

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

20153

P R E F A C E .

THE propriety of quoting the vernacular names of plants, has been questioned by several Indian Botanists and by none in more condemnatory terms than by Dr. Wight.* The objections urged, are the uncertainty and fluctuating character of local terms, the mistakes made by persons ignorant of the language of the country in assuming the answers of Natives to be names which were no names, the number of diverse names given to the same plant, the mischief which might be occasioned by such misapprehensions, &c. But it cannot be denied that many of the commonest and most useful plants are known by definite and

* *Prodr.* pref. p. xxiii. After stating that he discards all native names in concurrence with the opinions expressed by Wallich and Carey in their edition of the *Flora Indica*, he adds that "the natives seem to have no rule either for nomenclature or orthography; they have no means of producing an uniformity of names, and very frequently confound one name with another, so that our inserting these would only tend to mislead, in place of proving an aid in the investigation of an unknown plant, by one unacquainted with botany. Owing to very different plants having the same native name, we have occasionally known dangerous mistakes originated, by erroneously substituting active medicines, when those of an opposite kind were intended, and vice versâ. On these last grounds particularly, we not only think it useless but injurious, nay even dangerous, to insert those names, unless the natives themselves shall have discovered some method by which a plant shall be known throughout by but one name, and that name shall be restricted to the individual plant."

But Wallich simply states that the names given to plants by natives of Nipal are in general very uncertain and fluctuating and that he only uses them when he has reason to be tolerably satisfied as to their correctness, and accordingly he does insert

generally received appellations, an acquaintance with which must often prove useful to persons ignorant of botany and even to those commencing the study of that fascinating science, at a distance from books of reference and other assistance.

It must be borne in mind that many plants are spread over the whole of the Peninsula and are common to provinces where the dialects in use differ as much from each other as do French and Spanish and Portuguese and Italian. It cannot be matter of surprise therefore to find a different, though perhaps a cognate name, attached to the same object in each. Even within the range of one dialect, the same name will be pronounced differently by the educated and the ignorant, and this, owing to the greater diversity of races in India, occurs to a greater degree here, than is found in more civilized countries. Such differences of pronunciation and of local use, exist to a very considerable extent even in our own country, between the people of different counties and still more between those of England and Scotland, Wales and Ireland. But this is no reason why such words should be neglected. If their identification secured no other purpose, it would at least prove useful to the philologist. Few of the names now brought together, exist in the best dictionaries at all, and many of those that do find place in them, are erroneously explained.

On this ground alone, the formation of such lists as that now submitted, is deserving of encouragement.

To the merchant, to the officers of the Department of Public Works and the Railway, to European settlers engaged in agriculture or trade and to the traveller whose time is limited,* the aid afforded by such a manual cannot be slight.

several. In like manner, Carey attributes the occurrence of the mistakes so often found in the vernacular names assigned to plants, to the fact of their having been taken down from the mouths of natives, by persons more or less ignorant of the language or dialect spoken. But neither does he propose to discard them altogether, rather he agrees with Wallich that they should be added whenever there is reason to believe them to be correct.—*Flor. Ind. Ed. Carey*. II. 99, 415, notes.

* "And in this founde wee oftimes muche trouble and vexation, with moreover losses, bothe of precious tyme and lucre. *Fyrste*, thatt wee coulede never aske in $\frac{e}{v}$ *Indian* tongues for suche herbes, or fruites, woodes, barkes, or gummes, as wee

But even as regards scientific purposes, other botanists are found to view the subject in a very different light from Dr. Wight.

Dr. Royle, in his observations on the Provincial Exhibitions of the Madras Presidency, expressly recommends that native names should be introduced into the proposed botanical Manual, for Southern India.*

“ I have always found,” he observes, “ that such (plants) as are of use and are therefore important, have names by which they are well known to the Natives. These names no doubt differ in different districts and applying them may be more troublesome in the Madras Presidency than elsewhere, from the languages differing so much in different parts, but this very fact makes the task more necessary.”

The opinion of William Griffith, eminent among the many eminent botanists of India, also deserves to be cited. In a letter to Mr. Marshman written shortly before his death, he enumerates the merits of Voigt's catalogue, among which he particularizes that “ it gives in all definable cases, the vernacular names, and these appear to have been obtained with no common care and consequently to lose in a great measure, the usual inapplicability.”

One great source of confusion is found in the absence of a recognised standard for representing native sounds in an English dress. The same word is spelt in as many forms as there are writers, each according to his individual conception of the sound uttered by the speaker, so that the recorded results can hardly be recognised as applying to the same thing.

The persons moreover from whom such information is derived,

knewe full well, by experience in sundrye other partes, to bee wholesomme, (many of our crewe lyinge sicke at this tyme,) or savorye, or usefull to trafficke withall. Nexte, thatt when anye were shewne us, we coulde in noe wise tell, from $\frac{e}{y}$ names given toe them by $\frac{e}{y}$ Gentooes, whether or noe $\frac{e}{y}$ like were already knowne in European countryes: And yett these partes doe myghtylie abounde with herbes and woodes of sovraine virtew.”—*Master Richarde Kyngge, his travells, and voyages, and traffickes, in foraygne countryes, in the Shippe Tamburlan. Lond. MSS. fol. 1634.*—*Title to Pid. Ind.*

* In conformity with Dr. Royle's advice such a manual has already been undertaken and is now in course of preparation by Mr. Cleghorn, the late Professor of botany.—*Mad. Jour. Lit. and Sc. V. II. N. 5. p. 78.*

are frequently ignorant illiterate men, whose faulty enunciation of a name produces a sound very different from that of the same word correctly spoken. This is particularly the case with the wild races inhabiting jungle and forest tracts, such as the *Yánábis* of Nellore, the *Chenchus* of Guntoor, the *Kóyas* of Rajahmundry and the *Konda Doralu* of Vizagapatam. These classes possess a very extensive and accurate knowledge of the vegetable products of their several ranges and are generally able to apply a name to every plant or tree, in any wise remarkable. But as a matter of course, their pronunciation is rude and barbarous and frequently much corrupted. The particular term employed by one tribe, is likewise often peculiar to themselves and differs from that in use among the others. Still wherever such a name is found to prevail throughout a particular tract, a knowledge of it will prove useful.

In preparing the list which serves as the foundation of the present catalogue, the vernacular names were always written down in the native character, from the mouths of the speakers, by a native of the district. These have been tested by a reference to the best native dictionaries and corrected where possible. The same process has been applied to Roxburgh's and other names introduced. But many are without doubt still faulty, several may probably be found to be insufficiently established and many more remain to be added. On several occasions, names were given to unknown plants, the botanical position of which was never ascertained and consequently this want remains still to be supplied. The list admits of being greatly enlarged, for neither leisure nor opportunity have been sufficiently at command, to allow of a systematic collection being made.

It is hoped however that by the plan now followed, a beginning has been made for the preparation of a more accurate catalogue, on correct principles, and as such, it is offered to those who are interested in the scientific or economical study of vegetable productions.

The catalogue consists of two parts :—

- I. A list of Telugu names.
- II. A list of Sanscrit names with their Telugu equivalents.

The sources from which the names in Part I, have been derived are:—

- 1st. A list made during a residence of five years in the Northern Circars.
- 2d. A list prepared by Lieut. Beddome, Assistant Conservator of Forests, principally in the upper valley of the Godavery.
- 3d. Names found in Roxburgh's *Flora Indica* and *Coromandel Plants*.
- 4th. Names occurring in Heyne's *Tracts on India*.
- 5th. Names found in Piddington's *Index of the Plants of India*.*
- 6th. Names met with in Ainslie's *Materia Medica*.

Part II. has been drawn entirely from a native work in *M.S.* called the *Sabdārtha-kalpataru*, a Sanscrit and Telugu Dictionary compiled by Mámidi Venkayya, a learned Komati of Masulipatam, in the early part of the present century. It consists of three large folio volumes and was found in the possession of the author's grandson, the late Mámidi Nága-bhúshanam, who kindly permitted me to consult it during my residence at Masulipatam in 1851.

