THE ECONOMIST.

few years—or, at least, a generation afterwards—those who were then suppressed are often ready, if wanted, to aid the central Government in putting down those who suppressed them. And, lastly, the *prestige* of such empires—the *prestige* which is their life—is promoted by the distance of the seat of Government. The Emperor is far more feared in the remote province than he is in his capital, and among those who see his face daily. Other reasons, too, might be given ; but, without going into the cause of it, the fact is plain that immense monarchies have been common in Asia so long as it has been known to us ; that they have been founded with what to us seems a singular ease, and endure with what to us seems a marvellous tenacity ; and that China is one of these, and the greatest now existing.

The contact of such a Government as ours with such a specimen of very ancient States brings us into many difficulties. First, we have to do with a Government which has not our notion of—any notion, perhaps, properly speaking—of inter-national morality; its whole efforts are to keep itself existing, and it has no conception of duty beyond its own boundaries. In the days when it was founded, hardly any State had such a conception. The idea of international morality has arisen in Europe, where there are many States something like equal, who are partly acquainted with each other, and who have a complex set of mutual relations. But the Chinese Empire is so large and so situated that it was almost a world in itself; it has, as a whole, no intimate relations with any foreign State, and its rulers-even the best of them-have no adequate knowledge of any. In consequence our ordinary diplomacy wants the usual premises of its argument; it assumes maxims which have no meaning to those whom it addresses. As its most skilled masters have found, its use is meaningless. What is yielded by China is yielded to fear, and only to fear.

But then comes another difficulty-it is not easy to know whom to frighten. These great States are, by their own laws, hereditary monarchies. But by the laws of nature neither the capacity nor the industry to administer them are hereditary. The constitution of the world does not afford what the theory of the State requires. The n miaal possessor of power is generally an indolent and feeble-minded person who has never been taught anything, who knows nothing, and who is not able to do anything. In the more vigorous Western world such despots were generally set aside, and absolute monarchy was there made a somewhat tolerable institution, because the monarch was selected by competition in warwas removable at any moment by a renawal of the competition-and was, therefore, mostly an able man. But n China there has been upon the whole too much peace and obedience to admit of such selection, and there have been too few rebellions to effect it. In consequence, the apparent ruler is in reality nominal. At this moment the Government is in a sort of commission, the names of the commissioners being uncertain. The Emperor is a child, the nominal regents are two old women, and there are ministers around them ; but where the real authority lies it is hard to guess. What we want can, we know, only be obtained by fear, but we do not know whose fear it is to be.

Thirdly, the very constitution of the State is almost at variance with our succeeding. The vitality of the State is its *prestige*; that *prestige* is inconsistent with its seeming to yield to fear; yet its subjects, like itself, have simply no notion of yielding to any other motive. If they see the Government yield they will think it is afraid, and their so thinking will go as far to ruin it as anything can. Fourthly, if at this risk the Government tries to gratify us,

Fourthly, if at this risk the Government tries to gratify us, probably if it is left to choose its own means it will do exactly what we should not wish, or even dream of. At this moment we have been remonstrating with the Government on the insufficiency of the investigation into a murder. To quiet us the Government applies the torture, and cuts off the hands of suspected persons, to make them say what they know about it. The common English idea is that such a procedure must be in bad faith. And in this case very possibly it may be. But it is not necessarily so. These sort of measures are quite suitable to the ancient civilisation from which the Chinese Empire is a "survival." An elaborate judicial investigation, based on evidence and justified by argument, is unknown to early times; the notion of such times is to obtain the truth by some ordeal or some torture, by getting the gods to intimate something, or by forcing some statement, true or false, from

some suspected man. And such is the natural Chinese impulse now. Their notions are so different from ours that if you are strenuous in your remonstrances with them—and that even in what seems but a simple matter—you will at most often make them do that which you much wish they had left und me.

Lastly, you are never altogether sure that you may not be blaming the Government for what is not its own fault, or that you may not be requiring it to do that which it has no means of doing. The control of such an ancient empire over its outlying parts is not perfect like that of young and vigorous States. It has every sort and degree of relationship with them. The governors of some are submissive; of others less so; of others almost independent. The populations of some are orderly, and will obey the central Government; of others, most unruly, and they will d fy it if their passions are aroused, or their prejudices touched. To preserve a nominal authority the central Government is willing almost always to do little and sometimes to overlook much. Sometimes in the outlying regions of these empires outrages may be committed for which you must hold the central Government responsible, since it is the nominal ruler, and you must try to frighten it into reparation; but you are not sure that it is really responsible, or that, if you do frighten it, it can effect what you wish.

Such are the evils of diplomacy, but if you leave it and go to war you meet others and greater. You must either beat or be beaten, for your own sake; a nation like England will not think of defeat as possible. But if you are successful, you may only gain a very great loss. The Government may break in your hands, and you may have to manage the country. You will not be able to leave it alone; the same causes-the same trade, and the same inevitable intercourse-which brought you into collision with the Government will remain; only there will be an immense population without a Govern-ment. This is no idle supposition; after our last war with Chins, and in consequence of its effects, the Imperial Govern-ment was in great jeopardy—it had to meet a rebellion far more formidable than it had ever seen before; it certainly could not resist many more such-possibly it could not resist even one. The truth is that these old empires endure, not because the cohesive bond is strong, but because, though it is weak, the disuniting agencies are still weaker. But if you destroy the bond, or much weaken it, these agencies will win, and that will be the total dissolution of all authority. A very imaginable combination of events, of which a successful war is the first, might force a Chinese Empire on us as an Indian Empire has been already forced. The cause would be the same as well as the process. We should have come into irrevocable contact with States with whom we could not be at peace, whose former sovereigns perished before us, and in which we could set up no new ones. We should have to govern a country which, bit by bit, collapsed before us, and the almost invincible difficulty which we find in our present task is a conclusive reason why we should not begin another and greater.

We enlarge on these considerations now because this difficulty with China was of our own seeking. We sent to a remote province of it an emissary designed to promote commerce. The possible trade to be so gained was very small, but had it been twenty times greater it would not have been worth encountering the dangers and difficulties which we see now that we then risked in so doing.

#### THE TURKISH REPUDIATION.

THE long-predicted catastrophe in Turkish finance appears at last to have come. The Turkish Government, it is announced from Constantinople, has issued a decree ordering that for five years to come only half the interest and drawings on its loans is to be paid in cash. The remainder is to be paid in bonds bearing 5 per cent. interest, apparently at par, but the price, perhaps, being hardly material, as no issue of paper in such circumstances can be the equivalent of cash. Turkey thus announces its inability to pay half its debt charge for five years, and although full payment is promised at the end of that time, which would also give a value to the paper now to be issued, the postponement is for so long a period as to make the promise of resuming payment in full practically of little present value. The result has naturally been another heavy fall in Turkish stocks,—which, as usual, has been a good deal discounted beforehand,—accompanied by a great commotion in the markets generally for speculative foreign stocks.

Oct. 9, 1875.

THE ECONOMIST.

The event will not surprise our readers. We have repeatedly said, for many years, that countries with an unstable and incapable administration were unsafe borrowers, and that the system of borrowing money to pay interest on old debts, by which their credit was artificially maintained, was always in danger of collapse. The longer the delay the greater would The finances of Turkey, the most be the crash in the end. conspicuous offender in this line, have also been frequently discussed in our columns, in order to enforce cur general lesson. But the event, as it happens, is even more instructive as to the danger of such finance than we could have imagined It is occasioned, apparently, by very little accibeforehand. dents. The Herzegovina insurrection and the disturbances in Bosnia are assumed to have precipitated the catastrophe, while the end has also been heralded by the Turkish Government having to pay 18 per cent. per annum interest for the last short advance, to meet the October dividends. But Turkey has often been in worse difficulties. The Cretan insurrection, some years ago, lasted a long time, and was very costly. Frequently Turkey has had to pay for its short advances much higher rates of interest than 18 per cent.-as much as 22 and 24 per cent., if we remember rightly, having been paid in 1873 and 1874. There is reason to believe that the in 1873 and 1874. There is reason to believe that the present annual deficit of about five millions acknowledged by the Turkish Government is no greater than the average deficit for many years, if it has not even been reduced by the strenuous efforts which followed the failure of the 1873 loan. The floating debt, if the last Budget is at all to be believed, is also much lower than it has been at almost any date which could have been selected for at least five years. Almost the whole of the floating debt had, in truth, been nominally funded just before the present collapse is announced. It is instructive, therefore, to find that, in spite of the superficially improved situation, and with money cheap and abundant, which has always been an important matter to such financing, the catastrophe is not averted. The radical unsoundness of the system could not have been more clearly shown than by its coming to an end in circumstances like these. The truth, we believe, is that in spite of the superficial improvement exhibited, the real unsoundness was unchanged, and the one event having happened which brings this unsoundness to light, it becomes impossible for the system to go on. This event, as we explained lately with reference to the general fall in such foreign stocks, is the new alarm of the world at the system itself, and the consequent impossibility of "placing" more The task of placing such loans has almost always been loans. difficult, but since the Foreign Loans Committee of the present year the difficulty has become an impossibility, not only by the indisposition of the public to take new stock, but by their anxiety to sell what they had. Hence, as new borrowings had to take place at intervals to meet the obligations of the Government, the moment when no more money can be had from the public the payment of interest ceases. As there is no floating debt, it might have been thought at first sight that there was room to build up a new one, as has often been done before in times of temporary discredit, but this cannot meet the present difficulty. Though the floating debt has been nominally funded, the stock given in exchange for it is not placed, and the resources of the class of financiers, who make the advances at usurious interest, are largely locked ap both in that unplaced stock, and also, it is most probable, in purchases for market purposes of the old stock which the public have been offering for many months. As there are other stocks in the same category, particularly Peruvian and Egyptian, of which the former had previously sustained a panic fall, the difficulty of borrowing on the part of the Turkish Government is accounted for. But it is the inherent unsound-ness of the system which has brought it to an end, and not anything extraneous; and the catastrophe accordingly points all the more forcibly the moral of the warnings which we have given for many years.

It is also instructive to notice the cynical indifference of the Turkish Government to the interests of the financial class who have bolstered up its credit, as well as to the interests of the public creditor, now that more money is not to be had. The haste of the announcement is remarkable. If the Government had really thought of its future credit at all, it had plenty of time before the next dividend payment to propose some arrangement to the bondholders which might have been as serious a reduction of their income as what is now proposed, but would have caused a slighter shock. The

Spanish Government in 1872 avoided such a shock by calling its bondbolders together and getting their assent to a reduction of their interest by one-third, which was only too readily In this way Turkey might have kept up appearances given. with its creditors, retained some power of horrowing in the future, and maintained comparatively the saleability of the unplaced stock in the hands of the speculative capitalists and financiers who surround it. But it goes out of its way to precipitate the crash, careless of what may follow. This in-difference, while it marks the financial barbarism of the Turkish Government itself, which has not yet got to the stage of seeing the value of good credit, also proves incidentally how great the stringency must have been -- how absolutely impossible it had become to obtain money for the Constantinople exchequer by the easy device of borrowing. The Turkish Government, not finding money easily in the old way, turns round with absolute indifference, and leaves bondholders, financiers, and speculators to their loss.

1191

The practical question will now be the extent of the disaster, and it will plainly be a very great one. The money is much the same in amount as was involved in the Spanish default in 1873. The yearly interest on the Spanish external debt was estimated to amount to six millions, and the present Turkish default will involve a loss of cash income to the holders of Turkish bonds, to the amount of nearly seven millions annually. In the last Budget the annual charge of the debt is put at 13,500,000/, and although part of this is for interest on floating debt, still, as almost the entire balance of the floating debt was funded by a subsequent operation, the figure is probably about the present annual charge of the funded debt, including the guaranteed interest on railways. But although the default is about the same in money as that of Spain, it has the misfortune to be cumulative with it as well as with many minor defaults, of which that of Uraguay is the most recent. As the mischief goes on it is more felt. The total loss of income by investors and capitalists, quite apart from the loss of capital involved in the fall in price, is getting to be gigantic. The default also raises the question whether other States which have been guilty of the same financial mismanagement will not have a catastrophe in their case precipitated by the increased discredit which the present collapse diffuses. In that way the evil may grow to a still greater height, while the real extent of the Turkish disaster itself may not be limited to what is now proposed. By great efforts the Turkish annual revenue appears to have been taised to a sum at which there is a surplus of six or seven millions. after defraying the expenses of Government, for the creditor. But can Turkey be trusted to make the sacrifices necessary to maintain this surplus, and pay it over to its bondholders # The barbarism of the Government, as shown by the present step, makes the question a very perfinent one. The Governstep, makes the question a very periment one. ment may change its character and make the sacrifices, and in this event the creditors will be really better under the new arrangement than they have lately been. It is better for Turkey to pay honestly what it can than to pile up a load of debt. But the change of character, unfortunately, has yet to be manifested.

The lesson of the collapse need not be enforced. It has been shown by another conclusive event that the importance to investors in foreign loans of the character of the Government to which they lent could not be exaggerated, and that the systematic borrowing to pay interest does, in fact, come to an end. After what has happened there will be little investment in doubtful foreign loans for many years to come; but we are sorry, nevertheless, that it has required such events to teach the public. The loss and injury caused by the collapse of the bubble companies in 1866 are probably equalled, if not exceeded, by the disasters of the last few years in foreign loans.

THE INSTABILITY OF THE FRENCH MINISTRY. THE importance attached to M. Léon Say's very mild intimation that there was a difference between the character of "the "majority of the 24th May"—as it is called—which turned out M. Thiers and brought in Marshal MacMahon—and "the "majority of the 25th of February," which carried a Conservative Republic—not only by the country but by the colleagues of M. Léon Say, and especially by the Minister, M. Buffet, and even by the President himself, shows how very unstable as yet

THE ECONOMIST.

