ESTABLISHED 1834

Spring, 1936

IN PRESENTING our Garden Annual, we again thank our many patrons for their continued support, and in doing so we feel confident that we can guarantee the same high quality in seeds and bulbs that has proven so satisfactory for more than a century. You are cordially invited to visit our new store and warehouse at 130 Broad Street, conveniently located near Rowes Wharf and Atlantic Ave., where you can always be sure of courteous treatment and reliable information pertaining to horticulture.

Suggestions for Ordering

ORDER EARLY—We suggest that customers send us their orders as soon as possible after receiving this catalog, and avoid the rush of the planting season.

ADDRESS, ETC.—Give name of your **post office, county** and **state**, sign your name plainly; also specify means of conveyance preferred—whether by parcel post express or freight.

FREE DELIVERY—We will send by parcel post, to any part of the United States, all Vegetable and Flower Seeds quoted in this catalog at packet, ounce and quarter-pound rates free of expense to the purchaser. All heavy seeds, including Peas, Beans, Corn, Clover Seed, Seed Grain, Roots, etc. are quoted at net prices at our store. Purchasers desiring these by mail, are requested to remit an additional amount sufficient to cover postage at parcel post rates according to zone. Allow two pounds in weight for each quart of Peas, Beans, or Corn.

SHIPPING—We deliver free to Express, Railroad or Boat. All goods travel at the buyer's risk, our responsibility ceases when we take the carrier's receipt. If goods are damaged, so sign for them and enter claim with the carrier **at once**.

BAGS and PACKING—No charge is made for boxes or packing on anything, except **Flower Pots**,

Nursery Stock and Hotbed Sash, and this at cost only. **Cloth bags** are charged for at cost and if returned in good condition charges prepaid, will be credited at prices charged.

REMITTANCES—May be made by Express Money Order, P. O. Money Order or Bank Draft. If stamps or cash, send in a Registered Letter. Parties having no account with us—who order goods without remittance—must furnish satisfactory references.

PRICES—All prices are net without discount and **subject to change without notice**.

TERMS ARE NET CASH—All bills on which short credits are allowed are due the first of the month succeeding the date of the purchase.

ESTATE SUPERINTENDENTS, GARDENERS and FARMERS—We have at all times the names of practical gardeners and farm managers in want of positions. If parties desiring such will write us, we shall be glad to put them in communication with men whom we deem suitable. To aid us in making a selection we ask full particulars. We make no charge for this service.

☛ We give no warranty, expressed or implied, as to quality, description, productiveness, or any other matter of any Seeds, Bulbs or Plants we send out, and will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms, they must at once be returned.

Novelties and Specialties in Vegetable Seeds

BEET

Perfect Model Globe (Kelway's)

A very fine selection of Globe Beet; very small top, with scarcely any leaf. Fine rich color. The flesh is very rich in flavor compared with ordinary kinds. Pkt. 15c., oz. 40c., ¼ lb. \$1.00, lb. \$3.50.

BEET, Hovey's Red Ball

This is one of the earliest of the small table beets for outside culture. It has small leaves, is flat to globe in shape. Bright red skin. Vermillion red flesh with distinct zones of a lighter red. It is of excellent quality, being sweet, tender and free from fibrous roots. Pkt. 10c., oz. 30c., ¼ lb. 85c., lb. \$3.00.

BROCCOLI

Italian Green Sprouting

A distinct type of Broccoli with a delicious flavor, without the strong Cauliflower taste. It forms a small head with a branching habit, which are a dark green color from September until severe weather in December. Pkt. 25c., oz. \$1.50.

CARROT, Golden Ball

A most distinct and small early variety, specially adapted for forcing and frame work. The roots are almost as round as a turnip, flavor excellent and melting. Pkt. 10c., oz. 50c., ¼ lb. \$1.75.

CARROT, Hutchinson Danvers

Hutchinson's Strain is from 2 to 3 inches longer than Danvers, and holds its "fullness" well down to the tip. It will be noted that it is a blunt pointed carrot always. In color slightly darker than the Danvers. Yield enormous. Pkt. 10c., oz. 35c., ¼ lb. \$1.25.

CAULIFLOWER

Hovey's Supreme Snowball

The finest strain procurable of this extra early and most popular sort. Produces large, fine-grained, pure white heads. Suitable either for early or late crops. Pkt. 25c., oz. \$5.00.

CAULIFLOWER, HOVEY'S SUPREME SNOWBALL

CORN, SWEET

Hovey's Golden Sugar

In our estimation it is the best Early Sweet Corn, as early as Golden Bantam, with ears almost double the size. Very prolific, of delicious flavor. Lb. 35c., 2 lbs. 60c., 12 lbs. \$3.75.

CUCUMBER, Hovey's Leader

An excellent long, slender, dark green variety equally desirable for greenhouse forcing or outdoor culture. An ideal type for the private garden or as a "straight pack" variety for shipment to market. 12 to 14 inches long, by 2½ inches in diameter. Pkt. 35c., oz. \$2.50.

LEEK, Kelway's Prodigy

This has been tried side by side with all the "best" advertised sorts and has proved the finest of all and the hardiest of any. Specimens have been grown weighing upwards of 4 lbs. each. Pkt. 25c., oz. \$1.00, ¼ lb. \$3.50.

LETTUCE, Hovey's Longstanding

This crisp and curly heading variety stands the longest before going to seed, large compact heads which are white inside. Pkt. 25c., oz. 60c., ¼ lb. \$2.00.

MELON, Forcing Cotting's Hybrid

A greenhouse Melon, raised by Joseph Madden of Manchester, Mass. Flesh orange, oval-shaped, carries three to four melons to plant, weight 5 to 6 lbs. each. Pkt. 50c.

ONION, Ailsa Craig Selected

The stock we offer is absolutely the very best selection of this celebrated Onion that we have seen. The greatest care has been exercised in order to secure uniform shape and size. Pkt. 25c., oz. \$1.00.

ONION, Gigantic Gibraltar

A handsome straw-colored Onion of enormous size, possessed of many sterling qualities. Grand for exhibition. Pkt. 25c., oz. \$1.00.

PARSNIP, Dobbie's Selected

A superb Parsnip for exhibition or table use. We are confident this highly selected strain cannot be surpassed either for size or flavor. Pkt. 10c., oz. 35c., ¼ lb. \$1.25.

PARSLEY, Hovey's Exhibition

This Parsley is remarkable for its large fine leaves and close habit. The seed offered has been saved from selected plants only. Pkt. 25c., oz. 75c., ¼ lb. \$2.00.

PEAS, Admiral Beatty

A new and very popular variety, highly productive and of excellent quality. Pods large, green and produced in pairs. Height, 4 ft. Stock imported. Lb. 40c., 2 lbs. 75c.

PEAS, Quite Content, Carter

The largest and finest podded Pea in cultivation. A main crop variety; grows 5 feet high; foliage and pod deep green; pods 6 to 7 inches long, hanging mostly in pairs; ten to twelve peas in a pod. Flavor superb. Stock imported. Lb. 45c., 2 lbs. 85c.

SPINACH, Princess Juliana

An improved variety of Long Standing Spinach, of vigorous growth, leaves dark green, crumpled, rounded, growing in dense compact rosette with a glossy and most attractive appearance. Oz. 15c., ¼ lb. 30c., lb. \$1.00.

