# To Friends and Gustomers.

GAIN I have the pleasure of presenting each one of my old customers and friends, and also the 10,000 new ones added to my list last year, a copy of my Annual Catalog. Eleven years ago I issued my first price list of seeds. It has been my aim from the first not only to gain new patrons, but by furnishing the very best of seeds and fair and liberal dealing to make it for their interest as well as mine to continue to send me their orders; and it is with real pleasure that I note the annual return of nearly all of those who dealt with me during the first years of my business. Their names have become so familiar from the frequency of their orders they seem like old friends. I have received thousands of pleasant letters containing expressions of the satisfaction and success of customers with the seeds I furnish and it would have been a pleasure to me to reply to each one had time permitted; but an acknowledgement in this general way, through the medium of my Catalog must suffice. I am always glad to hear of the success of my patrons, and feel encouraged to make every effort to keep up the high reputation my seeds have already won and improve them in every way where improvement is receible.

every effort to keep up the high reputation my seeds have already won and improve them in every way where improvement is possible.

Sometimes I receive letters complaining of failure to a greater or less extent, and as a rule those who have the worst failure almost always blame the seeds and have the most confidence in their own abilities; old gardeners and those who have had much experience in sowing seeds will know that no matter how good and fresh the seeds may be, failure will sometimes occur from causes entirely beyond human control; and unfortunately, there are some people so careless that they never take proper care of anything and never succeed with seeds or anything else. I hope I have but a few of this class among my customers, because I want all to succeed with the seeds I send out, for a single failure of this kind does me more harm than a number of successes do good. Cases have come under my notice of persons buying the most delicate seeds that require very careful management and then sowing them broadcast, much as a farmer would turnip seed! They might as well have thrown them into the fire. In December of each year I make careful tests of the germinating qualities of every variety I offer and all that do not germinate properly are at once burned or thrown away, and it is almost impossible that any seeds I send out will fail to grow from any fault of the seeds.

Most of the flower seeds sold in this country are imported from Europe, and until within a few years

Impossible that any seeds I send out will fail to grow from any fault of the seeds.

Most of the flower seeds sold in this country are imported from Europe, and until within a few years it was supposed that they could not be grown in America, but it has been found that seeds of many of our most popular flowers can be produced here of much better quality than the European seeds, provided the necessary skill and care is used in growing them. The amount of time, skill and care necessary to produce seeds of the highest quality cannot be understood or appreciated by those not acquainted with the details of the business. I have made a specialty of growing flower seeds for the past eleven years, selling them first to city dealers at wholesale, and am now one of the largest growers in America. I have succeeded in greatly improving many of our most popular varieties, and among those that will be found much superior in quality to the seeds usually sold by dealers, I desire to call particular attention to my Asters, Balsams, China and Japan Pinks, Pansies, Petunias, Phlox, Double Portulaca, Stocks, Verbenas and Double Zinnias, which have been awarded numerous first premiums at fairs where exhibited. Such varieties as do not perfect their seeds in this climate and experience has shown are better for being grown elsewhere, I import from the most reliable growers of England, Germany and France.

experience has shown are better for being grown elsewhere, I import from the most reliable growers of England, Germany and France.

It is my constant study to furuish the Best Seeds at the lowest prices, which will be found in many cases to be from 20 to 50 per cent. lower thau those of city dealers. The figures on the right of the columns give the prices of each variety per packet in cents. My packets are large, each packet containing from a hundred to a thousand seeds, except some of the new or very scare varieties or those with very large seeds, which necessarily contain less. Please compare my prices with those of city dealers, and note the liberal discount I make on large orders. All seeds offered will be sent to any part of the U. S. by mail, postage paid, at the prices annexed, and I will guarantee safe delivery at your post-office.

U. S. by mail, postage paid, at the prices annexed, and I will guarantee safe delivery at your post-office. How to Send Molley.— Send all sums of one dollar or over by Post Office Money order, which is always the best way if it can be obtained: but if a money order cannot be obtained at your office, remit in bank bills and get the letter registered. The expense of sending by either of the above ways will be eight or ten cents, and may be selected in seeds from the catalog. Have all Money Orders and Postal Notes made payable at Amerst, Mass. Sums less than one dollar may be enclosed in a letter and sent at my risk. Always remit sums of less than a dollar by the new Postal Notes if possible, but if these cannot be obtained at your office, then use good, new 1-cent aud 2-cent postage stamps for change, but if stamps must be used do not detach or stick them to the letter, but send them just as purchased, and as I receive many more stamps than I can use, and have to sell them at a discount, do not send anything but sums of less than a dollar in stamps unless extra stamps are sent at the rate of 8 cts on each dollars worth. If customers will send just even dollars in bills, when they cannot obtain money orders or notes, I will return the change to them in 2-cent stamps with seeds. A sufficient amount to pay for all seeds ordered should be enclosed as it is my invariable rule to send seeds only to the value of the remittance. Canadian stamps are of no value to me and will not be accepted, but Canada bills and fractional currency are always acceptable. Twenty-five cents or less in silver can be sent safely in a letter, in a strong envelope, if pasted securely between two sheets of paper to prevent its cutting through the envelope, but never send larger suns than this in silver as it requires extra postage and is almost sure to cut through the envelope and become lost.

I take the greatest care in filling orders, yet it is impossible, in the hurry of the busy season, to avoid occasional mistakes, and where errors occur,

can fill it without further delay.

In making up your order be sure that Name, Post-office, COUNTY, and State are plainly written on every order. Every day during the busy season I receive letters with one and sometimes all of these important items wanting; and then all I can do is to wait until I receive scolding letters and am perhaps called hard names, when the fault is entirely with the customer.

Early Orders: The seed trade of a whole year is crowded into a few months, which makes a great rush of business, and it will be a great accommodation to me if all who can conveniently do so will send their orders as early as possible. The seeds will then be on hand when wanted for sowing and customers will be sure of getting just what is ordered, for stocks of some of the most desirable varieties often become exhausted late in the season varieties often become exhausted late in the season.

My Flower Gardens are always open to visitors, and friends are cordially invited to come and inspect the flowers from which I save seeds. Acres of Asters, Pansies, Petunias, Pinks, Phlox, Verbenas and scores of other varieties are, when in full bloom, a grand sight, worth going many miles to see. A new post-office has been established near my seed farm, and all communications should be addressed as below in future. Have all money orders, etc., made payable at AMMERST.

# ÷30-CENT÷COLLECTION÷OF÷SEEDS.∻

Every year I grow some of the best varieties in extra large quantities, and offer them in collections for about a quarter of the regular price. I have filled orders for over ONE HUNDRED THOUSAND of these collections, containing more than a million papers of seeds, and have received many thousands of letters containing expressions of the satisfaction they have given the purchasers; and I bave the pleasure of knowing that many who never cultivated a flower before have been induced to begin their culture by my cheap collections. The past season I grew the varieties named below in large quantities especially for this collection. All are of the choicest quality in every respect. Each packet contains from 50 to 500 seeds, nearly all 100 or more. The collection of fourteen packets will be sent to all who order it for only 30 cents. I am sometimes asked to make changes in the varieties, and while I am willing to accommodate customers in every way possible, yet in this I cannot do so, as I shall have them put no ready for mailing before the busiest part of the season. It is on this very condition of no change in connection with very large sales that I can offer them for such a small sum.

Pansy, New Diamond Strain, mixed varieties, This packet contains from 25 to 40 seeds of the Diamond Strain, the finest ever offered, and 25 to 40 seeds of my old strain, which has been highly praised in the past.

Rose Aster, mixed colors

Holichrysum, mixed colors. Godetias, new varieties mixed. Mignonette, new Giant White. Phlox Drummondii grandiflora, all colors.

Candytujt, New Mammoth Shite. Dianthus (China and Japan Pinks), all varieties in splendid mixture. Antirrhinum majus (Snapdragon), mixed col-

ors.
Xicotiana affinis.
Aster, Imbrique Pompon, mixed colors.
Double Portulaca, first quality, mixed colors.
Double Poppies (Improved), all varieties, mixed.
Virginian Stock, mixed colors.

### PREMIUMS FTO CLUBS.

Many are so highly pleased with my seeds that they recommend them to others and raise clubs among their friends and neighbors, and this is not only highly appreciated on my part, but I will reward liberally all who thus assist in extending my trade. For a club of four subscribers to the 30-cent collection, remitting 51.2) at one time, I will send one collection free to the raiser of the club, or if preferred, all the following seven new and choice varieties, one packet of each (see list of novelties for description):

Dwarf Spotted Snapdragon; Chrysanthemum segetum grandifforum; Godetia, Spotted Carpet; Double Poppy, Snowball; Oxalis corniculata purpurea; Schizanthus pinnatus roseus; Whitlavia campanularia.