[Oct. 9, 1875.

is the compromise between opposite parties on which everything | at present hangs in France. It is indeed very difficult to make out what it was in M. Léon Say's speech that could have offended his colleagues. Every one knows, we presume, that M. Léon Say could hardly have joined the ministry of the Due de Broglie, or the ministry of General Cissey ; and that it was the failure of the schemes formed by the Duc de Broglie, and the achievement of a definitive constitution in the face of the opposition of General Cissey, which alone rendered it possible for M. Léon Say to join the Cabinet of Marshal MacMahon. This is so obvious, that no one could question it, either in France or elsewhere. It was this, and this only, which M. Léon Say's speech intimated. The deelaration of the Republic had altered the policy of the numerical majority of the Assembly, and rendered it possible for Frenchmen who call themselves Conservative-Liberals, as well as for those who call themselves Conservatives, to support it. But, nevertheless, it seems that when the new Ministry was formed its programme was this :- It was to take up the generally Conservative policy of the majority which carried the Septennate, and which de-feated M. Thiers, as its leading idea in all respects except those settled by the declaration of a Republican Constitution ; and it was to try and recruit supporters from the Left Centre for this policy, which, it was supposed, it would not be difficult to do, now that the chief point of objection-the attempt to keep open the question of Monarchy or Republic-had been virtually settled. It was, in fact, to be a policical fiction assumed for the mollification of the wounded feelings of the Conservative party, that the old majority of the 24th May was still in power, and was trying to do all it had formerly tried to do, with the slight exception of preparing the country for a Monarchy. It seems that M. Leon Say's speech, at least as construed by the French journals, outraged the feelings of the Marshal and of M. Buffet, who had imposed this political fiction on the Cabinet, for M. Léon Say had implied what nobody in the world could help knowing, that the decision of the Assembly in favour of a completely Republican Constitution, even though one open to reconsideration in 1880, was an event the effects of which on the composition of parties could not possibly be ignored. So a great stir had to be made, and M. Léon Say was compelled to write a letter which so modified the construction put upon his speech as to make it clear that he did not intend to describe the present Government as at all more Liberal than the previous Government in anything except the important constitutional points determined when the Republic was voted. All this must strike political thinkers in any country more tranquil than France as a trifle childish. Supposing M. Léon Say and his colleagues to be agreed Supposing M. Leon Say and an conceivable difference can it make whether M. Léon Say interprets that policy in a loss Concervative sense than M. Buffet, or not? The commonplace English view of a coalition Ministry is thisthat the Liberal members of the coalition get as much support as they can from the Liberal party by putting the most Liberal construction possible on the policy of that Ministry, while its Conservative members get as much support as they can from the Conservative party by putting the most Conservative construction they can on the policy of that Ministry. We should regard that as the natural course of things in a coalition Cabinet. But it is not so, it seems, in France at the present moment. There the state of party feeling is so strained that Marshal MacMahon and M. Buffet are not simply anxious as to what they are to do, but are still more anxious as to what that which they do shall be called. M. Buffet treats it as point of honour that no one of his colleagues shall call in question the continuity in policy between the Government of the party which brought in Marshal Mac-Mahon, and the Government of the party which is now, under him, administering the new Republican Constitution. And M. Léon Say has to accommodate himself to this nice sense of political honour in M. Buffet, or else break up the Ministry. Of course such a condition of things could not exist unless the tie between the various members of the Ministry were extremely weak, and every body, therefore, extremely sensitive as to his position. The fact seems to be that the old Conservatives in the Ministry are exceedingly afraid of their more Liberal colleagues whose tendencies they greatly dislike, and are determined not to be responsible for any of these tendencies; while the Liberals on the other hand, though

compelled for the sake of policy and peace, to play a waiting game, find it so difficult to speak as if they approved all that their predecessors did, that they are constantly, even if inadvertently, calling attention to the difference between the administration of their predecessors and their own. We need hardly say that while this condition of things continues, it is impossible to look for any stability in the French administration. When a public explanation is required only because one Minister takes a view of his colleagues' acts which is likely to win support from a class of men whom those colleagues don't approve, it is clear enough that a very slight incident will cause an explosion and destroy the equilibrium altogether. The materials of the French ministry are evidently incompatible materials, held together by a very strong sense of expediency, but the two parties to the compromise are not any nearer to each other than they were. Indeed the stronger party in the Cabinet being the weaker party in the country, is getting more and more sensitive as to its position; and more and more resolute to hold not only real but nominal power while it can, and not permit even the appearance of any victory for the views of its more Liberal members.

The only hope that this situation yields is, that it may last its time, the time, namely, till a dissolution comes and shows all parties more clearly what the French people really desire. There is, however, great danger that it may not last its time. The rumoured resolution of the President of the Republic not to dissolve if the present electoral law, as regards scrutin de liste, should be adhered to by the Assembly, is a very dangerous element in the situation. Once let any attempt be made to prolong the present very unstable equilibrium too long, - beyond the merely provisional period for which it was alone adapted, - and we can hardly conceive of any power which would keep up the present forced alliance. If it be true, as almost everybody in France agrees, that Marshal MacMahon and his Ministry intend to insist on subdividing the departments into electoral districts, each to elect a single member, notwithstanding the fact that as yet even the Conservative National Assembly itself dislikes this unpopular scheme; and if they propose, if their policy is rejected, to postpone a dissolution indefinitely, we fear the end of this very artificial alliance of incompatibilities will come, and come soon. The present Ministry is just the kind of Ministry which might get over its mutual repulsions, so long as it sees a natural end to so strained a situation near at hand. But if that prospect disappears, and it becomes essential for the Ministers to unite heartily on any such policy as, for instance, postponing dissolution, or else imposing a very unwelcome electoral law on France, it is pretty certain that the attempt will fail. Coalitions are proverbially shortlived. They answer for a time when a great war has to be got through, or any great constitutional experiment completed for the purpose of which national and patriotic sentiment renders temporary personal sacrifices possible. But they almost always fail when the time comes for the coalesced statesmen to agree on a great policy without any motive for agreement of an overwhelming kind. And so it will be in this case. If M. Buffet can keep the dissolution well in view, and hasten matters to that end, the shortlived peace between him and M. Léon Say may fulfil its pur-But if not, if he hopes to govern France for any conpose. siderable time, either with this Assembly, or under a new and very unpopular electoral law, we should expect to see another Ministerial crisis, and another futile attempt to recast "the "majority of 24th May" within a few weeks.

THE BOARD OF TRADE RETURNS FOR SEPTEMBER. The returns of our foreign trade for September exhibit much the same characteristics as they have done for a few months past. There is a moderate decrease of the imports,—all the more serious this month on account of the simultaneous increase of the imports of articles of food; and there is a more sensible decrease of exports, which continue to fall off both in quantity and value as compared with last year. The decrease in the latter case is even greater than it was in the months just preceding, the comparison being made with a month in which there was comparatively little decrease last year.

#### THE ECONOMIST.

The following are the totals of imports and exports stated in our usual form :---

	IMPORT	38.		
1875 1874		September. E 30,859,000 31,143,000		Nine Months ling September. £ 281,515.000 283,220,000
	Decrease	{ 284,000 0.9 %	**********	1,705,000 0.6 %
	Expor	T8.		
		September.		Nine Months ding September.
1875 1874	*****	19,854,000 21,464,000	*********	169,366,000 180,941,000
	Decrease	{ 1,610,000 7.5 %		11,575.000 6*4 %

Thus the decrease of the imports is very moderate both for the month and nine months, while the decrease of the exports is considerable, amounting to 7.5 per cent. for the month, and 6.4 per cent. for the nine months. The last decrease does not show, we think, that the foreign trade generally is worse than it has lately been. The comparison, as we have stated, is with a month in which there was comparatively little decrease last year, and the decline in values is perhaps rather more marked as compared with quantities than was the case lately. This last change, however, as we have often remarked, is not unfavourable, when accompanied, as appears to be the case in many instances, by a corresponding decrease of the value of the raw material imported, while in other cases, where the raw material is not imported, the change shows that the trade is being put on a healthier basis for future development. The fact of decrease is unsatisfactory enough, because this is now the third year of depression in values, and the fourth in quantities; but the actual extent of the depression should not be exaggerated. The usual tables which we subjoin also show that there is an increase in several important departments of our foreign trade both in quantity and value, so that the account is not wholly unfavourable.

Analysing the returns in detail, the most noticeable fact about the imports is the large increase in the value of food imported. Notwithstanding a decrease in one or two important articles, particularly butter and rice, there is finally a net increase of 1,314,000l in the food imports for the month, the main item being an increase of 1,384,000l in wheat, where the increase in quantity is from 956,000 to 1,534,000 qrs. These figures clearly show the effect of the pressure to send forward a supply of wheat, which was caused by the recent advance of price, although it is noticeable that the price is not, in fact, higher than the average of September last year. This rush to import, we need hardly remind our readers, has itself been the main cause of the weak price; and why our bad harvest last season has not been followed by the natural consequence of a sustained rise in price. Adding, however, this increase in food imports to the above decrease of imports in the aggregate, it would appear that the decrease of the remaining imports —raw materials and articles of general con-sumption — amounts to about 1,592,0007 for the month. This is not satisfactory; and we observe that, in fact, in cotton and one or two other articles, there is a large decrease for the month, though, of course, the observation must be made that the imports are irregular, and that as yet, for the whole year, the imports of other articles have been maintained.

As regards the exports, the main points to notice in detail appear to be that the articles which show an increase are mainly coal, iron, and steel, and among textile manufactures linen. Cotton piece goods show a considerable decrease for the month, mainly caused, however, by a falling off in the export to Bengal, as compared with the same month of last year, in which there was an increase equal to the present falling off. The exports of woollen goods have also diminished, but a similar remark applies, the comparison being made with a period of last year, in which there was a large increase. The reduction in value, as compared with quantity, is again most conspicuous in the case of coal, and of iron and steel. In coal, it will be noticed, there is an increase of 3.1 per cent. in quantity, and a decline of 14 per cent. in value; and in iron and steel an increase of 4 per cent, in quantity, and a decline of 16 per cent. in value, the latter difference being, perhaps, partly due to the substitution of less valuable for more valuable constituents of the total export.

Curiously enough the returns of the entries and clearances 1

of shipping are still maintained at last year's totals, or even little in excess, notwithstanding the weakness of the foreign trade. The entries and clearances for September for the last three years have been—

1874				******	tons. 3,889,000 3,645,000 3,471,000
	the nine months				2'at 1'000
		Entries. tons.	Clearances, ton*,		Total. tons.

1875		13,980,000	 15,246,000		29,226,000	
1874	*******************	14,562,000	 14,891,000	******	29,453,000	
1873	******************************	13,918,000	 14,423,000		28,341,000	

The shipping trade of course may be worked largely at a loss, and there may be a much greater movement in proportion to the goods carried than there was a year ago, but capital cannot be going out of the trade, and the merchant directly, and through him the consumer, must at least be getting the benefit of the lower freights and the greater amount of tonnage "on offer."

As there was a large decrease in the foreign irade last year after the month (October) which has now commenced, the returns next to be published must be looked forward to with some interest. The only month this year in which there has been an increase of our exports was April, and this was immediately followed by the great failures which specially affected the foreign trade, and which have had the appearance of arresting an improvement that had set in. During the next few months it should be seen whether the apparent effects of this check are at an end, and the foreign trade really revives after what will have been nearly four years of depression.

I.-IMPORTS of ARTICLES of FOOD into the UNITED KINGDOM in September, 1875, compared with the Imports in September, 1874.

#### BUSINESS NOTES.

THE GERMAN MONEY MARKET. - There are now some signs that the stringency of money in Berlin caused by the withdrawal of the small notes and aggravated by the usual efflux of coin and notes in the autumn, has passed the climax. The withdrawal of the small notes which had been reduced to 8,500,0001 at the end of August is alleged by the North German Gazette, in what appears to be an inspired article, to have been nearly completed at the end of September. There is no doubt that considerable progress must have been made, as was evidenced by the first two returns of the Bank of Prussia in September, showing a simultaneous reduction of the note circulation and of the bullion; but the exact figures on this head have not yet been published. The aggravation due to the efflux of coin and notes to the country has also been of nearly the exact magnitude foreshadowed by us on September 18. In our issue of that date we said :--"List "year between September 7 and October 7 the circulation "[of the Bank of Prussia] increased from 40,055,000*l* to "42,739,000*l*, or 2,684,000*l*. The bullion in the same "period feil from 34,996,000*l* to 32,791,000*l*, or a "reduction of 2,205,000*l* making altogether a difference "of nearly 5,000,000*l* against the bank in a month. An "equivalent demand must probably be met now." Actually during the present season, from September 7 to September 30, between which dates the principal part of the above change took place last year, there is a difference of about 4,000,0002 against the bank-

The bullion on September 7 was — September 30	£ 25,167,000 22,780,000	
Reduction	2,387,000	
and the circulation in the same period has incre	ased -	
Amount on September 30 — September 7	36,774,000 35,130,000	
Increase	1,644,000	

The reduction of bullion is more, and the increase of circulation less than last year, in consequence of the withdrawal of small notes, but in this shape, as we pointed out when we wrote on September 18, the demand on the bank is the more effective. We have not yet the return for October 7, but even if the changes had not been continued to any serious

extent in the same direction, the account to September 30 is significant enough of pressure. The bank, especially, as we also anticipated, has exceeded what will become its minimum of tax-free issue after the 1st of January next.

Its circulation, as above stated on 30th September.	~
Was	36,774,000
Its bullion was	22,780,000

THE PROGRESS OF SPANISH TRADE.—We referred recently to the Spanish financial accounts for the year 1874-75 as indicating the remarkable magnitude and elasticity of the natural resources of the country, the revenue being maintained at more than 20,000,000*l* per anoum, or about the estimate of 1872, notwithstanding that the country is the seat of civil war and great political disturbance. The following table of the foreign trade of Spain since 1849, which is supplied by Mr Phipps, Her Majesty's Secretary of Legation at Madrid, in a report just issued by the Foreign Office, illustrates the same fact from another point of view :—

	Imports.	Exports.		Total.
1849	5,870,000	 4,780,000	***	10,650,000
1850	6,720,000	 4,890,000		11,610,000
1851	6,880,000	 4,980,000		11,860,000
1852	7,530,000	 5,670,000		13,200,000
1853	7,340,000	 8,360,000		15,700,000
1854	8,140,000	 9,930,000		18,070,000
1855	10,240,000	 12,590,000		22,830.000
1856	13,040 000	 10,640,000		23,680,000
1857	15,550,000	 11,680,000		27,230,000
1858	15,020,000	 9,840,000		24,860,000
1859	12,620,000	 12,260,000		22,880,000
1860	14,830,000	 10,980,000		25,810,000
1861	20,200,000	 12,700,000		32,900,000
1862	16,790,000	 11,100,000		27,900,000
1863	18,980,000	 12,200,000		31,180,000
1864	19,900,000	 14,130,000		34,030,000
1865-69 (medium rate)	17,227,344	 15,763,627		
1870	20,872,872	 15,981,971		36,854,843
1871	14,354,168	 15,195,612		29,549,780
1872	12,703,740	 18,695,479		31,399,219
1873	12,472,402	 22,566,126		35,038,528
1874	15,280,000	 16,123,330		31,403,330
PTT1 41 1	*	 1000		1

Thus the imports and exports in 1873 were at nearly the highest point which has yet been reached, and although there is a falling off in 1874 as compared with 1873, the amounts are still as great as in 1871 and 1872, immediately before the cutbreak of the present Carlist insurrection and other disturbances. Mr Phipps quotes the table to show that Spain has probably benefited from the lowering of the Spanish tariff in 1869, and he is no doubt right in doing so, but, however caused, the vitality of Spanish rescurces, even in the disastrous political circumstances of the country, is obvious. With a stable government there are few countries where material development would be so rapid as that of Spain.