SQUASH, Des Moines

It is a small, dark green, acorn-shaped Squash, almost black in color, with deep ridges, hard shell, dry meat, small seed cavity, usually about 6 inches long and 4 inches in diameter. When fully matured it is an excellent keeper, therefore one of the best for home garden. Pkt. 10c., oz. 25c., ¼ lb. 75c.

TOMATO, Sunrise (Carter's)

The finest Tomato for indoor or outdoor cultivation (True Stock). Pkt. 25c., oz. \$1.50.

ASTER

Wilt Resistant Golden Sheaf

Golden Sheaf, the deepest yellow Aster yet offered, and the only one that is wilt resistant. The flowers are fully double, with an attractive crest-like center, of good substance and fine depth of petal. It has all the characteristics of the Aurora type of Aster so popular now with florists. The flowers last well when cut, and are excellent shippers. Pkt. 25c. 1/8 oz. \$1.25.

CALENDULA, Double Art Shades

Art Shades contains many tones and shades not previously obtainable—delicate apricots, beautiful picotees, orange shades, cream tones—in fact, every conceivable tint from almost pure white through cream and buff to yellow and deep orange. Pkt. 25c.

CANTERBURY-BELLS New Annual

Many years of careful selection have at last given us an Annual Canterbury-bell which blooms from seed in less than six months. It should now be possible to have this beautiful flower in bloom at almost any time of the year. The plant grows from two to two and a half feet tall, each plant having from six to eight spikes of blooms.

MARIGOLD, DIXIE SUNSHINE

CHEIRANTHUS Allioni Golden Bedder

No plant has attained so quick or so certain a place in the garden as Cheiranthus Allioni. Golden Bedder is assured an equal popularity for it has all the attributes of the original Siberian Wallflower. The color is deep golden yellow, and the individual flowers are as large in size as our re-selected strain of Allioni. It is sweetly scented, long-lasting in flower and it may be sown in late Summer, Autumn, or early Spring. Pkt. 25c.

CHRYSANTHEMUM CASCADE Japanese Mountain Mixed

A new race of half hardy perennial Chrysanthemums which flowers six months from sowing of seed. It is very easily grown in pots or in the open ground. A fine cut flower and a showy pot plant. The colors are vivid and include scarlet, crimson, bronze, orange, yellow, white, etc. This variety makes an admirable greenhouse subject, falling as it does in cascades of beautiful flowers. Pkt. 50c.

CORNFLOWER, Jubilee Gem

Jubilee Gem is a dwarf variety of Cornflower making a compact plant literally covered with flowers. It has foliage distinct from all other Cornflowers, forming a tufted mass of vivid green, contrasting well with the dark but vivid double blue flowers. The plant is about 12 inches in height.

As an edging plant, a border plant, or for ground work in formal beds of Roses, etc., it will be found admirable; it is a fine cut flower and, above all, it may be sown outside in the Autumn for Spring flowering, or in the Spring for Summer flowering, and at intervals if a continuous supply of pot plants, cut flowers or bedding plants is wanted. Pkt. 35c.

COSMOS

Early Klondyke—Orange Flare

Cosmos Klondyke has through its lateness hitherto failed to gain the popularity its attractions deserve, but this new variety has all the merits of its parent, and in addition unfolds its beautiful vivid orange flowers at about the same time as the Early Flowering Cosmos. Pkt. 25c.

DAHLIA

Unwin's Dwarf Hybrids

The plants of this splendid semi-double Dahlia are of neat, compact habit, averaging about 18 inches high, and bear a full and continued succession of blooms from July until frost. The colors range from lightest to the darkest of shades. Pkt. 25c., 1/8 oz. \$1.25.

MARIGOLD, Dixie Sunshine

This is an entirely new Chrysanthemum-flowered type of Marigold. It comes 100 per cent fully double, pleasantly without the familiar Marigold odor in the flowers. The brilliant golden yellow flower is actually a head of tiny five petalled flowers, a lacinated effect. Tall bushy growth, rich green foliage, supporting masses of bright flowers on fine stems for cutting. Pkt. 25c.

NEW ANNUAL CANTERBURY-BELLS

COSMOS, EARLY KLONDYKE—ORANGE FLARE

Novelties and Specialties in Flower Seeds

MARIGOLD—Continued

MARIGOLD

French Tall Double Royal Scot

As modern in appearance as any flower now offered, Royal Scot is one of the most striking color combinations one could wish for. The large, wellformed double flowers are produced in abundance on plants from 24 to 30 inches in height, fine for garden or cutting use. The color is a bold combination of mahogany and gold in symmetrical stripes which radiate from the center of the flower. Pkt. 25c.

NASTURTIUM

Dwarf Double Gem Mixture

Gem Mixture is composed of an evenly balanced range of cheerful colors on dwarf, compact gem-like plants, is the ideal annual for border and edging use. The plants are truly dwarf and compact, totally without runners, and hold their compact form. We feel sure that for general use this Gem Mixture will be even more popular than the Gleams. The good sized sweet scented double flowers gaily cover the little plants in an excellent color range. Pkt. 35c. 1 oz. \$2.50.

NASTURTIUM

Dwarf Double, "Golden Globe"

This pretty novelty bears the same large double sweet-scented golden yellow flowers that have made the reputation of the Nasturtium Golden Gleam, but the habit of the plant is quite different. Instead of being a semi-runner it forms an almost perfect globe, thus obviating the trouble experienced by gardeners in keeping the plant within the desired bounds. Pkt. 15c. Oz. 50c.

NASTURTIUM

Double Semi-dwarf Sweet Scented

The plants are semi-dwarf, throwing short runners from well-rounded free-flowering bushes. Stems are long, and bear the flowers well above the foliage of the plants.

PETUNIA

Giant Double Fringed "Victorious"

The finest strain of large flowering, dwarf, double Petunias yet seen. A wonderful assortment of brilliant and fancy colors will be found in this superb mixture. Also makes excellent pot plants. Pkt. \$1.00.

PRIMULA MALACOIDES

Dawkin's Carmine Pink

The latest creation in Primulas, introducers claim there is no other variety has the same freedom of flowers and such perfect habit. Color is a deep and rich glowing carmine pink. Pkt. \$1.00.

PRIMULA MALACOIDES

Hovey's Supreme

A most desirable variety; the flowers are of a perfect carmine pink thrown up in graceful profusion well above the foliage. This strain is so well fixed that 90 per cent of the seedlings come true from seed. Pkt. \$1.00.

NASTURTIUM, SCARLET GLEAM

GIANT DOUBLE FRINGED PETUNIA, "VICTORIOUS"

ZINNIA, CHRYSANTHEMUM FLOWERED OR PHANTASY

ZINNIA, Scabious Flowered Mixture

Among the oddest and most attractive Zinnia forms developed is the Scabious Flowered type. The flowers, somewhat less than medium-sized, bear a remarkable resemblance to the annual Scabiosa, from which they get their name. The plants are extremely free flowering, 2 to 2½ feet high, giving a wealth of bloom throughout the Summer. While the color range includes all popular shades, it is particularly rich in shades of crimson, scarlet, orange, yellow and pink. Pkt. 25c., ¼ oz. \$1.00.