Any one who will try can easily raise a club of four: but those who do not succeed in obtaining that number, may, for one subscriber select any one of the above varieties, as a premium: for a club of two subscribers, any two varieties may be selected, and for a club of three any four of the above varieties. These premiums are offered for subscribers actually obtained; I cannot allow a premium on a person's own order for a collection. Those who get more than four subscribers, may select seeds in papers from the catalog to the value of ten cents for each and every subscriber over four. If the premium seeds are not wanted for the club-raiser's own use, they can easily be sold while taking orders for collections, and thus ten cents in cash be obtained for each subscriber. The premium seeds must be selected when the club order is sent. The seeds will be sent to the raiser of the club (which is much the best way when convenient to distribute, as they usually go safer when sent to one address), or, if not convenient for the raiser of the club to distribute them, to each member separately. Please send the name and address of each member of the club. As my profit comes in the future trade I may receive, this is a very important matter to me, and I cannot afford or allow premiums unless the name and address of each member of the club (whether large or small) is sent, so that we can put them on our books. on our books.

and address of each member of the club (whether large or small) is sent, so that we can put them on our books.

The above premiums are offered on the 30-cent collection, only, but to those who raise clubs for a general selection of seeds from the catalog, or order for themselves alone. I propose to be equally liberal, as follows: Persons sending 50 cts. for seeds in papers at the regular catalog prices. may select 10 cts. worth extra as a premium. Persons sending \$1.00 for seeds in papers at the regular catalog prices may select 25 cts. worth extra as a premium: and for seeds in papers at the regular catalog prices may select 25 cts. worth extra as a premium: and for each additional dollar sent for seeds in papers at the regular catalog prices 40 cts. worth extra may be selected as a premium. But it must be understood that these last premiums are offered oxiv on seeds in papers at The CATALOG PRICES. Seeds in collections, or bulbs. must not be reckoned in making this discount, nor can the premiums be paid in them, as it would bring the prices below cost in some cases.

As an encouragement to club raisers to make their clubs as large as possible. I have for several years offered liberal cash premiums to those who raised the largest clubs for the 30 ct. collection. Last year the cash premiums were awarded as follows: 1st premium. \$25.00 to A. C. Stark. Waterville. Me., for a club of 123 subscribers: 2d premium \$15.00, to Mrs. S. E. Simmons. Lynn., Mass. for a club of 112 subscribers; 3d premium \$10.00, to Mrs. G. M. Madox. Biddeford, Me., for a club of 80 subscribers; 4th premium \$5.00, to Mrs. G. W. Davis, Pine Bluff, Ark., for a club of 72 subscribers. A copy of a dollar book on flower culture was also sent to each one of these who sent the next twelve largest clubs as promised. Every person who raised a club of over \$7.00 in amount, received a cash or book premium, and in order that all who raise even a \$5.00 club will stand a good chance of receiving at least a book premium, I propose to do better than ever t

### TWENTY-FIVE CASH AND BOOK PRESENTS:

to those who raise the largest clubs for any flower and vegetable seeds offered in this Catalog whether collections or seeds selected from the Catalog, for partly of both:

One Cash Present of \$25.00 for the largest club order for seeds.
One Cash Present of \$15.00, for the next largest club order for seeds.
One Cash Present of \$10.00, for the next largest club order for seeds.
One Cash Present of \$5.00, for the next largest club order for seeds.
One Cash Present of \$5.00, for the next largest club order for seeds.
One Cash Present of \$2.00, for the next largest club order for seeds,
One Cash Present of \$2.00, for the next largest club order for seeds,
One Cash Present of \$2.00, for the next largest club order for seeds.

One Cash Present of \$2.00, for the next largest club order for seeds.

And to each one of the persons who send the nineteen next largest club orders, I will send as a present the best book published on Window Gardening, worth \$1.50. (See description of contents, etc., on another page.) By largest clubs is meant those who send the largest amount of cash during the season between now and the first of June, when the amounts each club raiser has sent in will be reckoned up and the presents forwarded to the successful competitors. Additions to clubs can be made and the amounts will be added to those previously sent; but club raisers who send more than one order should always mention that it is to be added to the last order sent. The name and address of each member of the club must be sent so we can put them on our books. Each new member of a club is entitled to a Catalog if wanted, and club raisers will please state how many are needed this season. All who compete for the cash and book presents are also entitled to the liberal seed premiums offered above, which must be selected when the club orders are sent. A small club can easily be raised in any neighborhood, and with some work a larger one, and the raiser will stand a good chance of obtaining one of the cash or book presents, and surely these presents and seed premiums are worth some effort to obtain. Competition is open to all persons except to those who received cash prizes last year.

The varieties under this head marked with a \* are now offered for the first time, and the descriptions

## NEM LARGE FLOWERING GERMAN PANSIES: DIAMOND STRAIN.

The snperior qualities of this unsurpassed new strain of German Pansies, introduced by me three years ago, has gained such a reputation among my enstomers that it has resulted in the sale of more than fitty thousand packets of seed. Its large and perfectly formed, round and velvety blooms, end-less variety of rich and delicate colors and tints, often in combinations that, if not seen, would be difficult to believe ever existed in a Pansy, distinguishes this strain above all others. An acre of these Pansies in full bloom in my grounds last year was the admiration of crowds of visitors, many of them from Boston, New York, Washington, and other distant places, including some old florists, and all acknowledged it to be the finest display of Pansies, in both quality and quantity they had ever seen. A large bed containing samples of every strain of Pansies offered by American and Enropean seedsmen, including several introduced last year for the first time, proved very interesting and instructive, especially to the florists. While some of these strains could be called good, most of them were quite ordinary, some were decidedly poor, and none were equal to the Diamond strain in richness, brilliancy

considered it to be the most display of Fansies, in both quality and quantity they had ever seen. A consequence of the conseque

GRANDIFLORA STELLATA SPLENDENS.

PAINTED FOR GOODELL'S SEED CATALOGUE.

## NEW EMPEROR PETUNIAS.

The flowers of this new and unsurpassed strain exhibit a greater variety of colors and markings than ever before obtained in the Petunia: from the richest purple and crimson to the most delicate rose and white there is every gradation. Some of the varieties have a clearly defined white throat, the other portion of the corolla being colored: some are evenly or irregularly striped, blotched and barred with purple, crimson, rose and white: others are elegantly veined with crimson, violet and maroon on a light ground, and several are exquisitely fringed and frilled, resembling ruffled lace. Many of the varieties are of very large size. These Petunias, and the Diamond Pansies, were the special admiration of hundred the control of the co are of very large size. These Petunias, and the Diamond Pansies, were the special admiration of hundreds of visitors to my grounds last season, and were awarded the first premium at every fair where I exhibited them.

exhibited them.

There is one peculiarity about Petunia plants that is not generally understood. In the finest strains there are always some plants that, in the seed-bed, grow strong and look dark green and healthy, while there are others that have small, curly, yellowish leaves, and seem small, sickly and poor; these latter should be saved and transplanted with particular care as they are the ones that always produce the largest, finest flowers. Those not familiar with this fact often transplant the largest, nicest looking plants, throwing away the small, sickly ones, and in consequence are rewarded with nothing but common flowers.

NEW EMPEROR PETUNIAS, Lace-edged or Fringed Section: The flowers of this section

finest large flowering and mammoth varieties only. This is the finest strain of Petunias ever offered, 30 NEW DWARF SWEET ALYSSUM, LITTLE GEM: This is an exceedingly pretty and entirely distinct dwarf variety of Sweet Alyssum originated by me. The plants are of very dwarf, compact spreading habit, and only 3 to 5 inches in height, each plant covering a circle from 15 to 30 inches in diameter. It begins to bloom when quite small, often when in the seed-bed, and so profusely that the plants are a solid mass of white from spring till late in autumn. I have counted over 600 clusters of flowers on a single plant at one time. For small beds and edgings it is very effective, and for pots and baskets a gem of the first water. From 75 to 90 per cent, of the plants from seeds come true and good. Although the plants bloom so profusely, but very few perfect seeds are formed, the whole vitality of the plant seeming to be expended in the production of flowers: Seeds, per packets of 50 good seeds, 15

with white, purple and crimson, with a broad yellow throat, veined like a Salpiglossis; packet of about 50 seeds...\*
\*\*PAPAVER pavonium: A new very free-flowering annual Poppy from Turkestan. Plant about 2 feet in height with neat, deeply pinnatified foliage and three colored single flowers, 3 to 4 inches across. The petals are MIGNONETTE, Golden Queen: This is one of the best and most distinct varieties of Mignonette, the flowers being of a rich vellow tint and very fragrant.

MIGNONETTE, Machet: A variety of very dwarf vigorous growth with massive spikes of deliciously scented red flowers, the spikes of deherously scented red flowers, the best of all sorts for pots...

