Printed by Lloyd's Register of Shipping
at Garrett House, Manor Royal
Crawley, Sussex, England

REGISTER BOOKS AND OTHER PUBLICATIONS ISSUED BY THE COMMITTEE OF LLOYD'S REGISTER OF SHIPPING

LLOYD'S REGISTER BOOK (The Register of Ships and List of Shipowners are issued annually in *July* and *August* respectively; the Appendix in *January*).

The Register of Ships (in two volumes A–L and M–Z) contains the names, classes and general information concerning the ships classed by Lloyd's Register of Shipping (including the British Corporation Register); also particulars of all known ocean-going merchant ships in the world, of 100 tons gross and upwards.

The second volume (M–Z) also contains floating docks, liquefied gas carriers, ships carrying refrigerated cargo, refrigerated cargo containers, refrigerated stores and container terminals classed with Lloyd's Register and self-elevating drilling rigs, as well as lists of changes of ships' names and composite vessels.

The Register is kept up to date by means of cumulative monthly Supplements containing the latest survey records for all classed ships, and changes of name, ownership, flag, tonnage, &c., for all ships, whether classed or not. Each Supplement is accompanied by particulars of new entries to the Register—that is, new ships and ships of which the names have been changed.

A Weekly List of Alterations to the Register of Ships is also published.

List of Shipowners contains a list of owners and managers of the ships recorded in the Register with their fleets.

The Appendix contains lists of shipbuilders with existing ships they have built; marine engineBuilders and boilermakers; dry and wet docks; telegraphic addresses and codes used by shipping firms; marine insurance companies.

Statistical Tables are issued gratis to Subscribers to the Register Book.

REGISTER OF YACHTS Published annually in April, this volume contains in addition to detailed information relating to yachts classed by the Society, the names, dimensions, etc., of other British and overseas yachts, whose particulars are known; a list of one-design and restricted classes; national ensigns and list of sail numbers of various classes of racing yachts*; geographical list of yacht clubs; list and particulars of yacht and sailing clubs with the names of officers; index of signal letters; late names of yachts; names and addresses of yacht builders and designers; list of owners with their addresses, clubs and the names of their yachts.

***LIST OF NATIONAL AUTHORITIES AND SAIL NUMBERS OF RACING YACHTS** (as published in the Register of Yachts) may be purchased separately.

THE FLAG BOOKLET (new edition published in 1966). A comprehensive manual, in full colour, of yacht club burgees and defaced ensigns as well as the distinguishing flags of yachtsmen.

YACHT RULES

Vol. I—WOOD AND COMPOSITE YACHTS (Sailing, Auxiliary, and Full Power)
Vol. II—STEEL YACHTS
Vol. III—INTERNATIONAL RATING CLASSES
PROVISIONAL RULES FOR THE CONSTRUCTION OF REINFORCED PLASTIC YACHTS
A GUIDE TO MACHINERY AND ELECTRICAL EQUIPMENT IN YACHTS

REGISTER OF AMERICAN YACHTS

This Register is published annually in May from the Society's New York Office. Copies may also be obtained on application to the Manager, Lloyd's Register Printing House, Manor Royal, Crawley, Sussex, England.

This book contains the names, dimensions, and full particulars of the yachts of the United States and Canada, so far as they are ascertainable; reproductions in colour of the burgees of yacht clubs and the private signals of yachtsmen; a list of yacht clubs with the names of their officers; an index of signal letters; late names of yachts; and a list of yacht owners of the United States and Canada, with their addresses, clubs and yachts.

Also issued separately:—

Club Burgees and Private Signals (in colour).

RULES AND REGULATIONS FOR THE CONSTRUCTION AND CLASSIFICATION OF STEEL SHIPS, which contain the following:—