The following letters prefixed to a name indicate the authority on which it is inserted:—

- B—Mr. Beddome's List.
 R—Roxburgh's *Flora Indica* and *Coromandel Plants*.
 P—Piddington's *Index*.
 H—Heyne's *Tracts*.
 S. K.—The *Sabdārtha-kalpataru*.
 Br.—Brown's *Dictionary*.

The letter S. following a word intimates that it is of Sanscrit origin.

Those without prefix, are from my own list and when it includes names also occurring in other works, the absence of the letter indicates that they have been noted independently of such authorities.

* The number of Telugu names in Piddington's list is 928, of which 445 are taken from the *Flora Indica* leaving 343 derived from other sources, but many both of the former and of the latter are wholly unrecognisable.

The first column contains the name in the vernacular character—the second its equivalent in Roman letters according to Sir W. Jones' principles as modified by Wilson and the latest authorities—the third gives the botanical names, and the fourth is devoted to miscellaneous remarks.

The botanical nomenclature has been chiefly, though not altogether based on Voigt's *Hortus Suburbanus Calcuttensis*, with the addition of references to the most accessible local authorities, indicated by the following abbreviations:—

R.—Roxburgh's *Flora Indica*, 3 vols. 8vo. Serampore, 1832; with the *volume* in Roman and *page* in Arabic numbers.

R. Cor.—Roxburgh's *Coromandel Plants*, London. 1795-98-1819; with the *number* of the plate only.

W. & A.—Wight and Arnott's *Prodromus Floræ Peninsulæ Indiæ orientalis*—London. 1834; the reference being invariably to the *number* of the species.

W. Ill.—Wight's *Illustrations of Indian Botany*, 2 vols. 4to. Madras 1840-50; the reference being, unless otherwise specified, to the *No.* of the plate.

W. Ic.—Wight's *Icones Plantarum Indiæ orientalis*, 6 vols. 4to. Madras. 1840-1853. The reference is always to the *No.* of the Plate.

W. Contr.—Wight's *Contributions to the Botany of India*—London 1834; the reference is to the *page*.

Heyne.—Heyne's *Tracts on India*, 4to. London, 1814—the reference being to the *page*.

O'Sh.—O'Shaughnessy's *Bengal Dispensary*, Calcutta. 1844; the reference is to the *page*.

Ains.—Ainslie's *Materia Medica of Hindustan*, 4to. Madras. 1813—the reference is to the *page*.

Rheede.—The *Hortus Malabaricus*—the reference being to the *part* or *vol.* in Roman and to the *plate* in Arabic numerals.

- Br.*—Occasional references, will be found to Mr. C. P. Brown's Telugu and English Dictionary, Madras 1852, with a direction to the *page* at which the word quoted, occurs : and
- W.* to Profr. Wilson's Sanscrit Dictionary, 2nd edition, 4to. London. especially in Part II, where in like manner the figures noted are intended to indicate the *page* on which the word is found.

A

The leaves are used as a spice and medicinally.

W. 17.—Br. 44.

Name given by the Konda Dorata.

Ditto.

Br. 45* gives *Nymphaea* as the signification of this term but it is a Tamil use of the word only employed by Telingas near Madras.

With large edible fruit.

The Sans. syn. is *Grach-cha*, which signifies 'tufts,' a peculiarity of *A. Iwarancusa*, R. i. 275.

బాలబందితీర-(నెవులపిల్లి)	Bálabándi tige (Chevulapilli tige),...	...	[POMEA PERSICAPRAE; <i>Secet.</i> —Convulvulus pescap. R. i. 486 ; C. bilobatus, R. i. 485.— <i>Rheede</i> , xi. 57.	
S K బల్బు బిము-(మొదవగడ్డి)	Balbajamu S (V. Modava gaddi),...	...	IMPERATA CYLINDRICA, Beauv.	W. 742, has <i>Valhoja</i> which he makes <i>Elen- sine Indica</i> Gaertn.—Br. 568. A doubtful name.
R బలికొమ్మ-(నల్లఉడత-నె బలురకీ-న. [ల ఉడత)	Bali konna (V. Nalla udata & Tel- ta udata), Balu rakkisa,	...	OPHIA AMENTACEA, R. ii. 87.—W. III. 40. FOURCROYA CANTALIA, Haw.—Agave Cant. R. ii. 167.	Commonly called the American aloe. The same name is also applied to <i>Argemone Mexicana</i> (V. <i>Bramha danadi</i>) and at Sim- hachalam the Konda Dorau gave it to <i>Paratropia venulosa</i> . In Piddington's in- dex, it is said to be <i>Arum</i> (<i>Colocasia</i>) <i>for- nicatum</i> R. iii. 501.—W. Ic. 789-92— Br. likewise, 567, makes it an <i>Arum</i> (<i>Co- locasia</i>) <i>macrorhizon</i> ? But his description seems to refer partly to the common aloe.

Tourcroya Cantala or perhaps to its con-
 gener *Tourcroya tuberosa*, confounded
 with *Colocasia Indica* and *Remusatia vira-
 para*, R. iii. 496, 498, all of which are
 propagated by tubers hanging from the
 stalk—and partly to *Spinifex squarrosa*
 (V. *Ravanásurum misáha*), the prickly
 spherical involucre of which are rolled
 and whirled over the sands of the sea-
 shore by the wind, all along the Coroman-
 del coast.—Fs. lxxxiii 13.
 The word *kíra* signifies "vegetable." The
 use of the plant occurs in a verse of the
 Bháráta where Krishna having been fed
 by a hunter or savage, his attendant asks :

నాల్సోదనాపూ పశాక సూపంబులా పాం

పాలికుండడు కబలుసుకూర

Is the *Batasa kúra* which you received from
 Panchálikudu equal to *sátyadanam* (fine
 rice) *aplypa* (cakes); *sáha* (vegetables),
áiyam (pulse) ?

It is a common proverb also—పాణం

వుంపైబలుసు అకులిని బ్రతక వచ్చును.

Whilst life remains, I can, subsist on the
 leaves (*áira*) of the *Batasa*—implying sub-
 mission to any necessity however grievous.
 Br. 523.

The name occurs in Br. 521 with the expla-
 nation "a hard yellow wood like mango
 wood." I heard the preceding name (with a
 soft *d*) frequently applied to *Nuclea cor-
 dífolia* in the Rajahmundry Hills and from
 its resemblance to its congener *Hyme-
 nodiction exzelsum*, the two may have
 been confounded under the same name.

TELUGU NAME.		Roman Character.	BOTANICAL NAME.	REMARKS.
Vernacular Character.				
బండారు. (బాల్ల తులెడ.)	Bandāru (<i>Gouia guilforda</i>),	...	DODONAEA BURMANIANA, <i>D.C.—W. & A. 389; III. 52.—D. angustifolia</i> and <i>dioica</i> , <i>R. ii. 256.</i>	Br. does not give this meaning to the word which is, nevertheless, the generally recognized name of one of the commonest shrubs in India—Roxb. two species appear to refer to one and the same plant. This name I heard in Guntoor. The word occurs in Br. 524, with the explanation, "Touch wood; a light wood that ignites easily." The <i>Dodonaea</i> is extensively used for firewood and the small twigs formed into faggots are useful in kindling fires.
బండేడు.	Bandēdu,	...	V. preceding name.	
S K బంధుజీవకము.	Bandhujīvakamu—S,	...	1. PENTAPETES PHANICEA, <i>L.</i>	W. 599.—Br. 524.
S K బంధుజీవము.	Bandhujīvamū—S,	...	2. IXORA BANDHUCA, <i>R. i. 376.—W. Ic. 149.</i>	
S K బంధూకము.	Bandhūkamu—S,	...	DALBERGIA VOLUBILIS, <i>R. iii. 231; Cor. 191.—W. & A. 818.</i>	This is a doubtful name resting solely on the authority of Roxb. Br. 522, has arbitrarily corrected the word to <i>Bandi gurigunjia</i> , which will apply more correctly to the next plant, the seeds of which are called the larger <i>guyijas</i> or <i>gurigujias</i> , q. v.
R బండికజ్జెన.	Bandigarjana,	...	ADENANTHERA FAYONINA, <i>L.—R. ii. 370.—W. & A. 839; III. 80.—Bheede, vi. 14.</i>	
Br. బండిగురిగంజ.	Bandi gurigunjia,	...	COMBRETUM OVALIFOLIUM, <i>R. ii. 226.—W. & A. 980.</i>	This name was heard at Poddapār—It is probably a mere local term. Roxb. gives a very similar name to <i>C. lacunum</i> which is merely a syn. of <i>C. ovalifolium</i> , apud W. and A. 980.
బండిగురి వెండ.	Bandi gurivenda,	...	<i>R. ii. 231.</i>