ZINNIA, Chrysanthemum Flowered or Fantasy Finest Mixed

Fantasy is the most fascinating new Zinnia type introduced to the flower world in many years. The very informal, shaggy appearing flowers are graceful and interesting, quite distinct from the stiff, formal Zinnias to which we are accustomed. The rounded medium sized flowers are composed of a mass of shaggy ray-like petals which give a delicate and refined appearance. Pkt. 25c. ¼ oz. \$1.00.

ZINNIA, GIANT DAHLIA-FLOWERED

GROWING GOOD ROSES

The beds ought not to be more than 4 feet wide, and the soil should be rich. Avoid making the ground loose or spongy. The stiffer and harder the soil in the lower layers of the bed, the better Roses grow. Old sods, greasy decayed cow manure, bonemeal, and commercial dried sheep manure are good fertilizers. Keep the surface of the Rose beds well cultivated.

Plant Hybrid Tea Roses 1½ feet apart. More vigorous types need more space. Set the "bud" or "graft" at least 1 inch beneath the surface. Spread out the fine roots carefully and tamp the soil firmly about them. It is sometimes well to tread the soil hard about the roots. Loose planting is fatal.

Roses must be pruned when planted and every Spring afterward. Remove weak and dead wood, and shorten the new growths to 6 inches or less, remembering that dwarf,

slender-growing Roses must be cut back harder than strong ones. Climbing Roses ought not to be cut in the Spring except to take out dead wood, but in July, when they have finished flowering, remove the old canes and train up new vigorous shoots from the roots for next year's bloom.

The green plant lice which attack the tips and buds of Roses in Spring and Fall may be destroyed by a nicotine spray such as Black Leaf 40. Hand picking is best for rose bugs. Black spot and mildew may be prevented by Bordeaux mixture or the sulphur arsenate dust recommended by the American Rose Society.

Protect for Winter by drawing the earth 6 inches high about them and cover the tops with leaves or other litter. Remove the protection gradually when freezing weather is past.

Recent Introductions—HYBRID TEA ROSES

Extra Strong, Field-grown, Dormant Plants; April Delivery

ALEZANE (Pahissa 1934). Plant Patent No. 116. Bud urn-shaped, large reddish brown; flowers cupped, opening to sorrel, unfurling from sorrel to rich apricot and reverse of petals sorrel striped with yellow veins. Petals not affected by hot or wet weather. Growth very vigorous, upright branching dark green foliage. An extremely interesting and striking novelty which has attracted much attention wherever shown. \$1.50 each, \$15.00 per doz.

See color illustration second cover page

AMELIA EARHART. Plant Patent No. 63. New. Large, ovoid bud, cream with blushes; flowers very full, graduating from a deep yellow center to an outer collarette of large cream petals with a blush overtone; extremely fragrant; strong grower; free bloomer; leathery dark green foliage. A worth-while addition. \$1.50 each, \$15.00 per doz.

ANNE POULSEN. Poly. (Poulsen 1935.) Patent applied for. Large, semi-double flowers scarlet crimson, scented, in large sprays, always in bloom, plants robust and hardy, for mass color effect, low hedges or borders. \$1.25 each, \$12.50 per doz.

BETTER TIMES (Jos. H. Hill Co. 1934). Plant Patent No. 23. New. The brilliant cerise flowers are large, double, and delicately fragrant. Being produced on long, strong stems, they are excellent for cutting; foliage is leathery, dark green; a very free full bloomer. Its success is indication of the name. \$1.50 each, \$15.00 per doz.

CARILLON. HT. (J. H. Nicolas.) Patent No. 136. A bedding Rose of great activity, giving at all times a note of cheer in the garden. The long pointed buds are orange scarlet, contrasting pleasingly with the green sepals. The half-open bloom is a deep coral overcast with orange and the full bloom is large, 4 in. diameter the inner petals being irregularly but artistically arranged. The bush is branching, so that when planted in mass, the whole bed is blanketed with glossy foliage upon which rest the many blooms. \$1.50 each, \$15.00 per doz.

See color illustration second cover page

COUNTESS VANDAL. HT. (M. Leenders 1932). Plant Patent No. 38. Is today the most popular Rose in America as well as in Europe. The long pointed bud, upright stems for cutting, a richer coloring and large, Rose differentiate it from Edith Nellie Perkins, also blooms more steadily. The color combination can hardly be described, a superposition of pink, copper, gold and salmon producing a peculiar effect changing as the bloom ages. \$1.00 each, \$10.00 per doz.

See color illustration second cover page

GLOAMING. HT. (J. H. Nicolas 1935). Patent No. 137. A cut flower variety, also of great value to the garden. The large buds are carried on long, rigid stems amply clothed with handsome foliage. The plant is vigorous and branching, fairly tall growing. The bloom is large and full, well formed and long lasting, either in water or on the plant. The color is a soft satiny pink heavily laden with salmon and amber. Delightful fragrance. \$1.50 each, \$15.00 per doz.

MARY HART (Geo. Hart 1931). Plant Patent No. 8. A striking red sport of Talisman. The bud is maroon red, opening to well-formed blossoms of deep velvety blood red with an overglow of amber. Unlike most red Roses, Mary Hart does not wilt or dry out when cut, but opens perfectly. \$1.00 each, \$10.00 per doz.

Illustrated in color on second cover page

MATADOR. HT. (Van Rossem 1935). Patent applied for. When shown in European shows, it was hailed as a great red Rose. Our tests have confirmed the opinion. Large, full Rose, well formed, scarlet crimson with darker silky sheen on the reverse, very perfumed, vigorous, healthy plant. \$1.50 each, \$15.00 per doz.

NIGRETTE (M. Krause 1934). Plant Patent No. 87. The Rose publicized by News Agencies, "The Black Rose of Sangerhausen." Its originator describes it as follows: "The flowers are medium size, deep maroon with blackish velvet sheen and quite fragrant. It is the darkest of Roses, appearing almost black in cool seasons. The plant is continuously in bloom. Has created a sensation in the European Rose World." \$2.00 each, \$20.00 per doz.

PERMANENT WAVE. Poly Hyb. (M. Leenders 1932). Plant Patent No. 107. The name fits the case. The petals are fluted or waved, permanently from the bud stage to the finish. Blooms rather large for the type, in great clusters. Rosy pink with cerise edges. Handsome plants may be grown tall enough for a low hedge. \$1.50 each, \$15.00 per doz.

ROCHESTER. (J. H. Nicolas 1934.) Plant Patent No. 131. New. Seedling of Rev. F. Page-Roberts and Echo. A lovely constant flowering bedder of the Roberts type of growth and form of bud and flower, with the Echo freedom of bloom. The color of the bud is like Roberts, with more pronounced carmine markings on the reverse of the petals and more blush in the open flower. Foliage heavy and disease-resistant—growth vigorous. Always in bloom, it is sure to be a great garden favorite. \$1.25 each, \$12.50 per doz.

WHITE BRIARCLIFF. HT. (Mme. Louis Lens). (Lens 1933). Patent No. 108. The Supreme White Rose of perfect form and glistening pure white. Plant branching and a continuous bloomer. The best white Rose to date for all purposes. \$1.50 each, \$15.00 per doz.