THE ALLEGED DIFFERENTIAL DUTY ON SPANISH AND PORTU-GUESE WINES.—Mr Phipps, Her Majesty's Secretary of Legation at Madrid, in his report to the Foreign Office just issued, discusses the question which has been often agitated, though it has been comparatively at rest for a long time—whether the English duty of 2s 6d per gallon on wines above 26 degrees of alcoholic strength really operates as a differential duty against the wines of Spain and Portugal. The wines of France and other countries, it has been said, being of low alcoholic strength, came in at the 1s duty charged on wines having less than 26 degrees, but Spanish and Portuguese wines have to pay the higher duty. This has been made an excuse by the Spanish and Portuguese Governments for maintaining, by way of retaliation, a protective and

#### THE ECONOMIST.

even prohibitory tariff on English manufactures. Mr Phipps, however, endeavours to show-and, we think, with some suc-cess-that the excuse for retaliation is unfounded. In any case, the reduction of our wine duty from 5s 9d to 2s 6d per gallon has been followed by a remarkable increase of the exportation of wine from Spain and Portugal to England. The export in 1859 to England was 3,629,000 gallons from Spain, and 1,798,000 gallons from Portugal ; whereas, in 1873, the export from Spain to England had nearly trebled, the total then being 9,480,000 gallons, and from Portugal had more than doubled, the total being 4,098,000 gallons. This does not look as if the English reductions of wine duties had affected unfavourably the Spanish wine trade, however much it may be argued that a farther change would have still more benefited that trade. Mr Phipps then refers to a series of articles published by Senor Luis Justo y Villanueva, a Professor of the School of Industrial Engineers at Barcelona, who has long devoted his attention to the subject of Spanish wines, as confirming the view that the natural wines of Spain are not excluded from England by a 2x 6d duty. The writer is of opinion that it is not for the interest of Spain to encourage the exportation of the wines artificially strengthened at Malaga and Barceloua, but rather that of the many excellent classes of pure Spanish wines, which are unknown in foreign markets. It is not true that Spanish wines do not "travel," owing to the insufficient amount of alcohol they contain :-

controversy of the differential duties on Spanish wines. Although a great deal of evidence has undoubtedly been adduced, from time to time, to show that the wine duty might safely be reduced to 1s, even on wines above 26 degrees of alcoholic strength, it is satisfactory to hear that there may be no occasion for the reduction, and that the trade in "natural" Spanish wines is likely to be developed without a step on our part, which is greatly feared by our revenue departments.

THE FACTORIES OF ENGLAND.—Mr Redgrave, the Inspector of Factories, in his last annual report to the Home Secretary, prints a set of interesting tables showing the comparative growth of factories, spindles, and power looms since 1850, and of the population employed in factories since 1861. The tables show very clearly that the size of factories is increasing, a source of great economy in working, and next that the proportion of machine power to the numbers employed is also increasing, a proof of the increased efficiency of the labour itself, whether it is owing to increased skill or improvements in machinery, or, perhaps, to both causes combined. The following are the tables :—

In regard to the increased efficiency of the labour employed, Mr Redgrave states that it is "perhaps more striking in the "cotton trade than in any other class of textile factory, for "while the number of looms has increased from 399,992 in "1861 to 463,118 in 1875, the number of weavers to attend "these looms has decreased from 166,209 in 1861 to 163,632 "in 1875." He goes on to explain that there are no data by which we can so nearly compare what has taken place as regards spinning machines, but an approximation may be arrived at by comparing the number of spinning spindles in the factories in Lancashire solely occupied in spinning with the number of persons employed in them in the two periods of 1850 and 1875. "In Lancashire in 1850 there were 517 "cotton spinning factories, containing 6,110,074 spinning "spindles, and employing 56,012 persons, which gives 110 "spindles to each person employed. In 1875 there were "767 factories, containing 16,415,071 spinning spindles, and "employing 100,178 persons, which gives 163 spindles to "each person employed."

THE BANKERS' CLEARING HOUSE RETURNS.—The suggestion we threw out last week, that the Clearing-house returns in October would probably show a smaller proportionate diminution than had been the case in September, in consequence of there having been an unusual activity in the latter month last year, is so far confirmed by the return issued this week. There is a decline from  $115\frac{1}{2}$  to  $110\frac{1}{2}$  millions, or about 4 per cent. as against a decline of 10 per cent. in September. It would be a mistake to draw conclusions from the returns of particular weeks, but so much attention has been drawn to the great decline in September that the least sign of a change may be noted.

. 3,143,673,042 97 ... 3,210,611,160 63 ... 3,213,994,459 6 The above return, compared with that of the preceding week, exhibits the following changes :-

DECREASE.	francs.
Circulation	35,055,260
Treasury account	32,010,470
Private deposits	5,424,958
Gash	15,785,172
Discounts	54,975,658

The diminution in the discounts is in Paris alone, the payments at the end of the month having amounted to 60 millions of francs. In the branches, there is an increase of about 5 ments at the end of the bound having an increase of about 5 of francs. In the branches, there is an increase of about 5 millions. The payment of the coupon of the Three per Cents. has reduced the Treasury account by 32 millions. The dimi-nution in the cash reserve may be accounted for by the re-quirements of the financial houses for the October dividends, the Bank of France issuing to them gold and silver in the place of the small notes now being withdrawn. There has been a rather better demand for bills in the open discount market during the week, but without any marked variation in market during the week, but without any marked variation in the rates, which remain nominally at 34 for commercial paper. The offers are, however, very kinited, and this business has been quiet since the payments at the end of the month. The exchange on London rose to 25f 224c, but after the demands The had been satisfied, paper was offered at 25f 20c, which is about the present value. The Berlin is firm, and relatively rare.

The termination of the monthly liquidation, which was got through without difficulty, and at which there was no scarcity through without difficulty, and at which there was no scarcity of money for carrying over purchases, was the starting point of a steady improvement in most securities. The Three per Cents. have gained 35 centimes in the week, and the Five's I franc. In foreign securities Italian rose in sympathy with French Rente, and Peruvian has found purchasers at better prices, although nothing has been yet decided with respect to the guano contract. Offers have been made by another group of speculators which may produce a further delay in a settle-

ment. Turkish securities, after being very unsettled during the week, have suffered a heavy fall to-day. Already on Tuesday the Five per Cents. went back at one moment to 32.70, on large orders of sale from Constantinople, but recovered to 33.60. Advices to-day from Constantinople, confirmed by telegraph from London, announcing that from January next for five years, the dividends will be paid half in cash and half in bonds, caused almost a panic among holders of Turkish funds. The Five per Cents. fell to 30.50, but closed at 31, a loss of 2½ in the day. All the series of bonds were proper-tionately affected, the last prices of the day being 195 for those of 1873, 220 for the 1869, 290 for the 1865, and 295 for those of 1863. Ottoman Bank shares lost 12f 50c, at 517f 50c, a fall of 25f in the week. Some of the financial and railway those of 1863. Ottoman Bank shares lost 121 ouc, at 517f 50c, a fall of 25f in the week. Some of the financial and railway companies shares have shared in the general improvement, Credit Mobilier gaining 10f, and Spanish Mobilier shares making a fresh rebound to 720. Lombards have been in demand. It is said that in the conference for the separation of the two networks the Italian Government will be represented by M. Sella, who is favourable to the purchase of the Italian lines by the State.

The receipts on the great railway companies in the 37th week suffered from the fresh mundations in the South. The Southern line has lost 153,000f, compared with the same week last year; and the Paris to Mediterranean, 100,000f. Those diminutions have reduced the aggregate gains in the week to 116,000f. Lombards have an increase of 133,000f, the whole of which is on the Italian network. The receipts of the Suez Canal Company in September mark a continued progress, and amounted to 2,155,000f, against 1,752,983f in September, 1874. The returns in the first nine months of the year give 1,123 The returns in the first nine months of the year give 1,123 vessels and 21,416,519f, against 922 vessels and 18,055,473f in 1874, and 893 vessels and 16,751,639f in 1873. The shares are one of the miscellaneous stocks in which the largest business is done, and fluctuations of price are wide and frequent. The price, after starting from 720, reached 740, and closed to-day at 735. Messageries shares are at 647f 50c; Transatlantic, 325f; Match Company, 431f 25c. Subjoined are to-day's prices for the account :-

In the last sitting of the Permanent Committee at Versailles the Marquis de Figure, who, besides being Sub-Governor of the Bank of France, is also a director of the Ottoman Bank, called the attention of the Government to what he alleged to be the false telegraphic news circulated in Paris relative to. Turkish affairs, and asked whether no legislative measures existed to remedy that abuse. That implication that the depreciation in the Turkish funds is due to exaggerated news depreciation in the Turkish funds is due to exaggerated news of the Herzegovinian insurrection did not long remain un-answered. The Semaine Financière replied that the fall in those securities had commenced long before the rising in the Christian provinces. In May, 1874, when the question of the transformation of the Ottoman Bank was first started, the price of the Turkish Fives was 49f 40c, while at the end of July last, before the outbreak of the insurrection, it had fallen to 40, or a loss of 20 per cent. The cause of the dis-credit of the Turkish funds was rather the failure of the Turkish Government to realise the promises of a serious control to be exercised over the finances by the Ottoman Bank, the functions of which have become reduced to those of Bank, the functions of which have become reduced to those of a simple intermediary between the State and the public. In a few months the capital of the Ottoman Bank has become absorbed by the requirements of Turkey, so that the shares are now only represented by bonds of the Ottoman Transury, and a semi-official journal of Constantinople hints at the necessity for the Ottoman Bank to call up the remaining 125 millions of frances of its capital to relieve the Treasury from its embarrassments from its embarrassments.

An article of the Italian monetary law of April, 1874, invited the Ministers of Finance and Commerce to draw up invited the Ministers of Finance and Commerce to draw up an account of the forced paper currency, which had then existed since May, 1866, and to present a report on the best mode of terminating it. That document, which is of great length, was recently presented to the Chamber of Deputies at Rome, and forms a complete exposition of the economic situation of Italy. The Journal des Debats publishes a summary of that paper by M. de Reinach. He shows that when the forced currency was decreed in 1866 the accumulated deficits in the State Budgets amounted to 2,000 millions of francs. Since 1861, a sum of 125 millions of Rente had been created; but the price had fallen to 44 for the Five per Cents., and a further issue had become impossible. By those and other extraordinary resources the deficit had been covered to the amount of 1,700 millions, and a balance of 300 millions remained unprovided for. The ordinary revenue had, however, not remained stationary; the receipts, which in 1861 amounted to 458 millions only, had increased to 637 millions in 1865; but on the other hand, the augmentation in the expenditure had been still more rapid, having advanced in the same period from 812 millions to 1,069 millions. At the same time the commercial balance in the four years showed a deficit of 1,340 millions. The Government had employed all its available resources; the State railways and Orown lands had been alienated as far as was possible, and the establishment of a forced circulation, with the creation of a State paper money, became a matter of absolute necessity. The consequence of the law, and of the requirements of the Treasury, was that the paper circulation, which had been only 247 millions of francs in April, 1866, rose in 1874 to 1,500 millions. During that period the depreciation of the paper money fluctuated between 19 per cent. in 1866, and 3 per cent. only in 1870; at present it is 7 per cent. The price of the Italian Five per Cents. at the same time rose from 40 in 1866, to 70 in 1871; then fell to 59 in 1873, and is now above 72. The frequent variations in the premium on gold was a cause of great uncertainty in trade, as the condiable resources; the State railways and Crown lands had been gold was a cause of great uncertainty in trade, as the condi-tions of a contract made when paper compared with gold was at a discount of 10 per cent. were completely changed when the depreciation rose to 15 per cent., or fell to 5 per cent. only. On the other hand, the *regime* of the forced circulation only. On the other hand, the regime of the forced circulation produced a great advance in the economic education of the country. Before 1859] banknotes could scarcely be said to be an instrument of credit or of circulation, being principally employed, from the facility with which they could be secreted, as a security against robbery. The inhabitants of the rural districts in the north recognised no other value than the 20 franc gold pieces, and those of the south only the silver piastre. Between 1866 and 1874 the six banks of issue had in-Between 1866 and 1874 the six banks of issue had in-creased the number of their offices or branches from 52 to 95, and Italy with 27 millions of inhabitants, had more facilities for banking than France at present with 36 millions. A fact remarked in countries with a forced paper currency is that, not being subject to the periodical influences of the scarcity or abundance of metal, they are less sensible to changes in the rate of interest. Thus between 1866 and 1874, the National Bank of Italy has only changed its rate three times, not rising above 6 per cent, nor falling below 5, while times, not rising above 6 per cent. nor falling below 5, while during that time the rate in Belgium and Holland had changed more than 50 times. ranging from 2½ to 7 per cent., and in England the fluctuations had been still more frequent and within wider limits. With respect to the second part of the report the ministers are forced to admit their inability to the report the ministers are forced to admit their insolity to propose any measures for the prompt termination of the forced currency. All that could be done was to diminish the inconveniences of it, by depriving the notes of each of the six banks of issue of their local character. That object was attained in the Act passed by the union of the six banks into a Syndicate for the issue of the milliard of Government paper, and their own notes to the amount of the triple of their capital, with a reciprocal forced circulation in each of the other provinces. To terminate the forced circulation, the Government would have to first redeem the 900 millions of its Government would have to first redeem the 900 millions of its notes already issued. To borrow that sum would be to charge the Budget, which already shows a deficit with an additional sum of 50 millions annually. A proposal supported by several deputies was to redeem a sum of 50 millions annually, but until the revenue leaves a surplus of receipts that measure will be impracticable. When that result shall have been attained the surplus may be either employed in the surplus will be impracticable. When that result shall have been attained, the surplus may be either employed in the amortisa-tion of an equal amount of notes, or in covering the interest of a losn for the entire withdrawal of the State paper money.

The Chamber of Commerce of Nantes has received from the Minister of Finance a letter in reply to questions relative to the interpretation of the law of the 29th July last, on the ugar duties. As in cases where the saccharine richness of sugar appears to the Excise agents to be superior to that indicated by the colour, recourse is to be had to a legal verification with the saccharometer, the refiners had demanded the same right, where they supposed the richness to be below that of the class to which the sugar belonged. That privilege had

been denied by the Administration, but the Minister now gives way on that point, and admits the right of an appeal to an expertise for both parties. The Minister, however, explains that the system of averages which the Government had proposed for the legal yield was not adopted in the Bill. For example, the standard of 7-9 sugar being 80 per cent. rich, and that of 10-14 sugar, 88, the point of 84 would have been taken above or below which the produce would be ranged in one or the other of the two classes. Instead of which the sugar will be retained in the class to which it belongs by its colour unless it reaches the full standard above or below; thus, the 10-14 will not be be classed as 7-9 unless the proportion of saccharine descends as low as 80 degrees, and on the other hand, the 7-9 will not be classed as 10-14 unless it reaches 88 degrees, or as "under 7" unless the essay shows it to mark 67 degrees or under. This regulation is manifestly to the advantage of the refiners, as it leaves a broad margin for the bonus of which the English refiners complain. For the class 7-9 the premium may reach 9 per cent., and for the "under 7" 12 per cent., and it is of the lower kinds that most use is made. It may be said that the rule cuts both ways, but the refiners are too shrewd men of business to buy sugar not equal to the standard of the class to which it belongs. The protection the English refiner was to obtain by the use of the saccharometer in France thus becomes quite illusory.

The British Chamber of Commerce in Paris recently commenced an agitation for a reduction of the telegraphic rates between England and France to a uniform charge of 4 frances per twenty words, instead of the present price of 4f for London and 6f for any other part of the United Kingdom—a difference for which there was no justification, as the collective rate of 6f is more than the three separate tariffs for France, for the submarine cable, and for England, combined. The French Government has now informed the British Chamber that it is willing to reduce the rate as proposed on condition that the same reduction shall be made on telegrams sent from England to France. Another reform advocated by the same Chamber appears also in a fair way to be partially realised. I mentioned a few weeks back that a public meeting, at which M. Michel Chevalier took the chair, had been held at the Hotel du Louvre, to memorialise the Government with the view of obtaining various improvements in the railway service on the great French lines, among which was the addition of second and third-class carriages to the fast trains. Although the British Chamber of Commerce modestly kept in the back-ground, in order not to offend the national susceptibility in a question in which foreign interference might be considered as intrusive, the agitation was really commenced by the British Chamber, which took the lead in calling the meeting. The Journal Officiel has now published a note stating that the Minister of Public Works had invited the different railway companies to consider which of their express trains might receive the addition of second-class carriages, and intimating that a more considerable extension of the express service would be demanded at some future time.

