

# Wiki Loves The Olympics [Gamification in Wikipedia]

Back in 2016 we had an idea: creating a contest to improve the existing articles about the Olympic Games!

Why? This type of events are very well-known around the world, and they can potentially attract a huge audience. People during these events tend to visit more articles about the athletes and about the event itself. If the information supplied is accurate and up-to-date, they will get a good impression of Wikipedia.

Who? The contest is organized by Iberocoop.

What? Improving the quantity and quality of articles about the Olympic and Paralympic Games, with a special focus on articles about paralympic athletes (and about sportswomen in 2016).

How? Special categories and prizes awarded to editors of paralympic and sportswomen articles, for all participating languages.