YOSEMITE. HT. (J. H. Nicolas 1934). Patent No. 109. Vigorous, bushy plant of continuous blooming habit. Buds orange scarlet in clusters opening to fairly large, semi-double blooms, orange scarlet with a suffusion of carmine on the reverse. \$1.25 each, \$12.50 per doz.

HARDY

CLIMBING and RAMBLER ROSES

BLAZE. Climber. Plant Patent No. 10. Acclaimed by the nation and continues to be the most popular of all new climbing Roses—the only hardy everblooming scarlet climber. It has every element to insure its success, for Blaze continues the vigor, beauty and hardness of Paul's Scarlet Climber with the everblooming Rose. Every one of the plants offered this season was propagated from blooming wood, in order to definitely and more quickly reproduce the everblooming quality in this Rose. Everblooming. \$1.25 each, \$12.50 per doz.

GOLDEN CLIMBER (Mrs. Arthur Curtiss James). Wich. Hyb. (W. D. Brownell 1933). Plant Patent No. 28. The most interesting and unusual feature is that its extreme hardness is combined with blooms of Hybrid Tea type and quality, long lasting and most always solitary on stems often 18 in. or longer. It is very hardy, being able to withstand sub-zero temperatures. The handsome, glossy green foliage, green wood and red thorns are very ornamental. \$1.50 each, \$15.00 per doz.

PRINCESS VAN ORANGE. (De Ruyter 1933). Plant Patent No. 106. New. Sensational climbing sport of Gloria Mundi. It has strong growth and rich green foliage. The branches are literally covered with masses of blazing Gloria Mundi red flowers in polyanthalike trusses. The most talked of European climbing novelty in many years. \$1.25 each, \$12.50 per doz.

Illustrated in color on second cover page

Dormant Plants, 60c. each, \$6.75 per doz.

AMERICAN PILLAR. Bears heavy trusses of pink flowers.

CLIMBING AMERICAN BEAUTY. Produces rosy crimson flowers.

CRIMSON RAMBLER. Double crimson flowers in great profusion.

DOROTHY PERKINS. Bears beautiful clusters of pink blooms.

EXCELSA. The red Dorothy Perkins.

LADY GAY. Cerise pink; very attractive.

TAUSENDSCHOEN. Delightful shade of soft pink.

WHITE DOROTHY PERKINS. Pure white.

For special Collection of twelve choice Roses, see third Cover Page

Novelties and Specialties in Hardy Perennial Plants

ASTERS—New, Dwarf

35c. each, \$3.75 per doz.

We are offering here a new addition to the perennial borders and rock gardens. Much needed Fall color is hereby attained. The group we are offering is our selection and gives a complete range of size and blooming period.

The general habit of these plants is low and bushy, covered with masses of flowers.

NOVIBELGI NANA, DAPHNE. Bushy grower of branching habit and very free blooming; flowers soft pink. 12-15 in.

NOVIBELGI NANA, MARJORIE. Clear bright rose pink flowers. 6-8 in. September.

NOVIBELGI NANA, NANCY. Pale flesh pink flowers. 9 in. September.

NOVIBELGI NANA, REMEMBRANCE. Lilac pink. 15 in. September-October.

Healthy foliage. 3-4 ft. 50c. each.

NOVIBELGI, RED ROVER. Novelty. Deep rosy red flowers with golden center; buds bright red, giving us first red Fall Aster. Compact habit; very free blooming. Should be in every border. A real novelty for the Fall garden. 1 yr. 3-4 ft. September to frost. 35c. each.

NOVIBELGI, SKYLANDS QUEEN, Blue. Large light blue blossoms borne abundantly on 4 ft. plants in late August and early September. Dark green, disease resistant foliage. The best Fall Aster, and a happy grower. Our favorite Aster. 25c. each.

CHRYSANTHEMUM Korean Hybrids

New, hardy Hybrids which add new colors to the garden and make it possible to grow Chrysanthemums in sections where they would otherwise be Winterkilled.

APOLLO. A sparkling combination of bronze, red, and gold, suffused with salmon. The flowers are produced in sprays with single flowers 2 in. across. Height 2½ ft. Blooms from early October until frost.

COREOPSIS LANCEOLATA, GOLDEN GIANT

CHRYSANTHEMUM—Continued

CERES. A suffusion of old gold, chamois yellow and soft coppery bronze. Attractive single flowers, produced in sprays. This is a very attractive, sturdy plant. 2-2½ ft. October.

DAPHNE. A beautiful Daphne-pink, with a lilac rose sheen, and prominent golden stamens in the center of the single flowers. 3½ in. in diameter. Frost resistant. 2-2½ ft. October.

INNOCENCE. A dazzling white, dwarf growing Korean Hybrid. The buds are flesh pink, opening to Daisylike, pure white flowers. 1½-2 ft. September-October. Very effective for borders.

LOUISE SCHLING. Glowing salmon red changing to a soft bronze salmon as the flower matures. Flowers are fully 3 in. across with three or four rows of petals. Early October.

MERCURY. The 3 in. single flowers open bronze red and change to coppery bronze as they mature. This is a cut flower that will keep well and the graceful spray make it ideal for that purpose.

ASTERS, DWARF

COREOPSIS

LANCEOLATA, GOLDEN GIANT. New. A glorious new, large flowered Coreopsis, one of our own hybrids. The flowers are a true rich golden yellow. 4 in. in diameter and perfect in form. They have a very attractive, sweet fragrance. It has been greatly praised by all who saw it in bloom. 35c. each.

PHLOX

P. D. WILLIAMS. Enormous flowers in pyramidal trusses. Soft Apple blossom pink with darker stripes in the center. Buds and backs of petals red. Similar to Milly Von Hoboken but a more bushy and healthier growth. 2½-3 ft. 65c. each.

GEUM

FIRE OPAL. Novelty. Dazzling rich scarlet with orange sheen. Flowers often 3 in. across. May to October. 2 ft. Free bloomer; good foliage. A striking Geum. 3 in. pots. (March delivery). Absolutely hardy in 30 degrees F. below zero. 50c. each.

SCABIOSA

HOUSE'S HYBRIDS, Hovey's Improved. This strain is a decided improvement over the original Caucasia. The flowers are larger, have stronger stems and bloom more profusely. Very good for cut flowers from July through the first frosts. Color lavender blue. 2 ft. 50c. each.

We are in a position to supply all PERENNIAL PLANTS, SHRUBS, EVERGREENS, etc., and will be pleased to quote on your requirements

General List of HOVEY'S RELIABLE VEGETABLE SEEDS

ARTICHOKE

One ounce will produce about 500 plants

Sow the seeds early in April or May, and when large enough, transplant in rows 3 ft. apart each way. They will yield well the second year if they are well protected from the cold throughout the Winter by earthing up and mulching. The Artichoke may be treated as an annual, sow the seeds under glass in March, keep the seedlings growing vigorously until May, when they should be set out in a rich soil. 1 oz. of seed will sow 35 ft. of drill.