Chapter	
	REGULATIONS
A	General Rules and Regulations of Lloyd's Register of Shipping.
B	Classification Regulations.
C	Periodical Survey Regulations.
	CONSTRUCTION RULES
D	Steel Ships.
E	Pumping and Piping.
F	Fire Protection, Detection and Extinction.
G	Conditions for Survey of Machinery during Construction.
H	Main and Auxiliary Engines and Associated Machinery Components.
J	Boilers and other Pressure Vessels.
K	Spare Gear for Steam and Internal Combustion Machinery Installations.
L	Control Engineering Equipment.
M	Electrical Equipment and Electric Propelling Machinery.
N	Refrigerated Cargo Installations.
P	Materials for Ship Construction.
Q	Materials for Boilers, Pressure Vessel and Machinery Construction.
	Appendices giving lists of Approved Manufacturers of Materials and Testing Establishments.
R	Provisional Rules and Guidance Notes:
	(A) Methane Gas as fuel for the propulsion of Methane Tankers.
	(B) Plastic Pipes.
	(C) Classification of Nuclear Ships.
	(D) Metal Pipes for Water Services.
	(E) Torsional Vibration Stresses and Critical Speeds for Main and Auxiliary Oil Engines.
	(F) Classification of Floating Docks.
	(G) Propeller—Hull Clearances.
	(H) Repairs by Welding to Steel Castings for Crankshafts.

EXTRACTS FROM THE RULES—

	CONTENTS
No. 1	B and C
No. 2	B, C, D, and P (including Appendices)
No. 3	B, C, E, F, G, H, J, K, Q (including Appendices) and R (A, B, D, E, G and H)
No. 4	E, G, H, K, Q (including Appendices) and R (A, B, D, E, G and H)
No. 5	J, Q (including Appendices) and R (A and H)
No. 6	P
No. 7	L and M
No. 8	N (and Pumps, Main Items)
No. 9	P, Q (including Appendices) and R (H)

RULES FOR STEEL TRAWLERS

GEOMETRIC PROPERTIES OF ROLLED SECTIONS AND BUILT GIRDERS

Volume I British and U.S.A. Sections Volume II Metric Sections Volume III Japanese Sections

A series of curves giving section modulus and moment of inertia of a wide range of sections used in shipbuilding, in association with varying thicknesses of plating. The areas of sections (without plating) are also given.

ANCHORS—APPROVED DESIGNS

Comprising lists (1) in alphabetical order of Firms, (2) in alphabetical order of names (if any) of anchors, together with descriptive sketches. Revised and brought up to date, 1965.

FOREWORD

SPECIAL attention is directed to the necessity of consulting the latest issue of the monthly Supplement for up-to-date records of surveys held on ships classed with the Society.

The information published in this Register of Ships has been obtained from sources which are believed to be reliable, but the Society is unable to guarantee the accuracy of all the details included. In particular, it will be appreciated that, owing to lack of official information from the People's Republic of China, records of merchant ships registered in this country are not complete.

All ships at present classed by Lloyd's Register of Shipping are included in this book. Every effort is made to obtain and publish accurate details of all other merchant ships of 100 gross tons and above which are sea-going.

J. HUXSTER,

July, 1979 *Secretary*

Extract from the Society's Regulations:—

"The Committees of the Society use their best endeavours to ensure that the functions of the Society are properly executed, but it is to be understood that neither the Society nor any Member of any of its Committees nor any of its Officers, Servants or Surveyors is under any circumstances whatever to be held responsible or liable for any inaccuracy in any report or certificate issued by the Society or its Surveyors, or in any entry in the Register Book or other publication of the Society, or for any act or omission, default or negligence of any of its Committees or any Member thereof, or of the Surveyors, or other Officers, Servants or Agents of the Society."

KEY TO THE REGISTER OF SHIPS

Column 1

LR Monthly No.

The seven-figured number printed in bold type is used for automatic data processing, and will remain unchanged during the life of the ship.

Call Sign

Assigned by the national authority with which the ship is registered.

Official No.

The number on the register of the national authority.

Navigational aids and other equipment

DF	Direction finder
Ech	Echo sounding device
Gc	Gyro-compass
Pfd	Position fixing device
Rdr	Radar
RT	Radio-telephone
RTm	Radio-telephone (medium frequency)
RTh	Radio-telephone (high frequency)
RTv	Radio-telephone (very high frequency)

Column 2

Former Names

The figures following the former name of a ship indicate the year in which the change of name occurred.

Former names are retained in the Register throughout the life of the ship, and an index to those names is given at the end of the second volume of the Register of Ships.

Owners

The name recorded in **bold type** is that of the registered owner.

Managers

The managers of the ship are recorded if desired.

Port of Registry

A port printed in italic type is the home port of a ship and is shown where there is no known port of registry.

Flag

Indicates the national authority with which the ship is officially registered.