MIGNONETTE, Giant White Spiral: An entirely distinct variety growing three feet tall with large spikes of white flowers often a foot or more in length and very sweet scented. Easily transplanted or may be sownwhere they are to grow. Set or thin plants to 18 inches nowers, o to 4 menes across. The petals are of a brilliant scarlet, each being marked near the base with a zone of glossy black, so as to form a complete ring of a striking effect, the center of the flower being of a lovely cherry carmine PHACELIA (Whitlavia) campanularia: This new California annual is one of the pret-This new California annual is one of the prettiest blue flowering plants ever introduced. The plant is of spreading bushy growth, about 7 inches tall by a foot across. The flowers are very numerous, of an open campanulate form, about three-fourths of an inch across, and of the finest satiny blue, of a shade very rare in flowers, irvalling the beautiful Palvia patens. It is of very easy culture and blooms in a few weeks from seeds, which may be sown either under glass or where they are to grow and thinned to 6 or 8 inches apart. Good blue flowers are always scarce, and this is MTRABILIS Jalapa, Dwarf White: A beautiful new variety never more than 10 inches in height and completely covered with pure white flowers. pure white flowers.

MIMULUE sgrandiflora: Very large flowers as beautifully tigered and spotted as the finest Calceolarias, and surpassing anything that has been hitherto offered in this genus..... has been hitherto offered in this genus......

\*MINA lobata: A splendid annual climbing vine from Mexico, closely related to the Ipomea, but entirely different in its flowers. The flowers are produced in fork-like racemes about 15 inches in length, growing upright and in great abundance amidst the luxuriant foliage, presenting a very striking aspect. The flowers are tubular in form, about three-fourths of an inch long; at first of a bright. grow and thinned to bors inches apart. Good blue flowers are always scarce, and this is certainly the finest blue annual introduced for many years.

PHLOX Drummondi, Double White: The only really double Phlox, about 50 per cent. of the blue to come in any least to the control of the period of th fourths of an inch long; at first of a bright the plants coming double; valuable for cutred, they change to orange yellow and yellowish white when fully expanded. The vine climbs to a height of 18 feet and is well suited PHLOX Drummondi grandiflora splen-dens: One of the finest of all the annual Phloxes for bedding. The flowers are very large and round, of a vivid crimson color,... climbs to a height of 18 feet and is well suited for covering arbors, trellises, etc. Start the seeds early under glass or in the house, . . . \*MIOSOTIS alpestris, Victoria: This new and very pretty Forget-Me-Not is of very bushy growth and is completely covered with large, bright azure blue flowers, remaining in bloom a large time. large and round, of a vivid crimson color,...

PHLOX Drummondi grandiflora stellata splendens: An introduction of last year that has proved the best for both bedding and cutting of any of the grandiflora varieties introduced for many years. The flowers, which are produced very profusely, are very large, round, and of a brilliant rosy crimson color with a large and clearly debloom a long time NICOTIANA affinis: One of the finest annuals of recent introduction. The plants grow nuals of recent introduction. The plants grow about 3 feet tall, and bloom profusely all summer. The flowers are white, two or three inches long, and about as much in diameter, and very sweet-scented, a small bed filling a whole garden with fragrance. It also succeeds admirably as a house plant. The plants can be taken up in the fall, cut back and potted for the house, where they will bloom freely all winter. This is one of the things that cannot be too highly recommended. Seeds are rather slow and uneven of germination, and should be sown in a frame or box... crimson color, with a large and clearly defined white star in the center.

PHIOX Drummondi New Dwarf: The plants of this new section are very bushy, only 5 or 6 inches tall, and completely covere 10 POPPY, Snowball: The finest of all white Poppies. The flowers very large, pure white, with deeply fringed petals, very double and perfectly globular in form, the plants appearing to be covered with real snowballs, ..... SILENE pendula compacta flore-pleno: A charming hardy annual of dwarf compact tion, and should be sown in a frame or box,... OXALIS corniculata purpurea: As a dwarf purple-brown foliage plant, this is unsurpassed. It was extensively used in the Boston public gardens last season in bedding with admirable effect. For borders to beds it is particularly valuable. Plants may be set 4 or 5 inches apart and will soon carpet the ground with rich purple-brown leaves and bright yellowish flowers; 3 inches in height... PANSY Trimardeau: An entirely distinct new race of this popular flower that, for size, surpasses any hitherto introduced. With and should be sown in a frame or box,. growth, covered with small, double, rose colgrowth, covered with small, double, rose colored flowers, very good for edgings.

TEN-WEEKS STOCK, Snowflake: A very valuable new variety of dwarf growth, with very large and double pure white flowers, and one of the earliest of all varieties.... TEN-WEEKS STOCK, Giant Perfection: TEN-WEEKS STOCK, Giant Perfection: A splendid race of pyramidal growth, attaining a height of 2½ feet, with long spikes of beautiful large double flowers. This is one of the best for open ground culture: 9 colors... SCHIZANTHUS pinnatus roseus (Butterfly Flower): A very fine addition to this pretty, hardy annual. The flowers are of a delicate rose color shading off at the center to white, the uppermost petal being almost covered with a blood red spot. The plants are of compact growth and literally covered with flowers resembling small butterflies... parted nowers, packet of 50 seeds. The seeds of this variety produce from 10 to 30 percent, of large and elegantly fringed pure white double flowers; packet of 50 seeds. with flowers resembling small butterflies,....

SWEET PEA, Princess Beatrice: One of the most charming and distinct of the new varieties, the flowers being of a new shade of \*PETUNIA grandiflora fimbriata "Ti-tania:" The flowers of this remarkable soft rosy pink, .... 15 SWEET PEA, Bronze Prince: A magnifi-cent variety, the standard of a rich bronzy maroon and the wings a bright purple,...... variety are elegantly fringed and of a dark velvety purple, with a broad and clearly de-fined pure white band around the edges of SWEET PEA, Capt. Clark: Rose and white edged with light blue; very pretty.,.... 10 PETUNIA New Throated: The ETUNIA New Large-flowered Yellow Throated: This new introduction has proved a remarkably fine acquisition. The SWEET PEA, Butterfly: A very pretty new sort, pure white, delicately laced with flowers are of large size, blotched and striped lavender blue,...

15

SWEET PEA, Adonis: Of a lovely rosy carmine, shaded with crimson,. carmine, shaded with crimson,

TROPEOLUM minus (Nasturtion) Lady

Bird: A pretty and distinct variety of a
rich golden yellow color, each petal with a
broad vein of bright ruby crimson at the base,

TROPEOLUM minus Chameleon: A brill-

liant novelty in this popular class. The flowers are crimson, bronze and and gold, bordered and flamed, changing in hue almost

daily, hence the name, .....\*DOUBLE ZINNIA, New Mammoth: particularly fine new class of Zinnias, differing from the older ones in its unusually ro-bust habit of growth and the immense size bust nabit of growth and the liminesse size (5 to 6 inches) of its perfectly formed very double flowers of various striking colors. The plants rise to a height of 3 to 3½ feet, are clothed with luxuriant foliage and bloom freely during a long period. Being of great consistency, the flowers are uninfluenced by heat and remain in good condition for sev-eral weeks; eight beautiful varieties mixed,... DOUBLE ZINNIA. New Dwarf: Of very dwarf, compact habit, this new and very desirable class produces double and perfect flowers of various colors; mixed colors,....

DOUBLE ZINNIA, New Dwarf, Fiery Scarlet: Produces in great abundance perfectly double flowers of a very bright scarlet,

DOUBLE ZINNIA, New Pompon: The flowers of this beautiful new strain are about one-half the size of the common Zinnia and of the most perfect form, the petals finely imbricated, overlaping each other in the most symmetrical manner. The colors are most symmetrical manner. The colors are very bright and varied. The plants are of dwarf, compact growth and fairly covered with flowers; mixed colors,....

\*ZEA gracillina variegata New Striped leaved Maize: This variety surpasses the variegated Japanese Maize by a more com-pact growth and in the broader gracefully drooping leaves, which are very regularly striped with white.

Sowing in Cold Frames.—A cold frame is easily managed by anybody, and in no other way can such uniform success be had; and I would recommend those who have more than half a dozen varieties to sow to try one. Make a box-like frame of boards without a bottom, which should be twelve or fifteen inches high at the back, sloping to about six inches in front, so as to catch the direct rays of the sun as much as possible. It can be made of any size desired and nailed at the corners, if small enough to be easily moved about, or if larger, fastened together with hooks and staples. About the last of April is the proper time in this latitude to start seeds in a cold-frame, and the plants will be large enough to transplant to the beds where they are to bloom as early as would be safe from frost.

Prepare a bed in a warm sheltered spot in the garden; rake out all the lumps and stones and on this set the frame, and cover with ordinary hot-bed sash or old window sash which will do quite as well. Make the soil in the frame smooth and firm with a board, and sow the seeds thinly and evenly on the surface in squares, and label each sort with a short pine label. Have a pile of light sandy soil or leaf mold from the woods, which has been sifted through a fine sieve, near at hand, and if the seeds are very small, carefully sift it over them. Probably more failures to make seed germinate result from covering too deep than from any other cause. A good and safe rule for the smaller kinds of seeds is to cover to smail, carefully sift it over them. From a probably more failures to make seed germinate result from covering too deep than from any other cause. A good and safe rule for the smaller kinds of seeds is to cover to a depth of about twice the diameter of the seed. This would give a covering of one-eighth to one-fourth of an inch to such seeds as Aster, Phlox and Verbena; one-sixteenth of an inch to Petunia, Portulaca, and seeds of like size, while very fine seeds, like Lobelia and Mimulus, should scarcely be covered at all, but merely pressed slightly into the soil. After the seeds are all nicely covered, it is very important to make the soil as hard and firm as possible; then water carefully with a pot having a fine rose, so as not to wash the soil from the seeds.