Pkt. Oz. ¼ lb.
LARGE GREEN GLOBE. The best variety; heads large and scales tender and excellent. \$0.25 \$1.00 \$3.50
JERUSALEM ARTICHOKE (*Helianthus tuberosus*). Cultivated for its tubers. Qt. 40c., pk. \$2.50

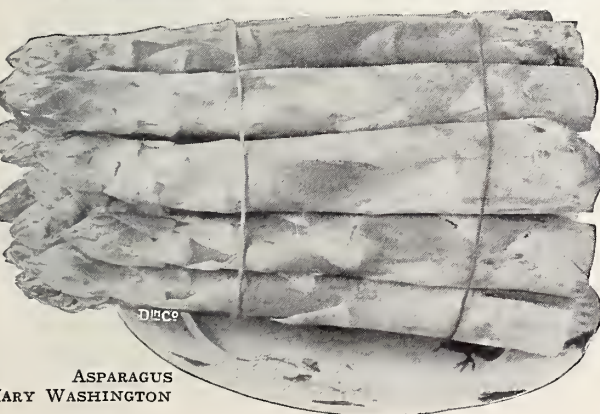

ASPARAGUS

One ounce will produce 200 plants

A deep, rich mellow soil is best adapted to the growth of Asparagus. It may be grown from seed or propagated by roots. Sow as early in the Spring as the ground will admit, in drills from 12 to 14 inches apart, and cover 1 inch deep; when the plants are well up, thin to 3 inches apart in the drills. Keep the plants free from weeds during Summer, and protect slightly during Winter.

The following Spring the roots will be ready to transplant into permanent beds; the roots should be set in rows 3 to 4 feet apart, and 1 foot apart in the rows; the crown of the root should be 4 to 6 inches below the surface of the ground. A fair crop may be expected the third year from the seed, or in one or two years when roots are used, according to the age of the roots planted. By planting two-year-old roots, a fair crop may be obtained in one year, and after that a full crop every year.

MASTERPIECE (Suttons): One of the best forcing or main crop, green string varieties, producing an abundant crop of excellent quality long-podded Beans. Lb. 40c., 2 lbs. 75c., 8 lbs. \$2.40.

To obtain a supply of Beans throughout the season, make plantings every two weeks from early May until about the middle of July. Beans are usually planted 2 inches deep in drills 18 inches apart. Many claim, however, that larger yields are obtained if three or four Beans are planted in a hill, 8 inches apart in the row. Cultivate frequently, but not deeply, and only when the plants are dry, as earth scattered on the foliage or pods when moist will often cause the development of rust.

Two pounds of Beans will sow 100 feet of drill.

BEANS,—Continued

BEANS
Pole or Running

It is good policy to plant Pole Beans at least a week later than the first planting of dwarf varieties because they are not as hardy. Plant four or five Beans to a hill in hills three or four feet apart, each way. Some growers raise the hills a little to insure good drainage. Hill applications of well composted manure are of value. Two pounds of Limas will plant 100 hills, one quart of the smaller seeded sorts about 200 hills. All large seeded Limas should be planted eye down to insure quick growth.

BEETS

One ounce of seed will sow 50 feet of drill. Any well prepared light garden soil will grow good Beets. Successive plantings can be made from April until the middle of July. Sow in drills about one inch deep and 12 or 15 inches apart. The young plants are usually thinned to four inches apart in the row before they begin to crowd; many gardeners wait until the plants are six inches high so that those removed can be used for greens.

CABBAGE

One ounce of seed should produce about 2500 plants

Cabbage will do well in rich, well-drained, manured soil. Sow seed of the early varieties in hotbeds about February 1st, and prick out into other hotbeds as soon as the plants are strong enough, or set in coldframes in March. When danger of frost is past, transplant to the open ground. The late or Winter crop seed can be sown in seed beds in May and plants set in the field in July. Late varieties are usually planted in rows 30 inches apart with 2 feet between plants, early sorts may be set 15 by 24 inches or even closer. Pkt. Oz. ¼ lb.

- ALL SEASONS.** One of the best for second early and late crops, very large and a sure header. .\$.010 \$0.35 \$1.25
- CHARLESTON, or LARGE WAKEFIELD.** One week later than early Jersey Wakefield, but the heads are fully one-half larger. .10 .35 1.25
- COPENHAGEN MARKET.** As early as Charleston Wakefield. Very solid. Excellent market sort. .10 .60 2.00
- DANISH BALL HEAD.** A Winter Cabbage. Extra hard-headed and of fine quality. .10 .35 1.25
- EARLY JERSEY WAKEFIELD.** One of the most popular, early pointed varieties; good grower. .\$.010 \$0.35 \$1.25
- EARLY WINNIGSTADT.** Pointed variety; both for early and late sowing. .05 .30 1.00
- ENKHUIZEN GLORY.** An early, large, solid, white variety. One of the best. .10 .35 1.25

- LARGE WHITE.** Largest and most profitable for feeding farm stock. .10 .15 .40 1.25

CAULIFLOWER

One ounce will produce 3000 plants

Cauliflower requires a deep, rich soil, and seldom succeeds well when grown on land long under cultivation. Sow the seed in the hotbed in March and transplant into the garden in May; set the plants in rows and cultivate the same as Cabbage.

HOVEY'S SUPREME SNOWBALL. The finest strain procurable of this extra early and most popular sort. Produces large, fine-grained, pure white heads. Suitable either for early or late crops. Pkt. 25c., oz. \$5.00

- LARGE-ROOTED.** Roots when dried and roasted are used as a substitute for coffee. .\$.010 \$0.35 \$0.75
- WITLOOF or FRENCH ENDIVE.** Plant in May or June in drills. Thin to 6 inches apart. Early in the Fall the roots should be removed, the tops cut off to within 1½ inches of the neck, the roots make a uniform length of 8 or 10 inches. They should then be planted in trenches somewhat below the level of the ground. Trenches should be filled with light soil, or if a quick growth is desired, should be covered with horse manure several inches deep. In four weeks the leaves will be ready for use. .10 .40 1.25
- CHIVES.** For soups and salads. Plants 20c. per clump. .25 .75 ...

CELERY

One ounce will produce about 4000 plants

For earliest crop, sow in February under glass or on a mild hotbed. Prick out on bottom heat when ready and transfer to trenches in May or June. For main crop, sow in March or April, and in June or July, when plants are large enough, transplant to trenches, preparing the same by bottoming with good rich loam. Water liberally during July and August; earth up gradually during August and September. Lift late in November and for Winter storage place upright on damp soil in a cellar or root house. Pack closely.

Pkt. Oz. ¼ lb.

- BOSTON MARKET.** The finest flavored variety in cultivation; solid, crisp and of excellent flavor; blanches perfectly white; a splendid keeper. .\$.015 \$0.85 \$3.00
- EASY BLANCHING.** Blanches very easily, medium dwarf, good flavor and a fine keeper. .15 1.50 5.00
- GIANT PASCAL.** Of fine flavor, free from any bitter taste. It grows about 2 feet high the stalks being broad, thick, solid and crisp, with golden yellow heart. A valuable variety for both second early and Winter use. .10 .50 1.75
- GOLDEN PLUME.** An improved strain of Golden Self-Blanching. The plants are of strong growth and produce thick and heavy stalks of excellent crisp and nutty flavor. .10 1.00 3.50
- GOLDEN SELF-BLANCHING.** Best for early use; color rich golden yellow; crisp, tender, fine flavor; keeps well throughout the season. .15 1.00 3.00

KELWAY'S GIANT SOLID PINK. A superb large growing variety, specially recommended for exhibition. Pkt. 25c., oz. \$1.00, ¼ lb. \$3.50.