Column 3

TONS

Gross tonnage

The gross tonnage printed in **bold type** is measured according to the law of the national authority with which the ship is registered.

The measurement is, broadly, the capacity in cubic feet of the spaces within the hull, and of the enclosed spaces above the deck available for cargo, stores, passengers and crew, with certain exceptions, divided by 100.

Thus 100 cubic feet of capacity is equivalent to 1 gross ton.

Net tonnage

Derived from the gross tonnage by deducting spaces used for the accommodation of the master, officers, crew, navigation, propelling machinery and fuel.

For some ships not sailing under the British flag, the gross and net tonnages have been measured in accordance with British rules and are accepted under British law. In such cases the gross and net tonnages are printed in *italic type*.

Deadweight

The weight in tons of **2240lb** of cargo, stores, fuel, passengers and crew carried by the ship when loaded to her maximum summer loadline.

Shelter deck ships

C/SD/CSD in column 4 indicates that the ship is a shelter-decker having arrangements for facilitating ready conversion from the open to the closed shelter deck condition or vice-versa. In the open condition the greater part of the upper 'tween-decks space is exempt and not included in the tonnage; in the closed condition the upper 'tween-decks space is included and consequently the tonnages in the C/SD condition are greater than in the O/SD. When available, tonnages for both conditions are recorded in the Register, the smaller (O/SD) tonnages printed above the larger (C/SD) tonnages.

T.Mk (Tonnage Mark)

T.Mk in column 5 indicates that the ship has a Tonnage Mark painted, in addition to the Load Line marks, on each side of the ship aft of the Load Line Disc. In its simplest form the Tonnage Mark is a horizontal line with an equilateral triangle standing vertex down on it.

In cases of this kind when two sets of tonnages are recorded the set of smaller tonnages applies when the ship is not loaded beyond the draught indicated by the horizontal line of the Tonnage Mark, and the set of greater tonnages applies when the ship is loaded deeper

T.Mk (Tonnage Mark)—Continued

than that draught; the Load Line Disc is positioned higher on the ship's sides than the Tonnage Mark. The difference between the two sets of tonnages is in accordance with amended Tonnage Regulations now in force for some countries under which tonnages may be measured either excluding the greater part of the upper 'tween-decks space even without a tonnage hatch in the upper deck, or including the upper 'tween-decks space.

In other cases only one set of tonnages is recorded, or where the horizontal line of the Tonnage Mark on the ship's sides is level with the deepest load line, the ship may not therefore load beyond the draught indicated by the horizontal line of the Tonnage Mark. The tonnage is exclusive of the greater part of the upper 'tween-decks space and the draught is less than the maximum allowed under the Load Line Convention.

Ore/Oil carriers

Two gross and two net tonnages are also recorded, when available, for a ship which is designed to carry either ore or oil cargoes.

CLASSIFICATION

Classification Symbols of Lloyd's Register of Shipping

Hull and Equipment

✠	Denotes that the ship was built under the supervision of the surveyors in accordance with the Rules and Regulations of Lloyd's Register of Shipping.
100A1	Character of sea-going iron or steel ships classed with Lloyd's Register.
A1	Character assigned to ships intended to trade within sheltered waters such as harbours, rivers or estuaries. Prior to 1948 this character was also assigned for limited sea-going service.
A1	Character of wood or composite ships. The number prefixed to the character indicates the term of years for which the ship is at present classed.
Cont. or Rest.	Indicates continuation or restoration of class after the original term of years has expired. A number of years suffixed to the character, thus -8 yrs, indicates the period of extension granted.
1	The figure 1 in the character signifies that the ship has equipment of anchors, chain cables and hawsers in accordance with, or of a standard equivalent to, the Rule requirements for sea-going ships classed for unrestricted service or has equipment which is acceptable to the Committee for a special or restricted service. If, by reason of the ship's service, normal equipment is considered to be unnecessary, the figure 1 may be omitted from the character of classification.
-	This sign in the position usually occupied by the figure 1 indicates that the equipment of the ship is not in accordance with the full tabulated requirements, but is acceptable for the particular service.
with freeboard with list	Signifies that the freeboard assigned is a condition of the ship's class. The scantlings of ships built since 1968 are based upon a specified draught and this notation is no longer assigned.