Now put on the soll from the seeds.

Now put on the sash and keep it tightly closed until the plants begin to come up, watering often enough to keep the surface moist. Some seeds, like Aster and Zinnia, germinate, under favorable circumstances, in a few days, while others require several weeks. Geranium and Verbena seeds germinate very unevenly, some seeds coming up in a week or ten days, while some remain dormant a month or more, and the soil should be kept moist and not be disturbed for at least a month after sowing. Cover the frame with straw mats or boards at night to keep out the cold, and after the plants are up give plenty of air, during warm, sunny days. Pull out the weeds as fast as they appear, and keep the plants well thinned out, so they will grow strong and stocky. The thinnings can be saved and trans-

planted to another frame if desired.

Sowing in Boxes in the House.—When only a few varieties are to be sown, good plants can be grown by sowing in shallow boxes of earth, putting these in a warm, sunny window in the house, covering each box with a pane of glass to retain moisture. Never sow seeds in pots unless they are sunk up to the rims in boxes of moist earth or moss; otherwise they are apt to quickly dry out and injure the

seeds or young plants.

seeds or young plants.

Sowing in the Open Ground.—With care and by sowing at the proper time, plants can be grown successfully in the open ground; but not much success can be expected from sowing the small, delicate seeds in the beds where they are to flower. It is always best to sow all but a few varieties like the Larkspurs and Poppies, which do not transplant well, in a seed-bed, in the same way as directed for cold-frames. Sow the half-hardy varieties about the middle of May, in this latitude, or about the time corn is usually planted. Hardy annuals may be sown two weeks earlier, and tender annuals not until two weeks later than this. Great care must be taken in watering and shading to prevent the surface from drying out; a few hours of hot sun in a dry time will sometimes ruin a whole bed; and this is the most frequent cause of failure when seeds are sown in the open ground, for after a seed has sprouted, and then becomes dry, it will never sprout again. It is a good plan to spread several thicknesses of newspaper over the bed to help keep in the moisture, but they must be removed as soon as the plants begin to come up. begin to come up.

TRANSPLANTING.—After the plants in the cold-frame or seed-bed have obtained their second leaves ARASHLANTING.—After the plants in the cold-frame or seed-bed have obtained their second leaves and grown an inch or two, transplant to the garden, first giving the seed-bed a good soaking with water. Transplanting should be done in a showery day, if possible, but it is better to transplant in a dry time than to wait too long for rain. Make holes where the plants are to be set, fill them with water, let it soak in, then set the plant, making the soil firm about the roots; water again and cover each plant with a piece of paper held down with clods of earth; or, what is better, with a large leaf or a handful of fresh grass, which is to be removed after a few days.

A freeh grass, which is to be removed after a few days.

A frequent cause of failure to make a good show of flowers is setting plants too thick in the beds, and before the summer is half through the vines become so crowded together they either die outright or become so much weakened in the struggle for existence, that their beauty is greatly injured. The soil for flowers, if not already rich, should be made so with fertilizers or well decayed manure, ties do well in almost any ordinary soil, but do much better in a rich one. Some varie-

I am thus explicit in giving directions because I know some of my customers are inexperienced in the culture of flowers,—some perhaps beginning their culture for the first time this year, and I am anxious that all who purchase even a single packet of seed should succeed as well as the most experienced

gardeners.

The flowers produced from seeds are classed as Annuals, Biennials, and Herbaceous Perennials. The Annuals perfect their seed and die the first year. Biennials live two years. Herbaceous Perennials die down to the ground every year, their roots living many years. Annuals are called hardy, half hardy and tender. A hardy annual will bear a severe frost without injury; a half-hardy annual will bear considerable frost; while tender annuals are destroyed by the least frost.

# ANNUALS Y

In this department will be found the most showy of the flowers that adorn the garden and lawn. It embraces, hesides the true annuals, some hiennials and perennials that produce flowers the first year from seed. The figures on the right of the columns give the price of each variety, per packet in cents.

## SEEDS FOR THE WILD GARDEN.

What is called a wild garden is becoming very popular. The plan is to take some back corner or spot in the garden and sow a quantity of the most hardy flower seeds that have been well mixed together, and, except to keep down the weeds, allow them to pretty much take care of themselves. The effect is very striking. I had many calls for such seeds last year, and have put up packages expressly for this purpose. Price per large package containing a great variety of seeds best adapted for the "Wild Garden," well mixed, 25 cents.

There is a good deal of pleasure in growing house plants from seeds, and very often as many plants can be grown from a packet of seeds as would cost several dollars if purchased from a green-house. Many of the varieties germinate as easily and quickly as the common annuals if properly treated. Fill shallow boxes (cigar boxes are just the things) nearly full with very fine, nice garden soil of a sandy nature, and press it down smooth and hard; make drills an inch apart by pressing the straight edge of a thick pane of glass into the soil to the depth of a sixteenth or eighth of an inch, according to the size of the seeds; sow the seeds and fill up the drill with fine sandy soil that has been sifted through a fine sieve; press down the soil quite hard over the seeds and water carefully with a fine spray, so as not to wash the soil from the seeds; cover each box with a pane of glass and put them in a good warm place. The best place I have ever found for germinating small seeds is on a mantel shelf back of a kitchen stove. Take particular care to keep the soil just moist so that it does not look dry, until the seeds germinate. As soon as the plants begin to come up, give plenty of air by partially or wholly removing the glass, and move the boxes at once to a warm, sunny window. Very fine seeds, like Calceolaria and Begonia, should only be covered with a mere sprinkling of earth. (The above directions apply particularly to the smaller house plant seeds, but the same treatment is best for all small seeds like Petunia, Portulaca, etc.) The seeds of Clianthus, Geranium, Cyclamen, Heliotrope, Lantana and Smilax, are very hard and slow of germination. Cover these a quarter to a half inch deep, and they must be kept quite moist and warm till they germinate, which will be in 4 to 8 weeks; and they should be sown in boxes by themselves and not mixed with other seeds. After house plants have made a little growth and as soon as large enough to handle, pot off singly in small pots and finally shift to 6 inch ones, which is the

## A SPECIAL REQUEST.

Should you receive more than one Catalog, or have no use for this one, please hand it to some friend who is interested in growing choice flowers, and if you will at the time say a good word for my seeds,

I shall be doubly obliged.

It is my rule to send a Catalog to all who order seeds the previous year, and then, if I do not hear from them, I drop their name from my books, as I have no means of knowing whether they are still livin the same place and desire another Catalog. This I very much dislike to do, and I hope that each one who receives a Catalog will send at least a small order, if no more than a ten-cent one, so that their names will appear on my books and I can send them a Catalog next year.

### BOWKER'S FOOD FOR FLOWERS.

This is a fertilizer made expressly for flowers grown in the house or garden. It is free from odor and clean to handle. It produces a healthy, luxuriant growth, and induces early and profuse flowering. Trial packages containing sufficient for twenty ordinary house plants three months, sent postpaid for 25 cents. Regular package, four times the size of trial package, post-paid for 50 cents. Directions for applying and a valuable little book on "How to Cultivate and Propogate House Plants," by S. T. Maynard, Professor of Horticulture at the Mass. Agricultural College, free with each package.

## SPECIAL TO CANADIAN CUSTOMERS.

The postage on all seeds sent from this country to Canada is very heavy, being 10 cts. for each package, no matter how small the package may be, even if it be but a single packet of seed, the postage on small orders being more han the price of the seeds; and to save my self from loss I am obliged to ask my Canadian customers to remit eight cents extra in addition to the price of the seeds, when their orders are less than 40 cents in amount. I will always pay postage on all larger orders.

## Varieties of Recent Introduction of Special Merit.

During the past few years, hundreds of varieties of vegetables have heen introduced hy seedsmen, all of which were claimed to he improvements on the older varieties. I have made it a rule to test these varieties in my grounds as fast as offered, and most of them repeatedly. Many of them I find to be either identical with old sorts or inferior to the hest of the standard varieties, or at hest no improvement on them, while a few, perhaps one in ten, have proved to be real and valuable improvements, and should have a place in every garden. From among them I select the following, which are the very cream of the novelties introduced during the past few years. I advise all my customers to give them a trial, feeling confident they will not have any reason to regret doing so.

The offer of three papers for the price of two, as offered on varieties selected from the standard list, does no apply to the varieties in this list, thut those who order 50 cents worth, at the single packet rates, may select 10 cents worth extra; and 25 cents worth extra for \$1.00, etc., the same as offered on other vegetable and flower seeds, page 3.

## COLLECTIONS OF VEGETABLE NOVELTIES,

Collection No. 1, seven varieties for 35 cents. For 35 cents I will send the first seven varieties on the list below, amounting to 60 cents at regular rates, one package of each; or if ordered at one time, four collections for SLOM. collections for \$1.00.

