  
(88) Small painting of a sparrow and a pink. This is a little too hard for Hokusai himself, and is doubtless the work of a pupil.
- 139—*KAKEMONO* HOKUSAI, Nineteenth Century  
(89) Tall girl of the Bunkwa type in quiet color, looking at a flying swallow. This is a fine, genuine specimen of Hokusai's work just after he takes Hokusai for his new name. We may date it about 1810. It is the period when Hokusai executed his finest illustration for novels, and this is like one of his printed figures enlarged and colored. Hokusai was as celebrated for his paintings as for his prints.
- 140—*KAKEMONO* School of HOKUSAI, Nineteenth Century  
(90) A rough study of sparrows dropping across a clouded moon. It is signed "Taito," a name that Hokusai took at one period, but is not a genuine work by him.
- 141—*KAKEMONO* FUJIMARO, Nineteenth Century  
(91) Girl. Fujimaro, a contemporary of Hokusai, was one of the better known pupils of Utamaro. This is good and typical, and to be dated about 1813.
- 142—*KAKEMONO* JORIU, Nineteenth Century  
(92) Lady playing with a dog. Joriu, a female painter, is an Ukiyo-ye offshoot of the Shijo school, being a pupil of Nagaku, the pupil of Okio. It shows a modern Kioto branch of Ukiyo-ye, and Kioto costume.

143—*KAKEMONO*

Probably KIODEN, Nineteenth Century

(93) Rough ink profile sketch of a girl, about 1802. Kioden, a famous writer and novelist of this day, had in earlier years been trained as the painter Kitao Masanobu by Shigemasa. In later life he occasionally painted, in changed style, under the name Kioden. In this example his name is signed only to the literary inscription above the picture, but one need not hesitate to ascribe the sketch also to his pen.

144—*KAKEMONO*

IPPO, Nineteenth Century

(94) Strong rough drawing of crow and persimmons. Ippo was one of the strongest of the late Kioto artists of the Shijo school, being probably a pupil of Tessen. Unknown in Tokio up to 1880, his work is now much sought for by Japanese collectors.

## ETCHINGS

### APPIAN, ADOLPHE

"My admiration for Appian's work as an etcher (he is a charming painter also) was already great several years ago, but the more I see how rare his qualities are in contemporary art, or in any art, the more I feel disposed to value them." —*P. G. Hamerton*, "Etchings and Etchers," p. 202.

249—*THE BRIDGE*

Proof before all letters on Japanese paper;

also

*THE FARM BY THE RIVER*

After the painting of Théodore Rousseau. Proof before all letters, on Holland paper.

Two pieces, one lot.

### BEAUVÉRIE, C.

250—*LES CHIÉVRIERS*

After the painting by Corot. Signed artist's proof, on vellum.

### BRACQUEMOND, FÉLIX

All the medals, including the Grand Medal of Honor, have been awarded him for his etchings. In 1882 he was made Chevalier of the Legion of Honor, an Officer of the same order in 1889; and was

also appointed a member of the Jury on Etching at the Universal Exposition in that year.

251—*THE KNITTING LESSON*

After the painting by J. F. Millet. Signed. Remarque proof, on Japanese paper. In the autograph of the etcher à *mon ami Hédouin, Bracquemond*.

252—*LANDSCAPE WITH A HORSEMAN*

After the painting by Corot. Proof on Holland paper. In the handwriting of Bracquemond. *P. Hédouin* in lower right corner.

CASANOVA, A.

A contemporary painter and etcher.

253—*THE COQUETTE*

Original etching. Proof before all letters, on Japanese paper.

CHAUVEL, THÉOPHILE

“Chauvel est le véritable graveur de paysage; et il a élevé la graveur de paysage à la hauteur de cette chose spéciale qu'on appelle une *estampe*.”—*Henri Beraldi*.

254—*LE BATELIER*

After the painting by Corot. Delteil, No. 93. Signed artist's proof, on vellum. Very fine impression.

255—*L'ORAGE*

Signed artist's proof, on Holland paper.
- THE WHITE HORSE*  
Signed artist's proof, on Holland paper. Two pieces, one lot.

JACQUE, CHARLES

"Ce que le distingue c'est la poésie pénétrante de ses paysages, c'est le charme intime de ses fermes, de ses cabarets, de ses paysanmeries."—*Ch. Blanc*, "Gazette des Beaux Arts," 15 février, 1861.

263—*LORAGE*

Guiffrey, No. 212 *bis*. Fourth state, with the remarque—*Janvier* 1866—before the indications of white clouds in the sky were effaced by new work. Signed artist's proof, on India paper. In the autograph of the artist, 4<sup>e</sup> état, *la seule épreuve de remarque qui reste*. Very fine impression.

264—*TROUPEAU À LA LISIÈRE D'UN BOIS*

Guiffrey (continued), No. 238. Signed artist's proof, on Holland paper. Fine and early impression.

265—*CLAIR DE LUNE*

Guiffrey (continued), No. 243. Only state. Signed artist's proof on toned, charcoal paper. Fine and harmonious impression. The tint of the paper adds greatly to the effect of moonlight.

266—*LISIÈRE DE FORÊT—EFFET DE SOIR*

Guiffrey (continued), No. 245. First state (of 5). The pure etching. Signed artist's proof, on Holland paper; marked by the artist. No. 1 *premier état* (probably the first impression from the plate). Very rare, and of great beauty.

267—*LA BERGERIE BÉARNAISE (INTÉRIEUR DE BERGERIE)*

Guiffrey (continued), No. 246. First finished state. Beautiful impression, on Japanese paper. This famous etching won for M. Jacque the Medal of Honor at the Paris Exposition of 1889. One hundred impressions only were printed, and the plate was then destroyed.

"Superbe pièce."—*Henri Beraldi*.

268—*LE BERGER*

Signed artist's proof, on Japanese paper. In the autograph of the artist, 4<sup>e</sup> état, très belle épreuve de ma collect<sup>n</sup> en noir. Ch. Jacque. A magnificent impression.
