SUGGESTED IDENTIFICATION

U. S. Bureau of the Census. *U. S. Census of Business: 1948. Vol. VI: Service Trade—General Statistics.*
U. S. Government Printing Office, Washington 25, D. C., 1952

This volume replaces the 1948 Census of Business Subject Bulletins, Series 2-S.

PREFACE

This is one of a series of seven volumes presenting final results of the 1948 Census of Business for Wholesale, Retail, and Service Trades. Statistics for Service Trade are contained in two volumes—Volume VII, Area Statistics, and this volume. The Census, which was conducted by personal canvass of business establishments, was taken in accordance with the provisions of the act of June 19, 1948 (62 Stat. 478; 13 U. S. C. 121-123). This act provides for a Census of Business to cover the year 1948 and every fifth year thereafter. Previous business censuses covered the years 1929, 1933, 1935, and 1939.

Important to the conduct of the 1948 Census of Business was the assistance of many private and public organizations in the planning phase of the census and the excellent cooperation of some 3,000,000 business establishments in supplying the information required, as well as the work of the several thousand Census employees who participated in the field enumeration, editing, tabulation, and other census operations.

The advice of trade associations, individual businessmen, research and marketing organizations, and Government agencies was invaluable in determining the feasibility of collecting various types of data and the methods for minimizing the burden of reporting, as well as in determining the types of information which would be of greatest value. Because of budgetary and other limitations, it was not possible to collect all of the data recommended by these groups. Timely publicity given to the Business Census by business organizations, trade papers, local newspapers, and radio stations aided greatly in informing businessmen of the nature and objectives of the census and facilitated the collection of census reports.

The primary responsibility for the 1948 Census of Business was centered in the Business Division of the Census Bureau. Other divisions of the Bureau, particularly the Field Division and the Machine Tabulation Division, also had important functions in the census.

The Business Census was taken under the supervision of William C. Truppner, Chief of the Business Division. Harvey Kailin, Assistant Division Chief, Program Branch, was appointed Acting Chief January 2, 1951, to succeed Mr. Truppner who was detailed to the National Production Authority. Major contributions to the planning of the 1948 Census of Business were made by William A. Ruff, Assistant Chief, who retired January 1, 1948, and Earl D. Krickbaum, Chief of the Procedures and Processing Section until November 1, 1948.

The following personnel in the Business Division had important responsibilities in the census:

Max A. Bershada was Chief of the Statistical Methods Section. Henry Wulff, in charge of Quality Control, worked on field enumerating techniques, and office editing and tabulating procedures. Aaron Sabghir, in charge of Sampling Techniques, worked on the post-enumeration survey and measures of census coverage and accuracy.

Ralph C. Janoschka was Chief of the Service Trade Section and Marguerite V. Schneeberger was Assistant Chief. Members of the Service Trade Section chiefly responsible for preparing text and handling technical problems in the processing of reports and tabulations were W. Richard Boyce, Samuel Schechter, Joseph Berg, and Florence Butt.

Louis Greenberg was responsible for review of all text material and table forms, and assisted on publication problems.

M. D. Bingham, Chief of the Procedures and Processing Section, was subsequently appointed Assistant Division Chief, Processing and Management Branch. Louis Greenberg was Assistant Chief of the Procedures and Processing Section; Richard S. McCurdy, succeeded by R. M. Micolý in July 1949, and assisted by Jervis Braunstein, was in charge of the Directory Subsection, responsible for receiving report forms and the handling of special problems connected with multiunit firms. Katrina C. Morse, succeeded by Emerson Tubbs in July 1950, was Chief of the Service Trade Processing Subsection, and was in charge of editing, coding, and tabulating Service Trade reports. J. Stanley Werking participated in the design of forms and all problems of printing and preparation of material for publication.

In the Field Division, Jack B. Robertson, assisted by Arthur Cook, directed the field work for the Census of Business. Lancelot W. Armstrong, Machine Tabulation Division, assisted by Betty J. Shockey, was responsible for machine tabulation techniques and procedures; and Franklin L. Thatcher and Robert H. Brooks, Administrative Services Division, were responsible for the printing and publishing of the Census of Business.

OTHER 1948 CENSUS OF BUSINESS VOLUMES*

Volume I: RETAIL TRADE—GENERAL STATISTICS, PART 1

Chapter

1. United States Summary.
2. Sales Size.
3. Single Units and Multiunits.
4. Employee Size.
5. City Size.

Chapter

6. Legal Form of Organization.
7. Warehouses, Other Auxiliary Units.
8. Miscellaneous.
9. Territories (Alaska and Hawaii).

Volume II: RETAIL TRADE—GENERAL STATISTICS, PART 2, AND MERCHANDISE LINE SALES STATISTICS

Chapter

10. Merchandise Inventories.
11. Credit.
12. Selected Types of Operation.
13. Employment and Pay Roll.
14. Trucks.
15. Miscellaneous.
16. Merchandise Line Sales—Food Group.
17. Merchandise Line Sales—Eating and Drinking Places.
18. Merchandise Line Sales—General Merchandise Group, General Stores.

Chapter

19. Merchandise Line Sales—Apparel Group.
20. Merchandise Line Sales—Furniture, Furnishings, Appliance Group.
21. Merchandise Line Sales—Automotive Group and Gasoline Service Stations.
22. Merchandise Line Sales—Lumber, Building, Hardware Group.
23. Merchandise Line Sales—Drug and Proprietary Stores.
24. Merchandise Line Sales—Miscellaneous Kinds of Business.

Volume III: RETAIL TRADE—AREA STATISTICS

United States Summary

Area Statistics—Consists of 50 Chapters: One for each State,

one for the District of Columbia, and one for Territories (Alaska and Hawaii).

Volume IV: WHOLESALE TRADE—GENERAL STATISTICS AND COMMODITY LINE SALES STATISTICS

Chapter

1. United States Summary.
2. Sales Size and Operating Expenses.
3. Credit.
4. Sales by Class of Customer.
5. Legal Form of Organization.
6. Employee Size.
7. Trucks.

Chapter

8. Miscellaneous General Statistics.
9. Territories (Alaska and Hawaii).
10. Commodity Line Sales—United States.
11. Commodity Line Sales—Merchant Wholesalers.
12. Commodity Line Sales—Manufacturers' Sales Branches.
13. Commodity Line Sales—Assemblers.
14. Petroleum Bulk Stations and Terminals.

Volume V. WHOLESALE TRADE—AREA STATISTICS

United States Summary

Area Statistics—Consists of 50 Chapters: One for each State,

one for the District of Columbia, and one for Territories (Alaska and Hawaii).

Volume VII. SERVICE TRADE—AREA STATISTICS

United States Summary

Area Statistics—Consists of 50 Chapters: One for each State,

one for the District of Columbia, and one for Territories (Alaska and Hawaii).

INTRODUCTION

Scope of the census and area covered.—The 1948 Census of Business covers Retail, Wholesale, and Service Trades. Retail and Wholesale Trades in the Business Census correspond with minor exceptions to these trade divisions as described in the Standard Industrial Classification Manual, issued May 1949, under the sponsorship of the Bureau of the Budget, Executive Office of the President. The portion of the Services Division of the Standard Industrial Classification Manual covered by the census is indicated below in "Scope of Service Trade." All previous Business Censuses covered Retail and Wholesale Trades; Service Trades were first enumerated in the 1933 Census.

The 1948 Census of Business includes business establishments located in continental United States and the Territories of Alaska and Hawaii. Data for Puerto Rico, obtained in a Census of Business for 1949, are published separately. The 1939 Business Census covered the same areas as the 1948 Census, and, in addition, Puerto Rico. All earlier Business Censuses were conducted only in continental United States.

Period covered by the census.—The 1948 Census of Business is basically a report of business activity in the calendar year 1948. However, the relatively small proportion of establishments that maintained their records on a fiscal-year basis and were unable to report on a calendar-year basis, were permitted to use a fiscal year ending between September 30, 1948, and March 31, 1949. In a very few cases, reports were accepted for fiscal years not falling within this range. Regardless of the fiscal year used, all establishments were required to report employment and pay roll (except annual pay roll) for the pay periods specified on the report forms.

Method of canvass.—The 1948 Census of Business was conducted primarily by means of field enumeration. For purposes of enumeration, 308 Census field offices were established with responsibility for canvassing the some 37,000 enumeration districts into which the Nation was divided. Full-scale field operations for the 1948 Census of Business were begun near the end of May 1949, shortly following the principal appropriation of funds for the census. The field work was divided into two broad phases, each of which is described below. The listing of business establishments, phase 1, was completed late in September, about four months after starting full-scale operations. The collection of report forms, phase 2, was substantially completed by the end of November 1949.

Enumerators were required to list all recognizable businesses (except medical, dental, and law offices, government offices, and also farms), and in the course of listing, to go into each business establishment to record the

name of the business and of the owner, general kind of business conducted, whether the establishment was part of a multiunit organization, and other items required for subsequent operations. Each establishment was listed by the enumerator as encountered while systematically canvassing each city block and each road or highway in rural areas in a preassigned pattern. A separate Listing Book (section IV of which is reproduced in appendix E) was used for each enumeration district.

During the listing operation, phase 1, appropriate report forms were left with business establishments for subsequent return to Census District Offices by mail. In a small proportion of cases (usually small retail or service businesses) the completed Census form was obtained by the enumerator in the course of the listing operation. In the case of business establishments which were units of multiunit organizations no report form was left for completion, unless requested by the establishment. In general, the reports for establishments operated by multiunit organizations were prepared at the central offices of the organizations. The reports so obtained were checked against a card file prepared from enumerator listings, thus insuring completeness of multiunit organization reporting.

A large percentage of the business establishments with which reporting forms were left during the listing operation completed the forms and mailed them to the Census District Office without further contact from the Bureau. When necessary, reminder letters were mailed to establishments which had not submitted their report. Those establishments which did not file their report in response to the reminder letters were again visited by an enumerator who was instructed to secure the report.

To insure that the reports received were not only usable but met census quality requirements, a field office coding and editing operation was conducted. This operation, along with the follow-up activities to obtain reports not promptly submitted, became phase 2 of the field operation. All reports which did not contain required information together with those which did not meet other quality standards were held in the field offices until a further check could be made with respondents and the reports corrected as necessary.

Because the completeness of coverage of the census depended so largely on the quality of the work done by individual enumerators during phase 1 of the enumeration, considerable effort was expended in verifying and correcting this work.

First, the work of each enumerator was checked in the field by a crew leader or supervisor by recanvassing a sample of the work. Wherever the listing was found to

be unsatisfactory, the enumerator was given further instructions before being allowed to proceed.

Second, a complete card file of firms reporting to the Social Security Administration's Bureau of Old Age and Survivors Insurance was obtained. These cards were arranged by enumeration districts and within enumeration districts by street and road to facilitate checking the cards to the listing books. The cards were individually checked to the listing books and a record made of whether or not the firm was listed. A check was then made to determine whether firms not listed were still at the location indicated. If found to be at such location, they were added to the listing. Further, if more than a fixed percentage of listings so added were of readily recognizable places of business, the entire district was re-canvassed. This latter provision was necessary because the file included only establishments having one or more paid employees while the census included establishments having no employees. By re-canvassing completely those districts having a significant number of establishments included in the Bureau of Old Age and Survivors Insurance files missed by the enumerator, it was possible to minimize misses among establishments with no employees.

Third, when the field operations were substantially complete, but prior to closing the field offices, a careful check by counties was made to verify establishment totals which differed significantly from trends in neighboring counties or those with similar economic characteristics. This check did not disclose any systematic fault in the canvass.

One other step taken to insure completeness of coverage is worthy of mention. As indicated above, the census listing operation began in late May 1949, by which time a number of businesses active at the end of 1948 had discontinued operations. Because it was not always feasible to locate the 1948 owners of such businesses or to get a report of their 1948 activities, it was sometimes necessary to estimate their sales volume based on information supplied by the 1949 occupants or other sources. This procedure was used only to account for businesses properly within the scope of the 1948 Census.

The "Post Enumeration Survey" (PES), which was made after the completion of the enumeration, is discussed below. It provides measures of the undercoverage of business in the census which occurred despite the procedures noted above.

Scope of Service Trade.—The Standard Industrial Classification (S. I. C.) Manual describes the Services Division as including "establishments primarily engaged in rendering a wide variety of services to individuals and business establishments." Of the 15 major groups included in this division, the 1948 Census of Business includes the following 5 S. I. C. major groups, essentially in their entirety:

- 72. Personal services.
- 73. Miscellaneous business services.

- 75. Automobile repair services and garages.
- 76. Miscellaneous repair services.
- 79. Amusement and recreation services, except motion pictures.

Of the S. I. C. Major Group 70, "Hotels, rooming houses, camps, and other lodging places," the Business Census includes only hotels having six or more guest rooms and tourist courts having three or more rental units. Of the S. I. C. Major Group 78, "Motion pictures," the Service Trade portion of the Business Census includes only Industry 7831, "Motion picture theaters."

The following major groups of the Services Division, as presented in the Standard Industrial Classification Manual are excluded in their entirety from the scope of this Census:

- 77. Radio broadcasting (including facsimile broadcasting) and television.
- 80. Medical and other health services.
- 81. Legal services.
- 82. Educational services.
- 84. Museums, art galleries, and botanical and zoological gardens.
- 86. Nonprofit membership organizations.
- 88. Private households.
- 89. Miscellaneous services.

Comparison of 1948 and 1939 Service Trade scope.—

The most significant changes in scope of the Service phase of the Census of Business for 1948 from the scope of the 1939 Census are exclusion (in whole or in substantial part) of the 1939 Census groups entitled "Services allied to transportation" and "Custom industries" (including small manufacturing plants). Figures for 1939, as presented in this volume, have been adjusted to reflect these changes. Following is a list of the kinds of business in the 1939 Business Census which have been omitted from the 1948 Census:

- Custom industries (including small manufacturing plants):
- Awning and tent manufacturing establishments (including repair).
 - Bookbinding establishments.
 - Bottling works.
 - Cabinet making shops (including woodworking).
 - Cider mills and presses.
 - Grist mills.
 - Slaughtering establishments.
 - Machine shops (unless engaged 100 percent in repair work).
 - Metal-plating shops.
 - Neon-sign manufacturing establishments (including repairs).
 - Printing and publishing shops.
 - Sawmills and planing mills (including contract logging).
 - Tinsmith shops (unless engaged 100 percent in repair work other than construction repair).
 - Tire retreading shops (on a factory basis).
 - Wearing apparel contract work shops.
 - Welding shops (unless engaged primarily in repair work).
- Services allied to transportation:
- Packing and crating service.
 - Stevedoring service.
 - Stockyard service.
 - Warehousing, cold storage.
 - Warehousing, cotton.
 - Warehousing, farm products.

Services allied to transportation—Continued.

Warehousing, other.
Weighing service.

Other businesses :

Boat repair.
Circulating libraries.
Cotton compresses.
Dental laboratories.
Landscape gardening and tree surgery service.
Livery stables.
Travel bureaus (including ticket agents and brokers).

In addition to these omissions, a limited number of changes in definitions for individual kinds of business have been made between 1939 and 1948. These changes are described fully in the descriptions of the kind-of-business classifications shown in appendix B. Appendix C summarizes the comparisons between the 1948 classifications and the corresponding 1939 classifications.

Establishment basis of the census and kind-of-business classification.—Census of Business figures represent a summary of reports for individual "establishments" rather than for the combined activities of "companies." A separate report was obtained for each location at which business was conducted, including each location of multiunit organizations. Each report was tabulated in accordance with the physical location of the establishment. In addition to being classified on the basis of location, the report for each establishment was assigned a kind-of-business classification on the basis of the primary activity of the establishment during the census year. See appendix B for further explanation and listing of kind-of-business classifications.

Report forms.—Five report forms were used for enumerating Service Trade establishments. These were required because of the diversity of kinds of business included in this field. While, in most kinds of business, establishments were able to report on the general form (BC-40), special forms were designed for Hotels and Tourist Courts (BC-41), establishments in the Amuse-

ment field (BC-42), Automobile Repair Services and Garages (BC-43), and Laundries, Cleaning and Dyeing Plants, and Related Services (BC-47). Copies of these forms will be found in appendix E.

Standard metropolitan areas.—In addition to States, counties, and cities, Census of Business statistics are presented for standard metropolitan areas. These are areas which have been defined and established cooperatively by a number of interested Federal agencies under the direction of the Bureau of the Budget for purposes of compilation and presentation of a wide variety of statistical data on a uniform area basis.

The general concept adopted in defining a standard metropolitan area was one of an integrated economic unit with a large volume of daily travel and communication between a central city and the outlying parts of the area. This resulted in an area considerably more restricted, especially for the larger cities, than the "market" or "trading" area. Each area (except in New England) consists of one or more entire counties. In New England, metropolitan areas have been defined on a town rather than a county basis. A complete statement of the principles adopted as a guide in applying this general concept to the definition of individual areas will be found in a document issued by the Bureau of the Budget, Executive Office of the President, dated July 28, 1950, entitled "Standard Metropolitan Area Definitions."

The 147 standard metropolitan areas for which 1948 Census of Business data are included in the Area Statistics Volumes are those defined by the Bureau of the Budget as of June 5, 1950, on the basis of 1950 population statistics available at that time. Subsequent to the preparation of Census of Business tabulations, the list of metropolitan areas was increased to 168 areas. The list of 147 standard metropolitan areas included in the Census of Business and the description of the territory which they cover will be found on page 26. These areas are also shown on the map on page 28.

THE POST ENUMERATION SURVEY

To permit an appraisal of the accuracy of its published statistics, the Bureau of the Census conducted an intensive investigation, on a sample basis, of the 1948 Census of Business enumeration. This investigation, known as the Post Enumeration Survey (PES), was designed primarily to measure the completeness of coverage of wholesale, retail, and service establishments in the 1948 Census.

Strict precautions were taken to make the PES an independent and objective check of the census enumeration. The location of the sample areas, which the PES was to cover, was not revealed to the Bureau's field organization until after the census enumeration had been certified as completed and records concerning the enumeration returned to Washington.

Census concepts and procedures.—The 1948 Census of Business was defined as a census of "recognizable" establishments which would provide a measure of the volume of sales of such establishments in 1948 and of the number of their employees. "Recognizable" establishments, for census purposes, were defined as all establishments with one or more employees whether or not "recognizable" as business places, as well as no-employee establishments which, because of appearance, sign, or marking, were recognizable to enumerators as business places.

The 1948 Census, by definition, excluded from the count of establishments those which were in business during 1948 but which went out of business before December 31, 1948. The 1948 sales of such establishments, referred to subsequently as "part-year" establishments, also were omitted from the census except in a relatively few cases where a successor establishment included in its Census report its own 1948 sales volume and that of its predecessor, i. e., the "part-year" establishment, and also in those cases where multiunit organizations supplied data on business units which had been discontinued during 1948.

The census enumeration was initiated by a listing operation in which Census enumerators in each of their enumeration districts were required to enter in a Listing Book the name, owner, address, major category of business, etc., for each recognizable place of business. Because of a delay in the appropriation for the census, the full-scale listing operation did not begin until almost June 1949 and was not substantially completed until late September 1949. As will be indicated later, a portion of the census "undercoverage" is attributable to the unavoidable delay in the start of the listing operation.

Analysis of PES data for coverage.—The program of analysis of PES data with respect to coverage has been designed to answer the following questions:

1. What is the extent of census "undercoverage" resulting from the failure of Census enumerators to list business establishments?
2. What is the extent of net census "undercoverage" resulting from the omission of establishments which were in business as of the end of 1948 but went out of business before the enumerator-listing operation was conducted and from the erroneous inclusion in the census of establishments which entered into business in 1949?