TELEGU NAME.		BOTANICAL NAME.	REMARKS.
Vernacular Character.	Roman Character.		
బొబ్బిలి చెట్టు.	Bobbarlu (<i>V. Alachandala</i>).	...	This name is explained by Br. 633, to be "the whispering larch tree"; such a definition may apply to the <i>Casuarina</i> , but we have never heard the name. This name was given by the Konda Doralu and means the small or bare <i>Chandra</i> (<i>Acacia Sunetra</i>)
బొబ్బిలి చెట్టు.	Bobbili chettu, ...	DOLICHOS SINENSIS, L.	
బోడవండ్ల - (ఉండ్ర వెంట్ర.)	Bōḍa chandra (<i>V. Undra and Venetra</i>), ...	MIMOSA RUBICAUUS, Lam.	This word is found in R. iii. 561, but seems very like a mistake for <i>Bramha médi</i> , the true name. The Konda Doralu at Simhachalam however called it <i>Bōḍa chettu</i> . This shrub was found on the rocky hills in the valley of the Krishna opposite Bezvada with the Telugu name in col. 1. The botanical name is taken from Voigt, who refers to the note in W. and A. at page 96 of the prodr. and to B. Hort. Bengeh p. 28. This name was found about Flakonda in Vizagapatam
బోడమామిడి - (బిహ్మ మేడి.)	Bōḍa māmidi (<i>V. Bramha médi</i>), ...	FIGUS OPPOSITIFOLIA, R.	
బోదంకి చెట్టు.	Bōḍanki chettu, ...	BALSAMODENDRON AGALLOCHA, B. Roxburghii <i>Dr.</i> — <i>W. III.</i> i. p. 185.— <i>Amyris</i> Commiphora, R. ii. 244.	Among the Sam. syns. only one <i>Kedarak</i> (not <i>Kēḍāra</i> as written in S. K.) is found in W. 247, "the name of a plant."
బోదంట చెట్టు.	Bōḍanta chettu, ...	BATHINIA PURPUREA, L.—R. ii. 320.— <i>W. and A.</i> 915.— <i>Rheedé</i> , i. 33.	
బోదారశ్రంకి చెట్టు.	Bōḍāra sringi chettu,	V. next word, R. distinguishes between <i>S. mollis</i> and <i>S. Indicus</i> as being one with, the other without scent—but Wight unites them. In Voigt, they have distinct Bengali names. This name, (as well as <i>atli</i> and <i>mōḍi</i> .) is applied indiscriminately to various kinds of <i>Ficus</i> but most frequently to <i>F. glomerata</i> .
బోడనరం.	Bōḍāsaram, ...	1 STEMODIA VISCOSA, R. iii. 94; <i>Cor.</i> 163.— <i>W. Ic.</i> 1408. 2 SPHGRANTHUS HIRTUS.	
బోడవరశ్రంకి చెట్టు.	Bōḍātarapu chettu, ...	SPHGRANTHUS HIRTUS, <i>Willd.</i> — <i>W. contr.</i> 11, <i>Ic.</i> 1094.— <i>S. mollis</i> , R. iii. 446.— <i>Rheedé</i> , x. 43.	FICUS GLOMERATA, R. iii. 558.— <i>F. racemosa</i> , <i>Willd.</i>
బోడవరశ్రంకి చెట్టు.	Bōḍā chettu (<i>V. Médi chettu</i>),	

బొద్దుమామిడి - (ముర్రుమామిడి) [బొడి.]	CUPANIA CANESCENS, <i>Perr.</i> —Molucca can. <i>R.</i> ii. 243; <i>Chr.</i> 60.— <i>W. and A.</i> 886. MACARANGA ROXBURGHII, <i>R. W.</i> in <i>Jc.</i> 1888.— <i>Osyris peltata</i> , <i>R.</i> iii. 755.— <i>W. Ic.</i> 817.	These names are somewhat doubtful. Br. inserts this name but does not state on what authority. It is also found in Piddington's Index.
బొద్ది కూర.	RIVEA HYPOCRATERIFORMIS, <i>Ch.</i> — <i>Lettoomis uniflora</i> , <i>R.</i> i. 495.	The leaves are used as a vegetable in the south, as are those of <i>R. Roma-nor</i> in Bengal, Voigt. The Sans. syns. in Pt. II. <i>Atēgi</i> , <i>W.</i> 123 and <i>Jwaga</i> , 353, are said to be <i>Argyrea argentea</i> , <i>Ch.</i> The buds of <i>Calonyction</i> and some sp. of <i>Ipomoea</i> , especially <i>I. reptans</i> , are also eaten as vegetables (<i>khira</i>).
బొద్ది కూర.		
బొద్దు కూర.	PORTULACA TUBEROSA, <i>R.</i> ii. 464.	PORTULACA TUBEROSA, <i>R.</i> i. Br. 677.
బొద్దు మల్లె.	JASMINUM SAMBAC, <i>Ait.</i> <i>var.</i> plenum.— <i>R.</i> i. 88.— <i>Rheede</i> , vi. 50-51. PORTULACA OLEACEA, <i>L.</i> — <i>R.</i> ii. 463.	
బొద్దు పాపిలి కూర (కొక పాపిలి)	HYMENOCHEITE GROSSA, <i>Nees</i> — <i>W. contr.</i> 110. — <i>Scirpus gros. & maximus</i> , <i>R.</i> i. 231. INGA XYLOCARPA, <i>DC.</i>	So called at Pithápur but the propriety of the name is doubtful.
బొద్దు తంగా.	EHEBETIA, <i>sp.</i>	
బొజ్జ (కంఠచూసు.)	ZAPANIA NODIZIOBA, <i>Lam.</i> —Lippia nod. <i>Rich.</i> — <i>Rheede</i> , x. 47. HYDROCOTYLE ASIATICA, <i>R.</i> ii. 88.— <i>Rheede</i> , x. 46.	Only one of the Sans. syns. <i>Karjasp'kōla</i> occurs in <i>W.</i> 196, with the explanation, "a sort of creeper." The etymon is <i>Karjya</i> the ear and <i>sp'kōla</i> a boil, showing it to be a remedy for ear-ache.
బొక్కడి.	EUPHORBIA ANTIQVORUM, <i>L.</i> — <i>R.</i> ii. 468.— <i>W. Ic.</i> 897-1863.— <i>Rheede</i> , ii. 42.	
బొక్కెన.	EUPHORBIA ANTIQVORUM, <i>L.</i> — <i>R.</i> ii. 468.— <i>W. Ic.</i> 897-1863.— <i>Rheede</i> , ii. 42.
బొక్కడు.	
బొల్లి బెతూర.	EUPHORBIA ANTIQVORUM, <i>L.</i> — <i>R.</i> ii. 468.— <i>W. Ic.</i> 897-1863.— <i>Rheede</i> , ii. 42.
బొమ్మ జెముడు - (బొంత జెముడు.)	

TELGUGU NAME.		Roman Character.	BOTANICAL NAME.	REMARKS.

SK చెప్పూట.		...	DESMODIUM FOLYCARPUM, <i>D. C. — W. and A.</i> 703; <i> Ic.</i> 406. — Hedysarum purpureum, <i>R. iii.</i> 358.	The exact plant to which this name properly belongs, is doubtful. I heard it on one occasion applied to <i>Desmodium. Lt.</i> Beddome heard it given to <i>Coldenia procumbens</i> . Br 354 and 370 following Ainslie 5, assigns it to <i>Asarabacca (Asarum Europæum)</i> a drug belonging to the natural family <i>Aristolochiaceæ</i> , which is imported and sold in the bazars, but does not grow in India. The Telugu word signifies "shoe leather," which is applied to leaves having a wrinkled surface. One of the Sans. syns. in <i>Y. H. Charadrā</i> agrees with this, as does <i>Scrappadi</i> .

