APO 301 (Kyoto, Honshu)

AG 611 - M

SUBJECT: Maintenance of Japanese Roads

TO: Commanding General, 24th Infantry Division, APO 24
Commanding General, 25th Infantry Division, APO 25

1. Attached hereto is a copy of Eighth Army Operational Directive No. 69, dated 20 November 1947, outlining the procedure to be followed for obtaining maintenance and repair of roads and highways by the Japanese. In compliance with paragraph 3b, (2) of OD 69, the following regulations are established for the efficient operation and supervision of the road maintenance program.

2. There are two road maintenance agencies now in operation in the Corps zone:

24th Division area — Kyushu Road Engineering Committee, Fukuoka
25th Division area — (including Kobe Base) Kansai Construction Engineering Corporation, Kyoto.

These agencies are composed of representatives of the Japanese Central Government, Japanese prefectures, and cities and are responsible for the prosecution of all road maintenance and repair which the Japanese Government is directed by Eighth Army to perform. The road maintenance and repair work of these agencies will be supervised by the Division within whose area they operate and by Kobe Base for the Kobe Metropolitan Area. In those areas in which there are no Division troops, the Military Government Team of that prefecture will be consulted as to which roads it desires to have maintained.

3. In order to supplement the inadequate Japanese supply of equipment, the road maintenance agencies have been authorized to receive on Memorandum Receipt, such orad maintenance equipment and supplies as may be made available to them from the I Corps Equipment Pools on Honshu and Kyushu. Maintenance materials may be released or issued in accordance with existing directives. Proper supervision will be exercised to insure that the equipment and materials so issued or released are used only on road maintenance projects authorized by Eighth Army.

4. Due consideration will be given to requests from the Japanese prefectures for equipment to maintain roads of value to the Occupation Forces even though no directive has been issued for the maintenance of said road. No change is contemplated in the present program and equipment now in use will continue in operation on such roads as have been designated for maintenance.

5. The officers supervising the operation of the I Corps Equipment Pools on Honshu and Kyushu are responsible for the training of Japanese operators and maintenance of equipment loaned to the road maintenance agencies listed above. The Japanese Government is responsible for housing, feeding and paying operators for equipment loaned for road maintenance. This includes all time spent in training operators and drivers and all personnel so trained must be acceptable t the Occupation Force Commander issuing the equipment.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

INFORMATION COPY

BASIC: Ltr, Hq I Corps, subj: "Maintenance of Japanese Roads", contd.

6. Close liaison will be maintained between the equipment issuing agency and the road maintenance supervising agency as to the availability, location, condition and servicing of equipment loaned to the Japanese road maintenance agencies. Equipment should not be withdrawn from road maintenance unless it is no longer required for road maintenance or is urgently required for Occupation Force construction. Equipment withdrawn for normal maintenance is excepted.

7. Attention is directed to the report requested in paragraph 4b (1), section I, of OD 69. It is desired that this information be forwarded to this headquarters as soon as practical. All roads presently being maintained for which continued maintenance is desired will be included.

Office of the Commanding General
APO 343

OPERATIONAL DIRECTIVE NUMBER 69

20 November 1947

SECTION I - ROAD MAINTENANCE
SECTION II - ROAD CONSTRUCTION

Section I - Road Maintenance

1. General Headquarters, Far East Command, has designated this headquarters as the command responsible for standardizing procedures for obtaining road maintenance and repair in Japan. The policies and procedures outlined below are established to provide a standardized method of obtaining such road work.

2. Road maintenance and repair includes only that work of a recurring nature which is required to maintain an existing road, without increasing its stage or standard of construction. Road maintenance also includes snow removal and maintenance of the road drainage system. For the purpose of procuring maintenance and repair, roads are divided into two classifications, as follows:

a. Classification I.

Interior roads in Occupation Force housing or operational areas, which are used exclusively by Occupation Force traffic or by Japanese traffic serving the Occupation Forces in such areas.

(1) Procurement of road maintenance in this classification will be by maintenance type procurement demand; that is, by JPNO Procurement Demands.

(2) Monthly receipts will be executed for all work accomplished.

b. Classification II.