- WHITE PLUME.** The stalks and portions of the leaves are white. .05 .50 1.75
- CELERIAC or TURNIP-ROOTED CELERY, GIANT PRAGUE.** A variety of Celery having Turnip-shaped roots; may be cooked, sliced and used in vinegar, also in soup. .10 .50 1.50
- CELERY PLANTS.** Per doz. 20c., per 100 \$1.00.

CAULIFLOWER, HOVEY'S SUPREME SNOWBALL

GIANT CURLED SAVOY. Finely curled leaves and of delicate flavor; used for Fall crop or for Winter. Pkt. 15c., oz. 75c., ¼ lb. \$2.50.

- GOLDEN ACRE.** A new Cabbage, head measuring 9 inches in diameter; 10 days earlier than Copenhagen Market and more compact. .25 .75 2.75
- PENN STATE BALL HEAD.** A large somewhat flattened form of the Ball head, producing probably the largest tonnage per acre of any known variety. This is one of the best Winter varieties. .15 .75 2.50
- PE-TSAI, CHINESE CABBAGE.** Resembles Cos Lettuce in growth. .10 .35 1.25
- RED DUTCH PICKLING.** Used extensively for pickling. .10 .35 1.25

- CABBAGE PLANTS.** Per doz. 30c., per 100 \$1.50.

CARDOON

Grown for the edible midrib of the leaf, which requires blanching in the same manner as Celery. Sow sparingly, early in Spring, in drills 1 inch deep and 4 or 5 feet apart; later, thin out the young plants to about 2 feet apart.

- Pkt. Oz. ¼ lb. Lb.
- LARGE SMOOTH SPANISH.** Grows about 4 feet high. .\$.010 \$0.25 \$0.85

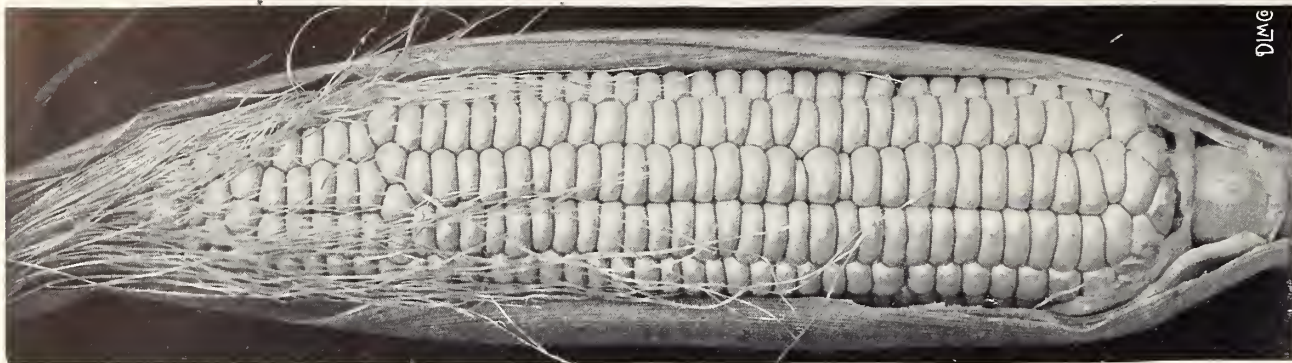

CARROTS

One ounce will sow 100 feet of drill; 4 pounds, 1 acre

Carrots are grown both for culinary purposes and for stock feeding; the medium varieties for the former; the long sorts for the latter use. Fine, mellow, sandy loams, which have been manured liberally for some previous crop, such as Potatoes or Onions, will produce smooth, well-shaped roots. Seed may be sown towards the end of April, in May, or for late crops for table use, up to the middle of June, in drills 12 inches apart and not over 1 inch deep. For an early crop sow the "Horn" or medium varieties as early in Spring as the ground can be prepared. If a horse cultivator is to be used the rows should be 30 inches apart. Thin out the plants from 3 to 5 inches apart according to the variety.

Pkt. Oz. ¼ lb. Lb.

- HUTCHINSON DANVERS.** The favorite strain of Danvers for Massachusetts market gardeners. .\$.010 \$0.35 \$1.25 ...

CORN, SWEET or SUGAR

One quart will plant 200 hills, or 100 feet of drill

While Sweet Corn is often grown in hills, experienced gardeners prefer drills. Make the first planting the latter part of May in a rich, warm soil; successive sowings should be made at intervals of about ten days until July. Sow in drills from 2½ to 3½ feet apart, according to the height of the variety, and thin out the plants to 12 inches apart in the row. If grown in hills, 3 or 4 feet apart each way gives ample space; never allow more than four plants to remain in one hill.

CUCUMBER

One ounce of seed will plant about 50 hills

Seed should be started under glass about May 1st, for an early crop in order to have plants ready to set out in the garden 3 or 4 weeks later when the ground has become thoroughly warm. Plant the seed in paper or earthen pots not less than 4 inches in diameter, which can be handled easily without disturbing the young plants; leave only the 3 or 4 strongest seedlings in each container. Well rotted manure or fertilizers may be dug into the hills a week or two before planting time. In every good soil the distance between hills should not be less than 4 by 5 feet. It is generally safe to plant seed in the garden late in May; for pickles, the middle of June is early enough. Cultivate often, and continue as late in the season as is possible without injuring the plants. Always pick Cucumbers before they begin to turn white or yellow.

DANDELION

When growing in deep rich soil cultivated varieties produce large, tender leaves much superior to those of the wild Dandelion, both in size and flavor. Sow seed early in May in shallow drills about a foot apart; later, thin the plants to 6 inches apart in the row, and cultivate to keep down the weeds. If blanched with soil the leaves make excellent salad. The plant may be held over Winter by covering with litter after the ground freezes.

ENDIVE

One ounce will sow 150 feet of drill

Sow early in the Spring in drills 12 inches apart, and thin out the plants to 10 inches apart in the drills as soon as they are large enough to handle. Before using, the plants must be blanched, which is accomplished by gathering the leaves to a point at the top and tying them together with matting or any soft material. It makes a most delicious salad.

LETTUCE

One ounce will produce about 3000 plants

Lettuce is the most popular of all salad plants and, at the same time, is one of the easiest to grow, due to its comparative freedom from disease and insects. A satisfactory way of starting the early crop is to sow in hotbeds in March, and transplant to 2 by 2 inches, preferably in flats, which may be transferred to coldframes when the plants are strong enough. Plants that have been properly hardened in coldframes may be set out of doors as early as the ground can be prepared the rows should be made 12 inches apart, with plants 1 foot apart in the rows. Seed may be sown in the open from the latter part of April until the middle of August. Most of the Cos varieties will be of finer quality if blanched by tying the tops together.

MUSHROOMS

To grow Mushrooms successfully, the following requirements are essential: Procure fresh stable manure (straw litter manure), shake out well, leaving as little straw as possible. After shaking out, stack your short manure closely, as if for the preparation of a hotbed, and there let it remain for a week. When thoroughly heated, turn it over and place what has been outside the heap into the center. Repeat this turning at intervals of three days (four turnings should be sufficient), and if dry, use water enough to moisten it gradually at each turning; this will get the material into right condition for the beds, as moisture is one of the most important points, and the right texture of the material depends almost entirely upon the proper state of moisture. If you get your material right in this respect, you will not be likely to experience any trouble afterwards. The ideal temperature is 60 to 65 degs., but Mushrooms will come at a lower temperature.