A separate PES report, planned for later issuance, will provide additional measures including (1) a measure of the 1948 sales volume not in the census because of the definition excluding "part-year" business, (2) a measure of differences in the 1948 sales and employment reported in the census and, subsequently, in the PES, and (3) a measure of differences between the census and PES in establishment classification (that is, whether an establishment was classified as "service" or as "other than service").

Design and procedures of the PES.—The PES had the following features which were introduced with the aim of assuring accurate measurement of coverage error:

1. The area sample for the PES consisted of about 2,500 small areas (segments) ranging in size from part of a building and part of a city block to an entire town or village. These segments were located in about 530 counties throughout the United States. This sample, drawn on a probability basis, was designed to include about 1 in 200 of the service establishments in the United States. Within the sample segments, enumerators were instructed to make a thorough field search for establishments missed in the census. As an aid to this search, special mapping materials, including Sanborn maps which show and describe individual structures, were provided.

2. The re-enumeration procedure was entrusted to a relatively small group of highly selected and specially trained interviewers. Prior to the canvass of each segment, the interviewer was provided with the general Census listings for the enumeration district in which the segment was located. He was also provided with Social Security Administration (BOASI) establishment cards for the district. In canvassing the segment the interviewer had to account for all in-segment addresses whether or not they were included on the Census listings or in the BOASI cards. Also, the interviewer had to write, in effect, a business history of the segment for the period January 1, 1948, to the date of his recanvass. He was required to obtain a listing of all the occupants of each business address in the segment for that period. The interviewer was instructed to obtain for each occupant sufficient information on the nature of the business activity to permit a classification into four major types: (i) wholesale, (ii) retail, (iii) service, (iv) other, i. e., not in the scope of the Census of Business. Finally, for each occupant in the first three classes, the interviewer was required to obtain from the best possible respondent information on 1948 sales and employment.

3. The materials obtained during the PES field work were thoroughly reviewed and a careful re-examination made of the Census listings to make sure that every establishment treated as missed in the census or erroneously included properly belonged in these categories.

PES findings on coverage of service establishments.—The estimated undercoverage in the census enumeration of service establishments, because of (1) the failure of enumerators to list service establishments—“enumerator misses” and (2) omission of establishments in business on December 31, 1948, which went out of business in 1949 before the Census listing was begun—“late start of listing,” was determined through the PES analysis to be 3.0 percent of the 1948 sales volume and 1.7 percent of the November 15, 1948, employment.

The PES data further indicate that this undercoverage was produced primarily by the failure to canvass or list small establishments. The omitted service establishments had, on the average, 0.6 paid employees on November 15, 1948, as against 3.2 paid employees for the enumerated service establishments. Saleswise, the situation is similar. The omitted service establishments had, on the average, sales of \$8,000 in 1948 as against \$20,000 for the enumerated service establishments. In terms of number of service establishments they represented 8.2 percent of the 1948 Census total.

The following table indicates the undercoverage caused by “enumerator misses” and by “late start of listing,” respectively:

Component of undercoverage	Undercoverage of service establishments (as percent of census total)		
	Sales	Employment	Number of establishments
Total.....	3.0	1.7	8.2
Enumerator misses.....	2.4	1.2	5.8
Late start of listing.....	0.6	0.5	2.4

Interpretation and limitations of PES undercoverage findings.—The PES findings are subject to the following limitations:

1. The estimate of undercoverage of the total number of establishments is subject to a sampling error of approximately 0.6 percent; that is, the chances are 2 out of 3 that the “percent of Census total” estimates will not differ by more than 0.6 percent, absolutely, from the true value. The sampling errors of the estimates of undercoverage of sales and employment are approximately 0.6 and 0.4 percent, respectively.

2. The “undercoverage” measures above refer only to losses occasioned by “enumerator misses” and the “late start of listing.” These measures do not account for any differences which a change of census definition might cause (e. g., a change which would include establishments which went out of business in 1948); or for any differences resulting from differences in census and PES scope and kind-of-business classifications; or from differences in the reporting to the census and PES of 1948 sales volume or employment.

Measures of undercoverage of retail and wholesale establishments will be found in the PES discussion in volumes I and IV, respectively, of the 1948 Census.

SUMMARY OF FINDINGS

1939-1948 Comparisons

From 1939 to 1948 there was a decrease of approximately 10,000 personal, business, and repair service establishments, 1.9 percent of the total number reported for 1939. In evaluating this change, it should be observed that not only were there significant differences in individual kinds of service businesses from 1939 to 1948, but that procedural differences in the 1939 and 1948 censuses had important effects on the count of establishments.

In the 1939 census, establishments with annual receipts volume under \$100 were excluded from the tabulations, but in 1948 the cut-off level was raised to \$500. This change affected mostly the count of establishments in the personal service and miscellaneous repair service groups in such businesses as barber shops; beauty shops; hand laundries; pressing, alteration, and garment repair shops; shoe repair shops; blacksmith shops; bicycle repair shops; and locksmith and gunsmith shops, which contain many very small enterprises. In the 1939 census, there were approximately 133,000 establishments in the under \$1,000 receipts category with total receipts of about \$76 million, or \$572 per establishment. Even after adjustment for difference in price level between 1939 and 1948, a number of establishments included in 1939 would not have met the 1948 specifications.

The 1948 census avoided "splitting" of establishments, which, particularly for such trades as barber shops and beauty shops, led to a higher count of establishments in the 1939 census. In the 1939 census lessees of "chairs" or "booths" were counted as separate establishments, but in the 1948 census a consolidated report was prepared for a business place, even though for some purposes each barber or beauty shop operator who leased a chair or booth could have been considered as an individual entrepreneur.

Despite the decrease in number of personal and miscellaneous repair service establishments covered by the 1948 Census of Business, there was an increase of 163.3 percent in the dollar volume of business for the year 1948 compared with 1939; the increase of 18.7 percent in paid employees and active proprietors of unincorporated businesses; and the increase of 195.4 percent in annual pay roll. Table A, below, presents the percentage changes by kind of business for the country as a whole.

TABLE A.—PERCENTAGE CHANGE, 1939 TO 1948—SELECTED KINDS OF BUSINESS, UNITED STATES

While a net increase of 12.1 percent in the total number of amusement enterprises is indicated in table A, above, examination of the kind-of-business detail presented in Table 1B, page 1.04, shows a decrease of more than three thousand in the number of billiard and pool parlors, and a decrease of more than a thousand dance halls, both of which are largely a result of definition changes. In the case of billiard and pool parlors, the definition was changed to include in the Retail phase of the Business Census those establishments reporting receipts from the sale of merchandise (including food and beverages) in the amount of 50 percent or more of their total receipts, compared with 75 percent in the 1939 census. For dance halls a more rigid definition of private dancing schools (which were not to be included in this classification in either census) mainly contributed to the decrease.

Tourist courts with an increase of 91.7 percent in number, 432.4 percent in receipts, 144.6 percent in employees, and 434.9 percent in pay roll gained proportionately more than hotels, which showed only a nominal increase in number, and a percentage increase in receipts volume somewhat below the levels of many other fields of economic activity. Average receipts per hotel increased only 137.6 percent as against the 177.7 percent increase in the average receipts per tourist court.

Per Capita Expenditures in Service Trade

A measure of the importance of the service trades in the economy of the Nation is the average expenditure for services per person. Inasmuch as the activities of business services ordinarily are not directly concerned with the household consumer as are those of personal and repair services, places of amusement, hotels, and tourist courts, they are omitted from this discussion. For the service trades included in the scope of the census, other than business services, total receipts in 1948 were \$12.0 billion, representing a per capita expenditure for the United States of \$82.10. Motion picture theaters received the largest share, with power laundries and general automobile repair shops next in order. Personal services, however, was the most important single group, ac-

counting for \$30.40 of the total per capita expenditure of \$82.10. The increase in per capita expenditures between 1939 and 1948, a period when the population increased by 12 percent, was 118 percent. However, changes in price levels accounted for a considerable part of this increase. Table B, below, shows how various kinds of service businesses shared in the growth in per capita expenditure.

TABLE B.—PER CAPITA EXPENDITURES, SELECTED KINDS OF BUSINESS—UNITED STATES, 1948 AND 1939¹

Kind of business	Per capita expenditure		Percent increase, 1939 to 1948
	1948	1939	
Personal services, total.....	\$30.40	\$13.92	118
Barber shops.....	2.77	1.76	57
Beauty shops.....	2.86	1.77	62
Cleaning, dyeing plants (excluding rug cleaning).....	5.53	1.40	295
Funeral service, crematories.....	3.92	2.00	96
Photographic studios (including commercial photography).....	1.45	0.49	196

Other amusements.....	7.57	2.49	204
Hotels.....	14.88	6.60	125
Tourist courts.....	1.34	0.28	379

¹ Per capita figures based on Census of Business data for 1948 and 1939 and estimated population figures for the same years.

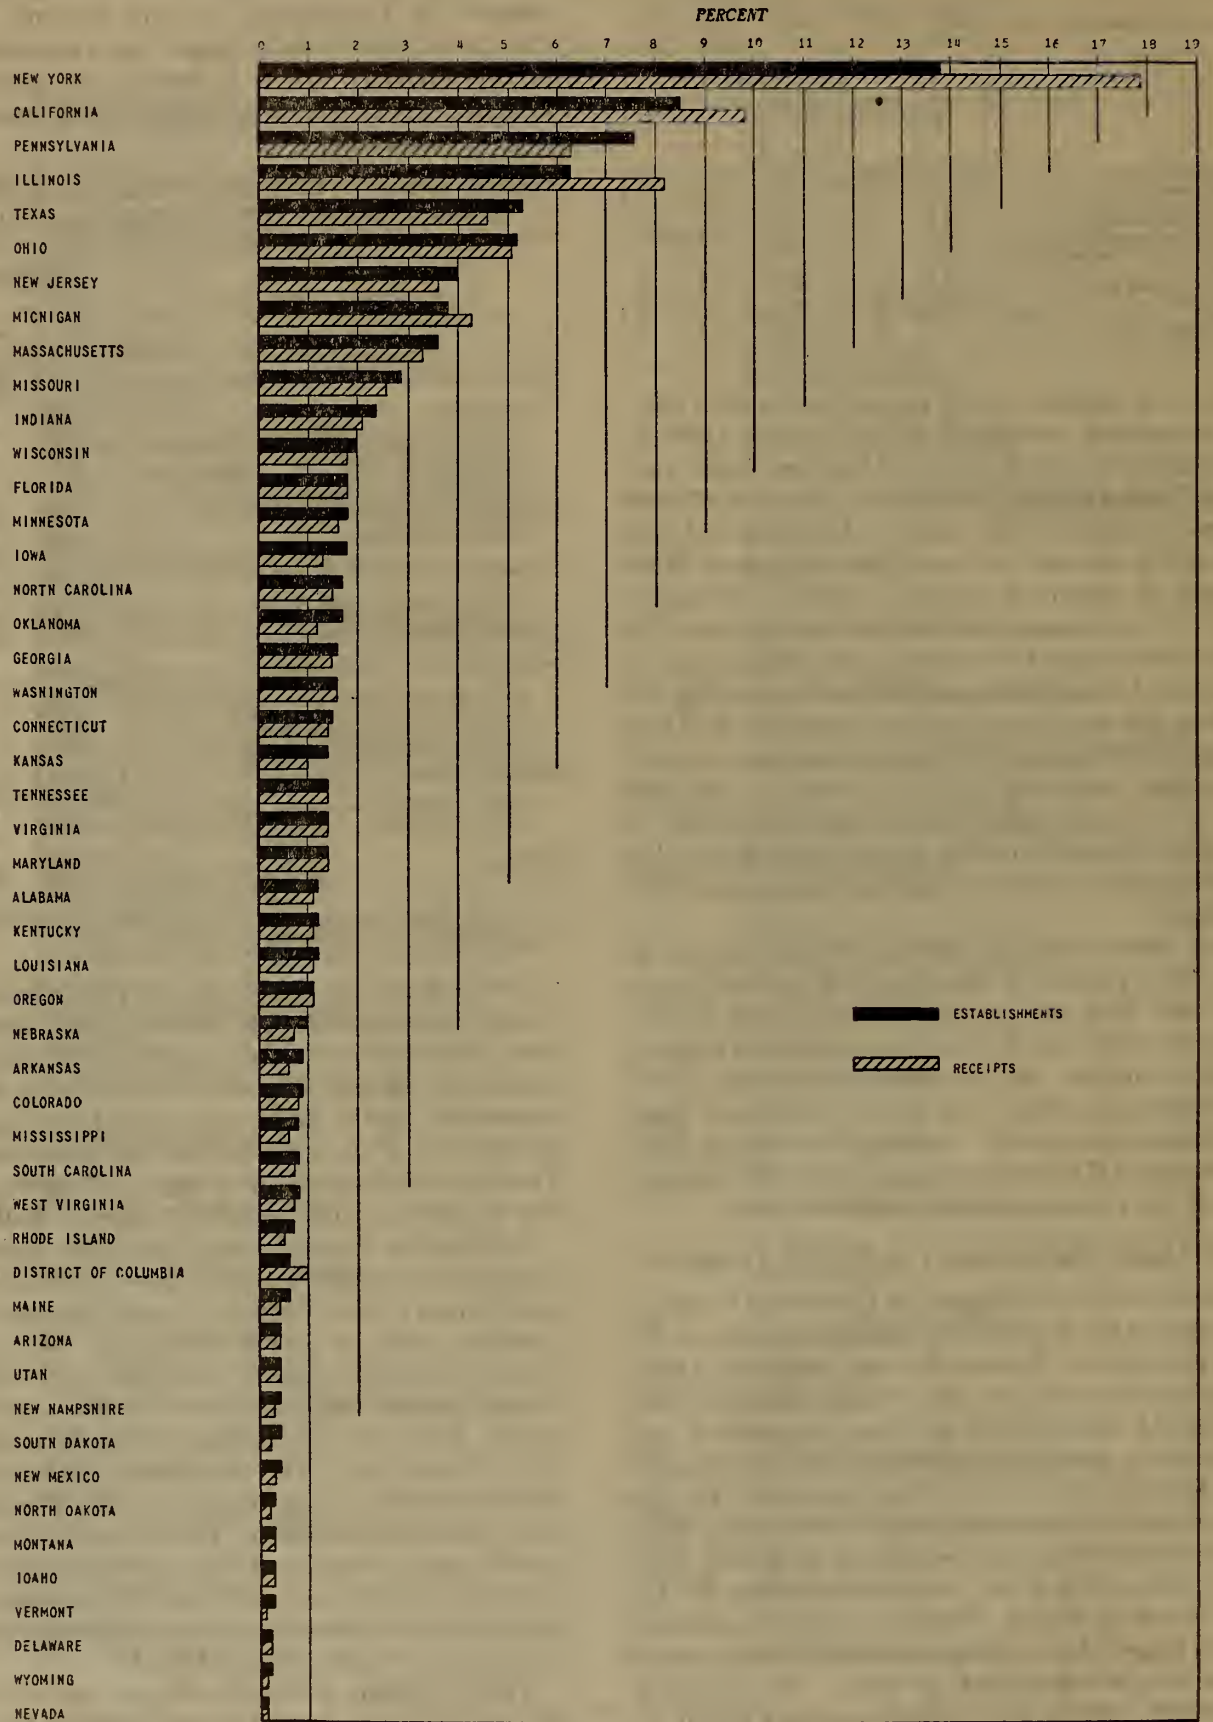

² Includes admission taxes.

Cleaning and dyeing plants and power laundries had become more important recipients of public patronage by 1948, while barber and beauty shops were relatively less important. Repair services, particularly the specialized automobile repair shops, accounted for a significantly greater part of the consumer's dollar in the later census. Tourist courts made the greatest gain of any major group, but its share of public spending was still small.

It should be observed that, if per capita figures on expenditure for "services" rather than in service businesses are desired, a small deduction should be made for merchandise sales by service businesses (see section on Source of Receipts, below), but that a substantial addition of service receipts of retail stores also should be made. Retail stores reported receipts from services of \$2.9 billion in 1948. This represented a per capita expenditure of \$19.94. More than half of this amount was for the repair of automobiles. The service receipts of automobile repair shops, and the service receipts of retail automobile dealers and gasoline service stations together accounted for an annual per capita expenditure for automobile repairs and services of \$21.47.

Table C, below, shows the distribution of repair and service receipts in several related kinds of business and

PERSONAL, BUSINESS, AND REPAIR SERVICES—PERCENTAGE DISTRIBUTION OF ESTABLISHMENTS AND RECEIPTS, BY STATE, 1948

kind-of-business groups as between retail stores and service establishments.

Geographic Distribution of Service Trade

A significant characteristic of the 1948 Service Trade activity in the United States was its geographic concentration in a relatively few States and metropolitan areas. These States and areas were places of high population density and generally high per capita income. Table D, below, shows the extent of this concentration for personal, business, and repair services.

TABLE D.—AREA CONCENTRATION OF RECEIPTS—PERSONAL, BUSINESS, AND REPAIR SERVICES, 1948

Area	Personal services	Business services	Automobile repair services and garages	Miscellaneous repair services
	Percent	Percent	Percent	Percent

Remainder of the United States.....	66.8	40.7	72.0	66.5

Receipts of personal service establishments, such as barber and beauty shops, funeral service, photographic studios, and shoe repair shops, were distributed geographically in a similar pattern to population. However, the large centers had a somewhat higher proportion of the receipts of all personal service business. The six metropolitan areas listed above had 21 percent of the population (1950 census) and 33 percent of the personal service receipts. The six States in this table had 40 per-

cent of the population and 48 percent of the receipts. The six metropolitan areas in the above table also accounted for 25 percent of all dry cleaning receipts and 31 percent of the power laundry receipts.

Business services were largely concentrated in industrial and commercial centers convenient to their customers or clients. The six large metropolitan areas accounted for 59 percent of all business service receipts in 1948. The New York-Northeastern New Jersey area alone accounted for nearly one-third of all business service activity. However, in the case of such business services as advertising agencies and news syndicates, receipts frequently are credited to the main office and do not measure activities of local offices of the organizations in other cities.

Except in the case of tourist courts (see table E below), receipts of automobile repair service businesses were less concentrated in the large metropolitan centers than those of the other major groups of service business. However, certain kinds of business in this group are found principally in large cities. For example, the New York-Northeastern New Jersey Metropolitan Area accounted for 16 percent of automobile rental receipts, 40 percent of storage garage receipts, and 17 percent of auto laundry receipts.

Inasmuch as the function of most of the establishments in the miscellaneous repair services group consisted largely of services performed for individuals, their geographic distribution was much the same as that of personal services. However, this group contained a large residual, "Other repair shops, not elsewhere classified," which consisted largely of repair services for business concerns. The New York-Northeastern New Jersey Metropolitan Area accounted for 15 percent of all receipts for these shops. Texas and California accounted for 27 percent, much of which was attributable to establishments engaged in the repair of oil well equipment.

