SBS Objections To Moving From Dai Ichi Building

(1) SBS library, a repository for a large number of documents on non-military subjects (political, economic and social), either classified or unclassified, is set up as a reference library for the use of members of SCAP and AFPAC sections. Considerable use has been made of this library not only because of its contents but also because of its central location with respect to other special staff sections.

(2) Almost daily, contact must be made personally with either the Office of the Chief of Staff on matters pertaining primarily with the monthly Summations, and/or the SCAP branch of AG usually concerning SCAPINs and their distribution. These daily contacts, with sections already located in the Dai Ichi building, result in the reaching of solutions of problems which ordinarily cannot be handled satisfactorily over a phone.

(3) Deadlines on the monthly Summations for which constant liaison with other special staff sections must be maintained in order to check the contents of their reports, must be met. Because of the present central location of SBS this liaison now permits of a minimum of lost or wasted time.

2. From: SRS To: G-1 Date: 26 July 1946

1. The efficiency of SRS will be greatly impaired due to the distance of the Mitsubishi Shoji Building from the Dai Ichi Building should the proposed reallocation of space be carried out.

2. SRS must maintain constant liaison with other staff sections of GHQ which are located for the most part in, or close to, the Dai Ichi Building. Normal duties involve frequent visits to the Office of the Secretary, General Staff and AG-SCAP Branch every day. The other sections are consulted frequently, and during the period when the Sumation is being prepared, extremely close liaison must be maintained with the SCAP staff sections.

3. 1. I suggest further exploration of this problem. It still remains a question of personnel and space. G-2 AFPAC cannot carry extra personnel without special allotment. I suggest that the "Library handling personnel" come from S & R S.

2. The matter could be explored along the lines of a combination of both WDIIT and S. & R. S., with obvious economies in personnel. As a matter of fact, if you examine J.C.S. directive 1538 and the enabling SCAP orders No. 9 and 15, the intent of the W.D. is for the creation of a single intelligence exploration agency, as it stands, W.D.I.T. transmits all reports to the War Department.

3. I believe this thought could be profitably explored by both agencies.

To: G/S

1. It is believed essential that these library facilities be made available for use by Allied Nations' agencies and the Allied Council.

2. It is recommended that either G-2 or SRS be directed to establish these facilities immediately along general lines as recommended by attached Staff Study.

**SRS Memorandum on Library Facilities**

G-2

Chief of S.R.S.

1 June 1946

1. Action on this paper was delayed because it is evident that the problem involves:

- a. Space
- b. Personnel ultimately chargeable to G-2.

Space is available only in the NYK (ATIS) Building, and space studies are now in progress between G-4 and G-2 on this general location.

2. While the approval of the recommendation of the SRS does add extra responsibility to G-2, it would result in more effective control over information furnished to foreign powers and would add to intelligence received from contacts with their representatives.

3. I concur with the SRS's recommendation, providing that:

- a. The SRS arrange to secure necessary space from G-4 on the third floor of the NYK Building (location of ATIS).
- b. The SRS arrange to procure necessary personnel from G-1.

(2)

From: SRS

To: G-3

Date: 6 June 1946

1. G-3 and SRS are the only two sections concerned since G-3 must clear information made available to foreign powers and in most instances the informational material is furnished by SRS.

2. It must become the responsibility of one of the two sections to provide necessary personnel and space to establish the reference room. It is believed essential that this be done immediately.

3. It is the opinion of SRS that G-3 is more vitally concerned with dissemination of information to foreign powers than SRS and should assume responsibility of establishing and organizing this reference room.