Exterior roads maintained for Occupation Force other than those defined in paragraph 2a above.

(1) Procurement of road maintenance in this classification will be accomplished by letter order from this headquarters to the Japanese Government.

(2) Receipts will not be executed for any work accomplished on roads in this classification.

Operational Directive No. 69, Hq. Eighth Army, 20 Nov 1947

3. Organization.

a. Japanese Maintenance Agencies.

The Japanese Government has been directed to designate a responsible road maintenace agency in each major sub-division of the Occupation Force command areas. These agencies are responsible for the prosecution of all road maintenance and repair which the Japanese Government is directed by this headquarters to perform.

(1) Agencies will be established in the following areas:

(a) Tokyo Metropolitan area.
(b) Tachikawa - Yokota area.
(c) Yokohama Engineer area.
(d) 1st Cavalry Division area.
(e) 11th Airborne Division area in Honshu.
(f) 11th Airborne Division area in Hokkaido
(g) 25th Division area.
(h) 24th Division area.
(i) British Commonwealth Occupation Force area in Honshu.
(j) Shikoku.

(2) Each agency is composed of representatives of the Japanese prefectural and national governments, and is an official governmental agency.

(3) The road maintenance and repair work of these agencies will be supervised by the command within whose area they operate.

b. Occupation Force Agencies.

The commands listed in paragraph 3b (1) below, are responsible for supervising the road maintenance and repair which this headquarters directs the Japanese Government to perform. In order to supplement the inadequate Japanese supply of equipment and materials, those commands are authorized to issue road maintenance equipment on Memorandum Receipt to the Japanese maintenance agencies listed above, and to release or issue maintenance materials in accordance with existing instructions. Proper supervision will be exercised to insure that the equipment and materials so issued or released are used only on road maintenance projects authorized by this headquarters. More detailed instructions are given in paragraphs 5 and 6, below.

(1) The commands listed below will exercise supervision over road maintenance and repair in the areas shown:

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

Operational Directive No. 69, Hq. Eighth Army, 20 Nov 1947.

(a) Headquarters and Service Group, General Headquarters, Far East Command.

Tokyo Metropo itan area.

(b) 5th Engineer Construction Group.

Yokohama Area Engineer area.

(c) Headquarters, Fifth Air Force.

Tachikawa - Yokota area.

(d) IX Corps.

1st Cavalry Division area.
11th A/B Division area in Honshu.
11th A/B Division area in Hokkaido.

(e) I Corps.

24th Division area.
25th Division area.

(f) British Commonwealth Occupation Forces.

Honshu area.
Shikoku area.

(2) The commands listed above will establish necessary regulations for the efficient operation of this program and for the proper supervision of road maintenance directed by this headquarters.

4. Operation.

a. Japanese Agencies.

This headquarters directs the Japanese Government to perform certain road maintenance. The Japanese Government informs the proper agency of the maintenance required, and that agency proceeds to perform the maintenance. The Japanese Government is responsible for furnishing all equipment and materials required for performing road maintenance directed by this headquarters.

b. Occupation Forces.

INFORMATION[3] COPY

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

INFORMATION COPY

Operational Directive No. 39, Hq. Eighth Army, 20 Nov. 1947

(1) Upon receipt of this directive, supervising commands will prepare, for each geographical location within their area at which it is desired road maintenance for the Occupation Forces be performed, a detailed plan for such road maintenance. The plan will contain a specific designation of each road which it is desired to have maintained, with length, width and description of surface for each road. Sufficient justification must be included for each road to warrant issuance of a directive by this headquarters to the Japanese Government for its maintenance. The program for each area should include all roads necessary for the fulfillment of Occupation Force missions in that area, so as to obviate the necessity of issuing amendments to the program at later dates. For example, a road in excellent condition which is used by the Occupation Forces on official business should be included in the program, even though it now requires no maintenance. Early submission of these maintenance plans is desired, so that this headquarters may review the justification and direct the Japanese Government to maintain the approved roads. Air Force installations desiring that certain exterior roads be maintained, will submit requests for such maintenance to the Army unit supervising road maintenance in that area. The Army unit will forward such requests, with comment, through channels to this headquarters. Army supervising commands will contact major Air Force units in their area for information required to compile the initial road maintenance request to this headquarters.