After the beds are ready each brick of spawn can be broken into ten pieces of equal size. These pieces should be inserted about 2 inches below the surface and 10 in. apart; the bed should then be gently stamped or compressed. In about 15 days the spawn should have run entirely through the bed. The whole surface should be then covered with about 2 inches of loam and over this place a few inches of straw. Under these conditions the Mushrooms should appear in about six weeks. One brick will spawn 9 square feet of bed.

ONION

One ounce will sow 100 feet of drill. Four or five pounds to the acre

The Onion requires a very fertile soil for the best development of its bulbs. While muck and peat soils are ideal, sandy loams properly enriched with well rotted manure furnish excellent conditions. As early in Spring as the land can be worked, sow seed sparingly in drills 1 foot apart and about ½ inch deep. Unless the soil is quite moist, it should be pressed firmly down on the seed to insure rapid and uniform germination. Weeding and thinning must be done by hand; at the first weeding, thin out to about 8 plants per linear foot of row. Cultivation should be shallow and frequent. When all the tops are yellow the Onions are usually pulled and left on the ground for 10 days or more if the weather is favorable, until the outer skin of the bulb is dry; after the first three or four days, stir them occasionally to hasten the process.

PARSNIP

One ounce will sow 100 feet of drill. Five to six pounds to the acre.

Sow in April or early in May, as Parsnips require a long season to mature. Their cultivation is otherwise the same as directed for Carrots. They may be dug in the Autumn and stored for Winter use, but if left in the ground till the following Spring they are very much improved in flavor. Sow a liberal quantity of seed, as from its nature it does not always come up well.

PARSLEY

One ounce will sow 150 feet of drill

Parsley succeeds best in rich, mellow soil, and as the seed germinates slowly—sometimes remaining in the earth four or five weeks before the plants appear—the sowing should be made as early in Spring as the ground is in working condition. Can also be sown in hotbed in February. When the plants are 2 or 3 inches high, thin them out to 8 or 10 inches apart. The leaves are used for garnishing, also for flavoring soups and stews.

In buying seeds a customer should be able to rely implicitly upon his dealer.

PEAS, GRADUS

PEAS

One quart will sow 100 feet of drill. One and one-half bushels per acre.

Peas succeed best in light, rich soil. The early round, smooth varieties should be planted as early in Spring as possible, while the wrinkled sorts, which are more tender, will do better if planted after the ground becomes warmer. Sow in drills, 2 to 3 feet apart, according to variety, and cover early sowing about 2 inches; later plantings should be covered 3 to 4 inches. Make the drills deep enough to allow room for the manure, which should be scattered along the bottom of the drill and then covered thinly with soil before sowing the Peas, so that they will not come in contact with it. Successive plantings can be made every ten days up to the middle of July. For the later plantings the early varieties are preferred.

| SPAULDING ROSE. A valuable early Potato of exceptional quality. Cooks white and mealy. Does well in light soils. |

PUMPKIN

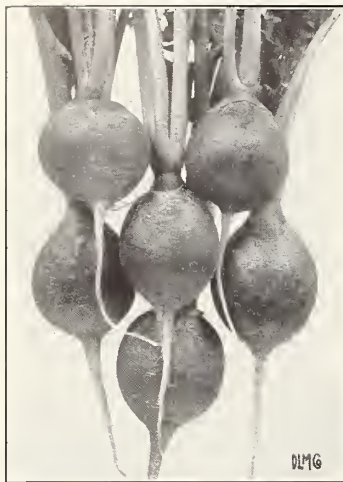

One ounce of seed will plant about 30 hills; 4 pounds, 1 acre.

Plant 1 inch deep in hills 8 x 8 feet apart, late in May, in highly enriched soil. When the plants are beginning to run, remove all but the two strongest from each hill. Farmers find field pumpkins a valuable addition to their stock feed, and commonly grow them in the cornfield, planting a few seeds in every third or fourth hill in alternate rows.

PUMPKIN, SWEET OR SUGAR

RADISHES, EARLY SCARLET GLOBE

RADISH

One ounce of seed will sow 100 feet of drill

Loose, fertile, light loams are to be preferred for radishes; in distinctly clay soils, the crop matures slowly. For a constant supply, sow at intervals of two or three weeks from early April until September. An early crop may be grown in the hotbed in February. For use during the Winter, the roots may be stored in earth in a cool cellar, but should be placed in cold water for an hour or so before they appear on the table.

RHUBARB

One ounce will produce about 750 plants

Rhubarb succeeds best in deep, rich loam, as it is scarcely possible to cultivate too deeply, or to manure too highly. It is propagated by seeds, or by division of the roots—the latter being the usual method. Sow the seed in drills 18 inches apart, and thin out the plants to 9 inches apart. When the plants are one year old transplant into beds, setting the plants 5 feet apart each way. Do not cut until the second year.

SALSIFY, or VEGETABLE OYSTER

One ounce will sow 50 feet of drill

A delicate and nutritious vegetable, peculiar oyster flavor. Sow the seed early in Spring, in drills 12 inches apart and 1 inch deep, thinning out the young plants to 6 inches. The roots will be ready for use in October, when a supply should be taken up and stored like Carrots.

SPINACH

One ounce will sow 50 feet of drill. Twenty pounds will sow an acre.

Spinach may be grown on any ordinary soil. For early use sow in August or September, in drills 12 to 14 inches apart. At the approach of cold weather cover lightly with straw. Uncover when the plants begin to make a new growth in Spring. For Summer use sow early in Spring, using rather less seed. Thin to 3 inches apart. A liberal dressing of good manure should be used.

SQUASH

Squash seed should not be planted until the ground has become warm. A rich, mellow soil is conducive to high yields and early maturity but squashes grow satisfactorily in almost any well drained soil. For bush types, the hills should be at least 4 x 4 feet apart; for the running varieties, 10 x 10 feet. It is customary to plant 8 or 10 seeds in each hill, and thin out later, to two or three strong plants. During the early stages of growth keep the plants well sprinkled with tobacco dust to make them distasteful to insects; the way to deal with the squash vine borer is to cover the joints with an inch or two of soil so that secondary roots may develop.

SQUASH IN VARIETY

TOMATO

One ounce will produce 1500 plants

Sow the seed sparingly about the middle of March, in drills $\frac{1}{4}$ of an inch deep and 2 inches apart, in a hotbed, or sunny window where the temperature will not fall below 65 degrees. When the seedlings are two inches high, they should be transplanted to 3 inches apart each way in other flats of soil 3 inches deep, in which they may remain until time for planting in the garden. If a very early crop is desired, transplant again three weeks later, preferably into 4-inch pots of very rich soil. About the first of June the plants may be set in the open ground. A heavy soil is conducive to high yields but the crop matures much earlier on fertile, sandy loams; in the former, plant 4 feet apart each way.

TURNIP

One ounce of seed will sow 150 feet of drill; two pounds one acre in drills.