Ice Classification

Ice Class 1* 1 2 3	Degrees of strengthening for navigation in ice.
Str. nav. ice	Strengthened for navigation in ice. This notation is no longer assigned, except for tankers, having been superseded by the Classes given above.

Classification Symbols of the British Corporation (unified with Lloyd's Register in 1968)

Hull and Equipment

✠	Denotes that the ship was built under the supervision of the surveyors in accordance with the Rules of the British Corporation.
ES	Hull and equipment of iron or steel ships classed according to British Corporation Rules.
ES (Comp)	Composite ships classed according to British Corporation Rules.
ESt ESa ESp ESd	Wood ship classed according to the British Corporation Rules and built of teak oak or wood of similar durability hard pine or wood of similar quality spruce or similar soft wood
(ES)	Equipment incomplete. Indicates that the equipment of the ship is not in accordance with the full tabulated requirements.
with freeboard with list	Denotes that the hull has been built with modified scantlings and arrangements approved for service in any part of the world at the assigned freeboards. This notation was discontinued in 1967.

Ice Classification

Ice Class A B C D	Degrees of strengthening for navigation in ice. Previously assigned to ships classed with the British Corporation.
Ice strengthening Ice stiffening	

The ice classification is shown in parentheses when it is temporarily suspended.

Abbreviations used in Classification notations

The expression "short international voyage" means an international voyage in the course of which a ship is not more than 600 miles from a port or place in which the passengers and crew could be placed in safety, and which does not exceed 800 miles in length between the last port of call in the country in which the voyage begins and the final port of destination.

APT	After peak tank
FPT	Fore peak tank
DT	Deep tank
DTs	Deep tanks
DTa	Deep tank aft
DTf	Deep tank forward
DTm	Midship deep tank
DTma	Midship deep tank aft
DTmf	Midship deep tank forward
TwD	Tween deck tank
(oc)	An approved system of corrosion control installed in the tanks indicated.
(cc)	Centre
b	Bridge
BR	Ballast room
DB	Double bottom
ER	Engine room
FP—°C.	Flash point in degrees Centigrade
FP—°F.	Flash point in degrees Farenheit
SG	Specific gravity

Machinery

LMC ✠LMC ✠LMC	Denotes that the machinery is classed with Lloyd's Register. The ✠ or ✠ signifies that the machinery was built under the supervision of the surveyors to the Rules of Lloyd's Register or of the British Corporation respectively.
(LMC) (✠LMC) (✠LMC)	When the LMC class is shown in parentheses, this indicates that the class has been temporarily suspended.
UMS	Denotes that essential machinery of the ship can be operated by remote and/or automatic control equipment with the machinery spaces left unattended.
(UMS)	When the UMS notation is shown in parentheses, this indicates that approval of the control equipment has been temporarily suspended.
MCS	Machinery classed according to British Corporation Rules. The ✠ or ✠ signifies that the machinery was built under the supervision of the surveyors to the Rules of the British Corporation or of Lloyd's Register respectively.
MCS ✠/✠	Machinery classed according to British Corporation Rules. Engines surveyed during construction by Lloyd's Register and boilers by British Corporation surveyors.
MCS ✠/✠	Machinery classed according to British Corporation Rules. Engines surveyed during construction by British Corporation and boilers by Lloyd's Register surveyors.

Refrigerated Cargo Installations

Lloyd's RMC ΦLloyd's RMC	Denotes that the refrigerated cargo installation of a ship is classed with Lloyd's Register. The Φ signifies that the installation was constructed under the supervision of the surveyors to the Rules of Lloyd's Register.	RMC RMC⊕	Denotes that the refrigerated cargo installation of a ship is classed under British Corporation Rules. The ⊕ signifies that the installation was constructed under the supervision of the surveyors to the Rules of the British Corporation.
Lloyd's RMC (LG) ΦLloyd's RMC (LG)	Assigned to a liquified gas carrier denoting that the refrigerating equipment for dealing with the boil-off gas is classed with Lloyd's Register.		
(Lloyd's RMC) (ΦLloyd's RMC) (Lloyd's RMC (LG)) (ΦLloyd's RMC (LG))	Where the Lloyd's RMC class is shown in parentheses, this indicates that the class has been temporarily suspended.	(RMC) (RMC⊕)	Where the RMC class is shown in parentheses, this indicates that the class has been temporarily suspended.