(2) This headquarters will notify each supervising command of all roads in its area which the Japanese Government has been directed to maintain. Supervising commands are responsible for supervising the directed maintenance and for supervising the use and maintenance of vehicles and equipment which they issue to the Japanese agencies. These commands will notify this headquarters of the failure of the Japanese agencies to perform road maintenance in a satisfactory manner, or of the failure of the Japanese agencies to receive, after a reasonable lapse of time, notification to perform certain maintenance which this headquarters has directed the Japanese Government to perform.

(3) Abuse or negligence in the operation or maintenance of equipment and vehicles is punishable under the provisions of Article IX, Inclosure 3 to Operational Directive 1, this headquarters 5 January 1946.

(4) The Japanese Government has been directed to contact the proper command for details of operations in each area.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

5. The Japanese Government is responsible for furnishing all equipment and materials required for performing road maintenance directed by this headquarters. When the commander responsible for supervising certain road maintenance determines that the Japanese Governmental agencies are unable to furnish adequate equipment, he may issue equipment to the governmental agencies on Memorandum Receipt. The Japanese Government is responsible for furnishing, housing, feeding and paying operators for all equipment obtained from the Occupation Forces. These operators must be acceptable to the Occupation Force commander issuing the equipment. The Japanese Governmental agencies are responsible for the security and first echelon maintenance, under supervision of the Occupation Forces, of all vehicles and equipment issued to them. Maintenance, other than first echelon, will be performed by the Occupation Forces. Equipment and vehicles will be returned to the issuing unit when no longer required on projects for which they were issued, or when desired by the issuing unit. Additional United States Army equipment, if needed, may be requested by United States Army commands as additions to Post, Camp, and Station Table of Allowances, or as additional project equipment. Such requests must be adequately justified, and will be submitted in accordance with existing instructions. General Officer Commanding, British Commonwealth Occupation Force, will furnish equipment and materials as he deems necessary.

6. Material for use in road maintenance and repair direct by this headquarters may be released from Occupation Force supplies for use by the Japanese agencies are unable to obtain such materials from Japanese sources. Supplies so issued or released will be replenished or forecast only through normal supply methods. Gasoline for Unties States Army equipment and vehicles issued to the Japanese agencies willbe furnished in accordance with instructions of Section I, Circular 154, this headquarters, 23 September 1947. Lubricants and other fuels will furnished from United States Army supplies. All commands will exercise necessary supervision to insure that such materials, fuels and lubricants are used only for authorized purposes

Section II - Road Construction

1. New road construction includes that work of a non-recurring nature which results in a new road or in major improvement of an existing road s that its stage or standard of construction is raised. An example of the latter is the concrete paving of a gravel road. For purposes of procurement of construction, roads are divided into the following two classifications:

a. Classification I.

Interior roads in Occupation Force housing or operational areas, which are used exclusively by Occupation Force traffic or by Japanese traffic serving Occupation Forces in such areas.

INFORMATION 5 COPY

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

INFORMATION COPY

(1) Procurement of road construction in this classification will be in accordance with procurement of other construction projects. Construction will be accomplished by procurement demand.

(2) Receipts for construction of roads in this classification will show all supplies, labor, and equipment furnished, as directed on each procurement demand.

b. Classification II.

All roads constructed for the Occupation Forces, other than those defined in paragraph 1a above.

(1) Procurement of road construction in this classification will be in accordance with procurement of other construction projects for the Occupation Forces. Construction will be accomplished by procurement demand.

(2) Receipts for construction of roads in this classification will show all supplies, labor and equipment furnished, as directed on each procurement demand. The traffic count, required by paragraph 2 below, to be submitted with each request for road construction, is to be used by this headquarters to determine the charge against the Occupation Forces. Each procurement demand issued for road construction will contain a statement as to the percentage of traffic using the road which is Occupation Force traffic. Receipts for construction of roads will show, in the "Remarks" section, the percentage statement which is contained on the procurement demand for that work.