Collection No. 2, fifteen varieties for 65 cents. For 65 cents I will send the seven varieties in collection No. 1 and the next eight varieties on the list helow, amounting to \$1.45 at regular rates; or two collections for \$1.00, if ordered at one time.

Collection No. 3, twenty-five varieties for \$1.00. This collection contains all the varieties in collection to the collection of the collection contains all the varieties in collection contains all the varieties all the varieties in collection contains all the varieties in collection contains all the varieties all the

Collection No. 3, twenty-live varieties for \$1.00. This collection contains all the varieties in collections and 2 and the next ten varieties on the list helow, amounting to \$2.40 at regular rates. Six of these collections will he sent, postage paid, for \$5.00, if ordered at one time.

I shall have these collections put up ready for mailing, and and no change whatever can be made in them. I was one of the first to put up collections of flower seeds and offer them at greatly reduced rates, since which there have heen many imitators, but I am determined that my collections shall always he at the head in value; and these collections of Vegetahle seeds are certainly the hest ever offered for the prices. Please note that while other collections of vegetahle seeds consist mainly of old

fered for the prices. Please note that while other collections of vegetable seeds convarieties or untried novelties, the most of which turn out to he of little or no value, collections are among the very best, REAL IMPROVEMENTS that should have a place in	, the varieties in my
	Per

EARLY CABBAGE, Peerless: This superior early Cahhage is fast hecoming t among the marketmen in the eastern part of this State, where it originated. It is as the Wakefield, very solid and uniform in size, averaging about 12 pounds each,	nearly as early
unsurpassed by any other sort, early or late,	hetween Long
Orange and Short Horn, hut of larger size than the Orange. It is smooth and han hest variety for main crop.  SWEET CORN, Corny: The earliest Succet Corn in cultivation. Planted by the side	5
head in my grounds last season, it was fit for the table nearly a week earlier that while the ears were slightly larger, and of equally good quality. It grows fit for	nn that variety, the tahle in 55
days from planting.  LETTUCE, Deucon: This is the most reliable Lettuce for heading during summ tried. Planted by the side of a dozen or more new varieties last summer, it made	de larger heads
and remained fit for use without running to seed, longer than any other, while t first-class,  **LETTUCE, Golden Spotted: A very distinct and handsome sort, the leaves."	
green spotted with brown; tender and good	lons introduced
during the past few years, this has pleased me most. The melons are of large size a dark green color mottled with a lighter shade. It is very productive, rich, crifully equal to the Peerless in quality, which is the richest of all Water Melons	isp and sugary,
RADISH, Chartier: A very handsome, quick growing sort of the form of the L upper half of the root being rose color, shading to white at the tip. It is remarka	ong Scarlet, the
keeps in good condition for eating for a long time,  TOMATO, Beauty: From a great number of so-called new sorts of Tomatoes, I s  most promising of the lot. It is as early as any, of large size, always perfectly sm	
in form, while they are so solid and heavy that they seem almost like stones in we of a peculiar pinkish red color and of unsurpassed quality.	ight. They are

	_
BUSH BEAN, Green Flageolet: This is the same variety sold by some seedsmen under the names of Green Gem and Wonder of France. It is early and wonderfully prolific, the beans of a pea green color, which color they retain when cooked, even when dry, if pulled as soon as fully grown. It is nearly as good in quality as the Lima Bean,	. 10
CABBAGE, Warren's Stone Mason: This variety is the result of careful selection for many years by a gardener of Marblehead. It is about as early as Brunswick, much rounder in shape, extremely solid, a splendid keeper, and unsurpassed for shipping purposes. It is becoming very	10
popular among the Boston market gardeners, CELERY, White Plume: This is the most valuable new Celery introduced in twenty years. It is entirely distinct from other varieties, its stalk and inner leaves and heart being naturally white so that by closing the stalks during the latter stages of its growth, and keeping them in place with a little earth, or by tying, it becomes completely blanched, making its culture very easy. It is	10
crisp and solid with a fine nutty flavor. $CARROT$ , $Guerande$ , or $Early Oxheart$ : A very valuable new early variety, growing about 6 inches in length by 3 or 4 inches in diameter. It is of splendid quality and will produce a greater	15
weight to the acre thau most varieties.  *CUCUMBER, Giant Pera: This has proved the handsomest and best long Cucumber ever raised. They grow to a length of 15 to 20 inches, are very smooth, with few spines, very straight and of nearly equal thickness the entire length. The vine is large, vigorous, and exceedingly prolific. In quality it is first rate, tender and crisp with very few seeds, which do not form until the	5
cucumbers are nearly full grown.  **LETTUCE, Green Fringed: A very ornamental and good variety. It is of a light and peculiar shade of green, almost white on the inner parts, while the edges of the leaves are most beautifully	10
cut and fringed, and are tender and good  PEA, Abundance: This is the best second early wrinkled Pea I have yet tried. The vines are very large, growing 2½ feet tall, and have a peculiar branching habit, and the vines should not be	10
nearer than 6 to 8 luches in the row. It is remarkably productive, continuing to bear for a long time, each pod containing from 5 to 7 large peas, which are equal in quality to any variety,	10
and tough which makes it a splendid keeper and shipper. It is long in form, dark green mottled with a lighter shade. Its quality is excellent.  ONION, Manimoth Silver King: A splendid white Onion, flat in form, growing to a diameter	10
of 4 to 7 inches and a weight of 2 to 3 pounds each with good culture. It is of mild and pleasant flavor.  SQUASH, Essex: This is one of the best fall and winter Squashes. The flesh is very thick, fine	10
grained, dry and sweet. It is one of the earliest of the fall or winter sorts	5
LIMA BEAN, Bliss' Early: About two weeks earlier than the common Lima, which is a great advantage in the North. It hears the bulk of its crop low down near the ground and good crops	
can be grown without poles,  LIMA BEAN, Challenger: This has proved a most desirable sort. It has been kept strictly pure in one family for three generations and improved by selecting the pods for seed containing	10
the most beans. The beans are about twice as thick as the common Lima and grow closely together in the pods, from 4 to 6 beans in a pod, and are very rich and fine flavored	10
less and first-class for a snap bean and excellent for shelling, and one of the most productive of all bush sorts, 60 bushels to the acre having been grown.  BUSH BEAN, Boston Favorite: This, as an early shell bean, is superior to all others. It is	10
immensely productive, the beans long and kidney shaped, striped like the Horticultural, but twice the size. It is fast becoming the most popular early shell bean in Boston market	10
used by the Squantum Club of R. I., in their famous clam bakes, and is sold by some seedsmen under the name of Squantum,	10
SWEET CORN, Mammoth: The largest of all varieties; ears have been grown to weigh over two pounds each; 16 rowed, sweet and good.	10
POP CORN, New Golden: A very handsome and fine variety, very prolific, 3 to 4 ears often growing on one stalk. Remarkably large and tender when popped,	10
tender and nice	10
head. The Savoy varieties have curled and crumpled leaves, and are very much better in quality than the plain-leaved sorts.  **CABBAGE. Manmoth Rock Red:** The largest red cabbage ever produced, the heads often	10
growing to a weight of 12 pounds,  MUSK MELON. Perfection: One of the very best melons I have ever grown. It is early and	15
very prolific, growing to a weight of 4 to 6 pounds, round, dark green. The flesh is remarkably thick, and of a rich orange color, very sweet and unsurpassed in quality  WATER MELON, Florida's Favorite: I have not tested this new sort, which is now for the first time offered, but it comes to me so highly recommended by one of the largest melon growers	10
of Florida that I add it to the list. It is long in form, mottled with light and dark green, and of large size. It is said to be two weeks earlier than Pride of Georgia, and equal to it in quality,  ONION, Mammoth Fompet: The largest variety of Onion ever introduced, specimens having	15
been grown to weigh 3 to 4 pounds each. It is reddish brown in color, the flesh white, fine grained and mild flavored. All who wish to grow large onious for exhibition should try this sort	10
double the size of Champion of England, and in quality fully equal to that variety,	10
PUMPKIN, Mammoth Potiron: The true Mammoth Pumpkin, growing to a weight of 100 to 200 pounds each,	10
NEW SQUASH, Bay State: This new Squash is a most valuable acquisition and I recommend it highly to all who like a first-class Squash. It is like the Essex in form, but a little earlier and be a little with the state of the sta	l
green on the outside, while the flesh is of a bright golden yellow, remarkably thick and solid, very fine grained, dry and sweet. It has an extremely hard, flinty shell which makes it one of the best of keepers. It is the most solid, and heaviest Squash of its size I have ever seen, and very uniform, averaging about 10 or 12 pounds each. In productiveness it fully equals, if not excels, the	-
Essex. The original viue produced three squashes in a length of three feet, weighing from 8 to	. 15

## Before ordering, please read the following instructions.

Before ordering, please read the following instructions.