Special Surveys

SS-with date	Special Survey. Records of any later Special Survey and the latest records of all other periodical surveys are published in the monthly Supplement.	M-with date	Modified Special Survey, indicating that the ship has been surveyed for the appropriate Special Survey but repairs effected only for a limited period. The period for which the class is maintained follows the date.
D—with date	Special Survey including drilling of shell and deck plates.		
D/ 4yrs—with date	Special Survey including drilling of shell and deck plates. Another drilling will be required after an interval of 4 years from the date given or at the next Special Survey thereafter.	CS-with date	Continuous Survey of the hull.
		(Adv)-with date	As a result of a General Examination the date of Special Survey previously assigned has been advanced to the date now shown, the ship having meantime been continuously laid up.
TS	Special Survey at which the rule requirements for determining the thickness of the ship's structure by drilling or other means have been complied with. The record TS/4 indicates that the thickness of the structure is to be determined at intervals not greater than 4 years.	Lake SS	Periodical survey of ship classed for Great Lakes service.

Equipment Letter (EL)

A, A1, B*, etc.	Equipment Letters determined by the Society's Rules. These are followed by the diameter and grade of the chain cable on the ship.	SQ	Indicates that the ship is provided with special quality steel cable.
		ESQ	Indicates that the ship is provided with extra special quality steel cable.
U1 U2 U3	Grades of chain cable other than wrought iron or mild steel fire-welded defined in the Society's Rules.	FSWR	Indicates that the ship is provided with flexible steel wire ropes.
		WI	Indicates that the ship is provided with wrought iron cable.
a, b*, c*, etc.	Equipment Letters previously determined by the Society's Rules, but no longer assigned. The diameter of the chain cable is recorded only when it differs from that corresponding to the Equipment Letter or when it is of special quality steel.	C	Followed by a numeral or letter gives equipment numification according to British Corporation Rules, the numeral indicating the size of wrought iron cable in sixteenths of an inch. Where this notation is followed by the letter S and a second numeral, the latter indicates the diameter of steel cable in sixteenths of an inch.
(a) (b) (c*), etc.	The letters in parentheses are employed to determine the fees for Special Surveys on the hull and are not Equipment Letters. If there is no letter in parentheses, the Equipment Letter is to be used for determining the fee for a Special Survey of the hull.	CT	Followed by a number, indicates the gross tonnage of the ship calculated from the formula in the British Corporation Rules (1967), which is used for determining fees and equipment.

Withdrawal of Class

"LR (or BC) class withdrawn—Owners' request" indicates that when the Owners requested withdrawal of class from the Register Book, the rule requirements had up to that time been complied with.

"LR (or BC) class withdrawn" indicates that at the time of withdrawal of class from the Register Book, survey requirements had not been complied with.

"LR (or BC) class withdrawn—Reported defects" indicates that owing to reported defects, the ship was not entitled to retain her class in the Register Book.

Classification with other Societies

If a ship is classed with another society, the initial letters of the society, as shown below, are inserted in column 4.

AB	American Bureau of Shipping	JR	Yugoslav Register
BV	Bureau Veritas	NK	Nippon Kaiji Kyokai
CR (Taiwan)	China Corporation Register (Taiwan)	NV	Norske Veritas
GSHK	Deutsche Schiffs-Revision und Klassifikation	PR	Polski Rejestr
GL	Germanischer Lloyd	RI	Registro Italiano Navale
HR	Hellenic Register of Shipping	RS	Register of Shipping of the U.S.S.R.

HULL

Date of build

For a ship built under the supervision of Lloyd's Register surveyors, the year and month recorded indicate the date of completion of the Special Survey during construction.

When there has been an unduly long interval between the launching and the completion or commissioning of the ship two dates are recorded prefixed by Lch. and Cmpl. or Cmd. The abbreviation Rerrnd. means recommissioned.

Shipbuilders and Place of build

This records the shipyard where the hull of the ship was built, and not the contractor who accepted the order, nor the yard where the ship was fitted out.

Overall length

The extreme length in feet and inches of the ship as reported by the owners or obtained from other reliable sources. When this measurement is followed by the notation (ind. B) in parentheses, this indicates that the ship has a bulbous bow and the overall length recorded includes any protrusion of that bow. If the extreme length is not available the registered length, as given on the ship's Certificate of Registry, is recorded in italics thus *259.7*.