The journal Le Charbon (Coal) states that experiments have been made at Bordeaux for the employment of cork in gas for lighting. The results were so favourable and so economical that it has been decided to fit up works for lighting the town of Nerac on that system. The waste obtained from cork manufactories is distilled in retorts, and flame thus obtained is said to be brighter and whiter than that from coal gas.

Through an error of punctuation in my letter last week, the fall in the average price of gold in 1874 was given 33'6 centimes per gramme, and of silver '065 centimes per gramme. The figures should have been 3'36 centimes and '0065 centimes for the two metals, according to the report of the Permanent Valuation Committee at the Ministry of Commerce.

The following are the latest quotations of the produce markets at Havre per 100 kilos (1 cwt) duty paid :--

COTTON. -- The Syndicate of Brokers in revising the price current at the end of last week reduced the various sorts from 1 to 3 france. The present rates for the current sorts are:--New Orleans lowmiddling, 82f; good ordinary, 75f; Georgia, same sorts, 82f and 80f; Pernambuco fair, 90f; Sorocaba, 83f; Oomrawuttee good fair, 56f; Tinnevelly, 61f; Bengal 47f. Sales last week, 7,851 bales; importations, 2,763. Stock, 183,460 bales, of which 85,690 from the United States, against 159,870 and 81,160 at the same datalast year.

COFFEE (in bend).—Rio, 92f to 107f; Bahia, 105f; Porto-Cabelle, 131f; Santoa, 114f 50c to 117f 50c; Hayti, 115f. Sales last week, 17,272 bags; importations, 9,305. Stock, 263,322 bags and 149 tierces against 142,393 and 82 at same date in 1874.

HIDES.-New York salted, cow, 47f 50c; Monte Video, 65f; Paysandu, 80f; Mexico, dry, 101f 50c; Rio Grande, 117f 50c; Monte Video, 130f.

#### THE ECONOMIST.

#### AUSTRIA AND GERMANY. (FROM OUR OWN CORRESPONDENT.)

VIENNA, Oct. 5.

VIENNA, Oct. 5. An event took place yesterday which, if it is not one of financial interest, is still of great economical importance. It is the opening of the Austrian College in the far East—the German University of Czernowitz. The opening took place on the hundredth anniversary of the annexation of Bukowina, whose capital is Czernowitz, to Austria. Galicia has two universities besides, one at Lemberg and one at Cracow, but in both these the Polish language has been introduced about ten years ago. The university at Czernowitz is, therefore, regarded as a central point for those districts where all the elements which are not Polish assemble. Its institution may be regarded as a reinforcement of the Austrian State's unity. be regarded as a reinforcement of the Austrian State's unity.

Last week both the Bourse and the rest of the commercial world were agreeably surprised by the news that the junction question of Turkish and Austrian railways has at last been solved satisfactorily. Count Andrásy took advantage of the revolutionary movement in the Herzegovina, and the friendly dispositions towards Austria, caused by its impartial conduct in this difficult question, to extract a treaty from the Turkish Government which puts an end to the junction business. According to this treaty the building of a railway between Bellova and Sofia is to commence next spring, or at the very latest on the 31st of May, 1876. The whole of the line Bellova-Sofia-Nissa is to be completed in of the line Bellova-Sofia-Nissa is to be completed in four years from the day on which the treaty was signed, that is to say, before the end of 1879. The Government of Austria-Hungary at the same time promises to commence and com-plete the junction between the Hungarian railways and Bel-grad within the same period. Serbia is not specially men-tioned in the treaty, because it has declared long ago that it quite agrees with the project of a junction. The Turkish Go-vernment has also promised the completion of the line be-tween Salonichi-Mitrowitza and Nissa, without, however, binding itself to any determined period of time. This treaty has solved a question which is not only of Austrian import, but which must interest all Europe.

has solved a question which is not only of Austrian import, but which must interest all Europe. The Austrian and Hungarian commerce shows in its returns of the first seven months of this year, some improvement. Im-ports (coin and bullion excepted) amounted to 306,648,113 gul-den. The amount of exports reached 271,282,475 gulden. The former was less by 21 million gulden, against the same period last year, but the latter increased by 32 million gulden against last year. The decrease of imports is owing to less corn, lard, and metal goods having been imported into the country.

last year. The decrease of imports is owing to less corn, lard, and metal goods having been imported into the country. The import of precious metals and bullion amounted to 94 millions, export 64 millions gulden. Both these figures are much lower than last year's. The amount of duty paid was 104 millions, that is to say 65,551 gulden more than last year. The conferences touching the question of the separation of Austrian and Italian railroads have been put off, on account of the illness of the Italian delegate, Sella. By the returns laid before the General Assembly, we see that the whole extent of the railway amounts to 569 Austrian miles, 295 of which are Austrian, which correspond to 2,237 kilometers, and the expense for which amounted to 207 millions gulden. The conferences on custom questions with Russia have come to an end. No treaty of commerce is to follow the results. Both governments will simply make known the facilities resolved upon, to their custom offices at the boundaries. A railway exists at Vienna, which surrounds three-fourths of the town, and which is intended to carry goods from one

of the town, and which is intended to carry goods from one railway station to the other. The Government has decided upon completing this railway in a manner to make it enclose Vienna as within a ring. Its destination, however, remains the same.

An answer given by the Austrian Minister of Finances to the assembly of Austrian delegates informs us, that in the year 1876 the expenses of the budget will exceed the income by 25 million gulden. Among these expenses there are, how-ever, some which will not be repeated, for instance that needed for the new cannons.

for the new cannons. In Pest the project for a new Act on tax collection, an-nounced by Minister Szell, has already been presented. The fact that the executors are to be replaced by inspectors is thus explained. Control is by this measure taken from the bands of lower officials into that of higher ones, who are subject to the Ministry alone, and it is hoped by this means a great deal of the indulgence at present in use will be done away with. Vienna has also perceived something of the fact that in Germany the rate of discount has been raised to 6 per cent., for private securities of the National Bank have increased by

for private securities of the National Bank have increased by almost 5 million gulden, which cannot be solely attributed to the growth of business transactions in the autumn months. It is stated that quite a number of bills, discounted by German banking houses, have returned to Vienna—a fact explained by the difference in the rate of discount. The returns of the Prussian Bank, published yesterday, produced almost a panic amongst men of business of all kinds

Within a week, the private securities have increased by 49,984,600 marks, the circulation of notes by 40,291,600 marks, and coin and bullion have grown less by 16,086,000 marks. and coin and builton have grown less by 10,000,000 marks. This is a very extraordinary result when one considers that the rate of discount had so lately been raised to 6 per cent., and that the Prussian Bank was wont to keep out of extremes. It had reached so high a rate of discount only in times of crisis. Commerce is at present suffering from the fault which consisted in the Government not having withdrawn the old coins all at once and exchanged them against the new ones, and then having circulated new gold without withdrawing their equivalent in old silver pieces. The result of the enquete that was to have been made on the 30th September at the different pay places is not yet publicly known. Should the result prove to be a greater amount of silver thalers than the Government expects, it will have to insist upon the rate of discount of the Prussian Bank being raised still higher, for the other reason also that the rate of discount of the Bank of Frankfort has been raised to 6 per cent. An order published on the 21st September puts a number of old silver coins out of circulation. By this measure the Bill mentioned in the ECONOMIST of the 18th September, and which deals with the exclusion from circulation of the coins of Hamburg and Lübeck, has come into force. From the first of October the silver and bronze coins of franc-currency are to be ex-cluded from circulation in Alsace-Lorraine. The following are the sums which have up to this moment been withdrawn in old currency :-consisted in the Government not having withdrawn the old in old currency :-

	Marks.	
In thaler standard	137,450,771	
In gulden standard (South German)	123,421,093	
In crown thalers	7,973,748	
In old Austrian currency	1,909,810

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1865, a deficiency of 10,371,692*l*; in 1872, a deficiency of 1,788,722*l*; in 1873, an excess of 238,713*l*; and in 1874, an excess of 3,094,001*l*. In 1875, there is an excess of 5,807,464*l*.

In 1865, a rise in the Bank rate took place, the reserve having suddenly fallen in amount to little over 5 millions. This change was largely brought about by a remarkable revolution which had sprung up in the Liverpool and Manchester markets, where much activity was created by the discovery that future supplies of cotton would be less than had been supposed.

In 1872, the release of the dividend money led to temporary plethora. The joint stock banks only allowed  $4\frac{1}{2}$  per cent., instead of 1 per cent. under Bank rate on deposits.

In 1873, money was easy in appearance from a like cause, but gold was going to America. The new Turkish loan was a conspicuous failure.

In 1874, the value of money in Germany was high, the Prussian Bank having advanced its rate to 5 per cent. But a turn in the Paris exchange, and the arrival of gold from Australia, cocurred at the same time, and the Bank refrained from raising its rate here.

The account of the Bank of France for the week ending October 7 shows the following changes :--

American currency is reduced into English money at 3s 8d per dol, the item specie being taken at 4s 2d per dol. Net deposits are left in dols on account of the mixture of currency and specie. DISCOUNT AND MONEY MARKET.—The Bank rate was raised

yesterday from 2 per cent., at which it has stood since the 9th of August, to  $2\frac{1}{2}$  per cent. The change had to some extent been previously anticipated, in consequence of the extent of the German demand for bullion, assisted by a demand for sovereigns for South America. The result was that on Wednesday it was necessary to resort to the Bank for bullion for Germany, and altogether 333,000/ has been withdrawn on balance for abroad since the previous return, besides about half-a-million since the return was made up. There has also been a good discount demand at the Bank during the week, although the increase of the private securities shown in the account is finally not so great as the demand during the week implied, advances having been repaid out of the dividend money. Since yesterday the demand has rather fallen away as compared with what it was earlier in the week and this afternoon. the minimum for the best short bills is at least & under Bank rate, although the rate is maintained at 3 per cent. for 3 months' bills. There are still, it will be understood, great complaints of the scarcity of bills, and short money on English Government securities is also abundant at the nominal rate of

1 per cent. The demand for gold for Germany has rather fallen off since yesterday, and there are signs that the stringency in Germany caused by the withdrawal of small notes is abating. The withdrawal of the notes is believed to be nearly complete, and money in Hamburg, Frankfort, and other centres in Germany has not been so scarce as in Berlin. There is still, however, a demand of some kind for gold which may, of

THE ECONOMIST.

course, become more active at any moment, though nothing is known for contain in the absence of any public announcement of its intentions by the German Government. In particular, no official announcement has yet been made as to the demonetisation of the silver.

The total decrease of bullion in the return is 1,053,000*l*, of which, as above stated, 333,000*l* is for export, and the remainder for the country. The circulation has also increased 163,000*l*, making a reduction of 1,216,000*l* in the reserve, which is now only a little over twelve millions. The increase in the private securities is however only 825,000*l*. The Government has borrowed largely from the Bank, as we anticipated, to pay the dividends, the Government securities having increased 2,688,000*l*, and the changes in the deposits are an increase of 168,000*l* in the public, and of 2,735,000*l* in the private deposits. The proportion of reserve to liabilities by the decrease of the reserve and the increase of deposits is considerably less than last week.

THE STOCK MARKETS .- Business in these markets procreded very quietly until yesterday, the tendency, in spite of some persistent sales of Turkish stocks from Constantinople, bing perhaps rather favourable. The more favourable news from China, and the evidence that the great powers would prevent a general complication arising out of the Eastern question, seemed to have given a firmer tone, with the exception stated, although business remained inactive. Yesterday and to-day, however, attention has been absorbed by one of the most important incidents which have occurred for a long period in the markets for securities, and which accounts for the exceptional and mysterious weakness in Turkish stocks, to which we have referred. This incident was the official announcement yesterday of the publication of a decree by the Turkish Government, ordering the payment of the debt interest and drawings for the next five years to be made one half in cash and the remainder in 5 per cent. bonds, to be issued, apparently, at par. It has long been evident that Turkish deficits could have but one end, and recently it has been found exceedingly difficult to find the funds for the October coupons as well as to repay advances falling due at the beginning of this month; but the announcement has been extremely sudden and without immediate warning to those most deeply interested in supporting Turkish credit. It is supposed that at the last moment, and confronted by the impossibility of borrowing more money, the Turkish Government has listened readily to the advice of intriguers, who urged it to the easy course of simply not paying the foreigner from whom no more money could be got. However this may be, the suddenness of the announcement, and its being made without any consultation with the creditors, have had the worst effect. The fall in Turkish securities has been most severe, as we describe in detail below, and Egyptian and Peruvian stocks, the former especially, have suffered heavily with it. The event naturally spreads dis-credit, both Egyptian and Peruvian stocks being held largely by classes who fear that their debtors may yield to the same temptation, the fear having also too much foundation in the really bad financing of these two States, whether or not their present circumstances are more critical critical

than those of Turkey. The incident has also weakened almost all the markets where there is any speculation, the event being of a sort to check buying in any direction, almost all the markets though only for the moment; the weakness latterly, how-ever, is perhaps partly attributable to the advance of the Bank rate this week, and the apprehensions of a farther advance very soon. The lowest point in prices was, for the present at least, touched this forenoon; since which there has been an almost general recovery, prices finally leaving off at about last night's closing. The indications are that the incident has been preceded by very large specula-tive operations for the fall, and the existence of this element, as we have often explained, tend momentarily to support prices—the fature course of which will really depend on the amount of stock brought to market on one side and purchased on the other. What support will be given to the market in this way has now to be seen. It has also to be considered, as far as market prices are concerned, that to a large extent the fall which has occurred corresponds to the real change in the return to the investor, caused by the repudiation. Turkish stock-, comparing them with Spanish at the time of a similar partial repudiation, are now about the range of price to which such an event was likely to carry them. This opinion is widely held in the City, and coupled with the amount of purchases which must be made to close accounts for the fall, tends to steady the markets, and diminish the risk of a continuous fall, which the event beforehand might have seemed calculated to produce. That the fall since the announcement calculated to produce. That the fall since the announcement has been no greater than it is must not be taken to mean that the disaster is not of the first magnitude, and will not have very serious consequences. The point of most interest will probably now be the movements in Egyptian stocks, which have hitherto fallen very little, compared with those of Turkey and Peru, although large amounts are stated to be held speculatively, and the campaign for the fall has also been entered into against them.

ENGLISH GOVERNMENT SECURITIES.—This department, after recovering on Monday and Tuesday under the influence of the more favourable news from China, has finally become rather weaker, partly in sympathy with the general dulness produced by the Turkish collapse, and partly from apprehensions of dearer money.

COLONIAL GOVERNMENT SECURITIES.—Cape of Good Hope 4<sup>1</sup>/<sub>2</sub> per Cents. are 1<sup>1</sup>/<sub>3</sub> higher; Mauritius, 1882, 1. Otherwise there is little movement. New Zealand 6 per Cents., 3rd issue, are 1 lower.