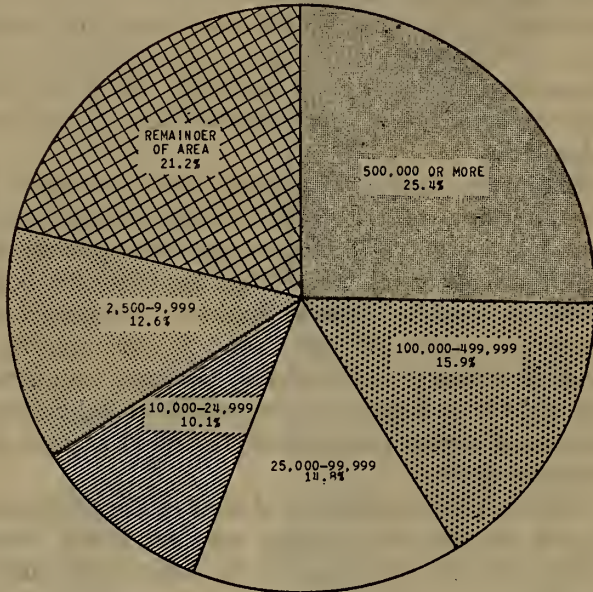

Table E below, demonstrates the degree of concentration of places of amusement, hotels, and tourist courts in the United States.

TABLE E.—AREA CONCENTRATION OF RECEIPTS—AMUSEMENTS, HOTELS, AND TOURIST COURTS, 1948

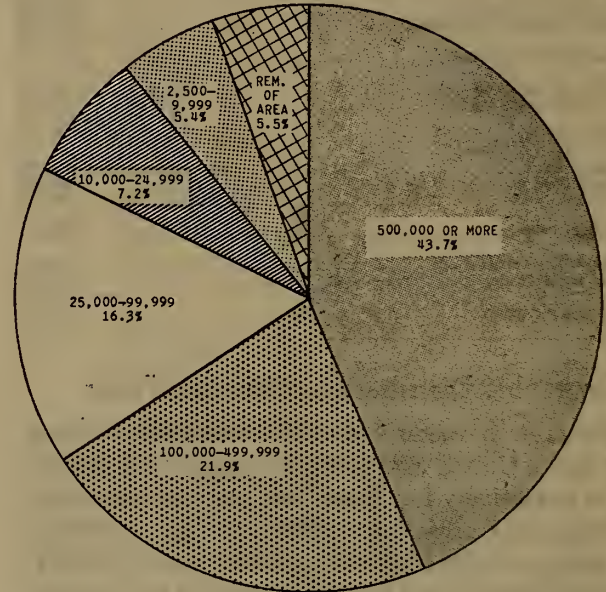

Area	Amusements	Hotels	Tourist courts
	Percent	Percent	Percent

SERVICE TRADE—DISTRIBUTION BY CITY-SIZE GROUP, 1948

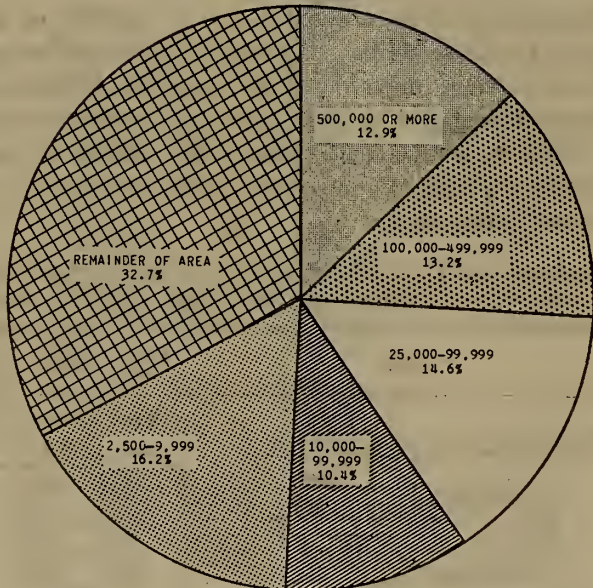

PERSONAL, AUTOMOBILE, AND MISCELLANEOUS REPAIR SERVICES
(527,552 establishments)

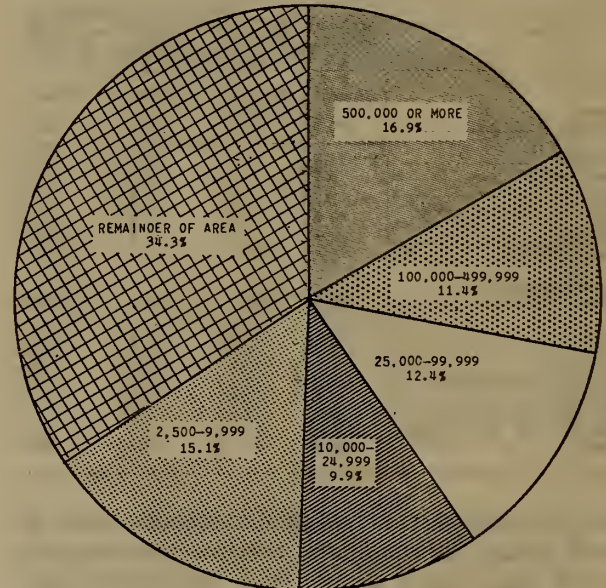

BUSINESS SERVICES
(32,007 establishments)

HOTELS
(29,650 establishments)

AMUSEMENTS
(50,347 establishments)

In each segment the arrangement of data is as follows:
City-size group (number of inhabitants),
Percentage of establishments located in city-size group.

A comparison with the corresponding table for personal, business, and repair services reveals that while amusements and hotels followed a similar pattern of concentration as personal services, tourist courts were quite differently distributed and were mainly outside the larger metropolitan areas.

Motion picture theaters, which reported over half of all amusement receipts in 1948, were distributed similarly to population, but certain other kinds of amusements did not show the same degree of correlation. For example, 17 southern States reported 37 percent of the Nation's receipts for billiard and pool parlors but only 21 percent of all amusement receipts. The Chicago Metropolitan Area, with 5.8 percent of all amusement receipts, reported 12.4 percent of all bowling alley receipts. Theaters and theatrical producers (excluding motion picture) were concentrated in the New York-Northeastern New Jersey Metropolitan Area, which had 57 percent of the receipts for this kind of business.

While illegal gambling receipts were excluded from the Census of Business, Nevada's legalized gambling establishments reported net receipts of \$28 million in 1948, 90 percent of all amusement receipts in that State.

The large States and metropolitan areas had approximately the same proportion of hotel receipts as personal service receipts. However, there were marked concentrations of hotels in the Miami and Atlantic City metropolitan areas, which reported 2.2 percent and 1.8 percent, respectively, of the \$2.2 billion receipts for 1948.

Seasonal hotels in the three States of New York, New Jersey, and Florida reported 54 percent of all seasonal hotel receipts in 1948. Other concentrations of seasonal hotels were in the northern border States from Maine to Minnesota; the western States of Wyoming, Colorado, and Arizona; and the coastal States of Maryland, Virginia, and California.

Tourist courts differed from the other service groups in that they were largely concentrated in the West. Eleven western States in 1948 reported 43 percent of the Nation's tourist court receipts. California alone accounted for 18 percent. In New Mexico, tourist courts reported receipts amounting to two-thirds of the volume reported by New Mexico hotels. In contrast, tourist courts in the eastern States reported receipts volumes ranging from 1 to 16 percent of the receipts of hotels in these States.

City-Size Distribution of Service Trade (Tables in Chapter 4)

As previously indicated, there was a tendency for service trade to be concentrated in large cities. However, this was not the case for some kinds of personal and miscellaneous repair services, such as barber and beauty shops and radio repair shops. On the other hand, most business services were located in large cities, in order to be near to their commercial and manufacturing clients. Certain other kinds of business, such as storage

garages, also were concentrated in large urban centers because they served needs peculiar to cities.

In this volume several tables are provided in which various groupings of service industries were classified according to the population of the city in which they were located. Tourist courts, since they were, for the most part, located in suburban areas or along highways, were not included in the tables.

A measure of the extent to which groups of service trades were concentrated in cities is the proportion of receipts reported by the establishments in the respective city-size groups. Table F, below, presents these data for four major groups of service trades.

TABLE F.—DISTRIBUTION OF RECEIPTS—PERSONAL, BUSINESS, AND REPAIR SERVICES, BY CITY-SIZE GROUP, UNITED STATES, 1948

City-size ¹ (number of inhabitants)	Personal services	Business services	Automobile repair services and garages	Miscellaneous repair services
	Percent 100.0	Percent 100.0	Percent 100.0	Percent 100.0
United States, total.....				
500,000 and over.....	32.5	67.7	27.0	29.7
250,000 to 499,999.....	9.2	9.3	9.4	8.7
100,000 to 249,999.....	11.1	9.0	11.4	10.6
50,000 to 99,999.....	9.1	4.6	7.7	9.0
25,000 to 49,999.....	8.8	3.4	6.6	7.0
10,000 to 24,999.....	10.4	2.7	8.0	10.0
5,000 to 9,999.....	6.3	0.9	4.6	5.6
2,500 to 4,999.....	4.1	0.5	3.4	3.7
Remainder of United States.....	8.5	1.9	21.9	15.7

¹ Based on advance 1950 population estimates.

The kinds of business included in business services were for the most part located in the large cities. Employment agencies, advertising agencies, and news syndicates had receipts of 73 percent, 85 percent, and 99.6 percent, respectively, in cities with 500,000 inhabitants or more. However, because receipts of certain business services such as advertising agencies are frequently credited to the main office of the organization, they do not adequately measure the activity in local offices of the organization which may be in smaller cities.

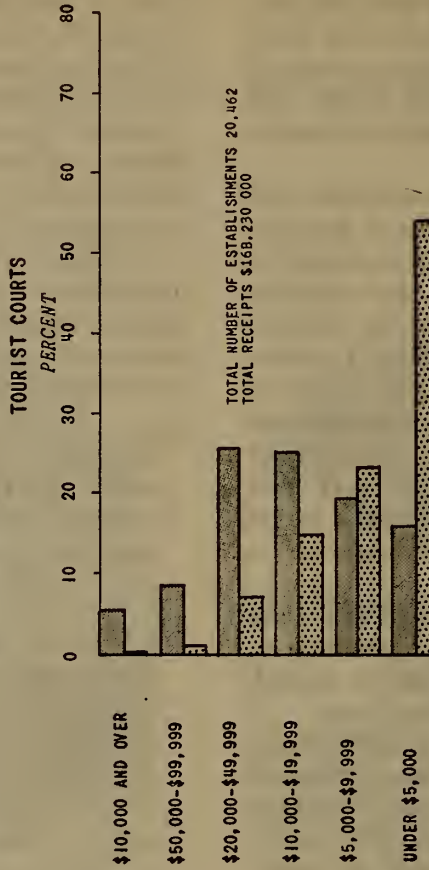

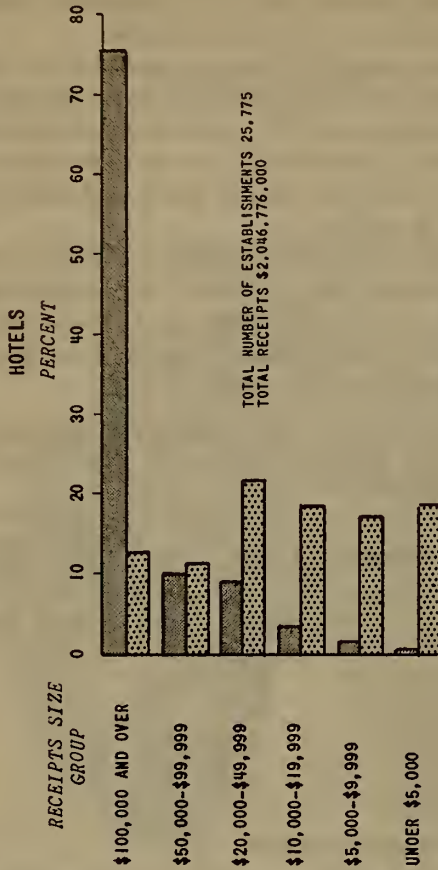

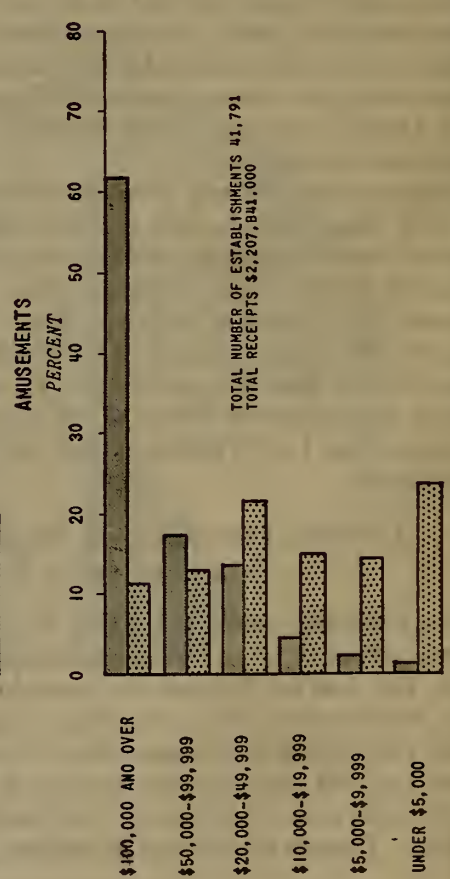

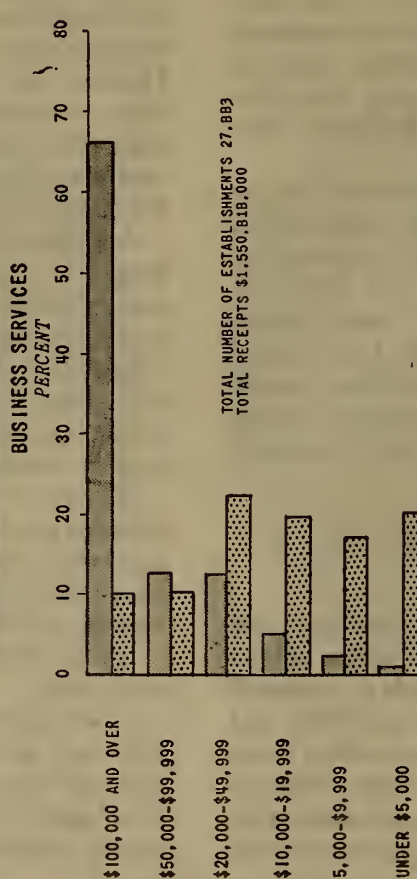

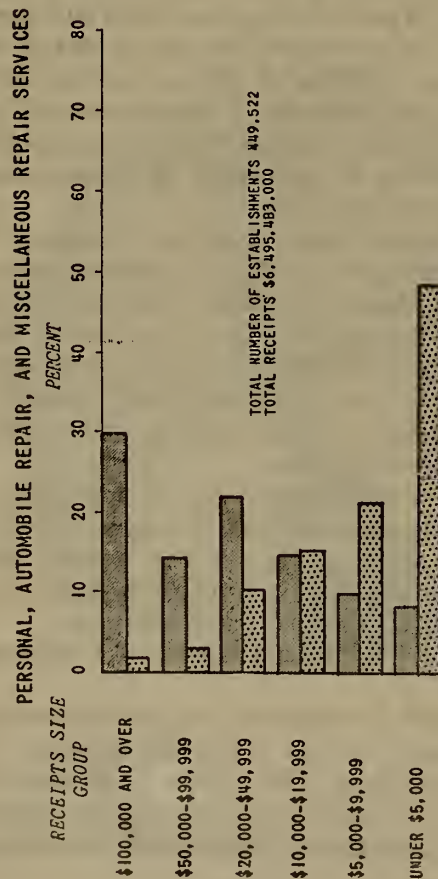

Automobile repair shops were less concentrated in larger cities than were any of the other three groups of service trades. However, several kinds of business in this group do show the big-city concentration. Establishments in cities of 500,000 or more reported 51 percent of receipts for all auto rental agencies, 72 percent for storage garages, 55 percent for parking lots, and 52 percent for automobile laundries.

Receipts of miscellaneous repair services were distributed similarly to those of personal services except for blacksmith and welding shops, which reported 56 percent and 28 percent, respectively, of all receipts from the "remainder of United States" (rural sections).

Table G below, provides city-size data for amusements and hotels.

It will be noted that hotels show a greater concentration than personal services in two size groups: Cities over 500,000 and places of fewer than 2,500 inhabitants. The hotels in rural areas were mainly resort establishments, some with relatively large volumes of receipts.

SERVICE TRADE—PERCENTAGE DISTRIBUTION OF ESTABLISHMENTS AND RECEIPTS, BY RECEIPTS SIZE, 1948¹

Receipts Size of Service Trade (Tables in Chapter 2)

The individual business establishment or unit rather than the company or firm was the basis for the statistics on receipts size in this volume. In the hotel and motion picture theater industries, for example, there were many firms which operated businesses at a number of locations. For these industries receipts-size statistics on a firm or company basis would differ considerably from those for the individual establishment or location.

In many service trades, where little investment in merchandise and equipment is ordinarily needed, small businesses predominate, e. g., barber shops. Certain other types of services, however, require considerable equipment or large staffs of employees and therefore result in large-size establishments. For example, a power laundry can render low-cost service by using factory methods, large specialized machines, and specialization in the operations performed by employees. Advertising agencies which conduct Nation-wide advertising campaigns require large staffs of specialists. Similarly, hotels or motion picture theaters need large buildings and sizable staffs to carry out their functions.

Data on receipts size for the various kinds of service establishments in 1948 are included in a series of tables in chapter 2 of this volume. In each table receipts of units established or acquired in 1948 are treated as a separate category. Thus, units in the several receipts-size groups are restricted to those reporting receipts for an entire year of operation.

A summary of the size variation among establishments in different service trades is presented in table H, below.

TABLE H.—AVERAGE RECEIPTS PER ESTABLISHMENT—SELECTED KINDS OF BUSINESS, UNITED STATES, 1948

Kind of business	Average receipts per establishment ¹
Barber shops.....	\$4,600
Power laundries.....	144,200
Advertising agencies.....	129,900
General automobile repair shops.....	15,400
Storage garages.....	47,300
Radio repair shops.....	8,000
Motion picture theaters, regular.....	79,000
Billiard and pool parlors.....	7,600
Hotels.....	79,400
Tourist courts.....	8,200

¹ Part-year establishments excluded from computations.

Table H indicates that large establishments are concentrated in a few kinds of business. This is further demonstrated by table I, below.