Extreme breadth

The extreme breadth is the maximum breadth to the outside of the ship's structure and in paddle ships includes the paddle boxes.

Maximum draught

In most cases this is the maximum summer draught exhibited, but in some ships of special construction the maximum draught is at the after end, and this figure is recorded. For ships employed on the Great Lakes and rivers, whose freeboards are assigned by Lloyd's Register, the summer draught in fresh water is inserted followed by the letters FW.

For OSE(C)SD ships, the summer draught in the open condition is recorded, followed by the draught in the closed condition.

For ships to which tonnage marks have been assigned, as indicated in column 3, the draughts recorded are those at the tonnage mark and the summer (maximum) load line respectively.

Length B.P. (between perpendiculars)

The distance in feet and inches on the summer load waterline from the fore side of the stem to the after side of the rudder post, or to the centre of the rudder stock if there is no rudder post.

Moulded breadth

The moulded breadth is the greatest breadth at amidships from load of frame to load of frame.

Moulded depth

The moulded depth is the vertical distance at amidships from the top of keel to the top of the upper deck beam at side.

Superstructures (with length in feet)

P	Poop
Q	Raised quarter deck
B	Bridge
F	Forecastle
H	Houses on deck (enclosures above with a tonnage capacity)
R dk	Raised deck
RAD	Raised after deck
RFD	Raised fore deck
RSD	Raised shelter deck

Decks

A dk	Awning deck
dk	Deck
fwd	Forward
Im	Iron-material of decks
Prom dk	Promenade deck
pt	Part
S dk	Shelter deck
St	Steel-material of decks
teak s	Teak sheathed (decks)
U dk	Upper deck
wo	Wood sheathed (decks)

Riveted/Welded

R	Riveted
RW	Riveted and welded

When neither of these abbreviations is given it may be assumed that the ship's hull is welded throughout.

Cargo Battens

NB (No Bearing) Cargo battens are not fitted

Bulkheads

APBH	After peak bulkhead
BH	Bulkhead(s)
FBH	Partial bulkhead
WT	Watertight
Coll	Collision
A dk	Awning deck
S dk	Shelter deck
U dk	Upper deck
W dk	Weather deck

Alterations

alt.	Altered
conv.	Converted (from)
lgn.	Lengthened
ND	New deck
pt.	Part

Rise of floor

rf Rise of floor (or deadrise). The height above the base line of the intersection of the line of bottom produced beyond the bilge at amidships, with the normal to the base line at half-breadth from the centre line.

Keel

BK	Bar keel
Box K	Box keel
DK	Duct keel

Water ballast

a	Aft
btm	Bottom
c	Centre
Comb.	Combined
DK	Deck (tank)
DT	Deep tank
DTs	Deep tanks
f	Forward
incl.	Including
m	Midship
t	Tons
TwD	Tween-deck tanks
WB	Water ballast, followed by the total water ballast capacity

CARGO CAPACITIES HANDLING

Description of Ship

Unless otherwise stated, ships are of steel construction. Where higher tensile steel is extensively used in the main hull structure of a ship classed with Lloyd's Register, a suitable note is inserted below the description of the ship.

The description of the ship given in this column is not a Lloyd's Register classification notation. This information is given by the owner or is obtained from other sources which are believed to be reliable.

For the purposes of the Register (1) a bulk carrier is a general purpose single deck dry cargo ship of over 10,000 tons deadweight with machinery aft and generally with hopper side tanks and topside tanks in the holds (2) a Container Ship, or part Container Ship, is one specially fitted for the carriage of containers in one or more holds, with large hatchways or with two or more hatchways abreast and fixed or portable guides to locate the containers.