Br. చేరికూర.	Chéri kúra,	<p>(“shoe-foot”) the Tamil name of <i>Coldenia</i> V. Rottler i. 389. The Telugu syn. <i>Hamsapádi</i> (goose-foot) conveys a somewhat similar idea. The Yánádi near Madras apply the name to <i>Elytraria crenata</i>, which has also corrugated leaves.</p> <p>Br. 361 says, “a kind of pottage used in <i>Ché-ri</i>” which he explains to be pepper-water soup or <i>milagutlanná</i>. The word pottage would perhaps be “potherb,” such being the signification of <i>kúra</i>. The name <i>ché-ri</i> we have not heard—but <i>Chirri</i> is a kind of <i>Amaranthus</i> q. v.</p>
చెరుకు.	Cheruku,	<p>The Sans syn. is <i>Pundariká</i> W. 540. “a var. of the sugar-cane.”</p> <p>R. iii. 718 says this var. is called <i>Katu-kumbi</i> W. 181; where the term <i>Katu-kittaka</i> is also found.</p>
SK చెరుకులోశేదం.	Cherukulr bhédam,	Do.

Vādaralasa</i>), ... WALSURIA TERNATA, R. ii. 389. Chinna botaku, ... CORDIA ANGSTIFOLIA, R. i. 595.</p>	

TELUGU NAME.		Roman Character.	BOTANICAL NAME.	REMARKS.
Vernacular Character.				
చిన్నజమ్మి-(నోలజమ్మి.)	Chinna jammi (<i>F. Nolia jammii</i>)	ACACIA CINERARIA, <i>Willd.</i> — <i>W. & A.</i> 864.	This plant which Wight seems to consider rare, is not uncommon in the neighbourhood of Madras. It was figured by Plukenet under the name of ' <i>Acacia Madras patensis, spinosus, Intsia accidens, &c.</i> ' tab. ii. f. 1
B చిన్నకలింగ.	Chinna kalinga,	DILLELIA PENTAGYNA, <i>R.</i> ii. 652; <i>Cor.</i> 20.	This seems a doubtful name and is given on Mr. Beddome's authority. <i>Inguera</i> and <i>Kedru ingua</i> are common names of species of <i>Gardenia</i> , the leaves of which resemble those of <i>Dillenia</i> . Roxb's name, <i>Roucaida</i> is unrecognizable.
B చిన్ననారె.	China nare,	EUGENIA SALICIFOLIA. <i>R. W.</i> — <i>III.</i> ii. p. 16; <i>lc.</i> 539.	Mr. Beddome gives this name with a mark of doubt.
చిన్ననీద్రకంటి.	Chinna nidra kanti,	DESMANTHUS TRIQUETRUS, <i>Willd.</i> — <i>W. & A.</i> 836; <i>lc.</i> 756.— <i>MIMOSA</i> triq. <i>R.</i> ii. 552.	Name of Konda Dorah.
చిన్నరంతు.	Chinna rantu,	RHAPHIDOSFORA GLABRA, <i>Nees.</i>	This plant tho' so common and so well known to the natives, is not found in Roxb. Wight, nor in Voigts. or Graham's Catalogues. Sprengel quotes it with the syn. of <i>A. fruticosa</i> Forsk. p. 161; and <i>Lam. supp.</i> iv. 681, under <i>A. fruticosa</i> refers to Vahl. symb. i. p. 77, to which Poirret adds a note that perhaps the plant of Retz and Willd. differs from Forskals and requires further examination. In this he is no doubt correct, for the Indian plant is not fruticose—but herbaceous.
P చిన్నిఅకు.	Chinni aku,	ACALYPHA BETULINA, <i>Retz.</i> — <i>Spreng.</i> <i>sys.</i> iii. 879— <i>A.</i> spiciflorus, <i>Lam. encycl.</i> vi. & <i>pl.</i> 789. <i>f.</i> 1.	Pluken. has two figures resembling our plant t. 99. f. 4 and <i>Amalth.</i> t. 449 f. 3.
				This species has also been confounded with <i>Catarrhus spiciflorus</i> <i>R.</i> iii. 760; <i>V. Pritzels Index</i> , voce <i>Acalyphia</i> , where reference is made to <i>Rumph.</i> <i>Amb.</i> 4. 37

చిరిపల్లెరు (పల్లెరు.)	Chiri palléru (<i>V. Palléru</i>),	...	TRIBULUS LANUGINOSUS, <i>L.</i>	
S.K. చిరిశనకలు.	Chiri śanagalu,	...	ERYUM, <i>L. sp. ?</i>	V. remark on <i>Béryopa chētu</i> and <i>Elāramara māri</i> .
S.K. చిరిశేకు.	Chiri śēka,	...	CLERODENDRON, <i>L. sp.</i>	

Br. చిరివంక.	Chiri vanga, SOLANUM MELONGENA, L. small var.	This refers to a small, procumbent, very soft, villous species, on the hills near Vizagapatam; g. <i>L. mollissima</i> , Wall? Br. 338.
చిరితుమ్మి.	Chiri tummi, LEUCAS, R. Br.	
చిరివేరు.	Chiri vēru, OLDENLANDIA UMBELLATA, L.—R. i. 421. Cor. 3.—W. & A. 1263.	
చిరిఉలవ (శిరిఉలవ).	Chiri ulava, (V. Sri ulava), RHYNCHOSIA (Phyllomatia) RUFESCENS, DC.—W. & A. 735.	This name meaning "small gram" is probably applied to other small Phaseolaceous plants. We found it given to the one indicated.
చిర్రెకూర. [ట. ట]	Chirri kura, AMARANTHUS POLYGONOIDES, R. iii. 602.—W. Ic 512 and 719.	
చిరుగుచెట్టు (చిరుగుడుచెట్టు)	Chirugu chettu (V. Jirugudu chettu), CARYOTA URENS, L.—R. iii. 625.	
K.S. చిరుపాల.	Chiru pāla, OXYSTELMA ESCULENTUM, R. Br.—W. contr. 54.—Asclepias rosea, R. ii. 40; Periploca esculenta, Cor ii.	The Sans. syns. <i>Tiktadagha</i> W. 375 and <i>Searmachiri</i> , 963, are explained "a medicinal kind of moon plant"—Br 1208. Br. 331. says only "a certain tree."
Br. చిట్టికూరచెట్టు.	Chittikāra chettu,	
H. చిట్టింకూర.	Chittintā kura, MARSILEA COROMANDELINA, N. L. <i>Burm.</i> —M. minuta, <i>Heyne</i> , 54.	Br. 332, adopts this word from <i>Heyne</i> . It appears to be the same as <i>Chittintā</i> , q. v. a very common and well-known word not in Br. but applied to <i>Bicadlea corchorifolia</i> , which is much used by the poorer classes as a vegetable.
చిట్టికేళ్ళరం (సుంకేళ్ళరం)	Chittikēṣvaram (V. Sankēṣaram), POINCIANA ELATA, L.—R. ii. 355.—W. and A. 875.	A generic name.
చిట్టిముటి (ముత్తవలంక)	Chitti muti (V. Muttavapulagam), SIDA ACUTA, <i>Burm.</i>	
చిత్త్రమూలం (తెల్ల-పిల్ల-పల్లచిత్త్రమూలం.)	Chittiramālam (V. Tella, Nalla, and <i>Erra chittiramidum</i>), PLUMBAGO, L.	
R. చిత్తెక.	Chitrika, LIMONIA PENTAGYNA, R. ii. 382.	This name occurs only in Roxb.—The sp. even appears to be doubtful. W. and A. p. 92.
చిట్టచుడుక (చుడుక.)	Chittaduḷaga (V. Dudduka), GUATTERIA CERASOIDES, <i>Dun.</i>	