FOREIGN GOVERNMENT SECURITIES.—As already stated this department, like the others, appeared to be gaining strength until Thursday, with the exception of Turkish stocks, which were heavily sold on Tuesday and Wednesday in consequence of orders from Constantinople. On Thursday morning these orders were repeated on a large scale, Turkish 5 per Cents., which were about 34 a week ago, falling to 30, and in the course of the day the explanation came in the shape of a formal notification from the Imperial Ottoman Bank that the Turkish Government had decreed the payment of half the interest and sinking funds in paper instead of cash. This maintained the flatness of Turkish stocks at the point stated, and just at the close of business there was a sharp fall all round, especially in Egyptian and Peruvian stocks, on which the anneuncement at first had hardly produced any effect. The fall in the Egyptian 1873 loan, which is the most weakly held, amounted however to about  $3\frac{1}{2}$  per cent, before the close of business. This forenoon there was little short of a panic in these securities. Turkish 5 per cents. were sold

### [Oct. 9, 1875.

down to  $27\frac{3}{4}$ ; the B and O's which left off at 68 a week ago were sold down to 60, and then to 57; and so of other stocks. Egyptian 1873 loan, which left off last night at  $71\frac{1}{2}$ , fell to  $67\frac{1}{2}$ , and Peruvian 5 per cents. were similarly "sold down" from  $41\frac{1}{2}$  to  $38\frac{1}{2}$ . In the afternoon, however, there was a rally, Turkish 5 per Cents. recovering to nearly last night's close, Egyptian 1873 to 691, and Peruvian 5 per Cents. to 404, though these prices were hardly maintained to the close. The fall being so great, and coming after the heavy fall a few weeks since in Peruvian stocks, has given rise to the fear of difficulties at the next settlement, which, it may be hoped, are unfounded ; the fall in Turkish stocks especially is of a sort which must have been well diffused, and for which those who are largely engaged were probably well prepared, although the sud-denness of the announcement has taken everybody by surprise.

According to the telegrams from Constantinople, the following is the official notification which has been made :-

It is well known that the Budget shows a deficit exceeding 5,000,0004. In order to be able to pay regularly the coupons of the various loans, the Government had hitherto been in the habit of ob-taining fresh loans, thus paying one debt by contracting another. The result of this expedient was an increase of the deficit and a diminution in the couped of the deficit and a diminution result of this expedient was an increase of the deficit and a diminution in the confidence of holders of Turkish securities, which is proved by the constant depreciation which Ottoman stock daily undergoes. In consequence of this the Government, in order to completely balance the Budget, has definitively decided to carry out from to-day the following measures :- All the receipts from the Customs, as well as those derived from the sale of tobacco and salt, the tribute paid by Egypt, and, if mecessary, a portion of the sheep tax, will be paid into treasuries specially established for the purpose, without, however, thereby pre-judicing the rights resulting from the concession made to the Imperial Ottoman Bank. It has been likewise decided that during five years the interest on Turkish securities is to be paid half in cash and half in bonds payable in five years, bearing an annual interest of 5 per cent. After five years the coupons will be again paid integrally and regu-larly as hitherto. A note has also been issued by the Ottoman Government, in

A note has also been issued by the Ottoman Government, in

sinking funds of the interior and exterior debt, the annual service of which amounts to about 14,000,000 Turkish pounds, is and remains suppressed. As compensation for the non-payment of the moiety of 7,000,000 pounds, there will be paid a sum calculated at 5 per cent., amounting to 350,000/ per annum. The provisional bonds, which will be delivered with this object, will have currency during five years only, and will serve exclusively as a guarantee for the payment in each of these years of the above-mentioned sum of 350,000/.

From these documents there can be no question that the easure is intended to be general, and applies to all the loans, except, according to a correction since received, the loan of 1855, guaranteed by England and France. It is obvious, however, that some difficulties and questions may arise in the application of so general a measure. Many of the loans, as is well known, have special revenues and securities assigned to them, and although we have always warned those concerned, that such special assignment was not to be implicitly trusted, because a repudiating Government— and this is now proved—would take a security from its secured creditors as readily as not pay the unsecured interest, yet the creditors who believed they were secured are not likely to submit without protest. A great deal of pressure will certainly be put upon the Turkish Government on behalf of these secured creditors. And whatever may be the case with the securities in the hands of the Turkish Government itself, it happens that there are two loans, besides the above guaranteed loan of 1355, secured upon the Egyptian tribute, which finds its way to the bondholders without going through the hands of the Turkish Government at all. The bondholders thus secured will certainly endeavour to make their security available, and some nice international and judicial questions may arise. The difficulties are such that the Turkish Government cannot carry out the decree in its present form and a more careful arrangement must be devised, which will give the opportunity of a consultation with the creditors such as ought to have preceded the present announcement. Turkey, however, will not soon recover from the additional and un-necessary discredit it has incurred by the haste it has shown to pass a rough and impracticable decree of repudiation.

Some additional confusion was caused to-day by the refusal of the Ottoman Bank to go on with the payment of the October coupons, the decree, dated October 6, being worded to take effect at once. It is understood, however, that the difficulty has been got over, and that the payment is being proceeded with.

Another default has also cocurred this week, but passes almost unnoticed amid the excitement occasioned by the

Turkish announcement. This is the default of Uruguay which has withheld from the agents payment of the last monthly instalment to make up the amount required for the next coupon.

ENGLISH RAILWAYS .- The tone generally in this market, apart from the momentary weakness occasioned by sympathy with the fall in the foreign market, has been very firm. By Wednesday, there had been an important advance in several stocks, principally North British, Brighton, and generally the lighter stocks; and although this has since been lost, in some cises North British, especially marks a great advance for the week, in addition to the similar advance last week. Among the heavier stocks, also, North-Western has exhibited a strong tendency to improve. The traffic returns published on Wednesday, though still disappointing as regards goods traffic, show on balance a material increase, while the reduction of goods traffic in the worst case is much less than last week. The disposition in the market now is to believe that the traffics will continue satisfactory, and that there may even be a recovery in goods towards the end of the year, when the comparison will be with weeks of falling off last year. Should this be the case, there must be increased dividends paid for the current halfyear, although not to the extent, perhaps, which sauguine operators anticipate. As confirming this view, another favourable revenue statement has also been published by the Sheffield Railway Company, showing that the increase of gross receipts is considered by the authorities of that line to be nearly all net.

The following shows the principal changes for the week in the quotations of ordinary stocks, comparing the latest unofficial prices :---

The traffic receipts on eighteen railways of the United Kingdom, of which a list is subjoined (including the principal amounted for the week ending October 2 to railways), 1,074,846l, being an increase of 31,119l as compared with the corresponding week of last year. The aggregate receipts for the half-year to date are now 13,755,677*l*, showing an increase of 347,980l on the corresponding period of last year. The principal increases for the week have again been on the passenger lines, but that on the North-Eastern is as much as 8.1311.

JOINT STOCK BANKS.—The great fall in the foreign stock market this week has been accompanied by sales of some London banking shares, on fear of indirect implication in the losses which must result from the fall in certain foreign stocks and the belief that business for the half-year to date has not been very profitable. Chartered Mercantile are 3 higher; Hong Kong and Shanghai, 1; London and San Francisco, <sup>1</sup>/<sub>2</sub>. On the other side, Imperial Ottoman are 11 down; London and Westminster, 31; Lon-don and County, 1; Union of London, 2; Anglo-Californian, 3.

TELEGRAPHS .- The operation of the renewed 4s per word tariff by the Anglo-American Company has been regarded favourably, and the stock is again 21 higher this week; Globe Trust has also advanced 1; Eastern shares,  $\frac{1}{4}$ ; Extension,  $\frac{1}{4}$ ; Hooper's Works,  $1\frac{3}{4}$ ; India-rubber Works, 1. On the other side, Direct United States Cable shares are 1 lower.

MINES .- Among British mining shares there is an advance of 20 for the week in West Seton; Wheal Bassett are also 1 higher; Great Laxey have fallen 1. In the foreign market, Richmond are 1 lower ; Rio Tinto Bonde, 1.

MISCELLANEOUS.-Among bonds, &c., City of Montreal are 1 higher; Bailway Debenture Trust, 1; Share Investment Preferred, 1; Credit Foncier of England shares are 1 better; but General Credit and Discount are 1 lower; and National Discount, 1. Royal Mail Steam are 1 lower. Among tea companies' share, Assam are 1 higher; but British Indian are 1 lower, and Upper Assam 1.

BULLION .- The following is taken from the circular of Messrs Pixley and Abell on the transactions in bullion during the week :-

the week :--Gold.-The demand for export for all countries has increased, and although the sovereigns from Australia (430,000/) were sent into the Bank, withdrawals to the amount of 834,000/ in bars and coin have taken place; the arrivals during the week, comprising 42,600/ from the West Indies, 7,970/ from the Cape, and 370,000/ from Australia and Japan, have also been sent away. The Tagus has taken 30,000/ to the West Indies, and the Main 50,000/ to New York. Silver.-The silver, ex Galicia, from the Pacific, and by the West India steamers, 96,500/ in value has been sold at 5614d per oz, at which rate the amounts from America (49,400/) were also placed. The market is now firmer, in consequence of an increased demand for the East. The P. and O. steamer leaving to-day, takes 41,000/ to India. Mexican Dollars,-Those by the West India steamer were sold at 554d per oz for China, they go by the Peninsular and Oriental steamer sailing to-day, which vessel takes 8,600/. Exchange on India for banks' drafts at 60 days' signt is 1s 944d to 1s 94d per rupee. Tenders for the India Council bills were received

Exchange on India for banks' drafts at 60 days' sight is 1s 94% to 1s 94% per rupee. Tenders for the India Council bills were received yesterday. The amounts allotted were—to Calcutta, 663,500/; to Bombay, 61,800/; and to Madras, 33,000/. Applications on all three Presidencies at 1s 94% per rupee receive 6 per cent. Quotations for Bullion.—Gol1—Bar gold, 77s 10d per ez std; ditts, fine, 77s 10d per ez std; ditto refineable, 78s 0d per ez std; ditts, fine, 77s 10d per ez std; bar silver, containing 5 grs gold, 57,% per ez std; Mexican dollars, 55% per ez. Quicksilver, 14/14s per bottle. Discount, 3 per cent. According to the *insetter* return of this evening the more

According to the Gazette return of this evening the move ment in the precious metals during the week ended Oct. 6 have been as follows :- Gold-Import, 882,0041; export, 1,092,7421. Silver-Import, 136,5891; export, 65,3561.

#### NOTICES AND REPORTS.

#### STOCKS.

Bolivian Loan of 1872 .- The numbers are published of 230 bonds, which have been drawn in conformity with the general

bonds of the loan. This State, however, is in default. Colombian 44 per Cent. External Debt, 1873.—The Council of Foreign Bondholders communicate that the balance of the remittances for the October coupon, as well as the first third for the January coupon, have been received by the London and County Bank, in bills at 90 days' sight, which were transmitted by special messenger from Bogota. The pay-ment of the coupon will be duly announced on maturity of the bills.

the bills. Costa Rica 6 per Cent. Loan, 1871.—It is announced that, in conformity with the general bond, the numbers of 30 bonds, amounting to 12,400l, have been drawn, but it is notified that no funds have been provided for the payment of the interest or sinking fund due 1st November. State of Massachusetts 5 per Cent. Bonds.—Messrs McCalmont, Bros., and Co., have received subscriptions at par for 267,000l, in bonds of 500l each, redeemable in 1895. *Turkish Debt.*—The following announcements have been made with regard to the crisis in Turkish finance:—

Turkish Debt.—The following announcements have been made with regard to the crisis in Turkish finance :— "Imperial Ottoman Bank, Throgmorton street, "October 7, 1875. "Dear Sir,—I am instructed to inform you that we have just re-ceived from the Director-General of the Imperial Ottoman Bank a telegram of which the following is the translation :—'The Government has sent me a copy of a decree ordering payment of coupons, balf in cash, half in Five p.r Cent. bonds.'—I am, dear Sir, yours faithfally, "W. LANDER, Secretary. "To the Secretary of the Stock Exchange."

"To the Secretary of the Stock Exchange." And the annexed is from the second edition of Thursday's Times:---

"CONSTANTINOPLE, Oct. 7.—The Porte has decided that, during five years from the 1st of January next, the interest and *amortissement* of the public debt shall be paid half in cash and half in bonds, bearing 5 per cent. interest." per cent. interest.

Turkish 1858 and 1862 Loans .- The Council of Foreign Bondholders state that the Joint Commission for the Ottoman Loans of 1858 and 1862 have, at the request of influential constituents, notified by telegram or letter to the Grand Vizier and to their agent in Constantinople their protest against any alteration in the recent conventions made with them, and requiring in such case as agreed, that their syndicates shall receive the revenues assigned.

Uruguay 6 per Cent. Loan, 1871 .- Messrs Thomson, Bonar,

# Old Broad street, London, Oct. 4.

Atlantic and Great Western-First Mortgage Bonds, Ohio Division .- It is announced that the receiver is now paying the

eoupons due 1st October. Atlantic, Mussissippi, and Okia-Consolidated Mortgage Loan.-A circular has been issued to the bondholders by the London

agent, which states that according to a letter received from the president of the company, the board are unable to pay "even one-half" of the interest on the coupons which matured on the 1st inst. The letter goes on to state that the recent panic in America has principally contributed to the deficit in the revenue; that the board confidently look for-ward to better times, and that meanwhile "co-operation and forhears nee at the hands of the bondholders are essential." forbearance at the hands of the bondholders are essential.

Bahia and San Francisco .- The receipts for the half-year ended June, were in excess of any previous six months since the opening of the railway. The expenditure was somewhat above that of the last corresponding half-year, amounting to 26,517*l*, leaving a balance of 61,765*l*. Out of this the directors recommend a dividend at the rate of 64 per cent. per annum, leaving 3,26 *l* to be carried to working capital. Capital ex-pended, 1,799,532*l*, leaving 468*l* to the credit of the account.

pended, 1,799,5321, leaving 4681 to the credit of the account. Berks and Hants Extension.—The receipts for the half-year were 9,4651, and the expenses 4,3381, leaving a balance avail-able of 3,7071. After payment of preference charges, a divi-dend was declared of 3½ per cent. per annum (being 1 per cent. in excess of that paid for the corresponding half), leaving 5571. Capital expended, 253,1491.

Ely, Haddenham, and Sutton .- At the meeting, a dividend was declared at the rate of 11 per cent. per annum. Capital expended, 49,4831.

Erie .- At a meeting of first consolidated mortgage bondholders at Dundee, a resolution was passed to the effect that any proposals for re-organisation, which do not include the cash payment of interest due to the first mortgage bondholders, shall receive their unqualified opposition. It was also decided to send the coupons due of the first section to New York for representation and protest in the event of non-payment. A committee was appointed to confer with the joint London committees of bondholders and shareholders, and the meeting was adjourned to 15th inst. Highland.—The dividend has been fixed at the rate of 5 per

per annum (the same as at this time last year), leaving cent 4,5502

Kettering, Thrapston, and Huntingdon.—The receipts for the half-year were 15,986l, as compared with 14,745l in the corre-sponding period of 1874—an increase of 1,241l. The balance sponding period of 1874—an increase of 1,241ℓ. The balance available was 5,816ℓ, out of which the fixed dividend of 5 per cent. on the preferred stock and 5 'per cent. on the deferred stock was declared, leaving 66ℓ. Capital expended, 305,600ℓ. An agreement has been made with the Midland, on the follow-ing conditions:—The Midland Company to guarantee to the Kettering Company 17,000ℓ a year as a minimum from 1st January, 1877; the excess of all gross receipts in 1877 and future years beyond 35,000ℓ a year to be divided as follows:— 80 per cent. to the Midland Company, and 20 per cent. to the Kettering Company. All future capital which may be re-quired to be found by the Midland Company. Norwich and Spalding.—There was an available sum of 1,852ℓ, out of which a dividend was declared at the rate of 2 per cent. per annum, carrying forward 152ℓ. During the half-year debenture stock amounting to 29,950ℓ was issued, leaving about 4,500ℓ debentures to be converted. Capital expended, 226,000ℓ.