Write all orders for articles on this and the following pages on a separate sheet of paper from seed orders or anything else. Spring is the best time to set all trees and plants in the Northern States. My stock is first-class, and packing will be done in the best manner by experienced hands. No charge for boxes or packing. Plants can be sent by mail or express with perfect safety to any part of the U. S., even the most distant places. Large orders can be shipped by freight. The postal regulations are such that plants cannot be sent by mail or express with perfect reight. It is always best to have plants sent by express, unless the order is small or on long and expensive routes, in which case it is cheaper to send by mail. If to be sent by express, mention nearest express office and name of company. If plants are ordered sent by mail, enough money must be added to the list prices to pay postage, which will be as follows: Strawberry plants 20 cents per 50, 30 cents per 100: Raspberries 15 cents per doz., 75 cents per 100: Blackberries 20 cents per 60.2, 90 cents per 100: Raspberries 15 cents per doz., 75 cents per 100: Blackberries 20 cents per 60.2, 20 cents per 100: Sloper 100. Two-years old Gooseberries, Currants and Grapes cannot be sent by mail. Trees are too large to be sent by mail. One-half doz. plants or trees (no less) of any one variety, sent at dozen rates, 50 at 100 rates. Neighbors, by clubbing together, can thus often get the advantage of 100 and 1,000 rates and reduce express and freight charges, which are now usually quite reasonable. My terms are invariably cash with order. Owing to expense of packing, no order can be filled for articles on this and the following pages for a less amount than one dollar. Those not familiar with the different varieties and who prefer to leave the selection to me, should state whether they are for home use or for market, and whether early or late varieties are wanted.

Please order early; don't wait till you

varieties, would do well to correspond for prices, stating varieties and quantity of each wanted. can supply all varieties in large quantities at very low rates, and first class stock.

#### STRAWBERRIES.

Prices for standard varieties: 25 cts. per doz.,

STRAWBERRIES.

Prices for standard varieties: 25 cts. per doz., \$1.00 per 100, unless otherwise priced.

Brighton one of the very best of red grapes; fruit large and of first

quality; early; vine vigorous and productive; one-year 20 cts. each, \$150 per doz.; two-years 30 cts. each, \$3.00 per doz. Delaware, old and popular early sort; should be in every garden; bunch and berry very small, of the highest flavor; vine vigorous berry very small, of the highest flavor; vine vigorous but slender; very productive; one-year old, 25 cts. each, \$2.50 per doz. two-years old, 30 cts. each, \$2.50 per doz. Early Victor, early black, rich, fine quality; vigorous, very hardy and productive; prices same as Delaware. Lady, the best early white grape for home use; very hardy and productive; fruit sweet and good; prices same as Delaware. Worden (true), an early black variety, the merits of which have been strangely overlooked till lately; both bunch and berry very large, larger than Concord, and a week or ten days earlier than that variety; vine very hardy, vigorous, healthy, and very productive; quality better than Concord. This is, in my opinion, one of the rery best black grapes for home use in the North. Prices same as Delaware. Pocklington, a very large and handsome white grape; fair quality, but too late for the North; one-year 30 cts. each, \$2.50 per doz.; two-years, 40 cts. each, \$3.50 per 100. per doz, two-years, 40 cts. each, \$3.50 per 100, two-years, 40 cts. each, \$3.50 per 100, Wyoming Red, early, very hardy and exceedingly productive; sweet and good; prices same as Pockington. Moore's Early, one of the most profitable early black grapes for market but quality too poor for home areas one room 35 cts. cock \$200, \$200, \$30 early black grapes for market but quality too poor for home use; one-year, 35 cts. each, \$3.00 per doz.; two-years, 50 cts. each, \$5.00 per doz. Lindley, one of the very best red grapes for home use; bunch and berry very large, sweet and rich; early; vine very vigorous and productive; fruit can be kept nearly all winter; one-year, 25 cts each, \$2.00 per doz.; two-years, 35 cts. each, \$3.00 per doz. very vigorous; lyear, 75 cts. each, \$7.50 per doz.

New varieties: Hayes, early, white, hardy; very promising; 1-year, 75 cts. each. \$7.50 per doz., 2 years \$1.00 each, \$10.00 per doz. Empire State, the most promising white grape yet introduced. The vine is a remarkably strong grower, very hardy; (has endured 32 deg. below zero.) and an early and heavy bearer. The bunches are very large, long; berry white, with a tinge of yellow, medium to large; tender, juicy, sweet, rich, spicy and pure flavored; ripens very early and keeps a long time after ripe. It is a seedling of Hartford, crossed with Clinton, and was raised by that great hybridizer, James H Ricketts, who sold the original vine to the introducer for \$4,000. Price, 1-year old, \$100 each, \$10.00 per doz.; 2-years, \$1.50 each, \$15.00 to the introducer for \$4,000. Price, 1-year old, \$10.00 ach, \$10.00 per doz.; 2-years, \$1.50 each, \$15.00 per doz. Niagara, undoubtedly one of the finest aud most prolitable of white grapes; bunch very large and of good quality; vine very vigorous, hardy, and extremely productive; ripens with Concord; one year, 50 cts. each, \$5.00 per doz; two years, 75 cts. each, \$7.00 per doz.

#### PLUMS.

Prices: Standard varieties, first-class, 5 to 7 feet,

40 cts. each, \$4.00 per doz.; medium size, 4 to 6 feet, 25 cts. each, \$2.50 per doz. Standard Varieties: Bradshaw, Golden Drop; Gen. Hand, German Prune, Green Gage, Imperial Gage, Lombard, McLaughlin. Monroe Egg, Peach, Quackenhoss. Reine Claude, Richland, Shropshire Damson, Smith's Orleans, Washington, Yellow Egg.

New Variety. Spaulding. The only real curculio-proof plum yet introduced. The curculio attacks this variety the same as others, but for some unex-plained reason the eggs deposited in the plum always fail to hatch and produce the grubs that cause other sorts to fall hefore they ripen. The fruit ripers early is of medium size really rich reason. other sorts to fall hefore they ripen. The fruit ripens early, is of medium size, yellowish green, marhled, with a white hloom; flesh pale yellow, very firm, sweet and rich, parting readily from the stone. It is one of the very best plums for canning. The tree is very vigorous and healthy and hears enormous crops every year. Price, first-class, 6 to 7 feet, \$2.00 each, \$20.00 per doz.

#### CHERRIES.

Prices: first-class, 35 cts. each, \$3.50 per doz.;

DISTANCE APART FOR SETTING FRUIT, TREES AND PLANTS. - Strawberries, set in rows 4 to 5 feet apart. I to 1½ feet in the row and let runners form hed 3½ to 3½ feet wide. Raspherries and Black-berries 3 hy 6 feet. Gooseherries and Currants 3 hy 4 feet. Grapes 6 by 8 feet. Peaches and Plums 15 to 18 feet each way. Apples 30 feet apart. Standard Pears 20 feet. Dwarf Pears 7 to 10 feet. Cher-ries 15 to 20 feet. Quinces 10 feet apart.

Thousands of my customers who engaged in the "Pansy Contest" proposed in my last Catalog, are, no doubt, awaiting with much interest the announcement of the result. The offer of several prizes for the largest pressed blooms of Diamond Pansies, created a great deal of interest among my patrons, and over three thousand signified their intention of competing for them; and several weeks before the time fixed for awarding the prizes, the blooms began to arrive by scores and soon by hundreds, until several thousand had been sent in. To carefully examine and measure these was a great, but very pleasant task. They were, when fresh, evidently of every color, tint and combination of tints ever seen in a Pansy. It might be supposed that the largest blooms would come from the rich soils of the West, especially from California, whence come so many big stories about big things, but such was not the case for the largest part of the finest blooms were grown in the Fast, which shows that good was not the case, for the largest part of the finest blooms were grown in the East, which shows that good culture is of more importance than mere locality. The following are the names of the successful con testants.

testants:

First prize \$5.00, to Mrs. M. Andrews, Owen Sound, Canada, for a bloom two and eleven-sixteenths inches in diameter. Second prize \$4.00, to Mrs. Wm. Dixon, Holden, Me., for a bloom two and nine-sixteenths inches in diameter. Third prize to Mrs. Cyrus Barber, East Steamburg, N. Y., for a bloom two and one-half inches in diameter. Fourth prize to Sarah M. Vose, Hyde Park, Mass., for a bloom two and seven-sixteenths inches in diameter. The following twelve persons sent extra fine and perfect blooms two and a quarter inches in diameter or over, and each received a dollar book; size of blooms in the order names are mentioned: Mrs. J. W. Shaw, Cumberland Centre, Me.: Mrs. C. P. Bancroft, Concord, N. H.; Mrs. G. B. Fuller, Watertown, N. Y.; Mrs. C. B. Carter, Greenwich, N. Y.; Mrs. C. H. Morrison, Bangor, Me.: Maria L. Hamilton, Heath, Franklin Co., Mass.; Josephine Smith, Napoleon, Ohio; Mrs. James A. Field, West Falmouth, Me.; Mrs. Mary A. Shankster, Pulaski, Ohio; James A. Bazin, Moutreal, Canada; Miss Maria Cooper, Tomales, Mariin Co., Cal. So many others sent in such flue blooms that I was sorry I had no more books I could give. Many wrote that even though they did not get a prize, they felt amply repaid for trying in the pleasure the Pansies had given and the knowledge gained of just how to grow nice Pansies.

