## INDEX TO VOLUME 112

July 1 to December 31, 1921

### EXPLANATORY NOTE

Illustrated articles are denoted by an asterisk (\*); book notices and technical papers by a dagger (†).

This index is made comprehensive but concise. Pains are taken to bring together matter belonging to same subject so that when a reader looks up an article he will be cited to related data. Series of simple page numbers following names of mines or companies usually refer to news notes. With a major entry or series of entries may be placed several minor ones, relating to the same subject in order that its history may be followed. If the author's name be known it is the simplest means of reference. Productions are indexed under names of metals and countries or states. The mere juxtaposition of a mineral and geographical name usually signifies an output but may cover other statistical or news matter.

Table showing the index of page numbers by date for each month from July to December 1921.

### A

Alphabetical index starting with 'A', listing authors and subjects such as Abbe, C. Jr., Abbot, C. E., and various mining topics.

Continuation of alphabetical index, listing subjects and authors like Algerian phosphate industry, Algonquin Co., B. C., and various mining companies.

Continuation of alphabetical index, listing subjects and authors like Anderson, H. G. S., Andes, Aragon, and various industrial and mining topics.

403745

Table listing various mining and engineering topics with page numbers, such as Carson Hill, Cal.—Gold Mining (Young) 112, 177; Cascade Silver M. & M. Co., Mont. 311, 1048; and various technical articles.

Table listing various mining and engineering topics with page numbers, such as Cobalt-Durango 172; Colorado Fuel & Iron Co., Colo. 474, 912; and various technical articles.

Table listing various mining and engineering topics with page numbers, such as Copper-Continued 359; Corrosion 786; and various technical articles.