TABLE I.—PERCENTAGE DISTRIBUTION OF ESTABLISHMENTS REPORTING 1948 RECEIPTS OF \$100,000 OR MORE—SELECTED KINDS OF PERSONAL, BUSINESS, AND REPAIR SERVICES

Kind of business	Number of establishments	Percentage distribution
Personal, business, and repair services.....	11,103	100
Personal services.....	5,919	53
Cleaning and dyeing plants (exc. rug cleaning).....	1,331	12
Funeral service.....	774	7
Power laundries.....	2,665	24
Linen supply service.....	517	5
Other personal services.....	632	5
Business services.....	2,804	25
Advertising agencies.....	687	6
Other business services.....	2,117	19
Automobile repair services and garages.....	1,516	14
General automobile repair shops.....	505	5
Storage garages.....	260	2
Other automobile repair services.....	751	7
Miscellaneous repair services.....	864	8

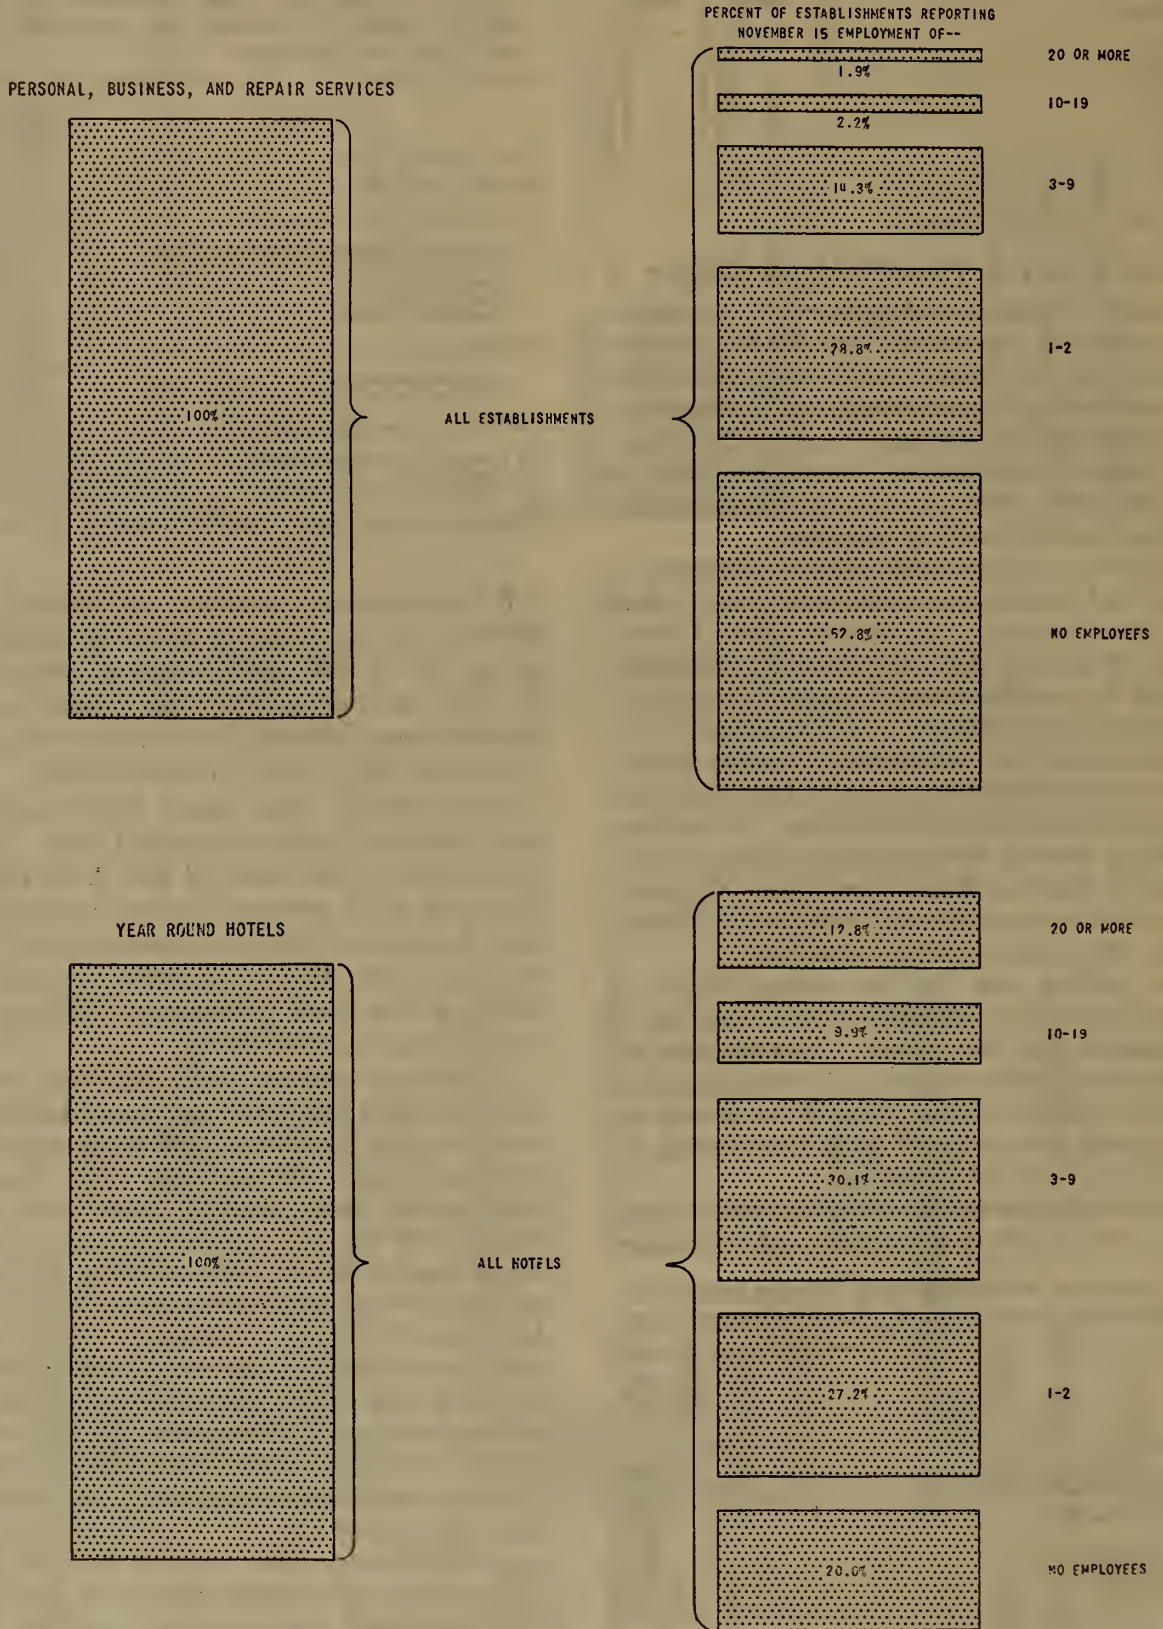

For purposes of comparison with table I, it is noted that only 16 out of 82,660 barber shops that operated during all of 1948 had receipts of \$100,000 or more. Business services accounted for a quarter of the large establishments, although this group covered only 6 percent of the total number of establishments.

Geographically, the largest service establishments were somewhat more concentrated than all service establishments. The State of New York reported only 14 percent of all personal, business, and repair services, but 19 percent of the establishments with \$100,000 receipts or more. The corresponding ratios for the three States of New York, Illinois, and California combined are 29 percent and 38 percent.

The average receipts per establishment of laundries, cleaning and dyeing plants, and related service businesses was related to types of activity combined and types of equipment used. For example, power laundries with cleaning and dyeing facilities had higher average receipts in 1948 than those that had no such facilities (\$182,400 as against \$89,500). Similarly in the linen supply and diaper service fields the larger establishments usually had power facilities. In the case of linen supply services, average receipts per establishments were \$311,100 for those with power plants, and \$103,600 for those not having such plants. Corresponding figures in the diaper service industry were \$73,600 and \$37,600, respectively.

In the case of hotels seasonality is a significant factor in average annual receipts. In 1948 seasonal hotels averaged \$36,700 in receipts, compared with \$81,100 for year-round hotels, and average receipts per guest room were \$924 for seasonal hotels compared with \$1,475 for year-round hotels.

PERSONAL, BUSINESS, AND REPAIR SERVICES AND YEAR-ROUND HOTELS—
DISTRIBUTION, BY EMPLOYEE SIZE, 1948

Employee Size of Service Trade (Tables in Chapter 3)

In addition to the dollar volume of business that it transacts, another indicator of the economic importance of a business establishment is the number of its employees. The number of employees is not strictly proportional to receipts, differing among kinds of business and being affected by such factors as proportion of receipts from sales of merchandise and also, in smaller businesses, by the number of proprietors and unpaid family workers who do work that would normally be done by paid employees in large establishments.

Since size of establishment based on number of paid employees has been based on number employed during the workweek ended nearest November 15, 1948, seasonal businesses, such as certain types of amusement enterprises, tourist courts, and seasonal hotels, did not lend themselves to this type of analysis. The tables in this chapter accordingly are limited to data for personal, business, and repair services, and year-round hotels.

Table J, below, presents a comparison of percentage distributions of establishments and receipts according to employee-size groups for two major categories of service trades.

TABLE J.—PERCENTAGE DISTRIBUTION BY EMPLOYEE-SIZE GROUP—PERSONAL, BUSINESS, AND REPAIR SERVICES AND YEAR-ROUND HOTELS, UNITED STATES, NOVEMBER 1948

Number of employees, November 15	Personal, business, and repair services		Year-round hotels	
	Estab.	Receipts	Estab.	Receipts
	Percent 100.0	Percent 100.0	Percent 100.0	Percent 100.0
All establishments, total.....				
No employees.....	52.8	13.2	20.0	1.6
1 employee.....	18.7	10.3	16.4	1.6
2 employees.....	10.1	8.9	10.8	1.7
3 employees.....	5.6	6.8	7.9	1.8
4 or 5 employees.....	5.1	9.2	10.6	3.3
6 or 7 employees.....	2.4	6.1	7.3	3.2
8 or 9 employees.....	1.2	3.9	4.3	2.5
10 to 19 employees.....	2.2	10.5	9.9	8.4
20 to 49 employees.....	1.3	11.9	6.8	12.7
50 to 99 employees.....	0.4	7.5	2.8	11.5
100 or more employees.....	0.2	11.7	3.2	51.7

Personal, business, and repair services include many small establishments in which the proprietor performs much or all of the work. An illustration of this is the fact that the total number of active proprietors in 1948 (574,610) was 43 percent of the number of employees. Less than 2 percent of the establishments had as many as 20 employees, although this small number (10,687) reported 31 percent of the receipts. These establishments were confined mainly to a few kinds of business in which large establishments generally predominate. Table K, below, gives the distribution of the establishments with 20 or more employees.

Power laundries with their large, factory-scale operations, plus cleaning and dyeing plants, comprised over half of the large establishments. Business services, considered as a single group, was the only other important

category having establishments with 20 or more employees.

TABLE K.—PERCENTAGE DISTRIBUTION OF ESTABLISHMENTS HAVING 20 OR MORE EMPLOYEES—SELECTED PERSONAL, BUSINESS, AND REPAIR SERVICES, UNITED STATES, NOVEMBER 1948

Kind of business	Number of establishments	Percent of entire group
Establishments with 20 or more employees, total.....	10,637	100.0
Personal services, total.....	7,334	68.6
Beauty shops.....	226	2.1
Cleaning, dyeing plants (exc. rug cleaning).....	2,073	19.4
Power laundries.....	3,988	37.3
Linen supply service.....	441	4.1
Other personal services.....	606	5.7
Business services, total.....	2,257	21.2
Advertising agencies.....	384	3.6
Consumer credit reporting agencies, etc.....	274	2.6
Other business services.....	1,599	15.0
Automobile repair services and garages.....	654	6.1
Miscellaneous repair services.....	442	4.1

Source of Receipts

General (table 13A).—Among the receipts reported by the personal, business, and repair services covered by the 1948 Census of Business were merchandise sales, in the amount of \$448 million, which constituted 5 percent of the total receipts of these establishments. These sales were principally of items that are related to the service rendered by the respective kind of business. For example, repair service establishments often sell accessories to the item repaired, or frequently even the item itself, such as new and used tires in the case of the tire repair shop. Personal and business services reported a relatively small part of their receipts (1.8 percent) from merchandise sales. The personal service trades which had substantial sales of merchandise were: Beauty shops, photographic studios, fur repair and storage shops, and shoe repair shops. Among business services sizable merchandise sales were reported by miscellaneous advertising agencies, blueprinting and photostating shops, and photo finishing laboratories. Repair service business, however, accounted for the bulk of the merchandise sales of personal, business, and repair service establishments. Automobile repair services and garages accounted for nearly half of the merchandise sales made by personal, business, and repair service businesses.

Power laundries, cleaning and dyeing plants, and related services (tables 8E through 8U).—A more detailed analysis of receipts was obtained from power laundries, cleaning and dyeing plants, linen supply and diaper service establishments, and rug cleaners than from the other service trades. Establishments in this group frequently performed, as a secondary activity, the functions of establishments in other kinds of business within the group. For example, power laundries with cleaning and dyeing facilities reported 13.6 percent of the cleaning and dyeing receipts of the group; nearly 20 percent

of the rug cleaning receipts for this group were accounted for by laundries and cleaning plants; and laundries and linen supply services reported about 11 percent of the diaper service work. However, the only segment of the group that reported more than 10 percent of its receipts from secondary activities was the "laundry with cleaning and dyeing plant" category, for which the figure for cleaning and dyeing was 22 percent.

Wholesale work in the laundry and cleaning industries was defined as work done for other establishments that do not have their own plant facilities. For example, pressing, alteration, and garment repair shops send their cleaning work to dry cleaning plants; independent laundry agents and "bobtail" operators of trucks have their work done by power laundries; and hand laundries frequently send part of their work to power laundries. Linen supply and diaper services that do not operate their own plants also have their work done on a wholesale basis. Wholesale work, on the basis of dollar-volume, is a relatively small part of the total business of laundries, cleaning and dyeing plants, and related services. Only 12 percent of the 33,877 establishments reported wholesale work in 1948, which amounted to 34 percent of their total receipts and only 7 percent of the aggregate receipts for these kinds of business. The bulk of the wholesale dollar-volume was accounted for by cleaning and dyeing plants, amounting to \$88,889,000, or 61 percent of the total wholesale receipts of the group. Pressing, alteration, and garment repair shops were the principal source of wholesale dry cleaning work.

Establishments reporting receipts of \$50,000 or more for the year 1948 from laundry work (bundle, flat, and family services) were requested to supply analyses of their laundry receipts according to type of work and method of delivery. Data from the reports of those who provided this analysis of receipts (70 percent of all such establishments) showed that family services were the principal type of laundry work. Table L, below, gives a percentage breakdown of the types of laundry work.

TABLE L.—PERCENTAGE DISTRIBUTION—RECEIPTS OF ESTABLISHMENTS REPORTING \$50,000 OR MORE FROM LAUNDRY WORK, BY SOURCE, UNITED STATES, 1948

Type of work	Percent of 1948 receipts
Laundry work, total.....	100
Bundle work.....	26
Flat work.....	14
Family services.....	60
Finished.....	29
Semifinished.....	22
Damp wash.....	9

Data reported by the same group of establishments show that most retail laundry work (77 percent) was delivered to homes rather than picked up by the custom-

ers at the plant office or branch store, which is in agreement with the predominance of family services in laundry work. Retail cleaning and dyeing work is less commonly home delivered, only 46 percent being so handled in 1948. However, power laundries delivered 68 percent of their dry cleaning to homes.

Hotels and tourist courts (tables 10D through 10K and 11B).—Hotels and tourist courts obtained their receipts from a variety of sources, as demonstrated by table M below.

TABLE M.—PERCENTAGE DISTRIBUTION OF RECEIPTS OF HOTELS AND TOURIST COURTS, BY SOURCE, UNITED STATES, 1948

Receipts source	Hotels			Tourist courts
	Total	Year-round	Seasonal	
	Percent 100.0	Percent 100.0	Percent 100.0	Percent 100.0
Total receipts.....				
Room rentals and sales of meals.....	81.1	80.3	89.3	93.0
Sales of alcoholic drinks.....	11.4	12.0	5.8	1.4
Sales of packaged liquor.....	0.8	0.8	0.4	(1)
Sales of other merchandise.....	1.4	1.4	1.6	4.3
Space and concession rental.....	1.5	1.6	0.6	0.4
Other sources.....	3.8	3.9	2.3	0.9

¹ Included in sales of merchandise.

The geographic distribution of receipts from the sale of alcoholic drinks in hotels is, of course, largely influenced by State and local laws. While 45 percent of such sales in 1948 were accounted for by the nine north-eastern States, receipts from the sale of alcoholic drinks for most States in the Middle West and the South were negligible. Legal restrictions also affected the geographic distribution of packaged liquor sales.

Seasonal hotels are more dependent upon room rentals and sales of meals than are year-round hotels, their revenues from the sales of alcoholic drinks being less important than in the case of year-round hotels. With the exception of Florida and Arizona, their receipts are concentrated in the summer months. Exclusive of establishments in these two States, the employment of seasonal hotels during the workweeks ended nearest March 15 and November 15 was about 6 percent of that for the workweek ended nearest July 15.

Less than one-third of all hotels reported separate data for receipts from room rentals and sales of meals; but these included the larger hotels, which accounted for 75 percent of all hotel receipts. In the aggregate, sales of meals amounted to 77 percent of receipts from room rentals, where separately reported; but in certain resort areas such as New England, Pennsylvania, and several western States, sales of meals exceeded room rentals.

Tourist court operation is frequently combined with gasoline service station, restaurant, or drinking place business. However, it should be observed that in the case of tourist places, the combined establishment was classified in Retail Trade if receipts were predom-

inantly from the retail operations rather than from the tourist court operations. The figures on distribution of tourist court revenue indicate that only 7 percent of receipts were from other than room rental and sale of meals.

Automobile repair services and garages (tables 12A through 12C).—All businesses in this category reported the amount of their merchandise sales, but a classification of merchandise sales according to type of product was obtained from only 24 percent of the establishments. However, the sales so analyzed amounted to 81 percent of all merchandise sales in the group. Sales of gasoline and oil constituted nearly half of the analyzed sales. Sales of parts and accessories accounted for most of the remaining merchandise sales. It should be noted that the value of parts installed in automobiles in connection with repair jobs was included in receipts for repairs and service rather than in merchandise sales. The service receipts of automobile repair services and garages were subclassified into "storage and parking receipts" and "receipts from repairs and services." Storage and parking receipts constituted 10 percent of the receipts of this group and were largely concentrated (over 90 percent) in parking lots and storage garages.

Amusements (tables 9A through 9E).—Places of amusement showed but a small part of their receipts as originating from the sale of merchandise, reporting only 8 percent of their total receipts from this source. These receipts, it should be observed, do not include the merchandise sales of retail concessionaires or of owners of coin-operated merchandising machines, since they submitted separate reports of their operations in the Retail Trade part of the Business Census. Amusement enterprises reported 1.8 percent of their receipts as coming from concession rentals. Sales of merchandise by amusement enterprises were most prominent in California and Illinois. California accounted for 15 percent of the merchandise sales of all motion picture theaters, while Illinois accounted for 21 percent of the merchandise sales of all bowling alleys.

Legal Form of Organization (Tables in Chapter 5)

All establishments enumerated for the 1948 Census of Business were classified by legal form of ownership into the following categories: Individual proprietorships, partnerships, corporations, and other forms of organization (e. g., estates, cooperatives, trusts, etc.). Service establishments generally are relatively small enterprises with low employment, and in 1948 a large majority of them were organized as proprietorships and partnerships. The corporate form of organization was found to predominate only in those kinds of business where establishments were large, such as power laundries, advertising agencies, storage garages, motion picture theaters, and hotels.

Table N, below, presents a selection of service industries and the proportion of establishments in these industries accounted for by corporations.

TABLE N.—CORPORATIONS IN SERVICE BUSINESSES—PERCENTAGE OF TOTAL FOR SELECTED KINDS OF BUSINESS, UNITED STATES, 1948

Kind of business	Establishments, percent corporations	Receipts—percent reported by corporations
Barber shops.....	(*)	1
Power laundries.....	39	67
Advertising agencies.....	41	76
General automobile repair shops.....	2	9
Storage garages.....	34	59
Electrical repair shops.....	4	24
Motion picture theaters, regular.....	47	77
Billiard and pool parlors.....	1	3
Hotels.....	17	67
Tourist courts.....	2	8

*Less than 0.5 percent.

While there are differences in the degree of representation as between corporations and the other legal forms within each kind of business listed, in every case the corporations reported a larger share of receipts than of number of establishments. Corporations were particularly prominent in hotels and motion picture theaters, where organizations comprising a number of units were relatively numerous.