TELUGU NAME.		ROMAN CHARACTER.		BOTANICAL NAME.	REMARKS.
Vernacular Character.	Roman Character.				
B. చిట్టమట్ట - (చిరిచికిరీ-)	Chittamatia (V. Chira bikkī)	...	GARDENIA GUMMIFERA, L.—R. i. 709.—W. & A. 1220; Ic.—576.—also G. arborea, R. i. 708.	This is the small variety from the seeds of which only, the medicinal castor oil is expressed.	
చిట్టాముదపు చెట్టు (ప్రముదపు చెట్టు)	Chittāmuḍapu chettu (Amudapuchettu)	...	RICINUS COMMUNIS, L. Var	The Sans. syn. is <i>Kakatinūka</i> W. 206 which is there rendered <i>D. tomentosa</i> .	
S.K. చిట్టతమికి.	Chittā tumiki,	...	DROSPYROS TOMENTOSA, R. ii. 532 —W. Ic. 182-3.		
చిట్టెడరు.	Chittedaru,	...	VANDA ROXBURGHII, R. Br.—W. Ic. 916—Cymbidium tessaloides, R. iii. 463.		
చిట్టెంటూర.	Chittenta kūra,	...	BLEDZIA CORCHIFOLIA, D. C.—W. & A. 245 —Melochia corch. R. iii. 139.	Roxb. applies the name <i>Chittenta kīra</i> , to <i>Hedyosarum umbellata</i> , R. iii. 380.	
చిట్టిలంకడ.	Chitti anukūḍa (V. Teḷḷa pēḷa).	...	WRIGHEEA TINCTORIA, R. Br.—W. Ic. 444.—Nerium thūct. R. ii. 4.		
చిట్టిపెండ (ముత్తవపులం)	Chitti penḍa (V. Muttanap ulagam.)	...	PAYONIA ODORATA, Willd.	Br. 1207, erroneously corrects Roxb's. name to <i>Chitla panḍu</i> .	
చిట్టి గార.	Chitti gāra,	...	CAPPARIS BEEVISPIA, D. C.	A doubtful name given by the Yánádis near Madras.	
చిట్టి గాంఠారికుంప.	Chitti gānthāri kumpā,	...	CRINUM, L. sp.	The bulbs only were found in paddy fields near Pithāpūr.	
చిట్టిపాపర (పిటిపుచ్చ.)	Chitti pāpara (V. Elipuccha).	...	CITRULLUS COLOCYNTHIS, Schrad.	This is the name of the Yánádis near Madras.	
చిట్టితెట్టు.	Chittia chettu,	...	PHENIX FARINIFERA, R. iii. 785; Cor. 74.		
చిట్టూడిపూర.	Chittūḍi kūra,		
చివీకిపెలప (పెలపనంధిపె)	Chiviki velama (V. Velamasandhi chettu)	Br. 332, "a sort of potherb" and a reference is made to the word <i>Uḍa</i> which is not more explicit.	
చోళ్ల (తమిడెలు.)	Cholla (V. Tamidela),	...	ELEUSINE CORACANA, Garbu.—R. i. 342.—Rheede xii. 78.	The Sans. syn. <i>Kāka jangha</i> is explained by W. 206, to be <i>Leca kirta</i> , Banks.—R. i. 656—which is also the modern Bengali name of the plant. The Telugu explanations of this word in Pt. II. all refer to climbing plants of different kinds.	
చుక్కడంప.	Chukkadumpa,	...	HABENARIA PLATYPHYLLA, Spreng.—W. Ic. 1709 —Orochis plantaginea, R. iii. 450; Cor. 37.		

D

R	చుక్క-కాడ (చుక్క కాడ)	Chukka kāḍa (V. <i>Sitka kāḍa</i> .)	... BIGELOWIA LAMIOCARPA, W. & A. 1344.—Sper.—Br. 345, seems to have adopted Roxb's name with a slight alteration. But both appear doubtful.
	చుక్క-కూర.	Chukka kūra,	... RUMEX VEICARIUS, L.—E. ii 209.
R	చుక్క-లివెట్టు (నిరసిక.)	Chukkali chettu, (V. <i>Sitanika</i>)	... EPICARPEUS SPINOSA, B. W.—Lc. 1062. Br. 345, adopts this name with a slight alteration from Roxb. Trophis sp. E. iii. 769.

TELUGU NAME.		Roman Character.	BOTANICAL NAME.	REMARKS.
Vernacular Character.				
దబ్బి చెట్టు.	[కడిమి.]	Dabba chettu,	CITRUS MEDICA, L.—E. iii. 392, latter part—W. and A. 344, var. vii.	
తాడుక (చెట్టుకణిమ-వసుతి సుగు కడిమి.)		Dāduga (V. <i>Betta ganaga and Pannapara</i> (V. <i>Gumpena chettu</i>),	NAUCLEA CORDIFOLIA, R. i. 514; Cor. 53.—W. and A. 1208. ODINA WODIER, B.	
B	దంపర (గుంపన చెట్టు.)	Dānmapara		
	తాసింకు చెట్టు.	Dāsīninka chettu,		Br. 406.
SK	తాడిక.	Dādika, S.	PUNICA GRANATUM, L.—R. ii. 499.—W. and A. 1010; Ill. 97.	W. 404.—Br. 404.
	తాలింబ చెట్టు.	Dālīmba chettu,		Br. 410.
R	డంకిబూర (నిరిలబెం.)	Danki būra (V. <i>Chiri ānwa</i>),	BRIEDELIA SCANDENS, Willd.	A doubtful name, resting on Roxb's authority only.
	డంతి చెట్టు.	Danti chettu,	CELASTRUS MONTANA, R. i. 620.—W. and A. 501; Lc. 382.	In Roxb. it is erroneously written "Chinta."
SK	డంతి చెట్టు.	Danti chettu,		Of the Syns. in Pt. II only one, <i>Vrika</i> is found in W. 790, with the signification 'the <i>Vakaputrasa</i> tree' (<i>Agave grandiflorum</i>).—Br. 377, says a "forest tree, that is <i>Jambavat</i> "—a name which seems to be connected with <i>Eugenia Jambos</i> .—Danti, W. 398, is said to be <i>Croton (Paltospermum) polyandrum</i> .

గట్లగడ్డి.	Gitti gadda,	ISOETES COBOMANDELINA, L.	Found in great abundance along the edges of tanks in the Carnatic. The tender
గితవరం - (కోలాకుపాచ్చు.)	Gita narum, (V. Kōlaku panna)	...	DESMODIUM GARGETICUM, DC.—W. & A. Sans. <i>Sāla parni</i> , W. 921.	white shoots immediately above the spore-bearing involucre, are a favorite article of diet and are sold commonly in the bazars after the monsoon.
గొబ్బి.	Gobbi,	697; Ic. 271.—Hedyarum Gan. R. iii. 349.	
గొదారి.	Godāri (V. Dhātāri kurumamu),	...	449 —Ruella lon. R. iii. 50.— <i>Racada</i> , ii. 45.	ASTERACANTHA LONGIFOLIA, Ness.—W. Ic. Br. 278-1193 refers to <i>Golimidi</i> or <i>Coiz.</i> q. v.
గొడసాలచెట్టు.	Godasāla chettu,	GRISLEA TOMENTOSA, R.	... The word signifies "a cobbler."
		This name is taken from S. K. with the syns. <i>Dēva gandha</i> , <i>Arāma sīlā</i> , and <i>Kukkudā-sardaka</i> , none of which are found in W.