226.000l.

Peebles.—The sum available was 3,858l, and a dividend has been declared at the rate of  $7\frac{1}{2}$  per cent. per annum, being an increase of a half per cent., as compared with last year. There remains to be paid to the working company 502l, leaving a balance of 56l.

Peterborough, Wisbeach, and Sutton .- At the meeting, a dividend was declared on the preferred shares at the rate of 4 per cent. per annum. Recife and Sun Francisco.—After the proposed payment of an

The receipts for the year ended 30th June were 90,4281, against 89,1891 for the previous year, and the expenditure, exclusive of exchange differences and extra rolling stock, was 50,6021, against 54,1441 in 1874. Capital expended, 1,842,1471

South Wales Mineral.—The net earnings of the line were 2,3041 for the half-year. After payment of interest on borrowed capital and expenses, the suspense account was reduced by 5884. Capital expenses, the suspense account was adverse balance of 22,8404. Tasmanian Main Line

Tasmanian Main Line.—The directors state that considerable delay has been caused in completing the railway by the difficulty of obtaining labour during the harvest and wool clipping seasons, but that the whole of the material has now

clipping seasons, but that the whole of the material has now been landed in the colony, and it is hoped that the line will be completed by the end of this year. *Tottenham and Hampstead Junction.*—The receipts for the half-year were 5,7564, and the sum available was 3,0094, out of which dividends were declared at the rate of 5 per cent. per annum on the No. 1 preference shares, and at the rate of 4 per cent. per annum on the No. 2 preference shares for the half-year, leaving a balance of 884. The debenture capital is being absorbed by the Midland company.

#### BANKS.

Chartered Mercantile of India, London, and China .- The profit for the half-year was 85,115/, out of which an interim dividend at the rate of 8 per cent. per annum is proposed, carrying forward 55,1151.

forward 55,115*l.* New London and Brazilian.—The available balance, including 20,124*l* brought forward, is 51,694*l*. An interim dividend of 5s per share was paid in April, and a further payment is now recommended of 7s per share, making 12s per share, or 6 per cent., leaving 24,694*l*. The recoveries during the year on account of the "Angelica Estate and accounts in realisation" amount to 1,206*l*, reducing the balance of that account to 118,808*l* 118,8081.

#### ASSURANCE COMPANIES.

Maritime Passengers and Mariners Insurance.-The company announce an interim dividend at the rate of 71 per cent. per annum.

annum. MISCELLANEOUS COMPANIES. Army and Navy Co-operative Society.—At the half-yearly meeting, a dividend at the rate of 5 per cent. per annum declared, free of income tax, and 1,000l was written off the building account. During the six months the purchases amounted to 282,552l, the sales to 299,742l, and the value of the stock remaining on hand was 65,673l. Brazilian Submarine Telegraph.—The accounts show a profit for the year ended 30th June sufficient to enable the directors to recommend a final dividend of 2s 6d per share, making with previous distributions 5 per cent. per annum, and carrying

previous distributions 5 per cent. per annum, and carrying 40,000/ to reserve.

40,000l to reserve. Brindley's Steam Slate Works, Limited.—Capital, 20,000l, in 5l shares. It is proposed to acquire, for about 13,000l, the slate and slate enamelling business of the late Joseph Brindley, of Bermondsey wall, Dockhead. Cape of Good Hope Four-and-a-Half per Cent. Debentures.— Tenders have been invited by the Crown Agents for the Colonies for 109,000l Cape of Good Hope Four-and-a-Half per Cent. Debentures, identical with those already known to the market. the market.

City of Melbourne (Victoria) Loans.—The Union Bank of Aus-tralia notify that they are prepared to pay, on 1st proximo, the interest due at that date.

City of Ottawa (Canada) 6 per Cent, Debentures,--Messrs Grant Brothers and Co. receive applications for 62,000l, at the price of 103 per cent. The bonds are redeemable at par in 1895. It is stated that the money is required for local improve-

ments and other municipal purposes. Conservative Land Society.—At the quarterly meeting, it was stated that the rate of interest would be as heretofore—viz., 5 per cent. per annum on shares completed and those paid in

advance, and 4 per cent. on deposits. Crystal Palace District Gas.—The available balance was 8,812!. After payment of preference charges, a dividend was 8,812. After payment of preference charges, a dividend was declared at the rate of 10 per cent. per annum, both preference and ordinary dividends being free of income tax. Capital expended, 205,255*l*, leaving a credit balance of 25,249*l*. Eastern Extension, Australasia, and China Telegraph.—The gross earnings for the half-year were 110,754*l*, and the ex-

gross earnings for the half-year were 110,7544, and the ex-penses, including maintenance of cables, 28,4734, leaving a profit of 82,2804. An interin dividend of  $1\frac{1}{2}$  per cent. has been paid, and it is now proposed to distribute a further one of  $1\frac{1}{2}$  per cent., leaving 22,3554 to be carried forward. The greater portion of the 3,200 debentures authorised to be issued for the cable between Sydney and New Zealand has been taken up, and it is anticipated that the cable will be laid early next war. next year.

next year. East London Waterworks.—The usual dividend of 6 per cent. per annum is recommended for the half-year. Equity Co-operative Society, Limited.—This undertaking is partly a reconstitution of the late Crown Co-operative Society, upon a different basis. The profits, after providing for a reserve fund, are to be returned to members in proportion to the amount of their purchases during the year. French, Belgian, and Dutch Railway Guaranteed Trust.—Appli-cations are invited for 20,000 certificates of 100l each, redeem-able at 125l each, and bearing interest at the rate of 5½ per cent. per annum. The issue price is par. It is mentioned that subscriptions will be invested in the securities of the above-mentioned railways, and not more than one-tenth of the above-mentioned railways, and not more than one-tenth of the amount allotted is to be invested in any one security. The interest is to be guaranteed by an investment in Consols in the names of trustees, such investment to be in proportion to the amount allotted.

the amount allotted. General Shipping and Trading, Limited.—Capital, 120,0001 in 101 shares. It is proposed to purchase, build, sell. and trade in and with steam and sailing ships, and to carry on the business of shipowners. Subscribers of five shares and up-wards, will be guaranteed a minimum dividend of 7 per cent. per annum for three years by the London directors. Globe Telegraph and Trust.—The interim dividends for the quarter ending the 18th inst., will be 3s per share on the preference shares, and 3s per share on the ordinary shares, both payments being at the rate of 6 per cent. per annum per share.

a share

National Freehold Land Society.-The directors have decided to raise the rate of interest on completed shares from 1st November from 31 to 4 per cent.

New Gellivara.—The report states that, for the first time for many years, there is a profit, and the debit balance is thus materially reduced. This change is attributed to the high prices obtained in 1874 for manufactured wood, and the in-creased out-turn of the new mill; and though these prices have since considerably declined, the out-turn, on the other hand, has materially increased.

Phoenix Bessemer Steel, Limited .- The shareholders being anxious that the works shall not pass out of their hands, have authorised the committee to make the unsecured creditors an offer of 12s 6d in the pound.

Price's Patent Candle.—At the meeting, it was stated that the balance in hand was 21,925/, against 10,702/ at the corres-ponding period of last year. A preference dividend was de-clared, and 20,870/ carried forward.

South Metropolitan Gas Light and Coke .- The sum available was 25,260l, and the usual dividend at the rate of 10 per cent, per annum was declared, carrying forward a balance. The price of gas has been maintained at 3s per 1,000 feet. Capital expended, 373,761l, leaving a credit balance of 26,239l. Capital

Submarine Cables Trust.-The coupons due 15th instant will be paid, as usual, by Messrs Glyn, Mills, and Co., on that date.

Surrey Consumers' Gas.—The available balance was 18,624, and the usual dividend of 5 per cent. for the half-year has been declared, carrying forward 7,028. Capital expended, 289,5221.

West India and Panama Telegraph.—At a meeting of the board, it was resolved to recommend the declaration of a divi-dend of 7s 6d per share on account of arrears of dividend on first preference shares.

#### MINING COMPANIES.

Malayan Peninsula (East Indian) Tin Mining, Limited.—At a meeting, it was resolved to wind-up the company voluntarily, and Mr Edward Schubert was appointed liquidator.

Original Hartlepool Colliences .- At a meeting, a resolution ssed on the 17th ult., in favour of increasing the capital by 50,000l was confirmed.

Sierra Buttes Gold Mining .- A dividend of 2s per share, free of income tax, has been declared.

#### COMMERCIAL EPITOME. FRIDAY NIGHT.

Wheat remains steady in price, and in the case of best qualities a rise of 1s per qr is very general. Arrivals from abroad continue good, but the damp weather has reduced the supply of new home-grown, and thrown the demand on the dry and good qualities available. Flour is therefore dearer also. At this particular time there are several influences combining to raise the value of good wheat; it is wanted by millers for mixing with that of inferior condition, the seeding requirements of the autumn also operate in the same direction, and a more permanent cause of scarcity is the larger consumption of better descriptions which always takes place when breadstuffs are cheap. At home and abroad for the last few years, it is also noticed, increased commerce and prosperity have taken consumption rather in the direction of good qualities than of inferior wheat and rye. But all descriptions of grain are at least steady in the market, notwithstanding the recent large arrivals from abroad, and our better crops of feeding stuffs this year. The price of cotton has apparently reached or passed so low a point that a steady upward movement is commencing. The

The price of cotton has apparently reached or passed so low a point that a steady upward movement is commencing. The cessation of war rumours in Europe, the reassuring news from China, and the recovery of credit now noticed in the manufacturing trade, all act in a favourable manner as regards demand, but as regards supply, the "position" of the raw material appears to be an especially strong one, and hence the dearer cotton market. The American crop, which governs and directs the tendency of prices more than any other influence, has been the subject of much attention lately; the figures published by the New York Commercial Chronicle have come to hand, and it becomes probable that stocks in the hands of spinners, as well as the visible supply of American cotton, at the ports and places of storage, have been reduced since last year. What the rate of consumption during the past season has been can hardly be estimated with much accuracy, but it is plain that, with consumption at a sustained rate, the supplies must have been trenched upon. A better state of affairs in the United States manufactures is doubtless to be desired general trade in that great country having continued to suffer from the depression succeeding the panic of 1873; but the improvement this week in the value of cotton has begun from that side, and has, therefore, the more appearance of being steady. Manufacturers of goods this week are reported well under order, but the production of yarns at Manchester is found to be a little excessive at present. The price of wool is described as softening, but growers in the country are firm in their demauds, and staplers reflect their firmness. Business is small in consequence of the general disagreement as to terms, and speculation is cramped

The price of wool is described as softening, but growers in the country are firm in their demands, and staplers reflect their firmness. Business is small in consequence of the general disagreement as to terms, and speculation is cramped by the downward tendency of prices. At the same time a fair amount of trade continues to be done, the worst complaint being that buyers are cautious, and take but small lots suitable to immediate requirements. Yarns in the manufacturing districts continue in steady demand, though business is lately reported quieter at Bradford, Halifax, and Leicester; goods are well bought generally both for home and foreign account. At Bradford, a very fair amount of orders occupy manufacturers; at Leeds and Huddersfield, the mills are running full time, but with poor prospects as yet of continued activity; at Leicester, present occupation is generally good, and prospects quite cheerful.

and prospects quite cheerful. In the iron trade, the general dulness continues, and the exceptionally active branches show indications of falling off as the end of the shipping season approaches. This applies chiefly to pig-iron, the exports of which for the past nine months already show a large increase on those of last year. Indeed, except in the case of railroad material, our export trade in iron on the whole goes on at an improved rate, as compared with 1874. At Middlesboro' this week, the stocks of pig-iron were found to have decreased considerably, and the market became firm, but for finished iron there is little denand, at least of a profitable nature to manufacturers. It is reported that shipbuilders, engineers, and ironfounders are all badly off for work, and cannot see any prospect of improvement. At Newcastle, also, the shipbuilders lack employment. In South Wales, the ironworks are ill engaged, orders being small and unremunerative. At Sheffield, the tendency is in an unfavourable direction as regards amount of business offering, and as in the case of nearly all other iron manufacturing districts, the profits are complained of as small or nothing.

The sugar trade has been but quiet, other kinds than West India attracting few transactions. Coffee has been dull, but is lately firmer in price. Rice rather easier. The tea trade is quieter, but prices remain steady. China silk has been in demand, and continues steady. A fair business of a quiet kind is reported in the oil trade. In foreign metals, tin is easier.

EXTRACTS FROM TRADE CIRCULARS. (From Sir Charles Forbes and Co.'s Circular, dated Bombay, September 3.)—In business generally during the past fortnight there has been extreme inactivity. Exports have shown the same languid character which they have now done for some time. The reports from the districts are generally satisfactory, with the exception of Kutch and Kattiwar, and in some parts of Guzerat, where rain is very much wanted. Locally, the rainfall is still far short of the average. Exchange, &c.—The business transacted during the past fortnight has been very restricted, transactions being still checked by the somewhat uncertain weather prevailing, and vague apprehensions that the recent commercial failures may yet, after all, directly or indirectly, affect the trade of this port. A slight renewal of confidence had indeed set in shortly after the departure of the mail of the 20th ult., but this was subsequently dispelled by the fear that the financial disasters in San Francisco may lead to renewed trouble in England. With Calcutta there has been an average business for the season at slightly finmer rates, while with China the transactions have been very restricted at a trifling decline.

(From Messrs W. Nicol and Co.'s Weekly Overland Circular, dated Bombay, September 9.)—Cotton—The position of holders on the spot is undergoing a change for the worse, for already several cargoes of Bhownugger have arrived from that port, and as the quality of the new supplies is much superior to that of our present stock, the latter must become very much cheaper ere buyers will be induced to deal in it. Notwithstanding the cheerless aspect of prospects ahead, an inquiry is springing up for new Hingunghat, Oomrawuttee, and machine-ginned Broach, at prices very much out of proportion to existing home parities, but reliable dealers are generally indisposed to run the risk of contracting for distant delivery, and consequently few transactions have resulted. Cvop accounts—The rainfall in Bombay for the week aggregates 15 inches, and we learn from our correspondents that it has extended over all the cotton growing districts. A telegram from Wurdah received this morning informs us that the Hingunghat crop has sustained such serious injury that the outturn will be largely reduced, but we are disposed to regard thus statement as somewhat exaggerated, and believe that a spell of sunshine would ropair most of the reported damage. From Broach also we have complaints of excessive rain, but the weather is now becoming more settled, and no damage is likely to result. In all the other districts the rainfall has done good.