A geographic concentration of corporations is also indicated by the fact that the State of New York alone accounted for 24 percent of the 28,570 corporations in personal, business, and repair services in 1948, as against 14 percent of the total number in all legal forms of organization in the United States.

Trucks (Tables in Chapter 6)

Operation of trucks is a characteristic of laundries, cleaning and dyeing plants, and related services. Nearly two-thirds of the establishments (22,444) in this field of business operated trucks in December 1948. They reported \$1.8 billion in receipts in 1948 or 88 percent of the total receipts for the group.

Table O, below, shows the extent to which trucks are used in each of the individual industries comprising this group.

TABLE O.—TRUCKS OPERATED BY LAUNDRY AND RELATED BUSINESSES, UNITED STATES, 1948

Kind of business	Establishments with trucks			
	Percent of all establishments	Receipts as percent of receipts of all establishments	Number of trucks per establishment	1948 receipts per truck operated (dollars)
Total.....	66	88	3.0	26,234
Power laundries (excluding industrial laundries):				
With cleaning and dyeing facilities.....	93	97	6.8	27,880
Without cleaning and dyeing facilities.....	79	91	3.9	26,183
Linen supply.....	81	93	7.6	30,613
Diaper service establishments.....	89	91	3.6	19,084
Industrial laundries.....	77	90	7.0	32,790
Cleaning and dyeing plants.....	60	81	1.9	24,333
Rug cleaning plants.....	70	83	1.6	17,611

Cleaning and dyeing plants made relatively less use of trucks than did laundries and linen supply and diaper service establishments, indicating a greater prevalence of "cash-and-carry" business in the first-mentioned kind of business. The dry cleaning industry had a relatively large representation of small establishments for which business volume presumably did not justify the operation of trucks.

In contrast to the general practice of operating trucks in the laundry and cleaning field, only 21,366 or 22 percent of the automobile repair services and garages in the United States operated trucks in December 1948. These establishments accounted for 38 percent of the total receipts for the group. General automobile repair shops accounted for 72 percent of the trucks in this group of businesses; top and body shops operated 9 percent; radiator repair shops, 3 percent; and tire repair shops, 3 percent. These trucks averaged higher generally in manufacturers' rated capacity than did those of laundries and cleaners, 30 percent having a capacity of 1½ tons or more. Establishments in the States of California, Pennsylvania, and New York, reported 26 percent of the total number of trucks in this kind-of-business group in the United States. California was the leading State, with over 2,600 trucks, or 10 percent of the United States total for automobile repair services and garages.

Period Established or Acquired (Tables 13C Through 13H)

The relatively short life of most service enterprises is illustrated by data on the period of acquisition or establishment. Of the 511,407 personal, business, and repair services for which this information was reported in connection with the 1948 Census of Business (91.4 percent of all such establishments enumerated), 82,154 or 16 percent had been acquired or started in 1948. During the postwar period (1946-48 inclusive), 43 percent of the reporting establishments were either acquired by new owners or were established as new places of business. Only 41 percent dated from before World War II (prior to 1942). A small group (2,319 establishments or 0.45 percent of the total) had an age of 49 years or more. The tenure of ownership for establishments in certain kinds of business, however, was longer than in others. The funeral service industry reported 510 establishments, 3.0 percent of the total, as beginning prior to 1900. Blacksmith shops, which have declined in number in recent years, included 163 (2.1 percent of the total) of these older establishments. The greatest concentration of older establishments was in the East, New York and Pennsylvania accounting for 297 and 296, respectively, of the 2,319 businesses established or last acquired prior to 1900. The group of old establishments averaged about \$62,000 in receipts for the year 1948, whereas the group established or acquired in 1946-7 had average receipts of slightly over \$13,000 for that year.

Places of amusement and hotels showed age distributions similar to personal, business, and repair services. In the fast growing tourist court business, however, establishments were even younger, 23 percent being reported as established or as last acquired in 1948, and 57 percent in the postwar years 1946-48 inclusive.

Supplemental Findings for Amusements (Tables in Chapter 9)

Admissions and Seating Capacity of Motion Picture Theaters.—Motion picture theaters in 1948 reported some 3.4 billion admissions, representing an average of 23 admissions, or almost 2 per month, for each person in the United States. The number of admissions per establishment for 1948 was 189,000, or approximately 500 per day. The average admission cost in 1948 was 44 cents gross, of which 8 cents was admission tax.

The extremes in patronage of motion picture theaters are represented by the State of Mississippi where there were 14 admissions per capita in 1948, with 30 cents as the average price of admission, and the State of New York with 30 per capita admissions at an average of 54 cents per admission. The average number of admissions per establishment showed a greater degree of variation in these two States, with 99,000 in Mississippi and 347,000 in New York, largely as a result of the larger New York City theaters.

Motion picture theaters in the United States had 11.7 million seats in 1948, 1 for every 12 persons in the country. This ratio was fairly constant throughout the country, rising to about 14 for the southern States. An average of about \$125 in gross admissions was realized for each seat, and there were 286 admissions per seat in 1948. Theaters for the country as a whole averaged 662 seats per theater, although there was some geographic variation in the size of theaters, those of New York averaging 1,005 seats; California, 841 seats; and the 17 southern States, 550 seats.

Amusement taxes.—A significant part of the expenditures in amusement businesses consisted of admission taxes. For all amusements included in the scope of the 1948 Business Census such taxes amounted to \$323 million, or 12 percent of the total receipts (including taxes). Motion picture theaters accounted for most of the taxes, 16 percent of their total receipts going to admission taxes. Other kinds of business that contributed large tax volumes were horse race tracks and baseball and football clubs. The State's share of pari-mutuel betting at race tracks was not included in the tax data presented in this volume. Admission taxes for motion picture theaters were rather evenly distributed throughout the country. Among the larger States they ranged from 14.6 percent of gross receipts in Texas to 19.3 percent in Pennsylvania. However, in every State they comprised the major part of all amusement taxes.

Supplemental Findings for Hotels (Tables in Chapter 10)

Supplemental compensation of hotel employees.—

The presentation of census data on supplementary compensation of hotel employees (free quarters, meals, tips) is confined to year-round hotels with 25 or more guest rooms. Nearly half (7,088) of the hotels in this category reported employees receiving free quarters and/or meals, and a slightly smaller number (6,451) reported employees receiving tips. Only 6 percent (21,451) of the employees in year-round hotels with 25 guest rooms or more received free living quarters. Free meals were more common, 28 percent (105,216) of the employees receiving at least two meals per day. In most cities, employees receiving two meals per day comprised the largest group of those who received meals as supplemental compensation. Employees receiving tips (89,970) constituted 24 percent of the total.

Percentage of occupancy for hotels.—Statistics on percentage of occupancy of hotel guest rooms are confined to year-round hotels with 25 or more guest rooms. The median percentage of occupancy for the 14,547 hotels in the United States that were in this category in 1948 was in the 71–80 percent interval. However, the hotels having a percentage of occupancy of 81 percent or more (5,598) accounted for more than half of the total receipts of the group. Hotels with a large proportion of residential rooms figure prominently in the “91 percent-or-more” group.

Hotels in cities of 500,000 inhabitants or more had the highest occupancy rate, with a median in the 81–90 percent interval. The median for hotels in places under 2,500 inhabitants was in the 61–70 percent occupancy bracket. A similar pattern prevailed for hotels grouped by size based on number of guest rooms, the larger hotels having a higher average occupancy rate, as illustrated by table P, below.

TABLE P.—PERCENTAGE OF OCCUPANCY—YEAR-ROUND HOTELS HAVING 25 GUEST ROOMS OR MORE, UNITED STATES, 1948

Number-of-guest-rooms size	Average percentage of occupancy rates of hotels in group ¹
All year-round hotels having 25 or more guest rooms.....	73
Hotels having:	
500 guest rooms or more.....	87
300 to 499 guest rooms.....	84
100 to 299 guest rooms.....	81
50 to 99 guest rooms.....	75
25 to 49 guest rooms.....	69

¹ Figures represent arithmetic averages.

Hotel size (guest rooms).—The classification of hotels by number of guest rooms indicates that a relatively few large hotels accounted for most of the receipts. There were 3,396 hotels (11 percent of the total) that had 100 guest rooms or more and reported 67 percent of the total hotel receipts in 1948. The group hav-

ing 100–299 guest rooms had a geographic concentration similar to that for all hotels; but the largest hotels, with 300 rooms or more, were concentrated in the large metropolitan areas. Of a total of 534 such hotels, 145 or 27 percent were located in the New York-Northeastern New Jersey Metropolitan Area. The average size in 1948 of seasonal hotels was somewhat less than that of year-round hotels—40 guest rooms for seasonal compared with 95 for year-round. The hotels with fewer than 25 guest rooms accounted for 42 percent of all hotels in 1948, but they reported only 7 percent of the total hotel receipts and employed only 5 percent of all hotel workers. Employees in these hotels amounted to nearly twice the number of active proprietors. However, there were a number of such establishments with no paid employees.

Classification of hotel guest rooms.—A substantial number of the hotels included in the Census of Business were primarily residential hotels with but a few transient rooms. (See Appendix D, Explanation of Terms, for definitions of hotels covered in the Census.) Another sizable group of hotels, while predominantly transient, also accounted for a relatively large number of the residential guest rooms. In year-round hotels having 25 guest rooms or more, for the Nation as a whole, 32 percent of the guest rooms were for residential use. This proportion did not vary greatly for hotels of different size groups.

Hotel rooms for residential use were generally common to the larger cities. A group of 32 selected metropolitan areas (listed in table 10V) contained 51 percent of all rooms of year-round hotels with 25 or more guest rooms, but 68 percent of the rooms for residential use. In the Chicago, Detroit, New York-Northeastern New Jersey, St. Louis, San Francisco-Oakland, and Seattle Metropolitan Areas, residential rooms comprised about half of all guest rooms, the smaller hotels accounting for a relatively high proportion of residential rooms.

Supplemental Findings for Tourist Courts (Table 11C)

Size of tourist courts based on number of rental units.—Tourist courts, in general, were small establishments compared with hotels. In 1948 they averaged only 12 rental units per establishment, and over half of the total number in the United States had fewer than 10 units, this group averaging only \$3,200 annual receipts per establishment. At the other extreme, the 1,072 establishments with 30 rental units or more had an average of \$37,000 annual receipts, a total comparable with that for small hotels. Tourist courts were concentrated in the western and southwestern States, but the large establishments with 30 rental units or more had an even higher concentration in those sections of the country. Texas reported 7.8 percent of all tourist courts and 17.6 percent of the larger courts. Corresponding figures for California were 14.2 percent and 19.0 percent.

Supplemental Findings for Cleaning and Dyeing Plants (Table 8C)

Solvent types used by cleaning and dyeing plants.—Data for cleaning and dyeing plants, classified according to type of solvent used, indicated that 18,491, or 77 percent of the total of 24,017 establishments in 1948, used petroleum solvents. Plants using only synthetic solvent were not uniformly distributed geographically. The

nine northeastern States reported 1,582 out of 3,913 establishments (40 percent of the plants in this area) using synthetic solvents. In 17 southern States there were only 867 out of 10,646 establishments (8 percent) that used synthetic solvents. An analysis of these two groups on the basis of size of establishment discloses that the plants using petroleum solvents averaged almost \$34,000 receipts in 1948, while the synthetic solvent users averaged a little over \$29,000.

UNITED STATES, BY GEOGRAPHIC DIVISION

STANDARD METROPOLITAN AREAS

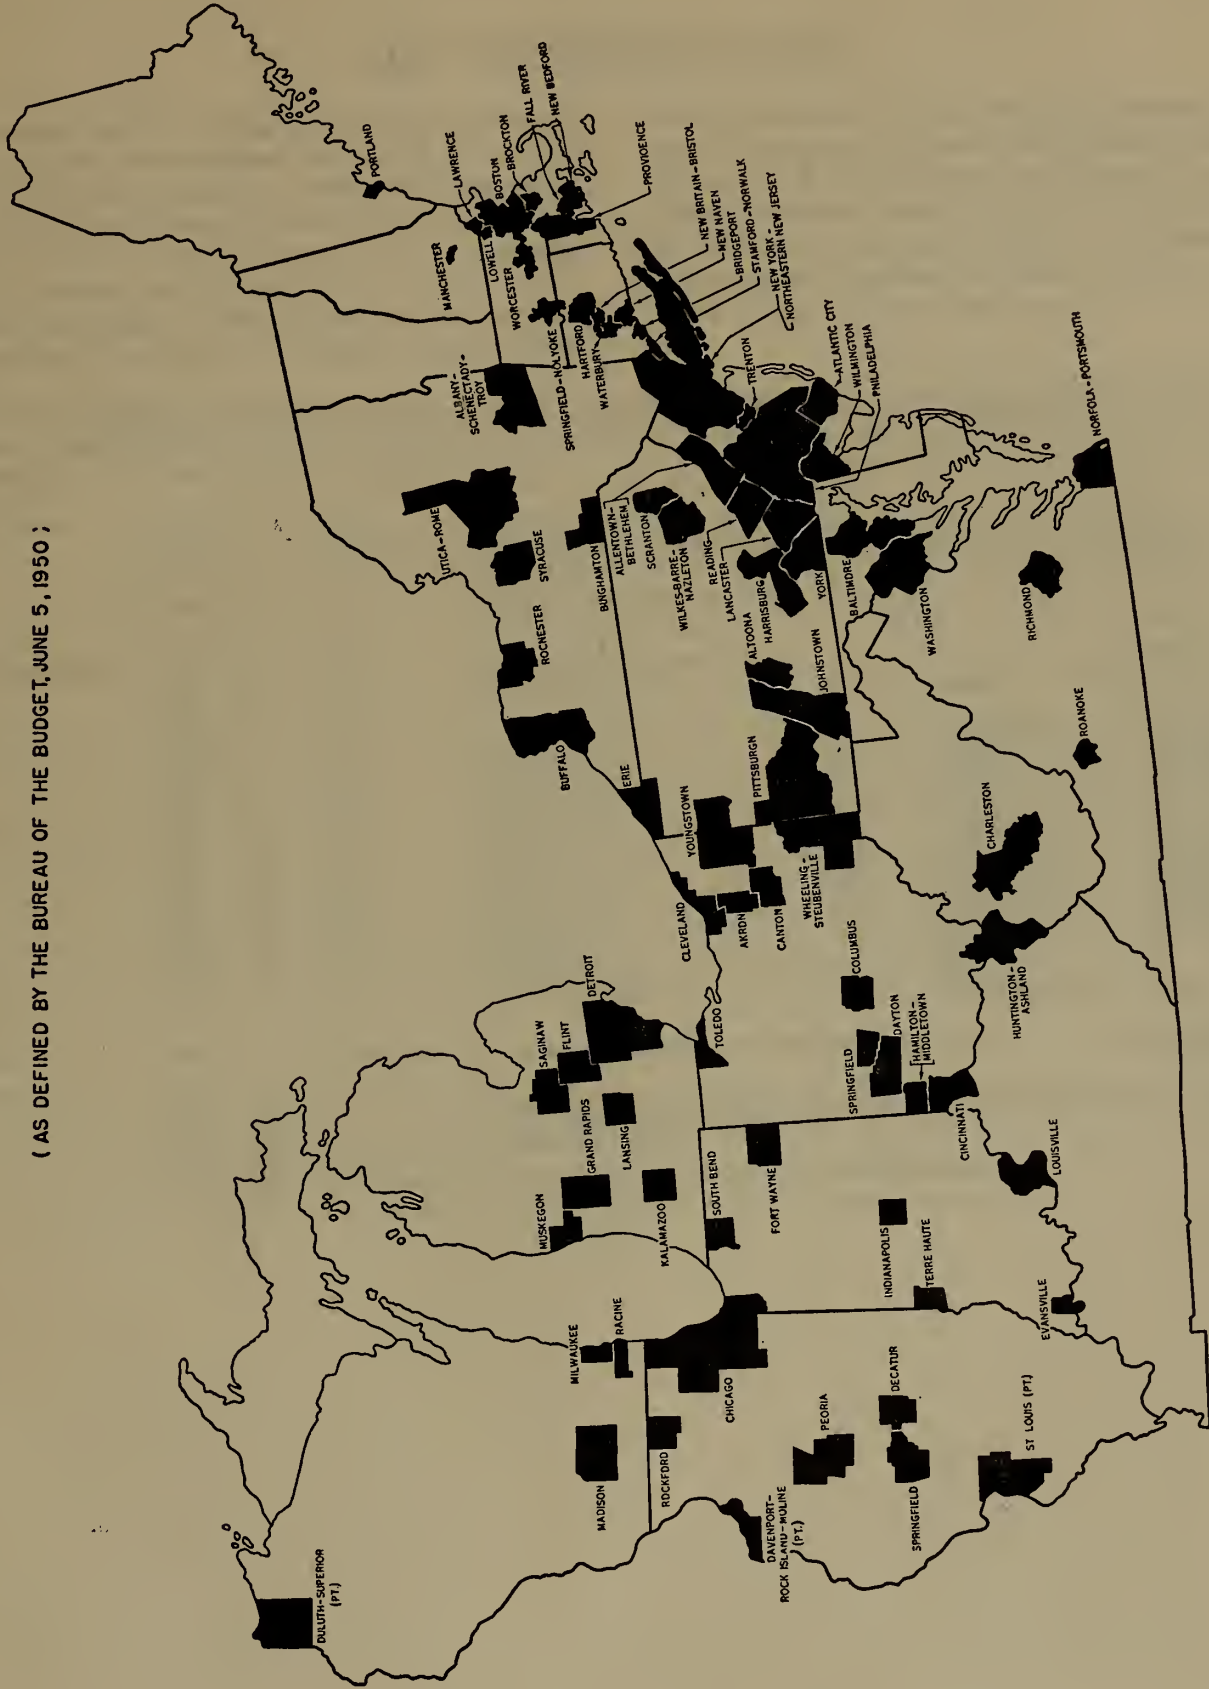

(As defined by the Bureau of the Budget, June 5, 1950)