Br. గొడుగుపావిత్ర (వెడపావిత్రి.)	Godūṅu pāvītri (<i>V. Pezōza pāvītri</i>), ...	PORTULACA QUADRIFIDA, L.—R. ii. 404.— W. & A. 1108.	Godūṅu means worthless, sterile. Br. 598.
Br. గొడుగుగూకార.	Godūṅu gūkāra,	Br. 273, says "a plant called <i>Vandhyā</i> or <i>Dēvi</i> ." The latter part of the name seems to refer to a cucurbitaceous plant <i>Momordica</i> sp.
R. గొడుగుకుంకరూకు.	Godūṅu kuṅkara,
గొడుగుములు.	Godūṅu muḷu,
S K. గొడుగుగొడ్డి.	Godūṅu goḍḍi,
Br. గొజ్జంగి (గొజ్జంగ).	Gojjangi (<i>V. Gōjjangi</i>),	W. 299.—Br. 287.
R. గొలగండ్లి (అకుడకాడ.)	Golaganḍi (<i>V. Amaḍa kāḍa</i>)	"Umbrella" grass. Sans. syn. <i>Ch'kārātri</i> ; <i>ch'kātira</i> , W. 333 "a fragrant grass growing in marshy ground."
Br. గొలకొండమీరప-(మాదిమీరప.)	Golakonda mirapa (<i>V. Sīdamīrapa</i>),	Br. 772.—It is called by various names as <i>Golakonda</i> , <i>Nepal</i> &c., chilly.
S K. గొల్లజిడుపెట్టు.	Golla jidḍu chettu,
గొల్లపువెడ(బండారు.)	Golla pulleḍa (<i>V. Baudāru</i>),	Br. 1195, "a kind of tree" and refers to another tree called <i>Kundena</i> . <i>Jidḍu</i> means "viscous."
S K. గొలిమి. } (గొలిమి.)	Golimidi } (<i>V. Gila gāḍi</i>),	So called by the Konda Doralu at Simhā-chalam.
గొలివె. } (గొలివె.)	Golive ... }	...	Common in rice fields and its seeds often therefore mixed with the paddy. Hence the Sans. syn. in Pt. II refer to very different plants. <i>Kōkīḍiksha</i> "cuckow-eye" W. 250, <i>Ikshugand'hā</i> , <i>Ikshura</i> and <i>Ikshuraka</i> , W. 129, are stated to be a <i>Capparis</i> also <i>Barteria longifolia</i> , <i>Saccharum spontaneum</i> , <i>Tribulus</i> , &c.
గొలుగొ.	Golugu,
గొంకార.	Gongura,
Br. గొంజిపండు-(గొలుగొ.)	Gonji paṅḍu (<i>V. Golugu</i>),	Br. 268 and 1190. This seems to have been taken from the Tamil name of the fruit. The word is commonly used by the Yānādis on the Nagai Hills.

TELUGU NAME.		Roman Character.	BOTANICAL NAME.	REMARKS.
Vernacular Character.				
S. K.	గొం తె మ గొ మ రు నెట్టు.	Gontema gomaru chettu,	IPOMEA FILICAULIS, Bl.	We give this name on the authority of Heyne 139. But the Sans. syn. <i>Prasée-Bhadravalli</i> is probably a more correct syn and is explained to be the name of a climber either a <i>Jasmine</i> or <i>Hiptage</i> — <i>Br.</i> 1191 guided by the Sans. syn. copies W.'s name <i>Ped.-fed.</i> adding in Telugu "which is <i>Languascentrum</i> "! q. v.
R.	గొ ర గ ము డి (అ ర మం డ.)	Gorgamudi (V. Aramand.)

W. 194 from <i>Karka</i> "white," perhaps <i>Zenimacusa cerifera</i> .

TELUGU NAME.		Roman Character.	BOTANICAL NAME.	REMARKS.
Vernacular Character.				
S K కరతాళము (కాటిచెట్టు)	Karatālam, S. (Y. <i>Tāti chettu</i>)	...	BORASSUS FLABELLIFORMIS, J.	... Br. 188, as distinguished from <i>Corypha Taliera</i> .
S K కకాకాళింగి తిగె	Kārkāka śringi (S.) tige	...	TERMINALIA CHEBULA, Retz.—O'Sh. p. 340	This rendering is given on the authority of O'Sh. and on inquiry for <i>Karkāka śringi</i> in the bazars at Madras, a gall like that of sp. of myrobolan was produced, which the vendor said was the same as <i>Kādu kaḅḅu</i> . Tam. <i>Karakkaya</i> or <i>Karaka</i> Tel. q. v. W. 194, at the word <i>Karkatiki</i> , says "a plant the fruit of which is compared to the claw or feelers of a crab," a description applying to the pepo of some cucurbitaceous plants. The Sans. syn <i>Śringi</i> , W. 855, signifies "a horn" and is applied to various roots, several of which come under the head of <i>Kakili</i> , q. v. The word <i>tige</i> implies a climbing plant.
S K కరిక.	Karika, S.	...	PREMNA SPINOSA, R. iii. 77.	... This is given on the authority of W. 194.—Br 192 has <i>Farleria</i> sp.
S K కారానము.	Kāpāsamu, S. (Y. <i>Pāti</i>)	...	GOSYPIUM HERBACEUM, J.	... W. 215.—Br. 220.
S K కపూరపెండ.	Karpūra bendā,	...	ABELMOSCHUS MOSCHATUS, Monch?—W. and A. 195; Ic. 899.—Hibiscus Abelm. R. iii. 202.—Rheede, ii. 38.	There is no authority for the botanical name, but it seems a probable application of the Telugu term <i>Karpura</i> .
S K కపూరపల్లి.	Karpūra valli,	...	COLEUS AMBOINICUS, Lour.—C aromaticus. Benth.—Plectranthus arom. R. iii. 22.	This plant has much the appearance of <i>Kuruvēru</i> , q. v. but it is easily distinguished by the aromatic fragrance of its leaves and indeed of all its parts, a quality which in <i>Kuruvēru</i> is confined to the exuberant roots alone. Dillwyn, Rev. Hort. Mal. following Bumphius, cites Rheede Tab. ix. 74 for this plant. But both the figure and description clearly refer to <i>Kuruvēru</i> . It is more probable that Rheedes fig. in Tab. 75 of his <i>Naravāli</i> (Tam. <i>నరవాలి</i>) <i>Naravāli</i> , lit. "fragrant plant" is intended for our <i>Karpuravalli</i> . The very meagre description characterizes the leaves as "odoris grati" and adds "that it never flowers" which in fact it rarely does. Both figures are wretched, the leaves being represented as alternate! and the whole very incorrect. Bottl. ii. 170, erroneously explains <i>Karpuravāli</i> as being <i>Anisochilos carnosus</i> .
S కరతాళింత.	Karra autinta,	...	DICERMA PULCHELLUM, DC.—W. and A. 709; Ic. 418.—Hedyarum pul. R. iii. 361.	So called from the legumes sticking like burrs.— <i>Autinta</i> means any thing that catches or sticks to cloth.