Aux	Auxiliary (sailing ship with auxiliary machinery)
D-E	Diesel-electric
GT	Gas turbine ship
M	Motorship
P	Paddle
Q	Quadruple screw
S	Steamship
T	Twin screw
T-E	Turbo-electric
Tr	Triple screw
Comp	Composite construction
Bk	Barque
Bkn	Barquentine
Rg	Brig
Bn	Brigantine
Ctr	Cutter
Dy	Dandy
G	Galliot
Gl	Galleon
H	Hoy
K	Ketch
Kt	Kraff
Lr	Lugger
Sk	Smack
Sp	Sloop
Sst	Spritsail
Sr	Schooner
Trb	Trabaccolo
Yt	Yawl
Ref	Ship fitted with refrigerated cargo installation
CSD	Closed shelter deck ship
OSD	Open shelter deck ship
OSD/CSD	A shelter deck ship which has arrangements for both the open and closed condition. (See note under Tonnages, Column 3).
Mchy-aft	Machinery aft
Mchy-fwd	Machinery forward

No. of Passengers

The maximum number of passengers, as reported by the owners, is regarded thus: (36P).

In some cases the number of berths (berth) and deck (dk) passengers are recorded separately.

Holds

Where possible, hold lengths are given in order, commencing at No. 1 from forward.

Holds are measured from bulkhead to bulkhead and are given to the nearest quarter of a foot.

Ho	Hold(s)
comb.	Combined
DT	Deep tank
TwD	Tween-deck space
G.	Grain capacity in cubic feet. The capacity of cargo spaces, measured to outside of frames, to top of ceiling and to top of beams, including hatchways. (Insulated spaces are not included).
B.	Bale capacity in cubic feet. The capacity of cargo spaces, measured to inside of cargo battens, to top of ceiling and to underside of beams, including hatchways. (Insulated spaces are not included).
In.	Insulated capacity in cubic feet. Bale capacity of the insulated spaces in ships having refrigerated cargo installations. It is measured from the face of overhead, 'tween deck and tank top ceiltation lining, or the surface of 'tween decks where uninsulated; or from the face of brine pipes or air ducts; from the face of permanent cargo battens or air screens or air coolers or casings. Deductions are made for floor gratings which are part of the air circulation system, for pillars, stanchions and other fixtures which interfere with the cargo-carrying capacity, but not for loose or portable floor dunnage, or for portable bins or trays and their supports. The insulated spaces are not included in the grain and bale capacities.

Tanks

Ta	Tanks (the number of tanks is given).
L.	Liquid capacity in cubic feet. The maximum available cubic space is recorded no allowance being made for expansion.
HeCls. B	Heating coils in Bunkers
pt/B	Part Bunkers
HeCls. C	Heating coils in Cargo tanks
pt/C	Part Cargo tanks

Hatchways

Weather deck hatchways only are recorded. The sizes are given in order, where possible, commencing at No. 1 from forward.

Measurements to the inside of coamings are recorded. Where two hatchways can be combined to form one large hatchway, only the combined size is given, and the two hatchways counted as one. The total length is followed by the abbreviation "comb." Measurements are given to the nearest quarter of a foot. Unless otherwise stated, all hatch covers are made of wood.

Ha	Hatchway(s)
(alu.)	Aluminium
(iron)	Iron
(stl)	Steel
(w)	Wood
comb.	Combined

Winches, Cranes, Derricks

W	Winches (prefixed by the number of winches). Cargo winches only are recorded, and not those used for other purposes.
Cr	Cranes (followed by the number of cranes and, in parentheses, the stated safe working load in tons of 2240lb).
Der	Derricks (followed by the number of derricks and, in parentheses, the stated safe working load in tons of 2240lb).

MACHINERY

Engines, Bore and Stroke

a.c.	Alternating current
C	Compound expansion engines
(CC)	Constant current system
Cy.	Cylinders. The figure before Cy. indicates the number of cylinders and those which follow are the cylinder diameter and length of stroke
D	Diagonal engines
D.A.	Double acting. The number prefixed indicates the stroke cycle
d.c.	Direct current
dr	Double reduction gearing
E	Engine (without indicates that the engine now fitted has been used previously either in the same or in another ship)
elec.	Electric
Emy	Emergency
fp	Free piston
gen.	Generator(s)
H	Horizontal engines
HP	High pressure
IP	Intermediate pressure
kW	Kilowatts
L	Lever engines
LP	Low pressure
M.E.	Main engine
ME	New engine(s). (The ⊕ or ✱ indicates that the engine(s) fitted at the date recorded were built under the supervision of the surveyors to the Rules of Lloyd's Register or of the British Corporation respectively)
Q	Quadruple expansion engines
Ref	Engines fitted with reheaters
S	Simple expansion engines
SA	Single acting. The number prefixed indicates the stroke cycle
sc.	Screw
sr	Single reduction gearing
S.Turb.	Steam Turbine
(Sy)	Synchronous system
T	Triple expansion engines
tr	Triple reduction gearing
V	Volts
(W/L)	Ward Leonard system

Total Horsepower

For engines classed under Lloyd's Register or British Corporation rules, the horsepower recorded is the total maximum designed horsepower approved. In ships not classed with the Society the horsepower recorded is the total maximum service horsepower as reported by the owners or obtained from other reliable sources.