- AKRON, OHIO: Summit County.
- ALBANY-SCHENECTADY - TROY, N. Y.: Albany, Rensselaer, and Schenectady Counties.
- ALLENTOWN - BETHLEHEM-EASTON, PA.: Lehigh and Northampton Counties, Pa.; Warren County, N. J.
- ALTOONA, PA.: Blair County.
- ASHEVILLE, N. C.: Buncombe County.
- ATLANTA, GA.: Cobb, De Kalb, and Fulton Counties.
- ATLANTIC CITY, N. J.: Atlantic County.
- AUGUSTA, GA.: Richmond County, Ga.; Aiken County, S. C.
- AUSTIN, TEX.: Travis County.
- BALTIMORE, MD.: Baltimore city, Baltimore and Anne Arundel Counties.
- BATON ROUGE, LA.: East Baton Rouge Parish.
- BEAUMONT-PORT ARTHUR, TEX.: Jefferson County.
- BINGHAMTON, N. Y.: Broome County.
- BIRMINGHAM, ALA.: Jefferson County.
- BOSTON, MASS.: All of Suffolk County; Cambridge, Everett, Malden, Medford, Melrose, Newton, Somerville, Waltham, and Woburn cities; Arlington, Ashland, Bedford, Belmont, Burlington, Concord, Framingham, Lexington, Lincoln, Natick, North Reading, Reading, Stoneham, Wakefield, Watertown, Wayland, Weston, Wilmington, and Winchester towns in Middlesex County; Beverly, Lynn, Peabody, and Salem cities; Danvers, Hamilton, Lynnfield, Manchester, Marblehead, Middleton, Nahant, Saugus, Swampscott, and Wenham towns in Essex County; Quincy city; Braintree, Brookline, Canton, Cohasset, Dedham, Dover, Medfield, Milton, Needham, Norwood, Randolph, Sharon, Walpole, Wellesley, Westwood, and Weymouth towns in Norfolk County; Hingham and Hull towns in Plymouth County.
- BRIDGEPORT, CONN.: Bridgeport city; Fairfield, Stratford, and Trumbull towns in Fairfield County; Milford town in New Haven County.
- BROCKTON, MASS.: Brockton city; Abington, Bridgewater, East Bridgewater, Rockland, West Bridgewater, and Whitman towns in Plymouth County; Avon, Holbrook, and Stoughton towns in Norfolk County; Easton town in Bristol County.
- BUFFALO, N. Y.: Erie and Niagara Counties.
- CANTON, OHIO: Stark County.
- CEDAR RAPIDS, IOWA: Linn County.
- CHARLESTON, S. C.: Charleston County.
- CHARLESTON, W. VA.: Fayette and Kanawha Counties.
- CHARLOTTE, N. C.: Mecklenburg County.
- CHATTANOOGA, TENN.: Hamilton County, Tenn.; Walker County, Ga.
- CHICAGO, ILL.: Cook, Du Page, Kane, Lake, and Will Counties, Ill.; Lake County, Ind.
- CINCINNATI, OHIO: Hamilton County, Ohio; Campbell and Kenton Counties, Ky.
- CLEVELAND, OHIO: Cuyahoga and Lake Counties.
- COLUMBIA, S. C.: Richland County.
- COLUMBUS, GA.: Chattahoochee and Muscogee Counties, Ga.; Russell County, Ala.
- COLUMBUS, OHIO: Franklin County.
- CORPUS CHRISTI, TEX.: Nueces County.
- DALLAS, TEX.: Dallas County.
- DAVENPORT, IOWA-ROCK ISLAND-MOLINE, ILL.: Rock Island County, Ill.; Scott County, Iowa.
- DAYTON, OHIO: Greene and Montgomery Counties.
- DECATUR, ILL.: Macon County.
- DENVER, COLO.: Adams, Arapahoe, Denver, and Jefferson Counties.
- DES MOINES, IOWA: Polk County.
- DETROIT, MICH.: Macomb, Oakland, and Wayne Counties.
- DULUTH, MINN.-SUPERIOR, WIS.: St. Louis County, Minn.; and Douglas County, Wis.
- DURHAM, N. C.: Durham County.
- EL PASO, TEX.: El Paso County.
- ERIE, PA.: Erie County.
- EVANSVILLE, IND.: Vanderburgh County.
- FALL RIVER, MASS.: Fall River city; Somerset, Swansga, and Westport towns in Bristol County, Mass.; and Tiverton town in Newport County, R. I.
- FLINT, MICH.: Genesee County.
- FORT WAYNE, IND.: Allen County.
- FORT WORTH, TEX.: Tarrant County.
- FRESNO, CALIF.: Fresno County.
- GALVESTON, TEX.: Galveston County.
- GRAND RAPIDS, MICH.: Kent County.
- GREENSBORO-HIGH POINT, N. C.: Gullford County.
- HAMILTON - MIDDLETOWN, OHIO: Butler County.
- HARRISBURG, PA.: Cumberland and Dauphin Counties.
- HARTFORD, CONN.: Hartford city; Avon, Bloomfield, East Hartford, Farmington, Glastonbury, Manchester, Newington, Rocky Hill, Simsbury, South Windsor, West Hartford, Wethersfield, and Windsor towns in Hartford County.
- HOUSTON, TEX.: Harris County.
- HUNTINGTON, W. VA.-ASHLAND, KY.: Cabell and Wayne Counties, W. Va.; Boyd County, Ky.; Lawrence County, Ohio.
- INDIANAPOLIS, IND.: Marion County.
- JACKSON, MISS.: Hinds County.
- JACKSONVILLE, FLA.: Duval County.
- JOHNSTOWN, PA.: Cambria and Somerset Counties.
- KALAMAZOO, MICH.: Kalamazoo County.
- KANSAS CITY, MO.: Johnson and Wyandotte Counties, Kans.; Clay and Jackson Counties, Mo.
- KNOXVILLE, TENN.: Anderson, Blount, and Knox Counties.
- LANCASTER, PA.: Lancaster County.
- LANSING, MICH.: Ingham County.
- LAWRENCE, MASS.: Lawrence city; Andover, Methuen, and North Andover towns in Essex County.
- LINCOLN, NEBR.: Lancaster County.
- LITTLE ROCK, ARK.: Pulaski County.
- LOS ANGELES, CALIF.: Los Angeles and Orange Counties.
- LOUISVILLE, KY.: Jefferson County, Ky.; Clark and Floyd Counties, Ind.
- LOWELL, MASS.: Lowell city; Billerica, Chelmsford, Dracut, and Tewksbury towns in Middlesex County, Mass.
- MACON, GA.: Bibb and Houston Counties.
- MADISON, WIS.: Dane County.
- MANCHESTER, N. H.: Manchester city and Goffstown town.
- MEMPHIS, TENN.: Shelby County.
- MIAMI, FLA.: Dade County.
- MILWAUKEE, WIS.: Milwaukee County.
- MINNEAPOLIS-ST. PAUL, MINN.: Anoka, Dakota, Hennepin, and Ramsey Counties.
- MOBILE, ALA.: Mobile County.
- MONTGOMERY, ALA.: Montgomery County.
- MUSKEGON, MICH.: Muskegon County.
- NASHVILLE, TENN.: Davidson County.
- NEW BEDFORD, MASS.: New Bedford city; Acushnet, Dartmouth, and Fairhaven towns in Bristol County.
- NEW BRITAIN-BRISTOL, CONN.: Bristol and New Britain cities; Berlin, Plainville and Southington towns in Hartford County; Plymouth town in Litchfield County.
- NEW HAVEN, CONN.: New Haven city; Branford, East Haven, Hamden, North Haven, Orange, West Haven, and Woodbridge towns in New Haven County.
- NEW ORLEANS, LA.: Jefferson, Orleans, and St. Bernard Parishes.
- NEW YORK-NORTHEASTERN NEW JERSEY: New York City (Bronx, Kings, New York, Queens, and Richmond Counties); Nassau, Rockland, Suffolk, and Westchester Counties, N. Y.; Bergen, Essex, Hudson, Middlesex, Morris, Passaic, Somerset, and Union Counties, N. J.
- NORFOLK-PORTSMOUTH, VA.: Norfolk and Princess Anne Counties; and the cities of Norfolk, South Norfolk, and Portsmouth.
- OKLAHOMA CITY, OKLA.: Oklahoma County.
- OMAHA, NEBR.: Douglas and Sarpy Counties, Nebr.; Pottawattamie County, Iowa.
- PEORIA, ILL.: Peoria and Tazewell Counties.
- PHILADELPHIA, PA.: Bucks, Chester, Delaware, Montgomery, and Philadelphia Counties, Pa.; Burlington, Camden, and Gloucester Counties, N. J.
- PHOENIX, ARIZ.: Maricopa County.
- PITTSBURGH, PA.: Allegheny, Beaver, Washington, and Westmoreland Counties.
- PORTLAND, MAINE: Portland, South Portland, and Westbrook cities; Cape Elizabeth and Falmouth towns in Cumberland County.
- PORTLAND, OREG.: Clackamas, Multnomah, and Washington Counties, Oreg.; Clark County, Wash.
- PROVIDENCE, R. I.: Central Falls, Cranston, Pawtucket, Providence, and Woonsocket cities; Cumberland, East Providence, Johnston, Lincoln, North Providence, North Smithfield, and Smithfield towns in Providence County, R. I.; North Kingstown town in Washington County, R. I.; Warwick city, East Greenwich, and West Warwick towns in Kent County, R. I.; all of Bristol County, R. I.; Attleboro city, North Attleboro, and Seekonk towns in Bristol County, Mass.; Bellingham, Franklin, Plainville, and Wrentham towns in Norfolk County, Mass.; Blackstone and Millville towns in Worcester County, Mass.

- RACINE, WIS. : Racine County.
- RALEIGH, N. C. : Wake County.
- READING, PA. : Berks County.
- RICHMOND, VA. : Richmond city; Chesterfield and Henrico Counties.
- ROANOKE, VA. : Roanoke city and Roanoke County.
- ROCHESTER, N. Y. : Monroe County.
- ROCKFORD, ILL. : Winnebago County.
- SACRAMENTO, CALIF. : Sacramento County.
- SAGINAW, MICH. : Saginaw County.
- ST. JOSEPH, MO. : Buchanan County.
- ST. LOUIS, MO. : St. Louis city, St. Charles and St. Louis Counties, Mo.; Madison and St. Clair Counties, Ill.
- SALT LAKE CITY, UTAH : Salt Lake County.
- SAN ANTONIO, TEX. : Bexar County.
- SAN BERNARDINO, CALIF. : San Bernardino County.
- SAN DIEGO, CALIF. : San Diego County.
- SAN FRANCISCO - OAKLAND, CALIF. : Alameda, Contra Costa, Marin, San Francisco, San Mateo, and Solano Counties.
- SAN JOSE, CALIF. : Santa Clara County.
- SAVANNAH, GA. : Chatham County.
- SCRANTON, PA. : Lackawanna County.
- SEATTLE, WASH. : King County.
- SHREVEPORT, LA. : Caddo Parish.
- SIOUX CITY, IOWA : Woodbury County.
- SOUTH BEND, IND. : St. Joseph County.
- SPOKANE, WASH. : Spokane County.
- SPRINGFIELD, ILL. : Sangamon County.
- SPRINGFIELD, MO. : Greene County.
- SPRINGFIELD, OHIO : Clark County.
- SPRINGFIELD - HOLYOKE, MASS. : Chicopee, Holyoke, Springfield, and Westfield cities; Agawam, East Longmeadow, Longmeadow, Ludlow, West Springfield, and Wilbraham towns in Hampden County, Mass.; Northampton city; Easthampton and South Hadley towns in Hampshire County, Mass.; Enfield town in Hartford County, Conn.
- STAMFORD-NORWALK, CONN. : Norwalk city; Darien, Greenwich, New Canaan, Stamford, and Westport towns in Fairfield County.
- STOCKTON, CALIF. : San Joaquin County.
- SYRACUSE, N. Y. : Onondaga County.
- TACOMA, WASH. : Pierce County.
- TAMPA-ST. PETERSBURG, FLA. : Hillsborough and Pinellas Counties.
- TERRE HAUTE, IND. : Vigo County.
- TOLEDO, OHIO : Lucas County.
- TOPEKA, KANS. : Shawnee County.
- TRENTON, N. J. : Mercer County.
- TULSA, OKLA. : Tulsa County.
- UTICA-ROME, N. Y. : Herkimer and Oneida Counties.
- WACO, TEX. : McLennan County.
- WASHINGTON, D. C. : The District of Columbia; Alexandria and Falls Church cities; Arlington and Fairfax Counties, Va.; Montgomery and Prince Georges Counties, Md.
- WATERBURY, CONN. : Waterbury city; Naugatuck borough; Beacon Falls, Cheshire, Middlebury, Prospect, and Wolcott towns in New Haven County; Thomaston and Watertown towns in Litchfield County.
- WHEELING, W. VA.-STEBENVILLE, OHIO : Brooke, Hancock, Marshall, and Ohio Counties, W. Va.; Belmont and Jefferson Counties, Ohio.
- WICHITA, KANS. : Sedgwick County.
- WILKES-BARRE - HAZLETON, PA. : Luzerne County.
- WILMINGTON, DEL. : New Castle County, Del.; Salem County, N. J.
- WINSTON-SALEM, N. C. : Forsyth County.
- WORCESTER, MASS. : Worcester city, Auburn, East Brookfield, Grafton, Holden, Leicester, Millbury, Northborough, North Brookfield, Shrewsbury, Spencer, Westborough, and West Boylston towns in Worcester County.
- YORK, PA. : York County.
- YOUNGSTOWN, OHIO : Mahoning and Trumbull Counties, Ohio; Mercer County, Pa.

STANDARD METROPOLITAN AREAS IN THE NORTHEASTERN PART OF THE UNITED STATES

(AS DEFINED BY THE BUREAU OF THE BUDGET, JUNE 5, 1950 ;

Mapa de la Sierra de Guadalupe, con las localidades de las plantas estudiadas.

LIST OF CORRECTIONS

This volume has been prepared primarily by assembling and binding the statistical portions of previously issued Subject Bulletins together with additional chapters covering other phases of Service Trade which were not issued in bulletin form. This publication plan was adopted to conserve public funds and expedite the issuance of the volume. It was found desirable to reprint completely the following Subject Bulletins for

volume publication: United States Summary; Receipts Size; Employee Size; Laundries, Cleaning and Dyeing Plants, and Related Services; and Hotels. In some instances, therefore, data will differ from those shown in the bulletins as originally issued. The corrections appearing below represent revisions made after volume copy was returned from the printer.

["Line" and "Column" indicate the position of the item on a page. Thus "line 10" means the tenth line from the top of the table stub, counting every line on which printing appears regardless of presence of entries in field. "Column 5" means fifth column from the left, not counting the stub column]

* Proprietors of unincorporated businesses.
n.a. Not available or not applicable.
n.e.c. Not elsewhere classified.

¹ Includes motion picture theaters.

² Taxes consist of Federal, State, and local amusement, sales, and excise taxes collected directly from the customer and paid directly to the taxing agency.

³ Out of scope of the Census in 1939.

⁴ Data for 1948 include legalized gambling operations; in 1939, such operations were out of scope of the Census. The 1948 and 1939 net revenues of pari-mutuel betting at race tracks are included in the classification "Race track operation."

⁵ Includes outdoor motion picture theaters, portable motion theaters, football clubs (inc. promoters), other commercial sports operators, n.e.c., and coin-operated amusement device services. Also includes statistics for the New York World's Fair and the Golden Gate International Exposition.

APPENDIX A

THE CENSUS ACT OF JUNE 19, 1948

(PUBLIC LAW 671--80TH CONGRESS)

(CHAPTER 502--2D SESSION)

(S.554)

AN ACT

To provide for the collection and publication of statistical information by the Bureau of the Census.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the Director of the Bureau of the Census, hereinafter referred to as the Director and the Bureau, respectively, is authorized and directed to take, compile, and publish the censuses of manufacturers, of mineral industries, and of other businesses, including the distributive trades, service establishments, and transportation (exclusive of means of transportation for which statistics are required by law to be filed with a designated regulatory body), in the year 1949 and every fifth year thereafter, and each such census shall relate to the year immediately preceding the taking thereof: Provided, That the census of manufacturers shall not be taken in 1949. The censuses herein provided for shall include the United States and its Territories and such possessions as may be determined by the Director with the approval of the Secretary of Commerce.

(b) That the Director is further authorized to make such surveys as are deemed necessary to furnish annual and other interim current data on the subjects covered by the censuses provided for in this and other Acts.

Sec. 2. That the following sections of the Act of June 18, 1929 (46 Stat. 21), shall apply to the censuses and surveys authorized by this Act: Section 3, as amended by section 404 of Reorganization Plan Numbered II (53 Stat. 1436), and sections 5, 7, 8, 9, 10, 11, 12, and 15, except that the Director may also authorize the expenditure of necessary sums for travel expenses for attendance at training courses held by the Bureau: Provided, That in connection with any survey conducted by the Director pursuant to

section 1 (b) of this Act, the provisions of sections 9 and 10 of the Act of June 18, 1929 (46 Stat. 21), with respect to the answering of questions and furnishing of information, shall apply only to such inquiries as are within the scope of the schedules and of the type and character heretofore used in connection with the taking of complete censuses under the Act of June 18, 1929 (46 Stat. 21), or in connection with any censuses hereafter taken pursuant to section 1 (a) of this Act and the Act of June 18, 1929: Provided further, (a) That sections 9 and 10 of the Act of June 18, 1929 (46 Stat. 21), shall apply to surveys conducted pursuant to section 1 (b) of this Act only after publication of a determination with reasons therefor certified by the Director with the approval of the Secretary of Commerce that the information called for is needed to aid or permit the efficient performance of essential governmental functions or services; or has significant application to the needs of the public, business, or industry and is not publicly available from nongovernmental or other governmental sources; (b) that in the case of any new survey said sections 9 and 10 shall apply only after public notice, given by the Director at least thirty days in advance of requesting a return, that such survey is under consideration; (c) that the provisions of said sections 9 and 10 shall not apply to any survey more frequent than annual conducted pursuant to section 1 (b) of this Act; and (d) that the provisions for imprisonment provided by said sections 9 and 10 shall not apply in connection with any survey conducted pursuant to section 1 (b) of this Act.

Sec. 3. That inquiries, and the number, form, and subdivisions thereof for the censuses and surveys provided for in this Act, shall be determined by the Director, with the approval of the Secretary of Commerce. To the extent that the provisions of this Act conflict with the provisions of any other Act, pertaining to the Bureau of the Census, the provisions of this Act shall control: Provided, That nothing herein shall be deemed to revoke or impair the authority of any other Federal agency with respect to the collection or release of information.

Approved June 19, 1948.

APPENDIX B

KIND-OF-BUSINESS CLASSIFICATIONS

Each establishment was assigned a kind-of-business classification based on its major activity during the census year. The kinds of business described below are arranged by major groups.

Special attention is given to those kinds of business in which classification changes have been made between the 1939 and the 1948 censuses, and in the few minor differences between definitions in the Standard Industrial Classification and Census definitions.

PERSONAL, BUSINESS, AND REPAIR SERVICES

Personal Services

This major group includes establishments primarily engaged in providing services generally involving the care of the person or his apparel, such as barber and beauty shops, cleaning and dyeing plants, laundries, photographic studios, and pressing and garment repair shops. The kinds of business classified within this group are essentially the same as those included in the Standard Industrial Classification of Personal Services, Major Group 72.

Barber shops

Establishments primarily engaged in furnishing barber services, with the exception of those shops owned by another business, and operated as a part of that business, such as a retail store or hotel. However, barber shop concessions (owned and operated independently), except concessions on trains and steamships, are included in this classification. Barber colleges are also included, providing a charge is made for services rendered by the students to the public. (The Standard Industrial Classification includes all barber colleges, regardless of whether or not service fees are charged.) In the 1939 census, independent operators renting space from a barber shop proprietor were included as separate establishments. In the 1948 census such operators were treated as employees of the individual shop from which space was rented, and the entire operations of the shop were reported as a single establishment.

Beauty shops

Establishments primarily engaged in furnishing beauty services, with the exception of those shops owned by another business, and operated as a part of that business, such as a department store, women's ready-to-wear store, or hotel. However, beauty shop concessions (owned and operated independently) in retail stores or hotels are included. Schools for the instruction of beauty shop operators are also included, providing a charge is made for services rendered by the students to the public. (The Standard Industrial Classification includes all beauty schools, regardless of whether or not service fees are charged.) In the 1939 census, independent operators renting space from a beauty shop proprietor were included as separate establishments. In the 1948 census, such operators were treated as employees of the individual shop from which space was rented, and the entire operations of the shop were reported as a single establishment.

Barber and beauty shops combined

Establishments which combine the functions of a barber shop and a beauty shop at the same site. As in the case of barber shops and beauty shops, the 1939 census included independent operators renting space from a shop proprietor as separate establishments. In the 1948 census, such operators were treated as employees of the individual shop from which space was rented, and the entire operations of the shop were reported as a single establishment.