(From Mr C. Möller's Freight Circular, dated October 1.)--So far from being able to report any improvement in the freight market, the rates have rather a downward tendency, and it must therefore be expected that now the season has so far advanced, and premiums of insurance are rapidly rising, many ships will have to be laid up, and wait for better times. The Baltic freights have almost been reduced to the carriage of wood goods, as the present state of the corn market will not admit of shipments of grain to any great extent. Owing to the great competition, the rates have been so reduced that they have barely covered the working expenses. From the Mediterranean we have already had several arrivals of new fruit, the first steamer being the London, after a rapid voyage of 12 days 13 hours from Patras, and more may daily be expected. The rates of freights have varied from 42s 6d to 25s, which is below the average of former years. From the Black Sea, the Azoff, and the Danube, the demand for tonnage has been rather limited, and freights low. From Montreal some charters have been effected, but at rates which have left little or no profit. A large number of steamers are still employed in the Iadia trade, but as the competition is getting more and more severe, in consequence of the P. and O. S. N. Co. having brought their ships to London, and are making an effort to monopolise the trade, private owners have many difficulties to contend with.

(From Messrs Page, Draper, and Co.'s Monthly Circular and Price Current of Leather, Hides, &c., dated October 6.)—Contrary to the general expectations, the demand for leather has not been so active during the past month as might have been expected, judging by the experience of the same period of previous years. A steady consumptive trade has prevailed, but not of sufficient amount to absorb the supplies, and stocks of most descriptions have slightly increased. The large supply of American leather continues to excercise an influence upon the sales and prices of light butts of secondary tannages, and some descriptions of dressing leather. The best qualities of heavy English and foreign butts and saddlers' hides sell readily, and maintain previous rates. With these exceptions, the tone of the market is dull, and prices may be quoted somewhat weaker. The raw hide market has been to lower prices in both salted and dry hides. The imports have been considerable, and present stocks of all descriptions are much larger than usual. The excess consists principally of the commoner class of dry hides and the lighter averages of salted, and there does not seem much probability of these entering rapidly into

## THE ECONOMIST.

#### [Oct. 9, 1875.

consumption until a lower range of prices has been reached in

consumption until a lower range of prices has been reached in the price of tanning materials. (From Messrs J. Berger Spence and Co.'s Weekly Chemical Report, dated October 2.)—The recently improved tone of our market is this week fully maintained; and although prices cannot as yet be said to have undergone any material change in makers' favour, a feeling of confidence is gradually becom-ing apparent. Next year's business still receives a large share of attention, and contracts are being rapidly concluded at full rates. A few makers having now disposed of a portion of their production at current rates, are declining further orders at present, preferring to withhold the balance of their make for a few months, in the hope of obtaining better prices.

#### THE COTTON TRADE.

#### LIVERPOOL .- OCTOBER 7.

Cotton is in increased demand, and though holders Cotton is in increased demand, and though holders continue to offer their stocks freely, with an active market quotations are slightly advanced in some descrip-tions. The Bank rate has been raised to-day to  $2\frac{1}{2}$  per cent. In Sea Island the business has been small, at un-changed rates. American has risen  $\frac{1}{16}$ d to  $\frac{1}{3}$ d per lb, but at the advanced quotations the demand is abundantly supplied. Brazilian, although more in request, has been freely offered, and quotations of some kinds are slightly reduced. Egyptian in the earlier part of the week was pressed for sale, but has since become steadier. West Indian and African have been in good demand, at steady prices. Rough Peruvian continues very scarce, but soft is freely offered at previous rates. East Indian has been in increased request, but being freely offered, last week's quotations are resumed.

Indian has been in increased request, but being freely offered, last week's quotations are resumed. In "futures" the business has been unusually extensive during the last few days, at an advance of fully <sup>1</sup>/<sub>8</sub>d per lb. The sales of the week amount to 85,900 bales, of which 5,400 are on speculation, and 14,640 declared for export, leaving 66,460 bales to the trade. Forwarded this week 3,930 bales, of which 1,820 are American, 730 Brazil, 290 Egyptian, and 1,090 bales Sarrat

1,090 bales Surat. Oct. 8.—The sales to-day will probably amount to about 14,000 bales, with a steady market.

In speculation there is an increase of 7,160 bales. The imports this week have amounted to 40,780 bales, and the quantity of American cotton reported at sea for Great Britain (including cable advices to date) is 33,000 bales, against 33,000 bales at the corresponding period last year. The actual exports have been 14,386 bales this week.

LONDON.-OCTOBER 7. Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association :-The market has been quiet during the week, and the moderate business reported, shows hardly any change in prices prices.

# MARKETS IN THE MANUFACTURING DISTRICTS.

MANCHESTER, Oct 7.—The heavy sales of cotton in Liver-pool have for the moment checked the downward movement in prices, and buyers as a rule have been unable to operate so advantageously as was possible a week ago. Still our market shows no signs of improvement, the orders given out being of no individual importance. Medium counts of home-trade yarns have met with more inquiry, but for fine and coarse numbers the trade concluded is extremely small. In export yarns the demand is also very moderate; in all quarters goods have been in less active request. For shirtings and other Eastern staples the demand has slackened, though values remain quite firm. Printing cloths continue to be freely offered, quotations, however, are not nominally lower. To-day the enhanced rates required materially limit business, bnyers generally declining to pay any increase on previous prices. The advance in the Bank rate to two and a-half per prices. cent. has had no perceptible influence on the course of trade in this district.

BRADFORD.-Business has been very inanimate during the week. Small purchases of wool have been made by some to cover urgent requirements, but most spinners are well supplied with wool, and keep out of the market. The yarn market is without material alteration. Spinners in most cases are rather better to deal with.

rather better to deal with. WOLVERHAMPTON.—There was an unusually large attend-ance of ironmasters in anticipation of the quarterly meetings next week. The pig-iron market was strong on the advance of 2s 6d reported last week. Finished iron firm. BIRMINGHAM.—On 'Change there was only a limited busi-ness doing. Buyers somewhat anyiously discussed the pro-

BIRMINGHAM.—On 'Change there was only a limited busi-ness doing. Buyers somewhat anxiously discussed the pro-babilities of an alteration in prices at the quarterly meetings next week. The prices of coal at Lord Dudley's collieries have been advanced Is per ton, and 6d per ton for the better and common descriptions respectively. It is not inferred from that, however, that any actual rise in the price of coal will follow. Bates of pig-iron were a shade firmer than a week ago. A better demand for hoops, strips, and other specialities is reported from the Dudley side of the district. Sheets are still in very fair request, and rates are steady. The wages question in the coal trade is still somewhat agitated.

#### CORN.

#### AMERICAN GRAIN AND FLOUR MARKETS. NEW YORK-Sept. 24.

There has been a moderate demand for flour the past week, There has been a moderate demand for hour the past week, but at drooping prices, except for a few styles of favourite grades, of which low shipping extras and Minnesota patents from old wheat are the most conspicuous. The market has also been unsettled by the pressure to sell so-called family brands of new winter wheat, which are found by the inspectors to be unsound. These flours have been pressed on the market at \$5.50 to \$6.50, or a dollar a barrel under their value if in good condition. It is probable that we shall have a good deal of this condition. It is probable that we shall have a good deal of this unsound flour. At the close the tone was less depressed. The wheat market declined steadily until Wednesday. But yesterday, with an important failure reported in the export trade, the whole of Wednesday's improvement was lost. The demand has not been active, whether for export or home use, but prices have received some support from Western speculators. To-day there was a stronger market, but a very limited business.

#### LONDON MARKETS.

#### STATE OF THE CORN TRADE FOR THE WEEK. MARK LANE, FRIDAY EVENING.

MARK LANE, FEIDAY EVENING. The improvement in the wheat trade noticed last week has made further progress, and prices in the leading markets of the kingdom have again advanced ls to 2s per qr, but after increased activity for a time, the demand at the close is quieter, and the tone more subdued. At Mark lane to-day, the advance was not, in all cases, sustained for foreign wheats, of

THE ECONOMIST.

which the supplies on offer have somewhat accumulated, and on the current transactions the rates scarcely differ from those of Friday last. Saxonka being quoted 49s, Southern Russian 44s to 47s, American Spring 47s to 51s. With English wheat the market continues to be scantily supplied, and farmers deliveries, for the kingdom, according to official returns, whilst showing some further increase, are still much under the average of provide according to the scanter of returns, whilst snowing some further increase, are still much under the average of previous seasons. The average price of wheat is, at the same time, lower than last year, which may be accounted for by the inferior quality of the larger portion of this year's crop. The floating cargo trade has been quiet during the week, yet on the whole, firm. Flour has sold rather more freely, and stiffer prices have occasionally been obtained, especially for American, the further advance at New York, advised early in the week, giving support to our market. Eng-lish barley is sent forward much more sparingly this season than last, and good malting qualities, which comprise but a very moderate proportion of present supplies, are very firm, 1s per qr more having, in many cases, been rea-lised. Common qualities do not sell so well. French malting descriptions are also fully entried but for forming in dis descriptions are also fully sustained, but for foreign grinding barley the market is still dull on the spot, whilst cargoes on passage, or for forward shipments, are more freely offered, and on easier terms. Of foreign beans, supplies have fallen off, on easier terms. Of foreign beans, supplies have fallen off, and with a steady demand prices have again advanced is per qr, the few English selling at firmer rates. Peas have meta steady moderate sale, late quotations being very fully supported. The maize trade in the principal markets has been firm; and at Mark lane, where arrivals have somewhat diminished, prices have ruled in favour of sellers. Oats have scarcely varied during the week, supply being only moderate, and the demand quiet. At the close to-day, however, the tendency of the market was rather towards easier rates.

#### COLONIAL AND FOREIGN PRODUCE MARKETS. TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAT'S MARKETS HE POSTSCRIPT. MINCING LANE, FRIDAY MORNING.

SUGAR.—There has not been any change in the market this week and the demand is steady, especially for refining sorts. Several floating cargoes have been bought for ports in the United Kingdom, including two of British West India at former rates. The total sales of these descriptions on the spot amount to 3,508 casks, including various parcels by auction. Brown to grey refining sorts, 18s to 21s; Barbadoes, 20s to 22s. 1,207 bags crystalised Berbice and Demarara sold at 25s to 26s, being very firmer prices. Low brown sorts sell rather slowly. Beet crystals on the spot sold at some reduction in prize. The refined market does not present any new feature of interest. Landings of sugar last week were less than the quantity delivered, leaving the stock in a further deficiency, and about 20,000 tons under the average of the four preceding years at same date. Interest and DELIVERIES of SUGAR into LOWDON to Oct. 2, with STOCKS on hand. SUGAR .- There has not been any change in the market this week

S

## THE ECONOMIST.

[Oct. 9, 1875.

Fine grades remain quiet. Common, steady at 10<sup>1</sup>/<sub>2</sub>d to 11<sup>1</sup>/<sub>2</sub>d. Scented tens irregular in price, Pekoe being rather cheaper. Capers firm at the late advance. Public sales have been smill, viz., 7,500 packages, and went off without alteration in prices. In green teas, gunpowders show more steadiness. The public sales of Indian tea have been large, catalogues comprising about 11,000 packages. A good demand has prevailed, and in most cases at steady prices. Deliveries continue large, but the stock in the United Kingdom on the 1st inst. was 86,500,000 lbs, against 74,000,000 lbs last year. The former figures did not include a large quantity landing. COFFEE.—The market has been without activity, and prices occa-

COFFEE.—The market has been without activity, and prices occa-sionally rather favourable to the buyers. At the public sales this week 661 casks 55 barrels 258 bags plantation Ceylon all sold : low dingy to 661 casks 55 barrels 258 bags plantation Ceylon all sold : low dingy to middling grey, 105a to 112s; bold, 113s to 115s; colory, 112s to 114s; good to fine bold, 115a to 118s 6d; small berry in proportion. 108 bags native sold at steady prices: good ordinary, 98s to 98s 6d; beld, 105s. 793 cases East India, chiefly Naidootatum, were with-drawn above the value. 898 bags East India principally consisted of small lots, including Corg, at 108s 6d to 112s 6d; Mysore, 110s to 112s. 608 packages Mocha were chiefly taken in above the value. A portion sold at 110s to 113s for mixed to good yellowish small berry. 1,227 bags foreign withdrawn. The stock in Holland and the quantity affocat amount at latest date to 691,100 bags, against 557,000 bags last year, an increase of 134,000 bags. Latest telegram from Rio reports a quiet market.

NITRATE OF SODA .- A cargo off the coast has sold at 11s 5d per cwt. COCHINEAL. — There has been some inquiry since the last week's sales, and business done, chiefly in Mexican, at 1s 74d per lb. INDIGO. — This morning the quantity advertised for sale was 9,225

chests. In October last year the sale comprised 12,850 chests.

chests. In October last year the sale comprised 12,850 chests. OTHER DEVELTERY GOODS.—No change to report in 'gambia on the spot, but a small parcel near at hand has sold at 27s ex subp. Cutch is quist. 111 bales Bengal safflower by auction chiefly sold at 3/ 17s 6d to 4/ 15s; old and wormy, 1/ 12s 6d to 3/. 335 bags Bengal turmeric were taken in at 26s. Several parcels of Myrabolanes sold at 11s to 16s. SHELLAC.—743 chests partly sold at 2s 6d to 5s decline on most de-scriptions. A C garnet, 6l to 6l 2s 6d; second ora ge, 6l 17s 6d to 7l 7s 6d; fine native orange, 8l 17s 6d to 9l; good liver, 8l 10s per cwt. METALS.—The general tendency to improvement noted last week has not continued, and the markets are now rather quiet, with quotations somewhat weaks of the on Friday the 2nd inst. Sales have been made in

not continued, and the markets are now rather quiet, with quotations somewhat weaker than on Friday, the 2nd inst. Sales have been made in copper. Chili bars now quoted steady, at 82/10s to 82/15s for good ordi-nary brands. Burra has realised 89/ to 90/. British unchanged. Tin has been sold to a moderate extent, at a reauction of about 1/10s; Straits, been sold to a moderate extent, at a reduction of about 1/ 10s; Straits, 851; November, 841; Australian, 831 to 834 10s per ton cash. The market in Holland has been quiet since the sale. The demand for lead is less active than of late. In the iron trade, a want of activity prevails. South pig has sold to a fair extent, but at a rather heavy decline. The latest business at 62s 9d cash. Rails quoted 6l 15s to 7l per ton at the works. Quicksilver higher, viz., 14l 14s per bottle. Spelter steady. At auction, 120 tons sheet zinc rolled at the London mills, went at 28l 15s to 29l per ton.

HEMP.—There has not been any improvement in the demand for Man la. 260 bales Italian, by auction, were withdrawn. 10 tons sound Konigsberg sold at 32/ per ton. JUTE.—Although the market is quiet, a fair amount of business has

JUTE.—Altheugh the market is quiet, a fair amount of business has been done during the week, including several rather large parcels for arrival at a range of 10/ 10s to 15/ 12s 6d. A moderate quantity also sold on the spot, but 9,488 bales by auction went off flatly, about 8,000 bales being withdrawn. Some marks of the new crop sold at 15/ to 18/ per ton. No change in the state of trade in Dundee. HIDES.—At yesterday's sales of East India 119,332 hides were offered. The demand generally rather slow, and about 66,000 sold, prices without material alteration. 8,980 buffalo hides sold at previous vates. Singapore being rather firmer.

Singapore being rather firmer.