కర్రపండ్లం - (మానుపేండ్లం.)	Karra pendālam (V. Mānu penādam).	JANIPHA MANIHOT, Avanth.	Cultivated in gardens.
కర్రపక (కారుశీకాయ.)	Karra chika (V. Kāru śikāya)	...	ACACIA PENNATA, Willd.	...	
కర్రపిల్వ - (పెల్లవీర.)	Karra siri (V. Tella tige.)	...	DALBERGIA RUBIGINOSA, R. iii. 231; Cor. 115. — W. and A. 817.	...	This is the name given by the Konda Dorah in Vizagapatam—Roxb's name is <i>Tella tige</i> , which simply means "white climber" and will suit any other white-flowered creeper.
కర్రపడల - (బండిమురుగుడు.)	Karra vajjala (V. Banḍi muruguḍu.)	GETONIA FLORIBUNDA, R.	Name given by Konda Doradu.
R. కర్రపంక.	...	MARISCUS DILUTUS, Ness.—W. contr. 90.—Cyperus spinulosus, R. i. 203.	
R. కర్రపలవ.	...	RHYNCHOSIA SUAVEOLENS, DC—W. and A. 737.	A doubtful name at Simlāchalam, of local application.
R. కారుఅలవంప.	Kāru alachanda,	...	PHASEOLUS ROSTRATUS, Wall.—W. and A. 750; Jac. 34.—Ph. alatus, R. iii. 288.—Rheede viii. 42.	...	
కారులము.	Kāralamu,	...	CARALLUMA ASCENDENS, R. Br.—Stapelia Allam	...	This is "ginger" <i>Kāru allam</i> "wild ginger." This is evidently a misnomer of Roxb, which has been perpetuated by R. Brown, who has formed his genus on Roxb's mistake—see next word.
కారుఅలము.	Kāru allamu,	...	ZINGIBER CASSUMUNAR, R. i. 40.	...	This name is universally known in the hilly parts of the Circars—It is also applied to other wild sp.
కారుఅలమువంప.	Kāru ālamdam dampa,	...	JATROPHA TUBEROSA, nob.	...	This name which means simply wild <i>Zizinus</i> and is applied to various wild <i>Crotoms</i> , was given to a curious plant brought from Golkonda, which grew for three years in my garden at Vizagapatam. Its generic characters are the same as those of <i>Jatropha villosa</i> , W. Ic. 1169, which he considers may form the type of a new genus: <i>Rood</i> , a perennial, cylindrical tuber, as thick as a man's arm; <i>stem</i> , annual, herbaceous, erect, smooth, without glands, appearing with the early showers in April—May, lasting till December; <i>leaves</i> , glabrous, digitately 3-parted, with rounded sinns, 8 inches in length, the divisions, oblong, entire, pointed, with well marked translucent veins and somewhat tumid, translucent edges; <i>petioles</i> , smooth, slightly channelled 1½ in. long; <i>stipules</i> 4 or 5 subulate bristles on each side of the petiole; <i>inflorescence</i> , terminal, monocious, ♂ flowers above, ♀ in the divisions; <i>bracts</i> , small, lanceolate, adpressed; <i>calyx</i> , 5-lob, divisions ovate; <i>corolla</i> , tubular, separating into 5 oblong, obtuse petals, throat hairy; <i>stamens</i> 8, united into a central column, with 5 erect glands at its base; <i>anthers</i> , extrorse; <i>ovary</i> , not specially noted, 3-celled, uniovulate?

P కౌసుకండ్లర.	...	Konsu kandira	...	STRECHNOS DICERBOSA, <i>Lesch.</i> — <i>R. Fl. Ind. ed.</i> Wall. ii. 267. This tho' a Tamil name used in Tanjore, where the species was first found, has nevertheless a Telugu derivation likewise, from <i>Kousu</i> , "a disagreeable smell," which is characteristic of the plant. The name is also quoted as <i>Tel.</i> in <i>Pid. Ind.</i> I found the plant plentiful in the Nagari Hills under the name of <i>Tige mushti. q. v.</i>
B కొయలు.	...	Koyalu	...	SALICORNIA BRACHIATA, <i>R. i. 84.</i> — <i>W. Ic.</i> 738.
B కొయల మొకిరి (పుట్టజీలెడు)	...	Koyila mokiri (<i>V. Pottja jille. du</i>)	...	WEIGHTIA TOMENTOSA, <i>Rom.</i> and <i>Sch.</i> — <i>W. Ic.</i> 443.— <i>Nerium tom. R. ii. 6.</i> — <i>Rheed.</i> ix. 3—4.
B కొయ్యపిప్పలి.	...	Koyya pippali	...	SALICORNIA INDICA, <i>Willd.</i> — <i>R. i. 85.</i> — <i>W. Ic.</i> 737.
కొయ్యలొటకూర.	...	Koyya lota kura	...	AMARANTHUS TRISTIS, <i>L.</i> — <i>R. iii. 604.</i> — <i>W. Ic.</i> 514.
కౌసుగ (కౌసుగ).	...	Krasnuga (<i>V. Kasnuga</i>)	...	PONGAMIA GLABRA, <i>Vent.</i> ...
కౌసుగర (అగరు).	...	Krishna agaru, S (<i>V. Agaru</i>)	...	AQUILLARIA AGALLOCHA, <i>R.</i> ...
				... Black agallocha. There appear to be at least three kinds of agallocha or wood-aloes, the trees producing which are not fully identified—Roxb. followed by Royle, admits doubtfully the existence of two, — <i>Ag. Agallocha</i> , <i>R.</i> and <i>Ag. ovata</i> Cor., the Garo delicata, which need not be taken into account. But Loureiro maintains that the best lign-aloe or <i>calambac</i> , which appears to be the <i>Adi-kimari</i> of the Indian bazars is derived from a tree which he calls <i>Aloexylon Agallochum</i> , Roxb.; and Royle considers the Malayan <i>agila</i> (whence probably is derived the Hindi <i>agaru</i>), the aquila and eagle-wood of commerce and the <i>Adi-kimari</i> of the bazars, to be the produce of <i>Aquillaria Agallocha</i> which grows plentifully to the N. E. of Bengal and that it is probably identical with <i>A. ovata.</i> — <i>Royle.</i>
కౌసుగంపనం-(చంపనం).	...	Krishna chandaunam, S. (<i>V. Chandanani</i>)	...	SANTALUM ALBUM, <i>L.</i> ...
				... Black sandal, probably referring to the heart of the tree which is the most prized for its scent and is more or less dark-colored according to age. W. 219. under <i>Kāṭeya</i> and <i>Kāṭeyakā</i> says "a yellow fragrant wood"—SK. says "sandal from the mountain <i>Jāpaka</i> " and quotes the Sans. <i>Kāṭṭinu sāraka</i> W. 218, where it is explained by <i>Tugara</i> (<i>Tabernemontana coronaria.</i>)

TELUGU NAME.		ROMAN CHARACTER.		BOTANICAL NAME.	REMARKS.
Vernacular Character.	Roman Character.				
B. కుక్క-పాల. (కెరీపాల.)	Kukka pāla (V. Verri pāla)	TYLOPHORA VOMITORIA, Voigt. ... or dog is used to designate any inferior or wild species— <i>pāla</i> is a generic term for several <i>Asclepiads</i> —Br. 238, calls it <i>Cynanchum paniciflorum</i> , R. Br. (<i>Ascl. tunicata</i> R. ii. 35) also <i>Ajagandhi</i> (which W. 12, renders <i>Ocimum gratissimum</i> and SK. <i>Polanisia tocosandra</i>)—Br. at 1184 also applies it erroneously to <i>Sauzeviera Rozburghiana</i> .	We found this name in use at Simlāchalam. It appears of doubtful acceptation— <i>Kukka</i>
Br. కుక్క-పాలకూర.	Kukka pāla kūra	TRIANTHEMA CRYSTALLINA, Vahl.—R. ii. 444.	[This is from Roxb. the word <i>pāla</i> should probably be <i>pāzila</i> and so Br. writes it (V. next word) which would then mean an inferior kind of vegetable either a <i>Portulaca</i> or with less propriety a <i>Triantlema</i> . V. preceding remark.
కుక్క-పావితీ.	Kukka pāvili	PORTULACA sp.	...

కూరుది నెట్టు (కాడేపత్తి 7.)	Kuru dinne (V. Kādēpa tige)	CASSIA FLORIDA, Vahl.	...	
కూరుంబి (కొండవంకేడు.)	Kurumbi (V. Konḍatangiḍu)	GARDENIA LATIFOLIA, Ait.	...	
కూరుకిటి - (కారింగువ.)	Kurukiṭi (V. Kāringura)	Br 25], "small Sesamum" Q. <i>Kāru nuṅṅulu</i> 9 v.
కూరును పుల్లు.	Kuru nuvulu	Br. 1187 explains it by <i>Puvēna gurūenda</i> i. e. flowery <i>Abrus</i> , adding, "the common plant <i>Heptage Madabiota</i> ," W. 232 under <i>Kuruvēnda</i> has <i>Cyperus hazasatichys</i> .
కూరు వెంక.	Karuveṅda	This appears certainly to be the plant figured by Kheede ix. 74. under the name of <i>Kuruvēnda</i> ix. 74. under the name of <i>Kuruvēru</i> —
కూరు వేరు.	Karuvēru ...	COLEUS, vel PLECTRANTHUS, sp.—Kheede, ix. 74.	...	doubt, an incorrect notation of <i>Kuruvēru</i> — <i>Iribēti</i> is the same as the Tamil <i>இருவேలి Iruvēti</i> , "a plant, the roots of which are fragrant," Rottl. i. 77, where it is applied to <i>Andropogon muricata</i> or <i>khaskhas</i> —Under <i>కూరువేలి Kuruvēli</i> , Rottl. 127 refers unhesitatingly

to Bheede's fig. 74, adding that it never flowers—Rheede however, adverts specifically to the flowers as being in terminal spikes. The whole of Bheede's description applies exactly to our plant, which does not appear to have been ever described and might be named provisionally *Colera omarikkon*. B's. description 251, is tolerably correct with the exception of the word *gunya* (ಗುಣ) which does not apply. Heyne 130, calls it *Anisochetius carnosus*, a very different plant. The Sans. syns. *Hrāśāra*, W. 981 and *Vāḍuka* W. 604, are rendered simply "a perfume." The Hindu women use the scented roots to ornament their hair. It is also employed in offerings to idols, and as a drug, for which purposes it is cultivated generally in gardens; but no one that I can discover, has seen it in flower.—V. remark on *Kārpūravallī*.