Cleaning, dyeing plants, except rug cleaning

Plants primarily engaged in dry cleaning and dyeing apparel and household fabrics. Statistics for establishments primarily engaged in rug cleaning are included in the classification, "Rug cleaning and repairing plants." The operations of collecting and distributing units (branch outlets) owned and operated by cleaning and dyeing plants were included in the plant reports. Establishments generally known as "tailor shops" or "cleaners" are included in this classification only if they operate their own cleaning plants or units. (The Standard Industrial Classification includes establishments engaged in dry cleaning and dyeing apparel and household fabrics other than rugs, which also do laundry work, in "Power laundries.")

Rug cleaning, repairing plants

Plants primarily engaged in rug cleaning, or in rug cleaning and repairing. Establishments doing repairing only are not included in this classification but are classified in "Other repair shops."

Funeral service

Establishments primarily engaged in preparing the dead for burial and conducting funerals. Funeral service, particularly in rural areas, is frequently reported in connection with retail furniture establishments, or with other retail activities. Every attempt was made to classify such reports accurately, and to include as service establishments only those places of business primarily engaged in conducting funeral services. All revenue from the sale of caskets, burial clothing, etc., is included in service receipts rather than in sales of merchandise.

Power laundries

Establishments primarily engaged in operating mechanical laundries with steam or other power. Laundries included in this classification may perform cleaning and dyeing operations in conjunction with their major laundry operations. (The Standard Industrial Classification includes in this kind-of-business, establishments engaged in dry cleaning and dyeing apparel and household fabrics other than rugs, which also do laundry work.) Collecting and distributing units (branch outlets) owned and operated by power laundries, and industrial laundries, are also included in this classification.

Linen supply service

Establishments primarily engaged in supplying to industrial or household users such laundered linens as uniforms, aprons, table covers, and towels. Establishments included in this classification may or may not operate their own power laundry facilities. This classification does not include industrial laundries; they are included in the classification "Power laundries."

Diaper service

Establishments primarily engaged in supplying diapers and other baby linens to homes. Such establishments may or may not operate their own power laundry facilities. In the 1939 census, diaper service establishments were not separately classified, but were included in the classification "Linen supply service."

Laundries (except power)

Establishments such as "French," "Chinese," and other laundries designating themselves as hand laundries, primarily engaged in furnishing laundry services. Many of these establishments use some power-driven equipment, but not of the industrial type.

Photographic studios (except commercial photography)

Establishments primarily engaged in portrait photography for the general public. Street photographers who have no established place of business are not included in this classification. Service establishments primarily engaged in film developing or print processing are classified as "Photo-finishing laboratories." In the 1939 census, portrait and commercial photography were combined in the one classification "Photographic studios"; in the 1948 census, they are classified separately.

Commercial photography

Establishments primarily engaged in photography for advertising agencies, publishers, and other industrial users. Service establishments primarily engaged in film developing or print processing are classified as "Photo-finishing laboratories." In the 1939 census, commercial and portrait photography were combined in the one classification "Photographic studios"; in the 1948 census, they are classified separately.

Pressing, alteration, garment repair shops (except fur)

Shops primarily engaged in pressing, repairing, and altering clothing (except furs) for individuals. Valet shops and establishments which may be known as "Tailor shops," primarily engaged in garment pressing and alteration, are included in this classification, but custom tailors are classified in Retail Trade. Establishments known as "cleaners" which do no dry cleaning but have their cleaning done for them by cleaning and dyeing plants and independently operated collecting and distributing agencies serving cleaning and dyeing plants or power laundries are also included.

Establishments primarily engaged in doing hemstitching, buttonholing, pleating, stitching, tucking, and reweaving for individuals are classified in "Other miscellaneous personal services, n.e.c."

Fur repair and storage shops

Shops primarily engaged in fur repairing and fur storage for individuals. Fur shops primarily engaged in the sale of merchandise from stock, or in making fur apparel to custom order, are classified in Retail Trade.

Shoe repair shops

Establishments primarily engaged in repairing footwear. Shoe repair departments conducted in connection with other service establishments (such as valet shops, laundries, and cleaning and dyeing plants), or with retail establishments (such as shoe stores and department stores) are not included in this classification, unless independently operated as leased departments or concessions.

Shoe shine parlors

Establishments primarily engaged in shining shoes. Shoe shine departments of shoe repair shops, valet shops, and other service or retail establishments are not included in this classification, unless independently operated as leased departments or concessions.

Hat cleaning shops

Establishments primarily engaged in cleaning and blocking hats. Hat cleaning departments of shoe shine parlors, valet shops, and other service or retail establishments are not included in this classification, unless independently operated as leased departments or concessions.

Self-service laundries

Establishments generally known as "laundromats" or "laundrettes" primarily engaged in renting laundry equipment on their own premises for the use of the public. Establishments which install and operate coin-operated laun-

dering machines in apartment houses are classified in "Other miscellaneous personal services, n.e.c." Establishments which rent machines, generally to apartment houses, are classified in "Coin-operated machine rental and repair services." In the 1939 census, self-service laundries were not classified separately, but were included in "Other personal services."

Costume and dress suit rental agencies

Establishments primarily engaged in the rental of costumes and accessories for costume balls, etc., and/or in the rental of tuxedos or formal attire for men and women. (These establishments are not classified separately in the Standard Industrial Classification, but are included in "Miscellaneous personal services, n.e.c.")

Turkish baths, massage parlors

Establishments primarily engaged in furnishing steam baths and massage services. Operations of this type, conducted in connection with other businesses (such as sanitariums and hotels), are not included in this classification, unless independently operated as leased departments or concessions.

Other miscellaneous personal services, n.e.c.

Establishments primarily engaged in providing personal services, not elsewhere classified (such as curtain cleaning and repair shops, locker rental, manicuring concessions, porter service, reducing salons, rug cleaning agencies, scalp treatment establishments, shopping service, social escort service, etc.) for which data are not presented separately because of their limited numbers. The rental of cold storage lockers is not included in the Census of Business.

Business Services

This major group includes establishments primarily engaged in rendering services, not elsewhere classified, to business enterprises on a fee or contract basis. The kinds of business classified within this group by the 1948 Census of Business are the same as those included in the Standard Industrial Classification of Miscellaneous Business Services, Major Group 73, with the exception of Accounting, Auditing, and Bookkeeping Services, Group 737, which are not included in the Census of Business.

Advertising agencies

Establishments primarily engaged in contracting for space in magazines, newspapers, periodicals; for radio time; or other advertising media; and placing advertising for clients on a commission or fee basis. Establishments which write advertising copy, or do commercial art work, but do not place advertising with media, are not included in the Census of Business. Receipts include commissions resulting from space and radio time transactions, and from fees for services rendered, but do not include reimbursements by clients for the cost of space or radio time.

Outdoor advertising services

Establishments primarily engaged in the preparation and presentation of poster displays and painted and electric spectacular displays (principally outdoors) on panels, bulletins, and frames. Such establishments may construct, repair, and maintain display boards and may post advertisements. Shops which make neon signs to order are not included in the Census of Business.

Miscellaneous advertising service

Establishments primarily engaged in furnishing advertising services not elsewhere classified, such as advertising research service, handbill distribution, mail advertising services, publisher and radio representation, the

distribution of samples, and transportation advertising. In the 1939 Census of Business, such establishments were included in "Other business services." Establishments which are primarily engaged in writing advertising copy or commercial art work are not included in the Census of Business.

Consumer credit reporting agencies, mercantile reporting agencies, and adjustment and collection agencies

Mercantile and consumer credit reporting bureaus and privately operated collection or adjustment agencies. Credit reporting bureaus, primarily engaged in publishing, are not in the scope of the Census of Business, but are included in the 1947 Census of Manufactures. Insurance adjustment agencies are not included in the Census of Business.

Duplicating, addressing, mailing, and mailing list services

Establishments primarily engaged in mimeographing, addressographing, and mailing services, or in compiling and selling mailing lists.

Public stenographic agencies, court reporting

Establishments primarily engaged in furnishing court reporting or public stenographic services. Public stenographers who maintain no separate places of business but are engaged as part-time employees of business offices are not included in the Census of Business.

Blueprinting, photostating services

Establishments primarily engaged in reproducing drawings, plans, maps, or other copy, by blueprinting or photostating.

Employment agencies, private

Establishments (nongovernmental) primarily engaged in providing employment service, except theatrical employment agencies (which are classified as amusement service in "Theaters and theatrical producers"), and motion-picture casting bureaus (which are not included in the Census of Business).

News syndicates

Establishments primarily engaged in furnishing news, pictures, features, etc., and supplying news reporting services to newspapers and periodicals. Both nonprofit syndicates operated on a membership basis and commercial (nonmembership) news syndicates are included in this classification. In the 1939 census, news syndicates were not classified separately, but were included in "Other business services."

Disinfecting and exterminating service

Establishments primarily engaged in disinfecting buildings and in exterminating insects, rodents, etc.

Window cleaning service

Establishments primarily engaged in cleaning windows in business houses and dwellings.

Miscellaneous services to dwellings and other buildings

Establishments primarily engaged in furnishing specialized services, not elsewhere classified, to dwellings and other buildings, such as janitorial service, floor waxing, and other cleaning. General repair contractors primarily engaged in building and maintenance work are not included in the Census of Business. The cleaning of building exteriors by sand or steam blasting is also outside the scope of the Census of Business. In the 1939 census, establishments furnishing building cleaning services (except window cleaning) were not classified separately, but were included in "Other business services."

Auctioneers' establishments (service only)

Establishments primarily engaged in selling merchandise or real estate for others at auction on a fee or commission basis. Establishments primarily engaged in selling their own or consignment merchandise at auction to household consumers are classified in Retail Trade. Auction companies selling farm products or merchandise in large lots (e.g., leaf tobacco, floor coverings, eggs and poultry, fruit, vegetables, etc.) are classified in Wholesale Trade. Commodity sales at which goods are sold at auction directly at the farm or house site, or in "Community barns," are not included in the Census of Business.

Coin-operated machine rental and repair services

Establishments primarily engaged in renting and repairing coin-operated machines. Establishments primarily engaged in retailing merchandise through coin-operated vending machines are classified in Retail Trade. Establishments engaged in the operation of other coin-operated machines (such as scales, pin ball machines, juke boxes, etc.) are classified as personal service or amusements, depending upon the type of operation involved.

Detective agencies

Establishments primarily engaged in providing the services of detectives for investigative purposes, either for individuals or businesses. Establishments primarily engaged in providing watching or night protective services are included in "Other business services, n.e.c."

Interior decorating service

Establishments primarily engaged in advising clients on the selection of furniture, draperies, rugs, and other interior decorations, on a fee or commission basis. Establishments providing an interior decorating service, but primarily engaged in the sale of merchandise, are included in Retail Trade. Painting and papering contractors who frequently term themselves "Interior decorators" are not included in the Census of Business.

Photo-finishing laboratories

Establishments primarily engaged in the developing of films and in photoprinting and enlarging.

Sign painting shops

Establishments primarily engaged in making signs to individual order or in office-door and window lettering. Establishments primarily engaged in making signs other than on a custom basis are not covered by the Census of Business.

Telephone answering service

Establishments primarily engaged in transmitting telephone messages between patients and physicians, clients and attorneys, etc.

Window display service

Establishments primarily engaged in decorating or "trimming" shop windows with display merchandise and advertising matter.

Other business services, n.e.c.

Establishments primarily engaged in furnishing business services, not elsewhere classified. Some of the more important are armored car service, bottle exchanges, burglar alarm service, business research, construction equipment leasing, designing service, display service, drafting service, hotel management service, information service, inspection service, machinery rental, management service, market research, packaging service, press clipping service, printing brokers, sales promotion service, water softener service, and writers' agents and representatives. Data are not

shown separately because of the limited number of establishments. Commercially operated research agencies and testing laboratories are included in this classification but non-profit research agencies are not included in the Census of Business.

Automobile Repair Services and Garages

This major group includes establishments primarily engaged in furnishing automobile repair, storage, and rental services to the general public. Similar facilities, owned and operated by concerns for their own use and not for the general public, are treated as auxiliary establishments of those concerns and are not included here. Automobile repair departments maintained by establishments engaged in the sale of automobiles are classified in Retail Trade. Gasoline service stations are also included in Retail Trade. The kinds of business classified within this group by the 1948 Census of Business are the same as those included in the Standard Industrial Classification of Automobile Repair Services and Garages, Major Group 75.

General automobile repair shops

Establishments primarily engaged in the general repair of automobiles. Establishments which have an active franchise for the retail sale of new passenger cars are included in Retail Trade, even though their principal source of receipts may be from automobile repairs.

Battery and ignition repair and service shops

Establishments primarily engaged in repairing, recharging, and renting storage batteries, and in repairing automobile ignition systems.

Glass replacement and repair shops

Establishments primarily engaged in the repair and replacement of automobile glass. In the 1939 census, these establishments were not classified separately, but were included in "Other automobile repairs."

Paint shops

Establishments primarily engaged in automobile painting and refinishing. Paint shops of establishments primarily engaged in top and body repair are included in the classification "Top and body repair shops."

Radiator repair shops

Establishments primarily engaged in the repair and cleaning of automobile radiators.

Tire repair shops

Establishments primarily engaged in repairing and retreading automobile tires for individuals. Establishments primarily engaged in retreading or rebuilding automobile tires for the trade or on a factory basis are not included in the Census of Business. In the 1939 census, tire retreading shops were not included in this classification but were classified separately in the group "Custom industries."

Top and body repair shops

Establishments primarily engaged in the repair of automobile tops and bodies. Paint shops maintained by such establishments are included in this classification.

Brake repair shops

Establishments primarily engaged in relining, repairing, and adjusting automobile brakes.

Wheel, axle, and spring repair shops

Establishments primarily engaged in the repair and alignment of automobile wheels, and the repair and installation of automobile springs and axles.

Other automobile repair shops, n.e.c.

Establishments primarily engaged in specialized automobile repairs, not elsewhere classified (such as automobile radio repair, carburetor repair, piston ring service and repair, and speedometer repair), for which data are not presented separately because of their limited number. In the 1939 census, miscellaneous automobile services, n.e.c., were also included in this classification.

Automobile rentals (without drivers)

Establishments primarily engaged in renting passenger automobiles or trucks without drivers. In the 1939 census, all automobile and truck rentals, with or without drivers, were included in this classification.

Storage garages

Establishments primarily engaged in operating structures for the live storage of automobiles. Long time or dead storage of automobiles is not within the scope of the Census of Business.

Parking lots

Establishments primarily engaged in the temporary open-air parking of automobiles, usually on an hourly or daily basis.

Automobile laundries

Establishments primarily engaged in washing automobiles.

Other automobile services, n.e.c.

Establishments primarily engaged in furnishing automobile services, not elsewhere classified (such as lubricating service, simonizing service, and towing service), for which data are not presented separately because of their limited number. In the 1939 census, such establishments were included in "Other automobile repairs."

Miscellaneous Repair Services

This major group includes establishments primarily engaged in miscellaneous repair services, such as blacksmith shops, electrical repair, watch, clock, and jewelry repair, and upholstery and furniture repair. Repair departments of retail dealers or manufacturers are not included in the repair classifications unless operated as separate departments. It does not include some repair services of which the more important are automobile repair services, garment and shoe repair. The kinds of business classified within this group by the 1948 Census of Business are the same as those included in the Standard Industrial Classification of Miscellaneous Repair Services, Major Group 76.

Blacksmith shops

Establishments primarily engaged in hand forging, horseshoeing, and other blacksmith operations involving the use of an anvil and forge. Many of these establishments also repair farm implements, automobiles, and machinery.

Radio repair shops

Establishments primarily engaged in radio and television repair.

Refrigerator service and repair shops

Establishments primarily engaged in servicing and repairing household and commercial electric refrigerators. Establishments repairing gas refrigerators are included in "Other repair shops, n.e.c."

Other electrical repair shops

Establishments primarily engaged in the repair of electrical equipment and electrical appliances (washing machines, vacuum cleaners, irons, etc.), other than radio

and television sets and electrical refrigerators. Electrical contractors, and electrical shops engaged primarily in house wiring, are not included in the Census of Business. Armature rewinding and the repair of electric motors are included in "Armature rewinding shops."

Upholstery and furniture repair shops

Establishments primarily engaged in furniture reupholstery and repair. Establishments primarily engaged in selling upholstery materials, making slip covers, draperies, etc., or in upholstering frames to individual order are classified in Retail Trade. Establishments making furniture and cabinet work on a custom basis to individual order are also classified in Retail Trade.

Watch, clock, and jewelry repair shops

Establishments primarily engaged in the repair of watches, clocks, or jewelry. Assembling of watches from purchased parts is not included in the Census of Business.

Armature rewinding shops

Establishments primarily engaged in rewinding armatures and repairing electric motors.

Bicycle repair shops

Establishments primarily engaged in the repair of bicycles.

Leather goods repair shops

Establishments primarily engaged in the repair of saddlery, harness, pocketbooks, luggage, or other leather goods. Repair departments of retail stores are included in Retail Trade.

Locksmith and gunsmith shops

Establishments primarily engaged in repairing locks or guns, and in making lock parts or gun parts to individual order. In the 1939 census, this classification also included establishments primarily engaged in duplicating keys; in the 1948 census, such establishments are classified in "Other repair shops, n.e.c."

Musical instrument repair shops

Establishments primarily engaged in the repair of musical instruments and in the tuning and adjustment of pianos and organs. In the 1939 Census of Business, piano and organ tuning and repair work was not included in this classification but was shown separately.

Lawn mower sharpening and repair shops

Establishments primarily engaged in sharpening and repairing lawn mowers. In the 1939 census, such establishments were included in "Other repair services."

Saw, knife, and tool sharpening and repair shops

Establishments primarily engaged in sharpening and repairing saws, knives, and tools.

Sewing machine repair shops

Establishments primarily engaged in the repair of sewing machines.

Stove repair shops

Establishments primarily engaged in repairing stoves, ranges, and heaters (gas, coal, wood, oil, and electric). Establishments primarily engaged in the repair of furnaces and steam and hot water heating plants are usually heating and plumbing contractors, and, as such, are not included in the Census of Business.

Taxidermists

Establishments primarily engaged in stuffing, preserving, and mounting the skins and heads of dead animals or fish for decorative or exhibition purposes.

Typewriter repair shops

Establishments primarily engaged in the repair of typewriters.

Welding shops

Establishments primarily engaged in welding repair work. Welding in connection with the manufacture of a product is not included in the Census of Business.

Other repair shops, not elsewhere classified

Establishments primarily engaged in specialized repair services, not elsewhere classified. The following are a few of the repair services classified in this industry: Air-conditioning equipment repair, aircraft repair, boiler repair, business machine repair, camera repair, dental equipment repair, Diesel engine repair, farm equipment repair, fountain pen repair, general repair, key duplicating, mattress renovating and repair, mirror resilvering, motorcycle repair, neon sign repair, scale repair, and umbrella repair shops. Data are not shown separately because of the limited number of these establishments. Tinsmith shops and machine shops engaged in repair exclusively are also included in this industry.

AMUSEMENTS

This major group includes establishments primarily engaged in providing amusement or entertainment on payment of a fee or admission charge. (Athletic events conducted by educational institutions are not included.) The kinds of business classified within this group by the 1948 Census of Business are the same as those included in the Standard Industrial Classification of Amusement and Recreation Services, Major Group 79, plus Motion Picture Theaters, Group 783, in Major Group 78.