## TANCOTORIOR PETANISYE CONTUCISTA

Many of the competitors complained of the very hot, dry weather that prevailed in so many places and the unfavorable conditions for growing nice Pansies, and expressed a desire to try again. I will, therefore, make twenty-five cash and book presents to those who grow the largest blooms of Diamond Pansies this year, as follows: One cash present of \$10.00 for the largest and most perfect pressed bloom. One cash present of \$5.00 for the second largest and most perfect pressed bloom. One cash present of \$3.00 for the third largest and most perfect pressed bloom. One cash present of \$2.00 for the fourth largest and most perfect pressed bloom. And to each one of those who send the next twenty-one largest blooms I will make a present of a beautiful dollar book entitled, "Every Woman Her Own Flower Gardener." (See special description in another place.)

RULES AND CONDITIONS:—Competition is open to all, except to those who received prizes last year, so that others may have a chance of obtaining a present. As the very largest blooms of Pansies are produced in the spring on plauts from seeds sown the previous year, it would not be fair to others to allow those who can grow blooms ou such plants to use them in competition with those who sow seeds this year; and all blooms intended for competition must be grown on plants raised from seeds this year, and those intending to compete for the presents, must so state when they order seeds. The presents will be awarded for the largest pressed blooms of the most perfect form, the color not being taken into account. If the blooms are carefully pressed they will retain their natural form and shrink but a trifle in size. The easiest way to press them is to cut off the stems close up to the flowers and put them in a large book in such a way that they will press out smooth and flat; then put a heavy weight on the book, or wedge it tightly with other books between two shelves, where they can remain till dry. The pressed blooms can be sent in an ordinary letter at any time before Nov. 10, feel well paid by the pleasure the culture of these superb Pansies will give.

## COMMECTION OF BURRY PRANTS

For \$3.501 will send by express one dozen each of the 8 varieties of berries named below and two plants of Fay's Prolific Currant,—98 plants in all,—good plants and nicely packed so as to go safely to any part of the U.S. Will send the same collection by mail, postage paid, for \$4.00:—Strawberry, Parry; Strawberry, Old Iron Clad; Blackberry, Early Harvest; Raspberry, Cuthbert; Raspberry, Souhegan; Raspberry, Hansell; Raspberry, Gregg; Blackberry, Taylor's Prolific. At regular rates, the same plants would cost \$4.25 by express or \$5.00 by mail, and it is only possible to sell this splendid collection at the low price offered, by digging and packing them in large quantities, hence it must be taken exactly as offered without change; any change subjecting all to regular rates.

## 6000 BOOKS ON GARDENING

WINDOW GARDENING, by H. T. Williams. Gives plain directions for the care of all kinds of house plants; about soil, watering, propagating, etc.; 300 pages, 250 illustrations, cloth bound, \$1.50 postpaid. Given as a premium to those who send club orders for seeds (see page 3).

EVERY WOMAN HER OWN FLOWER GARDENER.—This delightful work upon out-door gardening is full of useful information about laying out flower borders and beds, and the culture of all kinds of out-door plants; 148 pages, cloth-bound, \$1.00 post-paid. Twenty-one copies of this book given to those who send the largest pressed blooms of Diamond Pansies (see above).

who send the largest pressed blooms of Diamond Pansies (see above).

I can supply any book published on gardening and kindred topics, postage paid, at the usual prices, among which are the following valuable works: Henderson's Gardening for profit, \$1.50. Gardening for Pleasure, \$1.50. Roe's Play and Profit in my Garden, \$1.50. Treat's Injurious insetts of the Farm and Garden, \$2.00. Saunder's Insects Injurious to Fruit, \$3.00. Downing's Fruits and Fruit Trees of America, \$5.00. Fuller's Small Fruit Culturist, \$1.50. Practical Floriculture, \$1.50. Fuller's Grape Culturist, \$1.50. Ellwanger's The Rose, \$1.25. Long's Ornamental Gardening, \$2.00. Long's Home Florist, \$1.50. Canary Birds, 50 cents. Harris' Gardening for young and Old, \$1.25.

## KNOW ABOUT GARDENING.

I am often asked questions by customers about the care of plants, etc. which I am sometimes unable to answer.as I would gladly do, simply for want, of time. Everybody who has a garden, even a small one, or a few house plants, should subscribe to a good, live journal on gardening. Such a one, and one I can thoroughly recommend, is POPULAR GARDENING. The paper treats, on the one hand, of flowers, Pot plants, Lawns and the Beautiful of Gardening; on the other, taking up Fruit and Vegetables, and the Marketing business in all branches—about half and half to each. In style, it is exactly adapted to the wants of the people, heing plain, practical and to the point; no waste of engravings, and gives as much choice matter on gardening as six common books I am often asked questions by customers about the care of plants, etc.

words; engravings and printing the best. A yearly volume embraces over 1.000 engravings, and gives as much choice matter on gardening as six common books that would cost \$9.00 It is very ably managed and cheap; its price being ONLY ONE DOLLAR A YEAR. Subscriptions can begin with any month and may be sent to me at any time. It is indispensable to all who wish to have the best success in the cultivation of plants and keep up with the latest methods and improvements in gardening. In order that my patrons may see just what a nice and valuable paper it is, I have made special arrangements with the publishers to send a specimen free to each applicant. Send a postal card directed to directed to

THE POPULAR GARDENING PUBLISHING COMPANY,

BUFFALO, N. Y.. With your name and address, and say you saw this notice in my Catalog, and they will send you a specimen copy FREE.

YEARLY SUBSCRIPTIONS may be sent at any time to L. W. GOODELL, DWIGHT, MASS.

## ACRES OF FLOWERS.

A Famous Seed Farm in Amherst-A Charming Drive Across the Northampton Mead-ows and Through Old Hadley.

Northampton, September, 1886.—Have you been to Goodell's flower garden just beyond Amherst? was the question asked us a few days ago. We were obliged to confess our ignorance, to the great surprise of our questioner. The road from the Meadow city to that fair village under the shoulder of the Pelham hills is as familiar to our business men as to the students who frequent the fine thoroughfare which separates them from their cousins over the way. But we have been content to stand upon these charming uplands without venturing farther on into less familiar scenes. Tempted by the beauty of one of these crisp autumnal mornings, we set out on an exploring expedition.

these charming uplands without venturing farther on into less familiar scenes. Tempted by the beauty of one of these crisp autumnal mornings, we set out on an exploring expedition.

A drive of a few miles through the valley, a picnic under the pines on a sandy knoll, and there is wafted to us, by the south wind, the fragrance of flowers and we seem to be drawing near the fair world of Los Angeles, where the air is heavy with the perfume of orange blossoms and heliotrope. Even the patriarchial pony of the professor takes a new life, as we energe into a plateau quivering with beauty, and filled with aromatic odors. A surprise indeed. Here are acres covered with blossoming flowers, bearing names which take us to the far-away days of our boyhood, to the days of our grandmothers and the homes of those long since passed away. We inhale the fragrance of marigold and pinks and quickly we are borne back to the days of our early childhood and are again eating ginger-bread as we sit in the lap of the aged one, listening to the story of the Revolution. Strange that the simple odor of a flower carries us back through the years with more than telegraphic speed. We look upon long brilliant rows of black-eyed pansies and verbenas of a hundred shades and the brown eyes of fairer flowers, now blossoming in a fairer land, look up into our moistened eyes. Aye, friends you cannet visit this field of beauty and not be reminded of those who have—in days gone—made your own life radiant and glad, there are holy emotions awakened as you stand there amid the sunflowers and snap dragons, amid four o'clocks and asters, amid poppies and petunias, with the sweep of the mountains around you and the woodlands above you. One stands here on holy ground and is in the daily presence of the "burning bush."

But to pass out of our dreamland musings. Here is a flower-farm which is famed throughout our own

presence of the "burning bush."

But to pass out of our dreamland musings. Here is a flower-farm which is famed throughout our own land and is known heyond the sea, and we nine miles away had never dreamed of such a place till now. We have seen the printed catalog but had not associated the name of "Goodell, Dwight, near Amherst, with such a place as this. A modest young man, devolping new varieties of flowers, introducing into cold New England, the lotus of the Nile, the blue African lily of Zanzibar, the balsam of Malacca, the poppy of California, the primrose of China, is a public benefactor. Tens of thousands of homes are enriched by his enterprise, starting here on a hill-side country farm, where his ancestors have lived since the days of King George, with simply a love for the beautiful as it found expression in flowers, with no thought of making a life business out of these frail, delicate plants, he has built up a trade in flower seeds only second in the United States. Think of 15,000 pansy plants, 50,000 asters, 30,000 plinks looking up at you as you dreamily wander over their fair fields. Then the hundredths of other kinds of flowering plant and shrub and vine, with their bewildering shades of color, from the dainty little violet to the tall and graceful lilly and their sisters dressed in every shade of color. If you are one instant taken back to the old gambrel-roofed house of your mother and listen to the whirr of the spinning wheel as hollyhook and marigold and snap dragon and nasturtias nod their heads at you, in the next you are transported to the Grand Union and see passing before you a procession of dazzling brilliant maidens clad in all the colors of the rainbow, as columbine and zinnias and cockscombs and the gladiolus bow their heads as you pass through their ranks.