S K	ಕುಸುಮಂ ಪುಷ್ಪಂ = ಗಡ್ಡಿ.	Kusa darbha S. gadjii (<i>V. Darbhā</i>) POA CYNOBUIROIDES, Retz.	...	The use of two words which are synonymous seems a pleonasm—W. 235 and 401—Care must be taken not to confound <i>Darbha</i> with <i>Darbba</i> W. 419 which is <i>Gynodon Dactylon</i> , v. p. 58. W. 240.—Br. 259.

TELEUGU NAME.		Roman Character.	BOTANICAL NAME.	REMARKS.
Vernacular Character.				
మా ఘేరి - (చినరణ ఘేరి.)	Mābhēri (<i>V. China ranabhēri</i>)	...	ANISOMELES MALABARICA, <i>R. Br.</i> — <i>W. Ic.</i> 865 —Ajuga fruticosa. <i>R. iii.</i> 2.	It is also called <i>China rana bhēri</i> . <i>Br.</i> 762 writes <i>Mabhra</i> .
మా చిపత్తి.	Māchi patri	...	ARTIMISIA INDICA, <i>Willd.</i> — <i>R. iii.</i> 419— <i>W. Ic.</i> 1112.	This is the <i>Dona</i> of Roxb. Voigt, and Royle III., to which the latter also assigns the name of <i>Marvica</i> , (<i>V. Marvum</i>) which is properly <i>Origanum Majoranum</i> . <i>Dona</i> is from the Sans. <i>Damana</i> <i>W.</i> 399; another syn. is <i>Syrappaea</i> <i>W.</i> 935, which is stated to be "the same as the pungent, bitter drug, called <i>Māchi parua</i> ", but the latter word is not in <i>W.</i>
మడదెట్టు.	Maḍa chettu	...	AVICENNIA TOMENTOSA, <i>L.</i> — <i>R.</i> iii. 88— <i>W. Ic.</i> 1481.	
మదన ఆనపవేట్టు (పొప్పాంబి.)	Madana ānapa chettu (<i>V. Poppayi</i>)	...	CARICA PAPAYA, <i>L.</i> ...	So called in Ganjam and Vizagapatam.
మదన - మొదిన.	1 Madana or Modina	...	SPERMACOCE HISPIDA, <i>L.</i> — <i>W.</i> & <i>A.</i> 1348— <i>R.</i> i. 373; <i>S.</i> scabra i. 371— <i>Rheede</i> , ix. 76	<i>Br.</i> 741.
మదన బుడత కాడ.	2 Madana buḍata kāḍa	...		
మదన గ్రంధి.	3 Madana grandhi	...		
మదన గంట్టి (పొన్న గంట్టి.)	Madana ganṭi (<i>V. Ponnaganṭi</i>)	...	ALTERNANTHERA SESSILIS, <i>R. Br.</i>	Under the preceding word, <i>Br.</i> 741, has <i>Pāchī tige</i> as a syn. but it doubtless refers properly to this plant, which is a creeper growing near water, on the margin of tanks, &c.
మదన గింజలు - (అతనీ - అవి)	Madana ginjala (<i>V. Aaṅṅ & Avisi</i>)	...	LINUM USITATISSIMUM, <i>L.</i> ...	Linseed.

Br.	కుడకము.	Madanam, S. Br. 741 "a narcotic plant" with syns. <i>Ummetia</i> , <i>Dactylo</i> , &c.—W. 680 "a plant commonly called <i>Mayana</i> , thorn apple or <i>Datura</i> , &c."
	కుడక శేకు - (అడవి పొలతి క.)	Madana šku (F. <i>Adavipalati</i>)	(This name was used by the Hill people of Vizianagram who make cortage and also a kind of cloth from the fibre. Heyne, 57. (F. <i>Madi-phala</i>)
H.	కుడకలము.	Madaphalamu
	కుడ్డి నెట్టు (మూలం గనెట్టు).	Madqi chettu (F. <i>Miliga chettu</i>) The roots of a tree with this name are sold in the bazar as a red dye, and were sent to the Exhibition of 1855, so named, from Rajahmundry, Masulipatam, Bellary, Kurnul, Bangalore and Salem. We have seen the plant growing in black cotton soil but not more than 3 or 4 feet in height, being constantly dug up for the roots and there-fore neither in flower or seed.—Br. 788—Ains. 182.
R.	కుడ్డి నెట్టు.	Maddi chettu
	కుడ్డి రుబ్బు నెట్టు.	Madqi rubba chettu
SK	కుడక పీచి క.	Madhavi luge
	కుడక పీచి క.	Madhānika, S.
SK	కుడక పీచి క.	Madhurnakam (F. <i>Boppayi</i>) Said to be a grass in S. K. The word is not in Br. or W.
H.	కుడక నకకం (పొప్పాయి).	Madinika (F. <i>Gujja kanne kōmati</i>)
	కుడిచి క - (గుడ్డి క నెట్టు కోమలి).	Mādiphala chettu (F. <i>Bijapuramu</i>)
	కుడిచి కల నెట్టు - (చీజపురము.)	Mādi luge
	కుడిచి క.	ARGYREIA CYMOsa, <i>Sesl.</i> — <i>Lettsomia</i> cym. B. i. 492.—W. Ic. 839. It is remarkable that although perhaps, the commonest of all the <i>Argyrea</i> in the Carnatic, it is stated in the Flora Ind. to be a native of the Malabar mountains and to have been raised from seeds from the Wynād. This long led me to doubt whether this <i>Madi</i> was the same plant, for Koxb. must have been familiar with it at Sāmukōpa, and it was not until I had sent a specimen to Dr. Wight and got it named by him, that I adopted Roxb.'s designation. It is also to be observed that <i>Argy. aggregata</i> which Roxb. locates on the Coromandel coast, is confined to Mysore and mountainous tracts. It is possible he may have accidentally changed the habitat of the two sp.

మొక్క-బొమ్మ.	Mokka jonna

The fact of the bright flowers of this tree having no perfume has given rise to the following verse :

శో || రూపయావనసంపన్న విశాలగుణసంభవం - చిద్యామీనంకథంతి పా
 రాశకుసుమంపృథా || As a man endowed with beauty, wealth and other qualities
 is held in no esteem without learning, so the flower of *Pálasa* is worthless.

Br. 617 gives " wild sage " from the appearance of the leaves. Heyne 136, has *Chetumatti*, which seems wrong, for he quotes the Tam. name of the plant or *Peramatti* in the same bracket, for another plant, Both Br. and Heyne have founded the word *bhéri*, with *bhira*, the common name of various kinds of *Luffa*.

PANDANUS OBOBATISSIMA L. fil.—R. iii. 758 ; Br. 812.
 Cor. 94-96—Rheede, ii. 1-5.

			Generic term.
			V. Rem. p. 21. This curious diacious grass is commonly called "the sea-pink" by Europeans and is found in great abundance along the Coromandel Coast. When the seed is ripe, the spherical head of the ♀ plant is detached and blown about the sands by the wind, illustrating in a remarkable manner "the rolling thing before the whirl- wind," of Isaiah xvii. 13 and "the wheel before the wind," of Psalm lxxxiii. 13.