Turnip seed may be sown at all seasons from April until the middle of August in our climate, but the roots will be of finer quality if seed is sown early in Spring for the Summer crop, and about August 1st for the Fall and Winter crop. A light soil, well-manured the previous year, furnishes ideal conditions; no manure should be applied at the time of sowing, unless it be well rotted compost. The ground should be dug or plowed deep, and made mellow and fine. Sow the seed in drills $\frac{1}{2}$ inch deep and from 12 to 18 inches apart. Plants of the early varieties should be thinned to about 3 inches apart, while those of the larger late varieties should not be left closer than 5 inches apart in the row. Cultivate often, and keep the crop free from weeds. The Rutabaga sorts, which are generally grown for Winter use, may be sown from the 20th of June to the middle of July.

MALUS—CRAB

The Crab-apples are exceedingly beautiful Spring-flowering trees, equal in all respects to the famous Japanese Cherries, and provide a much wider range of color.

FLORIBUNDA. The Japanese Crab has bright pink buds in clusters and wide open, single, white flowers. It is a vigorous branching tree about 15 ft. high. One of the most beautiful of the lot. 4 to 5 ft., \$1.50 each.

IOENSIS FL.-PL. (Bechtel's Flowering Crab). Is a symmetrical, broad-shouldered tree with clusters of drooping pink flowers like dainty, semi-double Roses. It is not fragrant. 3 to 4 ft., \$1.25 each. 4 to 5 ft., \$1.50 each.

SARGENTI. A rather dwarf, spreading, shrubby tree, with clusters of creamy white flowers in great profusion. At times the opening buds and flowers have a faintly yellowish look. 4 to 5 ft., \$2.00 each.

SCHEIDECKERI. Scheidecker's Crab has double, bright pink flowers which rapidly fade white and hang on a long time. The waxy yellow fruit is produced in great profusion. 3 to 4 ft., \$1.50 each.

SPECTABILIS. The Chineset-flowering Crab is one of our oldest ornamental Crab trees, and grows about 30 ft. high, with half-single and double flowers of pale pink, followed by pale yellow fruit. 4 to 5 ft., \$1.50 each.

EDITH NELLIE PERKINS

Buds of rich orange pink outside and salmon pink inside of petals; fairly double blooms with a golden underglow.

E. G. HILL

Great massive blooms of deep maroon, velvety on inside, very fragrant.

ESSENCE

The long-sought double Etoile de Hollande. Bloom deep crimson; full of "Essence" of Rose. Vigorous grower.

GOLDEN DAWN

Bud rich straw yellow, flushed old rose; flower double, Sunflower yellow, passing to lemon yellow with age. Most healthy foliage.

KAISERIN AUGUSTE VIKTORIA

The standard, double, pure white bedding Rose.

MARGARET MCGREDDY

Brilliant red petals on hinges of deep gold. Plant upright. Seldom out of bloom.

MRS. ERSKINE PEMBROKE THOM

The fine long buds open into perfectly shaped flowers of rich lemon yellow.

MME. JULES BOUCHE

Medium-sized, white flowers, lightly tinted with pink at the center.

MRS. SAM MCGREDDY

Pern. Hyb. (McGredy 1930). Large, fairly double bloom of orange salmon, with a suffusion of gold. Vigorous, healthy plant. One of the best of the tribe of Irish Roses.

PRINCE FELIX (DE LUXEMBOURG)

HT. Well formed bloom rather large, of brilliant scarlet red. Tall, healthy plant of Radiance type. We are very much enthused over it. Has stood below zero weather without injury.

RADIANCE

Large Brilliant rose pink blooms.

ROSLYN

New. (Towill 1931). Full golden yellow bloom, deeper in center, with orange splashings on back of petals.

Grass Seed Mixtures

HOVEY'S "SPECIAL" LAWN GRASS MIXTURE

25 lbs. per bushel

This is our best mixture of seeds offered for the purpose of quickly producing a permanent lawn. It is prepared from our own formula, and is a careful blending of varieties adapted to producing the thick growth and velvety appearance so much desired.

Lb. 50c., 2½ lbs. \$1.20,
5 lbs. \$2.25, 12½ lbs. \$5.25,
25 lbs. \$10.00, 100 lbs. \$38.00.

SHADY PLACE LAWN GRASS

25 lbs. per bushel

Usually it is quite difficult to obtain a satisfactory growth of grass under trees and in shady places. For sowing in such places we recommend the use of this special mixture. It will quickly produce an abundant and even growth of beautiful green grass.

Lb. 50c., 2½ lbs. \$1.20, 5 lbs. \$2.25,
12½ lbs. \$5.25, 25 lbs. \$10.00,
100 lbs. \$38.00

ALL BENT FORMULA LAWN GRASS

For many years Bent Grasses have been used for Putting Greens with great popularity and recently many are using them for lawns with perfect results. Our mixture contains only Bent Grasses in variety.

Lb. \$1.00, 5 lbs. \$4.75, 20 lbs. \$18.00

CITY AND SUBURBAN LAWN GRASS MIXTURE

20 lbs. per bushel

This popular low priced mixture is well suited for various soil conditions, giving good results even in small city grass plots, where the soil is generally stiff and heavy. It will form a thick turf in a very short time and is well suited for lawns and other spaces having considerable hard wear.

Lb. 35c., 2 lbs. 65c., 5 lbs. \$1.65, 10 lbs. \$3.00,
100 lbs. \$28.00

TERRACE AND SLOPE MIXTURE

A mixture of deep rooted, fine-leaved grasses, producing a rich, green turf.

Lb. 40c., 10 lbs. \$3.75, 100 lbs. \$35.00

HOVEY'S FINEST PUTTING GREEN MIXTURE

25 lbs. per bushel

Careful study of the requirements for making the most substantial turf for putting greens developed this mixture. The varieties comprising it are all of the fine-bladed, low growing and most hardy kinds, and maintain their rich, green color throughout the season. For tennis courts, bowling greens and for all games in which the ball is required to run true.

Lb. 65c., 5 lbs. \$3.00, 25 lbs. \$13.75,
100 lbs. \$50.00

HOVEY'S FINEST FAIRGREEN MIXTURE

25 lbs. per bushel

Prepared from special formula, with the object of producing a thick turf that will stand the hard usage suffered by the average fairgreen. For the golf course, football and polo fields and other athletic grounds, this mixture will give perfect satisfaction.

Lb. 50c., 5 lbs. \$2.25, 25 lbs. \$10.00,
100 lbs. \$38.00

PARK MIXTURE

A mixture of grasses suited to public parks, polo or football fields and other large areas where the cost of the finer grasses is prohibitive; will produce a fine, deep greensward in the shortest space of time.

Lb. 35c., 10 lbs. \$3.00, 100 lbs. \$28.00

HOVEY'S PERMANENT PASTURE GRASS MIXTURE

This is a special mixture of Re-cleaned Grass and Clover seeds, and is composed of Perennial varieties, which insure at all times an abundant and nutritious food supply for all kinds of stock. It yields a heavy crop of Hay each year and supplies rich pasture all the year around. We ship out large quantities of this mixture and it has always given most satisfactory results. Sow 50 lbs. to the acre, and when ordering kindly state whether for heavy, light or medium soils.

50 lbs., sufficient for one acre, \$18.00

One of the secrets of a Good Lawn is to use the best implements for its upkeep. A Roller of the correct weight, a Mower that will cut the grass without pulling the roots, a Sprinkler which will distribute water gently and evenly. Write for our complete catalog on implements.