2. Requests for new road construction willbe prepared in accordance with current instructions on preparation of requests for construction. Particular attention willbe paid to providing detailed justification for the new construction. A traffic count over a representative period will be included, as well a map or sketch showing the relationship of the road to Occupation Force installations which it serves. A representative period of time for a traffic count is defined as including one holiday and two work days; for example, Sunday, Monday, and Tuesday of a normal week.

SUBJECT: Road Maintenance, Repair, and Construction

TO: Central Liaison Office, Tokyo

1. The Japanese Government is directed to place into effect a system for performing road maintenance throughout Japan as directed by this headquarters. The system for performing such road maintenance will embody the principles set forth in the remainder of this letter.

2. Effective at once, the Japanese Government will perform road Maintenance, repair, and construction for the Occupation Forces only when directed to do so by letter from this headquarters or by procurement demand issued by this headquarters. Requests for such work received by the Japanese Government from Occupation Force units other than this headquarters will be referred, without action, to this headquarters. When this headquarters directs the maintenance of a privately owned road, the Japanese Government is responsible for making necessary arrangements to have that maintenance done.

3. The Japanese Government will organize a government agency to perform road maintenance in each of the areas listed below. The agencies will be composed of representatives of the Home Ministry (or such agency as may assume its functions) Engineer Districts, of the prefectural governments, and of such city governments as the Japanese Government may decide to include. Agencies will be organized in the following areas; their operation will be supervised by the Occupation Force headquarters listed:

a. Headquarters and Service Group, General Headquarters, Far East Command:

Tokyo Metropolitan area.

b. 5th Engineer Construction Group:

Yokohama Engineer area.

c. Headquarters, Fifth Air Force:

Tachikawa - Yokota area.

d. Headquarters, IX Corps:

1st Cavalry Division area
11t Airborne Division area in Honshu.

11th Airborne Division area in Hokkaido.

4. The Japanese Government is responsible for furnishing all equipment, materials, and labor for performing road maintenance and repair directed by this headquarters. Occupation Force units may, if they so desire, aid the Japanese Government by furnishing equipment or materials for use on specific road maintenance projects. When equipment is so furnished, the Japanese Governmental agency, to be established by the Japanese Government in compliance with this directive, will receipt for such equipment as directed by the Occupation Forces will be receipted for as directed by the Occupation Force unit furnishing the materials. The Japanese governmental agencies will designate specific officials to sign receipts for equipment and materials. Each official so designated must be acceptable to the Occupation Force commander in whose area the agency operates. The Japanese Government is responsible for the hiring, quartering, and subsisting of operators for equipment furnished by the Occupation Forces.

5. This headquarters will, from time to time, direct the Japanese Government to perform certain road maintenance. Upon receipt of these directives, the Japanese Government will expeditiously notify the appropriate road maintenance agency to perform the maintenance, and shall take action to supply the agency with necessary materials and equipment. Maintenance of a road, when once directed, will continue until the Japanese Government is notified by this headquarters that such maintenance is no longer required.

6. The agencies established by the Japanese Government in conformance to this directive will contact the headquarters listed above to effect coordination in setting up operation and performing road maintenance.

SUBJECT: Asphalt for Road Maintenance Work

TO: Gifu Military Government Team
APO 25

1. In accordance with I Corps Administrative Order Number 24, this office is responsible for road maintenance in the Division Area of Responsibility.

2. In January 1947 the Road Section of your Prefectural Government submitted an estimate of requirements for asphalt to be used for road maintenance work.

3. A partial shipment of this asphalt is in the process of delivery to this office for a reallocation to the various Prefectural Governments. This partial shipment only covers approximately one-fourth of the requirements for a six months program, therefore this office will have to make allocations to those prefectures which are considered in their priority of maintenance.

4. It is requested that officials responsible for road maintenance in your prefecture accompanied by one representative from your headquarters meet with the Division Engineer at this headquarters on Wednesday 4 June 1947. The meeting will be called for 10:00. Data required for this meeting is to be furnished by the prefectural officials. This data of justification will include road maps of their areas of maintenance responsibility. These maps are to be clearly marked as to type of road, width, condition, and maintenance requirements.

5. Request acknowledgment of receipt of this communication.

FRED W KARSTEN
Major CE
25th Infantry Division
Division Engineer