Motion picture theaters, regular

Theaters primarily engaged in the exhibition of motion pictures with or without vaudeville presentations. Outdoor motion picture theaters and portable theaters are not included in this classification, but are classified separately.

Outdoor motion picture theaters

Theaters primarily engaged in the outdoor exhibition of motion pictures, commonly known as "Open-air" or "Drive-in." In the 1939 census, such establishments were not classified separately, but were included in the classification "Other amusements."

Portable motion picture theaters

Establishments primarily engaged in the itinerant exhibition of motion pictures with portable projection and sound equipment. In the 1939 census, such establishments were included in "Other amusements."

Bands, orchestras, and entertainers

Dance bands, orchestras, and entertainers for private dances, restaurants, night clubs, radio and television programs, etc., operating on a fee or contract basis. Symphony orchestras are included in "Theaters and theatrical producers (except motion pictures)."

Billiard and pool parlors

Establishments primarily engaged in the operation of billiard and pool parlors. In the 1939 census, establishments reporting as billiard and pool parlors but having

merchandise sales consisting largely of meals, tobacco, candy, and soft drinks, in excess of 50 percent of the total revenue of the establishment, were also classified as billiard and pool parlors; in the 1948 census, such establishments are classified in Retail Trade.

Bowling alleys

Establishments primarily engaged in the operation of bowling alleys.

Dance halls, studios, and schools

Public dance halls or ballrooms catering to the general public. Halls rented for private dances or for occasional dances sponsored by fraternal or other organizations are classified as real estate enterprises and are, therefore, excluded. This classification does not include dancing schools for children or professionals, and includes only those dancing schools which also provide, for a charge, facilities for dancing to persons not registered as students. (The Standard Industrial Classification does not make this distinction concerning dance studios and schools, but includes all dance studios and schools, except for children and professionals, in this classification.)

Race track operation--automobile

Establishments primarily engaged in the promotion of automobile and motorcycle racing.

Race track operation--dog

Establishments primarily engaged in the promotion of dog racing.

Race track operation--horse

Establishments primarily engaged in the promotion of horse racing. The operation of racing stables is not included in the Census of Business but is included in the Standard Industrial Classification.

Baseball clubs (including promoters)

Operators or promoters of professional and semiprofessional baseball clubs.

Football clubs (including promoters)

Operators and promoters of professional or semiprofessional football clubs. In the 1939 census, such establishments were not classified separately, but were included in the classification "Other amusements."

Stadiums, athletic fields, and promoters of boxing, wrestling, and other athletic events

Promoters of boxing, wrestling, hockey, basketball, and other athletic events, not classified elsewhere. Stadiums and athletic fields are included if the operators are actually engaged in the promotion of athletic events. The renting of stadiums and athletic fields to sports promoters and clubs is classified as a real estate operation and is not included in the Census of Business. In the 1939 census, sports promoters and sports and athletic fields were classified separately.

Bathing beaches

Establishments primarily engaged in the operation of bathing beaches. Municipally owned and operated bathing beaches are not included in the Census of Business, but are included in the Standard Industrial Classification.

Golf courses

Establishments primarily engaged in the operation of golf courses open to the public, on a fee basis. Municipally owned and operated courses and membership golf and country clubs are not included in the Census of Business,

but are included in the Standard Industrial Classification. Golf courses were not included in the 1939 Census of Business.

Riding academies

Establishments primarily engaged in operating academies and riding schools.

Skating rinks, roller

Establishments primarily engaged in operating roller-skating rinks open to the public.

Skating rinks, ice

Establishments primarily engaged in operating ice-skating rinks open to the public.

Swimming pools

Establishments primarily engaged in the operation of swimming pools. Municipally owned and operated swimming pools are not included in the Census of Business but are included in the Standard Industrial Classification.

Bicycle rentals

Establishments primarily engaged in renting bicycles to the general public.

Boat and canoe rentals

Establishments primarily engaged in renting small boats and canoes. Establishments which rent craft with operators, or furnish powerboat rides, are not included in the Census of Business.

Other commercial sports operators, n.e.c.

Establishments primarily engaged in the operation of sports, not elsewhere classified, such as gymnasiums and tennis courts. In the 1939 census, such establishments were not classified separately, but were included in the classification "Other amusements."

Theaters and theatrical producers, except motion pictures

Theaters primarily engaged in presenting legitimate productions; opera companies, concert organizations, road companies, and stock companies. This industry also includes services connected with theatrical production, such as theatrical and radio employment agencies, booking agencies, scenery and other theatrical equipment service, and ticket agencies. (Booking agencies and ticket agencies were included in business services in the 1939 Census of Business.) Theaters which are normally rented to theatrical producers, stock companies, etc., are classified as real estate operations and are not included in the Census of Business.

Amusement devices

Amusement devices such as carousels, ferris wheels, games of skill and chance. Amusement devices located in amusement parks or operated in connection with fairs, circuses, etc., are included as separate establishments in this industry only if they are operated on a concession basis. When such devices are under the management of the amusement park, they are included in a consolidated report covering the operation of the entire enterprise and classified under "Amusement parks."

Amusement parks

Establishments primarily engaged in the operation of amusement parks which may or may not make a charge for admission to the park. These establishments derive their

receipts from admissions and/or from the operation of a series of amusement devices and retail refreshment stands. Amusement devices located in amusement parks but operated independently on a concession basis are not included in this classification but are classified in "Amusement devices." Government-operated enterprises are not included in the Census of Business but are included in the Standard Industrial Classification.

Shooting galleries

Establishments primarily engaged in providing the necessary facilities for rifle and pistol target shooting.

Coin-operated amusement device services

Establishments primarily engaged in operating, servicing, and repairing coin-operated amusement devices either in their own or in other places of business. Such devices include juke boxes, pinball machines, mechanical games, slot machines (where legally authorized), and similar types of amusement equipment. Rental of such coin-operated devices is considered a business service and is shown separately under "Coin-operated machine rental and repair service." Operators of coin-operated merchandise vending machines are included in Retail Trade. In the 1939 census, coin-operated amusement device services were not classified separately, but were included in the classification "Other amusements."

Miscellaneous amusement and recreation services, n.e.c.

Amusement and recreation services, not elsewhere classified, such as exhibitions, carnivals, circuses, domino parlors, and pony tracks.

HOTELS

Commercial establishments with six or more guest rooms, known to the public as hotels, and primarily engaged in providing lodging, or lodging and meals, to the general public. Hotels operated by membership organizations which are open to the general public, and apartment hotels which provide accommodations for transients, are included in this classification. Rooming and boarding houses and private residences commonly known as "Tourist homes" are not included in the Census of Business.

The Standard Industrial Classification includes all hotels in its definition, regardless of the number of guest rooms. It also does not differentiate between all-residential and part-residential apartment hotels, but excludes all apartment hotels from this classification.

TOURIST COURTS

Establishments known as tourist courts, tourist camps, motor hotels, or motor courts, primarily engaged in providing transient lodging accommodations to tourists in furnished cabins or similar structures. Trailer camps, or parks which rent trailer space, are not included in the Census of Business. (The Standard Industrial Classification, however, includes trailer camps in this classification.) Tourist homes (private residences furnishing lodging to motorists), and commercially operated sporting and recreational camps (such as boys' and girls' camps, fishing and hunting camps, and dude ranches) are also excluded. Establishments primarily engaged in Retail Trade (such as filling stations, restaurants, and drinking places), although maintaining cabins or other accommodations for tourists, are included in Retail Trade if their sales of merchandise represent more than half of their total annual receipts.

Amusement parks.....	Amusement parks
Shooting galleries.....	Shooting galleries
Coin-operated amusement device services.....	Included in "Other amusements" and "Miscellaneous business services"
Miscellaneous amusement and recreation services, n.e.c..	Other amusements

¹ No totals were presented for these groups in tables prepared for the 1939 Census of Business.

APPENDIX D

EXPLANATION OF TERMS

Active proprietors (See Personnel.)

Admissions (See Motion picture theaters.)

Automobile repair receipts (See Receipts.)

City-size

Each service establishment included in the 1948 Census of Business was classified into one of nine city-size groups, depending on the number of inhabitants in the city in which the establishment was located. At the time city sizes were established for the 1948 Census of Business, final figures from the 1950 Census of Population were not available and therefore, preliminary population figures were used. Differences between these and final population figures affect slightly the data presented in this bulletin, since the composition of the city-size group is not always the same as it would be if final figures from the 1950 Population Census were used. Those unincorporated areas, classified in 1940 as urban under special rule by the Bureau of the Census, have been treated as incorporated places in the 1948 Census of Business. They are included in their appropriate city-size groups.

The nine city-size groups based on number of inhabitants are:

- Cities of 500,000 or more
- Cities of 250,000 to 499,999
- Cities of 100,000 to 249,999
- Cities of 50,000 to 99,999
- Cities of 25,000 to 49,999
- Cities of 10,000 to 24,999
- Cities of 5,000 to 9,999
- Cities of 2,500 to 4,999
- Remainder of United States

Cleaning and dyeing plants (See Laundries, cleaning and dyeing plants, and related services.)

Concession rentals (See Receipts.)

Corporations (See Legal form.)

Employees (See Personnel.)

Employees receiving supplemental compensation (See Hotels.)

Employee-size groups (See Personnel.)

Establishments (See Service establishments.)

Family workers (See Personnel.)

Guest rooms (See Hotels.)

Hotels

Year-round hotels.--Hotels which normally are in operation at least nine months of the year.

Seasonal hotels.--Hotels which normally are in operation less than nine months of the year.

Employees receiving supplemental compensation.--Consists of the number of employees who received, in addition to their regular compensation, quarters and meals without charge, or tips.

Guest rooms.--Consists of the total number of separate hotel rooms (transient and residential) as of December 31, 1948. Suites of rooms were not counted as units, but as individual rooms (e.g., a three-room suite was counted as three rooms).

Rooms for transient guests.--Consists of the number of rooms usually occupied by or available for transient guests,

i.e., for persons seeking lodging for short periods of time usually less than a month, and generally subject to the regular daily or weekly rates.

Rooms for residential guests.--Consists of the number of rooms usually occupied by or available for residential guests, i.e., for persons seeking lodging for a period of time, usually more than a month, and generally receiving reductions from the regular daily or weekly rates.

Percentage of occupancy.--This item was computed by multiplying the number of guest rooms by 366 and dividing the number of occupied room days during 1948 by the result. In the case of seasonal hotels, the number of days in the annual period of operation (i.e., 60 days, 90 days, etc.) was used instead of 366.

Individual proprietorship (See Legal form.)

Laundries, cleaning and dyeing plants, and related services

Retail receipts.--Consists of amounts received for work done directly for the household consumer; also for work done for institutions and industrial or commercial users, who are in effect ultimate consumers.

To home.--Consists of receipts for work done for retail customers which was delivered directly to customer's home.

Through plant office or branch store.--Consists of receipts for work which was brought to the plant or branch store, and called for by the retail customer. Both cash and charge transactions are included in this category.

Wholesale receipts.--Consists of amounts received for contract work done for other laundries, linen supply or diaper service establishments without power facilities, or for independent laundry and/or cleaning agencies. It does not include amounts received for work done for institutions, and industrial or commercial users who are in effect ultimate consumers.

Petroleum solvent.--An organic solvent manufactured from crude petroleum by means of distillation and chemical purification.

Synthetic solvents.--Noninflammable organic solvents consisting substantially of the chlorinated hydrocarbons.

Laundries with power facilities.--This classification includes power laundries with and without cleaning and dyeing facilities, all industrial laundries, linen supply establishments with power laundry facilities, and diaper service establishments with power laundry facilities.

Bundle work (sometimes known as starch work, bachelor bundle, or list-price bundle).--Consists of work that is completely finished, starched where necessary, minor mending done, hand finished, and touched up where required. Charge is made by the piece.

Flat work (other than commercial) charged by the piece or pound.--Consists only of pieces used for bed, table, or both purposes, such as sheets, pillow cases, towels, tablecloths, and napkins. Excludes all pieces whether flat or not that are worn on or carried by the person.

Family service:

Finished family.--Consists of work washed and completely finished by being machine or hand ironed ready for use.

Semifinished family service.--Consists of all family services except finished family and damp wash. Also includes damp-wash, flat work ironed.

Damp wash (not including damp-wash flat work ironed).--Consists of work in which everything is washed, extracted, and returned damp.

Commercial starch and flat work.--Consists of work done for hotels, hospitals, restaurants, rooming houses, etc.

Linen supply service.--Consists of owning, renting, supplying, and/or laundering all kinds of cotton garments and supplies, such as towels, coats, aprons, etc. for retail stores, service trades, professionals, etc.

Diaper service.--Consists of owning, renting, supplying, and/or laundering babies' diapers.

Industrial laundry work.--Consists of owning, renting, supplying, and/or laundering uniforms, overalls, wiping rags, etc. for factories in all branches of manufacturing.

Legal form of organization

Each establishment included in the 1948 Census of Business was classified into one of the following legal forms of organization:

Individual proprietorships.--Establishments owned by one person who may or may not actively participate in the operation of the business.

Partnerships.--Establishments owned by two or more persons, each of whom has a financial interest in and responsibility for the business. Any partner may or may not actively participate in the operation of the business.

Corporations.--Establishments owned by an organization or company legally incorporated under State laws. Cooperative associations incorporated under either regular corporation laws or under the special cooperative association laws are included in this legal form.

Other forms of organization.--Establishments having ownership under legal forms not defined above. Included in this legal form are estates, receiverships, some non-profit organizations, some joint ventures and syndicates, and cooperative associations not incorporated under the regular corporations laws or under special cooperative association laws.

Motion picture theaters

Number of admissions.--Includes total number of admissions during 1948 for which a tax was paid to the Federal Government.

Seating capacity.--Consists of the number of theater seats as of December 31, 1948.

Paid employees (See Personnel.)

Pay roll

Consists of all compensation (salaries, wages, commissions, and bonuses) paid during the specified period to all employees. For corporations, it includes amounts paid to officers and executives; it does not include compensation for proprietors or firm members of unincorporated businesses. Pay roll is reported before deduction for social security, income tax withholding, insurance dues, etc.

Pay roll--entire year.--All amounts paid during the Census year to employees are included in this item.

Pay roll--specified workweek.--Includes all amounts paid to employees on pay rolls for the workweeks ending nearest March 15, July 15, and November 15. Provision was made for reporting pay roll adjusted to the workweek, where the pay period was on other than a workweek basis, and for reporting, on a workweek basis, commission and bonus payments. However, for some establishments annual pay roll included amounts not allocated to weekly pay rolls. Full workweek pay rolls consist of pay received for the specified pay periods by employees defined below as "Full workweek employees."

Period established or acquired

The year that the establishment was acquired or established in its city or locality under the current ownership.

Personnel

Active proprietors of unincorporated businesses.--Consists of owners or partners of unincorporated businesses, who devoted the major portion of their time to operation of the business during November 1948.

Unpaid family workers of unincorporated business.--Consists of the number of family members (wives, sons, daughters, etc.) who worked in the business during November 1948. It

also includes unpaid family workers connected with seasonal hotels which normally did not operate during November.

Paid employees.--Consists of all employees, including salaried officers and executives of corporations, who were on the pay roll for the specified workweek.

Full workweek employees.--Consists of employees, whether regular or seasonal, who, for the specified pay period, were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

Employee size.--Each establishment was assigned to one of several size classes on the basis of the total number of paid employees at work during the workweek ended nearest November 15, 1948. The statistical material is limited to number of establishments, receipts, pay roll, number of employees for workweek ended nearest November 15, and in the case of hotels, number of hotel guest rooms.

Employee-size groups used are the following:

- No paid employees
- 1 paid employee
- 2 paid employees
- 3 paid employees
- 4 or 5 paid employees
- 6 or 7 paid employees
- 8 or 9 paid employees
- 10 to 19 paid employees
- 20 to 49 paid employees
- 50 to 99 paid employees
- 100 paid employees or more

Petroleum solvent (See Laundries, cleaning and dyeing plants, and related services.)

Proprietors (See Personnel.)

Proprietorships (See Legal form.)

Receipts

Consists of receipts during 1948 for services to customers, and receipts from the sale of merchandise, receipts from sale of meals and from fountain service, and receipts from related activities. Receipts of hotels, tourist courts, and amusements include space and concession rentals. Excluded are all other amounts not received from customers, such as income from investments, rental of real estate, etc. Also excluded are local and State sales taxes or Federal excise taxes collected by the establishment directly from customers, and paid directly to the local, State, or Federal taxing agency. Gasoline, liquor, tobacco, and those other excise taxes which are paid by the manufacturer or wholesaler and passed along to the reporting establishment are included.

Service establishments such as credit and collection agencies, interior decorators, auctioneers, and printing brokers transfer monies or merchandise incidental to the service they provide. Only charges for service are included in service receipts. Receipts of advertising agencies exclude media costs.

Receipts from space and concession rentals.--Consists of the amounts received by the hotel or amusement as rent (either fixed sum or percentage of receipts) from the operators of leased departments or concessions located in the establishment. The total receipts of leased departments, or concessions themselves, are not included in the hotel or amusement report. Operators of such leased departments or concessions were required to file separate reports which are included in the Census of Business data presented for the particular kind of business in which the concession or leased department was engaged.

Receipts from repairs.--Automobile repair services and garages. Cost of parts installed was included in receipts from repairs.

Receipts size.--Each establishment was assigned to one of several size classes on the basis of the total receipts of the establishment during 1948. The receipts size

classes are not uniform for all tables, varying to provide the most significant groupings and to permit comparisons with data from the previous census. Establishments which were acquired or started business during 1948 and whose receipts, therefore, do not represent a full year's operation, are not assigned a receipts-size class, but data for these establishments are shown separately. In the 1939 Census of Business, such establishments were assigned to a receipts-size class regardless of whether or not they were operated for a full year.

Receipts from laundry work (See Laundries, cleaning and dyeing plants, and related services.)

Rental units (See Tourist Courts.)

Rooms (See Hotels.)

Seasonal hotels (See Hotels.)

Seating capacity (See Motion picture theaters.)

Service establishments

Service establishments, hotels, tourist courts, and places of amusement are defined as places of business for which services provide the primary source of receipts. Each unit of a multiunit organization is considered a separate establishment. Service concessions, operated independently in connection with other businesses, are classified as separate establishments.

All establishments, as defined above, were enumerated, regardless of size, but those reporting a full year's operations with receipts amounting to less than \$500 were omitted. In the 1939 Census of Business, the corresponding figure was \$100.

The number of establishments in any kind-of-business classification does not necessarily equal the total number

engaged in the activity specified, since each establishment is classified on the basis of its major activity.

Solvents (See Laundries, cleaning and dyeing plants, and related services.)

Space and concession rentals (See Receipts.)

Supplemental compensation (See Hotels.)

Synthetic solvent (See Laundries, cleaning and dyeing plants, and related services.)

Taxes (Amusements)

Consists of Federal, State, and local amusement, sales, and excise taxes collected directly from the customer and paid directly to the taxing agency.

Tourist courts--rental units

Consists of the number of rooms, apartments, single cabins, or other tourist court rental units. The "number of rental units" is not to be confused with the number of cabins, which would be considerably less.

Trucks

Manufacturers' rated capacity--This is the rating assigned by the truck manufacturer. It should be noted that there is no exact relationship between such rated capacity and the actual load-carrying capacity. For example, trucks rated 1-1/2 tons can and do frequently carry loads of several tons.

Year established (See Period established or acquired.)

Year-round hotels (See Hotels.)