LINSEED.-A steady business has been done in Calcutta seed at lowe rates. Quotations on the spot, 48s to 48s 3d. Several contracts have been made to arrive at 49s 3d to 50s 3d, according to date of shipment. Bombay is worth about 49s; Azov seed to arrive, 50s per qr for the United Kingdom. SPIRITS TURPENTINE.—American rather dearer, and a good business

SPIRITS TURPENTINE.—American rather dearer, and a good business done this week. On the spot, 24s 3d; next two months, 24s 3d; January to April, 25s per cwt.

to April, 25s per cwt. PHEROLEUM OIL dull at 9<sup>1</sup>/<sub>2</sub>d to 9<sup>4</sup>/<sub>2</sub>d per gallon. OILS.—Olive steady. Gioja, 47l to 47l 10s; Tunis, 43l 10s, with limited sales. Sperm oil is almost nominal at 93l. Pale southern quoted 34l 10s; pale seal, 33l per tun. Linseed at one time sold at rather under 24l, but soon recovered, with a better demand; present quotations, 24l 5s to 24l 10s; October to December, 24l 10s; January to April, 24l 10s to 24l 15s. English brown rape firm; on the spot, 32l 10s to 32l 15s; next two months, 5s more; and January to April, 33l to 33l 10s; refined, 34l 10s to 35l. Advanced rates have been paid for coccoa-nut: Ceylon, 39l to 39l 5s; a large business for arrival at 38l 10s to 39l. Cochin, 40l to 42l on the spot. The stock of coccoa-nut oil is smaller than of late years. Palm firm, at the late advance. Fine Lagos, 40l per tun. Fine Lagos, 401 per tun.

TALLOW.—Imported descriptions have been firm, and home-make is again higher. New, Petersburg, 53s; October to December, 53s to 53s 6d; 1874 brack, 51s; 1873, 50s per cwt.

POSTSCRIPT. FRIDA! EVENING.

SUGAR.—The West India market closes without further alteration. Including the parcels by auction 1,163 casks sold, making 4,711 casks for the week. 3,058 bags Mauritius part sold: brown, 16s 6d to 18s; soft yellow, 19s 6d to 20s. 646 bags Bengal part sold at 175 6d for out how, 19s 6d to 20s. 646 bags Bengal part sold at to 18s; soft yellow, 19s 6d to 20s. 646 bags Bengal part sold at 17s 6d for soft brown. 1,705 bags Egyptian were taken in. Several parcela West India in bags sold. Barbadoes, low grainy yellow, 20s 6d; Trinidad usine, yellow at 24s to 25s; crystallised sorts, 24s 6d to 27s. Privately, 500 casks Honduras sold at 18s 6d to 20s. A cargo of Trinidad sugar at 18s 9d; one of Havana, about No. 16, at 24s for the United Kingdom.

COFFEE .--- 381 casks 42 barrels 160 bags plantation Ceylon sold at steady rates. 400 bags native, good ordinary. 97s 6d to 98s; bold, 104s 6d to 105s. 199 bags Singapore sold at 91s 6d. 130 half-bales Mocha withdrawn. 739 bags Gautimala realised 100s to 106s 6d.

RICE .- To-day a cargo of Bassein at 7s 6d ; one of Rangoon at about 7s 93d for the continent.

METALS.—Straits tin, 84/ to 85/; Australian 82/ to 83/; Scotch pig on, 628 6d to 628 9d per ton cash.

OILS.-520 packages cocoa-nut, by auction, went as follows : Ceylon, 10 to 391 5s; Cochin, 421 5s. Part of the latter bought in. 61

OILS. -520 packages cocoa-nut, by alerton, went as tone at the second state of the latter bought in. 61 38/ 10s to 39/ 5s; Cochin, 42/ 5s. Part of the latter bought in. 61 casks palm sold at 40/ for Lagos. TALLOW. - The public sales comprised 816 casks Australian, which all sold at high rates: Fine mutton up to 50s and 51s 6d; beef, to 48s 9d; one lot, 49s 6d. 198 casks South American part sold at 47s 6d to 49s 6d. Town up 2s 3d, viz., 52s 6d per cwt.

#### ADDITIONAL NOTICES.

TEA.-No change to report. The market remains dull but firm. Day FRUIT.-A decided improvement i currants has taken place this week, both in demand and prices. Telegrams from Patras state that the crop will be about 6,000 tons less than the first estimate, and holders are advised to be very firm. At sale on Wednesday, Valencias were firm at late rates, 34s being paid for ordinary off stalk, and fine fruit in good condition commanded high prices. Sultanas show an upward tendency, and large sales have been effected. ENCLISH WooL-Trade exceedingly flat but prices about the same.

ward tendency, and large sales have been effected. ENGLISH WOOL.-Trade exceedingly flat but prices about the same. COLONIAL WOOL.-Market very quiet, without change. SEEDS.-There is but little business doing in seeds, at about late

FLAX without alteration.

FLAX without alteration. HEMP.—Russian clean remains firm, with few sellers. Manila is dull, with very few sales making. TOBACCO. — There is no change to report in the market for American tobacco, and the transactions continue upon a limited scale only. Home buyers are as little inclined to hold stock, and only took such as they need for their present requirements. Exporters are compelled to limit their operations owing to the ex remely limited stock in the market. For substitutes there is a brisk demand, and suitable descriptions find a ready sale at rather higher prices; shipments would now come to a ready market. Segar tobacco is also inquired after. METALS.—The market has held a pretty uniform course, and a moderate amount of business has been done. Copper has been dealt in daily, and values have further stiffened. Ir.n is unchanged in demand,

#### -----

but prices keep steady. Tin, after recovering rapidly last week, has this week receded somewhat; the demand is pretty good, and the general position rather favourable. Spelter is a trifle easier, and the same may be aid of lead. Tin plates have been in demand, and in some cases a shilling a box advance obtained.

METROPOLITAN CATTLE MARKET. MONDAT, Oct. 4.—The total imports of foreign stock into London last week amounted to 23,052 head. In the corresponding week in last year we received 12,262; in 1873, 12,769; in 1872, 22,768; and in 1871, 17,580 head.

### Rebiews.

BRITISH METRIC ARITHMETIC. By ISAAC GREGORY, F.R.G.S. London: Cassell, Petter, and Galpin.

THIS is not the first book in which Mr Gregory has sought to disseminate bis views on our system of weights and measures. He has, in fact, elaborated one of his own in a former work, known as "Gregory's British Metric System." to which this is but a supplement. The plan here laid down is simple, though bold, the radical changes necessary to adjust our own quaint methods of calculation to the metae basis being softened down with much ingenuity. Most readers will, on opening the book, soon perceive the alarming proposal to alter our standard inch, making it a fraction smaller, and will be apt to condemn the whole thing immediately; but the evident care with which Mr Gregory has tried to adapt his system to the wants of the mass of the people entitle it to careful consideration. Though we find that 40 inches are to make a meter, instead of the 39 and a fraction, which are equivalent to the French measure of that name, though the gallon is to measure one-tenth larger than the present gallon, the pound one-tenth heavier, and so on; yet the advantages of making these changes are so well displayed that the work is interesting for its ingenuity, as well as useful for its practical value in attracting discussion to the subject.

### ULTIMA THULE; or, A SUMMER IN ICELAND. By RICHARD T. BURTON. London . and Edinburgh : William P. Nimmo.

MR BURTON, a clever writer and an accomplished traveller, has turned his attention to this country of "nothing but bogs, rocks, and precipices; precipices, rocks, and bogs, ice, snow, lava; lava, snow, ice; rivers and torrents; torrents and rivers" with an apparent enthusiasm which invests the place with adventitious interest. On the subject it will no doubt be the standard work for a long time without much danger of being supplanted, unless the book itself increase the interest felt in the bare and ice-bound region to the extent of stimulating the issue of a Baedeker's Guide or Cook's tickets. The care bestowed on the collection of facts explains the great length of the work, which the agreeable style and method of writing will fully excuse. Well illustrated with maps, views, and sketches, it contains much detail impossible to summarise ; many matter-of-fact directions perhaps more useful to the tourist than of interest to the far-off reader; and minutize of

statistics which cannot be said to be of general value. Iceland, a wretched country, with an uninteresting population, it is yet on the whole so admirably described by Mr Burton that his book cannot fail to be generally acceptable, notwithstanding its special adaptation to the wants of the traveller and geographer.

Total quantity of coal conveyed beyond limits of coal duty district during Sept, 1875 Ditto, Sept., 1874	155,974 134,621
COMPARATIVE STATEMENT, 1874 and 1875.	
Total distribution of coal from Jan. 1 to Sept. 30, 1875 Total distribution of coal from Jan. 1 to Sept. 30, 1874	1,307,834 1,218,902
Increase in the present year	89,032
GENERAL STATEMENT, 1874 and 1875.	
Increase in coals imported by sea during the present year	
Deduct increase in coals exported	

The following is a monthly resume of trade despatched to Australia, and dated 31st July :- A want of confidence still prevails in commercial circles, and the effects are seriously manifested, not only in the prices of commodities generally, but especially as regards the value of money. It is gratifying no important reflection of these disasters has yet been shown in Australian circles. It should be carefully noted, however, that nearly all the houses which have collapsed have been trading upon English capital to conduct Indian or foreign trade; that the losses by banks arise from an attempt to participate in profits where money is either scarce or dear, and that, had exchange operations been allowed their legitimate functions, business would have been differently transacted, and subject to such regulations as would have rendered any attempt of fraud not only more difficult, but sooner detected, if not frustrated. Produce markets .- The reduction in price of wool is id to Id per lb, and it is anticipated this depreciation will be fully confirmed when the August sales are commenced. Although very few sales of copper have been effected, prices have fallen about 3/ per ton. There have been severe fluctuations in wheat, caused by adverse weather destroying, more or less, the crops in many parts of the country, as the market is in the most critical condition.

The Report on Railways in India, by Mr Juland Danvers, contains the following statements with reference to their condition in 1874 :---"An addition of 558 miles was made to the 5,715 which were open at the beginning of the year, extending the length of railway now open in India to 6.273 miles. Of these 727 are double and 5.546 single : 5.686 are constructed on the 5 ft 6 in gauge and 587 on the metre gauge. The additions which have been made to this list since the last report was issued are-(1) the line from Rangoon to Prome, in British Burmah, which your Lordship sanctioned in October last, after being satisfied that the expectations of its 'direct remunerativeness' were completely borne out' by the statistics of trade and traffic which were forthcoming; and (2) the line extending north from Indore to Neemuch and Ajmere to join the railway there from Agra and Delhi. The part that railways played in the great event of the year must not be passed by in silence. The daily despatches from Howrah averaged 2,200 tons. The total qualities delivered by the railways were 306,697 tons of grain, 440,886 tons of rice, and 95,113 tons of pulses, of which 616,993 tons were conveyed by the East Indian Railway from Calcutta, 170,490 by the Scinde, Punjab, and Delhi Railway from the North-West, and 53,370 by the Great Indian Peninsula from the Central Provinces. It is estimated that about 80,000 were also carried by the Eastern Bengal Railway. The rest came from Oude and Rohilkund and from Rajpoo-Of the whole 842,696 tons, 479,696 were purchased by Governtana. ment, and 363,000 by private traders. It also appears that of the total number of shareholders at the end of last year, as many as 56,797 resided in England, and only 864 in India."

The Bulletin of the American Iron and Steel Association gives the details of the product of iron, including all kinds, in the United States during the year 1874, and the following are extracts from this report. The tons named are all of 2,000 lbs :--

1873.		1874	
2,868,278	********	2,689,413	
1,076,368		1.110,147	
129,015		144.044	
761,062		654.460	
- 9,430		6,739	
		31.635	
32,786	*********	34,128	
3,500		7.000	
13,714	*********	6.353	
		61,670	
4,024,704		4,912,180	
	1,076,368 129,015 761,062 9,430 27,985 32,786 3,500 13,714 62,584	2,668,278 1,076,368 129,015 9,430 27,985 32,786 3,500 13,714 62,564	2,668,278         2,698,413           1,076,368         1,110,147           129,015         144,944           761,062         544,669           9,430         6,739           27,985         31,635           32,766         34,129           3,500         7,000           13,714         63,531           62,664         61,670

From the above summary two inferences are drawn. First, the country produced in 1874 much more iron and steel, from pig iron to the finished product, than any person familiar with the trade has ever imagined. Of pig iron it produced only 178,865 net tons less than in 1873. Of all rolled iron rails included, only 126,885 net tons less than in 1873, and of rolled iron, excluding rails, actually 33,779 net tons more than in 1873. Second, the ability of the country to consume iron and steel since the occurrence of the panic, is greater than has been generally recognised; otherwise, so much of these products would not have been made.

The inflationist tendencies now apparent in the United States are singular enough at a time when trade in that country is too dull to require all the paper money in circulation, but additionally singular when it is found that the latter is now larger than ever. The premium on gold has widened the distance which separates the value of that metal from paper currency, and nothing could show more clearly that not more but less paper is really wanted. It is true that the lower the greenback falls the more currency is necessary to carry on the same amount of transactions; but the fact remains that there is more paper money available this year in America than was ever the case before. The following furnishes particulars for years which preceded the civil war, and up to the present, the account not, however, including the 3 per cent. certificates, which increased the inflation for a time after the

The American grain harvest has been much damaged by floods, but it appears there are yet large stocks in the country available for export Messrs McCulloch and Co's circular, dated New York, August 11th, states that :—"From the best accounts it appears that the wheat crop has suffered very severely. It would, perhaps, be a strictly moderate estimate to reckon that 30 per cent. of the erop of wheat in a large section has been either totally destroyed or rendered unmarketable, and of the portion that is saved a considerable percentage will be of poor condition. As a set-off against this misfortune, however, the farmers of the injured region hold over an amount of last year's wheat probably double in quantity that which has been destroyed. The maize crop has suffered much less than the wheat. In the flooded valleys, where the plant was entirely submerged, the crop is almost wholly lost; but otherwise the wet has done little injury to this grain, but has rather helped its growth. The oat crop has also been considerably damaged. Upon the whole, however, the rains cannot be ranked as a national calamity. While they have inflicted heavy disasters in many quarters, yet they have fallen upon the most prosperous of our farmers, who will not very seriously feel their losses, and, considering the large surplus carried over from the crop of 1874, they will leave us with almost an average supply of wheat and maize for export, provided prices abroad should be high enough to tempt farmers to part with their hoards—a condition on which much may depend, as the losses sustained at the West have produced there a very deep impression in favour of high prices."

According to an official statement of the production of the precious motals in the United States, the gold yield is gradually declining, while that of silver increases. The 25 years from 1849 (the first year of a gold yield in California) to 1873 are embraced in the statement. During this period the annual average gold yield was \$50,800,000; while the annual average yield of silver from 1859 to 1873 was \$13,300,000. The highest gold production was between 1852 and 1856, when it exceeded 70 millions a year. The highest annual silver production was in 1873, \$35,750,000. With the exception of one year, the gold yield has steadily declined since 1856, while the silver yield has as steadily increased since 1859. In 1873 the production of the one about equalled that of the other.

LONDON :--Printed and Published for the Proprietors by THOMAS HARFER MERSONE, of 340 Strand, at the Economist Office, 340 Strand, in the Parish of St Mary-le-Strand, County of Middlesex.--Saturday, October 9, 1875.