In diesel-electric or turbo-electric machinery, the total horsepower of the oil engines or turbines is recorded, together with the shaft horsepower of each electric motor.

bhp	Brake horsepower (oil engines)
ihp	Indicated horsepower (steam reciprocating engines)
shp	Shaft horsepower (turbines and electric motors)

Type

The type name of an engine is recorded when it has been built under licence.

Fuel Bunkers

The capacity of the bunkers is recorded in tons, followed by an indication of the fuel for which the machinery is fitted, as stated by the owners.

(c)	Burning coal
(d.o)	Burning diesel oil
(h.f)	Fitted for burning high viscosity fuel
(o.f)	Oil fuel

The coal capacity is the estimated capacity of all permanent bunkers. The oil fuel capacity is the estimated capacity of all spaces, including double bottom spaces, which are permanently fitted for the carriage of oil fuel and which have permanent provision for its use on board. The capacity of settling tanks is included. For tankers the tonnage of fuel used in one day is recorded thus: 62pd (per day). This figure is as stated by the owners.

Auxiliary electrical generating plant

The number of generators is given, followed by the kilowattage and voltage of each generator, the number of cycles (if an a.c. installation) and the type of current (a.c. or d.c.).

Emergency generators and sets used solely for harbour purposes are not recorded.

Special propellers

Only special type propellers are recorded, that is: directional, controllable pitch and Rivarted-type detail propellers. The fitting of propellers both forward and aft is also indicated.

Speed in knots

The speed recorded is that which the ship is stated to be capable of maintaining at sea in normal weather and at normal service draught.

Boilers

Information about boilers is recorded only for ships classed with Lloyd's Register or the British Corporation. When details of boilers are recorded in parentheses thus: (Aux6) 1935) this indicates that the boiler is temporarily out of use.

a	Air
Aux6	Boiler(s) supplying steam to auxiliary services essential to the operation of the ship at sea; but not supplying steam to the main propelling machinery
c	Centre
cf	Corrugated furnaces
Comp	Composite
dh	Domestic boiler(s) supplying steam for purposes not connected in any way with the operation of the ship at sea. Only recorded when working pressure and heating surface exceed 60lb/sq. inch and 50 square feet respectively.
DB	Double-ended boiler(s)
(el)	Electrically heated
e(ex.g)	Exhaust gas economiser
(ex.g)	Exhaust gas (boilers)
f	Forward
hs	Heating surface. The figure recorded is the total evaporative surface of boilers in square feet plus the total surface of superheaters (plus half the surface of economisers and is used for calculating the fees for periodical surveys of water tube boilers. Where the figures are recorded in parentheses they may represent only the heating surface of the boilers
htr	Heater
H'W'B	Hot water boiler(s)
-kg/cm²	Working pressure of boilers
-/b	
lever	Lever
N	New
n	
NB	New Boiler(s). (The ⊕ or ✱ indicates that the boilers fitted at the date recorded were built under the supervision of the surveyors to the Rules of Lloyd's Register or of the British Corporation respectively)
NAux6	
ndh	
N/WTB	
nwt(s)	
ND	Natural draught
(o.f)	Oil-fired boilers
p	Port side
pf	Plain furnaces
Prlb	Press boiler(s) or other pressure vessels used in connection with the preparation of oil, wool, etc., in a floating whale oil factory
rec	Receiver
rf	Ribbed furnaces
s	Starboard side
SB	Single-ended boiler(s)
sg	Steam heated steam generator(s) with working pressure
Sup-°F-lb	Superheater(s). The temperature is that of the steam at the outlet from the superheater(s) and the pressure is the working pressure at the superheater outlet.
upt	Upper
VB	Vertical boiler(s)
W'TB	Water tube boiler(s)
wtdh	Water tube domestic boiler(s)