A. M. B.

## WORTHLESS VEGETABLE NOVELTIES.

Among the many novelties I have tested and found of little value, I mention the following. I do not find any merit in them, save that of being new, and will not impose on my customers by offering such trash. Crystal White Wax Bean, Ivory Pod Wax, Sweet Potato Pumpkin, King Humbert or Wonder of Italy Tomato, Turner's Hybrid or Mikado (which is the same, and too rough and uneven), Hardy Ridge or Prescott Musk Melon, Banana Musk Melon. The following new squashes are too poor in quality to be worth cultivating; one squash of Hubbard, Marblehead, Essex or Bay State is worth more for table use than a whole cartload of any of these: Red China, Olive, White Pineapple, Brazil Sugar, Perfect Gem. Valnaraiso, Butman. Gem, Valparaiso, Butman.

Should you receive more than one copy of this Catalog, I shall be greatly obliged if you will kindly hand it to some friend who would be likely to order seeds. As printers' ink is expensive, I should like to place every copy where it will be likely to bring at least a small order.

# REPORTS OF CHSTOWERS!

I have received thousands of letters, containing entirely unsolicited expressions of the satisfactiou and success of customers. I take the liberty of publishing extracts from a few lately received, to show those who have never dealt with me that my seeds are just as represented. The gardens of customers are my best advertisements, and it is very gratifying to know that they have such unexceptional success and are so highly pleased with the seeds I furnish. I return my sincere thanks for the many kind sentiments and for the efforts many have made to extend my trade, and I shall try by furnishing the best of seeds and liberal dealings to merit a continuance of orders. Occasionally a failure occurs, and I am asked to replace seed which has failed to grow, and when such a failure is caused by any possible mistake of mine, I am ready to restore fourfold. I furnish all my customers with precisely the same quality of seed, just such as I would, and do, sow myself; and when ninety-nine succeed admirably, and the one hundreth one fails with seed that is all put up from one lot, it is impossible that the fault can be with the seed. All experienced gardeners well known that, no matter how good the seed, failure will sometimes occur from unfavorable weather and other causes entirely beyond control.

beyond control.

From James Beach, 5232 Paschall St., West Philadelphia, Pa.—I purchased your 30 ct. collection of seeds last year, and as I frequently purchased seed from other places from which I received no benefit whatever, I took your seeds and put them in the ground in a careless way not supposing they would amount to anything; but imagine my surprise, in a few weeks, I saw the bed filled to its utmost capacity with grand and beautiful flowers. I have recommended your seeds highly to all and the present \$4.00 order is the result my success last year.

From Mrs. Geo. E. Berry, Burlington, Yt.—I want to tell you of the success I had last year with your seeds. The Petunias and Pansies were the finest in Burlington. I took the special first premium on Petunias at the State Fair, and Mr. Klunder, the great florist of New York, who saw some I had on exhibition pronounced them the finest he ever saw.

From Mrs. Mary S. Cole, Laconia. N. H.—The seeds that I had last year were *very* good and we had a nice show of flowers; 65 Asters plants from 70 seeds, 100 Calceolarias from one paper, and other

From Mrs. W. H. Felker, West Corinth. Me.—The Pansies have been the surprise and delight of myself and friends all summer, and as they are the largest I ever saw from seeds the first year. I send one in this letter. If I am not fortunate enough to win a prize, I can take this opportunity to thank you for the pleasure I have taken this summer with the flowers from those seeds.

you for the pleasure I have taken this summer with the flowers from those seeds.

From John Gill, Mahauoy City, Pa.—I tried your 30 ct, collection last year and everything gave me great satisfaction. I have tried some of the best grower's seed in this country and spent a lot of money with them, but I never had such flowers as I had from your cheap collection.

From Mrs. C. H. Morrison, Baugor. Me. Perhaps you would be pleased to know that I took premiums at the N. E. Fair this fall on Stocks, Verbenas and Pinks grown from your seeds. I enclose my best Pansy hoping for at least one of the small prizes, but if I do not get a prize I have been amply rewarded for buying the choice seeds, for my Pansies have been very beautiful.

From Mrs. J. G. Leipold, Hunter, N. Y.—I cannot refrain from speaking of my success with your flower seeds which I have tried the past two years. I cannot say too much about them, and the cry has been, "Where do you get your seeds, I'm going to send to that place next year." My Petunias were far beyond anything in this vicinity. The Asters were perfect and Nicotiana a source of constant delight; and there were more than fifty varieties of Pinks. I have found it impossible to do as well with seeds from other houses.

From Ana M. Miller, Springs, N. Y.—My bed of Little Gem Alvssum is greatly admired by all who

seeds from other houses.

From ADA M. Miller, Springs, N. Y.—My bed of Little Gem Alyssum is greatly admired by all who have seen it; it is loaded with blossoms and looks like a snowbank. I planted two-thirds of the packet of Cineraria and have 73 plants. No seeds give such good satisfaction as yours. From Mrs. Cyrucs Barber, East Steamhurg, N. Y.—The Pansies were a marvel to all who saw them, for their large dimensions and exquisite coloring. The question was often asked me, "Where do you get your seeds?

From F. P. Avery, Tunkhannock, Pa.—Just to think about 2½ cents for the handsomest Petunias I ever saw. We had a row 5 rods long and they have attracted attention for two months. I sold hundreds of Verbena plants and nothing but praise from all sources. From Miss Elste Streecker, Reading, Pa.—All the seeds we sent for last year came up and produced some of the most beautiful flowers we ever saw, especially the Pinks and Asters, which were greatly which the all the sell of the most beautiful flowers we ever saw.

some of the most beautiful flowers we ever saw, especially the Pinks and Asters, which were greatly admired by all our friends from far and near.

From Mrs. G. B. Fuller, Watertown, N. Y.—Many people visited my flower garden and said my Pansies and Verbenas were the hest they ever saw. I took first premium on Pansies at our county fair, first on Asters and first on Verbenas.

From Mrs. James M. Vincent, East Shelby, N. Y.—I don't know as there is any need of my writing anything in commendation of your seeds, as my orders are proof that I have been well satisfied. I had snowball Cauliflower heads that weighed 5% pounds each, that beat anything around here in that line. From Mrs. J. Z. Miller, Parma, Mich.—My flowers from your seeds have been so nice that I want to write a little in praise of them. My Pansies were beauties; I had 65 plants. 30 distinct varieties; 16 distinct varieties of Asters, all double; China and Japan Pinks were very nice and a great many varieties; and my Portulaca bed was a perfect mat of all colors, and two-thirds of them as double as roses; Phlox was very nice, and of 11 varieties, and all of the seed was all, if not more, than you recommended. From Mrs. George S. Randell, East Marshfield, Mass.—I cannot find words to express the beauty of the Ciuerarias. They were over two feet tall and such a mass of bloom; the seeds must have been very choice, the flowers were so large and such a variety of rich colors, only two plants alike. They were just grand, and I never saw such nice ones before. I should think that every one that had anything to do with flowers would have some of them.

just grand, and I never saw such nice ones before. I should think that every one that had anything to do with flowers would have some of them.

From Mrs. Dill E. Holmes, Mattawan, Mich.—The Primroses, from seed purchased from you, were very satisfactory in blooms and they must have nearly every one sprung to life. The flowers on them have been a constant joy to me the past Winter and are now in profuse bloom.

From Mrs. WM. Dixon, Holden, Me.—The Pansies were the largest ever seen here and there was quite a time over them at the Fair and one gentleman from Boston wanted some of the seed as he never saw any so large. I referred him to you. I am going to try and have them still larger another rear if possible

year, if possible.

From A. E. Barnard, Whitneyville, N. Y.—I sent you an order last year for nineteen 30 ct. collections and heard only one complaint from them. My flowers were a wonder to all who saw them. I had three papers of Asters and no one in this vicinity ever saw such a show (and it is a great place for flowers too), they were so double and such a show. Although I did not get a prize I felt amply repaid for my trouble and wish you long life and happiness.

From Mrs. II. L. Surrytine, Dimondale, Mich.—From the paper of Diamond Pansies I grew thirty-three distinct varieties of the most heautiful Pansies I ever saw. All the seed you sent me grew. I had the handsomest Petunias, Asters, Godctias, Phlox, Balsams, Portulacas, and in fact every one of the twenty-six papers produced the most beautiful flower and my garden has been the admiration of the whole village all summer.

From Mrs. S. M. Hamlton, Windsor, Nova Scotia.—The seeds you sent last year gave universal satisfaction, and the Pansies turned out to be lovely. My Verbenas were the finest I ever saw. With the Chinese Primroses I had the greatest success, and have now a window full of beautiful blooms, which are the admiration of all who see them.
